Regarding reflexives, performance of our SLI group on simple contexts (in conditions with both referential and quantificational antecedents) was significantly worse compared to their performance on simple contexts with clitics. Moreover, performance of the SLI children on these conditions was significantly worse compared to performance of the TD children, particularly to the performance of the CA group, on the same conditions. Our SLI group's poor performance on reflexives provides evidence for atypical acquisition of anaphoric reference and is not fully compatible with findings reported in previous studies. It is not in line with findings reported in Stavrakaki and van der Lely (2010), where SLI children performed at ceiling on the reflexive condition (simple transitive clauses with a referential antecedent), and it is partly compatible with findings reported in van der Lely and Stollwerck (1997), where poor performance was observed on the reflexive condition with a quantificational antecedent but not on the reflexive condition with a referential antecedent. We conjecture that our findings indicate that sometimes SLI children have difficulties in accepting the correct antecedent within the relevant binding domain. Given that SLI children are known to exhibit processing limitations (Bishop, 1992; among others), these difficulties may be due to a general processing problem on the establishment of certain syntactic relations, particularly on the establishment of the bound reading. This line of explanation raises the question why a processing problem was not evident in the establishment of the bound reading in complex structures. We assume that the high performance of the SLI children in these constructions does not reflect a genuine bound reading interpretation, but is possibly a coreferential kind of reading, similar to that observed in complex structures with clitics. Although the source of the

coreferential reading in the case of complex structures is not obvious to us, it may be due to the different binding domains assumed by the children in these contexts compared to simple contexts.

To conclude, our study on the acquisition of pronominal and anaphoric reference in SLI showed that some of the asymmetries observed in the performance of TD children are also evident in the performance of SLI children, namely better performance on pronominal clitics in simple compared to complex contexts and better performance on anaphoric reflexives than pronominal clitics in complex contexts. However, differences were observed between the SLI and the two control groups of TD children in the interpretation of anaphoric reflexives in simple transitive clauses, indicating an atypical course of acquisition. It was argued that the findings of this study are not compatible with the view that SLI children have a deficit related to the grammatical nature of object clitics or to the feature checking operation through which the interpretation between object clitics and their referents is established, but support the view that SLI children do not have difficulties with all kinds of syntactic dependencies. The atypical performance of SLI children on anaphoric reflexives was attributed to a general processing problem on the establishment of the bound reading.

MEASURING THE GREEK INFINITIVE THROUGH TIME

Marina Vassiliou

University of Athens

marina.vassiliou@gmail.com

ABSTRACT

The current work consists in a series of statistical analyses of Greek infinitival structures, aiming at illustrating the syntactic behaviour of the Greek infinitive through time. Spanning the period 5 BC – AD 16, the specific structures are drawn from texts of various authors and divergent topics, being representative of the four synchronies of the Greek language. The text corpus employed exceeds 5 million words in size, within which the infinitival occurrences approximate 102,000. To the best of our knowledge, measurements of such scale are presented for the first time, allowing a diachronic study of the infinitive use supported by statistical tests.

Keywords: Greek infinitive, Accusative case, statistical analysis, discriminant models

1. Introduction

The current paper, being part of an ongoing work, the object of which is the syntactic behaviour of the Greek infinitival structures through time, presents a set of statistical analyses of the evolution of the Greek infinitive. These analyses were based on measurements of infinitival occurrences over an extensive corpus of texts dated from 5 BC to AD 16. The specific Corpus of Infinitival Structures (named hereafter **CIS**) has more than 5 million words and contains approximately 102,000 infinitival occurrences, which were manually annotated and classified by the author on the basis of their syntactic function.

The paper has the following structure: Section 2 provides detailed information on how CIS was compiled and what its contents are. Section 3 describes the categories into which the infinitival occurrences were classified, while Sections 4 and 5 present a set of initial observations on the data, which allow a profiling of the synchronies in terms of the use of the infinitive. The subsequent section 6 reports on the statistical analyses performed, while Section 7 concludes the paper.

2. Data description and collection

The Corpus of Infinitival Structures comprises infinitival structures drawn from texts of various authors and divergent topics, such as history, chronography, rhetoric, philosophy, tragedy, comedy, poetry, novel, epic, mythology, ecclesiastical texts, hagiography etc.¹ These texts span a pretty extensive period, ranging from 5 BC to AD 16, and are representative of the four synchronies (or periods²) of the Greek language, namely (i) **Classical Greek [CL]** (5 – 4 BC), (ii) **Hellenistic Koine [KO]** (3 BC – AD 4), (iii) the **Early Byzantine period [EB]** (AD 5 – 10) and (iv) the **Late Byzantine period [LB]** (AD 11 – 16). It should be noted that special care was taken for the texts of the last three periods to be of the vernacular variety.

¹ The corpus of infinitival structures does not include text material from inscriptions and papyri, as these may well be considered as a discrete register reflecting the status of spoken Greek at the Koine period, which will be studied in conjunction to the current contents of the corpus at a later stage of this research.

² It should be noted that the terms "period" and "synchrony" are used here interchangeably.

The primary resource employed for compiling the corpus was the Thesaurus Linguae Graecae (TLG)³. In particular, all the texts of the first three periods originate from TLG, while only a few texts (didactic and medical texts, poems and novels) of the Late Byzantine period, not being available via TLG, were drawn from printed resources (for instance Legrand (1881 & 1896); Wagner (1874)).

The compilation of the corpus and the corresponding dataset involved a three-step process. First, the texts were exhaustively searched for infinitival forms of all tenses (Present, Future, Aorist and Present Perfect) and voices (Active and Non-Active). The search, which was based on the corresponding infinitival endings, was performed automatically in the case of texts available in electronic form (including naturally the ones originating from TLG). On the other hand, those texts available only in printed form were manually searched for detecting the given infinitives.

Subsequently, all retrieved infinitival occurrences were examined manually within their context so that they could be assigned to a category reflecting their syntactic function (see Section 3 for more details on the properties of these categories).

The final step of the processing involved measuring the infinitival occurrences on the basis of various criteria such as author, work, topic, syntactic category and synchrony. This dataset of measurements served then as the input of the statistical analyses.

Table 1 summarises the features of the CIS, which is divided into 4 sub-corpora, each corresponding to a period. All sub-corpora have roughly the same size, ranging from 1 to 1.5 million words, while the infinitival occurrences number approximately 102,000. The last column contains information on the topics covered by the texts of each sub-corpus.

Synchrony	Number of texts	Number of words	Infinitival occurrences	Topic
Classical Greek (CL)	431	1,004,194	37,828	Comedy, history, rhetoric, philosophy, tragedy
Hellenistic Koine (KO)	261	1,548,520	26,026	New Testament, Septuagint, apocalyptic texts, ecclesiastical texts, hagiography, theology, history, philosophy, mechanics
Early Byzantine (EB)	126	1,493,411	28,541	Chronography, philosophy, ecclesiastical texts, hagiography, history, poetry, theology
Late Byzantine (LB)	98	1,405,123	9,568	Poetry, chronography, novel, epic, hagiography, comedy, mythology, tragedy, medical texts, satirical texts
Totals	916	5,451,248	101,963	

Table 1 Profile of the Corpus of Infinitival Structures

3. Classification of infinitival structures

As mentioned before, the infinitival occurrences, which were retrieved, were classified into categories, reflecting their syntactic function. These categories were defined on the basis of two criteria, namely the type of syntactic structure and the case of the infinitival subject (Accusative vs. non-Accusative). The combination of these two criteria yielded fifteen (15) categories, being illustrated in Table 2.

Category name	Infinitival structure	Example
sc	Subject control	ἐγὼ τὴν μνείαν τοῦ θανάτου ἀναγγεῖλαι οὐ δύναμαι
oc	Object control	Οἱ Ἀθηναῖοι προεῖπον τοῖς στρατηγοῖς μὴ ναυμαχεῖν
aci	Verb complement & Accusative subject (Accusativus-cum-Infinitivo)	Ὁ δὲ βασιλεὺς [...] ἡβουλήθη ἑτέραν ἀγαγέσθαι νύμφην τῷ Ἰωάννῃ
4a	Personal/Impersonal structure	ἡ δὲ ἡμετέρα ἀρχὴ χαλεπὴ δοκεῖ εἶναι
4b	Personal/Impersonal structure & Accusative subject	Αἰσχροὺν ἐστὶ τὸν ἰσχυρὸν Δαρεῖον βασιλέα [...] δουλωθῆναι δυστυχῶς ἀντάρτη Μακεδόνι

³ <http://www.tlg.uci.edu/>

Category name	Infinitival structure	Example
5a	Main verb of a subordinate (normally temporal or final) clause	ὁ Σίμων καὶ τὴν ἱερὰν σύγκλητον καὶ τὸν δῆμον Ῥωμαίων εἰς τοσοῦτο κατεπλήξατο, ὥς θεὸς νομισθῆναι
5b	Main verb of a subordinate clause & Accusative subject	καὶ συνέρχεται πάλιν ὄχλος, ὥστε μὴ δύνασθαι αὐτοὺς μηδὲ ἄρτον φαγεῖν
6a	Simple infinitive (a) with a mood (imperative or optative) function (b) in fixed expressions	* ὄψον δὲ μὴ πέμπετε μηδὲ πιεῖν * ἀπλῶς δ' εἰπεῖν , ἐναντία τοῖς νόμοις [...] διατετέλεκε
6b	Simple infinitive & Accusative subject	δῶρῃ ἡμῖν εὐφροσύνην καρδίας καὶ γενέσθαι εἰρήνην
7a	Adverbial infinitive 1 (denoting reference or explanation) or Complement of nominals	* τοῦτο παρακελεύονται τοῖς δικασταῖς, μὴ ἐθέλειν ἀκούειν τῶν ἀπολογουμένων * ἔτοιμος ἔσομαι [...] πληρῶσαι σοῦ τὴν αἴτησιν
7a1	Adverbial infinitive 2 (final or resultative infinitive)	ἀπεστάλη πρὸς τινὰ γέροντα ιάσασθαι αὐτόν
7b	Adverbial infinitive 1 & Accusative subject	Ἔτυχε δὲ καὶ τοῦτο [...] ἐμπεσεῖν Λατίνον τινα
7b1	Adverbial infinitive 2 & Accusative subject	ἐξελέξατο ἡμᾶς [...], εἶναι ἡμᾶς ἁγίους καὶ ἀμώμους
8a	Articulate infinitive	μηδὲν μεριμνῶντες τοῦ διαθρέψαι αὐτά
8b	Articulate infinitive & Accusative subject	οὐκ εἶπε γὰρ ὁ Κύριος τοῦ γενέσθαι σε πετεινόν

Table 2 Categories of the infinitival structures studied

4. Profiling synchronies based on the distribution of the infinitival structures

An initial rough processing of the CIS lends support to the usual assumption regarding the distribution of the infinitive across the four synchronies. More specifically, the infinitival structures of all categories (as shown in Figure 1) exhibit a high frequency of occurrence in the Classical period, which progressively declines in the subsequent periods (with the exception of the Early Byzantine period, where a minor increase is observed over the previous period).

Figure 1 Frequency of occurrence of infinitival structures across the four synchronies (values normalised per number of words)

A more detailed picture is provided in Table 3, which illustrates the distribution of the infinitival categories in each individual period. The cases where the frequency of occurrence exceeds 5% are marked in bold.

Infinitival category	CL	KO	EB	LB
sc	27,23%	27,86%	31,14%	53,63%
oc	10,00%	8,25%	10,22%	5,08%
aci	13,67%	7,62%	14,89%	7,35%
4a	19,23%	10,18%	8,32%	5,07%
4b	10,06%	7,53%	6,37%	2,24%
5a	2,46%	1,81%	2,22%	1,71%
5b	1,57%	2,43%	4,26%	1,20%
6a	0,63%	0,95%	0,63%	0,87%
6b	0,53%	0,11%	0,09%	0,00%
7a	4,26%	3,09%	2,14%	1,87%
7a1	1,62%	7,98%	3,76%	2,93%
7b	1,49%	0,67%	0,88%	0,48%
7b1	0,21%	0,56%	0,23%	0,39%
8a	5,24%	14,00%	8,88%	13,90%
8b	1,78%	6,95%	5,96%	3,29%
Totals	100%	100%	100%	100%

Table 3 Distribution (in percentages) of categories of infinitival structures across synchronies

The data of Table 3 allow forming the profile of the four synchronies of Greek based on the distribution of the categories of the infinitival structures. More specifically, in **Classical Greek**, five types of structures are the prominent categories, namely subject (sc) and object (oc) control, aci and personal/impersonal (4a & 4b) structures, constituting more than 80% of all the infinitival occurrences. The articulate infinitive (8a) is also a frequent structure, with a frequency exceeding 5%.

The same five categories (sc, oc, aci and 4a & 4b) are still salient during **Koine**, approximating 62% of all the infinitival structures, even though, with the exception of subject control structures, a considerable decrease is observed in the frequency of each category. In parallel, circa 8% of the structures are final or resultative infinitives (7a1), while the use of the articulate infinitive (8a & 8b) is intensified over Classical Greek with a frequency exceeding 20%.

The total occurrences of subject and object control, aci and personal/impersonal structures increase over the residual categories during the **Early Byzantine** period, exhibiting a cumulative frequency of approximately 71%. It should be noted though that the frequency of the personal/impersonal structures decreases in comparison to the previous period, while the frequency of occurrence of oc and aci increases. Besides, the articulate infinitive (8a & 8b) remains a widely used structure (~ 15%), despite its decreased frequency during this period.

Finally, within the **Late Byzantine** period, subject control, aci and the articulate infinitive seem to be the enduring structures, representing approximately 75% of the total occurrences of infinitives.

5. Distributional behaviour of the infinitival structures across synchronies

With respect to the distribution of each individual infinitival category through time, it could be observed that most categories exhibit the same trend of gradual reduction in the number of occurrences, reflecting the gradual loss of the infinitive (cf. Jannaris, 1897:570-575; Joseph, 1983:38 & 50; Horrocks, 2010:93-94), despite any minor distribution divergences (see Figure 2).

In particular, the **subject control** structures seem to form the most enduring category for all periods, always representing more than 25% of the infinitival occurrences. It is noteworthy that in the Late Byzantine period the specific structures are the predominant category (their frequency rising to circa 54%).

Object control infinitives, **aci** and **personal/impersonal** (4a & 4b) structures have initially (Classical Greek) a high frequency (more than 10%), which is gradually reduced in Koine, reaching on average no more than 7% in the two last periods.

The use of the infinitive as the main verb of a subordinate clause (category 5) or in replacement of a mood (category 6) or with an adverbial function (category 7) is generally fairly limited, although a minor increase is observed within the middle of the synchrony continuum, namely in Koine and in the Early Byzantine period. In all periods their frequency of occurrence reaches on average no more than 5%, this fact obviously justifying the early loss of such structures.

Figure 2 Frequency of occurrence of the 15 infinitival categories across the four synchronies (values normalised per number of words)

Finally, a non-typical behaviour is observed with respect to the articulate infinitive (category 8), for which the majority of occurrences are observed in the middle of the synchrony continuum, instead of at the initial period (Classical Greek), as would be expected in accordance to the general trend. The high usage rate within Koine (> 10%) could be attributed to the fact that the articulate infinitive was frequently used instead of a subordinate clause (cf. Jannaris, 1897:577; Joseph, 1983:51; Horrocks, 2010:95). In a similar vein, this replacement pattern, which continues in the Late Byzantine period with this type of infinitive substituting not only subordinate clauses but also nouns and subjunctive verb forms, could explain the relatively high frequency of occurrence (~ 9%).

6. Analysing the data further

The aforementioned measurements served as a basis for obtaining a first picture of the distribution of the infinitival structures across the four synchronies. Additional experiments conducted were aimed at (i) examining the correlation between the distribution of infinitive and time (i.e. the four periods) and (ii) investigating whether the four periods constitute well-defined classes, which would be distinguishable in terms of the use of the infinitive.

The correlation between infinitive and time was studied via two types of statistical analyses, namely Levene's test (Levene 1960) and Analysis of variance – ANOVA (Fisher, 1925). In order to investigate the possibility of discriminating the four synchronies on the basis of the use of the infinitive, Discriminant Analysis (Klecka, 1980) was performed. For all statistical processing the SPSS (version 18) statistical package⁴ was employed.

Before proceeding with the statistical analyses, it should be noted that in the following subsections the term "**infinitival variables**" refers to the measurements of the infinitival categories over the CIS and the term "**period variable**" denotes the synchrony.

⁴ The SPSS statistical package was made available by the Computer Center of the University of Athens [URL: http://share.uoa.gr/public/Software/SPSS/SPSS18_for_Windows.iso].

6.1 Levene's test

Levene's test is a method for assessing the null hypothesis of the homogeneity of variance; in the current case the null hypothesis being that the variance of the infinitival variables remains stable across all levels of the period variable. If the output of Levene's test exceeds a certain significance value p (this being set normally to 0.05), then the null hypothesis is true. If, however, the resulting figures are below this threshold, then the null hypothesis is rejected and it can be concluded that the variance is significantly different across synchronies. Table 4 presents the p values obtained for each infinitival variable in the dataset. The p values exceeding the threshold of 0.05 are marked in bold.

Infinitival variable	Sig.
sc	0,001
oc	0,000
aci	0,000
4a	0,000
4b	0,000
5a	0,926
5b	0,000
6a	0,066
6b	0,000
7a	0,067
7a1	0,000
7b	0,000
7b1	0,010
8a	0,201
8b	0,000

Table 4 Levene's test significance (p) values obtained for each infinitival variable over the 4 periods

For almost all infinitival structures the variance is significantly different across the four periods, since the p value does not exceed the threshold of **0.05**. The only exceptions, where p is less than 0.05, are categories 5a (infinitive as the main verb of a subordinate clause), 6a (simple infinitive), 7a (adverbial infinitive 1) and 8a (articulate infinitive).

6.2 Analysis of Variance (ANOVA)

The analysis of variance was employed in order to investigate the effect of the period variable on the distribution of the infinitival structures. In this case, a significance threshold of **0.05** is also used, which, when being exceeded, indicates that the synchrony does not influence the values of the infinitival structures. The p values exceeding the threshold of 0.05 are marked in bold.

Infinitival variable	F	Sig.
sc	29,116	0,000
oc	26,610	0,000
aci	25,002	0,000
4a	63,091	0,000
4b	28,487	0,000
5a	3,438	0,018
5b	8,921	0,000
6a	1,570	0,198
6b	14,526	0,000
7a	48,943	0,000
7a1	14,054	0,000
7b	30,570	0,000
7b1	2,495	0,061
8a	7,370	0,000
8b	13,545	0,000

Table 5 ANOVA significance (p) values obtained for each infinitival variable over the 4 periods

The results confirm our intuition, since in all cases (except for two) $p < 0.05$, which signifies that the period factor substantially influences the distribution of the infinitival structures. The variables failing the test are 6a (simple infinitive) and 7b1 (adverbial infinitive 2 with an Accusative subject).

6.3 Discriminant Analysis

The third type of analysis that was performed was discriminant analysis and it was intended to investigate whether the texts of the corpus could be discriminated in terms of synchrony on the basis of the infinitival structures. In other words, the aim was to see whether (or which of) the infinitival variables could characterise the texts from which they were retrieved and separate them into classes, representative of the four periods.

6.3.1 Experimental phase 1

The experimental set-up involved two models, namely a **full** discriminant model and a **stepwise** one. In the full discriminant all variables enter the model from the start, while in the **stepwise** discriminant the variables are gradually introduced in the model. The value of the F parameter for entering/removing variables was set to **5.00/4.99** for the present experiment.

Moreover, in both models the ten-fold cross-validation methodology was followed in order to verify the validity of the results obtained. According to this method, the dataset was divided into ten equally-sized subsets, so that each subset contained the same amount of texts from each period. This allowed for ten runs of each discriminant analysis to be performed. In each run the nine subsets served as a labelled training set, while the residual subset was provided as an unlabelled test set⁵, used for evaluating the accuracy of discrimination.

The rationale behind the division of the dataset into subsets was to check whether the information residing in 90% of the dataset, the classification of which is known, was sufficient for generating a model that could correctly classify the residual 10% of the dataset, the origin of which is not known. So, by repeating this process for each of the ten subsets it is possible to determine with an adequate degree of accuracy the average performance of the discriminant model.

The classification accuracy obtained is presented in Table 6, while Table 7 illustrates the variables that were used as discriminators in the stepwise model. The accuracy is not particularly high, ranging from 64% to ~ 69% for both models; it is though more than 2.5 times higher than the random rate of 25%, indicating the successful discrimination of groups. Besides, it is remarkable that the stepwise model employs only a limited set of variables, namely six (6), for assigning each text to a period.

	Full discriminant	Stepwise discriminant [$F = 5,00/4,99$]
Classification accuracy	63,55%	68,47%
Number of discriminant variables	15	6

Table 6 Accuracy obtained with the full and stepwise discriminant models (experimental phase 1)

Infinitival variable category	Number of variables	Number of variables retained in the model [Stepwise discriminant]	
sc	1		0
oc	1		0
aci	1	aci	1
4 (personal/impersonal)	2	4a	1
5 (infinitive as main verb)	2		0
6 (simple infinitive)	2	6b	1
7 (adverbial infinitive)	4	7a & 7a1	2
8 (articulate infinitive)	2	8b	1
Total	15	6	

Table 7 Types of variables retained in the stepwise discriminant model (experimental phase 1)

⁵ The terms “labelled” and “unlabelled” refer to known and unknown period membership respectively.

Table 8 presents the confusion matrix yielded for one ten-fold experiment of the stepwise discriminant, which indicates the amount of texts correctly identified as originating from a specific period. It can be observed that both ends of the synchronic continuum, that is Classical Greek (CL) and Late Byzantine (LB), constitute well-defined, discrete periods, since they exhibit a high classification accuracy (~ 92% of the CL texts were correctly characterised as originating from that synchrony and ~ 89% of the LB texts were also correctly characterised as originating from the corresponding period).

On the contrary, discriminating between the two periods in the middle of the synchronic continuum is not so straightforward. It is observed that 25% of the Koine texts are classified into the Early Byzantine period. In a similar vein, more than 30% of the Early Byzantine texts were predicted by the model as belonging to Koine.

		Predicted period membership according to the model			
		CL	KO	EB	LB
Actual period membership	CL	91.7%	8.3%	0.0%	0.0%
	KO	4.4%	46.7%	31.1%	17.8%
	EB	5.0%	25.0%	62.5%	7.5%
	LB	0.0%	5.0%	6.3%	88.8%

Table 8 Confusion matrix one ten-fold experiment of the stepwise discriminant model (experimental phase 1)

Figure 3 depicts the aforementioned picture by indicating the relative positions of patterns along the first two discriminant functions. The mapping of texts onto the pattern space shows that the CL and LB group centroids are far apart, while the KO and EB groups overlap and their centroids are very closely positioned in the space defined by the first two discriminant functions.

Figure 3 Mapping of the texts onto the space formed by the first two discriminant functions (experimental phase 1)

6.3.2 Experimental phase 2

As mentioned before, the boundaries between Koine and the Early Byzantine period are not so strict, as is evident from the low accuracy obtained when discriminating between texts for these two periods. This indicates that these two periods are very close and not easily distinguishable in terms of the use of the infinitive. Hence, a second experimental phase followed, which involved merging the Koine texts and the Early Byzantine ones into a single group, with the aim of investigating whether the classification accuracy of the model could be increased.

The experimental set-up was similar to the experimental phase 1 reported in Section 6.3.1. So, two models were employed, namely a **full** discriminant model and a **stepwise** one. The value of the *F* parameter for entering/removing variables was set again to **5.00/4.99**. Furthermore, the ten-fold cross-validation methodology was once more followed in order to verify the validity of the results obtained.

Table 9 presents the classification accuracy yielded in the second experimental phase. The accuracy substantially increases by ~ 17% and ~ 14% for the full and the stepwise model respectively, exceeding 80% in both cases. Moreover, in the case of both models the baseline rate of 33.3% for a 3-class discrimination experiment is comfortably exceeded, while the classification error is reduced by ~ 46% and ~44% respectively over the 4-class task.

	Full discriminant	Stepwise discriminant [<i>F</i> = 5,00/4,99]
Classification accuracy	80,49%	82,31%
Number of discriminant variables	15	8

Table 9 Accuracy obtained with the full and stepwise discriminant models (experimental phase 2)

Table 10 illustrates the variables that were used as discriminators in the stepwise model. The full discriminant model employs yet again fifteen (15) variables, whereas the variables of the stepwise model rise to eight (8), the two additional variables over the 4-class task being those related to the object control structures (oc) and the adverbial infinitive with an Accusative subject (7b).

Infinitival variable category	Number of variables	Number of variables retained in the model [<i>Stepwise discriminant</i>]	
sc	1		0
oc	1	oc	1
aci	1	Aci	1
4 (personal/impersonal)	2	4a	1
5 (infinitive as main verb)	2		0
6 (simple infinitive)	2	6b	1
7 (adverbial infinitive)	4	7a, 7b & 7a1	3
8 (articulate infinitive)	2	8b	1
Total	15		8

Table 10 Types of variables retained in the stepwise discriminant model (experimental phase 2)

The confusion matrix (Table 11) generated for one ten-fold experiment of the stepwise discriminant model shows that the model is now able to predict more accurately the period membership of texts, since 80% of the KO & EB texts are correctly classified into this period. This indicates that the synchronies can be highly discriminated, when the Koine and Early Byzantine texts are grouped into one category.

		Predicted period membership according to the model		
		CL	KO & EB	LB
Actual period membership	CL	91.7%	8.3 %	0.0%
	KO & EB	5.9%	80.0%	14.1%
	EB	0.0%	10.1%	89.9%

Table 11 Confusion matrix for one ten-fold experiment of the stepwise discriminant model (experimental phase 2)

The high discrimination of the three groups also becomes evident when mapping texts onto the pattern space (cf. Figure 4), where minor overlaps are detectible, while the group centroids are positioned far from each other.

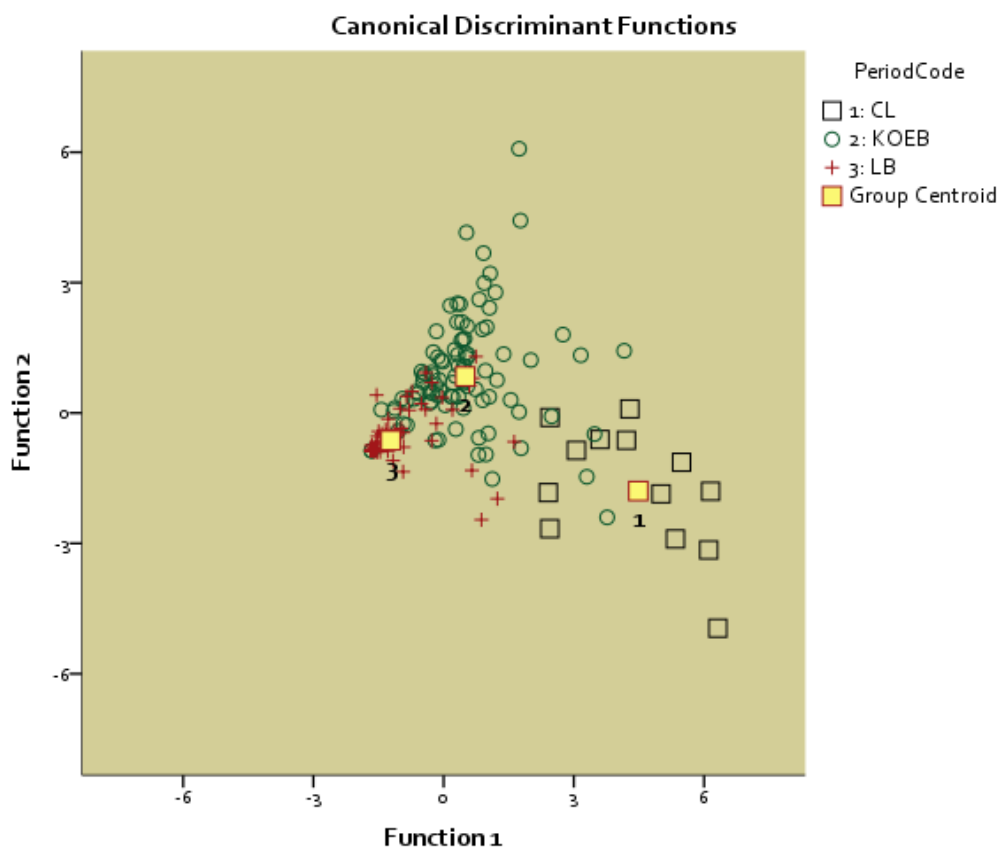

Figure 4 Mapping of the texts onto the space formed by the first two discriminant functions (experimental phase 2)

Finally, it is notable that the variables which serve as discriminating factors are either those whose frequency of occurrence systematically exhibits a declining trend through time, namely **4a** (personal/impersonal structures), **7a** and **7b** (adverbial infinitive 1 & complement of nominals with or without an Accusative subject), or those with substantial differences in frequency of occurrence across synchronies, that is **oc** (object control), **aci**, **6b** (simple infinitive with an Accusative subject), **7a1** (adverbial infinitive 2) and **8b** (articulate infinitive with an Accusative subject). The case of the infinitival subject also seems to play a significant role, since half of the discriminating variables correspond to structures with an Accusative subject.

7. Conclusions & future work

The present paper reported on a series of statistical analyses which were performed on an extensive corpus of infinitival structures. The aim was to draw some preliminary conclusions on the evolution of the Greek infinitive through time, supported by a statistical analysis.

The results obtained have shown that in all synchronies the categories exhibiting additively the highest frequency of occurrence are the subject and object control, aci and personal/impersonal structures together with the articulate infinitive. Besides, the subject control structures have been shown to form the most enduring category for all periods, always representing more than 25% of the infinitival occurrences.

Furthermore, the statistical analyses have asserted the correlation between time (i.e. the four synchronies) and the frequency of occurrence of infinitives and have highlighted a set of variables which can discriminate between synchronies in terms of the use of the infinitive.

It has already been mentioned that the present paper is part of an ongoing work, the object of which is the diachronic study of the Greek infinitival structures. Further experiments, either not reported here due to space restrictions or planned for the immediate future, include the employment of clustering techniques, discriminant analyses with variations based on text size or different values of the F parameter and the contrastive measurement of the frequency of occurrence of the final infinitive vs. the infinitive as complement of verbs of ‘saying’.

MOTHER TONGUE THEMA: GREEK PARADIGM IN SWEDISH PRESCHOOL EDUCATION

Magdalini Vitsou

Department of Theater Studies, Greece

magvits@gmail.com

ABSTRACT

This paper reports on a part of research conducted in 2009 in Stockholm to explore process drama as pedagogy in a mother tongue tuition program. There is an extended presentation of the Swedish policy towards mother tongue, focusing in Greek language, by the use of alternative didactic methods such as puppetry, drama and storytelling. Results suggest that a judicious and systematic use of drama techniques may present the teacher with opportunities for equipping the learners with explicit knowledge of the target language systems. This in turn may help students to develop their mother tongue skills from pre-school age. Therefore, as studies indicate, their academic performance at school will be better, as their mother tongue proficiency functions as a bridge between the language spoken at school and the language they speak at home.

Key words: mother tongue, drama, language acquisition, puppetry

1. Introduction-Context

For centuries, Greece has been a country that exports immigrants. There are now as many Greeks living across the world as live in Greece (Katsikas, 1993). Such a Diaspora has led to the formation of well-established and still locally important Greek communities. Generally, Greek communities are well organized and provide many activities and services, especially for the education of the younger members. As with other ethnic minority groups, hosted in a majority culture, Greek families and their children face the issue of language learning. That is, the need to learn the language and understand the culture of the country that hosts them and, at the same time, to maintain their own language and culture. Usually the statutory educational system of the host country takes responsibility for the first issue, whereas the second remains the responsibility of the family and/or the community (Damanakis, 1997).

As an exception, in Sweden there is a policy for tuition in student's mother tongues, where mother tongue tuition in the Swedish context refers to tuition for foreign background. The Riksdag (the Swedish Parliament) has taken a decision that all pupils whose mother tongue is not Swedish will be able to study their mother tongue during their nine-year compulsory school period and at upper secondary level. Mother tongue tuition is a question for the municipality, and not decided by the school, which is obliged to offer the tuition to students with a mother tongue other than Swedish. Some conditions regulate this offer. In order to participate, the students are required to have a basic knowledge in their mother tongue and it must constitute a daily spoken language (Skolverket, 2009).

Beside the above Greek communities have established community schools, which operate largely in the early evenings, during weekdays, and on Saturdays, both morning and afternoon. Financially, they are supported by the Greek community of each town/city. Schools are recognized by the Ministry of Education and Religious Affairs in Greece. Greek community schools are mainly staffed by qualified teachers, seconded by the Greek governments (Damanakis, 2003).

Even though there are alternative choices in learning, there are increasing concerns that gradually fewer children attend the schools and attendance patterns are irregular. My own personal experience and observations from a double role (that of a teacher and a parent) indicate that contributing factors include such as parental conflicting attitudes and uncertainties about the value and importance of learning the mother tongue; lack of inappropriate learning resources of teaching the mother tongue to young children; between children's educational experiences in Swedish schools and the Greek

community schools; The impact of parental conflict and confusion on the learning of the mother tongue is further clouded by the dated, mainly traditional didactic, methods of teaching and learning in the Greek community schools.

For some parents - learning Greek and understanding Greek culture and traditions - means that the language becomes part of, or even the whole of, the child's identity. For these parents language and identity are closely related and interwoven and they insist that their children are taught and learn the mother tongue (Bialystok, 2001). However, for another group of parents, the Greek language is less of a priority of fear of confusing languages. Yet research evidence has shown that bilingualism promotes flexibility of thinking and information processing and furthermore, the mother tongue and the language of instruction in school become interdependent and they nurture each other (Baker, 2000; Cummins, 2000).

The experiences of children living in Stockholm are likely to be more different than similar to the experiences of children living in Greece. In this context, the teaching of the Greek language becomes de-contextualized, with children failing to understand and comprehend the language. This problem is exacerbated by the use of phonetic only approaches to teaching and learning Greek. There is now strong evidence that, though phonetic approaches may help children acquire the mechanisms of the structure, syntax and spelling of a language, they may contribute very little to understanding and comprehension (Wyse, 2006).

Greek language for most of the parents is important as learning a second language, implicitly making the link between language, cultural heritage and identity.

1.1 The significance of mother tongue tuition

Mother tongue is used for the language that a person learnt as a child at home (usually from their parents). Children growing up in bilingual homes can, according to this definition, have more than one mother tongue or native language. The term mother tongue should not be interpreted to mean that it is the language of one's mother. In some paternal societies, the wife moves in with the husband and thus may have a different first language than the husband. Mother in this context originated from the use of "mother" to mean "origin" as in motherland (Viberg, 2001).

The mother tongue plays a very important part in a child's identity and self-esteem. The mother tongue provides the basis for the child's ability to learn. The child finds it easier to learn their second language and other school subjects.

Maintaining and developing language and literacy skills in the mother tongue ensures continuous cognitive development, and in parallel with the competence in the language of instruction, leads to additive bilingualism. Moreover, it is also crucial for maintaining cultural identity and emotional stability by enabling students to remain in touch with, and maintain esteem for the language, literature and culture of their home country. Finally, it makes it possible for students to readjust to life in their home community and education system should they return to their home country.

In short, bilingual children perform better in school when the school effectively promotes the mother tongue (Winsa, 2000).

1.1.1 The development of mother tongue education in Sweden

The development of mother tongue education in Sweden has to be seen against the background of public discussions at the beginning of the 1970s and the Immigrant Commission's report (SOU 1974) which led to the introduction of a general immigrant and minority policy in 1975. Here, the Swedish Riksdag (Parliament) decided to base migration and integration policy on the principles of equality, partnership and freedom of choice. The latter principle implies a rejection of cultural assimilation and underlies the right to mother tongue education. In 1977 the "home language reform" followed in response to a public campaign for immigrant rights in Swedish society. It gave immigrant and minority children the legal entitlement to mother tongue instruction in public schools. The reform was based on two diaverse motives: on the one hand it aimed to provide support for the retention of ethnic or cultural identity, on the other, it was intended to allow for a normal linguistic, academic and cognitive development of immigrant and minority students. This concern for the individual student's cognitive and academic development during school years was the main motive. Altogether, the reform was intended to help ensure equality between Swedes and persons from other ethnic backgrounds as well as cultural freedom of choice (Hult, 2004).

The Immigrant Commission's report (SOU 1974) reflected ideas already expressed in the UNESCO recommendation from 1953. This recommendation stated that all children should get their initial schooling in their mother tongue. It was based on the obvious fact that knowledge cannot be acquired in a language the student does not understand. Modern learning theories also assume that new knowledge can be acquired more easily if instruction is based on the known. Learning should thus start from the situation, the knowledge and proficiencies an individual already has. Based on these assumptions, mother tongue instruction has enjoyed the support of all major political parties in Sweden. Furthermore, it has since the 1970s been widely accepted that:

- it takes long, several years, before a second language works as efficiently for learning as the first language,
- an abrupt language shift will hamper a child's cognitive development during school years and diminish his or her potential academic achievement,
- children's attitudes about their first language – and through that also to their own culture and origin – will be affected by the role this language is accorded in society and at school,
- an individual's identity growth relies upon a person's experiencing positive affirmation of his or her cultural background (Utbildningsdepartementet, 2006).

Until now in Sweden, immigrant children in pre-school are entitled to mother language support. Immigrant students in compulsory education and in upper secondary education are formally entitled to mother language tuition as a school subject called "Mother Tongue Tuition" if they wish and certain other criteria are met, such as if there are more than five children in the school who want tuition in that language and a teacher can be found. The subject of the syllabus covers the literature, history and culture of the country of origin. The grades in this subject are considered equivalent to those in other subjects. It is in most cases an extracurricular activity outside normal timetabled lessons but students may be able to study the subject as an alternative to the second foreign language as a school option. At the end of year nine as well as in upper secondary education, there are nationally approved tests in the subjects of Swedish, Swedish as a Second Language, English and Mathematics. For years six to nine, there is diagnostic testing to form a basis on which to assess where an individual student stands in relation to the set goals, to help teachers to assess students and to support them in their learning. The materials used for the lower grades focus on language development and learning of basic mathematical concepts (Swedish Ministry of Education and Research, 2009).

Teacher education programs are required to prepare students teachers for a multicultural society and to promote access to teacher education programs for students with different cultures (Norberg, Sundgren 2000). The teacher education reform of 2001 emphasized that future teachers have to be trained to work in multicultural schools. Intercultural education has become a subject in the general part of the teacher training, although an evaluation indicates that the approaches of intercultural/multicultural education vary from one teacher education program to another. For example, some institutes focus on recruiting students with different cultural backgrounds in teacher education program, while some institutes offer obligatory courses for multicultural education for student teachers (Hult, 2004).

Mother tongue instruction in schools may take place in or outside the regular timetable in compulsory school; and as an individual option, a language option, or in the form of a remedial course in upper secondary education. If students study their mother tongue outside the regular timetable, they are entitled to a combined total of seven years in the public school system. Students wishing to take their mother tongue in upper secondary school must have a grade in that language from year nine of compulsory school, or equivalent (Wirén, 2009).

In practice, lessons are usually held outside regular timetable hours. In schools with students with limited knowledge in Swedish, some subjects may be offered in their mother tongue, while they learn Swedish. For instance, in Botkyrka, the review team interviewed students who were learning mathematics in Arabic through a mathematics teacher of the same immigrant background. Although calculations and mathematical formula are the same regardless of the language, the ways to do the calculations and solve the formula are different between the countries and, students preferred to continue to learn mathematics in the same way. Yet, learning the language of instruction was still important in mathematics as it helped in interpreting the questions (Enkvist, 2005).

Providing mother tongue tuition and support is expensive. Sharing the resources is of critical importance across all levels of education. An on-line resource site, *Tema Modersmål*, has been developed to primarily for those working in pre-school and school education. The website hosts different mother tongue rooms and provides tools for communicating in different languages. These rooms are run by mother tongue teachers at both pre-school and school level. As of July 2009, about 26 languages were covered (Winsa, 2000).

1.1.2 Pre School Mother Tongue Policy

According to the latest Swedish curriculum the preschool should take account of the fact that children have different living environments and that they try to create context and meaning out of their own experiences. Adults should give children support in developing trust and self-confidence. The child's curiosity, initiative and interests should be encouraged and their will and desire to learn should be stimulated. The task of the preschool involves not only developing the child's ability and cultural creativity, but also passing on a cultural heritage – its values, traditions and history, language and knowledge – from one generation to the next.

The internationalization of Swedish society imposes high demands on the ability of people to live with and understand values inherent in cultural diversity. The preschool is a social and cultural meeting place, which can reinforce this and prepare children for life in an increasingly internationalised community. Awareness of their own cultural heritage and participating in the culture of others should contribute to children's ability to understand and empathize with the circumstances and values of others. The preschool can help to ensure that children from national minorities and children with a foreign background receive support in developing a multicultural sense of identity (Wirén, 2009).

The goals of the curriculum include developing *“a rich and varied spoken language and the ability to communicate with others and to express their thoughts”*. It articulates Sweden's high emphasis on developing children's vocabulary, to increase their ability to play with words, raise interest in the written language and train their communicative functions. The goals also include striving for tolerance, sensitivity and mutual respect for all forms of different backgrounds and cultures. It explicitly supports children whose first language is not Swedish, in developing their cultural identity as well as their ability to communicate in both Swedish and their first language. Language support for immigrant children in Sweden is regarded as important not only for their language learning in Swedish but also for the child's language and cultural learning of their own (Viberg, 2001).

The pre-school curriculum prescribes that pre-school must contribute to providing children whose first language is not Swedish with the opportunity of developing both Swedish and their own first language. During the 1980s, language support in pre-school was supported with grants. This resulted in about 60% of children with a mother tongue other than Swedish receiving language support. The number of children gaining support fell substantially after funding for school and pre-school was no longer made through ear-marked grants. With the curriculum for pre-school, introduced in 1998, the provision of mother language support was strengthened and as a consequence the number of supported children has increased slightly but steadily. According to data by the National Agency for Education (Skolverket, 2006), in the case of one-to-five-year-olds, 15% of children in pre-schools and 5% of children in family day-care homes spoke a first language different from Swedish in 2005. Of these only 14% received first language support. For six-year-olds who attended the pre-school class in 2005, the proportion of pupils whose first language is not Swedish was 14.5%, and, of these, 46.6% received a first language support (Axelsson, 2005).

Overall, in almost all municipalities there are children in pre-school whose first language is not Swedish. However, only about seventy municipalities provide first language support. This is an increase compared with 2004 when only about fifty municipalities offered first language support (Skolverket, 2006).

There can be a mother tongue teacher specialising in teaching mother tongue at pre-school level who meets the children once or twice every week. As Garefalakis (1994) and Swedish Ministry of Education and Research mentioned in their research, mother tongue teachers usually use traditional didactic methods and therefore there is a big dropout of students. In order to improve the quality of teaching, the government initiated the “Boost for Teachers” program in 2007. It aims to provide current teachers with opportunities to attain qualifications. There were some problems in the initial phase of the initiative due to lack of demand from municipalities. In the last year, demand has increased and teachers who have taken part are satisfied with the in service training.

1.1.3 The use of drama in language acquisition

According to Shin-Mei and O'Neill (1998) drama has been used for language teaching since the middle ages. The last decade many teachers used to scoff at the idea of using drama to teach a second language. The change in attitude towards the use of drama in language teaching came about due to a greater emphasis on meaningful communicative activities instead of mechanical drills.

In a recent contribution to Tuttitalia, Boria (2003) discusses the role that literary texts can play in the foreign language classroom and provides some examples of how learners' linguistic awareness can

be enhanced by the use of literary texts. In the last two paragraphs she focuses on drama and argues that drama still offers the best literary source to present students with models of conversational interactions and discourse patterns. Dramatic dialogue can provide an excellent synthesis of some of the strategies that are used by speakers and listeners in conversations. (2003).

Language is used in meaningful situations (Liddicoat, 2008). Drama contextualizes the language in real or imagined situations in and out of the classroom. Language in the class that uses drama activities is explored, tried out and practiced in meaningful situations. Drama activities can be used as a means of reinforcement of language learnt (Mordecai, 1985; Fleming, 2003). It helps to extend, retain and reinforce vocabulary and sentence structure through role-play and communication games.

Drama improves oral communication. As a form of communication methodology, drama provides the opportunity for the student to use language meaningfully and appropriately. Alkistis (2008) states that drama puts back some of the forgotten emotional content into language. Appropriacy and meaning are more important than form or structure of the language. Drama can help restore the totality of the situation by reversing the learning process, beginning with meaning and moving towards language form. This makes language learning more meaningful and attempts to prepare the student for real-life situations. Learning a second language can be enjoyable, stimulating and meaningful when combined with drama activities (Holden, 1981, Haritos, 2003).

Educational drama, as an informal classroom improvisation, affects the ways students think and learn and has a powerful effect on thinking, reading, writing, and foreign-language learning (Bruner, 1983, Vygotsky, 1986).

2. Research Methodology

Concerning all the above factors we decided to conduct a project using alternative methods of teaching Greek during Greek mother tongue tuition in the Swedish preschool classes. As part of the “Boost of Teachers” program a 10-week project was developed in 7 preschool day centers in the area of Solna-Stockholm, which included mother tongue instruction in Greek origin students. Our sample comprised of 12 boys and 16 girls, 4–6 years old, of Greek and Greek-Swedish origin. They were second- and third-generation immigrants, and some were of mixed parentage. The program was developed by the author who also was the class’s teacher, posted by the Greek government.

2.1 Description of the intervention

The students were introduced to a variety of drama-in-education techniques such as improvisation, role-play, frozen image building, puppetry and storytelling. They were actively engaged in a range of practical activities, which enabled them to be active participants in the classroom. Initially, in an attempt to introduce the students to improvisation, we asked them to walk slowly around the room, to freeze and to act out various emotions. The emotions that they were required to act out included, amongst others, the following: *hate, love, anger, fear, courage, joy and sadness*. They were presented with various scenarios based on the emotions to enable them to provide a more realistic portrayal of their feelings.

The following are examples of scenarios presented to them:

- You have just heard that your dog has died. Act out your sadness.
- It is late at night and you are in the middle of a forest. Suddenly you hear a noise. Act out your fear.
- You have just discovered that your brother/sister took your favorite toy. Act out your anger.

The students were, also, introduced to the basics in frozen image building to enable them to work on a concept, which they could develop further. I discovered that it was a very effective technique in drawing the class together. Group frozen image building involved, amongst others, the following: “You are in circus. Think about who you are. Take up your position and freeze”. This was an individual task. Then we moved around from one frozen statue to another asking them, amongst others, the following questions: *Who are you? What are you doing here? How old are you?*

The frozen image scenes eventually led to role-play as the participants had to portray various roles in the context of the playlets, which they created. It was evident that the students were acquiring invaluable oral communication skills and their ability to empathize with characters was developing in a meaningful and dynamic manner.

In addition, we used puppetry as a mediator tool to facilitate language learning. Children created their own puppets from multiple materials and used them in improvisations and in structured activities.

The puppet's linguistic potential emerges when the children communicating with the puppet mediate cultural and social experiences, express their conceptions of knowledge and learning and develop indicative, semiotic and rhetorical functions of language (Kaplan, 2005).

A favorite puppet read a story and a dialogue started between the puppet and children about the story, aiming to clarify key points, and asking questions, making predictions and summarizing the story. The story was role-played by incorporating Greek music, dance, or kinaesthetic activities. The basic idea was to introduce the Greek culture and blend it with cultural aspects of the children's current experiences from the Greek community and the host majority culture. Its aim was for young children to gain a holistic view of the world in which they live, rather than seeing distinct cultures within and between which they move and shift and drift (Kozulin, Gindis, Ageyev, Miller, 2003).

2.2 Data analysis

For the implementation and evaluation of the project an ethnographic case-study methodology was used (David & Sutton, 2004). The researcher and teacher maintained an insider-outsider perspective in terms of the cultural context of the community, where the project was developed. We used participant observation, interviews, event-recording data collection sheets for free play, training observations, post-training observations, and follow-up observations were developed by the social skills instructor. Data were recorded on observation sheets using tally marks and anecdotal notations.

After the implementation of the project, data were collected to examine qualitatively the processes and the extent to which it addressed the aims of the project. Data collected included parents' informal feedback throughout the implementation of the project and via, a questionnaire administered after the implementation of the program and work produced by the children.

To be able to distinguish and identify drama's and puppets communicative potential and understand the empirical data in a qualitatively new way, the following concepts have played a prominent role throughout the analysis process: dialogue, subjectivisation, motive and mediation. Dialogue refers to linguistic contexts in which children talk with the puppet or during the role play or with each other and concerns the content of what is said and how it is said. Subjectivisation refers to puppet's and drama's sentimental value, i.e. how the process of the puppet's creation as a subject is developed and expressed in children's verbal and physical acts. Motive refers to communicative dynamics and the way the puppet's usage creates and generates knowledge-related and emotional motives. Mediation concerns how children construct and mediate their conceptual world, develop knowledge, exchange experiences, establish relationships and create new activities.

2.3 The communicative contexts of the analysis

The following contexts emerged as spontaneous arenas for children's communication and the drama's and puppet's communicative potential: improvisations, individual conversations, games with puppets inspired by the drama techniques and drawings that children produced of their own accord for certain puppets. Below, a description is given of what characterised these arenas.

Improvisations: Improvisation means that what is enacted emerges while the conversation/activity is in progress.

Individual conversations: Here, individual conversations refer to situations where children turn to me spontaneously and on their own initiative and want to talk about a specific drama scenario or puppets in general.

Games with puppets inspired by drama techniques: The children's games refers to children organizing a game of their own accord where the content of the game is partly an imitation of the puppet's movements on the stage and partly a development of new movement patterns that arise in the interaction.

Spontaneous drawings: Here, spontaneous drawings refers to the drawings children made of their own accord and out of interest and that the drawings were explained and given to me after the project.

3. Results

In a range of ways this study has highlighted how mother tongue in correlation with drama techniques and especially puppetry and related tasks, which encourage learner engagement and creativity, can provide a powerful means of developing language skills as well as broader understandings related to

literacy and culture. Both observational data and interviews with students and parents gave strong support for the view that using mother tongue in a context and purpose are fundamental to building genuine communicative competence and to facilitating the internalisation of their mother tongue.

The analysis made it possible to distinguish and identify the significance of mother tongue with drama and puppets techniques as communicative potential and as a mediating tool, based on three result areas: as driving force, mediation and three-party relationships and communicative processes.

Drama's and puppets sentimental value as a subject manifests itself primarily in children's dialogues and ways of talking. Here, sentimental value does not only refer to the existence of emotions that children express, it also includes children's negotiations concerning the meaning of the puppet being 'for real' and what it then consists of.

"Three-party relationships" refers to the relationships that are developed in the communication between three parties – the teacher, the puppet and children – and is a way of participating, creating and developing common knowledge in social learning activities. The communication in mother tongue is based on a common object, the puppet and the puppet's actions in the contexts. The results show that experiences in the common dialogue in a three-party relationship often create situations that, for the teacher, involve unexpected communicative twists and changes in Greek. It also emerges that such situations result in and contain both opportunities and limitations as regards the teacher's actions. Here, opportunities refer to the creation of new insights and discoveries in the dialog with the children, while limitations refer to the uncertainty that arises when it comes to the puppet's credibility in relation to what is unpredictable in the dialog between the puppet and the children.

The results from the study point to the mother tongue and puppet's and drama techniques relational, linguistic and action-related potential due to the fact that the puppet is perceived and treated as a subject. The results also show that subjectivisation of the puppet takes place in close and immediate contact between puppet and child especially when the dialogue in mother tongue. This means that children's individual motives are related to the puppet or to the puppet's properties. How the puppet is experienced and perceived as a subject is expressed above all in children's dialogs and ways of talking to the puppet, their way of talking with others about the puppet and in the interaction with each other in the light of the puppet's participation in the pre-school.

When we use drama techniques or puppetry, the children's interaction reflects their cultural and social context. How the world functions is expressed in, among other things, children's dialogues where they, with the help of mother language, define their experiences and develop their horizon of understanding. The dialogue that emerged with drama techniques or with the puppets functioned as a discussion forum where the children who actively participated in relation to the puppet most often adopted a narrative and teaching approach.

It is evident from the research that there are many advantages associated with this approach to teaching and learning mother tongue through drama techniques. The following were some of the advantages gleaned from the students' reflection sessions and our observation of the students during the entire process.

The participants developed confidence and were able to express themselves fluently. Through social interaction the students explored aspects of meaning together which enabled them to increase their understanding, not only of the particular content they were exploring, but also their individual interpretations. They learnt to offer, accept and modify ideas and to build upon the ideas presented by members of the group. They learnt how to empathize and as they became more motivated their self-esteem improved. They acquired better habits of speech and they increased their vocabulary in Greek as we could measure from the before and after the project interviews.

The project was positively received by all parents, who commented as follows: *"It has made learning more fun and interesting!"*, *"It enabled the children to learn different areas of the Greek language in a fun way"*, *"It has made learning more interesting and enabled understanding of the text with interaction"*, *"Children learn more when they play together; it promotes discussion, increases vocabulary"*, *"Helps promote the Greek language at home, speaking with your child"*.

Similar comments were made by the children: *"I can play now in the lesson, I like puppetry, and theatre"*, *"It's fun and interesting"*, *"I learn new words ... I speak Greek and I don't sit always on a chair .."*, *"I learn about Greece"*, *"I speak Greek at home with my parents and brothers and sisters."*

The comments were further supported by feedback offered informally during the implementation of the program. The project also had a positive impact on the attendance in mother tongue lessons not only in the Swedish Preschool Centre but also in the Greek evening school. They all attended the weekly sessions regularly and until the end of the academic year according to the official records of their teachers.

It thus emerged from this study that as the students became more confident their self-esteem improved dramatically, thereby leading to a concomitant improvement in their oral communication skills.

The participants developed confidence and were able to express themselves fluently. Through social interaction the students explored aspects of meaning together which enabled them to increase their understanding, not only of the particular content they were exploring, but also their individual interpretations. They learnt to offer, accept and modify ideas and to build upon the ideas presented by members of the group. They learnt how to empathize and as they became more motivated their self-esteem improved. They all attended the weekly sessions regularly and until the end of the academic year according to the official records of the school.

It thus emerged from this study that as the students became more confident their self-esteem improved dramatically, thereby leading to a concomitant improvement in their oral communication skills. This research also points to the properties of the drama techniques a versatile tool for communication and learning and defines mother tongue as children's communicative right in the context of pre-school.

4. Conclusions and Perspectives

The use of drama activities in mother tongue tuition can be used as an innovative method. With the emphasis on the use of the Communicative Approach in language teaching, drama provides a meaningful way of learning the language. However, it should not be used in isolation but should be used in an integrated approach for language teaching. It should be part and parcel of the communicative classroom methodology. In conclusion it is thus evident that drama-in-education can play a significant and meaningful role in the development of the students' oral communication skills whilst simultaneously developing their personality, self-expression, self awareness and self confidence..

Unfortunately, the way in which a language is acquired is often mechanistic and artificial, depending on a theory of teaching which ignores the emotional and non-verbal content of language. From my experience and research, I believe that the use of creative dramatics in a language classroom not only addresses the nonverbal aspects of language, but also provides a satisfactory linguistic base on which to build communicative competence.

In addition Swedish policy teaches us that mother tongue education must be a priority in every modern country.

ABSTRACT

The aim of our study is to develop a fluency task for Greek Sign Language (GSL), by which the fluency of adult Deaf signers can be measured. Following the standard methodology, the GSL fluency task used both semantic and phonemic categories. The task was administered to a pilot sample of five participants. We compared performances on the GSL fluency task with those on British Sign Language and oral Greek fluency tasks and found expected results on the basis of previous research. We conclude that the GSL fluency task can be successfully used to assess the performance of GSL users.

Keywords: Semantic fluency; Phonological fluency; Greek Sign Language

1. Introduction

Greek Sign Language (GSL) is the natural language of the Deaf¹ community in Greece. In 2000 it was recognized by Greek Legislation (2817/2000) as the official language of deaf and hard-of-hearing pupils in the Hellenic State (Ministry of National Education and Religion & Pedagogic Institute, 2004). It constitutes a fully-fledged and autonomous linguistic system with its own vocabulary, syntax, morphology and grammatical forms, just like any other known spoken language (Sandler, 2003). At the same time it shares the common features of sign languages across the world, by being organized grammatically in space in a three-dimension manner (Stokoe, 1972; Stokoe and Kuschel, 1978).

It is estimated that GSL is currently used by 12,000 children and 30,000 adults throughout Greece; however, precise quantitative data of this kind is difficult to collate due to lack of up-to-date archives. According to studies conducted at the Gallaudet University cited in the Ethnologue (2002), GSL is not derived from the oral Greek language, but rather has its origins in American and French Sign Languages and various indigenous sign languages. It should be noted that sign languages spring up wherever there are Deaf communities (Klima and Bellugi, 1988) passing them down from one generation to another. In this sense, they are culture-dependent to a greater degree than spoken languages (Emmorey, 2002; Kourbetis, 1999) and for that reason there is a heterogeneous language background among members of Deaf communities leading to a widespread variation in signing proficiency (Hauser, Paludneviciene, Supalla and Bavelier, 2006).

¹ Here and throughout we adopt the established convention of signaling with a capital D those persons with hearing impairments who are members of the Deaf community and use Sign Language in their everyday communication.

While sign languages are structured languages as the oral ones, they employ a different modality than oral languages in order to be transmitted. Therefore, there are significant differences between oral and sign languages. Consequently, to assess the performance in a sign language special assessment materials need to be developed. Notably, only a few studies have been carried out in this domain (Herman, Holmes & Woll, 1999; Herman et al., in press).

1.1 Fluency tasks in oral and sign languages

In oral verbal fluency tasks, individuals are given a limited amount of time, generally one minute, in which to produce as many items as they can within a particular category, and categories can be either semantic (e.g. “animals”) or phonological (“words beginning with ‘f’”) (Reitan and Wolfson, 1994; Lezak, 1995; Phillips, 1997). Verbal fluency tasks tap a wide range of cognitive processes, including semantic memory, language and executive functions. Consequently, they have been widely used for neuropsychological assessment and diagnosis, particularly after incidents of neurological damage (Parker and Crawford, 1992; Peña-Casanova et al., 2009). Notably, there has been a lot of research in order to develop norms appropriate for different languages, such as Greek (Kosmidis, Vlahou, Panagiotaki and Kiosseoglou, 2004), Spanish (Acevedo et al., 2000; Benito-Cuadrado et al., 2002; Peña-Casanova et al. 2009), and Hindi (Ratcliff et al., 1998). Moreover, in the literature there has been a lot of debate as to what determines how productive, or “fluent”, an individual is. Most studies suggest that factors predictive of greater fluency are the employment of categorization strategies, widely known as *clustering*, and the shifting from one subcategory to another when the time between responses lengthens (*switching*) (Raskin et al., 1992; Troyer et al., 1997; Abwender et al., 2001 among others).

With respect to the fluency assessment in sign languages, to the best of our knowledge, the only language to have been studied so far is *British Sign Language* (BSL; Marshall et al., to appear; Marshall, Rowley & Atkinson, submitted). Marshall and her colleagues (to appear; submitted) used two semantic categories, “animals” and “foods”, and found that Deaf children and Deaf adults produced responses that were comparable in all important ways – for example, total number of items produced, types of clusters, a slowing down of response rate during the course of the minute, most frequent responses – to those reported for spoken language fluency tasks.

Marshall et al.’s phonological fluency task used six categories that took into account the phonological structure of BSL, which, like all sign languages, can be divided into features “handshape”, “location” and “movement” (Marshall et al., submitted). Three were handshape categories, two were locations, and one was a movement category. Overall Deaf adults found this task quite difficult, with fewer responses than are typically reported for phonological fluency tasks in spoken languages. Marshall et al. speculated that this might be due to lower metaphonological awareness in signers, arising from sign languages not having an orthographic form.

2. The present study

The present study pilots a verbal fluency task for GSL which adapts Kosmidis et al.’s (2004) semantic categories for Greek and Marshall et al.’s (submitted) phonological categories for BSL. The aim is to compare performance to (oral) Greek and to BSL, in order to understand the types of responses produced by signers of GSL. The ultimate aim is to produce a task that can be used as part of a battery of tasks to assess GSL proficiency in a range of individuals, including deaf children.

2.1 Methods

2.1.1 Participants

For the needs of our study we contacted Associations of the Deaf in Thessaloniki and three schools of GSL situated in the same city in order to recruit informants. Data for the pilot study were collected from 5 participants (3 male; aged 24-36 & 2 female; aged 20-23, mean age=28). GSL, as any other sign language, has regional variation, especially in the field of vocabulary, and thus we intentionally selected participants from the northern part of Greece (cf. Marshall et al., to appear).

In order to collect demographic information on the participants we used a questionnaire, that included questions concerning sex, age, educational level, time of hearing loss and GSL acquisition, interaction with Deaf people and the use of GSL in everyday communication (see Appendix). All the

participants but one fulfilled the standard criteria for informant selection, that is, deafness at birth (or pre-lingual deafness), daily exposure to sign language, normal IQ abilities, full integration into the Deaf culture and following the standard procedure informed consent was received from each participant (Stokoe, 1972). Consider Table 1 for detailed information on signers' profile.

	Sex	Age	Hearing loss age	Level of education	Context of GSL acquisition
1	f	23	Birth	Technological Educational Institute degree	school teacher
2	f	20	Birth	University student	parents
3	m	36	1-12 months	High School	schoolmates
4	m	36	7 years	University degree	schoolmates
5	m	24	Birth	University student	schoolmates

Table 1 Demographic data

Participant 2 is a native signer who acquired GSL from Deaf parents. All the rest have daily exposure to the language using it as their preferred one. They are members of the Deaf community and acknowledged as competent signers (for criteria setting, see Stokoe, 1972; cf. Sapountzaki, 2005). They range in age from twenty to thirty six years. Four of them are pre-lingual deaf and one of them is a post-lingual deaf (participant 4), who nevertheless meets the criteria of exposure to GSL set previously.

2.1.2 Materials and procedure

2.1.2.1 Semantic fluency task

Participants were asked to generate as many words as possible for three semantic categories: animals, fruits and objects, which are the three categories used by Kosmidis et al. (2004) for oral Greek. They were allowed sixty seconds for each category. All signers received specific instructions in GSL by a Deaf person who collaborated with the first author of this study for the data collection. The signers were instructed by the Deaf person to sign all the names of animals/ fruits/objects that came into their mind. No examples were given at any time. The whole procedure was videotaped to allow for later transcription of the responses.

2.1.2.2 Phonological fluency task

For the phonological part of the task three handshapes were selected:

1. "Δ": the fist with the forefinger extended
2. "5": open hand
3. "Φ": thumb and forefinger together with the three remaining fingers extended

Figure 1 "Δ" handshape

Figure 2 "5" handshape

Figure 3 "Φ" handshape

The handshapes were selected based on their relative frequency in signs listed in the digital GSL dictionary *NOIMA* (ILSP, 2001). Specifically, the “Δ” handshape is used more frequently in the signs presented in the dictionary (i.e. 121 signs); “5” handshape is used in half of the tokens (i.e. 52 signs) and “Φ” corresponds to the $\frac{3}{4}$ of the sign words using the second handshape (i.e. 36 signs). As for the semantic categories, for each handshape participants were allowed sixty seconds. Again the instructions were delivered by the same Deaf person who showed them the specified handshape and asked them to tell him as many signs they could think of that use that handshape. No examples were given at any time and the whole procedure was filmed.

2.1.3 Analysis of the data

Responses were glossed with the equivalent Greek word and scored as either correct or incorrect. Repetitions and nonexistent signs counted as errors. Responses were assigned semantic clusters based on the subcategories that emerged from the data, that is both thematic (e.g. *pets, wild animals*) and taxonomic (e.g. *birds, mammals*) (Kosmidis et al., 2004; cf. Marshall et al., to appear, Marshall et al., submitted). Following Marshall and collaborators, we considered clusters as two or more adjacent responses from the same subcategory. Switches between clusters, or between items that did not form clusters were also calculated.

3. Results

In this section information is given on the numbers of responses to each category, the categorization of the clustering and the most frequent answers in all categories.

Table 2 shows the number of correct items produced by each participant in each category.

	Animals	Fruits	Objects	“Δ”	“5”	“Φ”
1	16	10	21	7	6	8
2	29	17	28	21	16	21
3	25	14	33	29	24	17
4	17	9	22	16	14	14
5	15	7	17	13	12	10
Mean	20.4	11.4	24.2	14.4	17.2	14

Table 2 Fluency data

Fluency for the semantic categories of animals and objects is higher than for the rest of the categories tested. Surprisingly this is not the case for the semantic category of fruits, which yielded the fewest responses compared to the total of the categories tested (semantic or phonological).

Coding semantic clustering in semantic and phonological categories in one participant’s responses is presented in table 3 and 4.

4. Discussion

Our results indicate that there are both similarities and differences between Deaf adult signers’ performance on the semantic and phonological fluency tasks and the performance reported in the literature for hearing individuals on analogous tasks. Specifically, we found the following similarities

to spoken languages: a larger number of responses for semantic than for phonological categories, and semantic clustering for both semantic and phonological categories (cf. Marshall et al., to appear). Since the participants of our study group do not show a wide range of age and educational level, it is quite difficult to match them with studies mentioned in the literature and more specifically with the one conducted in the hearing Greek population by Kosmidis et al. (2004). Comparing our results with that of BSL analyzed by Marshall et al. (to appear) is also complex, since the two sign language systems have dissociations in the way they encode their vocabulary, namely the use of finger-spelling. In addition to that, in the phonological part of the BSL fluency task a range of phonological categories was selected (i.e. handshape, location and movement), which concluded in different mapping of the participants responses (according to Marshall et al., phonological fluency in signed languages may be very dependent upon the particular category chosen).

In any case, it seems that Greek signers showed a comparable performance on both the semantic and phonological task to that of their hearing counterparts: a mean of 18.50 for correct responses as far as the category “animals” is concerned in spoken Greek (Kosmidis et al., 2004), whereas in GSL the mean is 20.4. Spoken Greek phonological fluency is in the region of 10-13 words (Kosmidis et al., 2004), lower than the mean of 15.2 which appears in the data of our study. In sum, our pilot investigation showed that semantic and phonological fluency tasks appear to be feasible in GSL. The participants understood the instructions, produced a set of relevant responses, and produced responses that were expected on the basis of previous work in Greek and BSL. It would therefore be worth testing the categories further with a larger number of neurotypical adult participants, and then with children and adults with neurological damage. With more data, subtle cross-linguistic differences between GSL and Greek and GSL and BSL might emerge, allowing insight into those aspects of fluency that are modality-specific, those that are modality-independent, and those that are language-specific. Given the paucity of cross-linguistic comparisons of sign languages, the fact that this task is quick and easy to administer and score might make it a prime candidate for comparisons across different sign languages.

ABSTRACT

Literary texts provide the student of Modern Greek as L2 with information concerning syntactic structures, common in oral and written discourse, in journalistic and scientific discourse. Literature comprises a sample of authentic discourse and functions as a source of information for natural speakers' way of thinking, cultural and social features, writers' attitudes, aspects of creativity in language and a rich vocabulary for teaching purposes. Course books for vantage and advanced levels include prose and poetry extracts, which serve as a means for interactive exchanges in class, through a series of related socio-cultural parameters.

Λέξεις κλειδιά: διδασκαλία ελληνικής ως δεύτερης / ξένης γλώσσας, λογοτεχνία, πεζογραφία

1. Γενικά

Βασική μας θέση είναι ότι η λογοτεχνία αποτελεί εύλογο και επιβεβλημένο όργανο στη διδασκαλία της δεύτερης / ξένης γλώσσας, αφενός για λόγους καθαρά γλωσσικούς και αφετέρου εξαιτίας της εμπλοκής της με ζητήματα προσωπικής ανάπτυξης και πολιτισμικής συνειδητοποίησης. Οπωσδήποτε, δεν αγνοούμε τη βιβλιογραφική διαμάχη σχετικά με την αναγκαιότητα ή μη της εμπλοκής του λογοτεχνικού υλικού κατά τη διαδικασία κατάκτησης του δεύτερου, τρίτου κ.λπ. γλωσσικού κώδικα (Carter 1988, Lazar 1993, Cook 1994, Short 1996, Tucker 2006) ούτε παραγνωρίζουμε τα προβλήματα που σχετίζονται με τον απαιτητικό χαρακτήρα της λογοτεχνικής γλώσσας, τη δυσκολία επιλογής των κειμένων λόγω θέματος, έκτασης κ.λπ. (Brumfit 1981, Collie & Slater 1987, Lazar 1993), ωστόσο υποστηρίζουμε την άποψη ότι το λογοτεχνικό κείμενο μπορεί να ενισχύσει αποτελεσματικά την

κατάκτηση της δεύτερης / ξένης γλώσσας (Krashen 1985), εν προκειμένω της Νέας Ελληνικής, εφόσον η διδακτική αξιοποίησή του παρουσιάζει πολλαπλά οφέλη για τους σπουδαστές¹.

Συγκεκριμένα, από αυστηρά γλωσσική άποψη μπορεί να γίνει λόγος για αξιοποίηση λογοτεχνικού υλικού γενικά προς εμπλουτισμό του λεξιλογίου και ανάπτυξη της γλωσσικής αντίληψης (Collie & Slater 1990:3, Carter & Long 1991:2, Lazar 1993:11, Νάτσινα 2007:510-511) και της γλωσσικής ικανότητας (Pickett 1986:271) ή της «αίσθησης» της γλώσσας (Hall 2005:48), τόσο σχετικά με τις κυριολεκτικές όσο και με τις μη κυριολεκτικές / σχηματικές σημασίες και τις ιδιομορφίες της φρασσεολογίας (Paran 2008, Parkinson & Reid 2000, Gibbs 1994, Collie & Slater 1987), και ειδικά για την πληρέστερη κατανόηση και κατάκτηση σύνθετων γραμματικών, συντακτικών και λεξιλογικών δομών (Widdowson, 1984:246, Lukashvili 2009:1-2).

Επιπροσθέτως, το λογοτεχνικό υλικό μπορεί να αποτελέσει το κατάλληλο υπόβαθρο για την παρουσίαση διαλέκτων, κοινωνιολεκτών, διαφορετικών επιπέδων λόγου, διακριτών κειμενικών ειδών (Maley & Duff 1990), ακόμη και παλαιότερων μορφών της γλώσσας-στόχου (Brumfit 1986:190, Hill 1986:10-11), καθώς και για την ενίσχυση της δημιουργικότητας των σπουδαστών και για την ανάπτυξη των δεξιοτήτων που σχετίζονται με την πρόσληψη και την παραγωγή προφορικού και γραπτού λόγου (Widdowson & Brumfit (1981:105, Widdowson 1984:246, Parkinson & Reid 2000:9-11, Νάτσινα 2007:511).

Παράλληλα, εφόσον το λογοτεχνικό φαινόμενο δεν περιορίζεται στο παραγόμενο αποτέλεσμα –το κείμενο–, αλλά περιλαμβάνει και τη διαδικασία πρόσληψής του, από την άποψη των πιθανών αντιδράσεων / ερμηνειών του αναγνώστη στο προτεινόμενο μήνυμα (Rifaterre 1985:137, Maley & Duff 1990), εφόσον πρόκειται δηλαδή για μορφή επικοινωνίας (Albert & Souchon 2000:181), η διδακτική αξιοποίηση του λογοτεχνικού προϊόντος σημαίνει προσωπική εμπλοκή (Doubrovsky 1985:20-23, Collie & Slater 1987:3-6) του διδάσκοντος και του διδασκόμενου, και ανάπτυξη στρατηγικών κατασκευής μιας καινούργιας υποκειμενικότητας (Πασχαλίδης 2002:321), αυτής που σχετίζεται με τη γλώσσα – στόχο. Με άλλα λόγια, το γεγονός ότι η λογοτεχνία αντλεί τη δύναμή της ουσιαστικά από το βίωμα (Alter 1985:69, Μέλλου & Χατζηδημητρίου – Παράσχου 2001:141) και απευθύνεται στο ανθρώπινο συναίσθημα παγκοσμίως (Hill 1986:7, Νάτσινα 2007:512), μπορεί να αποτελέσει αφορμή για καλλιέργεια της ευφυΐας και της κοινωνικής ευαισθητοποίησης των σπουδαστών της δεύτερης / ξένης γλώσσας (Parkinson & Reid 2000:9-11), δηλαδή για μεγαλύτερη διανοητική και ηθική ανάπτυξή τους, πέρα ή πάνω από το επίπεδο ωρίμανσης του καθενός στο πλαίσιο της μητρικής γλωσσικής κοινότητας. Υπό την έννοια αυτή το λογοτεχνικό κείμενο, ως εγνωσμένης ποιότητας αυθεντικό υλικό, λειτουργεί ως εύπλαστη πηγή περιεχομένου (Brumfit & Johnson 1979, Widdowson 1984:246), πάνω στην οποία το κάθε άτομο ή η κάθε ομάδα ατόμων έχει τη δυνατότητα να αναπτύξει τα δικά της νοήματα (Maley 1989:11). Πρόκειται, στην ουσία, για μια διαδικασία δεύτερης (τρίτης κ.λπ.) κοινωνικοποίησης και προσδιορισμού καινούργιας ταυτότητας (Hall 2005:71 κ. 77), με άξονα αναφοράς τα δεδομένα που προσφέρει το κείμενο της άλλης γλώσσας.

Επιπροσθέτως, το λογοτεχνικό μάθημα στους μη φυσικούς ομιλητές έχει και σαφή διαπολιτισμική διάσταση, αφού μπορεί να λειτουργήσει ως αφορμή για την κατανόηση του πολιτισμού της γλώσσας-στόχου (Carter & Long 1991:87, Collie & Slater 1987:3-6) και για τη συνειδητοποίηση και διερεύνηση ομοιοτήτων και διαφορών πολιτισμικού χαρακτήρα (Ghosn 2002:172, Πασχαλίδης 2002:322). Αυτός ο πολιτισμικός εμπλουτισμός (Lazar 1993:17, Byram 2003) αποτελεί και το υπόβαθρο για τη δημιουργία διαλεκτικά ανοιχτής και πλουραλιστικής πολιτισμικής ταυτότητας (Αγάθος, Γιαννακού, Δημοπούλου, Μοντζολή, Ρουμπής, Τσοτσόρου 2011:4-5, Hall 2005:48). Τα κείμενα που αποτελούν την πρώτη ύλη του λογοτεχνικού μαθήματος προτείνουν ουσιαστικά τρόπους ερμηνείας της πραγματικότητας (Vlaeminck 2004:82, Χοντολίδου 2002:279), περιβεβλημένους με το γλωσσικό ένδυμα της γλώσσας-στόχου (Δενδρινού, 2004:54), γι' αυτό και περιλαμβάνουν πλήθος αντιλήψεων, αξιών, ηθών, εθίμων, ιστορικών γεγονότων, ιδεολογικών στοιχείων κ.λπ. (Carter & Long 1991:2) που προσφέρονται στους σπουδαστές για δημιουργική επεξεργασία, κριτική αποκατάσταση και διαπολιτισμική ανασύνθεση.

2. Η θέση του λογοτεχνικού κειμένου στη διδασκαλία

Η διδακτική αξιοποίηση του λογοτεχνικού κειμένου εντάσσεται στην ευρύτατη διαδικασία απόκτησης γραμματισμού στη δεύτερη / ξένη γλώσσα, η οποία γίνεται αντιληπτή, στη συγκεκριμένη περίπτωση, ως αλυσίδα διαδοχικών μεταβάσεων από τον προφορικό στον γραπτό λόγο, από τον καθημερινό στον επίσημο, από τον αυθόρμητο στον επιμελημένο και από τον μη πρότυπο στον πρότυπο (Baynham

¹ Έρευνες καταγραφής των απόψεων των σπουδαστών (Yilmaz 2012: 86-99, Akyel, & Yalçin 1990:174-180) περιλαμβάνουν την ανάπτυξη των γλωσσικών και πολιτισμικών δεξιοτήτων στα αποτελέσματα της διδακτικής χρήσης της λογοτεχνίας.

1990:16-17). Στο πλαίσιο αυτό, η τριπλή οπτική γωνία στη μελέτη του διδακτικού ρόλου της λογοτεχνίας, όπως διαγράφηκε στα προηγούμενα, συγκεκριμενοποιείται στις ακόλουθες παρατηρήσεις:

α) Η ύπαρξη ενός σώματος αυθεντικού υλικού υψηλής ποιότητας αποτελεί παράγοντα εμπλουτισμού της διδακτικής διαδικασίας, εφόσον καλλιεργεί τις γλωσσικές δεξιότητες, οξύνει την ικανότητα ερμηνείας και εκτίμησης των κειμένων της δεύτερης / ξένης γλώσσας, αναπτύσσει τη φαντασία και το συναίσθημα (Rosenblatt, 1995:38,184) και γενικά επεκτείνει τα όρια της ανθρωπιστικής παιδείας. Παράλληλα, η εμπλοκή της λογοτεχνίας από τη μια πλευρά έχει την έννοια ότι αποτρέπει από το ολίσθημα της επιλογής κειμένων μόνο βάσει χρησιμότητας (όπως λ.χ. τα δημοσιογραφικά ή τα διαφημιστικά) (Σπανός 2001:195), ενώ από την άλλη ενισχύει τα κίνητρα που ωθούν τους σπουδαστές στην εκμάθηση της γλώσσας-στόχου λόγω της παγκοσμιότητας, της ποικιλίας και της πρωτοτυπίας των θεμάτων της (Lazar 1993:11, Maley 1989:11, Maley & Duff 1990).

β) Τα προϊόντα της λογοτεχνίας διακρίνονται, το καθένα ξεχωριστά, για τη μοναδικότητα και την αυτονομία τους ως προς την αναπαράσταση της εμπειρίας (Rifaterre 1985:136, Alter 1985:68), και για τον πλούτο των σημασιών, των πολιτισμικών συνυποδηλώσεων και των μηνυμάτων (Wissman Bruss 1975:349) που διαθέτουν προς μελέτη και κριτική αξιολόγηση –άρα μπορούν να εμπλουτίσουν τον γνωσιακό ορίζοντα των σπουδαστών. Ως προς αυτό έχει ιδιαίτερη σημασία η προσεκτική επιλογή των κειμένων, είτε ο διδάσκων αποφασίσει να αξιοποιήσει αυτόνομα έργα ευσύνοπτου μεγέθους είτε προκρίνει τη λύση της χρήσης αποσπασμάτων². Βασικός στόχος σε κάθε περίπτωση είναι η ελεύθερη και δημιουργική χρήση της γλώσσας προς την κατεύθυνση της παραγωγής λόγου (προφορικού και γραπτού), έτσι ώστε να προκύψει πολύ εξαγόμενο υλικό από λίγο εισαγόμενο (Maley 1989:11).

γ) Ειδικότερα η αφήγηση, ως λογοτεχνικό είδος, αποτελείται από μια ακολουθία γεγονότων ή περιστατικών και πλάθει ένα σύνολο κανόνων και αξιών με μικρότερη ή μεγαλύτερη αληθοφάνεια, δηλαδή αντιστοίχιση προς τον εξωκειμενικό κόσμο (Meunier 1996:159-160). Τα γνωρίσματα αυτά συνιστούν διαρκή πρόκληση για τους σπουδαστές, υπό την έννοια ότι τους παρακινούν σε συνεχή ανακατασκευή και αναθεώρηση της εικόνας του εαυτού τους και της θέσης τους μέσα στον κόσμο, με άξονα την καινούργια πραγματικότητα που υποδεικνύει το ξενόγλωσσο κείμενο. Επιπλέον, επειδή η αφηγηματική πεζογραφία διαθέτει πλοκή και διεγείρει το ενδιαφέρον του δέκτη, συνδέεται άμεσα με την έννοια της απόλαυσης της ανάγνωσης (Hall 2005:47-57). Με άλλα λόγια, ακόμη και αν επιλεγεί η «δύσκολη» λύση της αξιοποίησης εκτενών αφηγηματικών κειμένων, προκύπτει διδακτικό όφελος για την τάξη της Νέας Ελληνικής ως δεύτερης / ξένης γλώσσας, εφόσον οι σπουδαστές έρχονται σε επαφή με σημαντικά έργα και ασκούνται και εθίζονται στην ανάγνωση και την ολιστική ερμηνεία τους, διαμορφώνοντας έτσι το σώμα των αναγνωστών της νεοελληνικής λογοτεχνίας του μέλλοντος³.

3. Επιδιωκόμενες δεξιότητες

Όλα τα παραπάνω αντλούν τη χρησιμότητά τους από το γενικότερο πλαίσιο των επιδιωκόμενων δεξιοτήτων –με άλλα λόγια, το τι ακριβώς επιδιώκουμε να επιτύχουμε με την εισαγωγή του λογοτεχνικού κειμένου στην τάξη της Νέας Ελληνικής ως δεύτερης / ξένης γλώσσας.

Μια πρώτη απάντηση στο σύνθετο αυτό ζήτημα είναι ότι η λογοτεχνία μοιάζει με οποιοδήποτε άλλο γλωσσικό διδακτικό υλικό και στοχεύει στην επέκταση της γλωσσικής ικανότητας των αλλόγλωσσων σπουδαστών, εφόσον καλλιεργεί τις δεξιότητες που σχετίζονται με την παραγωγή προφορικού και γραπτού λόγου (Brumfit & Johnson 1979). Ειδικότερα, ωστόσο, για την περίπτωση της διδακτικής αξιοποίησης κειμένων με λογοτεχνικό περιεχόμενο, η γενική έννοια της *γλωσσικής ικανότητας* προτείνεται να εξειδικευτεί στις ειδικότερες παραμέτρους της *αναγνωστικής*, της *λογοτεχνικής* και της *διαπολιτισμικής* ικανότητας.

Πιο συγκεκριμένα, μέσω της διδασκαλίας της λογοτεχνίας επιδιώκεται να αποκτήσουν οι σπουδαστές την ικανότητα να αντιμετωπίζουν τις γλωσσικές προκλήσεις –κυρίως, αν και όχι αποκλειστικά– του αφηγηματικού κειμένου, να το διαβάσουν με ευχέρεια για να μπορούν να αντλήσουν απόλαυση από την πλοκή και το περιεχόμενό του (Hall 2005:111-113)· περαιτέρω, να αναπτύξουν τεχνικές αυτοκαθοδήγησης και αισθητήριο επιλογής της ποιοτικής αφήγησης (Sinclair 1996:140, Cook 1996:155), μέσα στον κατακλυσμό έντυπου, ηλεκτρονικού κ.λπ. υλικού της σύγχρονης ελληνικής κοινωνίας – *αναγνωστική ικανότητα*.

² Το ζήτημα της χρήσης αποσπασμάτων είναι εκτός των ορίων αυτής της εργασίας, αλλά προσφέρεται για μελλοντική έρευνα.

³ Προτάσεις διαχείρισης εκτενών λογοτεχνικών έργων υπάρχουν στα νέα Προγράμματα Σπουδών που εκτίθενται στην ιστοσελίδα του Ψηφιακού Σχολείου (digitalschool@minedu.gov.gr), αλλά βρίσκονται εκτός των ορίων της συγκεκριμένης εργασίας.

Από την άλλη μεριά, η εμπλοκή της λογοτεχνίας στη διδακτική της δεύτερης / ξένης γλώσσας στοχεύει στην καλλιέργεια της εκτίμησης της λογοτεχνικότητας του κάθε κειμένου (Carter 1986:110), από γλωσσική, αισθητική και διακειμενική άποψη. Αν οι σπουδαστές φτάσουν στο σημείο να αξιολογούν τα γλωσσικά πρότυπα που προτείνει το κείμενο (Carter & Long 1991:7), να διατυπώνουν υποθέσεις σχετικά με τις προθέσεις του συγγραφέα (Hill 1986:97), να κρίνουν τις υποκειμενικές απόψεις, να εξάγουν συμπεράσματα και να ανακαλύπτουν συνδέσεις με άλλα κείμενα (Hall 2005:149), τότε έχουν κατακτήσει τη *λογοτεχνική ικανότητα*. Οι Carter & Long υποστηρίζουν

Τέλος, ο απώτερος στόχος του λογοτεχνικού μαθήματος στους αλλόγλωσσους σπουδαστές πρέπει να είναι η προώθηση σημείων κατανόησης και σύγκλισης της πολιτισμικής εμπειρίας του καθενός με την αντίστοιχη των υπολοίπων (Πασχαλίδης 2002:331, Καλλιαμπέτσου-Κόρακα 2004:402), αλλά και με τον πολιτισμό της γλώσσας – στόχου, δηλαδή τον ελληνικό. Η αναγνώριση της ρευστότητας και της σχετικότητας των πολιτισμικών ταυτοτήτων και η ανασύνθεση, σε καθημερινή βάση, του πολιτισμικού υβριδίου της ξενόγλωσσας τάξης (Lazar 1993:11, Hall 2005:66) αποτελούν τον πυρήνα της *διαπολιτισμικής ικανότητας*.

4. Η λογοτεχνία στα εγχειρίδια της διδασκαλίας της Νέας Ελληνικής ως ξένης

Στο ακόλουθο κεφάλαιο θα εστιάσουμε σε όλα τα εγχειρίδια διδασκαλίας της Νέας Ελληνικής ως ξένης που περιέχουν λογοτεχνικά έργα ή αποσπάσματα από αυτά, από το 1982 ως και τις πιο πρόσφατες εκδόσεις, με σημείο εκκίνησης τα εγχειρίδια που εμπεριέχουν τις περισσότερες αναφορές στη λογοτεχνία.

Το εγχειρίδιο της Σ. Τλούπα, *Πολιτιστικό Πανόραμα - Νέα Ελληνικά και Πολιτισμός* (1994) θα μπορούσε να θεωρηθεί το πιο πλούσιο σε λογοτεχνικά αποσπάσματα, αλλά και το πιο αντιπροσωπευτικό για την παρουσίαση της Νεοελληνικής Λογοτεχνίας στους σπουδαστές της ελληνικής ως ξένης. Περιλαμβάνει μια ολόκληρη ενότητα αφιερωμένη στην ιστορία της Νεοελληνικής Λογοτεχνίας. Το θεωρητικό κείμενο, που προηγείται των αποσπασμάτων, έχει ως αφετηρία την περίοδο του 11ου - 12ου αιώνα. Ακολουθούν η Φραγκοκρατία, η περίοδος μετά την Άλωση και η Κρητική Λογοτεχνία (16ος-17ος αιώνας). Γίνεται ιδιαίτερη μνεία στο δημοτικό τραγούδι, στον Ελληνικό Διαφωτισμό και ακολουθεί πληροφοριακό υλικό για τον Σολωμό και του Κάλβο, τη Φαναριώτικη και την Επτανησιακή Σχολή. Ως επόμενος σταθμός προβάλλεται η γενιά του 1880, με έμφαση στον Παλαμά και αναφορά στο ηθογραφικό διήγημα. Έπεται μια γενικότερη αναφορά στη λογοτεχνία του 20ου αιώνα, ιδιαίτερα στους Καβάφη, Σικελιανό και Καζαντζάκη. Τέλος, η πορεία της νεοελληνικής λογοτεχνίας ολοκληρώνεται με τη γενιά του 1930 και τη μεταπολεμική λογοτεχνική παραγωγή. Ακολουθούν 17 δείγματα νεοελληνικής λογοτεχνικής δημιουργίας, από τον *Ερωτόκριτο* ως τον Σολωμό και τον Παλαμά και από τον Καζαντζάκη ως τη Ζατέλη.

Εξαιρετικά πλούσια σε υλικό προερχόμενο από τη λογοτεχνία είναι τα βιβλία 3 και 4 από τη σειρά *Ελληνικά για ξενόγλωσσους* (1991, 1995), των Μαυρούλια και Γεωργαντζή. Το τρίτο εγχειρίδιο περιέχει αποσπάσματα κυρίως από έργα της γενιάς του '30, αλλά δε λείπουν και αναφορές σε παλαιότερες περιόδους (Μαρκοράς, Πολυδούρη), καθώς και στη σύγχρονη λογοτεχνία (Β. Αλεξάκης, Γιάννης Κοντός). Το τέταρτο βιβλίο αποτελεί ένα εγχειρίδιο αποτελούμενο κατεξοχήν από λογοτεχνικά αποσπάσματα. Στον τομέα της ποίησης, υπάρχει μία ευρεία ποικιλία από το εναρκτήριο δείγμα της Νεοελληνικής Λογοτεχνίας (*Ο θάνατος του Διγενή Ακρίτα*), την Κρητική Λογοτεχνία (*Ερωτόκριτος*) και την Επτανησιακή Σχολή (Σολωμός, Κάλβος, Βαλαωρίτης). Περιέχονται, επίσης, αποσπάσματα από έργα της Αθηναϊκής Σχολής (Παλαμάς) και της γενιάς του '30. Εντύπωση προκαλεί η απουσία σύγχρονων ποιητών. Από την άλλη πλευρά, στο πεδίο της πεζογραφίας υπάρχουν αποσπάσματα από τη Φαναριώτικη Σχολή, από τα *Απομνημονεύματα* του Μακρυγιάννη, αλλά και από έργα του Μυριβήλη, του Καρκαβίτσα, του Θεοτόκη και του Τριβιζά. Ενδιαφέρον είναι το γεγονός ότι υπάρχει και απόσπασμα από το θεατρικό έργο *Φωνάζει ο κλέφτης* του Ψαθά.

Το βιβλίο *Ανακαλύπτοντας το Κείμενο* (2009) περιέχει πλήθος λογοτεχνικών αποσπασμάτων και είναι το μόνο που εστιάζει κατά κύριο λόγο στη σύγχρονη λογοτεχνία. Σημαντικά δείγματα και σημαντικοί λογοτέχνες παρουσιάζονται σε αυτό: αποσπάσματα από το μυθιστόρημα *Ο Καπετάν-Μιχάλης* του Καζαντζάκη, αλλά και από έργα των Τσιφόρου, Σαμαράκη, Κουμανταρέα, Σ. Τριανταφύλλου, Φακίνου, Τατσόπουλου.

Αντίστοιχα, το βιβλίο *Ακολουθώντας το κείμενο* (2004) περιέχει αρκετά κείμενα με τοπιογραφικό χαρακτήρα, όλα του Ουράνη. Στο εγχειρίδιο συναντάμε, επίσης, αποσπάσματα από έργα του Θεοτοκά, της Ιορδανίδου, του Σαμαράκη, του Ταχτσή και της Δούκα.

Στο εγχειρίδιο *Περισσότερα Ελληνικά* (1982) συναντάμε έναν λαϊκό μύθο (*Οι δώδεκα μήνες και το βαρέλι τους*), αποσπάσματα από πεζά κείμενα των Βενέζη, Ιορδανίδου και Καραγάτση, ένα

χρονογράφημα της Ακρίτα και ένα μόνο δείγμα ποιητικής γραφής (Ρίτσος, «Όνειρο καλοκαιρινού μεσημεριού»).

Στο βιβλίο *Πλουτίζω τα Ελληνικά μου* (1983) η προβολή της λογοτεχνίας γίνεται εντονότερη. Τα περισσότερα δείγματα προέρχονται από τον πεζό λόγο: πρόκειται για αποσπάσματα από μυθιστορήματα των Καρκαβίτσα, Καζαντζάκη, Βενέζη, Βλάχου, Σαμαράκη, Ταχτσή, Χαρακτηριστικό είναι ότι υπάρχει μόνο ένα δείγμα ποιητικού λόγου (του Γρυπάρη) και επίσης ένας λαϊκός μύθος.

Το βιβλίο των Παναγοπούλου και Χατζηπαναγιωτίδου, *Ελληνικά για Προχωρημένους, Γ κύκλος* (1997), αποτελείται στην πλειοψηφία του από άρθρα και δοκίμια επιστημονικού λόγου δημοσιευμένα στον τύπο. Στην ενότητα «Γλώσσα» υπάρχουν συντομώτατα αποσπάσματα από ποιήματα τα οποία χρησιμοποιούνται εν είδει προτροπών (Σεφέρης, Ελύτης, Παλαμάς, Ψυχάρης). Στην 7η ενότητα εντάσσεται ένα απόσπασμα από τη *Φανέλα με το 9* του Κουμανταρέα. Στην 10η ενότητα υπάρχουν ρήσεις Ελλήνων (Μακρυγιάννη, Σεφέρη, Πεντζίκη, Βασιλικού) και ξένων συγγραφέων, που αναφέρονται στη χώρα μας. Ακολουθώντας, στην ενότητα 11 («Πολιτισμός – Τέχνες – Ψυχαγωγία») υπάρχει και ένα ποίημα της Σαφρούς σε μετάφραση του Χριστιανόπουλου.

Στο βιβλίο Γ επιπέδου των Ε. Δεμίρη–Προδρομίδου, Ρ. Καμαριανού–Βασιλείου *Νέα Ελληνικά για Μετανάστες, Παλιννοστούντες, Πρόσφυγες και Ξένους* (2004), υπάρχει ένα εκτενές αφιέρωμα στην ελληνική λογοτεχνία στην ενότητα 9. Η έναρξη της ενότητας γίνεται με το προοίμιο της *Οδύσσειας* και τη μετάφρασή του. Το πέραςμα στη Νεοελληνική Λογοτεχνία προσεγγίζεται αρχικά θεωρητικά και συγκεκριμένα, με τη βασική διάκριση της Ν.Ε.Λ. στα είδη του πεζού και ποιητικού λόγου, με αρκετές πληροφορίες για το κάθε είδος. Ακολουθούν δύο μικρά αποσπάσματα έργων του Ελύτη και παραθέματα του Καβάφη και του Ρίτσου. Από την πλευρά της πεζογραφίας παρουσιάζεται ένα χαρακτηριστικό απόσπασμα από τον *Ζορμπά* του Καζαντζάκη. Στις επαναληπτικές ασκήσεις της ενότητας συναντάμε απόσπασμα από έργο του Βενέζη. Αξιοσημείωτο είναι ότι υπάρχουν και βιογραφικές αναφορές για τον κάθε λογοτέχνη, έργο του οποίου παρουσιάζεται, ωστόσο η επεξεργασία των κειμένων αφορά κατά κύριο λόγο το λεξιλογικό επίπεδο.

Στο τρίτο βιβλίο της σειράς *Επικοινωνήστε Ελληνικά* (1994) υπάρχει ένα κείμενο με τίτλο «Μία σύντομη ματιά στη σύγχρονη λογοτεχνία». Οι αναφορές περιορίζονται κυρίως σε ονόματα λογοτεχνών, ενώ τα δείγματα έργων που παρουσιάζονται είναι μόλις τρία: ένα απόσπασμα από τη *Χαμένη Άνοιξη* του Τσίρκα, ένα ποίημα του Σεφέρη και ένα απόσπασμα από το θεατρικό έργο *Η αυλή των θαυμάτων* του Καμπανέλλη.

Στο βιβλίο της Ελληνοαμερικανικής Ένωσης *Συνεχίζοντας* (2004) η παρουσία της λογοτεχνίας ξεκινά ήδη από τη δεύτερη ενότητα, με ένα παραδοσιακό παραμύθι από τη συλλογή *Μαγικά παραμύθια του ελληνικού λαού* του Ιωάννου. Ακολουθούν τρεις μύθοι του Αισώπου. Στη συνέχεια συναντάμε ένα διήγημα του Ταχτσή με τοπιογραφικό χαρακτήρα, το γνωστό ποίημα του Καβάφη «Ιθάκη» και τέλος, ένα μονόπρακτο για το θέατρο σκιών του Μ. Ξάνθου σε διασκευή Ιωάννου, *Ο Καραγκιόζης σε ταξίδι για δουλειές*.

Στο εγχειρίδιο *Η γλώσσα που μιλάμε στην Ελλάδα. Τα Ελληνικά ως ξένη γλώσσα* (2004) υπάρχουν δύο αποσπάσματα διηγημάτων του Αλ. Παπαδιαμάντη και ένα διήγημα του Καραγάτση, ενώ στο βιβλίο του Σιόντη *Μαθαίνω την Ελληνική Γλώσσα* (2001) εντοπίζονται αποσπάσματα από το *Πλατύ Ποτάμι* του Μπεράτη και τη *Μεγάλη Λιτανεία* του Καραγάτση.

Τέλος, ένα από τα πλέον πρόσφατα εγχειρίδια, το *Ακόμα καλύτερα* (2011) των Αντωνίου, Γαλαζούλα, Δημητράκου, Μαγγανά, εμπεριέχει τη σύγχρονη ελληνική λογοτεχνία στις διδακτικές του προτάσεις, με αποσπάσματα από τα έργα *Και με το φως του λύκου επανέρχονται* της Ζατέλη, *Η Κασσάνδρα και ο Λύκος* της Καραπάνου, *Όνειρο καλοκαιρινού μεσημεριού* του Ρίτσου, αλλά και το *Χάριν Παιδιάς* του Σαββόπουλου. Χαρακτηριστική είναι και η ενότητα 12 του εγχειριδίου, με στοιχεία από λαϊκούς μύθους και την αρχαία ελληνική μυθολογία καθώς και νεότερα λαϊκά παραμύθια.

5. Συμπεράσματα

Παρατηρώντας το λογοτεχνικό υλικό που περιέχεται στα διάφορα εγχειρίδια, οδηγούμαστε στα ακόλουθα συμπεράσματα:

α) Η λογοτεχνία είναι ανύπαρκτη σε εγχειρίδια που αφορούν τα αρχικά στάδια εκμάθησης της γλώσσας και πυκνώνει όσο το επίπεδο ανεβαίνει. Αποψη μας είναι ότι, ακόμα και σε ένα αρχικό στάδιο εκμάθησης της γλώσσας, που αφορά κυρίως στην κάλυψη της ανάγκης νέου λεξιλογίου, η απλή ανάγνωση λογοτεχνικών κειμένων βοηθάει τους εκπαιδευόμενους να έρθουν σε μια πρώτη επαφή με πιο σύνθετες δομές από εκείνες απλών επικοινωνιακών καταστάσεων. Επιπλέον, η σύνδεση με το πολιτισμικό πλαίσιο της γλώσσας-στόχου γίνεται πιο φυσικά (Nation & Coady, 1988). Παρά ταύτα, είναι γεγονός ότι οι σπουδαστές μέσου και προχωρημένου επιπέδου αποκομίζουν μεγαλύτερο όφελος

από την αξιοποίηση της λογοτεχνίας, καθώς μπορούν να ανταποκριθούν σε συλλογισμούς πιο αφηρημένους και σύνθετους από εκείνους των σπουδαστών του αρχάριου επιπέδου.

β) Ιδιαίτερα σε παλιότερα εγχειρίδια δεν επιχειρείται κάποιο είδος συστηματοποιημένης παρουσίασης των λογοτεχνικών έργων, για παράδειγμα, ανάλογα με το βαθμό δυσκολίας κατανόησης, αλλά ακολουθείται είτε η χρονική σειρά συγγραφής τους, είτε, κυρίως στα νεότερα βιβλία, η συνάφειά τους με τη γενική θεματολογία της ενότητας. Κατά την άποψή μας η παρουσίαση κατά χρονολογική σειρά δημιουργίας του έργου δε θα πρέπει να αποτελεί τόσο σημαντικό κριτήριο, όσο η συνάφεια με τη θεματολογία της ενότητας και το γλωσσικό επίπεδο.

γ) Ο πεζός λόγος είναι το επικρατέστερο λογοτεχνικό είδος μέσα στα εγχειρίδια εκμάθησης της δεύτερης γλώσσας, ενώ η παρουσία του ποιητικού είναι περιορισμένη και παρουσιάζεται σε ανώτερα επίπεδα γλωσσομάθειας. Αυτό είναι εύλογο να συμβαίνει, καθώς η ποίηση σχετίζεται κυρίως με την συνυποδηλωτική χρήση της γλώσσας, που πιθανόν να δυσκολεύει ακόμα και φυσικούς ομιλητές.

δ) Παρατηρώντας τα υπάρχοντα εγχειρίδια συμπεραίνουμε ότι δεν εκμεταλλεύονται πλήρως την παρουσία του εκάστοτε λογοτεχνικού κειμένου, για να το επεξεργαστούν σε επίπεδο λεξιλογικό, συντακτικό, ερμηνευτικό, επικοινωνιακό και πολιτισμικό ταυτόχρονα. Σημαντικό είναι το κείμενο ή το απόσπασμα το οποίο επιλέγεται να είναι αυθεντικό, με τις απαραίτητες ωστόσο προϋποθέσεις της νοηματικής, γλωσσικής και αισθητικής αυτοτέλειας και άρα κατάλληλο για επεξεργασία και ανάλυση. Έτσι το αποτέλεσμα είναι διπλά θετικό, αφού από τη μια πλευρά διδάσκεται η γλώσσα και συγχρόνως δεν παραμερίζεται το πολιτιστικό περιεχόμενο.

6. Επίλογος

Από τη συζήτηση που προηγήθηκε και με δεδομένο τα γεγονότα η λογοτεχνική ικανότητα, ως μέρος της γλωσσικής ικανότητας, είναι απαραίτητη για την απόκτηση της γλωσσικής ικανότητας στο υψηλότερο επίπεδο (Carter & Long 1991:6), υιοθετείται η άποψη για τον σημαντικό ρόλο που, κατά την άποψή μας, μπορεί να διαδραματίσει η νεοελληνική λογοτεχνία στη διδασκαλία της νέας ελληνικής γλώσσας ως ξένης, τόσο σε σχέση με την επέκταση του λεξιλογίου και την εμπέδωση ποικίλων γραμματικοσυντακτικών δομών, όσο και σε σχέση με τη διαμόρφωση ουσιαστικής επαφής με τον ελληνικό πολιτισμό και την εδραίωση της διαπολιτισμικής επικοινωνίας. Επιπρόσθετα, η επισκόπηση της ενσωμάτωσης λογοτεχνικών κειμένων σε ευρύ φάσμα εγχειριδίων της Νέας Ελληνικής ως ξένης γλώσσας οδήγησε σε ενδιαφέροντα συμπεράσματα και άφησε να διαφανεί ότι θα ήταν πολύ χρήσιμη μια περισσότερο συστηματική και διαβαθμισμένη παρουσία της νεοελληνικής λογοτεχνίας (πεζογραφίας και ποίησης) στα σχετικά εγχειρίδια και μάλιστα σε όλα τα επίπεδα ελληνομάθειας, και όχι μόνο στα πλέον προχωρημένα. Στην κατεύθυνση αυτή θα είχε ενδιαφέρον, έστω σε πειραματικό επίπεδο, και η δημιουργία εγχειριδίων προσανατολισμένων στη χρήση της νεοελληνικής λογοτεχνίας ως αποκλειστικού μέσου διδασκαλίας της νέας ελληνικής.

ABSTRACT

The development of a syllabus and the course design are two basic factors to successfully teach a foreign language. Consequently, the preparation of a well designed and applicable syllabus could -up to a point- assure an effective teaching.

This proposal is about the new syllabus for the advanced level of teaching Greek as a foreign language of the School of Modern Greek Language (Aristotle University of Thessaloniki). It is based on the Common European Framework for languages, also taking into consideration the structure of the new exam levels of the Center of Greek Language (2011). Moreover, for the formation of the syllabus were included the particular language needs expressed by the students of the school during the past years, considering that at this advanced level the learner's contribution is particularly important.

Λέξεις κλειδιά: αναλυτικό πρόγραμμα σπουδών, syllabus, σχεδιασμός μαθημάτων, ανάλυση γλωσσικών αναγκών, διδασκαλία της Ελληνικής ως Δεύτερης/ Ξένης Γλώσσας.

0. Εισαγωγή

Ένας βασικός παράγοντας για την αποτελεσματική διδασκαλία μιας ξένης γλώσσας, εκτός από τον σχεδιασμό των μαθημάτων, είναι η ανάπτυξη ενός αναλυτικού προγράμματος. Επομένως, η προετοιμασία ενός καλά σχεδιασμένου και εφαρμόσιμου τέτοιου προγράμματος μπορεί να εξασφαλίσει ως ένα βαθμό την αποτελεσματική διδασκαλία.

Σε αυτή την πρόταση, παρουσιάζεται το νέο αναλυτικό πρόγραμμα για το επίπεδο προχωρημένης ελληνομάθειας (Γ1) του Σχολείου Νέας Ελληνικής Γλώσσας (ΣΝΕΓ) του Α.Π.Θ., το οποίο βασίζεται στο Κοινό Ευρωπαϊκό Πλαίσιο Αναφοράς για τη Γλώσσα (ΚΕΠΑ), λαμβάνοντας υπόψη και τη δομή των εξεταστικών δοκιμασιών για τα νέα επίπεδα ελληνομάθειας, όπως ορίζονται από το Κέντρο Ελληνικής Γλώσσας (ΚΕΓ, 2011). Επιπλέον, για τη διαμόρφωση του αναλυτικού προγράμματος συνυπολογίστηκαν και οι ιδιαίτερες γλωσσικές ανάγκες που εκδήλωσαν οι σπουδαστές του ΣΝΕΓ κατά τη διάρκεια των τελευταίων ετών, θεωρώντας ότι σε αυτό το προχωρημένο επίπεδο γλωσσομάθειας είναι ιδιαίτερα σημαντική η συμβολή του εκπαιδευόμενου στην επιτυχημένη κατάρτιση ενός προγράμματος διδασκαλίας.

1. Στόχοι - Μεθοδολογία

Το παρόν αναλυτικό πρόγραμμα έχει σχεδιαστεί με στόχο αφενός να εξυπηρετήσει τις ανάγκες των σπουδαστών του Σχολείου Νέας Ελληνικής Γλώσσας, σχετίζεται δηλαδή καθαρά με το προφίλ των συγκεκριμένων σπουδαστών, και αφετέρου να διευκολύνει το έργο των διδασκόντων του Σχολείου που αναλαμβάνουν τη διδασκαλία του συγκεκριμένου επιπέδου. Πιθανόν η εφαρμογή του σε κάποιο άλλο αντίστοιχο ίδρυμα να μην είναι το ίδιο αποτελεσματική.

1.1 Το προφίλ των σπουδαστών στο ΣΝΕΓ

Το Σχολείο Νέας Ελληνικής Γλώσσας ιδρύθηκε το 1970. Από τότε έχει ως αντικείμενο τα μαθήματα ελληνικής γλώσσας και πολιτισμού σε *ενήλικες* ομογενείς και αλλοδαπούς, των οποίων σκοπός εκμάθησης της γλώσσας είναι η φοίτηση σε ελληνικά εκπαιδευτικά ιδρύματα και/ή η γνωριμία με την ελληνική γλώσσα και τον πολιτισμό. Απαραίτητες προϋποθέσεις για την εγγραφή τους στο ΣΝΕΓ είναι να διαθέτουν απολυτήριο τουλάχιστον Δευτεροβάθμιας εκπαίδευσης και νομιμότητα παραμονής κατά τη διάρκεια του προγράμματος.

1.2 Γιατί ένα νέο αναλυτικό πρόγραμμα σπουδών;

Είναι μεγάλη η ανάγκη για την ύπαρξη ενός προγράμματος σπουδών για τη διδασκαλία του συγκεκριμένου επιπέδου ελληνομάθειας. Πρώτα απ' όλα, τα εγχειρίδια που προορίζονται για το Γ1 είναι περιορισμένα και ανεπαρκή (άλλα είναι παρωχημένα, άλλα δεν είναι πλήρη κτλ.). Το πιο σημαντικό όμως είναι ότι δεν είναι ούτε απαραίτητη ούτε επαρκής η χρήση ενός εγχειριδίου. Ο σπουδαστής μπορεί να λειτουργεί αυτόνομα επιλέγοντας βάσει των αναγκών του. Ένα νέο αναλυτικό πρόγραμμα σπουδών για το επίπεδο αυτό θα πρέπει να συνδιαμορφώνεται με τους σπουδαστές του κάθε τμήματος, με βάση τη δυναμική της κάθε ομάδας σπουδαστών. Για το λόγο αυτό, προτείνουμε την πρότερη χρήση ενός *ερωτηματολογίου διερεύνησης αναγκών*, βάσει του οποίου θα τροποποιείται κάθε φορά το πρόγραμμα σπουδών.

1.3 Ο σχεδιασμός

Για το σχεδιασμό του στηριζόμαστε:

- στο Κοινό Ευρωπαϊκό Πλαίσιο Αναφοράς για τη Γλώσσα (ΚΕΠΑ)
- στη δομή των εξεταστικών δοκιμασιών για τα νέα επίπεδα ελληνομάθειας, Κέντρο Ελληνικής Γλώσσας (ΚΕΓ, 2011), οι οποίες τροποποιήθηκαν με βάση το ΚΕΠΑ
- σε διδακτικά εγχειρίδια και προγράμματα σπουδών ή syllabi, που προορίζονται για το επίπεδο αυτό
- στις ιδιαίτερες γλωσσικές ανάγκες που εκδήλωσαν οι σπουδαστές του ΣΝΕΓ κατά τη διάρκεια των τελευταίων ετών (θεωρούμε ότι σε αυτό το προχωρημένο επίπεδο γλωσσομάθειας είναι ιδιαίτερα σημαντική η συμβολή του εκπαιδευομένου στην επιτυχημένη κατάρτιση ενός προγράμματος διδασκαλίας)
- στις ιδιαίτερες γλωσσικές ανάγκες που εκδήλωσαν οι σπουδαστές του τμήματος που αναλαμβάνουμε κάθε φορά με τη χρήση του ερωτηματολογίου διερεύνησης αναγκών που έχουμε ετοιμάσει
- στη διδακτική εμπειρία μας από τμήματα προχωρημένου επιπέδου ελληνομάθειας
- σε συζητήσεις/συνεντεύξεις με συναδέλφους

Πιο αναλυτικά, όσον αφορά τη δομή των εξεταστικών δοκιμασιών του ΚΕΓ, από το 2011, με το Π.Δ. 60/30-6-2010 ΦΕΚ Α' 98 θεσμοθετήθηκαν τα 2 νέα γλωσσικά επίπεδα Α1 (Α1 για παιδιά από 8-12 ετών και Α1 για εφήβους και ενήλικους) και Γ2 και μετονομάστηκαν τα ισχύοντα επίπεδα ως εξής:

Παλαιά επίπεδα	Νέα επίπεδα
	A1
A	A2
B	B1
Γ	B2
Δ	Γ1
	Γ2

Πίνακας 1

Η τροποποίηση αυτή απαιτεί τη δημιουργία ενός νέου εμπλουτισμένου προγράμματος σπουδών, που να καλύπτει τις επιπλέον ανάγκες των υποψήφιων σπουδαστών, έτσι ώστε να αποφευχθεί μια

τυφλή διδασκαλία επικεντρωμένη στις εξετάσεις και βασισμένη αποκλειστικά στην ύλη που προτείνει το ΚΕΓ αλλά και να υπάρχει μια βάση πάνω στην οποία θα μπορέσουν να στηριχθούν οι συγγραφείς των νέων επικαιροποιημένων εγχειριδίων.

Τα εγχειρίδια, προγράμματα σπουδών / syllabi που αντιστοιχούν στο προχωρημένο επίπεδο ελληνομάθειας και τα οποία συμβουλευτήκαμε για την πρότασή μας είναι τα ακόλουθα:

- Αγάθος, Θ., Γιαννακού, Β., Δημοπούλου, Β. & Α. Τσोटσορού, 2004. *Ακολουθώντας το κείμενο: κείμενα για το προχωρημένο επίπεδο ελληνομάθειας*. Αθήνα: Εθνικό και Καποδιστριακό Πανεπιστήμιο Αθηνών.
- Βασιλείου, Ρ. & Ε. Προδρομίδου. «...και καλή επιτυχία». *Νέα Ελληνικά για μετανάστες, παλιννοστούντες, πρόσφυγες και ξένους-Επίπεδο Γ. Μεταίχμιο. (προσαρμοσμένο στα παλιά επίπεδα εξετάσεων ελληνομάθειας του Κέντρου Ελληνικής Γλώσσας)*
- Γαβριηλίδου, Γ., 2010. *Τα καλώς κείμενα για προχωρημένους*, εκδ. University Studio Press.
- Παναγοπούλου, Α. & Α. Χατζηπαναγιωτίδου. *Ελληνικά για προχωρημένους (ομογενείς και αλλογενείς) - Γ κύκλος. Ινστιτούτο Νεοελληνικών Σπουδών*.
- Κίτσα, Β. 2006. *Η διδασκαλία του λεξιλογίου της ελληνικής ως δεύτερης/ ξένης γλώσσας. Λεξικογραφική εφαρμογή. Κέντρο Ελληνικής Γλώσσας*.
- Ιακώβου Μ. & Σ. Μπέλλα, 2004. *Αναλυτικό Πρόγραμμα για τη Διδασκαλία της Νέας Ελληνικής ως Ξένης Γλώσσας σε Ενηλίκους: Προχωρημένο Επίπεδο*. Αθήνα: Πανεπιστήμιο Αθηνών.

1.4 Το ερωτηματολόγιο

Για την ανάλυση των αναγκών των σπουδαστών συντάχθηκε ερωτηματολόγιο διερεύνησης αναγκών, το οποίο συμπληρώθηκε από 34 σπουδαστές επιπέδου Γ1 που παρακολουθούσαν μαθήματα κατά τα ακαδημαϊκά έτη 2009-10 & 2010-11 (η έρευνα βρίσκεται σε εξέλιξη). Το ερωτηματολόγιο περιλαμβάνει ερωτήσεις ως επί το πλείστον κλειστού τύπου, που αφορούν:

- Τα *προσωπικά στοιχεία* των σπουδαστών (ηλικία, καταγωγή, επάγγελμα, σπουδές κτλ.), τα οποία είναι απόρρητα και χρησιμοποιούνται για στατιστικούς λόγους.
- Το *προφίλ* των σπουδαστών. Για ποιους λόγους κάνουν μαθήματα ελληνικών, πώς έμαθαν μέχρι τώρα ελληνικά, πού τα χρησιμοποιούν, πού έχουν αδυναμίες, ποια είναι τα ενδιαφέροντά τους κτλ.
- Τις *θεματικές* που τους ενδιαφέρουν. Έχουν να επιλέξουν ανάμεσα σε: Γλώσσα – Λογοτεχνία, Εκπαίδευση, Εργασία, Ελεύθερο χρόνο – Ψυχαγωγία, Δημόσιο βίο – Κοινωνία – Δημόσιες & Ιδιωτικές Υπηρεσίες, Περιβάλλον – Οικολογία, Πολιτισμό – Παραδόσεις, Ψυχολογία, Υγεία- Διατροφή, Οικονομία, Φυλετικές διακρίσεις – Μετανάστευση, Τεχνολογία, Επιστήμη, Πολιτική, Ελληνική ιστορία (Αρχαία, Βυζαντινή, Νεότερη και Σύγχρονη), Κινηματογράφος – Θέατρο ή να συμπληρώσουν κάποια άλλη.
- Τις *δεξιότητες* που επιθυμούν να καλλιεργήσουν: Κατανόηση/ παραγωγή γραπτού/ προφορικού λόγου.
- Τις *προσδοκίες* τους από το πρόγραμμα. Οι ερωτήσεις της ενότητας αυτής ήταν ανοιχτού τύπου, όπου όσοι σπουδαστές τις απάντησαν στην ουσία επικεντρώνονταν σε κάποιες ανάγκες τους που ήδη είχαν εκφράσει στις προηγούμενες ενότητες του ερωτηματολογίου.

2. Το νέο αναλυτικό πρόγραμμα

Λαμβάνοντας υπόψη όλα τα παραπάνω, αφενός το προφίλ των σπουδαστών του σχολείου και αφετέρου τις ανάγκες των φοιτητών που αποτυπώνονται τόσο μέσα από τα ερωτηματολόγια όσο και από τη δική μας παρατήρηση και εμπειρία κατά τη διάρκεια της εκπαιδευτικής διαδικασίας διδάσκοντας στο επίπεδο των προχωρημένων προβληματιστήκαμε αρκετά για το τι θα έπρεπε να περιέχει ένα πρόγραμμα σπουδών που απευθύνεται σε ένα κοινό με τέτοια ποικιλομορφία. Επιπλέον, ο αριθμός των εγχειριδίων που υπάρχουν για το Γ1 επίπεδο είναι περιορισμένος και δεν μπορεί να ανταποκριθεί στο εύρος των αναγκών των σπουδαστών του ΣΝΕΓ.

Σε όλες τις διαφορές που προαναφέρθηκαν σίγουρα θα πρέπει να προστεθεί και το γνωστικό, εκπαιδευτικό και πολιτισμικό κεφάλαιο που φέρει ο κάθε σπουδαστής. Έτσι, οδηγηθήκαμε στο συμπέρασμα ότι δεν είναι δυνατόν ειδικά στο προχωρημένο επίπεδο να περιοριστούμε μόνο σε ένα syllabus. Γι' αυτούς τους λόγους αναγνωρίσαμε την αναγκαιότητα κατάρτισης ενός αναλυτικού προγράμματος σπουδών για τη διδασκαλία της ελληνικής ως δεύτερης. Εκτός των άλλων, πιστεύουμε ότι ιδιαίτερα ένας ενήλικας που επιλέγει συνειδητά να παρακολουθήσει μαθήματα γλώσσας προχωρημένου επιπέδου μπορεί και πρέπει να διαθέτει έναν τέτοιο βαθμό αυτονομίας που να επιλέγει ο ίδιος ή η ίδια το περιεχόμενο του γλωσσικού προγράμματος που πρόκειται να παρακολουθήσει.

Επομένως, αυτό που προτείνουμε είναι η εμπλοκή και ο συμμετοχικός χαρακτήρας του εκπαιδευόμενου στη διαμόρφωσή του syllabus, το οποίο θα αντλεί το περιεχόμενό του από το curriculum. Αυτό προϋποθέτει τη διερεύνηση των εκπαιδευτικών και γλωσσικών αναγκών των σπουδαστών κατά την έναρξη κάθε τμήματος προχωρημένου επιπέδου με τον τρόπο που περιγράφηκε παραπάνω. Επιπλέον, η διερεύνηση αυτή κρίνεται απαραίτητη και για το λόγο ότι το Σχολείο Νέας Ελληνικής του ΑΠΘ προβλέπει μια ποικιλία προγραμμάτων ως προς τη χρονική διάρκεια (ετήσια, τριμηνιαία χειμερινά και εαρινά, μηνιαία χειμερινά και θερινά) με 10ωρη ή 20ωρη εβδομαδιαία διάρκεια.

Θα πρέπει να σημειωθεί ότι σε αυτό το επίπεδο γλωσσομάθειας έχουν ήδη κατακτηθεί όλες οι βασικές δομές και το λεξιλόγιο σε τέτοιο βαθμό που ο ομιλητής της Γ2 μπορεί να ανταπεξέλθει με μεγάλη άνεση στις καθημερινές του ανάγκες. Ήδη από το επίπεδο B2 οι σπουδαστές αρχίζουν να έρχονται σε επαφή με πιο επίσημες μορφές λόγου και κειμενικά είδη. Στο Γ1 επίπεδο τα κειμενικά είδη του επίσημου λόγου διαδραματίζουν κυρίαρχο ρόλο.

Επίσης, η ερμηνεία των αποτελεσμάτων του ερωτηματολογίου υποδεικνύει τις ανάγκες των εκπαιδευόμενων για βαθύτερη κατανόηση της ελληνικής πραγματικότητας και κατ' επέκταση της κοινωνίας αλλά και για μια πιο ολοκληρωμένη ένταξη στην κοινωνία αυτή διαμέσου της γλώσσας. Οι προϋποθέσεις αυτές είναι κρίσιμες για την επιλογή των γλωσσικών στοιχείων, την καλλιέργεια των γλωσσικών δεξιοτήτων αλλά και την ανάπτυξη της κοινωνικοπολιτισμικής τους ικανότητας.

2.1 Οι τέσσερις δεξιότητες

- **Κατανόηση προφορικού λόγου**
Βασικός στόχος αυτής της δεξιότητας είναι να αναπτύξουν οι σπουδαστές την ικανότητα να κατανοούν με ευκολία μια ευρεία γκάμα τύπων κειμένων του επίσημου λόγου όπως ειδησεογραφικά δελτία της τηλεόρασης και του ραδιοφώνου, ομιλίες που αφορούν διάφορα θέματα, να συναλλάσσονται με ευχέρεια με δημόσιες υπηρεσίες κατανοώντας εξειδικευμένες πληροφορίες και οδηγίες, να παρακολουθούν με άνεση πολιτικές συζητήσεις είτε επίσημου είτε ανεπίσημου επικοινωνιακού πλαισίου. Θα πρέπει να τονίσουμε σε αυτό το σημείο ότι ένας σημαντικός αριθμός σπουδαστών του σχολείου μας ζει στο εξωτερικό, γεγονός που σημαίνει έκθεση σε φτωχό προφορικό γλωσσικό εισαγόμενο το οποίο θα πρέπει να εμπλουτιστεί επαρκώς κατά την εκπαιδευτική διαδικασία.
- **Παραγωγή προφορικού λόγου**
Η εξοικείωση των σπουδαστών με τον καθημερινό λόγο θεωρείται δεδομένη σε αυτό το επίπεδο. Συνεπώς, πρέπει να προετοιμαστούν για τη μετάβαση στην παραγωγή προφορικού λόγου χρησιμοποιώντας επίσημο ύφος τόσο στο επίπεδο του λεξιλογίου όσο και στη χρήση των σύνθετων μορφοσυντακτικών δομών που απαιτούνται. Το μεγαλύτερο ενδιαφέρον των σπουδαστών που συμμετείχαν στην έρευνα εστιάστηκε στη συμμετοχή σε συζητήσεις πολιτικού και κοινωνικού περιεχομένου, εύρημα που αναδεικνύει τη διάθεση για μεγαλύτερη εμπλοκή σε ένα βαθύτερο επίπεδο στην κοινωνική ζωή της χώρας. Ωστόσο, θα πρέπει να εκφράζονται με ευκολία όχι μόνο σε περιστάσεις διάδρασης αλλά για παράδειγμα και κατά την παρουσίαση ενός θέματος σε κοινό ακολουθώντας τις συμβάσεις που χαρακτηρίζουν μια τέτοια δραστηριότητα.
- **Κατανόηση γραπτού λόγου**
Είναι μεγάλο το εύρος των κειμένων με τα οποία μπορούν να έρθουν σε επαφή οι εκπαιδευόμενοι, εκτός από το άρθρο που αποτελεί τον κυρίαρχο τύπο κειμένου στα διδακτικά εγχειρίδια αυτού του επιπέδου. Έτσι, ίσως εξηγείται αυτή η επιλογή κειμενικού τύπου από έναν μεγάλο αριθμό σπουδαστών. Πάραυτα υπάρχει πληθώρα κειμένων που απουσιάζουν συνήθως από τη διδασκαλία σε προχωρημένο επίπεδο, όπως είναι το λογοτεχνικό κείμενο που ήταν το στοιχείο που επέλεξαν οι περισσότεροι εξαιτίας ίσως και της δυσκολίας που παρουσιάζει ως προς την κατανόηση, η ποίηση αλλά και διάφορα είδη εγγράφων όπως

συμβάσεις, συμβόλαια, προκηρύξεις, επαγγελματικές επιστολές κ.α. τα οποία, όταν οι σπουδαστές τα συναντούν στην καθημερινή τους ζωή, τα αντιμετωπίζουν με δέος λόγω του ιδιαίτερα ασυνήθιστου λεξιλογίου που περιέχουν.

- Παραγωγή γραπτού λόγου
Στην παραγωγή γραπτού λόγου, όπως προέκυψε και από τις απαντήσεις στα ερωτηματολόγια, οι ανάγκες των σπουδαστών αφορούν και πάλι τύπους κειμένων του επίσημου λόγου σχετικούς με την επαγγελματική ζωή. Βέβαια η πιο δημοφιλής επιλογή είναι η σύνταξη άρθρου η οποία όμως μπορεί να συνδέεται με το γεγονός ότι κατά την ανάπτυξη αυτής της δεξιότητας στη διδακτική πράξη αυτό το είδος ζητείται συνήθως να συντάξουν παρόλο που στην κοινωνική πραγματικότητα δεν είναι ανάλογη η συχνότητα εμφάνισης του ως γραπτή παραγωγή.

2.2 Δομή/ Περιεχόμενο

- Κειμενικά είδη- Κειμενικοί τύποι

Η κειμενοκεντρική προσέγγιση βρίσκεται στο επίκεντρο του ενδιαφέροντος τα τελευταία χρόνια στη διδασκαλία της γλώσσας ως μητρικής, δεύτερης ή ξένης. Ειδικά όσον αφορά στην τελευταία, η έρευνα και οι θεωρίες που αναπτύχθηκαν στο πλαίσιο της Γλωσσικής Διδασκαλίας για Ειδικούς Σκοπούς προσφέρουν ένα μοντέλο εφαρμογής που μπορεί να προσαρμοστεί στις απαιτήσεις και τις προϋποθέσεις τμημάτων προχωρημένου επιπέδου γλωσσομάθειας. Αυτό που ενδιαφέρει περισσότερο είναι οι τύποι κειμένων, γραπτών και προφορικών, οι οποίοι μπορεί να συγκαταλέγονται σε ένα κειμενικό είδος ή και περισσότερα. Αυτό είναι απόλυτα φυσικό αφού στις σημερινές κοινωνικές πρακτικές οι περισσότεροι κειμενικοί τύποι είναι μεικτοί ως προς κειμενικά είδη.

Η επιλογή των κειμενικών τύπων έχει ως άξονα τις ευρύτερες θεματικές περιοχές με βάση τις οποίες δομείται ένα syllabus ή ένα διδακτικό εγχειρίδιο. Ενώ ένα άλλο κριτήριο επιλογής τους είναι οι πιθανότητες χρήσης τους σε διάφορες επικοινωνιακές περιστάσεις που αναμένεται να συμμετέχουν οι σπουδαστές στην κοινωνική τους ζωή χρησιμοποιώντας την Ελληνική. Οι κειμενικοί τύποι παρουσιάζουν ομοιότητες και διαφορές στις διάφορες χώρες. Ωστόσο, παρατηρείται μια αδυναμία αρκετών σπουδαστών να κατανοήσουν και να παραγάγουν διάφορους κειμενικούς τύπους, γεγονός που μπορεί να απορρέει από την ιδιαίτερη πολιτισμική τους ταυτότητα αλλά και το διαφορετικό «εκπαιδευτικό» κεφάλαιο που μεταφέρουν μέσα στην τάξη. Επομένως, σε ορισμένες περιπτώσεις η ρητή διδασκαλία των λεκτικών (λεξιλογικών, μορφοσυντακτικών, υφολογικών, κειμενικών) χαρακτηριστικών των κειμενικών τύπων επιβάλλεται από τις ίδιες τις δυσκολίες των ίδιων των εκπαιδευόμενων. Επίσης, η συνοχή και η συνεκτικότητα των παραγόμενων κειμένων θα πρέπει να πλαισιώνεται από τη διδασκαλία με τα κατάλληλα μέσα αφού από την διδακτική εμπειρία προκύπτει μια μεγάλη δυσκολία των εκπαιδευόμενων να ενσωματώσουν τους απαιτούμενους κειμενικούς δείκτες στις γραπτές παραγωγές τους (Γεωργακοπούλου & Γούτσος, 1999: 63-68· Αρχάκης, 2005:128-140).

- Λεξιλόγιο

Το λεξιλόγιο, όπως προέκυψε από τα ερωτηματολόγια, αποτελεί την σημαντικότερη ανάγκη των σπουδαστών μας καθώς πρόκειται για μια περιοχή με τεράστιο εύρος. Στόχος επομένως για τον προχωρημένο σπουδαστή είναι να αποκτήσει την ικανότητα κατανόησης άγνωστων λέξεων και εκφράσεων στηριζόμενος στις πληροφορίες του περικειμένου. Εντούτοις, πρέπει να εξοικειωθεί με λόγιες λέξεις που απαντούν στον επίσημο λόγο όπως επίσης με συνάψεις, λεξικές φράσεις, στερεότυπες εκφράσεις, ιδιωτισμούς και παροιμίες οι οποίες είναι ίσως το δυσκολότερο κομμάτι ως προς την κατάκτηση από την πλευρά των μη φυσικών ομιλητών καθώς συχνά εμπεριέχει και πολιτισμικές πληροφορίες. Ενδεικτικά αναφέραμε τις στερεότυπες εκφράσεις με τον αδύνατο τύπο της προσωπικής αντωνυμίας σε τρίτο πρόσωπο που χρησιμοποιούνται ευρύτατα στον ανεπίσημο προφορικό λόγο που αποτελούν ακατανόητες φράσεις ειδικά για άτομα που δεν έχουν ζήσει στη χώρα της Γ2.

Επιπρόσθετα, καθοριστικής σημασίας κρίνεται η πρόσληψη της συνυποδηλωτικής σημασίας που σημαίνει πολυεπίπεδη κατανόηση των λέξεων στο πλαίσιο των κειμένων. Σε όλα τα παραπάνω θα πρέπει να προστεθεί η ικανότητα διάκρισης των επιπέδων ύφους μεταξύ συνώνυμων λέξεων και η γνώση της ορθής χρήσης τους στα κατάλληλα γλωσσικά περιβάλλοντα. Η σύνθεση και η παραγωγή λεξιλογίου επίσης μπορεί να συμβάλλει στον εμπλουτισμό αλλά κυρίως στην ουσιαστικότερη κατανόηση των συστατικών των λέξεων και των νοημάτων (Αναστασιάδη-Συμεωνίδη, 2002· Ιορδανίδου & Πανταζάρα, 2010· Αναστασιάδη-Συμεωνίδη & Ευθυμίου, 2006: 90-95· Γούτσος, 2006: 44-49).

- **Μορφοσύνταξη**

Για την κατάκτηση των τεσσάρων δεξιοτήτων απαραίτητη είναι και η ανάπτυξη της γλωσσικής επίγνωσης δύσκολων, λιγότερο συχνά χρησιμοποιούμενων μορφοσυντακτικών δομών και λόγιων τύπων που χαρακτηρίζουν τον επίσημο λόγο χωρίς βέβαια να εξαιρούνται δομές ιδιωματικού χαρακτήρα που εντάσσονται στο πλαίσιο της καθημερινής επικοινωνίας. Στο νέο αναλυτικό πρόγραμμα περιλαμβάνονται η κλίση ανώμαλων ουσιαστικών, επιθέτων, αντωνυμιών, και λόγιων ρημάτων και ρηματικών τύπων (μετοχές) που συναντώνται στον επίσημο λόγο, οι λειτουργίες των πτώσεων, οι τροπικότητες αλλά και τα είδη των προτάσεων. Ωστόσο, δεν θα πρέπει να απουσιάζουν δομές που παρά του ότι έχουν διδαχθεί σε προηγούμενα επίπεδα παρουσιάζουν δυσκολίες στην κατάκτηση της ελληνικής, όπως είναι για παράδειγμα η χρήση του οριστικού και μηδενικού άρθρου, η αναφορά και η χρήση των κλιτικών όπως επίσης και η ρηματική όψη (ΚΕΓ, 2011· Ιακώβου Μ. & Σ. Μπέλλα, 2004: 169-202).

- **Πολιτισμική επίγνωση**

Ο πολιτισμός είναι συνυφασμένος με τη γλώσσα μιας χώρας και κατά την άποψή μας δεν θα πρέπει να αποτελεί ένα ξεχωριστό κομμάτι, αντίθετα να εντάσσεται στο γλωσσικό μάθημα. Ο πιο κατάλληλος τρόπος επαφής είναι η βιωματική εμπειρία διαμέσου της γλώσσας και έτσι είναι οργανωμένες στο Σχολείο Νέας Ελληνικής του ΑΠΘ οι δραστηριότητες που αφορούν γνωριμία με την πόλη αλλά και τους ανθρώπους της. Στα τμήματά μας -κυρίως στα προχωρημένα επίπεδα- είναι έντονη η επιθυμία των φοιτητών για απόκτηση γνώσεων σχετικά με την ιστορία ιδίως τη νεότερη καθώς εκφράζεται συχνά η ανάγκη για βαθύτερη κατανόηση τόσο της ελληνικής κοινωνίας όσο και των διεθνών γεωπολιτικών σχέσεων της χώρας. Στο αναλυτικό πρόγραμμα που καταρτίσαμε συμπεριλάβαμε και τη θεματική της ελληνικής ιστορίας εφόσον από τα ερωτηματολόγια προέκυψε ως σημαντική ανάγκη των σπουδαστών μας.

2.3 Θεματική ανάπτυξη του προγράμματος σπουδών

Το πρόγραμμα σπουδών αναπτύσσεται θεματικά όπως και τα syllabi των προηγούμενων επιπέδων του ΣΝΕΓ (Α1, Α2, Β1, Β2) αλλά και με τον τρόπο που είναι συνήθως διαρθρωμένα τα σύγχρονα διδακτικά εγχειρίδια. Οι θεματικές προκύπτουν από τις ανάγκες των φοιτητών που συμμετείχαν στην παρούσα έρευνα αλλά και από την εμπειρία τις διδακτικής πράξης, του ΚΕΠΑ, του αναλυτικού προγράμματος του ΚΕΓ για τις εξετάσεις ελληνομάθειας.

Η κάθε θεματική ενότητα συγκροτείται με βάση τους κειμενικούς τύπους που εμφανίζονται σε συγκεκριμένες αποικίες λόγου στην ελληνική πραγματικότητα και εξειδικεύεται σε επιμέρους θεματικούς τομείς που την συνιστούν. Για παράδειγμα στη θεματική ενότητα που αφορά την εργασία θα πρέπει να εξεταστούν άρθρα σχετικά με τα συνδικαλιστικά όργανα, την ανεργία κ.α. προκηρύξεις θέσεων εργασίας δημόσιου και ιδιωτικού τομέα, συμβάσεις εργασίας ορισμένου αορίστου χρόνου, συμβάσεις έργου επιστολές εκδήλωσης ενδιαφέροντος, επαγγελματικές αναφορές κ.α. στα οποία εμπεριέχεται μια μεγάλη ποικιλία λεξιλογικών στοιχείων και μορφοσυντακτικών δομών, όπως φαίνεται στον Πίνακα 2.

Θεματική ενότητα	Τύποι κειμένων	Θεματικό λεξιλόγιο
Εργασία	Άρθρο, επιφυλλίδα, Προκήρυξη, Αναφορά Σύμβαση εργασίας Βεβαίωση προϋπηρεσίας, Κανονισμός λειτουργίας, Βιογραφικό σημείωμα, Συνοδευτική επιστολή βιογραφικού σημειώματος, Επιστολή εκδήλωσης ενδιαφέροντος για θέση εργασίας, Επαγγελματική συνέντευξη Επιστολή δήλωσης παραίτησης Επαγγελματική αναφορά Άδειες ασκήσεως επαγγέλματος	Τα συνδικαλιστικά όργανα της Ελλάδας, ΟΑΕΔ, Εργασία στο δημόσιο και ιδιωτικό τομέα Φορείς ασφάλισης, Άδειες: Αναρρωτική Εκπαιδευτική, Κυήσεως ανατροφής τέκνου Άνευ αποδοχών Φορείς επαγγελματικής κατάρτισης Ανεργία στην Ελλάδα Αναζήτηση εργασίας

Πίνακας 2

3. Επίλογος

Στο άρθρο αυτό, περιγράψαμε την πρότασή μας για έναν νέο τύπο syllabus σύμφωνα με τον οποίο προτείνεται να αντλούνται κάθε φορά ανάλογα με τις ανάγκες των σπουδαστών οι τύποι λόγου αλλά και οι επιμέρους θεματικές από το αναλυτικό πρόγραμμα. Επίσης, τονίσαμε την αναγκαιότητα ενός ανοιχτού αναλυτικού προγράμματος που θα υπόκειται αφενός σε εμπλουτισμό με βάση τις εκάστοτε ανάγκες και τα ενδιαφέροντα των σπουδαστών ενισχύοντας έτσι το συμμετοχικό ρόλο του εκπαιδευόμενου ενήλικα και αφετέρου σε επικαιροποίηση λαμβάνοντας υπόψη τις αλλαγές στην κοινωνική πραγματικότητα ώστε να διασφαλίζει τον σύγχρονο χαρακτήρα του.

ABSTRACT

This paper reports on a case of MG grammatical gender change in progress. Our basic claim is that the observed masculine gender assignment to [+learned] feminine nouns in -(o)s reveals the shifting boundaries of the inflection class and reflects the way in which linguistic use is imposed on structure through self-regulation. We investigate the motivation and the diffusion of the gender change in written electronic data. The data analysis suggests that gender change is motivated by prototypicality, strengthened by phonetic similarity, and consolidated by high frequency of use, whereas gender mobility is observed in text categories characterized by [-learned] style.

Keywords: prototypicality, phonetic similarity, frequency, [±learned] style, homeostatic system

1. Εισαγωγή

Η παρούσα εργασία¹ εξετάζει την εναλλασσόμενη απόδοση γραμματικού γένους στα ουσιαστικά μιας συγκεκριμένης κλιτικής τάξης της νέας ελληνικής (NE στο εξής) και επιδιώκει να ερμηνεύσει την ‘αστάθεια’ αυτή ως συγχρονική ένδειξη μιας εν εξελίξει μορφολογικής αλλαγής, η οποία παράλληλα υπόκειται στους κανόνες της γλωσσικής αυτορύθμισης.

Πιο συγκεκριμένα, υποστηρίζουμε ότι η ποικιλοπλοκία που εμφανίζουν τα θηλυκά [+λόγια] ουσιαστικά της NE σε -(o)s στην απόδοση του γραμματικού γένους, π.χ. *η ψήφος* - *ο ψήφος*, αιτιολογείται βάσει της μορφοφωνολογικής πίεσης που δέχονται προς την αντίστοιχη τάξη των αρσενικών.² Βασική μας θέση είναι ότι η πίεση αυτή ασκείται από τα πιο πρωτοτυπικά³ μέλη (αρσενικά) του συστήματος γένους προς τα πιο περιφερειακά (θηλυκά), εφόσον το κλιτικό επίθημα -(o)s καταχωρείται στο νοητικό λεξικό των φυσικών ομιλητών ως κεντρικό πρότυπο επιθήματος αρσενικών ουσιαστικών. Υπακούοντας στην αρχή της πρωτοτυπικότητας, τα θηλυκά ουσιαστικά εμφανίζονται ολοένα και πιο συχνά ως αρσενικά στη γλωσσική χρήση,⁴ ενώ ταυτόχρονα η απόδοση του αρσενικού γένους ενισχύεται από τη φωνητική ομοιότητα προσδιοριστή και κλιτικού επιθήματος στο πλαίσιο της ονοματικής φράσης, π.χ. *τους ψήφους*. Έτσι, τα θηλυκά μέλη της συγκεκριμένης κλιτικής τάξης τείνουν να εξομαλυνθούν και να αποκτήσουν μεγαλύτερη σταθερότητα, ακολουθώντας το ‘κανονικό’ πρότυπο του κλιτικού παραδείγματος των αρσενικών (Wurzel 1989:125).

Προκειμένου να ανιχνεύσουμε τόσο την αιτιολόγηση όσο και τη διάχυση της παρατηρούμενης μορφολογικής αλλαγής, βασιστήκαμε στην κατανομή της συχνότητας συγκεκριμένων ουσιαστικών σε -(o)s με εναλλασσόμενο (αρσενικό και θηλυκό) γραμματικό γένος σε ηλεκτρονικά κείμενα. Η διακύμανση που εμφανίζουν τα ουσιαστικά σε -(o)s ως προς το γένος ερμηνεύεται με βάση ενδοσυστηματικές και εξωσυστηματικές παραμέτρους στο πλαίσιο της γλωσσικής αυτορύθμισης. Η

¹ Η εργασία ανακοινώθηκε σε πρώτη μορφή στη 13^η Συνάντηση Μορφολογίας (13th Morphology Meeting, Vienna, 3-6 February 2008).

² Για μια σύγχρονη ανάλυση της μετακίνησης των ουσιαστικών της AE σε -(o)s από το θηλυκό στο αρσενικό γένος, βλέπε Coker (2009).

³ Η πρωτοτυπικότητα χαρακτηρίζει τα κεντρικά και εξέχοντα πρότυπα που προκύπτουν κατά τη γλωσσική κατηγοριοποίηση· αντίθετα, τα λιγότερο αντιπροσωπευτικά πρότυπα χαρακτηρίζονται από περιφερειακότητα στο γλωσσικό σύστημα (Taylor 1989).

⁴ Αντίθετα, τα ουδέτερα ουσιαστικά σε -(o)s εμφανίζουν διαφορετικό κλιτικό παράδειγμα και έτσι δεν υπόκεινται σε γλωσσική αλλαγή. Τα λάθη, όμως, των αλλόγλωσσων μαθητών συνηγορούν στην επιλογή του πρωτοτυπικού γένους ακόμη και για τα ουδέτερα ουσιαστικά σε -(o)s, π.χ. **ο κράτος*.

μετακίνηση προς το αρσενικό γένος δείχνει την τάση του γλωσσικού συστήματος να προσαρμοστεί στις κανονικότητες που επιβάλλονται τόσο σε γνωσιακό/ εξελικτικό (αντιληπτική προτεραιότητα, αναλογία, οικονομία) όσο και σε χρησιακό (συχνότητα) επίπεδο. Η διαδικασία της γλωσσικής αυτορύθμισης επισυμβαίνει σε δύσκολες, [+πρωτοτυπικές], [+συχνές] και [+λόγιες] γλωσσικές δομές, υποδηλώνοντας την παρουσία μιας εν εξελίξει γλωσσικής αλλαγής. Η συχνότητα χρήσης των υπό εξέταση ουσιαστικών παίζει καθοριστικό ρόλο στη διαδικασία της γλωσσικής αυτορύθμισης, καθώς α) τα συχνόχρηστα πρότυπα των εμφανίσεων του αρσενικού γένους επηρεάζουν σημαντικά τις αναπαραστάσεις των φυσικών ομιλητών και διαμορφώνουν το βαθμό αποδεκτότητας και ορθού σχηματισμού τους (Bybee 2006), και β) η μορφολογική αλλαγή διαχέεται βαθμιδωτά από τα πιο συχνόχρηστα ουσιαστικά (π.χ. *ψήφος*) προς τα λιγότερο συχνόχρηστα (π.χ. *εγκύκλιος*).

2. Το γραμματικό γένος: συγχρονία

2.1 Το πρωτοτυπικό σύστημα γραμματικού γένους της ΝΕ

Η ΝΕ εμφανίζει τριμερή διάκριση του γραμματικού γένους σε αρσενικό, θηλυκό και ουδέτερο. Το γραμματικό γένος χαρακτηρίζει τα ονόματα μέσω ενός κλιτικού επιθήματος, το οποίο εσωτερικεύει τις γραμματικές κατηγορίες της πτώσης και του αριθμού. Οι προσδιοριστές, τα επίθετα, τα αριθμητικά και οι αντωνυμίες είναι επίσης φορείς γένους.

Η απόδοση του γραμματικού γένους καθορίζεται με βάση σημασιολογικά ([±ανθρώπινο], [±έμψυχο], σημασιολογικές κατηγορίες κτλ.) αλλά και μορφοφωνολογικά κριτήρια (φωνητικό σχήμα του τέρματος των ονομάτων, κλιτικά επιθήματα). Η συσχέτιση γραμματικού και αναφορικού γένους στη ΝΕ είναι μερική: η απόδοση του γένους είναι ξεκάθαρη σε κάποιες περιπτώσεις, όπως οι όροι συγγένειας, αλλά σύνθετη στην περίπτωση ονομάτων που φέρουν τα σημασιολογικά χαρακτηριστικά [-ανθρώπινο]/ [+έμψυχο] (π.χ. *ζώα*) και [-ανθρώπινο]-[-έμψυχο] (βλ. Πίνακα 1).

[+ανθρώπινο] [+έμψυχο]		[-ανθρώπινο] [+έμψυχο]			[-ανθρώπινο] [-έμψυχο]		
ΑΡΣ	ΘΗΛ	ΑΡΣ	ΘΗΛ	ΟΥΔ	ΑΡΣ	ΘΗΛ	ΟΥΔ
πατέρας	μητέρα	σκύλος	φάλαινα	φίδι	φόβος	αγάπη	μίσος

Πίνακας 1 Μερική συσχέτιση γραμματικού και αναφορικού γένους στη ΝΕ

Τα παραγωγικά επιθήματα είναι διαφανή ως προς το γένος, καθώς παρέχουν έναν συνδυασμό σημασιολογικών και τυπικών πληροφοριών. Αυτό σημαίνει ότι η απόδοση του γραμματικού γένους μπορεί επίσης να γίνει με κριτήριο τις σημασιολογικές κατηγορίες, όπως για παράδειγμα τα ονόματα των οπωροφόρων δέντρων της ΝΕ (Efthymiou 1999):

[[μήλ(ο)]_{ΒΑΣΗ} -(ι)ά]_{ΠΑΡΑΓΩΓΙΚΟ ΕΠΙΘΗΜΑ} [+οπωροφόρο δέντρο] → *μηλιά*

Στην περίπτωση που οι σημασιολογικές πληροφορίες απουσιάζουν, μόνο το μορφολογικό σχήμα της λέξης μπορεί να συμβάλει στην ορθή απόδοση του γένους.⁵ Παρόλα αυτά, η ταξινόμηση των ονομάτων κατά γένος αποκλειστικά με βάση μορφολογικά κριτήρια (δηλαδή με κριτήριο την κλιτική τάξη στην οποία ανήκουν, βλ. Ralli 2002, Ράλλη 2003, Κλαίρης & Μπαμπινιώτης 1996) μπορεί να αποβεί εξίσου σύνθετη, αφού στην ίδια κλιτική τάξη μπορεί να υπάρχουν ουσιαστικά που ανήκουν σε διαφορετικά γένη, π.χ. *άνθρωπος* (ΑΡΣ) και *πρόοδος* (ΘΗΛ), σε διαφορετικές σημασίες, π.χ. *βρύση* (αντικείμενο) και *λύση* (ενέργεια), αλλά και σε διαφορετικό γένος με παρόμοια λεξική σημασία, π.χ. *δρόμος* (ΑΡΣ) και *οδός* (ΘΗΛ). Συνεπώς, η κλιτική τάξη και η σημασία συσχετίζονται με το γένος, χωρίς το ένα να επιβάλλεται με αναγκαστικό και ενιαίο τρόπο στο άλλο (Αναστασιάδη-Συμεωνίδη & Χειλά-Μαρκοπούλου 2003:23).

Παρά τη συνθετότητά τους, οι μηχανισμοί απόδοσης του γένους της ΝΕ μπορούν να είναι προβλέψιμοι σε έναν σημαντικό βαθμό, εφόσον οι πρωτοτυπικές⁶ τάξεις είναι αμιγείς ως προς το γένος, τη σημασία και την κλιτική τάξη. Το πρωτοτυπικό σύστημα γένους της ΝΕ περιλαμβάνει (βλ. Πίνακα 2): α)

⁵ Ο Seiler (1958) πρότεινε πρώτος τη διάκριση των κλιτικών τάξεων με βάση το γραμματικό γένος κατά τα αλεξανδρινά χρόνια, υποστηρίζοντας ότι η διάκριση των πτώσεων στα αρσενικά και θηλυκά ουσιαστικά βασίζεται στην αντίθεση -Vs/-Ø, π.χ. το ΑΕ *πατήρ* έγινε *πατέρα* στη ΝΕ.

⁶ Η πρωτοτυπικότητα συνδέεται επίσης στενά με τις έννοιες *ασημαδευσία* (unmarkedness) (Jakobson, 1941), *κανονικότητα* (Wurzel 1989), *φυσικότητα* και *προτίμηση* (Dressler 2003, 2005, Χριστοφίδου 2003).

αρσενικά ουσιαστικά με το σημασιολογικό χαρακτηριστικό [+άρρεν] και το κλιτικό επίθημα -s, β) θηλυκά ουσιαστικά με το σημασιολογικό χαρακτηριστικό [+θήλυ] και τα κλιτικά επιθήματα -a/-i/-u και γ) ουδέτερα ουσιαστικά με το σημασιολογικό χαρακτηριστικό [-έμψυχο] και τα κλιτικά επιθήματα -o/-i/-a/⁷∅ (Αναστασιάδη-Συμεωνίδη & Χειλά-Μαρκοπούλου 2003).

Γραμματικό γένος	ΑΡΣ	ΘΗΛ	ΟΥΔ
Φυσικό γένος	[+άρρεν]	[+θήλυ]	[-έμψυχο]
Κλιτικό επίθημα	-s	-a/-i/-u	-o/-i/-a, άκλιτο

Πίνακας 2 Το πρωτοτυπικό σύστημα γένους της ΝΕ

Τα ουσιαστικά σε -(ο)ς της ΝΕ συνιστούν μια περίπτωση πολυσήμαντης αντιστοιχίας μεταξύ κλιτικού επιθήματος και γένους, καθώς εμφανίζουν και τις τρεις τιμές γένους στην ονομαστική ενικού, με τον προσδιοριστή να λειτουργεί ως διαφοροποιητικός δείκτης του γένους. Τα αρσενικά και θηλυκά ουσιαστικά της συγκεκριμένης κλιτικής τάξης εμφανίζουν το ίδιο κλιτικό παράδειγμα, ενώ το ουδέτερο διαφοροποιείται σημαντικά, γεγονός που ερμηνεύει επαρκώς την απουσία μετακίνησης των ουσιαστικών από το ουδέτερο στο αρσενικό γένος. Το αρσενικό γένος θεωρείται πρωτοτυπικό, π.χ. ο *φίλος*, ενώ το θηλυκό και το ουδέτερο λιγότερο αντιπροσωπευτικά του κλιτικού παραδείγματος των ουσιαστικών σε -(ο)ς, π.χ. η *ψήφος*, το *κράτος*. Τα περισσότερα θηλυκά και ουδέτερα ουσιαστικά σε -(ο)ς είναι [+λόγια], [-συχνά] και ολιγάριθμα (Αναστασιάδη-Συμεωνίδη & Χειλά-Μαρκοπούλου 2003).

Το γραμματικό γένος εμφανίζει πολυεπίπεδη λειτουργία, καθώς εκτός από τη μορφολογία, υπηρετεί και τη συμφωνία του ουσιαστικού με τους προσδιορισμούς του και την αναφορική σύνδεση, δηλαδή τη συμφωνία των αντωνυμιών με το ουσιαστικό στο οποίο αναφέρονται. Οι προσδιοριστές, οι αντωνυμίες, τα επίθετα και τα αριθμητικά είναι χαρακτηρισμένα ως προς το γένος, με αποτέλεσμα στις πρωτοτυπικές εμφανίσεις να συμφωνούν σχεδόν ομοιοκαταληκτικά στα τέρματα των λέξεων, π.χ. *η καλή τιμή*.

Θα πρέπει να σημειωθεί ότι η διάκριση μεταξύ αρσενικού και θηλυκού μορφογένους⁸ ουδετερώνεται στην περίπτωση της κλητικής ενικού και πληθυντικού και στην ονομαστική και γενική πληθυντικού, καθώς παρατηρείται συγκρητισμός των πτώσεων των προσδιοριστών και των ονομάτων. Συνεπώς, η ποικιλότητα στην απόδοση του γένους θα εξεταστεί στην ονομαστική, γενική και αιτιατική ενικού, καθώς και στην αιτιατική πληθυντικού αριθμού.

2.2 Γλωσσική αυτορύθμιση: μια έννοια-κλειδί

Η γλωσσική αυτορύθμιση αποτελεί μια ασύνειδη διαδικασία αναπροσαρμογής του συστήματος από τα μέλη μιας γλωσσικής κοινότητας. Πρόκειται για έναν όρο που αρχικά εμφανίστηκε στο πλαίσιο της εκπαιδευτικής ψυχολογίας για να περιγράψει τη διαδικασία της μάθησης που προκύπτει μέσα από την αξιοποίηση στρατηγικών ενεργειών και κινήτρων (Bandura 1991, Zimmerman 2000). Ο όρος χρησιμοποιείται επίσης στη συνεργετική και ποσοτική γλωσσολογία (Zipf 1949, Köhler 1992) για να ερμηνεύσει λειτουργικά την ποικιλότητα μεταξύ των γλωσσικών οντοτήτων. Σύμφωνα με τους Altmann & Koch (1998:517), τα γλωσσικά συστήματα διαθέτουν μηχανισμούς αυτορύθμισης και αυτοοργάνωσης, οι οποίοι, σε αναλογία με τη βιολογική εξέλιξη, τείνουν να τα μεταβάλλουν έτσι ώστε να προσεγγίσουν μια βέλτιστη σταθερή κατάσταση και να προσαρμοστούν κατά το βέλτιστο δυνατό βαθμό στο περιβάλλον τους.

Η γλωσσική αυτορύθμιση στοχεύει στην ανάδυση ασημάδευτων, απλών, οικονομικών και πρωτοτυπικών πραγματώσεων και χαρακτηρίζεται από τάσεις εξομάλυνσης των γλωσσικών τύπων. Εμφανίζει τα εξής χαρακτηριστικά: α) παρατηρείται σε περιπτώσεις δύσκολων και/ή μη συχνών γλωσσικών δομών, β) αντανακλά την αμφιταλάντευση των χρηστών ανάμεσα σε πρότυπες και καθημερινές/ λαϊκές⁹ γλωσσικές δομές που βρίσκονται σε ανταγωνιστική σχέση μεταξύ τους, γ) τροποποιεί τις γλωσσικές επιλογές των φυσικών ομιλητών, ενισχύοντας την ποικιλότητα με βάση το επίπεδο ύψους και το κοινωνικό κύρος και δ) παρέχει ενδείξεις φαινομενικού χρόνου για τις εν εξελίξει γλωσσικές αλλαγές.

⁷ Αφορά τα μεταρρηματικά ουσιαστικά σε -μα, π.χ. *μαθαίνω* → *μάθημα*.

⁸ Η Coker (2009:43) χρησιμοποιεί τον όρο *μορφογένος* (morpho-gender) για να αποδώσει συνθετικά το συνδυασμό σημασιολογικών και τυπικών κανόνων στην απόδοση του γραμματικού γένους.

⁹ Οι εμφανίσεις του αρσενικού μορφογένους θεωρούνται από τους καθαρολόγους λαθεμένες σε συγχρονικό επίπεδο.

Ο όρος *αυτορύθμιση* συνδέεται άμεσα με τον όρο *ομοιόσταση*. Η ομοιόσταση ως όρος της βιολογίας και της ψυχολογίας είναι η λειτουργία ενός οργανισμού που του επιτρέπει να διατηρεί την ακεραιότητά του και να ανακτά τον ομαλό τρόπο λειτουργίας του μέσω εσωτερικών αναπροσαρμογών, κάθε φορά που υφίσταται μη θανάσιμη διαταραχή. Στο επίπεδο ερμηνείας της γλωσσικής αλλαγής, η ομοιόσταση δηλώνει το μηχανισμό που ρυθμίζει, αυτοοργανώνει ή εξισορροπεί το εσωτερικό περιβάλλον του γλωσσικού συστήματος, ενώ ταυτόχρονα διατηρεί μια σταθερή κατάσταση, παρά τις συνεχείς τροποποιήσεις (Joos 1962:18).¹⁰

Στην περίπτωση των θηλυκών ουσιαστικών σε -(ο)ς, η γλωσσική αυτορύθμιση προκύπτει μέσω της γλωσσικής εξομάλυνσης του γένους: το μη πρωτοτυπικό μορφογένο [θηλυκό X_{-(ο)ς}] συρρικνώνεται, καθώς τα μέλη του μετακινούνται προς το πρωτοτυπικό μορφογένο [αρσενικό X_{-(ο)ς}]. Λαμβάνοντας υπόψη ότι οι φυσικοί ομιλητές τείνουν να εξομαλύνουν τους δύσκολους [+λόγιους] τύπους εφαρμόζοντας ασύνειδα την αρχή της πρωτοτυπικότητας, περιμένουμε να χρησιμοποιούν τα αποκλίνοντα μορφογένη, επηρεασμένοι: α) από τη συχνότητα χρήσης των ονομάτων σε συγκεκριμένες πτώσεις και β) από τη φωνητική ομοιότητα προσδιοριστή και ονόματος σε συγκεκριμένες πτώσεις. Εάν αυτό συμβαίνει, τα καταλλήλότερα φωνητικά περιβάλλοντα θα πρέπει να είναι η ονομαστική, γενική και αιτιατική ενικού, καθώς και η αιτιατική πληθυντικού. Σε όλες αυτές τις περιπτώσεις η συχνότητα χρήσης των επιμέρους ονομάτων αλλά και των ίδιων των πτώσεων θα πρέπει να καθιστά κάποια περιβάλλοντα περισσότερο κατάλληλα από κάποια άλλα.¹¹

Οι υποθέσεις εργασίας μας για την αιτιολόγηση, την εκδήλωση και τη διάχυση της αλλαγής που υφίσταται το θηλυκό μορφογένο σε -(ο)ς είναι οι εξής:

1. Η αυτορύθμιση του γένους εφαρμόζεται αρχικά σε συχνόχρηστες λέξεις:¹² το ουσιαστικό *ψήφος* είναι το δεύτερο συχνότερο ουσιαστικό στα σώματα κειμένων που χρησιμοποιήσαμε (βλ. Πίνακα 3). Επιλέξαμε να ελέγξουμε την κατανομή του, παρακάμπτοντας το πιο συχνόχρηστο ουσιαστικό *μέθοδος*, καθώς η χρήση του δεύτερου περιορίζεται σε συγκεκριμένους τύπους κειμένων με ακαδημαϊκό ή επιστημονικό προσανατολισμό.

Θηλυκά ουσιαστικά	(Συχνότητα χρήσης) (‰)
μέθοδος	0,1422
ψήφος	0,06
πρόοδος	0,0528
εγκύκλιος	0,0136
άμμος	0,0112
δίοδος	0,0057
δίφθογγος	0,0004

Πίνακας 3 Συχνότητα χρήσης των θηλυκών [+λόγιων] ουσιαστικών σε -(ο)ς
(εφημερίδες *Μακεδονία* και *Τα Νέα*)

2. Η συχνότητα χρήσης του αρσενικού μορφογένους αναμένεται να αυξάνει, καθώς αυξάνει η φωνητική ομοιότητα (βλ. Πίνακα 4).

ΠΡΟΣΔΙΟΡΙΣΤΗΣ + ΟΝΟΜΑ			
ON EN	i	΄psifos	→ o ΄psifos
GEN EN	tis	΄psifu	→ tu ΄psifu
AIT EN	tin	΄psifo	→ ton ΄psifo
AIT ΠΑ	tis	΄psifus	→ tus ΄psifus

Πίνακας 4 Μορφογένη και φωνητική ομοιότητα

3. Εκτός από τη συχνότητα χρήσης των ονομάτων, θα πρέπει να ληφθεί υπόψη και η συχνότητα χρήσης συγκεκριμένων πτώσεων στη ΝΕ: έτσι, αναμένεται η συχνότητα χρήσης του αρσενικού μορφογένους να είναι πιο υψηλή στην αιτιατική ενικού και πληθυντικού αριθμού, καθώς πρόκειται για τις δύο πιο συχνόχρηστες πτώσεις της ΝΕ (βλ. Αναστασιάδη-Συμεωνίδη 2003).

¹⁰ Ο Joos (1962) εισάγει πρώτος τον όρο *ομοιόσταση* (homeostasis) στη γλωσσολογία.

¹¹ Δεν είναι εφικτό να εξετάσουμε τα δύο εναλλασσόμενα μορφογένη στην ονομαστική πληθυντικού αριθμού, καθώς το φωνητικό σχήμα προσδιοριστή και επιθέματος του ονόματος συμπίπτουν τόσο για το αρσενικό όσο και για το θηλυκό, π.χ. *οι ψήφοι* (ΑΡΣ και ΘΗΛ).

¹² Για την κατανομή των συχνοτήτων χρησιμοποιήθηκαν τα ηλεκτρονικά σώματα κειμένων της Πύλης για την Ελληνική Γλώσσα (εφημερίδες *Μακεδονία* και *Τα Νέα* (6.698.486 λέξεις):

http://www.greek-language.gr/greekLang/modern_greek/tools/corpora/corpora/stats.html.

4. Το αυτορυθμιζόμενο αρσενικό μορφογένο διαχέεται μέσω της υψηλής χρήσης του από τα μέλη συγκεκριμένων ομάδων χρηστών.
5. Το [-λόγιο] αρσενικό μορφογένο αναμένεται να εμφανίσει υψηλότερη συγκέντρωση σε ανεπίσημα συγκεκριμένα.
6. Λαμβάνοντας υπόψη ότι η ηλικία αποτελεί κινητήρια δύναμη της γλωσσικής αλλαγής (Labov 2002), οι νεότεροι χρήστες αναμένεται να εκδηλώσουν γενικευμένη αντίσταση στους επίσημους τύπους της γλωσσικής νόρμας και σαφή προτίμηση στους τύπους που είναι καινοτόμοι και αποκλίνουν από τη νόρμα.
7. Εφόσον η γλωσσική αλλαγή βρίσκεται σε εξέλιξη, το αρσενικό μορφογένο αναμένεται να κάνει τη 'δειλή' εμφάνισή του σε έναν περιορισμένο αριθμό επίσημων συγκεκριμένων.
8. Το αναγόμενο στην ΑΕ [+λόγιο] μορφογένο αναμένεται να προβάλλει αντίσταση στην αλλαγή, εξαιτίας του υψηλού κοινωνικού κύρους που αποδίδεται στη χρήση του.

3. Η έρευνα

Η έρευνα βασίζεται σε σώματα κειμένων, ακριβώς επειδή στόχος μας είναι να 'συλλάβουμε' την πρώιμη εκδήλωση της γλωσσικής αλλαγής σε ένα επαρκές τυχαίο δείγμα αυθεντικών ηλεκτρονικών γραπτών κειμένων. Η επιλογή της συγκεκριμένης μεθοδολογίας έγινε με τα εξής κριτήρια: α) ο γραπτός λόγος χαρακτηρίζεται σε μεγάλο βαθμό από επισημότητα και β) το ηλεκτρονικό μέσο παρέχει το πλεονέκτημα της άμεσης και στατιστικά επαρκούς άντλησης δεδομένων, ενώ παράλληλα τα διαθέσιμα κείμενα χαρακτηρίζονται τόσο από επίσημο όσο και από ανεπίσημο επίπεδο ύφους.¹³ Λαμβάνοντας υπόψη ότι το [-λόγιο] αρσενικό μορφογένο της λέξης *ψήφος* είναι πιο πιθανό να προκύψει στον προφορικό λόγο, είτε ως εμπρόθετη επιλογή είτε ως γλωσσικό 'ολίσθημα', θεωρούμε ότι η παρουσία του στο γραπτό λόγο μπορεί να ενισχύσει τις υποθέσεις μας για την ύπαρξη μιας μορφολογικής αλλαγής σε εξέλιξη και να επιτρέψει μια ερμηνεία των κινητήριων δυνάμεων της αλλαγής αυτής με γνωσιακά κριτήρια και κριτήρια χρήσης.

Αρχικά αναζητήσαμε στη μηχανή Google τα δύο εναλλασσόμενα μορφογένη (θηλυκό και αρσενικό) της λέξης *ψήφος* (στην ονομαστική, γενική και αιτιατική ενικού, καθώς και στην αιτιατική πληθυντικού), χρησιμοποιώντας τύπους όπως '*η ψήφος*' - '*ο ψήφος*' κτλ. Τοποθετήσαμε το κάθε εισαγόμενο σε εισαγωγικά (" ") για να περιορίσουμε τα αποτελέσματα σε εκείνες μόνο τις ιστοσελίδες που εμφανίζουν την ακριβή ακολουθία (ΠΡΟΣΔΙΟΡΙΣΤΗΣ + ΟΝΟΜΑ). Στη συνέχεια, αποκλείσαμε από τα αποτελέσματα τις ανενεργές αλλά και τις επαναλαμβανόμενες ιστοσελίδες.¹⁴ Προσπαθήσαμε να διασφαλίσουμε όσο το δυνατόν μεγαλύτερη ποσότητα δεδομένων αντλώντας τα κατά τη διάρκεια των εθνικών εκλογών του 2007 και των δημοτικών εκλογών του 2010. Είναι ευνόητο ότι δεν λάβαμε υπόψη μας περιπτώσεις στις οποίες το γραμματικό γένος δεν μπορούσε να συναχθεί από το συγκεκριμένο, π.χ. *πήρε ψήφους της αριστεράς*.

Οι εμφανίσεις του κάθε μορφογένους που προέκυψαν από την αναζήτηση ταξινομήθηκαν με βάση γλωσσικά και εξωγλωσσικά κριτήρια. Προκειμένου να αντλήσουμε αξιόπιστα συμπεράσματα για τους παράγοντες που συμβάλλουν στη διάχυση της αλλαγής, ταξινομήσαμε τις εμφανίσεις του θηλυκού και του αρσενικού μορφογένους σύμφωνα με την κατηγορία κειμένων στην οποία εμφανίζονται. Τα κριτήρια της ταξινόμησης αυτής ήταν: α) το επίσημο και ανεπίσημο επίπεδο ύφους και β) το περιεχόμενο των κειμένων. Με άλλα λόγια, δώσαμε έμφαση α) στην επισημότητα της επικοινωνιακής περιστασης στο πλαίσιο της οποίας παρήχθησαν τα κείμενα και στο συναγόμενο κοινωνικό κύρος των παραγών τους, και β) στα νοήματα που επικοινωνούνται και στο θεματικό πεδίο στο οποίο αυτά εντάσσονται. Από την ταξινόμηση αυτή προέκυψαν οι κατηγορίες κειμένων που εμφανίζονται στον Πίνακα 7.¹⁵

4. Ανάλυση των δεδομένων

Η ανάλυση των δεδομένων αποκαλύπτει έναν αρκετά σημαντικό αριθμό εμφανίσεων του αρσενικού

¹³ Τα blog, για παράδειγμα, εμπεριέχουν απόψεις/ σχόλια και γενικότερα ημιπροφορικά κείμενα που αναρτώνται από φοιτητές, εργαζομένους κτλ. Έτσι, συνήθως χαρακτηρίζονται από μικτό επίπεδο ύφους, επίσημο και ανεπίσημο, το οποίο μπορεί να αποδοθεί στην υβριδικότητά τους.

¹⁴ Ο αριθμός των αποτελεσμάτων που αρχικά εμφανίζεται στη μηχανή Google μπορεί να είναι παραπλανητικός, εφόσον πολλά από αυτά μπορεί να εμφανίζονται δύο ή και περισσότερες φορές.

¹⁵ Δεν υιοθετήσαμε κατηγοριοποίηση ανά κειμενικό είδος (genre), καθώς στο ηλεκτρονικό μέσο εμφανίζεται συνεχής εναλλαγή και συμπλοκή των κειμενικών ειδών.

μορφογένους ανά γραμματική πτώση. Η κατανομή των συχνοτήτων παρουσιάζεται στον παρακάτω πίνακα συνάφειας:

	ΑΡΣ	ΘΗΛ	ΣΥΝΟΛΟ
ΟΝ ΕΝ	246	846	1092
ΓΕΝ ΕΝ	146	667	813
ΑΙΤ ΕΝ	332	669	1001
ΑΙΤ ΠΛ	738	634	1372
ΣΥΝΟΛΟ	1462	2816	4278

Πίνακας 5 Συσχέτιση πτώσης και γένους
(μηχανή αναζήτησης Google)

Εφαρμόσαμε το μη παραμετρικό τεστ χ^2 (Pearson's bivariate test of independence) στα αποτελέσματα των εμφανίσεων, προκειμένου να διαγνώσουμε αν υπάρχει στατιστικά σημαντική συσχέτιση μεταξύ της απόδοσης του γραμματικού γένους και της γραμματικής πτώσης. Τα αποτελέσματα του τεστ που εφαρμόστηκε στα ζεύγη των δύο κατηγορικών (ονοματικών) μεταβλητών (246.0, 846.0), (146.0, 667.0), (332.0, 669.0), (738.0, 634.0) έδειξαν ότι η συσχέτιση ανάμεσα στην απόδοση μεταξύ της αρσενικής και θηλυκής τιμής του γραμματικού γένους και στην επιλογή της γραμματικής πτώσης είναι στατιστικά σημαντική ($\chi^2=16,27$, $p < 0.001$, $df=3$).

Παρότι οι συνολικές εμφανίσεις των δύο μορφογενών υποδεικνύουν σαφή προτίμηση των χρηστών στο θηλυκό μορφογένο του ουσιαστικού *ψήφος* (66%), το αρσενικό μορφογένο καταλαμβάνει ένα επίσης αρκετά σημαντικό ποσοστό (34%), επαρκές για να καταδείξει την τάση προς τη γλωσσική αυτορύθμιση (περίπου το 1/3 των συνολικών εμφανίσεων, βλ. Διάγραμμα 1).

Διάγραμμα 1 Ποσοστά εμφάνισης θηλυκού και αρσενικού μορφογένους

Η στατιστική ανάλυση αναδεικνύει σημαντική συγκέντρωση του αρσενικού μορφογένους στην αιτιατική πληθυντικού (53,8% επί του συνόλου των εμφανίσεων, βλ. Διάγραμμα 2). Τα ποσοστά εμφάνισής του στην αιτιατική και ονομαστική ενικού είναι επίσης αρκετά υψηλά (33,2% και 22,5% αντίστοιχα). Θα πρέπει όμως να σημειώσουμε ότι το 26,4% των συνολικών εμφανίσεων του αρσενικού μορφογένους στην ονομαστική ενικού (22,5%) είναι μεταγλωσσικά/ ρυθμιστικά σχόλια, δηλαδή διορθωτικές παρεμβάσεις σε εφημερίδες, ιστοσελίδες, blog και fora συνήθως από χρήστες με υψηλό μορφωτικό επίπεδο. Τα σχόλια αυτά είναι ιδιαίτερα συχνά στην ονομαστική ενικού, καθώς χρησιμοποιείται ο λημματικός τύπος για να δηλωθεί η διόρθωση. Εάν παραλείψουμε τα σχόλια αυτά από το δείγμα μας, τα ποσοστά εμφάνισης του θηλυκού και του αρσενικού μορφογένους πέφτουν στο 81,2% και 18,8% αντίστοιχα. Η γενική ενικού παρουσιάζει το χαμηλότερο ποσοστό εμφάνισης (18%). Παρότι τα υψηλά ποσοστά εμφάνισης του αρσενικού μορφογένους στην αιτιατική ενικού και πληθυντικού είναι αναμενόμενα και επιβεβαιώνουν την αρχική υπόθεση εργασίας μας για το ρόλο της φωνητικής ομοιότητας στην αιτιολόγηση της γλωσσικής αλλαγής, θα πρέπει να διερευνήσουμε τους λόγους για τους οποίους τόσο η ονομαστική όσο και η γενική ενικού εμφανίζουν συγκριτικά χαμηλότερη συχνότητα χρήσης.

Διάγραμμα 2 Ποσοστά εμφάνισης αρσενικού και θηλυκού μορφογόνους κατά πτώση

Προκειμένου να δώσουμε μια ικανοποιητική ερμηνεία για τη χαμηλή συγκέντρωση του αρσενικού μορφογόνους στην ονομαστική και γενική ενικού, παρά την ύπαρξη φωνητικής ομοιότητας ανάμεσα στον προσδιοριστή και το επίθημα του ονόματος, θα πρέπει να λάβουμε υπόψη την κατανομή της συχνότητας των γραμματικών πτώσεων στη ΝΕ. Σύμφωνα με πρόσφατη έρευνα σχετικά με τη συχνότητα χρήσης των πτώσεων (Αναστασιάδη-Συμεωνίδη 2003¹⁶), η αιτιατική πληθυντικού είναι η πιο συχνόχρηστη πτώση των ονομάτων της ΝΕ (βλ. Πίνακα 6). Η ονομαστική και η αιτιατική ενικού είναι λιγότερο συχνές, ενώ η γενική ενικού είναι η λιγότερη συχνόχρηστη πτώση.

Πίνακας 6 Συχνότητα χρήσης των πτώσεων της ΝΕ (Αναστασιάδη-Συμεωνίδη 2003)

Μια πιο λεπτομερής εξέταση της συχνότητας χρήσης των πτώσεων του ουσιαστικού *ψήφος* ανά τάξη γένους (Διάγραμμα 3) δείχνει ότι το αρσενικό μορφογόνος συντάσσεται πλήρως με τα προηγούμενα ευρήματα, ενώ το θηλυκό όχι. Πιο συγκεκριμένα, στο θηλυκό μορφογόνος οι τέσσερις πτώσεις κατανέμονται σχεδόν ισόποσα, με την ονομαστική ενικού να είναι η πιο συχνόχρηστη και την αιτιατική πληθυντικού να εμφανίζει το χαμηλότερο ποσοστό συγκέντρωσης. Η ασυνέπεια αυτή μπορεί να ερμηνευθεί ως δείκτης του ομοιοστατικού μηχανισμού της γλώσσας, εφόσον τόσο η ονομαστική ενικού, πτώση του λημματικού τύπου, όσο και η γενική, κατεξοχήν λόγια πτώση, ανθίστανται σθεναρά στην αλλαγή. Με άλλα λόγια, οι ομιλητές αποφεύγουν συνειδητά ή ασυνείδητα τη χρήση του αρσενικού μορφογόνους στην ονομαστική ενικού, εφόσον η αναπαράσταση του θηλυκού ως λημματικού τύπου είναι ισχυρή στο νοητικό λεξικό τους. Από την άλλη, η χρήση της γενικής εντάσσεται συνήθως στο πλαίσιο σύνθετου/ ακαδημαϊκού λόγου, ο οποίος χαρακτηρίζεται από αυξημένη λογιότητα· κατά συνέπεια η εμφάνιση του αρσενικού μορφογόνους σε [+λόγιο] συγκείμενο είναι λιγότερο πιθανή.

Διάγραμμα 3 Ποσοστά συχνότητας του ουσιαστικού *ψήφος* κατά μορφογόνος και κατά πτώση

Η προηγούμενη στατιστική ανάλυση και ερμηνεία των δεδομένων ρίχνει φως στην αιτιολόγηση της αλλαγής, αλλά όχι στη διάχυσή της. Για το λόγο αυτό, εφαρμόστηκε μια επιπρόσθετη στατιστική ανάλυση της εμφάνισης του κάθε μορφογόνους του ουσιαστικού *ψήφος* ανά κατηγορία κειμένων. Η χρήση του αρσενικού μορφογόνους κατανέμεται σε ένα συνεχές επισημότητας. Η υψηλότερη χρήση εμφανίζεται σε λογοτεχνικά κείμενα/ στίχους τραγουδιών που χαρακτηρίζονται από [-λόγιο] επίπεδο ύφους (82,6% επί του συνόλου των εμφανίσεων, βλ. Πίνακα 7), καθώς επίσης σε κείμενα αθλητικού

¹⁶ Πρόκειται για έρευνα που βασίστηκε επίσης στα σώματα κειμένων της Πύλης για την Ελληνική Γλώσσα.

περιεχομένου (63,9%),¹⁷ ενώ η χαμηλότερη συγκέντρωση εμφανίζεται σε επίσημα κείμενα ευρείας κυκλοφορίας.

Στο μέσο του συνεχούς εντοπίζουμε κατηγορίες κειμένων που θα περιμέναμε να εμφανίζουν μικρή συγκέντρωση του αρσενικού μορφογένους, π.χ. εκκλησιαστικά κείμενα και μεταγλωσσικά/ ρυθμιστικά σχόλια. Συγκεκριμένα, η αυξημένη συγκέντρωση του αρσενικού μορφογένους σε εκκλησιαστικές ιστοσελίδες (50%) ήταν μη αναμενόμενη, εφόσον η ιδεολογία των εκκλησιαστικών φορέων είναι συνήθως προσανατολισμένη στην καθαρότητα των πολιτισμικών αποθεμάτων και της εθνικής ταυτότητας, προκειμένου να προκύψει αυθεντική πνευματική εμπειρία. Συνεπώς, οι εκπρόσωποι της εκκλησίας είναι συνήθως συντηρητικοί στις γλωσσικές τους επιλογές και καθαρολόγοι. Όμως, θα πρέπει να λάβουμε υπόψη ότι ένα σημαντικό ποσοστό εκκλησιαστικών εκπροσώπων αντιλαμβάνεται την εκκλησία ως πολυεθνική και ανοικτή προς τον κλήρο της, και για το λόγο αυτό επιδοκιμάζει τους γλωσσικούς τύπους που ευνοούν το [-λόγιο] πηγαίο και αυθεντικό λόγο. Η υψηλή εμφάνιση του αρσενικού μορφογένους σε μεταγλωσσικά σχόλια χρηστών (50%) επιβεβαιώνει την υπόθεση ότι η αυτορύθμιση του γραμματικού γένους αντανακλά μια εν εξελίξει μορφολογική αλλαγή, εφόσον οι ομιλητές υψηλού μορφωτικού επιπέδου αισθάνονται την ανάγκη να προβούν σε διορθωτικές παρεμβάσεις για να εμποδίσουν τυχόν 'αλλοίωση' της γλώσσας.

Στο κέντρο του συνεχούς εμφανίζονται επίσης κείμενα ανεπίσημου ύφους, τα οποία εντοπίζονται σε blog, fora, στο facebook και το twitter, καθώς επίσης σχόλια χρηστών σε ηλεκτρονικές εφημερίδες και περιοδικά (46,5%) και κείμενα σε ψυχαγωγικές ιστοσελίδες (μουσική, κινηματογράφος, βίντεο, 39%). Τα κείμενα αυτά παράγονται συνήθως από νεότερους ηλικιακά χρήστες. Οι νέοι συχνά ανθίστανται στις επίσημες γλωσσικές πρακτικές και αναζητούν γλωσσικούς τρόπους να αυτοπροσδιοριστούν (Labov 2002), δείχνοντας σαφή προτίμηση στον αποκλίνοντα τύπο γραμματικού γένους. Αν λάβουμε υπόψη μας ότι διαμορφώνουν πυκνά και σύνθετα κοινωνικά δίκτυα μεταξύ τους (Milroy 1987), μπορούμε να συμπεράνουμε ότι συνιστούν σημαντικό παράγοντα στη διάχυση της αλλαγής.

Κατηγορίες κειμένων	Ποσοστό (%) εμφάνισης του αρσενικού μορφογένους
Ιστοσελίδες λογοτεχνικών κειμένων/ στίχων τραγουδιών	82,6
Αθλητικές εφημερίδες/ ιστοσελίδες Ιστοσελίδες αθλητικών σωματείων και οργανώσεων	63,9
Μεταγλωσσικά/ ρυθμιστικά σχόλια	50
Εκκλησιαστικές εφημερίδες και ιστοσελίδες	50
Αναρτήσεις χρηστών σε blog, fora, στο facebook και το twitter Σχόλια χρηστών σε ηλεκτρονικές εφημερίδες, περιοδικά και ιστοσελίδες	46,5
Εκπαιδευτικές ιστοσελίδες	39
Κυπριακές ιστοσελίδες (όχι διαλεκτικές)	37,2
Ιστοσελίδες της Ελληνικής Διασποράς	34,7
Ακροδεξιές και εθνικιστικές εφημερίδες και ιστοσελίδες	28,3
Εκπαιδευτικές ιστοσελίδες	27,1
Ιστοσελίδες φορέων και εταιριών	23,7
Αριστερές και ακροαριστερές ιστοσελίδες	20,8
Νομαρχιακές/ δημοτικές/ τοπικές ιστοσελίδες	16,9
Ιστοσελίδες ραδιοφωνικών και τηλεοπτικών σταθμών	9,6
Επίσημες ιστοσελίδες πολιτικών παρατάξεων	7,4
Ηλεκτρονικές εφημερίδες και περιοδικά	5,2
Ενημερωτικές/ ειδησεογραφικές ιστοσελίδες	3,8
Ιστοσελίδες της Ευρωπαϊκής Ένωσης	0

Πίνακας 7 Ποσοστά εμφάνισης του αρσενικού και θηλυκού μορφογένους ανά κατηγορία κειμένων

¹⁷ Οι φίλαθλοι αποτελούν μια υποκοουλτούρα με κοινές αξίες και συγκεκριμένη ταυτότητα που εκδηλώνεται μέσω καινοτόμων και ευρηματικών γλωσσικών επιλογών. Εφόσον εμπλέκονται σε καθημερινή διεπίδραση μεταξύ τους, η διάχυση των [-λόγιων] τύπων μπορεί να επιτευχθεί πιο άμεσα.

Τα κείμενα που εμφανίζονται σε ιστοσελίδες της Ελληνικής Διασποράς και σε κυπριακές ιστοσελίδες παρουσιάζουν ένα αρκετά σημαντικό ποσοστό συγκέντρωσης του αρσενικού μορφογόνους (37,2% και 34,7% αντίστοιχα), γεγονός που μπορεί να αποδοθεί στην αποστασιοποίηση των παραγωγών τους από την ελληνική γλωσσική πραγματικότητα. Συνεπώς, δεν υπόκεινται στον ίδιο βαθμό στις ρυθμιστικές πιέσεις της ΝΕ και είναι περισσότερο δεκτικοί στη γλωσσική αλλαγή.

Τέλος, στο κέντρο του συνεχούς εντοπίζονται κείμενα που περιλαμβάνονται α) σε ακροδεξιές/εθνικιστικές ιστοσελίδες/εφημερίδες (28,3%), β) σε εκπαιδευτικές ιστοσελίδες (27,1%), γ) σε ιστοσελίδες κρατικών ή ιδιωτικών φορέων και εταιριών (23,7%), και δ) σε αριστερές και ακροαριστερές ιστοσελίδες/εφημερίδες (20,8%). Στην περίπτωση των ακροδεξιών/εθνικιστικών και αριστερών/ακροαριστερών εφημερίδων και ιστοσελίδων, η εμφάνιση του αρσενικού μορφογόνους υποδηλώνει την ανάγκη των χρηστών να προβάλλουν την ιδεολογία τους σχετικά με τις κοινωνικές ανισότητες υιοθετώντας ένα ύφος και μια φωνή που να 'μιλά' άμεσα στο λαό και να τον αγγίζει. Η εμφάνιση (έστω και σε μικρό ποσοστό) του αρσενικού μορφογόνους σε εκπαιδευτικά κείμενα (παραγωγοί τους είναι καθηγητές, δάσκαλοι, φοιτητές και μαθητές), καθώς και σε ιστοσελίδες επίσημων φορέων (οργανισμών, οργανώσεων, εταιριών) αποτελεί ένδειξη ότι η επιλογή του αποκλίνοντος τύπου σταδιακά αποσυνδέεται από την εγγραμματοσύνη και το εκπαιδευτικό επίπεδο.

Τέλος, το γεγονός ότι το αρσενικό μορφογόνους κάνει δειλά την εμφάνισή του και σε ιδιαίτερα επίσημα κείμενα (παραγόμενα από έγκριτους δημοσιογράφους, πολιτικούς ή διοικητικούς εκπροσώπους) αποτελεί ένδειξη φαινομενικού χρόνου για την εν εξελίξει γλωσσική αλλαγή.

Προκειμένου να ελέγξουμε τη διάχυση της αλλαγής και σε λιγότερο συχνούς τύπους και κατά συνέπεια την εγκυρότητα των αποτελεσμάτων της έρευνας, υπολογίσαμε τη συχνότητα εμφάνισης του αρσενικού μορφογόνους σε έξι ακόμη θηλυκά [+λόγια] ουσιαστικά σε -(ο)ς (βλ. Πίνακα 8). Αυτή τη φορά ελέγξαμε τη συχνότητα εμφάνισης μόνο στην αιτιατική πληθυντικού, εφόσον αποδείξαμε ότι στην πτώση αυτή εντοπίζεται η υψηλότερη συγκέντρωση του αρσενικού μορφογόνους.

Το ουσιαστικό *δίφθογγος* εμφανίζει το υψηλότερο ποσοστό εμφάνισης του αρσενικού μορφογόνους (62,6% επί του συνόλου των εμφανίσεων), παρά το γεγονός ότι ως γραμματικός όρος διαθέτει μικρή συχνότητα χρήσης. Θεωρούμε ότι αυτό οφείλεται τόσο στην εμφάνισή του ως αρσενικού στη γραμματική του Μανόλη Τριανταφυλλίδη (1941) όσο και στο ότι εμπεριέχει το ουσιαστικό *φθόγγος*. Τα ουσιαστικά *εγκύκλιος* και *μέθοδος* συγκεντρώνουν αρκετά υψηλό ποσοστό εμφάνισης του αρσενικού μορφογόνους παρά τη [+λόγια] φύση τους (35,1% και 26,8% αντίστοιχα). Το ουσιαστικό *οδός* διαθέτει υψηλή συχνότητα χρήσης και ως εκ τούτου θα περιμέναμε να είναι επιρρεπές στην αλλαγή. Παρόλα αυτά παρουσιάζει χαμηλό ποσοστό εμφάνισης του αρσενικού μορφογόνους (μόνο 17%), εφόσον το ουσιαστικό *δρόμος* έχει μεγαλύτερη συχνότητα χρήσης. Τα ουσιαστικά *άμμος* και *πρόοδος* χαρακτηρίζονται από ασθενή/ανώμαλο σχηματισμό των τύπων του πληθυντικού αριθμού,¹⁸ γεγονός που δικαιολογεί τα χαμηλά ποσοστά εμφάνισης του αρσενικού μορφογόνους στην αιτιατική πληθυντικού αριθμού (4,8% και 3,8% αντίστοιχα). Το ουσιαστικό *δίοδος* χαρακτηρίζεται από εξαιρετικά χαμηλή συχνότητα χρήσης στα συγκεκριμένα σώματα κειμένων (εφημερίδες *Μακεδονία* και *Τα Νέα*) (3%), καθώς αποτελεί σε μεγάλο βαθμό επιστημονικό όρο· έτσι, διατηρεί τη λογιότητα στο σχηματισμό του.

Θηλυκά ουσιαστικά σε -(ο)ς	Ποσοστά εμφάνισης (%) του αρσενικού μορφογόνους (ΑΙΤ ΠΛ)
δίφθογγος	62,6
εγκύκλιος	35,1
μέθοδος	26,8
οδός	17
άμμος	4,8
πρόοδος	3,8
δίοδος	3

Πίνακας 8 Συχνότητα χρήσης πρόσθετων θηλυκών [+λόγων] ουσιαστικών σε -(ο)ς (μέσω της μηχανής αναζήτησης Google)

¹⁸ Το ουσιαστικό *άμμος* χρησιμοποιείται περισσότερο στον ενικό αριθμό, οι τύποι του πληθυντικού είναι σπάνιοι και απαντούν σε λογοτεχνικά ή επιστημονικά κείμενα, ενώ το *πρόοδος* χρησιμοποιείται στον πληθυντικό με διαφορετικές σημασίες, π.χ. *γεωμετρική πρόοδος*, *πρόοδος στα ΤΕΙ*.

Συνεπώς, αφήνοντας έξω από την ανάλυση τις προαναφερθείσες εξαιρέσεις, μπορούμε να συμπεράνουμε ότι η γλωσσική αλλαγή που διαφαίνεται στο συχνόχρηστο ουσιαστικό *ψήφος*, αρχίζει να γίνεται ορατή και σε λιγότερο συχνά ουσιαστικά σε *-(ο)ς*.

5. Ερμηνεία

Η παρούσα έρευνα έχει τους εξής στόχους: α) να επαληθεύσει την εκδήλωση της αλλαγής γένους στη ΝΕ, β) να διερευνήσει τους ενδοσυστηματικούς λόγους που την προκαλούν, γ) να εξετάσει την επίδραση εξωσυστηματικών παραγόντων, όπως η συχνότητα χρήσης, στην παγίωσή της, δ) να εντοπίσει τους τρόπους διάχυσής της και ε) να αναδείξει τους παράγοντες που αυξάνουν τη δεκτικότητα ή την αντίσταση στην αλλαγή.

Βασίζόμενες στα ευρήματα της έρευνάς μας υποστηρίζουμε ότι η πρωτοτυπικότητα του κλιτικού επιθήματος *-(ο)ς* ως αρσενικού αιτιολογεί τη μορφολογική αλλαγή. Έχοντας ασύνειδη γνώση του πρωτοτυπικού κανόνα σχηματισμού αρσενικών ουσιαστικών, οι φυσικοί ομιλητές τον εφαρμόζουν και στα *[+λόγια]* περιφερειακά θηλυκά ουσιαστικά. Η φωνητική ομοιότητα προσδιοριστή και κλιτικού επιθήματος ευνοεί περισσότερο την εκδήλωση της αλλαγής, με καταλληλότερο περιβάλλον την αιτιατική πληθυντικού αριθμού (ΠΡΟΣΔΙΟΡΙΣΤΗΣ **tus**~ΜΟΡΦΟΛΟΓΙΚΟΣ ΔΕΙΚΤΗΣ **us**). Στην καταλληλότητα του περιβάλλοντος αυτού συνηγορούν και τα αριθμητικά δεδομένα που προκύπτουν από τη χρήση του μορφογένους σε *-(ο)ς*. Σύμφωνα με την ανάλυσή τους, η γλωσσική αλλαγή εκδηλώνεται αρχικά σε γραμματικές πτώσεις (αιτιατική πληθυντικού) και σε λέξεις (*ψήφος*) αυξημένης συχνότητας χρήσης, και στη συνέχεια διαχέεται σε λιγότερο συχνές λέξεις. Η διάχυση της γλωσσικής αλλαγής πραγματοποιείται από χρήστες των οποίων οι γλωσσικές επιλογές χαρακτηρίζονται από καινοτομικότητα, προφορικότητα, διάθεση να προσελκύσουν το ευρύ κοινό και αποξένωση από την ελληνική γλωσσική πραγματικότητα. Τα χαρακτηριστικά αυτά εντοπίζονται σε συγκεκριμένα πυκνά κοινωνικά δίκτυα, π.χ. νεολαία, οπαδοί, bloggers, Κύπριοι και Έλληνες της Διασποράς, εκπρόσωποι των ακροδεξιών και (ακρο)αριστερών παρατάξεων κτλ. Ταυτόχρονα, όμως, το θηλυκό *[+λόγιο]* μορφογένος διατηρείται σε επίσημα συμφραζόμενα, υποδηλώνοντας την ανάγκη των χρηστών για αυθεντικότητα, συμμόρφωση προς τον επίσημο κανόνα, ρυθμιστικότητα και υπογράμμιση του υψηλού μορφωτικού τους επιπέδου.

Η αιτιολόγηση, η εκδήλωση και η διάχυση της αλλαγής γένους που παρατηρείται στη ΝΕ μπορεί να ερμηνευτεί στο πλαίσιο της γλωσσικής αυτορρύθμισης και του ομοιοστατικού μηχανισμού του συστήματος. Οι προαναφερθέντες ενδοσυστηματικοί λόγοι 'εξαναγκάζουν' τους φυσικούς ομιλητές της ΝΕ να προβούν σε εξομάλυνση του δύσκολου *[+λόγιου]* μορφογένους, προκειμένου να εξυπηρετηθεί η οικονομία του συστήματος και η ευκολία/ απλότητα κατά την παραγωγή. Η αυτορρυθμιστική αυτή τάση αντανakλάται στη χρήση, με το *[-λόγιο]* αποκλίνον μορφογένος να περνάει ολοένα και περισσότερο στο γραπτό λόγο των ομιλητών. Καθώς, όμως, η διαδικασία της αυτορρύθμισης βρίσκεται σε εξέλιξη και το σύστημα του γραμματικού γένους της ΝΕ εμφανίζει διακυμάνσεις, το γλωσσικό σύστημα τείνει να διατηρηθεί σε μια σταθερή κατάσταση, παρόλες τις τροποποιήσεις, γεγονός που αντανakλάται στην τάση των ομιλητών με υψηλό μορφωτικό επίπεδο να εμμένουν στο θηλυκό *[+λόγιο]* μορφογένος σε επίσημα συγκεκριμένα και να απορρίπτουν το αρσενικό ως μη ορθό ή *[+λαϊκό]*.

6. Συμπερασματικές παρατηρήσεις και μελλοντικές προτάσεις

Διερευνώντας την κατανομή της συχνότητας χρήσης του θηλυκού *[+λόγιου]* και αρσενικού *[-λόγιου]* μορφογένους *[X_{-(ο)ς}]*, υποστηρίζουμε την ύπαρξη ενός αυτορρυθμιστικού/ ομοιοστατικού μηχανισμού, ο οποίος ελέγχει το σύστημα γένους της ΝΕ. Η ανάδυση του αρσενικού μορφογένους για τα θηλυκά ουσιαστικά σε *-(ο)ς* οδηγεί σταδιακά το σύστημα γένους σε μια ασταθή κατάσταση, η οποία ευνοεί τη γλωσσική αλλαγή. Η αστάθεια αυτή αιτιολογείται με βάση την πρωτοτυπικότητα του αρσενικού *[X_{(ο)ς}]*, ενισχύεται από τη φωνητική ομοιότητα προσδιοριστή και κλιτικού επιθήματος και παγιώνεται χάρη στην υψηλή συχνότητα χρήσης των ονομάτων σε συγκεκριμένες γραμματικές πτώσεις. Η αλλαγή του γένους διαχέεται σταδιακά μέσα από ισχυρά κοινωνικά δίκτυα. Οι αποκλίνοντες αρσενικοί τύποι είναι ιδιαίτερα συχνοί σε ηλεκτρονικά κείμενα ανεπίσημου *[-λόγιου]* ύφους.

Το γραμματικό γένος συνιστά ένα ενδιαφέρον πεδίο έρευνας όχι μόνο σε θεωρητικό επίπεδο (συγχρονική και διαχρονική γλωσσολογία) αλλά και σε εφαρμοσμένο επίπεδο (κοινωνιογλωσσολογία, ψυχολογία, απόκτηση της δεύτερης/ ξένης γλώσσας, διδακτική της ΝΕ). Έτσι, ιδιαίτερο ενδιαφέρον θα είχε η διερεύνηση των νοητικών διεργασιών που πραγματοποιούνται κατά την απόδοση του γραμματικού γένους της ΝΕ σε ψυχολογικό επίπεδο τόσο από τους φυσικούς ομιλητές όσο και από τους αλλόγλωσσους μαθητές, καθώς επίσης και η συγκριτική ανάλυση της απόδοσης του

γραμματικού γένους από φυσικούς ομιλητές διαφορετικού φύλου σε κοινωνιογλωσσικό επίπεδο. Τέλος, η κατανομή των δύο μορφογενών σε προφορικά σώματα κειμένων και σε διαφορετικές περιστάσεις επικοινωνίας θα μπορούσε να ρίξει περισσότερο φως στην εν εξελίξει αλλαγή γένους της ΝΕ.

ABSTRACT

The aim of this study was to investigate whether adolescents reach the linguistic level corresponding to their age and to compare their lexical and syntactic abilities in written narrative and non narrative texts. Our sample consisted of 2 groups of 162 adolescents, 14, 5 and 16, 6 mean years of age respectively. The results showed that generally older adolescents had better lexical and syntactic abilities compared to smaller ones. However, an unexpectedly high linguistic development was observed in the smaller age group in non narrative texts, showing that the production of complex texts may lead to unexpected linguistic levels.

Key words: Syntax, Vocabulary, Written texts, Adolescents, Linguistic development

1. Εισαγωγή

Με τον όρο «γλωσσική ανάπτυξη στην εφηβεία» εννοούμε τη γλώσσα που μαθαίνουμε υπό κανονικές συνθήκες όταν είμαστε στην εφηβική ηλικία, δηλαδή από τα 11 ή τα 12 έως την πρόωμη ενηλικίωση (Paul, 2001). Το σχολείο παίζει σημαντικό ρόλο στην ομαλή ανάπτυξη της γλώσσας του εφήβου. Οι μαθητές στη δευτεροβάθμια εκπαίδευση μαθαίνουν να επεξεργάζονται και να παράγουν, σε πλαίσια επικοινωνιακής προσέγγισης, αφηγηματικά και μη αφηγηματικά κείμενα (περιγραφικά, επιχειρηματολογικά, δοκίμια, άρθρα κ.ά.) (Γεωργακοπούλου & Γούτσος, 1999, Beaugrande & Dressler, 1981, Κλαίρης & Μπαμπινιώτης, 2005, Ματσαγούρας, 2004, Μήτσης, 2004, Παιδαγωγικό Ινστιτούτο, 2002).

Σ' αυτή την έρευνα ακολουθούμε την ταξινόμια των Γεωργακοπούλου και Γούτσου (1999), η οποία διακρίνει τον λόγο σε δύο «τρόπους», τον αφηγηματικό και τον μη αφηγηματικό. Με τη διάκριση αυτή αποφεύγεται ο «κατακερματισμός του λόγου σε αποσπασματικές κατηγορίες ασύνδετες μεταξύ τους και χωρίς σαφή όρια» (Γεωργακοπούλου & Γούτσος, 1999). Ως αφηγηματικά κείμενα ορίζονται εκείνα τα κείμενα που εκφράζουν συγκεκριμένες, κυρίως παρελθοντικές, εμπειρίες και δίνουν έμφαση στις ανθρώπινες δράσεις. Τα μη αφηγηματικά κείμενα, από την άλλη, συνιστούν μια μεγάλη ανομοιογενή και πολυποίκλη κατηγορία κειμένων, τα οποία σκοπό έχουν την ανταλλαγή γλωσσικών πληροφοριών και την προώθηση της γνώσης χωρίς να στηρίζονται στην αφήγηση (Γεωργακοπούλου & Γούτσος, 1999, Beers & Nagy, 2011).

2. Σκοπός και ειδικοί στόχοι

Σκοπός της έρευνάς μας ήταν να μελετήσουμε το αν οι έφηβοι κατακτούν το υψηλό γλωσσικό επίπεδο που αντιστοιχεί στην ηλικία τους και το αν διαφοροποιούνται ως προς το λεξιλόγιο και τη σύνταξη σε δύο διαφορετικά είδη γραπτών κειμένων (Paul, 2001). Ειδικότερα, μελετήθηκαν οι λεξιλογικές και συντακτικές ικανότητες μαθητών Γυμνασίου και Λυκείου σε αφηγηματικά και σε μη αφηγηματικά κείμενα. Συγκεκριμένα, για τη λεξιλογική ανάλυση επικεντρωθήκαμε στο συνολικό μήκος κειμένου σε λέξεις και στο μήκος λέξεων, δηλ. στον αριθμό λέξεων με 3 ή περισσότερες συλλαβές (Beers & Nagy, 2011, Berman & Nir-Sagiv, 2007). Για τη συντακτική ανάλυση χρησιμοποιήσαμε δύο ευρέως αποδεκτά συντακτικά κριτήρια, το μήκος πρότασης, δηλ. το μέσο αριθμό λέξεων ανά πρόταση, και τη

χρήση αναφορικών προτάσεων (Beers & Nagy, 2011, Beers & Nagy, 2009, Berman & Nir-Sagiv, 2007, Nippold, Hesketh, Duthie & Mansfield, 2005).

Οι υποθέσεις μας ήταν οι εξής:

- α) Τα γραπτά των μαθητών του Λυκείου θα παρουσιάσουν πιο αυξημένο αριθμό των πιο πάνω λεξιλογικών και συντακτικών κριτηρίων σε σχέση με τα γραπτά των μαθητών του Γυμνασίου.
- β) Στα αφηγηματικά κείμενα θα παρατηρηθεί υψηλότερη γραπτή επίδοση σε σχέση με τα μη αφηγηματικά κείμενα και στις δύο ομάδες μαθητών.

3. Υλικά και μέθοδοι

3.1 Συμμετέχοντες

Η έρευνά μας πραγματοποιήθηκε σε δημόσια αστικά Γυμνάσια και Λύκεια της Λάρισας και της Αθήνας. Στην έρευνα συμμετείχαν τελικά 162 μαθητές, αγόρια και κορίτσια, καθώς αποφασίστηκε να μη συμπεριληφθούν στο δείγμα της έρευνας: α) αλλόγλωσσοι μαθητές με πρώτη γλώσσα άλλη από την ελληνική και β) μαθητές στους οποίους είχε διαγνωστεί κάποια μορφή δυσλεξίας (Cohen, Manion & Morrison, 2008). Συγκεκριμένα, αξιολογήθηκαν 89 μαθητές που φοιτούσαν στην Γ' Γυμνασίου (Μ.Ο. ηλικίας 14,5) και 73 μαθητές στη Β' Λυκείου (Μ.Ο. ηλικίας 16,6) αντίστοιχα.

3.2 Διαδικασία

Διανεμήθηκε στους μαθητές ένα κείμενο προς ανάγνωση πάνω στο θέμα του ρατσισμού και τους ζητήθηκε να παράγουν δύο κείμενα, ένα αφηγηματικό και ένα μη αφηγηματικό, σε πλαίσια επικοινωνιακής προσέγγισης. Τα ερωτήματα που τους δόθηκαν ήταν ίδια για τους μαθητές Γυμνασίου και Λυκείου. Είχε προηγηθεί από τους διδάσκοντες καθηγητές τους η διδασκαλία των αντίστοιχων εννοιών για το ρατσισμό από τα σχολικά βιβλία Νεοελληνική Γλώσσα (Γ' Γυμνασίου) και Έκφραση-Έκθεση (Β' Λυκείου).

3.3 Στατιστική ανάλυση

Για τις συγκρίσεις των δύο ομάδων μαθητών (Γυμνάσιο, Λύκειο) εφαρμόστηκε ο έλεγχος Mann-Whitney ως προς τα παρακάτω κριτήρια γλωσσικής ανάπτυξης: α. Συνολικό μήκος κειμένου σε λέξεις, β. μήκος λέξεων (μέσος αριθμός λέξεων με 3 ή περισσότερες συλλαβές), γ. μήκος πρότασης (μέσος αριθμός λέξεων ανά πρόταση) και δ. χρήση αναφορικών προτάσεων.

Για τις συγκρίσεις των δύο τύπων κειμένου (αφηγηματικό, μη αφηγηματικό) χρησιμοποιήθηκε ο στατιστικός έλεγχος Wilcoxon ως προς τα τέσσερα κριτήρια που αναφέρθηκαν παραπάνω.

Οι στατιστικές αναλύσεις πραγματοποιήθηκαν με το στατιστικό πακέτο SPSS v.15. Στους στατιστικούς ελέγχους η παρατηρούμενη στάθμη σημαντικότητας (p -value) υπολογίστηκε με τη μέθοδο προσομοίωσης Monte-Carlo. Το επίπεδο σημαντικότητας όλων των στατιστικών ελέγχων προκαθορίστηκε σε $\alpha=0,05$.

4. Αποτελέσματα

Ο στατιστικός έλεγχος Mann-Whitney έδειξε ότι υπάρχει στατιστικά σημαντική διαφορά μεταξύ των δύο ομάδων μαθητών (Γυμνάσιο vs Λύκειο) ως προς: α) το συνολικό μήκος κειμένου σε λέξεις ($p=0,007$) στα μη αφηγηματικά κείμενα, β) το μήκος λέξεων (λέξεις με 3 ή περισσότερες συλλαβές) ($p=0,001$) στα αφηγηματικά κείμενα, γ) το μήκος πρότασης σε λέξεις ($p=0,001$) στα μη αφηγηματικά κείμενα (βλ. πίν.1,2).

	Μήκος κειμένου (σε λέξεις)	Μήκος λέξεων	Μήκος πρότασης	Αναφορικές προτάσεις
Γυμνάσιο (Μ.Ο.)	148,4	45,1	6,3	2,9
Λύκειο (Μ.Ο.)	142,9	50,1	3,0	6,4
p-value	$p=0,449$ (NS**)	$p=0,001$ (S*)	$p=0,665$ (NS)	$p=0,684$ (NS)

Πίνακας 1 Μέσος όρος λεξιλογικών και συντακτικών κριτηρίων σε αφηγηματικό κείμενο σε μαθητές Γυμνασίου και Λυκείου (*S: Significant - **NS: Non Significant)

	Μήκος κειμένου (σε λέξεις)	Μήκος λέξεων	Μήκος πρότασης	Αναφορικές προτάσεις
Γυμνάσιο (Μ.Ο.)	153,3	52,1	6,7	4,4
Λύκειο (Μ.Ο.)	137,8	55,9	4,2	7,9
p-value	p=0,007 (S)	p=0,119 (NS)	p=0,001 (S)	p=0,493 (NS)

Πίνακας 2 Μέσος όρος λεξιλογικών και συντακτικών κριτηρίων σε μη αφηγηματικό κείμενο σε μαθητές Γυμνασίου και Λυκείου.

Ο στατιστικός έλεγχος Wilcoxon έδειξε ότι υπάρχει στατιστικά σημαντική διαφορά μεταξύ των δύο τύπων κειμένου (αφηγηματικό vs μη αφηγηματικό) ως προς:

- α) το μήκος λέξεων (λέξεις με 3 ή περισσότερες συλλαβές τόσο στο Γυμνάσιο ($p=0,001$) όσο και στο Λύκειο ($p=0,007$),
- β) το μήκος πρότασης σε λέξεις στο Γυμνάσιο ($p=0,046$) αλλά και στο Λύκειο ($p=0,001$),
- γ) τη χρήση αναφορικών προτάσεων στο Γυμνάσιο ($p=0,001$) και στο Λύκειο ($p=0,001$) (βλ. διαγράμματα 1,2).

Διάγραμμα 1 Μέσος όρος λεξιλογικών και συντακτικών κριτηρίων σε αφηγηματικό και μη αφηγηματικό κείμενο στο Γυμνάσιο.

Διάγραμμα 2 Μέσος όρος λεξιλογικών και συντακτικών κριτηρίων σε αφηγηματικό και μη αφηγηματικό κείμενο στο Λύκειο.

5. Συμπεράσματα – Συζήτηση

Σ' αυτή την έρευνα χρησιμοποιήσαμε κριτήρια λεξιλογικής και συντακτικής πολυπλοκότητας και τα ευρήματα γενικά υποστήριξαν τις υποθέσεις μας. Παρατηρήθηκε, όμως, και μη αναμενόμενη γνωστική και γλωσσική εξέλιξη των παιδιών τόσο ηλικιακή όσο και ανάμεσα στα δύο είδη κειμένων που εξετάσαμε.

Τα αποτελέσματα έδειξαν πως οι μαθητές του Λυκείου, συγκρινόμενοι με τους μαθητές του Γυμνασίου, είχαν υψηλότερη επίδοση στο μήκος λέξεων (λέξεις με τρεις συλλαβές και πάνω) και στη χρήση αναφορικών προτάσεων τόσο στα αφηγηματικά όσο και στα μη αφηγηματικά κείμενα. Με το εύρημα αυτό επαληθεύτηκαν οι υποθέσεις μας, καθώς υποδηλώθηκε ότι η γλωσσική και γνωστική τους ανάπτυξη συμβαδίζει με την ηλικία τους. Επιπρόσθετα, επιβεβαιώθηκαν και άλλες έρευνες, οι οποίες έχουν υποστηρίξει ότι το μήκος λέξεων και ο αριθμός των δευτερευουσών προτάσεων, ειδικά των αναφορικών, τείνουν να αυξάνονται με την ηλικία (Beers & Nagy, 2011, Nippold, 2007, Nippold, Ward-Lonergan & Fanning, 2005, Wimmer, Köhler, Grotjahn & Altmann, 1994).

Ωστόσο, όμως, ως προς το συνολικό μήκος κειμένου και ως προς τον αριθμό λέξεων ανά πρόταση οι μαθητές του Γυμνασίου είχαν υψηλότερη επίδοση από τους μαθητές του Λυκείου, παρά το ότι σε προγενέστερες μελέτες σημειώθηκε πως το μέσο μήκος των προτάσεων σε λέξεις καθώς και το συνολικό μήκος κειμένου αποτελούν κριτήρια προχωρημένης γλωσσικής ανάπτυξης, που επέρχεται με το πέρασμα της ηλικίας (Berman & Nir-Sagiv, 2007, Beers & Nagy, 2009, Nippold, Ward-Lonergan & Fanning, 2005, Nippold, 2007).

Επιπλέον, όσον αφορά τη σύγκριση των κειμένων, τα αποτελέσματα έδειξαν ότι οι μαθητές του Λυκείου είχαν υψηλότερη επίδοση στα αφηγηματικά κείμενα σε σύγκριση με τα μη αφηγηματικά μόνο ως προς το συνολικό μήκος κειμένου σε λέξεις. Ως προς τα υπόλοιπα κριτήρια οι μαθητές του Λυκείου είχαν υψηλότερη επίδοση στα μη αφηγηματικά κείμενα. Με τα ευρήματα αυτά επαληθεύτηκε εν μέρει η αρχική μας υπόθεση, η οποία ήταν ότι οι μαθητές θα είχαν υψηλότερη επίδοση στα αφηγηματικά κείμενα, καθώς ασκούνται σ' αυτά από την προσχολική τους ηλικία.

Επίσης, οι μαθητές του Γυμνασίου είχαν υψηλότερη επίδοση στα μη αφηγηματικά κείμενα σε σύγκριση με τα αφηγηματικά κείμενα ως προς όλα τα κριτήρια. Μ' αυτό το εύρημα δεν επαληθεύτηκε η παραπάνω αρχική μας υπόθεση. Ωστόσο, όμως, επιβεβαιώθηκαν ευρήματα προηγούμενων ερευνών, οι οποίες επίσης είχαν εντοπίσει μη αναμενόμενη εξελιγμένη γλωσσική ανάπτυξη εφήβων μαθητών σε μη αφηγηματικά κείμενα, τα οποία συνιστούν μια πολύ απαιτητική κατηγορία κειμένων (Berman & Nir-Sagiv, 2007, Beers & Nagy, 2011).

Συμπερασματικά, τα ευρήματά μας υποδηλώνουν ότι κάποιοι μαθητές είναι δυνατόν να βρίσκονται σε υψηλότερο γλωσσικό επίπεδο από αυτό που αντιστοιχεί στην ηλικία τους και επιδεικνύουν μεγάλη ικανότητα στην παραγωγή γραπτού λόγου. Η κατασκευή ενός μη αφηγηματικού κειμένου είναι δυσκολότερη από αυτή ενός αφηγηματικού κειμένου, αφού απαιτεί πιο πολύπλοκη χρήση της γλώσσας καθώς και παραγωγή ιδεών. Συνεπώς, η ικανότητα παραγωγής μη αφηγηματικών κειμένων συνδέεται με τις μεγαλύτερες ηλικίες. Ωστόσο, όμως, η ανάγκη παραγωγής πιο πολύπλοκων κειμένων είναι δυνατόν να οδηγήσει και σε μη αναμενόμενη γνωστική και γλωσσική ανάπτυξη τόσο ηλικιακή όσο και ανάμεσα σε διαφορετικά είδη κειμένων (Berman & Nir-Sagiv, 2007, Beers & Nagy, 2011, Nippold, 2007, Nippold, Ward-Lonergan & Fanning, 2005, Nippold, Hesketh, Duthie & Mansfield, 2005).

ABSTRACT

The present study explores Crosslinguistic Influence (CLI) in verbal tenses and in vocabulary in the acquisition of Greek as a Foreign Language (FL). Spanish L1 learners with knowledge of English took a variety of tests designed to explore CLI between these languages. Results evidenced that CLI was present, although no correlation was found between CLI and variables such as age, English proficiency, metalinguistic awareness and exposure to Greek. However, a moderate negative correlation was observed between lexical CLI and proficiency in Greek. Spanish was the predominant source of CLI, probably due to psychotypology.

Λέξεις Κλειδιά: Διαγλωσσική Επίδραση, Ελληνική ως Ξένη Γλώσσα, ισπανόφωνοι, ψυχολογία

1. Εισαγωγή

Η παρούσα μελέτη, η οποία αποτελεί τμήμα μιας μεγαλύτερης έρευνας (Andria 2010), επιθυμεί να εμβαθύνει στο φαινόμενο της Διαγλωσσικής Επίδρασης (ΔΕ) στην Πολύγλωσση Εκμάθηση (ΠΕ) μέσα από έναν συνδυασμό γλωσσών που δεν έχει μελετηθεί αρκετά: Ισπανόφωνοι μαθητές με γνώση της αγγλικής οι οποίοι μαθαίνουν μια τυπολογικά διαφορετική γλώσσα, τα νέα ελληνικά (ΝΕ), ως Ξένη Γλώσσα (ΞΓ). Στόχος της εργασίας είναι να ερευνήσει, αρχικά, αν υπάρχουν περιπτώσεις ΔΕ κατά τη διάρκεια της εκμάθησης της ΝΕ ως ΞΓ, αν η ΔΕ σχετίζεται με παράγοντες όπως η ηλικία, η γλωσσική επάρκεια στα αγγλικά, η μεταγλωσσική επίγνωση (ΜΕ) και η έκθεση στα ελληνικά· και τέλος, ποια από τις προηγούμενα κατακτημένες γλώσσες (ισπανικά ή αγγλικά) είναι πιο συχνά γλώσσα-πηγή ΔΕ.

2. Επισκόπηση Προηγούμενης Έρευνας

2.1 Πολύγλωσση Εκμάθηση και Διαγλωσσική επίδραση

Τα τελευταία χρόνια, η μελέτη του φαινομένου της πολυγλωσσίας (*multilingualism*) έχει γίνει ένας πολύ διαδεδομένος κλάδος στον τομέα της γλωσσικής κατάκτησης. Η Πολύγλωσση Εκμάθηση (ΠΕ) (*multilingual acquisition*) έχει οριστεί (Cenoz 2000) ως η διαδικασία εκμάθησης περισσότερων της μίας γλώσσας. Η κύρια διαφορά ανάμεσα στην εκμάθηση μιας Δεύτερης Γλώσσας (Γ2) και στην εκμάθηση μιας Γ3 (Γ4, Γ5, κλπ.) έγκειται στη μεγαλύτερη πολυπλοκότητα που χαρακτηρίζει την εκμάθηση της τελευταίας, διότι όσο πιο πολλές γλώσσες αναμειγνύονται, τόσο ο αριθμός των παραγόντων που αλληλεπιδρούν αυξάνεται.

Έχει τονιστεί ότι τα «κατακτημένα γλωσσικά συστήματα δεν συνυπάρχουν το ένα δίπλα στο άλλο σε αμοιβαία αρμονία» (Herdina & Jessner 2000:90), αλλά αλληλεπιδρούν μεταξύ τους. Η επίδραση από τη μητρική γλώσσα, αλλά και από όλες τις γλώσσες που κατέχει ένας ομιλητής κατά τη διαδικασία

εκμάθησης μίας νέας γλώσσας- στόχου (ΓΣ) ονομάζεται Διαγλωσσική Επίδραση (ΔΕ) (Odlin 1989, Jarvis & Pavlenko 2008).

2.2 Παράγοντες που επηρεάζουν τη Διαγλωσσική Επίδραση (ΔΕ)

Η αλληλεπίδραση παραγόντων στη ΔΕ κατά την πολυγλωσσία είναι ένα θεμελιώδες θέμα και έχει ερευνηθεί από ένα πλήθος μελετών (Murphy 2003). Ένας από τους πιο συχνά ερευνώμενους παράγοντες που μπορούν να προβλέψουν τη ΔΕ είναι η γλωσσική επάρκεια (*proficiency*) στη ΓΣ. Είναι γενικά αποδεκτό ότι η ΔΕ είναι πιθανότερο να λάβει χώρα σε αρχικά επίπεδα γλωσσομάθειας (Hammarberg 2001) και συνήθως εμφανίζεται ως στρατηγική αναπλήρωσης (*compensatory strategy*). Σε αυτές τις περιπτώσεις, η έλλειψη επαρκών μέσων έκφρασης στη ΓΣ μπορεί να καλυφθεί με τη χρήση της Γ2. Ωστόσο, η επάρκεια στη Γ2 αποτελεί έναν εξίσου θεμελιώδη παράγοντα. Στην μελέτη της για το ρόλο της γλωσσικής επάρκειας της Γ2 στη ΕΓ3 η Tremblay (2006: 109) συμπεραίνει ότι «μέχρι να επιτευχθεί ένα βασικό επίπεδο (*threshold level*) στη Γ2, η ΔΕ από τη Γ2 στη Γ3 είναι πολύ περιορισμένη». Στη μελέτη της, οι συμμετέχοντες από ένα χαμηλό/μέσο επίπεδο επάρκειας στη Γ2 δεν εμφανίστηκαν να ανατρέχουν στην Γ2 κατά την εκμάθηση της Γ3.

Ένας εξίσου σημαντικός παράγοντας είναι η έκθεση στη ΓΣ. Η συγκεκριμένη μεταβλητή συχνά μετράται με γνώμονα τη Διάρκεια Παραμονής (*Length of Stay*) στην κοινότητα όπου ομιλείται η ΓΣ ή ως το ποσό των ωρών διδασκαλίας στη ΓΣ. Αυξημένη έκθεση στη ΓΣ συνήθως οδηγεί σε λιγότερη ΔΕ, αν και υψηλή έκθεση στη Γ2 μπορεί να οδηγήσει σε μεγαλύτερη επίδραση από τη Γ2 κατά τη διάρκεια της εκμάθησης της Γ3. Έχει αποδειχθεί ότι υπάρχει σημαντική αλληλεπίδραση ανάμεσα σε αυτή τη μεταβλητή, την ηλικία και τη γλωσσική επάρκεια (Ringböm 2001).

Μεγάλης σημασίας είναι επίσης η Μεταγλωσσική επίγνωση (ΜΕ), η οποία είναι μία ικανότητα συνυφασμένη με τον πολύγλωσσο ομιλητή και διαφέρει από αυτήν ενός μονόγλωσσου που μαθαίνει την πρώτη του Γ2. Στη μελέτη της η Jessner (1999), ανακάλυψε ποιοτικές διαφορές στις στρατηγικές μάθησης των πολύγλωσσων μαθητών, λόγω της ΔΕ. Οι συμμετέχοντες αποκάλυψαν ότι είχαν αναπτύξει στρατηγικές ικανότητες όπως η εναλλαγή γλωσσών, η χρήση *ξενισμών* και η κατά λέξη μετάφραση, προκειμένου να αναπληρώσουν την έλλειψη γνώσης στη ΓΣ.

Ο παράγοντας «ηλικία» έχει υπάρξει σημαντικό αντικείμενο έρευνας στις μελέτες ΕΓ3. Ωστόσο, τα αντικρουόμενα αποτελέσματα αυτών, δεν έχουν διασαφηνίσει τον ρόλο της. Σε ορισμένες έρευνες (Cenoz 2001) μεγαλύτερης ηλικίας μαθητές έδειξαν μεγαλύτερα ποσοστά ΔΕ από ό, τι οι μικρότεροι, παρά την μεγαλύτερη γλωσσική τους επάρκεια στη ΓΣ, γεγονός που ερμηνεύτηκε ως αποτέλεσμα της υψηλότερης μεταγλωσσικής επίγνωσης των μεγαλύτερων παιδιών. Αντίθετα αποτελέσματα παρατηρήθηκαν από τις Navés, Miralpeix και Celaya (2005), όπου μεγαλύτερης ηλικίας μαθητές έδειξαν μικρότερες περιπτώσεις ΔΕ.

Άλλες μεταβλητές είναι η σειρά εκμάθησης των διαφόρων γλωσσών καθώς και το πρόσφατο της χρήσης (*recency of use*) της κάθε γλώσσας. Η πρώτη αναφέρεται στην επίδραση που μπορεί να έχει στη ΔΕ η σειρά με την οποία μαθεύτηκαν οι διάφορες Γ2. Η δεύτερη σχετίζεται με την ιδέα του ότι οι μαθητές ενδέχεται να ανατρέχουν περισσότερο στη γλώσσα την οποία χρησιμοποιούν ενεργά, παρά σε άλλες γλώσσες που γνωρίζουν αλλά ίσως δεν τις χρησιμοποιούν.

Οι τυπολογικές ομοιότητες ανάμεσα στις γλώσσες φαίνεται να παίζουν έναν θεμελιώδη ρόλο στον καθορισμό της έκτασης της ΔΕ. Οι πρώιμες έρευνες σε αυτόν τον τομέα εστίαζαν στην τυπολογική εγγύτητα και στις συγκλίνουσες δομές ανάμεσα στις γλώσσες, αλλά πρόσφατες έρευνες τείνουν να δίνουν έμφαση περισσότερο στη σημασία της ψυχοτυπολογίας (*psychotypology*: Kellerman 1983). Ο όρος ψυχοτυπολογία αφορά στην εκλαμβανόμενη από τον μαθητή απόσταση ανάμεσα στη Γ1 (ή τις Γ2) και τη ΓΣ. Αρκετές μελέτες έχουν δείξει ότι οι μαθητές συνήθως ανατρέχουν στη Γ2 αν την εκλαμβάνουν ως πιο κοντινή στη ΓΣ σε σχέση με τη Γ1 (Cenoz 2001). Επιπλέον, έχει βρεθεί ότι η ψυχοτυπολογία αλληλεπιδρά σημαντικά με άλλους παράγοντες, όπως η ηλικία και ΜΕ.

2.3 Παρελθοντικοί χρόνοι και λεξιλόγιο στα ελληνικά, ισπανικά και αγγλικά

Στη συγκεκριμένη μελέτη, η ΔΕ θα ερευνηθεί μέσα από τους παρελθοντικούς χρόνους και το λεξιλόγιο. Όσον αφορά τους παρελθοντικούς χρόνους, στόχος είναι να μελετηθεί μια διάκριση στους ελληνικούς χρόνους, η οποία είναι όμοια στο ένα γλωσσικό σύστημα (αγγλικά), αλλά διαφορετική στο άλλο (ισπανικά). Αυτή η διάκριση αφορά στην διαφορετική χρήση του Παρακειμένου έναντι του Αορίστου. Ένας μεγάλος αριθμός μελετών στην Ελληνική Γλωσσολογία (Μόζερ 1986, μεταξύ άλλων) έχει ασχοληθεί με τη σχέση ανάμεσα στον Παρακειμένο και τον Αόριστο στη ΝΕ. Ο κατάλληλος

«χειρισμός» των συγκεκριμένων διαφορών ανάμεσα στους χρόνους είναι ουσιαστικής σημασίας γιατί έτσι μπορούν να αποφευχθούν περιπτώσεις αρνητικής ΔΕ.

Πιο συγκεκριμένα, στα ελληνικά, όπως και στα αγγλικά, δεν γίνεται χρήση του Παρακειμένου για αναφορά στο κοντινό παρελθόν, όπως γίνεται στα ισπανικά (Πίνακας 1):

Γλώσσα	Χρόνος	Παράδειγμα
Ισπανικά	παρακείμενος	Esta mañana <u>me he levantado</u> pronto.
Ελληνικά	αόριστος	Σήμερα το πρωί <u>σηκώθηκα</u> νωρίς.
Αγγλικά	αόριστος	This morning <u>I woke up</u> early.

Πίνακας 1 Παράδειγμα χρήσης Παρακειμένου-Αορίστου σε ισπανικά, ελληνικά και αγγλικά

Στην περιγραφή της για την αντιστοιχία των ρηματικών συστημάτων στα ισπανικά και στα ελληνικά, η Álvarez (1999) παρατηρεί ότι, παρά το γεγονός ότι οι δυο γλώσσες έχουν παρεμφερείς δομές, σε κάποιες περιπτώσεις ένας συγκεκριμένος χρόνος στα ισπανικά ενδέχεται να μην αντιστοιχεί στον αναμενόμενο χρόνο στα ελληνικά, και αντίθετα. Τέτοια είναι η περίπτωση της διαφοράς στη χρήση του *Pretérito Indefinido* και *Pretérito Perfecto* στα ισπανικά με τον αντίστοιχο στα ελληνικά Αόριστο και Παρακείμενο. Χαρακτηριστικό της ισπανικής γλώσσας¹ είναι η αποφυγή χρήσης αορίστου για πράξεις που συνέβησαν στο εγγύς παρελθόν ή, τουλάχιστον, για πράξεις που ομιλητής τις αισθάνεται κοντινότερες. Συνεπώς, όταν αναφέρεται κανείς σε κάτι που συνέβη τώρα ή σήμερα το πρωί ή αυτήν την εβδομάδα/ αυτόν τον μήνα κλπ., χρησιμοποιείται ο παρακείμενος αντί του αορίστου.

Λαμβάνοντας υπόψη τις παραπάνω διαφορές ανάμεσα στα τρία γλωσσικά συστήματα, στόχος μας είναι να ερευνήσουμε αν κατά την εκμάθηση μιας χρονικής δομής στη ΓΣ (εδώ, τα ελληνικά) η οποία είναι ίδια στη Γ2 (εδώ, στα αγγλικά) αλλά διαφορετική στη Γ1 (εδώ, τα ισπανικά) α) υπάρχουν περιπτώσεις ΔΕ και αν ναι, β) από ποια γλώσσα.

Όσον αφορά το λεξιλόγιο, επιθυμούμε να εξετάσουμε αν οι πολύγλωσσοι μαθητές θα ανατρέξουν περισσότερο στη Γ1 τους (ισπανικά) ή στη Γ2 τους (αγγλικά) όταν καλούνται να αναμετρηθούν με άγνωστο λεξιλόγιο.

2.4 Στόχοι της παρούσας μελέτης

Η συγκεκριμένη μελέτη επιθυμεί να απαντήσει τα παρακάτω ερευνητικά ερωτήματα:

1. Υπάρχουν περιπτώσεις ΔΕ κατά την εκμάθηση της ελληνικής από Ισπανόφωνους μαθητές;
2. Υπάρχει κάποια σχέση ανάμεσα στη ΔΕ και στους ακόλουθους παράγοντες: α) ηλικία β) γλωσσική επάρκεια στα αγγλικά γ) γλωσσική επάρκεια στα ελληνικά δ) μεταγλωσσική επίγνωση ε) έκθεση στα ελληνικά;
3. Σε ποια γλώσσα-πηγή ανατρέχουν περισσότερο οι μαθητές της ελληνικής; Γιατί;

3. Μεθοδολογία

3.1 Συμμετέχοντες

Τριανταπέντε (N=35) μαθητές της ΝΕ ως ΞΓ έλαβαν μέρος στην έρευνα. Η Γ1 τους ήταν τα ισπανικά και 26 από αυτούς ήταν δίγλωσσοι ισπανικών και καταλανικών. Όλοι τους είχαν ως Γ2 τα αγγλικά. Πέντε συμμετέχοντες που δεν είχαν τα συγκεκριμένα χαρακτηριστικά (Γ1 Ισπανικά, Γ2 αγγλικά) αποκλείστηκαν από το αρχικά μεγαλύτερο δείγμα (40 μαθητές). Οι συμμετέχοντες ήταν πολύγλωσσοι ομιλητές, με τουλάχιστον 4 κατεκτημένες γλώσσες. Πιο συγκεκριμένα, 12 από αυτούς γνώριζαν 4 γλώσσες, 21 από αυτούς 5 γλώσσες και 2 από αυτούς 6 γλώσσες. Οι συμμετέχοντες μαθαίνουν τη ΓΣ σε ένα επίσημο περιβάλλον μάθησης, στην Επίσημη Σχολή Γλωσσών της Βαρκελώνης (*Escola Oficial*

¹ Πρέπει να σημειωθεί ότι αυτή η χρήση διαφοροποιείται σημαντικά στα Ισπανικά της Λατινικής Αμερικής, καθώς και σε κάποιες περιοχές της Βόρειας Ισπανίας, όπου η χρήση του αορίστου είναι πιο συνήθης από ό, τι του παρακειμένου.

*d'Idiomes, Barcelona-Drassanes*²), στην Ισπανία. Ανήκουν σε τέσσερα επίπεδα: 3A, 3B, 4 και 5, τα οποία για τις ανάγκες της συγκεκριμένης μελέτης θα αναφέρονται ως Επίπεδο 1, 2, 3 και 4 αντίστοιχα. Ο λόγος για τον οποίο περιλήφθηκαν επίπεδα μόνο από το 3 και πάνω οφείλεται στο γεγονός ότι η γραμματική μορφή που επιθυμούσαμε να εξετάσουμε διδάσκεται από το επίπεδο 3A και πάνω. Επιπλέον, αξίζει να σημειωθεί ότι η συγκεκριμένη μορφή, ακόμα και αν εισάγεται σε αυτό το επίπεδο, δεν χρησιμοποιείται σε μεγάλη συχνότητα μέχρι το επίπεδο 3B. Όλοι οι συμμετέχοντες διέθεταν πανεπιστημιακά πτυχία. Οι ηλικίες τους κυμαίνονταν από 22 ως 74 χρονών (Μ.Ο. Ηλικίας: 39,31), 19 από αυτούς ήταν άνδρες και 16 γυναίκες.

Επίσης έλαβε μέρος μία ομάδα από 12 μονόγλωσσους φυσικούς ομιλητές της ΝΕ. Ο λόγος για τον οποίο συμπεριλάβαμε μία ομάδα φυσικών ομιλητών ήταν διπλός: αφενός, για να εδραιώσουμε μία βάση για τα τεστ στους χρόνους, αφετέρου δε για να λάβουμε ανατροφοδότηση όσον αφορά το σχεδιασμό των εργαλείων. Επιπλέον, ένας Ισπανός μαθητής της ελληνικής συμμετείχε στην πιλοτική μελέτη των εργαλείων (βλ. 3.2.2).

3.2 Εργαλεία και Διαδικασία

3.2.1 Εργαλεία

Τα εργαλεία που χρησιμοποιήθηκαν στη μελέτη σχεδιάστηκαν εξ αρχής, ειδικά για τους σκοπούς της συγκεκριμένης μελέτης. (Για αναλυτική περιγραφή των εργαλείων και πλήρη παράθεση αυτών, βλ. Andria 2010.) Τα εργαλεία αυτά ήταν τα εξής: 1. *Τεστ στους χρόνους*: προκειμένου να εξετάσουμε τη ΔΕ στους χρόνους, χρησιμοποιήσαμε δύο ήδη τεστ: α. Τεστ Γραμματικότητας (*Grammaticality Judgment Test*) (ΤΓΡ), β. Άσκηση Συμπλήρωσης Κενών (*Fill-in-the-Blanks*). 2. *Τεστ Λεξιλογίου*: ένα τεστ πολλαπλής επιλογής που περιελάμβανε δέκα σπάνιες ελληνικές λέξεις, ώστε οι μαθητές να μην τις ξέρουν και να πρέπει να μαντέψουν. Στόχος μας ήταν να ερευνήσουμε αν ανατρέχουν περισσότερο στη Γ1 ή στη Γ2 όταν μαντεύουν. 3. *Ερωτηματολόγιο*: διανεμήθηκε στους μαθητές προκειμένου να συλλεχθούν πληροφορίες σχετικά με το γλωσσικό υπόβαθρο των μαθητών, αλλά και τις μεταβλητές τις οποίες επιθυμούσαμε να εξετάσουμε. 4. *Προφορικό Πρωτόκολλο (Oral Protocol)*: στην έρευνα συμπεριλάβαμε ένα προφορικό πρωτόκολλο προκειμένου να φωτίσουμε τις αιτίες που οδήγησαν τους συμμετέχοντες να βασιστούν στη μία ή στην άλλη γλώσσα. Ο πολύ σημαντικός παράγοντας που επηρεάζει τη ΔΕ, η ψυχοτυπολογία, ερευνήθηκε μέσω του προφορικού πρωτοκόλλου. Αυτό το εργαλείο έρευνας έδωσε μια πιο σαφή εικόνα των διαδικασιών που λαμβάνουν χώρα στο μυαλό ενός πολύγλωσσου ομιλητή κατά την εκμάθηση μιας νέας ΓΣ. Επιπλέον, το προφορικό πρωτόκολλο μας βοήθησε να εξετάσουμε αν όταν οι μαθητές χρησιμοποιούσαν αόριστο, στηρίζονταν στο αγγλικό σύστημα χρόνων ή όντως γνώριζαν τον σωστό τύπο στα ελληνικά. 5. *Συνεντεύξεις*: τον Απρίλιο του 2010, συλλέχθηκαν επιπλέον δύο συνεντεύξεις από τη Διευθύντρια και Καθηγήτρια της Σχολής γλωσσών. Σε αυτές τις συνεντεύξεις, μας δόθηκε ανατροφοδότηση σχετικά με την καταλληλότητα των εργαλείων.

3.2.2 Πιλοτική Μελέτη και Συλλογή Δεδομένων

Η πιλοτική μελέτη διεξήχθη σε δύο μέρη: το πρώτο μέρος έλαβε χώρα τον Μάρτιο του 2011 προκειμένου να ελεγχθεί η εγκυρότητα των τεστ. Ένας μαθητής νέων ελληνικών από το επίπεδο 2, ο οποίος μελετάει τη ΓΣ εδώ και πέντε χρόνια σε ένα επίσημο περιβάλλον εκμάθησης, μας παρείχε ανατροφοδότηση σχετικά με τα τεστ, τα οποία τροποποιήθηκαν ανάλογα. Το δεύτερο μέρος της πιλοτικής μελέτης έλαβε χώρα στην Ελλάδα, τον Απρίλιο του 2010. Οι συμμετέχοντες ήταν οι 12 μονόγλωσσοι της ομάδας φυσικών ομιλητών. Τα σχόλιά τους ελήφθησαν επίσης υπόψη για περαιτέρω τροποποιήσεις πριν από τη συλλογή δεδομένων.

Η συλλογή των δεδομένων έλαβε χώρα τον Μάιο του 2010 στην Επίσημη Σχολή Γλωσσών της Βαρκελώνης, στην Ισπανία. Τα τεστ μοιράστηκαν στους μαθητές στις τάξεις τους από τους ερευνητές. Ο χρόνος ήταν ελεγχόμενος για κάθε άσκηση και ήταν ο ίδιος για κάθε επίπεδο. Στην ίδια ώρα, μετά το πέρας των ασκήσεων, οι μαθητές κλήθηκαν να συμπληρώσουν το ερωτηματολόγιο. Οι οδηγίες δόθηκαν στα ισπανικά και στα ελληνικά προς αποφυγή παρεξηγήσεων. Τα προφορικά πρωτόκολλα συλλέχθηκαν σε διαφορετικές μέρες και συμμετέχοντες είχαν την επιλογή να τα δώσουν σε όποια γλώσσα προτιμούσαν.

² Ευχαριστούμε θερμά τις καθηγήτριες της Σχολής Teresa Magadán και Κλαίρη Σκανδάμη, καθώς και τους μαθητές τους, για την πολύτιμη βοήθειά τους.

4. Αποτελέσματα

Το πρώτο μας ερευνητικό ερώτημα διερευνούσε αν υπάρχουν περιπτώσεις ΔΕ κατά την εκμάθηση της ελληνικής από ισπανόφωνους μαθητές. Όσον αφορά στα τεστ στους χρόνους, το ΤΓΡ έδειξε πράγματι περιπτώσεις ΔΕ. Αντίθετα, η άσκηση συμπλήρωσης κενών δεν παρουσίασε περιπτώσεις ΔΕ, συνεπώς τα αποτελέσματα από αυτήν την άσκηση δεν μετρήθηκαν στην τελική στατιστική ανάλυση. Περιπτώσεις ΔΕ βρέθηκαν επίσης στο τεστ λεξιλογίου και τα αποτελέσματα παρουσιάζονται στον Πίνακα 2.

	N	Ελάχιστο	Μέγιστο	M.O.	Τυπική Απόκλιση
ΔΕ-ΤΓΡ	35	1	5	2.86	1.216
ΔΕ-ΛΕΞ	35	0	4	2	1.188

Πίνακας 2 Περιγραφικές στατιστικές των μεταβλητών ΔΕ (στο ΤΓΡ και Λεξιλόγιο)

Το δεύτερο ερευνητικό ερώτημα επιθυμούσε να ερευνήσει τη σχέση ανάμεσα στη ΔΕ και στις ακόλουθες μεταβλητές: ηλικία, γλωσσική επάρκεια στα αγγλικά, επάρκεια στα ελληνικά, έκθεση στα ελληνικά και ΜΕ. Η ομαλότητα (*normality*) αξιολογήθηκε και βρέθηκε ότι οι μεταβλητές «ΔΕ στο ΤΓΡ» και «ΔΕ στο Τεστ λεξιλογίου» δεν ήταν ομαλά κατανομημένες σύμφωνα με το τεστ Kolmogorov-Smirnov (.003 και .000 αντίστοιχα). Ως εκ τούτου, διεξήχθη μία συσχέτιση (*correlation*) Spearman, η οποία έδειξε ότι δεν υπήρχε συσχέτιση ανάμεσα στη ΔΕ και στην ηλικία, την επάρκεια στα αγγλικά, την έκθεση στα ελληνικά και τη ΜΕ. Ωστόσο, βρέθηκε μια μέτρια συσχέτιση ανάμεσα στο ποσό ΔΕ στο τεστ λεξιλογίου και στην επάρκεια στα ελληνικά [$r = .356, n=35, p \leq .05$], δηλαδή όσο μεγαλύτερη ήταν η επάρκεια στα ελληνικά, τόσο λιγότερη η επίδραση στον τομέα του λεξιλογίου.

Ωστόσο, ένα τεστ Kruskal-Wallis έδειξε ότι η σχέση ανάμεσα στη λεξική ΔΕ και την επάρκεια στα ελληνικά δεν ήταν σημαντική (*significant*) (0.057). Ο παρακάτω πίνακας δείχνει πως όσο η επάρκεια στα ελληνικά βελτιώνεται, τόσο μειώνεται η παρουσία ΔΕ στο λεξιλόγιο. Αντίθετα, η ΔΕ στους χρόνους που χρησιμοποιήθηκαν στην παρούσα μελέτη δεν επηρεάστηκε από την επάρκεια στη ΓΣ.

Πίνακας 3 Ποσό ΔΕ σύμφωνα με το επίπεδο γλωσσομάθειας και τον υπό μελέτη τομέα (Γραμματική και Λεξιλόγιο)

Το τελευταίο ερευνητικό μας ερώτημα είχε ως στόχο να εξετάσει τη γλώσσα-πηγή ΔΕ. Στο ΤΓΡ εντοπίστηκε ΔΕ μόνο από τα ισπανικά. Στο τεστ λεξιλογίου, υπήρξε επίδραση και από τις δύο γλώσσες και κατά τον υπολογισμό του ποσοστού των περιπτώσεων βρέθηκε ότι υπήρξε μεγαλύτερη επίδραση από τα ισπανικά (Πίνακας 4 και Σχήμα 1). Ωστόσο, δεν βρέθηκαν σημαντικές συσχετίσεις ανάμεσα στη γλώσσα-πηγή της ΔΕ και στις ανεξάρτητες μεταβλητές που εξετάστηκαν.

	N	Ελάχιστο	Μέγιστο	Μ.Ο.	Τυπική Απόκλιση
ΔΕ-Ισπανικά	35	0	4	1.23	1.087
ΔΕ-Αγγλικά	35	0	2	0.8	0.759

Πίνακας 4 Περιγραφικές στατιστικές των μεταβλητών που δείχνουν τη γλώσσα-πηγή ΔΕ στο λεξιλόγιο

Σχήμα 1 Ποσοστό ΔΕ από τα ισπανικά και από τα αγγλικά στο Τεστ Λεξιλογίου

Η ποιοτική ανάλυση των δεδομένων επιβεβαίωσε την τάση που παρουσιάστηκε στο Σχήμα 1, δηλαδή την ισχυρότερη επίδραση από τα ισπανικά. Στο τεστ λεξιλογίου παρατηρήθηκε ότι σε περιπτώσεις όπου η λέξη στα ελληνικά ήταν άγνωστη, οι μαθητές είχαν την τάση να ανατρέχουν περισσότερο στη Γ1 τους, προκειμένου να καλύψουν το λεξικό κενό. Για παράδειγμα, στην περίπτωση της λέξης «στυρί», η πλειοψηφία των μαθητών διάλεξε την λεξική επιλογή *γρανάκι από την ισπανική λέξη *grano* έναντι της αγγλικής *πιμπλίδιο (από την αγγλική λέξη *pimple*) που επίσης δινόταν. Αντίθετα, η επιλογή αγγλικών λεξικών επινοήσεων ήταν πολύ περιορισμένη. Μόνο στην περίπτωση της λέξης «μαγκούρα», η πλειοψηφία των μαθητών βασίστηκε στα αγγλικά και διάλεξε την επιλογή *στίκι (από την αγγλική λέξη *stick*).

Επιπρόσθετα, η ανάλυση των προφορικών πρωτοκόλλων αποκάλυψε ότι οι επιλογές αυτές εκ μέρους των μαθητών ήταν αποτέλεσμα μια στρατηγικής αναπλήρωσης. Όλοι οι συμμετέχοντες επιβεβαίωσαν ότι κατά τη διαδικασία μαντέματος επηρεάστηκαν πιο πολύ από τη Γ1 τους. Σε περιπτώσεις όπου κλήθηκαν να εξηγήσουν παραδείγματα όπως τα παραπάνω, δήλωσαν ξεκάθαρα ότι ανέτρεξαν στο ισπανικό λεξιλόγιο για να μαντέψουν την άγνωστη λέξη.

5. Συζήτηση

Ο πρώτος στόχος αυτής της εργασίας πάνω στη ΔΕ κατά την εκμάθηση της ελληνικής ως ΞΓ από ισπανόφωνους μαθητές ήταν να ερευνηθεί αν υπάρχουν περιπτώσεις ΔΕ. Ως απάντηση στο πρώτο αυτό ερευνητικό ερώτημα, βρέθηκε ότι πράγματι υπήρχαν περιπτώσεις ΔΕ τόσο στους χρόνους, όσο και στο λεξιλόγιο. Ωστόσο, εντοπίσαμε ότι στις ασκήσεις πάνω στους χρόνους, μόνο το ΤΓΡ εμφάνισε περιπτώσεις ΔΕ, ενώ η άσκηση συμπλήρωσης κενών όχι. Είναι πιθανό αυτό το είδος τεστ ως μεθοδολογικό εργαλείο εντοπισμού ΔΕ να είναι πιο αποτελεσματικό στα αρχικά επίπεδα, αλλά όχι στα πιο προχωρημένα. Ενδέχεται, επίσης, η διερεύνηση της διάκρισης «Αόριστος/ Παρακείμενος» να ήταν πιο παραγωγική με τη χρήση διαφορετικών, πιο απαιτητικών εργαλείων. Συνεπώς, θα ήταν καλό να διεξαχθεί περαιτέρω έρευνα, η οποία να εστιάζει στο σχεδιασμό πιο απαιτητικών ασκήσεων-εργαλείων γι αυτόν τον σκοπό.

Το δεύτερο αποτέλεσμα αυτής της μελέτης δείχνει ότι δεν υπήρξε κάποια συσχέτιση ανάμεσα στη ΔΕ και τις ακόλουθες μεταβλητές: ηλικία, επάρκεια στα αγγλικά, ΜΕ και έκθεση στα ελληνικά.

Μολαταύτα, μια μέτρια αρνητική συσχέτιση εντοπίστηκε ανάμεσα στη ΔΕ στο λεξιλόγιο και την επάρκεια στα ελληνικά. Δύο λόγοι μπορούν να εξηγήσουν την έλλειψη συσχέτισης με τις παραπάνω μεταβλητές, αλλά και την μέτρια συσχέτιση με την τελευταία μεταβλητή: αφενός, η φύση της ίδιας της ΓΣ, δεδομένου ότι είναι μια τυπολογικά διαφορετική γλώσσα από όσες συνήθως έχουν μελετηθεί μέχρι σήμερα. Αφετέρου, οι διαφορετικές μεθοδολογικές τεχνικές και το διαφορετικό ερευνητικό σχέδιο της παρούσας εργασίας τα οποία ήταν διαφορετικά σε σχέση με τις άλλες έρευνες στο τομέα αυτό.

Όσον αφορά τον παράγοντα «ηλικία», αντίθετα με προηγούμενες έρευνες (Cenoz 2001, Navés *et al.* 2005) στις οποίες ευρήθη συσχέτιση ανάμεσα στη ΔΕ και στην ηλικία, η συγκεκριμένη μελέτη δεν εντόπισε κάτι ανάλογο. Οι προαναφερθέντες λόγοι ενδέχεται να είναι υπεύθυνοι γι' αυτή τη διαφορά με προηγούμενες μελέτες.

Το γεγονός ότι δε βρέθηκε καμία συσχέτιση ανάμεσα στην επάρκεια στη Γ2 και στη ΔΕ μπορεί να οφείλεται πρωτίστως στο επίπεδο στα αγγλικά, το οποίο ενδεχομένως να ήταν πολύ χαμηλό για να οδηγήσει σε εμφάνιση ΔΕ από την εν λόγω γλώσσα (Tremblay 2006), όπως επίσης και στη περιορισμένη έκθεση στα αγγλικά. Έχει εξάλλου αποδειχθεί ότι όταν η έκθεση και η χρήση στη Γ2 είναι πολύ περιορισμένες, είναι αμφίβολο αν η γλώσσα αυτή θα έχει κάποιον αντίκτυπο στη ΓΣ. Αυτό μπορεί επιπρόσθετα να εξηγήσει γιατί δε βρέθηκε συσχέτιση μεταξύ ΔΕ και έκθεσης στα ελληνικά, δεδομένου ότι σε όλες οι περιπτώσεις η έκθεση στη ΓΣ ήταν μικρότερη του ενός έτους. Περαιτέρω έρευνα χρειάζεται να διεξαχθεί για να ερευνηθεί αν μαθητές με περισσότερη έκθεση στη ΓΣ εμφανίζουν διαφορετικές τάσεις ΔΕ.

Μια μέτρια συσχέτιση βρέθηκε ανάμεσα στην επάρκεια στη ΓΣ και στη λεξιλογική ΔΕ. Όσο η επάρκεια στα ελληνικά μεγαλώνει, τόσο μειώνεται η παρουσία λεξικής ΔΕ. Αυτό το εύρημα συνάδει με αυτά προηγούμενων ερευνών (Ringböm 2001, Navés *et al.* 2005).

Μέσα από την ποιοτική ανάλυση των δεδομένων εντοπίστηκε ότι όλοι οι μαθητές που εμφάνισαν πολύ λίγες περιπτώσεις ΔΕ μοιράζονται όλοι ένα κοινό προφίλ: χαρακτηρίζονται όλοι από μία *αφοσίωση στη γλώσσα (devotion to language)*³, πρόκειται δηλαδή για μαθητές οι οποίοι τρέφουν ένα ιδιαίτερο ενδιαφέρον για τη γλώσσα και την εκμάθηση γλωσσών (γλωσσολόγοι, καθηγητές γλωσσών, μεταφραστές κλπ). Οι συγκεκριμένοι μαθητές δήλωσαν ότι ήταν πολύ προσεκτικοί όταν έκαναν τα τεστ. Παρά το γεγονός ότι οι στατιστικές αναλύσεις δεν έδειξαν σημαντικές διαφορές όσον αφορά τη ΜΕ⁴ και τη ΔΕ, αυτό το σχόλιο κατά τα προφορικά πρωτόκολλα μπορεί αναμφίβολα να συσχετιστεί με μια υψηλή ΜΕ⁵ από μέρους των συγκεκριμένων μαθητών. Οι μαθητές δήλωσαν ότι, ειδικά στο τεστ λεξιλογίου, ήταν πολύ επιφυλακτικοί και είχαν την τάση να αποκλείουν ένα στοιχείο που τους φαινόταν «πολύ ισπανικό», που το θεωρούσαν «ψευδόφιλη λέξη» (*false friend*) ή λεξική επινόηση (*lexical invention*), ακόμα και αν αυτό το στοιχείο ήταν η σωστή ελληνική λέξη που όντως προέρχεται από τα ισπανικά.

Όσον αφορά τη ΔΕ στους χρόνους, η επάρκεια στα ελληνικά δε φαίνεται να την επηρέασε. Ο παρόμοιος μέσος όρος περιπτώσεων ΔΕ στους χρόνους (σε όλα τα επίπεδα) αποκάλυψε ότι το ΤΓΡ ήταν εξίσου απαιτητικό για όλους τους μαθητές του δείγματος. Η εξήγηση του γιατί η επάρκεια στα ελληνικά δεν επηρέασε τη ΔΕ στους χρόνους ίσως να έγκειται στο γεγονός ότι οι δομές που εξετάστηκαν στη συγκεκριμένη μελέτη χρησιμοποιούνταν συχνά στην τάξη. Σε περιπτώσεις πιο «προχωρημένων φράσεων», η δυσκολία ήταν η ίδια για όλα τα επίπεδα. Συνεπώς, μπορούμε να θεωρήσουμε ότι το πόσο πρόσφατα έχει χρησιμοποιηθεί μια συγκεκριμένη μορφή χρόνων, αλλά και η συχνότητα χρήσης της, φαίνεται να είναι ένας σημαντικός παράγοντας που μειώνει την πιθανότητα ΔΕ.

Σχετικά με το τρίτο ερευνητικό ερώτημα, η περιγραφική ανάλυση των αποτελεσμάτων αποκαλύπτει ότι υπήρξε μεγαλύτερη επίδραση από τα ισπανικά. Στην ανάλυση των χρόνων, όλες οι περιπτώσεις ΔΕ προέρχονταν από τη Γ1. Στο ΤΓΡ κάθε γραπτό είχε έστω μία περίπτωση ΔΕ από τα ισπανικά, ακόμα και αυτά των μαθητών στα υψηλότερα επίπεδα. Επιπλέον, όλοι οι μαθητές τόνισαν στα πρωτόκολλα ότι, όσον αφορά το ρηματικό σύστημα, πάντα επηρεάζονται από τη Γ1 τους, ποτέ από τη Γ2. Το συγκεκριμένο εύρημα έρχεται να επιβεβαιώσει αυτά προηγούμενων μελετών (Bouny

³ Όρος που χρησιμοποιήθηκε από τους Abrahamsson & Hyltenstam (2008:500) για μαθητές με «δυνατό και συχνά υψηλά ακαδημαϊκό ενδιαφέρον σε θέματα που αφορούν τη γλώσσα και την εκμάθηση γλωσσών», οι οποίοι ειθίστα να θεωρούνται «προικισμένοι μαθητές» δείχνοντας υψηλότερη γλωσσική ικανότητα (*language aptitude*) κατά τη διαδικασία εκμάθησης μιας Γ2.

⁴ Στην παρούσα μελέτη η ΜΕ μετρήθηκε μέσω του αριθμού ομιλούμενων γλωσσών. Ωστόσο, η ποιοτική ανάλυση έδειξε ότι η συγκριμένη μεταβλητή θα μπορούσε να προέρχεται όχι μόνο από τον αριθμό γλωσσών, αλλά επιπλέον από το είδος των σπουδών που έχουν κάνει οι μαθητές και τη στάση τους απέναντι στη γλώσσα και στη γλωσσική εκμάθηση.

⁵ Αναφερόμαστε εδώ σε μαθητές με υψηλότερη ΜΕ υπό την έννοια ότι έδειξαν έναν προσεκτικό στοχασμό για τη γλωσσική δομή, χρήση, κλπ. η οποία παρατηρήθηκε καθαρά μέσα από τις επιλογές τους στα τεστ και στις προσωπικές τους δηλώσεις μέσω των προφορικών πρωτοκόλλων.

2000, Ringböm 2001) που υποστηρίζουν ότι η γραμματική μεταφορά (*transfer*) προέρχεται σχεδόν πάντα από τη Γ1.

Στο λεξιλόγιο υπήρξαν περιπτώσεις ΔΕ και από τις δύο γλώσσες, αλλά η επιρροή της Γ1 ήταν πιο δυνατή από αυτή της Γ2. Ο παράγοντας που εξηγεί αυτήν την τάση δύναται να είναι η ψυχοτυπολογία. Οι μαθητές ισχυρίστηκαν ότι εκλάμβαναν τα ισπανικά ως μια γλώσσα πιο κοντινή στα ελληνικά και γι αυτό στηρίζονταν σε αυτήν. Το αποτέλεσμα αυτό συμφωνεί με αυτά προηγούμενων ερευνών (Bouny 2000, Cenoz 2001, De Angelis & Selinker 2001, Odlin & Jarvis 2004) για τη σημασία της ψυχοτυπολογίας ως παράγοντα-κλειδί για την προώθηση της ΔΕ. Σύμφωνα με τον Ringböm (2001) σε περιπτώσεις που οι γλώσσες δεν μοιράζονται το ίδιο αλφάβητο, η ψυχοτυπολογία φαίνεται να παίζει έναν αποφασιστικό ρόλο. Η παρούσα μελέτη φαίνεται να επιβεβαιώνει αυτόν τον ισχυρισμό.

Τα προφορικά πρωτόκολλα αποκάλυψαν επιπλέον ότι οι εκλαμβανόμενες ομοιότητες ανάμεσα στα ελληνικά και στα ισπανικά δεν είναι μόνο γλωσσικές, αλλά και πολιτισμικές. Αυτό το γεγονός υποδηλώνει την ύπαρξη μιας δια-πολιτισμικής επίδρασης, η οποία πάει πέρα από τη διαγλωσσική και φαίνεται να παίζει ρόλο κατά τη διάρκεια της εκμάθησης της ελληνικής. Μελλοντικές έρευνες θα ήταν καλό να ερευνήσουν πώς η εκλαμβανόμενη πολιτισμική εγγύτητα και οι διαπολιτισμικές ομοιότητες μπορούν να επηρεάσουν τη διαδικασία εκμάθησης μιας Γ2.

Η περιορισμένη επίδραση από τα αγγλικά στο λεξιλόγιο μπορεί να οφείλεται, αρχικά στην ψυχοτυπολογία. Οι μαθητές την εκλάμβαναν ως πιο μακρινή στη ΓΣ, επομένως δεν ανέτρεχαν σε αυτήν. Επιπρόσθετα, όπως έχει καταδειχθεί σε προηγούμενες μελέτες πιο εκτεταμένη έκθεση και μεγαλύτερη επάρκεια στη Γ2 είναι απαραίτητες συνθήκες προκειμένου να εντοπιστεί επίδραση από τη Γ2. Μόνο σε μεμονωμένες περιπτώσεις όπου οι μαθητές ελληνικών ήταν καθηγητές αγγλικών και είχαν καθημερινή επαφή με τη Γ2, παρατηρήθηκε ΔΕ από τα αγγλικά. Η Ανδριά (2009) βρήκε ότι τα αγγλικά έπαιζαν ένα πιο σημαντικό ρόλο κατά την εκμάθηση της νέας ελληνικής, πιθανόν γιατί οι συμμετέχοντες εκείνης της μελέτης χρησιμοποιούσαν αγγλικά στην καθημερινή τους ζωή, επομένως είχαν τη Γ2 ενεργοποιημένη και μπορούσαν να τη χρησιμοποιήσουν ως πηγή επίδρασης. Εντούτοις, στην ίδια μελέτη παρατηρήθηκε επίσης ότι στην περίπτωση μαθητών με Γ1 τα ισπανικά, η επίδραση ήταν αποκλειστικά από τη Γ1. Συνεπώς, θα μπορούσαμε να συμπεράνουμε ότι στην περίπτωση των Ισπανόφωνων μαθητών της ελληνικής, η ψυχοτυπολογία επισκιάζει άλλους παράγοντες που προωθούν τη ΔΕ.

6. Συμπεράσματα και Μελλοντική Έρευνα

Η παρούσα μελέτη επιθυμεί να συνεισφέρει στον τομέα της Εκμάθησης της Ελληνικής ως ΞΓ από Ισπανόφωνους μαθητές, χρησιμοποιώντας ένα συνδυασμό γλωσσών που μέχρι τώρα δεν έχει μελετηθεί αρκετά. Τα αποτελέσματα της έρευνας έδειξαν την ύπαρξη ΔΕ κατά την εκμάθηση της ελληνικής, καθώς και μία μέτρια αρνητική συσχέτιση ανάμεσα στη λεξιλογική ΔΕ και την επάρκεια στα ελληνικά. Ωστόσο, δε βρέθηκε συσχέτιση ανάμεσα στη ΔΕ και την ηλικία, την επάρκεια στα αγγλικά, τη ΜΕ, και την έκθεση στα ελληνικά. Η ψυχοτυπολογία εμφανίστηκε να αποτελεί πρωταρχικής σημασίας παράγοντα, στον οποίο οφειλόταν κατά κύριο λόγο η μεγάλη επίδραση από τα ισπανικά.

Δεδομένου του μικρού αριθμού του δείγματος, τα αποτελέσματα της συγκεκριμένης έρευνας δε θα μπορούσαν να θεωρηθούν εύκολα γενικεύσιμα: μία μελλοντική επανάληψη της μελέτης με μεγαλύτερο δείγμα, θα μπορούσε να συμβάλει προς αυτήν την κατεύθυνση. Εντούτοις, πιστεύουμε ότι μπορούν να αναδείξουν σημαντικές πτυχές της εκμάθησης της ΝΕ από ισπανόφωνους ομιλητές.

Μελλοντικές έρευνες καλό θα ήταν να επικεντρωθούν στο σχεδιασμό κατάλληλων μεθοδολογικών εργαλείων για την εξέταση της ΔΕ, όπως επίσης και στο να επεκτείνουν το πεδίο μελέτης τους σε γλωσσικούς τομείς πέραν των χρόνων και του λεξιλογίου. Ακόμη, θα ήταν σκόπιμο να διεξαχθούν παρόμοιες έρευνες στη ΔΕ κατά την εκμάθηση της ελληνικής ως ΞΓ, με άλλους συνδυασμούς γλωσσών Γ1 και Γ2. Η ΔΕ είναι ένας κλάδος με περιορισμένη έρευνα στην Ελληνική Γλωσσολογία, ως εκ τούτου περαιτέρω μελέτη στον τομέα αυτό, θα φώτιζε σημαντικές πλευρές της γλώσσας και της γλωσσικής εκμάθησης γενικότερα.

Τελειώνοντας, πιστεύουμε ότι τα ευρήματα της παρούσας μελέτης θα μπορούσαν να έχουν εφαρμογές στη διδασκαλία της ελληνικής ως ΞΓ, με την έννοια ότι θα μπορούσαν πρωτίστως να βοηθήσουν τους καθηγητές να κατανοήσουν τα διαγλωσσικά φαινόμενα που λαμβάνουν χώρα κατά τη διάρκεια της διαδικασίας εκμάθησης μιας Γ2. Ακόμη, τα αποτελέσματα θα μπορούσαν να βοηθήσουν το σχεδιασμό κατάλληλου διδακτικού υλικού για τα ελληνικά ως ΞΓ από ισπανόφωνους μαθητές και ενδεχομένως στο μέλλον να μπορούσαν να ληφθούν υπόψη κατά το σχεδιασμό προγραμμάτων σπουδών. Αυτοί οι παράγοντες μπορούν να συνεισφέρουν στη βελτίωση της ποιότητας και της

αποτελεσματικότητας της διδασκαλίας της ελληνικής ως ξένης σε δίγλωσσους και πολύγλωσσους μαθητές.

ABSTRACT

The written representation of Cypriot Greek by means of the Greek alphabet poses some problems concerning sounds not existing in Standard Modern Greek, such as post-alveolar consonants. In the case of creating dictionaries of Cypriot Greek, the solution selected is based on linguistic and typographical considerations; an equally important factor for any solution selected should also be the acceptability and usability of the proposed writing system by its potential users. The present study presents the experimental investigation of the trends of native speakers of Cypriot Greek regarding the written representation of post-alveolar consonants.

Keywords: Cypriot Greek, writing system, post-alveolar consonants.

1. Εισαγωγή

Η παρούσα έρευνα διεξήχθη στο πλαίσιο του ερευνητικού προγράμματος «Συντυδίες», που υλοποιήθηκε στο Πανεπιστήμιο Κύπρου στη διάρκεια των ετών 2006–2010 (βλ. Κατσογιάννου κ.ά. υπό έκδοση). Το πρόγραμμα επικεντρώνεται ερευνητικά αφενός στη μελέτη του λεξιλογίου της σύγχρονης κυπριακής ελληνικής και αφετέρου στην επεξεργασία μιας συνεκτικής πρότασης για τη γραπτή του αναπαράσταση —εφόσον αυτή τη στιγμή δεν υπάρχει στην Κύπρο κανένα επίσημο σύστημα γραφής της διαλέκτου. Το πρόγραμμα «Συντυδίες» αποτέλεσε την πρώτη φάση του φιλόδοξου έργου της δημιουργίας ενός λεξικού ηλεκτρονικής μορφής, το οποίο θα διατίθεται στο ευρύ κοινό μέσω του διαδικτύου. Ένα από τα προβλήματα που έπρεπε να επιλυθεί για τη σύνταξή του, ήταν και η γραπτή αναπαράσταση φθόγων που δεν υπάρχουν στην κοινή νέα ελληνική (ΚΝΕ), και ιδιαίτερα των μεταφατνιακών συμφώνων. Παρόλο που το θέμα αυτό θα μπορούσε να αντιμετωπισθεί λαμβάνοντας υπόψη μόνο ενδογλωσσικά κριτήρια, εντούτοις, όπως παρατηρούν οι Cahill και Karan (2008), κοινωνιογλωσσικοί και πολιτικοί παράγοντες (όπως κρατικές πολιτικές, διαλεκτική ποικιλία, γλωσσικές στάσεις, και η επίδραση άλλων συστημάτων γραφής) παίρνουν συχνά προτεραιότητα εις βάρος μιας γλωσσολογικά ιδανικής ορθογραφίας. Έτσι, κρίθηκε σκόπιμο να διερευνηθεί πειραματικά το πώς επιλέγει ο κόσμος να αναπαριστά τα σύμφωνα αυτά.

Προτού περιγραφεί η έρευνα και ο τρόπος διεξαγωγής της, θα γίνει μια σύντομη αναφορά στα υπό εξέταση σύμφωνα και στα φωνολογικά φαινόμενα πίσω από αυτά.

1.1. Τα μεταφατνιακά σύμφωνα της κυπριακής

Η κυπριακή ελληνική (στο εξής «κυπριακή») διαφέρει από την ΚΝΕ σε αρκετά σημεία, ένα από τα οποία είναι και η ύπαρξη μεταφατνιακών (συγκεκριμένα ουρανοφατνιακών) συμφώνων στο φωνητικό της ρεπερτόριο. Οι μεταφατνιακοί φθόγγοι της κυπριακής είναι οι εξής:

(1) Τριβόμενα συριστικά σύμφωνα:

(1') το άηχο [ʃ]

(i) ως απλό (μονό) [ʃ], όπως π.χ. στις λέξεις [ˈiʃe] <ί~~σ~~ια> και [meˈʃerɪn] <μα~~σ~~αίριν>·

(ii) ως μακρό (διπλό) [ʃ:], όπως π.χ. στη λέξη [ˈʃil:ɔs] <ᾠ~~σ~~ύλλος>·

(2') το ηχηρό μακρό¹ [ʒ:], όπως π.χ. στη λέξη [mexeˈʒ:e] <μαχα~~ζ~~ιά>·

(2) Προστριβή σύμφωνα:

(1') το άηχο [tʃ]

(i) ως απλό (μονό) [tʃ], όπως π.χ. στη λέξη [feˈtʃes] <φα~~τ~~ζές>·

(ii) ως μακρό (διπλό) και δασύ [tʃː], όπως π.χ. στη λέξη [feˈtʃːes] <φα~~τ~~σιές>·

(2') το ηχηρό απλό² [dʒ], όπως π.χ. στη λέξη [ˈndʒiz:ɔ] <ν~~τ~~ζίζω>·

Η γραφηματική αναπαράσταση των πιο πάνω φθόγγων αποτελεί το θέμα της παρούσας μελέτης. Πέρα από αυτά, εξετάζονται και δύο συγκεκριμένοι συνδυασμοί συμφώνων, ήτοι [k+ʃ] και [p+ʃ], οι οποίοι γράφονται ως διφωνηματικά γραφήματα <ξ> και <ψ> αντίστοιχα (κατ' αντιστοιχία προς τους συνδυασμούς [k+s] και [p+s], οι οποίοι γράφονται ως <ξ> και <ψ> αντίστοιχα).

Τέλος, στη μελέτη αυτή θα εξεταστούν και οι χαρακτήρες <ξ> και <τξ>, οι οποίοι εμφανίζονται ως αλλόγραφα των γραφημάτων <δ> και <τδ> αντίστοιχα όταν βρίσκονται στο τέλος λέξης: π.χ. <ντου~~ξ~~> [nduʃ]· <μα~~τ~~ξ> [metʃ].

1.1. Συνίζηση και ουράνωση

Τα μεταφατνιακά σύμφωνα της κυπριακής συσχετίζονται συχνά με δύο φωνολογικά φαινόμενα, τη συνίζηση και ουράνωση. Η *συνίζηση* είναι η μη πραγμάτωση ενός άτονου /i/ φωνητικά ως [i] σε προφωνηεντική θέση: π.χ. <κα~~μ~~ιά> = [keˈmɪɐ] (όχι [keˈmɪe])· <π~~κ~~οιοι> = [pɔi] (όχι [pɪi]). Ειδικά όταν η συνίζηση λαμβάνει χώρα μετά από τα φατνιακά σύμφωνα /s/, /ts/ και /z/ καθώς και μετά τα υπερωικά σύμφωνα /x/ και /k/, τότε το /i/ δεν προφέρεται, ενώ τα σύμφωνα αυτά μετατρέπονται σε *μεταφατνιακά* σύμφωνα (δηλαδή παθαίνουν *ουράνωση*): <ί~~σ~~ιος> = /ˈisɪɔs/ → [ˈiʃɔs]· <δί~~σ~~ιονιν> = /ˈxiɔnin/ → [ˈʃɔnin].

Στην περίπτωση των υπερωικών /x/ και /k/, η ουράνωση μπορεί να προκύψει χωρίς απαραίτητα να υπάρχει συνίζηση: όταν αυτά τα δύο σύμφωνα ακολουθούνται από τα φωνήεντα [i] και [e], τότε τα υπερωικά /x/ και /k/ ουρανώνονται σιγήτως σε [ʃ] και [tʃ] αντίστοιχα: π.χ. <ᾠ~~σ~~αίρουμαι> = /ˈxerume/ → [ˈʃerume]· <τ~~ξ~~ερίν> = /keˈrin/ → [tʃeˈrin].

Η μόνη περίπτωση κατά την οποία μεταφατνιακά σύμφωνα σε λέξεις της κυπριακής δεν είναι αποτέλεσμα συνίζησης ή ουράνωσης είναι όταν αυτά εμπεριέχονται σε δάνειες λέξεις: π.χ. <ᾠ~~σ~~απού> [ʃeˈpʰu] (από το αγγλικό *shampoo*).

1.2. Τρόποι γραφής των μεταφατνιακών συμφώνων της κυπριακής

Η κυπριακή δεν διαθέτει τυποποιημένη γραπτή αναπαράσταση. Για τη συγγραφή κειμένων όπως λογοτεχνικά κείμενα και διαλεκτικά λεξικά χρησιμοποιείται το ελληνικό αλφάβητο. Ωστόσο, προκύπτουν προβλήματα στην αναπαράσταση φθόγγων της κυπριακής που δεν υπάρχουν στην ΚΝΕ. Έτσι διάφοροι συγγραφείς χρησιμοποιούν διαφορετικές γραφηματικές συμβάσεις: π.χ. για τη δήλωση του [ʃ] χρησιμοποιείται το γράμμα σίγμα με διάφορα διακριτικά, ως εξής: <ᾠσ (π.χ. Γιαγκουλλής 2005), <ᾠσ (π.χ. Γεωργίου 1990), <ᾠσ (π.χ. Παπαγγέλου 2001), <ᾠσ (Χατζηιωάννου 2002) και <ᾠσ (Ξιούτας 1972).³

Από την άλλη, στον έντυπο και ηλεκτρονικό τύπο, δεν γίνεται χρήση διακριτικών λόγω κυρίως τεχνικών προβλημάτων, όπως η έλλειψη κατάλληλης γραμματοσειράς για τα κυπριακά (βλ. π.χ.

¹ Το [ʒ:] είναι εγγενώς μακρό στην κυπριακή.

² Το [dʒ] δεν υπάρχει ως μακρό στην κυπριακή. Επίσης πάντοτε συνοδεύεται από το σύμφωνο [n], δηλαδή εμφανίζεται ως [ndʒ].

³ Για περισσότερες πληροφορίες βλ. Papadima, Ayiomammitou and Kyriacou (2011).

Πεννηταέξ 2012). Όταν δεν χρησιμοποιούνται διακριτικά, συνήθως γίνεται χρήση ενός <ι> για να δηλωθεί ο μεταφατνιακός φθόγγος: π.χ. <σιέριν> (= <δέριν>).

Ορισμένοι συγγραφείς (π.χ. Παπαγγέλου 2001) κάνουν διάκριση στη δήλωση του φθόγγου [ʃ] ανάμεσα τις λέξεις <χέριν> και <ιδιώννω>, διότι στην πρώτη περίπτωση το [ʃ] προέρχεται από ένα υπερωικό /x/, ενώ στη δεύτερη από ένα φατνιακό /s/. η τάση αυτή λαμβάνει υπόψη τη φωνολογική και ετυμολογική πληροφορία πίσω από την προφορά των μεταφατνιακών φθόγγων.

Τέλος, κάποια έντυπα λογοτεχνικά κείμενα (π.χ. Ψαράς 2011) αποδίδουν τα μεταφατνιακά σύμφωνα με τη χρήση ξένων χαρακτήρων (π.χ. <ψυσής>). Αυτό μπορεί να θεωρηθεί και χαρακτηριστικό πιο πρόχειρων περιστάσεων γραφής της κυπριακής, όπως στην ηλεκτρονική επικοινωνία, όπου χρησιμοποιούνται κυρίως τα Greeklish (βλ. Themistocleous 2009).

1.3. Ερευνητικά ερωτήματα

Από τους πιο πάνω δυνατούς τρόπους απόδοσης των μεταφατνιακών συμφώνων, το πρόγραμμα «Συντυσίδες» υιοθέτησε τις πιο κάτω ορθογραφικές επιλογές: (α') να αποδίδονται συστηματικά με τη χρήση του διακριτικού <ˆ> (“Combining Caron”, κωδικός Unicode: U-030C)· (β') το ιώτα να χρησιμοποιείται μόνο όταν προκύπτει από φωνολογικά-ετυμολογικά αιτιολογούμενη συνίζηση· και (γ') να ακολουθείται η φωνητική τάση στην απόδοση των μεταφατνιακών φθόγγων —δηλαδή να μην χρησιμοποιούνται τα υπερωικά <χ̣̣>.

Σκοπός της παρούσας μελέτης είναι να διερευνήσει τις προτιμήσεις των ομιλητών της κυπριακής σε σχέση με αυτές τις ορθογραφικές επιλογές. Ο τρόπος που επιλέγηκε να γίνει αυτό ήταν με το να φέρει τους ομιλητές αντιμέτωπους με όλους τους δυνατούς παράγοντες⁴ που πιθανόν επηρεάζουν τη γραφή των μεταφατνιακών συμφώνων. Αυτοί οι παράγοντες μπορεί να επηρεάζουν μία ή περισσότερες από τις τέσσερις πιο κάτω πτυχές της γραφής των μεταφατνιακών συμφώνων:

(α') τη χρήση του διακριτικού <ˆ> για τη δήλωση των μεταφατνιακών συμφώνων·

(β') τη χρήση του <ι> που παθαίνει συνίζηση·

(γ') τη χρήση υπερωικών συμφώνων για την (ετυμολογική) απόδοση των μεταφατνιακών συμφώνων·

(δ') τη χρήση ξένων χαρακτήρων.

2. Πειραματική μέθοδος

Για την εξέταση των πιο πάνω ερευνητικών ερωτημάτων σχεδιάστηκε ένα πείραμα με τρία μέρη: προ-τεστ, κυρίως τεστ, και μετα-τεστ. Οι λεπτομέρειες του σχεδιασμού και της διεξαγωγής του πειράματος περιγράφονται πιο κάτω.

2.1. Πειραματικό υλικό

Το πειραματικό υλικό αποτελείτο από ηχητικά αρχεία, τα οποία ενσωματώθηκαν σε ένα αρχείο Microsoft PowerPoint, και τα οποία άκουσαν οι συμμετέχοντες στο πείραμα με τη χρήση ακουστικών μέσω ενός φορητού ηλεκτρονικού υπολογιστή. Οι απαντήσεις καταγράφονταν χειρογράφως σε ένα έντυπο ερωτηματολόγιο.

2.1.1. Παράγοντες που λήφθηκαν υπόψη κατά το σχεδιασμό του πειραματικού υλικού

Ο τρόπος γραφής των μεταφατνιακών συμφώνων (ως προς τις τέσσερις μεταβλητές που περιγράφηκαν στο §1.3 πιο πάνω) μπορεί να επηρεάζεται από διάφορους παράγοντες, τόσο εξωγλωσσικούς (όπως π.χ. αν είναι φιλόλογος) όσο και γλωσσικούς παράγοντες. Οι γλωσσικοί

⁴ Βλ. §2.1.1 για αναλυτική παρουσίασή τους.

παράγοντες, όπως διαφαίνονται από όσα αναφέρθηκαν στο §1.2 πιο πάνω, και οι οποίοι λήφθηκαν υπόψη κατά το σχεδιασμό του πειράματος, είναι οι εξής:

- (α') Το εάν φωνητικά το μεταφωτινικό σύμφωνο ακολουθείται από φωνήεν ή όχι:
αν ακολουθεί φωνήεν (π.χ. [fe'ʎɛs]), τότε μπορεί κάποιος να χρησιμοποιήσει είτε το <ι> (<φατζιές>), είτε το διακριτικό <'> (<φατζές>), είτε και τα δύο (<φατζιές>), είτε κανένα από τα δύο (<φατζές>). αν ακολουθεί σύμφωνο (π.χ. [i'ʎɛ]) τότε μπορεί οι συμμετέχοντες να επιλέγουν πιο συστηματικά τη χρήση του διακριτικού παρά τη μη χρήση του (και μάλλον θα αποφεύγουν τη χρήση του ιώτα: π.χ. <ισιτέ>).
- (β') Το εάν φωνητικά το μεταφωτινικό σύμφωνο βρίσκεται στο τέλος της λέξης ή όχι:
αν βρίσκεται στο τέλος λέξης (π.χ. [kleʎʃ]), τότε μπορεί οι ομιλητές να προτιμούν τη γραφή χωρίς το ιώτα (π.χ. <κλατξ>) παρά με το ιώτα (π.χ. <κλατςι> ή <κλατσι>).
- (γ') Το εάν μετά το σύμφωνο που μας ενδιαφέρει ακολουθεί (φωνολογικά-ετυμολογικά αιτιολογούμενο) /i/ το οποίο να παθαίνει συνίζηση:
μπορεί στην περίπτωση π.χ. του /meli'ssiɛs/ → [meli'ʃ:ɛs] η ορθογράφηση <μελισιές> να προτιμηθεί έναντι της ορθογράφησης <μελισές>, ενώ στην περίπτωση του /ske'rezzɔ/ → [ʃ:ɛ'rez:ɔ] η ορθογράφηση <σεπάζω> να προτιμηθεί έναντι της ορθογράφησης <σιεπάζω> (επειδή σε αυτήν την περίπτωση η χρήση του <ι> δεν αιτιολογείται ετυμολογικά). αυτή η φωνολογική-ετυμολογική πληροφορία μπορεί να έχει επίδραση τόσο στη χρήση του <ι> όσο και στη χρήση του διακριτικού.
- (δ') Το εάν η λέξη (ή το μόρφημα) που περιέχει το μεταφωτινικό σύμφωνο είναι δάνεια ή όχι:
μπορεί η γνώση ότι μια λέξη είναι δάνεια (που δεν αιτιολογεί τη χρήση του <ι>) να επηρεάζει το αν θα χρησιμοποιηθεί το <ι> ή / και το διακριτικό (βλ. §1.1).
- (ε') Το εάν το μεταφωτινικό σύμφωνο ανάγεται φωνολογικά ή ετυμολογικά σε ένα υπερωικό σύμφωνο όπως το /k/ ή /x/:
για όσους ενδεχομένως να θέλουν να γράφουν τα μεταφωτινικά σύμφωνα περισσότερο φωνολογικά-ετυμολογικά παρά φωνητικά (βλ. §1.2), αναμένεται να έχει σημασία το εάν το μεταφωτινικό σύμφωνο σχετίζεται με τα υπερωικά σύμφωνα /k/ και /x/ ή όχι. για παράδειγμα, κάποιος που ακολουθεί αυτή την τάση, θα γράψει <χιόνιν> και <σχοινίν> (αντί <σιόνιν> και <σθοινίν>), ενώ δεν αναμένεται ότι θα γράψει <ιχια> και <χόκας> (αντί <ισια> και <χότζας>).
- (ς') Το είδος του μεταφωτινικού συμφώνου:
μπορεί κάποιοι ομιλητές να αντιμετωπίζουν διαφορετικά τα γραφήματα για τα τριβόμενα σύμφωνα (<σ, ζ>), διαφορετικά τα διγραφήματα για τα προστριβή σύμφωνα (<τσ, τζ>), και διαφορετικά τα διφωνηματικά γραφήματα <ξ, ψ> ως προς τη χρήση του <ι> ή / και του διακριτικού.

2.1.2. Το γλωσσικό υλικό

Με βάση τους πιο πάνω παράγοντες, σχεδιάστηκε το γλωσσικό υλικό για το κυρίως τεστ του πειράματος. Με τους διάφορους επιτρεπούς συνδυασμούς των έξι παραγόντων προέκυψαν 28 διαφορετικές κατηγορίες λέξεων που περιέχουν μεταφωτινικά σύμφωνα. Για την απόκτηση ικανοποιητικού αριθμού παρατηρήσεων, κάθε κατηγορία προβλέφθηκε να περιέχει τρεις λέξεις, με αποτέλεσμα να εξετάζονται $28 \times 3 = 84$ λέξεις στο κυρίως τεστ.⁵

⁵ Εκ παραδρομής, δύο από τις κατηγορίες περιέχουν δύο λέξεις αντί τρεις, ενώ δύο άλλες κατηγορίες περιέχουν τέσσερις (βλ. Παράρτημα 2). το γεγονός αυτό λήφθηκε υπόψη κατά την ανάλυση των αποτελεσμάτων.

Για το προ-τεστ σχεδιάστηκαν 10 προτάσεις, οι οποίες εμπεριείχαν 19 λέξεις ενδιαφέροντος (δηλαδή λέξεις που περιείχαν μεταφαινιακά σύμφωνα). Για το μετα-τεστ σχεδιάστηκαν 8 προτάσεις, οι οποίες εμπεριείχαν 16 λέξεις ενδιαφέροντος.

2.2. Συμμετέχοντες

Οι συμμετέχοντες στο πείραμα ήταν 155 εκπαιδευτικοί, 45 πρωτοβάθμιας και 110 δευτεροβάθμιας εκπαίδευσης. Οι ηλικίες τους κυμαίνονταν από 26 μέχρι 57 ετών ($M = 38$, $TA = 6.9$). Επίσης, 36 ήταν άντρες, ενώ 119 γυναίκες. Όλοι οι συμμετέχοντες ήταν φυσικοί ομιλητές της κυπριακής.

Ο λόγος που επιλέγησαν εκπαιδευτικοί ήταν διότι με την εκπαιδευτική μεταρρύθμιση που εφαρμόστηκε πρόσφατα στην Κύπρο, οι εκπαιδευτικοί καλούνται να χρησιμοποιήσουν την κυπριακή συγκριτικά-αντιπαραβολικά προς την ΚΝΕ (Υπουργείο Παιδείας και Πολιτισμού 2010). Ένα ζήτημα που έχουν να αντιμετωπίσουν οι εκπαιδευτικοί είναι και ο τρόπος γραφής της κυπριακής· επομένως, η διερεύνηση των τάσεων των εκπαιδευτικών όσον αφορά τον τρόπο γραφής της κυπριακής ίσως να μπορεί να αξιοποιηθεί εποικοδομητικά στην επιμόρφωση που τους παρέχεται στο πλαίσιο των νέων αναλυτικών προγραμμάτων.

2.3. Ηχογράφηση του πειραματικού υλικού

Για την ηχογράφηση του πειραματικού υλικού επιλέχθηκε μια φυσική ομιλήτρια της κυπριακής, η ΚΧ, 26 ετών, από τη Λευκωσία. Η ΚΧ δεν παρουσίαζε κανένα πρόβλημα ομιλίας.

Το πειραματικό υλικό δόθηκε στην ομιλήτρια τυπωμένο σε χαρτί και της ζητήθηκε να διαβάσει τις λέξεις και φράσεις που της δίνονταν όσο πιο φυσικά γινόταν. Ο τρόπος ορθογράφησης του υλικού όπως παρουσιάστηκε στην ομιλήτρια δίνεται στο Παράρτημα 1. Η ομιλήτρια ήταν εξοικειωμένη με τις διάφορες μορφές γραφής της κυπριακής και ανέφερε ότι δεν αντιμετώπισε οποιαδήποτε δυσκολία στην ανάγνωση του υλικού.

Η ηχογράφηση διεξήχθη στον ηχομονωμένο θάλαμο ηχογραφήσεων του Τμήματος Πληροφορικής και Τηλεπικοινωνιών του Εθνικού και Καποδιστριακού Πανεπιστημίου Αθηνών.

2.4. Διαδικασία διεξαγωγής του κυρίως πειράματος

2.4.1. Παρουσίαση του υλικού

Στο προ-τεστ και μετα-τεστ, οι προτάσεις παρουσιάστηκαν αποκλειστικά ακουστικά στους συμμετέχοντες μέσω του ηλεκτρονικού υπολογιστή, ούτως ώστε να καταγράψουν ελεύθερα στο χαρτί τις προτάσεις που άκουγαν χωρίς επήρειες από την όποια γραπτή μορφή τους παρουσιαζόταν.

Στο κυρίως τεστ, οι λέξεις παρουσιάζονταν και πάλι ακουστικά στους συμμετέχοντες, αλλά αυτή τη φορά είχαν να επιλέξουν αναγκαστικά ανάμεσα σε οκτώ γραπτές επιλογές που τους δίνονταν στο ερωτηματολόγιο. Οι οκτώ αυτές επιλογές προέκυπταν από το συνδυασμό των μεταβλητών που μετρούνταν, όπως φαίνεται στον Πίνακα 1. Συγκεκριμένα, οι επιλογές που δίνονταν ήταν: με ή χωρίς το διακριτικό· με ή χωρίς το ιώτα· και τέλος με χρήση γραφημάτων που κανονικά δηλώνουν φαινιακά σύμφωνα (όπως <σ>, <τζ> κτλ) ή υπερωικά σύμφωνα (όπως <χ>, <κ> κτλ). Οι οκτώ αυτές επιλογές δίνονταν για κάθε λέξη, ασχέτως αν πραγματικά αιτιολογείται η χρήση π.χ. του <ι> (π.χ. δινόταν και η επιλογή <ατζιαμής> μαζί με την επιλογή <ατζαμής>) ή αν προέρχεται πραγματικά το μεταφαινιακό σύμφωνο από κάποιο υπερωικό σύμφωνο (π.χ. δινόταν και η επιλογή <ίχια> μαζί με την επιλογή <ίσια>). Οι 84 λέξεις του κυρίως τεστ παρουσιάστηκαν με προκαθορισμένα τυχαία σειρά, έτσι ώστε να μην γίνονται εμφανείς στους συμμετέχοντες οι ομαδοποιήσεις των λέξεων.

	με διακριτικό		χωρίς διακριτικό	
	με <ι>	χωρίς <ι>	με <ι>	χωρίς <ι>
με φατνιακά	(α') νύσσια	(β') νύσθα	(γ') νύσσια	(δ') νύσσα
με υπερωικά	(ε') νύχια	(ζ') νύχθα	(η') νύχια	(θ') νύχα

Πίνακας 1 Παράδειγμα των οκτώ επιλογών που δίνονταν στους συμμετέχοντες στο κυρίως τεστ

2.4.2. Διεξαγωγή του πειράματος

Πριν την έναρξη του πειράματος, ενημερώθηκαν οι συμμετέχοντες ότι ο σκοπός της έρευνας ήταν να διαφανεί πώς γράφουν οι ίδιοι την κυπριακή, ενώ τους τονίστηκε ότι σε καμία περίπτωση δεν θα κριθούν για τις ορθογραφικές τους επιλογές —ειδικά αφού δεν υπάρχει επίσημη ορθογραφία για την κυπριακή.

Αφού τους δόθηκε το ερωτηματολόγιο, συμπλήρωσαν τα δημογραφικά τους στοιχεία και άρχισαν το πείραμα ακούγοντας τους ήχους από τα ακουστικά. Η χρήση του PowerPoint επέτρεπε να χρησιμοποιείται όσος χρόνος χρειαζόνταν για κάθε εκφώνημα, καθώς και να επαναλαμβάνεται κάποιος ήχος αν το ζητούσε ο συμμετέχων. Ανάμεσα στα τρία μέρη μπορούσε να υπάρχει μικρό διάλειμμα.

Για το προ- και μετα-τεστ, οι οδηγίες που δόθηκαν γραπτώς στο ερωτηματολόγιο ήταν οι εξής: «Γράψτε τις προτάσεις με τη σειρά που ακούστηκαν». Στο κυρίως τεστ η γραπτή οδηγία που τους δινόταν ήταν η εξής: «Δεύτερο μέρος: πώς θα το γράφατε; (Κυκλώστε την απάντησή σας)». Σε αυτό το σημείο οι συμμετέχοντες έρχονταν για πρώτη φορά αντιμέτωποι με το διακριτικό <ι> (αν δεν το είχαν χρησιμοποιήσει ήδη απ' εαυτών στο προ-τεστ), οπότε πολλοί ρωτούσαν τι συμβόλιζε. Δεν δόθηκε καμία εξήγηση για τη λειτουργία του διακριτικού για να μην επηρεαστούν υπέρ της χρήσης του· η απάντηση που τους δινόταν ήταν να πράξουν όπως νομίζουν.

Τα πειράματα διαρκούσαν συνολικά 30–45 λεπτά. Η εξεύρεση συμμετεχόντων καθώς και η επίβλεψη του πειράματος έγινε από 37 φοιτητές του μαθήματος «Γλώσσα και γραφή» (Τμήμα Βυζαντινών και Νεοελληνικών Σπουδών Πανεπιστημίου Κύπρου, Χειμερινό εξάμηνο 2010–2011).

2.5. Τρόπος ανάλυσης των δεδομένων

Για την ανάλυση των δεδομένων που προέκυψαν από το πείραμα χρησιμοποιήθηκε ο αλγόριθμος δένδρικής ταξινόμησης id3. Ο αλγόριθμος επιτρέπει την ομαδοποίηση των δεδομένων σε συγγενείς ομάδες ανάλογα με το βαθμό της συσχέτισής τους.

2.5.1. Μετρήσεις

Οι μεταβλητές που μετρήθηκαν ήταν οι τέσσερις που αναφέρθηκαν στο §1.3: η χρήση του διακριτικού <ι>, του ιώτα <ι>, υπερωικών χαρακτήρων (π.χ. <χ> αντί <σ>), και της χρήσης ξένων χαρακτήρων. Η τελευταία μεταβλητή αφορούσε το προ- και μετα-τεστ, αφού στο κυρίως τεστ η αναπαράσταση των λέξεων με χρήση ξένων χαρακτήρων δεν δινόταν ως επιλογή.

2.5.2. Μέθοδος ανάλυσης

Από τις τέσσερις μετρηθείσες μεταβλητές δεν χρησιμοποιήθηκε στην ανάλυση η μεταβλητή που αφορούσε τη χρήση ξένων χαρακτήρων, επειδή δεν αφορά το κυρίως τεστ —εντούτοις, στις γραφικές παραστάσεις που θα ακολουθήσουν θα παρουσιάζεται και αυτή η μεταβλητή, έστω κι αν δεν ήταν μέρος της ανάλυσης.

Για κάθε μια από τις τρεις μεταβλητές πραγματοποιήθηκε ξεχωριστή ανάλυση σε ομάδες (cluster analysis). Οι παράγοντες που λήφθηκαν υπόψη κατά την ανάλυση ήταν 16: έξι εξωγλωσσικοί παράγοντες και δέκα γλωσσικοί. Οι εξωγλωσσικοί παράγοντες ήταν το φύλο, η ηλικία, η επαρχία

καταγωγής του συμμετέχοντα, η βαθμίδα εργασίας του (πρωτοβάθμια ~ δευτεροβάθμια), καθώς και η ειδίκευσή του (ελληνική φιλολογία ~ λοιπές ανθρωπιστικές επιστήμες και τέχνες ~ θετικές επιστήμες)· ένας τελευταίος εξωγλωσσικός παράγοντας ήταν και τα μέρη του πειράματος (προ-τεστ ~ κυρίως τεστ ~ μετα-τεστ), διότι λόγω της φύσης τους μπορεί να προκαλούσαν διαφορετικές αντιδράσεις στους συμμετέχοντες.

Οι γλωσσικοί παράγοντες που λήφθηκαν υπόψη είναι οι έξι που αναφέρονται στο §2.1.1. Επιπλέον λήφθηκε υπόψη το εάν ορθογραφικά το μεταφωτνιακό σύμφωνο ακολουθείται από το γράφημα <ι>, το οποίο να αντιπροσωπεύει φωνητικά ένα φωνήεν [i], π.χ. <ντζίζω>: μπορεί οι συμμετέχοντες να διστάσουν να χρησιμοποιήσουν ακόμα ένα <ι> για να δηλώσουν το μεταφωτνιακό σύμφωνο (ήτοι <ντζίζιω>) —ενώ μπορεί να είχαν διαφορετικές αντιδράσεις στην περίπτωση που δεν ακολουθεί συλλαβικό <ι>, π.χ. <σιειμώνας> (αντί <σειμώνας>). Ο παράγοντας αυτός δεν λήφθηκε υπόψη κατά το σχεδιασμό του πειράματος, για να μην διογκωθεί —ακόμη περισσότερο— το μέγεθος του πειραματικού υλικού. Εντούτοις υπήρξε πρόβλεψη να περιληφθούν τέτοιες λέξεις στο πειραματικό υλικό (βλ. Παράρτημα 2).

Τέλος, λήφθηκαν υπόψη οι τρεις μετρηθείσες μεταβλητές (§2.5.1), κι αυτό επειδή μπορεί να υπάρξει αλληλεπίδραση μεταξύ τους: π.χ. αν κάποιος γράφει τη λέξη [ˈʃeɪn] με το ιώτα (<σιέριν>), τότε πιθανόν να μην επιλέξει να χρησιμοποιήσει και το διακριτικό ταυτόχρονα (<σιέριν>)· και αντίστροφα, αν κάποιος επιλέξει να τη γράψει με το διακριτικό (<σέριν>), τότε ίσως να αποφύγει να γράψει και το ιώτα.

3. Αποτελέσματα

Κατά μέσο όρο, οι συμμετέχοντες χρησιμοποίησαν το διακριτικό σε ποσοστό 57%, το ιώτα 66%, υπερωικούς χαρακτήρες 2%, και ξένους χαρακτήρες 2%. Τα αποτελέσματα αναλυτικά για το κάθε μέρος παρουσιάζονται στο Σχήμα 1: η χρήση του ιώτα φαίνεται να είναι σταθερή στα τρία τεστ· η χρήση του διακριτικού ξεκινά χαμηλά στο προ-τεστ (8%), ανέρχεται στην πρώτη θέση στο κυρίως τεστ (74%), και κατέρχεται στο (25%) στο μετα-τεστ· η χρήση υπερωικών και ξένων χαρακτήρων ήταν χαμηλή (< 5%) σε όλες τις περιπτώσεις.

Σχήμα 1 Γενικά ποσοστά χρήσης των τεσσάρων μεταβλητών για το καθένα από τα τρία μέρη του πειράματος

Το Σχήμα 2 παρουσιάζει όλους τους τρόπους που επέλεξαν οι συμμετέχοντες να παραστήσουν τα μεταφωτνιακά σύμφωνα. Οι δύο κυριότεροι τρόποι (με σχεδόν ίση προτίμηση) ήταν: (α') με τη χρήση του ιώτα και του διακριτικού και (β') με τη χρήση του ιώτα χωρίς το διακριτικό. Κατά δεύτερο λόγο προτιμήθηκε το διακριτικό χωρίς το ιώτα, ενώ πολύ πιο χαμηλά ποσοστά παρουσίασε η επιλογή χωρίς ούτε το ιώτα ούτε το διακριτικό. Πέραν από αυτούς τους τέσσερις τρόπους, άλλοι τρόποι απόδοσης των μεταφωτνιακών παρουσίασαν ποσοστά κάτω του 1%.

Σχήμα 2 Γενικά ποσοστά των 11 παρατηρηθέντων τρόπων γραφής των μεταφαινιακών συμφώνων

3.1. Χρήση του διακριτικού

Η ανάλυση έδειξε ότι η χρήση του διακριτικού επηρεάστηκε πρωτίστως από το αν οι συμμετέχοντες επέλεξαν να χρησιμοποιήσουν και το ιώτα μαζί με το διακριτικό (ή αντ' αυτού): όπως φάνηκε στο Σχήμα 2, το διακριτικό είχε μεγαλύτερη χρήση μαζί με το ιώτα, παρά χωρίς το ιώτα. Η παρατήρηση αυτή ισχύει και για τα τρία μέρη, αλλά εξεχόντως για το κυρίως τεστ, όπως φαίνεται στο Σχήμα 3.

Σχήμα 3 Σύνοψη των τεσσάρων συχνότερων τρόπων γραφής των μεταφαινιακών συμφώνων ανά μέρος πειράματος

Δευτερευόντως, τη χρήση του διακριτικού επηρέασε η ειδικότητα των εκπαιδευτικών: ενώ γενικά η χρήση του διακριτικού ήταν γύρω στο 60% για τις περισσότερες ειδικότητες, στην περίπτωση των καθηγητών θετικών επιστημών η χρήση του διακριτικού ήταν 47% (βλ. Σχήμα 4).

Σχήμα 4 Χρήση των τεσσάρων μεταβλητών ανά ειδικότητα εκπαιδευτικού

[ΤΑΣΕΙΣ ΤΩΝ ΚΥΠΡΙΩΝ ΩΣ ΠΡΟΣ ΤΗ ΓΡΑΠΤΗ ΑΠΟΔΟΣΗ
ΤΩΝ ΜΕΤΑΦΑΤΝΙΑΚΩΝ ΣΥΜΦΩΝΩΝ ΤΗΣ ΚΥΠΡΙΑΚΗΣ]

Τη χρήση του διακριτικού επηρέασε επίσης και το είδος του συμφώνου: ενώ τα περισσότερα σύμφωνα παρουσίασαν χρήση του διακριτικού πάνω από 50%, στην περίπτωση του [tʃ] ήταν 43% (βλ. Σχήμα 5).

Σχήμα 5 Επιλογές σε σχέση με το είδος των υπό εξέταση συμφώνων

Τη χρήση του διακριτικού επηρέασε και το τι ακολουθεί το μεταφατνιακό σύμφωνο: όταν ακολουθούσε φωνήεν, η χρήση του διακριτικού ήταν γύρω στο 55%, εκτός αν ακολουθούσε συλλαβικό <ɿ> (π.χ. <ντζίζω>), οπότε το ποσοστό ήταν αυξημένο· όταν δεν ακολουθούσε φωνήεν, τα ποσοστά ήταν ψηλά, ιδίως όταν ακολουθούσε σύμφωνο (βλ. Σχήμα 6).

Σχήμα 6 Επιλογές με βάση το περιβάλλον μετά το μεταφατνιακό σύμφωνο

Τέλος, τη χρήση του διακριτικού επηρέασε και η ηλικία: το χρησιμοποίησε περισσότερο η ηλικιακή ομάδα 34–37, ενώ μετά τα 37, όσο μεγάλωνε η ηλικία, τόσο μειωνόταν η χρήση του διακριτικού.

Σχήμα 7 Επιλογές με βάση ηλικιακές ομάδες

3.2. Χρήση του ιώτα

Τη χρήση του ιώτα επηρέασε κυρίως το εάν το μεταφωτινικό σύμφωνο ακολουθείται ετυμολογικά-φωνολογικά από ένα /i/ που να παθαίνει συνίζηση: όπως φαίνεται στο

Σχήμα 8, το ιώτα χρησιμοποιείται πολύ περισσότερο όταν αιτιολογείται η συνίζηση (όπως στο <ίσια>), ενώ όταν δεν αιτιολογείται, είναι αρκετά χαμηλότερη η χρήση, ειδικά στις δάνειες λέξεις.

Δευτερευόντως η χρήση του ιώτα επηρεάζεται από τη χρήση του διακριτικού, όπως φάνηκε και πιο πάνω.

Σχήμα 8 Επιλογές με βάση την ύπαρξη αιτιολογούμενης συνίζησης καθώς και με την καταγωγή της λέξης

3.3. Χρήση υπερωικών χαρακτήρων

Η ελάχιστη χρήση υπερωικών χαρακτήρων που σημειώθηκε επηρεάστηκε κατά κύριο λόγο από τη χρήση του ιώτα: όπως φάνηκε στο Σχήμα 2, το συγκριτικά υψηλότερο ποσοστό συγκεντρώνει η χρήση του υπερωικού χωρίς ιώτα ή διακριτικό. Το αποτέλεσμα αυτό είναι οφειλόμενο στην γραφή του συνδέσμου [tʃ] ως <και> στο προ- και μετα-τεστ (βλ. Σχήμα 3).

Δευτερεύοντα ρόλο έπαιξε το εάν η λέξη είναι δάνεια, με τις δάνειες λέξεις να γράφονται πολύ πιο σπάνια με υπερωικούς χαρακτήρες παρά οι μη δάνειες (βλ. Σχήμα 8). Επίσης, το είδος του συμφώνου έπαιξε ρόλο: η χρήση υπερωικών χαρακτήρων ήταν συγκριτικά περιορισμένη στην περίπτωση των [tʃː], [ndʒ], [zː], και [rʃ] (βλ. Σχήμα 5).

Σε λιγότερο βαθμό επηρέασε το εάν τα μεταφωτινικά σύμφωνα προέρχονται όντως από υπερωικά σύμφωνα: όπως φαίνεται στο Σχήμα 9, οι υπερωικοί χαρακτήρες χρησιμοποιήθηκαν περισσότερο όταν τα μεταφωτινικά σύμφωνα προέρχονται από υπερωικά, παρά όταν δεν προέρχονταν από υπερωικά.

Σχήμα 9 Επιλογές με βάση το εάν τα μεταφωτινικά σύμφωνα προέρχονται από υπερωικά

3.4. Χρήση ξένων χαρακτήρων

Η χρήση ξένων χαρακτήρων, αν και ελάχιστη, ήταν μεγαλύτερη στο προ-τεστ παρά στο μετα-τεστ (βλ.

Σχήμα 1). Τα σύμφωνα που συχνότερα γράφονταν με ξένους χαρακτήρες ήταν τα [ʃ] και [ʒ:] (βλ.

Σχήμα 5), ειδικά αν βρίσκονταν στο τέλος λέξης (βλ. Σχήμα 6). Από τους συμμετέχοντες, χρησιμοποίησαν περισσότερο τους ξένους χαρακτήρες όσοι ήταν άνω των 37 ετών (βλ. Σχήμα 7) καθώς και οι καθηγητές ελληνικής φιλολογίας (βλ. Σχήμα 4). Τέλος, η χρήση ξένων χαρακτήρων ήταν το κυριότερο στοιχείο που διαχώρισε τα δύο φύλα, με τους άντρες να σημειώνουν ψηλότερα ποσοστά (βλ. Σχήμα 10).

Σχήμα 10 Επιλογές με βάση το φύλο

4. Σχολιασμός αποτελεσμάτων

Τα γενικά αποτελέσματα κατέδειξαν ότι οι συμμετέχοντες προτίμησαν να αποδίδουν τα μεταφωτανιακά σύμφωνα της κυπριακής κυρίως με τη χρήση ενός ιώτα <ι>, με ή χωρίς το διακριτικό <^>.

Στο προ- και μετα-τεστ, η χρήση του διακριτικού ήταν περιορισμένη. Αυτό ήταν αναμενόμενο, διότι ο μέσος ομιλητής της κυπριακής σπάνια γράφει στην κυπριακή, και όταν το κάνει, δεν ακολουθεί κάποιους τυποποιημένους κανόνες: ως εκ τούτου, γράφει με το λιγότερο επιτηδευμένο τρόπο, δηλαδή χωρίς διακριτικά (τα οποία μπορεί να θεωρηθούν φιλολογική επιτήδευση).

Παρόλα αυτά, η χρήση του διακριτικού στο κυρίως τεστ (όπου παρουσιάστηκε στους συμμετέχοντες το διακριτικό ως επιλογή) αποτέλεσε την κύρια προτίμηση των συμμετεχόντων. Μια πιθανή ερμηνεία για αυτό είναι οι συμμετέχοντες να μην είχαν προηγουμένως έρθει σε ιδιαίτερη επαφή με κυπριακά κείμενα που να χρησιμοποιούν το διακριτικό, επομένως να μην είχαν το διακριτικό υπόψη ως πιθανή λύση για τον τρόπο γραφής των μεταφωτανιακών: έτσι, όταν τους δόθηκε αυτή η επιλογή, ίσως να τη θεώρησαν πιο κατάλληλη σε πολλές περιπτώσεις. Αυτή η υπόθεση μπορεί να στηριχθεί και με μια άλλη παρατήρηση: μετά την εξοικείωση με το διακριτικό που επήλθε στο κυρίως τεστ, στο μετα-τεστ αυξήθηκε η χρήση του διακριτικού κατά 220% σε σχέση με το προ-τεστ. Αυτό το αποτέλεσμα μπορεί να αποδοθεί σε επίδραση μάθησης (learning effect): παρόλο που δεν έγινε κανένα είδος διδασκαλίας στους συμμετέχοντες για τον τρόπο χρήσης του διακριτικού, φαίνεται ότι οι ίδιοι διέκριναν τη χρησιμότητά του (π.χ. όταν το μεταφωτανιακό σύμφωνο βρισκόταν στο τέλος λέξης) και το υιοθέτησαν και στο μετα-τεστ.

Η χρήση τόσο του ιώτα, όσο και του διακριτικού φάνηκε να διέπεται από κάποια λογική: όταν δεν μπορούσε να χρησιμοποιηθεί το ιώτα (δηλαδή στο τέλος λέξης, ή πριν από σύμφωνο), χρησιμοποιήθηκε το διακριτικό κατά κόρον· το ιώτα φάνηκε να χρησιμοποιείται περισσότερο στις περιπτώσεις που αιτιολογείται φωνολογικά —δηλαδή όταν τα μεταφωτανιακά σύμφωνα προκύπτουν από συνίζηση.

Όσον αφορά στη χρήση υπερωικών χαρακτήρων (<χ̣̣>), αυτή ήταν μηδαμινή και στα τρία μέρη, ακόμα και στο κυρίως τεστ, όπου προσφερόταν ως επιλογή. Εξαιρετικά χαμηλά ποσοστά παρουσίασε

και η χρήση ξένων χαρακτήρων, οι οποίοι χρησιμοποιήθηκαν περισσότερο από καθηγητές ελληνικής φιλολογίας παρά από άλλες ειδικότητες —ένα αποτέλεσμα που δεν ήταν αναμενόμενο.

Πέρα από τη χρήση ξένων χαρακτήρων, η ειδικότητα των εκπαιδευτικών φάνηκε να παίζει ρόλο στη χρήση του διακριτικού, με τους καθηγητές θετικών επιστημών να χρησιμοποιούν λιγότερο το διακριτικό σε σχέση με άλλες ειδικότητες. Τέλος, η ηλικία φαίνεται να παίζει κάποιο ρόλο, αφού μετά την ηλικία των 37, όσο αυξανόταν η ηλικία των συμμετεχόντων, τόσο μειωνόταν η χρήση του διακριτικού.

5. Συμπεράσματα

Από τα αποτελέσματα της πιο πάνω έρευνας φαίνεται να δικαιολογούνται οι ορθογραφικές επιλογές του προγράμματος «Συντυσίες». Συγκεκριμένα, η χρήση του διακριτικού <ˆ> για την απόδοση των μεταφωτισμένων συμφώνων, την οποία υιοθετεί το πρόγραμμα, φαίνεται να βρίσκει ανταπόκριση στους ομιλητές της κυπριακής. Επίσης, παρατηρείται ότι οι συμμετέχοντες μπορούν να διακρίνουν πού να χρησιμοποιούν το ιώτα και πού όχι, βασιζόμενοι στο φωνολογικό περιβάλλον του μεταφωτισμένου συμφώνου. Έτσι, η επιλογή του προγράμματος «Συντυσίες» να χρησιμοποιεί το ιώτα μόνο αν αιτιολογείται συνίζηση δεν διαφαίνεται να δημιουργεί δυσκολίες. Επίσης, τα εξαιρετικά χαμηλά ποσοστά χρήσης υπερωικών χαρακτήρων <ˆ ˆ> από τους συμμετέχοντες επιβεβαίωσαν ότι η επιλογή του προγράμματος να ακολουθήσει τη φωνητική παρά τη φωνολογική-ετυμολογική τάση γραφής των μεταφωτισμένων συμφώνων είναι πιο αποδεκτή από τους φυσικούς ομιλητές της κυπριακής.

Ακόμα, η έρευνα κατέδειξε ότι οι παιδαγωγοί είναι σε θέση να μάθουν εύκολα ένα σύστημα γραφής το οποίο να αποδίδει τα μεταφωτισμένα σύμφωνα συστηματικά με τη χρήση του διακριτικού, ενώ το ιώτα να χρησιμοποιείται μόνο αν αιτιολογείται ετυμολογικά.

Τέλος, θα πρέπει να σημειωθεί ότι η έρευνα αυτή εξέτασε το ζήτημα της γραφής των μεταφωτισμένων συμφώνων περισσότερο με βάση γλωσσικές παραμέτρους παρά κοινωνικές· μελλοντικές έρευνες θα πρέπει να επικεντρωθούν και στην κοινωνική διάσταση του ζητήματος, η οποία είναι καθοριστικής σημασίας για την όποια πορεία θα ακολουθήσει το προτεινόμενο σύστημα γραφής.

Η ΑΦΗΓΗΣΗ ΤΗΣ ΜΑΘΗΤΙΚΗΣ ΑΠΕΙΘΑΡΧΙΑΣ: ΑΝΑΛΥΣΗ ΣΥΝΟΜΙΛΙΑΚΩΝ ΔΕΔΟΜΕΝΩΝ¹

Αργύρης Αρχάκης
Πανεπιστήμιο Πατρών, Ελλάδα
archakis@upatras.gr

ABSTRACT

The present paper concentrates on the narrative management of the teacher-student relationship. Focusing on the construction of students' identities, the present study draws upon the social constructionism paradigm, thus considering identities as social constructs via discourse. More particularly, in the data examined, students construct powerful identities which allow them to project themselves as capable of acting independently from their teachers' directives and expectations. I intend to suggest that, via constructing powerful identities, students resist teacher authority. Their resistance is indicative of their will to free themselves from their teachers' directives, even if this can only take place during their conversational narratives with their peers.

Λέξεις κλειδιά: διεπίδραση στη σχολική τάξη, έναρξη-ανταπόκριση-ανάδραση, κοινωνική δομή/ατομική δράση, κατασκευή ταυτοτήτων, αφηγήσεις

1. Εισαγωγή

Στην εργασία αυτή θα με απασχολήσει η αφηγηματική διαχείριση της σχέσης μαθητών και καθηγητών. Τα δεδομένα μου δεν προέρχονται από τους χώρους όπου κατεξοχήν μαθητές και καθηγητές συνυπάρχουν και συνδιαλέγονται, δηλαδή τη σχολική τάξη,² αλλά από συνομιλίες μεταξύ συμμαθητών σε εξωσχολικούς χώρους, απουσία των καθηγητών τους. Θα εστιάσω την προσοχή μου ειδικά σε περιπτώσεις όπου οι μαθητές προβαίνουν σε κατασκευές ισχυρών ταυτοτήτων μέσω των οποίων προβάλλουν τον εαυτό τους ικανό να δραστηριοποιείται ανεξάρτητα από τους περιορισμούς και τις κατευθύνσεις των καθηγητών τους, επιδιώκοντας έτσι τον αυτοπροσδιορισμό και την αυτοδιάθεσή τους στο πλαίσιο των συνομιλιών τους. Για το σκοπό αυτό θα αναλύσω ενδεικτικά ένα εκτεταμένο αφηγηματικό απόσπασμα μαθήτριας της γ' λυκείου, αξιοποιώντας για τη διάγνωση του τρόπου οικοδόμησης των προβαλλόμενων ταυτοτήτων, το μοντέλο αφηγηματικών τοποθετήσεων του Bamberg (1997, 2004).

2. Οι ρόλοι του καθηγητή και των μαθητών στο πλαίσιο της διεπίδρασης στη σχολική τάξη

Η συζήτηση για τους ρόλους του καθηγητή και των μαθητών του, όπως διαμορφώνονται στο σύγχρονο δυτικό κόσμο, θα λάβει υπόψη της τον ευρύτερο διεπιστημονικό προβληματισμό που προσδιορίζεται από δίπολα όπως: (κοινωνική) δομή (structure) / ατομική δράση (agency), κανονικότητα / επιτελεσματικότητα. Ακολουθώντας τις θέσεις του Coupland (2007: 107) και εντάσσοντας στο πλαίσιο της συζήτησης αυτής τη διερεύνηση των ρόλων του καθηγητή και των μαθητών του, θα ξεκινήσω επισημαίνοντας τις προβλεπόμενες δομικές διεπιδραστικές συμβάσεις και προσδοκίες που απορρέουν από τις κοινωνικές τους θέσεις στη σχολική τάξη, για να προχωρήσω στη διερεύνηση των δυνατοτήτων

¹ Πολλές θερμές ευχαριστίες οφείλω στη Βίλλυ Τσάκωνα, τον Άρη Δρουκόπουλο και τη Ράνια Καραχάλιου για τις υποδείξεις τους.

² Σχετικά με την ανάλυση διεπιδραστικών δεδομένων από ελληνικές τάξεις, βλ. Κονδύλη (1990), Τσολακίδου (1995), Παυλίδου (1999), Pavlidou (2001), Αρχάκης (2006).

ενεργητικής αναδιαμόρφωσης των προβλεπομένων συμβάσεων. Το ενδιαφέρον μου για τις δυνατότητες ενεργητικής αναδιαμόρφωσης των ρόλων θα περιοριστεί στην πλευρά των μαθητών δεδομένου ότι το υλικό μου αφορά και προέρχεται από μαθητές.

Οι ρόλοι του καθηγητή και των μαθητών είναι συνδεδεμένοι με ισχυρές συμβάσεις και προσδοκίες ως προς τα δικαιώματα και τις υποχρεώσεις αμοτερών. Οι καθηγητές, ως ειδικοί, είναι επιφορτισμένοι με τη μετάδοση της γνώσης έχοντας θεσμική εξουσία να αναθέτουν καθήκοντα στους μαθητές, να ελέγχουν το αποτέλεσμα της δουλειάς τους και να το επιβραβεύουν ή να το απορρίπτουν (Spencer-Oatey 2000: 32). Δεδομένης της σαφούς και έντονης διάκρισης των ρόλων μεταξύ καθηγητών και μαθητών, το βασικό χαρακτηριστικό της διεπίδρασης στην τάξη (classroom interaction) είναι τα ασύμμετρα επικοινωνιακά δικαιώματα, με τους καθηγητές να έχουν την κύρια ευθύνη για την οργάνωση και εξέλιξη του μαθήματος (Stubbs 1983: 53, 58-60).

Σύμφωνα με τους Sinclair & Coulthard (1975: 21) μια συμβατική διδακτική ανταλλαγή (teaching exchange) μέσα σε μια τυπική, καθηγητοκεντρική τάξη όπου δίνεται ιδιαίτερη έμφαση στη διαδικασία εξέτασης των μαθητών, περιλαμβάνει i) μια εναρκτήρια κίνηση εκ μέρους του καθηγητή (E), λ.χ. μία ερώτηση ή μία οδηγία, ii) μία κίνηση ανταπόκρισης εκ μέρους ενός μαθητή (A), λ.χ. μία απάντηση ή την εκτέλεση οδηγίας στη γνωστική περιοχή που έχει προσδιορίσει ο καθηγητής στο (i), και τέλος iii) μια κίνηση ανάδρασης εκ μέρους του καθηγητή (Av), λ.χ. έναν αξιολογικό σχολιασμό των όσων είπε ο μαθητής (βλ. σχετικά Τσολακίδου 1995: 23, 85, 199, 201). Ενδεικτικό είναι το ακόλουθο παράδειγμα (1)³ από την διεπίδραση στην τάξη, σε μάθημα ιστορίας στην γ' γυμνασίου (βλ. σχετικά Αρχακής 1995):

(1)

[1] K: (...) Τι ήταν το παιδομάζωμα, Παναγιώτη;

[2] M/Π: Εε οι Τούρκοι παίρνανε τα παιδιά των Ελλήνων και τα σκληραγωγούσανε, για να τα πάρουν μαζί τους.

[3] K: Μάλιστα.

Η καθηγήτρια (K) με μια εναρκτήρια κίνηση (συνεισφορά [1]) ρωτάει ένα μαθητή (M/Π) για το παιδομάζωμα στα χρόνια της τουρκοκρατίας. Ο μαθητής απαντάει (συνεισφορά [2]) και η καθηγήτρια παρέχει ένα σύντομο, θετικό επιβεβαιωτικό, σχόλιο αξιολόγησης (συνεισφορά [3]).

Ακολουθώντας τον Rampton (2006: 70-71), θεωρώ ότι η συμβατική δομή E-A-Av εκφράζει εκπαιδευτικές σχέσεις εξουσίας διότι οι μαθητές καλούνται να ανταποκριθούν μέσω προσδοκώμενων συνεισφορών σε γνωστικές περιοχές που προσδιορίζονται από τον καθηγητή και να αξιολογηθούν από αυτόν με κλίμακες καλύτερης και χειρότερης επίδοσης. Χρησιμοποιώντας όρους του Foucault, ο Rampton (2006: 71) εκλαμβάνει τη διδακτική ανταλλαγή E-A-Av ως μία από τις *τεχνικές πειθαρχικής εξουσίας* (techniques of disciplinary power) οι οποίες «δομούν τα πιθανά πεδία δράσης των άλλων» (Foucault 1982: 221). Εν προκειμένω, οι μαθητές καλούνται να ανταποκριθούν σε γνωστικές περιοχές που προσδιορίζονται από τον καθηγητή τους και να αξιολογηθούν από αυτόν με κλίμακες καλύτερης ή χειρότερης επίδοσης.

Ωστόσο, η εξέλιξη του μαθήματος δεν πραγματοποιείται πάντα με τον αναμενόμενο συμβατικό τρόπο που προϋποθέτει την εξαρτημένη, παθητική συμμετοχή των μαθητών μόνο σε θέσεις ανταπόκρισης (A). Όπως παρατηρεί η Παυλίδου (1999), είναι δυνατόν οι μαθητές να εκδηλώσουν ποικίλες γλωσσικές πρωτοβουλίες, λ.χ. να αυτοεπιλεγούν (με ή χωρίς τη συναίνεση του καθηγητή) ζητώντας διευκρινίσεις από τον καθηγητή τους, διατυπώνοντας απορίες, αλλά και απόψεις για όσα ο καθηγητής μεταφέρει, συμφωνώντας ή διαφωνώντας με τις θέσεις που εκφράζει (βλ. σχετικά Orletti 1981: 534 κ.ε.). Ο Rampton (2006: 51, 64, 69) βασισμένος στα πορίσματα ερευνών του σε σχολεία της Αγγλίας καταγράφει επίσης περιπτώσεις αποκλίσεων και παραβιάσεων της αναμενόμενης συμβατικής ανταλλαγής E-A-Av όπου οι μαθητές επισημαίνουν λάθη, ασυνέπειες και αδικίες του καθηγητή τους. Εκλαμβάνει δε τις αποκλίνουσες αυτές κινήσεις των μαθητών ως αντιστάσεις στην προβλεπόμενη από τη συμβατική δομή υπόταξή τους στις καθηγητικές κατευθύνσεις, ως ενεργητικές προσπάθειες αυτοπροσδιορισμού και αυτοδιάθεσης των μαθητών (Rampton, ό.π.: 71-72· βλ. σχετικά Bruner 1996: 41).

³ Χρησιμοποιούμε τα ακόλουθα σύμβολα απομαγνητοφώνησης του προφορικού λόγου: /: αυτοδιακοπή, [xxχ]: επικάλυψη, χχχ: emphatic stress, χχ:: επιμήκυνση συλλαβής, >χχχ<: επιτάχυνση ομιλίας, (): ακατανόητο εκφώνημα, (...): παράλειψη στοιχείων, ((χχχ)): πρόσθετα διευκρινιστικά ή μεταγλωσσικά σχόλια, **έντονη γραμματοσειρά**: ευθείς λόγοι.

3. Το υλικό της έρευνας

Η δική μου έρευνα δεν βασίζεται σε υλικό από τη διεπίδραση στη σχολική τάξη και, ως εκ τούτου, τα ζητούμενά της δεν αφορούν την άμεση διεπιδραστική σχέση καθηγητή και μαθητών του. Το υλικό μου αποτελείται από συνομιλιακές αφηγήσεις μαθητών οι οποίες αναφέρονται σε γεγονότα της σχολικής ζωής. Για τους στόχους του παρόντος άρθρου, έλεγξα 16 περίπου από τις διαθέσιμες ώρες συνομιλίας⁴ οι οποίες περιλαμβάνουν πάνω από 300 συνομιλιακές αφηγήσεις. Από αυτές, περίπου οι 200 (2/3) αναφέρονται σε ζητήματα της σχολικής ζωής. Από τις αφηγήσεις αυτές, οι 94 (περίπου 1/3 του συνόλου των 300) αναφέρονται ειδικά στη σχέση των αφηγητών-μαθητών με τους καθηγητές τους, κυρίως σε αρνητικές αποτιμήσεις των μαθητών για τους καθηγητές τους. Από το σύνολο των 94 αφηγήσεων, σε 11 (περίπου 1/30 του συνόλου των 300) οι μαθητές επιχειρούν την κατασκευή ισχυρών ταυτοτήτων που τους δίνουν τη δυνατότητα να αγνοούν ή να μην συμμορφώνονται στην κανονικότητα των προβλέψεων της συμβατικής δομής *E-A-An* και την καθηγητική εξουσία όπως εκφράζεται μέσα από αυτή. Η αναλυτική προσοχή μου θα επικεντρωθεί σ' αυτές τις αφηγήσεις μαθητικής απειθαρχίας και ειδικότερα στον τρόπο με τον οποίο οι μαθητές-αφηγητές τοποθετούνται απέναντι στην αυθεντία του καθηγητή.

Ο λόγος για τον ιδιαίτερα περιορισμένο αριθμό αφηγήσεων μη συμμόρφωσης με τις προβλέψεις της δομής *E-A-An* εντοπίζεται προφανώς στο ότι τέτοιου τύπου απόκλιση συνεπάγεται αρνητικές συνέπειες για τους μαθητές. Το ακόλουθο αφηγηματικό απόσπασμα είναι αποκαλυπτικό:

(2)

X: (...) σηκώνεται ο Μένιος τον ρωτάει εκεί πέρα ((ο καθηγητής)), απαντάει, και του κάνει: **τι λες**

μωρέ () του κάνει, η απάντησή σου παίρνει δεκάξι, του λέει, και του κάνει ο Μένιος, **ε το 'ξερα κύριε δεν είμαι ο θεός για να πάρω σ' εσάς είκοσι**, ο Μένιος, και του κάνει, **ανόητε κάτσε κάτω**, ((μιμείται τον καθηγητή που φωνάζει)) και του βάζει δεκατέσσερα, στο τετράμηνο, και κάνει ο Μένιος, **τι ήθελα και μίλαγα ο ηλίθιος;**

Στο απόσπασμα αυτό ο αφηγητής Χρυσάνθος (X), αναφέρεται στον αποκλίνοντα τρόπο με τον οποίο ο συμμαθητής του Μένιος, μαθητής της γ' λυκείου, αντιμετώπισε τη διαδικασία της εξέτασής του. Ειδικότερα, και σύμφωνα με τον Χρυσάνθο, ο καθηγητής σηκώνει για εξέταση τον Μένιο, του θέτει μία ερώτηση (*E*), ο Μένιος απαντάει (*A*) και ο καθηγητής τον αξιολογεί (*η απάντησή σου παίρνει δεκάξι*) (*An*). Αν η διαδοχή των συνεισφορών σταματούσε εδώ, θα είχαμε μια τυπική και αναμενόμενη διαδοχή της μορφής *E-A-An*. Ωστόσο, ο Μένιος αντιδρά στην αξιολόγηση του καθηγητή του αναδεικνύοντας ως υπερβολικά τα κριτήριά του (*ε το 'ξερα κύριε δεν είμαι ο θεός για να πάρω σ' εσάς είκοσι*). Κατά τον αφηγητή Χρυσάνθο, η αντίδραση αυτή έχει ως αποτέλεσμα ο καθηγητής να επιπλήξει τον Μένιο (*ανόητε*) και να του αφαιρέσει το λόγο (*κάτσε κάτω*), κυρίως όμως έχει ως αποτέλεσμα τη χαμηλή βαθμολόγησή του στο τετράμηνο. Το γεγονός αυτό οδηγεί τον Μένιο στην αυτοκριτική (*τι ήθελα και μίλαγα ο ηλίθιος;*) και προφανώς πολλά άλλα παιδιά στη συμμόρφωση με τις κανονικές προβλέψεις της δομής *E-A-An*.

Στη συνέχεια θα συζητήσω έννοιες που θα εφαρμόσω κατά την αφηγηματική ανάλυση.

4. Το θεωρητικό πλαίσιο της ανάλυσης

Δεδομένου ότι κεντρικό ζητούμενο της ανάλυσής μου είναι οι κατασκευές ταυτοτήτων, ακολουθώ βασικές θέσεις της θεωρίας της κοινωνικής κατασκευής (βλ., λ.χ., Sarbin & Kitsuse 1994, Antaki & Widdicombe 1998· επίσης Αρχάκης & Τσάκωνα 2011). Ως εκ τούτου, στην αφήγηση που θα αναλύσω εκλαμβάνω τις προβαλλόμενες ταυτότητες όχι ως στατικά και παγιωμένα εσωτερικά χαρακτηριστικά της μαθήτριας-αφηγήτριας και των χαρακτήρων της εξιστόρησής της, αλλά ως γλωσσικές κοινωνικές κατασκευές.

Η αφήγηση, σύμφωνα με κοινά αποδεκτούς προσδιορισμούς, αποτελεί κειμενικό είδος το οποίο κωδικοποιεί *αξιομνημόνευτες* (reportable) παρελθοντικές (συνήθως) εμπειρίες θέτοντάς τις σε χρονική αλληλουχία⁵ (Labov 1972: 359-361). Σύμφωνα με ερευνητικά πορίσματα της τελευταίας εικοσαετίας,

⁴ Η έρευνα χρηματοδοτήθηκε από την Επιτροπή Ερευνών του Πανεπιστημίου Πατρών (Κ. Καραθεοδωρής, 2425).

⁵ Βλ. σχετικά Labov (1972), ο οποίος εισήγαγε τον όρο *reportable*, και Sacks (1995 τ. II: 3 κ.α.) ο οποίος χρησιμοποιεί τον όρο *tellable*.

η αφήγηση αποτελεί ένα ιδιαίτερα κατάλληλο πεδίο γλωσσικής κατασκευής ταυτοτήτων (De Fina 2003: 117). Πολύτιμη συμβολή στην κατανόηση του τρόπου αφηγηματικής κατασκευής ταυτοτήτων αποτελεί το μοντέλο αφηγηματικής ανάλυσης του Bamberg (1997, 2004). Το μοντέλο αυτό δίνει τη δυνατότητα να αντιληφθούμε την οικοδόμηση της ταυτότητας κατά την εκτύλιξη του αφηγηματικού γεγονότος ως μια σειρά *τοποθετήσεων* (positioning) τόσο στο πλαίσιο των τοπικών συμφραζομένων όσο και σε σχέση με τα ευρύτερα κοινωνικο-ιδεολογικά συμφραζόμενα. Διακρίνονται τρία επίπεδα τοποθέτησης: Πρώτον, αυτό του αφηγηματικού κόσμου, δηλαδή μεταξύ των χαρακτήρων μιας αφήγησης· δεύτερον, αυτό της αφηγηματικής διεπίδρασης, δηλαδή μεταξύ αφηγητή/τών και ακροατή/τών (Bamberg 1997: 337). Τα δύο πρώτα ‘τοπικά’ επίπεδα συμβάλλουν στην τρίτη και κεντρική τοποθέτηση του αφηγητή ως προς διάφορες απόψεις που εντοπίζονται στο ευρύτερο κοινωνικο-ιδεολογικό περιβάλλον. Με άλλα λόγια, στο τρίτο επίπεδο τοποθέτησης αναδύονται άμεσες ή έμμεσες σχολιαστικές στάσεις προς ιδεολογικές θέσεις που βρίσκονται σε κοινωνική κυκλοφορία (Bamberg 2004: 336). Ως εκ τούτου, μπορεί να εκληφθεί ως μία προσπάθεια των αφηγητών να δώσουν μια τοπική απάντηση στη γενική ερώτηση «ποιος είμαι;» (Bamberg 1997: 337, βλ. σχετικά Αρχάκης & Τσάκωνα 2011).

Στην ανάλυση που ακολουθεί θα αναδειχτεί ο τρόπος με τον οποίο μία μαθήτρια της γ’ λυκείου, μέσω της αφηγηματικής της επιτέλεσης και τοποθέτησης, κατασκευάζει τον εαυτό της αρκούντως ισχυρό ώστε να αμφισβητήσει την καθηγητική εξουσία και να πληξεί το πρόσωπο του καθηγητή της. Θα υποστηρίξω ότι, στο πλαίσιο του αφηγηματικού κόσμου που κατασκευάζει, η μαθήτρια αποκλίνει από τον προβλεπόμενο ρόλο της συμμόρφωσης και υπόταξης στις καθηγητικές κατευθύνσεις.

5. Ανάλυση αφηγηματικού αποσπάσματος

Η αναλυτική προσοχή μου θα εστιαστεί στο αξιοσημείωτο γεγονός της αφήγησης, στις κατασκευές χαρακτήρων που επιχειρούνται κυρίως μέσω των ευθέων λόγων, καθώς και στις αξιολογήσεις χαρακτήρων.

Το αφηγηματικό απόσπασμα στο (3) προέρχεται από συνομιλία της Αρετής (Α) με τη στενή της φίλη και συμμαθήτρια Δέσποινα (Δ), παρουσία της ερευνήτριας (Ε), η οποία έχει περιορισμένη και κυρίως προτρεπτική συμμετοχή. Οι δύο φίλες, μαθήτριες της γ’ λυκείου, έχουν πολύ καλές επιδόσεις στα μαθήματα και, ως εκ τούτου, έχουν πολλές πιθανότητες να επιτύχουν στις εισαγωγικές εξετάσεις για το πανεπιστήμιο.

(3)

((Προηγείται αναφορά σε μια φιλόλογο-καθηγήτρια η οποία θα αντικαταστήσει τον φιλόλογο-καθηγητή Παπαντωνόπουλο στο δεύτερο τετράμηνο. Οι μαθήτριες τη συγκρίνουν μαζί του.))

[1] Α: (...) Κι αυτή:: είχα παρατηρήσει, δεν είναι απόλυτη όπως είναι ο Παπαντωνόπουλος, δηλαδή εγώ κάνω μάθημα με την φιλόλόγο μου ((εννοεί σε ιδιαίτερα μαθήματα)) και: σε μία λέξη, μπορεί να έχουνε δοθεί τρεις σημασίες, αυτή μου λέει να γράψω και τις τρεις για να ‘μαι μέσα, ο Παπαντωνόπουλος //

[2] Ε: //σου δίνει μία

[3] Α: μας δίνει μία.

[4] Δ: Ναι.

[5] Α: Δεν είναι σωστό αυτό ρε παιδιά όμως. Δεν είναι σωστό [γιατί ξέρεις τι; γιατί]

[6] Δ: [() όπως μας έκανε με το άγνωστο,] ξέρεις τι μας έκανε; σας το ‘πανε;

[7] Α: Ναι, αλλά του την είπα εγώ ((γελώντας))

[8] Δ: () εγώ την έβαλα αιτιολογική την πρόταση

((Γίνεται αναφορά στο γεγονός ότι μεγάλο ποσοστό της τάξης στο διαγώνισμα του αγνώστου κειμένου χαρακτήρισε μια πρόταση που εισάγεται με το *επειδή* ως αιτιολογική, ενώ ο καθηγητής είχε πει ότι σ’ αυτήν τη θέση το *επειδή* εισάγει χρονική πρόταση.))

[9] Δ: (...) και αυτός μας έλεγε ότι θα το κόψει, και ότι το παίρνει μόνο χρονική, και::, πες τι έκανες τώρα ((η Α γελάει))

[10] Α: Πρόσεξε, είχαμε ένα κείμενο

((Οι δύο μαθήτριες προσπαθούν να θυμηθούν ποιο ακριβώς ήταν το κείμενο στο οποίο η Α βρήκε αιτιολογική χρήση του *επειδή* στην αρχή περιόδου.))

[11] Α: (...) Λοιπόν, πρόσεξε, και ξεκίναγε με το ‘επειδή’, ‘επειδή’ στην αρχή προτάσεως ε:: αρχή περιόδου, και::

[12] Δ: Μεταφραζότανε με το ‘επειδή:’ εκεί [πέρα έχει ‘επειδή’]

[13] Α: [Ε::, ε::, μετα] μεταφραζότανε αιτιολογικό.

[14] Δ: Ναι.

- [15] A: Εγώ εντωμεταξύ είχα λυσσάξει να βρω κείμενο να ξεκινάει με το 'επειδή' να έχει μετάφραση από κάτω,
- [16] E: μπράβο
- [17] A: γιατί μου 'χε, μου 'χε κολλήσει ρε, εμένα άμα μου κολλήσει κάτι, δεν υπάρχει περίπτωση να ησυχάσω. (...) Λοιπόν, πρόσεξε, και έψαχνα εγώ τώρα, ένα σωρό κείμενα. Είχα βρει κάποια, αλλά δεν μπορούσα ρε παιδί μου τώρα να πάω να του πω ορίστε να τα κείμενα:: Λοιπόν, και:: είχαμε κάνει, είχαμε κάνει αυτό το κομμάτι. Και λέω, κοίτα λέω ρε γαμώ, να δεις τι θα του κάνω, θα τον αφήσω λέω, να το μεταφράσει, και, όχι, όχι στην παράδοση, γιατί μπορεί στην παράδοση να κάνει κάποιο λάθος αυτός, >γιατί μερικές φορές είναι αφηρημένος< στην εξέταση, που προσέχει πάρα πολύ τα παιδιά τι λένε.
- [18] E: Καλό.
- [19] A: Λοιπόν, βάζει τώρα μια κοπέλα, και:: το μετέφρασε αυτή, όταν/ ε:: 'επειδή' και μεταφράστηκε ως αιτιολογικό και αυτός μετά, το ξανάπε, 'επειδή', εντωμεταξύ μας είχε δώσει κάτι δικές του σημειώσεις, που είχανε τη μετάφραση μέσα, 'επειδή'.
- [20] E: Καλό.
- [21] A: Λοιπόν, λέω τώρα λέω, είναι τρία πράγματα, το 'πε ο ίδιος, το 'πε η μαθήτρια, και μας το 'χει δώσει κι αυτός, δεν μπορεί λέω τόσο μεγάλο λάθος να κάνει. Τελειώνει λοιπόν η:: εξέταση της:: μετάφρασης, σηκώνω εγώ το χέρι μου, και λέω, **κύριε του λέω, τώρα [έχω μπερδευτεί]** ((γελάει))
- [22] Δ: [**Επειδή έχω μπερδευτεί**] του κάνει.
- [23] A: **Επειδή** του λέω κύριε, **έχω μπερδευτεί σ' ένα σημείο στη μετάφραση, θέλω να με βοηθήσετε**, χάριξε αυτός τώρα επειδή είχα απορία, ξέρεις. Του λέω κύριε, **τι κάνω; εδώ μας έχετε πει εσείς, ότι το 'επειδή', στην αρχή της περιόδου είναι πάντοτε:: χρονικό, ε:: χρονικό, γιατί** του λέω κύριε, **γιατί το μεταφράσαμε αιτιολογικό;** [Με κοιτάει αυτός]
- [24] Δ: [Εντωμεταξύ αυτός,] κόμπλαρε:: δηλαδή ένωσε άσχημα, φάνηκε ότι [ένωσε άσχημα]
- [25] A: [Έλα ρε συγγνώμη], εντάξει.
- [26] Δ: Κάνει αυτός, **ε::ντάξει**
- [27] A: **εντάξει** λέει μου κάνει, **εσύ τώρα έχεις μείνει από το άγνωστο, ναι** του λέω κύριε, μου λέει **εντάξει τώρα δε::, τι να σου πω**, του λέω κύριε του λέω, **δε μ' ενδιαφέρει να μου πείτε για τώρα, ή για το βαθμό μου για το άγνωστο, εμένα μ' ενδιαφέρει του λέω στο τέλος, αν μου τύχει σε μία ανάλογη περίπτωση, τι θα κάνω, αυτό του λέω μ' ενδιαφέρει.** Και πεταχτήκαν και τ' άλλα τα παιδιά να πουν [ξέρεις]
- [28] Δ: [Του λέω] **δηλαδή άμα () στο τέλος, άμα μας το βάλουν στο τέλος, στις εξετάσεις, του λέω θα ήταν και τα δυο σωστά;** και λέει αυτός, **μάλλον, λέει θα σας τα 'παιρνα και τα δυο σωστά.**
- [29] A: **Ε, τότε λέει η Γιώτα, γιατί δε μας τα παίρνετε και σεις.** Και λέει αυτός, **ε:: εδώ ήτανε, έβγαине καλύτερα χρονικό, ε του λέμε κύριε και το αιτιολογικό έβγαине όμως και τώρα, τι [να χάσουμε]**
- [30] Δ: [Και λέει] αυτός, **τελοσπάντων,**
((ακολουθεί συζήτηση των μαθητριών γιατί την συντακτική λειτουργία του *επειδή*))
- [31] A: (...) συνήθως τις μετοχές βάζεις έτσι, μια πρόταση δεν μπορείς να πεις ότι είναι χρονικοαιτιολογική πρόταση. Δεν ξέρω.
- [32] E: Μάλιστα.
- [33] A: Πάντως του την είπα.
- [34] E: Καλά, [καλά του 'πες, καλά του 'πες, έτσι.]
- [35] A: [να δω τι βαθμό θα μου βάλει στο () όμως.]
- [36] E: Έλα ρε, δεν έχει σχέση.

Η Αρετή είναι η κύρια αφηγήτρια του αποσπάσματος στο (3), ενώ ενισχυτικό και υποστηρικτικό ρόλο στις απόψεις που καταθέτει παίζει η Δέσποινα, αλλά και η ερευνήτρια. Το κεντρικό αξιοσημείωντο γεγονός γύρω από το οποίο περιστρέφεται η αφήγηση της Αρετής είναι ότι τόλμησε να καταδείξει μέσα στην τάξη και ενώπιον του καθηγητή τις αντιφάσεις της διδασκαλίας του: ενώ ο καθηγητής θεωρεί ότι ο σύνδεσμος *επειδή* στην αρχή περιόδου εισάγει χρονική πρόταση και για το λόγο αυτό βαθμολόγησε αρνητικά σε διαγώνισμα άγνωστου κειμένου όσους το χαρακτήρισαν αιτιολογικό, ο ίδιος κατά τη διαδικασία εξέτασης στην τάξη αποδέχτηκε τον χαρακτηρισμό του συνδέσμου *επειδή* στην αρχή περιόδου ως αιτιολογικού. Ειδικότερα, στις συνεισφορές [21], [23] η Αρετή αναπαριστάνει τον εαυτό της να λειτουργεί ανεξάρτητα από τη συμβατική δομή *E-A-Av*. Δηλαδή, ζητά η ίδια και παίρνει το λόγο με σκοπό να αμφισβητήσει μετωπικά την εξουσία του ειδικού που θεσμικά έχει ο καθηγητής, εν προκειμένω τη συνέπεια και την αξιοπιστία της διδασκαλίας του, πλήττοντας έτσι το θετικό του πρόσωπο (Brown & Levinson 1987): *σηκώνω εγώ το χέρι μου, και λέω,*

κύριε (...) Επειδή του λέω κύριε, έχω μπερδευτεί σ' ένα σημείο στη μετάφραση, θέλω να με βοηθήσετε (...) Του λέω κύριε, τι κάνω; *εδώ μας έχετε πει εσείς, ότι το 'επειδή', στην αρχή της περιόδου είναι πάντοτε:: χρονικό, ε:: χρονικό, γιατί του λέω κύριε, γιατί το μεταφράσαμε αιτιολογικό;*

Σύμφωνα με την ανάλυση διεπιδραστικών δεδομένων από ελληνικές τάξεις γυμνασίου που επιχειρεί η Τσολακίδου (1995: 199 κ.ε., 291, 296), στο στάδιο της εξέτασης οι μαθητές δεν υποβάλλουν συχνά ερωτήσεις και δεν παίρνουν πρωτοβουλίες που να επηρεάζουν την πορεία της συζήτησης στην τάξη. Η Τσολακίδου (ό.π.: 292), ωστόσο, εντοπίζει ορισμένες 'τολμηρές' ερωτήσεις, όπως τις ονομάζει, οι οποίες «εκφράζουν τη στάση (απορία, έκπληξη ή και διαμαρτυρία) των μαθητών/τριών ...» (ό.π. 294). Θεωρώ ότι η ερώτηση της Αρετής στις συνεισφορές [21], [23] του (3) αποτελεί μία τέτοιου τύπου 'τολμηρή' ερώτηση, δεδομένου ότι δεν προβλέπεται από τη συμβατική δομή *E-A-An* στο στάδιο της εξέτασης και, επιπλέον, περιλαμβάνει τη διαμαρτυρία-καταγγελία της μαθήτριας για τις αντιφάσεις του καθηγητή της.

Ειδικότερα, η Αρετή σηκώνοντας το χέρι (συνεισφορά [21]) διεκδικεί το λόγο έξω από τη συμβατική δομή *E-A-An*. Όπως προκύπτει από τα λεγόμενά της ο καθηγητής, θεωρώντας ότι πρόκειται για διευκρινιστική ερώτηση/απορία, ασμένως της παραχωρεί το λόγο (βλ. *χάρηκε αυτός τώρα επειδή είχα απορία*, συνεισφορά [23]). Ωστόσο, η ερώτηση της Αρετής (*τι κάνω;*), αν και περιβάλλεται με το μανδύα των ερωτήσεων διευκρίνισης όπως δείχνει η συμφραστική της πλαίσισωση (πρβλ. *έχω μπερδευτεί ... θέλω να με βοηθήσετε*), αποτελεί μάλλον καταχρηστική (abusive) πραγμάτωση διευκρίνισης (Austin, 1962). Όπως αποκαλύπτεται από την αναπαράσταση του εσωτερικού διαλόγου της (*Και λέω, κοίτα λέω ρε γαμώ, να δεις τι θα του κάνω*, συνεισφορά [17]), ο απώτερος στόχος της Αρετής φαίνεται να είναι η αποκάλυψη της αντίφασης του καθηγητή και, εντέλει, η καταγγελία του και η πλήξη του προσώπου τους. Η μαθήτρια, έχοντας επιτύχει τη νομιμοποιημένη κατοχή του βήματος σε εναρκτήρια θέση (Ε), σε θέση δηλαδή πρώτου σκέλους, μπορεί πλέον να προσδιορίσει αυτή και όχι ο καθηγητής το πλαίσιο, το περιεχόμενο και την ακολουθιακή εξέλιξη του λόγου και εν προκειμένω να προχωρήσει αυτή και οι συμμαθήτριάς της σε διαδοχικές έμμεσες καταγγελίες. Όπως παρατηρεί η Καπελλίδη (2011: 222) ερευνώντας το σύστημα οργάνωσης του λόγου στην τάξη «η πιο εμφανής απόκλιση των παιδιών από αυτό είναι η κατοχή πρώτου σκέλους σε μια αλληλουχία». Δεν πρέπει να διαφύγει της προσοχής μας ότι ο φόβος της τελικής αρνητικής αξιολόγησης από τον καθηγητή ελλοχεύει (βλ. σχετικά και Καπελλίδη 2011: 214), γεγονός που οδηγεί την Αρετή να αναρωτηθεί *τι βαθμό θα μου βάλει* (συνεισφορά [35]) (βλ. και παράδειγμα 2). Το γεγονός αυτό επιπρόσθετα ενισχύει τον αποκλίνοντα και μη προβλεπόμενο χαρακτήρα της ερώτησης της Αρετής.

Στο σημείο αυτό θα πρέπει να λάβουμε υπόψη ότι η Αρετή για να κατοχυρώσει την ίσως μη αναμενόμενη για μια καλή μαθήτρια στάση αμφισβήτησης προς τον καθηγητή της, φροντίζει να δικαιολογήσει τη συμπεριφορά της οικοδομώντας μία άκρως απαξιωτική εικόνα για τον καθηγητή της μέσω αρνητικών αξιολογήσεων (βλ. συνεισφορές [1] –[5], [6], [17], [19], [21]). Από την άλλη, η εικόνα που η Αρετή οικοδομεί για τον εαυτό της είναι απολύτως θετική προβάλλοντας λ.χ. τον εαυτό της ως άτομο ιδιαίτερα επίμονο προκειμένου να βρει τα κατάλληλα επιχειρήματα που θα αποδείξουν την ασυνέπεια του καθηγητή (βλ. τις emphatic εκφράσεις *είχα λυσσάξει να βρω κείμενο και μού 'χε κολλήσει ρε, εμένα άμα μου κολλήσει κάτι, δεν υπάρχει περίπτωση να ησυχάσω* στις συνεισφορές [15] και [17] αντίστοιχα). Τέλος, το ίδιο το γεγονός ότι η Αρετή στο στάδιο εξέτασης σε μια καθηγητοκεντρική τάξη δεν περιορίζεται στη δομή *E-A-An*, αλλά υποβάλλει 'διευκρινιστική' ερώτηση αποσκοπώντας ουσιαστικά να δείξει την αντίφαση του καθηγητή και να πλήξει το πρόσωπό του (συνεισφορές [21], [23]), την συστήνει ως ιδιαίτερα τολμηρή και αποφασιστική.

Συνοψίζοντας τις παραπάνω διαπιστώσεις από την οπτική του Bamberg θα μπορούσαμε να παρατηρήσουμε τα εξής: Στον αφηγηματικό κόσμο η Αρετή παρουσιάζει τον καθηγητή της με απόψεις και συμπεριφορές που δεν βοηθούν αυτήν και τους συμμαθητές της κατά την προετοιμασία τους για τις εισαγωγικές εξετάσεις. Το γεγονός αυτό κινητοποιεί την Αρετή να οργανώσει την διαμαρτυρία της με στόχο να καταγγείλει και να προσβάλει τον καθηγητή της. Η Αρετή δηλαδή τοποθετεί τον εαυτό της σ' έναν αφηγηματικό ρόλο με τον οποίο α) ζητάει και παίρνει το λόγο, σε ακατάλληλη θέση, έξω από το πλαίσιο της συμβατικής δομής *E-A-An* με πρόσχημα τη διευκρίνιση, β) εναντιώνεται προς τον καθηγητή της και φορέα της θεσμικής εξουσίας του ειδικού αναδεικνύοντας τις αντιφάσεις του, και γ) καταγγέλλει έμμεσα τον καθηγητή σε διαδοχικές αντιπαραθέσεις μαζί του, πλήττοντας έτσι το θετικό του πρόσωπο.

Στο επίπεδο της αφηγηματικής διεπίδρασης η παρουσία της Δέσποινας είναι περιορισμένη, αλλά συστηματικά ενισχυτική της τοποθέτησης της Αρετής. Χαρακτηριστική είναι η παρέμβασή της για να καταδείξει την πλήρη 'κατατρόπωση' του καθηγητή μετά τη 'διευκρινιστική' ερώτηση της Αρετής προς αυτόν στη συνεισφορά [24]. Αντίστοιχα ενισχυτική είναι και η στάση της ερευνήτριας στις συνεισφορές [16], [18], [20] και κυρίως, όπως είδαμε, στη συνεισφορά [34].

Τέλος, στο τρίτο επίπεδο της κοινωνικο-ιδεολογικής τοποθέτησης η Αρετή από τη μια συντονίζεται με τις κοινωνικές νόρμες που επιβραβεύουν τους μαθητές με καλές επιδόσεις και στόχο την είσοδό

τους στο πανεπιστήμιο (γι' αυτό επιδιώκει να μαθαίνει τις 'σωστές' απαντήσεις). Από την άλλη όμως, η κεντρική αφηγηματική της τοποθέτηση, ενισχυμένη από την υποστήριξη των συνομιλητριών της, είναι αντίθετη με την προσδοκία συμμόρφωσης των μαθητών στη θεσμική και γνωστική εξουσία που έχουν οι καθηγητές. Ως εκ τούτου, κατασκευάζει για τον εαυτό της μια ισχυρή ταυτότητα δυναμικής και κυρίως κριτικής μαθήτριας, ικανής να μην περιορίζεται στο πλαίσιο της συμβατικής δομής *E-A-An* και, ως εκ τούτου, να παίρνει το λόγο για να αμφισβητήσει τον καθηγητή της αναδεικνύοντας τις αντιφάσεις του και, εντέλει, για να τον απαξιώσει.

6. Συζήτηση και συμπεράσματα

Σ' ό,τι προηγήθηκε η προσοχή μου εστιάστηκε στην ανάλυση ενός αφηγηματικού αποσπάσματος όπου η αφηγήτρια, μαθήτρια της γ' λυκείου, προβαίνει σε κατασκευή ισχυρής ταυτότητας. Πιο συγκεκριμένα, η μαθήτρια, αν και θεσμικά υποδεέστερη σύμφωνα με τις προβλέψεις της συμβατικής δομικής ανταλλαγής *E-A-An*, αξιοποιεί αφηγηματικά τον θεσμικά ισχυρό καθηγητή της για να επιδείξει τη δυνατότητά της να αντιπαρατεθεί προς αυτόν. Τελικός της στόχος είναι η οικοδόμηση και προβολή ισχυρής ταυτότητας που της εξασφαλίζει, στο επίπεδο της αφήγησής της, την ανεξαρτητοποίησή της από την καθηγητική εξουσία.

Ειδικότερα και σε σχέση με δίπολα όπως (κοινωνική) δομή / ατομική δράση, κανονικότητα / επιτελεστικότητα, οι ισχυρές διεπιδραστικές ταυτότητες μαθητών, όπως αυτή που είδαμε να κατασκευάζει η Αρετή, δεν θα πρέπει να αντιμετωπιστούν ως απότοκα δράσεων συγκροτημένης (πολιτικής) σκοπιμότητας με στόχο να αμφισβητηθεί ή έστω να τροποποιηθεί η κανονικότητα της δομής *E-A-An* (βλ. σχετικά Foucault 1982: 211-212). Άλλωστε, όπως είδαμε, η παρουσία τέτοιων αφηγήσεων είναι ιδιαίτερα περιορισμένη στο σύνολο του υλικού μου, ενώ πολιτικές ή άλλες συναφείς εθνογραφικές μαρτυρίες για τέτοιους τύπου δράσεις δεν υπήρξαν ούτε στη δική μου ούτε σε άλλες σχετικές έρευνες (βλ. Rampton 2006: 71-72).

Λαμβάνοντας υπόψη ότι στην Ελλάδα οι μαθητές είναι υποχρεωμένοι να δαπανούν πολύ χρόνο για την προετοιμασία τους ενόψει του επικείμενου ελέγχου από τον καθηγητή τους στην τάξη, οι αφηγηματικές κατασκευές αυτών των ταυτοτήτων στα συμφραζόμενα των καθημερινών, μεταξύ συμμαθητών, συχνά 'εκτονωτικών' συνομιλιών, θα πρέπει μάλλον να αντιμετωπιστούν ως άμεσες και πιθανώς άναρχες αντιδράσεις προς τον δραστικό περιορισμό που ασκούν οι καθηγητές στον αυτοπροσδιορισμό και την αυτοδιάθεσή τους (πρβλ. Foucault 1982: 211-212).

Δεν αποκλείεται βέβαια οι αντιδράσεις αυτές, τόσο στην αφηγηματική τους διάσταση όσο και ενδεχομένως στην πραγματικότητα του σχολείου στο βαθμό που συμβαίνουν, σταδιακά και μακροπρόθεσμα να οδηγήσουν σε νέες διεπιδραστικές συμβάσεις στην τάξη.

Με βάση ωστόσο τα πορίσματα της ανάλυσής μου, είναι σκόπιμο να τονίσω το εξής: θεωρώντας ότι οι αντιδράσεις των μαθητών προς την καθηγητική εξουσία μέσω της αφηγηματικής κατασκευής ισχυρών ταυτοτήτων συνδέονται με την επιδίωξη του αυτοπροσδιορισμού και της αυτοδιάθεσής τους, δηλαδή της (παροδικής, στο πλαίσιο της συνομιλίας) ανεξαρτητοποίησής τους από τις περιοριστικές καθηγητικές κατευθύνσεις, η αφήγηση αναδεικνύεται σε ιδιαίτερα κατάλληλο επικοινωνιακό μέσο επίτευξης (διεπιδραστικών) επιδιώξεων (δηλ. την καταγγελία του καθηγητή) οι οποίες είναι συχνά αμφίβολο αν και σε ποιο βαθμό, έκταση και ένταση θα μπορούσαν να λάβουν χώρα στην πραγματικότητα της σχολικής τάξης (βλ. σχετικά Archakis & Tzanne 2005).

Ως εκ τούτου, τα ευρήματά μου συντονίζονται με τις γενικότερες παραδοχές του θεωρητικού ρεύματος της κοινωνικής κατασκευής σύμφωνα με το οποίο οι ταυτότητες, εν προκειμένω οι ισχυρές μαθητικές ταυτότητες, δεν είναι εγγενώς εγκαταστημένες στα άτομα, αλλά κατασκευάζονται κατά περιστάσεις με βασικό οικοδομικό υλικό το λόγο και αποσκοπώντας σε συγκεκριμένες κάθε φορά επιδιώξεις. Η παρούσα μελέτη, αξιοποιώντας το μοντέλο του Bamberg (1997) συμβάλλει στην κατανόηση του τρόπου με τον οποίο οι μαθητές μέσω των αφηγηματικών τους τοποθετήσεων κατασκευάζουν ισχυρές ταυτότητες, επιδιώκοντας, στο πλαίσιο των συνομιλιών τους, την ανεξαρτητοποίησή τους από την καθηγητική εξουσία.

ΚΡΙΤΗΡΙΑ ΑΞΙΟΛΟΓΗΣΗΣ ΠΛΗΡΟΦΟΡΗΤΙΚΟΤΗΤΑΣ ΜΑΘΗΤΙΚΩΝ ΚΕΙΜΕΝΩΝ

Γεώργιος Ασπρούλης
Πανεπιστήμιο Κρήτης, Ελλάδα
geaspr@yahoo.gr

ΠΕΡΙΛΗΨΗ

Producing a written text is a demanding procedure requiring both knowledge and language awareness. In this research we examine the ability to produce written texts by Greek-speaking and Albanian-speaking pupils of the fourth and sixth grades of Primary school in Rethimno, Crete. Informativity is an essential element for a text to function in communication. It depends on vocabulary, syntax, and the way we analyze the opinions stated. From the quantitative and qualitative analysis of the research facts no statistically significant differences were noticed regarding text informativity between Greek-speaking and Albanian-speaking pupils.

Λέξεις κλειδιά: text production, writing, second language, bilinguals

1. Σκοπός της έρευνας

Σκοπός της εργασίας αυτής είναι η καταγραφή μιας υπάρχουσας εκπαιδευτικής κατάστασης, της ικανότητας των μαθητών των σχολείων του Ρεθύμνου, Ελληνόφωνων και Αλβανόφωνων, στην παραγωγή κειμένων (αφηγήσεων).

2. Προβληματική της έρευνας

Η παραγωγή κειμένων είναι μια απαιτητική διαδικασία, γνωστικά και γλωσσικά. Αποτελεί βασικό εκπαιδευτικό στόχο από τις πρώτες τάξεις της πρωτοβάθμιας εκπαίδευσης ως και το τέλος της δευτεροβάθμιας εκπαίδευσης. Ως διαδικασία δεν διευκολύνεται από την ικανότητα του μαθητή να αντιλαμβάνεται εξωγλωσσικά και διαπροσωπικά δεδομένα, είναι γνωστικά απαιτητική, γίνεται σε περιβάλλον πλαισιακά μειωμένο και οι αλλοδαποί μαθητές δυσκολεύονται να ανταποκριθούν. Πολλοί αποφοιτούν από το δημοτικό ουσιαστικά ανέτοιμοι, έχοντας χαμηλό επίπεδο ανάπτυξης της ακαδημαϊκής τους ικανότητας. Οδηγούνται με την είσοδό τους στο γυμνάσιο σε σχολική αποτυχία, η οποία ως φαινόμενο έχει πολλές κοινωνικές διαστάσεις.

Σύμφωνα με τα αποτελέσματα ερευνών, όπως αυτή του J. Cummins σε μετανάστες μαθητές στον Καναδά (Cummins 1999) και άλλων (Collier 1987), οι μετανάστες μαθητές χρειάζονται πέντε έως επτά χρόνια για να φτάσουν τους γηγενείς στην ακαδημαϊκή γλωσσική ικανότητα στη γλώσσα της χώρας υποδοχής. Οπότε, σύμφωνα με αυτά τα αποτελέσματα, ενώ στη Δ' τάξη αναμένεται να υπάρχει απόκλιση, στη Στ' Δημοτικού, δηλαδή μετά από έξι σχεδόν χρόνια, αναμένεται κάποια σύγκλιση στην ανάπτυξη ακαδημαϊκής γλωσσικής ικανότητας μεταναστών και γηγενών μαθητών.

3. Το κείμενο και οι λειτουργίες του

Το μοντέλο των de Beaugrande & Dressler δίνει πολλές απαντήσεις στη διακλαδική αντιμετώπιση των κειμένων. Για τους de Beaugrande & Dressler, ως κείμενο θεωρείται το επικοινωνιακό συμβάν που πληροί τους επτά παράγοντες (κριτήρια) της κειμενικότητας, τις επτά κειμενικές λειτουργίες, τη συνοχή, τη συνεκτικότητα, την προθετικότητα, την αποδεκτότητα, την πληροφορητικότητα, την καταστασιακότητα και τη διακειμενικότητα (de Beaugrande & Dressler 1981: 3-4). Οι επτά κειμενικές λειτουργίες αποτελούν ένα ολοκληρωμένο σύνολο, έχουν χαρακτήρα συνδετικό και παρουσιάζουν

τους τρόπους με τους οποίους τα κειμενικά στοιχεία συνδέονται σε ένα σύστημα (Κουτσοιλέλου - Μίχου 1997: 24-25).

3.1 Πληροφορητικότητα

Ένας παράγοντας κειμενικότητας είναι η πληροφορητικότητα (informativity). Είναι παράγοντας απαραίτητος προκειμένου ένα κείμενο να λειτουργήσει στην επικοινωνία, καθώς σχετίζεται με τη μετάδοση πληροφοριών. Εξετάζει το βαθμό που τα κειμενικά στοιχεία ενός κειμένου είναι αναμενόμενα ή όχι, γνωστά ή άγνωστα. Επομένως, η πληροφορία δεν είναι μόνο το περιεχόμενο του κειμένου, αλλά και η συμβατότητα με ό,τι γνωρίζει και ό,τι μπορεί να προσλάβει ο αποδέκτης του κειμένου (Παπαϊωάννου 2006). Όταν το περιεχόμενο είναι σε πλήρη αντιστοιχία με τις γνώσεις του αποδέκτη, τότε το κείμενο είναι αδιάφορο. Στην αντίθετη περίπτωση το περιεχόμενο του κειμένου είναι ανοίκειο. Έτσι, η ελάχιστη και η μέγιστη πληροφορητικότητα οδηγούν στο ίδιο αποτέλεσμα, τη ματαιώση της επικοινωνίας (de Beaugrande & Dressler 1981: 3-4).

Είναι σημαντικό σε ένα γραπτό, το υλικό του κειμένου. Πιο συγκεκριμένα, οι ιδέες ή τα επιχειρήματα του δημιουργού, ανεξάρτητα από το αν είναι κατανοητά, πρέπει να ενδιαφέρουν και να είναι σημαντικά για τον αποδέκτη. Στόχος δεν είναι η γνώση ως γνώση, αλλά η ποιότητά της. Επιπλέον, το κείμενο πρέπει να έχει ποιότητα και να είναι πάρα πολύ καλά οργανωμένο. Η καλή οργάνωση αφορά στο λεξιλόγιο, στα συντακτικά σχήματα, στον τρόπο ανάλυσης και επεξεργασίας των μεταβλητών και των απόψεων που διατυπώνονται. Η παραγωγή κειμένου με υψηλή πληροφορητικότητα είναι συγχρόνως πολύ σημαντική και πιο ενδιαφέρουσα.

Κάθε κειμενικό στοιχείο είναι φορέας συγκεκριμένου βαθμού πληροφορητικότητας. Οι de Beaugrande & Dressler συσχετίζουν την πληροφορητικότητα με την περιβαλλοντική πιθανότητα εμφάνισης ενός κειμενικού στοιχείου· διακρίνουν τα κειμενικά στοιχεία σε αναμενόμενα και μη αναμενόμενα. Τα αναμενόμενα σχετίζονται με χαμηλή πληροφορητικότητα, ενώ τα μη αναμενόμενα με υψηλή (Riffaterre 1971).¹ Όμως, η περιβαλλοντολογική πιθανότητα εξαρτάται από το είδος του κειμένου και δεν είναι ανάλογα κατανοημένη στα διάφορα συστήματά του (Κουτσοιλέλου-Μίχου 1997: 160).

Η πληροφορητικότητα σχετίζεται και με το βαθμό δυσκολίας προσέγγισης των κειμενικών στοιχείων (de Beaugrande 1980: 105). Πρώτου, δηλαδή ελάχιστου βαθμού πληροφορητικότητας, είναι τα πιο συνηθισμένα από πλευράς χρήσης στοιχεία και πιο εύκολα από πλευράς κατανόησης, ενώ εύκολα συνδέονται εννοιολογικά με τα άλλα στοιχεία του κειμένου. Σε αυτή την κατηγορία εντάσσονται τα άρθρα, οι προθέσεις, οι σύνδεσμοι, οι αντωνυμίες, δηλαδή οι λειτουργικές λέξεις. Από κειμενική πλευρά αυτά τα γραμματικά στοιχεία αποτελούν ένα μικρό, κλειστό σύνολο, στο οποίο δεν μπορούν να προστεθούν νέα μέλη, σε συγχρονικό τουλάχιστον επίπεδο. Όλες οι υπόλοιπες λέξεις του λεξικού είναι συστατικά δεύτερου βαθμού πληροφορητικότητας (Κουτσοιλέλου-Μίχου 1997: 160). Τρίτου (μέγιστου) βαθμού πληροφορητικότητας είναι τα κειμενικά στοιχεία που απαιτούν ιδιαίτερη προσπάθεια για να κατανοηθούν σωστά. Τέτοιες είναι παραβιάσεις στο επίπεδο της συνεκτικότητας, τις οποίες οφείλει να ερμηνεύσει ο δέκτης και να αντιληφθεί τις προθέσεις του δημιουργού, όπως και οι ασυνέχειες της γλωσσικής και νοηματικής ροής του κειμένου (Παπαϊωάννου 1995: 32-35). Όταν ο δέκτης επιτύχει να κατανοήσει τα στοιχεία τρίτου βαθμού και τη σημασία τους με στοιχεία που προηγούνται ή έπονται ή είναι εκτός κειμένου, η πληροφορητικότητα των στοιχείων πέφτει από τον τρίτο στο δεύτερο βαθμό. Η ερμηνεία τους όμως συχνά είναι σοβαρό πρόβλημα που απαιτεί γνώσεις και ιδιαίτερη ικανότητα κατανόησης.

Σε αυτή την κατηγορία ανήκουν οι λέξεις περιεχομένου, δηλαδή ουσιαστικά, ρήματα, επίθετα και επιρρήματα, επειδή ενεργοποιούν τις γνωστικές λειτουργίες και δημιουργούν νοητικές εικόνες. Κάθε κείμενο αναπτύσσεται αντλώντας από αυτό το σύνολο των λεξικών στοιχείων, το οποίο είναι σχεδόν ανεξάντλητο.

Η πληροφορητικότητα του κειμένου εξαρτάται και από τις προσδοκίες των δεκτών κατά την επικοινωνία. Οι προσδοκίες του μελετητή σχετίζονται και με το είδος του κειμένου (de Beaugrande & Dressler 1981: 146). Από το κάθε κειμενικό είδος ο δέκτης έχει συγκεκριμένες προσδοκίες για τη δομή, την έκφραση και τη διάρθρωσή του (Κουτσοιλέλου - Μίχου 1997: 194). Αναμένει συγκεκριμένα στοιχεία ύφους από το κείμενο και το δημιουργό του, ώστε αυτό να παρουσιάζεται ενδιαφέρον και πληροφορητικό.

¹ Ο Riffaterre τονίζει ότι η προβλεψιμότητα των στοιχείων παίζει ρόλο στο κειμενικό αποτέλεσμα.

4. Μεθοδολογία της έρευνας

4.1 Υποθέσεις της έρευνας

Οι βασικές υποθέσεις εργασίας είναι ότι:

- οι δίγλωσσοι (αλβανόφωνοι) μαθητές στη Δ' τάξη δεν έχουν φτάσει το επίπεδο των γηγενών συμμαθητών τους στην παραγωγή κειμένων και
- οι δίγλωσσοι (αλβανόφωνοι) μαθητές στο τέλος της πρωτοβάθμιας εκπαίδευσης (Στ' τάξη) έχουν φτάσει το επίπεδο των γηγενών συμμαθητών τους στην παραγωγή κειμένων.

4.2 Ερευνητικά εργαλεία – Μέθοδος – Δείγμα

Για την τεκμηρίωση αυτών των υποθέσεων χρησιμοποιήθηκε ερωτηματολόγιο και γλωσσικό τεστ (αφηγηματικό κείμενο) που δόθηκαν στους μαθητές για να ελεγχθεί η ικανότητά τους στην παραγωγή κειμένου.

Στη συγκεκριμένη έρευνα ακολουθήθηκε η γενετική μέθοδος έρευνας και συγκεκριμένα στη συγχρονική της μορφή (Βάμβουκας 1988: 216-218).

Τα δείγμα της έρευνας αυτής αποτέλεσαν οι 64 αλβανόφωνοι μαθητές και οι 325 ελληνόφωνοι συμμαθητές τους από δεκαεπτά σχολεία από όλο το Νομό Ρεθύμνης.

4.3 Κριτήρια αξιολόγησης των κειμένων

Η αξιολόγηση κειμένων (ιστοριών) μπορεί να γίνει με πάρα πολλά κριτήρια και να δώσει διαφορετικά αποτελέσματα. Γι' αυτό το λόγο η επιλογή του συστήματος κωδικοποίησης και η αξιολόγηση των δεδομένων πρέπει κάθε φορά να λαμβάνει υπ' όψιν τα υποκείμενα, τη διαδικασία, τα υλικά και γενικά το σκοπό της έρευνας. Όπως τονίζει η Akhmanova, προτού αρχίσουμε να μετράμε, πρέπει να ξέρουμε τι μετράμε και για ποιο λόγο το μετράμε (Akhmanova 1976: 110). Έγινε προσπάθεια να βρεθούν κριτήρια αξιολόγησης που να μην αφήνουν περιθώρια για υποκειμενική κρίση (Ματσαγγούρας 2001: 286-287).²

Επειδή τα κείμενα ήταν αφηγήσεις, έπρεπε βασικά να αξιολογηθεί η δομή τους. Η δομή μιας ιστορίας που μπορεί να θεωρηθεί πρότυπη ή ελάχιστη οφείλει να πληροί ορισμένα βασικά χαρακτηριστικά:

- Πρότυπη δομή ιστορίας: α) σκηνικό, β) αρχικό γεγονός, γ) εσωτερική αντίδραση, δ) εγχείρημα, ε) συνέπειες, στ) αντίδραση.
- Ελάχιστη δομή ιστορίας: α) ένα συγκεκριμένο πρωταγωνιστή που θα μπορεί να θέσει κάποιο σκοπό, β) τα κίνητρα και / ή οι στόχοι ενός πρωταγωνιστή, γ) φανερή δράση που στοχεύει στην επίτευξη του στόχου, δ) πληροφορίες που αφορούν στην επίτευξη ή όχι του στόχου.

Ο πλούτος των συντακτικών σχημάτων καθώς και η ποικιλία και η ευελιξία των συντακτικών δομών είναι καθοριστικοί παράγοντες και για την πληροφορητικότητα ενός κειμένου, καθιστώντας το περισσότερο ενδιαφέρον και ικανό να πείσει τον αναγνώστη του.

Η κατανομή κύριων και δευτερευουσών προτάσεων (επιρρηματικών και ονοματικών) και η στατιστική τους αναλογία δίνει πολύτιμα στοιχεία για το ύφος του κειμένου. Η υπεροχή του ανεξάρτητου λόγου έναντι του υποταγμένου δίνει παραστατικότερα νοήματα αλλά ελαττώνει τη λογική τους σχέση. Ο μεγάλος αριθμός κύριων προτάσεων σε σχέση με τις δευτερεύουσες είναι ένα χαρακτηριστικό του απλού ύφους.

Η υποτακτική σύνδεση εκφράζει ανώτερο επίπεδο σκέψης και λόγου, γιατί μέσω των δευτερευουσών προτάσεων δεν παρατίθενται απλά πληροφορίες και σκέψεις αλλά συσχετίζονται τα δεδομένα και παρουσιάζονται οι σκέψεις και ο τρόπος δράσης των ηρώων (Χαραλαμπίδης 1999: 145).

² Κοινά αποδεκτά κριτήρια για αξιολόγηση μαθητικών κειμένων θεωρούνται η δομή κειμένου, η ακρίβεια, η σαφήνεια, η αλληλουχία σκέψεων, η σύνταξη, ο λεκτικός πλούτος, η τεκμηρίωση απόψεων, η κατανόηση του θέματος, η πληρότητα της ανάπτυξης, η ορθογραφία, η γενική εικόνα, η πρωτοτυπία σκέψεων και το ύφος.

«Η πολυπλοκότητα του γραπτού λόγου των μαθητών μπορεί να βρεθεί με βάση τη συχνότητα χρήσης των δευτερευουσών προτάσεων» (Λαμπροπούλου 1993: 43-44).

Στην έρευνα αυτή διακρίθηκαν οι δευτερεύουσες προτάσεις σε ονοματικές και επιρρηματικές. Ευκολότερα και συχνότερα χρησιμοποιούνται από τα παιδιά οι ονοματικές (Μπασλής 1989: 26-27). Όμως, μέσω των επιρρηματικών προτάσεων αναδεικνύονται οι έννοιες του χρόνου, της αιτίας, της υπόθεσης, του σκοπού, του αποτελέσματος, της εναντίωσης. Έτσι, τα γεγονότα σε μια ιστορία συνδέονται μεταξύ τους, η ιστορία αποκτά μεγαλύτερη πλοκή και οι σχέσεις μεταξύ των στοιχείων της γίνονται πιο στενές. Αυτό έχει ως συνέπεια την αύξηση της πληροφορητικότητάς της.

Στην έρευνα αυτή υπολογίστηκαν:

1: συνολικός αριθμός δευτερευουσών προτάσεων προς το συνολικό αριθμό κύριων προτάσεων (Λαμπροπούλου 1993: 43-44).

2 : συνολικός αριθμός επιρρηματικών προτάσεων προς το συνολικό αριθμό κύριων προτάσεων.

Η πληροφορητικότητα ενός κειμένου εξαρτάται και από το λεξιλόγιο, την ποιότητα του υλικού που ο δημιουργός του επιλέγει. Στην ηλικία αυτή ο στόχος για την παραγωγή κειμένου δεν είναι η δημιουργία εκκολαπτόμενων λογοτεχνών. Όμως, ένα πλούσιο λεξιλόγιο, το οποίο έχει σωστά επιλεγεί και ευστοχα τοποθετηθεί, καθιστά το κείμενο ενδιαφέρον. Αντίθετα, ένα κείμενο με περιορισμένο ή επαναλαμβανόμενο λεξιλόγιο δεν έλκει την προσοχή του αναγνώστη και δεν επιτυγχάνει το σκοπό του.

Επίσης, επισημαίνεται ο σημαντικός ρόλος των επιθέτων στην πληροφορητικότητα ενός κειμένου. «Τα επίθετα είτε περιορίζουν την έκταση της γενικής σημασίας του ουσιαστικού και προσθέτουν στο λόγο σαφήνεια και ακρίβεια είτε ως κατηγορούμενα συμπληρώνουν τη σημασία του ρήματος, αναδεικνύοντας την ποιότητα ή την ιδιότητα που αποδίδεται στο υποκείμενο. Όσο καλύτερα το παιδί γνωρίζει τη γλώσσα, τόσο περισσότερα και πιο κατάλληλα επίθετα χρησιμοποιεί».

Ένας δείκτης ταυτότητας του κειμένου είναι η αναλογία λειτουργικών λέξεων και λέξεων περιεχομένου. Έχει ονομαστεί λεξική πυκνότητα. Παρά το γεγονός όμως ότι οι λειτουργικές λέξεις είναι πολύ λιγότερες από τις λέξεις περιεχομένου, καταλαμβάνουν σχεδόν το 50% του συνόλου των λέξεων που παρουσιάζονται σ' ένα κείμενο.

Για την αξιολόγηση ενός κειμένου με βάση τη λεξική πυκνότητα είναι σημαντικό να λαμβάνεται υπ' όψιν το μήκος του κειμένου. Το λεξιλόγιο ενός κειμένου ανανεώνεται μόνο από λεξικά στοιχεία, συνεπώς ο αριθμός των νέων λέξεων τείνει να μειώνεται όσο αναπτύσσεται το κείμενο και διαφέρει από ενότητα σε ενότητα (Youmans 1994).

Συνεπώς, χρησιμοποιήθηκαν τα παρακάτω κριτήρια:

- Το πλήθος των διαφορετικών λέξεων,
- Η ποικιλία και ο πλούτος του λεξιλογίου. Σύμφωνα με τη Β. Λαμπροπούλου (Λαμπροπούλου 1993: 43) μπορεί να υπολογιστεί από το «type-token ratio» των Templin και Quigley & Paul (Quigley & Paul 1984). Ο λόγος αυτός βρίσκεται από το εξής ποσοστό: Συνολικός αριθμός διαφορετικών λέξεων κειμένου προς το συνολικό αριθμό λέξεων κειμένου (Σπαντιδάκης 1998: 63-64),³
- Το πλήθος επιθέτων,
- Το ποσοστό του πλήθους επιθέτων σε σχέση με το συνολικό αριθμό λέξεων του κειμένου,
- Το πλήθος των λέξεων περιεχομένου.

Το ποσοστό του πλήθους των λέξεων περιεχομένου σε σχέση με το πλήθος των λειτουργικών λέξεων.

5. Αποτελέσματα της έρευνας

5.1 Η ικανότητα παραγωγής κειμένων στη Δ' τάξη

Με βάση τον πειραματικό σχεδιασμό για την εξέταση όλων των κριτηρίων που επιλέχθηκαν στις δύο ομάδες της Δ' δημοτικού, των ελληνοφώνων και των αλβανοφώνων μαθητών, χρησιμοποιήθηκε το μη παραμετρικό Test Mann Whitney για δύο ανεξάρτητα δείγματα. Δεν χρησιμοποιήθηκε το αντίστοιχο παραμετρικό κριτήριο T-test, καθώς υπήρχαν ακραίες τιμές και αποκλίσεις των μεταβλητών από την κανονική κατανομή (Νόβα-Καλτσούνη 2006: 162). Με αυτό το test εξετάζεται αν υπάρχουν

³ Σύμφωνα με τον Σπαντιδάκη, είναι λογικό να μειώνεται το πλήθος των διαφορετικών λέξεων όσο αυξάνεται το μήκος του κειμένου. Προτείνει ως επιλογή για μεγαλύτερη αξιοπιστία να λαμβάνεται ως δείγμα ο ίδιος αριθμός λέξεων από κάθε γραπτό.

στατιστικά σημαντικές διαφορές στις μετρήσεις των εξαρτημένων μεταβλητών (κριτήρια αξιολόγησης κειμένων) που προέρχονται από τις δύο ομάδες.

Έλεγχος στατιστικής σημαντικότητας με βάση τα κριτήρια αξιολόγησης γραπτού λόγου μεταξύ της ομάδας των αλβανόφωνων και των ελληνόφωνων μαθητών στη Δ' τάξη

Δ' τάξη				
Κριτήρια αξιολόγησης	Μ.Ο (ελάχιστη-μέγιστη τιμή)		Z	P
	Αλβανόφωνοι	Ελληνόφωνοι		
Δομή ιστορίας	1,4 (0 – 2)	1,3 (0 – 2)	-0,988	0,323
Διαφορετικές λέξεις	71,9 (32 – 130)	81,5 (22 – 314)	-0,994	0,320
% διαφορετικών λέξεων	49,2 (34 – 75,3)	48,6 (31 – 71,7)	-0,646	0,518
Λέξεις περιεχομένου	83,7 (29 – 185)	99,1 (17 – 564)	-1,005	0,315
Λέξεις περιεχομένου / λέξεις λειτουργικές	1,2 (0,9 – 1,5)	1,2 (0,8 – 1,6)	-0,950	0,342
Επίθετα	7,4 (1 – 23)	8,6 (0 – 65)	-0,857	0,391
% επιθέτων	4,4 (1,2 – 8,7)	4,4 (0 – 10,3)	-0,227	0,821
% Δευτερεύουσες / κύριες	40,8 (6,9 – 85,7)	47,8 (0 – 125)	-1,537	0,124
% Επιρρηματικές / κύριες	20,1 (0 – 57,1)	23,3 (0 – 100)	-1,190	0,234

Δεν φαίνεται να επαληθεύεται η υπόθεση ότι οι δίγλωσσοι μαθητές στη Δ' τάξη δεν έχουν φτάσει το επίπεδο των γηγενών συμμαθητών τους στην παραγωγή κειμένων στα κριτήρια που σχετίζονται με την πληροφορητικότητα ενός κειμένου.

Πιο συγκεκριμένα, μη στατιστικά σημαντικές ήταν οι διαφορές στα εξής κριτήρια:

- Δομή ιστοριών: Οι αλβανόφωνοι μαθητές δημιουργούν ιστορίες με μέσο όρο δομής 1,4, ενώ οι ελληνόφωνοι μαθητές με μέσο όρο 1,3 ($p=0,323$).
- Διαφορετικές λέξεις: Οι αλβανόφωνοι μαθητές χρησιμοποιούν κατά μέσο όρο 71,9 διαφορετικές λέξεις σε κάθε τους κείμενο, ενώ οι ελληνόφωνοι μαθητές χρησιμοποιούν κατά μέσο όρο 81,5 διαφορετικές λέξεις σε κάθε τους κείμενο ($p=0,320$).
- Ποσοστό διαφορετικών λέξεων: Το ποσοστό των διαφορετικών λέξεων ως προς το σύνολο των λέξεων του κειμένου είναι κατά μέσο όρο στα κείμενα των αλβανόφωνων μαθητών 49,2, ενώ στα κείμενα των ελληνόφωνων μαθητών 48,6 ($p=0,518$).
- Λέξεις περιεχομένου: Οι αλβανόφωνοι μαθητές χρησιμοποιούν κατά μέσο όρο 83,7 λέξεις περιεχομένου σε κάθε τους κείμενο, ενώ οι ελληνόφωνοι μαθητές χρησιμοποιούν κατά μέσο όρο 99,1 ($p=0,315$).
- Λέξεις περιεχομένου προς λέξεις λειτουργικές: Η σχέση λέξεων περιεχομένου προς τις λειτουργικές λέξεις ήταν 1,2 προς 1 κατά μέσο όρο στα κείμενα των αλβανόφωνων μαθητών και των ελληνόφωνων μαθητών ($p=0,342$).

- Πλήθος επιθέτων: Οι αλβανόφωνοι μαθητές χρησιμοποιούν κατά μέσο όρο 7,4 επίθετα σε κάθε τους κείμενο, ενώ οι ελληνόφωνοι μαθητές 8,6 ($p=0,821$).
- Ποσοστό επιθέτων: Το ποσοστό των επιθέτων ως προς το σύνολο των λέξεων του κειμένου είναι κατά μέσο όρο στα κείμενα των αλβανόφωνων μαθητών 4,4. Το ίδιο βρέθηκε και στα κείμενα των ελληνόφωνων μαθητών ($p=0,797$).
- Ποσοστό δευτερευουσών προτάσεων ως προς τις κύριες: 40,8 δευτερεύουσες προτάσεις αντιστοιχούν σε κάθε 100 κύριες κατά μέσο όρο στα κείμενα των αλβανόφωνων μαθητών, ενώ 47,8 σε κάθε 100 στα κείμενα των ελληνόφωνων μαθητών ($p=0,124$).
- Ποσοστό επιρρηματικών προτάσεων ως προς τις κύριες: 20,1 επιρρηματικές προτάσεις αντιστοιχούν σε κάθε 100 κύριες κατά μέσο όρο στα κείμενα των αλβανόφωνων μαθητών, ενώ 23,3 σε κάθε 100 στα κείμενα των ελληνόφωνων μαθητών ($p=0,234$).

5.2 Η ικανότητα παραγωγής κειμένων στη Στ' τάξη

Για την εξέταση όλων των κριτηρίων αξιολόγησης που επιλέχθηκαν στις δύο ομάδες της Στ' δημοτικού, των ελληνόφωνων και των αλβανόφωνων μαθητών, χρησιμοποιήθηκε, και σε αυτή την περίπτωση, το μη παραμετρικό Test Mann Whitney για δύο ανεξάρτητα δείγματα.

Έλεγχος στατιστικής σημαντικότητας με βάση τα κριτήρια αξιολόγησης γραπτού λόγου μεταξύ της ομάδας των αλβανόφωνων και των ελληνόφωνων μαθητών στη Στ' τάξη

Στ' τάξη				
Κριτήρια αξιολόγησης	Μ.Ο (ελάχιστη-μέγιστη τιμή)		Z	P
	Αλβανόφωνοι	Ελληνόφωνοι		
Δομή ιστορίας	1,3 (0 – 2)	1,5 (0 – 2)	-0,802	0,422
Διαφορετικές λέξεις	93 (22 – 232)	109,3 (28 – 410)	-1,756	0,079
% διαφορετικών λέξεων	47,3 (31 – 81,5)	45,9 (27,3 – 63,7)	-0,410	0,682
Λέξεις περιεχομένου	116,4 (16 – 313)	136,4 (31– 599)	-1,463	0,143
Λέξεις περιεχομένου / λέξεις λειτουργικές	1,1 (0,8 – 1,6)	1,2 (0,8 – 1,7)	-1,415	0,157
Επίθετα	11,2 (0 – 31)	13,9 (1 – 69)	-1,331	0,183
% επιθέτων	4,9 (0 – 7,7)	5,4 (0,4 – 11,2)	-0,955	0,339
% Δευτερεύουσες / κύριες	60,6 (21,1 – 171,4)	50,3 (9,5 – 166,7)	-1,821	0,069
% Επιρρηματικές / κύριες	30,7 (0 – 114,3)	21,9 (0 – 71,4)	2,063	0,039

Φαίνεται να επαληθεύεται η υπόθεση ότι οι δίγλωσσοι μαθητές στη Στ' τάξη έχουν φτάσει το επίπεδο των γηγενών συμμαθητών τους στην παραγωγή κειμένων στα κριτήρια που σχετίζονται με την πληροφορητικότητα ενός κειμένου. Στα περισσότερα κριτήρια αξιολόγησης που σχετίζονται με την πληροφορητικότητα του κειμένου δεν παρουσιάζονται στατιστικά σημαντικές διαφορές μεταξύ των δυο ομάδων. Όμως, στο ποσοστό των δευτερευουσών προτάσεων ως προς τις κύριες και στο ποσοστό

των επιρρηματικών προτάσεων ως προς τις κύριες υπερέχουν, ασθενώς στατιστικά σημαντικά και στατιστικώς σημαντικά αντίστοιχα, οι δίγλωσσοι μαθητές. Τέλος, το κριτήριο του πλήθους των διαφορετικών λέξεων υπερέχουν ασθενώς στατιστικά σημαντικά οι γηγενείς μαθητές έναντι των δίγλωσσων.

Πιο συγκεκριμένα, μη στατιστικά σημαντικές ήταν οι διαφορές στα εξής κριτήρια:

- Δομή ιστοριών: Οι αλβανόφωνοι μαθητές δημιουργούν ιστορίες με μέσο όρο δομής 1,3 ενώ οι ελληνόφωνοι μαθητές με μέσο όρο 1,5 ($p=0,422$).
- Ποσοστό διαφορετικών λέξεων: Το ποσοστό των διαφορετικών λέξεων ως προς το σύνολο των λέξεων του κειμένου είναι κατά μέσο όρο στα κείμενα των αλβανόφωνων μαθητών 47,3, ενώ στα κείμενα των ελληνόφωνων μαθητών 45,9 ($p=0,682$).
- Λέξεις περιεχομένου: Οι αλβανόφωνοι μαθητές χρησιμοποιούν κατά μέσο όρο 116,4 λέξεις περιεχομένου σε κάθε τους κείμενο, ενώ οι ελληνόφωνοι μαθητές χρησιμοποιούν κατά μέσο όρο 136,4 ($p=0,143$).
- Λέξεις περιεχομένου προς λέξεις λειτουργικές: Η σχέση λέξεων περιεχομένου προς τις λειτουργικές λέξεις ήταν 1,1 προς 1 κατά μέσο όρο στα κείμενα των αλβανόφωνων μαθητών, ενώ 1,2 προς 1 σε αυτά των ελληνόφωνων μαθητών ($p=0,401$).
- Πλήθος επιθέτων: Οι αλβανόφωνοι μαθητές χρησιμοποιούν κατά μέσο όρο 11,2 επίθετα σε κάθε τους κείμενο, ενώ οι ελληνόφωνοι μαθητές χρησιμοποιούν κατά μέσο όρο 13,9 ($p=0,183$).
- Ποσοστό επιθέτων: Το ποσοστό των επιθέτων ως προς το σύνολο των λέξεων του κειμένου είναι κατά μέσο όρο στα κείμενα των αλβανόφωνων μαθητών 4,9, ενώ στα κείμενα των ελληνόφωνων μαθητών 5,4 ($p=0,339$).

Μεταξύ αλβανόφωνων και ελληνόφωνων μαθητών στη Στ' τάξη στατιστικά σημαντικές αποδείχθηκαν οι διαφορές στα εξής κριτήρια:

- Διαφορετικές λέξεις: Οι αλβανόφωνοι μαθητές χρησιμοποιούν κατά μέσο όρο 93 διαφορετικές λέξεις σε κάθε τους κείμενο, ενώ οι ελληνόφωνοι μαθητές 109,3 ($p=0,079$).
- Ποσοστό δευτερευουσών προτάσεων ως προς τις κύριες: 60,6 δευτερεύουσες προτάσεις αντιστοιχούν σε κάθε 100 κύριες κατά μέσο όρο στα κείμενα των αλβανόφωνων μαθητών, ενώ 50,3 σε κάθε 100 στα κείμενα των ελληνόφωνων μαθητών ($p=0,069$).
- Ποσοστό επιρρηματικών προτάσεων ως προς τις κύριες: 30,7 επιρρηματικές προτάσεις αντιστοιχούν σε κάθε 100 κύριες κατά μέσο όρο στα κείμενα των αλβανόφωνων μαθητών, ενώ 21,9 σε κάθε 100 στα κείμενα των ελληνόφωνων μαθητών ($p=0,039$).

6. Συμπεράσματα - Προτάσεις

Σε αυτή την έρευνα η βασική υπόθεση ήταν ότι οι δίγλωσσοι μαθητές στη Δ' τάξη δεν έχουν φτάσει το επίπεδο των γηγενών συμμαθητών τους στην παραγωγή κειμένων και ότι οι δίγλωσσοι μαθητές στο τέλος της πρωτοβάθμιας εκπαίδευσης (Στ' τάξη) έχουν φτάσει το επίπεδο των γηγενών συμμαθητών τους στην παραγωγή κειμένων.

Στην πρώτη φάση (στη Δ' τάξη) αναμένονταν διαφορές ανάμεσα στις δυο ομάδες. Πιο συγκεκριμένα, αναμενόταν οι ελληνόφωνοι μαθητές να είναι περισσότερο έτοιμοι από τους αλβανόφωνους μαθητές σε αυτή τη γνωστικά απαιτητική πλευρά της γλωσσικής ικανότητας. Συνεπώς, θα μπορούσαν να γράφουν κείμενα με μεγαλύτερη πληροφορητικότητα. Από την ποσοτική και ποιοτική ανάλυση των δεδομένων της έρευνας επιβεβαιώθηκε η βασική υπόθεση σε αρκετά κριτήρια αξιολόγησης των κειμένων. Συγκεκριμένα, οι ελληνόφωνοι μαθητές, εμφάνισαν σε σημαντικά κριτήρια καλύτερες επιδόσεις από τους αλβανόφωνους μαθητές. Αναλυτικότερα, δεν παρουσιάστηκαν διαφορές μεταξύ των αλβανόφωνων και ελληνόφωνων μαθητών της Δ' τάξης στο κριτήριο της δομής αφήγησης, το οποίο διασφαλίζει την πληροφορητικότητα των κειμένων. Οι μαθητές χρησιμοποιούσαν τον ίδιο σχεδόν αριθμό διαφορετικών λέξεων για να συνθέσουν τα κείμενά τους και σε απόλυτους αριθμούς αλλά και σε σχέση με το πλήθος των λέξεων που χρησιμοποίησαν. Χρησιμοποιούσαν το ίδιο συχνά λέξεις περιεχομένου, δηλαδή ουσιαστικά, ρήματα, επίθετα και επιρρήματα, που ενεργοποιούν τις γνωστικές λειτουργίες και δημιουργούν νοητικές εικόνες. Τέλος, ο λόγος τους ήταν το ίδιο σύνθετος, καθώς επέλεγαν παρόμοιο αριθμό δευτερευουσών προτάσεων ανά κύρια πρόταση.

Στη δεύτερη, όμως, φάση δηλαδή μεταξύ των αλβανόφωνων και ελληνόφωνων μαθητών της Στ' τάξης δεν αναμένονταν διαφορές. Πιο συγκεκριμένα, αναμενόταν οι ελληνόφωνοι μαθητές και οι

αλβανόφωνοι μαθητές να είναι εξίσου έτοιμοι σε αυτή τη γνωστικά απαιτητική πλευρά της γλωσσικής ικανότητας και ότι θα μπορούν να γράφουν και οι δυο ομάδες εξίσου πληροφορητικά κείμενα. Όμως, δεν επιβεβαιώθηκε η βασική υπόθεση σε αρκετά κριτήρια αξιολόγησης των κειμένων. Συγκεκριμένα, οι ελληνόφωνοι μαθητές, εξακολούθησαν να εμφανίζουν σε σημαντικά κριτήρια καλύτερες επιδόσεις από τους αλβανόφωνους μαθητές. Δεν παρουσιάστηκαν διαφορές μεταξύ των αλβανόφωνων και ελληνόφωνων μαθητών της Στ' τάξης στο κριτήριο της δομής αφήγησης. Τα κείμενα, επίσης, δεν είχαν σημαντικές διαφορές ως το ποσοστό των διαφορετικών λέξεων από τις οποίες τα κείμενα αποτελούνταν. Οι μαθητές χρησιμοποιούσαν το ίδιο συχνά λέξεις περιεχομένου, δηλαδή ουσιαστικά, ρήματα, επίθετα και επιρρήματα εμπλουτίζοντας με αυτόν τον τρόπο το λόγο τους. Σημαντικές διαφορές παρουσιάστηκαν στο ποσοστό των δευτερευουσών προτάσεων και πιο συγκεκριμένα των επιρρηματικών που χρησιμοποιούσαν οι δύο ομάδες. Οι αλβανόφωνοι μαθητές χρησιμοποιούσαν περισσότερο από τους ελληνόφωνους μαθητές τον υποτεταγμένο λόγο προκειμένου να αποδώσουν στα κείμενά τους τις έννοιες του χρόνου, της αιτίας, της υπόθεσης, του σκοπού, του αποτελέσματος, της εναντίωσης.

Γενικά, η παραγωγή κειμένου είναι μια διαδικασία διαθεματική από τη φύση της. Γνώσεις, ιδέες, εικόνες, σύμβολα και πληροφορίες από όλες τις επιστήμες πρέπει να φωτίσουν τη θεματική που έχει επιλεγεί. Μόνο τότε θα αποκτήσει σφαιρική εικόνα ο μαθητής και θα μπορέσει να εκφράσει τη δική του άποψη. Με τις γνώσεις του βάζει ένα λίθο, μικρό ή μεγάλο, στο κατασκευάσμα που θα δημιουργηθεί με το τέλος της εκπαιδευτικής διαδικασίας.

Τα κείμενα που συνθέτουν οι δίγλωσσοι μαθητές δε διαφέρουν ως προς την πληροφορητικότητα τους σε σχέση με αυτά που συνθέτουν οι γηγενείς συμμαθητές τους. Έχουν πολύ καλή αφηγηματική δομή. Εμφανίζουν πλούτο συντακτικών σχημάτων και ποικιλία συντακτικών δομών συσχετίζοντας και παρουσιάζοντας τις σκέψεις και τον τρόπο δράσης των ηρώων. Το λεξιλόγιο τους δεν είναι επαναλαμβανόμενο. Εμφανίζονται αρκετά επίθετα μέσα σε αυτά, τα οποία προσδίδουν σαφήνεια και ακρίβεια σε πρόσωπα και αντικείμενα, για τα οποία γίνεται λόγος. Τέλος, έχουν καλό βαθμό πληροφορητικότητας με αρκετές λέξεις περιεχομένου.

Προκειμένου τα κριτήρια να μπορούν να λειτουργούν καλύτερα και να οδηγούν σε ασφαλέστερα συμπεράσματα πρέπει να τηρούνται κάποιες προϋποθέσεις. Τα κείμενα πρέπει να έχουν, ή έστω να στοχεύουν, σε συγκεκριμένο αριθμό λέξεων. Κατά τη σύνθεσή τους καλό είναι να ακολουθείται συγκεκριμένη δομή αφήγησης με τις αντίστοιχες παραγράφους.

Οι δίγλωσσοι μαθητές φαίνεται ότι έχουν γνωστικό υλικό, σκέψεις, πληροφορίες και λεξιλόγιο για να δομήσουν τα κείμενά τους. Απομένει η σωστή καθοδήγηση, ώστε αυτό το υλικό να παρουσιάζεται χωρίς μορφοσυντακτικά λάθη. Τα σχήματα αφήγησης και περιγραφής που δίνονται στα σχολικά εγχειρίδια είτε με τη μορφή ερωτήσεων είτε με τη μορφή διαγραμμάτων είναι το πρώτο μόνο από τα βήματα που απαιτούνται για γνωστικά απαιτητικές και με χαμηλό βαθμό πλαισιακής στήριξης διαδικασίες της παραγωγής κειμένου.

Οι μαθητές οφείλουν να αναπτύσσουν αυτοέλεγχο και αυτοπεποίθηση. Πρέπει να είναι ξεκάθαρος ο σκοπός για τον οποίο συνθέτεται το κείμενο, ποιοι θα είναι οι αποδέκτες του και με ποια κριτήρια θα αξιολογηθεί, πώς το κείμενο θα γίνει περισσότερο πληροφορητικό, ποιο θα είναι το εξωγλωσσικό περιβάλλον του κειμένου⁴ και τέλος ποια χαρακτηριστικά πρέπει να έχει το κείμενό τους για να μπορεί να ενταχθεί στο αντίστοιχο κειμενικό είδος στο οποίο στοχεύει η εκπαιδευτική διαδικασία.

ABSTRACT

The paper presents a corpus-based account of the synchronic behaviour of the Modern Greek marker σαν 'like, as' in a number of similarity comparison constructions. Complementing approaches that emphasize its capacity for loose use, σαν is analyzed as a marker of comparison and a mental space builder. The findings suggest that σαν is sensitive to the speakers' choice of epistemic stance and that its inherent comparative nature is responsible for its polysemy and discourse functions. It is concluded that the σαν constructions initiate a concept adjustment process, which can be best described in a continuum of similarities to identities.

Λέξεις κλειδιά: σύγκριση, ομοιότητα, επιστημική στάση, νοητικοί χώροι, σώματα κειμένων, σαν

1. Εισαγωγή

1.1 Στόχοι της έρευνας

Οι δομές ομοιότητας εντάσσονται στη γλωσσική έκφραση της ισοδυναμίας και συνεξετάζονται με γραμματικές περιγραφές των συγκρίσεων γενικότερα (Χειλά-Μαρκοπούλου 1986, Haspelmath & Buchholz 1998, Holton, Mackridge & Φιλίππακη-Warburton 1999, Huddleston & Pullum 2002). Όπως επισημαίνει η Χειλά-Μαρκοπούλου (1986: 128-29), στις αρχές του 20^{ου} αιώνα η γλωσσολογική ανάλυση των συγκρίσεων στις φυσικές γλώσσες είχε ταυτιστεί με την ανισότητα -κατά το πρότυπο των κλασικών γλωσσών- και είχε έτσι αγνοηθεί «μία από τις βασικότερες μορφές σύγκρισης, η ισότητα». Παρόμοια θέση διατυπώνουν οι Haspelmath & Buchholz (1998: 277), διαπιστώνοντας την έλλειψη τυπολογικών μελετών και δικαιολογώντας έτσι την πρόθεσή τους να διερευνήσουν διαγλωσσικά τις εξισωτικές και τις παρομοιαστικές δομές.

Στη μελέτη αυτή επιχειρείται μια πρώτη προσέγγιση της συγχρονικής συμπεριφοράς ενός βασικού δείκτη ομοιότητας για τα Ελληνικά, του δείκτη *σαν*¹. Ύστερα από μια σύντομη ανασκόπηση προγενέστερων κατηγοριοποιήσεων, ορίζονται οι άξονες της δικής μας ανάλυσης, η μεθοδολογία και το σώμα του υλικού, βάσει των οποίων εφαρμόζεται ένα ενιαίο πλαίσιο ερμηνείας της πολυμορφίας, αλλά και της εξέλιξης των δομών.

Το *σαν* πρωτοεμφανίζεται στα Μεσαιωνικά Ελληνικά μέσω του ελληνιστικού *ὡσαν*, ήδη εν χρήσει στην Αρχαία Ελληνική σε αναλυτική μορφή, σε συνεκφορές των στοιχείων *ὡς* και *ἄν*, όπου το πρώτο είναι αναφορικό και το δεύτερο με αναντίρρητη τροπικότητα². Αποτελεί δηλαδή γλωσσικό στοιχείο σημασιολογικά προσανατολισμένο προς τον από κόσμο της πραγματικότητας, σε συνδυασμό με την οπτική ενός παρατηρητή που αντιλαμβάνεται την πραγματικότητα και τη σχολιάζει. Οι λεξικογραμματικές περιγραφές κάνουν λόγο για μια πολυλειτουργική άκλιτη λέξη³. Στις ελληνικές μελέτες αντιμετωπίζεται σε άμεσο συσχετισμό με τον αρχαιότερο δείκτη *ὡς* (λ.χ. Τζάρτζανος 1963: 250-53, Κλαίρης & Μπαμπινιώτης 2005: 564) και μάλιστα η έρευνα ολοένα αναδεικνύει μια παράλληλη εξέλιξη (Τσαμαδού-Jacoberger 1990, Χαραλαμπίδης 1999: 122, Χάρης 2001: 347-68, Κατσιμαλή 2003, Σαραντάκος 2007: 295-301, Κατσούδα 2009: 239, Νάκας 2010). Αυτό που ενοποιεί

¹ Η έρευνα αποτελεί τμήμα διδακτορικής διατριβής, η οποία εκπονείται με χορηγία του Ιδρύματος Ωνάση.

² LSJ, Chantraine 1999, Sophocles 1914, Humbert 1960: 207-11, BDF 1961: 219, 236-38, Δημητρ. ΕΛΝΕΓ, ΑΚΝ.

³ Κατατάσσεται, ανάλογα με το περιβάλλον και τη λειτουργία του, γενικότερα στα μόρια (Τζάρτζανος 1963, Τριανταφυλλίδης 1996, Τσόκογλου 1998, ΑΝΕΓ, ΜΕΛ), ειδικότερα στις προθέσεις (Mackridge 1990, Τσοπανάκης 1994, Holton, Mackridge & Φιλίππακη-Warburton 1999, Κλαίρης & Μπαμπινιώτης 2005 'οιονεί πρόθεση', επίσης Τζάρτζανος 1963, ΑΚΝ 'προθεσικό επίρρημα') και στους συνδέσμους (γενική ομορφονία).

τις αναλύσεις βρίσκεται στην παραδοχή όλων ότι πίσω από το *σαν* κρύβεται ο ομιλητής και η σχέση του με την πραγματικότητα.

Στην ομώνυμη μελέτη της για τη σημασιολογία του *σαν*, η Τσαμαδού-Jacobberger (1990) ονομάζει το δείκτη «ουδέτερο διενεργητή χαλαρής ταύτισης» (σελ. 297). Η ιδιότητά του να δημιουργεί «χαλαρές συνδέσεις» ανάμεσα στις έννοιες, ότι δηλαδή κάτι *είναι σχεδόν* κάτι άλλο, χωρίς να ταυτίζεται απόλυτα με αυτό, προκρίνεται ως βασική λειτουργία του σε συγκεκριμένες ενδοπροτασιακές εκφορές, με επεκτάσεις και σε διαπροτασιακές (σσ. 301-303). Είναι σαφές το σκεπτικό της κατηγοριοποίησης της Τσαμαδού-Jacobberger και η ανάλυσή μας είναι απολύτως συμβατή με το πλέγμα των σημασιών που αποδίδονται στο *σαν*. Στην εργασία αυτή, ωστόσο, προτείνουμε τη *συγκριτική* (συσχετιστική) του λειτουργία ως εναλλακτική δεσπόζουσα της ανάλυσης: οι δομές με το δείκτη *σαν* αποτελούν τη βάση (2^{ος} όρος) με την οποία συσχετίζεται ένας 1^{ος} όρος (άμεσα συνδεδεμένος με τον κόσμο του ομιλητή τη στιγμή της εκφώνησης). Τα συσχετιζόμενα μέρη μπορεί να είναι γεγονότα, καταστάσεις, πρόσωπα, πράγματα κ.ά. Συγχρόνως, και ο δεύτερος όρος αποτιμάται με βάση τον πρώτο. Στόχος μας είναι να διερευνηθεί ο μηχανισμός των συσχετισμών, ώστε να ενοποιηθούν όσο γίνεται οι χρήσεις του δείκτη και να αναδειχθούν κανονικότητες που διέπουν τη συμπεριφορά του.

1.2 Μεθοδολογικά

Στην ομαδοποίηση του υλικού απομονώθηκαν συντάξεις κατά τις οποίες ο *σαν* εμφανίζεται σε δομές «A, *σαν* B» ή «*σαν* B, A», όπου τα A, B αποτελούν α) ονοματικά στοιχεία, κυρίως πρόσωπα, πράγματα (± έμψυχα, ± συγκεκριμένα· εφεξής *οντότητες*, στα οποία ο δείκτης αποδίδει ιδιότητες διά της σύγκρισης (βλ. 2.2) β) ολόκληρες προτάσεις, τις οποίες ο *σαν* συνδέει μεταξύ τους ως εισαγωγικός σύνδεσμος (βλ. 2.1)⁴. Στις προτασιακές εκφορές ο δείκτης συνοδεύει *γεγονότα, καταστάσεις, ενέργειες, διαδικασίες*: η ομάδα αυτή περιλαμβάνει και τις χρονικές, αιτιολογικές, υποθετικές του σημασίες, οι οποίες τείνουν να εκλείψουν από την Κοινή Νέα Ελληνική, διότι θεωρούνται είτε λαϊκότητες και ιδιωματικές είτε υφολογικά μαρκαρισμένες.

Στην έρευνα χρησιμοποιούνται μεθοδολογικά εργαλεία από γνωσιακές προσεγγίσεις που δίνουν έμφαση στον κόσμο του ομιλητή και στην *επιστημική* του *στάση* (θετική/αρνητική/ουδέτερη) απέναντι στα λεγόμενά του ('epistemic stance': Fillmore 1990, Dancygier & Sweetser 2005), έννοια εγγενώς τροπική και διαβαθμίσιμη. Συναφής είναι και η *επιστημική απόσταση* ('epistemic distance': ό.π. σσ. 56-79), ο βαθμός αποστασιοποίησης του ομιλητή από το περιεχόμενο των λεγομένων του. Από την ανάλυση προκύπτει ότι: 1) η παρουσία του δείκτη *σαν* σηματοδοτεί ένα είδος σύγκρισης που προϋποθέτει αυξημένη εμπλοκή του ομιλητή, υπό την έννοια ότι η σύγκριση αυτή διενεργείται από ένα υποκείμενο που παρουσιάζει την πραγματικότητα (1^{ος} όρος σύγκρισης) υπό τη δική του θεώρηση (Nikiforidou & Katis 2000) και τοποθετείται απέναντι σε αυτήν με βάση μια δεύτερη πραγματικότητα (2^{ος} όρος σύγκρισης), έναν νοητικό χώρο⁵ ('mental space': Fauconnier & Turner 2003) που δημιουργεί ή ανακαλεί κατά τη διάρκεια της επικοινωνιακής διαδικασίας 2) ο δείκτης υποδεικνύει το σημείο του εκφωνήματος όπου κατασκευάζεται η σύνδεση των νοητικών χώρων, καθοδηγώντας τον ακροατή στην πληρέστερη κατανόηση του μηνύματος 3) η πρω(το)τυπική συγκριτική σημασία του *σαν* δικαιολογεί διαβαθμίσεις στην επιστημική, οι οποίες κωδικοποιούνται στο σημασιολογικό του προφίλ 4) σημασιολογικές ωσώσεις οδηγούν από τη σφαίρα του συγκεκριμένου σε πιο αφηρημένες έννοιες (Sweetser 1990), εφόσον στις συγκρίσεις ομοιότητας το λεξιλογικό πεδίο της ομοιότητας γίνεται αντικείμενο νοητικής επεξεργασίας 5) ο δείκτης διεπιδρά με το επίπεδο του κειμένου, διότι ανάλογα με τη θέση του στα εκφωνήματα ρυθμίζει την προβολή της πληροφορίας σε ρέοντα λόγο⁶.

Το σώμα των δεδομένων συγκροτήθηκε βάσει αυθεντικού γλωσσικού υλικού 1) από ηλεκτρονικά σώματα κειμένων: τον Εθνικό Θησαυρό Ελληνικής Γλώσσας [ΕΘΕΓ] του Ινστιτούτου Επεξεργασίας του Λόγου, το Σώμα Ελληνικών Κειμένων [ΣΕΚ] των Πανεπιστημίων Αθηνών/Κύπρου και το Corpus Προφορικού Λόγου του Ινστιτούτου Νεοελληνικών Σπουδών (Ίδρυμα Μανόλη Τριανταφυλλίδη) [CΠΛ]. Αξιοποιήθηκαν επίσης 2) παραδείγματα από λεξικογραφματικές περιγραφές και 3) μαρτυρίες προφορικού διαλεκτικού λόγου του 19^{ου} και 20^{ου} αιώνα από το Αρχείο του Ιστορικού Λεξικού⁷ της Ακαδημίας Αθηνών [ΙΑΝΕ].

⁴ Δεν εξετάζονται στην παρούσα φάση της ανάλυσης 1) συνάψεις *σαν* + επιρρηματικά στοιχεία, 2) ελλειπτικές δομές 'Σαν B' 3) στερεότυπες φράσεις με ιδιοσυγκρασιακή σημασία: *σαν τα χιόνια* κ.λπ.

⁵ Το αναφορικό μέρος των ομηρικών παρομοιώσεων, η *εικόνα* (Snell 1981).

⁶ Οι συγκριτικές σχέσεις ομοιότητας εξετάζονται στην προσθετική σύνδεση (Halliday-Hasan 1976) και από τη στιγμή που ενεργοποιούνται με δείκτες λόγου, συμβάλλουν στην κειμενική συνοχή.

⁷ Τα διαλεκτικά δεδομένα χρησιμοποιήθηκαν επικουρικά, προκειμένου να πιστοποιηθούν (παλαιότερες) δημωδέστερες σημασίες του *σαν* που καταγράφονται όμως σε λεξικά της Κοινής.

2. Ανάλυση

2.1 Γεγονότα, καταστάσεις, ενέργειες, διαδικασίες

Για την πολυσημία των δομών *σαν* + πρόταση στηριζόμαστε σε προγενέστερη έρευνα⁸. Εδώ παρατίθενται μόνο γενικά συμπεράσματα σε σχέση με την επιστημική στάση του ομιλητή:

- 1) Όταν το *σαν* πρωτοεμφανίστηκε στη Μεσαιωνική Ελληνική σε διαπροτασιακές εκφορές, χρησιμοποιήθηκε με αναφορική/τροπική σημασία για τη σύγκριση όμοιων ως προς τον τρόπο ή το βαθμό καταστάσεων (Τζάρτζανος 1963: 238-39 για παραδείγματα). Οι προτασιακές παρομοιαστικές αυτές δομές έχουν σήμερα εξαλειφθεί. Εξίσου, οι υπόλοιπες συνδεσμικές χρήσεις (χρονικές, αιτιολογικές υποθετικές) θεωρούνται πλέον πεπαλαιωμένες και υφολογικά χαρακτηρισμένες (στα σώματα κειμένων εμφανίζονται σε μικρό ποσοστό οι χρονικές, κυρίως σε λογοτεχνικά είδη). Συχνές είναι, αντιθέτως, οι σύνθετες εκφορές *σαν...που* (αιτιολογία), *σα(ν) να* (παρομοίωση).
- 2) Η χρονικότητα αναδύεται, όταν ο ομιλητής δεσμεύεται θετικά για το λογικό περιεχόμενο του εκφωνήματός του (θετική επιστημική στάση)⁹:

I.

Σαν έρθει ο καινούριος καπετάνιος, θα δούμε τι θα κάνουμε με δαύτον. (ΕΘΕΓ, Λογοτεχνία) (πολύ περιληπτικά: η πρόβλεψη για την εξέλιξη των πραγμάτων [νέος νοητικός χώρος με το νέο καπετάνιο να καταφθάνει και να διευθετεί ζητήματα] επιβεβαιώνεται από τον ομιλητή ως πραγματοποιήσιμη σε σχέση με αυτό που ισχύει στο παρόν [παλιός καπετάνιος, εκκρεμή θέματα])

Κοκκινίζει **σαν με βλέπει**. [ΛΝΕΓ] (*κάθε φορά που ...*)

Σαν ξημέρωσε, ξεκίνησαν για τα βουνά. [ΛΚΝ] (*μόλις: ο ήλιος που πάντα θα ανατέλλει σήμανε την έναρξη της πεζοπορίας*)

- 3) Ο δείκτης *σαν* συνοδεύει δομές αιτιολογίας, όταν ο ομιλητής ανακαλεί μια δεδομένη, περικειμενικά γνωστή κατάσταση πραγμάτων (θετική επιστημική στάση)¹⁰:

II.

Σαν το λες εσύ, αλήθεια θα είναι. [Δημητρ.] (*επειδή, μια και, άμα ...*)

Τρέξε να τους βοηθήσεις, **σαν πιο μικρός που είσαι**. [ΛΚΝ] (αιτιολογείται η λεκτική πράξη *τρέξε...*)

- 4) Όταν ο ομιλητής ούτε απορρίπτει ούτε επιβεβαιώνει τα λεγόμενά του (ουδέτερη επιστημική στάση), η επιλογή του συνδέσμου δημιουργεί έναν υποθετικό νοητικό χώρο [αν X], από τον οποίο εξαρτάται μία απόδοση [Ψ]. Συγχρόνως, ενεργοποιείται και η εναλλακτική δομή [αν ~X, ~Ψ], έως ότου επιβεβαιωθεί ή διαψευσθεί¹¹:

IIIα.

Σαν δουλέψεις, θα φας. [ΜΕΛ] (*αν όμως δεν δουλέψεις, ...*)

Σαν θέλεις, πήγαινε και συ μαζί τους. [ΛΝΕΓ]

Συμβατές με την επιστημική ερμηνεία είναι και οι μετριάστικές χρήσεις του *σαν*, κατά τις οποίες, «το όμοιο είναι λιγότερο αληθινό» (Νάκας 2010), όπως και η παρουσία του δείκτη σε συμφραζόμενα αμφιβολίας, σε ευθείες ερωτήσεις, προκειμένου να δραματοποιηθεί η ομιλούσα σκέψη ενός υποκειμένου, να δηλωθεί έντονη απορία, ευγενική συμπεριφορά:

IIIβ.

Αισθάνθηκα **σαν να υπήρχε και κάποιος άλλος στο δωμάτιο**. [ΛΚΝ]

Σαν να έχουμε συναντηθεί και παλιότερα. [ΛΚΝ] (*μπορεί να, μπορεί και όχι*)

«Αν είναι έτσι οι δικοί μας, πώς θα είναι οι άλλοι;» **σαν να σκεφτόταν ο Ουίλκινς**. (ΣΕΚ, Γρ. λόγος, Ειδήσεις)

Σαν τι θα σας ενδιέφερε ακριβώς; Ο θεός δεν απάντησε. (ΕΘΕΓ, Λογοτεχνία)

- 5) Στο αντίθετο άκρο, η επιλογή του *σαν* συνοδεύει υποτεταγμένο λόγο του μη πραγματοποιήσιμου, συνεπώς αρνητική επιστημική στάση του ομιλητή¹². Ο ομιλητής χτίζει έναν κόσμο πιθανό, τον οποίο εν γνώσει του υπονομεύει, σε σχέση με την παρούσα

⁸ Βλ. Afentoulidou (2009).

⁹ Αναμφίβολα οι ρηματικοί χρόνοι συμβάλλουν αποφασιστικά στην ερμηνεία των δομών, ωστόσο μια τέτοια ανάλυση αποτελεί ξεχωριστή ανακοίνωση.

¹⁰ Βλ. Dancygier & Sweetser (2005) για τα *if, since* της Αγγλικής.

¹¹ Συχνή είναι η παρουσία της υποτακτικής, η οποία ενισχύει την υποθετικότητα.

¹² Ο δείκτης *να* συνάπτεται με οριστική παρατατικού ή υπερσυντελικού, προσδίδοντας την ανάλογη τροπικότητα.

κατάσταση επικοινωνίας. Ωστόσο, η διάψευση είναι ρητορικά ισχυρή, μια και του επιτρέπει να εκφράσει βιωματικά τις απόψεις του, την έντονη διαφωνία του πάνω σε ένα θέμα, να προτείνει τη δική του οπτική. Οι εκφορές *σαν να* θυμίζουν τις παλαιότερες δημώδεις αναφορικές/τροπικές δομές, εντούτοις είναι πλέον αμιγώς υποθετικές στη φύση τους (εκφράζουν υποθετική παρομοίωση, βλ. Οικονομάκου 2010):

IV.

Αλλά να τον τώρα, εκατό μέτρα μπροστά μου, να τρέχει **σαν να είχαν πάρει φωτιά τα μπατζάκια του**. (ΕΘΕΓ, Λογοτεχνία)

Ο τρόπος όμως που έγινε η σύλληψη της 45χρονης και η συμπεριφορά των οργάνων της τάξης ήταν απαράδεκτος. Περικύκλωσαν το σπίτι της **σαν να επρόκειτο να συλλάβουν κανένα μαφιόζο ή επικίνδυνο εγκληματία**. (ΣΕΚ, Γρ. λόγος, Άρθρο γνώμης)

Συνεχίζουν να συγκυβερνούν **σαν να μην τρέχει τίποτα**; Κάτι τέτοιο είναι αδιανόητο. (ΣΕΚ, Γρ. λόγος, Άρθρο γνώμης)

- 6) Σχηματικά κινούμαστε από τη γνώση στη διάψευση, με ενδιάμεσο σταθμό την εικασία:

ΓΝΩΣΗ	Πραγματικό	+ επιστημική στάση	επιβεβαίωση	τρόπος αναφορά ** (αμάρτ.) χρόνος αιτιότητα
	Μη-Πραγματικό	- επιστημική στάση	διάψευση	υπόθεση αναφορά τρόπος
ΑΓΝΟΙΑ		ουδέτερη επιστημική στάση	εικασία αμφιβολία	υπόθεση αναφορά τρόπος

Πίνακας 1 Οι συνδεσμικές χρήσεις του *σαν*, με βάση την επιστημική στάση του ομιλητή

Εικόνα 1 Σαν + γεγονότα, καταστάσεις, ενέργειες, διαδικασίες και η επιστημική στάση του ομιλητή

Εικόνα 2 Επιστημική στάση του ομιλητή και Σημασιολογικά πεδία

Συμπερασματικά: Στη συγχρονία της Νέας Ελληνικής, γνωσιακές παράμετροι (η επιστημική στάση του ομιλητή) συσχετίζονται με την εκάστοτε ανάγνωση (χρονική, αιτιολογική, υποθετική, αναφορική-υποθετική) δομών *σαν* + πρόταση. Η παρουσία του *σαν* ενεργοποιεί ένα νοητικό σχήμα σύγκρισης προειδοποιώντας τον ακροατή ότι ο ομιλητής εγγράφει την οπτική του γωνία, η οποία κωδικοποιείται σε συνεχές. Αυτό που δηλώνει η πρόταση με το *σαν* αποτιμάται με βάση αυτό που πιστεύει ο ομιλητής κατά τη στιγμή της εκφώνησης: όσο η απόσταση επιστημικά μεταξύ τους είναι μικρότερη, τα γεγονότα επιβεβαιώνονται, τοποθετούνται στον άξονα του χρόνου, ερμηνεύονται εικονικά¹³ ως ακολουθίες συμβάντων που συνέβησαν/συμβαίνουν/θα συμβούν ή αιτιακά, με βάση τη νομοτέλεια που διέπει τον κόσμο μας (ΧΡΟΝΙΚΟΣ, ΑΙΤΙΟΛΟΓΙΚΟΣ *σαν*). Όσο μεγαλώνει επιστημικά η απόσταση τόσο κινούμεθα στη σφαίρα του υποθετικού και εν τέλει του μη πραγματοποιήσιμου (ΥΠΟΘΕΤΙΚΟΣ, ΑΝΑΦΟΡΙΚΟ-ΥΠΟΘΕΤΙΚΟΣ *σαν*). Οι διαπιστώσεις της συγχρονίας (εμπλοκή του ομιλητή στη διαδικασία και στο αποτέλεσμα της σύγκρισης, σημασίες χειροπιαστές, που άπτονται του φυσικού χώρου-χρόνου και σημασίες αφηρημένες, κειμενικές δομές με συγκεκριμένες λειτουργίες) συνδημιουργούν έναν πολύσημο *σαν* (Afentoulidou 2009), αφήνοντας να διαφανούν τα ίχνη μιας πορείας γραμματικοποίησης προς περισσότερο κειμενικές και υπο-κειμενικές σημασίες (Traugott 1989, Lehmann 1985). Η ίδια η έννοια της ομοιότητας, άλλωστε, έχει όψεις και διαβαθμίσεις, όπως και η αλήθεια. Και από έννοια εξωτερική τροπική γίνεται εσωτερική αφηρημένη νοητική άλγεβρα¹⁴.

2.2 Οντότητες

Στις κατεξοχήν παρομοιαστικές χρήσεις (αυτές είναι οι επικρατέστερες συντάξεις σήμερα), ο δεύτερος όρος σύγκρισης τροποποιεί τον πρώτο (σε συνδυασμό κυρίως με επιθετικούς προσδιορισμούς και ρήματα):

2.2.1 Κυριολεκτική ομοιότητα

- 1) Ο *σαν* συσχετίζει ρητά ως προς τον τρόπο: οι δύο όροι τοποθετούνται χωροχρονικά, προσδιορίζονται ποσοτικά και ποιοτικά (λ.χ. με χρήση επιθετικών προσδιορισμών) σε συγκρίσεις που τους εξισώνουν (I1)¹⁵. Συχνά η βάση σύγκρισης εκφέρεται αντωνυμικά (I2). Διαπιστώνονται ομοιότητες, χωρίς να γίνεται ρητή αναφορά στο βαθμό ύπαρξής τους. Το πόσο μεγάλος, ψηλός ή δυνατός είναι κάποιος, είναι μια πληροφορία που υπονοείται ή επεξηγείται στη ροή της ομιλίας.

I1.

¹³ Όπως στις παρατακτικές παρομοιώσεις (Κακριδής 1991).

¹⁴ Βλ. Βελούδης (2010: 392-97) για τον «αστορικό γρίφο της σημασίας *όμοιος*» και τη λ. *ίσως* που «αρχικά δήλωνε ομοιότητα».

¹⁵ Για τις «συσχετιστικές, εξισωτικές χρήσεις» βλ. Νάκας 2010 και NEΛ (το μοναδικό μέχρι στιγμής νεοελληνικό λεξικό που αναφέρει τη σύγκριση, μαζί με παραδείγματα, στον ορισμό του *σαν*).

Ο θάλαμος βρισκόταν στο τέλος του διαδρόμου κι ήταν μεγάλος σαν εκείνους στο στρατό. (ΕΘΕΓ, Λογοτεχνία)

Σίγουρα θα φοβόντουσαν τους δυο άντρες που ήταν μαζί της, γιατί και ο Λουδοβίκο ήταν ψηλός και δυνατός σαν τον Αμπρόσιο. (ΕΘΕΓ, Λογοτεχνία)

Ι2.

[(Αυτή)/(Τι)] η μεσαία είναι? η

Μί[να °μεγαλύτερη είναι?]

[Η Τασούλα είναι σαν ε]μάς περίπου.

(.)

Ένα χρόνο μικρότερη? [CΠΛ]

- 2) Ο *σαν* συσχετίζει έναν γενικό ή ασαφή όρο με μια συγκεκριμένη οντότητα του ίδιου σημασιολογικού πεδίου. Και πάλι ο ομιλητής δεσμεύεται ως προς την αλήθεια των λεγομένων του, ωστόσο η σύγκριση εξειδικεύει τις έννοιες από το γενικό στο ειδικό, προβάλλοντας το εξέχον παράδειγμα μιας κατηγορίας, συνήθως ένα κύριο όνομα. Έτσι συγκεκριμενοποιούνται οι πρώτοι όροι και «στενεύουν» σημασιολογικά (II). Συχνά απαντώνται και αντωνυμικά στοιχεία που συνδέονται έτσι με έννοιες απτές: ο δεύτερος όρος δηλώνει ρητά το πρότυπο της σύγκρισης (IIIα). Ψυχικές καταστάσεις, συναισθήματα που ο ομιλητής δυσκολεύεται να περιγράψει συγκεκριμενοποιούνται (IIIβ). Ο *σαν* ενίοτε συνοδεύει απευθείας σε ευθύ λόγο την ομιλούσα σκέψη του συνομιλητή ή και μη λεκτικά στοιχεία της έκφρασης του προσώπου του, χειρονομίες κ.ά., όπως τα ερμηνεύει ο ομιλητής ή προσπαθεί να τα ανακαλέσει στην πρωτοτυπική, παραδειγματική τους μορφή (IIIγ)¹⁶.

II.

φιλόσοφοι σαν τον Τζιορντάνο Μπρούνο· επιστήμονες σαν τον Γαλιλαίο. (ΣΕΚ, Γρ. λόγος, Άρθρο γνώμης)

Ποτέ δεν δίνει κανείς νομική μάχη εναντίον ενός γραφειοκρατικού μηχανισμού σαν την Κομισιόν. (ΕΘΕΓ, Εφημ. Γνώμη)

IIIα.

Στη χώρα της είναι κάτι σαν «ροκ σταρ». (ΕΘΕΓ, Εφημ. Γνώμη)

IIIβ.

Με κοίταζε μόνο βουβά και κάτι σαν ντροπή σκίαζε τα μάτια του. (ΕΘΕΓ, Λογοτεχνία)

IIIγ.

Τι μήνυμα μετέφερε η σύζυγός σας, εκείνη τη Μ. Παρασκευή;

Χαμογελάει.

Κάτι σαν «πού να θυμάμαι τώρα;» (ΕΘΕΓ, Εφημ. Συζήτηση)

- 3) Τα παραδείγματα (IIIα-γ) προσδίδουν τροπική χροιά στα εκφωνήματα, ότι δηλαδή, σύμφωνα με τη γνώμη του ομιλητή *κάτι είναι σχεδόν κάτι άλλο*, χωρίς να ταυτίζεται απόλυτα με αυτό (βλ. 1.1). Επομένως, τόσο η ιδιότητα του δείκτη να δημιουργεί χαλαρές συνδέσεις ανάμεσα στις έννοιες όσο και οι μετριαστικές του χρήσεις (βλ. 2.1.4) προκύπτουν από την πρωτοτυπική συγκριτική του σημασία.

2.2.2 Μη κυριολεκτική ομοιότητα

Η παρομοίωση κινείται επιστημικά στο *μη πραγματικό*¹⁷. Ως σχήμα λόγου συγκρίνει με τρόπο πρωτότυπο και αποκαλυπτικό δύο τομείς της εμπειρίας που διαφέρουν αισθητά μεταξύ τους, προκειμένου να προβληθούν ομοιότητες που δεν είχαν γίνει αντιληπτές. Ο δείκτης *σαν*, όταν συγκρίνει δύο ετερογενείς οντότητες τονίζει *ακραία* τους χαρακτηριστικά. Ο δεύτερος όρος σύγκρισης αποτελεί το πρωτοτυπικό παράδειγμα μιας κατηγορίας, κατέχοντας μια ιδιότητα σε *υπερθετικό βαθμό* (Israel, Harding & Tobin 2004). Η σύγκρισή του με τον πρώτο όρο έχει περιγραφική και γνήσια ρητορική δύναμη, εκφράζει υπερβολές, έντονες αντιθέσεις, συναισθήματα (IV). Στις δομές αυτές συχνά εμφανίζονται παράμετροι σύγκρισης, κυρίως ποιοτικοί προσδιορισμοί ή χρωματικοί όροι (V). Συχνές είναι οι συγκρίσεις ανθρώπων με είδη του ζωικού βασιλείου ή γενικότερα τη φύση (VI). Συχνά οι παρομοιαστικές δομές αποδίδουν γενικευτική ισχύ στα λεγόμενα και χρησιμεύουν ως στρατηγική των

¹⁶ Για παρόμοια λειτουργία του *like* της Αγγλικής, βλ. Vandelanotte & Davidse (2009), Fleischman & Yaguello (2004), Andersen (2001), Romaine & Lange (1991).

¹⁷ Δεν θα αναφερθώ στην πάντα επίκαιρη, από την εποχή του Αριστοτέλη, διάκριση μεταφοράς/παρομοίωσης (Carston 2010, Glucksberg & Haught 2006, Moder 2010, O' Donoghue 2009).

ομιλητών για την εισαγωγή ενός νέου θέματος, με την απαραίτητη επεξήγηση, όταν δεν είναι εύκολο να διαπιστωθεί η ομοιότητα (VII).

IV.

Ο ήλιος έμοιαζε **σαν ένα πορτοκαλί μπαλόνι**, που κρεμόταν πάνω απ' την έρημο. (ΕΘΕΓ, Λογοτεχνία)

Σκολνάω καμιά φορά, τρέχω **σαν τρελός** στο κατάστημα που δουλεύει, κάνω πως ψωνίζω... (ΕΘΕΓ, Λογοτεχνία)

...του φέρθηκε **σαν μεγάλος αδελφός και δάσκαλος** συνάμα... (ΕΘΕΓ, Εφημ. Γνώμη)

V.

Ετών τριάντα πέντε και ωραίος **σαν θεός!** (ΕΘΕΓ, Λογοτεχνία)

Ο Γιάγκος με σκυφτό κεφάλι, κίτρινος **σαν το φλουρί**, τον άκουγε αμίλητος. (ΕΘΕΓ, Λογοτεχνία)

VI.

Ως τότε οι επιβάτες θα ταξιδεύουν την περίοδο των διακοπών στοιβαγμένοι **σαν σαρδέλες** στο κατάστρωμα. (ΣΕΚ, Γρ. λόγος, Άρθρο γνώμης)

Πρέπει να τρέχει **σαν τον άνεμο!** (ΕΘΕΓ, Λογοτεχνία)

Ένας φωτογράφος μπορεί να κάνει τους ναζί να φαίνονται **σαν άγγελοι**. (ΕΘΕΓ, Εφημ. Συζήτηση)

VII.

Οι σκηνοθέτες είναι **σαν τα καρπούζια**. Τα βλέπεις και είναι πολύ ωραία. Κι όταν τα ανοίγεις είναι κολοκύθια. (ΕΘΕΓ, Εφημ. Συζήτηση)

Οι κυριολεκτικές ομοιότητες διαφοροποιούνται, λοιπόν, από τις μη κυριολεκτικές ως προς τις οντότητες που συγκρίνονται και το αποτέλεσμα της σύγκρισης. Αυτό που τροποποιείται είναι το σημασιολογικό περιεχόμενο του 1^{ου} όρου (διά μέσου του 2^{ου}). Στις κυριολεκτικές ομοιότητες τα όριά του στενεύουν, εξειδικεύεται ή κατηγοριοποιείται στο τυπικό του παράδειγμα, στις μη κυριολεκτικές τα όριά του πλαταίνουν, εφόσον συνδέεται με το τυπικό παράδειγμα μιας νέας κατηγορίας εννοιών, με την οποία διαφέρει εντελώς ή γειτνιάζει σημασιολογικά. Στη δεύτερη περίπτωση, όμως, το συγκρινόμενο αποκτά νέα χαρακτηριστικά με ακραίες συνυποδηλώσεις που η σύγκριση αναδεικνύει με παραστατικό τρόπο¹⁸.

2.2.3 Από την ΟΜΟΙΟΤΗΤΑ στην ΤΑΥΤΟΤΗΤΑ

Όπως προέκυψε από την επεξεργασία των δεδομένων, ο δείκτης *σαν* συνοδεύει ολοένα και περισσότερο τη δήλωση πραγματικών ιδιοτήτων και ταυτοτήτων, κάτι που ουσιαστικά συνιστά *σημασιολογική επέκταση* από το πεδίο της ΟΜΟΙΟΤΗΤΑΣ στη γλωσσική έκφραση της ΤΑΥΤΟΤΗΤΑΣ¹⁹:

- 1) Σε άμεση αντιστοιχία με τη λειτουργία του σε (δια)προτασιακό επίπεδο (βλ. 2.1.3) εμπλέκεται σε δομές αιτιολογίας και προβάλλει πραγματικές ιδιότητες, *γνωστές* στον ομιλητή και στον ακροατή, *εξαιτίας* των οποίων ισχύει το νόημα ολόκληρης της πρότασης. Οι συντάξεις αυτές συχνά προτάσσονται. Η έμφαση δίνεται πλέον στην αιτιολόγηση μιας στάσης, ενός συναισθήματος, μιας γνώμης (VIII).

VIII.

Σαν καλός καπετάνιος, πήρε πάνω του όλες τις ευθύνες. (ΕΘΕΓ, Εφημ. Ενημέρωση)

Σαν απλός πολίτης, σαν δικηγόρος με είκοσι πέντε χρόνια στο χώρο της δικαιοσύνης, αλλά πάνω από όλα **σαν μητέρα** που βρίσκομαι εδώ εκπρόσωπος στο ελληνικό Κοινοβούλιο, δεν μου επιτρέπεται να μη συμμετάσχω στη συζήτηση αυτή. (ΕΘΕΓ, Βουλή των Ελλήνων)

- 2) Εμφανίζεται σε συμφραζόμενα που προβάλλουν πραγματικές ιδιότητες, χώρος που παραδοσιακά είχε καλυφθεί από τον αρχαιότερο δείκτη *ως*. Έτσι ο 1^{ος} όρος συγκρίνεται με ολόκληρη την κατηγορία εννοιών που αντιπροσωπεύει και *κατηγοριοποιείται* ως αντιπροσωπευτικό τους παράδειγμα (πχ. ο τάδε είναι τυπικός γλύπτης κ.λπ.). Έτσι ο τρόπος εκλαμβάνεται πλέον ως ιδιότητα, ρόλος, λειτουργία (IX) και προσδιορίζει κατηγορικά πλείστα ρήματα, συνδετικά και μη (X). Δεν είναι ίσως τυχαίο που τα περισσότερα παραδείγματα αναφέρονται σε κοινωνικούς ρόλους, επαγγέλματα και «ετικέτες» που οι άνθρωποι συνηθίζουν να αποδίδουν ο ένας στον άλλο.

IX.

¹⁸ Πιθανό αποτέλεσμα μιας διαδικασίας υποκειμενικοποίησης (Traugott 1995).

¹⁹ Σύμφωνα με το σχήμα: X μοιάζει με Ψ, ως προς Z => X είναι ένα με το Ψ, ως προς Z. Αν κάτι μοιάζει με κάτι άλλο, μπορεί να γίνει άλλο.

Εγώ προχωρούσα μεν **σαν** γλύπτης, αλλά είχα μείνει πίσω **σαν** άνθρωπος. (ΕΘΕΓ, Εφημ. Συζήτηση)
Από το 1975 ασχολείται με τη Δημοσιογραφία (**σαν** ανταποκριτής εφημερίδων). (ΣΕΚ, Γρ. λόγος, Ενημερωτικά)

τώρα, να σου πω **σαν**

οδηγός? να σου πω **σαν** ιδιοκτήτης? θα σου πω τι γίνεται.= (CΠΛ)

Εδώ τελικά που φτάσαμε, και μιλώ **όχι** **σαν** ειδικός -εξάλλου δεν είμαι ειδικός- αλλά **σαν** ένας απλός καταναλωτής, θα μπορούσαμε να πούμε ότι δεν είμαστε σίγουροι ποτέ 100% για την ασφάλεια ενός τροφίμου. (ΕΘΕΓ, Βουλή των Ελλήνων)

X.

Μοιάζουμε **σαν** λαοί και παρά τις αντιξοότητες μπορούμε ειρηνικά να συνυπάρξουμε... (ΕΘΕΓ, Εφημ. Ενημέρωση)

Ήταν η πρώτη μου επιτυχία, ο ρόλος που σημάδεψε τη ζωή μου. Ύστερα απ' αυτόν όλος ο κόσμος με αναγνώρισε **σαν** τραγική ηθοποιό. (ΕΘΕΓ, Εφημ. Συζήτηση)

Επί Τουρκοκρατίας χρησίμευε **σαν** καταφύγιο. (ΕΘΕΓ, Βιβλίο, Ενημέρωση)

Θεωρούμε τα 1, 2 απότοκα της ικανότητας του *σαν* να διενεργεί συγκρίσεις, εφόσον ο 1^{ος} όρος κατηγοριοποιείται πάντα ως προς κάτι, *υπό το μέτρο*, την οπτική γωνία του ομιλητή²⁰.

- 3) Το πέρασμα από τις κλίμακες ομοιότητας στην ταυτότητα σημασιολογικά σηματοδοτεί μιαν αφαίρεση, δηλαδή κίνηση προς το αφηρημένο, όπως θα μπορούσε να ερμηνευθεί στο πλαίσιο της Γλωσσικής Αλλαγής. Οι Haspelmath & Buchholz (1998) επιβεβαιώνουν παρόμοιες εξελίξεις στις περισσότερες από τις γλώσσες που ονομάζουν 'Standard Average European': οι δείκτες που μαρκάρουν τις συγκριτικές προτάσεις εμπλέκονται και στην έκφραση πραγματικών ιδιοτήτων ('role phrases', σελ. 322). Για την Ελληνική, ο *σαν* κατατάσσεται στους συγκριτικούς δείκτες μαζί με τον *όπως*, αλλά και στους δείκτες ρόλων, μαζί με τον *ως* (σελ. 328).
- 4) Στηριζόμενοι στα διαγλωσσικά δεδομένα και στη συμπεριφορά του *σαν* να πραγματοποιεί συγκρίσεις εξακτινώνοντας τις ομοιότητες σε ένα συνεχές τρόπων και βαθμών, η κίνηση προς την απόδοση πραγματικών ιδιοτήτων αποτελεί σημασιολογική ζύμωση αναμενόμενη²¹. Ισχυρή (κειμενικά και γνωσιακά) είναι και η επίδραση των δομών αιτιολογίας (causality) στο σημασιολογικό προφίλ του δείκτη. Άλλωστε, ο *ως* είναι ο αρχαιότερος δείκτης ομοιότητας, έχει διανύσει ολόκληρο το μονοπάτι της αλλαγής από την ΟΜΟΙΟΤΗΤΑ στην ΤΑΥΤΟΤΗΤΑ και με παρόμοιο τρόπο κινείται ο *σαν*, είμαστε, ουσιαστικά, εν μέσω αλλαγής. Έτσι, ίσως, μπορεί να δικαιολογηθεί το «γλωσσολογικό κονταροχτύπημα» ως προς τη σχέση του *σαν* και του *ως*, τη σύγχυση και την ασάφεια που δημιουργεί στους ομιλητές, κυρίως στους προσεκτικούς, η ύπαρξη του *σαν*, προκειμένου για πραγματικές ιδιότητες²². Μέσα από αυτή την οπτική θα μπορούσε να εξεταστεί κατά πόσον η ίδια ασάφεια στη σημασία του *ως* επέτρεψε τη σύνδεσή του με άλλα γλωσσικά στοιχεία (*καθώς, ωσάν, ώστε*).
- 5) Ασφαλώς ο *ως* και ο *σαν* διαφέρουν ως προς το βαθμό λογιότητάς τους στην Κοινή Νέα Ελληνική, στο αν έλκουν δομές λόγιες ή δημοδέστερες, όπως απέδειξε ο Νάκας (2010). Ωστόσο, κατά τη γνώμη μας το θέμα υπερβαίνει τη διάκριση λόγιο/λαϊκό. Σε γλωσσικό υλικό που παραθέτει η Τζαμάλη (1999), αρχαιότερες παρομοιαστικές χρήσεις του *ως* επιβιώνουν στις Νεοελληνικές Διαλέκτους. Ίσως, η ουσιαστική διαφορά ανάμεσα στο *ως* και στο *σαν* να είναι θέμα διαχρονικού σταδίου: ο *ως* βρίσκεται σε πιο προωθημένο στάδιο μεταβολής. Το θέμα απαιτεί πληρέστερη εξέταση που υπερβαίνει τα όρια της παρούσας μελέτης.

2.2.4 Μετριαστικές χρήσεις

XI.

Και μετά κοκκίνισε, μικρές φλέβες φάνηκαν στις άκρες της μύτης, μου φάνηκε **σαν** δακρυσμένη κι αυτό με καταπίεσε όσο τίποτα. (ΕΘΕΓ, Λογοτεχνία)

²⁰ Πρόκειται για «δήλωση αιτιολογίας, αναφοράς/οπτικής γωνίας ή κάποιας μεικτής σημασίας» (Νάκας 2010).

²¹ Οι Halliday & Hasan (1976: 77-80) συνδέουν τις γενικές συγκρίσεις ('general comparisons') με την ευρύτερη έννοια της ομοιότητας ('likeness'), η οποία επιμερίζεται σε ολική, μερική ομοιότητα και αν-ομοιότητα ('identity, similarity, difference').

²² Παρόμοιες «ερμηνευτικές συγχύσεις» επισημαίνουν σύγχρονοι μελετητές της Αρχαίας Ελληνικής Λογοτεχνίας για το επίθετο *όμοιος* (Nagy 2010: 153-54), προκειμένου για την απόδοση ομοιότητας ή ταυτότητας στα ησιόδεια και στα ομηρικά έπη.

Στο (XI) ο ομιλητής ούτε απορρίπτει ούτε επιβεβαιώνει τα δεδομένα των αισθήσεων, τα οποία αποτελούν την πρώτη ύλη για τις εικασίες του. Εδώ ο δείκτης συνοδεύει δομές κατηγορήσεως σε ρήματα που καταρχήν λεξικοποιούν την αντίληψη διά των αισθήσεων (*φαίνομαι, μοιάζω, βλέπω, φαντάζω, παρουσιάζομαι*)²³.

2.2.5 Συμπερασματικά

Ο δείκτης *σαν*, όταν *συσχετίζει οντότητες*, κατευθύνει την κατασκευή του νοήματος ως εξής: τοποθετεί τους συγκρινόμενους όρους σε κλίμακες, από το όμοιο στο ανόμοιο, με ενδιάμεσο σταθμό την εικασία:

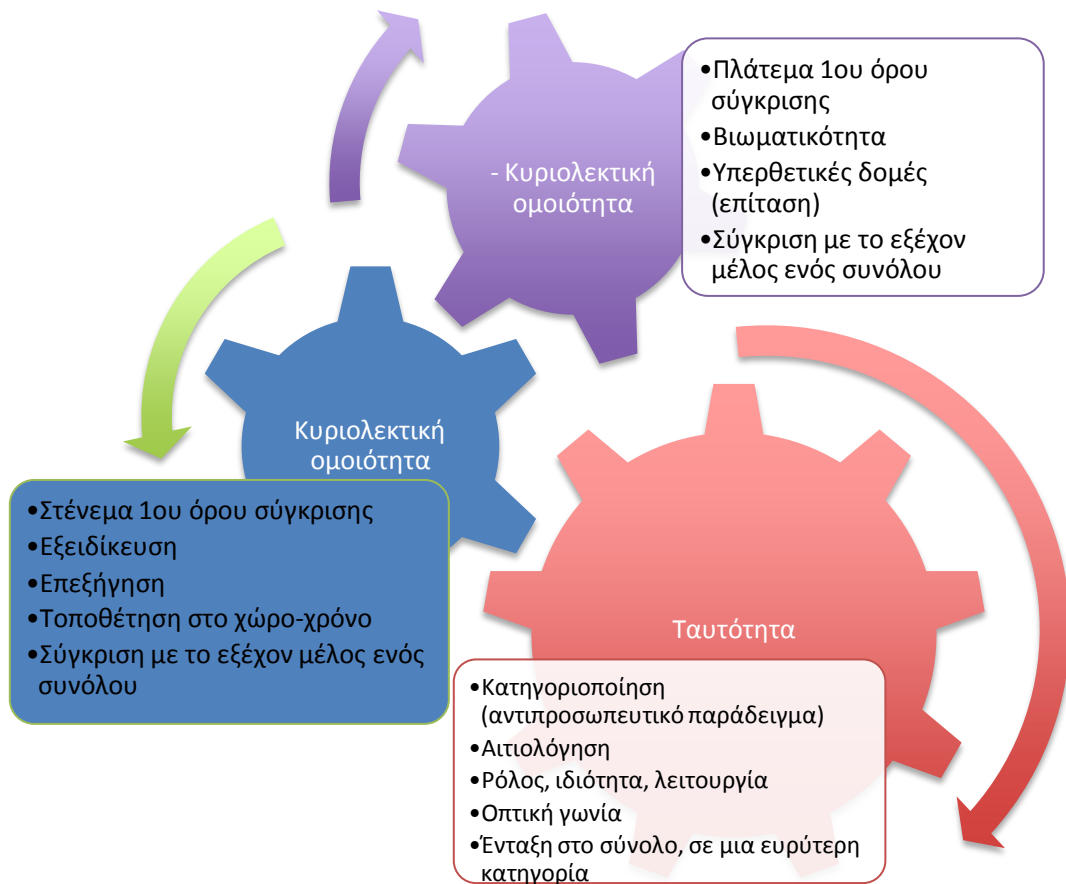

Εικόνα 3 *Σαν* + οντότητες και η επιστημική στάση του ομιλητή

Στις κλίμακες αυτές ο ομιλητής «ζυγίζει» τις λέξεις, εξειδικεύει τη σημασία τους με αναγωγή στο εξέχον παράδειγμα μιας κατηγορίας ή την εξακτινώνει, επεκτείνει τις λέξεις αυτές στα άκρα, διευρύνει τις κατηγορίες, δημιουργώντας υπερθετικές δομές με ακραίες συνυποδηλώσεις. Η απόδοση πραγματικής ιδιότητας αποτελεί σημασιολογικό παρακλάδι της επιτυχημένης του καριέρας στο χώρο της ομοιότητας²⁴. Σχηματικά:

²³ Οι δομές κατηγορήσεως απαιτούν ειδική ανάλυση και μάλιστα ποσοτική, σε συνεξέταση με την εναλλαγή των *ως/σαν* ανά κειμενικό είδος. Όπως επισημαίνει ο Νάκας (2010), στα σώματα κειμένων δημοσιογραφικού λόγου το *ως* υπερτερεί στις δομές που αποτελούν συμπλήρωμα ειδικών ρημάτων ή δηλώνουν ιδιότητα/οπτική γωνία.

²⁴ Η λεξικοποίηση της ομοιότητας φαίνεται να διατρέχει και τα επίπεδα της παραγωγής και της σύνθεσης: σημασιολογικές σχέσεις ομοιότητας/ταυτότητας ενεργοποιούνται και σε παρατακτικές φραστικές κατασκευές (όπως *ταξίδι-κεραυνός, φιλόλογος-γλωσσολόγος*, βλ. Νάκας & Γαβριηλίδου 2005).

Εικόνα 4 Συγκρίσεις ομοιότητας και 1^{ος} όρος σύγκρισης

3. Επίλογος

Υποστηρίχθηκε ότι η παρουσία του δείκτη *σαν* στην Ελληνική πυροδοτεί ένα συνεχές συγκρίσεων ομοιότητας ανάμεσα σε οντότητες, γεγονότα, καταστάσεις, ενέργειες, διαδικασίες. Η ομοιότητα διαπλέκει τα συγκρινόμενα στοιχεία, έτσι ώστε το δεύτερο να επηρεάζει την κατανόηση του πρώτου. Τα δεδομένα της έρευνας επιβεβαιώνουν τη συστηματικότητα με την οποία γίνεται αυτό. Επισημάναμε το σημαίνοντα ρόλο της υποκειμενικότητας (ο ομιλητής εκτιμά τα πράγματα από το προσωπικό του πεδίο θέασης), στηριζόμενοι μεθοδολογικά στην επιστημική στάση του ομιλητή και στις διαβαθμίσεις της (Εικ. 1, 2, 3). Τα σώματα κειμένων μάς επέτρεψαν να διατυπώσουμε υποθέσεις για τη λειτουργία του μηχανισμού των συσχετισμών (Εικ. 4). Αναγνωρίσαμε ότι τέτοιου είδους δομές ουσιαστικά υπερβαίνουν την ίδια τη σύγκριση, μια και είναι πλούσιες σε ρητορική δύναμη, εκφραστικότητα και συνδέονται με τις έννοιες της επίτασης και του μετριασμού (βλ. 2.1.4, 2.2.1, 2.2.2, 2.2.4). Τελικά οι συγκρίσεις ομοιότητας είναι βαθιά ριζωμένες στον κόσμο τον πραγματικό, τον οποίο συγκρίνουν αναλογικά με μια άλλη πραγματικότητα, πιο φανταχτερή στα μάτια του ομιλητή. Έτσι οι δύο κόσμοι συνυπάρχουν, όπως στις ομηρικές παρομοιώσεις. Ο ένας αποτελεί σχόλιο, *μετακείμενο* του άλλου. Το αποτέλεσμα της σύγκρισης είναι, ασφαλώς, θέμα άποψης.

ABSTRACT

The aim of this paper is to study the use of Greek as a foreign language by the French speaking learners on the basis of evidences from a Learner Corpus. This study will be focused on the sentence structure and the word order. Greek, in contrast to French, is a relatively flexible language with respect to word order. Syntactic relations among clausal elements can be identified thanks to the rich nominal inflection. On the other hand, French is not as flexible, and clausal elements are placed in fixed positions. Our study concerns written texts of learners of four different levels.

Keywords: Learner Corpus of Modern Greek, Greek as a foreign language, French-speaking learners, word order in Greek

1. Εισαγωγή

Η έρευνα που παρουσιάζεται στο άρθρο αυτό μελετά την κατάκτηση της ελληνικής ως ξένης γλώσσας από τους γαλλόφωνους διδασκόμενους, όπως αυτή διαφαίνεται μέσα από την ανάλυση του γραπτού και προφορικού λόγου τους. Για τις ανάγκες της παρούσας εργασίας, θα περιοριστούμε στη μελέτη της σειράς των κύριων όρων της πρότασης στο γραπτό λόγο.

Η σειρά των κύριων όρων της πρότασης αποτελεί ένα ιδιαίτερα, κατά τη γνώμη μας, ενδιαφέρον συντακτικό ζήτημα το οποίο ελάχιστα έχει μελετηθεί αναφορικά με τη διδασκαλία και εκμάθηση της ελληνικής ως ξένης γλώσσας. Χαρακτηριστικά αναφέρουμε το άρθρο της Κατσιμαλή (1996:121) όπου υπογραμμίζεται ότι η σειρά των όρων στα Νέα Ελληνικά «αποκτά ιδιαίτερο ενδιαφέρον για τη διδασκαλία της Νέας Ελληνικής σε αλλοδαπούς για τρεις λόγους: κατ'αρχήν οι ευρωπαϊκές γλώσσες δεν παρουσιάζουν ανάλογη ευελιξία των όρων και ίσως η συγκριτική ανάλυση της μητρικής και της ξένης (ελληνικής) γλώσσας δημιουργεί σύγχυση στο μαθητή. Εξάλλου είναι επιθυμητό και εφικτό να πλουτίσει ο μαθητής τις εκφραστικές του δυνατότητες και να μυηθεί σε κάποιο βαθμό στις σημασιολογικές αποχρώσεις που υπονοούν. Τέλος πρέπει να προστατευθεί από τη λανθασμένη υπεργενίκευση ότι όλες ανεξαιρέτως οι σειρές είναι επιτρεπτές στη Νέα Ελληνική»¹.

Η μελέτη μας θα βασιστεί σε ένα σώμα προφορικού και γραπτού λόγου από τις εξετάσεις πιστοποίησης της ελληνομάθειας του Κέντρου Ελληνικής Γλώσσας. Για τις ανάγκες της παρούσας ανακοίνωσης θα λάβουμε υπόψη μας τα γραπτά από τα τέσσερα προτεινόμενα επίπεδα, α', β', γ' και δ', χωρίς ωστόσο να επιθυμούμε τη διατύπωση υποθέσεων σχετικά με την εξέλιξη της εκμάθησης και κατάκτησης της γλώσσας, σε αυτό τουλάχιστον το στάδιο της έρευνάς μας. Αυτό που κατά βάσει μας ενδιαφέρει είναι η διδακτική εφαρμογή των παρατηρήσεών μας και η θεωρητικοποίηση των συμπερασμάτων μας με στόχο τη *συγκειμενοποίηση* (*contextualisation*) της διδασκαλίας και του Κοινού Ευρωπαϊκού Πλαισίου (εφεξής ΚΕΠ). Με τον όρο *συγκειμενοποίηση* (Valetopoulos et Marquilló Larruy, 2008, βλ. επίσης ΚΕΠ², § 4.1. Το περιεχόμενο της χρήσης της γλώσσας) αναφερόμαστε σε μια ιδιαίτερη προσέγγιση του ΚΕΠ που έχει ως στόχο τη μελέτη των ιδιομορφιών

¹ Για την αξιολόγηση της γλωσσικής ικανότητας και της γλωσσικής εξέλιξης του προφορικού λόγου αλλόγλωσσων μαθητών στη δευτεροβάθμια εκπαίδευση στην Ελλάδα, βλέπε Βαρλοκώστα και Τριανταφυλλίδου (2003).

² Το ΚΕΠ διατίθεται δωρεάν στην ιστοσελίδα http://www.pi-schools.gr/lessons/english/pdf/cef_gr.pdf. Για τα επίπεδα ελληνομάθειας, βλέπε επίσης <http://www.greeklanguage.gr/certification/node/94/>.

του διδασκόμενου κοινού και τη βελτίωση του διδασκόμενου υλικού που θα προσαρμοστεί στη γλωσσική και πολιτισμική πραγματικότητα του διδασκόμενου.

Προκειμένου να επιτευχθεί αυτό, οφείλουμε να μελετήσουμε τόσο τις δυσκολίες του εν λόγω κοινού όσο και τις γλωσσικές ή πολιτισμικές ζώνες που θα επιτρέψουν την ευκολότερη πρόσβαση στην εκμάθηση της ξένης γλώσσας, λόγω γλωσσικής συγγένειας ή γλωσσικής προσέγγισης. Εξάλλου, μέσα στο πλαίσιο αυτό της διδασκαλίας, αυτό που μας ενδιαφέρει δεν είναι μόνο τι μπορούν να πουν οι διδασκόμενοι αλλά και αυτό που θα μπορούσαν να πουν, αλλά δεν το λένε λόγω γλωσσικής αβεβαιότητας.

Βέβαια, θα πρέπει να υπενθυμίσουμε ότι τα σώματα κειμένων μπορούν να μας προσφέρουν ένα μόνο μέρος από όλες αυτές τις πληροφορίες για ποικίλους λόγους. Θα επανέλθουμε στα χαρακτηριστικά των σωμάτων κειμένων στα συμπεράσματα του άρθρου (βλέπε επίσης Valetopoulos, 2010).

2. Η σειρά των όρων στη νέα ελληνική και τη γαλλική

Στο κεφάλαιο αυτό προτείνουμε μια σύντομη παρουσίαση της σειράς των όρων στη νέα ελληνική και τη γαλλική. Πρέπει να σημειωθεί ότι οι ερευνητές των δύο γλωσσών επικεντρώνουν την προσοχή τους σε διαφορετικά ζητήματα. Οι μελετητές της ελληνικής μελετούν κατά κύριο λόγο τη σειρά των όρων και τη βασική δομή της πρότασης ενώ οι μελετητές της γαλλικής προσεγγίζουν το ζήτημα των ομοιοτήτων και των διαφορών μεταξύ του προφορικού και του γραπτού λόγου.

2.1 Η σειρά των όρων στη νέα ελληνική

Σύμφωνα με τις γραμματικές της νέας ελληνικής (βλ. μεταξύ άλλων Holton et al., 1999, βλ. επίσης Philippaki-Warbuton, 1985, 1987, Tsimpli, 1990, 1995, Goutsos, 1994, για μια συζήτηση των διαφορετικών θεωρητικών προσεγγίσεων, Alexiadou, 1999), η δομή της πρότασης στα ελληνικά είναι σχετικά ελεύθερη με δυνατότητα μετακίνησης των διαφόρων συστατικών. Βέβαια, η κάθε σειρά μπορεί να είναι κατάλληλη για ορισμένα κειμενικά περιβάλλοντα. Πέραν αυτού, συγκεκριμένοι παράγοντες μπορούν να επηρεάσουν τη σειρά των όρων, όπως για παράδειγμα ποιο είναι το συστατικό που παρουσιάζεται ως *θέμα* ή ως *εστία*.

Οι προτάσεις που παρουσιάζονται ως νέα πληροφορία με ουδέτερο επιτονισμό μπορούν να έχουν είτε τη σειρά ΡΥ(Α) είτε ΥΡΑ. Έτσι, η σειρά ΡΥ(Α) αφορά τα αμετάβατα ρήματα ή τα μεταβατικά ρήματα που βρίσκονται σε δομή που εκφράζει μια απρόβλεπτη, νέα πληροφορία. Για παράδειγμα,

1. *Κυκλοφορούν φωτοτυπίες με λανθασμένες απαντήσεις!*

2. *Χτύπησε το τηλέφωνο και τάραξε τις σκέψεις της.*

Η σειρά ΥΡΑ εμφανίζεται πιο συχνά όταν η πρόταση είναι μεταβατική και το υποκείμενο είναι γνωστό και έμψυχο ή αόριστο αλλά γνωστό και ειδικό στους συνομιλητές.

3. *Ορισμένοι πιστεύουν ότι το κάπνισμα τους δίνει κάποιο στυλ.*

Δύο είναι τα συντακτικά φαινόμενα που κατά τη γνώμη μας έχουν ιδιαίτερο ενδιαφέρον στην περίπτωση μας, καθώς επιτρέπουν την τροποποίηση της βασικής συντακτικής δομής προσδίδοντας μια ιδιαίτερη σημασία στην πρόταση, η *εκτόπιση* και η *εστίαση*. Η εκτόπιση είναι μια ιδιαίτερη περίπτωση θεματοποίησης μέσω της οποίας το εκτοπισμένο συστατικό, συντακτικά ή σημασιολογικά συνδεδεμένο με την πρόταση, βρίσκεται στην περιφέρεια της πρότασης και μπορεί να επαναλαμβάνεται με τη βοήθεια κάποιας αντωνυμίας. Σε επίπεδο επιτονισμού, παρατηρείται μια μακρά παύση μεταξύ του εκτοπισμένου στην αρχή της πρότασης στοιχείου και της υπόλοιπης πρότασης, καθώς και βαθιά πτώση του επιτονισμού. Στην περίπτωση που το εκτοπισμένο στοιχείο μετατίθεται στο τέλος της πρότασης, το στοιχείο αποκτά επεξηγηματική λειτουργία.

4. *Η Δάφνη σας μιλάει για χρήματα και λέει τα πράγματα όπως τα σκέφτεται: (τους φτωχούς,) δεν τους συμπαθεί ιδιαίτερα (, τους φτωχούς).*

Η εστίαση μπορεί να εκφραστεί είτε με την παρουσία εμφατικού τόνου είτε με τη μετατόπιση ενός συστατικού στην αρχή της πρότασης διατηρώντας τον εμφατικό τόνο.

5. *Ο Γιάννης έκανε όλη τη δουλειά.*

Προτού κλείσουμε το κεφάλαιο αυτό, θα πρέπει να τονίσουμε ότι η συζήτηση περί σειράς των όρων δεν έχει καταλήξει και υπάρχουν διάφορες προσεγγίσεις και αναλύσεις. Ιδιαίτερο ενδιαφέρον παρουσιάζει βέβαια ο προφορικός λόγος μέσα από πρωτότυπες παραγωγές προφορικού λόγου, ο οποίος δεν έχει ακόμη αναλυθεί ικανοποιητικά.

Με την ένταξη του ΚΕΠ στην καθημερινή ζωή των διδασκόντων και τη χρησιμοποίησή του ως κύρια πηγή για τη συγγραφή εγχειριδίων, γίνεται πλέον λόγος και επισήμως για την ικανότητα των

διδασκόμενων να χρησιμοποιούν, τόσο στο γραπτό όσο και στον προφορικό λόγο, «περικειμενικές, γραμματικές και λεκτικές ενδείξεις για να συμπεράν[ουν] στάσεις, διαθέσεις και προθέσεις και να προβλέψ[ουν] τι πρόκειται να ακολουθήσει» (ΚΕΠ, σελ. 87). Βέβαια, το Κοινό Ευρωπαϊκό Πλαίσιο δεν μπορεί παρά να μας δώσει τις καντευθυντήριες γραμμές, καθώς έγκειται στους διδάσκοντες και τους συγγραφείς να προτείνουν πιο συγκεκριμένα αυτό το οποίο θα πρέπει να διδαχθούν οι διδασκόμενοι ώστε να αναπτύξουν την εν λόγω ικανότητα.

Μια σύντομη έρευνα των εγχειριδίων μπορεί να μας δείξει ότι η ικανότητα αυτή δεν αναπτύσσεται παρά με έμμεσο τρόπο μέσω της κατανόησης και της έκφρασης. Όσον αφορά δε τη σειρά των όρων στην πρόταση, ελάχιστες είναι οι πληροφορίες που μπορούμε να αποκομίσουμε από τα εγχειρίδια. Μήπως διότι πρόκειται για μια ασύνειδη λειτουργία που δύσκολα μπορεί να θεωρητικοποιηθεί από τους διδάσκοντες και τους συγγραφείς των εγχειριδίων; Μήπως διότι η άμεση διδασκαλία αυτού του συντακτικού φαινομένου δεν μπορεί να οδηγήσει στην ανάπτυξη και κατάκτηση της εν λόγω ικανότητας που εξαρτάται και από την ανάπτυξη της πραγματολογικής ικανότητας;

Για το λόγο αυτό, η παρατήρηση των Μπακάκου-Ορφανού & Χειλά-Μαρκοπούλου (1992) μας φαίνεται ιδιαίτερα ενδιαφέρουσα δεδομένου ότι ήδη σε αυτό το άρθρο είχαν υπογραμμίσει ότι «επιλογές του ομιλητή που σχετίζονται με τη στάση του απέναντι στο μήνυμα, στο συνομιλητή του και στο γενικότερο πλαίσιο της εκάστοτε επικοινωνιακής πράξης, επιλογές που σε τελευταία ανάλυση επηρεάζουν καθοριστικά τη σειρά των στοιχείων των γλωσσικών εκφωνημάτων, γενικά δε θίγονται στα εγχειρίδια».

2.2 Η σειρά των όρων στη Γαλλική

Αντίθετα από την ελληνική, η γαλλική είναι, θεωρητικά, πολύ πιο «συντηρητική» και επιβάλλει τη σειρά ΥΡΑ, υποκείμενο-ρήμα-αντικείμενο (βλέπε μεταξύ άλλων Bidaud & Megherbi, 2005 και Muller, 2008). Αυτός ο τύπος δομής προσφέρει συγκεκριμένες δυνατότητες: το ονοματικό σύνολο που βρίσκεται πριν από το κλινόμενο ρήμα είναι το υποκείμενο και κάθε ονοματικό σύνολο μετά το κλινόμενο ρήμα είναι το συμπλήρωμά του. Εξαιρέση αποτελούν τα εργαστικά ρήματα των οποίων τα υποκείμενα διαθέτουν και ορισμένες από τις ιδιότητες του συμπληρώματος.

Οποιαδήποτε μετατόπιση ενός συστατικού, εξαιρουμένων των κλιτικών, μεταξύ του υποκειμένου και του ρήματος είναι αδύνατη (παράδειγμα 6). Η εισαγωγή ενός επιρρηματικού στοιχείου μεταξύ του βοηθητικού και της μετοχής είναι δυνατή (παράδειγμα 7), αλλά αυτή η θέση δεν είναι πιθανή για το προθεσιακό μη επιρρηματικό συμπλήρωμα (παράδειγμα 8).

6. **Paul une soupe a mangé.*

[Πάυλος μια σούπα έχει φάει]

Ο Πάυλος έφαγε μια σούπα.

7. *Paul a toujours travaillé dans la publicité.*

[Πάυλος έχει πάντοτε εργαστεί στη διαφήμιση]

Ο Πάυλος πάντοτε εργαζόταν στο χώρο της διαφήμισης.

8. **Paul a de son patron obtenu une augmentation de son salaire.*

[Πάυλος έχει από το αφεντικό του πετύχει αύξηση του μισθού του]

Ο Πάυλος πέτυχε από το αφεντικό του αύξηση του μισθού του.

Βέβαια, στο μεγαλύτερο μέρος των εργασιών, η συζήτηση για τη γαλλική δεν επικεντρώνεται στο αν η σειρά είναι ΥΡΑ ή κάποια άλλη, αλλά κατά πόσο η σειρά αυτή είναι η ίδια στο γραπτό και τον προφορικό λόγο. Ο Fradin (1990:30, υποσημείωση 19) διαχωρίζει τον προφορικό από το γραπτό λόγο υπογραμμίζοντας ότι οι περιορισμοί του γραπτού λόγου παύουν να ισχύουν στον προφορικό λόγο, κάτι που τον ωθεί να χαρακτηρίσει ως εξαιρετικές περιπτώσεις του προφορικού λόγου κάθε παραβίαση των κανόνων του γραπτού λόγου³.

Πολλές έρευνες έχουν υποστηρίξει, ωστόσο, ότι οι διαφορετικές δομές που συναντώνται στον προφορικό και γραπτό λόγο αποτελούν κυρίως ένα συνεχές που εμπλουτίζει τη γραμματική της γλώσσας. Έτσι, η Blanche-Benveniste υπογραμμίζει (1996:109) ότι οι δομές του προφορικού λόγου διαθέτουν μια μεγαλύτερη ποικιλία από μετατροπές οι οποίες ωστόσο δεν είναι παντελώς άγνωστες στο γραπτό λόγο. Εξάλλου, η ίδια σημειώνει (1996:117) ότι υπάρχει μια συγκεκριμένη σειρά όρων που μπορεί να επηρεάζεται από φαινόμενα φυσικού λόγου και λεκτικών ανταλλαγών.

Όπως και στην περίπτωση της ελληνικής, δύο συντακτικά φαινόμενα είναι ιδιαίτερα ενδιαφέροντα στον προφορικό και το γραπτό λόγο και θα μας απασχολήσουν στη συνέχεια του άρθρου. Το πρώτο

³ Blanche-Benveniste (1996:109) σημειώνει αναφορικά με την παρατήρηση του Fradin : «Il ne sera pas question ici de séparer fondamentalement le français parlé, pour la raison qu'il aurait des tournures exceptionnelles, 'où les interdictions [de l'écrit] ne jouent pas pleinement'».

είναι η εστίαση η οποία γίνεται κατά κύριο λόγο με τη βοήθεια της συγκεκριμένης συντακτικής δομής 'c'est ... QU-' (βλέπε παραδείγματα 9 και 10). Το φαινόμενο αυτό αποτελεί ένα συντακτικό μετασχηματισμό (M. Gross, 1975) που μπορεί να εμφανίζεται τόσο στο γραπτό όσο και στον προφορικό λόγο⁴.

9. *C'est un enfant qui a trouvé l'idée.*

[Είναι ένα παιδί το οποίο βρήκε την ιδέα]

Ένα παιδί είχε την ιδέα αυτή.

10. *Bon, c'est c'est le père qui qui doit travailler.* (Corpus oral)

[Ωραία, είναι είναι ο πατέρας ο οποίος ο οποίος πρέπει να εργαστεί]

Ο πατέρας είναι αυτός που πρέπει να εργαστεί.

Το δεύτερο φαινόμενο είναι αυτό του εκτοπισμού (βλέπε παραδείγματα 11-13) που μπορεί να συνοδεύεται από την επανάληψη με μια αναφορική αντωνυμία (βλέπε παράδειγμα 11). Ο μετασχηματισμός αυτός παρουσιάζει ιδιαίτερο ενδιαφέρον στη γαλλική, τόσο λόγω του μεγάλου αριθμού στοιχείων που μπορούν να εκτοπιστούν (προθεσιακά σύνολα, απαρεμφατικοί τύποι, κλπ.), όσο και λόγω του στοιχείου που επιτρέπει την επανάληψη (δεικτικές αντωνυμίες, κλπ.). Ο εκτοπισμός μπορεί να γίνεται είτε στην αρχή της πρότασης είτε στο τέλος της πρότασης. Το φαινόμενο αυτό συναντάται ιδιαίτερα σπάνια στο γραπτό αλλά ιδιαίτερα συχνά στον προφορικό λόγο.

11. *Ma tante, elle habite à Paris.*

Η θεία μου, μένει στο Παρίσι.

12. *ça elle peut comprendre.* (Blanche-Benveniste, 1996:113)

Αυτό, μπορεί να το καταλάβει.

13. *Ces progrès, Monsieur DM les a indiqués brièvement* (Blanche-Benveniste, 1996:113)

Τις προόδους αυτές, τις έχει ήδη επισημάνει εν συντομία ο κύριος DM.

Στη συνέχεια του άρθρου, θα παρουσιάσουμε παραδείγματα από ένα σώμα κειμένων διδασκόμενων και θα εστιάσουμε την προσοχή μας στη σειρά των όρων και πώς οι επιλογές των διδασκόμενων διαμορφώνονται ενόσω προχωρούν στην εκμάθηση της γλώσσας.

2.3 Ορισμός της πρότασης

Προτού περάσουμε στην ανάλυση του σώματος κειμένων, θεωρούμε απαραίτητες ορισμένες παρατηρήσεις αναφορικά με τον όρο *πρόταση*. Ο ελληνικός όρος αντιστοιχεί σε ποικίλες ενότητες που ανάλογα με τις θεωρήσεις μπορούν να ανταποκρίνονται σε όρους όπως *proposition*, *sentence*, *clause*, για να μην αναφερθούμε παρά στους αγγλικούς όρους.

Η σημασία που αποδίδουμε στην *πρόταση* είναι αυτή ενός συνόλου που αποτελείται από το κατηγορήμα και τα βασικά του συστατικά, δηλαδή τους όρους που είναι υποχρεωτική από τη λεξική δομή του κατηγορήματος. Εξάλλου, όπως διαφαίνεται και από μία σύντομη μελέτη των διδακτικών εγχειριδίων αυτή είναι συνήθως και η διδασκόμενη δομή στους αρχάριους.

3. Υποθέσεις εργασίες και σώμα έρευνας

Η έρευνα βασίζεται στην ποιοτική και ποσοτική⁵ ανάλυση ενός μικρού σώματος κειμένων που περιλαμβάνει γραπτά από την Πιστοποίηση της Ελληνομάθειας που προτείνει το Κέντρο Ελληνικής Γλώσσας. Το γενικό σώμα, μέρος του οποίου αποτελεί το εν λόγω σώμα κειμένων, αποτελείται από 14 γραπτές παραγωγές και 7 προφορικές παραγωγές που κατατάχθηκαν στο πρώτο επίπεδο, 30 γραπτές παραγωγές και 15 προφορικές παραγωγές του δεύτερου επιπέδου, 18 γραπτές παραγωγές και 9 προφορικές του τρίτου επιπέδου και, τέλος, 10 γραπτές παραγωγές και 5 προφορικές παραγωγές προφορικού λόγου. Συνολικά, μελετήθηκαν 12 000 περίπου λέξεις γραπτού λόγου και 350 λεπτά συνομιλίας, εκ των οποίων τα 200 αποτελούσαν λόγο διδασκόμενων. Αποφασίσαμε να μελετήσουμε ένα σώμα κειμένων μικρού μεγέθους, καθώς αποτελεί, κατά πρώτον, μία πιλοτική έρευνα και, κατά δεύτερον, διότι επικεντρώνεται σε ένα συγκεκριμένο γλωσσικά κοινό.

Σύμφωνα με τις παραπάνω παρατηρήσεις αναφορικά με τη δομή της πρότασης στα ελληνικά και τα γαλλικά, θα μελετήσουμε τις ακόλουθες υποθέσεις :

⁴ Βλέπε την ανάλυση των Valetopoulos et Lamprou, υπό δημοσίευση. Στη μελέτη αυτή γίνεται μια προσπάθεια ανάλυσης των δομών 'εγώ είμαι αυτός που' ή 'εγώ είμαι που', μέσα από τη μελέτη μεταφράσεων διδασκόμενων τη γαλλική ως ξένη γλώσσα.

⁵ Να σημειωθεί ότι τα ποσοτικά στατιστικά στοιχεία μας επιτρέπουν απλώς να έχουμε μια συνολική εικόνα του σώματος κειμένων.

- οι γαλλόφωνοι διδασκόμενοι θα προτιμήσουν τη συντακτική δομή ΥΡΑ, κυρίως στο γραπτό λόγο, καθώς αποτελεί την πλέον ουδέτερη για αυτούς δομή·
 - οι γαλλόφωνοι διδασκόμενοι θα χρησιμοποιήσουν δομές που θα γίνονται πιο ευέλικτες όσο θα προχωρούν στα υψηλότερα επίπεδα·
 - παρά την παραγωγή συντακτικά ορθών δομών, ορισμένα περιβάλλοντα θα είναι ακατάλληλα από την άποψη της πληροφοριακής δομής.
- Πρέπει να σημειωθεί ότι αποκλείσαμε τα κείμενα αυτά που προέρχονταν από ομογενείς και επικεντρωθήκαμε στα κείμενα των γαλλόφωνων που δεν είχαν κάποια ιδιαίτερη σχέση με ελληνόφωνους.

4. Ανάλυση δεδομένων

Στο κεφάλαιο αυτό, προτείνουμε μια πρώτη ανάλυση των δεδομένων ανά επίπεδο. Μέσα από συγκεκριμένα παραδείγματα, θα υπογραμμίσουμε τα χαρακτηριστικά των προτάσεων που διαθέτουμε στο πιλοτικό σώμα κειμένων, με στόχο να αναδείξουμε την ανάπτυξη των γραμματικών και συντακτικών γνώσεων των διδασκόμενων.

4.1 Επίπεδο Α

Προτού μελετήσουμε τη δομή των φράσεων, πρέπει να σημειώσουμε ότι το επίπεδο αυτό αντιστοιχεί στο Α2 επίπεδο του *Κοινού Ευρωπαϊκού Πλαισίου*. Σύμφωνα με τους συγγραφείς του (ΚΕΠ, σελ. 34), ο διδασκόμενος μπορεί να «γράφ[ει] σύντομα, απλά μηνύματα και σημειώσεις που σχετίζονται με θέματα άμεσης ανάγκης. Μπορ[εί] να γράψ[ει] μια πολύ απλή προσωπική επιστολή ευχαριστώντας, λ.χ., κάποιον για κάτι.»

Βάσει αυτών, δύο κύριες παρατηρήσεις επιβάλλονται. Πρώτον, τα κείμενα των διδασκόμενων αποτελούνται, όπως είναι αναμενόμενο, από σύντομες προτάσεις με κατά κύριο λόγο δύο συστατικά μέρη, το ρήμα και το συμπλήρωμά του:

14. *Έχω καινούριους φίλους. Τα μαθήματα είναι πολύ καλά και είναι πολύ ωραίο μέρος. Έχω καινούργιο σπίτι. Είναι πολύ ωραίο και πολύ μεγάλο. Ζώω με τον Γ. και τον Π. Η Μ. και η Ι. ζουν δίπλα μας και τρόμαι όλοι μαζί. Το πανεπιστήμιο είναι πολύ μεγάλο.*

15. *Μα, έχασα το πιστοποιητικό μου.*

16. *Δεν έχω πολύ καλούς βαθμούς.*

ενώ οι προτάσεις μπορούν να περιλαμβάνουν επίσης κάποιον τοπικό ή χρονικό προσδιορισμό.

17. *Το μεσημέρι πάω στο κινηματογράφο.*

18. *Μέσα την τσάντα μου ήτανε το πιστοποιητικό μου.*

Οι σύντομες αυτές προτάσεις μπορούν να συνδέονται με τους συνδέσμους *και* ή *αλλά*, ενώ πολύ σπάνια παρατηρούνται δομές με *να* + *ρήμα* ή πιο σύνθετες δομές με αναφορικές προτάσεις.

Η δεύτερη παρατήρηση αφορά το υποκείμενο των προτάσεων· οι περισσότερες προτάσεις έχουν ως υποκείμενο το συγγραφέα του κειμένου. Σε σπάνιες μόνο περιπτώσεις, αναφέρεται το υποκείμενο σε αρχική θέση. Για παράδειγμα,

19. *Αλλά εγώ κάνω γιορτί με τους φίλους μου και τελικά είμαι πεθαμένος την Δευτέρα το πρωί.*

20. *Τα καλλιτεχνικά μαθήματά μου είναι ωρέα και μου αρέσει πολύ.*

Στην πρόταση 19, ο διδασκόμενος έχει ως στόχο να εστιάσει στο υποκείμενο, χρησιμοποιώντας τον αντιθετικό σύνδεσμο *αλλά*. Στην πρόταση 20, παρατηρούμε ένα πολύ συχνό φαινόμενο, όπου οι διδασκόμενοι τοποθετούν την προσωπική αντωνυμία σε θέση υποκειμένου, όταν θέλουν να αλλάξουν το θέμα της περιγραφής. Έτσι, από την πρόταση αυτή και στη συνέχεια, το υποκείμενο θα απουσιάζει και θα εννοείται δεδομένου ότι έχει ήδη παρουσιαστεί στον αναγνώστη.

Τέλος, συχνή είναι η εμφάνιση της δομής Αντωνυμία Ρήμα Υποκείμενο, καθώς οι διδασκόμενοι χρησιμοποιούν τις δομές ‘μου αρέσει’, ‘μου χρειάζεται’, κλπ.

Μπορούμε να πούμε συγκεντρωτικά ότι οι 125 προτάσεις που μελετήθηκαν μπορούν να καταταχθούν ως εξής: 64% των προτάσεων ακολουθούν τη δομή Ρήμα + Συμπλήρωμα, 14,5% διαθέτουν έναν επιρρηματικό προσδιορισμό σε αρχική θέση, όπως *αντίθετα*, *επιπλέον*, κλπ., 14,5% εμφανίζουν το υποκείμενο στην αρχική θέση, και μόλις 7% αντιστοιχούν σε τριτοπρόσωπες δομές με την προσωπική αντωνυμία σε αρχική θέση.

4.2 Επίπεδο Β

Το επίπεδο Β, ήτοι Β1, διακρίνεται από το επίπεδο Α τόσο ως προς τη λεξιλογική ποικιλία που χαρακτηρίζει τα γραπτά όσο και από την πιο πλούσια συντακτική δομή. Σύμφωνα με το ΚΕΠ (σελ. 34), ο διδασκόμενος «[μ]πορ[εί] να γράψ[ει] απλό κείμενο σχετικό με θέματα που [τ]ου είναι γνωστά ή που [τον] ενδιαφέρουν προσωπικά. Μπορ[εί] να γράψ[ει] προσωπικές επιστολές περιγράφοντας εμπειρίες και εντυπώσεις.»

Αν εξετάσουμε τα κείμενα, μπορούμε να διαπιστώσουμε ότι πέρα από τις απλές προτάσεις του τύπου ΥΡΑ, υπάρχει ένας σχετικά μεγάλος αριθμός από δευτερεύουσες προτάσεις οι οποίες εισάγονται κατά κύριο λόγο από τους συνδέσμους *για να, επειδή και ώστε*. Όσον αφορά τη δομή τους, σε ένα σύνολο 300 περίπου προτάσεων, απλών ή και σύνθετων, μπορούμε να παρατηρήσουμε τα ακόλουθα: 51% των προτάσεων ακολουθούν τη δομή Ρήμα + Συμπλήρωμα, 21% εμφανίζουν το υποκείμενο στην αρχική θέση, 11,5% διαθέτουν έναν επιρρηματικό προσδιορισμό σε αρχική θέση και 8,5% αποτελούν σύνθετες προτάσεις με μια δευτερεύουσα επιρρηματική πρόταση. Τέλος μόλις το 7,5% των προτάσεων αντιστοιχούν σε τριτοπρόσωπες δομές με την προσωπική αντωνυμία σε αρχική θέση.

Η πλειοψηφία των προτάσεων, όπως καταδεικνύεται από την καταμέτρηση, αντιστοιχεί στην ακολουθία ΡΑ καθώς οι διδασκόμενοι εξακολουθούν να χρησιμοποιούν ως πρόσωπο αναφοράς το πρώτο πρόσωπο ενικού ή πληθυντικού.

21. *Σε μια στιγμή μπήκαμε σ'ένα πυκνό δάσος, όπου δεν υπήρχε πια μονοπάτι.*

22. *Φόναξα τους φίλους μου με φωνή δυνατή.*

Σταδιακά, οι διδασκόμενοι αρχίζουν να χρησιμοποιούν όλο και περισσότερες να-προτάσεις, κυρίως με τη δομή *θα ήθελα*, ή ότι-προτάσεις με λεκτικά ρήματα.

23. *Θα ήθελα να σας πω ότι εδώ η ζωή είναι δύσκολη για μένα.*

Αυτό όμως που παρουσιάζει ιδιαίτερο ενδιαφέρον είναι καταρχήν η δομή Επίρρ. Προσδ. + (Υ)ΡΑ, καθώς παρουσιάζεται λιγότερο συχνά από ό,τι στο επίπεδο Α. Αυτό βέβαια μπορεί να ερμηνευτεί από το γεγονός ότι οι διδασκόμενοι καταφεύγουν πλέον σε πιο σύνθετες δομές, χρησιμοποιώντας τις δευτερεύουσες προτάσεις ως επιρρηματικό προσδιορισμό. Για παράδειγμα,

24. *Όταν μου έστειλε σε αυτή πολύ, συμφώνησα γιατί ήθελα να δω πως θα είναι.*

25. *Λοιπόν, αν δεν μου αρέσει πολύ να γράφω, σου στέλνω γράμμα, για να σου μαθαίνω μια κακό νέα.*

Να σημειωθεί ότι πολλές παρένθετες προτάσεις αρχίζουν να εμφανίζονται στο λόγο με κύρια λειτουργία να συσχετίζουν μια πρόταση με πληροφορίες που θεωρούνται γνωστές σύμφωνα με τις οδηγίες του άρθρου.

26. *Όπως το ξέρετε αγόρασα ένα σπίτι πέρσι και τώρα είμαι μακριά.*

Συνολικά, παρατηρούμε συνεπώς ότι οι διδασκόμενοι προτείνουν πλέον πιο σύνθετες προτάσεις, ακολουθώντας τη δομή κύρια πρόταση-σύνδεσμος-δευτερεύουσα πρόταση, χωρίς ωστόσο να αλλάζει ιδιαίτερα η θέση των βασικών συστατικών όρων της πρότασης.

4.3 Επίπεδο Γ

Το επίπεδο Γ, που αντιστοιχεί στο επίπεδο Β2, προϋποθέτει ότι ο διδασκόμενος «[μ]πορ[εί] να γράψ[ει] σαφή, λεπτομερή κείμενα για ένα ευρύ φάσμα θεμάτων που έχουν σχέση με τα ενδιαφέροντά [τ]ου. Μπορ[εί] να γράψ[ει] ένα δοκίμιο ή μια αναφορά, παραθέτοντας πληροφορίες ή δίνοντας επιχειρήματα για να στηρίξ[ει] ή να αντικρούσ[ει] μια συγκεκριμένη άποψη. Μπορ[εί] να γράψ[ει] επιστολές τονίζοντας την προσωπική σημασία γεγονότων και εμπειριών.» (ΚΕΠ, σελ. 34). Βέβαια αυτή η γενική, όπως το απαιτεί το ΚΕΠ, φράση δε μας δίνει ιδιαίτερες πληροφορίες σχετικά με το τι μπορεί να κάνει ο διδασκόμενος σε συντακτικό επίπεδο.

Ας εξετάσουμε ορισμένα παραδείγματα από το σώμα των 4500 λέξεων που αντιστοιχούν σε 200 περίπου προτάσεις σύνθετες. Οι απλές προτάσεις είναι σχεδόν ανύπαρκτες μέσα στο σώμα που μελετήθηκε. Τα γραπτά του επιπέδου αυτού χαρακτηρίζονται, όπως είναι αναμενόμενο, από πιο σύνθετες προτάσεις, πλουσιότερες συντακτικά και λεξιλογικά. Ωστόσο, ορισμένα συντακτικά φαινόμενα αρχίζουν πλέον να εμφανίζονται με ιδιαίτερη συχνότητα. Ας εξετάσουμε τις παρακάτω προτάσεις:

27. *Εσύ πρέπει να βοηθείς την κόρη σου να δημιουργήσει μια δική της προσωπικότητα, όχι να μοιάζει με τις φίλες της!*

28. *Σε τέτοια ηλικία το παιδί είναι – και πρέπει να είναι – πάντα με άλλους ενήλικους.*

29. *Αλλωστε στην τάξη της πρέπει να είναι κλειστό το κινητό.*

30. *Πράγματι για όλους εσάς και γι'αυτούς που δεν μπόρεσαν να έρθουν απόψε, το καινούργιο μας γήπεδο θα είναι ανηχτό.*

Στις παραπάνω προτάσεις, οι διδασκόμενοι αλλάζουν τη βασική δομή εκτοπίζοντας στην αρχή της πρότασης άλλα συστατικά: το υποκείμενο της εξαρτημένης να-πρότασης (παράδειγμα 27), έναν (εμπρόθετο) επιρρηματικό προσδιορισμό (παράδειγματα 28-30). Αυτή η ανάγκη έμφασης διαφαίνεται μερικές φορές και από το γλωσσικό υλικό ή τις δομές που χρησιμοποιούνται όπως στα παραδείγματα 31 και 32, όπως ‘είναι ... που’, μεταφράζοντας ή αποδίδοντας εν μέρει τη γαλλική δομή ‘c’est ... qui/que’.

31. *Ένα πράγμα ακόμη που μου φαίνεται πολύ σημαντικό.*

32. *Είναι μεγάλο λάθος που έκανες.*

Πέρα όμως από αυτές τις λίγες δομές που μας επιτρέπουν να διακρίνουμε μια γενικότερη ευελιξία στην πρόταση χωρίς να δομούνται απαραίτητως και αποδεκτές προτάσεις, η συχνότερη δομή παραμένει αυτή που έχουμε μελετήσει μέχρι τώρα, δηλαδή (Y)PA.

4.4 Επίπεδο Δ

Στο επίπεδο Δ, που αντιστοιχεί στο επίπεδο Γ1, ο διδασκόμενος «μπορ[εί] να εκφραστ[εί] με σαφή, καλά δομημένα κείμενα, εκφράζοντας απόψεις αρκετά εκτενώς. Μπορ[εί] να γράψ[ει] επιστολές, δοκίμια ή αναφορές για σύνθετα θέματα, υπογραμμίζοντας τα σημεία που πιστεύ[ει] πως αποτελούν ουσιαστικά ζητήματα. Μπορ[εί] να επιλέξ[ει] ύφος κατάλληλο για τον αναμενόμενο αναγνώστη.» (ΚΕΠ, σελ. 34). Αυτό σημαίνει ότι ο διδασκόμενος χειρίζεται ικανοποιητικά τη γλώσσα και τη δομή της πρότασης, ώστε να είναι ικανός να αλλάζει την πρόταση με διάφορους μετασχηματισμούς.

Οι προτάσεις του σώματος κειμένων που μελετήσαμε ακολουθούν κατά κύριο λόγο τη βασική δομή (Y)PA (παράδειγμα 33):

33. *Σε μισούσα απόλυτα, είχες γίνει το πιο αδιάστικτο άτομο στον πλανήτη. Σε ονειρευόμουν κάθε νύχτα, και ξύπναγα με αυτό το κακό συναίσθημα της λύπης και της μελαγχολίας.*

Εξάλλου, η πλειοψηφία των προτάσεων είναι σύνθετες προτάσεις με ιδιαίτερη προτίμηση για τις αιτιολογικές, χρονικές, τελικές και υποθετικές προτάσεις. Βέβαια, παρατηρούμε παράλληλα ότι οι προτάσεις αυτές εισάγονται πάντοτε με τους ίδιους συνδέσμους, γιατί, διότι, όταν, για να:

34. *Όταν μου ανακοίνωσες την απόφασή σου, πρώτ’απ’όλα το πήρα πολύ ψύχραιμα, γιατί σε είχα στο τηλέφωνο (μα και εσύ, από το τηλέφωνο τα λένε αυτά;), και δεν ήθελα να σου δείξω την στεναχώρια μου.*

Οι διδασκόμενοι καταφεύγουν στη μετατροπή της βασικής δομής σε συγκεκριμένες περιπτώσεις:

α. Στην περίπτωση του εκτοπισμού του επιρρηματικού προσδιορισμού στην αρχή της πρότασης, που πολλές φορές γενικεύεται (παράδειγματα 35-37). Η γενίκευση αυτή οφείλεται είτε στην υπερδιόρθωση είτε στην πιθανή επίδραση της συντακτικής ανάλυσης της γαλλικής, όπως στο παράδειγμα 37, όπου το ουσιαστικό αλήθεια αναλύεται επιρρηματικά:

35. *Βεβαίως ξέρεις πολύ καλά εσύ τι σημαίνει για μια γυναίκα το να δουλεύει και να προσέχει τα παιδιά της.*

36. *Για αυτό το λόγο, Χάρη μου, σου γράφω αυτό το γράμμα : πρέπει να σκεφτείς καλά και να πάρεις μια απόφαση.*

37. *Αλήθεια είναι ότι από πολύ καιρό κάνεις πολλές δραστηριότητες ...*

β. Η δεύτερη περίπτωση στην οποία παρατηρείται μετατροπή της βασικής δομής είναι στην περίπτωση ιδιαίτερου επιτονισμού. Στα παραδείγματα 38 και 39, ο διδασκόμενος επιθυμεί να δώσει έμφαση σε κάτι που έχει ήδη πει συνδέοντάς το με τη συνέχεια του κειμένου. Η αντωνυμία αυτά (παράδειγμα 38) ή αυτές (παράδειγμα 39) αποκτά κατά συνέπεια αναφορική λειτουργία παραπέμποντας σε ό,τι έχει ειπωθεί.

38. *Είναι επίσης αυτά τα κίνητρα της υποψηφιότητας σου, αν δεν κάνω λάθος.*

39. *Ενδιαφέρεσαι ιδιαίτερα στις γυναίκες, διότι είναι αυτές που παθαίνουν την μεγαλύτερη έλλληψη βοήθειας στη ζωή τους.*

Τέλος, θα επιθυμούσαμε να κάνουμε μια γενικότερη παρατήρηση αναφορικά με τον τύπο των κειμένων. Παρατηρούμε ότι πολύ συχνά οι διδασκόμενοι καταφεύγουν σε απλές δομές ή στην παράταξη απλών προτάσεων επιθυμώντας να προσδώσουν στο κείμενό τους φιλικό χαρακτήρα. Αυτό τους οδηγεί στη χρήση προφορικών δομών ή δομών που θα μπορούσαν να χαρακτηριστούν ως προφορικές (παράδειγμα 33).

5. Συμπεράσματα

Τα συμπεράσματα της μελέτης του πιλοτικού αυτού σώματος κειμένων δεν μπορούν να γενικευτούν αλλά ούτε και να θεωρηθούν ως τελικά. Προς το παρόν, προσπαθήσαμε να κάνουμε ορισμένες γενικές παρατηρήσεις που θα μας επιτρέψουν να κάνουμε πιο συγκεκριμένη την έρευνά μας.

Όσον αφορά τις τρεις γενικές υποθέσεις που διατυπώσαμε στην αρχή της έρευνάς μας, παρατηρούμε ότι οι γαλλόφωνοι διδασκόμενοι προτιμούν τη συντακτική δομή (Υ)ΡΑ, καθώς αποτελεί την πλέον ουδέτερη για αυτούς δομή. Όσο προχωρούμε στα διάφορα επίπεδα, παρατηρούμε ωστόσο ότι οι διδασκόμενοι αποφεύγουν τις άλλες δομές και ο λόγος τους παραμένει κατά βάση προσκολλημένος στη δομή (Υ)ΡΑ. Αυτό βέβαια μπορεί να οφείλεται και στον τύπο των γραπτών που επιλέξαμε να μελετήσουμε, καθώς πρόκειται για γραπτά εξετάσεων και, σε αυτή την περίπτωση, οι διδασκόμενοι αποφεύγουν τους πειραματισμούς. Παρόλα αυτά, αυτό μπορεί επίσης να υποδεικνύει και την ανασφάλεια την οποία πιθανότατα νιώθουν με ορισμένες συντακτικές δομές, κάτι που τους ωθεί στο να παράγουν απλές συντακτικές δομές. Τέλος, όσον αφορά την ορθότητα ορισμένων δομών σε συγκεκριμένα περιβάλλοντα, μπορούμε να πούμε προς το παρόν ότι οι διδασκόμενοι έχουν την τάση ακόμη και στο πιο προχωρημένο επίπεδο να γενικεύουν ορισμένες δομές είτε από επίδραση της μητρικής γλώσσας είτε από υπερδιόρθωση. Εξάλλου, παρατηρείται η τάση να χρησιμοποιούνται δομές που θα μπορούσαν να θυμίζουν προφορικό λόγο αλλά που στην πραγματικότητα βασίζονται απλώς στην παράταξη απλών προτάσεων.

Σε κάθε περίπτωση, η έρευνα μάς έδειξε το δρόμο για την περαιτέρω ανάλυση, καθώς απαιτείται, κατά τη γνώμη μας, συγκριτική μελέτη με το γραπτό και προφορικό λόγο των ομογενών. Επιπλέον, επιβάλλεται η ανάλυση και των εγχειριδίων που χρησιμοποιούνται για τη διδασκαλία της ελληνικής ώστε να φανεί κατά πόσο τα εγχειρίδια και η διδασκαλία επηρεάζουν τελικά τις επιλογές αυτές των διδασκόμενων. Αντίστοιχες έρευνες, τις οποίες πραγματοποιήσαμε με ελληνόφωνους διδασκόμενους τη γαλλική ως ξένη γλώσσα, έδειξαν ότι το είδος της άσκησης που πρέπει να πραγματοποιήσουν καθορίζει και τους παράγοντες που παρεμβαίνουν. Έτσι, άλλοτε παρατηρείται έντονη επίδραση της μητρικής, όταν οι διδασκόμενοι πρέπει να μεταφράσουν ένα κείμενο (Valetopoulos et Lamprou, υπό δημοσίευση), είτε επίδραση της διδασκαλίας και των στρατηγικών εκμάθησης, καθώς οι διδασκόμενοι χρησιμοποιούν τη στρατηγική της αποφυγής, μαθαίνουν να γράφουν χωρίς να πειραματίζονται με νέες δομές ή δομές που δεν κατέχουν ικανοποιητικά (Valetopoulos, υπό δημοσίευση).

Τέλος, όλες οι παραπάνω παρατηρήσεις δείχνουν επίσης και το πλήθος των πληροφοριών που μπορεί ο ερευνητής να αντλήσει από τη μελέτη των σωμάτων κειμένων διδασκόμενων. Τα σώματα κειμένων, χωρίς να αποτελούν μοναδική πηγή, προσφέρουν μια συνολική εικόνα της πορείας εκμάθησης της ξένης γλώσσας.

ABSTRACT

In the following paper we study and analyze texts written by students of the 3rd and 4th year of the Department of Greek Philology of the University of Belgrade. This examination aims at the error identification, classification and interpretation at the advanced level (C1-C2). Based on the errors of these texts we focus on the basic grammatical categories which tend to have the most problematic function such as aspect and article. Finally we examine the vocabulary and register errors based on the given text genres.

1. Εισαγωγή

Η παρούσα ανακοίνωση στόχο έχει να παρουσιάσει και να αναλύσει τα σημαντικότερα λάθη που παρουσιάζονται σε κείμενα παραγωγής γραπτού λόγου σερβόφωνων φοιτητών του 3^{ου} και 4^{ου} έτους του τμήματος Ελληνικής Φιλολογίας του Πανεπιστημίου του Βελιγραδίου καθώς και να επικεντρώσει στις προβληματικές περιοχές της διαγλώσσας των ομιλητών με βάση την επεξεργασία των συγκεκριμένων λαθών.

2. Το λάθος για τα «λάθη»

Για αρκετές δεκαετίες στο χώρο της διδασκαλίας των ζωντανών γλωσσών, τα γλωσσικά λάθη αντιμετωπίζονταν ως ανεπάρκεια στη διαδικασία της εκμάθησης με εύλογη συνέπεια τη διαδικασία διόρθωσης αυτής της «ελαττωματικής» γλωσσικής συμπεριφοράς. Η γλωσσική διδασκαλία επηρεασμένη τις δεκαετίες του '50 και του '60 και '70 από τη θεωρία του συμπεριφορισμού αντιμετώπισε και την εκμάθηση της δεύτερης/ξένης γλώσσας ως μια ακόμη έκφανση της ανθρώπινης συμπεριφοράς που βασίζεται στις έννοιες ερέθισμα και ανταπόκριση (Μπέλλα 2007: 60). Υπό τη γενική αυτή οπτική ο Lado εισήγαγε μέσω της Αντιπαραβολικής Ανάλυσης (Contrastive Analysis 1957) την έννοια της *Παρεμβολής* (transfer) σύμφωνα με την οποία ο ομιλητής μεταφέρει αυτόματα τις συνήθειες της Γ1 στη διαδικασία κατάκτησης της Γ2 και αυτές συμβάλλουν θετικά όταν πρόκειται για όμοια γλωσσικά στοιχεία ή αρνητικά όταν πρόκειται για ανόμοια. Παρόλα αυτά η εμπειριοκρατική λογική του γλωσσικού εισερχόμενου και εξερχόμενου δεν ήταν ικανή να προβλέψει και να ερμηνεύσει γλωσσικά λάθη που δεν οφειλονταν στην παρεμβολή της μητρικής γλώσσας καθώς αντιμετώπιζε επιφανειακά τα γλωσσικά συστήματα χωρίς να λαμβάνει υπόψη τις νοητικές διεργασίες του ομιλητή. Η αδυναμία ερμηνείας των λαθών μέσω της παρεμβολής αποδείχτηκε και με μια σειρά πειραμάτων που αποδείκνυαν πως τα σημεία διαφοροποιήσεων μεταξύ Γ1 και Γ2 δεν οδηγούν απαραίτητα σε δυσκολία κατάκτησης της Γ2 (Zobl 1980) καθώς και ότι οι ομοιότητες δύο γλωσσών δεν οδηγούν απαραίτητα σε θετική παρεμβολή (Odlin 1989).

Με την εμφάνιση της γενετικής θεωρίας του Chomsky, εισάγεται από τον Corder αρχικά (1967) και στην συνέχεια από το Selinker (1972) η έννοια της *Διαγλώσσας* που εκφράζει την ίδια τη διαδικασία

εκμάθησης κατά την οποία ο ομιλητής περνά ώστε να φτάσει στο στόχο που είναι το γλωσσικό σύστημα της Γ2. Οι Corder και Selinker καθώς οι μεταγενέστεροι ερευνητές τις διαγλώσσας (Sharwood-Smith 1994) υποστήριξαν πως η διαδικασία εκμάθησης είναι ένας συνεχής (interlanguage continuum) που αποτελείται από μια σειρά αλληλοεπικαλυπτόμενων γραμματικών που υπόκεινται σε συνεχή αλλαγή. Η αφετηρία δόμησης αυτού του συνεχούς, σύμφωνα με τον Ellis είναι ένα πρώιμο λεξιλόγιο χωρίς να χρειάζεται ο ομιλητής να καταφεύγει σε γραμματικές δομές της μητρικής (Ellis 1982, 210). Υπό το νέο πρίσμα θεώρησης της διδασκαλίας τα λάθη αντιμετωπίζονται ως εκφάνσεις της νοητικής διαδικασίας του ομιλητή και μπορούν να διακριθούν σε α) διαγλωσσικά (interlingual) που οφείλονται στην παρεμβολή και β) σε ενδογλωσσικά (intralingual) που οφείλονται σε ενδοσυστηματικές δυσκολίες της Γ2 (Αναστασιάδη κ.ά. 2008, 160). Έτσι τα λάθη μπορούν να αποτελέσουν θετικά εναύσματα στη διδασκαλία καθώς βοηθούν στην ερμηνεία της δυσκολίας κατάκτησης κάποιων δύσκολων γλωσσικών δομών της Γ2.

Η νοητική διεργασία της διαγλώσσας αντιμετωπίζεται από τους ερευνητές ως ένα συνεχές (interlanguage continuum) που υπόκειται σε συνεχείς αλλαγές και οδηγεί σύμφωνα με τον Selinker (1972) στην *Απολίθωση* (fossilization), καθώς η διαγλώσσα χάνει τη διαπερατότητά της και σταματά η διαδικασία της κατάκτησης σε σημείο διαφορετικό για τον κάθε ομιλητή. Το σημείο απολίθωσης διαφέρει από ομιλητή σε ομιλητή και οφείλεται σε διάφορους παράγοντες όπως η ηλικία και το κίνητρο εκμάθησης μιας γλώσσας.

3. Ταξινόμηση λαθών

Βασικός διαχωρισμός των λαθών σε τυχαία (mistakes) και συστηματικά (errors) μας οδηγεί στην πρώτη δυσκολία να τα εντάξουμε σε μια από τις δύο κατηγορίες. Τα τυχαία λάθη οφείλονται στη λανθασμένη εφαρμογή ενός γνωστού κανόνα που ο ομιλητής μπορεί να διορθώσει επαναδομώντας την πρόταση ενώ τα συστηματικά στην άγνοια ή μη κατανόηση ενός γλωσσικού συστήματος (Αντωνοπούλου κ.ά. 2006: 25-26). Έτσι η μελέτη και ανάλυση τυχαίων λαθών οδηγού σε λανθασμένα συμπεράσματα. Βασικό κριτήριο διαχωρισμού των λαθών σε όλα τα επίπεδα γλωσσομάθειας είναι κυρίως η συχνότητα.

Η επιμέρους κωδικοποίηση των συστηματικών λαθών ακολουθεί συνήθως τα επίπεδα γλωσσικής ανάλυσης, εδώ θα περιοριστούμε στα λάθη που μπορούμε να εντοπίσουμε στα κείμενα παραγωγής γραπτού λόγου: α) τα μορφοσυντακτικά λάθη στις γραμματικές κατηγορίες του άρθρου (οριστικό, αόριστο, μηδενικό), του ρήματος (όψη, χρόνος, έγκλιση), β) τα συντακτικά λάθη (συμφωνία ρήματος υποκειμένου-αντικειμένου, ρήματα με προθέσεις) και γ) λεξιλογικά λάθη (λεξήματα, μη-λεξήματα).

Όμως πέρα από τα «μεμονωμένα» λάθη σε επίπεδο γραμματικής και σημασιολογίας, στην περίπτωση γραπτών κειμένων έχουμε και επιπλέον συμβάσεις τις οποίες πρέπει να λάβουμε υπόψη. Οι συμβάσεις αυτές καθορίζουν το βαθμό στον οποίο γίνεται αποδεκτό ένα κείμενο ή αποκλίνει από την επικοινωνιακή διαδικασία. Τα λάθη που συναντούμε σε επίπεδο κειμένου δεν προσκρούουν άμεσα στους «αυστηρούς» κανόνες γραμματικότητας μια λεξικής μονάδας ή στην καταλληλότητα μιας γλωσσικής επιλογής (Γούτσος 2007: 88). Τα κειμενικά λάθη λοιπόν, αφορούν κυρίως την υφολογική καταλληλότητα ανάλογα με το δεδομένο κειμενικό είδος (προφορικότητα, κειμενικοί δείκτες, συνεκτικότητα). Τα λάθη αυτά είναι δυσκολότερο να εντοπιστούν και να αναλυθούν καθώς η γλωσσική διδασκαλία δεν προσανατολίζεται επαρκώς στα κειμενικά είδη και τύποι. Παρόλα αυτά είναι ευρέως αποδεκτό ότι η κειμενική επάρκεια αποτελεί έναν σημαντικό παράγοντα κυρίως στην παραγωγή γραπτού λόγου.

4. Σώμα κειμένων

Τα δεδομένα συλλέχθηκαν από ένα σώμα 88 γραπτών κειμένων 22 σεβδόφωνων φοιτητών/τριών του Τμήματος Νεοελληνικών Σπουδών του Πανεπιστημίου του Βελιγραδίου. Ο/Η κάθε φοιτητής/τρια παρήγαγε 4 κείμενα στα πλαίσια του γλωσσικού μαθήματος με τίτλο «Συνομιλία» (Converzacija), 3 κείμενα κατά τη διάρκεια του 3^{ου} έτους της φοίτησής του/της και ένα στο 4^ο έτος (στο εξής Γ1, Γ2, Γ3, Δ1). Οι ομάδες των φοιτητών/τριών είναι προχωρημένης γλωσσομάθειας καθώς παρακολουθούν και μαθήματα νεοελληνικής λογοτεχνίας πέρα από τα γλωσσικά μαθήματα. Η επιλογή του συγκεκριμένου κοινού έγινε γιατί παρουσιάζει πολλά πλεονεκτήματα: α) η μητρική τους γλώσσα είναι κοινή β) βρίσκονται στο ίδιο επίπεδο γλωσσομάθειας γ) έχουν τα ίδια χρόνια έκθεσης στην ελληνική καθώς (περιορισμένη επαφή με φυσικό λόγο) δ) έχουν περίπου την ίδια ηλικία ε) τα γραπτά κείμενα συντάχθηκαν κάτω από τις ίδιες συνθήκες (εξετάσεις). Με αυτόν τον τρόπο μπορούν να αποκλειστούν διάφοροι παράγοντες που μπορούν να επηρεάσουν την παραγωγή γραπτού λόγου και να οδηγήσουν σε

λάθη τυχαία με αποτέλεσμα την εξαγωγή λανθασμένων πορισμάτων. Επιπλέον η παρατήρηση και μελέτη τεσσάρων κειμένων από τον ίδιο ομιλητή μπορεί να βοηθήσει στην εξαγωγή σχετικά ασφαλών συμπερασμάτων σχετικά με την απολίθωση του διαγλωσσικού συνεχούς της συγκεκριμένης ομάδας.

Η βασική μέθοδος συλλογής δεδομένων ήταν η αναλυτική εξέταση των γραπτών κειμένων και η κατηγοριοποίησή των λαθών με κριτήριο τα επίπεδα γλωσσικής ανάλυσης (φωνολογία, μορφολογία, σύνταξη, λεξιλόγιο). Τα δεδομένα οδήγησαν σε πιο εξειδικευμένες κατηγοριοποιήσεις όπως άρθρο, ρηματική όψη, υφολογική διαφοροποίηση και κειμενική καταλληλότητα.

5. Δεδομένα

5.1 Λάθη στη χρήση του άρθρου

Ο μεγαλύτερος αριθμός λαθών εντοπίστηκε στη χρήση οριστικού και μηδενικού άρθρου κάτι που ήταν αναμενόμενο λόγω της μεγάλης συχνότητας εμφάνισης του στα κείμενα ως προσδιοριστικό του ονόματος. Η κατηγορία αυτή παρουσιάζει ιδιαίτερες δυσκολίες στην κατάκτηση σε όλα τα επίπεδα γλωσσομάθειας ακόμη και στο προχωρημένο και ιδιαίτερα όταν απουσιάζει ως μορφοσυντακτική κατηγορία από τη μητρική γλώσσα των μαθητών (Ιακώβου & Μπέλλα 2004: 170-172). Στη σερβική όπως και στις άλλες σλαβικές γλώσσες δεν υπάρχει άρθρο αλλά μόνο το αριθμητικό *jedan/jedna/jedno* που λειτουργεί σε κάποιες μόνο περιπτώσεις ως αόριστο άρθρο. Επιπλέον οι λειτουργίες και οι χρήσεις ιδιαίτερα του οριστικού και του μηδενικού άρθρου στη νέα ελληνική παρουσιάζουν μια πολυπλοκότητα. Εξάλλου, θα πρέπει να σημειωθεί η απουσία των λειτουργιών και της χρήσης του από τα διδακτικά εγχειρίδια που απευθύνονται σε ενηλίκους (ενδεικτικά Βαλσαμάκη & Μανάβη 2004, Αρβανιτάκης & Αρβανιτάκη 2000 2002 2004, Μπαμπινιώτης 2003, Βαλσαμάκη-Τζεκάκη κ.ά 2002, Σιμόπουλος κ.ά. 2009) εκτός ελαχίστων εξαιρέσεων (Αντωνίου κ.ά. 2011, Παθιάκη κ.ά 2011, Γαλίτη κ.ά. 2004) και κατ' επέκταση και από τη διδασκαλία. Οφείλουμε να αναφέρουμε ότι τελευταία έχουν γίνει συγκριτικές με άλλες γλώσσες έρευνες που αναφέρονται σ' αυτό το φαινόμενο και κάποιες πρόσφατες εκδόσεις διδακτικών εγχειριδίων που συμπεριλαμβάνουν συστηματοποιημένη τη ρητή του διδασκαλία (Τσαμαδού-Jacobberger & Χειλά-Μαρκοπούλου 2006: 179-213). Αποτέλεσμα όλων των παραπάνω είναι από την πλευρά των μαθητών η υπεργενίκευση χρήσης είτε του οριστικού είτε του μηδενικού άρθρου ακόμη και σε περιπτώσεις που θεωρείται υποχρεωτική η χρήση του ενός ή του άλλου.

5.1.1 Λάθη στη χρήση του οριστικού άρθρου

Ακολουθούν παραδείγματα από τα σώματα κειμένων των φοιτητών όπου στη θέση του οριστικού άρθρου με γενικευτική χρήση επέλεξαν το μηδενικό.

[2] *Η λύση ο προβλήματος* (10Δ1)

[3] *Είναι γνωστός και ο βελονισμός* (5Γ2)

[4] *Κατά τη γνώμη μου ο ελληνική κοινωνία* (7Δ1)

Το ίδιο συμβαίνει μετά από δεικτικά και ποσοτικά προσδιοριστικά όπου η θέση του οριστικού είναι υποχρεωτική αλλά και στον υπερθετικό βαθμό επιθέτων. Εδώ επομένως διακρίνεται έντονα η επίδραση της μητρικής με το φαινόμενο της μεταφοράς.

[5] *ο διαρροή αυτή* (18Γ3)

[6] *Στη αυτή ο κοινωνία* (8Δ1)

[7] *Αυτό ο μαγικό περιβάλλον* (5Γ3)

[8] *όλοι ο άνθρωποι* (3Δ1)

[9] *ο περισσότεροι νομίζουν* (5Γ1)

[10] *ο μεγαλύτερες επιπτώσεις* (3Γ3)

[11] *ο περισσότεροι φοβούνται* (13Δ1)

Πρόκειται ίσως για το μοναδικό φαινόμενο που παρουσιάζεται ρητά στα υπάρχοντα διδακτικά εγχειρίδια τα οποία παρουσιάζουν το φαινόμενο και περιέχουν ασκήσεις κυρίως δομικού τύπου για την εμπέδωσή του.

5.1.2 Λάθη στη χρήση του μηδενικού άρθρου

Μεγαλύτερος είναι ο αριθμός των λαθών που εντοπίστηκαν στις περιπτώσεις χρήσης του μηδενικού άρθρου όπου οι φοιτητές υπεργενικεύουν τη χρήση του οριστικού όπως είναι και απόλυτα αναμενόμενο εφόσον απουσιάζει από τη σερβική. Τα λάθη αφορούν:

α) εμπρόθετες φράσεις που εισάγονται με τις προθέσεις από, σε και για

[12] *όλοι οι κάτοικοι έτρεξαν στη βοήθεια* (13Γ2)

[13] *από τη πολύ μικρή ηλικία* (8Δ1)

[14] *Είναι στη δύσκολη κατάσταση* (8Δ1)

[15] *σαν και στις άλλες χώρες* (5Δ1)

[16] *καινούριο σαμπουάν για τα υπέροχα μαλλιά* (4Γ1)

[17] *Πριν από τους μερικούς μήνες* (1Γ3)

β) σε θέση αντικειμένου όταν τα ουσιαστικά δηλώνουν γενικές έννοιες που συμπληρώνουν σημασιολογικά το ρήμα

[18] *...βλέπεις τους απελπισμένους και απογοητευμένους ανθρώπους, σε απόγνωση που δε βρίσκουν τη λύση για πρόβλημα της επιβίωσης που τους το έφερε η ζωή έτσι ξαφνικά* (6Γ3)

[19] *Παντού μπορούμε να δούμε τις διαφημίσεις για διαφορετικά πράγματα* (8Δ1)

γ) σε συνάψεις

[20] *έχουν ληφθεί μέτρα της προστασίας* (9Γ3)

[21] *το πρόβλημα της υγείας* (12Γ2)

[22] *χάνει το χρόνο για να αποφασίσει* (5Γ2)

5.2 Λάθη στο ρήμα

5.2.1 Λάθη στην όψη

Μία άλλη κατηγορία λαθών αφορά το ρήμα και πιο συγκεκριμένα τη ρηματική όψη, και τη φωνή. Γενικά η όψη θεωρείται η πιο προβληματική περιοχή στο ρήμα ως προς την κατάκτηση της ακόμη και στο προχωρημένο επίπεδο γλωσσομάθειας. Ο μεγάλος αριθμός συγκεντρώσεως λαθών οφείλεται στη συχνότητα χρήσης της και είναι αυτή που προηγείται στην κατάκτηση σε σχέση με το χρόνο ακόμα και στα παιδιά.

Η ρηματική όψη είναι μια γραμματική κατηγορία που δηλώνει τον τρόπο με τον οποίο αντιλαμβάνεται ο ομιλητής την ενέργεια που εκφράζει το ρήμα. Διακρίνεται σε συνοπτική και μη συνοπτική και τετελεσμένη. Η διάκριση σε συνοπτική και μη συνοπτική είναι εμφανής στο παρελθόν, το μέλλον στους τύπους της υποτακτικής και της προστακτικής. Η συνοπτική όψη παρουσιάζει μια ενέργεια ως μοναδικό και ολοκληρωμένο γεγονός ενώ η μη συνοπτική εκφράζει το σύνθηες, το συνεχές, την εξέλιξη μιας ενέργειας, την επανάληψη και τη διάρκεια. Η επιλογή της επηρεάζεται από την παρουσία ή απουσία χρονικών προσδιορισμών αλλά και από ρήματα που συντάσσονται με να-συμπληρώματα. Τα λάθη που εντοπίστηκαν αφορούν λανθασμένη επιλογή

α) ως προς το χρόνο ακόμα και με την παρουσία χρονικών δεικτών

[23] *Από τους αρχαίους χρόνους οι άνθρωποι θεραπεύτηκαν με τα φάρμακα* (3Γ2)

β) ως προς την έγκλιση

[24] *Να μην ονειρευτείτε ότι η ζωή τους θα γίνει συνεχής αγώνας για τη θέση στην ελληνική κοινωνία* (2Δ1)

[25] *Κρατούν τους αρρώστους σε ίδια κατάσταση χωρίς να τους βοηθήσουν* (1Γ2)

[26] *Το γεγονός ότι πολλοί άνθρωποι φύγουν από τις πατρίδες τους, συνήθως φτωχές και όχι οικονομικά αναπτυγμένες χώρες, για να βρουν καλύτερη ζωή σε άλλα κράτη προκαλεί αντιδράσεις* (9Δ21)

[27] *Τώρα είμαι εδώ για να υπερασπίζω την κλασική ιατρική και να μιλάω για τους κινδύνους που μπορούν να προκαλέσουν τα είδη εναλλακτικής ιατρικής* (3Γ2)

Η τάση που εμφανίζεται αφορά τη χρήση της υποτακτικής ενώ εντοπίζονται πολύ λιγότερα λάθη στην επιλογή συνοπτικού ή μη συνοπτικού χρόνου. Το φαινόμενο αυτό συμφωνεί και με άλλες έρευνες για την επιλογή της ρηματικής όψης από μη φυσικούς ομιλητές (Ματθαίουδάκη, Κίτσου & Τζιμόκας 2011, Παπαδοπούλου 2005, Βαλετόπουλος 2001). Επίσης θα πρέπει να τονίσουμε ότι είναι πιθανόν να υπάρχει επίδραση της μητρικής γλώσσας καθώς ενώ υφίσταται η διάκριση στη σερβική οι λειτουργίες της συνοπτικής και της μη συνοπτικής όψης είναι διαφορετικές.

5.2.2 Λάθη στη συμφωνία

Στη συμφωνία ουσιαστικού επιθέτου δεν υπήρχαν ιδιαίτερα ευρήματα όπως είναι αναμενόμενο σε αυτό το επίπεδο γλωσσομάθειας καθώς δεν παρουσιάζει ιδιαίτερη πολυπλοκότητα ως φαινόμενο ειδικά για ομιλητές με γλωσσικά συστήματα που έχουν μια αναλογία στο φαινόμενο. Ωστόσο ένας αριθμός λαθών αφορούσε τη συμφωνία υποκειμένου ρήματος και αυτό είναι πιθανόν να οφείλεται σε μεταφορά από τη μητρική γλώσσα.

[28] *Τα πάντα τώρα βρίσκεται* (4Γ3) (sve se nalazi)

ή στη χρήση απαιτητικών συντακτικών δομών

[29] *Ξέρω πως οι περισσότεροι από σας που είστε εξειδικευμένοι στην γιατρική*, δεν υποστηρίζουν αυτό το είδος θεραπείας, αλλά σκεφτείτε λίγο, πώς τα κατάφεραν οι παππούδες και οι γιαγιάδες μας στα χωριά τους χωρίς κανένα γιατρείο* ή φαρμακείο;* (6Γ2)

5.3 Συντακτικά λάθη

Αρκετά λάθη ανιχνεύθηκαν στη σύνταξη ρημάτων όπου η επιλογή αφορούσε είτε λανθασμένη χρήση πρόθεσης είτε εμπρόθετη εκφορά του αντικειμένου.

[30] *να αντιμετωπίσουμε με μελλοντικά προβλήματα* (4Γ3) (Suočavamo se sa...)

[31] *να αποφύγει από τα καθημερινά του προβλήματα* (22Γ2) (Da pobegne od...)

[32] *δεν σκέφτεται στους ασθενείς* (19Γ2) (Razmišlja o...)

[33] *επηρεάζουν στα παιδιά τους* (8Δ1) (Utiču na...)

Στα παραπάνω παραδείγματα είναι εμφανής η μεταφορά συντακτικών δομών από τη Σερβική.

Η σύνδεση των προτάσεων ενός κειμένου επιτελείται με τη χρήση συνδέσμων παρατακτικών και υποτακτικών, επιρρημάτων και αντωνυμιών αλλά και εκφράσεων. Κατά την εξέταση των κειμένων παρατηρήθηκε τόσο λανθασμένη χρήση των παραπάνω δεικτών όσο και παράλειψή τους σε θέσεις που είναι υποχρεωτική η χρήση τους.

[34] *όλοι που γεννιούνται* (21Δ1), *σε όλοι που ακούν* (7Γ10 αντί *όσοι*)

[35] *είμαι απελπισμένη ότι* (7Γ3) *αντί που*

[36] *Ένα άλλο μειονέκτημα είναι που διαφημίσεις μας διακόπτουν* (14Γ1) *αντί ότι*

[37] *Δε θυμάμαι ότι είχαμε ποτέ μια τέτοια καταστροφή εδώ στο νησί* (1Γ3) *αντί να*

[38] *θεωρούν ο πέφτει* (3Δ1) *παράλειψη του ότι*

5.4 Λεξιλογικά

Στην περιοχή του λεξιλογίου υπήρξαν σημαντικά ευρήματα που δείχνουν τη δυσκολία που παρουσιάζει αυτή η περιοχή στην εκμάθηση λόγω του τεράστιου εύρους της όσο προχωρά η διαδικασία κατάκτησης της Γ2. Έτσι τα λάθη διακρίνονται σε δύο κατηγορίες α) λανθασμένη χρήση λεξήματος και β) παραγωγή μη λεξήματος. Η μητρική γλώσσα επηρεάζει σημαντικά την επιλογή των λέξεων αλλά οι μη φυσικοί ομιλητές έχουν επίσης την τάση να υπεργενικεύουν τη χρήση λέξεων σε διάφορα προτασιακά και κυρίως κειμενικά περιβάλλοντα προκειμένου να επιτύχουν τον επικοινωνιακό τους στόχο. Στο προχωρημένο επίπεδο εξάλλου έχουν ήδη εξοικειωθεί με κανόνες σύνθεσης και παραγωγής γεγονός που οδηγεί συχνά σε λαθεμένες επιλογές.

Στην πρώτη κατηγορία ανήκουν επιλογές όπως

[39] *Υγιεινού ανθρώπου* (υγιούς) (4Γ2)

[40] *θαλάσσια ζώα* (είδη) (12Γ3)

[41] *ακουστά δημοτικά σχολεία* (ζακουστά, γνωστά) (10Δ1)

[42] *παρουσιάζει ανεκτίμητο θησαυρό* (αποτελεί) (4Γ3)

[43] *μεγαλοκαρδία* (μεγαλοψυχία) (22Δ1)

[44] *Ένας μαύρος που βίωσε στο πετσί του το αδίκημα* (την αδικία) (20Δ1)

[45] *που οφείλονται είτε σε λανθασμένη χρήση πλησιώνυμου είτε σε μεταφορά* (Βλ. *αδίκημα nepravda, μεγαλοκαρδία širokogrudnost*) (4Γ2).

Στη δεύτερη κατηγορία που αφορά την παραγωγή μη λεξημάτων είναι εμφανής η προσπάθεια πειραματισμού και παραγωγής λέξεων. Ιδιαίτερα προβληματικό φαίνεται να είναι το σημασιολογικό πεδίο της ιατρικής και των παραγώγων λέξεων καθώς άλλες δομούνται με το θέμα ιατρ- ενώ άλλες με το γιατρ- γεγονός που δημιουργεί σύγχυση στους μη φυσικούς ομιλητές.

[46] *Γιατρική** (16Γ2) (6Γ2),

[47] *γιατρείο** (6Γ20)

[48] *γιατρικοί** (3Γ2)

Και εδώ εμφανίστηκαν λάθη που οφείλονται σε μεταφορά όπως *Μουσλιμάνος** (8Δ1) αλλά και διάφορα άλλα που δείχνουν την ανεπιτυχή προσπάθεια παραγωγής λέξεων με επιθήματα, *επιστημονιακές** (22Γ2) καθώς και σύνθετων λεξικών μονάδων όπως *θαλασσοαετοί ** (4Γ3)

5.5 Κειμενικά Λάθη

Σε αυτήν την ενότητα θα παρουσιαστούν στοιχεία που αφορούν τη σύσταση των κειμένων εξετάζοντας όχι πλέον σε λεξικό ή προτασιακό επίπεδο αλλά κειμενικό. Θα προσπαθήσουμε να διερευνήσουμε σε ποιο βαθμό η φοιτητές του προχωρημένου επιπέδου ακολουθούν τις συμβάσεις που απαιτούνται για την παραγωγή ενός «αποδεκτού» κειμένου και ποιες είναι οι αποκλίσεις που εμφανίζονται. Η τήρηση ή μη των συγκεκριμένων παραμέτρων που καθορίζουν τη σύσταση ενός κειμένου συχνά παραμερίζεται κατά τη διόρθωση των γραπτών παραγωγών στο πλαίσιο της εκπαιδευτικής διαδικασίας. Η διόρθωση των λαθών περιορίζεται στα επίπεδα γλωσσικής ανάλυσης με αποτέλεσμα να παραμελείται η επεξεργασία των κειμενικών λαθών. Για την επισκόπηση των υπό εξέταση κειμένων θα αναφερθούμε στα προβλήματα σύνδεσης, συνεκτικότητας, ύφους και κειμενικού είδους.

Η σύνδεση σε επίπεδο κειμένου εξασφαλίζει τη συνεκτικότητα η οποία επιτυγχάνεται με τη χρήση κειμενικών δεικτών που διευκολύνουν τη μετάβαση από ένα κομμάτι του κειμένου σε άλλο αλλά ενισχύουν και σχέσεις ανάμεσα σε τμήματα και νοήματα αντιθετικές, χρονικές κ.α. Στις γραπτές παραγωγές που εξετάστηκαν παρατηρήθηκε ότι γίνεται προσπάθεια για τη χρήση τέτοιων δεικτών όχι όμως πάντοτε επιτυχημένη και αναμφισβήτητα υπάρχει απόκλιση από αντίστοιχα κείμενα φυσικών ομιλητών.

[49]...... *αυτή η πράξη δεν έπρεπε να γίνει μια συνήθεια. Στο τέλος αν και μπορούμε να μιλήσουμε πολύ γι' αυτό το θέμα...* (16γ2)

[50]...... *Το να ασχολείται κανείς με τις διαφημίσεις έγινε ένα πολύ γνωστό επάγγελμα. Εντάξει, αν και οι διαφημίσεις βοηθάνε την πρόσληψη...* (4γ1)

[51]...... *Θα ήθελα να σε ενημερώσω για το γεγονός που προκάλεσε πολλές διαμαρτυρίες εδώ στο νησί. Δηλαδή, χτες το απόγευμα...* (17γ3)

Τα σημαντικότερα όμως στοιχεία που καθορίζουν και τη σύσταση των κειμενικών τύπων είναι το ύφος και οι συμβάσεις που απαιτούνται για να θεωρούνται αποτελεσματικοί ως προς το στόχο τους. Οι αδυναμίες στη χρήση κατάλληλου ύφους είναι αναμενόμενες, ωστόσο, οι φοιτητές φαίνεται να χρησιμοποιούν εκφράσεις του προφορικού λόγου που καταδεικνύουν ότι δεν αντιλαμβάνονται την υφολογική ποικιλία ανάμεσα στο επίσημο και το ανεπίσημο και τους περιορισμούς των διαφορετικών επικοινωνιακών περιστάσεων.

[52] *Θεωρώ ότι κάθε είδος της εναλλακτικής ιατρικής είναι μια βλακεία* (16Γ2)

[53] *εντάξει ... μας σπάνε τα νεύρα* (4Γ1)

[54] *τελοσπάντων* (9Γ2)

Επίσης παρατηρείται η χρήση απλοϊκού ύφους εκεί που θα χρειαζόταν μια ευρύτερη λεξιλογική ικανότητα στην απόδοση των νοημάτων.

[55] *Κακό προϊόν* (5γ2)

[56] *η επίδραση είναι κακή* (9γ1)

[57] *δεν ξέρουν* (3γ2)

Πιστεύουμε ότι η εστιασμένη διδασκαλία σε αυτόν τον τομέα μπορεί να συντελέσει στη σωστή επιλογή ύφους και στην απόδοση του επίσημου χαρακτήρα που απαιτείται για παράδειγμα σε μια ανακοίνωση σε συνέδριο ιατρικής. Επιπλέον η μη τήρηση κανόνων στην εισαγωγή και το «κλείσιμο» μπορεί να οφείλεται στη απουσία επικοινωνιακού πλαισίου στην παραγωγή γραπτού λόγου.

[58] *Είμαι πολύ ευτυχισμένη επειδή είμαι εδώ με τόσους σημαντικούς γιατρούς* (19Γ2)

Ακόμη η προφορική παρουσίαση για ένα θέμα επιβάλλει διαφορετικές λεκτικές και εκφραστικές επιλογές από αυτές που χαρακτηρίζουν ένα ενημερωτικό φυλλάδιο ή ένα άρθρο οδηγιών.

[59] *Κάθε φορά που παρατηρείτε τα συμπτώματα κάποιας αρρώστιας πρέπει να πηγαίνετε στο γιατρό σας. Μη χάνετε χρόνο με την εναλλακτική ιατρική ενώ η κατάστασή σας μπορεί να γίνει χειρότερη* (3Γ2)

6. Επίλογος

Από τα αποτελέσματα της ανάλυσης γίνεται φανερό ότι οι σερβόφωνοι φοιτητές του Τμήματος Νεοελληνικών σπουδών παρουσιάζουν αδυναμίες κυρίως στη χρήση του άρθρου, οριστικού και μηδενικού λόγω της απουσίας αντίστοιχης μορφοσυντακτικής κατηγορίας στη σερβική χωρίς εμφανή τάση υπεργενίκευσης του ενός ή του άλλου. Ενδεχομένως η ρητή και συστηματοποιημένη διδασκαλία

τους ως προς τις λειτουργίες και τη χρήση τους από τα πρώτα κιόλας επίπεδα μπορεί να συντελέσει στην αποφυγή των λαθών. Τόσο από την παραπάνω εξέταση όσο και από άλλες έρευνες που έχουν προηγηθεί προκύπτει η ανάγκη να συμπεριλαμβάνεται στα διδακτικά εγχειρίδια όχι μόνο η μορφολογική υπόσταση του άρθρου ως προς το γραμματικό γένος αλλά και η λειτουργική χρήση του από τα πρώτα ως τα προχωρημένα επίπεδα γλωσσομάθειας κατά το πρότυπο σύγχρονων εγχειριδίων όπου υπάρχει ως ξεχωριστό περιεχόμενο στην ενότητα της γραμματικής (πρβ. Αντωνίου κ.ά. 2011)

Η ρηματική όψη φαίνεται να αποτελεί ιδιαίτερα προβληματική περιοχή παρά την ύπαρξη αντίστοιχης μορφοσυντακτικής δομής στη σερβική. Η βαθύτερη κατανόηση των περιορισμών που χαρακτηρίζουν τη ρηματική όψη στη νέα ελληνική μέσα από την μελέτη κειμένων όπου μπορεί να αναλυθεί η στάση του ομιλητή και να αξιοποιηθούν και πραγματολογικού τύπου πληροφορίες (Παπαδοπούλου 2005, Τλούπα & Παναγοπούλου 1995, Παναγοπούλου & Χατζηπαναγιωτίδου 1997) αναμένεται ότι είναι δυνατό επιφέρει βελτίωση στη χρήση της.

Αναφορικά με το λεξιλόγιο η εκτεταμένη επιλογή λανθασμένων λεξημάτων προκύπτει κυρίως λόγω μεταφοράς από τη μητρική αλλά παράλληλα είναι και δείγμα εξέλιξης της διαγλώσσας καθώς παρατηρείται ένας πειραματισμός με νέο και αρκετά απαιτητικό επίσημο λεξιλόγιο. Η εξάσκηση των μαθητών μέσα από ασκήσεις σύνθεσης και παραγωγής αλλά και στην κατανόηση της χρήσης των λεξικών συμφράσεων μέσω του κατάλληλου διδακτικού υλικού (πρβ. Ευσταθιάδης & Αντωνοπούλου) θα μπορούσε να βελτιώσει τις λεξιλογικές τους επιλογές.

Στο επίπεδο των κειμένων εντοπίζεται μίξη επίσημου και προφορικού ύφους και ενδείξεις πιθανής στρατηγικής αποφυγής σύνθετων κειμενικών δεικτών (Αρχάκης 2005). Αυτό αποτελεί και απόρροια του γεγονότος ότι η παραγωγή γραπτού λόγου δεν πλαισιώνεται πάντα από σαφές επικοινωνιακό πλαίσιο λαμβάνοντας υπόψη τα θέματα των γραπτών δοκιμασιών. Επομένως η διδασκαλία ίσως θα έπρεπε να εμπλουτισθεί με μεγαλύτερη ποικιλία κειμενικών ειδών και να επικεντρωθεί στις παραμέτρους που τα καθορίζουν αλλά και σε προσπάθειες μέσα στην εκπαιδευτική διαδικασία διάκρισης της προφορικότητας σε παραδείγματα γραπτού λόγου ή έλλειψης σενδετικών δεικτών που να εξυπηρετούν τους στόχους του συγγραφέα στα είδη της αφήγησης, της περιγραφής και της επιχειρηματολογίας (πρβ. Αντωνίου κ.ά. 2011, Ευσταθιάδης & Αντωνοπούλου).

Η παρούσα μελέτη πιστεύουμε ότι μπορεί να συμβάλλει στη βελτίωση της διδασκαλίας προκειμένου να αντιμετωπιστούν τα προβλήματα που απορρέουν τόσο από την επίδραση της μητρικής όσο και από τα διδακτικά εγχειρίδια και τη διδασκαλία. Όπως προαναφέρθηκε, τα λάθη μπορούν να αποτελέσουν θετικά εναύσματα στη διδασκαλία εφόσον τα αντιμετωπίσουμε σαν βασικό στοιχείο της διδακτικής διαδικασίας και όχι σαν απλά «ψεγάδια» ανάμεσα σε δύο τέλεια γλωσσικά συστήματα.

ABSTRACT

In Modern Greek dialects, the names for the genitals, unlike their sparing presence in the dictionaries of common Modern Greek, appear to be diverse, usually witnessed as figurative and euphemistic wordings, their phraseology also being rich ('pistole', 'torment', 'reveler' for the penis, 'nest', 'pocket' for the pudenda, 'button' for the clitoris etc.). The terminology of this special vocabulary field displays exceptional ingenuity, humor and creativity, but also reveals the social conditions which created it. The paper presents rich dialectal data and offers a classification of the glossarial material according to the language mechanisms of its construction.

Λέξεις κλειδιά: γεννητικά όργανα, αργκό, νεοελληνικά ιδιώματα, άσεμνο λεξιλόγιο, ευφημισμός

1. Εισαγωγή: Σκοποί, δομή και υλικό της εργασίας

Αφορμή για τη συγγραφή αυτού του άρθρου ήταν η διαπίστωση της διάστασης στην περιγραφή των γεννητικών οργάνων ανάμεσα στην κοινή νεοελληνική απ' τη μια και στις νεοελληνικές διαλέκτους και ιδιώματα από την άλλη. Η κοινή νεοελληνική λοιπόν διακρίνεται από ένα ταμπού όταν πρόκειται να ονοματίσει τα μέρη του σώματος που σχετίζονται με τη γενετήσια λειτουργία. Η αμηχανία γύρω από τις ονομασίες των γεννητικών οργάνων γίνεται φανερή όχι μόνο στη φειδώ της λεξικογραφικής αποτύπωσής τους στα λεξικά της κοινής νεοελληνικής, στην οποία θα αναφερθούμε στη συνέχεια, αλλά και στις περισσότερες προφορικές περιστάσεις που κάποιος θα θελήσει να ονομάσει αυτά τα μέρη του σώματος με όρους που δεν θα θεωρούνται άσεμνοι ή χυδαίοι. Αντίθετα, στις νεοελληνικές διαλέκτους και ιδιώματα τα γεννητικά όργανα παρουσιάζονται με πάμπολλες ονομασίες, συνήθως μεταφορικές και ευφημιστικές, ενώ πλούσιο είναι και το φρασσεολογικό υλικό που τις περιβάλλει. Όροι που στην κοινή νεοελληνική θεωρούνται άσεμνοι, στο διαλεκτικό και ιδιωματικό υλικό, εμφανίζονται με ουδέτερη σήμανση όπως φαίνεται από τα παραδείγματα αλλά και τα παράγωγα και τα σύνθετα που σχηματίζουν. Επιπλέον εμφανίζονται και νέοι όροι ή φράσεις που διαθέτουν ιδιαίτερη ευρηματικότητα, χιούμορ και φαντασία, αλλά παράλληλα φανερώνουν και τις συνθήκες του κοινωνικού περιβάλλοντος που τους δημιουργήσε.

Σκοπός του παρόντος άρθρου είναι να αναδείξει αυτόν το διαλεκτικό λεξιλογικό πλούτο, καταγράφοντας και ομαδοποιώντας το λεξιλογικό υλικό και αντιπαραβάλλοντάς το με τα αντίστοιχα της κοινής νεοελληνικής, της νεοελληνικής αργκό και με ονομασίες από τα αρχαία ελληνικά και από τα μεσαιωνικά ελληνικά.

Όσον αφορά το υλικό, ως διευκρινιστεί ότι το διαλεκτικό και ιδιωματικό υλικό που παρατίθεται προέρχεται στο μεγαλύτερο βαθμό από το ανέκδοτο αρχειακό υλικό του Κέντρου Ερεύνης των Νεοελληνικών Διαλέκτων και Ιδιωμάτων της Ακαδημίας Αθηνών (KENΔΙ). Για την κοινή χρησιμοποιήθηκαν κατά βάση τα δύο μεγάλα Λεξικά της Νέας Ελληνικής του Ιδρύματος Τριανταφυλλίδη και του Γ. Μπαμπινιώτη, ενώ οι αρχαιοελληνικές και μεσαιωνικές ονομασίες των γεννητικών οργάνων αντλούνται κυρίως από δύο μελέτες, του Χ. Χαριτωνίδη και του Φ. Κουκουλέ, αντίστοιχα. Σημσιολογικά, σκόπιμα το θέμα περιορίστηκε μόνο στις ονομασίες των γεννητικών οργάνων, καθώς ο χρόνος, στο πλαίσιο αυτής της ανακοίνωσης, δεν επαρκεί για επέκταση και σε άλλα λεξιλογικά πεδία.

2. Αρχαία και μεσαιωνική ελληνική

Κάνοντας μία διαχρονική διερεύνηση των ονομασιών των γεννητικών οργάνων στην ελληνική γλώσσα, διαπιστώνει κανείς πως στην αρχαία ελληνική υπήρχε πλήθος τέτοιων ονομάτων. Ένα συγκεντρωτικό κατάλογό τους, δίπλα και σε άλλο λεξιλογικό και φρασεολογικό υλικό «άσεμνου» περιχομένου, βρίσκουμε στη μονογραφία με τίτλο «Απόρρητα». Είναι άξιο απορίας και θαυμασμού πώς κατάφερε ο Χαρίτων Χαριτωνίδης, καθηγητής αρχαίων ελληνικών στο Πανεπιστήμιο Αθηνών, να εκδόσει, στο συντηρητικό περιβάλλον της προμεταξικής ελληνικής κοινωνίας του 1935, ένα τέτοιο πόνημα, έστω και με το ψευδώνυμο Εύιος Ληναίου. Αντίθετα, είκοσι χρόνια αργότερα, ο Φ. Κουκουλές στα «Ου φωνητά» του νιώθει την ανάγκη να δικαιολογηθεί για το λόγο που τον ώθησε να καταπιαστεί με ένα τέτοιο θέμα και σπεύδει να επισημάνει ότι το κίνητρό του είναι μόνο επιστημονικό και πως δεν είχε την πρόθεση να σκανδαλίζει τους αναγνώστες του «αναπτύσσων θέματα τας ταπεινότερας ορμάς υποδαυλίζοντα»¹. Στα «Απόρρητα» λοιπόν καταγράφονται 108 αρχαιοελληνικές ονομασίες του ανδρικού γεννητικού οργάνου και 80 του γυναικείου, εμπλουτισμένες με ετυμολογικές και φρασεολογικές πληροφορίες και με βιβλιογραφικές αναφορές, ενώ σε λίγες περιπτώσεις γίνεται σύγκριση και με αντίστοιχες νεοελληνικές ονομασίες.

Διατρέχοντας κανείς αυτό τον κατάλογο, εύκολα διαπιστώνει ότι ελάχιστες είναι οι ονομασίες που σημασιολογικά έχουν αρνητικό πρόσημο. Οι περισσότερες προέρχονται από μετωνυμίες που βασίζονται σε ομοιότητα σχήματος, χρώματος ή παραπέμπουν στη θετική εκδοχή της σεξουαλικής πράξης και διακρίνονται από φαντασία και διάθεση αστεϊσμού. Αναφέρω ορισμένα παραδείγματα: α) Το ανδρικό μόριο ονομάζεται κυρίως με βάση το σχήμα: *πάτταλος* (= πάσσαλος), *κορόνη*, *ιστός*, *άγκυρα*, *ορθίας* (=κατάρτι πλοίου), *μύκης* (=μανιτάρι²), *σανν(ν)ίον* (=δόρυ) κ.λπ.. Οι όρχεις πάλι ονοματίζονται κυρίως από τη διπλή τους υπόσταση κι όχι από το σφαιρικό τους σχήμα: *δίδυμοι*, *παραστάται*, *ήλικαι*, *γείτονες* (η ονομασία διατηρείται και στα νε.) Αντίστοιχες ονομασίες του γυναικείου αιδοίου από το σχήμα ή (και) το χρώμα είναι: *δέλτα*, *νάπος*, *το* (= δασώδης κοιλάδα, φαράγγι), *χοίρος*, *χοιρίον*, *ίαχος* (=χοίρος), *υς* (από την ομοιότητα με το δέρμα του χοίρου σε χρώμα και υφή³) κ.α. Φυσικά υπήρχαν και πολλές κυριολεκτικές ονομασίες (πολλές από τις οποίες διατηρούνται και στα νε.), όπως *φύσις*, *εφήβαιον*, *γόνιμον/ γεννητικόν/ παιδουργόν μόριον* (κοινά για άνδρες και γυναίκες) *τρύπα*, *οπή*, *δελφάκιον* (για το γυναικείο κόλπο), *ψωλή*, *πόσθη*, *πέος*, *βύλλος*, *ο* (για το ανδρικό μόριο).

Στα βυζαντινά χρόνια, αντίθετα, οι ονομασίες των γεννητικών οργάνων που μας παραδίδονται είναι πολύ λιγότερες, και ο προσανατολισμός είναι σαφώς αρνητικός, αφού η γενετήσια λειτουργία αντιμετωπίζεται κατά κύριο λόγο ως αμαρτία και αισχύνη. Άλλωστε και τα ονόματα που διασώζονται προέρχονται από συγγράμματα που την αντιμετωπίζουν ως τέτοια. Από καταλόγους αμαρτημάτων, από αναφορά σε ποινές που αντιστοιχούν σε διάφορα αμαρτήματα, από οδηγίες προς κληρικούς σχετικά με τις ερωτήσεις που οφείλουν να κάνουν στους εξολογούμενους κατά την εξομολόγηση κ.λπ. Το γεγονός αναγνωρίζει και ο Φαίδων Κουκουλές στην εισαγωγή του κεφαλαίου για «τα ου φωνητά των Βυζαντινών» όταν λέει: «εν ω διά την διαπραγματέυσιν παρομοίου θέματος κατά την αρχαίαν εποχήν αι πηγαί δεν είναι σπάνιαι (κείμενα, έργα μικροτεχνίας, αγαλμάτια, δακτυλιόλιθοι, εικόνες εν αγγείois, νομίσματα κ.τ.λ.), δεν συμβαίνει το αυτό διά την Βυζαντινήν περίοδον, καθ' ην ο τρόπος της ζωής και αι περί ηθικής αντιλήψεις ήσαν κατά πολύ διάφοροι»⁴. Σε μεγάλο βαθμό διατηρούνται οι αρχαίες ονομασίες, κυρίως όμως αυτές που ήταν κυριολεκτικές και όσες ήταν ουδέτερα ή αρνητικά φορτισμένες. Βρίσκουμε π.χ. τις ονομασίες: *κρυφά μέλη*, *άσχημα*, *αναγκαία* για τα γεννητικά όργανα και των δύο φύλων. Το ανδρικό μόριο διατηρεί τις αρχαίες ονομασίες *φύσις*, *ψωλή*, *ψώλος*, *σάρκα*, *βύλλος*, *βιλλίν*, *νεύρον*, *δέμας*, *βάμβαλον* οι όρχεις λέγονται *δίδυμοι* και *διδύμια*, *όρχεις*, *παραστάται*, *μήδεα*, το γυναικείο αιδίοι: *μέλος*, *σχίσμα*, *διάσφαγμα*, *τρύπα*, *σύκον*, *κύσθος*, *αιδοίον*, *κτένιον*.

¹ Κουκουλές Φαίδων (1955: 505): «Εις την δημοσίευσιν της παρούσης μελέτης με ώθησεν ουχί βεβαίως η πρόθεσις να σκανδαλίσω τους αναγνώστας μου αναπτύσσων θέματα τας ταπεινότερας ορμάς υποδαυλίζοντα, αλλ' η επιθυμία μου να γνωσθή μία ακόμη, ελάχιστη γνωστή, πλευρά του βίου των Βυζαντινών προγόνων μας εις τα ήθη και τον πολιτισμόν αυτών αναφερόμενη. [...] Ο σκοπός μου είναι μόνον επιστημονικός, η δε μελέτη συνέχεια και συμπλήρωσις παρομοίων διατριβών εις τα σεξουαλικά των αρχαίων Ελλήνων αναφερομένων.»

² Υπάρχει μια άμεση σχέση ανάμεσα στις λαϊκές ονομασίες του μανιταριού και στα σεξουαλικά όργανα, κυρίως όμως –και αντίθετα από το, λόγω σχήματος, αναμενόμενο- στα θηλυκά, π.χ. *γλυτσομούνι*, *αδραχτίτσα*, *κουκουβάκι* κ.ά. (βλ.σχετικά: Βραχιονίδου Μαρία. 2007: 173-203) .

³ Εδώ πρέπει να εξηγήσουμε ότι αρχαιοελληνική συνήθεια καλλωπισμού των γυναικών αποτελούσε η ολοκληρωτική αποτρίχωση του εφηβαίου, που έκανε την ομοιότητά του με το δέρμα του χοίρου πιο φανερή. Από αυτή τη συνήθεια άλλωστε προκύπτουν κι άλλες ονομασίες: *δορίαλλος*, ο (<δείρειν, θα μπορούσε να μεταφραστεί ως «το αποτρίχωμένο», «το ξεπουπουλιασμένο»).

⁴ Κουκουλές Φαίδων (1955: 505).

Παράλληλα, εμφανίζονται και κάποιες νέες όπως *κανλί*, *κανλός* και *βαλάνιον* (ονομασίες της βάλανου του πέους), *βέργα* και *τσουτσούνα* (= το πέος στην Κύπρο, όπως «μας παραδίδει ο, κατά τον Κουκουλέ, αισχρολόγος Σαχλίκης»⁵) και το πάγκοινο *μουνίν* (=το γυναικείο αιδόιο), για το οποίο έχουν προταθεί πολλές ετυμολογήσεις⁶. Ακόμα συχνή είναι η ευφημιστική χρήση αντωνυμίας π.χ. το ανδρικό μόριο αποκαλείται «αυτή» στην παροιμία: «πτωχός ή πλούσιος, αν *αυτή* σου βάλει, ουδέν κοιμάται», ενώ για γυναίκα που συνουσιάζεται εύκολα με οποιονδήποτε έλεγαν «*το* κάμνει» ή «*το* δίδει». Τέλος στα βυζαντινά χρόνια εμφανίζεται και το ρ. *γαμώ* με τη σημερινή σημασία, όπως και το επίθετο *γαμέας* με την έννοια «οχευτής».⁷

3. Κοινή και Αργκό

Το ταμπού στην ονομάτιση των μερών του σώματος που σχετίζονται με τη γενετήσια λειτουργία φαίνεται πως διατηρείται και στην κοινή νεοελληνική. Ακόμα και στον προφορικό λόγο, στις περιπτώσεις που ο ομιλητής της κοινής θέλει να αναφερθεί στα γεννητικά όργανα χωρίς να ακούγεται χυδαίος αντιμετωπίζει δυσκολία στην εύρεση του κατάλληλου επικοινωνιακού κώδικα. Οι γλωσσικές στρατηγικές που ακολουθούνται τότε είναι ποικίλες, συνήθως όμως είτε ο λόγος στερείται φυσικότητας είτε αποτυγχάνει στην επιτέλεση της επικοινωνίας. Για παράδειγμα, όταν ο αποδέκτης είναι παιδί χρησιμοποιούνται συχνά όροι της νηπιακής γλώσσας, κυρίως ηχομιμητικοί. (Εδώ θα είχα να παρατηρήσω πως συχνά όροι που θεωρούνται ηχομιμητικοί ή νηπιακοί δεν είναι παρά ξενόγλωσσοι, στην ξένη γλώσσα μάλιστα από την οποία προέρχονται μπορεί να μη θεωρούνται άσεμνοι αλλά κοινοί ή λόγιοι. π.χ. *μεμέ* = στήθος < τουρκ. *memme* = στήθος.) Μεταξύ συγγενών ή οικείων προσώπων μπορεί να υιοθετηθούν συνθηματικές λέξεις, όπως *άλλωστε* και μεταξύ εραστών, αν και συχνή τακτική είναι ...αυτή της αποσιώπησης. Φυσικά δεν γίνεται εδώ λόγος για τις περιστάσεις σκόπιμης χρήσης άσεμνου λεξιλογίου, που ως τέτοιο γίνεται κατανοητό, το οποίο σύμφωνα με τους Dumas και Lighter⁸ έρχεται να υπονομεύσει την αξία της επίσημης ή σοβαρής γλώσσας – προφορικής ή γραπτής.⁹ Σ' αυτή την περίπτωση βεβαίως μιλάμε για εσκεμμένη χρήση της αργκό.

Η αντιμετώπιση του λεξιλογίου γύρω από τα γεννητικά όργανα ως απαγορευμένου γίνεται φανερή και λεξικολογικά. Στα λεξικά της κοινής αυτό γίνεται φανερό από το μικρό αριθμό των ονομασιών των γεννητικών οργάνων που περιλαμβάνουν, αλλά και από τους χαρακτηρισμούς που τα συνοδεύουν, που είναι συνήθως «χυδαίο» ή «λέξη ταμπού».¹⁰ Άλλωστε είναι λίγες οι λέξεις που λημματογραφούνται, συνοδευόμενες συνήθως από λίγες φρασεολογικές πληροφορίες και λίγα παράγωγα και σύνθετα. Ενδεικτικά π.χ. στο Λεξικό Τριανταφυλλίδη λημματογραφούνται οι λέξεις: *μουνί*, *πέος*, *φαλλός*, *πούτσος*.

Ενδιαφέρον παρουσιάζει επιπλέον το γεγονός ότι οι κοινές σήμερα ονομασίες αιδόιο και φαλλός, στα αρχαία ελληνικά αρχικά αρχικά σχετίζονταν με τη λατρεία: το αιδόιο σήμαινε το ιερό¹¹, ενώ ο φαλλός ήταν η απομίμηση του ανδρικού μορίου για τελετουργικούς σκοπούς. Τέλος θα ήθελα να παρατηρήσω ότι ακόμα και οι πιο κοινές λέξεις για τα γεννητικά όργανα ονομάζονται με λέξεις δυσετυμολογήτες. Έτσι π.χ. η λ. *πούτσος* και *πούτσα* κατά το λεξικό Τριανταφυλλίδη ετυμολογείται από το τουρκ. *puç* = σχισμή ανάμεσα στους γλουτούς ή ιταλ. *puzzo* και διαλ. *puzza* = βρόμα, ενώ κατά το λεξικό Μπαμπινιώτη θεωρείται αβέβαιου ετύμου, ως πιθανή όμως ετυμολογία δίνεται το σλαβ. *butsa* = εξόγκωμα, προεξοχή ή κατ' άλλη εκδοχή το αρχ. πόσθη. Το ίδιο ισχύει, όπως είδαμε και για τη λέξη *μουνί*. Θεωρώ ότι πιθανόν αυτή η δυσκολία ετυμολόγησης οφείλεται στο ότι το λεξιλόγιο αυτό προέρχεται σε μεγάλο βαθμό από την αργκό. Άρα, είναι πιθανό τα δάνεια και αντιδάνεια μεταξύ των

⁵ Κουκουλές Φαίδων (1955: 516).

⁶ Κουκουλές Φαίδων (1955: 539): «α. < βουνίν (κατά τον Hubert Pernot και τον G. Rohlf), β. < ευνίον – ευνί (κατά τον Γ. Χατζιδάκι), γ. < βενετσ. *monin*, *mona* (κατά τον P. Kretschmer), δ. σικελ. *μυλλός* (κατά τον Κοραή).» Επίσης έχουν προταθεί και άλλες ετυμολογήσεις: ε. μεσαιων. *μουνίν* < *μνίον < αρχ. βινεΐν = οχεύω, στ. < μεσαιων. *μνίον* < υποκ. του αρχ. *μνους* = χνούδι, απαλό μαλλί.

⁷ Κουκουλές Φαίδων (1955: 535).

⁸ Dumas, B & Lighter, J. (1978: 5-17).

⁹ βλ. Κεχαγιά Κατερίνα (1997: 592).

¹⁰ Μπαμπινιώτης Γ. (1998: 32): «Προκειμένου να δηλωθούν σημασίες (ανατομικών οργάνων, σεξουαλικής υφής κ.τ.ό.), που ο ομιλητής πρέπει να χρησιμοποιεί με ιδιαίτερη προσοχή, γιατί πρόκειται για κοινωνικά «απαγορευμένες λέξεις» (λέξεις ταμπού), χρησιμοποιείται μπροστά από αυτές το θαυμαστικό σημείο (!)».

¹¹ Κοπιδάκης (1994): «Η αμφιθυμία αυτή δηλώνεται εναργέστατα στη σημασιολογική εξέλιξη του επίκοινου "αιδοία", το οποίο, ενώ αρχικά σήμαινε τα "σεβάσματα", κατέληξε να σημαίνει ευφημιστικώς τα "επαίσχυντα"».

αργκό διαφόρων γλωσσών να είναι πιο συχνά απ' ό,τι σημειώνεται λεξικογραφικά. Και εδώ πιστεύω πως ανοίγεται ένα πεδίο πρόσφορο για ετυμολογική έρευνα.

Πάντως η χαρακτηριστική λεξιπενία της συγκεκριμένης λεξιλογικής ομάδας παρατηρείται ήδη από παλιά. Ήδη ο Κοραΐς το 1811 σε επιστολή του απορεί πώς «από τόσον θησαυρόν ονομασιών η κοινή γλώσσα δεν εφύλαξε παρά την Ψ. επί ανδρός και την φύσιν κοινώς επί των δύο, μερικώς δε διά το θήλυ μεταχειρίζεται δύο ιταλικά το Μ. και το των Χίων Ρ (Π).[...]»¹²

Πού πράγματι βρίσκονται κρυμμένες οι άλλες ομοσήμαντες λέξεις, αναρωτιέται κανείς μαζί με τον Κοραΐ; Ευλόγως θα περίμενε να βρει τις περισσότερες στο λεξιλόγιο της αργκό. Ωστόσο, μια πρώτη διερεύνηση σε λεξιλόγια της αργκό δείχνει ότι ούτε εκεί υπάρχει πλήθος ονομασιών, καθώς δεν είναι το πλήθος αλλά η συχνότητα στη χρήση των ήδη γνωστών ονομασιών που διαφέρει από την κοινή, όπως και η ποικιλία στις ερμηνείες, στα παράγωγα και σύνθετα, στο φρασολογικό υλικό που τις συνοδεύει, στα λογοπαίγνια. Για παράδειγμα στη γλώσσα του στρατού βρίσκουμε τη λέξη *αρχιδέας* που σημαίνει το δόκιμο (από λογοπαίγνιο με τα αρχικά ΔΕΑ). Στη *Νεοελληνική Αθυροστομία* της Μ. Κουκουλέ το γυναικείο αιδείο αποκαλείται *οντάς* (στο δίστιχο: «μες στο' Αγγέλας τον οντά/ μαύρος ντούμπανος βροντά»), *κλαπαρχίδω* και *ψωλοσακατεύτρα* ονομάζεται η ερωτική γυναίκα. Βρίσκουμε ακόμα την κατάρα «να στραβοψωλιάσεις!», τους χαρακτηρισμούς σεμνής γυναίκας: «*χριστιανομούνα, αθαθομούνα, νοικοκυρο-πουτάνα*», τα παρωνύμια γυναικά: *Μουνοκαΐσαρας, μουννοβοσκός*, τη φράση «έπεσε *μουννοθύελλα*» = ήρθε πλήθος γυναικών.

4. Διάλεκτοι και ιδιώματα

Νομίζω ωστόσο ότι, όσο ευφάνταστο κι αν είναι το γλωσσικό υλικό της αργκό στη λεξιλογική ομάδα των γεννητικών οργάνων, δεν μπορεί να συγκριθεί με το αντίστοιχο των νεοελληνικών διαλέκτων και ιδιωμάτων, καθώς υπάρχουν κάποιες ουσιαστικές διαφορές:

1. Πρώτ' απ' όλα οι ονομασίες των γεννητικών οργάνων, μετωνυμικές και ευφημιστικές είναι πολύ περισσότερες αριθμητικά, πολλές απ' αυτές μάλιστα παραπέμπουν στις αντίστοιχες αρχαιοελληνικές¹³. Έτσι, ενδεικτικά, το ανδρικό μόριο ονομάζεται: α. από το σχήμα και το μέγεθος: *κολόκα* (= κολοκύθα), *λάλα*, *η* (=1. κάμπια, 2. πέος μικρού παιδιού), *μασουράκι* (Στερελλ.) (= 1. μικρό μασούρι, 2. το πέος μικρού παιδιού), *μαντζαφλάρι* (Βιθυν.) (= κρεμαστάρι, κάτι που προσθέτουμε κ.ά.), *κακαλιά* (= δέντρο), *κρεμαντέλια* (το πέος με τους όρχεις επειδή κρέμονται –Α. Ρουμελ. –στις Σέρρες λέγονται *χαρχαγκέλια*), *μπίλι*, *το* (= 1. αιχμηρό κομμάτι ξύλου, εξάρτημα του παιδικού παιχνιδιού ντάλια (Πελοπν.), 2. το πέος του μικρού παιδιού –Κάρπ.), *ράι* (Ικαρ., < ουράδι, – βλ. και α.ε. *κέρκος* = ουρά), *τομπρούκι* (=1. μεγάλος κορμός δέντρου –πολλαχ. 2. το μεγάλο πέος (Στερελλ. Αράχ.), *κομπαρούλα*, *η* (Θήρ.) (πιθ. <κομπάρα = μεγάλη άρθρωση < κόμπος), *μονόματος*, *ο* (Τριχωνία), *μπουρνιδόρος*, *ο* (Ιθάκ.) (<μπουρνί = πήλινο δοχείο), αντίστοιχα στη Μακεδονία *μπουτσαρίκα*, στη συνθηματική γλώσσα των κτιστών της Ηπείρου λέγεται *μπράνα*, που κυριολεκτικά σημαίνει ένα είδος ποταμίσιου ψαριού, *ρόζος* (Κρήτ.), *τριλέτρι* (Μεγίστ.) (κυριολεκτικά = τριπλό άροτρο. φρ. «Τ' αρχίδια του τριλέτρι κι η ψωλή καμάτσι»). β. από το συσχετισμό με διάφορα είδη όπλων και εργαλείων, που αποτελεί υποομάδα της προηγούμενης κατηγορίας. Εδώ η ομοιότητα δεν περιορίζεται μόνο στο σχήμα αλλά και στη λειτουργία: η επιθετική χρήση του όπλου αποτελεί μεταφορά για τον ενεργητικό ρόλο κατά τη σεξουαλική πράξη. Έτσι το πέος ονομάζεται: *κουμπούρα* (Πελοπν. Σπάρτ.), *τουφέκι* (Εύβ. Λιχάς), *σινακίλια*, *τα* (Κύπρ.) (= 1. σκεύη και εργαλεία, 2. το πέος και οι όρχεις μαζί < προφανώς τουρκ. silahlik = ζώνη οπλισμού), *καραμπίνα*, *πυρόβολος* (Θεσσ.), *σπαθί* (= πέος τράγου – Πελοπν.), *τσακμάκι* (Θεσσ.), *σντριβίδι* (Δ. Κρήτ. Αλικάμπ. βλ. και επωδή: «Ὡς ἐκό(λλ)ησεν ἡ πίσσα/ 'ς τὸ (λ)αιμὸ τση κο(λ)οκύθας/ εἰς τὴν (ρ)ιζοκο(λλ)ήση/ τοῦ γαβ(ρ)οῦ το *σνδ(ρ)ιβίδι*/ 'ς τὴ (ρ)ιζοκολιά τση νύφης»¹⁴), *χρειασικό* (=1. αγροτικό εργαλείο ή γενικά εργαλείο – Μακεδ. (Πεντάπολ.) Θράκ. (Σκοπ.). 2. Η ανάγκη (ενιαχ.) 3. πέος –Ιος- φρ.: *γαργαλιέται, είναι γαργαλιάρα, μα δεν έχει χρειασικό*), *σύνεργο* (Θεσσ. Πήλ.) και *ύπουργα* (=τα ανδρικά γεννητικά όργανα –Λευκ.), *χαλάτι* (= σε διάφορα μέρη σημαίνει το παλαμάρι, στην Ήπ. =το πέος). Αντίστοιχα στα αρχαία ελληνικά έχουμε τις ονομασίες *ξίφος*, *ρόπαλον*, *σανν(ν)ίον* (=δόρυ) κ.λπ. γ. από την έντονη σεξουαλική δραστηριότητα: *ζάβλακας* (επειδή ζαβλακώνεται, χαζεύει), *καπριάνα* και *καπροτσούλι* (επειδή μοιάζει στο μέγεθος και στη δραστηριότητα με το πέος κάπρου). Εδώ ανήκουν και οι ονομασίες που συσχετίζουν το πέος με το σκύλο, αντίστοιχα και με την αρχαιοελληνική ονομασία του *κύων*. Έτσι στη Μακεδονία *μέντζος*

¹² Εύιος Ληναίου (1935: 3).

¹³ Τα παραδείγματα διαλεκτικού υλικού που παρατίθενται προέρχονται από το αρχείο του ΚΕΝΔΙ.

¹⁴ Πάγκαλος Γεώργιος (2002: 289).

ονομάζεται τόσο το πέος όσο και ο σκύλος. Αλλού βρίσκουμε το δίστιχο: «Στα καστανομαζώματα θε νάρθω στο χωριό σου,/ να βάλω το *κουλούκι* μου να πιάσει το *λαγό* σου!» (κουλούκι = σκύλος).

Αντίστοιχα οι όρχεις ονομάζονται είτε από το στρογγυλό τους σχήμα ή τη μαλακή υφή τους π.χ. *αβγά*, *βαρίδια* και *βαριδάκια*, *τρυφερά* και *τρυφερούλια*, *μπάλες*, *βωλαράκια* (Κρήτ.), *βόλια* (Χίος), *δεκαράκια* (Πελοπν. Καλάβρ.) και *δέκαρα*, *κοκόβια* (=καρύδια –Χίος), *ψαχνά*, είτε έχουν κάποια ευφημιστική ονομασία π.χ. *αμαρτωλά*, *αμίλητα*, *αμάλαγα* (=αυτά που δεν πρέπει κανείς να αγγίζει), *αμελέτητα*, *αχαμνά*, ενώ διατηρείται σε μικρότερο βέβαια βαθμό, η α.ε. συνήθεια για ονομάτισή τους με βάση τη διπλή τους υπόσταση, π.χ. *γείτονες*.

Ας περάσουμε τώρα σε ονομασίες που αναφέρονται στο γυναικείο αιδείο. Αρχικά θα ήθελα να παρατηρήσω πως, αντίθετα με την επισήμανση του Κοραή, η λ. *πουτί* δεν παρουσιάζεται τόσο συχνά στο διαλεκτικό υλικό. Ασφαλώς υπάρχει, συναντιέται άλλωστε και σε κάποια σύνθετα (πρβλ. και το όνομα *Σταχτοπούτα* στο γνωστό παραμύθι) δεν είναι όμως τόσο ευρεία και διαδεδομένη όσο η πάγκοινη λέξη *μουνί*. (Αντίστοιχα για το ανδρικό μόριο οι πιο διαδεδομένες ονομασίες είναι το *ψωλή* και το *πούτσος/πούτσα*, ενώ η λ. *φύση* έχει περιοριστεί σημασιολογικά κυρίως στο ανδρικό μόριο και όχι και στο γυναικείο). Πολλές ονομασίες προέρχονται: α) από το σχήμα της κοιλότητας ή από τις διπλώσεις που σχηματίζονται στη γυναικεία γενετήσια περιοχή, π.χ. *κοίτη* (= εξωτερικά γεννητικά όργανα – Πελοπν.), *πηγαδούλι* (χρησιμοποιείται στη νηπιακή γλώσσα – Ήπ.), *λάκκα*, *μαλλιαρόχωρα* (Ζάκυν.), *μαναριά* (κυριολεκτικά σημαίνει τσεκουριά < μανάρα =τσεκούρι –Κορωνίς Νάξου), *μελοκούρουπο* (κυριολεκτικά το δοχείο που βάζουν το μέλι –Κρήτ.), *μπακρατσάρβαλο* (= 1. χείλος μπακρατσιού, δοχείου, 2. χείλος αιδείου –Στερελλ. Αράχ.), *πορτοφολάκι* (Ιος), *πουρσέλι* (<πούρσα = τσέπη –Οινούσες), *σκισμάτι* και *σκισμάταρα* (Μακεδ. Καστορ.), *σύκο* (-η ονομασία υπάρχει από την αρχαιότητα- και φρ. «ωρίμασε το σύκο» = (για κορίτσι: ήρθε σε ώρα γάμου), *απίδι* (Ήπ.) (προφανώς από παρετυμολόγηση από το αλβανικό *πίδι*= γυναικείον αιδείο)¹⁵. Υποκατηγορία αποτελούν οι ονομασίες που παραπέμπουν σε όστρακα, όπως *κόχλος*, ο (η ομοιότητα εδώ βρίσκεται πέρα από το σχήμα και στο χρώμα, εφόσον η λ. σημαίνει: 1. πορφύρα, 2. σαλιγκάρι, 3. μαύρη βαφή, 4. κουφέτο σε σχήμα μικρού χωνιού που έχει μέσα του ένα χαρτί με δίστιχο, 5) μεγάλο κοχύλι που μεταχειρίζονται για τηλεβόα, 6. μτφ.: το γυναικείο αιδείο), το *χάβαρο* (κυριολ. = οστρακόδερμο), *κοράλι*, *μαργαριτάρι*, η *τσαβίδα* (κυριολ. σημαίνει μύδι ή όστρακο –Θράκ.). β) Επίσης αρκετές είναι οι ονομασίες που παραπέμπουν στο μαύρο χρώμα του εφηβαίου: π.χ. *κατσιβέλικο* (φυσικά εδώ είναι εμφανείς οι ρατσιστικές αντιλήψεις), *αχινός* (βλ. άσμα κατά το οποίο ένας γέρος προτείνει σε καλόγριες: «Ελάστε να χορέψωμε/ ανοιχτά, προσκελωτά/ και με τον *αχινό* μπροστά» - Κοζ. Βόιον), *μουτζούρα* (σε σκωπτικό άσμα από τη Νάξο), *πισσούδι* (Λέσβ.) ενώ στην αρχαιότητα είχαμε αντίστοιχα ονόματα, όπως *μέλαν* (=μαύρο), *οπτάνιον* (=ψημένο), *εσχάρα* (εκτός από το μαύρο χρώμα, λεγόταν έτσι και από την ομοιότητα του σχήματος, κατά τη δίπλωση της σάρκας). γ) Ακόμη βρίσκουμε ονομασίες του αιδείου από ανθωνύμια, πολλές από τις οποίες χρησιμοποιούσαν οι μαμές, π.χ. το *μάτι του ήλιου* (=ηλιοτρόπιο), ο *ανθός του κουτιού*, η *καμπανούλα της κόρης*, ο *κεραπουκάτος ανθός* (=που βρίσκεται κάτω από τον αφαλό), και φράσεις όπως: «αυτό το κορίτσι έχει ανέγγιχτο τον ανθό του», «η καθαρομελάχρινη το έχει κόκκινο και λουλουδάτο»¹⁶ δ) από ουράνια σώματα: π.χ., *πούλια*, *δόξα* (=ουράνιο τόξο), *αστέρι* (από παρετυμολόγηση του «υστέρα»). δ) Άλλοτε πάλι οι ονομασίες του παραπέμπουν στη σεξουαλική διέγερση που προκαλεί στον άνδρα ή γενικότερα στη σεξουαλική λειτουργία: π.χ. *μίτσα*: (κυριολεκτικά σημαίνει φυτίλι, έναυσμα –Θεσσ.), *νταραβερίκο*: (επειδή κάνει «νταραβέρι», δόσοληψία, εδώ. μτφ. εννοείται η συνουσία –Κρήτ.), *θέλημα* φρ. «Μας έφτανε και μίγια *ψωλίτσα* τώρα που δεν έχουμε τίποτα να μας το αργαλικήση (γαργαλήση) το έρμο το *θέλημα*» - Ερεικ.) Αρκετές από τις ονομασίες που συναντούμε δείχνουν μια αρκετά θετική προσέγγιση των γεννητικών οργάνων της γυναίκας και μια αξία που δινόταν στη σεξουαλική πράξη, βλ. π.χ. την ονομασία *μελοκούρουπο* (κυριολεκτικά το δοχείο που βάζουν το μέλι –Κρήτ.). Αντίστοιχο θετικό πρόσημο αναγνωρίζουμε και στους εύγλωττους αρχαιοελληνικούς ευφημισμούς *άμβων* (=άμβωνας, εξέδρα), *κέλης* (=μικρό πλοίο), *μέλαθρον* (=οίκημα, παλάτι).

Ειδικές ονομασίες υπάρχουν επίσης για την κλειτορίδα: π.χ. *παπαδίτσα*, *γλωσσίδι* και *γλωσσιδάκι*, *κουμπί*, όπως και για τον παρθενικό υμένα, άλλοτε αρνητικού προσανατολισμού, π.χ. *αχαμνότερυπα* (=λεπτή τρύπα, ευκολόσχιστη και εύθρυπτη), *ζέτρυπο* (=διάτρητος παρθενικός υμένας), κι άλλοτε θετικού π.χ. *στεφανάκι*, *λαγουδικό*, *καμαράκι*, *στόλος* κ.α.¹⁷

Πάντως οι κοινές ονομασίες για τα ανδρικά και γυναικεία γεννητικά όργανα είναι συνήθως ευφημιστικές και συνήθως αρνητικού προσανατολισμού: *κρυφά*, *απόκρυφα*, *πράμα*, *αποκατινά*. Επίσης εμφανίζεται συχνά και η ευφημιστική χρήση των αντωνυμιών *αυτός*, *απαντός* κυρίως στα ιδιώματα του

¹⁵ Σκουβαράς Β, (1954: 29).

¹⁶ Οικονομόπουλος Χρ. (2002: 327-328).

¹⁷ Οικονομόπουλος Χρ. (2002: 323-325).

νησιώτικου χώρου, π.χ. το *’ποφτείνo* = το γυναικείο αιδoίο, η *τέτοια* = το ανδρικό μόριο (Μάν. Κρήτ. Ικαρ. κ.ά.), όπου και η κοινή φρ. «σε γράφω στα τέτοια μου» = γεννητικά όργανα, η οποία διαλεκτικά, κατά την Ε. Γιακουμάκη, λεγόταν μόνο από άνδρες.¹⁸

Επιπλέον βρίσκουμε πολλές ονομασίες γεννητικών οργάνων που απεικονίζουν μια δύσκολη κοινωνική πραγματικότητα ως προς τις σεξουαλικές σχέσεις, π.χ. *πασχαλινό*, το = μτφ. το γυναικείο αιδoίο, γιατί μόνο το Πάσχα το βλέπουν οι χριστιανοί (Κρήτ.) ή φρ. ‘Σήμιρα είναι η Τυρ’νή/ απουκρεύουν του μουνί’ (άσμ. - Μακεδ. Μεσορ.), ενώ το *φύκωμα του ανθού*, το *βαψίμι της φωλιάς* κ.ά. είναι ονομασίες μεθόδων αναπαρθενισμού.¹⁹ Άλλες δείχνουν την αντίληψη για τη λειτουργία που οφείλουν να έχουν τα γεννητικά όργανα στη ζωή: π.χ. στην Κοζάνη *φαμελιά* λέγονται τα γεννητικά όργανα του άνδρα, στη Μεγίστη το γυναικείο αιδoίο *τρυπανιά* επειδή ανοίγει με το τρυπάνι (=πέος), ενώ το ανδρικό λέγεται και *γλεντιστής*. Ο άντρας με μεγάλο πέος στο ΝΑ Αιγαίο λέγεται *σερμαγιαλής* που αρχικά σημαίνει κεφαλιούχος. Στη Λακωνία πάλι βρίσκουμε τη φρ. *Μου ρθανε τ’ αδρίκεια μου*. *Της ήρθανε κι αυτηνής τ’ αδρίκεια της*.²⁰ – δηλαδή ακόμα και ο γυναικείος οργασμός δηλώνεται με έναν όρο που χαρακτηρίζει τον άνδρα, διαπιστώνουμε δηλ. ότι ο προσανατολισμός βρίσκεται σαφώς στην κατεύθυνση του ανδρικού οργασμού. Φυσικά κάποιες ονομασίες αντικατοπτρίζουν την έντονη διάθεση των αντρών για σεξουαλικές σχέσεις που όμως λόγω των απαγορεύσεων σπάνια βρίσκει εκτόνωση: π.χ. το ανδρικό μόριο ονομάζεται *παντέρημος*, *βάσανο*, όπως και παλιά, *παλιατζίκος* ή το στιγματισμό του γυναικείου ερωτισμού: π.χ. σε φράση από μάνα προς τη μικρή της θυγατέρα λέγεται: «Σκέπασε τη φωλιά σου, μωρή!» ή φρ. «Όταν κάθεσαι να μην έχεις αναχούβδουλα τα πόδια σου (ανοιχτά) και φαίνονται τα κρυφά σου». Ειρωνικά πάλι στην Καπαδοκία το γυναικείο αιδoίο ονομάζεται *πλυμένο* (φρ. υβριστική: «γαμώ δου πλυμένου τ’» - Καππ. Μιστ. Δίλ.), Πολλές είναι και οι υποτιμητικές ονομασίες της χήρας, από το αιδoίο: π.χ. λέγεται: *χάσκα*, η (επειδή το αιδoίο της είναι ανοιχτό και χαίνον). Επίσης: *τσαφάρα*, *χάρβαλη*, *μουρόχαυλη*, *γαβαλομούνα*, *χάχανη*, *χανομούνα*, *χλαπατσάνα*, *χάρχαλη*, *αγκλαβάνη*, *φαρδομούνα*, *ανέχαρη*, *γρυλλομούνα*, *ξεμανταλωμένη* ενώ το ίδιο το αιδoίο της χήρας λεγόταν *πάρταλο*, δηλ. το κουρελιασμένο.²¹

2. Η πρώτη λοιπόν διαφορά ανάμεσα στην κοινή και τις διαλέκτους είναι το πλήθος των ονομασιών των γεννητικών οργάνων. Μια άλλη διαφορά από την κοινή νε. αλλά και από τη νε. αργκό, είναι το πλήθος των παράγωγων και σύνθετων που συναντάμε στις διαλέκτους και τα ιδιώματα, αλλά και οι χρήσεις τους. Είναι δεκάδες οι λέξεις που αναφέρονται στα γεννητικά όργανα, ως υποκοριστικά, μεγεθυντικά, παρωνύμια αλλά ακόμη και τοπωνύμια, που, μάλιστα, χρησιμοποιώντας ένα μεγάλο αριθμό μορφημάτων για την παραγωγή τους φανερώνουν μια δυναμική τάση γλωσσικής δημιουργίας. Για του λόγου το αληθές, αναφέρω στη συνέχεια ένα συνοπτικό δείγμα από τις γλωσσικές οικογένειες με α’ ή β’ συνθετικό τη λέξη *μουνί* και τη λέξη *πούτσος* αντίστοιχα. Έτσι, βρίσκουμε τα μεγεθυντικά *μούνα*, *μουνάρδος* (Κεφαλλ.), *μουνάρα*, (Πελοπν., Θάσ.), *μούναρος* (σημαίνει επίσης τη μεγαλόσωμη γυναίκα), τα υποκοριστικά *μουνάκι*, *μουνουδι* (Προπ.), *μουνούλι* (Μακεδ.), *μουνόπον* (Πόντ. Τραπ.), *μουναρδέλι* (άσμα: «το μουνί το μουναρδέλι, φουσκωμένο σα σκουτέλι» - Ζακ.), τα παρωνύμια *Μούναρος* (Σίφν.), *Μουνάκας* (Θάσ.), *Μουνάς* (Στερελλ., Φούρν.). Από το *πούτσος*, έχουμε τα μεγεθυντικά *πουτσάκλα* (Τριχων.), *πουτσάρα* (πολλαχ.), *πουτσαρος* (Ερεικ. Πελοπν.) τα υποκοριστικά *πουτσάκι* (Ερεικ.), *πουτσαράκι* (Πελοπν.), *πουτσαρέλα* (Ερεικ.), *πουτσί* (ενιαχ.), *πουτσίδι* (Θεσσ. Στερελλ.) τα παρωνύμια *Πουτσάγκας* (Θεσσ.), *Πουτσάς* (Στερελλ. Εύβ.), *Πουτσής* (Σύρ.), *Πουτσίας* (Κεφαλλ.), *Πουτσίτας* (Κεφαλλ.), το επών. *Πουτσέλας* (Τσακων.), Βλέπουμε λοιπόν ένα μεγάλο αριθμό υποκοριστικών, μεγεθυντικών και παρωνυμίων (αλλά ακόμα και ένα επώνυμο!), με κάθε πιθανό επίθημα, γεγονός που εκτός από τη δυναμική της γλωσσικής παραγωγής δείχνει επίσης και μια απελευθερωμένη στάση απέναντι στο αντικείμενο που αντικατοπτρίζουν. Ενδιαφέρον αλλά και περιέργεια προκαλεί το ότι από αυτό το λεξιλόγιο βρίσκουμε και τοπωνύμια: *Μουνάδι* (Τήν.), *Μουνόκωλος* (Μάν.), *Μουνοπλύτης* (Αμοργ.), *Μουνοθώρι* (Φούρν.), *Μουνοστήθι* (Αττικ.) και *Πούτσαρη*, η (Θεσσ.) *Πουτσόβρυση* (Μακεδ.) *Πουτσικάκι* (Ιθάκ.) αντίστοιχα. Την ίδια έλλειψη ταμπού απέναντι σε ένα τέτοιο σημασιολογικά λεξιλόγιο δείχνουν και τα παράγωγα: α) από το μουνί: *μουνικό* (= αλοιφή για τη θεραπεία παθήσεων των εξωτερικών γεννητικών οργάνων της γυναίκας²²), *μουναρίζω* (= έχω εμμηνόρροια - Στερελλ.), *μουνέλος* (= ο γυναικάς - Ζάκ.), *μουνιενιές* (= γυναικάς - Κρήτ.), *μουνίλα* (= μυρωδιά από έμμηνα - Πόντ.), και β) από το πούτσος: *πουτσαράς* και (Στερελλ.)

¹⁸ Γιακουμάκη Ελευθερία, *Ευφημισμός. Γλωσσική προσέγγιση*, Αθήνα 2000, σελ. 87.

¹⁹ Οικονομόπουλος Χρ. (2003: 193).

²⁰ ΙΑΝΕ, λ. αντρίκειος.

²¹ Οικονομόπουλος Χρ., (2003: 190).

²² Οικονομόπουλος Χρ. (1999: λ. μουνικό).

πουτσαρίνης (= αυτός που έχει μεγάλο μόριο αλλά και ο ρωμαλέος, θαρραλέος, φιλότιμος, αντίστοιχα και *πουτσαρίνα* (= γυναίκα δυνατή, άξια, καλή), *πουτσαρίης* (= αυτός που έχει μεγάλο ανδρικό μόριο - Πελοπν.), *πουτσαρένιος* (=ικανός, άξιος άνθρωπος -Ηπ.), Επίσης και τα σύνθετα: α) *τραστομούνα* (= γυναίκα με αιδόιο μεγάλο σαν τράστο (= ταγάρι -Πελοπν.), *λαγκαδομούνα* (= 1. γυναίκα με μεγάλο αιδόιο, 2. αργόσχολη γυναίκα), *φαρμακομούνα* (= η γυναίκα της οποίας πέθαναν οι προηγούμενοι δύο ή τρεις άντρες, ή αντροφάγα.), *πορδομούνα* (= αυτή που αφήνει αέρια ηχηρά από το αιδόιο -Χίος), *μουνολάσι* (= συνάθροιση γυναικών -Ζάκ.) και *μουνοπανήγυρο* (= συνάθροιση πολλών γυναικών -Κεφαλλ.) *μουνομοίρι* (= μερίδιο προερχόμενο από τη γυναίκα -Θράκ.), *μουνομούλκι* (= κτήμα από προίκα γυναικός -Μακεδ.), β) *πουτσαδιάστρα* (= γυναίκα που της αρέσουν πολύ οι άντρες -Κεφαλλ.), *πουτσανάλατος* (= ύβρις που σημαίνει "μωρό" -Πελοπν.), φρ.: «Α ναχαθής ρε πουτσανάλατε», *πουτσομάλλι* (= τριχοφυΐα του ανδρικού μορίου -Μακεδ.), *πουτσοόρριγμα* (=Μακεδ.) και *πουτσοόχυμα* (Ερείκ.) (= εκσπερμάτωση, το σπέρμα του ανδρός), *πλατυπούτσης* (= αυτός που έχει πλατύ πέος -Πελοπν.), *κοκκαλόπουτσος* (= αυτός που έχει σκληρό πέος -Πελοπν.), *πουτσοχάφτρα* (= εκείνη που δεν χορταίνει τον άντρα -Πελοπν.), *πουτσοδέτης* (= ζώνη -Μακεδ., Θάσ.), *πουτσοκάμισο* (= πεοκαλύπτρα -Στερελλ.)

3. Τέλος ιδιαίτερη αξία νομίζω πως έχει και μια άλλη, συχνή γλωσσική διαδικασία που δεν απαντά ούτε στην κοινή ούτε στην αργκό (ή απαντά σπάνια). Ενώ δηλαδή συνήθως χρησιμοποιούνται μετωνυμίες που παρομοιάζουν τα γεννητικά όργανα με κάτι άλλο, δηλ. κάποιο άσχετο με τη γενετήσια λειτουργία αντικείμενο, εδώ βρίσκουμε και το αντίθετο: αντικείμενα άσχετα με τη γενετήσια λειτουργία να ονοματίζονται από παράγωγα ή σύνθετα ονομασιών των γεννητικών οργάνων, με βάση κάποιο κοινό τους χαρακτηριστικό. Αυτή η διαδικασία, πέρα από το χιούμορ, τη φαντασία και τη γλωσσοπλαστική δύναμη που περικλείει, φανερώνει, θεωρώ, και την απενοχοποιημένη οπτική των φορέων του διαλεκτικού λόγου απέναντι στη σεξουαλική πράξη. Θα χρησιμοποιήσω παραδείγματα και πάλι από τις γλωσσικές οικογένειες των λέξεων *μουνί* και *πούτσος*: *μουνάβρα* (=είδος μαλακίου όμοιο με το καλαμάρι (Κάλυμν.), *μουνάκλα* (Στερελλ, Παξ.)/ *μουνάρα* (Πελοπν.) *μουνήθρα* (Σκύρ.), *μουνίτσα* (Πόντ.), *θαλασσομούνι* (Μακεδ. Ν. Ηράκλ.) = η μέδουσα, *μουναρίδα* (Κύθν, Σίφν, Φολεγ, Θεσσ.) και *μουναριδόγουλο* = είδη φυτών, *μουνοθώρι* (= το ουροδοχείο -Χίος, Σάμ, Ικαρ, Πάρ.) *μουνοσκεπαστήρα* (Θάσ.) και *μουνοσκέπη* (= η ποδιά -Μακεδ.), *πουτισιδόπον* (= βασιλόπουλο - Πόντ.), *πουτσοόγιαλος*, ο (= είδος θαλασσινού μαλακίου όμοιο με το ανδρικό μόριο -Κέρκ.) Η διαδικασία αυτή γίνεται συχνότερη στα ανιγμάτα, π.χ. «παπαδιά σιδερομούνα, σιδερόπουτσα γυρεύει»= σιδερένιο κλειδί -Πελοπ.) ή «αντιπατώ τ' αρχίδια μου, σηκώνεται η ψωλή μου»=τα μιτάρια και ο αργαλειός.

5. Συμπεράσματα

Μετά από την παράθεση όλου αυτού του υλικού νομίζω πως συμπερασματικά μπορούμε να πούμε ότι:

1. Οι διάλεκτοι και τα ιδιώματα χρησιμοποιούν άφθονες ονομασίες για να ονοματίσουν τα γεννητικά όργανα. Η ποσότητα των ονομασιών αυτών είναι ασύγκριτα μεγαλύτερη από το φειδωλό λεξιλόγιο της κοινής αλλά και από το επίσης μικρό και όχι τόσο ευρηματικό λεξιλόγιο της αργκό. Ίσως λοιπόν εδώ θα έβρισκε ο Κοραΐς απάντηση στο ερώτημά του.

2. Πέρα από την ποσότητα, και η φαντασία, το χιούμορ, η ευρηματικότητα και η ποικιλία των ονομασιών των γεννητικών οργάνων και του σχετικού φρασσεολογικού υλικού φανερώνει πως η παραδοσιακή κοινωμία – φορέας του ιδιωματικού λόγου ήταν αρκετά πιο απενοχοποιημένη από την αντίστοιχη αστική γύρω από τη σεξουαλικότητα.

Φυσικά, το θέμα σε καμία περίπτωση δεν έχει εξαντληθεί. Δεν έγινε π.χ. αναφορά, στο πλαίσιο αυτής της ανακοίνωσης στο ενδιαφέρον λεξιλόγιο των συνθηματικών γλωσσών, στους δυσετυμολόγητους όρους που περιμένουν τη διερεύνησή τους, στα αντίστοιχα ξενόγλωσσα λεξιλόγια κ.ά. Αυτή αποτελούσε απλά μια πρώτη απόπειρα για την ανάδειξη αυτού του υλικού. Ο δρόμος της έρευνας απλώνεται μπροστά μας πλατύς.

ΠΕΡΙΛΗΨΗ

Σε αυτή τη μελέτη εξετάζονται αντιπαραθετικά μια απομαγνητοφωνημένη δημοσιογραφική συνέντευξη και αποσπάσματα του κειμένου των πρακτικών μιας δίκης. Στο θεσμικό πλαίσιο του δημοσιογραφικού και του δικανικού λόγου αντίστοιχα αναλύεται η διαπραγμάτευση περιστατικών άσκησης βίας και η συνακόλουθη απόπειρα απόδοσης ευθυνών στους εμπλεκόμενους μέσα από την κατασκευή εναλλακτικών αφηγήσεων (Kompter 2006, Heffer 2010). Συγκεκριμένα, αναλύονται οι ερωτηματικές δομές που επιλέγονται και απευθύνονται από δικηγόρους και δημοσιογράφους σε μάρτυρες και συνεντευξιαζόμενους και η ανταπόκριση σε αυτές (Clayman & Heritage 2002, Tracy & Robles 2009, Holt & Johnson 2010, Ehrlich 2010). Με βάση την ανάλυση, επισημαίνονται οι ομοιότητες των επικοινωνιακών στρατηγικών που διατρέχουν δύο είδη δημόσιου λόγου διαφορετικών ως προς την πλαισίωση και τη συγκρότησή τους.

Λέξεις κλειδιά: Δημοσιογραφικός λόγος, Δικανικός λόγος, Ερωτήσεις/ Απαντήσεις, Ταυτότητα

1. Εισαγωγή

Στο πλαίσιο δύο απομακρυσμένων ως προς τον τόπο και το χρόνο γεγονότων που πρόσφατα απασχόλησαν την επικαιρότητα -τη δολοφονία του Αλέξανδρου Γρηγορόπουλου στην Αθήνα και τον τραυματισμό του Jody Mc Intyre στο Λονδίνο κατά τη διάρκεια επεισοδίων με τις αστυνομικές δυνάμεις- έγινε απόπειρα δημιουργίας εναλλακτικών αφηγήσεων με στόχο την ενοχοποίηση των θυμάτων και τον συνακόλουθο επιμερισμό της ευθύνης ανάμεσα σε δράστες και θύματα. Αυτές προέκυψαν με αφορμή την εξέταση των μαρτύρων από τους συνηγόρους υπεράσπισης στη δίκη Γρηγορόπουλου και τη συνέντευξη του Mc Intyre σε δημοσιογράφο του BBC. Στο πλαίσιο της Ανάλυσης του Δημοσιογραφικού και του Δικανικού Λόγου, στη μελέτη αυτή αναλύονται αντιπαραθετικά το απομαγνητοφωνημένο κείμενο της συνέντευξης Mc Intyre και αποσπάσματα των πρακτικών της δίκης Γρηγορόπουλου. Συγκεκριμένα, εξετάζονται οι ερωτηματικές δομές και η ανταπόκριση σε αυτές σε σχέση με τη συνεργατικότητα ή την αντίσταση που επιδεικνύει ο ερωτώμενος. Αναλύονται οι ερωτηματικές εκφορές στο πλαίσιο των αλληλουχιών που εμφανίζονται (Clayman & Heritage 2002, Holt & Johnson 2010, Tracy & Robles 2009), και οι απαντήσεις κυρίως σε ότι αφορά την αντίσταση που προβάλλεται σε αυτές από την πλευρά του συνεντευξιαζόμενου ή του εξεταζόμενου μάρτυρα αντίστοιχα (sequential analysis). Επίσης, προσδιορίζεται η λειτουργία τους σε ό,τι αφορά την κατασκευή εναλλακτικών αφηγήσεων για τα γεγονότα που εξετάζονται (Kompter 2006, Heffer 2010). Οι αλληλουχίες ερωτήσεων/ απαντήσεων συνδέονται με την οργάνωση του λόγου στο πλαίσιο δημοσιογραφικών και νομικών διαδικασιών αντίστοιχα, καθώς και με την απόπειρα κατασκευής της ταυτότητας του ερωτώμενου ως μη αξιόπιστου μάρτυρα των γεγονότων. Με βάση την ανάλυση, επισημαίνονται οι ομοιότητες των επικοινωνιακών στρατηγικών που διατρέχουν δύο είδη δημόσιου λόγου, τα οποία διαφέρουν σημαντικά ως προς την πλαισίωση και τη συγκρότησή τους.

1.1 Πολιτική Δημοσιογραφική Συνέντευξη/ Ποινική Δίκη

Η πολιτική δημοσιογραφική συνέντευξη, και συγκεκριμένα η συνέντευξη που μεταδίδεται κατά τη διάρκεια δελτίων ειδήσεων, αποτελεί αντικείμενο διερεύνησης κατά τις τελευταίες δεκαετίες στο πλαίσιο της ανάλυσης του δημοσιογραφικού λόγου (Clayman & Heritage 2002). Τα βασικά ερωτήματα που τίθενται κατά την ανάλυση αφορούν τη διερεύνηση των τρόπων με τους οποίους η συνομιλιακή

οργάνωση και οι επικοινωνιακές πρακτικές των συμμετεχόντων διαμορφώνουν κατά τρόπο δυναμικό τον ίδιο τον θεσμό της πολιτικής δημοσιογραφίας. Μέσα από καθημερινές συνομιλιακές πρακτικές (την εναλλαγή των ομιλητών στο βήμα, την εισαγωγή νέου θέματος, τη διαδικασία της διόρθωσης, τα ζεύγη των ερωταπαντήσεων, κ.τ.λ.), οι συμμετέχοντες στη διαδικασία της συνέντευξης κατασκευάζουν τους θεσμικούς τους ρόλους και επιδιώκουν την εκπλήρωση επικοινωνιακών στόχων που συνδέονται με την πολιτική τοποθέτηση του μέσου (συχνά άρρητη) και του ιδεολογικού και πολιτικού χώρου που εκπροσωπούν. Η πολιτική δημοσιογραφική συνέντευξη διαρθρώνεται με βάση τη διαδοχική εναλλαγή συνεντευκτών και συνεντευξιαζόμενων στο βήμα σε αντιστοιχία με την εκφώνηση ερωτηματικών και απαντητικών εκφορών κατά τις οποίες τα δικαιώματα και οι υποχρεώσεις των συμμετεχόντων παραμένουν δεδομένα και η αντιστροφή των συνομιλιακών ρόλων αυστηρά περιορισμένη. Σε αυτή τη διαδικασία, τα συνομιλιακά δικαιώματα των συμμετεχόντων καθώς και η επιδιωκόμενη από αυτούς κατασκευή ταυτοτήτων αποδεκτών κατά τον μέγιστο βαθμό από τα ακροατήρια στα οποία απευθύνονται συντείνουν στην πραγμάτωση του θεσμού ως ενός διακριτού συνομιλιακού κειμενικού είδους. Η πολιτική δημοσιογραφία λοιπόν, συνδέεται με την οργάνωση του λόγου σε συνάρτηση με την επιδιωκόμενη επίτευξη των πολιτικών στόχων των εμπλεκόμενων μερών και ως εκ τούτου με τις πολιτικές λειτουργίες των κοινωνιών που υιοθετούν τον θεσμό. Η ανάγκη διερεύνησης των μηχανισμών που ενεργοποιούνται κατά τη διεξαγωγή των πολιτικών συνεντεύξεων συνδέεται επίσης, με τη δυνατότητα των απομακρυσμένων αποδεκτών του μεταδιδόμενου επικοινωνιακού συμβάντος να κατανοήσουν και να τοποθετηθούν κριτικά απέναντι στα τεκταινόμενα.

Αντίστοιχα, πέραν των ιδιαίτερων χαρακτηριστικών της διαδικασίας σε συνάρτηση με το νομικό πλαίσιο το οποίο βρίσκεται σε ισχύ σε διαφορετικές χώρες και συστήματα απονομής της δικαιοσύνης, η δικαστική διαδικασία αποτελεί ένα κειμενικό είδος με διακριτά χαρακτηριστικά σε ότι αφορά την οργάνωση του λόγου για την οποία ακολουθείται μια σειρά διαδικασιών και τελετουργικών που προβλέπονται από την εκάστοτε νομοθεσία. Σε αυτό το πλαίσιο αυτό ορίζονται οι επιτελεστικές λεκτικές πράξεις μέσω των οποίων, και εφόσον εκφωνηθούν, ξεκινούν και διεκπεραιώνονται τα επιμέρους στάδια της διαδικασίας μιας δίκης. Επίσης, ορίζονται τα συνομιλιακά δικαιώματα των συμμετεχόντων στη διαδικασία. Ορίζεται ποιος έχει το δικαίωμα να απευθύνει ερωτήσεις, σε ποιον, σε ποιο σημείο της διαδικασίας και με ποιο περιεχόμενο. Από τη θεσμοθετημένη κατανομή του λόγου στο πλαίσιο της ανακριτικής και δικαστικής διαδικασίας προκύπτουν άνισα συνομιλιακά δικαιώματα για τους συμμετέχοντες. Για παράδειγμα, οι συνήγοροι θέτουν ερωτήσεις και οι εξεταζόμενοι απαντούν χωρίς να είναι δυνατόν να αντιστραφεί η διαδικασία. Κατά το σύνολο των ανακριτικών και δικαστικών διαδικασιών και μέσω της εξέτασης των μαρτύρων επιχειρείται η αφηγηματική ανακατασκευή των γεγονότων που συνδέονται με την υπόθεση που συζητείται. Αυτό έχει σαν αποτέλεσμα την απόπειρα κατασκευής ανταγωνιστικών αφηγήσεων από τους αντιδίκους και τους εκπροσώπους τους (Kompter 2006, Heffer 2010).

Η πολιτική δημοσιογραφική συνέντευξη και η διαδικασία εξέτασης μαρτύρων φαίνεται να παρουσιάζουν σημαντικές αναλογίες ως προς τη δομή και τη στόχευση του παραγόμενου λόγου. Καταρχάς, εντοπίζονται αναλογίες σε ότι αφορά τα συνομιλιακά δικαιώματα των συμμετεχόντων. Και οι δημοσιογράφοι, όπως και οι συνήγοροι, θέτουν τις ερωτήσεις, τις οποίες οι συνεντευξιαζόμενοι και οι μάρτυρες καλούνται να απαντήσουν. Και στα δύο συμβάντα υπάρχει ελάχιστη δυνατότητα αντιστροφής αυτών των ρόλων. Στην πολιτική δημοσιογραφία κυριαρχεί το στερεότυπο του αμερόληπτου δημοσιογράφου η/ο οποίος- εκ μέρους του ακροατηρίου του- επιδιώκει να θέσει τον συνομιλητή του προ ερωτήσεων τέτοιων ώστε να τον/την οδηγήσει στην αποκάλυψη των απώτερων κινήτρων για τις επιλογές και τη δράση του. Σε αυτή την απόπειρα και η/ο δημοσιογράφος όπως και η/ο συνήγορος έμμεσα κατασκευάζει εναλλακτικά σενάρια. Δημοσιογράφος και δικηγόρος απευθύνονται στο κοινό (θεατές-ακροατές/ δικαστές-ενόρκους) μέσω του συνομιλητή τους, εφόσον αυτό πρέπει να πείσουν για την αναγκαιότητα της επιλογής τους και/ή την ορθότητα του προβαλλόμενου σεναρίου (Matoesian 2005, Ehrlich 2010). Επίσης, όπως ο συνήγορος κατά τη διεξαγωγή μιας δίκης δεν μπορεί να ισχυριστεί ίδια γνώση των γεγονότων, των οποίων η περιγραφή πρέπει να προκύψει από το λόγο των μαρτύρων, το επικρατών μοντέλο στην πολιτική δημοσιογραφία είναι αυτό του αμερόληπτου δημοσιογράφου ο οποίος θέτει και διαπραγματεύεται με επιμονή δύσκολα ερωτήματα διατηρώντας όμως την ουδετερότητα του (Clayman & Heritage 2002). Μέσα από το πρίσμα αυτών των παρατηρήσεων εξετάζονται οι ερωτηματικές και απαντητικές εκφορές στο πλαίσιο του δημοσιογραφικών και του δικανικών κειμένων αντίστοιχα.

1.2 Ερωτήσεις και απαντήσεις στο δημοσιογραφικό και δικανικό λόγο

Με αφετηρία τη θέση ότι “οι κοινωνικοί θεσμοί κατασκευάζονται δια του λόγου”, και μάλιστα σε άμεση συνάρτηση με τη μέθοδο με την οποία οι συμμετέχοντες διαχειρίζονται την εναλλαγή τους στο

βήμα (Clayman & Heritage 2002: 21), σε αυτή τη μελέτη εξετάζονται οι ερωτηματικές δομές που επιλέγονται και απευθύνονται από δικηγόρους και δημοσιογράφους σε μάρτυρες, αντιδίκους και συνεντευξιαζόμενους αντίστοιχα. Οι ερωτηματικές δομές που εκφωνούνται θα μπορούσαν να κατηγοριοποιηθούν ως εξής:

- ερωτήσεις μερικής αγνοίας (ανοιχτού τύπου/ Wh-q)
- ερωτήσεις ολικής αγνοίας (κλειστού τύπου/ Yes/no-q)
- βεβαιωτικές προτάσεις με προσλεκτική ισχύ ερώτησης ολικής αγνοίας (με ή χωρίς ερωτηματικό επιτονισμό)
- ερωτήσεις (είτε ανοιχτού είτε κλειστού τύπου) που εισάγονται με
 - βεβαιωτική/ες πρόταση/εις ή πλάγιο λόγο
 - αναδιατύπωση (formulation)
 - παράφραση ή επανάληψη του περιεχομένου προηγούμενων συνεισφορών

(Clayman & Heritage 2002, Tracy & Robles 2009).

Αναλυόμενες στο πλαίσιο των αλληλουχιών που εμφανίζονται (sequential analysis), οι ερωτηματικές εκφορές συνδέονται με την οργάνωση του λόγου στο πλαίσιο δημοσιογραφικών και δικανικών διαδικασιών. Με βάση την οργάνωση των *προτιμήσεων* (preference), οι ερωτήσεις φέρουν το βάρος μιας προσδοκίας (Clayman & Heritage 2002: 13), περιορίζοντας τις παραμέτρους επιλογής στην κατεύθυνση της προτιμητέας απαντητικής εκφοράς. Ασκούν δηλαδή, πίεση στον ερωτώμενο ώστε να επιλέξει εκείνη την εκδοχή που συμφωνεί με το προβαλλόμενο σενάριο, ή την άμεσα ή έμμεσα διατυπωμένη άποψη του συνομιλητή του. Στο πλαίσιο των δικανικών διαδικασιών κατά κύριο λόγο, οι ερωτήσεις λειτουργούν εργαλειακά για την κατασκευή εναλλακτικών αφηγήσεων για τα γεγονότα που εξετάζονται (Kompter 2006, Heffer 2010), καθώς και για την ενδεχόμενη απόπειρα κατασκευής της ταυτότητας των αντιδίκων ως μη αξιόπιστων μαρτύρων. Οι συνήγοροι ως εκ τούτου, θέτουν ερωτήσεις ώστε όχι μόνο να εκμαιεύσουν τη μαρτυρία των εξεταζόμενων αλλά και να κατασκευάσουν μια αξιόπιστη εκδοχή/ αφήγηση για τα γεγονότα, τέτοια ώστε να υποστηρίξει τα συμφέροντα των πελατών τους, συχνά υπονομεύοντας την αξιοπιστία των αντιδίκων (Matoesian 2005 & Ehrlich 2010). Αν και αυτό δεν ισχύει σε κάθε περίπτωση στη δημοσιογραφική συνέντευξη (βλ. deferential και aggressive-adversarial styles of questioning, Clayman & Heritage 2002), η πίεση για υψηλές ακροαματικότητες και η ενδεχόμενη ρητή ή υπόρρητη διαφορά της πολιτικής αφετηρίας μέσου/ δημοσιογράφων και συνεντευξιαζόμενων συνήθως οδηγούν στην πιο επιθετική μορφή δημοσιογραφικής συνέντευξης, η οποία σημειωτέον δημιουργεί εκείνα τα δημοσιογραφικά γεγονότα τα οποία σχολιάζονται ως αυτοτελείς ειδήσεις.

Οι γλωσσικές επιλογές των μαρτύρων ή των συνεντευξιαζόμενων στην απαντητική συνεισφορά τους εξετάζονται για τη συνεργατικότητα, ή την αποφυγή και την αντίσταση που επιδεικνύεται και την αποδοχή ή απόρριψη του σεναρίου που έμμεσα κατασκευάζει ο/η συνήγορος ή ο/η δημοσιογράφος. Επίσης, καθώς η αναγωγή σε μύθους και στερεότυπα (π.χ. η αμφιλεγόμενη σεξουαλική συμπεριφορά γυναικών θυμάτων βιασμού (Matoesian 2005 & Ehrlich 2010), ή η βίαιη συμπεριφορά των νέων που συμμετέχουν σε συγκεντρώσεις διαμαρτυρίας) προκύπτει από τις *προϋποθέσεις* (presuppositions) και τις *συνεπαγωγές* (entailments) που ενεργοποιούνται με την επιλογή σημασιολογικά και πραγματολογικά φορτισμένων φραστικών δομών για την κατασκευή της ερωτηματικής εκφοράς. Η αποδοχή ή η απόρριψη τους από τον αποδέκτη, κατασκευάζεται γλωσσικά μέσω της συμμόρφωσης ή μη με την *προτίμηση* για ευθυγράμμιση με την ατζέντα που θέτει ο συνεντευκτής μέσω της ερωτηματικής του συνεισφοράς.

Τα κείμενα που αναλύονται στη συνέχεια συνδέουν τα παραπάνω ζητήματα με συγκεκριμένα συμβάντα, η διαπραγμάτευση των οποίων αναδεικνύει ζητήματα που αφορούν τη συγκρότηση και τη λειτουργία του δημόσιου λόγου στο πλαίσιο δημοσιογραφικών και δικανικών πρακτικών.

1.3 Τα γεγονότα, τα κείμενα και τα ζητήματα που αυτά θέτουν

Η δολοφονία του δεκαπεντάχρονου Αλέξανδρου Γρηγορόπουλου στην Αθήνα και ο τραυματισμός του εικοσάχρονου Jody Mc Intyre που πάσχει από σοβαρή εγκεφαλική παράλυση στο Λονδίνο κατά τη διάρκεια επεισοδίων με τις αστυνομικές δυνάμεις και οι θεσμικές διαδικασίες που επακολούθησαν θέτουν πολλαπλά ζητήματα για τον τρόπο διαχείρισης της βίας στο δημόσιο λόγο και μάλιστα πέρα από εθνικά σύνορα και δεδομένα κοινοτικά/ πολιτισμικά όρια. Οι διαφορές ανάμεσα στα δύο γεγονότα είναι προφανείς: ο τόπος, ο χρόνος, το αποτέλεσμα, το θεσμικό πλαίσιο. Οι ομοιότητες πάλι αποτελούν το ζητούμενο αυτής της μελέτης. Για την ανάδειξή τους θα χρησιμοποιήσω ως υλικό το λόγο όπως

καταγράφηκε στα επίσημα πρακτικά της δίκης Γρηγορόπουλου και το απομαγνητοφωνημένο κείμενο της συνέντευξης Mc Intyre στο BBC¹. Και τα δύο γεγονότα έγιναν αντικείμενο έντονης δημόσιας συζήτησης για τις στρατηγικές λόγου των συμμετεχόντων σε αυτά². Το πρώτο ζήτημα που τέθηκε αφορά την προσπάθεια -από τους συνηγόρους υπερασπίσεως στην εν λόγω δίκη και του δημοσιογράφου που διεξήγαγε τη συνέντευξη- επιμερισμού των ευθυνών ανάμεσα σε θύτες και θύματα και την επιχειρούμενη ενοχοποίηση των ιδίων των θυμάτων με βάση την επικαλούμενη πολιτική τους ταυτότητα και την από αυτήν απορρέουσα υποτιθέμενη βίαιη συμπεριφορά τους. Το δεύτερο αφορά την απόπειρα εκτροπής της δημόσιας συζήτησης από το ζητούμενο της, δηλαδή την αυταπόδεικτη από τα καταγεγραμμένα γεγονότα- ένα θάνατος, ένα βίντεο- άσκηση βίας από τις δυνάμεις του ελέγχου και της καταστολής της. Το τρίτο αφορά το ίδιο το φαινόμενο της βίας και του λόγου για τη βία στα σύγχρονα αστικά περιβάλλοντα στο πλαίσιο σημαντικών αλλαγών που συντελούνται σε όλα τα επίπεδα της ζωής (π.χ. οικονομικές σχέσεις, μετανάστευση) και μεταβάλλουν τον κοινωνικό ιστό και τις δυναμικές που συνδέονται με τη συμπεριφορά των πληθυσμών τους. Τα δύο τελευταία υπερβαίνουν τα όρια της παρούσας μελέτης.

Στη συνέχεια, μέσα από την ανάλυση των συνομιλιακών ζευγών των ερωταπαντήσεων στην περίπτωση της συνέντευξης Mc Intyre και των απαντήσεων μαρτύρων αλλά και άλλων περιστατικών λόγου όπως καταγράφονται στα επίσημα πρακτικά της δίκης Γρηγορόπουλου, θα προσπαθήσω να αναδείξω αναλογίες στις στρατηγικές που χρησιμοποιούνται τόσο από τους συνηγόρους και τον δημοσιογράφο όσο και την αντίσταση σε αυτές όπως καταγράφεται στο λόγο του Mc Intyre και των εξεταζόμενων μαρτύρων στο πλαίσιο της δίκης.

2. Ανάλυση

2.1 Η συνέντευξη Mc Intyre (Παράρτημα 1)

Οι ερωτηματικές εκφορές που απευθύνονται από τον δημοσιογράφο στον συνεντευξιαζόμενο στην συγκεκριμένη συνέντευξη (σύνολο: 13) αποτελούν ανοιχτού ή κλειστού τύπου ερωτήσεις οι οποίες είτε εισάγονται με βεβαιωτικές προτάσεις ή αποτελούν βεβαιωτικές προτάσεις με ή χωρίς ερωτηματικό επιτονισμό. Εξαιρέση αποτελούν τα ζεύγη 3-4 και 29-30³, τα οποία εισάγονται με ανοιχτού τύπου ερωτήσεις χωρίς εισαγωγή, καθώς και το ζεύγος 21-22 που εισάγεται με ερώτηση κλειστού τύπου, οι οποίες απαντώνται κατά τρόπο συνεργατικό. Οι υπόλοιπες δέκα ερωτηματικές εκφορές αποτελούν ανοιχτού (σειρές 5, 7, 15, 23) και κλειστού τύπου ερωτήσεις (σειρές 9, 13, 19) που εισάγονται με βεβαιωτικές προτάσεις και βεβαιωτικές προτάσεις με ή χωρίς ερωτηματικό επιτονισμό (σειρές 11, 25, 27) με προσδοκώμενη ανταπόκριση την επιβεβαίωση ή άρνηση του σεναρίου που προβάλλεται σε αυτές.

Μέσω των βεβαιωτικών δομών που προηγούνται των ανοιχτού τύπου ερωτήσεων μεταφέρονται οι δηλώσεις της αστυνομίας (σειρές 5 και 15), επισημαίνεται ο χρόνος που έχει παρέλθει από το συμβάν (σειρά 7) και παραφράζονται προηγούμενες δηλώσεις του συνεντευξιαζόμενου (σειρά 23). Στις τρεις πρώτες περιπτώσεις τίθεται σε αμφιβολία η σπουδαιότητα του περιστατικού, εφόσον ισχύει η *προϋπόθεση* ότι το θύμα δεν ανέφερε το περιστατικό στην αστυνομία και δεν αντέδρασε με βάση τα νόμιμα δικαιώματά του σε χρόνο προγενέστερο της συνέντευξης. Στη σειρά 23, η με υποθετικό λόγο μεταφορά των ισχυρισμών του συνεντευξιαζόμενου (*αν ισχυρίζεστε ότι...*) ενεργοποιεί την επιστημική διάσταση της τροπικότητας, μεταθέτοντας την ευθύνη για την αλήθεια των ισχυρισμών για την άσκηση βίας εναντίον του από τον ομιλητή στον αποδέκτη.

Μέσω των βεβαιωτικών δομών που προηγούνται των κλειστού τύπου ερωτήσεων μεταφέρεται η υπόθεση ότι ο συνεντευξιαζόμενος κινήθηκε επιθετικά, χωρίς να προσδιορίζεται η πηγή των ισχυρισμών (σειρά 9), ένα κείμενο της εφημερίδας Observer στο οποίο αναφέρεται ως *διαδικτυακός ριζοσπάστης* (σειρά 13), καθώς και η προσωπική μαρτυρία του συνεντευκτή για ρίψεις αντικειμένων εναντίον της αστυνομίας κατά το περιστατικό (σειρά 19). Και στις τρεις περιπτώσεις επανεισάγεται ως ενδεχόμενο σενάριο η βίαιη συμπεριφορά από την πλευρά του αποδέκτη ο οποίος ερωτάται τέσσερις

¹ Για τα μεν πρώτα οφείλω να ευχαριστήσω τους δικηγόρους Νίκο και Ζωή Κωνσταντοπούλου. Το δεύτερο αναρτήθηκε στο You Tube (http://www.youtube.com/watch?v=CfSB_XchpPko-feature=player_embedded) από όπου και το απομαγνητοφώνησα.

² Βλ. τα αρνητικά σχόλια για τη στρατηγική Κούγια σε όλα σχεδόν τα μέσα μαζικής ενημέρωσης κατά την περίοδο διεξαγωγής της δίκης, καθώς και την αυτούσια μετάφραση και δημοσίευση της συνέντευξης Mc Intyre από την Κυριακάτικη Ελευθεροτυπία (Εψίλον 16/1/2011, σελ 32-33), υπό τον τίτλο «... και ο Τζόντι που ξευτέλιξε το BBC».

³ Το πρώτο μετά την έναρξη και το τελευταίο πριν το κλείσιμο της συνομιλίας.

φορές (σειρές 9, 11, 19, 25) αν όσα λέχθηκαν ισχύουν και αν ο ίδιος συμμετείχε στη ρίψη αντικειμένων. Αντίστοιχες είναι οι επιλογές του δημοσιογράφου στις βεβαιωτικές εκφορές οι οποίες έχουν προσλεκτική ισχύ αιτήματος για επιβεβαίωση/ απόρριψη (σειρές 11, 25 και 27).

Αν και κατά το μεγαλύτερο μέρος της συνέντευξης ο συνεντευξιαζόμενος ανταποκρίνεται κατασκευάζοντας την ταυτότητα του συνεργατικού συνομιλητή μέσα στο πλαίσιο του θεσμικού του ρόλου (σειρές 4, 6, 8, 12, 20, 22, 24, 30), στις σειρές 10 και 28 απαντά με άμεσα απειλητικές για το πρόσωπο του συνομιλητή του λεκτικές πράξεις, με τις οποίες ευθέως αμφισβητεί την ουδετερότητα και την αντικειμενικότητά του αλλά και την αντικειμενικότητα του μέσου στο οποίο προβάλλεται η συνέντευξη (*είναι γελοίο/ εκπλήσσομαι που το κάνετε/ όλη αυτή η επιχειρηματολογία είναι εντελώς γελοία*). Επίσης, κατά περίπτωση επαναδιαπραγματεύεται τα όρια των θεσμικών ρόλων συνεντευκτή/ συνεντευξιαζόμενου εισάγοντας νέα θεματολογία (σειρές 14, 16/18, 20, 28) και απευθύνοντας ερωτήσεις στο δημοσιογράφο (σειρές 26, 28 αντίστοιχα: *Πιστεύετε πραγματικά ότι ένας άνθρωπος με εγκεφαλική παράλυση.../ Θεωρείτε ότι θα μπορούσα, καθ' οιονδήποτε τρόπο, καθισμένος στο καρότσι μου να αποτελέσω πραγματική απειλή...*), με τις οποίες εμμέσως αμφισβητείται είτε η οξύνοια είτε η καλή προαίρεση του. Μέσω αυτών προβάλλει αντίσταση στην προτεινόμενη από τον συνεντευκτή εναλλακτική αφήγηση, σύμφωνα με την οποία ο ίδιος κινήθηκε επιθετικά εναντίον των αστυνομικών δυνάμεων. Επίσης, παρά το γεγονός ότι κατά κύριο λόγο ο συνεντευξιαζόμενος επιτίθενται στην προβαλλόμενη άποψη και όχι στον εκφραστή της (Clayman & Heritage 2002: 165), ο Mc Intyre μετακινείται από την θέση της συνεργατικότητας, σε αυτή της άμεσης αμφισβήτησης της ουδετερότητας και της αντικειμενικότητας τόσο του δημοσιογράφου όσο και του μέσου.

2.2 Η δίκη Γρηγορόπουλου⁴ (Παράρτημα 2)

Η υπερασπιστική στρατηγική των συνηγόρων υπεράσπισης στη δίκη Γρηγορόπουλου βασίζεται στη απόπειρα τεκμηρίωσης της βίαιης συμπεριφοράς, μέσω της κατασκευής της ταυτότητας του μέλους αριστερών- αναρχικών ομάδων, των μαρτύρων κατηγορίας, οι οποίοι ήταν είτε συνομήλικοι και φίλοι του Αλέξανδρου Γρηγορόπουλου, είτε αυτόπτες μάρτυρες που παρακολούθησαν τα γεγονότα ως κάτοικοι της περιοχής ή πελάτες κοντινών καφετεριών (απόσπασμα 2: *Για μας ο Αλέξανδρος Γρηγορόπουλος ήταν αναρχικός...*/ απόσπασμα 1: *...οι ανωτέρω είναι μέλη οργάνωσης που λέγεται Νεολαία Κομμουνιστικής Απελευθέρωσης*). Το γεγονός της παρουσίας των εν λόγω μαρτύρων- αλλά και του ίδιου του θύματος- στην περιοχή των Εξαρχείων (απόσπασμα 4: *Ποιο είναι το σημαντικό, το γοητευτικό, που παιδιά της ηλικίας μου από άλλες περιοχές της Αθήνας, τη Φιλοθέη, το Ψυχικό, έρχονται εκεί στα Εξάρχεια...*), και η επικοινωνία κάποιων εξ αυτών με τη δικηγόρο Ιωάννα Κούρτοβικ (απόσπασμα 3: *...η δικηγόρος Κούρτοβικ... είναι δικηγόρος των αντιεξουσιαστών*) συνεισφέρει ως τεκμηρίωση της υποτιθέμενης βίαιης συμπεριφοράς τους. Οι *συνεπαγωγές* (→) (οι αντίδικοι είναι μέλη της οργάνωσης Νεολαία Κομμουνιστικής Απελευθέρωσης, → οι αντίδικοι είναι άτομα που λειτουργούν εκτός πλαισίων νομιμότητας) και οι *προϋποθέσεις* που ενεργοποιούνται (στα Εξάρχεια επικρατεί ανομία (στερεότυπο)/ υπάρχει κάτι που έλκει τα παιδιά εκεί (προϋπόθεση)→ τα παιδιά έλκονται από την ανομία), λειτουργούν ως έμμεση αιτιολόγηση της βίας που ασκήθηκε από την πλευρά των κατηγορουμένων αλλά και ενδεχόμενη δικαίωσή της.

Οι αντίδικοι αντιστέκονται σε αυτές τις κατασκευές άμεσα (απόσπασμα 2: *...(η υπεράσπιση) επιχειρεί να μεταφέρει αντιπαράσταση αντιεξουσιαστών με την αστυνομία/ απόσπασμα 5: Δεν έχω συμμετάσχει σε αντιεξουσιαστικές εκδηλώσεις, ούτε εγώ ούτε ο αδελφός μου. Ζω σε μια συγκροτημένη οικογένεια..*), αρνούμενοι τις προϋποθέσεις και τις συνεπαγωγές τους (τα άτομα που ανήκουν σε δυσλειτουργικές οικογένειες συμμετέχουν σε αντιεξουσιαστικές οργανώσεις/ εκδηλώσεις και έχουν βίαιη συμπεριφορά→ το θύμα και οι μάρτυρες κατηγορίας είναι τέτοια άτομα). Αντίστοιχα, αντιστέκονται στην εκδοχή της θεωρίας της συμμετοχής τους σε συνομιλία του φερόμενου ως αντιεξουσιαστικού χώρου ώστε να προκαθορίσουν το αποτέλεσμα της δίκης (δηλώσεις Κούγια, αποσπάσματα 1 και 3), αρνούμενα έμμεσα το σενάριο της εκ των προτέρων συνεννόησης με συνηγόρους των αντιδίκων (απόσπασμα 3: *Δεν έχω δει καν την δικηγόρο Κούρτοβικ, δεν την γνωρίζω προσωπικά. Ζήτησα το τηλέφωνό της και μου το έδωσαν*). Επίσης, αντιστέκονται στην ενεργοποίηση της προϋπόθεσης ότι ο χώρος των Εξαρχείων, ως περιοχή στιγματισμένη από συμβάντα βίας, ασκεί έλξη σε νεαρά άτομα, τα οποία, ως εκ τούτου, έλκονται από τη βία, με συνακόλουθη συνεπαγωγή την εκτός ορίων νομιμότητας συμπεριφορά τους (απόσπασμα 4: *Ποιο είναι το σημαντικό, το γοητευτικό, που παιδιά της ηλικίας μου από άλλες περιοχές της Αθήνας, τη Φιλοθέη, το Ψυχικό, έρχονται εκεί στα*

⁴ Τα κείμενα 1-5 αποτελούν αποσπάσματα των επίσημων πρακτικών της δίκης Γρηγορόπουλου/ Πρωτοδικείο Αμφισσας/ Πρακτικά και Απόφαση Δημόσιας Συνεδρίασεως Μικτού Ορκωτού Δικαστηρίου Αμφισσας, Αριθμοί απόφασης 14-73/2010.

Εξάρχεια και κάθονται σε μια τέτοια εσοχή που μου δείχνετε, δεν μπορώ να καταλάβω στην ερώτησή σας, δεν χρειάζεται να σε γοητεύει κάτι για να πας εκεί.).

3. Συζήτηση/ Συμπέρασμα

Όπως προκύπτει από τις συνομιλιακές επιλογές των συμμετεχόντων (με δεδομένους τους περιορισμούς που θέτει ο τρόπος συγγραφής του κειμένου των πρακτικών μιας δίκης), τόσο στην περίπτωση της συνέντευξης Mc Intyre όσο και στην περίπτωση της δίκης Γρηγορόπουλου, η πολιτική ταυτότητα των μαρτύρων/ συνεντευξιαζόμενου αποτέλεσε διαρκές διακύβευμα. Με την προσπάθεια κατασκευής αντιεξουσιαστικών, και άρα αξιωματικά παραβατικών, ταυτοτήτων, μέσω των ερωτηματικών εκφορών που επιλέχθηκαν, επιχειρήθηκε ο επιμερισμός των ευθυνών ανάμεσα σε θύτες και θύματα. Αυτός στηρίχθηκε σε εναλλακτικές αφηγηματικές κατασκευές της βίαιης συμπεριφοράς των ερωτώμενων, κατά κύριο λόγο μέσω των βεβαιωτικών διακειμενικών αναφορών σε πολιτικές ταυτότητες και ενδεχόμενες ενέργειες (που εισάγουν ή εμπεριέχονται στην ερωτηματική εκφορά), τις οποίες οι συμμετέχοντες καλούνται είτε να επιβεβαιώσουν είτε να αρνηθούν. Τόσο ο Mc Intyre όσο και οι αντίδικοι στη δίκη Γρηγορόπουλου, στις απαντητικές τους συνεισφορές, αντιστάθηκαν σθεναρά στα προτεινόμενα σενάρια και τις συνεπαγωγές τους, κατά περίπτωση με τρόπο απειλητικό για το πρόσωπο του συνομιλητή τους.

Όπως διαφαίνεται από τα κείμενα που εξετάστηκαν, η πολιτική δημοσιογραφική συνέντευξη και η διαδικασία εξέτασης μαρτύρων στην ποινική δίκη παρουσιάζουν σημαντικές αναλογίες ως προς τη δομή και τη στόχευση του παραγόμενου λόγου. Τα συνομιλιακά ζεύγη των ερωταπαντήσεων αποτελούν το βασικό μέσο συγκρότησής τους και στα δύο θεσμικά περιβάλλοντα. Εντοπίζονται αναλογίες σε ότι αφορά τα συνομιλιακά δικαιώματα των συμμετεχόντων. Και οι δημοσιογράφοι, όπως και οι συνήγοροι, θέτουν τις ερωτήσεις τις οποίες οι συνεντευξιαζόμενοι και οι μάρτυρες καλούνται να απαντήσουν. Και στα δύο περιβάλλοντα υπάρχει ελάχιστη δυνατότητα αντιστροφής αυτών των ρόλων. Σε ότι αφορά τα συγκεκριμένα περιστατικά, τα οποία συνδέονται με ιδεολογικές αντιπαραθέσεις, στερεότυπα και ταυτότητες νομιμότητας/ παραβατικότητας, δημοσιογράφος και συνήγορος επιχειρούν μέσω των ερωτηματικών τους εκφορών την κατασκευή εναλλακτικών σεναρίων και ταυτοτήτων για τους θεσμικούς συνομιλητές τους. Παρότι τα δύο είδη δημόσιου λόγου διαφέρουν σημαντικά ως προς την πλαisiώση και τη συγκρότησή τους, η ανάλυση των παραγόμενων κειμένων επιβεβαιώνει την αρχική υπόθεση για αναλογίες και αναδεικνύει την ανάγκη περεταίρω συγκριτικής ανάλυσης ώστε να μελετηθούν ζητήματα που αφορούν τη συγκρότηση και τη λειτουργία του δημόσιου λόγου στο πλαίσιο των δημοσιογραφικών και δικανικών πρακτικών. Ζητούμενο επίσης, είναι η κριτική προσέγγιση των κειμένων που αποτελούν όχι μόνο το παραγόμενο αλλά και το μέσο υλοποίησης των θεσμών που τα πλαisiώνουν.

Παράρτημα 1

Η συνέντευξη του Jody Mc Intyre στο BBC⁵

1. J: ...And we can speak to Jody Mc Intyre now who is in our Westminster studio. Good evening to you.
2. M: Good evening.
3. J: Could you just explain what happened to you?
4. M: Well during the demonstration I was attacked by and pulled out of my wheelchair by the police on two occasions. The footage that you have shown is of the second incident. One of the policemen who had dragged me down the road in the first incident obviously recognized me, came running over, pushed me out of my wheelchair onto the road and then dragged me across the road=
5. J: =Ok. The police say you haven't made any kind of complaint. So why not?
6. M: I haven't made a complaint yet but I'm in contact with a lawyer and I will be doing so.
7. J: We(II) it's been a few days since this happened. Why-why haven't you complained before?
8. M: Because I wanted to consider my options before taking that step.
9. J: E, there's a suggestion that you were rolling towards the police in your wheelchair-e. I-is that true?
10. M: I think to try and justify a police officer pulling a disabled person out of a wheelchair and dragging them across the co-concrete road is quite ridiculous and I'm surprised that you've just tried to do so.
11. J: So are you saying that's not true. You were not wheeling yourself towards the police?
12. M: Well I can't physically use my wheelchair myself. My brother was pushing me. I think it's quite obvious from the footage that I was one hundred per cent not a threat to anyone.
13. J: A: In the Observer newspaper you were described as a cyber radical and you were quoted as saying that you want to build a revolutionary movement and that can only happen through direct action on the streets. Do-do you classify yourself as a revolutionary?
14. M: I don't classify myself as anything but I think we all have the right to fight against what the government are trying to do. They are trying to create a two <gear> education system whereby only the rich will be able to afford a university education. That is something that I think we should all be fighting against.
15. J: Now the police have said that they have referred this incident to the Directorate of Professional Standards. Em-what's your reaction to that?
16. M: I don't have a reaction but I will be making a complaint in the near future. I would say it's very important not to see this as an isolated incident. This is the police's role at demonstrations. To incite and provoke violence. They've done it in the past and they are continuing to do it now. I'm not the real victim here. The real victims are the students like Alfie Meadows who is in hospital within an inch of his life after a policeman struck him on the head with a [<xx>]=
17. J: [But I-but I]
18. M: =and he needed emergency brain surgery. Now imagine if it was Prince Charles or Camilla or a police officer who had been within an inch of their life. [How that//]
19. J: [But I have] to say I was- I was- I was in Parliament Square covering that demonstration and I saw protesters throwing a-a-lots of rock at the police throwing missiles various missiles a-at the police. Were you throwing anything at all at the police during that day?
20. M: I wasn't throwing anything at the police during that day or during any other demonstration. But what is clear is that the media are now trying to distract the public from the real issue. The real issue is the cuts the government are makin [and not <xxx>//]
21. J: [Were you were you] harmed were you harmed in any way well in that incident with the police [on that day?]
22. M: [Well not] in that/ if-if the incident that has been shown. There is also another incident around forty five minutes earlier when a police officer struck me with a <baton> on my left shoulder and yes that did cause some injury.

⁵ Σύμβολα απομαγνητοφώνησης: /: self-repair, //: interruption, (:): pause, ((): extralinguistic information, underlined segments: high pitch, =: latching, []: simultaneous speech, <x>: unintelligible segment

23. J: And why then do you think, if you are saying that the police picked on you twice, why do you think they did?
24. M: I have no idea. I-I mean to make one suggestion, I think, in the second incident at least, I think there's a clear element of trying to provoke other protesters into violence. Certainly, I see myself as equal to anyone else but I do understand that I could be perceived as more vulnerable, so I think there was an element of trying to provoke violence from other [people]
25. J: [And you] didn't shout anything provocative or throw anything that would have induced the police to do that to you?
26. M: Do you really think a person with cerebral paralysis in a wheelchair can pose a threat to a police officer who is armed with weapons?
27. J: But you do say that you-you are a revolutionary.
28. M: Tha-that's a word. That's not physical action that I've taken against the police officer. That's a word that you are quoting from a website. But I'm asking you. Do you think I could've in any way posed a physical threat from the seat of my wheelchair to an army of police officers armed with weapons. This whole line of argument is absolutely ludicrous because you are blaming the victims of violence for that violence. In fact it reminds me a lot of the way the BBC report on the Pa-palestinian conflict [wher//]
29. J: [When] when are you gonna make your complaint to the police then?
30. M: I will be making my complaint very shortly. In the near future.
31. J: Ts. Ok. Jody Mc Intyre thank you very much for your time. Thanks for talking to us this evening.
32. M: Thank you.

Αποσπάσματα πρακτικών της δίκης Γρηγορόπουλου

(1) Δηλώσεις Κούγια

Για μας ο Ρωμανός δεν έρχεται γιατί συνεργάζεται με επικίνδυνο κύκλωμα που έχει καθορίσει από την αρχή την τύχη αυτής της δίκης. Σας αναφέρω ότι Μ. Παρασκευή έφθασε στο γραφείο μου μια επιστολή από δικηγόρο Αθηνών που μας έδινε συγκλονιστικά στοιχεία που αφορούν τους Ζέρβα, Παπαδημητρίου Λίλα, Τσελέντη, Τσιμπιζίδη, τον Ρωμανό και το θύμα. Μας οδήγησε σε ιστοσελίδες και βρήκαμε ότι οι ανωτέρω είναι μέλη οργάνωσης που λέγεται Νεολαία Κομμουνιστικής Απελευθέρωσης.

(σελ. 229/1310 των υπ. αριθ. 14-73/2010 του Μ.Ο.Δ. Αμφισσας)

(2) Δηλώσεις Κωνσταντοπούλου/ Κούγια

Έλαβε το λόγο η συνήγορος πολιτικής αγωγής Ζωή Κωνσταντοπούλου η οποία δήλωσε τα εξής: Ζητάμε να αναφέρει ο συνήγορος υπεράσπισης τον συντάκτη των κειμένων αυτών και την πηγή των συγκεκριμένων εντύπων, καθόσον αυτά που προσκομίζει είναι ανώνυμες καταχωρήσεις, όποιος δε προσκομίζει τέτοια έγγραφα, ένα χρόνο μετά το θάνατο του Αλέξανδρου, αυτό το οποίο επιχειρεί, είναι να μεταφέρει αντιπαράσταση αντιεξουσιαστών με την αστυνομία. Ήταν αντιεξουσιαστής ο Αλέξανδρος Γρηγορόπουλος; Αν τον θεωρεί αντιεξουσιαστή η υπεράσπιση να μας το πει.

Έλαβε το λόγο ο συνήγορος υπεράσπισης Αλέξιος Κούγιας ο οποίος δήλωσε: Για μας ο Αλέξανδρος Γρηγορόπουλος ήταν αναρχικός, το είπαμε αυτό από την πρώτη μέρα της δίκης.

(σελ. 376-377/1310 των υπ. αριθ. 14-73/2010 του Μ.Ο.Δ. Αμφισσας)

(3) Κατάθεση Βαλιάντζα

Φεύγοντας, ακολουθούσα τον Κουζέλη προς τα συμβατικά αυτοκίνητα για να πάμε στη ΓΑΔΑ να καταθέσω, έγινε ένα επεισόδιο εκεί και ο Κουζέλης με άφησε χωρίς να πει τίποτα. Δεν με πήραν μαζί τους, με άφησαν εκεί και έφυγαν. Τηλεφώνησα στην δικηγόρο Κούρτοβικ και της είπα τι έγινε και ότι θέλω να καταθέσω αυτά που είδα, γιατί οι αστυνομικοί με παράτησαν και έφυγαν και να κανονίσει να πάω να καταθέσω στον ανακριτή. Δεν έχω δει καν την δικηγόρο Κούρτοβικ, δεν την γνωρίζω προσωπικά. Ζήτησα το τηλέφωνό της και μου το έδωσαν.

(σελ. 53/1310 των υπ. αριθ. 14-73/2010 του Μ.Ο.Δ. Αμφισσας)

Ο συνήγορος υπεράσπισης του πρώτου κατ/νου Αλέξιος Κούγιας αφού έλαβε το λόγο δήλωσε: Προσφεύγω στο Δικαστήριο κατά της διάταξης της διευθύνουσας (Πρόεδρου) που μου απαγόρευσε την ερώτηση, γιατί ήλθε η μάρτυρας σε επαφή με την δικηγόρο Κούρτοβικ, και υποβάλω προς το δικαστήριο αίτημα, όπως μου επιτραπεί η ερώτηση προς την μάρτυρα, για το ποιος της έδωσε το τηλέφωνο της δικηγόρου Κούρτοβικ, αν γνωρίζει ότι η δικηγόρος Κούρτοβικ είναι συνήγορος του Ρωμανού, αν γνωρίζει ότι αυτή είναι δικηγόρος των αντιεξουσιαστών.
(σελ. 54/1310 των υπ. αριθ. 14-73/2010 του Μ.Ο.Δ. Άμφισσας)

(4) Κατάθεση Τσελέντη (ετών 16)

Ποιο είναι το σημαντικό, το γοητευτικό, που παιδιά της ηλικίας μου από άλλες περιοχές της Αθήνας, τη Φιλοθέη, το Ψυχικό, έρχονται εκεί στα Εξάρχεια και κάθονται σε μια τέτοια εσοχή που μου δείχνετε, δεν μπορώ να καταλάβω στην ερώτησή σας, δεν χρειάζεται να σε γοητεύει κάτι για να πας εκεί. Δεν ξέρω τι τα τραβάει εκεί. Στη Τζαβέλα δεν υπάρχει μαγαζί που να πουλάει σάντουιτς, υπάρχουν στη Κωλέτη και Μεσολογγίου.
(σελ. 207/1310 των υπ. αριθ. 14-73/2010 του Μ.Ο.Δ. Άμφισσας)

(5) Κατάθεση Τσιμπιτζίδη (ετών 18)

Δεν έχω συμμετάσχει σε αντιεξουσιαστικές εκδηλώσεις, ούτε εγώ ούτε ο αδελφός μου. Ζω σε μια συγκροτημένη οικογένεια.
(σελ. 75/1310 των υπ. αριθ. 14-73/2010 του Μ.Ο.Δ. Άμφισσας)

ABSTRACT

In this paper, some findings of a research concerning Greek kindergarteners' attempts to define and classify geometric shapes are presented. Following the sociosemiotic perspective of Systemic Functional Linguistics, according to which the use of linguistic resources and children's previous knowledge enact meaning systems assumed to be relevant for specific learning contexts, we set up a learning context related to literacy practices such as the production of a book about geometric shapes addressed to other preschool children.

The analysis of dialogues between children and their preschool teacher focus upon verbalization of the semantic organization of geometric shapes. By these means, our data illustrate semantic options and strategies employed by children in order to carry out the task. Moreover, some issues about semantic organization of school uncommonsense knowledge categories become more transparent.

Keywords: classifications, definitions, geometric shapes, kindergarten, semantic organization, systemic functional linguistics.

1. Εισαγωγή

Σύμφωνα με την κοινωνιοσημειωτική προσέγγιση της συστημικής λειτουργικής γλωσσολογίας (ΣΛΓ), οι ορισμοί και οι ταξινομήσεις σε πεδία μη κοινής (uncommonsense) / εκπαιδευτικής γνώσης (Painter, 1999b), όπως είναι στην περίπτωση μας οι κατηγοριοποιήσεις γεωμετρικών σχημάτων, συνιστούν «ειδικές μορφές γλωσσικής σημείωσης» (Hasan, 2005) που συνδέονται με τη γλώσσα του σχολείου και τη συγκρότηση των λόγων των αντικείμενων της σχολικής μάθησης (Halliday, 1999, 2000).

Σε αντιδιαστολή, με την καθημερινή/κοινή (commonsense) γνώση, που κατακτάται σε καθημερινά πλαίσια διεπίδρασης παιδιών και ενηλίκων, η εκπαιδευτική (uncommonsense) γνώση είναι συστηματική, απομακρυσμένη από την άμεση εμπειρία, στηριγμένη στη σημειωτική παράσταση και τη γραπτή γλώσσα, παρουσιασμένη στο πλαίσιο ενός θέματος, ταξινομητική κ.ο.κ. Σημειωτικές διεργασίες, επομένως, που εμπλέκονται στην εξοικείωση με ορισμούς και με κριτήρια ταξινόμησης, στην ενασχόληση με τα κείμενα, στον προσανατολισμό στο νόημα, συνιστούν την αναγκασία «γλωσσική προετοιμασία» των παιδιών για τη μετάβαση από την καθημερινή στην εκπαιδευτική γνώση (Painter (1996, 1999a, 1999b, 2007· για μία εφαρμογή σε ελληνικά δεδομένα από σχολική τάξη νηπιαγωγείου, βλ. Kondyli & Lykou, 2008).

Στην έρευνά μας αξιοποιούμε το παραπάνω μεθοδολογικό υπόβαθρο, εφαρμόζοντάς το σε μια περιοχή εκπαιδευτικής γνώσης (γεωμετρικά σχήματα). Σκοπός είναι να αναδειχθούν όψεις της ανάπτυξης μορφών γλωσσικής σημείωσης, όπως οι ορισμοί και οι ταξινομήσεις γεωμετρικών σχημάτων, οι οποίες προϋποθέτουν γλωσσικές διεπιδράσεις σε κατάλληλα νοηματοδοτημένα πλαίσια δράσης προσανατολισμένα στη σημασία.

Η οργάνωση της παρούσας διερεύνησης ακολούθησε την κοινωνιοσημειωτική θέση για τη συστηματική και διαλεκτική σχέση ανάμεσα σε πλαίσιο-νόημα-λεξικογραμματική (Hasan, 2005) με τις εξής υποθέσεις εργασίας:

- Δεδομένης της σχέσης πραγμάτωσης μεταξύ σημασιολογικών και λεξικογραμματικών επιλογών, η ανάλυση των γλωσσικών διαλόγων, ιδίως οι πραγματώσεις των ίδιων των παιδιών, μας επιτρέπει να εξετάσουμε τις *σημασιολογικές επιλογές* των παιδιών στο υπό διερεύνηση πεδίο (σημασιολογική οργάνωση ενός πεδίου μη κοινής γνώσης).
- Σ' ένα σημασιολογικό σύστημα υπό διαμόρφωση, τα παιδιά αναμένεται να αξιοποιήσουν νοήματα που έχουν συγκροτήσει με βάση τις *πρότερες* (σχολικές και μη) *εμπειρίες* τους.
- Με δεδομένο ότι η ίδια η *περίσταση* προσανατολίζει σε συγκεκριμένες επιλογές, η οργάνωση του μαθησιακού πλαισίου ευνοεί την κατάλληλη νοηματοδότηση της περιστασης από τα παιδιά και, επομένως, τις λεξικογραμματικές επιλογές τους.

Βασικό, λοιπόν, κορμό του ερευνητικού-διδασκτικού μας σχήματος και των σχετικών δραστηριοτήτων αποτέλεσε η οργάνωση ενός νοηματοδοτημένου πλαισίου δράσης ως συνθήκη για την αναπλαισίωση της προϋπάρχουσας γνώσης των παιδιών γύρω από τις κατηγορίες γεωμετρικών σχημάτων. Οι δραστηριότητες οργανώθηκαν από τη νηπιαγωγό-ερευνήτρια ως μέρος του προγράμματος της τάξης της. Η προσέγγιση των γεωμετρικών εννοιών τοποθετήθηκε σ' ένα σεναριακό πλαίσιο δράσης: την *παραγωγή βιβλίων* για τα γεωμετρικά σχήματα, που θα αποστέλλονταν σε άλλα σχολεία που δεν διέθεταν τους οικονομικούς πόρους να τα προμηθευτούν, δράση που προτάθηκε με αφορμή την παγκόσμια ημέρα παιδικού βιβλίου. Η πραγμάτωση ορισμών και ταξινόμησεων εντάχθηκε στο έργο, που συμπεριέλαβε τόσο ένα αίτημα γλωσσικής διαπραγμάτευσης και συμφωνίας μεταξύ των μελών των ομάδων για τον τρόπο ταξινόμησης του δοθέντος υλικού όσο και ένα αίτημα πιο αποπλαισιωμένου λόγου προκειμένου να συγκροτηθούν τα συνοδευτικά πληροφοριακά κείμενα των κατηγοριών σχημάτων που διαμόρφωσαν τα παιδιά.

Τα νήπια της τάξης (12 κορίτσια και 6 αγόρια ηλικίας 5:6 - 6:3 ετών) εργάστηκαν μαζί με τη νηπιαγωγό σε μικρές ομάδες των 3 ατόμων (2 κορίτσια – 1 αγόρι), εντός του χώρου του σχολείου και του προβλεπόμενου διδακτικού ωραρίου των ολοήμερων νηπιαγωγείων στο διάστημα Απριλίου-Μαΐου του σχολικού έτους 2008-9. Η συλλογή του υλικού πραγματοποιήθηκε με βιντεοσκόπηση των συναντήσεων κάθε ομάδας και συμπληρωματικά μαγνητοφώνηση όλων των δραστηριοτήτων. Κάθε ομάδα παιδιών ανέλαβε την παραγωγή ενός βιβλίου για τα γεωμετρικά σχήματα, καθώς και ενός ένθετου παιχνιδιού με κάρτες σχημάτων. Το είδος του βιβλίου προσδιορίστηκε εξ αρχής ως βιβλίο «γνώσεων» (ενημερωτικό φυλλάδιο/εγχειρίδιο «βασικών όρων»), που θεωρήθηκαν προαπαιτούμενες για την εκτέλεση από τους παραλήπτες του βιβλίου του ένθετου παιχνιδιού με τις κάρτες. Το συνολικό έργο επιμερίστηκε στις διαδοχικές συναντήσεις κάθε ομάδας σε ενότητες δραστηριοτήτων με συνέχεια και σύνδεση μεταξύ τους ως προς το πλαίσιο νοηματοδότησης του έργου (παραγωγή βιβλίου) και ως προς το βαθμό απομάκρυνσης από την υλική βάση του έργου (από τη χειρωνακτική ταξινόμηση των σχημάτων έως την περιγραφή τους). Οι γενικοί στόχοι των επιμέρους έργων κάθε συνάντησης εξεζητούνταν στην αρχή της συνάντησης. Η νηπιαγωγός, σε ρόλο συντονίστριας, συμμετείχε στη συζήτηση θέτοντας ανοιχτές και καταρχάς γενικές ερωτήσεις σε συνάρτηση με το στόχο κάθε δραστηριότητας, ενθαρρύνοντας κυρίως τη συζήτηση μεταξύ των μελών κάθε ομάδας.

Το έργο κάθε ομάδας περιλάμβανε συνοπτικά τις παρακάτω δραστηριότητες:

A] Ταξινόμηση επίπεδων γεωμετρικών σχημάτων για επικόλληση στις σελίδες του υπό διαμόρφωση βιβλίου μετά από συζήτηση και συμφωνία σε επίπεδο ομάδας (36 μη πανομοιότυπα χάρτινα γεωμετρικά σχήματα ίδιου χρώματος και υφής, με παραλλαγές για τους εκπροσώπους κάθε κατηγορίας σε σχέσης με το μέγεθος και επιμέρους ιδιότητες).

B] Προσθήκη γραπτών κειμένων: Απόδοση «τίτλων» για κάθε κατηγορία σχήματος (*κατηγοριοποίηση με κατονομασία*) για τις ανάγκες της σελιδοποίησης και παραγωγή πληροφοριακών κειμένων για τον αναγνώστη (*ορισμοί, περιγραφές των κατηγοριοποιήσεων τους*), τα οποία υπαγορεύονταν στη νηπιαγωγό.

Γ] Κατασκευή συνοδευτικού ένθετου παιχνιδιού με κάρτες («τράπουλα» 27 καρτών με 4 βασικά σχήματα: κύκλος, τρίγωνο, τετράγωνο, παραλληλόγραμμο) μετά την ολοκλήρωση της Β φάσης και μιας δειγματικής εκτέλεσής του από τις ομάδες εργασίας στην ολομέλεια της τάξης.

Δ] Παρουσίαση των βιβλίων των ομάδων με τη συμμετοχή των παιδιών του άλλου τμήματος της σχολικής μονάδας και παιχνίδι **περιγραφής** (επιλογή κάρτας από τράπουλα σχημάτων και περιγραφή απεικονιζόμενου σχήματος από ένα νήπιο κάθε φορά για την «ανεύρεση» του από τα υπόλοιπα παιδιά).

2. Εργαλεία ανάλυσης

Στην ανάλυση των γλωσσικών διαλόγων, που αποτέλεσαν το σώμα των δεδομένων μας, αξιοποιήσαμε πτυχές του μοντέλου της συστημικής λειτουργικής γλωσσολογίας (ΣΛΓ) και ειδικότερα ορισμένες από

τις κατηγορίες ανάλυσης των σχετικών ερευνών της Painter (1996, 1999a, 1999b). Μολονότι οι έρευνες της Painter αφορούν αφενός μικρότερες ηλικίες (2,5-5 ετών) και αφετέρου πιο άτυπα πλαίσια μάθησης (οικογενειακός γραμματισμός), τα συγκεκριμένα εργαλεία αποδεικνύονται ιδιαίτερα χρήσιμα για την ανάλυση των σημειωτικών διεργασιών σε διαφορετικά πλαίσια, και συγκεκριμένα για τους τρόπους γλωσσικής εδραίωσης περιοχών μη κοινής γνώσης στο νηπιαγωγείο.

Ειδικότερα εξετάστηκαν οι *συσχετιστικές προτάσεις* που πραγματώνουν σχέσεις *ταυτοποίησης* (identifying) και *απόδοσης χαρακτηριστικών* (attributive) στις οντότητες του κόσμου (Halliday, 2004). Εκτός από τα συσχετιστικά *ρήματα/διαδικασίες*, που ορίζουν τις συσχετιστικές προτάσεις, οι *μετέχοντες* (participants) και τα *περιστασιακά στοιχεία* (επιρρηματικά σύνολα ή προθετικές φράσεις) φάνηκαν χρήσιμα για να αναδειχτούν ζητήματα κατονομασίας και σημασιολογικής οργάνωσης των κατηγοριών, δηλαδή της ερμηνείας και παράστασης της πραγματικότητας άρρηκτα συνυφασμένης με το περικείμενό τους.

Οι χρήσεις των ονομάτων (μετεχόντων) από τα παιδιά εξετάζονται σε συνάρτηση με τη δομή του Ονοματικού Συνόλου (ΟΣ) (πρβλ. Painter, 1999a: 82), τα είδη αναφοράς, τις λεξικές σχέσεις (υπωνυμία, μερωνυμία κτλ. -βλ. ενδ. Unsworth, 2001: 66-68). Για την εξέταση της δομής του ΟΣ λήφθηκαν υπόψη οι τροποποιητές (modifiers): ταξινομητές (classifiers) και προσδιοριστές (qualifiers). Οι ταξινομητές τυπικά είναι προ-τροποποιητές και στα ελληνικά πραγματώνονται συνήθως με χρήση επιθέτων, ενώ οι προσδιοριστές, ως μετα-τροποποιητές, εγκιβωτίζονται στο ΟΣ μια πρόταση ή μια φράση ενσωματώνοντας περιστασιακά στοιχεία (Halliday 2004: 319-324).

Οι τρόποι αναφοράς ως μεταβλητή της κειμενικής οργάνωσης μπορούν να διακριθούν σε *φορικές* (phoric) και *μη φορικές* (non phoric) (Martin, 1992: 98). Τα φορικά ΟΣ σημασιοδοτούν μια συγκεκριμένη ταυτότητα του μετέχοντα, με τη χρήση συγκεκριμένων δεικτικών στοιχείων. Τα μη φορικά εισάγουν μετέχοντες με χρήση π.χ. αόριστων άρθρων και αντωνυμιών, αλλά και του ουσιαστικού στον πληθυντικό χωρίς πρόσθετους δεικτικούς όρους. Η ταυτότητα του μετέχοντα μπορεί να προσδιορίζεται βάσει της παραπομπής στο ευρύτερο πολιτισμικό πλαίσιο, στο πλαίσιο της συγκεκριμένης περίπτωσης ή στο ίδιο το κείμενο. Συνεπώς, συνδέονται με το βαθμό αφαίρεσης από τον πλαισιωμένο στον αποπλαισιωμένο λόγο.

Ειδικότερα για τον λόγο των παιδιών, η χρήση γενικής αναφοράς χωρίς την παρουσία δεικτικών στοιχείων σηματοδοτεί μια πιο συνειδητή ενασχόληση με την ταξινομική οργάνωση των κατηγοριών που υπερβαίνει την πλαισιωμένη κατηγοριοποίηση (ταξινόμηση συγκεκριμένων δειγμάτων).

Επιπλέον αναλύθηκαν και υπερπροτασιακά δεδομένα, ειδικότερα σε συνάρτηση με τους ορισμούς. Δεδομένου και του ηλικιακού φάσματος, ως πραγμάτωση ορισμών θεωρήσαμε τις απόπειρες των παιδιών να προσδιορίσουν/ταυτοποιήσουν μια κατηγορία συγκροτώντας, ταυτόχρονα, τα κριτήρια που την ταυτοποιούν. Σε επίπεδο πραγμάτωσης τέτοιου είδους απόπειρες από τα παιδιά του δείγματός μας συνδέονται με γλωσσικούς δείκτες γενίκευσης και παραγωγής αποπλαισιωμένου λόγου με τη χρήση για παράδειγμα αόριστων δεικτικών ή ποσοδεικτικών στοιχείων, την εισαγωγή μη φορικών ΟΣ, τον εγκιβωτισμό πληροφοριών. Συχνά στο υλικό μας εμφανίστηκε *χρονικοϋποθετικός λόγος* με την ενσωμάτωση δομών αιτιότητας και υποθετικού λόγου σε συμπλέγματα συσχετιστικών προτάσεων (με χρήση αιτιολογικών ή χρονικοϋποθετικών συνδέσμων όπως *γιατί, άμα, αν, όταν*).

Η σημασία της λογικο-σημασιολογικής σχέσης της αιτιότητας σε προτάσεις όπως αυτές που αφορούν καταρχήν τη συγκρότηση του *Πεδίου* (αναπαράσταση εμπειρίας), έγκειται στο ότι η απόδοση αιτιώδους σχέσης (δήλωση/αξιολόγηση πιθανότητας ή υποχρέωσης) υπονοεί την ισχύ της όχι μόνο στη συγκεκριμένη αλλά σε κάθε ανάλογη περίπτωση (πρβλ. Painter, 1999a: 106-107, 146-148, 173-175).

3. Ανάλυση

Τα παραδείγματα από το υλικό των γλωσσικών διαλόγων συνοψίζουν:

- α) τους κυριότερους τρόπους νοηματοδότησης των κατηγοριών γεωμετρικών σχημάτων από τις επιμέρους ομάδες παιδιών σε συνάρτηση με το έργο ταξινόμησης
- β) τους τρόπους παραγωγής ορισμών, σε συνάρτηση με γλωσσικούς δείκτες γενίκευσης και αποπλαισιωμένου λόγου.

Στην αρίθμηση των παραδειγμάτων, σε παρένθεση καταγράφεται η ομάδα παιδιών (Ομ1, Ομ2 κλπ) και η φάση υλοποίησης του έργου (Α, Β, Γ, Δ). Στους διαλόγους τα νήπια σημειώνονται με ένα αρχικό και η νηπιαγωγός με τα αρχικά «Νηπ.». Σε πλάγιες αγκύλες σημειώνονται πληροφορίες για το συμφραστικό πλαίσιο, και με τους χαρακτήρες (...) και (.) η παράλειψη κειμένου και η παύση στο λόγο αντίστοιχα.

3.1 Ταξινομήσεις και σημασιολογική οργάνωση κατηγοριών γεωμετρικών σχημάτων

Σύμφωνα με τη ΣΛΓ, οι κατηγορίες και οι ταξινομίες αποτελούν κοινωνικές κατασκευές που συνεπάγονται επιλογές κριτηρίων για τη νοηματοδότηση της εμπειρίας σε συνάρτηση με ειδικότερους στόχους. Έτσι, οι στρατηγικές που υιοθέτησαν τα παιδιά είναι ιδιαίτερα ενδιαφέρουσες για τους τρόπους με τους οποίους αξιοποίησαν τόσο τους διαθέσιμους σημειωτικούς πόρους όσο και το ίδιο το μαθησιακό πλαίσιο.

Τα σημασιολογικά όρια των επιμέρους κατηγοριών γεωμετρικών σχημάτων και η ιεραρχική τους οργάνωση αποτέλεσαν αντικείμενο πολλών συζητήσεων εντός των ομάδων. Αν εξετάσουμε τις ονομασίες των σχημάτων που χρησιμοποίησαν τα παιδιά στις ταξινομήσεις τους (με μονολεκτική κατονομασία ή με συσχετιστικές προτάσεις), διαπιστώνουμε ότι κατηγοριοποιούν το υλικό χρησιμοποιώντας σε μεγάλο βαθμό τυπικές ονομασίες σχημάτων (π.χ., «κύκλος», «τρίγωνο», «τετράγωνο», «ρόμβος», «ορθογώνιο», «παράλληλόγραμμο»). Αξιοσημείωτη όμως είναι και η χρήση του όρου «στρογγυλά» ή «κύκλινα» για την απόδοση μιας κοινής ιδιότητας (καμπυλότητα) σε κύκλους και ελλείψεις (και ως ταυτοποιητικό χαρακτηριστικό διαβλεπόμενης υπερκατηγορίας –βλ. παραδ. 15-16), η συχνή απόδοση ομοιότητας ή ακόμη και η πρόταση ονομασίας των ελλείψεων ως «αβγά» (πρβλ. και *ωοειδές σχήμα*), καθώς και η ονομασία κάποιων τριγώνων ως «περύγια (του καρχαρία)» ή «πυραμίδα/-ες». Η χρήση οικείων όρων συνδέεται με το εγχείρημα των παιδιών να προσδιορίσουν κάποια από τα σχήματα του υλικού ως εκπροσώπους μιας διακριτής κατηγορίας ή υποκατηγορίας, της οποίας αγνοούν την πιο τυπική ονομασία. Έτσι, επέλεξαν τη συσχέτιση των συγκεκριμένων σχημάτων με κάποιες γνωστές οντότητες διαφορετικής τάξης, με κριτήριο το σχήμα ως κοινό γνώρισμα των συσχετιζόμενων αντικειμένων. Διασύνδεσαν, επομένως, διαφορετικά πλαίσια συμφραζομένων κατά την ενασχόλησή τους με το σχήμα ως ιδιότητα των αντικειμένων.

Ενδιαφέρον επίσης είναι ότι, όταν τα παιδιά αγνοούν ή ξεχνούν προσωρινά μια ονομασία ή έχουν αμφιβολίες για τον τρόπο ταξινόμησης κάποιων σχημάτων χρησιμοποιούν μεταγλωσσικές συσχετιστικές προτάσεις για να ταυτοποιήσουν κατηγορίες (πρβλ. και Kondyli & Lykou, 2008).

1. (Ομ2Β)

Μ.: Οι ρόμβοι είναι σαν χαρταετός (...) και δεν μοιάζει σαν τα άλλα σχήματα, αλλά μοιάζει με κάποιο που το λένε τετράγωνο.

2. (Ομ5Β)

Ξ.: Αυτά [σελ. με ορθογ. τρίγωνα], αυτά κάπου.. δεν τα θυμάμαι με τίποτα πώς τα λένε. (...)

Ξ.: Εγώ λέω να τα λένε πυραμίδα. [Στην Ε.] Εσύ;

Ε.: Έτσι είναι το περύγιο του καρχαρία. Μπορούμε να το ονομάσουμε περύγιο του καρχαρία.

Η επίγνωση της ύπαρξης τυπικών ονομάτων για τα σχήματα οδήγησε το ίδιο νήπιο και σε ευθεία ερώτηση προς τη νηπιαγωγό, που αντιμετωπίζεται από το παιδί ως φορέας της τυπικής γνώσης:

3. (Ομ5Α)

Νηπ.: Αυτά που βάζεις Ξ. μου τώρα, τι είναι; Τι είναι όλα αυτά;

Ξ.: Ρόμβος. Όχι..

Κυρία, πώς το λένε το σχήμα αυτό; Τσουκ-τσουκ-τσουκ-τσουκ
[σχηματίζει ένα φανταστικό τετράπλευρο]

Αξίζει, ακόμη, να σημειωθεί ότι ο όρος «**σχήμα** /-ατα» χρησιμοποιήθηκε από τα παιδιά σε διάφορες φάσεις ως σημασιολογική υπερκατηγορία των γεωμετρικών σχημάτων (πχ. σε όλους τους προτεινόμενους τίτλους των βιβλίων τους). Σχέσεις υπωνυμικού τύπου εμφανίζονται χαρακτηριστικά στην αρχή των προτεινόμενων κειμένων της Β' φάσης:

4. (Ομ4Β)

Ζ.: Το ορθογώνιο είναι σχήμα.

5. (Ομ1Β)

Φ.: Τα τετράγωνα είναι ένα σχήμα [[που έχει 4 γραμμές]] (...) [[που αν το γυρίσουμε κάπως αλλιώς γίνεται ρόμβος]].

3.1.1 Τα ονόματα σχημάτων ως ιδιότητες

Ενδιαφέρον έχει ωστόσο και η χρήση των κατηγορικών ονομάτων ως τροποποιητών (βλ. ενδ. παραδ. 6) του πράγματος (Thing). Αξιοποιώντας τους σημειωτικούς πόρους της καθημερινής γλώσσας (κατ' αναλογία, πιθανόν, και με τη συχνή στην καθομιλουμένη χρήση του επιθέτου τετράγωνος) τα παιδιά (παραδ. 6-7) μετατρέπουν την ονομασία του σχήματος σε επίθετο (τρίγωνος, τρίγωνη, κύκλινη, παραλληλόγραμμη). Στις διατυπώσεις αυτές είναι φανερό ότι τα παιδιά μιλούν για το σχήμα ως ιδιότητα του αντικειμένου.

6. (Ομ4Α)

Ζ.: Αυτή είναι η κύκλινη ομάδα.

7. (Ομ4Β)

Α.: [Κοιτάζοντας σελίδα σε βιβλίο γεωμετρικών σχημάτων] Η σημαία είναι παραλληλόγραμμη.

3.1.2 Καθημερινοί όροι ως τροποποιητές του σχήματος

Σε αρκετές περιπτώσεις, τα παιδιά επιχειρούν να εξειδικεύσουν το είδος του σχήματος χρησιμοποιώντας καθημερινούς όρους (στραβά, όρθιος, ξαπλωτός, κοντό, ανάποδο κλπ), που αφορούν συχνά τη χωρική τοποθέτησή του (βλ. ενδ. παραδ. 8-10). Μεγαλύτερη αμφισημία παρουσιάζει ο προσδιορισμός «στραβό/-ά», που στα δεδομένα μας χρησιμοποιείται από διαφορετικές ομάδες παιδιών για τις ελλείψεις, τα ορθογώνια τρίγωνα και τους ρόμβους, υπονοώντας κάποιες φορές μια προτυπική θεώρηση του σχήματος, σε συνάρτηση ενδεχομένως με τη συχνότερα εμφανιζόμενη μορφή και χωρική τοποθέτηση των σχημάτων στις συνήθεις σχολικές απεικονίσεις.

8. (Ομ3Β)

Κ.: Κυρία, εγώ έχω βρει. Αν τα κόψουμε εδώ τα ορθογώνια [δείχνει σε ένα παραλληλόγραμμο], θα γίνουν στραβά τρίγωνα. [το στραβά ταξινομητής στο τρίγωνο]

9. (Ομ1Α)

Τ.: Μπορεί.. άμα τα το γυρίσουμε έτσι, τι θα γίνει; [δείχνει ρόμβο]

Νηπ.: Δεν ξέρω, τι λέτε; Τι λέτε; Θα μας πει η Τ., που το σκέφτηκε..

Φ.: Είναι ρόμπο...είναι ένα ρόμβος.

Νηπ.: Τι είναι, τι είναι; [δεν άκουσε]

Τ.: Άμα το γυρίσουμε έτσι; [το στρέφει στο πλάι ώστε οι 2 παράλληλες να είναι οριζόντια]

Φ.: Ε, είναι στραβωμένο τετράγωνο.

10. (Ομ3Α)

Κ.: Κι έτσι [γυρίζει ρόμβο οριζόντια] είναι ξαπλωτός ρόμβος.

Μ.: Έτσι [κάθετο] είναι όρθιος ρόμβος, έτσι [οριζόντια] είναι ξαπλωτός.

3.2 Ορισμοί: δείκτες γενίκευσης και παραγωγής αποπλαισιωμένου λόγου

Σε επίπεδο γλωσσικής πραγμάτωσης, η ενασχόληση με τη σημασία των κατηγοριών, η γενίκευση και ο πιο αποπλαισιωμένος λόγος των παιδιών προκύπτει από τις διατυπώσεις των συσχετίσεων. Όπως ήταν αναμενόμενο, οι συσχετιστικές διαδικασίες εμφανίζονται συχνότερα εξαρτημένες από το εξωγλωσσικό πλαίσιο στην Α' φάση, όπου το έργο απαιτεί κυρίως υλική δράση με κριτήρια που συχνά παρέμειναν υπόρρητα. Έτσι, για παράδειγμα, στην Α' φάση η αναφορά του ονόματος (κύκλοι, τρίγωνα κλπ) παραπέμπει κατά βάση στο εξωγλωσσικό πλαίσιο (εξωφορική αναφορά για παρούσες οντότητες, ενδοφορική αναφορά για παρούσες οντότητες που έχουν προηγουμένως καταδειχθεί).

Ωστόσο, και σε αυτή τη φάση έχουμε ρητές διατυπώσεις που υποδηλώνουν μια πιο συνειδητή ενασχόληση με τα συγκεκριμένα σχήματα του υλικού ως μέλη ή χαρακτηριστικά δείγματα της κατηγορίας, όπως στο παράδειγμα 11.

11. (Ομ1Α)

Φ.: Έτσι είναι τα τρίγωνα. [Σηκώνει ψηλά ένα τρίγ. και το δείχνει ως δείγμα / εκπρόσωπο της ευρύτερης κατηγορίας]

<i>Έτσι</i>	<i>είναι</i>	<i>τα τρίγωνα</i>
<i>Φορέας:</i> Περιστασιακό επίρρημα τρόπου σε θέση μετέχοντα (Εξωφ. αναφορά)	<i>Συσχ. Διαδικασία:</i> Εντασιακή απόδοσης ιδιοτήτων	<i>Χαρακτηριστικό</i> (Τάξη)

Σε συσχετιστικές προτάσεις όπως αυτές, όπως αντίστοιχα και στα παραδείγματα που προαναφέρθηκαν με ρητή αναφορά στο *σχήμα*, τα παιδιά επιχειρούν την ταυτοποίηση των σχημάτων του υλικού ως μελών διακριτών κατηγοριών. Τέτοιου είδους διατυπώσεις ακόμη και αν δεν συνοδεύονται με κάποια εξειδίκευση των κριτηρίων ταξινόμησης εκφράζουν την απόπειρα των παιδιών να μιλήσουν με ένα πιο γενικευτικό και αποπλαισιωμένο τρόπο. Στους διαλόγους του υλικού μας αντίστοιχου τύπου ορισμοί πραγματώνονταν: α) με χρήση *γενικευμένων όρων* για τους μετέχοντες στις συσχετιστικές προτάσεις β) με χρήση του *ταυτοποιητικού ιδιο-ια* γ) με *εγκιβωτισμό* πληροφοριών στη δομή του ΟΣ δ) με *χρονικοϋποθετικές προτάσεις* για τη γενίκευση του περικειμένου.

3.2.1 Γενίκευση των μετεχόντων

Η γενίκευση των μετεχόντων συνδέεται με την εισαγωγή στο λόγο των παιδιών μη φορικών αναφορών. Έτσι, στο υλικό μας εμφανίζονται ονομασίες των σχημάτων που αναφέρονταν με γενικευμένο τρόπο (σε ενικό ή πληθυντικό) και προσδιορίζονταν από δείκτες όπως «*όλα*», «*μερικά*» «*όλο*», «*μόνο*», «*ίδιο/-ια*» ή αόριστα δεικτικά στοιχεία, όπως «*κάτι*», «*κάποιο/-α*», «*άλλο/-α*». Ενδεικτικά είναι τα παρακάτω παραδείγματα:

12. (Ομ2Β) Μ.: ***Το τρίγωνο** μοιάζει σαν **τις σκεπές**, έτσι, έτσι..*
[σχεδιάζει νοητό τρίγωνο]
13. (Ομ3Β) Κ.: *Μπορούμε να πούμε [τα ορθογώνια] **είναι πιο μακριά**.*
[χωρίς δείξη –το μακριά εδώ ως επίθετο]
14. (Ομ1Α) Κ.: ***Όλα** αυτά **είναι τρίγωνα**.*
[Σύνολο τριγώνων πριν την τοποθέτησή τους σε φάκελο]
[Κοινή ένταξη τριγώνων υλικού ως μέλη της κατηγορίας]
15. (Ομ1Α) Τ.: *Εγώ μαζεύω **όλα τα στρογγυλά**.*
16. (Ομ2Γ) Νηπ.: (...) Σ' αυτό το καλάθι έχουμε βάλει αυτά που θα φτιάξουμε για...
Ε.: *Για **όλα τα κύκλινα**.*
17. (Ομ1Α) [Σύνοψη ταξινομήσεων για τοποθέτηση ομαδοποιημένων σχημάτων σε φακέλους]
Φ.: *Λοιπόν, εδώ έχει **όλο** τετράγωνα. Σύμφωνοι; Ωραία;*
18. (Ομ2Β) Μ.: ***Μερικά** [παράθυρα] **είναι τετράγωνα**.*
19. (Ομ2Β) Μ.: *Ο κύκλος **είναι κάτι** που δεν έχει γωνίες και **είναι στρογγυλός** σαν τον ήλιο.*
[γενικός όρος *κάτι* και εγκιβωτισμένη πρόταση
[[που δεν έχει γωνίες]] σε θέση προσδιοριστή]

Η γενίκευση επιχειρείται μάλιστα κάποιες φορές με σαφή παραπομπή στο ευρύτερο πολιτισμικό πλαίσιο με χρήση υπαρκτικών ρημάτων (*υπάρχουν, συναντάμε*), παράλληλα με τους δείκτες *άλλα/όλα* που προαναφέρθηκαν. Ενδιαφέρον έχει εδώ η κειμενική χρήση του *και άλλα*, αλλά και η χρήση του γενικευμένου μετέχοντα *πράγματα*.

20. (Ομ5Β)
Ξ.: *Συναντάμε κι άλλα πράγματα, πυραμίδα, όλα τα πράγματα που 'ναι σ' αυτό το σχήμα [ενν. στο σχήμα τριγώνου].*

21. (Ομ6Β)

Α.: Υπάρχουν και άλλα τρίγωνα στον κόσμο, στον πλανήτη μας
(.) σαν το καπέλο το τρίγωνο ..

Γενικευμένες δηλώσεις εμφανίζονται επίσης με τον όρο «σχήμα/-ατα» σε θέση μετέχοντα και τροποποιητές όπως «άλλο/-α», «ίδια» (παραδ. 22-24). Οι διατυπώσεις στα παραδείγματα αυτά διαφοροποιούνται από αυτές που προαναφέρθηκαν στο κεφ. 3.1 σε σχέση με τη χρήση του όρου σχήμα/-ατα (υπωνυμική ένταξη στη σημασιολογική υπερκατηγορία σχήμα), καθώς αλλάζει η στόχευση των παραγόμενων συσχετίσεων. Εδώ η έμφαση στη σύγκριση και αντιπαραβολή των επιμέρους κατηγοριών οδήγησε σε διατυπώσεις όπου η ιδιότητα (σχήμα) γίνεται αντικείμενο προκειμένου να αντιπαραβληθεί η ταυτότητα των υπό σύζηση σχημάτων.

22. (Ομ2Β)

Νηπ.: Πείτε μου, για τους ρόμβους τι πρέπει να γράψω εδώ..

Μ.: Οι ρόμβοι είναι σαν χαρταετός

Νηπ.: [γράφοντας] οι ρόμβοι είναι σαν..

Γ.: ..σαν χαρταετός.

Μ.: ..και δεν μοιάζει σαν τα άλλα σχήματα,
αλλά μοιάζει με κάποιο που το λένε τετράγωνο.

23. (Ομ3Β)

Μ.: Αν το κόψουμε στη μέση [κύκλοι] θα γίνει ένα άλλο σχήμα.

24. (Ομ2Β)

Ε.: Έχουνε ίδιες γωνίες [ορθογώνια και τετράγωνα]

(...) όμως δεν είναι ίδια σχήματα.

3.2.2 Ταυτοποιητικό ίδιο-ια

Αξιοσημείωτη είναι η χρήση του ίδιο, -ια ως τροποποιητή στο σχήμα/-ατα (ή και στο πράγμα/-τα) για την ταυτοποίηση των κατηγοριών. Στα δεδομένα μας ο συγκεκριμένος τροποποιητής εμφανίζεται σε πραγματώσεις που απέβλεπαν κυρίως στην αντιπαραβολή διαφορετικών κατηγοριών σχημάτων με δηλώσεις κυρίως αρνητικές (βλ. και αρνητικό μόριο δεν) και συνοδεύονταν συνήθως με ρητές επεξηγήσεις με χρήση αιτιολογικών ή αντιθετικών συνδέσμων ή του επεξηγηματικού μορίου δηλαδή. Χαρακτηριστικές είναι οι διατυπώσεις στα παρακάτω παραδείγματα (βλ. και παραδ. 24):

25. (Ομ5Β)

Ξ.: Εγώ λέω μην τα βάλουμε μαζί [σύγκριση 3 οξυγόνων τριγώνων και 3 ορθογωνίων τριγώνων]. Εγώ δεν συμφωνώ, γιατί δεν είναι ίδια. Δηλαδή, το τρίγωνο έπρεπε να είχε λίγο πιο μεγάλη γραμμή, αλλά αυτό [ορθογώνιο σκαληνό] μοιάζει σαν του καρχαρία, το αυτό που έχει στην πλάτη του...

26. (Ομ1Α)

Νηπ.: Εδώ πέρα τι έχεις βάλει Κ, ποια σχήματα έχεις βάλει;

Κ.: Ε, τα τρίγωνα και τους ρόμβους [2 ομάδες τοποθετημένες πολύ κοντά].

Νηπ.: Θα τα κάνετε μια ομάδα ή χωριστές ομάδες;

Τ.: Μία.

Φ.: Χωριστές, χωριστές λέω εγώ. Δεν πάνε οι ρόμβοι με τα τρίγωνα.

Κ.: Πάνε! (...) Πάνε, πάνε, γιατί έχουμε... κι εδώ τσιμπάει, κι εδώ τσιμπάει.. κι εδώ είναι ίδιο.. [δείχνει διαδοχικά κορυφές ρόμβων και τριγώνων]

Φ.: Ναι, αλλά δεν πρέπει... ναι, αλλά αυτά δεν είναι ίδια!

27. (Ομ6Β)

Α.: Το τετράγωνο έχει τέσσερις γωνίες. Και το ορθογώνιο έχει τέσσερις,
αλλά είναι πιο μεγάλο, δεν έχουν το ίδιο ύψος.

28. (Ομ2Β)

Νηπ.: Ωραία, το παραλληλόγραμμο ταιριάζει με το τετράγωνο.

Για ποιο λόγο; Για πες μου.

Γ.: Γιατί έχει τέσσερις γωνίες, τέσσερις γωνίες.

Ε.: **Αλλά δεν είναι ίδιο σχήμα.**

29. (Ομ5Β)

[Συζήτηση για τίτλους σελιδοποιημένων σχημάτων]

Νηπ.: Θα τους δώσουμε ένα όνομα ή δύο διαφορετικά ονόματα;

Ε.: Ένα.

Νηπ.: ..Αφού τα βάλατε σε διαφορετικά χαρτόνια..

Ε.: Εδώ κύκλοι κι εδώ κύκλοι [2 σελ. με κύκλους]. Εγώ θέλω κύκλοι να βάλουμε εδώ, **δηλαδή να είναι ίδια ονόματα, γιατί βλέπω εγώ, γιατί είναι ίδιοι στρογγυλοί. Δεν είναι κάποιο διαφορετικό σχήμα. Δηλαδή αυτά** [ελλείψεις] **δεν είναι κύκλοι, μοιάζουν σαν αβγούλακια.**

30. (Ομ2Β)

Μ.: Εγώ λέω πως **δεν είναι και για ομάδα, γιατί** αυτό είναι έτσι και αυτό είναι έτσι [δείχνει περίγραμμα των 2 σχημάτων, τριγώνου και ρόμβου, με το χέρι της]. **Δηλαδή αυτό έχει 3 γωνίες.. αυτό έχει μία, δύο, τρεις, τέσσερις..** [μετράει δείχνοντας διαδοχικά γωνίες στα 2 σχήματα]

Ε.: Αυτό [δείχνει σε άλλο τρίγωνο] έχει μία, δύο, τρεις.

Μ.: Ναι, **δεν μπαίνουν στην ίδια ομάδα.**

3.2.3 Εγκιβωτισμός πληροφοριών

Απόπειρες παραγωγής αποπλαισιωμένου λόγου εμφανίζονται στο υλικό μας και με συμπλέγματα συσχετιστικών προτάσεων (παραδ. 31-32). Επιμέρους συσχετιστικές προτάσεις εγκιβωτίζονται στη δομή του ΟΣ αναπλαισιώνοντας τη γνώση για το σχήμα από οικείες περιστάσεις στο παρόν πλαίσιο – τη συζήτηση για το σχήμα. Στο παράδειγμα από την Ομάδα 6, η εγκιβωτισμένη πρόταση (ΕΠ) *[[που μοιάζει σαν τρίγωνο]]* συνιστά συσχετιστική πρόταση απόδοσης ιδιοτήτων που λειτουργεί ως προσδιοριστής του ονόματος (τυρί). Αντίστοιχα, οι φράσεις «*όπως κόβουμε στην τούρτα*», «*και όταν μοιάζει έτσι, μπορούμε να το τρώμε*» ενσωματώνουν στη δομή του ΟΣ (σε χαμηλότερο επίπεδο ιεραρχικής οργάνωσης) πληροφορίες από σχετικά συγκεκριμένα πλαίσια. Διαφορετική είναι η χρήση της ΕΠ *[[που μοιάζει σαν τη σκεπή]]* από την Ομάδα 5. Η ΕΠ λειτουργεί εδώ συμπληρωματικά στην πρόταση ταυτοποίησης της κατηγορίας σχήματος (μη φορική αναφορά) επεξηγώντας την έννοια μέσα από ένα παράδειγμα του σχήματος.

31. (Ομ6Β)

Α.: Το τρίγωνο μοιάζει σαν το (τέτοιο) τυρί *[[που μοιάζει σαν τρίγωνο]]*, *[[όπως κόβουμε στην τούρτα, και όταν μοιάζει έτσι μπορούμε να το τρώμε]]* (...).

32. (Ομ5Β)

Ε.: Είναι το τρίγωνο *[[που μοιάζει σαν ... τη σκεπή]]*.

Και η σκεπή είναι τρίγωνη.

3.2.4 Γενίκευση με χρονικοϋποθετικές προτάσεις

Στις πραγματώσεις των παιδιών εμφανίζεται και ένα μεγάλος αριθμός συσχετιστικών προτάσεων που διερευνούσαν τη διατήρηση ή τη μεταβολή της ταυτότητας του σχήματος σε συνάρτηση με το χωρικό προσδιορισμό του (αλλαγή θέσης/περιστροφή -παραδ. 33-38) ή τα δυνητικά παράγωγα από την τομή των σχημάτων (ανάλυση/σύνθεση σχήματος -παραδ. 39-42). Οι συσχετιστικές αυτές προτάσεις λεκτικοποιούν μια υπόθεση τοποθετώντας σε θέση μετέχοντα επιμέρους χρονικοϋποθετικές προτάσεις (ως συνθήκη ισχύος της συσχέτισης) θεμελιωμένες σε περιστασιακά στοιχεία. Οι χρονικοϋποθετικές προτάσεις εισάγονται συνήθως με τους συνδέσμους *αν, άμα, όταν* και σε κάποιες περιπτώσεις και με την αοριστολογική φράση *όπως και να* (πρβλ. Holton κ.ά. 1999: 424-425) και πραγματώνονται με ρήματα σε α' πληθυντικό ή β' ενικό (εγχείρημα γενίκευσης της υλικής διαδικασίας –*γυρίσουμε/ γυρίσεις, κόψουμε* κλπ). Η συσχετιστική διαδικασία πραγματώνεται με ρήματα όπως *είναι, γίνεται / θα γίνει* αλλά και με το τροπικό *μπορεί/-ούν (να γίνει/-ουν)* στις πραγματώσεις που αφορούσαν ειδικότερα τα νοητά παραγόμενα σχήματα (βλ. παραδ. ανάλυσης-σύνθεσης σχημάτων). Στις προτάσεις, επιπλέον, που δηλώνουν τη διατήρηση της ταυτότητας του σχήματος (παραδ. 33-35) εμφανίζονται και οι δείκτες *ακόμη, πάλι* (έμφαση στη διατήρηση ως συνέχεια, επανάληψη).

Αν και οι συσχετιστικές αυτές προτάσεις διατηρούν ένα βαθμό εξάρτησης από το πλαίσιο (βλ. πχ. περιστασιακά χώρου *έτσι*, *αλλιώς*), λόγω ενδεχομένως άγνοιας πιο εξειδικευμένων όρων για τη δήλωση των χωρικών σχέσεων, η δομή τους εκφράζει τη διερεύνηση της γενικευσιμότητας του πλαισίου από τα παιδιά, δηλώνοντας όχι μόνο το συναγόμενο στη συγκεκριμένη περίπτωση συμπέρασμα αλλά μια δυνητική συνθήκη. Τέτοιου τύπου προτάσεις συχνά άλλωστε διάσυνδεσαν δύο διαφορετικούς κατηγορικούς όρους σχήματος στην ίδια πρόταση, επιχειρώντας να εξειδικεύσουν το είδος συσχέτισής τους. Έτσι, για παράδειγμα η συσχέτιση τετραγώνων-ρόμβων απασχόλησε το σύνολο των ομάδων, διερευνήθηκε σε συνάρτηση κυρίως με *χωρικούς μετασχηματισμούς* και νοηματοδοτήθηκε κυρίως ως σχέση μεταβολής της ταυτότητας (παραδ. 36-38).

Στα παραδείγματα με υπογράμμιση σημειώνονται οι συσχετιζόμενες οντότητες (μετέχοντες - ονόματα σχημάτων) και με μαύρα γράμματα οι χρονικουποθετικές προτάσεις, που εδώ εντάσσονται στη δομή της πρότασης ως Δείγμα ή Φορέας για προτάσεις ταυτοποιητικές ή απόδοσης χαρακτηριστικών αντίστοιχα. Με μαύρα γράμματα σημειώνονται επίσης οι δείκτες *ακόμη/-α*, *πάλι* και το τροπικό *μπορεί*.

- Διατήρηση / μεταβολή ταυτότητας σε συνάρτηση με το χωρικό προσδιορισμό του σχήματος

33. (Ομ1Β)

Φ.: *Αν το γυρίσουμε έτσι το τρίγωνο* [περιστροφή σελ. με τρίγωνα], *γίνεται πάλι τρίγωνο*. (...)

Τ.: *Αμα το γυρίσουμε έτσι* [νέα περιστροφή σελ.], *θα είναι πάλι τρίγωνο*. (...)

Τ.: *Να, γράψε αυτό που είπαμε.*

Νηπ.: *Πες το.*

Τ.: *Αμα το γυρίσουμε κι έτσι, θα γίνει πάλι τρίγωνο.*

[[Αν/ Αμα το γυρίσουμε έτσι]] Τροποποιητής: ΕΠ Η περίπτωση ως συνθήκη				[το τρίγων ο]	γίνεται / θα είναι / θα γίνει	πάλι	τρίγων ο

34. (Ομ1Β)

Τ.: *Ξέρω, ξέρω! Αμα το γυρίσουμε έτσι* [περιστροφή σελ. με κύκλους], *..γίνεται;*

Φ.: *Είναι ακόμη κύκλος.*

Επειδή οι κύκλοι δεν έχουν γωνίες, όπως και να το γυρίσουμε.

35. (Ομ3Α)

Κ.: *Να έτσι...Όπως και να τους γυρίσουμε τους ρόμβους, ακόμα ρόμβους θα μας δείχνει.*

36. (Ομ6Β)

Α.: *Το τετράγ.. Αμα το γυρίσεις έτσι το τετράγωνο, είναι ρόμβος* [υπαγορεύει σε νηπιαγωγό, χωρίς να απευθύνεται σε συνομιλητή].

(...)

Νηπ.: *Με μπέρδεψες. Αυτό που μου 'πες πριν, ότι το τετράγωνο άμα το γυρίσεις ... πες το μου ξανά.*

Α.: *Το τετράγωνο, όταν το γυρνάς έτσι, γίνεται ένας υπέροχος ρόμβος.*

37. (Ομ1Β)

Φ.: *Το τετράγωνο είναι ένα σχήμα που έχει 4 γραμμές.*

(...)

Νηπ.: *Περίμενε. Μου είπατε το τετράγωνο είναι ένα σχήμα που έχει 4 γραμμές. Θα πούμε κάτι άλλο;*

Φ.: *Και κάτι άλλο για το τετράγωνο...*

Νηπ.: *Πες το.*

Φ.: *...που αν το γυρίσουμε κάπως αλλιώς, γίνεται ρόμβος.*

38. (Ομ5Α)

Ξ.: Κυρία, αυτό [τετραγ.] άμα το κάνουμε έτσι [το γυρίζει λοξά], είναι ρόμβος. Άμα το κάνουμε έτσι [ίσιο], θα είναι τετράγωνο.

(...) Άμα το βάλουμε έτσι, φαίνεται σαν ρόμβος. Άμα το βάλουμε έτσι, είναι τετράγωνο.

- Ανάλυση /σύνθεση σχημάτων

39. (Ομ3Β)

Κ.: Κυρία, εγώ έχω βρει. Αν τα κόψουμε εδώ [δείχνει σε ένα παραλληλόγραμμο] , τα ορθογώνια, θα γίνουν στραβά τρίγωνα.

(...)

Κ.: Μπορούμε να γράψουμε: Αν κόψουμε στη μέση, να γίνει τρίγωνο.

Νηπ.: [Γράφοντας] Αν το κόψουμε..

Μ.: [Υπαγορεύει] ..στη μέση

Κ.: ..τρίγωνο μπορεί να γίνει.

40. (Ομ3Β)

Μ.: Όταν κόψουμε αυτό εδώ [δείχνει νοητή διαγώνιο πάνω σε ένα ρόμβο της σελίδας], θα γίνει τρίγωνο μντερό.

41. (Ομ3Β)

Νηπ.: Θέλω να μου πείτε τι ξέρετε για τους κύκλους. Γενικά τι ξέρουμε για τους κύκλους.

Κ.: Εγώ ξέρω. Αν το κόψουμε στη μέση, μπορεί να γίνει τούνελ και καμπύλη.

42. (Ομ3Β)

Νηπ.: (...) Τι ξέρουμε για τα τετράγωνα;

Κ.: Λοιπόν, μπορούμε να τα κάνουμε λίγο ρόμβο, αν κόψουμε το μισό έτσι [δείχνει νοητές τομές].

Νηπ.: Ωραία, τι να γράψω λοιπόν;

Κ.: Μπορεί να γίνει και ρόμβος.

3.2.5 Περιγραφικοί ορισμοί

Απ' τη συνολική εικόνα του υλικού, στη Β' φάση (γραφή των κειμένων) παγιώνονται και γενικεύονται σημασιολογικά από τα παιδιά οι αρχικές τους ταξινομήσεις της Α' φάσης. Σε αυτή τη φάση επιχειρούνται και ορισμοί μέσα από συσχετίσεις με οικείες οντότητες, είτε σχολικές (απεικόνιση γραμμάτων, απεικονίσεις αντικειμένων σε βιβλία με σχήματα της τάξης) είτε με αντικείμενα της καθημερινής εμπειρίας (πχ. ήλιος, γη, πασχαλίτσα, κουμπί, σκεπή/-ες, πανιά του πλοίου, κορμός, χαρταετός). Στις προτάσεις αυτές, που συχνά εμπεριέχουν και εκτενέστερες περιγραφές του απόντος αντικειμένου ή χρονικοϋποθετικές προτάσεις για τον προσδιορισμό της συνθήκης ομοιότητας, κυριαρχούν τα ρήματα *είναι σαν*, *μοιάζει σαν*, *γίνεται σαν*. Οι συσχετίσεις αυτές συνιστούν *περιγραφικούς ορισμούς* που λειτουργούν επεξηγηματικά για τον "αναγνώστη" παρέχοντας του παραδείγματα του σχήματος.

Αξιοσημείωτο είναι ωστόσο ότι, στις απόπειρες ταυτοποίησης του σχήματος στη Δ' φάση (παιχνίδι περιγραφής με κάρτες 4 διαφορετικών σχημάτων), τα παιδιά χρησιμοποιούν όρους που συνδέονται με πιο τυπικές ιδιότητες του σχήματος, όπως *γωνίες/γραμμές* (για τις πλευρές), όρους που αναφέρθηκαν και συγκροτήθηκαν ως χαρακτηριστικά των αντικειμένων στις προηγούμενες συναντήσεις των ομάδων. Οι περιγραφές πραγματώνονται με περιεκτικές κτητικές συσχετιστικές προτάσεις, όπως στα παραδείγματα που ακολουθούν:

43. (Δ)

Κ. (Ομ3): Δεν έχει γραμμές ούτε γωνίες.

Α. (Ομ4): Δεν έχει γωνίες.

Γ. (Ομ2): Έχει 4 γωνίες [τετράγωνο]

Ε. (Ομ5): Έχει 4 γωνίες ... και είναι; [ορθογώνιο]

Φ. (Ομ1): Έχει 2 μεγάλες γραμμές και 2 μικρές γραμμές.

Α. (Ομ4): Έχει 3 γωνίες.

Φ. (Ομ1): Έχει 3 γραμμές και 3 γωνίες.

4. Συμπεράσματα - συζήτηση

Στην πραγμάτευσή μας προσπαθήσαμε να δείξουμε πώς το πλαίσιο γραμματισμού που οργανώθηκε με ολιγάριθμες ομάδες παιδιών ενεργοποίησε τις δυνατότητές τους να συγκροτούν και να λεκτικοποιούν σημασιολογικές κατηγορίες γεωμετρικών σχημάτων, δηλαδή μιας περιοχής κατεξοχήν σχολικής γνώσης. Σε συμφωνία με τις γενικές υποθέσεις της έρευνάς μας, τα παιδιά επιχείρησαν να νοηματοδοτήσουν την όλη κατάσταση και να συγκροτήσουν κριτήρια ταξινόμησης, αξιοποιώντας στη συγκεκριμένη διδακτική συνθήκη και τις προϋπάρχουσες γνώσεις τους για τις συγκεκριμένες κατηγορίες σχημάτων.

Οι γλωσσικές πραγματώσεις ξεκινούσαν καταρχάς από την άμεση παρατήρηση, σύγκριση και αντιπαράβολή τόσο μελών της ίδιας κατηγορίας σχήματος όσο και μεταξύ διαφορετικών κατηγοριών σχημάτων. Η διατύπωση *συσχετιστικών διαδικασιών* συνδέεται με τις απόπειρες των παιδιών να διερευνήσουν τις ιδιότητες των σχημάτων, ως ταυτοποιητικά χαρακτηριστικά κάθε κατηγορίας και ως κριτήρια ταξινόμησης.

Η διατύπωση κριτηρίων στη βάση ομοιοτήτων ή διαφορών προκάλεσε συχνά αντιπαράθεσεις εντός των ομάδων. Ενώ, όμως, σε γενικές γραμμές, οι ταξινομήσεις που υιοθέτησαν σε επίπεδο ομάδας προσεγγίζουν τις πιο τυπικές ταξινομήσεις, εύλογο ήταν τα παιδιά να μη διαθέτουν πιο εξειδικευμένους τυπικούς πόρους ταξινόμησης. Έτσι, χρησιμοποιήθηκαν καθημερινοί όροι προκειμένου να αποδοθεί μια διαβλεπόμενη υπερκατηγορία (πχ *στρογγυλά*) ή να προσδιοριστούν πιθανές υποκατηγορίες (*αβγά, πετύρια του καρχαρία, πυραμίδα/-ες*), ενώ σε κάποιες περιπτώσεις η ταυτοποίηση κατηγοριών παραματώθηκε και με μεταγλωσσικές διαδικασίες (*να τα λένε, να το ονομάσουμε*). Καθημερινοί ή επινοημένοι όροι χρησιμοποιήθηκαν επίσης και ως *τροποποιητές* στην ονομασία του σχήματος (βλ. πχ. *στραβά/-ιά, όρθιος, μυτερό, κοντό, στραβωμένο*) προκειμένου να εξειδικευτεί η σχετική θέση ή το είδος του σχήματος.

Η χωρική τοποθέτηση των σχημάτων (περιστροφή και αλλαγή θέσης) ως πιθανή μεταβλητή διατήρησης/μεταβολής της ταυτότητας των σχημάτων, καθώς και η διερεύνηση της ανάλυσης/σύνθεσής τους αποτέλεσαν στρατηγικές σημασιολόγησης όπου εμφανίστηκαν ενδιαφέρουσες απόπειρες γενίκευσης με χρονικοϋποθετικό λόγο. Οι χρονικοϋποθετικές προτάσεις (*αν /άμα/όταν...*) επέχουν θέση μετέχοντα συσχετιστικών προτάσεων (η περίπτωση ως συνθήκη/προϋπόθεση -δήλωση υποχρεωτικότητας- ή ως πιθανότητα -πρόβλεψη ακολουθίας γεγονότων). Η αναπλαισίωση γνώσεων με εγκιβωτισμό της πληροφορίας στη δομή του ΟΣ καθώς και η χρήση γενικευμένων όρων στους μετέχοντες των συσχετιστικών προτάσεων (γενική σημασία της ονομασίας του σχήματος σε ενικό ή πληθυντικό ή χρήση του όρου *σχήμα/-ατα*, μαζί με δείκτες όπως *όλα, μερικά, όλο, μόνο, ίδια/-ιο, κάτι, κάποιο/-α, άλλο/-α*) εκφράζουν επίσης απόπειρες γενίκευσης και παραγωγής αποπλαισιωμένου λόγου από τα παιδιά στο πλαίσιο παραγωγής ενός ορισμού.

Η παραγωγή ορισμών αποτυπώνεται με μεγαλύτερη σαφήνεια στη Β' φάση, καθώς το πλαίσιο των αρχικών ταξινομήσεων της Α' φάσης εμπεριέχει μεν ένα αίτημα συμφωνίας αλλά και μεγαλύτερη ευχέρεια «άτυπων» σχολίων κατά το χειρισμό του υλικού. Αντίθετα, το διδακτικό πλαίσιο στη Β' φάση προωθεί την παραγωγή πιο αποπλαισιωμένου λόγου και τη διατύπωση δηλωτικού λόγου.

Ο σχολικός χαρακτήρας του βιβλίου φαίνεται, πράγματι, να λαμβάνεται υπόψη από τα παιδιά και τα ωθεί στο να αξιοποιήσουν όλους τους διαθέσιμους γλωσσικούς πόρους για το γραπτό λόγο. Μέσα από συσχετίσεις ομοιότητας με οικεία αντικείμενα (ως παραδείγματα της κατηγορίας), οι περιγραφικοί ορισμοί στη Β' φάση συνδέονται με το διδακτικά προσανατολισμένο επικοινωνιακό στόχο των συνοδευτικών-πληροφοριακών κειμένων για τα σχήματα. Η επιλογή τέτοιου τύπου συσχετίσεων από τα παιδιά στη Β' φάση συνιστά ταυτόχρονα έναν τρόπο ερμηνείας-νοηματοδότησης του έργου και μια στρατηγική ανταπόκρισης σε αυτό. Η ανταπόκριση των παιδιών στις απαιτήσεις των επιμέρους έργων αναδεικνύεται και από τις επιλογές τους στο παιχνίδι περιγραφής της Δ' φάσης, όπου οι συσχετίσεις ομοιότητας με οικεία αντικείμενα σχεδόν απουσιάζουν. Τα παιδιά χρησιμοποιούν εδώ όρους που συνδέονται με τυπικές ιδιότητες του σχήματος (*γωνίες, γραμμές*), αναγνωρίζοντάς τους ως πιο κατάλληλους στο συγκεκριμένο πλαίσιο, ακόμη και αν το νόημά τους δεν είναι ακόμη συγκροτημένο με πιο τυπικά μαθηματικό τρόπο.

Συνοπτικά, θα λέγαμε, ότι τα δεδομένα μας επιβεβαιώνουν τη βασική μας υπόθεση ότι η οργανωμένη και λειτουργικά νοηματοδοτημένη ενασχόληση με ορισμούς και ταξινομήσεις στο πλαίσιο πρακτικών γραμματισμού και η γλωσσική πραγμάτωση και διαπραγμάτευση του νοήματος ενεργοποιούν τις προϋπάρχουσες γνώσεις των παιδιών και προωθούν τις διαδικασίες συλλογισμού και μάθησης των κατηγοριών μη κοινής γνώσης.

ABSTRACT

In this paper we present work in progress aimed at the formal description of Greek verbs denoting emotion and their classification on the grounds of their syntactic and semantic properties within the methodological framework of Lexicon-Grammar. The ultimate goal being to develop a sound lexical resource (LR) aimed to also assist applications such as sentiment analysis and summarization – among others - the encoding of emotion verbs in a conceptual Data Base (DB) has also been attempted on semantic grounds, developing, thus, a conceptual system that organizes the semantic field of emotions (being, in this sense, an ontology of emotions).

Λέξεις κλειδιά: σημασιολογικό πεδίο των συναισθημάτων, λεξικό – γραμματική, σημασιολογική ταξινόμηση, ένταση συναισθήματος, πολικότητα συναισθήματος, λεξιλογικός πόρος, επεξεργασία φυσικής γλώσσας.

1. Εισαγωγή

Στόχος της παρούσας ανακοίνωσης είναι η παρουσίαση των πρώτων αποτελεσμάτων ερευνητικής εργασίας με αντικείμενο την πλήρη καταγραφή και ταξινόμηση των ρημάτων της νέας ελληνικής που δηλώνουν συναισθήματα (*Vsent*). Η ταξινόμηση αυτή λαμβάνει υπόψη τα συντακτικά και σημασιολογικά χαρακτηριστικά των εν λόγω ρημάτων, με στόχο την κωδικοποίησή τους σε βάση δεδομένων και τη δημιουργία ενός εύρωστου γλωσσικού πόρου για το συγκεκριμένο σημασιολογικό πεδίο, ο οποίος θα μπορεί να ενσωματωθεί σε διάφορες εφαρμογές επεξεργασίας φυσικής γλώσσας (ΕΦΓ). Η εργασία αυτή εντάσσεται σε ένα ευρύτερο ερευνητικό πλαίσιο, το οποίο αφορά: (α) στην χαρτογράφηση και οριοθέτηση του *σημασιολογικού πεδίου των συναισθημάτων στην ελληνική* μέσω της συγκέντρωσης, κατηγοριοποίησης και διασύνδεσης όλων των λεξικών τύπων που υπάρχουν σε αυτό το πεδίο, (β) στον συνακόλουθο καθορισμό ενός πολυ-επίπεδου ταξινομικού σχήματος που θα αφορά όλο εν γένει το *λεξιλόγιο των συναισθημάτων στην ελληνική*, και (γ) στην κωδικοποίηση των ανωτέρω σε έναν ολοκληρωμένο Γλωσσικό Πόρο (ΓΠ) που θα αποτελεί, στην πρώτη αυτή φάση, μία “γραμματική των συναισθημάτων”.

2. Στόχος – Μεθοδολογία

Η μελέτη των ανθρώπινων συναισθημάτων αποτελεί αντικείμενο διεπιστημονικής έρευνας. Παράλληλες εξελίξεις σε διαφορετικά πεδία της φιλοσοφίας, της ψυχολογίας και της φυσιολογίας όχι μόνο συγκλίνουν στην σημασία που αποδίδεται στο συναισθήματα ως αυτόνομο πεδίο έρευνας, αλλά παράλληλα, οριοθετούν την έννοια, το εύρος και τα χαρακτηριστικά του συναισθήματος. Μέσω αυτού του λεξιλογικού πεδίου, έχει γίνει προσπάθεια να διερευνηθεί η ύπαρξη καθολικών χαρακτηριστικών (universals) της ανθρώπινης γλώσσας (Wierzbicka 1999).

Στο χώρο της θεωρητικής γλωσσολογίας, η μελέτη και συστηματοποίηση των ρημάτων που εκφράζουν συναισθήματα αποσκοπεί στη διερεύνηση του κατά πόσον μία σημασιολογική κατηγορία μπορεί να οριστεί με βάση συντακτικά και δομο-λειτουργικά χαρακτηριστικά (Levin 1993, Ruwet 1995, Voorst 1995).

Πέρα, όμως, από τις γλωσσολογικές προσεγγίσεις, η αναγνώριση συναισθήματος σε κείμενο αποτελεί το ζητούμενο στο χώρο της *γλωσσικής τεχνολογίας*. Πράγματι, τα τελευταία χρόνια, παρατηρείται μία στροφή της ερευνητικής κοινότητας από την εξαγωγή πληροφορίας σχετικά με πρόσωπα/οργανισμούς/γεγονότα που εμφανίζονται στα γραπτά κείμενα, στην κατανόηση του κειμένου αναφορικά με τις απόψεις/κρίσεις ατόμων ή ομάδων ατόμων και την συνακόλουθη ανάδειξη του θεματικού πεδίου των συναισθημάτων. Παραδοσιακά, οι μεθοδολογίες *ανάλυσης συναισθήματος σε κείμενο* (sentiment analysis), περιορίζονται συνήθως στην αναγνώριση και διάκριση συναισθημάτων με βάση το δίπολο θετικό – αρνητικό, ή, εναλλακτικά, το συνεχές θετικό – ουδέτερο – αρνητικό, ενώ τελευταία προτείνεται και μία πιο λεπτομερής κατηγοριοποίηση των συναισθημάτων (Wiebe et al. 2005, Wilson 2008, Asher et al. 2009). Στο πλαίσιο αυτό, η γλωσσολογική έρευνα αναφορικά με το συναισθηματικό αποκτά νέες προοπτικές, καθώς μέσα από την γλωσσική ανάλυση και την λεξικογραφική πρακτική έρχεται να συμπληρώσει και να επιβοηθήσει τις ποσοτικές μεθόδους στην κατανόηση κειμένου και την αναγνώριση συναισθήματος.

Η παρούσα εργασία εντάσσεται στο πλαίσιο ευρύτερης έρευνας που αφορά στο λεξιλόγιο της ελληνικής που εμπίπτει στο σημασιολογικό πεδίο των συναισθημάτων με στόχο την περιγραφή και ανάλυση της ελληνικής αφενός, και αφετέρου, την ανάπτυξη εύρωστων λεξιλογικών πόρων οι οποίοι θα μπορούσαν να ενσωματωθούν σε εργαλεία επεξεργασίας φυσικής γλώσσας. Το ζητούμενο στο σημείο αυτό είναι όχι μόνο ένας ορισμός του το λεξιλόγιο των συναισθημάτων, αλλά και, ει δυνατόν, η επαλήθευση του ορισμού αυτού με κριτήρια συντακτικά και σημασιολογικά κατά τρόπον ώστε να είναι εμφανές ότι η υπό μελέτη σημασιολογική κατηγορία είναι αυτόνομη και διακριτή. Η μελέτη αυτή επικεντρώνεται σε τρεις άξονες: (α) στην πλήρη οριοθέτηση και καταγραφή του ειδικού λεξιλογίου που συγκροτεί το εν λόγω σημασιολογικό πεδίο (ρήματα, ουσιαστικά, επίθετα, επιρρήματα, φράσεις), (β) την μελέτη και συστηματοποίηση για κάθε λέξη ή ομάδα λέξεων των λεξικών της χαρακτηριστικών, των επιλογών υποκατηγοριοποίησης (subcategorization features), και των χαρακτηριστικών επιλογής (selectional features), και (γ) την οργάνωση του λεξιλογίου σε εννοιολογική βάση δεδομένων, κατά τρόπον ώστε να ορίζεται μία “οντολογία των συναισθημάτων”.

Η συλλογή, συστηματοποίηση και ανάλυση των υπό εξέταση ρημάτων βασίστηκε στη χρήση Σωμάτων Κειμένων (ΣΚ) για την εξαγωγή εμπειρικών δεδομένων σύμφωνα με τις μεθοδολογίες της Γλωσσολογίας Σωμάτων Κειμένων (Corpus Linguistics). Με στόχο την κατά το δυνατόν πληρέστερη καταγραφή των δομών των γλωσσικών μονάδων, καταρτίστηκε ΣΚ από ετερογενείς πηγές. Ειδικότερα, μεγάλο μέρος του ΣΚ απαρτίζεται από ένα υποσύνολο του Εθνικού Θησαυρού της Ελληνικής Γλώσσας (ΕΘΕΓ), κατάλληλα επιλεγμένο ώστε να περιλαμβάνει τα υπό μελέτη ρήματα. Παράλληλα, για λόγους πληρότητας, το ΣΚ εμπλουτίστηκε περαιτέρω με κείμενα από το διαδίκτυο, από blogs, forums, κείμενα έκφρασης γνώμης (π.χ. επιστολές αναγνωστών σε εφημερίδες), κείμενα life-style, σχολιασμός ειδήσεων, κ.τ.λ., καθώς επίσης και από μεταγραμμένα κείμενα προφορικού λόγου, τα οποία αντικατοπτρίζουν μία πιο καθημερινή/ανεπίσημη και “συναισθηματική” γλώσσα. Το ΣΚ φέρει κατάλληλη επισήμειωση σε διάφορα επίπεδα γλωσσικής ανάλυσης (μορφο-συντακτική ανάλυση και λημματοποίηση, predicate-argument structure).

3. Το μεθοδολογικό μοντέλο

Το μεθοδολογικό μοντέλο το οποίο χρησιμοποιείται στην παρούσα εργασία είναι αυτό του «Λεξικού-Γραμματικής» (Lexicon-Grammar, Gross 1975 1981). Σύμφωνα με την παραδοχή ότι η λειτουργία των γενικών συντακτικών κανόνων, οι οποίοι περιγράφουν ή/και ορθώς προλέγουν τις γραμματικές δομές της/μιας γλώσσας, στο πλαίσιο των σύγχρονων συντακτικών θεωριών, στην πράξη εξαρτάται εν πολλοίς από τις συντακτικές και σημασιολογικές ιδιότητες των επιμέρους λεξικών μονάδων, ως βασική μονάδα αναπαράστασης και ανάλυσης της γλώσσας λαμβάνεται η βασική πρόταση, νοούμενη ως η πυρηνική δομή Υποκείμενο - Ρήμα – Συμπλήρωμα. Έτσι, ως μονάδα ανάλυσης δεν είναι η λέξη που συνοδεύεται από γραμματικές πληροφορίες αλλά απλές προτάσεις που συνοδεύονται από περιγραφή των κατανομικών (distributional) και μετασχηματιστικών (transformational) ιδιοτήτων τους (Gross 1984). Τα γλωσσολογικά μοντέλα που προκύπτουν είναι εξαντλητικά, καθώς επιτρέπουν την καταγραφή του συνόλου των δομών των γλωσσικών μονάδων, και παρουσιάζονται κατά τρόπο συστηματικό και τυποποιημένο. το οποίο με την τυποποίηση και κωδικοποίηση των μορφοσυντακτικών και σημασιολογικών ιδιοτήτων τους, και την δημιουργία πινάκων (lexicon-grammar tables) και τοπικών γραμματικών (local grammars). Η συστηματοποίηση και ο φορμαλισμός των δεδομένων διευκολύνουν την περιγραφή της γλώσσας και την αυτόματη ανάλυσή της.

4. Προηγούμενες Μελέτες

Στο πεδίο της θεωρητικής γλωσσολογίας, η μελέτη του λεξιλογίου των συναισθημάτων έχει απασχολήσει στο παρελθόν την έρευνα διεθνώς, και για πολλές γλώσσες, εντούτοις, πολλά ζητήματα παραμένουν ακόμα ανοικτά. Οι περισσότερες μελέτες έχουν ως στόχο την πλήρη καταγραφή των λεξικών και σημασιολογικών δομών του λεξιλογίου των συναισθημάτων ανά γραμματική κατηγορία, και συνηθέστατα για γλώσσες όπως η γαλλική, και η αγγλική. Από την θεώρηση της Γενετικής-Μετασχηματιστικής θεωρίας, πρώτοι οι Belletti και Rizzi (1988) προτείνουν μία ανάλυση των ρημάτων ψυχικού πάθους (psych verbs)¹ της ιταλικής με βάση το θεματικό δίκτυο (theta-grid) για τα συμπληρώματά τους, το οποίο περιλαμβάνει τους θεματικούς ρόλους [*Experiencer*, *Theme*] (Βιώνων, Θέμα).

Η Mathieu (2000) επιχειρεί την ταξινόμηση των ρημάτων της γαλλικής που δηλώνουν συναίσθημα με βάση την σημασία τους σε τρεις βασικές κατηγορίες: *θετικά* (agréables), *αρνητικά* (désagréables) και *ουδέτερα* (indifférents). και προχωρά στην συστηματική μελέτη αυτών ως προς τα κοινά χαρακτηριστικά της σύνταξής τους αλλά και λοιπών λεξιλογικών χαρακτηριστικών (π.χ. ρήματα με ενσωματωμένο δείκτη έντασης). Στην ίδια κατεύθυνση, οι Mathieu et al. (2010) προχωρούν στη συγκριτική μελέτη των ρημάτων της αγγλικής και της γαλλικής που δηλώνουν συναίσθημα, με βάση τα σημασιολογικά και δομο-συντακτικά τους χαρακτηριστικά. Καταλήγουν σε κοινές για τις δύο γλώσσες κατηγορίες, ενώ εντοπίζονται οι ιδιαιτερότητες της κάθε γλώσσας.

Για την ελληνική, μία πρώτη προσπάθεια για την καταγραφή και συστηματοποίηση των ρημάτων που δηλώνουν συναίσθημα με βάση το πρότυπο του Λεξικού-Γραμματικής επιχειρείται από την Antoniou (1984). Τα δομο-λειτουργικά και σημασιολογικά χαρακτηριστικά των εν λόγω ρημάτων συστηματοποιούνται, ενώ καταγράφονται και συστηματοποιούνται οι δομές με μεταφορική σημασία.

Ομοίως, τα επίθετα και ρήματα της ελληνικής που δηλώνουν συναίσθημα, τα τελευταία μάλιστα και σε σύγκριση με άλλες γλώσσες (γαλλική – τουρκική) έχουν αναλυθεί (Valetopoulos 2005). Το ενδιαφέρον της έρευνας επικεντρώνεται στην περιγραφή και τυπολογική διάκριση μεταφορικών φράσεων και εκφράσεων που σημαίνουν συναίσθημα (πάγωσα – πάγωσα από τον φόβο μου), ή φράσεων που δηλώνουν συναίσθημα (κάνω μούτρα σε κάποιον, η Μαρία είναι στον έβδομο ουρανό, βράζω από θυμό, είμαι στα κέφια μου), με έμφαση σε εκείνες που εμφανίζουν δομή με τα ρήματα *είμαι* και *έχω*:

είμαι + Prep + Det + N(psy) Poss (*είμαι στα κέφια μου*)

έχω + Det + N(psy) Poss (*έχω τα διαόλια μου*).

Κυρίως όμως, η μελέτη του λεξιλογίου των συναισθημάτων μέσα στο πλαίσιο του μεθοδολογικού μοντέλου του «Λεξικού-Γραμματικής» έχει επικεντρωθεί στη συστηματοποίηση των ονοματικών δομών (Gavrilidou 2002, Γαβριηλίδου 2002), κλπ. Ιδιαίτερο, όμως, ενδιαφέρον για την παρούσα μελέτη (καθώς αποτελεί οργανική τους συνέχεια), αποτελούν οι εργασίες των Pantazara, et al. (2008) και Fotopoulou et al. (2009), στις οποίες επιχειρείται η θέσπιση σημασιολογικών & συντακτικών κριτηρίων για την διάκριση των ουσιαστικών, και τελικά, ταξινόμηση των ουσιαστικών με βάση σημασιολογικά χαρακτηριστικά των δομών στις οποίες εμφανίζονται.

4.1. Περί συναισθήματος ή τυπολογία συναισθημάτων

Με αφετηρία τις διάφορες θεωρήσεις σχετικά με βασικές ιδιότητες που φέρει η έννοια *συναίσθημα* και την πραγματώσή τους μέσω της γλώσσας, έχει επιχειρηθεί η τυπολογία των ρημάτων ψυχικού πάθους στο μεταίχμιο της Σύνταξης – Σημασιολογίας. Μία τυπική, πλέον, διάκριση στον άξονα αυτό στηρίζεται στις έννοιες της οντότητας από την οποία προέρχεται το συναίσθημα ή *πηγής* (origin) του συναισθήματος, και του Βιώνοντος το συναίσθημα (*experiencer*) αναγνωρίζοντας συναισθήματα *ενδογενή* (endogenic) και *εξωγενή* (exogenic) (Anscombe 1996). Σύμφωνα με τη θεώρηση αυτή, ως ενδογενή ορίζονται τα συναισθήματα των οποίων η πηγή και ο βιώνων το συναίσθημα ταυτίζονται (π.χ. Θαυμασμός, Αγάπη, κ.τ.λ.). Αντίστοιχα, ως εξωγενή ορίζονται τα συναισθήματα των οποίων η πηγή και ο βιώνων δεν ταυτίζονται (π.χ. άγχος, αγανάκτηση, κ.τ.λ.). Αντίστοιχη είναι και η διάκριση σε ενεργά συναισθήματα (active emotions), όπως *αγάπη*, *ζήλεια*, κ.τ.λ., τα οποία στις περισσότερες περιπτώσεις επιδέχονται Αντικείμενο [+ανθρώπινο] και μη-ενεργά ή προκαλούμενα συναισθήματα (caused emotions), όπως *λύπη* (Buillon 1997).

Επίσης, στη βιβλιογραφία είναι συχνή και η διπλή διάκριση ανάμεσα στις έννοιες *αίσθημα* (sentiment) και *συναίσθημα* (emotion). Αν και στην παρούσα προσέγγιση, δεν θα μας απασχολήσει η διάκριση αυτή, αξίζει να σημειωθεί ότι στον άξονα αυτό, η τυπολογία των ουσιαστικών στηρίζεται επίσης σε

¹ Στην αγγλική βιβλιογραφία ο τα ρήματα αυτά αναφέρονται επίσης και ως emotion verbs.

κριτήρια γλωσσικά και δομο-λειτουργικά (Flaux et al. 2000). Έτσι, τα “δηλωτικά αισθήματος” ουσιαστικά (π.χ. *αγάπη*) διακρίνονται τυπολογικά από τα “δηλωτικά συναισθήματος” (π.χ. *φόβος*) ως προς την υποχρεωτική παρουσία δύο μετεχόντων. Με τον ίδιο τρόπο, η υπαγωγή ουσιαστικών στην κατηγορία “δηλωτικό ψυχολογικής κατάστασης” (π.χ. *θλίψη*), ενισχύεται περαιτέρω και από τις λεξιλογικές συνάψεις τους με ρήματα όπως βρίσκομαι σε / ζω στη θλίψη.

5. Επιλογή γλωσσικού υλικού: ρήματα δηλωτικά συναισθήματος της ελληνικής

Ως σημείο αφετηρίας, χρησιμοποιήθηκε ο σημασιολογικός θησαυρός της ελληνικής *Αντιλεξικό* ή αλλιώς *Ονομαστικών της Νεοελληνικής Γλώσσας* (Βοσαντζόγλου 1988), από το οποίο εξήχθησαν με το χέρι όλα τα ρήματα και οι ρηματικές φράσεις που υπάγονται στην σημασιολογική κατηγορία *Συναίσθημα*. Στον γλωσσικό αυτό πόρο περιλαμβάνονται 57 έννοιες/εννοιολογικές κατηγορίες οι οποίες λεξικοποιούνται μέσω 1168 ρημάτων και ρηματικών εκφράσεων. Ακολούθησε εκτεταμένος έλεγχος και διόρθωση με την κατάλληλη σηματοδότηση ή/και διαγραφή ρημάτων και ρηματικών τύπων που είναι πλέον παρωχημένοι και για τα οποία μπορούμε με μεγαλύτερη ασφάλεια να υποστηρίξουμε ότι δεν χρησιμοποιούνται πλέον στην ΝΕ, π.χ. βαριοθυμώ, κατεξανίσταμαι, φρυάττω, κλπ. Ομοίως, εξαιρέθηκαν από τον κατάλογο και όσα ρήματα χρησιμοποιούνται σε σχεδόν παγιωμένα περιβάλλοντα, όπως για παράδειγμα: υποδουλίζω (τα μίσση/πάθη), υποκινώ (μίσση/πάθη), αναπερώνω το ηθικό κπ / αναπερώνεται το ηθικό κπ, κλπ. Παρέμειναν για περαιτέρω έλεγχο με βάση τα γλωσσικά δεδομένα του ΕΘΕΓ (corpus evidence) μόνον όσα ρήματα θεωρήσαμε ότι είναι πιθανόν να απαντούν είτε στον προφορικό λόγο, ή σε λογοτεχνικά κείμενα, κλπ. Τέτοια ρήματα είναι τα: αγάλλομαι, αναθυμιάζω, , κλπ. Επίσης, ρήματα που δεν σημαίνουν αλλά υπονοούν ή συνεπάγονται συναίσθημα (π.χ. δακρύζω, γελάω, κλπ) σηματοδοτήθηκαν ανάλογα, με στόχο να μελετηθούν σε μεταγενέστερο στάδιο. Το υλικό αυτό εμπλουτίστηκε περαιτέρω με ρήματα από έντυπα λεξικά (ΛΝΕΓ 1998, ΛΚΝ 1998), μέσω συνωνύμων, αντιθέτων, κλπ. (π.χ. υπήρχε το λήμμα *αιδούμαι*, αλλά όχι *ντρέπομαι*, το οποίο προστέθηκε), καθώς και από ηλεκτρονικούς σημασιολογικούς πόρους για την αγγλική. Έτσι, από τον ηλεκτρονικό λεξιλογικό πόρο FrameNet (Fillmore et al. 2001) ελέγξαμε (μέσω μετάφρασης) όσα ρήματα της αγγλικής περιλαμβάνουν στο θεματικό τους δίκτυο ρόλο *Experiencer*.

Η επιλογή των ρημάτων οριστικοποιήθηκε με την εφαρμογή κριτηρίων (διαγνωστικών tests). Το διαγνωστικό κριτήριο που χρησιμοποιούμε στην παρούσα εργασία προκειμένου να καταλήξουμε στο συμπέρασμα ότι ένα ρήμα V είναι ρήμα δηλωτικό συναισθήματος (*Vsent*) είναι αυτό της υποκαταστασιμότητας. Έτσι, ένα ρήμα χαρακτηρίζεται ως *Vsent* αν και μόνο αν μπορεί να αντικατασταθεί από:

- σημασιολογικά ισοδύναμη παράφραση αποτελούμενη από τα ρήματα νιώθω/αισθάνομαι + ουσιαστικό δηλωτικό συναισθήματος (*Nsent*):

$N0 \ Vsent \ (E+NI) = N0 \ (\nuιώθω + \text{αισθάνομαι}) \ Nsent \ (E+PrepNI)$

Παραδείγματα:

$\muισώ \ κπν = (\nuιώθω + \text{αισθάνομαι}) \ \muίσος \ \text{για} \ \kappaπν$
 $\alphaγανακτώ = (\nuιώθω + \text{αισθάνομαι}) \ \alphaγανάκτηση$

- σημασιολογικά ισοδύναμη παράφραση αποτελούμενη από το ρηματική δομή :
κάνω κάποιον να (νιώθει + αισθάνεται) ουσιαστικό δηλωτικό συναισθήματος (*Nsent*):
 $N0 \ Vsent \ NI = [N0 \ \kappaάνω \ NI] \ \text{να} \ [NI \ \nuιώθει \ Nsent]$

Παραδείγματα:

$\epsilonξοργίζω \ κπν = \kappaάνω \ \kappaάποιον \ \text{να} \ (\nuιώθει + \text{αισθάνεται}) \ \text{οργή}$
 $\zetaαφνιάζω \ κπν = \text{προκαλώ} \ \text{σε} \ \kappaπν \ \epsilonκπληξη$

Να σημειωθεί εδώ ότι ως *Nsent* χαρακτηρίζεται κάθε ουσιαστικό του οποίου το σημασιολογικό φορτίο ταυτίζεται με μία έννοια ψυχολογική: συναίσθημα, αίσθημα, ψυχολογική στάση, κατάσταση ή συμπεριφορά, κ.τ.λ. Σύμφωνα, μάλιστα με τη μελέτη των Fotopoulou et al. (2009) αυτή η κατηγορία ουσιαστικών είναι δυνατόν να προσδιοριστεί με κριτήρια όχι μόνο σημασιολογικά αλλά και δομο-λειτουργικά. Για την λειτουργία των διαγνωστικών τεστ, το *Nsent* είτε ανήκει στην ετυμολογική οικογένεια του ρήματος (*αγαπώ – αγάπη*), ή απλά αποτελεί σημασιολογικό ισοδύναμο.

Η ανωτέρω διαδικασία, κατέληξε στην επιλογή 336 ρημάτων δηλωτικών συναισθήματος: π.χ. *αγαπώ*, *θυμώνω*, *τρομάζω*, κ.τ.λ. τα οποία εν συνεχεία μελετήσαμε και ταξινομήσαμε με βάση τις δομο-συντακτικές και σημασιολογικές τους ιδιότητες.

6. Συντακτική/δομο-λειτουργική ταξινόμηση των δηλωτικών συναισθήματος ρημάτων

Ο G. Gross (1994), στο πλαίσιο της θεωρίας περί ομάδων/τάξεων αντικειμένων (classes d'objets) διαπιστώνει ότι οι τάξεις των συναισθημάτων (classes des «affects») ορίζονται με σημασιολογικά κριτήρια, εν συνεχεία, όμως επικυρώνονται με συντακτικές και λεξικές ιδιότητες. Η μελέτη και συστηματοποίηση των εμπειρικών δεδομένων, επιτρέπει την επαλήθευση παλαιότερων συμπερασμάτων, ότι τα υπό εξέταση ρήματα εμφανίζουν κοινά σημασιο-συντακτικά χαρακτηριστικά τα οποία, πράγματι, επιτρέπουν τον ορισμό μίας αυτόνομης σημασιολογικής κατηγορίας. Η τυπολογία των ρημάτων στην παρούσα φάση στηρίζεται στα ακόλουθα χαρακτηριστικά: (i) τον αριθμό και το είδος των υποχρεωτικών ορισμάτων τους (ορισματική δομή), (ii) τους περιορισμούς επιλογής (selectional restrictions) που επιβάλλουν στο Υποκείμενο ή Αντικείμενο, και (iii) τους επιτρεπτούς μετασχηματισμούς (transformations). Να σημειώσουμε εδώ ότι, σύμφωνα με την “αρχή της μέγιστης ορισματικής επέκτασης” η ορισματική δομή ενός ρήματος συμπίπτει με τη μεγαλύτερη και πλήρους νοήματος συντακτική δομή της/μίας πρότασης, όπως αυτή προκύπτει από τη διαγραφή των (μη υποχρεωτικών) προσδιορισμών που μπορούν να εμφανίζονται (Kyriacopoulou 2003). Οι γραπτές ή προφορικές εκφορές οι οποίες πραγματώνονται ελαττωμένες κατά ένα ή και περισσότερα συμπληρώματα, εφόσον απαντούν στα ΣΚ και κρίνονται ως αποδεκτές από τους φυσικούς ομιλητές, απεικονίζονται στον πίνακα του λεξικού - γραμματικής ως υποκατηγορίες των βασικών κατηγοριών.

Στο επίπεδο της σύνταξης, για την ελληνική παρατηρούμε ότι τα ρήματα που δηλώνουν συναισθήματα συμμετέχουν σε δύο ειδών ορισματικές δομές όσον αφορά στα υποχρεωτικά συμπληρώματά τους (Υποκείμενο – Αντικείμενο):

(α) N0 V, όπου με N0 δηλώνεται το Υποκείμενο του ρήματος V, και

(β) N0 V N1, όπου με N0 δηλώνεται το Υποκείμενο του ρήματος V ενώ με N1 δηλώνεται το άμεσο Αντικείμενό του.

Η συστηματοποίηση των προαναφερθέντων συντακτικών και σημασιολογικών χαρακτηριστικών των υπό μελέτη ρημάτων, όπως προκύπτουν από την ανάλυση των εμπειρικών δεδομένων, οδηγεί στην ακόλουθη προκαταρκτική ταξινόμηση των δηλωτικών συναισθήματος ρημάτων:

1η κατηγορία: N0 (hum) V (E + Prep N1): αγανακτώ

Στην πρώτη κατηγορία υπάγονται ρήματα όπως *αγαλλιάζω, αγανακτώ, δυσανασχετώ, ντρέπομαι*, τα οποία έχουν Υποκείμενο N0, υποχρεωτικά έμψυχο [+έμψυχο]. Παραδείγματα:

*(Οι πολίτες +*τα βιβλία) αγανακτούσαν (με όσα έβλεπαν).*

Η τοπική κοινωνία έφριξε με το στυγερό έγκλημα.

2η κατηγορία: N0(hum) V (E+N1) ⇔ N1 VMP (E+Prep N0): αγαπώ

Στην δεύτερη κατηγορία υπάγονται ρήματα με περιοριστικό Υποκείμενο N0 το οποίο είναι υποχρεωτικά [+έμψυχο]. Παραδείγματα:

Ο Γιάννης αγαπάει (τη Μαρία +τα βιβλία+τη μουσική)².

*(*Η μουσική +*το βιβλίο) αγαπάει τον Γιάννη.*

Βασική ιδιότητα των ρημάτων αυτής της κατηγορίας των ρημάτων της κατηγορίας αυτής είναι ότι εφόσον έχουν παθητική φωνή, επιτρέπουν παθητικοποίηση. Παραδείγματα:

Ο Χούλιο αγαπήθηκε από οπαδούς και αντιπάλους

Ο Χούλιο αγαπήθηκε από οπαδούς και αντιπάλους για την αξία του.

Μία δεύτερη ιδιότητα είναι ότι η ορισματική δομή μπορεί να εμφανίζεται σε κάποιες περιπτώσεις και με ένα λιγότερο όρισμα, το μη περιοριστικό Αντικείμενο. Σ' αυτές τις περιπτώσεις έχουμε τη «γενικευτική» σημασία του ρήματος. Παραδείγματα:

Δεν γεννήθηκα για να μισώ αλλά για ν' αγαπώ.

Η Μαρία καμαρώνει (E+ για τα παιδιά της / για το δαχτυλίδι της / για τις επιτυχίες των αθλητών μας.)

Ο Γιάννης ντρέπεται (E+τους ξένους) για ό,τι έκανε.

² Η σημασία του *αγαπώ* σ' αυτή την πρόταση δεν είναι «ψυχικού πάθους» τουλάχιστον με τον παραδοσιακό ορισμό. Παραφράζεται η πρόταση με το «μου αρέσει η μουσική» και θα αποτελέσει ξεχωριστό λήμμα σ' ένα λεξικό αλλά και σ' ένα εννοιολογικό λεξικό.

3η κατηγορία: N1 V N0(hum) ⇔ N0(hum) V (E+PrepN1): νευριάζω

Στην τρίτη κατηγορία υπάγονται ρήματα τα οποία εμφανίζουν δύο διαφορετικές δομές ισοδύναμες με ή χωρίς Αντικείμενο. Στην πρώτη περίπτωση, η ορισματική τους δομή περιλαμβάνει μη-περιοριστικό Υποκείμενο και Αντικείμενο υποχρεωτικά [+έμφυχο]. Η εναλλακτική, και σημασιολογικά ισοδύναμη δομή περιλαμβάνει περιοριστικό Υποκείμενο υποχρεωτικά [+έμφυχο], και μη περιοριστικό Αντικείμενο. Παραδείγματα:

(Ο Γιάννης +ο θόρυβος+ το ότι άργησες) νευρίασε (τη Μαρία +*το σπίτ)ι.³
= Η Μαρία νευρίασε με το (E +Γιάννη + θόρυβο + ότι άργησες).

Ως προς τη μορφολογία τους, τα ρήματα της κατηγορίας αυτής συστήνουν μία ομοιογενή ομάδα με συγκεκριμένες ιδιότητες, καθώς διαθέτουν μόνο [+ενεργητική] μορφολογία (αηδιάζω, ανησυχώ, ηρεμώ, θυμώνω, καλμάρω, κ.τ.λ.) ενώ στερούνται μίας μορφολογίας, εν προκειμένω [-ενεργητικής].

Ο Γιάννης *αηδιάστηκε / *θυμώθηκε.

4η κατηγορία: N0 V N1(hum) ⇔ N1(hum) Vmp (E + Prep N0): αγχώνω

Τέλος, στην τέταρτη κατηγορία υπάγονται ρήματα με ορισματική δομή η οποία περιλαμβάνει μη περιοριστικό Υποκείμενο N0 και περιοριστικό Αντικείμενο N1 το οποίο είναι υποχρεωτικά [+έμφυχο]. Παραδείγματα:

(Η Μαρία + η κατάσταση) λύπησε (τον Γιάννη +*το παιχνίδι).
Το ότι δεν έρχεσαι να με δεις με λυπεί αφάνταστα.
(Ο Νίκος+ η κακή συμπεριφορά + το ότι ο Νίκος φεύγει εν μέσω μετακόμισης) εκνευρίζει την Μαρία.
Ο Γιάννης δυσαρεστεί (την Μαρία +*το παιχνίδι).

Τα ρήματα της κατηγορίας αυτής επίσης συνιστούν μία ομοιογενή μορφολογικά κατηγορία, καθώς διαθέτουν και τις δύο μορφολογίες [±ενεργητική] (αγχώνω – ομαι, δυσαρεστώ – ούμαι, εκνευρίζω – ομαι). Ωστόσο, δεν είναι ξεκάθαρο αν οι δομές με μορφολογία [-ενεργητική], είναι αποτέλεσμα μετασχηματισμού παθητικοποίησης ή αν τα ρήματα αυτά έχουν μέση σύνταξη. Παραδείγματα:

(Ο Νίκος +η Χημεία) αγχώνει τον Γιάννη
=Ο Γιάννης αγχώνεται (E + από τον Νίκο).
=Ο Γιάννης αγχώνεται (*από τη Χημεία. + με τη Χημεία).
Το διαζύγιο των γονιών της τάραξε τη Μαρία.
=Η Μαρία ταραχτήκε με το διαζύγιο των γονιών της.

Γενικότερα μπορούμε να πούμε ότι τα υπό μελέτη ρήματα ανάλογα με την σημασία τους, επιβάλλουν περιορισμούς επιλογής είτε στο Υποκείμενο ή στο Αντικείμενο, ενώ σπανίως επιβάλλουν περιορισμούς επιλογής και στα δύο. Στην τελευταία αυτή περίπτωση, το εν λόγω χαρακτηριστικό περιλαμβάνεται ως διακριτή ιδιότητα μέσα στους πίνακες του λεξικού – γραμματικής, για την οποία τα σχετικά ρήματα λαμβάνουν την τιμή [+]. Παραδείγματα:

Η Μαρία απογοήτευσε τον (προπονητή +*τον καιρό).
Η Μαρία ζηλεύει (την Άννα + *το τραπέζι).

Τέλος, διαπιστώνουμε ότι το περιοριστικό Υποκείμενο N₀ της πρώτης και δεύτερης κατηγορίας των ρημάτων ψυχικού πάθους, δηλώνει το πρόσωπο που βιώνει το συναίσθημα το οποίο δηλώνεται μέσω της σημασίας του ρήματος, κατέχοντας, έτσι, τον θεματικό ρόλο του Βιώνοντος (Experiencer). Αντιθέτως, τα ρήματα που ανήκουν στην τρίτη και τέταρτη κατηγορία, επιβάλλουν περιορισμούς επιλογής στο Αντικείμενό τους, καθώς ο θεματικός ρόλος του Βιώνοντος απαντά στην θέση αυτή. Η διαπίστωση αυτή ισχύει και για άλλες γλώσσες, και αποτελεί βάση για την διχοτόμηση των ρημάτων ψυχικού πάθους (psych verbs) σε Subject-Experiencer (SE) και σε Object-Experiencer (OE), ανάλογα με το αν ο θεματικός ρόλος του Βιώνοντος απαντά στην εξωτερική θέση του Υποκειμένου ή του Αντικειμένου του Ρήματος αντιστοίχως.

³ Εδώ πρόκειται για δομές του τύπου: Ο Γιάννης νευρίασε τη Μαρία (με τη συμπεριφορά του) = Η συμπεριφορά του Γιάννη νευρίασε τη Μαρία όπου έχουμε αναδόμηση (restructuration) της προθετικής φράσης. Πρόκειται σε ονοματική ΟΟγεν (Guillet-Leclerc, 1981), τις οποίες θα παρουσιάσουμε αναλυτικότερα σε μελλοντικές εργασίες.

7. Σημασιολογική ταξινόμηση των δηλωτικών συναισθήματος ρημάτων

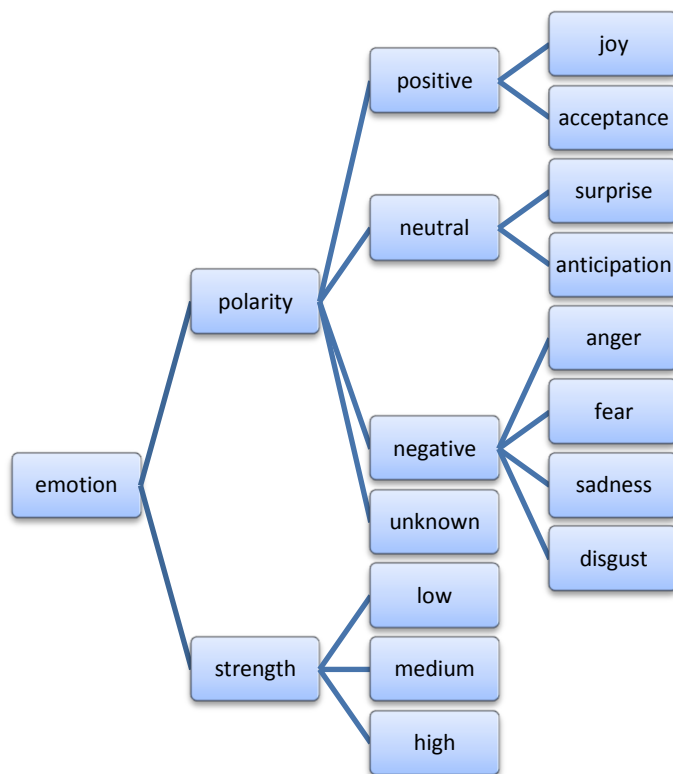

Η σημασιολογική ταξινόμηση των υπό ανάλυση ρημάτων με την υπαγωγή τους σε εννοιολογικές κατηγορίες επιτρέπει την δόμηση του σημασιολογικού πεδίου των συναισθημάτων και την σχηματοποίηση της σημασιολογικής διάκρισης μεταξύ ρημάτων όπως φοβάμαι, αγωνιώ, πανικοβάλλομαι, τρομάζω, κλπ.

Ψυχολογικές θεωρήσεις του συναισθήματος, υποστηρίζουν ότι κάποια βασικά συναισθήματα είναι πιο βασικά από άλλα, και συνεπώς αναμένεται να είναι καθολικά για όλες τις ανθρώπινες γλώσσες. Η αναγνώριση των βασικών συναισθημάτων στηρίζεται σε συγκεκριμένα λειτουργικά και φυσιολογικά κριτήρια. Στην παρούσα εργασία υιοθετήσαμε το τυπολογικό μοντέλο (Plutchik, R., 1991) που ορίζει τα εξής 8 βασικά συναισθήματα: *anger* (=θυμός), *fear* (=φόβος), *sadness* (=λύπη), *disgust* (=αηδία), *surprise* (=έκπληξη), *anticipation* (=αναμονή), *acceptance* (=αποδοχή), και *joy* (=ευχαρίστηση). Στις κατηγορίες αυτές μπορούν να υπαχθούν όλα τα συναισθήματα, ενώ είναι δυνατός ο διαχωρισμός των βασικών κατηγοριών αυτών σε επιμέρους υποκατηγορίες.

Παράλληλα, πολλοί ερευνητές περιγράφουν το συναισθήμα ως ένα σύνολο δύο ή περισσότερων διαστάσεων. Οι πιο συνηθισμένες διαστάσεις που χρησιμοποιούνται για την περιγραφή του συναισθήματος είναι η ένταση (ενεργοποίηση του επιπέδου ενθουσιασμού) και η πολικότητα, δηλαδή η θετική ή αρνητική χροιά του συναισθήματος. Λιγότερο συχνά χρησιμοποιείται η διάσταση *διάρκεια*.

Σε πρώτη φάση, η ταξινόμηση των εν λόγω ρημάτων στον άξονα της σημασίας λαμβάνει υπόψη λεξικά σημασιολογικά χαρακτηριστικά σε δύο άξονες: (α) πολικότητα (θετικό – ουδέτερο – αρνητικό συναισθήμα), και (β) ένταση συναισθήματος. Σε κάθε ρήμα αποδόθηκε το χαρακτηριστικό *strength* με πιθανές τιμές: *low*, *medium*, *high*, *uncertain*. Η απόδοση τιμής για το εν λόγω χαρακτηριστικό βασίστηκε τόσο σε στοιχεία της λεξικής σημασίας, για την αναγνώριση ρημάτων με ενσωματωμένο δείκτη έντασης (Mathieu, 2000). Έτσι, μέσω της κωδικοποίησης αυτής για κάθε ρήμα, σχηματοποιείται η διαφορά στο σημασιολογικό επίπεδο μεταξύ ρημάτων όπως π.χ., *φοβάμαι* και *αγωνιώ*.

Στην επόμενη φάση, τα ρήματα ταξινομήθηκαν σε μία από τις προαναφερθείσες 8 κατηγορίες βασικών συναισθημάτων, ενώ διατηρήθηκε η αρχική κατηγοριοποίηση σε 57 σημασιολογικές κατηγορίες οι οποίες προβλέπονται από τον αρχικό σημασιολογικό πόρο (Βοσταντζόγλου, 1988), με κάποιες (μικρής κλίμακας) αλλαγές, επεκτάσεις και διορθώσεις. Με τον τρόπο αυτό, διαμορφώθηκε ένα ταξινομικό πλαίσιο για το σημασιολογικό πεδίο των συναισθημάτων, το οποίο είναι διαβαθμίσιμο, καθώς ξεκινάει από σχετικά αδρομερείς κατηγορίες για να καταλήξει σταδιακά σε ένα πιο λεπτομερές περιγραφικό πλαίσιο. Το ταξινομικό σχήμα παρουσιάζεται στο σχήμα 1 που ακολουθεί.

Σχήμα 1 Το ταξινομικό σχήμα για το σημασιολογικό πεδίο των συναισθημάτων

8. Επίλογος

Συνοψίζοντας, η παρούσα ανακοίνωση, παρουσιάζει τα πρώτα ερευνητικά αποτελέσματα εργασίας που αφορά στην μελέτη και συστηματοποίηση του σημασιολογικού πεδίου των συναισθημάτων μέσω της ρηματικής κατηγορίας. Επιχειρήθηκε η με αυστηρά κριτήρια επιλογή των δηλωτικών συναισθήματος ρημάτων και η αρχική (σχετικά αδρομερής) δομο-συντακτική και σημασιολογική ταξινόμηση. Η παρούσα προσέγγιση, σε αντίθεση με προηγούμενες προσπάθειες, στηρίζεται σε μεγάλα ΣΚ τα οποία συγκροτήθηκαν για την μελέτη και ανάλυση συναισθήματος και στο ευρύτερο πλαίσιο της Γλωσσικής Τεχνολογίας. Η περαιτέρω επεξεργασία των δεδομένων θα οδηγήσει στην συστηματοποίηση και άλλων ιδιοτήτων των εν λόγω ρημάτων και την συνακόλουθη ολοκλήρωση των σχετικών πινάκων του λεξικού - γραμματικής. Η ολοκλήρωση της σημασιολογικής κατηγοριοποίησης των ρημάτων και η σύνδεση αυτών με τα αντίστοιχα ουσιαστικά, επίθετα και τις ρηματικές φράσεις, θα οδηγήσει στην δημιουργία μίας “οντολογίας των συναισθημάτων”. Η εργασία αυτή αποσκοπεί στη δημιουργία ενός γλωσσικού λεξιλογικού πόρου, ο οποίος θα είναι συμβατός με τα σχετικά πρότυπα, ώστε να μπορεί να ενσωματωθεί σε εργαλεία Επεξεργασίας Φυσικής Γλώσσας.

ABSTRACT

The study offers a preliminary analysis of the lexicogrammatical profile of the verbs θυμάμαι (to remember) and ξεχνάω (to forget) in the Corpus of Greek Texts (CGT), a reference corpus of approx. 30 million words. All verb forms were annotated for the categories of negation, tense, modality, number and person. The correlation between these categories suggests the occurrence of typical patterns in which the two verbs are used in Greek. It is suggested that verb patterns are related to specific speech acts and discourse functions and the implications of the study are drawn in conjunction with cross-linguistic findings in the literature.

Λέξεις κλειδιά: άρνηση, γλωσσικές πράξεις, δομικά σχήματα, ρήματα, σώματα κειμένων, τροπικότητα, χρόνος

1. Από τη χρήση στο σύστημα

Ένα από τα κεντρικότερα ζητήματα που έχουν απασχολήσει την ανάλυση λόγου στις διάφορες εκφάνσεις της είναι ο βαθμός στον οποίο η προσλεκτική ισχύς ενός εκφωνήματος και, ευρύτερα, η σημασία του καθορίζεται από γλωσσικές ενδείξεις και μηχανισμούς. Μπορούμε, δηλαδή, να συνδέσουμε μια συγκεκριμένη γλωσσική μορφή με μια λειτουργία όταν αναλύουμε πράξεις ομιλίας σε πραγματικές συνθήκες γλωσσικής αλληλεπίδρασης; Σύμφωνα με την κλασική ανάλυση του Levinson (1983), κάτι τέτοιο είναι αδύνατο γιατί η ισχύς ενός εκφωνήματος καθορίζεται αποφασιστικά από τις περικειμενικές συνθήκες χρήσης της γλώσσας (πρβλ. Collavin 2011: 388 κ.εξ.). Με παρόμοιο τρόπο, θεωρητικά πρότυπα όπως η ανάλυση συνομιλίας δίνουν έμφαση στην τοποθέτηση των εκφωνημάτων σε συγκεκριμένες αλληλεπιδράσεις μεταξύ των συμμετεχόντων σε ένα επικοινωνιακό συμβάν (βλ. Liddicoat 2007). Έτσι, για παράδειγμα, τα υπογραμμισμένα ρήματα των εκφωνημάτων στα αποσπάσματα (1) και (2) παρακάτω μπορούν να αναλυθούν ως συμβολές των συμμετεχόντων, που υπαγορεύονται από τον προσανατολισμό τους σε φαινόμενα όπως η εναλλαγή της σειράς των ομιλητών, ο σχεδιασμός για τον συνομιλητή, το καταστασιακό περικείμενο κ.λπ.

(1) Απόσπασμα από συνομιλία μεταξύ φίλων

<Θ> εμάς στο Καμάρι είχανε:: καεί @@@ κανά δυο (.) είχανε καεί

<Π> σπίτια;

<Θ> ναι

<Π> σοβαρά μιλάς; δεν το 'χα ακούσει (.) εδώ στα Μερτικέικα:: (.) μια καλύβα (.) δεν ήταν σπίτι δηλαδή ακριβώς @@@ στο χωριό που κάηκε αλλά γενικότερα όλο το δάσος δεν έμεινε ούτε ένα δέντρο (.) έφτασε μέχρι το δρόμο η φωτιά δηλαδή:: θυμάμαι ήτανε:: εφιαλτικές οι στιγμές ήτανε:: η ατμόσφαιρα αποπνικτική (.) παντού καπνός

<Θ> κι εμείς που 'χαμε μια:: απόσταση αρκετή (.) η κάπνα και:: τ' αποκαΐδια ερχόντουσαν:: σπίτι [...]

(2) Απόσπασμα από τηλεοπτική συζήτηση

<XT> [...] (.) δηλαδή εγώ περίμενα ότι σήμερα το Πασόκ θα μιλήσει για τις μεταρρυθμίσεις που ΕΠΡΕΠΕ να γίνουν και δεν έγιναν (.) [και που ενδεχομένως η κατάσταση της οικονομίας να ήταν ακόμα καλύτερη να]

- <ΓΠ> [μην ξεχνάμε Χρύσα ότι πάμε σε εκλογές (.) κι ένα (.) κι ένα μεγάλο κόμμα της αντιπολίτευσης που διεκδικεί την εξουσία σ' αυτές τις εκλογές (.) δεν θα μπορούσε να μιλήσει θετικά αυτή την ώρα (.) [στην πολιτική μάχη τη γνωρίζουμε και οι δυο καλά

- <ΓΠ> ναι καταλαβαίνω πολύ καλά τι λες (.)

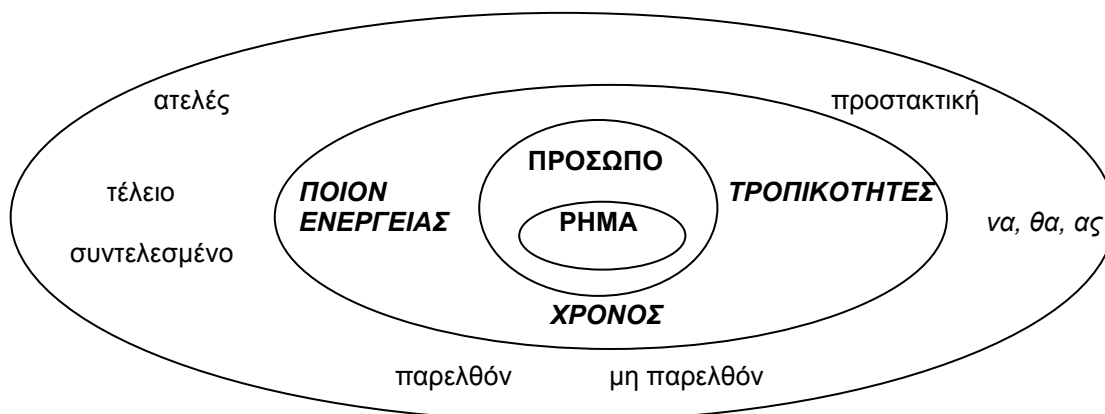

Ωστόσο, μια τέτοια ανάλυση αφήνει αναπάντητο το ερώτημα αν τα ρήματα που συμμετέχουν στις σχετικές δομές των εκφωνημάτων συμβάλλουν με κάποιο τρόπο στη σημασία τους. Με άλλα λόγια, αυτό στο οποίο δεν μπορεί να απαντήσει μια συμβατική μικρο-ανάλυση των παραπάνω κειμένων είναι αν έχουμε να κάνουμε με τυπικά δομικά σχήματα και τυπικές χρήσεις των ρημάτων *θυμάμαι* και *ξεχνάω* ή αν, αντίθετα, στα συγκεκριμένα εκφωνήματα η χρήση των ρημάτων αποκλίνει από τη συνήθη συμπεριφορά τους στα Ελληνικά. Για να επιχειρήσουμε μια απάντηση στο ερώτημα αυτό, θα πρέπει να μελετήσουμε πώς διαφέρουν συστηματικά τα δυο ρήματα ως προς τα δομικά σχήματά τους και τις λειτουργίες που συνδέονται με αυτά.

Η παρούσα μελέτη επιχειρεί μια προκαταρκτική ανάλυση του λεξικο-γραμματικού προφίλ των ρημάτων *θυμάμαι* και *ξεχνάω* στα δεδομένα του Σώματος Ελληνικών Κειμένων, από το οποίο προέρχονται τα παραπάνω αποσπάσματα, με στόχο την ανίχνευση των δομικών τους σχημάτων και των πράξεων ομιλίας με τα οποία συνδέονται. Τα ευρήματα της έρευνας αυτής μπορούν να χρησιμεύσουν στο να απαντηθούν τα ερωτήματα που τέθηκαν προηγουμένως και να συμβάλουν στην πληρέστερη ανάλυση κειμενικών αλληλεπιδράσεων όπως αυτές στα (1) και (2).

2. Μεθοδολογία και δεδομένα

Για να διερευνηθούν τα ερωτήματα της έρευνας, είναι αναγκαία η μεθοδολογία της γλωσσολογίας των σωμάτων κειμένων. Στη συγκεκριμένη έρευνα αναζητήθηκαν τα λήμματα *θυμάμαι* και *ξεχνάω* σε όλους τους τύπους τους στα δεδομένα του Σώματος Ελληνικών Κειμένων (ΣΕΚ), του σώματος κειμένων αναφοράς της Ελληνικής που περιλαμβάνει περίπου 30 εκατομμύρια λέξεις από μια ποικιλία κειμενικών ειδών του προφορικού και γραπτού λόγου. (Για λεπτομέρειες, βλ. Γούτσος 2003, Goutsos 2010a).

Οι τύποι των δύο ρημάτων που εμφανίζονται στο σώμα κειμένων επισημειώθηκαν για τις γραμματικές κατηγορίες της άρνησης, του χρόνου, του προσώπου, του ποιού ενεργείας και των τροπικοτήτων, σύμφωνα με την ανάλυση των Κλαίρη & Μπαμπινιώτη (2005) για τα παρεπόμενα του ρήματος στα Ελληνικά, από όπου προέρχεται το Σχήμα 1 που ακολουθεί:

Σχήμα 1 Ρηματικές κατηγορίες στα Ελληνικά (βλ. Κλαίρης & Μπαμπινιώτης 2005: 436)

Έτσι, κάθε τύπος των δύο ρημάτων χαρακτηρίστηκε ως θετικός ή αρνητικός (άρνηση), παρελθοντικός ή μη παρελθοντικός (χρόνος), τροπικός ή μη τροπικός (τροπικότητα), ατελής, τέλειος ή συντελεσμένος (ποιόν ενεργείας) και σημειώθηκε ο αριθμός (ενικός-πληθυντικός) και το πρόσωπο (πρώτο-δεύτερο-τρίτο) που δηλώνει μορφολογικά. (Πρβλ. την ανάλυση στο Κλαίρης & Μπαμπινιώτης 2005: 443-444). Επίσης, βρέθηκαν οι κυριότερες λεξικές και γραμματικές συνάψεις των δύο ρημάτων και τα λεξικά συμπλέγματα στα οποία συμμετέχουν (βλ. Γούτσος 2006).

3. Ευρήματα

Στο σύνολο των 30 εκατομμυρίων λέξεων του ΣΕΚ, οι τύποι του ρήματος *θυμάμαι* είναι 4.694, ενώ του *ξεχνάω* 3.272. Στην παρούσα μελέτη παρουσιάζονται τα ευρήματα της έρευνας που αφορούν τις γραμματικές κατηγορίες της άρνησης, του χρόνου, της τροπικότητας, του προσώπου και του αριθμού.¹ Δεν θα αναφερθούμε εδώ στη γραμματική κατηγορία του ποιού ενεργείας, καθώς και στο σύνολο των λεξικών και γραμματικών συνάψεων των δύο ρημάτων.

Τα δεδομένα από τη σύγκριση θετικών και αρνητικών τύπων των δύο ρημάτων στο ΣΕΚ παρουσιάζονται στον Πίνακα 1 και το Γράφημα 1 παρακάτω και εμφανίζουν μια τυπική αναλογία 9 προς 1 στην περίπτωση του *θυμάμαι*, ενώ αντίθετα θετικοί και αρνητικοί τύποι είναι σχεδόν ισάριθμοι στην περίπτωση του *ξεχνάω*:

	<i>θυμάμαι</i>	<i>ξεχνάω</i>
Θετικοί τύποι	4.013 (85,5%)	1.702 (52%)
Αρνητικοί τύποι	681 (14,5%)	1.570 (48%)
ΣΥΝΟΛΟ	4.694	3.272

Πίνακας 1 Κατανομή θετικών και αρνητικών τύπων των δύο ρημάτων

Γράφημα 1 Κατανομή θετικών και αρνητικών τύπων των δύο ρημάτων

Όπως έχει επισημανθεί στη βιβλιογραφία (Halliday 1993, Halliday & James 1993), η αναμενόμενη σχέση θετικών και αρνητικών τύπων στη γλώσσα παρουσιάζει μια τυπική ανισοκατανομή 9 προς 1, που συνδέεται με το ότι συχνότερα εκφράζουμε γλωσσικά τι συμβαίνει παρά τι δεν συμβαίνει. Τα ευρήματα επομένως υποδεικνύουν μια ιδιαίτερα μεγαλύτερη συσχέτιση του *ξεχνάω* με την άρνηση, εφόσον θετικοί και αρνητικοί τύποι παρουσιάζουν σχεδόν ισοκατανομή μεταξύ τους. Η σχέση του ρήματος αυτού με την άρνηση έχει ήδη παρατηρηθεί στη βιβλιογραφία για τα Αγγλικά (Jørgensen 1990: 149, Biber et al. 1999: 159, 174) και σε άλλα δεδομένα στα Ελληνικά (Goutsos 2010b) και είναι αξιοσημείωτο ότι επιβεβαιώνεται και στο σύνολο του ΣΕΚ.

Είναι ιδιαίτερα σημαντικό, ωστόσο, να προσδιορίσουμε αν η κατανομή αυτή σχετίζεται με άλλες κατηγορίες. Στο Γράφημα 2 που ακολουθεί φαίνεται η σχέση της άρνησης με το γραμματικό χρόνο:

¹ Στο Goutsos (2010b) αναλύονται τα ευρήματα για το *ξεχνάω* ως προς αυτές τις γραμματικές κατηγορίες σε ένα υπο-σώμα του ΣΕΚ.

Γράφημα 2 Κατανομή θετικών και αρνητικών τύπων των δύο ρημάτων σε σχέση με το χρόνο

Όπως μπορούμε να παρατηρήσουμε, η ανισοκατανομή 9 προς 1 εμφανίζεται τόσο στους παρελθοντικούς, όσο και στους μη παρελθοντικούς τύπους του *θυμάμαι*, αλλά και στους παρελθοντικούς τύπους του *ξεχνάω*, ανατρέπεται όμως και μάλιστα υπέρ των αρνητικών τύπων στους μη παρελθοντικούς χρόνους του *ξεχνάω*, στους οποίους η αναλογία θετικών με αρνητικούς τύπους είναι 4 προς 6. Επομένως, η παρουσία αρνητικών τύπων σχετίζεται με τους μη παρελθοντικούς χρόνους στην περίπτωση του *ξεχνάω*. Ενδιαφέρον έχει επίσης η μεγάλη συγκέντρωση μη παρελθοντικών, θετικών τύπων του *θυμάμαι*. Η εικόνα που προκύπτει είναι συμμετρική ως προς την άρνηση: οι πιο συχνοί τύποι του *θυμάμαι* είναι θετικοί μη παρελθοντικοί, ενώ του *ξεχνάω* αρνητικοί μη παρελθοντικοί.

Όσον αφορά το γραμματικό χρόνο καθ' εαυτόν, το *θυμάμαι* εμφανίζει ανισοκατανομή 9 προς 1 μεταξύ μη παρελθοντικών και παρελθοντικών τύπων, ενώ το *ξεχνάω* επίσης εμφανίζει προτίμηση στους μη παρελθοντικούς τύπους αλλά με μικρότερη αναλογία σε σχέση με τους παρελθοντικούς (7,5 με 2,5). Άρα, το *θυμάμαι* σχετίζεται τυπικά με μη παρελθοντικούς τύπους.

Συμμετρική είναι και η εικόνα των ευρημάτων που σχετίζονται με την τροπικότητα, όπως φαίνεται στο Γράφημα 3:

Γράφημα 3 Κατανομή τροπικών και μη τροπικών τύπων των δύο ρημάτων

Στην περίπτωση του *θυμάμαι* οι μη τροπικοί τύποι υπερτερούν των τροπικών, όπως ίσως είναι αναμενόμενο, ενώ στο *ξεχνάω* συμβαίνει το αντίστροφο, αν και με μικρό μόνο προβάδισμα των τροπικών τύπων.

Όπως και για την άρνηση, οι προτιμήσεις αυτές δια φωτίζονται με τη μελέτη της κατανομής της τροπικότητας στις άλλες γραμματικές κατηγορίες, της άρνησης και του χρόνου. Τα ευρήματα παρουσιάζονται στα Γραφήματα 4 και 5 για τα ρήματα *θυμάμαι* και *ξεχνάω*, αντίστοιχα:

Γράφημα 4 Κατανομή θετικών και αρνητικών τύπων του *θυμάμαι* σε σχέση με χρόνο και τροπικότητα

Το Γράφημα 4 δείχνει την προτίμηση των τύπων του *θυμάμαι* σε τρεις μεγάλες κατηγορίες: μη παρελθοντικούς μη τροπικούς θετικούς τύπους (λ.χ. *θυμάσαι*, περίπου το 43% των τύπων), μη παρελθοντικούς τροπικούς θετικούς τύπους (λ.χ. *να θυμάσαι*) και παρελθοντικούς μη τροπικούς θετικούς τύπους (λ.χ. *θυμήθηκες*). Οι τύποι αυτοί καλύπτουν το 85% του συνόλου, ποσοστό που φτάνει στο 95% αν προστεθούν οι μη παρελθοντικοί μη τροπικοί αρνητικοί τύποι (λ.χ. *δεν θυμάσαι*).

Γράφημα 5 Κατανομή θετικών και αρνητικών τύπων του *ξεχνάω* σε σχέση με χρόνο και τροπικότητα

Για το *ξεχνάω* οι προτιμήσεις είναι κατοπτρικές σε σχέση με το *θυμάμαι*, καθώς υπάρχει συγκέντρωση σε μη παρελθοντικούς τροπικούς αρνητικούς τύπους (λ.χ. *να μην ξεχνάς*, περίπου το 40% του συνόλου), παρελθοντικούς μη τροπικούς θετικούς τύπους (λ.χ. *ξέχασες*) και μη παρελθοντικούς θετικούς τροπικούς και μη τροπικούς τύπους (λ.χ. *να ξεχνάς* και *ξεχνάς*). Οι συνδυασμοί αυτοί αντιπροσωπεύουν ποσοστό 90% περίπου του συνόλου των τύπων για το *ξεχνάω*.

Εξίσου σημαντική είναι η συσχέτιση της τροπικότητας με τις γραμματικές κατηγορίες του προσώπου και του αριθμού, όπως φαίνεται στα ακόλουθα γραφήματα για τα δύο ρήματα:

Γράφημα 6 Κατανομή τροπικών και μη τροπικών τύπων του *θυμάμαι* σε σχέση με πρόσωπο και αριθμό

Γράφημα 7 Κατανομή τροπικών και μη τροπικών τύπων του *ξεχνάω* σε σχέση με πρόσωπο και αριθμό

Όπως δείχνει το Γράφημα 6, οι μισοί τύποι του *θυμάμαι* είναι μη τροπικοί τύποι 1ου και 3ου ενικού, ενώ το ποσοστό αυτό φτάνει στο 60% για όλους τους τύπους (τροπικούς και μη τροπικούς) των δύο αυτών προσώπων. Αντίθετα, σύμφωνα με το Γράφημα 7, το ένα τέταρτο των τύπων του *ξεχνάω* είναι τροπικοί τύποι 1ου πληθυντικού, ενώ όλοι οι τύποι (τροπικοί και μη τροπικοί) του ίδιου προσώπου είναι περίπου το ένα τρίτο του συνόλου. Επιπλέον, τροπικοί τύποι του 2ου πληθυντικού και μη τροπικοί τύποι του 3ου ενικού εμφανίζονται με αρκετά μεγάλη συχνότητα στην περίπτωση του *ξεχνάω*. Με άλλα λόγια, οι τύποι του *θυμάμαι* δείχνουν προτίμηση στον ενικό και είναι, όπως αναμένεται, μη τροπικοί, ενώ του *ξεχνάω* στον πληθυντικό και είναι τροπικοί.

4. Δομικά σχήματα και πράξεις ομιλίας

Συνοψίζοντας τη συζήτηση των ευρημάτων, μπορούμε να διακρίνουμε ένα κυρίαρχο σχήμα για κάθε ρήμα, που προκύπτει από το συνδυασμό των γραμματικών κατηγοριών στις οποίες απαντούν οι τύποι τους. Έτσι, στο *θυμάμαι* κυριαρχούν οι μη τροπικοί, μη παρελθοντικοί, θετικοί τύποι 1ου ενικού (λ.χ. *θυμάμαι*), ενώ στο *ξεχνάω* κυριαρχούν οι τροπικοί, μη παρελθοντικοί, αρνητικοί τύποι 1ου πληθυντικού (λ.χ. *να μην ξεχνάμε*). Τα δύο ρήματα παρουσιάζουν επομένως μια κατοπτρική εικόνα ως προς την προτίμηση στις γραμματικές κατηγορίες της άρνησης, της τροπικότητας και του αριθμού και μια παρόμοια εικόνα όσον αφορά την προτίμηση στις γραμματικές κατηγορίες του χρόνου και του προσώπου.

Η διαπίστωση των κυρίαρχων γραμματικών προτιμήσεων είναι σημαντική για να απαντηθεί το ερώτημα που τέθηκε στην αρχή της μελέτης σχετικά με τη χρήση των δύο ρημάτων στα κειμενικά αποσπάσματα που παρουσιάστηκαν. Όπως προκύπτει, και στις δύο περιπτώσεις οι ομιλητές χρησιμοποιούν τύπους που ταυτίζονται με τις κυρίαρχες γραμματικές προτιμήσεις των ρημάτων και με αυτή την έννοια η γλωσσική τους επιλογή προβλέπεται από το λεξικογραμματικό προφίλ του *θυμάμαι* και του *ξεχνάω*.

Πιο αναλυτικά, τα γραμματικά χαρακτηριστικά της μη τροπικότητας, μη άρνησης, μη παρελθοντικού χρόνου και 1ου προσώπου ενικού συμβάλλουν σημαντικά στην ερμηνεία του αποσπάσματος (1) από φιλική συνομιλία, που επαναλαμβάνεται εδώ:

<Π> [...] δηλαδή: θυμάμαι ήτανε:: εφιαλτικές οι στιγμές ήτανε:: η ατμόσφαιρα αποπνικτική (.)

Η γλωσσική επιλογή του ομιλητή Π μπορεί έτσι να συσχετιστεί με παρόμοιες επιλογές ομιλητών και συγγραφέων από το ευρύτερο σώμα κειμένων, από το οποίο προέρχεται το απόσπασμα, όπως αυτές που περιλαμβάνονται στον Πίνακα 2, και να αναδειχτούν οι ομοιότητες στη χρήση της λέξης.

υστηρή μαζί σας η μητέρα σας; «Θυμάμαι ότι μικρός μπορεί να

Πίνακας 2 Επιλογή από το συμφραστικό πίνακα του *θυμάμαι*

Όπως φαίνεται και από τον Πίνακα 2, η χρήση του ρήματος στο συγκεκριμένο τύπο φαίνεται να εντάσσεται σε ένα ευρύτερο δομικό σχήμα που περιλαμβάνει τις γραμματικές συνάψεις του (colligation), δηλαδή τη συνδυαστικότητα του με συγκεκριμένες γραμματικές κατηγορίες στο συνταγματικό άξονα (βλ. Γούτσος & Φραγκάκη, υπό δημοσίευση). Στη συγκεκριμένη περίπτωση είναι η απουσία συνδυαστικότητας με άλλες γραμματικές κατηγορίες, αριστερά και δεξιά από την κομβική λέξη *θυμάμαι*, δηλαδή η παρενθετική του χρήση, που είναι σημαντική.

Μπορούμε να θεωρήσουμε ότι το δομικό αυτό σχήμα συνδέεται με μια πράξη ομιλίας ανάμνησης, αναφοράς δηλαδή σε μια παρελθοντική εμπειρία του ομιλητή. Η συμβατικότητα αυτής της πράξης ομιλίας φαίνεται ακριβώς στη χαλάρωση των συντακτικών δεσμών του ρηματικού τύπου *θυμάμαι* με το υπόλοιπο εκφώνημα, που οδηγεί στο να αποτελεί απλό δείκτη αποδεικτικότητας και προσωπικής εμπλοκής του ομιλητή. Η εμφάνισή του στην αρχή εκφωνημάτων φαίνεται να συνδέεται με αυτή τη χρήση.²

Αντίστοιχα, τα γραμματικά χαρακτηριστικά της τροπικότητας, άρνησης και μη παρελθοντικού χρόνου είναι σημαντικά στην ερμηνεία του αποσπάσματος (2) από τηλεοπτική συζήτηση, που επαναλαμβάνεται πιο κάτω:

<ΓΠ> [μην ξεχνάμε Χρύσα ότι πάμε σε εκλογές (.) κι ένα (.) κι ένα μεγάλο κόμμα της αντιπολίτευσης που διεκδικεί την εξουσία σ' αυτές τις εκλογές (.) δεν θα μπορούσε να μιλήσει θετικά

Και σε αυτή την περίπτωση, πέρα από τις ιδιαιτερότητες της χρήσης στο συγκεκριμένο περιεχόμενο, ο ρηματικός τύπος θα πρέπει να συσχετιστεί με τις γραμματικές του συνάψεις ως δείγμα ενός ευρύτερου

² Είναι πιθανόν η λειτουργία αυτή να συνδέεται και με την τοποθέτησή του στην αρχή κειμένων ή κειμενικών ενοτήτων (λ.χ. αφηγήσεων). Μια τέτοια έρευνα θα ήταν χρήσιμο να πραγματοποιηθεί στο σώμα κειμένων.

δομικού σχήματος που περιλαμβάνει ειδική πρόταση με το *ότι* ή *πως* και το οποίο εμφανίζεται και στα ακόλουθα παραδείγματα από το ΣΕΚ:

ημιστικών εσόδων. Άλλωστε, μην ξεχνάμε ότι η NET είναι ένας α) θα ήταν 51% περίπου. Ας μην ξεχνάμε όμως ότι το Χρηματιστήριο αυτών, διότι δεν πρέπει να ξεχνάμε ότι η περιφέρεια ΑΜΘ κών καρτών. Πίνακας 3 Επιλογή από το συμφραστικό πίνακα του *ξεχνάω*

Η λειτουργία του ρηματικού τύπου στο δομικό αυτό σχήμα δεν φαίνεται να συνδέεται με τη μνήμη ή τη λήθη, αλλά συσχετίζεται με μια κατευθυντική πράξη ομιλίας υπενθύμισης και κατ' επέκταση επισήμανσης του σημαντικού (βλ. Goutsos 2010b). Η εμφάνισή του δομικού σχήματος στην αρχή εκφωνημάτων φαίνεται να συνδέεται με τη μετάβαση σε ένα νέο θέμα ή μια νέα πτυχή της επιχειρηματολογίας, που πραγματώνεται με αυτή την πράξη ομιλίας. Η παρουσία δεικτών λόγου όπως *άλλωστε* και *όμως* στο δομικό σχήμα υποδεικνύει ότι εισάγεται μια δευτερεύουσα αλλά εξίσου σημαντική πτυχή του επιχειρήματος, που ενισχύει ή μετριάξει την ισχύ της προηγούμενης διαπίστωσης. Τέλος, η επιλογή του 1ου προσώπου πληθυντικού μπορεί να αποδοθεί στην επιδίωξη για εμπλοκή του συνομιλητή. Πρόκειται ουσιαστικά για εγκλειστικό πληθυντικό που υπαγορεύεται από αρχές της ευγένειας, καθώς μετριάξει την επιβολή της κατευθυντικής πράξης με το να αποδίδει την υπενθύμιση ή την επισήμανση, εκτός από τους συνομιλητές (ακροατές ή αναγνώστες), και στον ίδιο τον ομιλητή.

Με παρόμοιο τρόπο μπορούν να αναλυθούν τα άλλα δομικά σχήματα στα οποία συμμετέχουν οι ρηματικοί τύποι του *θυμάμαι* και του *ξεχνάω*. Σύμφωνα με τα παραπάνω ευρήματα, εκτός από τα κυρίαρχα σχήματα, διαπιστώθηκαν προτιμώμενα σχήματα που περιλαμβάνουν για κάθε ρήμα τους εξής ρηματικούς τύπους:

- τροπικοί μη παρελθοντικοί θετικοί τύποι (να *θυμάμαι*)
- μη τροπικοί παρελθοντικοί θετικοί τύποι (*θυμήθηκα*/*θυμόμουν*)
- μη τροπικοί μη παρελθοντικοί αρνητικοί τύποι (*δεν θυμάμαι*)
- μη τροπικοί παρελθοντικοί θετικοί τύποι (*ξέχασα*/*ξεχνούσα*)
- τροπικοί μη παρελθοντικοί θετικοί τύποι (να *ξεχνάω*)
- μη τροπικοί μη παρελθοντικοί θετικοί τύποι (*ξεχνάω*)

Οι τύποι αυτοί αλληλεπιδρούν με τις γραμματικές κατηγορίες του προσώπου και του αριθμού, όπως και στα κυρίαρχα σχήματα, για τα οποία πρέπει να σημειωθεί ότι η προτίμησή τους στο πρώτο πρόσωπο (ενικού ή πληθυντικού) συνδέεται με την πραγμάτωση πράξεων ομιλίας.

Η εξαντλητική ανάλυση των πράξεων ομιλίας που πραγματώνουν τα σχετικά δομικά σχήματα δεν ανήκει στους στόχους της παρούσας μελέτης.³ Είναι βέβαιο όμως ότι η προσεκτικότερη μελέτη των λεξικών και γραμματικών συνάψεων των ρηματικών τύπων μπορεί να αποκαλύψει ένα πλήθος λειτουργιών που υπαγορεύονται και ταυτόχρονα ερμηνεύουν την επιλογή συγκεκριμένων γραμματικών κατηγοριών όπως η τροπικότητα, η άρνηση, ο χρόνος κ.λπ.

³ Ένα ακόμη δομικό σχήμα στην περίπτωση του *ξεχνάω* αναλύεται και συνδέεται με πράξεις ομιλίας στο Goutsos (2010b).

5. Συμπεράσματα και προεκτάσεις

Τα κύρια συμπεράσματα της έρευνας αυτής προκύπτουν από το εύρημα ότι τα δύο υπό εξέταση ρήματα διαθέτουν διαφορετικές προτιμήσεις όσον αφορά την επιλογή παρεπομένων ή γραμματικών κατηγοριών: το *θυμάμαι* εμφανίζεται πιο συχνά σε μη παρελθοντικούς, θετικούς, μη τροπικούς τύπους, ενώ το *ξεχνάω* επίσης σε μη παρελθοντικούς, αλλά σε τροπικούς και, σε μεγάλο βαθμό, αρνητικούς τύπους.

Κατ' αρχάς, το εύρημα αυτό επιβεβαιώνει ότι η κατανομή των λημμάτων σε τύπους δεν είναι ομοιόμορφη σε όλα τα λήμματα· αντίθετα, ορισμένα λήμματα φαίνεται να ελκύονται από φαινόμενα όπως η άρνηση ή η τροπικότητα. Η εκτεταμένη ανάλυση λ.χ. των ρηματικών λημμάτων με παρόμοιες μεθόδους σε δεδομένα από σώματα κειμένων είναι απαραίτητη για να κατανοήσουμε τη λειτουργία των γραμματικών κατηγοριών και τις συγκεκριμένες προτιμήσεις των ρημάτων σε αυτές.

Επιπλέον, φάνηκε ότι οι προτιμήσεις σε ορισμένα παρεπόμενα δημιουργούν επαναλαμβανόμενα δομικά σχήματα, που συνδέονται με πράξεις ομιλίας. Αυτό σημαίνει ότι η λειτουργία και η σημασία των ρημάτων εξαρτώνται άμεσα από τα συγκεκριμένα δομικά σχήματα στα οποία εμφανίζονται και δύσκολα μπορεί να γίνει κατανοητή ανεξάρτητα από αυτά. Η σύνδεση αυτή επιβεβαιώνει τη βασική διαπίστωση της γλωσσολογίας των σωμάτων κειμένων ότι μορφή και λειτουργία είναι αλληλένδετες στη γλώσσα, ενώ, από την άλλη, είναι σημαντικό ότι στον λόγο διαπιστώνονται συγκεκριμένοι λεξικογραμματικοί μηχανισμοί ένδειξης των γλωσσικών πράξεων. Όπως διαπιστώνει η Adolphs, «ακόμη και ελάχιστες μορφικές παραλλαγές μπορεί να συνδέονται με μια συγκεκριμένη μεταβλητή στη λειτουργία ενός εκφωνήματος» (2008: 2, πρβλ. Γούτσος 2008).

Οπωσδήποτε, στην εμφάνιση δομικών σχημάτων βασική είναι η συμβολή των γραμματικών συνάψεων της λέξης και, επομένως, μια πιο συστηματική διερεύνηση των συμπληρωμάτων των υπό εξέταση ρημάτων αποτελεί αναγκαία προέκταση της παρούσας έρευνας. Για παράδειγμα, είναι ιδιαίτερα σημαντικό ότι στο συχνότερο δομικό σχήμα του *θυμάμαι* το ρήμα δεν συνδέεται συνήθως συντακτικά με την υπόλοιπη πρόταση, κάτι που πιθανώς υποδεικνύει τη σταδιακή του γραμματικοποίηση, δηλαδή τη μετατροπή του από πλήρες ρήμα σε απλό δείκτη αποδεικτικότητας ή εμπλοκής, όπως έχει διαπιστωθεί και στο Tao (2003) για το *remember* στα Αγγλικά. Μια παρόμοια διαδικασία παρατηρείται και στο κυρίαρχο δομικό σχήμα του *ξεχνάω*, το οποίο τείνει να αποτελέσει μια στερεότυπη φράση με κύρια λειτουργία την έκφραση της πράξης ομιλίας της υπενθύμισης ή επισήμανσης, ενώ το κύριο σημασιολογικό περιεχόμενο της πρότασης μεταφέρεται από την ειδική πρόταση που ακολουθεί. Εξίσου σημαντικά ενδέχεται να είναι τα πορίσματα από την εξέταση της γραμματικής κατηγορίας του ποιού ενεργείας, που δεν αναλύθηκε στην παρούσα μελέτη.

Ιδιαίτερο ενδιαφέρον έχει και η σύγκριση των ευρημάτων στα Ελληνικά με τις παρατηρήσεις της βιβλιογραφίας για τα αντίστοιχα ρήματα στα Αγγλικά (βλ. λ.χ. Jørgensen 1990, Biber et al. 1999, Tao 2001, 2003, Goddard 2007). Για παράδειγμα, στις μελέτες της Αγγλικής διαπιστώνεται η μεγαλύτερη συχνότητα του *remember* σε σχέση με το *forget*, η τάση του δεύτερου να συνάπτεται με αρνητικά στοιχεία και η τάση και των δύο να απαντούν στο πρώτο πρόσωπο. Οι διαπιστώσεις αυτές συμφωνούν με τα ευρήματα για την Ελληνική της παρούσας έρευνας και υποδεικνύουν ίσως ότι οι προτιμήσεις αυτές των ρημάτων οφείλονται στις εγγενείς σημασιολογικές ιδιότητες των συγκεκριμένων λημμάτων. Το γεγονός ότι και τα δύο αποτελούν ρήματα γνώσης και εκφράζουν, όπως έχει παρατηρηθεί από τον Jørgensen (1990), ενεργό επίγνωση (*θυμάμαι*) ή νοητική αδράνεια (*ξεχνάω*), μπορεί να ερμηνεύσει τη διαφορετική τους συμπεριφορά και τα διαγλωσσικά παράλληλα. Ταυτόχρονα, η λεπτομερέστερη έρευνα μπορεί να αναδείξει τις διαφορές των δύο γλωσσών στο εύρος των δομικών σχημάτων και των πραγματολογικών λειτουργιών των στοιχείων, αλλά και στη σύνδεσή τους με παραμέτρους της εγγένειας ή πολιτισμικές νόρμες. Χαρακτηριστικές είναι, για παράδειγμα, οι πολιτισμικές και ιστορικοκοινωνικές συνδηλώσεις της φράσης *den ξechνώ*.

Στους περιορισμούς της έρευνας συγκαταλέγεται επίσης η μελέτη του συνόλου του ΣΕΚ, καθώς μια διαφοροποίηση των δεδομένων ανά κειμενικό είδος μπορεί να διευκρινίσει τη σχέση των ρηματικών τύπων με ορισμένα επικοινωνιακά περιβάλλοντα. Ιδιαίτερο ενδιαφέρον για τις τάσεις που διαμορφώνονται στα Ελληνικά θα είχε η μελέτη των προφορικών δεδομένων του ΣΕΚ. Τέλος, η στατιστική επεξεργασία των ευρημάτων είναι σημαντική για την αξιολόγησή τους, αν και θα πρέπει να σημειωθεί ότι παραμένουν ισχυρές αμφιβολίες για το κατά πόσο τα γλωσσικά φαινόμενα των σωμάτων κειμένων μπορούν να αντιμετωπίζονται ως στατιστικά αναλυσίμοι πληθυσμοί (βλ. Sinclair 2008).

Τα πορίσματα της μελέτης υποδεικνύουν ότι στη βάση της γραμματικής συμπεριφοράς των γλωσσικών στοιχείων βρίσκονται συγκεκριμένα δομικά σχήματα που υπαγορεύονται από ποικίλες κειμενικές λειτουργίες. Με αυτή την έννοια, δεν μπορούμε να κάνουμε λόγο για ένα ενιαίο και

αδιαφοροποίητο γλωσσικό σύστημα, που περιλαμβάνει γλωσσικά στοιχεία με δεδομένη εκ των προτέρων συμπεριφορά, ούτε όμως μπορούμε να δεχτούμε ότι το νόημα προκύπτει εξ αρχής κάθε φορά στο συγκεκριμένο περιεχόμενο, χωρίς καμιά σύνδεση με προϋπάρχουσες κανονικότητες. Η εικόνα που προκύπτει από τη μελέτη των σωμάτων κειμένων γεφυρώνει τις δύο αυτές αντίθετες τοποθετήσεις, τονίζοντας μια πραγματολογική θεώρηση του συστήματος (βλ. Goutsos 2010b). Όπως διαπιστώθηκε στην παρούσα μελέτη, συγκεκριμένοι τύποι του ρήματος συνδέονται τυπικά με πράξεις λόγου και σχέσεις των συμμετεχόντων, υπογραμμίζοντας έτσι την απευθυντικότητα και τη διαπροσωπικότητα που διαποτίζει τη γλώσσα (Voloshinov 1973: 85, 86). Ταυτόχρονα, οι τυπικές αυτές διασυνδέσεις εγγράφονται στο σύστημα της γλώσσας και παρέχουν ενδείξεις που βοηθούν τους ομιλητές και τους ακροατές στη διαδικασία δημιουργίας του νοήματος.

ABSTRACT

The aim of this paper is to provide evidence of the claim that idioms should be considered as a form of interaction between human perceptual and linguistic system. The evidence comes from Modern Greek and the semantic field of nature. The examples are grouped together on the basis of their meaning and form abstract systems of schemata or hierarchies in mental lexicon. In this aspect, idioms are seen as complex mechanisms, firstly with a conceptual character and then with a linguistic one, and dealt with as linguistic expression of subject cognitive schemata that shape a good deal of everyday notions.

Λέξεις κλειδιά: ιδιωτισμοί, γνωστική θεμελίωση, εννοιακά πεδία, εννοιολογικές μεταφορές, εννοιολογικές μετωνυμίες, συστήματα, ιεραρχίες.

1. Εισαγωγή

Στο επίκεντρο του ενδιαφέροντος του άρθρου βρίσκονται οι κλειστοί συνδυασμοί λέξεων, δηλαδή οι λεξιλογικές ακολουθίες με λίγο – πολύ δεσμευτικό χαρακτήρα ως προς τη συνεμφάνιση των μελών τους (στερεοτυπία), πολλές από τις οποίες (και οι πιο ενδιαφέρουσες) παρουσιάζουν και το επιπρόσθετο, διαβαθμισμένο γνώρισμα της σημασιακής απόκλισης από την κυριολεξία, χαρακτηρίζονται δηλαδή από ιδιωματοκότητα. Το πλήθος και η ποικιλία τέτοιων εκφράσεων σε κάθε γλώσσα – άρα και στην κοινή Νέα Ελληνική – είναι δεδομένα, γι' αυτό χρειάζεται εξ αρχής να διευκρινιστεί ότι η παρούσα ανάλυση αφορά μόνο σε φράσεις που προκύπτουν ως αποτελέσματα της δράσης των εννοιολογικών μηχανισμών της μεταφοράς και της μετωνυμίας.

Ειδικότερα, τα δείγματα φράσεων που μελετώνται στο άρθρο προέρχονται από το corpus νεοελληνικών στερεοτύπων που συνέλεξε η γράφουσα κατά τα έτη 1999-2004 με πηγές τα κυριότερα λεξικά της Κοινής Νεοελληνικής, το λεξικογραφικό αρχείο της Βιβλιοθήκης Γλωσσολογίας του Πανεπιστημίου Αθηνών, μέρος του ημερήσιου και περιοδικού τύπου και, σποραδικά, προφορικές συζητήσεις, από τις οποίες κρατήθηκαν σημειώσεις. Βασικό κριτήριο για τη συγκέντρωση του υλικού στάθηκε αφενός η φραστική δομή και η παγίωση και αφετέρου το ζήτημα της πληρότητας στην κάλυψη προεπιλεγμένων εννοιών (π.χ. των στοιχείων της φύσεως). Το corpus, ωστόσο, σχεδιάστηκε κυρίως με βάση την εννοιολογική-γνωστική διάσταση των λημμάτων, το αν και κατά πόσο δηλαδή οι συγκεκριμένες δομές μπορούν να αναχθούν σε υποκείμενα εννοιολογικά μεταφορικά ή/και μετωνυμικά σχήματα που διευκολύνουν την πρόσληψη αφηρημένων εννοιών.

Από σημασιολογική άποψη, οι φράσεις που εξετάζονται στο άρθρο, αλλά και όλα τα λήμματα του corpus υπάγονται στην ευρύτατη κατηγορία της *φύσης*. Επειδή όμως η *φύση* μπορεί να θεωρηθεί ότι περιλαμβάνει πάμπολλα και ετερόκλητα στοιχεία, και με δεδομένη την αμφίδρομη σχέση μεταξύ των σημασιολογικών πεδίων και της εξωγλωσσικής πραγματικότητας (Μότσιου 1994:175), το αχανές 'πεδίο' της φύσεως προτείνεται να διαιρεθεί εσωτερικά σε επιμέρους σημασιολογικά - εννοιακά πεδία (π.χ. τα στοιχεία της φύσεως: φως, σκοτάδι, νερό, αέρας, γη κ.λπ., τα φυσικά φαινόμενα και μεγέθη: βρασμός, ψύξη, θερμότητα, ψυχρότητα κ.λπ., τα φυσικά σώματα: μέταλλα κ.ά.), καθένα από τα οποία αξιοποιείται από την νεοελληνική γλωσσική κοινότητα ως πηγή για τον σχηματισμό μη κυριολεκτικών σχημάτων της σκέψης και των αντιστοιχών φράσεων. Με βάση τα επιμέρους εννοιακά πεδία κατηγοριοποιήθηκαν και ταξινομήθηκαν τα λήμματα στο corpus και από το υλικό που το καθένα περιλαμβάνει αντλήθηκαν - επιλεκτικά - συγκεκριμένες φράσεις για να καλύψουν τις ανάγκες των

επιχειρημάτων του παρόντος άρθρου¹. Συγκεκριμένα, τα εννοιακά πεδία της *φωτιάς*, της *γης* και του *νερού* (φυσικά στοιχεία), του *αστεριού* (φυσικό σώμα) και του *λαδιού* (φυσικό προϊόν) χρησιμοποιούνται στα επόμενα ως πηγές για να αποδώσουν τις αφηρημένες έννοιες της συναισθηματικής έντασης, του ζωτικού χώρου και της ισχύος, της διαχείρισης πόρων, της αξιολόγησης και της καταβολής προσπάθειας αντιστοίχως, ενώ το εννοιακό πεδίο του *φωτός* παρουσιάζεται σε όλο το παραγωγικό του εύρος.

2. Το θεωρητικό υπόβαθρο – γενικά

Οι ιδιωτισμοί αντιμετωπίζονται παραδοσιακά από τη θεωρία της γλώσσας ως εκτεταμένες λεξιμοποιημένες δομές, με σημασία που δεν προκύπτει αθροιστικά από τις σημασίες των επιμέρους συστατικών τους (Fernando 1978:317, 1996:7-8, Swinney & Cutler 1973:4, Davies 1982:70, Strässler 1982:79, Cooper 1986:180, για την ελληνική φρασεολογία Αναστασιάδη – Συμεωνίδη (1986), Αναστασιάδη-Συμεωνίδη και Ευθυμίου (2006), Θώμου (2011), Γαβριηλίδου (2001, 2008, 2009), Μουστάκη (1992) και Fotopoulou (1993). Με άλλα λόγια θεωρούνται κάτι σαν «μεγάλες λέξεις», αυτόνομες και ανεξάρτητες η μία από την άλλη και με περιεχόμενο εν πολλοίς καθιερωμένο και συμβατικό (Palmer 1981²:79, Carter 1987:58, Cruse 1987²:37), έτσι ώστε να μπορούν να ανακληθούν ανά πάσα στιγμή από το νοητικό λεξικό ως απλά λεξήματα, για να καλύψουν τις ανάγκες της επικοινωνιακής περιστάσης

Στην πραγματικότητα, ακόμη και η πιο βιαστική ματιά σε σώματα κειμένων ή σε συλλογές εκφράσεων, όπως το corpus που προαναφέρθηκε, υποδεικνύει ότι οι ιδιωτισμοί ομαδοποιούνται, ιεραρχούνται και οργανώνονται γύρω από κεντρικούς πόλους, και μάλιστα όχι τυχαία, αλλά με βάση το κριτήριο της σημασίας. Και επειδή πρόκειται για σημασία συχνά μη κυριολεκτική, η ανάλυση των φράσεων προτείνεται να ενταχθεί στο ευρύτερο πλαίσιο της συζήτησης για τους δύο βασικούς, εννοιολογικούς και γλωσσικούς μηχανισμούς παραγωγής μη κυριολεκτικών σημασιών, τη μεταφορά και τη μετωνυμία, και, φυσικά, στην έρευνα για τη μεταξύ τους διαπλοκή και τον σχηματισμό ευρύτερων συστημάτων και ιεραρχιών. Επίσης, η αναφορά στο εννοιολογικό επίπεδο σχηματισμού των φράσεων, το οποίο προηγείται του γλωσσικού, υποδεικνύει ότι ο προβληματισμός για τη φύση και τη λειτουργία των ιδιωτικών δομών λαμβάνει γνωστική κατεύθυνση.

3. Ως προς το σχήμα της μεταφοράς

Από γνωστική άποψη, οι ιδιωτισμοί αντιμετωπίζονται ως γλωσσική απόδοση των υποκείμενων εννοιολογικών μεταφορικών σχημάτων (conceptual metaphor) (Lakoff & Johnson 1980:21), δηλαδή των μηχανισμών κατανόησης αφηρημένων εννοιών με τους όρους της καθημερινής εμπειρίας. Υπό την έννοια αυτή, υποστηρίζεται ότι οι εκφράσεις αντικατοπτρίζουν στην επιφανειακή δομή της γλώσσας κάθε τέτοιο σχήμα, δηλαδή ένα συγκεκριμένο σύστημα δι-εννοιολογικών αντιστοιχίσεων (cross domain mapping) ανάμεσα στο συγκεκριμένο και το αφηρημένο. Με τις αντιστοιχίσεις αυτές δύο κατά βάση διαφορετικές μεταξύ τους έννοιες (η συγκεκριμένη και η αφηρημένη) προσεγγίζουν η μία την άλλη προς όφελος της κατανόησης (Lakoff 1993²:203, Gibbs 1994:248-9, Kövecses 2002:4, Niemeier 2003:196, Deignan 2005:14, Βελούδης 2005:182).

Για παράδειγμα, το φυσικό στοιχείο της *φωτιάς* και η διαδικασία της *καύσης* μπορούν να συγκροτήσουν ένα εννοιακό πεδίο – πηγή για εκφράσεις, όπως οι ακόλουθες:

(1) Η ΣΥΝΑΙΣΘΗΜΑΤΙΚΗ ΕΝΤΑΣΗ ΕΙΝΑΙ ΦΩΤΙΑ

- α) (κάτι) με καίει
- β) καίγεται η καρδιά μου
- γ) ανάβω φωτιές (σε κάποιον)
- δ) παίρνω φωτιά (με το πρώτο)
- ε) είμαι / γίνομαι πυρ και μανία κ.ά.

¹ Το σύνολο του corpus περιλαμβάνει ενενήντα (90) επιμέρους σημασιολογικά – εννοιακά πεδία και περίπου 3000 λήμματα. Παραμένει αδημοσίευτο, αλλά βρίσκεται στη Βιβλιοθήκη Γλωσσολογίας του Ε.Κ.Π.Α.

Στις δομές αυτές ένα σαφές και συγκεκριμένο στοιχείο του φυσικού κόσμου (*φωτιά, καύση*) συνδέεται εννοιολογικά με το ασαφές και μη μετρήσιμο μέγεθος της έντασης των ανθρώπινων συναισθημάτων, πράγμα που προσδίδει εννοιολογική προσβασιμότητα στο ασαφές, δηλαδή διευκολύνει την πρόσληψη και κατανόησή του. Πρόκειται, στην ουσία, για έναν τρόπο εννοιολογικής υπαγωγής των στοιχείων της φυσικής εμπειρίας, όπως αυτή γίνεται αισθητή διά του σώματος, στις ανάγκες έκφρασης της αφηρημένης σκέψης (Holme 2003:391, Βελούδης 2005:178), ειδικότερα σε σχέση με την περίπλοκη φύση και γλώσσα των ανθρώπινων συναισθημάτων (Kövecses 1990, Kövecses 2000, Gavriilidou 2002, Γαβριηλίδου 2002). Και επειδή η υπαγωγή εδώ γίνεται με όρους μεταφορικούς, μπορεί να θεωρηθεί ότι οι φράσεις (1) εντάσσονται στο εννοιολογικό μεταφορικό σχήμα *Η ΣΥΝΑΙΣΘΗΜΑΤΙΚΗ ΕΝΤΑΣΗ ΕΙΝΑΙ ΦΩΤΙΑ*² που αποτελεί τη βάση τους και δικαιολογεί την παρουσία και τη χρήση τους στον λόγο. Παράλληλα, η καθεμία από τις φράσεις αντιστοιχεί σημασιολογικά σε ένα ιδιαίτερο είδος συναισθηματικής έντασης, στο εσωτερικό του ίδιου εννοιολογικού πλαισίου, δηλαδή καμία δεν είναι ισοδύναμη με την άλλη και καμία δεν μπορεί να υποκατασταθεί από άλλη ή από κάποιο κυριολεκτικό ισοδύναμο, χωρίς (μερική έστω) διατάραξη της σημασιολογικής ισορροπίας.

Επιπλέον, εφόσον η κοινή εμπειρία αποτελεί τη βάση της εννοιολογικής δομής και η εννοιολογική τη βάση της γλωσσικής, οι μεταφορικές έννοιες που βασίζονται στην εμπειρία και ενσωματώνονται στους ιδιωτισμούς (Kövecses 2002:177, Steen & Gavins 2003:9) έχουν τη δύναμη όχι μόνο να περιγράφουν, αλλά και να διαμορφώνουν εν μέρει την εξωγλωσσική πραγματικότητα, όπως ο άνθρωπος την αντιλαμβάνεται (Lakoff & Johnson 1980:144, 1999:63). Επ' αυτού, ένα από τα παραδείγματα από το εννοιακό πεδίο του φυσικού σώματος του *αστεριού* μπορεί να θεωρηθεί το σύμπλεγμα των στοιχείων της καθημερινότητας (ξενοδοχείων, εστιατορίων, ποτών κ.ά.) που αξιολογούνται με το σύμβολο και το γλωσσικό σημείο του αστεριού (π.χ. *ξενοδοχείο πέντε αστέρων*), εφόσον στη Νέα Ελληνική λειτουργεί το εννοιολογικό μεταφορικό σχήμα ταύτισης του αστεριού με τις έννοιες του πολύτιμου, του αξιόλογου κ.λπ.. Σημειωτέον δε ότι το συγκεκριμένο σχήμα αποτελεί μία έκφανση της ευρύτερης, προσανατολιστικού χαρακτήρα εννοιολογικής μεταφοράς *ΤΟ ΚΑΛΟ ΕΙΝΑΙ ΠΑΝΩ (ΑΠΟ ΤΟ ΕΛΑΦΟΣ)* που υλοποιείται και σε άλλα εννοιακά πεδία (π.χ. του *ουρανού*, σε φράσεις όπως *βρίσκομαι στον έβδομο ουρανό, πετάω στα σύννεφα* κ.ά.) (Δημοπούλου 2010:294).

Από την άλλη μεριά, η λίγο πολύ παγιωμένη και σταθερή μορφή του συνόλου των συναφών φράσεων όχι μόνο αποκαλύπτει, στο επίπεδο της σκέψης, έναν γενικό τρόπο διαμόρφωσης των καθημερινών εννοιών, αλλά και συγκροτεί, στο επίπεδο της γλώσσας, μια παρακαταθήκη σταθερών μεταφορικών σημασιών, κοινή και διαθέσιμη σε όλα τα μέλη της γλωσσικής κοινότητας. Όλα αυτά, πάντως, δεν σημαίνουν ότι οι χρήστες της γλώσσας, κάθε φορά που προσλαμβάνουν ή αναπαράγουν μία έκφραση, ανακαλούν στον νου τους το σχήμα ή τα σχήματα. Απλώς τα σχήματα είναι εκεί και λειτουργούν ασυνείδητα, φέρνοντας τον ομιλητή σε θέση να διατρέχει με άνεση τις απαιτητικές έννοιες που αποδίδουν (Gibbs 1994:306-7).

Στο σημείο τούτο υπεισέρχεται και η έννοια του πολιτισμικού πλαισίου λειτουργίας των μεταφορικών ιδιωτισμών που μπορεί να θεωρηθεί ως ένας επιπρόσθετος παράγοντας διαμόρφωσης της σημασίας και προσδιορισμού της χρήσης τους: Εφόσον οι αφηρημένες έννοιες κατανοούνται (εν μέρει) με βάση συγκεκριμένους τομείς της φυσικής εμπειρίας, είναι εύλογο πως η κάθε πολιτισμικά προσδιορισμένη οργάνωση της εμπειρίας αυτής και η διαμόρφωση σχετικών αντιλήψεων επηρεάζει τον σχηματισμό τους. Με άλλα λόγια, τα συμβατικά μεταφορικά σχήματα, που παράγουν τους ιδιωτισμούς, περικλείουν και τα συμβατικά σχήματα σκέψης της γλωσσικής κοινότητας, στην οποία κυκλοφορούν οι ιδιωτισμοί (Lakoff & Johnson 1980:22, Kövecses 1999:67, 2007²:284, Radden 2003:102).

Λόγου χάρη, στο μεταφορικό σχήμα της Ελληνικής που συνδέει την καταβολή οποιασδήποτε προσπάθειας (σωματικής, ψυχολογικής κ.λπ.) με την έκθλιψη του ελαιοκάρπου και την εξαγωγή του λαδιού, περιλαμβάνονται φράσεις, όπως οι (2):

(2) *Η ΠΡΟΣΠΑΘΕΙΑ / Ο ΚΟΠΟΣ ΕΙΝΑΙ ΕΞΑΓΩΓΗ ΛΑΔΙΟΥ*

α) *βγάζω το λάδι (κάποιον)*

β) *μου βγαίνει το λάδι κ.ά.*

² Αποδίδεται με κεφαλαία στοιχεία μικρού μεγέθους, όπως έχει καθιερωθεί.

Στα δείγματα αυτά, οι επιμέρους μεταφορικές συνεπαγωγές (metaphorical entailments)³, δηλ. οι αυτόματες διαδικασίες μεταβίβασης γνωστικών λεπτομερειών που προέρχονται από τα βαθύτερα εικονιστικά περιγράμματα (image schemata) και διαμορφώνουν τις φράσεις (Kövecses 2002:94), είναι εμπλουτισμένες με στοιχεία από το νεοελληνικό πολιτισμικό σύμπαν, εφόσον οι φυσικοί ομιλητές της γλώσσας, ιδίως στα πλαίσια της παλαιότερης αγροτικής κοινωνίας, έχουν ακούσει, δει, βιώσει κ.λπ. κάποιες λεπτομέρειες σχετικά με τη διαδικασία παραγωγής του λαδιού και με βάση αυτές επινόησαν τις φράσεις. Στη συνέχεια μπορούν και να χρησιμοποιήσουν το γνωστικό αυτό υλικό, αν επικρατήσει η σχετική γλωσσο-πολιτισμική επιλογή, για να εμπλουτίσουν το σχήμα, ή, αντίθετα, να το παραμερίσουν τελείως και οι φράσεις να μην πολλαπλασιαστούν ή / και να περιπέσουν σε αχρηστία. Σε κάθε περίπτωση, πάντως, ο πολιτισμικός παράγοντας, μαζί με την εννοιολογική – κοινωνική διάσταση και τη φραστική παγίωση, μεγιστοποιούν το γνωστικό όφελος των μεταφορικών ιδιωτισμών (Radman 1997:113, Crisp 2003:101).

4. Ως προς το σχήμα της μετωνυμίας

Στο επίπεδο της γλωσσικής πλήρωσης, η εμφάνιση ιδιωτισμών εκφράσεων μετωνυμικού χαρακτήρα υποδεικνύει την ύπαρξη εννοιολογικών μετωνυμικών σχημάτων, δηλαδή φυσικών συστημάτων συνεπαγωγών, τα οποία λειτουργούν στο εσωτερικό του ίδιου εννοιακού πεδίου (Radden & Kövecses 1999:17, Kövecses 2002:145, Barcelona 2003a:13, Barcelona 2003b:32-33), εξομαλύνοντας εννοιολογικά, με άλλα λόγια διευκολύνοντας την κατανόηση των δεδομένων που προσλαμβάνει ο ανθρώπινος νους. Η διευκόλυνση επιτυγχάνεται με την αναγωγή ενός μέλους του εννοιακού πεδίου στη θέση του πρωτοτύπου που μπορεί να υποκαταστήσει εννοιολογικά ολόκληρη την κατηγορία (Radden & Kövecses 1999:18). Σχετικό είναι το παράδειγμα από το εννοιακό πεδίο του φυσικού στοιχείου του νερού:

(3) ΤΟ ΝΕΡΟ ΑΝΤΙ ΤΗΣ ΠΑΡΟΧΗΣ ΚΑΙ ΔΙΑΧΕΙΡΙΣΗΣ ΑΥΤΟΥ

- α) ανοίγω / κλείνω το νερό
- β) το νερό τρέχει / σταματάει / κόβεται
- γ) ρίχνει νερό (= βρέχει)
- δ) πληρώνω το νερό (= το λογαριασμό) κ.ά.

Το σχήμα αυτό λειτουργεί κατ' αρχάς συσχετιστικά, εφόσον συνάπτει την κεντρική έννοια του νερού με τις επιμέρους έννοιες που σχετίζονται με αυτό (παροχή, διαχείριση), αλλά ταυτόχρονα και αιτιολογικά, αφού η συνολική επιλογή των λέξεων σε κάθε φράση υπηρετεί άριστα την κατανόηση, χωρίς ανάγκη προσφυγής στις επιμέρους έννοιες για λόγους ακριβολογίας. Παράλληλα, επειδή οι συγκεκριμένες δομές είναι βαθιά θεμελιωμένες στην εμπειρία και υφίστανται τη δοκιμασία της συχνής χρήσης και τριβής στη νεοελληνική γλωσσική κοινότητα, έχουν εν μέρει αποχρωματιστεί ως προς τον στερεοτυπικό (figurative) και μη κυριολεκτικό χαρακτήρα τους και εκλαμβάνονται – πρόχειρα – ως κυριολεκτικές, χωρίς αυτό να μειώνει τη μετωνυμική θεμελίωση του σχηματισμού τους. Σε τελική ανάλυση, ακριβώς λόγω της πολιτισμικής καταξίωσης και της παγίωσης στη μορφή και τη σημασία τους, οι εκφράσεις αυτές, αλλά και όλοι οι νεοελληνικοί μετωνυμικοί ιδιωτισμοί, αποκαλύπτουν χρήσιμα στοιχεία για τον τρόπο σχηματισμού και κυκλοφορίας των εννοιών και άρα διαθέτουν υψηλή γνωστική λειτουργικότητα (Barcelona 2003a:14).

5. Ως προς τη διαπλοκή των δύο σχημάτων

Στον καθημερινό λόγο εμφανίζονται ιδιωτισμοί που πραγματώνουν χαρακτηριστικά και των δύο μηχανισμών (μεταφοράς και μετωνυμίας), είτε κατ' ακολουθία είτε συνδυαστικά και σε διαφορετικό βαθμό κάθε φορά. Αυτό υποδεικνύει τον σύνθετο χαρακτήρα του ανθρώπινου αντιληπτικού συστήματος και τις δομικά περίπλοκες σχέσεις αλληλεξάρτησης και επικάλυψης, οι οποίες αναπτύσσονται στο πλαίσιο του για τον εννοιολογικό σχηματισμό και τη γλωσσική αποτύπωση πιο

³Ο όρος απαντά και στον Βελούδη (2005:190).

απαιτητικών εννοιών (Goossens 1995a:161, Barcelona 2003a:9, 2003c:232, Dirven 2003b:88). Στην πράξη έχουν γίνει απόπειρες κατηγοριοποίησης των σύνθετων εκφράσεων, με αναγωγή στα αντίστοιχα σχήματα (Barcelona 2003a:9-12, Goossens 1995a:159-174, 1995b:175-204, 2003:149-169), η γλωσσική πραγματικότητα ωστόσο υπερβαίνει κάθε τυπολογία, με εξαίρεση την κυρίαρχη τάση της ενσωμάτωσης της απλούστερης διαδικασίας (της μετωνυμίας) μέσα στην πολυπλοκότερη (τη μεταφορά). Η τάση αυτή υλοποιείται συνήθως με τη συγκρότηση σύνθετων σχημάτων, στα οποία η μεταφορική αναλογία εδράζεται πάνω σε μετωνυμική γειτνίαση, και στη γενετική παραγωγή ανάλογων φράσεων. Έστω το ακόλουθο παράδειγμα από το εννοιακό πεδίο της γης στη Νέα Ελληνική:

(4) Ο ΖΩΤΙΚΟΣ ΧΩΡΟΣ / Η ΕΚΦΡΑΣΗ ΙΣΧΥΟΣ ΕΙΝΑΙ ΓΗ (ΕΔΑΦΟΣ / ΤΟΠΟΣ)

- α) *κερδίζω έδαφος* (= *προχωρώ: ο στρατός ~ // αποκτώ πλεονέκτημα: η άποψη ~*)
β) *χάνω έδαφος* (= *υποχωρώ: ο στρατός ~ // χάνω το πλεονέκτημα: η άποψη ~*)
γ) *κάνω τόπο* (= *αφήνω ελεύθερο χώρο: Κάνε τόπο να περάσω! // αφήνω ελευθερία κινήσεων: Κάντε τόπο στα νιάτα!*)
δ) *πιάνω τόπο* (= *έχω αποτέλεσμα: Φρόντισε οι ενέργειες σου να πιάνουν τόπο!*)
ε) *αφήνω στον τόπο* (= *σκοτώνω ακαριαία: Με ένα χτύπημα τον άφησε στον τόπο.*)

Οι φράσεις (4) αποτελούν κατ' αρχάς τυπικούς μεταφορικούς ιδιωτισμούς και μπορούν να αναχθούν όλες στο εννοιολογικό μεταφορικό σχήμα *Ο ΖΩΤΙΚΟΣ ΧΩΡΟΣ / Η ΕΚΦΡΑΣΗ ΙΣΧΥΟΣ ΕΙΝΑΙ ΓΗ (ΕΔΑΦΟΣ / ΤΟΠΟΣ)*, εφόσον σε αυτές η συγκεκριμένη σημασία (*τόπος, έδαφος*) χρησιμοποιείται ως αφετηρία για να γίνει αντιληπτή και να εκφραστεί η αφηρημένη έννοια – στόχος (*έκφραση ισχύος, αποτελεσματικότητα*). Ωστόσο, η μακρινή και εν πολλοίς αυθαίρετη αυτή μεταφορική μεταβίβαση βρίσκει γνωστική αιτιολογία, αν θεωρηθεί ότι βασίζεται στη θεμελιωμένη στην εμπειρία εννοιολογική μετωνυμία *Η ΓΗ ΑΝΤΙ ΤΗΣ ΒΑΣΗΣ / ΤΟΥ ΣΥΓΚΕΚΡΙΜΕΝΟΥ ΧΩΡΟΥ ΔΡΑΣΤΗΡΙΟΤΗΤΑΣ*. Παράλληλα, εσωτερικά του σχήματος οι φράσεις διαφοροποιούνται δομικά και εννοιολογικά, όπως μπορεί να γίνει αντιληπτό και από την απόδοση της σημασίας και τα παραδείγματα χρήσης που δίνονται επί τούτου σε παρένθεση. Συγκεκριμένα, οι (4) (α), (β) και (γ) είναι δυνατό να χρησιμοποιηθούν αφενός μετωνυμικά, αν το περικείμενο επιβάλλει την υπερίσχυση της σχέσης γειτνίασης ανάμεσα στη διαχείριση του εδάφους και στην αντίστοιχη κίνηση (προώθηση, υποχώρηση και παραμερισμός) και αφετέρου μεταφορικά, αν βάσει περικειμένου κυριαρχήσει η μεταφορική ομοιότητα ανάμεσα στη διαχείριση εδάφους και στην απόκτηση ή απώλεια πλεονεκτήματος, ενώ οι (4) (δ) και (ε) λειτουργούν κατά βάση μεταφορικά. Επομένως, ορισμένοι ιδιωτισμοί μπορούν να κινηθούν σε δύο επίπεδα (μετωνυμικό – μεταφορικό), τα οποία εναλλάσσονται ελεύθερα στον λόγο, χωρίς οι χρήστες της γλώσσας να συνειδητοποιούν τη διαφορά τους.

Πρόκειται στην ουσία για τη γλωσσική αποτύπωση της ύπαρξης ενός εννοιολογικού συνεχούς από τη μετωνυμία προς τη μεταφορά ή, ορθότερα, ενός συνεχούς από την κυριολεξία προς την ποιητική ή / και συμβολική χρήση της γλώσσας, βασικά ενδιάμεσα στάδια του οποίου αποτελούν η μετωνυμία και η μεταφορά (Radden 2003:93, Niemeier 2003:198, Deignan 2005:62-5). Στον φωνούμενο λόγο το συνεχές αποτυπώνεται με τη δημιουργία αναλόγων εκφράσεων, μερικές από τις οποίες παγιώνονται δομικά και σημασιολογικά και απαρτίζουν τους ιδιωτισμούς, γίνονται δε αντιληπτές και αυτές υπό μορφή συνεχούς ως προς την απόκλιση της σημασίας τους από την κυριολεξία (Cacciari 1993:31-2) και ως προς την κατανόηση και ερμηνεία τους (Cacciari & Tabossi 1988:680).

6. Ως προς τον σχηματισμό συστημάτων και ιεραρχιών

Η εστίαση στη γνωστική λειτουργικότητα του μεταφορικού και του μετωνυμικού μηχανισμού, όπως αποκαλύπτεται από την παρουσία των ιδιωτισμών στον λόγο, μπορεί να οδηγήσει σε όλο και περισσότερες γενικεύσεις και αφαιρέσεις και στην υπόθεση ότι συγκροτούνται ολόκληρες ιεραρχίες και συστήματα ιεραρχιών μεταφορικών και μετωνυμικών σχημάτων, βάσει των οποίων οργανώνεται και χρησιμοποιείται μέρος του λεξιλογίου (Lakoff 1993²:222, Lakoff & Johnson 1999:63-64, Feyaerts 2003:68-9). Σύμφωνα με τη συλλογιστική αυτή, οι ιδιωτισμοί μπορούν να αποκαλύψουν την

εσωτερική δομή του διαμορφούμενου συστήματος, αφού με την πάγια και συμβατική μορφή τους αντικατοπτρίζουν τους κόμβους κατασκευής του.

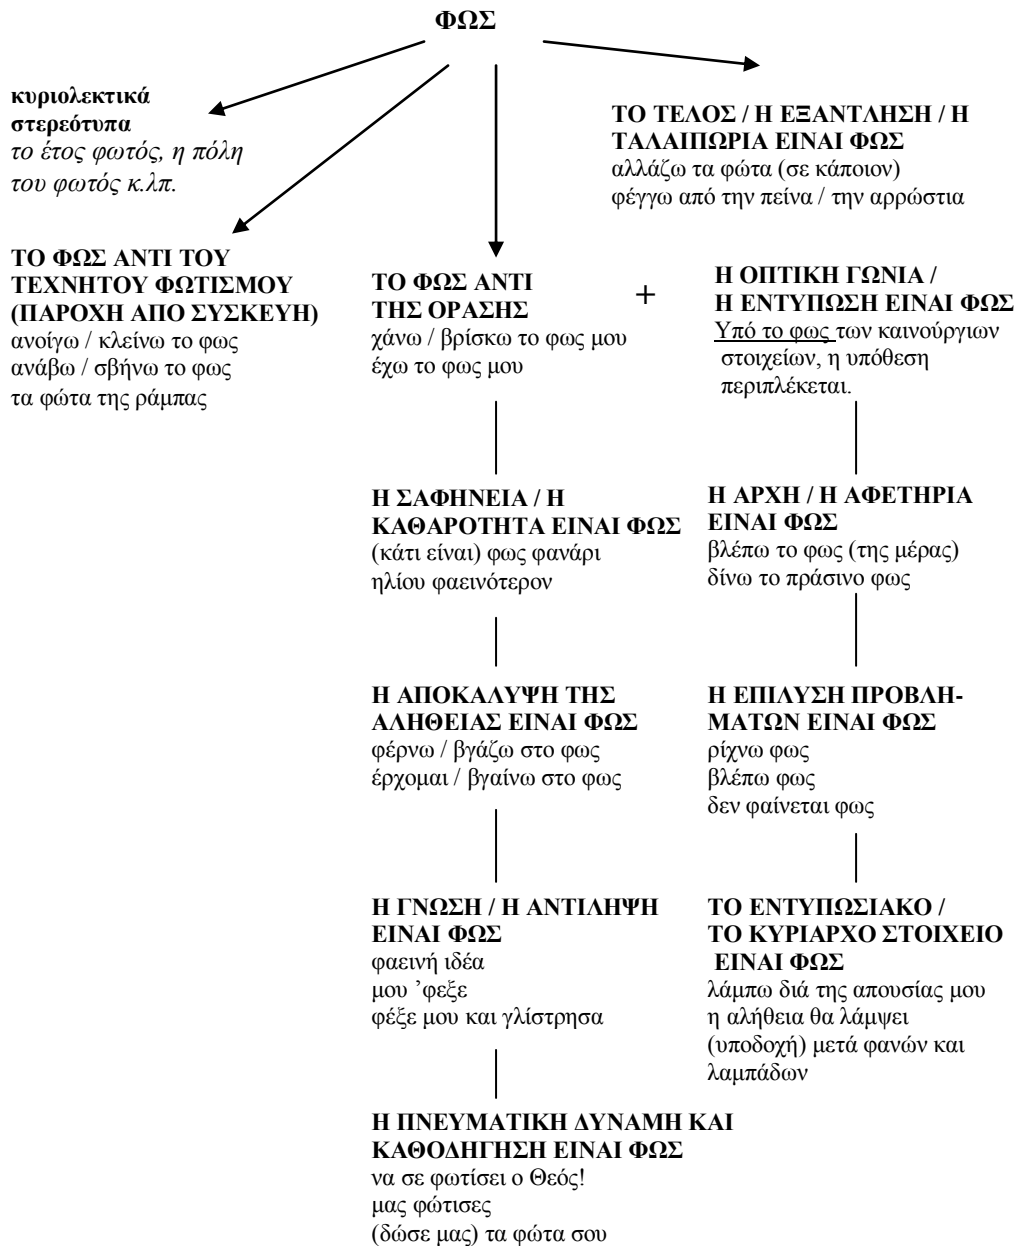

Ειδικά για τη Νέα Ελληνική, αν θεωρηθεί ότι οι έννοιες που σχετίζονται με τη φύση συγκροτούν ένα αχανές πεδίο, τέτοιες ιεραρχίες σχημάτων συγκροτούνται γύρω από κεντρικά λεξήματα – σημασίες του πεδίου (π.χ. *η γη, το φως, το νερό, ο αέρας, τα διάφορα φυτά* κ.λπ.), τα οποία διαμορφώνουν τα εννοιικά πεδία – πηγή (source fields), δηλαδή λειτουργούν ως εμπειρική βάση για τη μη κυριολεκτική σύλληψη αφηρημένων εννοιών και τη γλωσσική απόδοση των εννοιών αυτών μέσω των ιδιωματοισμών (target fields). Για παράδειγμα, από τη φυσική εμπειρία της βίωσης του φωτός πηγάζει ένα ολόκληρο σύστημα μη κυριολεκτικών σχημάτων – φορέων σημασιών και αναλόγων εκφράσεων, το οποίο οργανώνεται ως ακολούθως:

Κατ' αρχάς, εκτός από τις ολιγάριθμες κυριολεκτικές στερεοτυπικές εκφράσεις, επιστημονικού και πολιτισμικού χαρακτήρα (π.χ. *το έτος φωτός, η πόλη του φωτός*), συγκροτούνται δύο θεμελιώδη μετωνυμικά σχήματα: *ΤΟ ΦΩΣ ΑΝΤΙ ΤΟΥ ΤΕΧΝΗΤΟΥ ΦΩΤΙΣΜΟΥ (ΠΑΡΟΧΗ ΦΩΤΟΣ ΑΠΟ ΕΙΔΙΚΗ ΣΥΣΚΕΥΗ)* και *ΤΟ ΦΩΣ ΑΝΤΙ ΤΗΣ ΟΡΑΣΗΣ*. Το πρώτο από αυτά αντικατοπτρίζει τη βασική μετωνυμική σύνδεση ανάμεσα σε στενότερες και ευρύτερες οντότητες εντός του ιδίου εννοιικού πεδίου και υλοποιείται γλωσσικά μέσω τυπικών μετωνυμικών ιδιωματοισμών υψηλής συχνότητας (π.χ. *ανοίγω / κλείνω το φως*) ή συνδυασμών μετωνυμίας και μεταφοράς (*τα φώτα της ράμπας*). Το δεύτερο βασίζεται στην εξίσου θεμελιώδη σχέση γειννίας ανάμεσα στο ερέθισμα (φως) και την αίσθηση (όραση) και πραγματώνεται με ανάλογα συχνές και οικείες εκφράσεις (π.χ. *χάνω / βρίσκω το φως μου*), ταυτόχρονα όμως εμπλέκεται και με τον μεταφορικό σχηματισμό *Η ΟΠΤΙΚΗ ΓΩΝΙΑ / Η ΕΝΤΥΠΩΣΗ ΕΙΝΑΙ ΦΩΣ*, παράγοντας ανάλογες εκφράσεις (π.χ. *Υπό το φως των καινούργιων στοιχείων, η υπόθεση περιπλέκεται*) και συγκροτώντας ένα σύνθετο μετωνυμικό – μεταφορικό σχήμα. Το σχήμα αυτό διαθέτει υψηλή γνωστική αξία διότι αποτελεί τη βάση, από την οποία εξακτινώνονται τα συστήματα σχημάτων που συνδέουν το φως και την όραση με τη σκέψη και το συναίσθημα.

Συγκεκριμένα, από την κυριολεκτική πηγή του φωτός πηγάζει ένα σύστημα μεταφορικών ταυτίσεων, με το οποίο συλλαμβάνονται εννοιολογικά και αποδίδονται γλωσσικά διάφορα επίπεδα αντίληψης και αφηρημένης σκέψης: *Η ΣΑΦΗΝΕΙΑ / Η ΚΑΘΑΡΟΤΗΤΑ ΕΙΝΑΙ ΦΩΣ, Η ΑΠΟΚΑΛΥΨΗ ΤΗΣ ΑΛΗΘΕΙΑΣ ΕΙΝΑΙ ΦΩΣ, Η ΓΝΩΣΗ / Η ΑΝΤΙΛΗΨΗ ΕΙΝΑΙ ΦΩΣ* και *Η ΠΝΕΥΜΑΤΙΚΗ ΔΥΝΑΜΗ ΚΑΙ ΚΑΘΟΔΗΓΗΣΗ ΕΙΝΑΙ ΦΩΣ*. Τα σχήματα αυτά κλιμακώνονται από το απλούστερο στο (σημασιολογικά) συνθετότερο και από το λιγότερο προς το περισσότερο αφηρημένο, αναγόμενα όλα στο προηγούμενο σύνθετο, μετωνυμικό – μεταφορικό σχήμα, και πραγματώνονται γλωσσικά με ιδιωματοισμούς οικείους και σημασιολογικά παραγωγικούς (π.χ. *κάτι είναι*) *φως φανάρι, φέρνω στο φως, (δίνω) τα φώτα μου, να σε φωτίσει ο Θεός!, μας φωτίσεις!*), με μεταφορικό κυρίως χαρακτήρα και διακύμανση ως προς την παγίωση της μορφής (π.χ. *βγαίνω στο φως, μου 'φεξε, φέξε μου και γλίστρησα!*).

Από την άλλη μεριά, από τη βασική ταύτιση του φωτός και της όρασης με την οπτική γωνία και την εντύπωση εξαρτάται και μία δεύτερη, επίσης κλιμακούμενη ομάδα μεταφορικών σημασιών, η οποία οργανώνεται γύρω από τα σχήματα: *Η ΑΡΧΗ / Η ΑΦΕΤΗΡΙΑ ΕΙΝΑΙ ΦΩΣ, Η ΕΠΙΛΥΣΗ ΠΡΟΒΛΗΜΑΤΩΝ ΕΙΝΑΙ ΦΩΣ* και *ΤΟ ΕΝΤΥΠΩΣΙΑΚΟ / ΤΟ ΚΥΡΙΑΡΧΟ ΣΤΟΙΧΕΙΟ ΕΙΝΑΙ ΦΩΣ (ΛΑΜΨΗ)*. Ως προς το πρώτο, αξίζει να σημειωθεί η διαπλοκή της κυριολεκτικής πηγής με το φυσικό φαινόμενο της *ημέρας* στη μεταφορική αντιστοίχιση του πρωινού φωτός με την αρχή της ανθρώπινης ζωής (π.χ. *βλέπω το φως (της μέρας), το λυκαυγές της ζωής*), αλλά και η παρεμβολή του πολιτισμικού στοιχείου στις σχηματιζόμενες φράσεις (π.χ. στον μεταφορικό ιδιωματοισμό: *δίνω (σε κάποιον) το πράσινο φως*)· αντίθετα, στο δεύτερο και το τρίτο υπεισέρχεται και ο παράγοντας της συναισθηματικής συμμετοχής αυτού που μεταχειρίζεται την έκφραση, με συνέπεια τον ανάλογο «χρωματισμό» της σημασίας. Τούτο γίνεται ιδιαίτερα φανερό σε δομές, όπως λ.χ. *φως στο βάθος του τούνελ ή λάμπω διά της απουσίας μου*, οι οποίες μπορούν να προσλάβουν δραματικό, ειρωνικό, σαρκαστικό κ.λπ. τόνο ανάλογα με την περίπτωση. Τέλος, παρατηρείται και το περιορισμένα παραγωγικό μεταφορικό σχήμα *ΤΟ ΤΕΛΟΣ / Η ΕΞΑΝΤΛΗΣΗ / Η ΤΑΛΑΙΠΩΡΙΑ ΕΙΝΑΙ ΦΩΣ*, το οποίο συγκροτείται εκτός των βασικών συστημάτων και πραγματώνεται γλωσσικά με οικείες εκφράσεις (π.χ. *αλλάζω τα φώτα (σε κάποιον)*).

Το διαμορφούμενο σύνολο μπορεί να παρασταθεί και σχηματικά ως εξής:

7. Συμπεράσματα

Τα παραπάνω υποδεικνύουν ότι οι ιδιωματικές σημασίες στο σημασιολογικό πεδίο της φύσεως στη Νέα Ελληνική δεν παράγονται αυθαίρετα ούτε καταγράφονται στο νοητικό λεξικό ανεξάρτητα, αλλά εμφανίζονται πλήρως αιτιολογημένες με βάση τα υποκείμενα σχήματα, ιεραρχίες και συστήματα και σημασιολογικά δομημένες έτσι ώστε να καλύπτουν ευρύ φάσμα των μεταφορικών ή / και μετωνυμικών αντιστοιχίσεων στο εσωτερικό των σχημάτων. Επομένως, οι αντίστοιχες παγιωμένες εκφράσεις αποτελούν περίπλοκους μηχανισμούς, με χαρακτήρα πρώτα εννοιολογικό και μετά γλωσσικό, και μπορούν να θεωρηθούν ως ένα χαρακτηριστικό δείγμα της αλληλεπίδρασης ανάμεσα

στο γνωστικό και το γλωσσικό σύστημα του ανθρώπου, δηλαδή ανάμεσα στον σχηματισμό ορισμένων (καθημερινών) εννοιών και τη γλωσσική τους απόδοση⁴.

Παράλληλα, από λειτουργική άποψη, οι ιδιωματικές εκφράσεις της φύσεως δεν συνιστούν αδρανή στοιχεία της γλώσσας, αλλά γνωστικά απαραίτητες μεταφορικές ή / και μετωνυμικές μονάδες που εξαρτώνται – σε μικρότερο ή μεγαλύτερο βαθμό – και από κοινωνικούς και πολιτισμικούς παράγοντες. Έτσι, άλλωστε, εξηγείται και η γενική δυσκολία κυριολεκτικής παράφρασης ή εύρεσης κυριολεκτικού αντιστοίχου για την καθεμία από αυτές. Επίσης, ως παγιωμένες και συμβατικές δομές, οι νεοελληνικοί ιδιωματισμοί της φύσης μπορούν να θεωρηθούν ως σημαντικός παράγοντας προώθησης τόσο της απαραίτητης για την επικοινωνία συνεκτικότητας των νοημάτων όσο και της σημασιολογικής διαφοροποίησης, δηλαδή του εμπλουτισμού και της ανανέωσης του λεξιλογίου (Fernando 1996:215, Αναστασιάδη – Συμεωνίδη & Ευθυμίου 2006:18). Επιπλέον, η πολιτισμική διάσταση της σημασίας τους καθιστά τις εκφράσεις αυτές παράγοντα κοινωνικής συνοχής (Levorato 1993:126), στο μέτρο που αποτελούν συνδεδετικό κρίκο μεταξύ των μελών της νεοελληνικής γλωσσικής κοινότητας, αλλά και σημείο διαφοροποίησης από τα μέλη άλλων κοινοτήτων.

Γενικότερα, οι ιδιωματισμοί αποτελούν για τους ομιλητές καθημερινές αξίες: όλοι μας σκεφτόμαστε και εκφραζόμαστε με αυτούς και δι’ αυτών, χωρίς να συνειδητοποιούμε το μεταφορικό ή/και μετωνυμικό τους υπόβαθρο. Άρα, η ύπστη λειτουργικότητά τους συνίσταται στο ότι μετατρέπουν τη φαντασιακή λογική και τη δημιουργικότητα του μη κυριολεκτικού λόγου σε συλλογική εννοιολογική κατάκτηση και τρέχον επικοινωνιακό νόμισμα.

ABSTRACT

Teaching in the Information Era involves incorporating in practice multimodal material as it is acknowledged that the way people are learning is affected by the way people are communicating; something that has largely changed because of the use of new technologies.

This study examines the development of multimodal educational material by Greek-Cypriot pre-service teachers using MMB. The data shows that, although pre-service teachers managed to some degree to 'strike a balance' among different literacies (linguistic, visual, digital) when constructing educational material, most of them did not manage to develop exercises for their students that required responding in a multimodal manner.

Λέξεις κλειδιά: πολυτροπικότητα, πολυγραμματισμοί, εκπαιδευτικό υλικό, Multimedia Builder, οπτικός γραμματισμός, ψηφιακός γραμματισμός.

1. Εισαγωγικά

Στο παρελθόν ο γραμματισμός οριζόταν παραδοσιακά ως απλώς ή γενικά η ικανότητα ανάγνωσης και γραφής. Φυσικά, η έννοια του γραμματισμού προσαρμόζεται στις εκάστοτε εξελίξεις στους τομείς της οικονομίας, της τεχνολογίας και της κοινωνίας γενικότερα. Έτσι, το 2003 στα πλαίσια συνάντησης οργανωμένης από το Ινστιτούτο Εκπαίδευσης της UNESCO και το Union des Institutions Sociales του Πανεπιστημίου Paris 6, ο γραμματισμός προσδιορίστηκε ως «η ικανότητα κάποιου να ταυτίζει, να καταλαβαίνει, να ερμηνεύει, να δημιουργεί, να επικοινωνεί, να υπολογίζει και να χρησιμοποιεί εκτυπωμένο ή γραπτό υλικό που σχετίζεται με διάφορα περικείμενα. Στον γραμματισμό εμπλέκεται ένα συνεχές μάθησης μέσω της οποίας τα άτομα γίνονται ικανά να πετυχαίνουν τους στόχους τους, να αναπτύσσουν τις γνώσεις και τις δυνατότητές τους και να είναι πλήρως μέλη της τοπικής και της ευρύτερης κοινωνίας» (σ. 21). Γενικά, σύμφωνα με τη Μητσκοπούλου (2001) στην εποχή μας η έννοια του γραμματισμού έχει επεκταθεί και αφορά τη δυνατότητα του ατόμου να λειτουργεί αποτελεσματικά σε διάφορα περιβάλλοντα και καταστάσεις επικοινωνίας, χρησιμοποιώντας κείμενα όχι μόνο γραπτού αλλά και προφορικού λόγου καθώς και μη γλωσσικά κείμενα (εικόνες, σχεδιαγράμματα, χάρτες κλπ.).

Εξάλλου, από την επέκταση της έννοιας του γραμματισμού δεν μπορεί να μείνει έξω ένα από τα κύρια χαρακτηριστικά του σύγχρονου επικοινωνιακού τοπίου, η πολυτροπικότητα, δηλ. η χρήση και μίξη πολλών τρόπων (modes) κατά την επικοινωνία. Σύμφωνα με τον Kress (2003), η γλώσσα και ο γλωσσικός γραμματισμός πολύ συχνά είναι μόνο μερικοί φορείς σημασίας και, γενικά, δεν πρέπει να αντιμετωπίζουμε τον γλωσσικό γραμματισμό ως το μοναδικό ή το κύριο μέσο αναπαράστασης της πραγματικότητας ή επικοινωνίας, καθώς σε πολλά περιβάλλοντα άλλοι τρόποι μπορεί να είναι πιο

εμφανείς ή σημαντικοί. Οι Cope & Kalantzis (2009) τονίζουν ότι απαιτείται να προσεγγίσουμε τις σύγχρονες κατασκευές νοημάτων ως ολοένα και περισσότερο πολυτροπικές, με τον γλωσσικό, τον οπτικό, τον ηχητικό, τον παραγλωσσικό και τον χωρικό τρόπο να ενσωματώνονται ολοένα και περισσότερο συνδυαστικά στην καθημερινή επικοινωνία και σε πολιτισμικές πρακτικές. Μια αναπόφευκτη συνέπεια των παραπάνω είναι η ανάγκη να συμπληρωθεί ο γλωσσικός γραμματισμός με μια παιδαγωγική των πολυγραμματισμών ή με τη διδασκαλία του πώς ερμηνεύουμε και παράγουμε πολυτροπικά κείμενα. Σύμφωνα με τον Lemke (2005), είναι σημαντικό να θέσουμε ερωτήματα όπως: οι άλλοι τρόποι απλώς ξανακάνουν ό,τι και η γλώσσα; Πότε είναι βοηθητικοί ή περιθωριακοί και πότε παίζουν έναν (πιο) πλήρη ρόλο; Τα παραπάνω ερωτήματα σαφώς σχετίζονται και με τη διαμόρφωση ενός προγράμματος διδασκαλίας για τον γραμματισμό το οποίο θα μπορούσε να βοηθήσει μαθητές και φοιτητές να αναλύουν και να παράγουν νοήματα σε ένα πολυτροπικό κείμενο.

Ο τεχνολογικός - ή διαφορετικά *ψηφιακός* - γραμματισμός συζητείται εδώ και πολλά χρόνια στη βιβλιογραφία. Ορίζεται ως η γνώση του τί είναι τεχνολογία, πώς δουλεύει, τι σκοπούς εξυπηρετεί ώστε να προάγεται η μάθηση, η παραγωγικότητα και η αποτελεσματικότητα των διαδικασιών. Επίσης, ο ψηφιακός γραμματισμός συμπεριλαμβάνει την ανάπτυξη ικανοτήτων χρήσης της ψηφιακής τεχνολογίας, εργαλείων επικοινωνιών και δικτύων, για να προσεγγίσουμε, να διαχειριζόμαστε, να ολοκληρώνουμε, να αξιολογούμε και να δημιουργούμε πληροφορίες έτσι ώστε να λειτουργούμε στην κοινωνία της πληροφορίας. Ακόμη με τον όρο *ψηφιακός γραμματισμός* εννοούμε την ικανότητα οργάνωσης, κατανόησης, αξιολόγησης και ανάλυσης πληροφοριών και κατασκευής νοημάτων μέσω της χρήσης ψηφιακής τεχνολογίας (Riddle 2009) καθώς και τις κοινωνικά τοποθετημένες πρακτικές που υποστηρίζονται από δεξιότητες, στρατηγικές και στάσεις που καθιστούν δυνατή την αναπαράσταση ή την κατανόηση ιδεών μέσω της χρήσης ψηφιακών εργαλείων (O'Brien & Scharber 2008). Σύμφωνα με τους Κυρίδη, Δρόσο & Ντίνα (2003), ένα τεχνολογικά εγγράμματο άτομο πρέπει να μπορεί να αντιλαμβάνεται τη φύση και τον ρόλο της τεχνολογίας, τον σχεδιασμό και τον έλεγχο των τεχνολογικών συστημάτων καθώς και να είναι ικανό να εκτιμά τα πλεονεκτήματα αλλά και τους κινδύνους που συνδέονται με την τεχνολογία. Ο τεχνολογικός γραμματισμός θεωρείται επιθυμητό προσόν για όλες τις ειδικότητες. Είναι σημαντικό οι μαθητές (μελλοντικοί πολίτες της Κοινωνίας της Πληροφορίας) να είναι τεχνολογικά εγγράμματοι, ώστε να μπορούν να χρησιμοποιούν την τεχνολογία για προσωπικούς, εκπαιδευτικούς και μελλοντικά επαγγελματικούς σκοπούς.

Με τον όρο *οπτικός γραμματισμός* εννοούμε η ικανότητα κατανόησης και κατασκευής νοημάτων μέσω οπτικών εικόνων (Giorgis κ.ά., 1999). Γενικά, στα πλαίσια της ανθρώπινης ενσυνείδητης οπτικής επικοινωνίας ο οπτικός γραμματισμός αναφέρεται σε ένα σύνολο κυρίως επίκτητων δεξιοτήτων, που αναφέρονται σε ικανότητες κατανόησης και χρησιμοποίησης εικόνων, καθώς και στην ικανότητα να σκέφτεσαι και να μαθαίνεις με εικόνες. Συγκεκριμένα, έχει διαπιστωθεί ότι υπάρχουν έντεκα κοινά αποδεκτές ικανότητες που χαρακτηρίζουν τον οπτικό γραμματισμό: γνώση οπτικού λεξιλογίου και ορισμών, γνώση οπτικών συμβάσεων, οπτικοποίηση, κριτική θέαση, οπτική σκέψη, οπτικός συλλογισμός, οπτική διάκριση, οπτική αναδόμηση, οπτικός συσχετισμός, δόμηση νοήματος και αναδόμηση νοήματος (Avgerinou, 2007). Συχνά η αξία της καλλιέργειας του οπτικού γραμματισμού συσχετίζεται με την αισθητική, που γενικά συνδέει την έννοια του ωραίου με τη φύση και την τέχνη, κυρίως ως επενέργεια πάνω στις αισθήσεις, και θεωρείται ότι μπορεί να αυξήσει τη χρησιμότητα και χρηστικότητα των οπτικών ερεθισμάτων (Tory & Möller 2004). Σε ένα τέτοιο πλαίσιο η εμφάνιση και ανάπτυξη των ΤΠΕ έφερε στο προσκήνιο μια νέου τύπου αισθητική, την αισθητική της πληροφορίας (*info-aesthetics* Manovich 2001), που σχετίζεται με την αισθητική της πρόσβασης στην πληροφορία καθώς και με τη δημιουργία έργων με τα νέα μέσα ώστε να προσδοθεί αισθητική στη διαδικασία της επεξεργασίας (Manovich 2001, Cawthon & Vande Moere 2007). Έτσι, σε επίπεδο σχεδιασμού εκπαιδευτικού υλικού με τις ΤΠΕ, η αισθητική της πληροφορίας μπορεί να συνδεθεί με την ποιότητα του συναισθήματος που μπορεί να μεταδοθεί ή να καλλιεργηθεί με την χρήση των ΤΠΕ, π.χ. με την αύξηση του ενδιαφέροντος και της απόδοσης των μαθητών (Laurel 1991, Mirdehghani & Monadjemi 2009), καθώς γενικά οι άνθρωποι θεωρούν ότι κάτι που δείχνει καλό ή όμορφο, λειτουργεί καλύτερα ή ικανοποιητικότερα (Kurosui and Kashimura 1995, Tractinsky κ.ά. 2000) ή ότι σε άλλες περιπτώσεις κατανοούν ευκολότερα και πιο αποτελεσματικά κάποια στοιχεία, επειδή τους είναι αρεστά λόγω εξοικείωσης και προηγούμενης εμπειρίας (Cawthon & Vande Moere 2007).

Το συγκεκριμένο άρθρο εξετάζει την ανάπτυξη της έννοιας των πολυγραμματισμών σε μελλοντικούς εκπαιδευτικούς, με έμφαση στον ψηφιακό, τον οπτικό και τον γλωσσικό γραμματισμό. Λαμβάνοντας υπόψη τις διάφορες έρευνες που έχουν γίνει όσον αφορά τους διάφορους γραμματισμούς, και τη συσχέτισή τους με τη μαθησιακή διαδικασία, διαμορφώθηκαν και τα ερευνητικά ερωτήματα του συγκεκριμένου άρθρου. Πιο συγκεκριμένα, εξετάζει κατά πόσο οι μελλοντικοί εκπαιδευτικοί μπορούν να εντάξουν την πολυτροπικότητα στη διδακτική πρακτική τους, αναπτύσσοντας πολυτροπικό εκπαιδευτικό υλικό. Επίσης, διερευνάται με βάση το εκπαιδευτικό υλικό που ανέπτυξαν, κατά πόσο οι μελλοντικοί εκπαιδευτικοί κατανοούν την έννοια της πολυτροπικότητας

και των πολυγραμματισμών όπως επίσης και κατά πόσο είναι έτοιμοι να διδάξουν την πολυτροπικότητα και τους πολυγραμματισμούς.

2. Μεθοδολογία

2.1 Δείγμα

Το δείγμα της έρευνάς μας αποτέλεσε το εκπαιδευτικό υλικό που ανέπτυξαν 45 μελλοντικοί εκπαιδευτικοί – φοιτητές του Τμήματος Δημοτικής Εκπαίδευσης του Πανεπιστημίου Frederick. Χρησιμοποιήθηκε το εκπαιδευτικό λογισμικό MMB¹ και οι εργασίες των μελλοντικών εκπαιδευτικών, που εκπονήθηκαν στα πλαίσια του μαθήματος της Εκπαιδευτικής Τεχνολογίας κατά το εαρινό εξάμηνο του 2010, αναλύθηκαν σε σχέση με τα κεντρικά ερευνητικά μας ερωτήματα (βλ. κεφ. 1).

2.2 Κριτήρια αξιολόγησης των γραμματισμών

2.2.1 Γλωσσικός γραμματισμός

Τα κριτήρια βάσει των οποίων διερευνήθηκε ο γλωσσικός γραμματισμός ήταν:

- 1) Σε τι βαθμό υπάρχει ουσιαστική και όχι επιφανειακή πολυτροπικότητα, δηλ. σε τι βαθμό μέσω των MMB projects παράγονται νοήματα (meanings) που για την κατανόησή τους απαιτείται ο συνδυασμός περισσότερων του ενός τρόπων (στην περίπτωσή μας, γλωσσικό κείμενο, εικόνα, ήχος);
- 2) Η ουσιαστική πολυτροπικότητα αφορά μόνο την παροχή των δεδομένων του μαθήματος στους μαθητές, ή και τα κείμενα τα οποία καλούνται να παράγουν οι μαθητές μέσω των διαφόρων δραστηριοτήτων;
- 3) Οι μαθητές καλούνται να συνθέσουν κείμενα που εκτός από πολυτροπικά, συνδέονται με συγκεκριμένες πλευρές ενός επικοινωνιακού πλαισίου; Με άλλα λόγια, κατά πόσο οι μελλοντικοί δάσκαλοι είχαν στο μυαλό τους να συνδυάσουν την αξιοποίηση της τεχνολογίας με την επικοινωνιακή/λειτουργική πλευρά της γλωσσικής διδασκαλίας (Χατζησαββίδης, 2003);

2.2.2 Ψηφιακός γραμματισμός

Τα κριτήρια που χρησιμοποιήθηκαν για την αξιολόγηση του ψηφιακού γραμματισμού ήταν κατηγοριοποιημένα σε 6 βασικές παραμέτρους όπως φαίνονται πιο κάτω. Ο ψηφιακός γραμματισμός αξιολογήθηκε επίσης σε σχέση με την επίτευξη των μαθησιακών στόχων που τέθηκαν και κατά πόσο η χρήση της τεχνολογίας προώθησε την επίτευξη των πιο πάνω. Την κάθε παράμετρο αποτελούσαν διάφορες υπο-παράμετροι με σκοπό την αποτελεσματικότερη αξιολόγηση των εργασιών. Συγκεκριμένα, οι 6 παράμετροι και ενδεικτικές υπο-παράμετροι είναι οι ακόλουθες:

- 1) Επεξεργαστής κειμένου (π.χ. εισαγωγή και μορφοποίηση κειμένου, εικόνας, γραφικών, πινάκων και σελίδων).
- 2) Λογιστικά Φύλλα Εργασίας (π.χ. εισαγωγή και μορφοποίηση δεδομένων σε ηλεκτρονικό φύλλο εργασίας· εισαγωγή και μορφοποίηση κειμένου, εικόνας, γραφικών, πινάκων σε ηλεκτρονικό φύλλο εργασίας· κατάλληλη χρήση φορμουλών και πράξεων· εισαγωγή και εξαγωγή δεδομένων).
- 3) Διαδίκτυο (π.χ. χρήση ηλεκτρονικού ταχυδρομείου, χρήση μηχανών αναζήτησης πληροφοριών με λέξεις κλειδιά· χρήση διαδικτυακών πηγών όπως εγκυκλοπαίδειες και βιβλιοθήκες· χρήση εργαλείων Διαδικτύου 2^{ης} γενιάς και κοινωνικών δικτύων).
- 4) Πρόγραμμα παρουσιάσεων και γραφικά (π.χ. δημιουργία παρουσίασης και εισαγωγή διαφανειών, εισαγωγή και μορφοποίηση κειμένου, εικόνων, γραφημάτων και πινάκων· εισαγωγή βίντεο και μουσικής· κίνηση διαφανειών).
- 5) Βασικές δεξιότητες λειτουργικού συστήματος (π.χ. δημιουργία, ονομασία και αποθήκευση αρχείων· αντιγραφή, αποκοπή και επικόλληση δεδομένων· ταυτόχρονη εργασία μεταξύ διαφόρων λογισμικών).
- 6) Ενσωμάτωση άλλων λογισμικών.

¹ Πρόκειται για ένα λογισμικό που δίνει τη δυνατότητα εύκολης δημιουργίας πολυμεσικών εφαρμογών και διαδραστικού εκπαιδευτικού υλικού (υποστηρίζοντας τη χρήση διαφόρων τύπων αρχείων εικόνας, ήχου, βίντεο, ιστοσελίδων) χωρίς να απαιτούνται από τους εκπαιδευτικούς ιδιαίτερες γνώσεις προγραμματισμού (Μαντζαρίδου, Ράπτης & Χαμπιαούρης 2009).

2.2.3 Οπτικός γραμματισμός

Τα κριτήρια που τέθηκαν σε σχέση με τον οπτικό γραμματισμό του εκπαιδευτικού υλικού που αναπτύχθηκε με το MMB αφορούσαν κυρίως τη δεξιότητα της οπτικοποίησης, που συνδέεται με τις δεξιότητες γνώσης οπτικού λεξιλογίου και οπτικών συμβάσεων. Έτσι, ουσιαστικά τα κριτήρια δεν αφορούν τις υπόλοιπες δεξιότητες, όπως είναι την κριτική θέαση οπτικών μηνυμάτων, την οπτική σκέψη, τον οπτικό συλλογισμό, την οπτική διάκριση, την οπτική αναδόμηση, τον οπτικό συσχετισμό και τη δόμηση και αναδόμηση νοήματος με εικόνες. Αρχικά θεωρήθηκε ότι λόγω της φύσης αυτών των δεξιοτήτων θα ήταν δύσκολο να καθοριστεί μέσα από το εκπαιδευτικό υλικό εάν οι δημιουργοί του υλικού τις είχαν επαρκώς ανεπτυγμένες (αυτό θα ήταν κάτι που θα μπορούσε να διερευνηθεί με άλλα μέσα, όπως είναι προσωπικές συνεντεύξεις) και επομένως εκείνο που επρόκειτο να αξιολογηθεί θα ήταν η ύπαρξη (ή μη) εργασιών προς παιδιά που θα τις προωθούν. Στη συνέχεια, όμως, κατά την πιλοτική δοκιμή των κριτηρίων διαπιστώθηκε η απουσία σχετικών δραστηριοτήτων για τα παιδιά από το εκπαιδευτικό υλικό και έτσι αποφασίστηκε ότι τα κριτήρια θα αφορούσαν μόνο μέρος των δεξιοτήτων του οπτικού γραμματισμού, με έμφαση στη δεξιότητα της οπτικοποίησης. Τα κριτήρια λοιπόν αφορούν κυρίως θέματα αισθητικής όσον αφορά την αποτελεσματική οπτικοποίηση πληροφοριών και είναι τα ακόλουθα:

- 1) Χρώματα: ποια χρώματα χρησιμοποιήθηκαν, κατά πόσο αυτά εμπίπτουν σε κάποια συγκεκριμένη κατηγορία που συμβολίζει κάτι (π.χ., κυρίως θερμά χρώματα), καθώς και η ένταση των χρωμάτων (τονισμοί και αποχρώσεις).
- 2) Χρήση εικόνων: ενσωμάτωση ή όχι εικόνων, λειτουργία εικόνων (διακοσμητική ή πληροφοριακή), αρμονία εικόνων (π.χ. διαστάσεις και αναλογία) και κατανομή/αναλογία εικόνας σε σχέση με τον ολικό χώρο.
- 3) Ενότητα της αισθητικής: συνοχή των διαφόρων οπτικών στοιχείων σε όλες τις σελίδες του MMB.
- 4) Απλότητα/περιπλοκότητα των οπτικών στοιχείων.
- 5) Ποικιλία οπτικών στοιχείων: εικόνες, χρώματα, χάρτες, βίντεο, γραμματοσειρά, μέγεθος και χρώματα λέξεων.

2.4 Διαδικασία

Όπως προαναφέρθηκε, το εκπαιδευτικό υλικό αναπτύχθηκε μέσα στα πλαίσια του μαθήματος της Εκπαιδευτικής Τεχνολογίας. Δόθηκαν οδηγίες προς τους φοιτητές όσον αφορά το περιεχόμενο, τις απαιτήσεις και το τι αναμενόταν να αναπτύξουν. Το εκπαιδευτικό υλικό που δημιουργήθηκε αξιολογήθηκε με βάση ομάδες κριτηρίων που αναπτύχθηκαν, μία για κάθε γραμματισμό. Τα κριτήρια αναπτύχθηκαν συνδυάζοντας τα πιο κάτω: 1) σχετική υφιστάμενη βιβλιογραφία, 2) άλλα υπάρχοντα κριτήρια αξιολόγησης, και 3) εμπειρία των ερευνητών.

Μετά την ολοκλήρωση των επιμέρους αξιολογήσεων ακολούθησε και μια συνολική αξιολόγηση του εκπαιδευτικού υλικού που αναπτύχθηκε, καθώς υπήρξε το αίσθημα ότι μερικές φορές κάποια στοιχεία δεν μπορούσαν να ενταχθούν απόλυτα στην κατηγορία ενός και μόνο γραμματισμού και επομένως υπήρχε ο κίνδυνος να παραβλεφθούν.

3. Αποτελέσματα

3.1 Ψηφιακός γραμματισμός

Βάσει των κριτηρίων που αναπτύχθηκαν για την αξιολόγηση του ψηφιακού γραμματισμού διαφάνηκε ότι οι εκπαιδευτικοί χρησιμοποίησαν το λογισμικό MMB για να αναπτύξουν μικρά ηλεκτρονικά βιβλία εργασίας στα πλαίσια διαφόρων γνωστικών αντικειμένων. Μέσα στα πλαίσια των δραστηριοτήτων που αναπτύχθηκαν, συνδυάστηκαν διάφορες λειτουργίες και δυνατότητες του MMB και, πιο συγκεκριμένα, εισαγωγή σελίδων, τίτλων, κειμένων και παραγράφων, κουμπιά σύνδεσης σελίδων, εισαγωγή και μορφοποίηση εικόνων καθώς και μορφοποίηση σελίδων, κειμένων και κουμπιών.

Επιπλέον, ενσωματώθηκαν λογισμικά σχετικά με την επεξεργασία κειμένου, τη δημιουργία παρουσιάσεων, τη χρήση λογιστικών φύλλων και την πλοήγηση στο διαδίκτυο, και ζητούνταν από τους μαθητές να τα χρησιμοποιήσουν για τη συμπλήρωση διαφόρων ασκήσεων.

Αναλυτικότερα, ο επεξεργαστή κειμένου MS Word συσχετίστηκε με ποικιλία δραστηριοτήτων όπως η συγγραφή κειμένων ή παραγράφων (91,1%), η εισαγωγή εικόνων ή/και αντικειμένων ή/και γραφημάτων σε ένα αρχείο κειμένου (60%) και η επεξεργασία εικόνων ή/και αντικειμένων ή/και γραφημάτων (57,8%).

Επίσης, σε αρκετές περιπτώσεις (περίπου 50%) οι μαθητές καλούνταν να εκτελέσουν τις πιο κάτω δραστηριότητες χρησιμοποιώντας το πρόγραμμα παρουσιάσεων MS Power Point: δημιουργία παρουσίασης (53,3%), εισαγωγή δεδομένων (53,3%), επεξεργασία εικόνων ή/και αντικειμένων ή/και γραφημάτων (53,3%) και αναπαραγωγή προβολής διαφανειών (51,1%).

Ακόμη, η χρήση του Διαδικτύου ενσωματώθηκε αρκετές φορές στις προτεινόμενες δραστηριότητες. Έτσι, οι μαθητές καλούνταν να: 1) βρουν πληροφορίες σε διαδικτυακές πηγές, όπως εγκυκλοπαίδειες, βιβλιοθήκες, εκπαιδευτικές και κυβερνητικές ιστοσελίδες και ηλεκτρονικούς καταλόγους (66,7%), 2) μεταφορτώσουν αρχείο από το διαδίκτυο (64,4%), και 3) παρακολουθήσουν βίντεο από το διαδίκτυο (51,1%).

Το τέταρτο λογισμικό που αξιοποιήθηκε σε μεγάλο βαθμό ήταν το λογιστικό φύλλο MS Excel. Σε σύγκριση με τα υπόλοιπα λογισμικά, το ποσοστό των μελλοντικών εκπαιδευτικών που ζήτησαν από τους μαθητές τους να χρησιμοποιήσουν λογιστικά φύλλα ήταν αρκετά μικρότερο, όπως και η ποικιλία των δραστηριοτήτων, αφού το μόνο που ζητήθηκε ήταν η εισαγωγή δεδομένων (17,8%). Επιπλέον, παρατηρήθηκε σχεδιασμός δραστηριοτήτων σχετικών με την ανάπτυξη βασικών δεξιοτήτων χειρισμού αρχείων και λογισμικών. Συγκεκριμένα, οι μαθητές καλούνταν να: 1) δημιουργήσουν αρχεία (80%), 2) αποθηκεύσουν αρχεία (86,7%), 3) αντιγράψουν και επικολλήσουν κείμενα, εικόνες, γραφικά, πίνακες, αντικείμενα (53,3%), και 4) εργαστούν παράλληλα μεταξύ δύο ή περισσότερων εφαρμογών (100%).

Τέλος, είναι σημαντικό να αναφερθούμε στη δυσκολία στην πλοήγηση του εκπαιδευτικού υλικού που παρατηρήθηκε. Συγκεκριμένα, η δυσκολία στην πλοήγηση που παρατηρήθηκε μπορεί να εξηγηθεί με την έννοια ότι ήταν συχνή η κουραστική ή/και εκνευριστική έλλειψη κουμπιών που να συνδέουν άμεσα το βασικό μενού με τις διάφορες σελίδες του αρχείου MMB, με αποτέλεσμα, προκειμένου κάποιος να πλοηγηθεί στο υλικό, να απαιτείται να χρησιμοποιεί πολλές φορές το κουμπί «πίσω».

3.2 Οπτικός γραμματισμός

Σε σχέση με την αξιολόγηση του οπτικού γραμματισμού καταγράφηκαν τα χρώματα που χρησιμοποιήθηκαν, καθώς είναι γενικά αποδεκτό ότι το χρώμα αποτελεί καθοριστικό στοιχείο της αισθητικής ενός οπτικού ερεθίσματος και κατ'επέκταση του οπτικού γραμματισμού. Σε όλες τις περιπτώσεις του εκπαιδευτικού υλικού που αναπτύχθηκε με το MMB, χρησιμοποιήθηκαν χρώματα. Σε καμία περίπτωση δεν υπήρξε υλικό που να μην έχει χρώμα (όπως μπορεί να συμβεί με ένα φύλλο εργασίας τυπωμένο σε χαρτί όπου απλώς χρησιμοποιείται το μαύρο μελάνι), κάτι που αποτελεί ένδειξη του έντονου ενδιαφέροντος για το αισθητικό αποτέλεσμα. Πιο συγκεκριμένα, όλες οι σελίδες του MMB είχαν χρώματα στο φόντο καθώς και όλες οι παρουσιάσεις που έγιναν με το λογισμικό PowerPoint. Αντίθετα, σε λίγα αρχεία κειμένου υπήρχε έγχρωμο φόντο. Αυτό αποτελεί ένδειξη ότι στην πλειοψηφία των εργασιών αναπαράχθηκε ο κυρίαρχος Λόγος σχετικά με την αισθητική συγκεκριμένων τύπων κειμένων.

Σε σχέση με την ένταση των χρωμάτων, παρατηρήθηκε ότι στις περισσότερες περιπτώσεις χρησιμοποιήθηκαν απαλά χρώματα (δηλαδή, ανοιχτοί τόνοι χρωμάτων). Στην πλειοψηφία τους αυτά τα χρώματα ήταν ψυχρά χρώματα (μπλε, μοβ και πράσινο), χρώματα που τις πλείστες φορές συνδέονται με το αίσθημα της ηρεμίας και της χαλαρότητας.

Αναφορικά με την χρήση εικόνων παρατηρήθηκε ότι υπήρξε έντονη ενσωμάτωση ψηφιακών εικόνων. Εικόνες ενσωματώθηκαν παντού, τόσο στις σελίδες του MMB όσο και στα αρχεία κειμένου. Στην πλειοψηφία τους οι εικόνες ήταν αρμονικές, με την έννοια ότι διατηρήθηκε η αναλογία των διαστάσεων τους (αναλογία πλάτους με μήκος) παρόλο που το μέγεθος της εικόνας (οπτικό μέγεθος / διαστάσεις και όχι ψηφιακό μέγεθος) τροποποιήθηκε με βάση τον διαθέσιμο χώρο που υπήρχε στη «σελίδα». Σε ελάχιστες περιπτώσεις οι διαστάσεις των εικόνων δεν ήταν αισθητικά ωραίες (δε διατηρήθηκε η αναλογία πλάτους/μήκους όταν τροποποιήθηκαν) ή ήταν χαμηλής ποιότητας (θαμπές, με χαμηλή ευκρίνεια).

Μία άλλη σημαντική διάσταση του οπτικού γραμματισμού είναι τα οπτικά μηνύματα που προβάλλονται μέσα από εικόνες, και επομένως η δυνατότητα προαγωγής της οπτικής σκέψης μέσω οπτικών ερεθισμάτων. Επομένως ένα από τα κριτήρια αξιολόγησης αποτέλεσε και η λειτουργία των εικόνων που ενσωματώθηκαν στο εκπαιδευτικό υλικό. Διαπιστώθηκε ότι στα αρχεία κειμένου και στις σελίδες του MMB οι εικόνες είχαν συνηθέστατα διακοσμητικό χαρακτήρα κι όχι πληροφοριακό. Αντίθετα, στις παρουσιάσεις PowerPoint η λειτουργία ήταν άλλοτε πληροφοριακή και άλλοτε διακοσμητική.

Γενικότερα θα πρέπει να τονιστεί ότι οι μελλοντικοί εκπαιδευτικοί προσπάθησαν να οπτικοποιήσουν το υλικό τους, καθώς υπήρχαν εικόνες σε όλες τις σελίδες του MMB και των αρχείων κειμένου όπως και σε αρκετές σελίδες των παρουσιάσεων σε PowerPoint. Στις δε περιπτώσεις των σελίδων του MMB και των αρχείων κειμένων οι εικόνες κάλυπταν ένα μεγάλο ποσοστό της επιφάνειας

της σελίδας. Στις σελίδες MMB ο αριθμός των εικόνων που εμφανίζονταν ήταν ποικίλος: από μία μέχρι και 10 μικρές εικόνες σε μια σελίδα MMB.

Κοιτάζοντας και αξιολογώντας συνολικά το εκπαιδευτικό υλικό σε σχέση με τα οπτικά του στοιχεία διαπιστώθηκε ότι:

α) δεν υπήρχε συνοχή των διαφόρων στοιχείων. Δηλαδή, η ύπαρξη όμοιων στοιχείων σε κάθε σελίδα του MMB (όπως για παράδειγμα το χρώμα του φόντου ή η τοποθέτηση της εικόνας σε συγκεκριμένο σημείο) ήταν συνήθως μικρή.

β) τα οπτικά στοιχεία δεν ήταν ιδιαίτερα αλλά, αντιθέτως, απλά, που καθιστούν συνήθως το υλικό εύκολο στη χρήση και πιθανότατα πιο κατάλληλο για μικρότερες ηλικίες.

γ) δεν υπήρχε μεγάλη ποικιλία οπτικών στοιχείων. Σε όλες τις περιπτώσεις υπήρχαν εικόνες, κείμενο και χρώματα, ενώ υπήρχαν και λίγοι σύνδεσμοι προς κινούμενη εικόνα, δηλαδή βίντεο (κυρίως από το youtube).

3.3 Γλωσσικός γραμματισμός

Η ουσιαστική πολυτροπικότητα εμφανίστηκε στο 72,2% των εργασιών που εκπονήθηκαν, και στο 53,4% των εργασιών χαρακτηριζε και τα κείμενα που καλούνταν να παράγουν οι μαθητές. Αξίζει να σημειωθεί ότι στο 47,6% των περιπτώσεων όπου δεν εκπληρώθηκε το αυτό το κριτήριο οι εργασίες που προβλεπόταν να ανατεθούν στους μαθητές, θα μπορούσαν να χαρακτηριστούν ως «ημιπολυτροπικές», με την έννοια ότι οι μαθητές έπρεπε να παραγάγουν ένα κείμενο σχολιάζοντας κάποιες εικόνες αλλά όχι να συνθέσουν ένα πολυτροπικό κείμενο όπου ο γλωσσικός τρόπος να συνδυάζεται με κάποιον άλλο τρόπο.

Είναι σαφές ότι τα κριτήρια του «γλωσσικού» γραμματισμού δεν είναι αμιγώς γλωσσικά αλλά βασίζονται σε μια προσέγγιση όπως αυτή που προτείνουν οι Kress & van Leeuwen (2001), που αποτελεί μια προσπάθεια διατύπωσης μιας πολυτροπικής θεωρίας της επικοινωνίας, που επιχειρεί να ερμηνεύσει συνολικά το φαινόμενο της σύγχρονης επικοινωνίας και όχι μόνο της γλώσσας ή των άλλων επιμέρους τρόπων χωριστά². Σε αντίθεση με τη σωσσυριανή παράδοση, που ορίζει τη γλώσσα ως σύστημα με ένα από τα κύρια χαρακτηριστικά της τη διπλή άρθρωση, οι Kress και van Leeuwen προτείνουν μια τετραπλή άρθρωση που οργανώνεται γύρω από τη διπλή διάκριση περιεχομένου (content) και έκφρασης (expression) της επικοινωνίας. Το περιεχόμενο επιμερίζεται στον Λόγο (Discourse) και το σχέδιο (design), ενώ η έκφραση στην παραγωγή (production) και τη διανομή (distribution).

Οι Λόγοι είναι κοινωνικά κατασκευασμένες γνώσεις για κάποια πτυχή της πραγματικότητας³, που δεν πραγματώνονται μόνο μέσω της γλώσσας αλλά και μέσω άλλων σημειωτικών συστημάτων. Με άλλα λόγια, όλοι οι διαθέσιμοι σημειωτικοί τρόποι (modes) σε κάποια κοινωνία μπορούν να χρησιμοποιηθούν ως σημειωτικοί πόροι για την άρθρωση Λόγων.

Το σχέδιο σχετίζεται με την επιλογή των κατάλληλων τρόπων, ανάλογα με τον εκάστοτε επικοινωνιακό στόχο. Ο ρόλος του είναι να οργανώσει αυτό που είναι να διατυπωθεί, σε έναν οδηγό για παραγωγή. Στην περίπτωση μας θα μπορούσαμε να θεωρήσουμε ως σχέδιο τα σχέδια μαθήματος που συνέταζαν οι μελλοντικοί εκπαιδευτικοί μας, όπου, μεταξύ άλλων, περιγράφουν την αξιοποίηση του υλικού που ανέπτυξαν με το MMB. Τα σχέδια βρίσκονται σε ένα αφηρημένο επίπεδο, μεταξύ περιεχομένου και έκφρασης και, επομένως, είναι ανεξάρτητα από τα μέσα υλοποίησης, αφού οι πόροι στους οποίους στηρίζονται, οι σημειωτικοί τρόποι, είναι σε αφηρημένο επίπεδο, και μπορούν να υλοποιηθούν με διαφορετικά υλικά.

Η υλοποίηση του σχεδίου σε πρακτικό επίπεδο αποτελεί την παραγωγή, που δε δίνει απλώς συγκεκριμένη μορφή στο σχέδιο αλλά προσθέτει και σημασία ή νόημα, π.χ. η χρήση ή όχι ηλεκτρονικών εφαρμογών για τη διαμόρφωση του μαθησιακού υλικού συχνά προσθέτει σημασία. Στην περίπτωση μας βασικό στοιχείο της παραγωγής είναι το ίδιο το εκπαιδευτικό υλικό που ανέπτυξαν οι μελλοντικοί εκπαιδευτικοί με τη χρήση του MMB. Τέλος, η διανομή είναι η από τεχνική άποψη επανεγγραφή των σημειωτικών προϊόντων ή γεγονότων.

² Βλ. και Κουτσογιάννης (2005).

³ Βλ., ενδεικτικά, Hodge & Kress (1988), Fairclough (2003) και Gee (2005).

3.4 Σχολιασμός ενδεικτικών παραδειγμάτων

Όπως αναφέρθηκε και στο κεφ. 2.1, όταν ολοκληρώθηκε η φάση των επιμέρους αξιολογήσεων με βάση τις ξεχωριστές για κάθε γραμματισμό ομάδες κριτηρίων, προβήκαμε και σε μια συνολική αξιολόγηση-θεώρηση των δεδομένων μας. Ακολουθεί η παράθεση και ο σχολιασμός ενδεικτικών παραδειγμάτων σχετικών με τα μαθήματα της Οικιακής Οικονομίας, της Γεωγραφίας και της Επιστήμης. Τα παραδείγματα επιλέχθηκαν με βάση τον βαθμό αλληλεπίδρασης των τριών γραμματισμών. Σε δύο από αυτά παρουσιάζεται ουσιαστική πολυτροπικότητα (εικ. 1, 5), σε ένα η πολυτροπικότητα είναι ελλιπής (εικ. 2) και σε ένα υποδεικνύεται μια «ημιπολυτροπική δραστηριότητα» (εικ. 3, 4).

Εικόνα 1 Παράδειγμα ουσιαστικής πολυτροπικότητας

Η εικόνα 1 αποτελεί ένα παράδειγμα ουσιαστικής πολυτροπικότητας, επειδή τα γλωσσικά τμήματα της εικόνας (πρόκειται για τους τίτλους των ενοτήτων εκπαιδευτικού υλικού σχετικά με την υγιεινή διατροφή) συνδέονται (το καθένα ξεχωριστά) με επιμέρους εικόνες που συμβάλλουν στην κατασκευή νοημάτων όσον αφορά το τι εννοεί η συντάκτρια του υλικού λέγοντας «Διατροφή και υγεία», «Διατροφική πυραμίδα» και «Μεσογειακή κουζίνα», π.χ. υγεία και διατροφή συνδέονται μεταξύ τους αν κάποιος φροντίζει να καταναλώνει χυμούς, φρούτα και λαχανικά. Το συνολικό νόημα που κατασκευάζεται (ιδιαίτερα με την αριστερή και τη δεξιά εικόνα) έχει να κάνει με εκείνο τον Λόγο περί υγιεινής διατροφής που τονίζει τη σημασία των φυτικών στοιχείων και όχι των ζωικών (θα μπορούσαμε να τον ονομάσουμε – τουλάχιστον εν μέρει - χορτοφαγικό Λόγο⁴). Ταυτόχρονα οι θεματικές παρουσιάζονται με ομοιόμορφο τρόπο: οι τρεις τίτλοι ενοτήτων στο άνω μέρος έχουν πράσινο πλαίσιο ενώ οι τρεις τίτλοι στο κάτω μέρος κόκκινο πλαίσιο. Επίσης οι διαστάσεις των εικόνων, η προσεχτική τοποθέτηση τους στο χώρο της σελίδας και η ικανοποιητική ποιότητα τους συμβάλλουν σε ένα απλό άλλα όμορφο και ξεκάθαρο αισθητικό αποτέλεσμα. Τέλος, οι διάφορες

⁴ Βλ. και Beardsworth & Keil (1997).

λειτουργίες και δυνατότητες του λογισμικού ενσωματώθηκαν σε μεγάλο βαθμό, έχοντας ως αποτέλεσμα το πιο πάνω παράδειγμα ουσιαστικής πολυτροπικότητας. Για παράδειγμα, οι μελλοντικοί εκπαιδευτικοί χρησιμοποίησαν την τεχνολογία για να ψάξουν και να επιλέξουν τις κατάλληλες εικόνες, να τις επεξεργαστούν και να τις μορφοποιήσουν αλλά και να τις τοποθετήσουν με σκοπό να δίνεται συγκεκριμένο νόημα. Ακόμη έγινε εισαγωγή και χρήση κουμπιών για μεταφορά σε άλλες σελίδες ή/και προγράμματα.

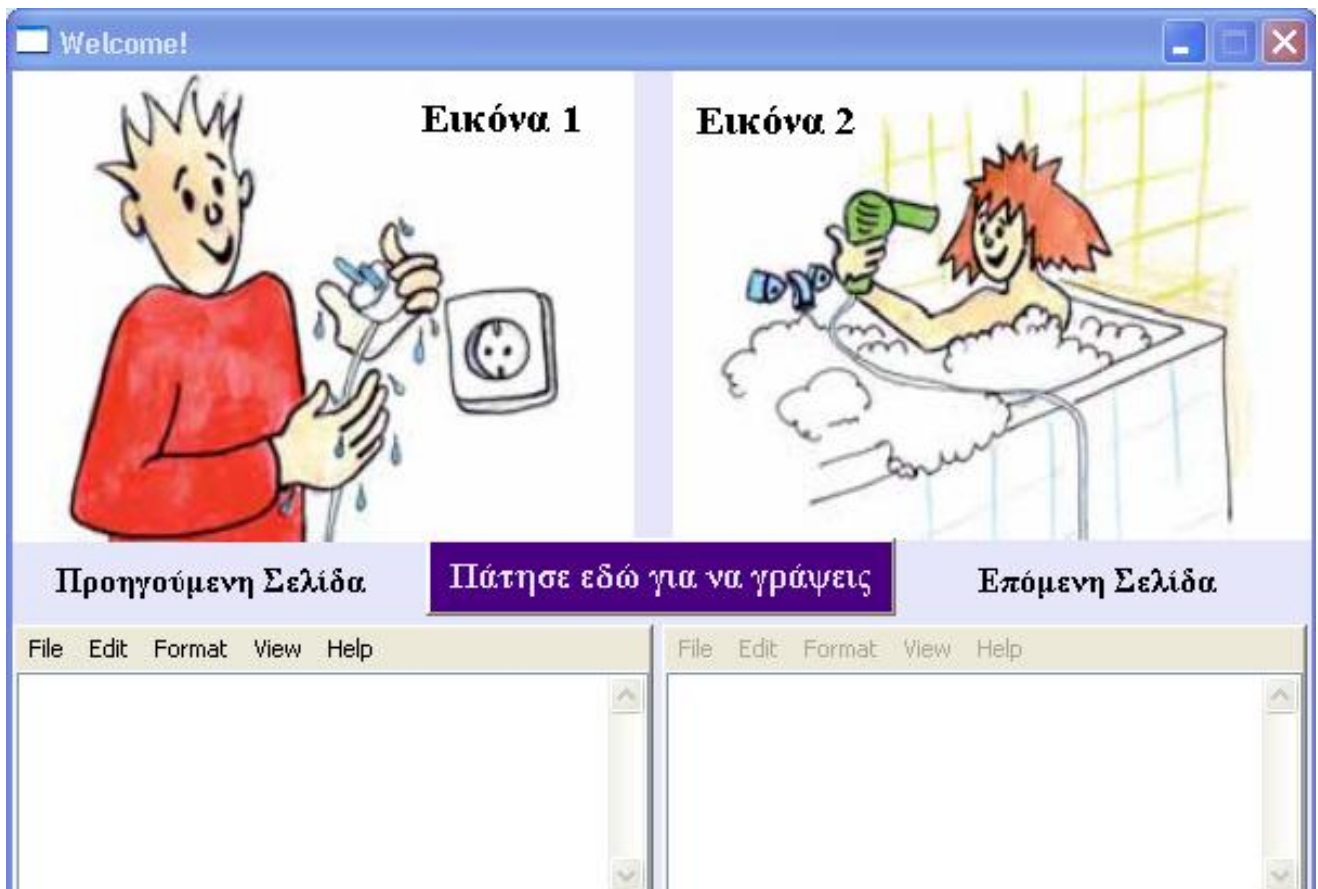

ΠΟΛΙΤΙΣΤΙΚΗ ΑΝΑΠΤΥΞΗ

- Η ΣΥΜΒΟΛΗ ΤΟΥ ΓΑΛΛΙΚΟΥ ΛΑΟΥ ΣΤΗΝ ΑΝΑΠΤΥΞΗ ΤΩΝ ΓΡΑΜΜΑΤΩΝ, ΤΩΝ ΤΕΧΝΩΝ ΚΑΙ ΤΩΝ ΕΠΙΣΤΗΜΩΝ ΗΤΑΝ ΠΟΛΥ ΣΗΜΑΝΤΙΚΗ.
- Η ΠΡΟΟΔΟΣ ΤΩΝ ΓΡΑΜΜΑΤΩΝ ΚΑΙ ΤΩΝ ΤΕΧΝΩΝ ΣΤΗ ΓΑΛΛΙΑ ΗΤΑΝ ΤΟΣΟ ΜΕΓΑΛΗ ΑΦΟΥ ΓΙΑ ΠΟΛΛΑ ΧΡΟΝΙΑ ΤΟ ΠΑΡΙΣΙ ΗΤΑΝ ΤΟ ΠΝΕΥΜΑΤΙΚΟ ΚΑΙ ΚΑΛΛΙΤΕΧΝΙΚΟ ΚΕΝΤΡΟ ΤΗΣ ΕΥΡΩΠΗΣ.
- ΣΕ ΠΟΛΛΑ ΜΟΥΣΕΙΑ ΚΑΙ ΠΙΝΑΚΟΘΗΚΕΣ ΠΟΥ ΥΠΑΡΧΟΥΝ ΣΤΗΝ ΧΩΡΑ ΕΚΘΕΤΟΥΝ ΘΑΥΜΑΣΙΑ ΔΕΙΓΜΑΤΑ ΤΗΣ ΠΛΟΥΣΙΑΣ ΠΟΛΙΤΙΣΤΙΚΗΣ ΤΟΥΣ ΠΑΡΑΔΟΣΗΣ.

Εικόνα 2 Παράδειγμα εντελώς επιφανειακής ή ουσιαστικά ανύπαρκτης πολυτροπικότητας

Στην εικόνα 2 η πολιτιστική ανάπτυξη της Γαλλίας συνδέεται εντελώς αόριστα με έναν πίνακα, δύο καλοντυμένες γυναίκες και έναν φωτογράφο. Πουθενά δεν υπάρχει ουσιαστική σχέση μεταξύ των εικόνων και της συμβολής του γαλλικού λαού στην πρόοδο των τεχνών και των γραμμμάτων ή η σχέση αυτή είναι τόσο ασαφής που και το όλο υπό κατασκευή νόημα να είναι πολύ γενικόλογο. Άλλωστε, ο Λόγος που απηχούν οι 2 από τις 5 εικόνες είναι αυτός μιας μαζικής κουλτούρας που συνδέει τη Γαλλία όχι τόσο με τις Καλές Τέχνες και τα Γράμματα όσο με τα επιτεύγματα στον τομέα της μόδας και της γυναικείας εμφάνισης. Επιπλέον, οι αναλογίες των διαστάσεων των εικόνων έχουν τροποποιηθεί, παραποιώντας τις εικόνες. Τέλος, δεν έγινε αποτελεσματική χρήση των λειτουργιών και δυνατοτήτων του λογισμικού. Έχουν χρησιμοποιηθεί, ανεπιτυχώς πολύ βασικά εργαλεία του λογισμικού. Παρά το ότι χρησιμοποιήθηκε η τεχνολογία για εξεύρεση εικόνων, δεν έγινε επιτυχής επιλογή, επεξεργασία και τοποθέτηση.

Εικόνα 3 Παράδειγμα «ημιπολυτροπικής» δραστηριότητας

Η εικόνα 3 προέρχεται από μια πολύ καλή εργασία που πληροί ικανοποιητικότητας το κριτήριο περί ουσιαστικής πολυτροπικότητας όσον αφορά το παρεχόμενο στους μαθητές υλικό. Παρ'όλα αυτά όλες οι προτεινόμενες δραστηριότητές της είναι «ημιπολυτροπικές», με την έννοια ότι, π.χ. περίπτωση της εικόνας 3 τα παιδιά καλούνται, έχοντας λάβει υπόψη τους ένα πολυτροπικό κείμενο (βλ. εικ. 4), απλώς να παραγάγουν γραπτό λόγο και όχι ένα δικό τους πολυτροπικό κείμενο όπου ο γλωσσικός τρόπος θα συνδυάζεται με κάποιον άλλο.

Εικόνα 4

Εικόνα 5 Παράδειγμα πολυτροπικής δραστηριότητας

Στην εικόνα 5 βλέπουμε μια πολυτροπική δραστηριότητα, με την έννοια ότι τα παιδιά καλούνται να συνδυάσουν τον γλωσσικό με τον οπτικό τρόπο και να συντάξουν μια διαφήμιση, κάτι που, επιπλέον, κάνει τη συγκεκριμένη δραστηριότητα να ανταποκρίνεται και στο κριτήριο περί επικοινωνιακής/λειτουργικής πλευράς της γλωσσικής διδασκαλίας. Τέλος, γίνεται αποτελεσματική χρήση της τεχνολογίας ως εργαλείο που είχε ως αποτέλεσμα τη δημιουργία πολυτροπικής δραστηριότητας. Για παράδειγμα, έγινε η κατάλληλη επιλογή, επεξεργασία και τοποθέτηση εικόνων και κειμένων, συνθέτοντας μια σελίδα η οποία χαρακτηρίζεται ως πολυτροπική-επικοινωνιακή.

8. Συζήτηση-συμπεράσματα

Το γεγονός ότι, ενώ η ουσιαστική πολυτροπικότητα εμφανίστηκε στο 72,2% των εργασιών, μόνο στις μισές σχεδόν εργασίες αυτή αφορούσε και τα κείμενα που καλούνταν να παράγουν οι μαθητές, ή και την επικοινωνιακή/λειτουργική διάσταση της γλωσσικής διδασκαλίας, αποτελεί σαφή ένδειξη ότι η πολυτροπικότητα δε συνοδεύεται απαραίτητα και από την ικανοποιητική αλλαγή όσον αφορά το πώς οι μελλοντικοί δάσκαλοι βλέπουν τη διδακτική πράξη σε σχέση με το σύγχρονο επικοινωνιακό τοπίο. Σίγουρα το MMB τους ώθησε να ασχοληθούν περισσότερο με την κατασκευή πολυτροπικών νοημάτων και ασκήσεων (έστω και ημιπολυτροπικών) αλλά σε αρκετές περιπτώσεις, παρά το γεγονός ότι ζήτησαν και από τους μαθητές να λειτουργήσουν «πολυτροπικά», εξακολούθησαν να κινούνται σε κάτι που έμοιαζε με το σχήμα που ο Κουτσογιάννης (2010) ονομάζει προσοφορά-ζήτηση(-σύνοψη), δηλ. στην αρχή δίνεται, συνήθως, κάποια πληροφορία (offering information), που στην περίπτωσή μας μπορεί να είναι ένα πολυτροπικό κείμενο (π.χ. εικόνα και γραπτός λόγος ή εικόνα και ήχος, π.χ. βίντεο) και στη συνέχεια ζητούνται πληροφορίες (demanding information) από τα παιδιά (π.χ. να επιλύσουν κάποια άσκηση). Δυστυχώς, σε όλες τις περιπτώσεις όπου τα παιδιά έπρεπε να αναζητήσουν κάποιες πληροφορίες από το διαδίκτυο, αυτό γινόταν με τη χρήση ηλεκτρονικών διευθύνσεων που ήταν εκ των προτέρων καθορισμένες από τον διδάσκοντα, κάτι που σημαίνει ότι το MMB απλώς υποκαθιστούσε τις δύο ή τρεις (έντυπες) πηγές που θα χρησιμοποιούσαν έτσι κι αλλιώς τα παιδιά προκειμένου να κάνουν μια εργασία.

Εξάλλου, η σύγκριση των ποσοστών του κριτηρίου της ύπαρξης ουσιαστικής πολυτροπικότητας στο υλικό που παρέχεται στους μαθητές και του κριτηρίου της ουσιαστικής πολυτροπικότητας όσον αφορά το υλικό που καλούνται να παράγουν οι μαθητές βάσει των δραστηριοτήτων που τους ανατίθενται, δείχνει ότι, ενώ οι μελλοντικοί μας δάσκαλοι, ζώντας ήδη σε έναν πολυτροπικό κόσμο με πολλούς γραμματισμούς, έχουν αναπτύξει διάφορες πλευρές αυτών των γραμματισμών, δεν έχουν ακόμα εξοικειωθεί ικανοποιητικά με την «πολυτροπική» δυνατότητα συνδυασμού τους σε επίπεδο διδακτικής πράξης. Ενδεικτικός για τα παραπάνω είναι ο μεγάλος αριθμός «ημιπολυτροπικών» ασκήσεων, δηλ. ασκήσεων όπου οι μαθητές έπρεπε να παραγάγουν ένα κείμενο σχολιάζοντας κάποιες εικόνες αλλά όχι να κατασκευάσουν ένα πολυτροπικό κείμενο όπου ο γλωσσικός τρόπος να συνδυάζεται με κάποιον άλλο τρόπο. Δυστυχώς, με αυτόν τον τρόπο δε γίνεται αξιοποίηση του ότι, σύμφωνα με έρευνες οι κατά κανόνα πολυτροπικές εξωσχολικές πρακτικές γραμματισμού των παιδιών είναι εξαιρετικά δημιουργικές (Beavis, Nixon & Atkinson, 2005). Τέλος, το 52,2% όσον αφορά το κριτήριο της επικοινωνιακής/λειτουργικής πλευράς της γλωσσικής διδασκαλίας δείχνει ότι σε οκτώ περιπτώσεις στους μισούς μελλοντικούς δασκάλους η πολυτροπικότητα δε σημαίνει απαραίτητα και επικοινωνιακή προσέγγιση της διδασκαλίας. Με άλλα λόγια, η πολυτροπικότητα δε συνδέεται οπωσδήποτε με τη μη αποπλαισιωμένη αντιμετώπιση της γλώσσας.

Με βάση τα πιο πάνω μπορεί να υποστηριχθεί ότι οι μελλοντικοί εκπαιδευτικοί είναι σε θέση να εντάξουν την πολυτροπικότητα στη διδακτική τους πρακτική και να δημιουργήσουν πολυτροπικό υλικό, αλλά όχι σε απόλυτα ικανοποιητικό βαθμό. Χρειάζονται αρκετή εκπαίδευση ακόμη, όμως έχουν τις απαραίτητες γνώσεις, δεξιότητες και υπόβαθρο. Φαίνεται να κατανοούν την έννοια της πολυτροπικότητας και των πολυγραμματισμών, δεδομένου ότι κατάφεραν να δημιουργήσουν πολυτροπικό εκπαιδευτικό υλικό. Παρ' όλα αυτά δυσκολεύτηκαν να δημιουργήσουν δραστηριότητες όπου να ζητούν από τους μαθητές τους να δημιουργήσουν πολυτροπικό υλικό με σκοπό την ανάπτυξη πολυγραμματισμών και δυσκολεύτηκαν να εφαρμόσουν τις 2 πιο πάνω έννοιες όσον αφορά το τι ζητούσαν από τους μαθητές. Γενικά, θεωρούμε ότι ακόμη δεν είναι πλήρως έτοιμοι να διδάξουν την πολυτροπικότητα και τους πολυγραμματισμούς. Χρειάζονται περισσότερη εκπαίδευση και εμπειρία όσον αφορά την ενσωμάτωση και διδακτική των δύο πιο πάνω εννοιών στην εκπαιδευτική πράξη.

Τα συμπεράσματα αυτής της έρευνας βασίζονται κυρίως στο εκπαιδευτικό υλικό που ανέπτυξαν οι μελλοντικοί εκπαιδευτικοί με ένα λογισμικό που επιτρέπει και μάλιστα ενθαρρύνει την ανάπτυξη πολυτροπικού υλικού. Στην παρούσα έρευνα, επικεντρωθήκαμε στο εκπαιδευτικό υλικό που ανέπτυξαν οι μελλοντικοί εκπαιδευτικοί και έμμεσα μελετήθηκαν οι απόψεις τους για αυτό που τους ζητήθηκε να δημιουργήσουν, κάτι που μελλοντική έρευνα σκοπεύει να συμπεριλάβει (π.χ. προσωπικές

συνεντεύξεις ή/και ομάδες συζητήσεων) καθώς θα επιτρέψει την περεταίρω διερεύνηση των θεμάτων που εγέρθηκαν από την παρούσα έρευνα. Όπως για παράδειγμα, γιατί, ενώ σε διάφορα μαθήματα διδασκαλίας της γλώσσας, έχει γίνει αναλυτικά λόγος για την επικοινωνιακή προσέγγιση, σε πολλές περιπτώσεις έλειπε αυτή η πλευρά από τις ασκήσεις που ανατίθονταν στους μαθητές.

9. Επίλογος

Σύμφωνα με τον U. Eco “Η ανθρωπότητα για αιώνες προχώρησε προς τα μπρος διαβάζοντας και γράφοντας [...]. Όταν ανακάλυψαν ότι μπορούσαν να δένουν μεταξύ τους τα φύλλα [...] ποτέ πια δεν μπόρεσαν να απαρνηθούν αυτό το θαυμαστό εργαλείο”. Σε μια εποχή όπου κυριαρχεί η πολυμεσική και πολυτροπική κειμενική παραγωγή και όπου ζητάμε από τους δασκάλους να αξιοποιήσουν τις δυνατότητες που προσφέρουν οι ΤΠΕ, εργαλεία όπως το MMB τους δίνουν τη «θαυμάσια» δυνατότητα να «δέσουν» εύκολα, γρήγορα αλλά και δημιουργικά διάφορες δραστηριότητες και κάθε λογής υλικά σε ενιαία κείμενα προσφέροντας στους μαθητές κάτι που συνδυάζει, από τη μια πλευρά, στοιχεία από το ΤΠΕ περιβάλλον μέσα στο οποίο μεγαλώνουν, και, από την άλλη, εκείνες τις προσεγγίσεις που θέλουν τον γραμματισμό να αναπτύσσεται και μέσα και από την «ανάγνωση» σύνθετων και μη αποπλαισιωμένων κατασκευών νοήματος⁵.

themistocleous@gmail.com

ABSTRACT

This study examines the Cypriot Greek nuclear pitch accents. Specifically, it examines the tonal representation of narrow information focus, broad focus, contrastive focus, and contrastive topic. For this purpose, an experiment has been designed in which four distinct contexts have been devised in order to elicit utterances with different information structure categories. The experiment examined whether the information structure categories are associated with categorically distinct nuclear pitch accents. The results showed no effect of the information structure categories on the realization of the nuclear pitch accents. However, secondary cues from segmental duration distinguish narrow foci from broad focus. These results, which underline a division of labor between phonological structure and meaning interpretation, are difficult to accommodate in models that directly associate meaning to tonal categories.

Λέξεις Κλειδιά: πυρηνικά τονικά ύψη, κυπριακή ελληνική, επιτονισμός, εστία, θέμα

1. Εισαγωγή

Η παρούσα μελέτη εξετάζει την παραγωγή των πυρηνικών τονικών υψών της Κυπριακής Ελληνικής (στο εξής ΚΕ). Συγκριμένα, εξετάζεται η ευθυγράμμιση και η κλιμάκωση των πυρηνικών τονικών υψών σε περιβάλλοντα στα οποία δηλώνονται διαφορετικές κατηγορίες εστίας, όπως ευρεία εστία, στενή εστία πληροφωρίας, στενή αντιθετική εστία και στενό αντιθετικό θέμα.

Ο επιτονικός περίγυρος αποτελείται από αφηρημένες κατηγορίες τα *τονικά γεγονότα* (tonalevents), τα οποία διακρίνονται περαιτέρω στα *τονικά ύψη* (pitchaccents), στους *τόνους φράσης* (phraseaccents) και στους *τόνους ορίου* (boundarytones) (G. Bruce, 1977; J. B. Pierrehumbert & M. E. Beckman, 1988; J. B. Pierrehumbert, 1980; Pierrehumbert & Beckman, 1986). Τα τονικά ύψη συνδέονται με τις προβεβλημένες συλλαβές του εκφωνήματος, οι οποίες δυνάμει μπορούν να λάβουν λεξικό τονισμό· χωρίς να προϋποτίθεται ισομορφική σχέση ανάμεσα στα επιτονικά ύψη και στις τονισμένες συλλαβές. Οι τόνοι φράσης (T-) δηλώνουν το δεξιό άκρο των *ενδιάμεσων φράσεων* (εφ) (πβ. Pierrehumbert & Beckman, 1986; Pierrehumbert & Hirschberg, 1990) και οι τόνοι ορίου (T%) τα όρια των *επιτονικών φράσεων* (ΕΦ).

Τα πυρηνικά τονικά ύψη της νέας ελληνικής (στο εξής ΚΝΕ) είναι σύμφωνα με την τρέχουσα ανάλυση (βλ. A. Arvaniti & M. Baltazani, 2005) τα ακόλουθα: ένα υψηλό τονικό ύψος (H*), ένα χαμηλό τονικό ύψος (L*) και δύο δίτονα ύψη (L+H*, H*+L)¹. Το H* χρησιμοποιείται σύμφωνα με τις Amalia Arvaniti και Mary Baltazani (2005) για τη δήλωση ευρείας εστίας σε καταφάσεις. Σε αυτές τις περιπτώσεις το τελευταίο συστατικό του εκφωνήματος είναι το πλέον προβεβλημένο (Avesani & Vayra, 2003· Ball, 2002· Baltazani, 2003· Erteschik-Shir, 1999, 2007· Shattuck-Hufnagel & Turk, 1996). Το L+H*, δηλώνει την παρουσία αντιθετικής εστίας ή εστίας σε μη τερματικές θέσεις στην επιτονική φράση, ενώ το H*+L υποδηλώνει ότι αυτό που εκφράζει η απάντηση θα έπρεπε να είναι προφανές στον ακροατή (Arvaniti, 2007). Το προπυρηνικό τονικό ύψος αποτελείται από ένα χαμηλό τόνο που ευθυγραμμίζεται με την τονισμένη συλλαβή και ένα υψηλό τόνο (L*+H) (Amalia Arvaniti & Mary Baltazani, 2005· Arvaniti, Ladd, & Mennen, 1998). Η νέα ελληνική διαθέτει τρεις φραστικούς τόνους, που δηλώνουν το όριο της ενδιάμεσης φράσης ένα υψηλό τόνο φράσης (H-), ένα χαμηλό τόνο φράσης (L-) και ένα υψηλό καταβαίνοντα τόνο φράσης (IH) για τη δήλωση των ενδιάμεσων μελωδιών (Amalia Arvaniti & Mary Baltazani, 2005). Ανάλογα, για τη δήλωση των ορίων της ΕΦ υπάρχουν τρεις τόνοι ορίου, ένας υψηλός (H%), ένας χαμηλός (L%) και ένας καταβαίνων τόνος ορίου (IH%). Ο

¹Το αστεράκι δηλώνει τον τόνο που συνδέεται φωνολογικά με την τονισμένη συλλαβή του εκφωνήματος.

συνδυασμός των τόνων φράσης και των τόνων ορίου στο τέλος της ΕΦ, δημιουργεί σύνθετα μελωδικά σχήματα. Το διάστημα μεταξύ δύο στόχων θεωρείται φωνολογικά ακαθόριστο και πραγματώνεται από μηχανισμούς παρεμβολής (interpolation) (βλ. J. B. Pierrehumbert, 1980).

Τα τονικά ύψη ορίζονται τοπικά σύμφωνα με το σχετικό τους ύψος, που καλείται κλιμάκωση (scaling) και την χρονική τους τοποθέτηση ή ευθυγράμμιση (alignment) σε σχέση με το επίπεδο των τεμαχίων (δηλ. τα φωνήεντα και τα σύμφωνα) και με τα όρια των φωνολογικών τομέων (Gussenhoven, 2004· Ladd, 2008· Prieto, 1998). Η σημασία της ευθυγράμμισης είχε ήδη επισημανθεί από τον Bruce (1977) στην εξέταση του επιτονισμού στη Σουηδική της Στοκχόλμης. Ο Bruce έδειξε ότι η ακριβής ευθυγράμμιση των τονικών υψών επιτρέπει τη διάκριση ανάμεσα στην οξεία, όπως λ.χ. στη λέξη *stégen* 'σκαλοπάτια' και στη βαρεία, λ.χ. στη λέξη *stègen* 'σκάλα'. Οι αναλύσεις αυτές του Bruce (1977) είχαν σημαντική επίδραση σε μελέτες διαφόρων γλωσσών, όπως λ.χ. η αμερικάνικη αγγλική και η ελληνική (Arvaniti et al., 1998· Arvaniti, Ladd, & Mennen, 2006· Botinis, 1989, 1998· Dilley, Ladd, & Schepman, 2005· Pierrehumbert, 1993, 2000· Pierrehumbert & Steele, 1989).

Έχει διεξαχθεί σημαντική έρευνα στον επιτονισμό της ΚΝΕ, ωστόσο ελάχιστη έρευνα έχει διεξαχθεί στις διαλεκτικές ποικιλίες της ελληνικής (Arvaniti, 1998· Grice, Ladd, & Arvaniti, 2000· Themistocleous, 2011· Θεμιστοκλέους & Κυριάκου, 2010). Σε αυτή την μελέτη εξετάζεται η παραγωγή των πυρηνικών τονικών υψών στην κυπριακή ελληνική.

Ήδη προηγούμενες μελέτες έχουν δείξει ότι η ΚΕ συμπεριφέρεται διαφορετικά σε ορισμένες πτυχές του επιτονισμού από την ΚΝΕ. Ειδικότερα, η Arvaniti (1998) καθώς και οι Grice, Ladd και Arvaniti (2000) έδειξαν ότι τα φραστικά τονικά ύψη της ΚΕ διαφοροποιούνται ως προς την ευθυγράμμισή τους από αυτά της ΚΝΕ. Τα κυπριακά φραστικά ύψη ευθυγραμμίζονται με τη λήγουσα, όπως και τα ογγρικά φραστικά ύψη. Αντίθετα, τα φραστικά ύψη της ΚΝΕ εξαρτώνται από την θέση της τονισμένης συλλαβής.

Εκτός από τον επιτονισμό, η ΚΕ διαφοροποιείται από την ΚΝΕ και στην έκφραση της πληροφοριακής δομής. Η ΚΕ αξιοποιεί συντακτικά την απόσχιση (clefting) για την δήλωση της εστίας, όχι όμως η ΚΝΕ (Grohmann, Panagiotidis, & Tsiplakou, 2006· Tsiplakou, Panagiotidis, & Grohmann, 2007). Μάλιστα είναι δυνατόν η ΚΕ να παρουσιάζει διαφοροποιήσεις από την ΚΝΕ και ως προς την δήλωση των θεμάτων (Themistocleous, 2012). Σύμφωνα με τα προηγούμενα, τίθενται τα ακόλουθα ερωτήματα:

(α) Σε ποιο βαθμό διαφοροποιείται η ευθυγράμμιση και η κλιμάκωση των πυρηνικών τονικών υψών της ΚΕ όταν εκφράζουν ευρεία εστία, στενή εστία πληροφορίας, στενή αντιθετική εστία και αντιθετικό θέμα;

(β) Σε ποιο βαθμό διαφοροποιείται η διάρκεια της τονισμένης συλλαβής των συστατικών ανάλογα με την εστιακή κατηγορία που εκφράζουν: ευρεία εστία, στενή εστία πληροφορίας και στενή αντιθετική εστία;

2. Μεθοδολογία

2.1 Μετέχοντες

Πέντε γυναίκες ομιλήτριες, πέντε άντρες ομιλητές της ΚΕ από την Λευκωσία είχαν λάβει μέρος στην ηχογράφηση. Όλοι οι ομιλητές ήταν φοιτητές στο Πανεπιστήμιο Κύπρου· είχαν περίπου την ίδια ηλικία δηλ. 18 και 22 χρονών και δεν είχαν κανένα πρόβλημα στην ακοή ή στην άρθρωση.

2.2 Ακουστικό υλικό

Σύμφωνα με τα πειραματικά ερωτήματα, παρήχθη τονική κορύφωση σε τέσσερα διαφορετικά περιβάλλοντα στα οποία εκφράζονταν διαφορετικές κατηγορίες εστίας: ευρεία εστία, στενή εστία πληροφορίας και στενή αντιθετική εστία όπως παρουσιάζεται στο (1)

(1)

α. Ευρεία εστία:

- Τι συμβαίνει;
- [διαλέγει βελόνια]Ε.

β. Στενή αντιθετική εστία:

- Μου είπαν ότι η Μελίνα διαλέγει νήματα.
- Όχι, διαλέγει [βελόνια]Ε.

- γ. Στενή εστία πληροφορίας
 -Τι διαλέγει η Μελίνα;
 -Διαλέγει[βελόνια]Ε.
- δ. Αντιθετικό θέμα
 -Τι διαλέγει η Μελίνα βελόνια ή νήματα;
 -Διαλέγει [βελόνια]Ε.

Σχετικά περιβάλλοντα διατυπώθηκαν για τις σαράντα διαφορετικές λέξεις κλειδιά που παρουσιάζονται στον Πίνακα 1.

Βελόνι	Βολίδα	Γαλόνι	δαμάλι	καλάμι
Καμίνι	Κανάλια	Κανέλλα	κανόνι	κοιλιάδα
κουνέλι	Κυδώνι	Λαδάκι	Λαλιώτη	μονάρι
λιβάδι	Μανώλη	Μαρίνα	μελάνι	Μελίνα
Λιμάνι	Μπαλόνι	Ντομάτα	παλάμη	Πολίνα
Μονάδα	Μονάδα	Σαλάτα	Σαλώμη	Σελίνη
Σαλάμι	Φανέλα	Σελίδα	καλύβα	πανάκι
Σαλόνι	Καλύβια	Κονάκια	λεμόνι	μολύβι

Πίνακας 1 Τρισύλλαβες λέξεις-κλειδιά αποτελούμενες από ακολουθίες ΣΦ, με δυναμικό τονισμό στην παραλήγουσα

Επιλέχθηκαν λέξεις που είχαν στην τονισμένη συλλαβή ένα ηχηρό φθόγγο κατά προτίμηση έρρινο ή πλευρικό προσεγγιστικό, καθώς αυτό επιτρέπει την καλύτερη διάκριση της επιτονικής κίνησης. Τέλος, σχηματίστηκαν προτάσεις με τη χρήση των ακόλουθων ρημάτων: *διανέμει* και *διαλέγει* όπως τα ακόλουθα στο (2).

(2)

1. διανέμει βελόνια
2. διαλέγει καμίνια
3. διαλέγει κουνέλια

Ο συνολικός αριθμός εκφωνημάτων που παρήχθησαν για τους σκοπούς του πειράματος ήταν 4800 εκφωνήματα (10 ομιλητές \times 40 λέξεις κλειδιά \times 4 κατηγορίες πληρ. δομής \times 3 επαναλήψεις). Δεν αφαιρέθηκαν εκφωνήματα με βάση κριτήρια ορθής ή λανθασμένης παραγωγής.

2.3 Διαδικασία

Οι ηχογραφήσεις έγιναν σε άηχο δωμάτιο στο Πανεπιστήμιο Κύπρου. Για την εκμαίευση κατά το δυνατόν φυσικών παραγωγών, φτιάχτηκαν σύντομες ιστορίες που αποτέλεσαν το περιεχόμενο της εκφώνησης. Οι ιστορίες ήταν προσαρμοσμένες στην ΚΕ. Συγκεκριμένα, οι ιστορίες συνοδεύονταν από σχετικές εικόνες, έτσι για το (1) το περιβάλλον είχε την ακόλουθη μορφή (βλ. (3)):

(3)

Η Μελίνα ε σπίτι της και θκιαλέει βελόνια για να σάσει ένα σχίσμένο φόρεμα.

Το (3) αποδίδεται στην ΚΝΕ ως εξής «Η Μελίνα είναι στο σπίτι της και διαλέγει βελόνια για να φτιάξει ένα σκισμένο φόρεμα». Μια συνεργάτιδα, φυσική ομιλήτρια της ΚΕ διατύπωσε τις ερωτήσεις (βλ. (1)). Αφού ολοκληρώνονταν δέκα περιβάλλοντα εκφωνήσεων ακολουθούσε παύση τριών λεπτών. Αν οι ομιλητές έκαναν κάποιο λάθος ή υπήρχε κάποιος θόρυβος στο περιβάλλον, η συνεργάτιδα ζητούσε από τον ομιλητή να επαναλάβει το εκφώνημα.

Το ακουστικό υλικό τεμαχιοποιήθηκε σε φθόγγους και σε συλλαβές από τον συγγραφέα, στη συνέχεια εντοπίστηκαν οι τονικοί στόχοι. Η τεμαχιοποίηση ακολούθησε τα καθιερωμένα κριτήρια ανάλυσης που προτείνονται από τους Peterson και Lehiste (1960) καθώς επίσης και από τις οδηγίες που προτείνουν οι Turk, Nakai και Sugahara (2006).

Οι μετρήσεις, που ακολούθησαν την τεμαχιοποίηση, έγιναν σε σχέση με το τοπικό ελάχιστο (local minimum) της επιτονικής καμπύλης και το τοπικό μέγιστο (local maximum), τα οποία αποτελούν σημεία σημαντικής αλλαγής της επιτονικής καμπύλης από την έμβαση της συλλαβής, τον αρχή και το τέλος του πυρήνα της τονισμένης συλλαβής. Επίσης, υπολογίστηκαν οι τιμές διάρκειας στην τονισμένη συλλαβή.

3. Αποτελέσματα

Τα αποτελέσματα της ανάλυσης παρουσιάζονται στην συνέχεια. Αρχικά παρουσιάζεται ο επιτονικός περίγυρος στα εκφώνηματα στα οποία εκφράζεται *ευρεία εστία*, *στενή αντιθετική εστία*, *στενή εστία πληροφορίας* και *αντιθετικό θέμα*. Ακολούθως παρουσιάζονται περιγραφικά στατιστικά για κάθε εστιακή κατηγορία.

Η μελωδική παραγωγή για το εκφώνημα «διαλέγει βελόνια» με ευρεία εστία παρουσιάζεται στην Εικόνα 1.

Εικόνα 1 Παραγωγή της ευρείας εστίας στο εκφώνημα «διαλέγει βελόνια» από άντρα ομιλητή της ΚΕ

Υπάρχουν δύο επιτονικά ύψη στο εκφώνημα, ένα τονικό ύψος στην λέξη «διαλέγει» [θca'lei] και ένα πυρηνικό τονικό ύψος στη λέξη «βελόνια» [ve'lonɐ]. Ειδικότερα, το προπυρηνικό τονικό ύψος αποτελείται από ένα τοπικό ελάχιστο (local minimum) το οποίο ευθυγραμμίζεται με την αρχή της τονισμένης συλλαβής και ένα τοπικό μέγιστο που ευθυγραμμίζεται με την αρχή του πρώτου φωνήεντος της λέξης «βελόνια». Από αυτό το σημείο, ο μελωδικός περίγυρος χαμηλώνει σε ένα τοπικό ελάχιστο στο τέλος του πρώτου φωνήεντος της λέξης «βελόνια». Στην συνέχεια, ο μελωδικός περίγυρος ανεβαίνει και κορυφώνεται στο τέλος της τονισμένης συλλαβής. Τέλος, η θεμελιώδης συχνότητα ολοκληρώνει την κίνησή της σε ένα τοπικό χαμηλό ελάχιστο, που συνιστά το πιο χαμηλό σημείο της παραγωγής.

Στην Εικόνα 2. παρουσιάζεται η παραγωγή με αντιθετική εστία για το εκφώνημα «διαλέγει βελόνια»:

Εικόνα 2 Δήλωση αντιθετικής εστίας στο εκφώνημα «όχι, διαλέγει βελόνια» από άντρα ομιλητή της ΚΕ

Αυτή παραγωγή, σε αντίθεση με το προηγούμενο εκφώνημα, αρχίζει με μια πρώτη ενδιάμεση φράση «όχι» [oi], που αποτελείται από ένα υψηλό τονικό ύψος στο πρώτο μέρος της διφθόγγου. Στη συνέχεια, ακολουθεί μια πτώση και μια άνοδος της θεμελιώδους συχνότητας. Από το σημείο κορύφωσης της ανόδου αρχίζει και πάλι μια πτώση της συχνότητας σε ένα τοπικό ελάχιστο που αποτελεί και τον πρώτο στόχο του προπυρηνικού τονικού ύψους. Συγκεκριμένα, το προπυρηνικό τονικό ύψος αρχίζει με ένα τοπικό ελάχιστο (local minimum) το οποίο ευθυγραμμίζεται με την αρχή της τονισμένης συλλαβής της λέξης «διαλέγει» και ολοκληρώνεται σε ένα τοπικό μέγιστο στο δεύτερο μισό του τελευταίου φωνήεντος της λέξης.

Η θεμελιώδης συχνότητα κινείται από αυτό το σημείο καθοδικά σε ένα τοπικό χαμηλό ελάχιστο, που συνιστά τον πρώτο στόχο του πυρηνικού τονικού ύψους. Ακολούθως, η θεμελιώδης συχνότητας ανεβαίνει σε ένα τοπικό μέγιστο στην αρχή του τονισμένου φωνήεντος και διατηρεί μια επίπεδη κορυφή σε όλη τη διάρκεια του τονισμένου φωνήεντος. Στη συνέχεια, από το τέλος του φωνήεντος αρχίζει μια καθοδική κίνηση σε ένα τοπικό ελάχιστο.

Στην Εικόνα 3 παρουσιάζεται η παραγωγή της στενής εστίας πληροφορίας.

Εικόνα 3 Παραγωγή στενής εστίας πληροφορίας στο εκφώνημα «διαλέγει βελόνια» από άντρα ομιλητή της ΚΕ

Η παραγωγή στενής εστίας πληροφορίας είναι όμοια με την παραγωγή αντιθετικής εστίας. Το προπυρηνικό τονικό ύψος αρχίζει με ένα τοπικό ελάχιστο (local minimum) το οποίο ευθυγραμμίζεται με την αρχή της τονισμένης συλλαβής της λέξης «διαλέγει» και ολοκληρώνεται σε ένα τοπικό μέγιστο στο δεύτερο μισό του τελευταίου φωνήεντος της λέξης. Η θεμελιώδης συχνότητα κινείται από αυτό το σημείο καθοδικά σε ένα τοπικό ελάχιστο, που συνιστά τον πρώτο στόχο του πυρηνικού τονικού ύψους. Ακολούθως, η θεμελιώδης συχνότητας ανεβαίνει σε ένα τοπικό μέγιστο στην αρχή του τονισμένου φωνήεντος και διατηρεί μια επίπεδη κορυφή σε όλη τη διάρκεια του τονισμένου φωνήεντος. Από το τέλος του φωνήεντος αρχίζει μια καθοδική κίνηση μέχρι και το τέλος του εκφωνήματος.

Στην Εικόνα 4 παρουσιάζεται παραγωγή του στενού αντιθετικού θέματος στο εκφώνημα «διαλέγει βελόνια».

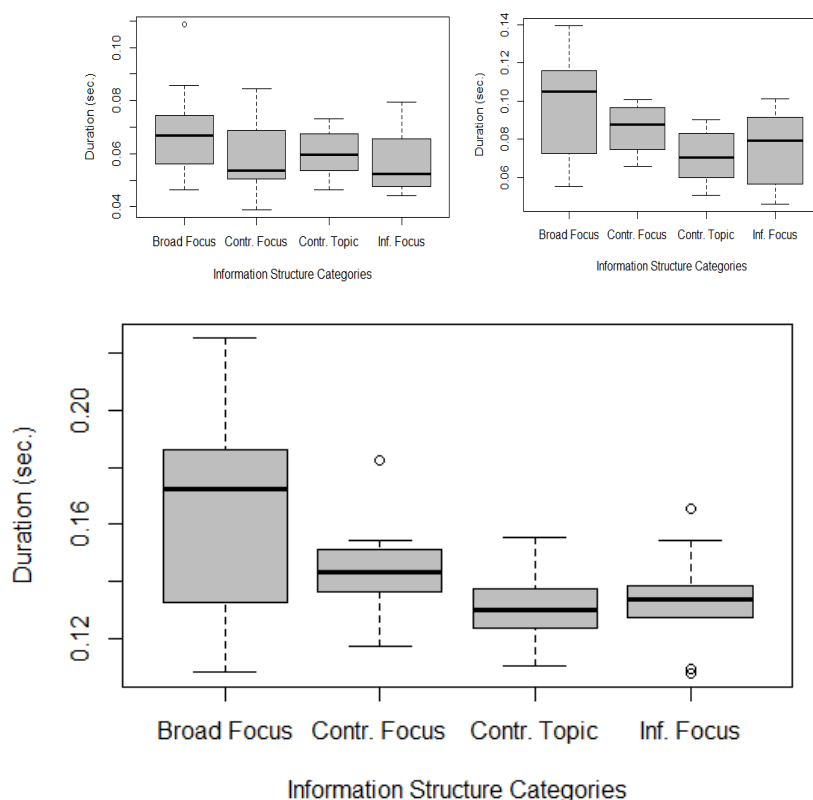

Εικόνα 4 Παραγωγή στενού αντιθετικού θέματος στο εκφώνημα «διαλέγει βελόνια» από άντρα ομιλητή της ΚΕ

Το προπυρηνικό τονικό ύψος στο εκφώνημα «διαλέγει βελόνια» για τη δήλωση αντιθετικού θέματος αρχίζει με ένα τοπικό ελάχιστο το οποίο ευθυγραμμίζεται με την αρχή της τονισμένης συλλαβής και κορυφώνεται σε ένα τοπικό μέγιστο στο τέλος της λέξης «διαλέγει». Στη συνέχεια, ο μελωδικός περίγυρος χαμηλώνει σε ένα τοπικό ελάχιστο στο τέλος της πρώτης συλλαβής της λέξης «βελόνια». Στην συνέχεια, ο μελωδικός περίγυρος ανεβαίνει και κορυφώνεται στο τέλος της τονισμένης συλλαβής. Τέλος, η θεμελιώδης συχνότητα ολοκληρώνει την κίνησή της σε ένα τοπικό χαμηλό ελάχιστο, που συνιστά το πιο χαμηλό σημείο της παραγωγής.

Στα τέσσερα εκφωνήματα η πρώτη άνοδος συσχετίζεται με το λιγότερο προβεβλημένο συστατικό του εκφωνήματος «διαλέγει» και συνιστά ένα προπυρηνικό τονικό ύψος. Η δεύτερη άνοδος στο συστατικό «βελόνια», που κλιμακώνεται συγκριτικά πολύ χαμηλότερα σε σχέση με την πρώτη άνοδο, αποτελεί το πυρηνικό τονικό ύψος· με αυτό το τονικό ύψος δηλώνεται η μεγαλύτερη τονική κορύφωση των εκφωνημάτων.

Η Εικόνα 5 παρουσιάζει τις μελωδικές παραγωγές των εκφωνημάτων και τις αντίστοιχες μέσες τιμές διάρκειας των φθόγων για κάθε κατηγορία εστίας.

Εικόνα 5 Παρουσίαση τιμών διάρκειας ως προς τις κατηγορίες της ευρείας εστίας (BroadFocus), αντιθ. εστίας (Contr. Focus), αντιθ. θέματος (Contr. Topic) και εστίας πληροφ. (Inf. Focus) για το τονισμένο σύμφωνο (πάνω αριστερά) και το τονισμένο φωνήεν (πάνω δεξιά) και για την τονισμένη συλλαβή (κάτω)

Σύμφωνα με την Εικόνα 5, η μέση τιμή διάρκειας της τονισμένης συλλαβής με την οποία συσχετίζεται το πυρηνικό τονικό ύψος διαφοροποιείται στην περίπτωση της ευρείας εστίας από την μέση τιμή διάρκειας της αντιθετικής εστίας, του αντιθετικού θέματος και της εστίας πληροφορίας. Συγκεκριμένα, η μέση τιμή για την ευρεία εστία είναι κατά πολύ μεγαλύτερη από την μέση τιμή στις υπόλοιπες πληροφοριακές κατηγορίες. Οι δύο κατηγορίες στενής εστίας καθώς και το αντιθετικό θέμα έχουν περίπου αντίστοιχες τιμές διάρκειας.

Όσον αφορά στις μέσες τιμές των τονισμένων συμφώνων της συλλαβικής έμβασης, παρατηρείται ότι στην περίπτωση της ευρείας εστίας η μέση τιμή υπερβαίνει τις μέσες τιμές των άλλων κατηγοριών πληροφοριακής δομής. Η αντιθετική εστία και η εστία πληροφορίας έχουν αντίστοιχες μέσες τιμές διάρκειας του συμφώνου και διαφοροποιούνται ελαφρώς από την μέση τιμή του αντιθετικού θέματος. Αυτές οι διαφοροποιήσεις επαναλαμβάνονται και στην περίπτωση του τονισμένου φωνήεντος, όπου πάλι η ευρεία εστία διακρίνεται από την στενή εστία πληροφορίας, το αντιθετικό θέμα και την

αντιθετική εστία. Παρόλο που και σε αυτή την περίπτωση η μέση τιμή διάρκειας του τονισμένου φωνήεντος στο αντιθετικό είναι μικρότερη από την αντιθετική εστία και την στενή εστία πληροφορίας.

4. Συζήτηση

Η μελέτη του επιτονισμού αποτέλεσε αντικείμενο ενδεδειγμένης έρευνας ιδιαίτερα τα τελευταία τριάντα χρόνια (M. E. Beckman & J. Pierrehumbert, 1986· M. Beckman & J. Pierrehumbert, 1986· Bolinger, 1958, 1965, 1972, 1986· G. Bruce, 1977· Ladd, 2008· J. Pierrehumbert & M. Beckman, 1988· t'Hart, Collier, & Cohen, 1990· Wells, 1945). Οι κύριες διαπιστώσεις της έρευνας είναι οι ακόλουθες: (α) οι βασικές μονάδες του επιτονισμού είναι τα (επι)τονικά ύψη, οι τόνοι φράσεως και οι τόνοι ορίου, (β) τα επιτονικά ύψη και οι τόνοι ορίου αποτελούνται από ένα ή δύο τονικούς στόχους, (γ) η ευθυγράμμιση των τονικών στόχων με την τεμαχιακή αλυσίδα και η κλιμάκωσή τους καθορίζει τη μορφή τους, (ε) δύο διαδοχικά επιτονικά ύψη συνδέονται με γραμμική παρεμβολή που δεν έχει φωνολογικές λειτουργίες, αλλά προκύπτει με τρόπο αυτόματο μη αβίαστο (Gussenhoven, 2004, 2007· Ladd, 2008· J. Pierrehumbert, 1980· J. Pierrehumbert & M. Beckman, 1988).

Σε αυτή τη μελέτη εξετάστηκε η παραγωγή των πυρηνικών τονικών υψών στην ΚΕ, δηλαδή των τονικών υψών που εκφράζουν την μεγαλύτερη τονική κορύφωση. Η παρουσία πυρηνικών τονικών υψών σε κάθε εκφώνημα είναι υποχρεωτική. Αντίθετα, προαιρετική είναι η παρουσία των προπυρηνικών τονικών υψών που εκφράζουν χαμηλότερου βαθμού τονική κορύφωση σε ένα εκφώνημα από τα πυρηνικά τονικά ύψη (Arvaniti et al., 1998· Silverman & Pierrehumbert, 1990).

Η ανάδειξη των συστατικών μέσα σε ένα εκφώνημα με την χρήση του επιτονισμού αποτελεί αναμφίβολα μια από τις κύριες του λειτουργίες. Το προβλεπόμενο συστατικό επιδέχεται διαφορετικές ερμηνείες, για παράδειγμα μπορεί να ερμηνευθεί ως *ενεργεία εστία*, *εστία πληροφορίας*, *αντιθετική εστία* ή *αντιθετικό θέμα* (Avesani & Vayra, 2003· Baltazani, 2006· Baltazani & Jun, 1999· Beaver, Clark, Flemming, Jaeger, & Wolters, 2007· Birch & Clifton, 1995· Botinis, Bannert, & Tatham, 2000· Büring, 1997· Erteschik-Shir, 1999· Georgiades, 2005· Gussenhoven· Rooth, 1992· Skopeteas, Féry, & Asatiani, 2009· Truckenbrodt, 1995· Xu & Xu, 2005). Ωστόσο, γενικά υπάρχει ασυμφωνία ανάμεσα στους ερευνητές κατά πόσον αυτές οι διαφορετικές ερμηνείες προκύπτουν από τα ίδια τα τονικά ύψη ή από άλλους παράγοντες (Baltazani, 2006· Büring, 1997· Gussenhoven, 1999, 2002· Pierrehumbert & Hirschberg, 1990· Shattuck-Hufnagel & Turk, 1996· Themistocleous, 2012). Με άλλα λόγια, υπάρχει ένα άλλο ζήτημα κατά πόσον τα ίδια τα τονικά ύψη έχουν σημασία που συνεισφέρει στην συνολική σημασία του εκφωνήματος (Ladd, 2008· Pierrehumbert & Hirschberg, 1990) ή ότι τα τονικά ύψη αξιοποιούνται για τον χαρακτηρισμό και την ανάδειξη συστατικών, χωρίς ωστόσο τα ίδια να είναι σημαίνοντα (Bolinger, 1983, 1986). Ο έλεγχος της υπόθεσης αυτής μπορεί να επιτευχθεί μέσω της αντιδιαστολής ιδιών ως προς όλα τα χαρακτηριστικά εκφωνημάτων. Το συγκεκριμένο περιβάλλον που πλαισιώνει τα υπό εξέταση εκφωνήματα αναγκαστικά πρέπει να ποικίλει για την έκφραση των διαφορετικών κατηγοριών της πληροφοριακής δομής. Σε αυτή την περίπτωση, θα αναμενόταν ότι διαφορετικές κατηγορίες της πληροφοριακής δομής θα συσχετίζονται με κατηγορικά διαφορετικά τονικά ύψη.

Ωστόσο, τα αποτελέσματα της μελέτης έχουν δείξει ότι το τονικό ύψος είναι το ίδιο σε όλες τις κατηγορίες πληροφοριακής δομής δηλ. στα συστατικά με ευρεία εστία, στενή αντιθετική εστία, στενή εστία πληροφορίας και στενό αντιθετικό θέμα (Georgakopoulos & Skopeteas, 2010· Themistocleous, 2011). Συγκεκριμένα, το τονικό ύψος αποτελείται από ένα χαμηλό τονικό στόχο στην αρχή της τονισμένης συλλαβής και ένα υψηλό τονικό στόχο στο τονισμένο φωνήεν. Από το τονισμένο φωνήεν και εξής η θεμελιώδης συχνότητα χαμηλώνει, ολοκληρώνοντας την πορεία της σε ένα τοπικό ελάχιστο. Η παρουσία αυτού του μελωδικού σχήματος στην συγκεκριμένη πειραματική μελέτη θέτει υπό αμφισβήτηση την άποψη ότι τα μελωδικά σχήματα στα πυρηνικά τονικά ύψη διαφοροποιούνται ανάλογα με την σημασία του εκφωνήματος (Pierrehumbert & Hirschberg, 1990) και μάλλον ότι οι διαφοροποιήσεις αφορούν στην ανάδειξη συστατικών με σκοπό την ερμηνεία σε ένα άλλο επίπεδο (Bolinger, 1951, 1958, 1965, 1972, 1982, 1983, 1986).

Αυτό ερμηνεύει την διακριτή διαφοροποίηση των πυρηνικών τονικών υψών από τα προπυρηνικά τονικά ύψη. Συγκεκριμένα, το προπυρηνικό τονικό ύψος αποτελείται από δύο διακριτούς τονικούς στόχους: ένα χαμηλό τονικό στόχο που ευθυγραμμίζεται με την αρχή της τονισμένης συλλαβής και ένα υψηλό τονικό στόχο που ευθυγραμμίζεται στο τέλος της ακόλουθης μη τονισμένης συλλαβής. Αντίθετα, το πυρηνικό τονικό ύψος, εκφράζει μια ανοδική κίνηση από την αρχή ή μέση του συμφώνου της τονισμένης συλλαβής, αλλά κορυφώνεται στο τονισμένο φωνήεν. Έτσι, αντίθετα με το προπυρηνικό τονικό ύψος, η κορύφωση συμβαίνει στην τονισμένη συλλαβή και όχι μετά από αυτήν. Η ευθυγράμμιση του τονικού μεγίστου του πυρηνικού τονικού ύψους με την τονισμένη συλλαβή υποστηρίζεται από δεδομένα προηγούμενων μελετών στην Ελληνική και σε άλλες γλώσσες (Α.

Arvaniti, Ladd, & Mennen, 2000, 2006· Botinis, Bannert, & Tatham, 2000· Gussenhoven, Bel, Marlien, & Parole, 2002· Ladd, 2008). Ο Gussenhoven (2004) αποδίδει την ακριβή ευθυγράμμιση της κορυφής των πυρηνικών τονικών υψών στην αρθρωτική προσπάθεια που καταβάλλει ο ομιλητής, η οποία ερμηνεύεται ως έμφαση από τον ακροατή. Αντίθετα, υποστηρίζει ο Gussenhoven η απουσία ευθυγράμμισης της κορυφής με την τονισμένη συλλαβή ερμηνεύεται ως απουσία έμφασης. Τα προπυρηνικά συσχετίζονται με το αχαρακτήριστο συστατικό αντίθετα τα πυρηνικά με το χαρακτηρισμένο συστατικό το οποίο χρήζει ερμηνείας από τον ακροατή.

Τα πυρηνικά τονικά ύψη φάνηκε ότι δεν διαφοροποιούνται μεταξύ τους ως προς την κλιμάκωση τους σύμφωνα με την σημασία της εστίας που εκφράζουν. Γενικά, το πυρηνικό τονικό ύψος κλιμακώνεται χαμηλότερα στις υπό εξέταση παραγωγές από το προπυρηνικό τονικό ύψος: τόσο ο χαμηλός τονικός στόχος όσο και ο υψηλός τονικός στόχος του πυρηνικού τονικού ύψους έχουν μικρότερη θεμελιώδη συχνότητα από τις αντίστοιχες τιμές που παρουσιάζονται στο προπυρηνικό τονικό ύψος.

Τα πυρηνικά τονικά ύψη της ΚΕ παρουσιάζουν σημαντικές ομοιότητες με αντίστοιχες παραγωγές της ΚΝΕ. Σύμφωνα με τις Arvaniti και Baltazani (2005) στις καταφατικές προτάσεις ΚΝΕ το πυρηνικό τονικό ύψος πραγματώνεται με δύο πυρηνικά τονικά ύψη H^* και ένα $L+H^*$. Το H^* αποτελεί το κανονικό τονικό ύψος για δήλωση της ευρείας εστίας, αντίθετα το H^*+L υποδηλώνει ότι η απάντηση θα έπρεπε να είναι γνωστή ή προφανής στον ακροατή. Τα δεδομένα αυτής της έρευνας δεν μπορούν να στηρίξουν τέτοιες διακρίσεις στα πυρηνικά τονικά ύψη καθώς απαιτείται η ύπαρξη δεδομένων από συνομιλία και ελεύθερο λόγο και όχι ελεγχόμενα πειραματικά δεδομένα. Στα δικά μας δεδομένα οι παρατηρήσεις από την ευθυγράμμιση δεν συνηγορούν στην ύπαρξη δύο διακριτών κατηγορικών πυρηνικών τονικών υψών. Επιπλέον, διαφοροποιήσεις στην κλιμάκωση δεν αποτελούν ασφαλές κριτήριο διάκρισης ξεχωριστών κατηγοριών πυρηνικών τονικών υψών. Σε κάθε περίπτωση απαιτείται περισσότερη συγκριτική έρευνα ανάμεσα στα πυρηνικά τονικά ύψη της ΚΝΕ και της ΚΕ για εξαγωγή καταληκτικών συμπερασμάτων (Themistocleous, 2011, 2012).

Βεβαίως, οι ακροατές διακρίνουν προσωδιακές διαφοροποιήσεις στις διαφορετικές παραγωγές, οι οποίες σε περίπτωση που δεν εκφράζονται κατηγορικά από τα τονικά ύψη θα πρέπει να δηλώνονται με κάποιον άλλο τρόπο. Στην έρευνα αυτή φάνηκε μια δύναμη διαφοροποίηση στη διάρκεια της συλλαβής ανάμεσα στην ευρεία εστία και στις κατηγορίες στενής εστίας, συμπεριλαμβανομένου και του στενού αντιθετικού θέματος. Αναμφίβολα, απαιτείται περαιτέρω έρευνα για τον έλεγχο της συνεισφοράς της διάρκειας αλλά και άλλων ακουστικών παραμέτρων, όπως η ένταση, στην ανάδειξη συστατικών (Breen, Fedorenko, Wagner, & Gibson, 2010· Calhoun, 2006, 2007· Themistocleous, 2011, 2012), καθώς και του τρόπου που οι ακουστικοί παράγοντες αλληλεπιδρούν μεταξύ τους.

ABSTRACT

In this paper we are dealing with metaphorical predicates for which the language synchronically does not develop literal collocability. Since metaphoric presupposes non metaphoric, the question arising is how non metaphoric is non-existent in language collocability. We opt for a semantic decomposition of these predicates based on their semantic features. Motivation of metaphor in such cases is detected in the semantics of the predicates, namely, in their secondary semantic features.

Λέξεις κλειδιά: μεταφορά, κυριολεξία, κινητοποίηση (motivation) μεταφοράς, συμφραστικότητα (collocability), λεξική σημασία

1. Εισαγωγή

Θέμα της συγκεκριμένης εργασίας αποτελούν ρηματικές φράσεις σε μεταφορική χρήση, οι οποίες στη συγχρονία της γλώσσας δεν παρουσιάζουν αντίστοιχη κυριολεκτική χρήση. Η συλλογή γλωσσικού υλικού κατέδειξε ότι πολλές από αυτές τις ρηματικές φράσεις περιέχουν ένα λόγιο στο σχηματισμό ρήμα:

- (1) επωμίζομαι, αφυπνίζω, ενστερνίζομαι

Η μεταφορά (metaphor), σε εννοιακό επίπεδο, αποτελεί τρόπο σκέψης και σύλληψης του κόσμου. Πρόκειται για τη δημιουργία αναλογίας ανάμεσα σε μία συγκεκριμένη έννοια και σε μία αφηρημένη έννοια (Lakoff 1993). Η αφηρημένη έννοια προσλαμβάνεται με τους όρους της συγκεκριμένης έννοιας. Στο επίπεδο γλωσσικής παραγωγής, οι γλωσσικές αποδόσεις, οι ρηματικές φράσεις, με αναφορά στη συγκεκριμένη έννοια αποτελούν τις κυριολεκτικές χρήσεις, ενώ οι ρηματικές φράσεις με αναφορά στην αφηρημένη έννοια αποτελούν τις μεταφορικές χρήσεις. Το γλωσσικό υλικό που μας απασχολεί παρουσιάζει την εξής ιδιομορφία: ενώ χρησιμοποιείται μεταφορικά, συγχρονικά δεν εμφανίζει αντίστοιχη κυριολεκτική χρήση.

- (2) επωμίζομαι τις ευθύνες – *επωμίζομαι το σάκο

2. Περιγραφή γλωσσικών παραγωγών

Το γλωσσικό υλικό μας αποτελείται από ρηματικές φράσεις, στις οποίες το ρήμα σχηματίζεται με λόγιο πρόθημα. Η μεταφορική χρήση των φράσεων αυτών θα μπορούσε να αποδοθεί στο λόγιο σχηματισμό των ρημάτων και συνακόλουθα στην περιορισμένη χρήση τους. Οι μονάδες όμως που μας απασχολούν αποτελούν διαφανείς στη σημασία περιπτώσεις λέξεων με πρόθημα, δηλαδή, η σημασία του ρήματος που προκύπτει δεν έχει υποστεί αλλοιώσεις. Η σημασία της ρήματος που προκύπτει είναι συνάρτηση της σημασίας που φέρει το πρόθημα και της σημασίας που φέρει το δεύτερο λέξιμα. Για παράδειγμα, η μονάδα *επωμίζομαι*, φέρει τη σημασία «έχω κάτι στον ώμο».

Με αυτά τα ρήματα, τα οποία είναι διαφανή στη σημασία, σχηματίζονται ρηματικές φράσεις, ρηματικά κατηγορήματα, τα οποία παρουσιάζουν μόνο μεταφορική χρήση. Τέτοια διαφανή στη σημασία ρήματα, τα οποία παρουσιάζουν αυτή τη συμπεριφορά είναι τα εξής¹:

- (3) *επωμίζομαι τις ευθύνες*
αφυπνίζει συνειδήσεις
αποκρυσταλλώνω την άποψή μου
ενστερνίζομαι απόψεις, ιδέες
επιρρίπτω ευθύνες
καταπολεμώ τη λοίμωξη
καταπνίγω τα αισθήματά μου, την εξέγερση
διαφωτίζω τα δεδομένα

Η αναζήτηση ανάλογων μη μεταφορικών, κυριολεκτικών, φράσεων προσκρούει σε μη αποδεκτά παραδείγματα:

- (4) *επωμίζομαι το σάκο
*αφυπνίζω το παιδί
*αποκρυσταλλώνω ένα αντικείμενο

Η αποκλειστικά μεταφορική σημασία και χρήση αυτών των ρημάτων οδηγεί, όπως είναι λογικό, σε περιορισμένη συμφραστικότητα (collocability) του ρήματος με πολύ λίγα ουσιαστικά. Τα ρηματικά κατηγορήματα που προκύπτουν αποτελούν, λόγω της περιορισμένης συμφραστικότητας, λεξικές συνάψεις² (lexical collocations) της Νέας Ελληνικής. Οι συγκεκριμένες συνάψεις ανήκουν σαφώς στο δύσκολο και απαιτητικό λεξιλόγιο της ελληνικής αλλά όχι σε ειδικά, τεχνικά λεξιλόγια, συγκεκριμένων επιστημονικών κλάδων.

Οι λεξικές συνάψεις που μας απασχολούν απαρτίζονται από ένα λόγιο στο σχηματισμό ρήμα, του οποίου όμως η σημασία είναι διαφανής, και από ένα ουσιαστικό το οποίο αναφέρεται σε αφηρημένη έννοια:

- (5) *νοοτροπία, άποψη, ιδέα, δεδομένα, κ.ά.*

Οι έννοιες αυτές σχετίζονται με τη νόηση, τα συναισθήματα και συνήθως φέρουν παραπάνω από μία διαστάσεις σημασίας ανάλογα με το γλωσσικό περιβάλλον που εμφανίζονται:

- (6) *ενστερνίζομαι την ιδέα σου (ιδέα: άποψη, γνώμη)*
για μια ιδέα ζούμε (ιδέα: ιδανικό)

Σε αυτές τις λεξικές συνάψεις διαπιστώνεται μεταφορική χρήση χωρίς αντίστοιχη κυριολεκτική χρήση. Το ερώτημα είναι πώς αποδίδεται γλωσσικά η κυριολεξία σε αυτές τις περιπτώσεις. Η κυριολεξία, το μη μεταφορικό, αποδίδεται γλωσσικά ως εξής:

A. με ομόθεμο λεξιλόγιο

- (7) *διαφωτίζω κάποιον (μεταφορά)- φωτίζω τον κήπο (κυριολεξία)*
(8) *καταπνίγω το θυμό μου (μεταφορά)- το νερό έπνιξε τα ζώα (κυριολεξία)*

B. με διαφορετικό λεξιλόγιο

- (9) *επωμίζομαι τις ευθύνες (μεταφορά)- βάζω την τσάντα στον ώμο (κυριολεξία)*

¹ Για τη συλλογή του γλωσσικού υλικού χρησιμοποιήθηκε το Ιορδανίδου και Πανταζάρα (2010). *Χτίζω λέξεις: Πώς σχηματίζονται οι νεοελληνικές λέξεις*. Τα παραδείγματα φράσεων αντλήθηκαν από το «Σώμα ελληνικών κειμένων» (Γούτσος 2003) και από τα λεξικά γενικής χρήσης (Λεξικό της Κοινής Νεοελληνικής, Λεξικό της Νέας Ελληνικής Γλώσσας).

² Στις λεξικές συνάψεις παρατηρείται εξάρτηση του ενός στοιχείου από το άλλο, η οποία πραγματώνεται με την περιορισμένη δυνατότητα λεξικής εναλλαγής του ρήματος ή του ουσιαστικού (αντικειμένου) με συνώνυμες λέξεις (βλ. Θώμου 2006).

- (10) **αποκορυφώνεται** η αγωνία (μεταφορά)- **ανεβαίνω** την κορυφή του βουνού (κυριολεξία)

Γ. ενώ το επίθετο χρησιμοποιείται μόνο μεταφορικά, το ομόθεμα ρήμα χρησιμοποιείται και μεταφορικά και κυριολεκτικά

- (11) **αφοπλιστικό** βλέμμα (μεταφορά)-***αφοπλιστικό** μαχαίρι (κυριολεξία: δεν υπάρχει)
 ενώ
 (12) **αφοπλίζω** το συνομιλητή (μεταφορά)- **αφοπλίζω** τους εχθρούς (κυριολεξία)

2.1 Διαχρονική εξέταση των ρημάτων

Θα ήταν διαφωτιστική η ετυμολογική προσέγγιση των συγκεκριμένων ρημάτων στα κατηγορήματα που μας ενδιαφέρουν. Όλες οι ρηματικές λεξικές μονάδες που εξετάζουμε μαρτυρούνται, σύμφωνα με το Λεξικό της Κοινής Νεοελληνικής, είτε από τα αρχαία χρόνια (αφυπνίζω < *ἀφυπνίζω*, επιρρίπτω < *ἐπιρρίπτω*, καταπολεμώ < *καταπολεμῶ*, καταπνίγω < *καταπνίγω*, εξατμίζω < *ἐξατμίζω*) είτε από τα ελληνιστικά (επωμίζομαι < *ἐπωμίζομαι*, ενστερνίζομαι < *ἐνστερνίζομαι*, διαφωτίζω < *διαφωτίζω*, αποκορυφώνω < *ἀποκορυφῶ*, αποτυπώνω < *ἀποτυπ(ῶ)-ώνω*) είτε από τα μεσαιωνικά (αποκρυσταλλώνω < *αποκρυσταλλοῦμαι*).

Η σημασία όμως που έφεραν εκείνη τη χρονική περίοδο ήταν κυριολεκτική και προέκυπτε από τη διαφανή σημασία του ρήματος:

- (13) *ἀφυπνίζω*: σηκώνω τινά από τον ύπνον (Λεξικό Σταματάκου)
ἐπιρρίπτω: ρίπτω τι επί τινός ή κατά τίνος (Λεξικό Σταματάκου)
καταπολεμῶ: καταβάλλω πολέμων, κατανικῶ ἐν πολέμῳ (Λεξικό Σταματάκου)
ἀποκορυφῶ: σχηματίζω κορυφή, κάμνω σουβλερόν, καταλήγω σε κορυφή (Λεξικό Σταματάκου και ΛΚΝ)
αποκρυσταλλοῦμαι: γίνομαι πάγος (ΛΚΝ)
καταπνίγω: πνίγω, σβήνω (ΛΚΝ)
διαφωτίζω: φωτίζω, φέγγω (τριτοπρόσωπο: ξημερώνει) (Λεξικό Κριαρά)

Η συνθήκη της διαφανούς σημασίας στην κυριολεξία δεν ισχύει για το *ἐνστερνίζομαι*, το οποίο, σύμφωνα με το Λεξικό Κριαρά, στα μεσαιωνικά ελληνικά είχε ήδη μεταφορική σημασία:

- (14) *ἐνστερνίζομαι*: αποδέχομαι πρόθυμα, ασπάζομαι

Επομένως οι συγκεκριμένες λεξικές μονάδες εμφανίζονται με κυριολεκτική σημασία από προηγούμενες φάσεις της ελληνικής γλώσσας. Αρκετές από αυτές σε κάποια χρονική στιγμή εισήγαγαν μέσω σημασιολογικού δανεισμού κυρίως από τη γαλλική γλώσσα νέο σημασιολογικό περιεχόμενο³.

- (15) αποκρυσταλλώνω-cristalliser (γαλλ.)
 ενστερνίζομαι-embrasser (γαλλ.)
 καταπολεμώ-combattre (γαλλ.)
 καταπνίγω-étouffer (γαλλ.)
 αποτυπώνω-sich ausdrücken (γερμ.)

Ο σημασιολογικός δανεισμός, σύμφωνα με την Αναστασιάδη-Συμεωνίδη (1994:34) είναι η διαδικασία κατά την οποία η Γ1 (η ελληνική) δανείζεται από τη Γ2 μόνο το περιεχόμενο, χωρίς την έκφραση. «Το προϊόν αυτού του φαινομένου εμφανίζεται ως νέα -ενδεχομένως απροσδόκητη- σημασία του σημασιολογικού πεδίου μιας λεξικής μονάδας που ήδη αποτελεί μέρους του κώδικα της Γ1»⁴.

Οι παρακάτω μονάδες δεν διήλθαν από αυτή τη διαδικασία του σημασιολογικού δανεισμού από άλλη γλώσσα:

- (16) αφυπνίζω, επωμίζομαι, επιρρίπτω, διαφωτίζω, αποκορυφώνω, εξατμίζω

Επομένως, οι ρηματικές λεξικές μονάδες που ερευνώνται στην εργασία μορφολογικά υπάρχουν από τα αρχαία ή ελληνιστικά χρόνια. Η σημασία τους εκείνα τα χρόνια ήταν διαφανής και ενέπιπτε στα όρια

³ Πρόκειται για τη μεταφορική χρήση.

⁴ Αναστασιάδη-Συμεωνίδη (1994:34).

της κυριολεξίας. Με την πάροδο των χρόνων η σημασία των ρηματικών μονάδων και των συνάψεων που σχηματίζουν μεταβλήθηκε είτε στο εσωτερικό της ίδιας γλώσσας (της ελληνικής) είτε με δανεισμό σημασίας από αντίστοιχες μονάδες άλλης γλώσσας. Αυτό είχε ως αποτέλεσμα συγχρονικά οι μονάδες αυτές να φέρουν σημασία και χρήση μόνο μεταφορική.

2.2 Τρία πρότυπα συμφραστικότητας

Θεωρείται σκόπιμο να εξετάσουμε εάν η αποκλειστικά μεταφορική χρήση των συνάψεων αυτών συγχρονικά σχετίζεται με το λόγιο σχηματισμό του ρήματος. Γι' αυτό το λόγο θα εξετάσουμε λεξιλόγιο αυτής της κατηγορίας, δηλαδή, λεξικές μονάδες με λόγιο πρόθημα. Παρουσιάζονται τρία πρότυπα (patterns) χρήσης:

A. Καταγράφονται λεξικές μονάδες που χρησιμοποιούνται μόνο κυριολεκτικά και δεν παρουσιάζουν μεταφορική χρήση:

- (17) εμφιαλώνω

κυριολεξία	μεταφορά
εμφιαλώνω το κρασί	*εμφιαλώνω τις αξίες μου, τη σκέψη

B. Υπάρχουν λεξικές μονάδες που χρησιμοποιούνται και κυριολεκτικά και μεταφορικά:

- (18) αποτυπώνω

κυριολεξία	μεταφορά
αποτυπώνω ένα σχέδιο στο ύφασμα	αποτυπώνει την πραγματικότητα στο έργο του

Γ. Καταγράφονται λεξικές μονάδες που χρησιμοποιούνται μόνο μεταφορικά (πρόκειται για τις συνάψεις που εξετάζουμε):

- (19) επωμίζομαι

κυριολεξία	μεταφορά
*επωμίζομαι το σάκο	επωμίζομαι μόνο τις ευθύνες, τις υποχρεώσεις

Αυτό οδηγεί στο συμπέρασμα ότι δεν είναι η μεταφορική χρήση μονόδρομος για αυτού του τύπου το λεξιλόγιο. Η αποκλειστικά μεταφορική χρήση δεν οφείλεται στο λόγιο σχηματισμό και στο επίσημο επίπεδο ύφους των μονάδων αυτών.

Επιπλέον, διαπιστώνεται ότι αυτή η δυνατότητα αποκλειστικής μεταφορικής χρήσης παρατηρείται και σε διαφορετικού τύπου λεξιλόγιο που δεν έχει διέλθει τη διαδικασία λόγιου σχηματισμού:

- (20) φλογερή καρδιά (μεταφορά) - *φλογερή φωτιά (κυριολεξία)

- (21) ελκυστική άποψη (μεταφορά) - *ελκυστικός γερανός (κυριολεξία)

3. Ανάλυση των γλωσσικών δεδομένων

Η περιγραφή των λεξικών συνάψεων οδηγεί στη διαπίστωση ότι αφενός δεν εμφανίζουν συμφραστικότητα (collocability) με την κυριολεκτική διάσταση της σημασίας τους και αφετέρου με τη μεταφορική διάσταση της σημασίας τους δημιουργείται η οικεία, η προσδοκώμενη σύναψη. Εύλογα, λοιπόν, προκύπτει το ερώτημα με ποιον τρόπο συγχρονικά παρακάμπτεται η κυριολεξία σε αυτά τα κατηγορήματα και πώς παρέχει η γλώσσα τη δυνατότητα για μεταφορική χρήση χωρίς αντίστοιχη κυριολεκτική.

3.1 Γνωσιακή (cognitive) θεωρία για τη μεταφορά

Η γνωσιακή θεωρία για τη μεταφορά δίνει προτεραιότητα στις εννοιακές αντιστοιχίες: μία έννοια B που συνήθως είναι αφηρημένη προσλαμβάνεται ως μια έννοια A που συνήθως είναι συγκεκριμένη (Lakoff and Johnson 1980, Lakoff 1993, Croft and Cruse 2004, Βελούδης 2005). Σύμφωνα με τους γνωστικούς γλωσσολόγους η μεταφορά είναι εννοιακή στη φύση της (conceptual) και όχι γλωσσική. Η

γλώσσα δεν αποτελεί βασικό τμήμα του μηχανισμού της μεταφοράς, ο οποίος είναι ένας μηχανισμός σκέψης και ερμηνείας του κόσμου. Οι γνωστικοί γλωσσολόγοι υποστηρίζουν ότι οι γλωσσικές αποδόσεις βοηθούν στο να διαπιστωθεί η πραγμάτωση της εννοιακής μεταφοράς. Η μεταφορά είναι εννοιακής φύσης και συνήθως συσχετίζει μια αφηρημένη με μια συγκεκριμένη έννοια ή ακόμα και πιο γενικές κατηγορίες/ πεδία.

Η εννοιακή φύση της μεταφοράς σίγουρα δεν τίθεται υπό αμφισβήτηση. Τα ρηματικά κατηγορήματα της έρευνας διαχρονικά παρουσίαζαν κυριολεκτική συμφραστικότητα, όμως συγχρονικά δεν παρουσιάζουν. Είναι δύσκολο να εφαρμοσθεί η γνωστική θεωρία για τη μεταφορά, στην περίπτωση που το ενδιαφέρον της έρευνας εστιάζεται στο γλωσσικό υλικό και τη συμφραστικότητα που παρουσιάζει, όπως συμβαίνει στη δική μας περίπτωση⁵.

Επιπλέον, η γνωστική θεώρηση για τη μεταφορά δύσκολα παρέχει ερμηνεία για την κινητοποίηση (motivation) της μεταφοράς: ποιες περιοχές (domains) ή ποιες έννοιες (concepts) εν δυνάμει μπορούν να ερμηνευθούν μεταφορικά και ποιες όχι. Οποιαδήποτε αφηρημένη έννοια μπορεί να αντιστοιχηθεί με οποιαδήποτε συγκεκριμένη έννοια. Δεν εντοπίζονται από τη θεωρία περιορισμοί στην πραγμάτωση της μεταφοράς. Διαπιστώσαμε όμως και πριν ότι κάποιες έννοιες, για παράδειγμα, η έννοια στην οποία αναφέρεται η λεξική μονάδα *εμφιαλώνω*, δεν εμφανίζονται σε μεταφορική χρήση στο λόγο. Κάτω από ποιες συνθήκες ενεργοποιείται ο μηχανισμός της μεταφοράς και τι είναι αυτό που τον κάνει να ενεργοποιείται; Τι είναι αυτό που κινητοποιεί μια μεταφορική ερμηνεία και χρήση.

3.2 Σημασιολογική ανάλυση γλωσσικών δεδομένων

Θεωρούμε ότι, εάν προσεγγίσουμε τα γλωσσικά δεδομένα μας με μια σημασιολογική θεωρία που να εστιάζει στη σημασία των λεξικών μονάδων, θα τα ερμηνεύσουμε με πιο αποδοτικό τρόπο. Στόχος είναι να εξετάσουμε με ποιον τρόπο τα συγκεκριμένα παραδείγματα λειτουργούν μόνο στο μεταφορικό, ενώ η διαδικασία της μεταφοράς προϋποθέτει το μη μεταφορικό. Ακόμα και εάν κάποιος υποστηρίξει ότι το μη μεταφορικό υπάρχει εν δυνάμει, έστω και εάν δεν πραγματώνεται γλωσσικά, αξίζει να δούμε με ποιον τρόπο «παρακάμπτεται» η μη μεταφορική συμφραστικότητα και καταλήγει σε μεταφορική μόνο. Μας ενδιαφέρει η κινητοποίηση της μεταφοράς, δηλαδή, τι είναι αυτό που κάνει τη μεταφορά να ενεργοποιείται. Εξάλλου, η γλωσσική συμφραστικότητα δεν είναι αυθαίρετη, προκύπτει και περιορίζεται από τη σημασία των λεξικών μονάδων.

Η ανάλυση που θα ακολουθηθεί συνίσταται σε ανάλυση της λεξικής σημασίας του ρήματος των συνάψεων. Η ανάλυση αυτή παίρνει τη μορφή αποσύνθεσης της λεξικής σημασίας (lexical decomposition). Μελετητές που ακολουθούν αυτού του τύπου την αποσύνθεση των κατηγορημάτων είναι οι Jackendoff (1990, 1992), Pustejovsky (1992, 1995), Levin and Rappaport (1992), Rappaport et al (1993). Αποσυνθέτουν τα κατηγορήματα καθορίζοντας την ορισματική δομή⁶ (argument structure) και τη λεξική εννοιακή δομή των κατηγορημάτων⁷ (lexical conceptual structure). Η αναγνώριση των σημασιακών συστατικών των κατηγορημάτων οδηγεί στην εξακρίβωση του νοήματος.

Η ανάλυσή μας αρχικά εστιάζει στην εσωτερική δομή των κατηγορημάτων και πιο συγκεκριμένα, στην ορισματική δομή του κατηγορήματος. Αν πάρουμε δύο κατηγορήματα ένα σε μη μεταφορική (κυριολεκτική) και ένα σε μεταφορική χρήση, διαπιστώνουμε ότι η ορισματική δομή του ρήματος δε μεταβάλλεται από την κυριολεξία στη μεταφορά:

- | | | |
|------|--|--------------|
| (22) | αποτυπώνει ένα σχέδιο στο ύφασμα | [κυριολεξία] |
| | αποτυπώνει την πραγματικότητα στο έργο του | [μεταφορά] |

Τα ορίσματα και η ορισματική δομή είναι κοινά, και στις δύο περιπτώσεις έχουμε:

- (23) [δράστης, θέμα, τόπος]

Αυτό που μεταβάλλεται είναι η σύσταση του θέματος, στην κυριολεξία αντιστοιχεί σε μια συγκεκριμένη οντότητα ενώ στη μεταφορά σε μια αφηρημένη οντότητα. Επομένως την κινητοποίηση της μεταφοράς δεν μπορούμε να την ανιχνεύσουμε στην ορισματική δομή των κατηγορημάτων, εφόσον αυτή η σημασιακή δομή δε μεταβάλλεται από τα κυριολεκτικά στα μεταφορικά κατηγορήματα.

⁵ Βλ. και Θώμου (2008) για μια ανάλυση μεταφορικών γλωσσικών δεδομένων με εστίαση στο γλωσσικό υλικό.

⁶ Τα ορίσματα εκφράζουν τους συμμετέχοντες (participants) σε μια δραστηριότητα ή μια κατάσταση όπως ορίζεται από το κατηγορήμα (Pustejovsky 1995).

⁷ Η λεξική εννοιακή δομή περιλαμβάνει εκτός από τα ορίσματα και λεξικές πληροφορίες για το λεξικό ποιόν ενέργειας (lexical aspect) και τη γεγονοτική δομή (event structure) του κατηγορήματος.

3.2.1 Κατηγορήματα με κυριολεκτική και μεταφορική συμφραστικότητα

Εφόσον η κινητοποίηση της μεταφοράς δεν ανιχνεύεται στα ορίσματα του ρηματικού κατηγορήματος, αυτό οδηγεί στην αναζήτηση πιο λεπτών σημασιακών στοιχείων / χαρακτηριστικών (semantic features) του ρήματος για την κινητοποίηση της μεταφοράς. Εξετάζουμε κατηγορήματα που εμφανίζουν και κυριολεκτική και μεταφορική συμφραστικότητα και τα αποσυνθέτουμε στα σημασιακά συστατικά τους.

- (24) εξατμίζονται οι σταγόνες [κυριολεξία]
εξατμίζονται τα όνειρα, οι σκέψεις [μεταφορά]

Το κυριολεκτικό ρηματικό κατηγορήμα φέρει το σημασιακό συστατικό «αλλαγή σύστασης» και πιο συγκεκριμένα, «γίνομαι από νερό αέρας». Αυτό το σημασιακό συστατικό δεν το φέρουν τα μεταφορικά κατηγορήματα. *Οι σκέψεις, τα όνειρα που εξατμίζονται* εξασθενούν, αλλά δεν υπάρχει αλλαγή σύστασης, ύλης. Αυτό οδηγεί στην παρατήρηση ότι το κύριο σημασιακό συστατικό δεν κινητοποιεί τη μεταφορά, από τη στιγμή που δεν ενεργοποιείται στα μεταφορικά κατηγορήματα. Δεν θα ήταν παράλογο να πούμε ότι κάτι που εξατμίζεται, στη συνέχεια και ως συνέπεια της εξάτμισης, «φεύγει (προς τα πάνω)» και «παύει να φαίνεται/να υπάρχει», να γίνεται, δηλαδή, ορατό. Αυτό το σημασιακό συστατικό που προκύπτει από το πρώτο και κύριο φαίνεται να ενεργοποιείται εκτός από το κυριολεκτικό κατηγορήμα και στα μεταφορικά κατηγορήματα. *Τα όνειρα που εξατμίζονται* «φεύγουν» και «δεν υπάρχουν». Η παρατήρηση αποτυπώνεται καλύτερα στον παρακάτω πίνακα:

	ΚΥΡΙΟΛΕΞΙΑ	ΜΕΤΑΦΟΡΑ
<i>εξατμίζομαι</i>	<i>σταγόνες</i>	<i>όνειρα, σκέψεις</i>
«γίνομαι από νερό αέρας»	+	-
«δε φαίνομαι / δεν υπάρχω»	+	+

Πίνακας 1

Αυτό το δεύτερο σημασιακό συστατικό κινητοποιεί τη μεταφορά και μεταγγίζεται από τις κυριολεκτικές στις μεταφορικές δομές. Η λογική που αναπτύσσεται παραπάνω μοιάζει με τη σημασιακή σχέση της συνεπαγωγής (entailment). Το παράδειγμα του Jackendoff (1990, στο Saeed: 249-50)

- (25) X killed Y entails Y died

με το υπερκείμενο εννοιακό περίγραμμα (schema)

- (26) X cause E to occur entails E occur

βρίσκει εφαρμογή και στα δικά μας κατηγορήματα. Το κύριο σημασιακό συστατικό συνεπαγωγικά επιφέρει ένα δεύτερο σημασιακό συστατικό. Αυτό το δεύτερο σημασιακό συστατικό εντοπίζεται στα κυριολεκτικά κατηγορήματα. Ανιχνεύεται επιπλέον και στις μεταφορικές δομές, ενώ το πρώτο όχι. Άρα, το συστατικό αυτό κινητοποιεί τη μεταφορά και μεταγγίζεται από τις κυριολεκτικές στις μεταφορικές δομές:

ΡΗΜΑ συστατικό σημασίας	συγκεκριμένο ΟΥΣ	αφηρημένο ΟΥΣ
↓	+	-
[συνεπαγωγή] συστατικό σημασίας	+	+

Πίνακας 2

Η ανάλυση ενός δεύτερου ρήματος και των κατηγορημάτων του οδηγεί στο ίδιο συμπέρασμα.

- (27) αποτυπώνω ένα σχέδιο στο ύφασμα [κυριολεξία]
αποτυπώνω την πραγματικότητά στο έργο μου [μεταφορά]

Το κυριολεκτικό ρηματικό κατηγορήμα φέρει το σημασιακό συστατικό συστατικό «σχηματίζω το περίγραμμα ενός σώματος σε μια επιφάνεια». Αυτό το σημασιακό συστατικό δεν ενεργοποιείται στα μεταφορικά κατηγορήματα. Η *πραγματικότητα που αποτυπώνεται* κάπου, δεν αφήνει κάποιο περίγραμμα. Άρα, και σε αυτή την περίπτωση το κύριο σημασιακό συστατικό δεν κινητοποιεί τη μεταφορά. Ως συνέπεια αυτού του σημασιακού συστατικού προκύπτει το σημασιακό συστατικό «κάνω κάτι αντιληπτό (στους άλλους)», το οποίο ενεργοποιείται και στα κυριολεκτικά και στα μεταφορικά κατηγορήματα. Αυτό το σημασιακό συστατικό που προκύπτει από το πρώτο και κύριο κινητοποιεί τη μεταφορά.

	ΚΥΡΙΟΛΕΞΙΑ	ΜΕΤΑΦΟΡΑ
<i>αποτυπώνω</i>	<i>ένα σχέδιο</i>	<i>την πραγματικότητα</i>
«σχηματίζω το περίγραμμα ενός σώματος σε μια επιφάνεια»	+	-
«κάνω κάτι αντιληπτό (στους άλλους)»	+	+

Πίνακας 3

3.2.2 Κατηγορήματα με μεταφορική συμφραστικότητα

Η ανάλυση προχωρά σε λεξική αποσύνθεση κατηγορημάτων που εμφανίζουν μόνο μεταφορική συμφραστικότητα.

- (28) *επωμίζομαι το σάκο [κυριολεξία]
επωμίζομαι τις ευθύνες [μεταφορά]

Το κύριο σημασιακό συστατικό που θα ενεργοποιούνταν στα κυριολεκτικά κατηγορήματα, εάν υπήρχε κυριολεκτική συμφραστικότητα, θα ήταν το «βάζω κάτι στους ώμους μου». Το κύριο σημασιακό συστατικό δεν το φέρουν τα μεταφορικά κατηγορήματα, όπως παρατηρήθηκε και στις προηγούμενες περιπτώσεις. Αν έχω κάτι στους ώμους μου, συνεπαγωγικά, μπορούμε να πούμε ότι «το παίρνω μαζί μου/είναι δικό μου». Αυτό το δευτερεύον σημασιακό συστατικό που προκύπτει από το πρώτο και κύριο, φυσικά δεν ενεργοποιείται σε κυριολεκτικά κατηγορήματα, εφόσον δεν υπάρχει κυριολεκτική συμφραστικότητα, αλλά ενεργοποιείται στα μεταφορικά κατηγορήματα. Όταν *επωμίζομαι τις ευθύνες*, «τις αναλαμβάνω, τις παίρνω μαζί μου, γίνονται δικές μου».

	ΚΥΡΙΟΛΕΞΙΑ	ΜΕΤΑΦΟΡΑ
<i>επωμίζομαι</i>	<i>*το σάκο</i>	<i>τις ευθύνες</i>
«βάζω στους ώμους»	[+]	-
«το παίρνω μαζί μου/είναι δικό μου»	[+]	+

Πίνακας 4

Η ανάλυση αυτή μας παρέχει τη δυνατότητα να περιγράψουμε με ποιον τρόπο προκύπτουν μεταφορικές δομές, όταν δεν υπάρχουν αντίστοιχες κυριολεκτικές. Λανθάνον, εν δυνάμει, σημασιακό συστατικό που προκύπτει συνεπαγωγικά από το κύριο σημασιακό συστατικό, ενεργοποιείται στη σύναψη του ρήματος με αφηρημένο ουσιαστικό.

Η ανάλυση ενός δεύτερου ρήματος και των κατηγορημάτων του οδηγεί στο ίδιο συμπέρασμα.

- (29) *καταπνίγω τα ζώα [κυριολεξία]
καταπνίγω το θυμό μου [μεταφορά]

Το κύριο σημασιακό συστατικό που θα ενεργοποιούνταν στα κυριολεκτικά κατηγορήματα, εάν υπήρχε κυριολεκτική συμφραστικότητα, θα ήταν το «κάνω κάτι να μη ζει». Αυτό δεν ενεργοποιείται στα μεταφορικά κατηγορήματα. Εάν «κάνω κάτι να μη ζει, συνεπαγωγικά, «το κάνω να μην υπάρχει/ να μη φαίνεται». Αυτό το δευτερεύον σημασιακό συστατικό που προκύπτει από το πρώτο και κύριο, ενεργοποιείται στα μεταφορικά κατηγορήματα. Όταν *καταπνίγω το θυμό μου*, «τον κάνω να μην υπάρχει / να μη φαίνεται».

	ΚΥΡΙΟΛΕΞΙΑ	ΜΕΤΑΦΟΡΑ
<i>καταπνίγω</i>	<i>*τα ζώα</i>	<i>το θυμό μου</i>
«κάνω κάτι να μη ζει»	[+]	-
«κάνω κάτι να μην υπάρχει / να μη φαίνεται»	[+]	+

Πίνακας 5

Επομένως, στις περιπτώσεις κατηγορημάτων που εμφανίζουν μόνο μεταφορική συμφραστικότητα παρατηρούνται τα εξής:

Το κύριο σημασιακό συστατικό του ρήματος υπάρχει εν δυνάμει, αλλά δεν ενεργοποιείται, εφόσον δεν υπάρχουν κυριολεκτικά κατηγορήματα. Δευτερεύον σημασιακό συστατικό, που προκύπτει με συνεπαγωγή από το πρώτο, ενεργοποιείται αποκλειστικά και μόνο στη σύναψη ρήματος με αφηρημένο ουσιαστικό, δηλαδή στις μεταφορικές δομές.

ΡΗΜΑ συστατικό σημασίας ↓ [συνεπαγωγή] συστατικό σημασίας	συγκεκριμένο ΟΥΣ [+] [+]	αφηρημένο ΟΥΣ - +
--	------------------------------------	-----------------------------

Πίνακας 6

Η ανάλυση των κατηγορημάτων σε σημασιακά συστατικά δείχνει πώς λειτουργεί η μεταφορά στα γλωσσικά δεδομένα και προσφέρει την ίδια ερμηνεία και για τα κατηγορήματα που εμφανίζουν παράλληλα κυριολεκτική συμφραστικότητα και για τα κατηγορήματα που δεν εμφανίζουν κυριολεκτική συμφραστικότητα. Αντιλαμβανόμαστε ότι και στις δύο περιπτώσεις η μεταφορά κινητοποιείται συνεπαγωγικά από ένα δεύτερο σημασιακό συστατικό. Άρα, εντοπίζεται ένα κοινό πρότυπο ερμηνείας για την κινητοποίηση της μεταφοράς και για τους δύο τύπους κατηγορημάτων.

Η ανάλυση που ακολουθήθηκε στην παρούσα εργασία παρουσιάζει τα ακόλουθα πλεονεκτήματα:

Α. Παρέχει τη δυνατότητα να περιγράψουμε με ποιον τρόπο προκύπτουν μεταφορικές δομές, όταν δεν υπάρχουν αντίστοιχες κυριολεκτικές.

Β. Παρέχει ένα κοινό πρότυπο ερμηνείας για τα ρήματα είτε παρουσιάζουν μόνο μεταφορική συμφραστικότητα είτε παρουσιάζουν κυριολεκτική και μεταφορική συμφραστικότητα. Ο μηχανισμός κινητοποίησης της μεταφοράς είναι κοινός και στις δύο περιπτώσεις.

Γ. Ερμηνεύει την κινητοποίηση της ίδιας της μεταφοράς. Η μεταφορά ως μηχανισμός σκέψης δεν ενεργοποιείται με τυχαίο τρόπο. Η ενεργοποίησή της δεν ανιχνεύεται ούτε στα πρωτεύοντα σημασιακά στοιχεία των ρηματικών κατηγορημάτων, τα ορίσματα. Η κινητοποίηση της μεταφοράς εντοπίζεται σε δευτερεύοντα σημασιακά συστατικά των ρηματικών κατηγορημάτων, τα οποία προκύπτουν συνεπαγωγικά από τα πρωτεύοντα.

4. Συμπέρασμα

Στη συγκεκριμένη εργασία μάς απασχόλησαν μεταφορικές φράσεις που δεν παρουσιάζουν αντίστοιχες κυριολεκτικές φράσεις. Επιχειρήσαμε μια σημασιολογική περιγραφή των παραδειγμάτων. Αποσυνθέσαμε σημασιολογικά τα κατηγορήματα, με σκοπό να ανιχνεύσουμε στα στοιχεία σημασίας των κατηγορημάτων την κινητοποίηση της μεταφοράς. Η μεταφορά είναι δύσκολο να ερευνηθεί έξω από τη γλώσσα, η κινητοποίηση της μεταφοράς εντοπίζεται στη γλώσσα, κατευθύνεται και περιορίζεται από τη γλώσσα. Η μεταφορά κινητοποιείται από τα σημασιακά συστατικά των λεξικών μονάδων.

Περίληψη

Η παρούσα εργασία συγκρίνει τη γλωσσική χρήση των εκπαιδευτικών πρωτοβάθμιας και δευτεροβάθμιας δημόσιας εκπαίδευσης στην Κύπρο. Παρόλο που το Υπουργείο Παιδείας και Πολιτισμού προωθεί τη συστηματική χρήση της Κοινής Νέας Ελληνικής (ΚΝΕ) στο επίσημο μαθησιακό περιβάλλον της τάξης, τα ερευνητικά δεδομένα από τις συμμετοχικές παρατηρήσεις καταδεικνύουν ότι η Κυπριακή Διάλεκτος (ΚΔ) χρησιμοποιείται σε ποικίλες περιστάσεις μέσα στην τάξη από τους εκπαιδευτικούς. Από τα γλωσσικά δεδομένα διαφαίνεται ότι ο βαθμός και το είδος της γλωσσικής ποικιλότητας εξαρτώνται από την κατάσταση επικοινωνίας μέσα στην τάξη. Τέλος, περιγράφονται οι ποικίλες τεχνικές διόρθωσης που χρησιμοποιούνται από τους εκπαιδευτικούς για αντικατάσταση της διαλέκτου με την πρότυπη ποικιλία.

Λέξεις κλειδιά: γλωσσική ποικιλότητα, κυπριακή διάλεκτος, γλωσσική χρήση εκπαιδευτικών, περίσταση επικοινωνίας

1. Εισαγωγή

Ο σκοπός της παρούσας εργασίας είναι να εξετάσει τη γλωσσική χρήση των εκπαιδευτικών στο διδασκαλικό σκηνικό της Κύπρου όπου σε πολιτικό και θεσμικό επίπεδο η Κοινή Νέα Ελληνική (ΚΝΕ) λειτουργεί ως η επίσημη γλωσσική ποικιλία, ενώ η Ελληνική Κυπριακή Διάλεκτος (ΚΔ) αντιμετωπίζεται ως η «χαμηλή» και ανεπίσημη ποικιλία, παραπέμποντας σε ένα σκηνικό κοινωνικής διγλωσσίας (Ferguson, 1959). Συγκεκριμένα η εργασία αυτή εξετάζει πρώτον, τη γλωσσική χρήση των εκπαιδευτικών στην τάξη ανάλογα με την περίσταση επικοινωνίας και δεύτερον διερευνά τις στρατηγικές που χρησιμοποιούν οι εκπαιδευτικοί για «διόρθωση» των διαλεκτικών τύπων που χρησιμοποιούν οι μαθητές μέσα στην τάξη. Αρχικά γίνεται μια ανασκόπηση σε ζητήματα που αφορούν τη γλωσσική εκπαιδευτική πολιτική με ιδιαίτερη αναφορά στο κοινωνικό-πολιτικό και εκπαιδευτικό συγκείμενο της Κύπρου. Ακολουθούνται τα ερευνητικά δεδομένα από τάξεις σε δημόσια σχολεία και ειδικότερα από τη γλωσσική χρήση των εκπαιδευτικών πρωτοβάθμιας και δευτεροβάθμιας εκπαίδευσης.

2. Θεσμική μονογλωσσία και γλωσσική πολιτική στην Κύπρο

Ο τρόπος που χρησιμοποιείται η γλώσσα στο σχολείο παρουσιάζει ιδιαίτερο κοινωνιογλωσσολογικό και παιδαγωγικό ενδιαφέρον, όχι μόνο γιατί η εκπαίδευση βρίσκεται συνήθως στο επίκεντρο των γλωσσικών συγκρούσεων (May 2001, Skutnabb-Kangas 2000), αλλά και γιατί μέσω της γλωσσικής εκπαιδευτικής πολιτικής διαμορφώνονται γλωσσικές στάσεις και τίθενται τα όρια για τη γλωσσική χρήση. Στην περίπτωση της Κύπρου το κοινωνικό-πολιτικό πλαίσιο αποτέλεσε τον καταλύτη για τη χάραξη εκπαιδευτικών γλωσσικών πολιτικών. Το γεγονός ότι η χώρα βίωσε τα τελευταία χρόνια έντονα πολιτικά γεγονότα (π.χ. ανεξαρτησία 1960, εθνοτικές συγκρούσεις 1963-1967, πραξικόπημα και εισβολή 1974) ενίσχυσε την τάση για εκπαίδευση εθνοκεντρικού χαρακτήρα (Smith 1991, Karageorgis 1986) στην οποία

το γλωσσικό μάθημα είχε κεντρική θέση (Persianis 1981, Karoulla-Vrikkis 2004). Από την ίδρυση της Κυπριακής Δημοκρατίας το 1960, η γλωσσική εκπαιδευτική πολιτική προωθούσε αποκλειστικά την επίσημη γλωσσική ποικιλία της Ελλάδας (βλ. καθαρεύουσα μέχρι το 1976 και δημοτική από το 1976 και μετά), συνδέοντας άμεσα την επιλογή αυτή με την προώθηση της ελληνικής ταυτότητας των Ελληνοκυπρίων (Ioannidou 2007, Sophocleous 2009β). Συγκεκριμένα, για πρακτικούς και πολιτικούς λόγους η ελληνοκυπριακή γλωσσική εκπαίδευση ακολουθούσε πιστά τις γλωσσικές μεταρρυθμίσεις, τα σχολικά εγχειρίδια και τα αναλυτικά προγράμματα της Ελλάδας (Koutsellini-Ioannidou 1997, Philippou 2007). Το θέμα της διαλέκτου δεν απασχόλησε ποτέ την επίσημη πολιτεία και υπήρξε σε μεγάλο βαθμό αγνοημένο¹, τόσο στα αναλυτικά προγράμματα όσο και στις εγκυκλίους του Υπουργείου Παιδείας. Σύμφωνα με διάφορες αναλύσεις (Karyolemu 2002, Paparavlou & Pavlou 2005) η κεντρική φιλοσοφία πίσω από την υιοθέτηση της ΚΝΕ ως αποκλειστικής επίσημης ποικιλίας ήταν η διαφύλαξη της εθνικής ενότητας, με κεντρική ιδεολογία τη συσχέτιση γλωσσικής ομοιογένειας, ενιαίας ταυτότητας και μιας «κοινής» και εθνικής γλώσσας (Coulmas 1988). Όπως υποστήριξε ο Buck (1916, σ. 47-49) «η γλώσσα είναι το σήμα κατατεθέν της εθνικότητας» και στη σύγχρονη Κύπρο η ΚΝΕ λειτουργεί, σε πολιτικό και ιδεολογικό επίπεδο, ως δείκτης ταυτότητας που πραγματώνει τη διάκριση μεταξύ «Ελληνοκυπρίων» και «Αλλων», διασφαλίζοντας τις στενές σχέσεις μεταξύ Ελλάδας και Κύπρου.

Οι γλωσσικές αυτές πολιτικές είχαν ως αποτέλεσμα τη διασύνδεση της ΚΝΕ με αξίες όπως η ισχύς, το κύρος, το ψηλό μορφωτικό επίπεδο, η ευγένεια και η υψηλή αισθητική (βλ. Paparavlou 1998, Ioannidou 2004). Αντίθετα, η ΚΔ διασυνδέθηκε με πιο υποβαθμισμένες αξίες όπως η ανεπισημότητα, το χαμηλό μορφωτικό επίπεδο κ.ο.κ.

Από τις υπάρχουσες έρευνες αναδεικνύεται μια ασυνέπεια και κυρίως μια σύγχυση από πλευράς εκπαιδευτικών όσον αφορά τις «νόμιμες» γλωσσικές ποικιλίες της τάξης. Όπως υποστηρίζουν οι Paparavlou και Pavlou (2005), η γλωσσική πολιτική στην Κύπρο είναι μια «υπόρρητη πολιτική», καθώς δεν υπάρχει επίσημο έγγραφο που να δηλώνει σαφώς ποια πρέπει να είναι η γλώσσα της εκπαίδευσης. Αυτή η ασάφεια, εντοπίζεται στην ετήσια έκθεση του Συμβούλιο της Ευρώπης για τη γλωσσική εκπαίδευση (βλ. ERC, 2004) όπου ο όρος «μητρική γλώσσα» χρησιμοποιείται στην Κύπρο είτε για αναφορά στην ΚΝΕ είτε στην ΚΔ.

Παρά το γεγονός ότι οι πλείστοι εκπαιδευτικοί αναγνωρίζουν την ΚΝΕ ως τη γλώσσα της εκπαίδευσης (Pavlou & Paparavlou 2004), κατέχουν αμφίθυμες στάσεις σχετικά με τη χρήση της διαλέκτου μέσα στην τάξη (Sophocleous 2009α). Σε μια έρευνα στην πρωτοβάθμια εκπαίδευση, οι εκπαιδευτικοί δεν «υιοθετούν μια ξεκάθαρη στάση όσον αφορά τη χρήση ή μη της διαλέκτου ως μέσο διδασκαλίας, ούτε εμφανίζονται να είναι υπέρ της ενεργής συμμετοχής τους για την επιλογή της γλωσσικής ποικιλίας που θα χρησιμοποιείται στην εκπαίδευση» (Paparavlou & Pavlou, 2005, σ.175).

Λαμβάνοντας υπόψη τον έντονο πολιτικό λόγο γύρω από τη γλώσσα της εκπαίδευσης και την ασάφεια των εκπαιδευτικών σχετικά με τη γλωσσική χρήση στο σχολείο, η παρούσα έρευνα θέτει δύο στόχους:

- (1) Να διερευνήσει τη γλωσσική χρήση των εκπαιδευτικών μέσα στην τάξη ανάλογα με την κατάσταση επικοινωνίας και
- (2) Να εξετάσει κατά πόσον οι εκπαιδευτικοί χρησιμοποιούν συγκεκριμένες στρατηγικές διόρθωσης, για να περιορίσουν τη χρήση της διαλέκτου στο επίσημο περιβάλλον της τάξης.

Η έρευνα επικεντρώνεται τόσο στην πρωτοβάθμια όσο και στη δευτεροβάθμια εκπαίδευση και τα δεδομένα που προκύπτουν από τα δύο περιβάλλοντα θα διερευνηθούν συγκριτικά. Η συνεισφορά της παρούσας εργασίας έγκειται στο γεγονός ότι έστω και αν η γλωσσική χρήση των εκπαιδευτικών στην πρωτοβάθμια (Ioannidou 2002, 2007, 2009β) και δευτεροβάθμια εκπαίδευση (Sophocleous 2009α, 2009β) έχει διερευνηθεί, δεν έχει γίνει σύγκριση μέχρι τώρα της γλωσσικής χρήσης των εκπαιδευτικών (ΚΝΕ ή ΚΔ) σε αυτά τα δύο περιβάλλοντα. Αξίζει να σημειωθεί ότι η σύγκριση των γλωσσικών πρακτικών των εκπαιδευτικών στην πρωτοβάθμια και δευτεροβάθμια βαθμίδα της εκπαίδευσης είναι χρήσιμη όχι μόνο επειδή πρόκειται για ομάδες διαφορετικής ηλικίας αλλά και λόγω της διαφορετικής φιλοσοφίας στη γλωσσική εκπαίδευση. Στο δημοτικό σχολείο, οι μαθητές πρέπει να «μεταβούν από το κυπριακό ιδίωμα

¹ Αξίζει να σημειωθεί ότι με την εκπαιδευτική μεταρρύθμιση του 2010 και την εφαρμογή της φιλοσοφίας του κριτικού γραμματισμού στο πρόγραμμα της γλώσσας (βλ. Χατζησαββίδης, Κωστούλη & Τσιπλάκου 2010, Υπουργείο Παιδείας και Πολιτισμού 2010), η γλωσσική ποικιλότητα αντιμετωπίζεται ως εργαλείο μεταγλωσσικής ενημερότητας. Για πρώτη φορά προσφέρεται συγκεκριμένο θεωρητικό γλωσσολογικό και παιδαγωγικό πλαίσιο για τη διδακτική αξιοποίηση της γλωσσικής ποικιλότητας στα δημόσια σχολεία της Κύπρου.

στη πρότυπη Νέα Ελληνική (Υπουργείο Παιδείας, 1994, σ. 44), ενώ στη δευτεροβάθμια εκπαίδευση αναμένεται να χρησιμοποιούν με επάρκεια την ΚΝΕ.

3. Μεθοδολογία

Για τη διερεύνηση της γλωσσικής χρήσης των εκπαιδευτικών χρησιμοποιήθηκαν τα εθνογραφικά εργαλεία της συμμετοχικής παρατήρησης στο φυσικό περιβάλλον της τάξης και των συνεντεύξεων. Η βασική φιλοσοφία της εθνογραφικής έρευνας είναι η συλλογή πολλαπλών και σε βάθος δεδομένων για εκτενές χρονικό διάστημα, με αναστοχαστική ερμηνεία των δεδομένων βάσει του συγκειμένου και του κοινωνικο-πολιτισμικού πλαισίου (Denzin 1997, Hammersley 1992, 1993).

Η συλλογή των δεδομένων διενεργήθηκε σε δώδεκα σχολεία (έξι πρωτοβάθμιας και έξι δευτεροβάθμιας εκπαίδευσης) στις αστικές περιοχές των πόλεων Α και Β για συνολικά δέκα μήνες. Αποφασίσαμε να επικεντρωθούμε στα αστικά κέντρα προκειμένου να αποφύγουμε τα βασιλεκτικά γλωσσικά χαρακτηριστικά που συναντούμε κυρίως σε αγροτικές περιοχές και να εστιάσουμε στις περιοχές όπου ομιλείται μια κοινή «αστική διάλεκτος» (Tsiplakou, Papapanlou, Pavlou & Katsoyannou 2007). Τα σχολεία επιλέχθηκαν με διττό στόχο: πρώτον, προσπαθήσαμε να αποφύγουμε σχολεία που χαρακτηρίζονταν από τις τοπικές εκπαιδευτικές υπηρεσίες ως ΖΕΠ (Ζώνες Ειδικής Προτεραιότητας), δηλαδή με ιδιαίτερα χαρακτηριστικά. Δεύτερον, επιλέξαμε σχολεία όπου γνωρίζαμε «άτομα σε θέσεις κλειδιά», οι οποίοι μας εξασφάλισαν πρόσβαση στις τάξεις και διευκόλυναν τη συλλογή δεδομένων.

Συνολικά, συμμετείχαν στην έρευνα 24 εκπαιδευτικοί, 12 πρωτοβάθμιας και 12 δευτεροβάθμιας εκπαίδευσης και από τα τρία επίπεδα της δημόσιας εκπαίδευσης στην Κύπρο (Δημοτικό, Γυμνάσιο, Λύκειο /Τεχνική Σχολή). Οι εκπαιδευτικοί διέφεραν στην εμπειρία και την ειδικότητα, ενώ οι πλείστοι είχαν παρόμοιο μορφωτικό επίπεδο (πτυχίο ή μεταπτυχιακό). Συγκεκριμένα, οι εκπαιδευτικοί του δημοτικού σχολείου ήταν δάσκαλοι τάξης (δηλαδή όχι εξειδικευμένοι σε ένα θέμα, αλλά εκπαιδευμένοι να διδάξουν όλα τα μαθήματα στην τάξη) ενώ οι καθηγητές της δευτεροβάθμιας εκπαίδευσης είχαν διάφορες ειδικεύσεις (Φιλολογία, Ιστορία, Μαθηματικά, Φυσική, Φυσική Αγωγή (Φ.Α.), Αγγλικά και Τεχνολογία).

Οι συμμετοχικές παρατηρήσεις διεξήχθησαν στην τάξη κάθε εκπαιδευτικού για πέντε σχολικές περιόδους. Συγκεκριμένα, στην πρωτοβάθμια εκπαίδευση παρατηρήσαμε μαθήματα στα ακόλουθα γνωστικά αντικείμενα: Ελληνικά, Μαθηματικά, Επιστήμη, Ιστορία, Γεωγραφία, Μουσική, Τέχνη, Σχεδιασμό και Τεχνολογία. Στη δευτεροβάθμια εκπαίδευση παρατηρήσαμε μαθήματα στα εξής γνωστικά αντικείμενα: Ελληνικά, Ιστορία, Αρχαία Ελληνικά (Αρχαιογνωσία), Θρησκευτική Εκπαίδευση, Πληροφορική, Τεχνολογία, Χημεία, Φυσική και Φυσική Αγωγή. Ακολούθως, διενεργήθηκαν συνεντεύξεις ημι-δομημένης μορφής με τους εκπαιδευτικούς.

Η ανάλυση των δεδομένων βασίστηκε στα μοντέλα ποιοτικής ανάλυσης που προτείνονται από τους Rubin και Rubin (2005) και Miles και Huberman (1994). Και στα δύο μοντέλα η βασική ιδέα είναι ότι οι ερευνητές, καθοδηγούμενοι από τα ερευνητικά τους ερωτήματα, πρέπει να «διαβάσουν» τα δεδομένα τους και να δημιουργήσουν κώδικες (Rubin και Rubin 2005) ή θεματικές κατηγορίες, τις οποίες στη συνέχεια θα πρέπει να ερμηνεύσουν και να κατανοήσουν, αναλαμβάνοντας το δύσκολο έργο που ο Denzin (1997) ονομάζει «τέχνη της ερμηνείας». Επομένως, τα τέσσερα βήματα στα οποία στηριχτήκαμε για την ανάλυση των δεδομένων ήταν: κωδικοποίηση, κατηγοριοποίηση, εννοιολογική χαρτογράφηση και δημιουργία θέματος.

Η ανάλυση της γλωσσικής χρήσης ήταν κυρίως βασισμένη στην έννοια του Hymes (1985) για το «επικοινωνιακό ρεπερτόριο», το οποίο εστιάζει στους εξής τρεις άξονες του λόγου της τάξης: α). εντοπισμός των γλωσσικών ποικιλιών, β). κατηγοριοποίηση ανάλογα με την κατάσταση και γ). διερεύνηση μορφών «καταλληλότητας/νομιμοποίησης» (appropriateness). Οι γλωσσικές ποικιλίες προσδιορίστηκαν με την κλασική μέθοδο προσδιορισμού της διαλέκτου, όπου από ένα σώμα προφορικών δεδομένων εντοπίζονται οι πιο συχνόχρηστοι γλωσσικοί τύποι οι οποίοι θεωρούνται και ο «πυρήνας» των χαρακτηριστικών για το συγκεκριμένο σώμα κειμένων (βλ. Lucas & Bordes 1994, Ioannidou 2009α, 2009β). Ακολούθησε, η κατηγοριοποίηση της ομιλίας των εκπαιδευτικών σε περιστάσεις επικοινωνίας (Wolfram, Temple-Adger, & Christian 1999). Για κάθε εκπαιδευτικό, χρησιμοποιήθηκε ένας πίνακας για να σημειώνεται η συχνότητα με την οποία χρησιμοποιήθηκε είτε η ΚΔ είτε η ΚΝΕ σε διάφορες περιστάσεις επικοινωνίας σε κάθε μάθημα (βλ. Πίνακα 1 για παράδειγμα).

Μετά την κωδικοποίηση και τον καθορισμό των κατηγοριών, έγινε προσπάθεια για εντοπισμό μοτίβων και τάσεων στη γλωσσική χρήση των εκπαιδευτικών. Για κάθε εκπαιδευτικό έγινε μια χαρτογράφηση των βασικών παραμέτρων της έρευνας (Simons, 2009) και στο τελικό στάδιο της ανάλυσης των δεδομένων, δημιουργήθηκαν εξατομικευμένοι πίνακες όπου συνόψιζαν προσωπικές πληροφορίες, αξίες και

συμπεριφορές στα υπό εξέταση θέματα (όπως προέκυψαν από τις συνεντεύξεις) και επιλεγμένα αποσπάσματα από τις παρατηρήσεις στην τάξη.

Πίνακας 1 Περιστάσεις επικοινωνίας στη γλωσσική χρήση των εκπαιδευτικών

4. Αποτελέσματα: Η γλωσσική χρήση των εκπαιδευτικών

4.1 Περιστάσεις επικοινωνίας μέσα στην τάξη.

Οι εκπαιδευτικοί είχαν το δικό τους προσωπικό στιλ ομιλίας και ο τρόπος με τον οποίο χρησιμοποιούσαν τις ποικιλίες της πρότυπης και της διαλέκτου διέφερε. Μερικοί έτειναν να συγκλίνουν περισσότερο προς την ΚΝΕ, ενώ άλλοι χρησιμοποιούσαν συχνότερα διαλεκτικά στοιχεία είτε με εναλλαγή² (Auer 1998) είτε με μίξη (Muysken 2000) κωδίκων. Παρά τις ιδιολέκτους τους, στη λεπτομερή ανάλυση των δεδομένων διαφάνηκε ότι υπήρχαν κάποια επαναλαμβανόμενα, στην πλειονότητά των εκπαιδευτικών, μοτίβα που σχετίζονταν κυρίως με τη γλωσσική χρήση και την επισιμότητα ή όχι της περιστασης επικοινωνίας.

4.1.1 Επίσημες περιστάσεις και χρήση της «πρότυπης» γλωσσικής ποικιλίας

Κατά τη διάρκεια της «κύριας διδασκαλίας», δηλαδή σε περιστάσεις που συνδέονταν άμεσα με τη διδακτική διαδικασία (π.χ. ερωτήματα σχετικά με το κείμενο, ανάγνωση, γραφή) η μεγάλη πλειοψηφία των εκπαιδευτικών τόσο από την πρωτοβάθμια (10/12) όσο και από τη δευτεροβάθμια (9/12) εκπαίδευση χρησιμοποιούσαν μια παραλλαγή της πρότυπης, αυξάνοντας τους γλωσσικούς τύπους της ΚΝΕ στην ομιλία τους ή αποφεύγοντας μορφολογικά και συντακτικά στοιχεία της διαλέκτου. Αυτές οι περιστάσεις ήταν συνήθως συνυφασμένες με τη μελέτη γραπτού κειμένου από το σχολικό εγχειρίδιο. Από την ανάλυση των γλωσσικών δεδομένων προέκυψε ότι όταν οι εκπαιδευτικοί έθεταν ερωτήσεις, εξηγούσαν έννοιες, ή περιέγραφαν και επεξηγούσαν το κείμενο, συμπεριλάμβαναν στοιχεία της πρότυπης νεοελληνικής στο λόγο τους. Τα αποσπάσματα 1 και 2 αποτελούν χαρακτηριστικά παραδείγματα αυτής της τάσης.

Απόσπασμα 1: Τεχνολογία, Γ' Λυκείου

³**Και** έτσι σε γενικές γραμμές μπορούμε να πούμε ότι η Κυπριακή ξυλουργική βιομηχανία **ανέκαμψε και είχε πάρει** μία τρομερή άνοδο, μετά την ανεξαρτησία **μέχρι** την τουρκική εισβολή.

² Παρόλο που ο διαχωρισμός «εναλλαγή» και «μίξη» κωδίκων θεωρείται προβληματικός (βλ. Muysken 2000) αφού επικρατεί η άποψη ότι θα πρέπει να μιλάμε κυρίως για «μίξη» κωδίκων (code mixing, Muysken, 2000), για τους σκοπούς της παρούσας έρευνας οι όροι χρησιμοποιούνται με τον πιο παραδοσιακό τρόπο για να υποδηλώσουν εναλλαγή από πρόταση σε πρόταση (code switching) ή εναλλαγή μέσα στην πρόταση (μίξη -code mixing).

³ Υπογραμμισμένες λέξεις = ΚΔ

Σκιασμένες λέξεις = ΚΝΕ

Δ= Δασκάλα / Δάσκαλος

Κ= Καθηγήτρια / Καθηγητής

Μ= Μαθήτρια/ Μαθητής

(π)= Παύση στο λόγο

Απόσπασμα 2: Ελληνικά, Ε΄ Δημοτικού

Ξαναλέω το κείμενο για δούμε αν το εγράψαμεν με **τις (π)** τόνους του με **όλα** που χρειάζεται.

Στο απόσπασμα 1 δεν υπάρχουν καθόλου διαλεκτικά στοιχεία, τουλάχιστον σε μορφολογικά και συντακτικό επίπεδο. Ο εκπαιδευτικός παραδίδει μάθημα και είναι έκδηλο ότι η κατάσταση σχετίζεται άμεσα με αυτό που ονομάσαμε «κύρια διδασκαλία» με εμφανή την επιλογή τύπων της ΚΝΕ και την αποφυγή διαλεκτικών δεικτών. Παρομοίως, στο δεύτερο απόσπασμα η εκπαιδευτικός δίνει οδηγίες στους μαθητές στο μάθημα των Ελληνικών και χρησιμοποιεί κυρίως τύπους της ΚΝΕ. Υπάρχει μια παρεμβολή στη διάλεκτο (αύξηση αορίστου στον τύπο εγράψαμεν), αλλά από την ανάλυση της ιδιολέκτου της συγκεκριμένης εκπαιδευτικού προέκυψε ότι χρησιμοποιούσε αρκετά διαλεκτικά στοιχεία στο λόγο της και αυτά μειώνονταν δραματικά σε πιο επίσημες περιστάσεις μέσα στην τάξη, περιστάσεις που σχετίζονταν δηλαδή άμεσα με τη διδασκαλία.

Αν και δεν παρατηρήθηκαν σημαντικές διαφορές μεταξύ της γλωσσικής χρήσης των εκπαιδευτικών της πρωτοβάθμιας και δευτεροβάθμιας εκπαίδευσης, πρέπει να σημειωθεί ότι οι εκπαιδευτικοί με ειδικευση σε θεωρητικά θέματα και θέματα που σχετίζονται με τη γλώσσα, δηλαδή, αυτοί που δίδασκαν Ελληνικά, Αρχαία Ελληνικά και Ιστορία αντιμετώπιζαν ευνοϊκότερα τη χρήση της ΚΝΕ κατά τη διάρκεια του μαθήματος. Αυτό πιθανόν να οφείλεται στην επικρατούσα άποψη ότι σε αυτά τα μαθήματα η ικανότητα και η επάρκεια των μαθητών στην ΚΝΕ αποτελεί βασικό κριτήριο επιτυχίας. Αυτή η άποψη απεικονίζεται ξεκάθαρα στο ακόλουθο απόσπασμα συνέντευξης: «*Πρέπει να θυμόμαστε ότι οι οδηγίες που δίνονται [από το Υπουργείο] αναφέρουν ότι η διδασκαλία πρέπει να γίνεται στην ΚΝΕ(...). Υπάρχουν περιστάσεις όπου θα προβαίναμε ακόμα και σε διορθώσεις, με σκοπό να δείξουμε στους μαθητές τι θα πρέπει να γράφουν στα τετράδιά τους. Σε περιπτώσεις όπου χρησιμοποιούν βαρετή κυπριακή λέξη, αυτόματα θα την αντικαταστήσω με μια άλλη λέξη από την ΚΝΕ*» (Δάσκαλος Γλώσσας Η, Α Δημοτικό σχολείο).

4.1.2 Ανεπίσημες περιστάσεις και χρήση της ΚΔ

Ένα άλλο θέμα που προέκυψε είναι ότι και στις δύο βαθμίδες της εκπαίδευσης, σε «ανεπίσημες» περιστάσεις επικοινωνίας, περιστάσεις δηλαδή που σχετίζονταν με την οργάνωση της τάξης, με ανεπίσημα σχόλια και συζητήσεις εκτός της «κύριας διδασκαλίας», η μεγάλη πλειοψηφία των εκπαιδευτικών της πρωτοβάθμιας εκπαίδευσης (10/12) χρησιμοποιούσαν διαλεκτικά στοιχεία σε διαφορετικό βέβαια εύρος και συχνότητα ανάλογα με τον κάθε εκπαιδευτικό. Αντίθετα, οι εκπαιδευτικοί δευτεροβάθμιας εκπαίδευσης παρουσίασαν μεγαλύτερη διαφοροποίηση στον τρόπο που χρησιμοποιούσαν τη διάλεκτο στις ανεπίσημες περιστάσεις επικοινωνίας της τάξης. Συγκεκριμένα, η πλειοψηφία των εκπαιδευτικών (5/12) χρησιμοποιούσαν κάποιους διαλεκτικούς τύπους αλλά διατηρούσαν και συγκεκριμένα χαρακτηριστικά στην ΚΝΕ. Επίσης, το ένα τρίτο των εκπαιδευτικών (4/12) διατηρούσε την ΚΝΕ και στις πιο ανεπίσημες περιστάσεις ενώ μια άλλη ομάδα (3/12) χρησιμοποιούσε αποκλειστικά τη διάλεκτο. Τα αποσπάσματα 3-4 αποτυπώνουν αυτή την τάση.

Απόσπασμα 3: Ελληνικά, Στ΄ Δημοτικού

Δ: Εδιόρθωσες το; Εδιόρθωσες το; Είνταλος ε; Έτο ποιος έννα την ιγράψει;

Μ: εξίγασα κυρία

Δ: Α, ούλλα ξιγάνεις τα, έτο αδιόρθωτη η ορθογραφία τζιαι εφύλαξες την.

Απόσπασμα 4: Μαθηματικά, Γ΄ Λυκείου

Κ: Λοιπόν, **εδώ πέρα. Με ρώτησε** κάποια το ημίτονο **και** το συνημίτονο **τι είναι** πάντοτε; (...)

Μ: Διότι ο αριθμητής εν πάντα μικρότερος που τον παρονομαστήν.

[]= σχόλια

ΚΕΦΑΛΑΙΑ ΓΡΑΜΜΑΤΑ = Αύξηση στην ένταση της φωνής

Κ: Ρε, εσένα είπα σου να μεν απαντάς ρε!

[Όλοι οι μαθητές γελούν]

Κ: Ρε, εν σου παράντζεϊλα να μεν το κάμνεις ρε;

Στο απόσπασμα 4 ο εκπαιδευτικός χρησιμοποιεί τύπους της ΚΝΕ για να εξηγήσει έννοιες που σχετίζονται με το μάθημα (ημίτονο, συνημίτονο) αλλά στη συνέχεια κάνει εναλλαγή στη διάλεκτο για να επιπλήξει ένα μαθητή που μιλούσε χωρίς να πάρει άδεια. Ο εκπαιδευτικός υιοθετώντας ένα χιουμοριστικό και φιλικό ύφος και χρησιμοποιώντας τη διάλεκτο σε ένα πιο ανεπίσημο υφολογικό επίπεδο, σχολιάζει τη στάση του μαθητή χρησιμοποιώντας το βασιλευκτικό ρηματικό τύπο «παράντζεϊλα» (συμβούλεψα).

Αντίθετα, στο απόσπασμα 3 η εκπαιδευτικός κάνει παρατήρηση σε ένα μαθητή διατηρώντας υψηλό τόνο φωνής και χρησιμοποιώντας αποκλειστικά τη διάλεκτο. Οι γλωσσικές επιλογές της εκπαιδευτικού πιθανόν να οφείλονται στο γεγονός ότι η κατάσταση αυτή δε συμβαίνει κατά την «κύρια διδασκαλία» και γι αυτό ίσως δεν αισθάνεται την ανάγκη για χρήση της πρότυπης. Μια άλλη ερμηνεία θα μπορούσε να είναι ότι η εκπαιδευτικός είναι πολύ θυμωμένη, αφήνει κατά μέρος τις επισημότητες και χρησιμοποιεί τη μητρική της γλωσσική ποικιλία, κάτι που έχει αναδειχτεί και από παρόμοιες έρευνες (π.χ. Ιωαννίδου 2002, Tsiplakou & Hadjioannou 2010). Αυτό επιβεβαιώθηκε και στις συνεντεύξεις των εκπαιδευτικών, όπου η συντριπτική πλειοψηφία (22 από τους 24), εξήγησαν ότι δεν χρησιμοποιούν συνεχώς την ΚΝΕ, καθώς υπήρχαν περιπτώσεις όπου αισθάνονταν την ανάγκη να κάνουν εναλλαγή στην ΚΔ.

4.1.3 Μίξη και εναλλαγή των γλωσσικών ποικιλιών στην τάξη

Τόσο οι εκπαιδευτικοί της πρωτοβάθμιας όσο και της δευτεροβάθμιας εκπαίδευσης χρησιμοποιούσαν εναλλαγή ή μίξη κωδίκων ανάλογα με την κατάσταση επικοινωνίας. Ωστόσο, μια πιο λεπτομερής ανάλυση των δεδομένων κατέδειξε ότι υπήρχε διαφοροποίηση στον τρόπο με τον οποίο γινόταν αυτή η εναλλαγή. Συγκεκριμένα, οι περισσότεροι εκπαιδευτικοί της δημοτικής εκπαίδευσης (7/12) χρησιμοποιούσαν αρκετά διαλεκτικά στοιχεία, ακόμα και στις πιο επίσημες περιστάσεις που σχετίζονταν με την «κύρια διδασκαλία», παρουσίαζαν δηλαδή αυξημένη «μίξη» κωδίκων στο λόγο τους. Αντίθετα, οι εκπαιδευτικοί της δευτεροβάθμιας εκπαίδευσης φαίνεται να διατηρούσαν μια πιο αυστηρή διάκριση μεταξύ περιστάσεων και γλωσσικής ποικιλίας, χρησιμοποιώντας επομένως περισσότερο την εναλλαγή κωδίκων και λιγότερο τη μίξη στο λόγο τους (μόνο 4 από τους 12 χρησιμοποιούσαν τη μίξη-κωδίκων, ενώ 6 από τους 12 δεν χρησιμοποιούσαν τη μίξη-κωδίκων καθόλου και 2 χρησιμοποιούσαν σπάνια τη μίξη κωδίκων).

Συγκεκριμένα, στο απόσπασμα 5, η εκπαιδευτικός χρησιμοποιεί την πρότυπη ποικιλία για να δώσει οδηγίες και να ενθαρρύνει τους μαθητές, αλλά χρησιμοποιεί τη διάλεκτο για να ελέγξει αν οι μαθητές ακούουν τις οδηγίες της. Κατά παρόμοιο τρόπο, στο απόσπασμα 6 χρησιμοποιεί κυρίως την πρότυπη για να δώσει οδηγίες, αλλά τη διάλεκτο για εμφιασμένους σκοπούς. Τα δεδομένα αυτά καταδεικνύουν ότι παρόλο που η «διδασκαλία» θεωρείται η κατεξοχήν περίπτωση για τη χρήση της πρότυπης ποικιλίας, τόσο από τους εκπαιδευτικούς αλλά και από τους φορείς εκπαιδευτικής πολιτικής (βλ. Ιωαννίδου 2009), η διάλεκτος χρησιμοποιείται από τους εκπαιδευτικούς με ποικίλο τρόπο. Ενδιαφέρον παρουσιάζει το γεγονός ότι στις συνεντεύξεις τους οι εκπαιδευτικοί υποστήριξαν ότι σε περιστάσεις που σχετίζονται με τη διδακτική διαδικασία χρησιμοποιούν αποκλειστικά την ΚΝΕ κάτι που καταρρίπτεται από τις παρατηρήσεις.

Απόσπασμα 5: Ελληνικά, Ε' Δημοτικού

Λίγο πιο βιαστικά, όποιος **τελειώνει διαβάξει** το δεύτερο μέρος του «οι μαστόροι παίζουν θέατρο» -> ακούσετε; για να **μην το λέω (π)** όποιος τελειώνει κλείει την ορθογραφία

Απόσπασμα 6: Ελληνικά, Δ' Δημοτικού

Όταν τελειώσουμε, όταν **διαβάσουμε**, ξεκινάς να διορθώνεις. Τωρά διαβάστε και ξεκινά τα

Από το σύνολο των γλωσσικών δεδομένων διαφάνηκε ότι οι εκπαιδευτικοί κατά τη διδασκαλία, ξεκινούσαν συνήθως χρησιμοποιώντας την πρότυπη, είτε για να δώσουν οδηγίες (απόσπασμα 5) ή να εξηγήσουν έννοιες (αποσπάσματα 1 και 2), είτε για να θέσουν ερωτήσεις (αποσπάσματα 3 και 4). Κατά τη

διάρκεια αυτών των επεισοδίων όμως, υπήρχαν υπο- περιστάσεις στις οποίες χρησιμοποιούσαν τη διάλεκτο όπως η επανάληψη εννοιών, οι επεξηγήσεις στους μαθητές και ο έλεγχος κατανόησης. Επομένως, ακόμα και στις περιστάσεις όπου η νόμιμη και θεσμοθετημένη ποικιλία ήταν η ΚΝΕ, υπήρχαν περιπτώσεις όπου οι εκπαιδευτικοί ήθελαν να εμφανίζονται πιο πρακτικοί και λιγότερο «τυπικοί» και ως εκ τούτου, χρησιμοποιούσαν τη διάλεκτο είτε με τη μίξη κωδίκων (Απόσπασμα 6) είτε με την εναλλαγή τους (Απόσπασμα 5). Γενικά, αυτό που προέκυψε είναι ότι κυρίως στα δημοτικά σχολεία, ακόμη και σε τομείς όπου αναμενόταν η χρήση της πρότυπης, η παρουσία της διαλέκτου ήταν αναμφισβήτητη εμφανής. Αντίθετα, η πρότυπη ήταν εμφανής και κυρίαρχη σε περιστάσεις που είχαν τη μορφή ερωτο-απάντησης και συνδέονταν με τη μελέτη γραπτού κειμένου. Η διαπίστωση αυτή καταδεικνύει ότι γινόταν χρήση της διαλέκτου σε πιο φυσικές συζητήσεις στις οποίες οι ισχυρές νόρμες της διδασκαλίας δεν είχαν τόση επιρροή.

Αντίθετα, η χρήση της πρότυπης από τους εκπαιδευτικούς της δευτεροβάθμιας εκπαίδευσης ήταν λιγότερο επιρρεπής στη μίξη κωδίκων. Αν και υπήρχαν εκπαιδευτικοί (4 στους 12) που κατά τη διάρκεια της διδασκαλίας προέβαιναν στη μίξη κωδίκων κατά παρόμοιο τρόπο με αυτό των εκπαιδευτικών της πρωτοβάθμιας εκπαίδευσης, η πλειοψηφία (8 στους 12) χρησιμοποιούσε συστηματικά την πρότυπη σε περιστάσεις που σχετίζονταν με τη διδασκαλία. Ένα παράδειγμα αυτής της τάσης παρουσιάζεται στο Απόσπασμα 7, όπου ο εκπαιδευτικός θέτει το ερώτημα στην πρότυπη, δέχεται την απάντηση στη διάλεκτο, και διατηρεί την πρότυπη στο σχολιασμό της απάντησης του μαθητή.

Απόσπασμα 7: Ιστορία, Β' Γυμνασίου

Κ: Θυμάστε **τι είναι** ο Μερκαντισμός;

Μ: Κύριε, εκάμαμεν τον πέρσι αν δε κάμνω λάθος.

Κ: Ναι, πρέπει να τον **έχετε κάνει και** επίσης **είχαμε πει** κάτι την προηγούμενη φορά για τον μερκαντισμό.

Η τάση αυτή, επιβεβαιώνεται και σε παρόμοια περιστατικά και με άλλους εκπαιδευτικούς της δευτεροβάθμιας εκπαίδευσης και τονίστηκε στις συνεντεύξεις των εκπαιδευτικών: «*Τους το κάνω σαφές ότι πρέπει να χρησιμοποιούμε την ΚΝΕ στην τάξη όχι επειδή η ΚΔ είναι υποδεέστερη, αλλά γιατί χρειάζονται να μάθουν να μιλούν στην ΚΝΕ και αυτό θα συμβεί μόνο αν υπάρχει συνεχής χρήση της στην τάξη*» (Εκπαιδευτικός Ε, Γυμνάσιο Β).

4.2 Τεχνικές «διόρθωσης» της ΚΔ

Ένα επιπλέον σημαντικό στοιχείο που προέκυψε ήταν ότι σε περιστάσεις που σχετίζονταν με τη διαδικασία διδασκαλίας υπήρχαν πολλές περιπτώσεις όπου οι εκπαιδευτικοί σχολίαζαν ή διόρθωναν τη χρήση της διαλέκτου από τους μαθητές. Αυτό γινόταν με την υιοθέτηση τριών κυρίως στρατηγικών που σκοπό είχαν να τονίσουν την ανάγκη και σημασία στη χρήση της πρότυπης ποικιλίας (ΚΝΕ). Οι τεχνικές αυτές ήταν οι εξής: α) επανάληψη της λέξης στην πρότυπη (απόσπασμα 8), β) άμεση «διόρθωση» της διαλέκτου και αντικατάστασή της με τον αντίστοιχο πρότυπο τύπο (απόσπασμα 9) και γ). προτροπή στους μαθητές να παράγουν τον αντίστοιχο τύπο στην πρότυπη ποικιλία (απόσπασμα 10). Στα τρία αποσπάσματα που ακολουθούν είναι εμφανής ο τρόπος που οι τρεις τεχνικές χρησιμοποιούνταν από τους εκπαιδευτικούς στην προσπάθειά τους να τονίσουν τη σημασία χρήσης της «κατάλληλης» ποικιλίας κατά τη διάρκεια της διδασκαλίας.

Απόσπασμα 8: Τέχνη, Α' Δημοτικού

Δ: Ποιος ξέρει ποια **είναι** η διαφορά μεταξύ των λιονταριών με τη μεγάλη χ αίτη **και αυτών** που **δεν** έχουν;

Μ1: Ε, τζείνα εν άλλα ζώα

Δ: **Όχι, δεν είναι.**

M2: Τα αγόρια έχουν **μεγάλα** μαλλιά, ενώ τα κορίτσια **δεν** έχουν.

Δ: Μπράβο. Εμείς διαφέρουμε **από** τα λιοντάρια. Εμείς έχουμε μακριά μαλλιά **και** τα αγόρια κοντά συνήθως.

M3: Έσσειε τζιαί αγόρια με μακριά μαλλιά.

T: Ναι, **ΕΧΕΙ ΚΑΙ** αγόρια με μακριά μαλλιά.

Στο απόσπασμα 8 παρακολουθούμε μια συζήτηση που αναπτύχθηκε στο μάθημα της Τέχνης, μεταξύ της εκπαιδευτικού και των μαθητών σχετικά με τα θηλυκά και αρσενικά λιοντάρια. Η εκπαιδευτικός, χρησιμοποιώντας στοιχεία της KNE ζητάει από τους μαθητές να της πουν τη διαφορά ανάμεσα σε λιοντάρια που έχουν χαιτή και σ' εκείνα που δεν έχουν. Μια μαθήτρια (M1) δίνει λανθασμένη απάντηση χρησιμοποιώντας τη διάλεκτο, και η εκπαιδευτικός απορρίπτει την απάντηση της χρησιμοποιώντας την KNE. Ακολούθως, ένα μαθητής (M2) παρέχει την απάντηση που αναμένει να ακούσει η εκπαιδευτικός, χρησιμοποιώντας μάλιστα και την «κατάλληλη» ποικιλία και επιβραβεύεται για αυτό. Στη συνέχεια, η εκπαιδευτικός, σχολιάζοντας την απάντηση του μαθητή (M2) εξηγεί ότι οι άνθρωποι διαφέρουν από τα λιοντάρια, δεδομένου ότι οι γυναίκες έχουν μακριά μαλλιά σε αντίθεση με τους άντρες. Όταν όμως μια άλλη μαθήτρια διαφωνεί (M3) με το σχολιασμό της δασκάλας της, τονίζοντας ότι υπάρχουν και αγόρια με μακριά μαλλιά, η εκπαιδευτικός, παρόλο που φαίνεται να συμφωνεί με τη μαθήτρια, δε σχολιάζει την απάντησή της αλλά την επαναλαμβάνει στην πρότυπη μορφή της. Αυτό που αποκαλύπτει αυτό το επεισόδιο είναι ότι από τους τρεις μαθητές, αυτός που επαινέθηκε και του δόθηκε η αίσθηση ότι ήταν «σωστός» ήταν ο δεύτερος μαθητής (M2), ο οποίος ανταποκρίθηκε στις προσδοκίες της εκπαιδευτικού τόσο από πλευράς περιεχομένου όσο και από πλευράς γλωσσικής χρήσης. Αντίθετα, ο πρώτος μαθητής (M1) όχι μόνο είπε κάτι ανακριβές, αλλά χρησιμοποίησε και ως μέσο έκφρασης τη διάλεκτο. Με τον ίδιο τρόπο, η τρίτη μαθήτρια (M3) διαφώνησε με τις στερεότυπες διακρίσεις της εκπαιδευτικού για τους άντρες και τις γυναίκες (κοντά και μακριά μαλλιά), δείχνοντας με σαφήνεια τον τρόπο σκέψης της και κατά κάποιον τρόπο τον θάρρος της να αμφισβητήσει την εξουσία της εκπαιδευτικού. Ωστόσο, η χρήση διαλεκτικών τύπων στο λόγο της, την έφερε αντιμέτωπη με την απόρριψη της εκπαιδευτικού, μια πρακτική που έχει αναδειχτεί και σε προηγούμενες έρευνες (Ioannidou 2009α, Τσιπλάκου 2007).

Η δεύτερη τεχνική, δηλαδή η άμεση διόρθωση διαφαίνεται στο απόσπασμα 9. Εδώ, ο μαθητής θέτει μια διευκρινιστική ερώτηση στη δασκάλα, χρησιμοποιώντας μια μίξη πρότυπων και διαλεκτικών τύπων. Αν και αυτή η περίπτωση δεν συνδέεται άμεσα με την «κύρια διδασκαλία» αφού ο μαθητής ζητάει οδηγίες σχετικά με την επόμενη τους δραστηριότητα, η εκπαιδευτικός διορθώνει άμεσα το μαθητή, παρέχοντας και τον αντίστοιχο πρότυπο γλωσσικό τύπο. Η άμεση διόρθωση πραγματοποιείται στην KNE τονίζοντας ανοιχτά ποια λεξιλογικά στοιχεία *πρέπει* και *δεν πρέπει* να χρησιμοποιούνται στην τάξη. Το παράδοξο, ωστόσο στη γλωσσική χρήση της εκπαιδευτικού είναι ότι διορθώνει κάποιους τύπους που η ίδια θεωρεί στιγματισμένους (π.χ. έννα – ΚΔ, θα – KNE) αλλά διατηρεί κάποιους άλλους τύπους της διαλέκτου (π.χ. κάμουμε – ΚΔ). Διορθώνει δηλαδή άμεσα τους μαθητές για τη χρήση διαλεκτικών στοιχείων στο λόγο τους, αλλά στην εκφώνηση-διόρθωσή της χρησιμοποιεί και η ίδια διαλεκτικούς τύπους.

Απόσπασμα 9: Τεχνολογία, Ε' Δημοτικού

M1: Κυρία **τι έννα κάμουμεν**;

Δ: **ΟΧΙ ΤΙ 'ΕΝΝΑ ΚΑΜΟΥΜΕ', τι 'ΘΑ' κάμουμε**

Τέλος, η τρίτη τεχνική στη «διόρθωση» διαλεκτικών στοιχείων ήταν μέσω της προτροπής και της ενθάρρυνσης για αντικατάσταση από τους ίδιους τους μαθητές, διαλεκτικών τύπων με τους αντίστοιχους πρότυπους. Αυτή η τεχνική παρατηρήθηκε κυρίως στις τάξεις της δευτεροβάθμιας εκπαίδευσης (π.χ. απόσπασμα 10).

Απόσπασμα 10: Ιστορία, Β' Γυμνασίου

M: Λόγω της βαριάς φορολογίας, **δεν** μπορούσαν να πληρώσουν. **Και** επίσης **δεν** συμπαθούσαν ορισμένους στρατιωτικούς, **και**, ναι, **δεν** ήταν καλοί, **και** ηθέλασιν να πάσιν (π)

(οι μαθητές γελάνε στην τάξη)

Κ: (χαμογελά) Δηλαδή, **ήθελαν... Δεν, δεν θεωρούνταν** ικανοί για το έργο τους;

Μ: Ναι!

Από το παράδειγμα αυτό διαφαίνεται ότι στο πιο «θεωρητικό» πλαίσιο του μαθήματος της Ιστορίας, οι μαθητές αναμένεται να χρησιμοποιούν την πρότυπη και αυτή η νόρμα επιβάλλεται όχι μόνο από τον εκπαιδευτικό αλλά και από τους συμμαθητές τους. Προφανώς, σ' ένα μάθημα όπως η Ιστορία, το «κατάλληλο» μέσο αλληλεπίδρασης θεωρείται η ΚΝΕ. Κατά συνέπεια, οι απαντήσεις στην ΚΔ μπορεί να ακούγονται εμφανώς χιουμοριστικές και ενδεχομένως εκτός πλαισίου. Στο συγκεκριμένο παράδειγμα η επιλογή της γλωσσικής ποικιλίας είναι πολύ σημαντική για αυτό και ο εκπαιδευτικός, δίνοντας το παράδειγμα παρακινεί το μαθητή να ολοκληρώσει το λόγο του στην ΚΝΕ.

Η ανάλυση των παραπάνω αποσπασμάτων υποδεικνύει ότι υπήρχαν ποικίλοι παράγοντες που παρακινούσαν τους εκπαιδευτικούς να προβούν σε γλωσσικές διορθώσεις. Σε κάποιες περιπτώσεις οι εκπαιδευτικοί παρενέβαιναν στη γλωσσική χρήση βασιλεκτικών χαρακτηριστικών της διαλέκτου (π.χ. απόσπασμα 11). Ταυτόχρονα, σε άλλες περιπτώσεις ακόμα και ένας μόνο διαλεκτικός τύπος γινόταν αντικείμενο «διόρθωσης» σε περιβάλλοντα όπου το πλαίσιο επικοινωνίας ήταν συγκεκριμένο (π.χ. κύρια διδασκαλία). Τέλος, υπήρχαν περιπτώσεις όπου οι εκπαιδευτικοί απλά απέρριπταν το λόγο-γλωσσικές επιλογές των μαθητών, επιβάλλοντας την εξουσία τους και διατηρώντας παραδόξως οι ίδιοι τη χρήση διαλεκτικών χαρακτηριστικών (π.χ. απόσπασμα 9).

Το απόσπασμα 11 για παράδειγμα, από μια τάξη Φυσικής Αγωγής, καταδεικνύει ξεκάθαρα τις προσπάθειες κάποιων εκπαιδευτικών για περιορισμό της χρήσης βασιλεκτικών χαρακτηριστικών της ΚΔ στην τάξη. Μια προσπάθεια όμως που σε αρκετές περιπτώσεις τόνιζε τη σημασία της γλωσσικής μορφής παρά του περιεχομένου και δυσχέραινε με αυτό τον τρόπο την επικοινωνία εκπαιδευτικού-μαθητή, σε επίπεδο κυρίως εξουσίας και αξιών. Συγκεκριμένα, στο απόσπασμα αυτό, ο εκπαιδευτικός αρνείται κατηγορηματικά τη βοηθητική υπόδειξη του μαθητή μεταθέτοντας το βάρος της συζήτησης όχι στον αρχικό επικοινωνιακό σκοπό αλλά στη μορφή του γλωσσικού κώδικα. Με αυτό το επεισόδιο, το μήνυμα που παίρνει ο συγκεκριμένος μαθητής είναι ότι η αλληλεπίδραση του με τον καθηγητή δεν είχε να κάνει με επικοινωνιακούς σκοπούς αλλά με γλωσσικές νόρμες.

Απόσπασμα 11: Φυσική Αγωγή, Γ' Γυμνασίου

Κ: Πού **είναι** ο Αντρέας;

Μ1: Κύριε, ο Αντρέας εν πουποδά

Τ: **Δεν** ακούω

Σ: Ο Αντρέας εν ΠΟΥΠΟΔΑ

Τ: Ο Αντρέας είναι ΑΠ' ΕΔΩ!

Συνολικά, δύο σημαντικά ευρήματα αναδύονται από τα στοιχεία που συλλέχθηκαν μέσω της παρατήρησης της τάξης και των συνεντεύξεων των εκπαιδευτικών. Πρώτον, υπήρχαν περισσότερα επεισόδια «διόρθωσης» στην πρωτοβάθμια εκπαίδευση. Μια πιθανή ερμηνεία θα μπορούσε να είναι ότι οι μαθητές της δευτεροβάθμιας εκπαίδευσης έχουν ήδη μάθει ποιες στιγματισμένες λέξεις πρέπει ν' αποφεύγουν κατά τη διάρκεια των αλληλεπιδράσεων τους στην τάξη και για αυτό το λόγο υπάρχει μικρότερη παρέμβαση από τους εκπαιδευτικούς. Αυτό φάνηκε και στις συνεντεύξεις, όπου η πλειοψηφία των εκπαιδευτικών υπογράμμισε τη σημασία της επιτακτικής γνώσης της ΚΝΕ στην πρωτοβάθμια εκπαίδευση, κυρίως για να είναι σε θέση να συνεχίσει η δευτεροβάθμια εκπαίδευση στην πρότυπη ποικιλία: «Είμαστε εκείνοι οι οποίοι θα θέσουν το ορθό παράδειγμα στα παιδιά για την εκμάθηση της σωστής γλώσσας (...) πιστεύω ως εκπαιδευτικοί, είμαστε υποχρεωμένοι να διδάξουμε την κατάλληλη γλώσσα, την Κοινή Νέα Ελληνική» (Εκπαιδευτικός Μ, Β Δημοτικό σχολείο). Δεύτερον, όσον αφορά τις τρεις τεχνικές διόρθωσης υπήρχαν περισσότερες περιπτώσεις επανάληψης και διόρθωσης στην πρωτοβάθμια απ' ότι στη δευτεροβάθμια εκπαίδευση. Επιπλέον, η τεχνική της προτροπής φαίνεται να είναι πιο συχνή σε σχολεία δευτεροβάθμιας εκπαίδευσης.

5. Συζήτηση και συμπεράσματα

Οι γλωσσικές πρακτικές των εκπαιδευτικών στο διδασκαλικό πλαίσιο της κυπριακής δημόσιας εκπαίδευσης αποτέλεσαν το κεντρικό θέμα αυτής της εργασίας, με το διττό στόχο τη διερεύνηση της συσχέτισης περιστάσεων επικοινωνίας και γλωσσικών ποικιλιών, και την εξέταση των στρατηγικών διόρθωσης που υιοθετούν οι εκπαιδευτικοί στην τάξη στην προσπάθειά τους να ενθαρρύνουν τη χρήση της πρότυπης ποικιλίας. Τα αποτελέσματα της παρούσας εργασίας καταδεικνύουν μια σύνθετη και πολυδιάστατη συνύπαρξη ΚΝΕ και ΚΔ, εγείροντας δύο βασικά ζητήματα σχετικά με τη γλωσσική χρήση στην τάξη.

Πρώτον, είναι ξεκάθαρο ότι οι γλωσσικές επιλογές των εκπαιδευτικών υποδηλώνουν διαφορετικές αξίες και νόρμες που συνδέονται με την κάθε ποικιλία. Και στις δύο βαθμίδες της εκπαίδευσης, η πρότυπη ποικιλία συνδέεται με επισημότητα, καταλληλότητα, και επάρκεια καθώς ήταν άμεσα συνδεδεμένη με την περίπτωση της κύριας διδασκαλίας. Παρατηρήθηκαν περιπτώσεις, όπου οι μαθητές απέτυχαν να ανταποκριθούν γλωσσικά στις προσδοκίες των εκπαιδευτικών και επικρίθηκαν ή έτυχαν διόρθωσης. Ωστόσο, παρά τη θεσμοθέτηση της ΚΝΕ ως της έγκυρης και νόμιμης ποικιλίας στο σχολείο και στην τάξη, τα αποτελέσματά μας τεκμηριώνουν μια ισχυρή παρουσία της διαλέκτου στην τάξη, τόσο στη γλωσσική χρήση των μαθητών όσων και των εκπαιδευτικών.

Δεύτερον, σε ότι αφορά την παρέμβαση των εκπαιδευτικών στη χρήση της διαλέκτου, αυτό που προέκυψε ήταν η υιοθέτηση τριών διαφορετικών «τεχνικών» για την αντικατάσταση της διαλέκτου με την πρότυπη. Τα δεδομένα μας κατέδειξαν ότι οι εκπαιδευτικοί χρησιμοποιούσαν αυτές τις τρεις τεχνικές και στις δύο βαθμίδες της εκπαίδευσης, αν και παρατηρήθηκαν περισσότερες περιπτώσεις διόρθωσης σε αλληλεπιδράσεις με νεότερους μαθητές (δηλαδή στο δημοτικό σχολείο). Τα αυξημένα επεισόδια διόρθωσης στο δημοτικό σχολείο πιθανόν να οφείλονται στους εξής δύο λόγους. Πρώτον, στα πρώτα χρόνια της επίσημης εκπαίδευσης, οι μαθητές φέρνουν στο σχολείο τη μητρική τους ποικιλία, αυτήν που χρησιμοποιούν με την οικογένεια και τους φίλους τους (ΚΔ). Δεύτερον, οι γλωσσικές δεξιότητες των παιδιών στην πρότυπη ποικιλία δεν έχουν ακόμα αναπτυχθεί και πιθανόν να δυσκολεύονται να ανταποκριθούν στις γλωσσικές απαιτήσεις που επιβάλλει ο κώδικας της τάξης.

Τέλος, μπορεί κανείς να υποθέσει ότι η τρέχουσα πολιτική κατάσταση στην Κύπρο επηρεάζει, σε σημαντικό βαθμό, το εκπαιδευτικό σύστημα, τα σχολικά προγράμματα σπουδών και την «επίσημη» γλώσσα του σχολείου. Προφανώς, σε επίπεδο εκπαιδευτικής πολιτικής η γλώσσα λειτουργεί ως ένας από τους ισχυρότερους δεσμούς που συνδέει τους Ελληνοκύπριους με την Ελλάδα και όπως διαφαίνεται από τις γλωσσικές επιλογές της πολιτείας, είναι η πρότυπη γλώσσα που φαίνεται να έχει κερδίσει το προνόμιο της ελληνικότητας. Όπως υποστηρίζει ο κοινωνικός φιλόσοφος Walzer (1983), η εκπαίδευση «είναι ένα πρόγραμμα για την κοινωνική επιβίωση» (σ. 197). Στην περίπτωση της Κύπρου, το κράτος ενθαρρύνει την εκπαίδευση στην ΚΝΕ για να διατηρεί στενούς δεσμούς με την «μητέρα πατρίδα» Ελλάδα, αλλά και για να διατηρηθεί η ιδέα της καταγωγής, της συνέχειας και των ζωντανών παραδόσεων (Sophocleous & Wilks, 2010).

Η συγκριτική αυτή μελέτη μπορεί να χρησιμοποιηθεί προς όφελος των εκπαιδευτικών και των εκπαιδευτικών φορέων για χάραξη σαφέστερων γλωσσικών πολιτικών, με ειδική αναφορά στις γλωσσικές αναπτυξιακές ανάγκες των νεότερων και μεγαλύτερων ηλικιακά μαθητών. Τίθεται επίσης ένας σημαντικός παιδαγωγικός προβληματισμός σχετικά με το γενικότερο ρόλο του σχολείου και της εκπαίδευσης, αν λάβουμε υπόψη ότι η μητρική γλωσσική ποικιλία των μαθητών είναι στιγματισμένη σε συγκεκριμένα πλαίσια και ιδιαίτερα ότι πολλές φορές η συνεισφορά τους στην τάξη και στη διδακτική διαδικασία ανακόπτεται, όχι για το περιεχόμενό της αλλά για τη γλωσσική της μορφή.

ABSTRACT

Mural slogans, a highly spatialized sub-genre of political discourse, that allows anonymous, active subjects to air their voice, systematically exploit verbal humour. Based on a corpus of 286 slogans written on walls and other public surfaces, the present study analyses, in terms of humour theory, the linguistic strategies employed in them and explores their contribution to identity construction, suggesting that humorous mural slogans form a revolutionary antilanguage that challenges hegemonic discourse.

Λέξεις κλειδιά: χωρικοποίηση, γλωσσικό χιούμορ, γνωστική αντίθεση, ασυμβατότητα, ταυτότητα, στόχος, αντιγλώσσα

1. Εισαγωγή

Ο γραπτός, ανώνυμος συνθηματικός λόγος, σύγχρονη εκδοχή μιας πανάρχαιας και οικουμενικής πρακτικής, αξιοποιεί τους κοινωνιογλωσσικούς πόρους της γλωσσικής κοινότητας, προκειμένου να σχολιάσει τα εκάστοτε κοινωνικοπολιτικά δρώμενα, να νοηματοδοτήσει ιδεολογίες ή απλώς να «αιχμαλωτίσει» στον χρόνο προσωπικές σκέψεις και συναισθήματα. Το σύνθημα - ως συμπτυκνωμένη και δραστική μορφή δημόσιας επικοινωνίας, που αποτυπώνεται σε τοίχους, κολώνες, θύρες, με σπρέι, μαρκαδόρο ή μπογιά - περιλαμβάνει στη θεματολογία του από ερωτικές εξομολογήσεις και οπαδικά μηνύματα, μέχρι πολιτικά μανιφέστα και φιλοσοφικές ενατενίσεις, σκιαγραφώντας τις σχέσεις που αναπτύσσονται τα δρώντα υποκείμενα με το κοινωνικό τους περιβάλλον και δημιουργώντας ατομικές και συλλογικές μνήμες (Ψύλλα 2009).

Τα αναγραφόμενα συνθήματα βρίσκονται σε άμεση αλληλεπίδραση με τον ιδιαίτερο «χώρο» παραγωγής τους, το σύγχρονο αστικό περιβάλλον, σε τέτοιο βαθμό, μάλιστα, ώστε η συγκεκριμένη πρακτική να αποκτά λειτουργικότητα μόνο εντός του πλαισίου αναγραφής της. Αυτή η *χωρικοποίηση* (*spatialisation*) του γραπτού συνθηματικού λόγου, όπως και των συγγενών ειδών του graffiti και του street art, «διαταράσσει» και αναμορφώνει τα «ουδέτερα» αστικά κοινωνικά δίκτυα, τα οποία στηρίζονται «σε τέτοιο βαθμό στην αδιαφορία, όσο και στη διαφορά» (Wark 1997: 18).

Επομένως, η ίδια η γένεση του συνθήματος είναι σύμφυτη με τη μετατροπή του *τόπου* σε δημόσιο *χώρο*, μέσω της δράσης ενός συλλογικά αυτοπροσδιοριζόμενου υποκειμένου, που αφήνει το ίχνος του εαυτού του στο «άχρωμο» αστικό τοπίο, επιδιώκοντας τη διαφοροποίηση και τη διάκριση (Sennett 1990: 41). Υπό αυτή την έννοια, λοιπόν, το σύνθημα ως επικοινωνιακή δράση ανήκει στην ευρύτερη κατηγορία του πολιτικού λόγου¹.

Ένα από τα βασικά «όπλα» που επιστρατεύει ο γραπτός συνθηματικός λόγος, για να πετύχει τους στόχους του, ρητούς ή υπόρητους, είναι το γλωσσικό χιούμορ: ευφυείς, περιπαικτικές, πικρόχολες, ειρωνικές ή και υβριστικές χιουμοριστικές ατάκες «κοσμούν» κάθε είδους διαθέσιμη επιφάνεια, μετατρέποντας την πόλη σε ένα απέραντο σημειωματάριο.

¹ Ως «πολιτικά» ορίζουμε τα κείμενα που αποσκοπούν στην επίτευξη πολιτικών στόχων μέσω του χειρισμού των γλωσσικών μέσων (Φραντζή και Γεωργαλίδου 2009: 1249). Πβ. Obeng 2000: 362, ο οποίος εντάσσει την πρακτική του graffiti στον πολιτικό λόγο.

2. Σκοπός-Μέθοδος

Σκοπός της συγκεκριμένης ανακοίνωσης είναι η ανάλυση δεδομένων από τον γραπτό συνθηματικό λόγο στο πλαίσιο της *Γενικής Θεωρίας για το Γλωσσικό Χιούμορ* των Attardo και Raskin (1991· πβ. Attardo 1994, 2001), σύμφωνα με την οποία το χιούμορ στηρίζεται στην *ασυμβατότητα* (*incongruity*), δηλαδή τη *γνωστική αντίθεση* (*script opposition*) ανάμεσα σε δύο *σενάρια/γνωστικά σχήματα*, τα οποία, ενώ φαίνονται διαφορετικά και ετερόκλητα, μέσα στο κείμενο συνδυάζονται, προκαλώντας την έκπληξη και την ανατροπή των προσδοκιών του αποδέκτη. Με άλλα λόγια, ο συντάκτης του εκάστοτε χιουμοριστικού κειμένου «εντοπίζει γύρω του/της ένα συμβάν το οποίο ο/η ίδιος/-α κρίνει ως ασύμβατο, ότι δηλαδή αντιβαίνει στα αναμενόμενα και σε ό,τι θα έπρεπε ‘κανονικά’ να συμβαίνει, και στη συνέχεια ο/η ίδιος/α επιλέγει να το κωδικοποιήσει έτσι ώστε να φέρει στην επιφάνεια την ασυμβατότητα αυτή» (Τσάκωνα 2009: 1188).

Ειδικότερα, θα επιχειρηθεί η διπλή, υφολογική και κοινωνιογλωσσολογική, προσέγγιση των χιουμοριστικών συνθημάτων, προκειμένου να διερευνηθεί: 1) με ποιες γλωσσικές - ή/και ευρύτερα γνωστικές - στρατηγικές διατυπώνεται σε αυτά το γλωσσικό χιούμορ και 2) με δεδομένο ότι «κάθε λέξη αποτελεί ένταξη στα κοινωνικά δίκτυα, στα οποία ανήκουν αυτές οι λέξεις» (Gergen 1994: 22), πώς οι γλωσσικές τους επιλογές συμβάλλουν στη διαδικασία οικοδόμησης κοινωνικών ταυτοτήτων.

Το κειμενικό σώμα που θα αναλύσουμε αποτελείται από 286 χιουμοριστικά συνθήματα, που καταγράψαμε με επιτόπια έρευνα στο κέντρο της Αθήνας, αλλά και αναζήτηση σε διαδικτυακές πηγές², τα οποία επελέγησαν από ένα ευρύτερο corpus 440 συνθημάτων, τόσο χιουμοριστικών, όσο και μη - επομένως, τα χιουμοριστικά συνθήματα καλύπτουν το 65% του συνολικού σώματος κειμένων.

3. Ανάλυση δεδομένων

Κατά την επεξεργασία των δεδομένων του corpus, κάθε σύνθημα αντιμετωπίστηκε ως αυτοτελής *χιουμοριστική φράση* (*jab line*, Attardo 2001: 89), η οποία περιλαμβάνει λέξεις, φράσεις ή προτάσεις που θεωρούνται ασύμβατες με το περιεχόμενο ή/και το επίπεδο ύφους του κειμένου, παραβιάζοντας τις προσδοκίες του αναγνώστη.

Τα παρατιθέμενα στη συνέχεια συνθήματα εμφανίζονται στη μορφή που εντοπίστηκαν, με διατήρηση των όποιων ορθογραφικών³ ή γραμματικοσυντακτικών αποκλίσεων, των σημείων στίξεως, της μικρογράμματος ή κεφαλαιογράμματος γραμματοσειράς κ.ο.κ. Η χρήση του συμβόλου «/» δηλώνει την αλλαγή σειράς στο πρωτότυπο σύνθημα.

3.1 Στρατηγικές εκφοράς του χιουμοριστικού συνθηματικού λόγου

Από την ανάλυση του σχετικού υλικού προέκυψε μια σειρά από στρατηγικές πρόκλησης του γλωσσικού χιούμορ, οι οποίες αξιοποιούν τόσο τις διάφορες διαθέσιμες από το γλωσσικό σύστημα επιλογές σε φωνολογικό, μορφολογικό, συντακτικό και λεξιλογικό επίπεδο (βλ. *γλώσσα* (*language*) στο μοντέλο των έξι *γνωστικών παραμέτρων* (*knowledge resources*)⁴ των Attardo και Raskin), όσο και ευρύτερους γνωσιακούς μηχανισμούς συγκρότησης του γλωσσικού νοήματος. Στη συνέχεια παρουσιάζεται ενδεικτική, και όχι εξαντλητική, τυποίηση των στρατηγικών που εντοπίστηκαν, με βάση τη συχνότητα εμφάνισής τους στο corpus. Να σημειωθεί ότι οι διάφορες στρατηγικές δεν είναι αμοιβαίως αποκλειόμενες, αντιθέτως μπορεί να συνυπάρχουν στο ίδιο σύνθημα. Για τις ανάγκες της παρούσας μελέτης, ως κριτήριο κατηγοριοποίησης του κάθε συνθήματος θεωρήθηκε η, κατά την άποψή μας, κυρίαρχη σε αυτό στρατηγική.

² Οι ιστοσελίδες στις οποίες ανατρέξαμε είναι οι εξής: 1) <http://www.otherside.gr/2008/12/synthimata-se-toixous-meros-1o/>, 2) <http://xamogelo.wordpress.com/2007/09/23/asteia-wall/>, 3) <http://teenagergr.wordpress.com/2008/10/03/50kaliterasin8imata/> (τελευταία πρόσβαση: Σεπτέμβριος 2011).

³ Πέραν των συνήθων ορθογραφικών λαθών, δεν εντοπίστηκαν εξόφθαλμα εμπρόθετες χιουμοριστικές αλλοιώσεις του ορθογραφικού συστήματος (π.χ. αναγραμματισμοί, επανάληψη μορφημάτων για λόγους προβολής/εστίασης κ.ο.κ., βλ. ενδεικτικά Breva Claramonte and García Alonso 1993, πβ. Jaffe 2000: 498), με εξαίρεση το σύνθημα «ΕΝΑΝΤΙΑ ΣΤΙΝ ΑΣΤΟΙΚΥ ΩΡΩΓΡΑΦΕΙΑ».

⁴ Βλ. Attardo 2001: 23-24.

3.1.1 Διακειμενικότητα (83 συνθήματα)

Η διακειμενικότητα (*intertextuality*) ως ιδιότητα ενός κειμένου να ενσωματώνει αποσπάσματα από άλλα κείμενα, με αποτέλεσμα η ερμηνεία του να μην είναι αυτάρκης, αλλά να εξαρτάται εν πολλοίς από την επιτυχή ανάγνωση των ενυπαρχουσών σε αυτό διακειμενικών ενδείξεων, αποτελεί στο υπό εξέταση σώμα γλωσσικών δεδομένων τη συνηθέστερη στρατηγική εκφοράς του γλωσσικού χιούμορ, στην οποία αξιοποιούνται τόσο τα γλωσσικά, όσο και τα γνωσιακά αποθέματα του δυνητικού αποδέκτη.

Ειδικότερα, η ανάκληση διακειμενικών αναφορών προκαλεί σύγκρουση σεναρίων ανάμεσα στο αρχικό κείμενο (*διακείμενο*) και το τελικό, ανατρέποντας τις προσδοκίες των περαστικών.

Ως πηγή έμπνευσης των συνθημάτων του corpus λειτούργησαν διακείμενα, όπως διαφημίσεις (1), μικρές αγγελίες (2), διάσημες ρήσεις (3), παραμύθια (4), κινηματογραφικές ταινίες (5) ή και κηδεόχαρτα (6):

- (1) «ΑΚΟΜΗ ΚΑΙ ΤΟ ΑΡΙΕΛ / ΚΑΝΕΙ ΕΠΑΝΑΣΤΑΣΗ / ΕΣΥ;» (πβ. «Το Αριέλ Ultra φέρνει την επανάσταση στο πλύσιμο»).
- (2) «Ζητούνται αναρχικοί για κατεδάφιση πολυκατοικίας. / Τηλ. 100».
- (3) «Δεν ελπίζω τίποτα / δε φοβάμαι / τίποτα, είμαι άνεργη» (πβ. «Δεν ελπίζω τίποτα, δεν φοβάμαι τίποτα, είμαι ελεύθερος», Ν. Καζαντζάκης).
- (4) «Ψήφισε Αλί Μπαμπά / Έχει μόνο / 40 κλέφτες» (πβ. «Ο Αλή Μπαμπά και οι 40 κλέφτες»).
- (5) «ΕΝΩ ΕΣΕΙΣ ΚΟΙΜΟΣΑΣΤΑΝ...» (πβ. «Ενώ εσύ κοιμόσουν»).
- (6) «ΤΟ ΛΑΤΡΕΥΤΟ ΜΑΣ ΜΝΗΜΟΝΙΟ ΚΗΔΕΥΟΥΜΕ ΤΗΝ ΚΥΡΙΑΚΗ 5 ΙΟΥΝΙΟΥ ΣΤΙΣ 13.00 Μ.Μ. ΣΤΟ ΣΥΝΤΑΓΜΑ. Η ΠΟΜΠΗ ΞΕΚΙΝΑ ΑΠΟ ΠΛΑΤΕΙΑ ΜΟΝΑΣΤΗΡΑΚΙ (ΜΕΤΡΟ). Η ΜΗΤΕΡΑ ΑΓΓΕΛΑ ΜΕΡΚΕΛ. Ο ΘΕΙΟΣ ΜΠΑΡΑΚ ΟΜΠΑΜΑ. ΟΙ ΛΟΙΠΟΙ ΣΥΓΓΕΝΕΙΣ. ΓΡΑΦΕΙΟ ΚΗΔΕΙΩΝ ΤΟΥ ΑΓΑΝΑΚΤΙΣΜΕΝΟΥ ΛΑΟΥ. ΔΙΑΝΥΚΤΕΡΕΥΕΙ ΚΑΙ ΕΠΑΓΡΥΠΝΑ».

Στις διακειμενικές πηγές γλωσσικού χιούμορ εντάσσουμε και την αποπαγίωση⁵ και παραφθορά στερεότυπων φράσεων, παροιμιών, αρχαίων γνωμικών κ.λπ., δηλαδή την ακύρωση της μορφοσυνητακτικής σταθερότητας εκφράσεων που χαρακτηρίζονται ως παγιωμένες και την κατάργηση της συμβολικής σχέσης που υπήρχε μεταξύ των στοιχείων τους (βλ. Γαβριηλίδου και Τσάκωνα 2004-2005: 155), διαδικασία η οποία καταλήγει στη δημιουργία λογοπαϊγνίων μέσω της σύγκρισης της αρχικής έκφρασης με την τελική. Π.χ.:

- (7) «Η ΕΥΤΥΧΙΑ ΔΕ ΦΕΡΝΕΙ ΤΑ ΛΕΦΤΑ» (πβ. «Τα λεφτά δεν φέρνουν την ευτυχία»).
- (8) «ΕΙΣ ΟΙΩΝΟΣ ΑΡΙΣΤΟΣ / ΑΜΥΝΕΣΘΑΙ ΓΙΑ ΤΗΝ ΠΑΡΤΗ ΣΑΣ» (πβ. «Εις οιωνός άριστος, αμύνεσθαι περί άτρης»· το λογοπαίγνιο στηρίζεται στο ζεύγος παρωνύμων «άρτης-πάτρης»).
- (9) «ΧΟΥΝΤΑ ΕΙΝΑΙ ΘΑ ΠΕΡΑΣΕΙ» (πβ. «Μπόρα είναι, θα περάσει»).

Εικόνα 1 Αποπαγίωση και παραφθορά στερεότυπων εκφράσεων

Μια ειδικότερη υποκατηγορία αποπαγιωμένων «διακειμενικών» συνθημάτων περιλαμβάνει τη χιουμοριστική παραλλαγή άλλων, ευρέως διαδεδομένων - κάτι σαν ανακύκλωση του προϋπάρχοντος υλικού. Η διατήρηση της ρυθμικής δομής του αρχικού συνθήματος στο αποπαγιωμένο διευκολύνει τη συνειρμική σύνδεση των δύο εκ μέρους του θεατή, δημιουργώντας ανανεωμένες εκδοχές, ουσιαστικά παρωδίες, της συνθηματολογικής παράδοσης:

⁵ Πβ. και Νάκας 2006: 371-384.

- (10) «ΦΟΝΙΑΔΕΣ ΤΩΝ ΨΑΡΙΩΝ ΑΡΓΥΡΟΠΕΛΕΚΑΝΟΙ» (πβ. «Φονιάδες των λαών Αμερικάνοι»).
- (11) «Η ΚΥΠΡΟΣ ΕΙΝΑΙ ΚΙΝΕΖΙΚΗ» (πβ. «Η Κύπρος είναι ελληνική»).
- (12) «Ψωμί, μπριζόλα, Coca Cola» (πβ. «Ψωμί, παιδεία, ελευθερία»).

3.1.2 Σχηματικός λόγος (76 συνθήματα)

Στη συγκεκριμένη κατηγορία συμπεριλαμβάνονται εκφωνήματα στα οποία το γλωσσικό χιούμορ αποκρυσταλλώνεται σε γνωστούς από την κλασική ρητορική μηχανισμούς, δηλαδή έντεχνες αποκλίσεις από τις προσδοκίες του αποδέκτη σε επίπεδο είτε μορφής (*σχήματα λόγου*), είτε σημασίας (*τρόποι*)⁶. Τα συνθέστερα ρητορικά σχήματα των συνθημάτων του corpus είναι τα εξής:

3.1.2.1 Μεταφορά⁷

Ως ένας από τους κεντρικούς γνωστικούς μηχανισμούς αντίληψης της πραγματικότητας και κατασκευής γλωσσικού νοήματος (βλ. μεταξύ άλλων Lakoff and Johnson 1980), που «βασίζεται στη (μερική συνήθως) ομοιότητα ή αναλογία που εντοπίζεται ανάμεσα σε δύο πράγματα που κατά κανόνα δεν φαίνονται να σχετίζονται μεταξύ τους» (Τσάκωνα 2009: 1189, πβ. Τσάκωνα 2004: 179-188), η μεταφορά στον συνθηματικό λόγο παράγει χιουμοριστικό αποτέλεσμα μέσα από την επίλυση της γνωστικής αντίθεσης που προκαλείται από τη σύγκριση ανόμοιων οντοτήτων (Attardo 2001: 25-27, 136-138). Π.χ.:

- (13) «ΕΙΣΟΥΝ / ΚΑΛΟ ROBOT / ΣΗΜΕΡΑ;».

Η ερμηνεία του συνθήματος (13) προϋποθέτει την αναγνώριση της ασυμβατότητας του σημασιολογικού χαρακτηριστικού [έμψυχο], που αντιστοιχεί στο εννοούμενο υποκείμενο-αποδέκτη, και [άψυχο], που προσιδιάζει στο κατηγορούμενο *ρομπότ*, δηλαδή την αναγνώριση της παραβίασης των *περιορισμών επιλογής* (*selectional restrictions*). Ως υπόβαθρο του συγκεκριμένου συνθήματος μπορεί να θεωρηθεί η διαδεδομένη εννοιολογική μεταφορά «Ο ΑΝΘΡΩΠΟΣ ΕΙΝΑΙ ΜΗΧΑΝΗ» (HUMAN IS MACHINE/IMPLEMENT, βλ. Goatly 2007: 103-117), χωρίς να αποκλείεται και η διακειμενική του αναφορά («ήσουν καλό παιδί σήμερα;»).

Είδος μεταφοράς είναι και η προσωποποίηση, όπου χαρακτηριστικά εμψύχου αποδίδονται σε άψυχες οντότητες:

- (14) «Συναχώνονται οι Βρυξέλες / και φταρνίζεται / η Αθήνα...».
- (15) «ΞΥΠΝΑ ΗΡΘΕ Η ΩΡΑ / ΝΑ ΤΑΪΣΕΙΣ ΤΙΣ ΤΡΑΠΕΖΕΣ!».

Συχνά η σύγκρουση σεναρίων προκαλείται από το παιχνίδι ανάμεσα στην κυριολεκτική και τη μεταφορική σημασία ενός λεξήματος:

- (16) «Ξεκουμπώστε το μυαλό σας / τόσο συχνά όσο και το παντελόνι σας».
- (17) «Παλιά καίγαν τα βιβλία / Τώρα καίνε τα μυαλά».

3.1.2.2 Οξύμωρο

Το οξύμωρο συνδυάζει δύο έννοιες αντιφατικές μεταξύ τους ή φαινομενικά αλληλοαποκλειόμενες, οι οποίες εκφράζουν, ωστόσο, κατά βάθος ένα λογικό νόημα (Μπαμπινιώτης 2002: 1276). Π.χ.:

- (18) «Ο ΚΟΣΜΟΣ ΘΑ ΚΑΤΑΣΤΡΑΦΕΙ ΑΥΡΙΟ / ΠΟΡΕΙΑ ΔΙΑΜΑΡΤΥΡΙΑΣ ΤΗΝ ΕΡΧΟΜΕΝΗ ΤΡΙΤΗ».

Μέσα από την αξιοποίηση του συγκεκριμένου σχήματος συνήθως τονίζεται η αντίθεση ανάμεσα, αφενός, στη ζοφερή πραγματικότητα που περιβάλλει τους συντάκτες των συνθημάτων και, αφετέρου, στον ιδεατό κόσμο που αυτοί οραματίζονται. Π.χ.:

⁶ Η θεωρητική διάκριση μεταξύ *σχημάτων λόγου* (*shemes*) και *τρόπων* (*tropes*) εκφεύγει των ορίων της παρούσας μελέτης και, ως εκ τούτου, δεν θα μας απασχολήσει περαιτέρω (βλ. σχετικά Maes and Schilperoord 2009).

⁷ Βλ. Λεξικό Γλωσσολογικών Όρων [στο εξής: ΛΓΟ].

- (19) «ΑΝ ΟΙ ΕΚΛΟΓΕΣ ΑΛΛΑΖΑΝ ΚΑΤΙ / ΘΑ ΗΤΑΝ ΠΑΡΑΝΟΜΕΣ».
(20) «ΑΝ ΘΕΣ ΝΑ / ΟΝΕΙΡΕΥΕΣΑΙ... / ΞΥΠΝΑ!».

3.1.2.3 Επανάληψη⁸

Τα συνθήματα που στηρίζονται στην επανάληψη εκμεταλλεύονται τη ρυθμική δομή της νέας ελληνικής, προκειμένου να δημιουργήσουν σύγκρουση σεναρίων ανάμεσα στις δύο οιονεί μετρικές ενότητες του συνθήματος. Στο corpus εντοπίστηκαν τα εξής επαναληπτικά σχήματα:

- *Αντιμεταβολή*: η επανάληψη λεξικών μονάδων σε διαδοχικές ενότητες λόγου με αντίστροφη σειρά, που δημιουργεί λογοπαίγνιο. Π.χ.:

- (21) «ΟΙ ΤΟΙΧΟΙ / ΕΧΟΥΝ / ΑΥΤΙΑ ΚΑΙ / ΤΑ ΑΥΤΙΑ ΣΑΣ / ΤΟΙΧΟΥΣ».
(22) «Κάτω τα ζήτω, ζήτω τα κάτω».

- *Ομοιοτέλετο*: δύο ή περισσότερες διαδοχικές ενότητες λόγου που τελειώνουν με ίδιες, ομοιοκατάληκτες ή ομόηχες λέξεις. Π.χ.:

- (23) «ΠΕΝΤΕ ΜΕΡΕΣ ΤΡΩΣ ΤΟ ΑΓΓΟΥΡΙ ΚΑΙ / ΣΤΟ ΚΛΑΜΠ ΤΟ ΠΑΙΖΕΙΣ ΜΟΥΡΗ».
(24) «ΡΟΥΧΑ GUCCI / ΜΥΑΛΟ ΚΟΥΚΟΥΤΣΙ».

- *Αν(ταν)ακλαστικό*: βλ. σχετικά 3.1.3.1.

3.1.3 Σημασιολογικές σχέσεις (64 συνθήματα)

Η εκμετάλλευση των σημασιολογικών σχέσεων των λεξημάτων προκαλεί σύγκρουση ανάμεσα σε αντιτιθέμενες σημασιολογικές διαστάσεις. Στο πλαίσιο αυτού του «παιχνιδιού» με τα σημασιολογικά όρια των λέξεων στο corpus αξιοποιήθηκαν οι ακόλουθες εκφάνσεις της σημασίας:

3.1.3.1 Πολυσημία

Ο συσχετισμός μιας μορφής με περισσότερες από μία σημασίες, οι οποίες, λόγω της προφανούς σημασιολογικής τους συσχέτισης, αντιμετωπίζονται ως διαφορετικές σημασίες της ίδιας λέξης⁹. Π.χ.:

- (25) «ΤΩΡΑ ΜΕΧΡΙ ΚΑΙ 50% / ΕΚΠΤΩΣΗ ΣΤΙΣ ΑΞΙΕΣ ΣΑΣ!» (έκπτωση: 1. «το ποσό κατά το οποίο μειώνεται η τιμή πωλήσεως προϊόντος από τον πωλητή», 2. μτφ. «ο ξεπεσμός»: η παρουσία του ποσοστού 50% παραπέμπει αρχικά στην πρώτη σημασία του λεξήματος, εντύπωση που αμέσως ανατρέπεται από τη σύμφραση «έκπτωση αξιών», που ακολουθεί ελαφρώς παραλλαγμένη και αξιοποιεί τη δεύτερη σημασία)¹⁰.
(26) «Κάτω τα κόμματα, ζήτω οι τελείες» (κόμμα: 1. πολιτικός σχηματισμός, 2. σημείο στίξης).

Στην πολυσημία στηρίζεται και το αν(ταν)ακλαστικό σχήμα (βλ. Νάκας 2006: 369-371, 673-686), στο οποίο επαναλαμβάνεται σε μια ενότητα λόγου η ίδια αυτόνομη λεξική μονάδα με διαφορετική σημασία ή/και χρήση:

- (27) «Για να καταλάβεις έναν χώρο / πρέπει να τον καταλάβεις».
(28) «ΤΟ ΣΥΝΤΑΓΜΑ ΘΕΛΕΙ / ΣΥΝΤΑΓΜΑ».

⁸ Βλ. Νάκας 2005, Κακριδή-Ferrari 2008.

⁹ [ΛΓΟ].

¹⁰ Μπαμπινιώτης 2002: 582.

3.1.3.2 Συνομιλιακή υποδήλωση¹¹

Η συνομιλιακή υποδήλωση κατά την επίλυση της οποίας ο συντάκτης του συνθήματος προσδοκά ότι ο αποδέκτης θα ανασυνθέσει το συνομιλιακό υπονόημα. Π.χ.:

(29) «ΤΑ ΓΚΑΖΑΚΙΑ / ΔΕΝ ΕΙΝΑΙ ΜΟΝΟ / ΓΙΑ ΚΑΦΕ!».

3.1.3.3 Επέκταση της καθιερωμένης σημασίας

Η επέκταση της καθιερωμένης σημασίας και δημιουργία νέων, ανατρεπτικών σημασιολογικών εκδοχών. Π.χ. στο σύνθημα (30), η ασυμβατότητα εντοπίζεται ανάμεσα στη συνήθη σημασία του επιθέτου «κοινωνικός», δηλαδή «που δημιουργεί εύκολα σχέσεις με τους άλλους ανθρώπους, είναι ικανός να ζήσει μέσα στην κοινωνία»¹² και στη χιουμοριστική επέκτασή του «που λουφάρει μετά συνοδείας».

(30) «ΜΗΝ ΕΙΣΤΕ / ΑΝΤΙΚΟΙΝΩΝΙΚΟΙ. ΛΟΥΦΑΡΕΤΕ ΜΕ ΠΑΡΕΑ!».

3.1.3.4 Ανακυριολεξία (ή απομεταφορά, βλ. Νάκας 2006: 358-366)

Η επαναφορά ενός λεξήματος στην αρχική, κυριολεκτική του σημασία, αντί της μεταφορικής. Π.χ. στα συνθήματα (31) και (32), οι παρατιθέμενες μεταφορικές συμφράσεις «χρυσός κανόνας» (=βέλτιστη πρακτική) και «χτυπάω εισιτήριο» (=ακυρώνω), αντιστοίχως, αποπαγώνονται στη συνέχεια και χρησιμοποιούνται κυριολεκτικά, σαν ελεύθερα συντάγματα, πυροδοτώντας χιουμοριστικούς συνειρμούς:

(31) «Ο ΧΡΥΣΟΣ ΚΑΝΟΝΑΣ ΕΙΝΑΙ ΕΝΑΣ / ΑΥΤΟΣ ΠΟΥ ΕΧΕΙ ΤΟ ΧΡΥΣΟ ΦΤΙΑΧΝΕΙ ΤΟΝ ΚΑΝΟΝΑ».

(32) «ΜΗΝ ΧΤΥΠΑΣ / ΕΙΣΙΤΗΡΙΟ / ΧΤΥΠΑ ΕΛΕΓΧΤΗ».

3.1.3.5 Συμφυρμός λεξημάτων

Ο Συμφυρμός λεξημάτων, που καταλήγει στη δημιουργία υβριδικών γλωσσικών στοιχείων, όπως π.χ. το παρακάτω σύνθημα, που πλαισιώνεται πολυτροπικά από μια εικόνα¹³.

Εικόνα 2 Συμφυρμός

3.1.3.6. Αντωνυμία

Η σημασιολογική αντίθεση μεταξύ λεξικών μονάδων, η αξιοποίηση της οποίας λ.χ. στο σύνθημα (33) καταλήγει σε χιουμοριστική σύγκρουση μεταξύ «ψευδοαντώνυμων», με την προσθήκη του προθήματος *αντι-* και στα δύο λεξήματα της σύμφρασης *παθητικός καπνιστής*:

(33) «Δεν υπάρχουν παθητικοί καπνιστές / μόνο αντιπαθητικοί αντικαπνιστές».

¹¹ [ΛΓΟ].

¹² Λεξικό της Κοινής Νεοελληνικής.

¹³ Να σημειωθεί ότι μόνο σε τέσσερα συνθήματα του corpus επισημάνθηκε πλαισίωση από άλλες σημειωτικές πρακτικές, όπως η εικόνα, η γελοιογραφία κ.ο.κ.

3.1.3.7 Ομοηχία

Η φωνητική ταυτότητα σημασιολογικά διαφοροποιημένων λεξημάτων, από την οποία προκύπτουν εναλλακτικές αναγνώσεις του ίδιου συνθήματος. Π.χ.:

(34) «ΤΑ ΠΤΥΧΙΑ COPIES / ΚΤΩΝΤΑΙ».

Εικόνα 3 Ομοηχία

3.1.4 Γλωσσική ποικιλότητα (47 συνθήματα)

Η χιουμοριστική αξιοποίηση της γλωσσικής ποικιλότητας στα συνθήματα του corpus περιλαμβάνει κυρίως λεξήματα του οικείου/προφορικού ύφους (γαμάτο, τζαμπατζής, γουστάρετε), μειωτικούς όρους (βλάκες, κουφάλες, λαμόγια) και «λέξεις-ταμπού»¹⁴ (μαλάκας, σκατά, πουτάνα κ.ο.κ.), γλωσσικά στοιχεία που θεωρούνται ακατάλληλα για τις πρωτοτυπικές μορφές δημόσιας έκφρασης, τα οποία, εντούτοις, συχνά εμφιλοχωρούν σε κειμενικά είδη που κινούνται στα όρια μεταξύ προφορικού και γραπτού ύφους, όπως είναι τα συνθήματα. Άλλωστε, από την εποχή του Αριστοφάνη μέχρι σήμερα η αθυροστομία και η βωμολοχία συνδέονται με την πρόκληση κωμικού αποτελέσματος. Π.χ.:

(35) «ΦΑΤΕ ΣΚΑΤΑ / ΚΕΡΝΑΕΙ / ΤΟ / ΚΡΑΤΟΣ».

(36) «ΑΝΑΓΚΗ / ΕΙΝΑΙ ΤΟ ΧΕΣΙΜΟ. / ΟΧΙ ΟΙ ΕΚΛΟΓΕΣ!».

Συνοψίζοντας, μέσω των διαφόρων στρατηγικών εκφοράς του γλωσσικού χιούμορ που προαναφέρθηκαν, οι συντάκτες των συνθημάτων αξιοποιούν, αφενός, τις δυνατότητες που προσφέρει το γλωσσικό ρεπερτόριο και οι ρητορικοί μηχανισμοί της νέας ελληνικής και, αφετέρου, τις προϋπάρχουσες πραγματολογικές γνώσεις των περαστικών για την επικαιρότητα, την κουλτούρα και τις αξίες της ελληνικής γλωσσικής κοινότητας, προκειμένου να διατυπώσουν ατάκες που προσελκύουν την προσοχή του αποδέκτη, τού δημιουργούν μια αίσθηση προφορικότητας και οικειότητας¹⁵ (πβ. Brea Claramonte and García Alonso 1993 · Nwoye 1993: 433, 439 · Jaffe 2000: 498) και τον διεγείρουν συγκινησιακά, ενεργοποιώντας τις θετικές ή αρνητικές συνδηλώσεις που φέρουν τα γλωσσικά στοιχεία (πβ. Τσάκωνα 2009: 1189-1190). Έτσι, τελικά τα χιουμοριστικά συνθήματα γίνονται όχημα για την αιχμηρή κριτική νοσηρών κοινωνικοπολιτικών πρακτικών, την εξοικείωση (*domestication*, Morris 1993) των περαστικών με ανατρεπτικές ιδέες και την υποβολή σε αυτούς νέων τρόπων αντίληψης και δράσης.

¹⁴ Βλ. Χαραλαμπίκης 2009: 1271-1274. Στο corpus επισημάνθηκαν περιορισμένες περιπτώσεις «λέξεων-ταμπού», μόλις 28 σε 286 συνθήματα (ποσοστό 9.79%).

¹⁵ Αντιθέτως, στα συνθήματα σε τοίχους σπανίζουν τα λεξήματα από πρότυπες ποικιλίες (πβ. Dürmüller ό.π.: 279), όπως η λόγια· παράδειγμα από το corpus: «Ου φονεύσεις / αν δεν έχεις καλό δικηγόρο», «Του οχαθώρου οι πεσόντες νανουρίζονται με τσόντες».

3.2 Τα χιουμοριστικά συνθήματα ως μέσο έκφρασης ταυτότητας

Οι γλωσσικές επιλογές των συνθημάτων σχετίζονται άμεσα με το κοινωνικοπολιτικό δίκτυο, στο οποίο εντάσσεται ο δημιουργός τους, καθώς και με τα ιδιαίτερα κίνητρα¹⁶ που υποκινούν τη δράση του. Με άλλα λόγια, το *ύφος* (*style*) αποτελεί «πηγή στην ενεργό δημιουργία, αναπαράσταση και αναδημιουργία της ταυτότητας¹⁷ του ομιλητή» (Schilling-Estes 2002: 388), δηλαδή «της αίσθησης που έχει ένα πρόσωπο για συμπερίληψη σε (ή αποκλεισμό από) ένα φάσμα κοινωνικών ρόλων και τρόπων ζωής» (Liechty 1995: 167· πβ. Holmes 2000: 159).

Λαμβάνοντας υπ' όψιν ότι η οικοδόμηση ενδοομαδικών ταυτοτήτων συνιστά μία από τις βασικές κοινωνικές λειτουργίες του χιούμορ (Archakis and Tsakona 2005: 42), στόχος του δεύτερου μέρους της παρούσας μελέτης είναι να διερευνηθούν τα κοινωνιογλωσσικά νοήματα που εκφράζονται μέσα από τη χρήση-αναγραφή των χιουμοριστικών συνθημάτων.

Προσεγγίζοντας τον χιουμοριστικό συνθηματικό λόγο από τη σκοπιά της οικοδόμησης κοινωνικών ταυτοτήτων, προκύπτει το εξής φαινομενικό «αδιέξοδο»: τα ατομικά χαρακτηριστικά του συντάκτη (φύλο¹⁸, ηλικία, επάγγελμα, μορφωτικό επίπεδο κ.λπ.), που αποτελούν αναπόσπαστο κομμάτι της κοινωνιογλωσσικής του ταυτότητας, παραμένουν απόρρητα και αδιαφανή, αφού τα συνθήματα είναι πάντοτε ανώνυμα (Dürmüller 1987: 281)¹⁹, προστατεύοντας το *πρόσωπο* (*face*) του δημιουργού από ενδεχόμενο τραυματισμό - γι' αυτό ο Obeng (2000: 359) ονομάζει τον συνθηματικό λόγο *λόγο αποφυγής* (*avoidance discourse*), εφόσον «μιονώνει» τους συμμετέχοντες από απειλητικές λεκτικές πράξεις.

Ωστόσο, η γλώσσα ως σημειωτικό σύστημα παρέχει ποικίλες ενδείξεις κοινωνικής ταυτότητας, που επιτρέπουν την ανασύνθεση του δικτύου πολιτισμικής νοηματοδότησης, όπου εντάσσεται ο δημιουργός (πβ. Ψύλλα 2009).

Κατά πρώτον, σαφή ένδειξη ταυτότητας, και μάλιστα ιδεολογικοπολιτικής, συνιστά η μονογραφή «Α», που συνοδεύει πολλά από τα συνθήματα του corpus, ιδιαίτερα εκείνα που προέρχονται από τη γειτονιά των Εξαρχείων, παραπέμποντας στον ακροαριστικό χώρο. Μέσω αυτής, ο συντάκτης του χιουμοριστικού συνθήματος επιδιώκει να εγγράψει το μήνυμά του στην κειμενική παράδοση ενός αντισυμβατικού, επαναστατικού λόγου, άρρηκτα συνδεδεμένου με την τοπικά προσδιορισμένη κουλτούρα της συγκεκριμένης περιοχής.

Εικόνα 4 Η μονογραφή «Α»

Στα «μη υπογεγραμμένα» χιουμοριστικά συνθήματα, βασικό εργαλείο για τη διερεύνηση της δημόσιας διαπραγμάτευσης κοινωνικών ταυτοτήτων αναδεικνύεται η γνωστική παράμετρος του *στόχου* (*target*), που σχετίζεται με τη θεώρηση του χιούμορ ως επιθετικής συμπεριφοράς (Raskin 1985: 30-41· Attardo 1994: 49-50): σε αυτό το πλαίσιο, η χιουμοριστική ασυμβατότητα «προκύπτει άμεσα από διαδικασίες αξιολόγησης ή ακόμη και κριτικής των πραγμάτων, τα οποία αποδεικνύεται ότι είναι κα-

¹⁶ Βλ. Blume 1985.

¹⁷ Για την έννοια της ταυτότητας βλ. και Αρχάκης και Τσάκωνα 2011.

¹⁸ Σε ό,τι αφορά το θέμα της έμφυλης διαφοροποίησης των συνθημάτων και του graffiti, στη διεθνή βιβλιογραφία τονίζεται η κυριαρχία του ανδρικού φύλου (MacDonald 2001: 82, Tierney 2005: 20), ιδιαίτερα σε συντηρητικές κοινωνίες, όπου οι συγκεκριμένες μορφές δημόσιας έκφρασης αποτελούν αποκλειστικά ανδρική πρακτική (Obeng 2000).

¹⁹ Κατά τον McGlynn (1972), τα αναγραφόμενα συνθήματα απαλλάσσουν τον ομιλητή από τις υποχρεώσεις της διαλεκτικής αντιπαράθεσης και του εξασφαλίζουν την ασφάλεια της ανωνυμίας. Αντιθέτως, για τον Nwoye (ό.π.: 429) λειτουργούν ως ερεθίσματα που προκαλούν δημόσια συζήτηση (π.χ. από το corpus: «ΤΟ ΤΕΛΕΥΤΑΙΟ ΔΕΝΤΡΟ ΚΡΑΤΗΣΕ ΤΟ ΓΙΑ ΝΑ ΚΡΕΜΑΣΤΕΙΤΕ». Συμπλήρωση-επέκταση: «Είναι τόσοι πολλοί / που ένα δέντρο δε φτάνει»).

τώτερα απ' ό,τι αναμενόταν ή έπρεπε να είναι» (Αρχάκης και Τσάκωνα 2005: 3 · πβ. Bergson 1998 [1900]). Ο χιουμοριστικός *στόχος* (Attardo 2001: 23-24), επομένως, είναι το πρόσωπο, η ομάδα, ο θεσμός ή η ιδέα που δέχεται τα χιουμοριστικά πυρά και που υπόκειται σε αξιολόγηση. Εφαρμόζοντας την έννοια του *στόχου* στην ανάλυση των δεδομένων του corpus, εξάγουμε χρήσιμα συμπεράσματα αναφορικά με το τι επιδοκιμάζουν ή επικρίνουν οι συντάκτες των συνθημάτων, δηλαδή εις βάρος ποιων προσώπων ή θεσμών στρέφονται τα χιουμοριστικά βέλη, προκειμένου τελικά να αντιληφθούμε πώς η όλη αξιολογική διαδικασία συνδέεται με την κοινωνική ταυτότητα των δημιουργών.

Δεδομένου ότι τα συνθήματα σε τοίχους καταγράφουν συνήθως ευρύτερους προβληματισμούς, απαγκιστρωμένους από συγκεκριμένα άτομα και καταστάσεις, η κατονομασία επώνυμων στόχων στα δεδομένα του corpus είναι περιορισμένη (14 συνθήματα, ποσοστό 4.89%), εφόσον αυτομάτως καθιστά το σύνθημα επικαιρικό και εφήμερο, στερώντας του τη διαχρονικότητα, που προφανώς αποτελεί την «εντελέχεια» του εν λόγω κειμενικού είδους. Π.χ.:

(37) «Ο Ζ...Σ / ΠΗΔΗΞΕ, ΕΣΥ ΤΙ ΘΑ ΚΑΝΕΙΣ?».

(38) «ΤΟ ΠΑΘΟΣ ΓΙΑ ΧΡΗΜΑ / ΣΕ ΚΑΝΕΙ Π... ΤΣ...».

Αντιθέτως, πολλές φορές «κατακεραυνώνονται» γενικευτικά συγκεκριμένες κοινωνικές ή ιδεολογικές ομάδες, που βρίσκονται «απέναντι» από το δίκτυο ένταξης του δημιουργού, στο πλαίσιο μιας αντιπαράθεσης του τύπου «εμείς και οι άλλοι»²⁰. Τέτοιου είδους ομάδες είναι οι πολιτικοί, οι ρατσιστές, οι ακροδεξιοί, οι καθηγητές, οι γονείς κ.ο.κ. Π.χ.:

(39) «ΞΕΧΑΣΤΕ ΤΙΣ ΠΟΡΤΕΣ ΛΑΜΟΓΙΑ ΒΟΥΛΕΥΤΕΣ / ΤΟ ΜΟΝΟ ΠΟΥ ΣΑΣ ΣΩΖΕΙ ΝΑ ΣΚΑΨΕΤΕ ΣΤΟΕΣ».

(40) «Χαλαρώστε τρέντιδες και πιείτε το ποτό σας / λίγο πιο κάτω καίγεται το αυτοκίνητό σας».

Τόσο στα συνθήματα με επώνυμους στόχους, όσο και σε αυτά με γενικευτικούς, το γλωσσικό χιούμορ αποτελεί στρατηγική *απονομιμοποίησης* (*delegitimation*, πβ. Archakis and Tsakona 2005: 59) μελών της έξω ομάδας με υψηλό κοινωνικό γόητρο, που σχετίζονται με τις δομές του συστήματος και κάθε είδους εξουσίας (πολιτικοί, αστυνομικοί, καθηγητές κ.λπ.). Έτσι, ο δημιουργός του συνθηματικού λόγου εμφανίζεται ως ανώνυμος επικριτής ή και λεκτικός τιμωρός αυτών οι οποίοι ευθύνονται για τα δεινά που βιώνει ο λαός. Επομένως, μπορούμε να κάνουμε λόγο για μια *ανατρεπτική* (*subversive*, Holmes and Marra 2002: 70-71) ή *δηκτική* (*biting*, Boxer and Cortés-Conde 1997) λειτουργία του γλωσσικού χιούμορ.

Όσοι από τους δυνητικούς αποδέκτες συμμερίζονται την εκφραζόμενη κριτική αποτελούν ένα σύνολο με κοινές παραδοχές και βιώματα, που «προβάλλεται συνασπισμένο να αντιτίθεται σε κάποιους άλλους ή ενίοτε να τους στιγματίζει» (Αρχάκης και Τσάκωνα 2005: 8 · Boxer και Cortés-Conde ό.π.: 281, 283 · Holmes 2000: 168-169). Ως εκ τούτου, μέσω της προβολής των κοινών αξιών και αντιλήψεων που συγκροτούν την ομαδική ταυτότητα, το γλωσσικό χιούμορ επιτελεί ταυτόχρονα *ex negativo ενισχυτική* (*reinforcing*, Holmes and Marra 2002: 70-71) ή *ενωτική* (*bonding*, Boxer and Cortés-Conde 1997 · πβ. Archakis and Tsakona 2005: 61) λειτουργία.

Κατεξοχήν *ενισχυτική/ενωτική* είναι η λειτουργία του γλωσσικού χιούμορ στα συνθήματα στα οποία ο συντάκτης αναλαμβάνει τον ρόλο του καθοδηγητή-μέντορα, που έχει ως αποστολή να συμβουλέψει τον ανώνυμο αποδέκτη, να τον/την αφυπνίσει και να τον/την συμπαρασύρει στην κριτική αμφισβήτηση κατεστημένων πρακτικών (41-44). Στα συνθήματα αυτού του είδους, η υιοθέτηση του β' προσώπου ενισχύει την οικειότητα και τη συνομιλιακότητα, λειτουργώντας ως στοιχείο προφορικότητας (41, 42), ενώ, αντίθετως, η επιλογή του γ' προσώπου προστατεύει διά της εμμεσότητας το *πρόσωπο* (*face*) του υποθετικού θεατή, προσδίδοντας παράλληλα στο σύνθημα αξιωματική ισχύ, εφόσον δεν πρόκειται πλέον για παραίνεση, δηλαδή υποκειμενική απόφαση, αλλά για γενική παραδοχή-θέσφατο (43, 44):

(41) «ΜΗ ΣΤΗΡΙΖΕΙΣ / ΤΑ ΟΝΕΙΡΑ ΣΟΥ ΣΤ' ΑΣΤΡΑ / ΓΙΑΤΙ ΑΥΤΑ ΔΕΝ ΣΤΗΡΙΖΟΝΤΑΙ ΠΟΥΘΕΝΑ!».

(42) «ΜΗ ΣΚΟΤΩΝΕΤΕ ΤΑ ΚΟΥΝΟΥΠΙΑ / ΆΛΛΟΙ ΣΑΣ ΠΙΝΟΥΝ ΤΟ ΑΙΜΑ...».

(43) «ΌΠΟΙΟΣ ΑΝΑΚΑΤΕΥΕΤΑΙ ΜΕ ΤΙΣ ΤΡΑΠΕΖΕΣ / ΤΟΝ ΤΡΩΝΕ ΟΙ ΤΟΚΟΙ».

(44) «ΤΑ ΠΡΟΒΑΤΑ ΑΠΕΙΡΓΗΣΑΝ / ΚΑΙ ΖΗΤΗΣΑΝ ΚΑΛΥΤΕΡΕΣ ΣΥΝΘΗΚΕΣ ΣΦΑΓΗΣ».

²⁰ Πβ. Tajfel and Forgas (1981: 124), «είμαστε αυτό που είμαστε, επειδή αυτοί δεν είναι αυτό που είμαστε».

Συνοψίζοντας, ο ανώνυμος δημιουργός του συνθήματος αναλαμβάνει τον ρόλο μιας οιονεί «φωνής» του λαού, ενός ενεργού πολίτη που εξέρχεται από τον μικρόκοσμο της ιδιωτικής σφαίρας, βρίσκεται σε διάλογο με τον δημόσιο χώρο και επωμίζεται την ευθύνη να εγχειμενοποιήσει και να «απαθανατίσει» - με χαριτολογική διάθεση ή με επιθετικότητα, ειρωνεία, σαρκασμό ή αυτοσαρκασμό - κοινά πολιτισμικά βιώματα υπό συγκεκριμένη, πολιτικοποιημένη οπτική. Έχοντας ως στόχο άλλοτε τα μέλη της έξω ομάδας (*εξωτερικός στόχος*) και άλλοτε τα μέλη της έσω ομάδας (*εσωτερικός στόχος*)²¹, επιδιώκει μέσα από τη λεκτική εκδίκηση ή κατήχηση, αντιστοίχως, να «χρωματίσει» με την αντισυστημική κριτική του το ουδέτερο αστικό τοπίο και να τροφοδοτήσει τη συλλογική μνήμη. Έτσι, τόσο από την πλευρά του δημιουργού του συνθηματικού λόγου, όσο και από την πλευρά των αποδεκτών, που επιλέγουν να τον ενστερνιστούν ή να τον απορρίψουν, τα συνθήματα συνιστούν πράξεις ταυτότητας, επιβεβαιώνοντας την απόφαση του Derrida (1991: 68), ότι «το υποκείμενο μετατρέπεται σε σημαίνον υποκείμενο μόνο μέσω της εγγραφής του σε ένα σύστημα αντιθέσεων».

4. Επίλογος

Από την ανάλυση των χιουμοριστικών συνθημάτων του corpus προέκυψε ότι το γλωσσικό χιούμορ ως μέσο δημόσιας έκφρασης δίνει στους συντάκτες του συνθηματικού μικροκειμένου τη δυνατότητα να αξιοποιήσουν μια σειρά από γλωσσικά μέσα και στρατηγικές, προκειμένου να διαπραγματευθούν, με τρόπο ελκυστικό, οικείο αλλά και καυστικό, διάφορα ζητήματα κοινού ενδιαφέροντος, κεντρίζοντας το ενδιαφέρον των περαστικών και παρακινώντας τους να ενεργοποιήσουν θετικές ή αρνητικές αξιολογήσεις.

Μέσα από αυτή την κριτική, χιουμοριστική διαπραγμάτευση, τα συνθήματα σε τοίχους, ως υποείδος του πολιτικού λόγου, αναδεικνύονται σε δείκτες κοινωνικοπολιτικών στάσεων, οριοθετώντας δίκτυα ανατροπής των κατεστημένων αντιλήψεων και προτείνοντας εναλλακτικά μοντέλα συμμετοχικής δράσης.

Έτσι, σε αντίθεση με τον εξουσιαστικό πολιτικό λόγο, που εκμεταλλεύεται το σύνθημα για τη *φυσικοποίηση* (*naturalization*)²² της καθεστηκυίας τάξης και την αναπαραγωγή της κοινωνικής ισχύος, οι χιουμοριστικές συνθηματικές ατάκες συνθέτουν έναν επαναστατικό *χωρικό* (*spatial*) κώδικα, σύμβολο μιας διαφορετικής κοινωνίας, που σπάει τα δεσμά ανάμεσα στο ιδιωτικό και το κοινό²³, μια *αντιγλώσσα* (*antilanguage*)²⁴, που καθιερώνει τόπους αντίστασης ενάντια στον ηγεμονικό λόγο.

ABSTRACT

This paper aims at raising several issues concerning recording continuous spontaneous spoken discourse for linguistic and dialectal research and its subsequent transcription. Transcription involves both interpretive and representational decisions which respond to the contextual conditions of the process, the transcriber's expectations and beliefs about the informants and the purpose of transcription. In the field of dialectology there is a need for a thorough reassessment of the state of the art in the transcription of spoken language for linguistic research.

Λέξεις κλειδιά: επιτόπια έρευνα, προφορικός λόγος, καταγραφή, απομαγνητοφώνηση

1. Εισαγωγή: προφορικός λόγος και επιτόπια έρευνα

Το λεκτικό εκφώνημα αποτελεί τη μονάδα του προφορικού λόγου. Μεγάλη σημασία όμως έχουν και ορισμένα άλλα γνωρίσματα της ομιλίας που το συνοδεύουν, όπως τα παραγλωσσικά γνωρίσματα, ο επιτονισμός, οι παύσεις, η προφορά, η ένταση της φωνής και τα εξωγλωσσικά γνωρίσματα, χειρονομίες, κινήσεις, εκφράσεις, βλέμμα, διάθεση. Στον προφορικό λόγο παρουσιάζονται συχνά ελλειπτικές προτάσεις ή ανολοκλήρωτες φράσεις, ενώ ακόμα υπάρχουν πολλά «γεμίσματα» και παύσεις. Ορισμένες φορές διαφαίνεται η προσπάθεια του ομιλητή να αλλάξει ή να βελτιώσει μια φράση που χρησιμοποίησε.

Η επιτόπια έρευνα είναι ένα απαραίτητο και αξιόπιστο μεθοδολογικό εργαλείο για τις ανθρωπιστικές και κοινωνικές επιστήμες. Πρόκειται για μια καταγραφή της σύγχρονης πραγματικότητας που διαθέτει τόσο παραδοσιακά στοιχεία όσο και νεωτερισμούς. Πρόκειται για έρευνα διπλής κατεύθυνσης: α) καταγραφή πρωτογενούς υλικού για αρχείο, β) πρόσληψη προφορικού διαλεκτικού λόγου μέσα σε κοινωνικά και πολιτισμικά συμφραζόμενα.

Η βιογραφική μέθοδος χρησιμοποιείται στις ποιοτικές έρευνες για την ανασυγκρότηση και την ανάλυση της εμπειρίας και κατά συνέπεια των κοινωνικών διαδικασιών. Η αφηγηματική ιστορία ζωής δεν είναι μόνο ένα άθροισμα ακολουθιών δράσης πάνω σε ένα βιογραφικό χρονικό άξονα, αλλά έχει τη δική της λογική, αυτή της αυτοβιογραφικής αναδόμησης. Είναι μια τεχνική που χρησιμοποιείται σήμερα εκτεταμένα και αναπτύχθηκε στο πλαίσιο κοινωνιολογικών μελετών. Η τεχνική έγκειται στο ότι ο ερωτώμενος διηγείται ελεύθερα ιστορίες που έζησε ο ίδιος.

Σε αντίθεση με άλλες μορφές συνέντευξης, δεν βασίζεται στο σχήμα ερώτηση-απάντηση, αλλά δίνεται ο χρόνος στον πληροφοριοδότη να διηγηθεί ένα συμβάν χωρίς να διακόπτεται ή να σχολιάζεται. Ο ερευνητής είναι απλώς ακροατής. Επιβεβαιώνει, όποτε χρειάζεται, τη συμμετοχή του με νοήματα (ή ένα κούνημα του κεφαλιού). Έτσι δίνεται στον ερωτώμενο η δυνατότητα να αναπτύξει ένα θέμα αποκλειστικά στη δική του γλώσσα. Όλη η συνέντευξη μαγνητοφωνείται, ώστε να μπορούν κατά τη διάρκεια της απομαγνητοφώνησης να σημειωθούν ακόμα και οι αποχρώσεις στον τόνο της φωνής, τα κομπιάσματα κλπ., τα οποία σημειώνονται και αναλύονται.

Πρόκειται για μια χρονοβόρα μέθοδο. Κάθε συνέντευξη μπορεί να κρατήσει από 20 λεπτά έως 1 ½ ώρα. Συνήθως γίνεται στον ιδιωτικό χώρο του ερωτώμενου αλλά και αλλού, π.χ. στο καφενείο. Προϋποθέτει την κοινωνική επαφή ερευνητή-πληροφορητή (σε αντίθεση π.χ. με τα ερωτηματολόγια, που μπορούν να σταλούν ταχυδρομικώς προς συμπλήρωση, ή με σύντομο τηλεφωνικό διάλογο κλπ.), ενώ ακολουθεί η επεξεργασία, ανάλυση και ερμηνεία των αποτελεσμάτων. Πριν από το απομαγνητοφωνημένο κείμενο θα πρέπει να υπάρχει ένα σύντομο σημείωμα για τον πληροφορητή

(όνομα, ηλικία και προέλευση). Στην περίπτωση προσφύγων ή κατοίκων μη γηγενών (νύφης στο χωριό, Θρακιώτης σε μικρασιατικό χωριό) η πληροφορία αυτή είναι ουσιαστικής σημασίας. Στην ημικατευθυνόμενη συνέντευξη το αντικείμενο δεν είναι περιορισμένο, οι ερωτήσεις δεν είναι προκαθορισμένες και το κείμενο που προκύπτει από την απομαγνητοφώνηση εξετάζεται στην ολότητά του κι όχι επιλεκτικά. Η βασική μονάδα καταγραφής επιλέγεται από τον ερευνητή σε σχέση με τα βασικά ερωτήματα της έρευνας και όταν η μονάδα καταγραφής (π.χ. λέξη) δεν είναι δυνατό να ερμηνευθεί παρά μόνο σε σχέση με τα συμφοραζόμενα, τότε το εκτενέστερο κομμάτι του περιεχομένου αποτελεί τη μονάδα καταγραφής και είναι η μονάδα συμφοραζομένων.

Ακόμα είναι δυνατό να χρησιμοποιηθούν ομάδες εστιασμένης συζήτησης: ένας μικρός αριθμός ατόμων με κοινά χαρακτηριστικά, κτλ. γυναίκες μιας ηλικιακής ομάδας, όπου αναπτύσσεται η δυναμική της ομάδας. Σε αυτές τις περιπτώσεις, στην απομαγνητοφώνηση έχει κανείς να αντιμετωπίσει το πρόβλημα της αλληλοεπικάλυψης του λόγου (overlapping). Η καταγραφή γίνεται σε κασετόφωνο, ενώ ο ερευνητής κρατά και χειρόγραφες σημειώσεις. Ένα από τα πιο ενδιαφέροντα αποτελέσματα της απομαγνητοφώνησης είναι η συνύπαρξη, μέσα στο ίδιο εκφώνημα, «αντιφατικών καταστάσεων»: παράλληλων τύπων (πολυτυπία, δυναμικότητα συγχρονίας, συνώνυμα, ρηματικοί τύποι (ποιοι τύποι παράγονται πιο αυθόρμητα;). π.χ. *γυναϊκών* και *γυναϊκώνε* ή δυο εναλλακτικοί τρόποι προφοράς (διαλεκτική προφορά που υποχωρεί;).

2. Προφορικές καταγραφές: Το τι και το πώς

Το θέμα που θα μας απασχολήσει στη συνέχεια είναι τα προβλήματα που προκύπτουν από τις προφορικές καταγραφές. Με βάση τις καταγραμμένες συνεντεύξεις επιδιώκεται να συζητηθούν προβλήματα απόδοσης του προφορικού λόγου και ανάγνωσης ποικίλων στοιχείων που μια προφορική συνέντευξη περιέχει. Δεν θα αναφερθούμε εδώ αναλυτικά στις τεχνολογικές εξελίξεις των τελευταίων ετών που επιτρέπουν καλύτερες εγγραφές: συσκευές ψηφιακής εγγραφής φωνής που προσφέρουν ήχο ποιότητας CD, λογισμικό αναγνώρισης ομιλίας, απομόνωση θορύβου, λήψη ηχητικών αρχείων σε υπολογιστή, κλπ.

Κεντρική διαδικασία αναδεικνύεται η μαγνητοφώνηση του προφορικού λόγου και στη συνέχεια η απομαγνητοφώνηση και η πιστή καταγραφή του. Στην πράξη ο προφορικός λόγος μετατρέπεται σε γραπτό κείμενο αλλά δεν προσαρμόζεται στις προδιαγραφές του. Διατηρεί έτσι το αρχικό του περιεχόμενο και το ανάλογο επίπεδο ύφους. Η απομαγνητοφώνηση λέει «λέξη προς λέξη» ό,τι είπε ο ομιλητής ή η ομιλήτρια. Συμπεριλαμβάνονται π.χ. φράσεις που ξεκινούν και μένουν μετέωρες, λεκτικές και γραμματικές ανακολουθίες που ενδέχεται να κάνει ο ομιλητής ως συνέπεια του αυθόρμητου, μη προσχεδιασμένου χαρακτήρα του λόγου του. Ακόμα καταγράφονται λέξεις ή τμήματα φράσεων που επαναλαμβάνει ο ομιλητής, ακόμα κι αν η επανάληψη δεν γίνεται για λόγους έμφασης, αλλά αποτελεί στοιχείο της προφορικής εκφοράς.

Κατά την καταγραφή προκύπτουν, όπως είναι φυσικό, αποσπάσματα με προβληματικό ήχο (λόγω θορύβου ή κακής εγγραφής) και διάφορα δυσνόητα σημεία που σχετίζονται κυρίως με απόδοση κυρίων ονομάτων, τοπωνυμίων, κλπ., για την εξακρίβωση των οποίων χρησιμοποιείται συμπληρωματικό υλικό. Άλλωστε, πολλές φορές απαιτείται να επιστρέψει ο ερευνητής στα ηχητικά αρχεία του και να ακούσει ξανά και ξανά τα επίμαχα σημεία. Επειδή απώτερος στόχος της απομαγνητοφώνησης είναι η περαιτέρω αξιοποίηση του προφορικού υλικού π.χ. στην περίπτωση του ΙΑΝΕ στη μελέτη των νεοελληνικών ιδιωμάτων και τον εμπλουτισμό του αρχείου, το υλικό αποδελτιώνεται για τη σύνταξη του Ιστορικού Λεξικού.

Κατά την απομαγνητοφώνηση, ο ερευνητής συνειδητοποιεί ότι μια σειρά από στοιχεία όπως ο τόνος της φωνής, ο ρυθμός της ομιλίας, ο διαλεκτικός επιτονισμός, χωρίς να αναφέρει κανείς τις χειρονομίες ή τις εκφράσεις του ομιλητή δεν αποτυπώνονται συνήθως στο χειρόγραφο. Η ακρίβεια της μεταγραφής του προφορικού λόγου περιλαμβάνει και το μείζον ζήτημα της φωνητικής ή μη μεταγραφής της προφοράς (Bailey 1986, Lane et al. 1996, Bailey et al. 2005, Macaulay 1991, Miethaner 2000). Καθώς η μεταγραφή όλου του κειμένου στο Διεθνές Φωνητικό Αλφάβητο θα δυσκόλευε πολύ την ανάγνωση και κατανόησή του, κάποιοι μελετητές μεταγράφουν στο IPA μόνο ορισμένες μη προβλέψιμες πραγματώσεις, κάτι που σημαίνει ότι ήδη γνωρίζουν τι είναι σταθερό και τι όχι σε μια ποικιλία.

Η μεταγραφή ενός προφορικού κειμένου δεν είναι μια ουδέτερη γραπτή αναπαράστασή του. Καθορίζεται σε μεγάλο βαθμό από τις θεωρητικές απόψεις του μελετητή των δεδομένων και τα συγκεκριμένα ερευνητικά ενδιαφέροντά του. Παρ' όλο που η τεχνολογική εξέλιξη έχει διευκολύνει τη συλλογή και ηλεκτρονική επεξεργασία των προφορικών κειμένων, οι δυσκολίες κατά την καταγραφή και ιδιαίτερα κατά τη μεταγραφή τους σε γραπτό λόγο παραμένουν. Μάλιστα, αν τα διακριτικά στοιχεία του προφορικού εκφώνηματος (ύψος φωνής, ένταση, επιτονισμός, διάρκεια παύσεων)

αποτυπωθούν στη μεταγραφωμένη του μορφή, δίνουν κείμενα σημειωτικά επιβαρυμένα, δηλαδή δυσανάγνωστα, ενώ ταυτόχρονα δυσχεραίνουν και την ψηφιακή τους εκμετάλλευση.

Ένα από τα βασικά ζητήματα που προκύπτουν λοιπόν κατά τη μεταγραφή του προφορικού κειμένου είναι η απομαγνητοφώνηση του συνόλου του υλικού και η όσο το δυνατόν πληρέστερη σήμανσή του. Αν και το ηχητικό υλικό συντηρείται και αρχειοθετείται και τα ηχητικά αρχεία μεταφέρονται από παλαιότερα μέσα σε νεότερα (ψηφιοποιήσεις, κλπ.) είναι δύσκολο να ανατρέχει κανείς στην πρωτότυπη ηχογράφηση. Καθώς λοιπόν το απομαγνητοφωνημένο κείμενο είναι αυτό που αποτελεί συνήθως το κοινό σημείο αναφοράς των ερευνητών, η μεταγραφή του κειμένου οφείλει να προβλέπει τη μελλοντική του χρήση από μελετητές με άλλα ενδιαφέροντα (Bucholtz 2007: 794).

Το όλο θέμα της μεταγραφής (discourse transcription) έχει απασχολήσει πολλούς μελετητές προερχόμενους από ποικίλους τομείς, που σχετίζονται με αυτή τη διαδικασία με κυριότερους την Ανάλυση Ομιλίας και Παθολογία/Μελέτη Διαταραχών του Λόγου και τις κοινωνιολογικές έρευνες (για μια σχετική με τη μεταγραφή σχολιασμένη βιβλιογραφία βλ. Hammersley 2010).

Στην κλασική για το θέμα που μας απασχολεί εργασία της η Ochs (1979: 43-72) παρατηρεί πως μετά την απομαγνητοφώνηση ο ερευνητής εργάζεται με τα αποτελέσματα της μεταγραφής που έχει κάνει –αυτά είναι τα δεδομένα του. Τα δεδομένα όμως αυτά αντανακλούν τις θεωρητικές του απόψεις και αποτελούν προϊόν επιλογής και αποτελέσματα ορισμένων αποφάσεων του (σχετικά με το τι και το πώς της μεταγραφής), οι οποίες δεν δηλώνονται σε όσους ενδιαφέρονται να χρησιμοποιήσουν στη συνέχεια το υλικό του (Green et al. 1997: 172-176). Κατ' επέκταση, οι μεταγραφές του θέτουν περιορισμούς στις γενικεύσεις και τα συμπεράσματα που προκύπτουν από την έρευνά του.

Παρ' όλο που σε μια μεταγραφή δεν υπάρχει απόλυτη αντικειμενικότητα, η ερευνητική κοινότητα διαθέτει ορισμένα συμβατικά συστήματα μεταγραφής που περιλαμβάνουν ένα συγκεκριμένο αριθμό συμβόλων, π.χ. Jefferson (1996, 2004), Dubois (1991, 1993), Schiffrin 1994, Edwards 2003. Από μια μεταξύ τους σύγκριση προκύπτουν ομοιότητες και διαφορές. Καθώς όμως κάθε σύμβολο εντάσσεται σε ένα σύστημα, η χρήση μεμονωμένων συμβόλων από διαφορετικά συστήματα μπορεί να οδηγήσει σε λάθη και παρανοήσεις κατά τη μεταγραφή. Ο γενικός προβληματισμός ως προς τα σύμβολα μεταγραφής αφορά μεταξύ άλλων τη θέση και το χώρο (spatial organization) που καταλαμβάνουν στη σελίδα του μεταγραφωμένου κειμένου. Στις πραγματικές συνθήκες όλα συμβαίνουν ταυτόχρονα (λόγος, χειρονομίες, άλλοι ήχοι) αλλά στο γραπτό κείμενο για πρακτικούς λόγους σημαίνονται σε χωριστά σημεία και έτσι χάνεται ο συγχρονισμός. Σύμφωνα με την άποψη ορισμένων μελετητών τα σύμβολα μπαίνουν μέσα στο κείμενο (σε παρενθέσεις, αγκύλες), ενώ σύμφωνα με άλλους τα κείμενα και τα σύμβολα μεταγραφής μπαίνουν σε δύο παράλληλες στήλες. Στη δεύτερη ή σε χωριστή τρίτη στήλη μπαίνουν τα σχόλια του ερευνητή σχετικά με το κείμενο, π.χ. ένα σχόλιο για την παρουσία άλλων προσώπων που μπορεί να επηρεάσουν τον εκφερόμενο λόγο.

Στο πλαίσιο αυτών των συστημάτων μεταγραφής, χρησιμοποιούνται ορισμένα σύμβολα π.χ. σημεία στίξης (κόμμα, τελεία, ερωτηματικό) για να δηλώσουν τον επιτονισμό του εκφωνήματος, συγχρόνως όμως χρησιμοποιούνται και με την κανονική τους λειτουργία. Στην περίπτωση του κόμματος π.χ. τρία-τέσσερα συνεχόμενα κόμματα σε ένα απομαγνητοφωνημένο τμήμα λόγου μπορεί να δηλώνουν μικρή παύση, επανάληψη ή και τα δύο. Κεφαλαία γράμματα συμβολίζουν κάτι που λέγεται δυνατά. Μεταξύ των συμβάσεων υπάρχουν ακόμα σύμβολα (αγκύλες) για ταυτόχρονα ή μερικώς επικαλυπτόμενα εκφωνήματα (simultaneous/overlapping utterances). Επίσης σύμβολα για ποικίλα χαρακτηριστικά του εκφερόμενου λόγου, όπως η παρατεταμένη διάρκεια ενός φθόγγου ή μιας συλλαβής (extension), η μη φωνολογικά καθορισμένη μακρότητα (σύρσιμο της φωνής), η έμφαση (emphasis) συνήθως με υπογράμμιση, η ένταση της φωνής, κλπ. Ακόμα, καταγράφεται το γέλιο, το κλάμα, γενικά οι συναισθηματικές εκδηλώσεις/εκφράσεις (Herburn 2004: 251-291) το χειροκρότημα, οι επευφημίες, άλλοι ήχοι (π.χ. εντός παρενθέσεως, τηλέφωνο), η κατεύθυνση του βλέμματος των ομιλητών, κλπ.

Υπάρχουν σημεία σε μια απομαγνητοφώνηση που ο ερευνητής δεν είναι σίγουρος για το τι ακούει και το αποτέλεσμα της μεταγραφής ενέχει αμφιβολία ως προς την ακρίβεια. Η αμφιβολία αυτή πρέπει να καταγραφεί με κάποιο τρόπο (transcriptionist doubt). Ορισμένοι ερευνητές παραθέτουν εναλλακτικές πιθανότητες του τι μπορεί να είχε ειπωθεί στα επίμαχα σημεία. Όταν οι λέξεις ή φράσεις είναι εντελώς ακατάληπτες, κάποιοι συμβατικά χρησιμοποιούν ως σύμβολα ένα κεφαλαίο Χ εντός παρενθέσεως για κάθε συλλαβή που είναι αδύνατο να μεταγραφεί. Άλλοι συμπληρωματικά δηλώνουν και το λόγο αδυναμίας της μεταγραφής (π.χ. θόρυβος). Σε περίπτωση που ο ερευνητής αποφασίσει να παραλείψει τα σημεία αυτά κατά την μεταγραφή θα πρέπει να δηλώσει το κενό/χάσμα που υπάρχει στο μεταγραφωμένο κείμενο (Bucholtz 2007: 788). Τα δεδομένα που παραλείπονται μπορεί να δημιουργήσουν προβλήματα στη μελέτη του ευρύτερου κειμένου π.χ. ως προς τη συνοχή, συνεκτικότητα, αντωνυμική αναφορά, δείξη κλπ ακόμα και σε ζητήματα συντακτικής ανάλυσης των δεδομένων. Όπως αντιλαμβάνεται κανείς, αν απουσιάζουν τμήματα των εκφωνημάτων, η δομή του λόγου αλλοιώνεται. Ιδιαίτερα στο ζήτημα της διαλεκτικής σύνταξης, ξεπερνώντας τις προκαταλήψεις

για την ασυνταξία του προφορικού λόγου, τέτοιου είδους αυθόρμητη παραγωγή λόγου αποτελεί το ιδανικό υλικό για τη μελέτη της.

Ένα ακόμα αδύνατο σημείο στα συμβατικά σύμβολα που χρησιμοποιούνται σχετικά: οι τρεις τελείες (αποσιωπητικά) χρησιμοποιούνται για παύση πάνω από μισό δευτερόλεπτο και συγχρόνως για την παράλειψη στοιχείων. Πρόκειται για δυο εντελώς διαφορετικές περιπτώσεις που μπορούν να προκαλέσουν σύγχυση στον αναγνώστη του μεταγγραμμένου κειμένου.

Άλλες πτυχές του ζητήματος της μεταγραφής προς επιμέρους εξέταση σχετίζονται α) με τον ερευνητή που κάνει την απομαγνητόφωνηση, π.χ. ποιος μεταγράφει; Ο ίδιος ο ερευνητής που έκανε την καταγραφή; β) με το σκοπό της έρευνας για την οποία θα χρησιμοποιηθεί το υλικό της απομαγνητόφωνησης π.χ. ειδικός σκοπός έρευνας τα διαλεκτικά επιφωνήματα (Γιακουμάκη 1998), θαυμαστικά, κλητικά, σχετλιαστικά (ωχ, αχ), τα οποία πρέπει να αποδοθούν με ακρίβεια ή οι παύσεις (ποικίλης υφής και διάρκειας).

Στην περίπτωση αυτή η απλή δήλωση παύσης δεν αρκεί αλλά χρειάζεται χρονομέτρηση. Ο ομιλητής είναι δυνατόν να μην έχει σταματήσει να μιλάει, να στέκεται για να σκεφτεί, να κάνει ένα λάθος και να το διορθώνει, ξεχνάει, επαναδιατυπώνει, κλπ. Η δομή μιας προφορικής αφήγησης είναι συχνά περισσότερο ζήτημα παύσεων παρά χρήσης λεκτικών μέσων. Το όλο ζήτημα των παύσεων στον προφορικό λόγο σχετίζεται με το κόμπιασμα στη ροή του λόγου. Πώς μεταγράφεται ο δισταγμός, η δυσκολία (διστακτικά μόρια-δείκτες διόρθωσης/hesitation markers-particles); Είναι σημαντικό να δηλωθεί γιατί μπορεί να προηγείται μιας εξαιρετικά πλούσιας προσωπικής εξομολόγησης (θάνατοι, δυστυχίες, κλπ.) πυκνής συγκίνησης.

Η έρευνα μπορεί να επικεντρωθεί σε ποικίλα άλλα ζητήματα όπως:

- ο ρυθμός της ομιλίας: το πόσο γρήγορα μιλάει κανείς έχει σχέση με την ποιότητα του παραγόμενου λόγου. Μιλώντας πιο αργά, προσχεδιάζεις, άρα επηρεάζεται και η δομή των λεγομένων.
- η συμπεφορά (ιδιαίτερα σημαντική στα προφορικά δεδομένα από διαλέκτους).
- η λογοκρισία σε άσεμνες εκφράσεις, ύβρεις, κλπ.
- η αποτύπωση του σωστού και του λάθους, οι παραβιάσεις των γραμματικών κανόνων και ο διαλεκτικός λόγος ως ατομική έκφραση/λάθος της στιγμής, η ορθογράφηση (Miethaner 2000).
- η ιδιόλεκτος του πληροφορητή: η μεγάλη ακρίβεια και λεπτομέρεια στην καταγραφή μπορεί να προβάλλει στοιχεία της ιδιολέκτου του ομιλητή σε βάρος του τοπικού ιδιώματος.

3. Συμπεράσματα

Στις περιπτώσεις που μια μηχανιστική τεχνική μεταγραφής του προφορικού λόγου σε γραπτό δεν είναι αρκετή (πρακτικά συνεδριάσεων), η γλωσσική ιδεολογία των εμπλεκόμενων αποκτά το δικό της ρόλο (Lapadat 2000, Lapadat & Lindsay 1998, 1999). Ο σύνθετος χαρακτήρας του προφορικού λόγου και οι αναντιστοιχίες του με το γραπτό θέτουν επιπλέον δυσκολίες στο εγχείρημα. Το γεγονός ότι διαφορετικοί ερευνητές μεταγράφουν διαφορετικά το ίδιο ηχητικό αρχείο αποδεικνύει από τη μία τον πλούτο της προφορικής επικοινωνίας και από την άλλη ότι ένα πληρέστερο μοντέλο αντίληψης και γραπτής απόδοσης του προφορικού λόγου αποτελεί ακόμα το ζητούμενο. Η πρόκληση για όσους ερευνητές ασχολούνται με τη συλλογή γλωσσικών δεδομένων προφορικού λόγου, ιδιαίτερα διαλεκτικού, παραμένει ως εξής: μπορεί μια μεταγραφή να διαβαστεί όπως ακούγεται το μαγνητοφωνημένο ηχητικό αρχείο;

Παράρτημα παραδειγμάτων απομαγνητοφωνημένου λόγου:

1. Τον βλέπει αυτή, η χήρα τώρα (-Γιατρέ, κάθου κειπέρα τώρα!), τον βλέπει αυτήνα (Δοξάτο Δράμας, χφ. 1456)
2. -Κυρία μου, λέει, Καρατζόγλου Νίκο εισπράκτωρ δεν έχουμε (Δοξάτο Δράμας, χφ. 1456)
3. Πααίνω 'γω, 'γω είμι διάβουλους, 'γω 'μι «πιταζάμην», 'γω δ' λιέου ... μπουρ μπουρ μπουρ (Κυψέλη Καστοριάς, χφ. 1422)
4. Όχ, ήρθαν οι άνδρoι όλ' κει, ήταν όξου στουν γραφέ, λιέει, κάτι την αστυνουμία να..., στ' αυτόφουρου, λιέει, όλοι να βγούμε μαρτύροι, λέει, τέλους πάνδουν δεν θέλhς' αυτός τέτοιο πράμα να κάνει... (Κυψέλη Καστοριάς, χφ. 1422)
5. 'Υστια μάζευαν του τυρί κι τ' άφ'ναν καμβόσες μέρες στο καδί, κι ύστερα έριχναν πυτιά ικεί μέσα κι αυτό γένουνταν ύστερα και φούσκωνε κι εκεί το δουβουλούζαν ύστερα κι έβγαναν τυρί, έβγαναν βούτυρο, έβγαναν ξ' νόγαλο, που το λεγάμαν γίζα (Κεφαλοχώρι Κονίτσης, χφ. 1402)
6. Αλλού τα λέν' χράμια. Κιλίμια, δ'λαδή του χράμ' έχ' άλλου σχεδίου, είνι άλλου υφαδό. Του χράμ' του λέν' δωπέρα που έχουν οι Σουρπιώτες έχουν το χράμ' άπου κάνουν μι τιτραγουνάκια έτσ'. Εμείς... ήταν υφαδό κιλίμια τα 'λεγαμι, ήταν τραγουμαλλήσιο, ήταν από τα γίδια του μαλλί (Κεφαλοχώρι Κονίτσης, χφ. 1402)
7. Βλέπ'ς κάθε παλιό σπίτι δε χαλάει, διότι ο εργάτης εργάζεται για να φκειάσ' τέλειου, δε δουν διέφερε για του ημερομίσθιου, αλλά σόλεγ': να το φκειάσω στέρεου να μη βέσ', να το φκειάσω έτσ' να μη χαλάσ'. Τώρα ουόλα πρόστυχα, όλα ταλαίπωρα (Αράχωβα Ναυπακτίας, χφ. 1446)
8. Η Αράχωβα το χίλια εννιακόσα τριάδα ιφτά πανδρευτήκανε οχτώ ζευγάρια απ' του ίδιου το χωργιό, την ίδια χρονιά. Έτσ' κι από τα χουργιά. Τουτέ, από αγάπη δεν έπαρχε κανένα ανδρόγυνο. Οι συγενείς, να πούμε, η γινεά, ρωτούσι, συμβουλευέταν, δηλαδή ένας με τον άλλουν συγενής (Αράχωβα Ναυπακτίας, χφ. 1446)

9. Τ' Άγιο-Τρυφώνου τίποτα, αγιασμό διαβάξει ο παπάς για τα περιβόλια, στην εκκλησία. Πάνε και παίρνουνε, αυτός ο αγιασμός, αυτός ο αγιασμός μπορείς να δونه χρησιμοποιήσεις όλο do χρόνο, να ριζ'ς και στα περιβόλια, ενώ του Φωτάνε δεν δونه κουνάνε, δεν δونه σειούνε τον αγιασμό (Ριζοσπηλιά Γορτυνίας, χφ. 1388)
10. Μετά το λιώναμε, το βάζαμε το βράζαμε, το χύναμε το πρώτο νερό, μετά του ρίχναμε άλλο, το βράζαμε αυτό καλά, μετά το τσιγαρίζαμε, βάναμε λίπος από το ίδιο. Βάζαμ' απάνω, ήσαδε χώρια η σκόρτσα του γουρουνιού, χώρια η πέτσα του και χώρια το βασιλικό (Ριζοσπηλιά Γορτυνίας, χφ. 1388)
11. Πήγαμι με του βατέρα μ' να κάνουμε χωράφ' και το χωράφ' αυτό είχ' βάτα. Για να μη σ'κώσου 'γω τη σκιρπανιά, ήταν πιο βαριά, για να χτ'πάου τα βάτα για να τα βγάλου, πάει ου πατέρα ζουμ κι θάμινιβι, εμένα μ' έβαλε να κάνω χωράφ' (Σούρπη Μαγνησίας, χφ. 1439)
12. Ιγώ πόναγα; Σι λέου, ήμαν τρεις μέρις ήμαν μια βάλα, και διν ήβλιπα, ούτι μάτια, ούτι ...! Ξέρ'ς τι μ' έκαναν; Ξιδόλασπη, κόκκινου χώμα ζ'μουμένου με ξιδ' κι μ' έβαιναν σ' ένα σιδόν'. Κι τότες σιδόνια διν είχαμι (είχαμι κι καεί κιόλα, γιατί κάηκι το χωριό μας), κι είχαμε κουριλές (Σούρπη Μαγνησίας, χφ. 1439)
13. Εχαράκωναμε λουπόν ελιές, άλλες εβάναμε κολυβάδες. Τσι βάζαμε πρώτα... είχαμε πολλές μεθόδους. Όταν εθέλαμε για να 'χουμε και πρώιμα, προσφάι στην ελιά, τσι κάναμε σκαστές, τ'ς είχαμε δώδεκα μέρες, δεκαπέδε, αλλάζαμε τα νερά και μετά αφού τσι ζεσταίναμε, έβλεπες και κάναμε το ωραίο το προσφάι, γλήγορα, εκεί που μαζεύαμε ελιές (Περαχώρι Ιθάκης, χφ. 1429)
14. Όλοι είμαστε στις εξοχές! Ανάλογα τη βοιότητα, ποσότητα που είχε ο καθένας εμαζεύαμε και τέσσερους μήνες ελιές! Όχι με την ευκολία που υπάρχει σήμερα, με τα ρούχα κάτου και με τα τσιγριά και με τα μηχανήματα! Τότες είχαμε... Να 'ρθεις κάποια ώρα να πάμε στο κατώι, να σου δείξω. Ακόμα έχω το σακκούλι, είναι όπως μαξιλαροθήκη, υφαδό σακκούλι, με σκoiνιά, το 'φερνα έτσι, από τη μέση μου, και πηγαίναμε πριν να φέξει (Περαχώρι Ιθάκης, χφ. 1429)
15. Εμένα η μάνα μου έκανε πάρα πολλά π'τοπούλια, και με σταρένιο βέβαια αλεύρι. -Να κάμομε, παιδιά, κι ένα πιτοπούλι. Τα λέγαμε λειψανάβατα πιτοπούλια, άλλα τ' ανεβατά. Και μάλασσε γρήγορα-γρήγορα, μια ολιά ζύμη και στο τηγάνι. Και το πατούσε και του 'κανε κι έτσι τρύπες-τρύπες όπως είναι ο βολίστρης για να ψηθεί γρήγορα και το τρώγαμε κι ήτανε νοστιμότατο (Κρίτσα Λασιθίου χφ. 1448)
16. Τα χρόνια τση μάνας μου παρατηρούσανε ποια λαμπάδα επρωτοκάηκε: «'Ησβησε το γαμπρού η λαβάδα; 'κειοσάς θα πρωταποθάνει» και κάτι τέθoια. Είχα ένα γξάδερφο παπά. Όταν το βαφτίσανε, βάνουνε το έλαιο στη γολυμπήθρα, λουπόν η νονά αποκρεμάται από πάνω και λέει του παπά: -Γα πρόσεξε ένα σημείο στη γολυβήθρα μέσα; Και ξανοίγει ο παπάς, σταυρό εσχημάτισε. Αυτό το παιδί θα λάβει χάρη. Και δα ύστερα, πράγματι παπάς (Κρίτσα Λασιθίου χφ. 1448)
17. Και του 'βγαλα το γαβρί, φύγε λέω, γιατί θα σε σκ... θα σου δώσω μια θα σε ξε..., θα σου σπάσω το κεφάλι σου! Και βγάνει τη γάμα. Και να μην ηδραλιστώ, ε! Να μια κάμα ήβγαλε! Και μου την έφερε εδονά, τοσοδά. Και νε ηδραλίστικα, μήτε φοβήθηκα (Φούρνοι Ικαρίας χφ. 1436)
18. Αυτά εδώ λέγονται ταράχτης. Θα το ανεκατέψω και θα πάρω τη γουτάλα, που είναι πιο κουφαλωτή. 'Κείνο με το κλαδί λέγεται διόνιστρο. Κι αυτό εδώ λέγεται διόνιστρο, το καλάμι με το κλαδάκι λέγεται διόνιστρο. Πρώτα ήτανε στη σειρά οι τσοπάνηδοι όλοι, καθόδανε και ένας ήρμε τα δικά του. Κάνουμε καθένας τα δικά του. Έπειτα, κάνουμε κι ένα σημάδι, σφραγίδα λέγεται, στα αυτιά για να τα γνωρίζω. Αλλά και να μη τα σφραΐσουμε, τα γνωρίζουμε... Τώρα γίνηκε αργολάβος, τσοπάνης αργολάβος (Φούρνοι Ικαρίας χφ. 1436)

Η ΚΟΙΝΩΝΙΚΗ ΔΙΓΛΩΣΣΙΑ ΣΤΗΝ ΙΣΤΟΡΙΑ ΤΗΣ ΕΛΛΗΝΙΚΗΣ ΓΛΩΣΣΑΣ

ABSTRACT

The aim of this article -beyond discussing a number of translation issues with regard to Greek terminology-is to address certain methodological problems in characterizing the sociolinguistic situation of the Roman and Byzantine periods as diglossia. These issues relate mainly to: a) the literacy degree (of the Greek speaking) Byzantine speech community and the fact that L variety affects the speech community as a whole only in "modern" societies, b) the difficulty to define/identify two distinct varieties, H and L respectively in the 2th century AD.

Λέξεις-κλειδιά: (κοινωνική) διγλωσσία, διπλογλωσσία, Βυζάντιο, εγγραμματισμός, ελληνιστική κοινή.

1. Εισαγωγικά

Η ενασχόληση με τη συγκεκριμένη θεματική επιβάλλει την εκ προοιμίου διευκρίνιση δύο σημείων, (1) του όρου *κοινωνική διγλωσσία*, (2) της απόδοσής του στη νέα ελληνική.

(1) Στο παρόν άρθρο ο όρος *κοινωνική διγλωσσία* (αγγλ. diglossia) χρησιμοποιείται στο κλασικό του σχήμα, όπως το όρισε ο Charles Ferguson το 1959,¹ χαρακτηρίζοντας δηλ. τη συνύπαρξη δύο ποικιλιών της ίδιας γλώσσας σε μία γλωσσική κοινότητα. Τη χρήση των ποικιλιών αυτών χαρακτηρίζει μεταξύ άλλων η λεγόμενη συμπληρωματική κατανομή, δηλ. το γεγονός ότι οι εν λόγω ποικιλίες «λειτουργούν», χρησιμοποιούνται συμπληρωματικά στη γλωσσική κοινότητα. Καμία δεν χρησιμοποιείται με πληρότητα σε όλα τα γλωσσικά πεδία, αλλά μόνο σε ορισμένα από αυτά, συμπληρώνοντας έτσι η μία την άλλη. Κατά συνέπεια η πρώτη, η λεγόμενη *υψηλή ποικιλία* (αγγ. high variety), στο εξής Υ, χρησιμοποιείται κυρίως στο γραπτό λόγο και γενικότερα σε πεδία που έχουν ή θέλουν να έχουν την αίσθηση της επιστημότητας, της «ορθής»/πρότυπης γλώσσας (λ.χ. στον τύπο, στη «σοβαρή» λογοτεχνία, στον επιστημονικό λόγο, στα ΜΜΕ, σε θρησκευτικό περιβάλλον κ.λπ.), ενώ η δεύτερη, η λεγόμενη *χαμηλή ποικιλία* (αγγλ. low variety), στο εξής Χ, χρησιμοποιείται σε «καθημερινό», σε «οικείο» περιβάλλον (λ.χ. στην οικογένεια, στην προφορική λογοτεχνία, στην καθημερινή/αβίαστη γλωσσική επικοινωνία κ.λπ.). Στον κλασικό ορισμό του Ferguson, όπου ως παραδείγματα χρησιμοποιήθηκαν οι περιπτώσεις της νέας ελληνικής, της αραβικής, της ελβετικής γερμανικής και της κρεολής της Αϊτής, οι δύο ποικιλίες αποτελούν ποικιλίες της ίδιας γλώσσας, τουλάχιστον ιδωμένες ιστορικά.² Βασικό χαρακτηριστικό, λοιπόν, της λεγόμενης *κλασικής* ή *εσωτερικής* (στενής) διγλωσσίας αποτελεί το γεγονός πως οι δύο ποικιλίες είναι γενετικά συγγενείς και στενά συνδεδεμένες μεταξύ τους.

Η αναφορά στη λεγόμενη κλασική ή εσωτερική διγλωσσία καθιστά αναγκαία τη μνεία και του αντίποδά της, δηλ. της λεγόμενης *εκτεταμένης* (ευρείας) ή *εξωτερικής* διγλωσσίας,³ μιας κοινωνιογλωσσολογικής κατάστασης, την οποία επισήμανε λίγα χρόνια αργότερα, το 1967, ο Joshua

¹ Ferguson 1959.

² Για τον ορισμό της «ιστορικής» γλώσσας, σε αντίθεση με τις διάφορες ποικιλίες που συνθέτουν ένα γλωσσικό σύστημα στη συγχρονία του (προπαντός με τις κάθε είδους γεωγραφικές, κοινωνικές και λειτουργικές ποικιλίες του), βλ. κυρίως Coseriu 1988. Για την απόδοση του αγγλικού register ακολουθώ εδώ την πρόταση «λειτουργική ποικιλία» (έναντι του «επίπεδο ύψους») στο Αρχάκης/Κονδύλη 2004: 89, 144-145 (υποσημείωση 25).

³ Για την ορολογία βλ. περιληπτικά Schiffman 1997. Στη χρήση των όρων υπάρχει ακόμη ρευστότητα –συχνή είναι και η αναφορά στα ονόματα των εμπνευστών του κάθε σχήματος: Ferguson και Fishman–, αλλά σε γενικές γραμμές κυριαρχούν τα προσδιοριστικά «κλασικός», «εσωτερικός» vs. «εκτεταμένος», «εξωτερικός».

Fishman.⁴ Στην «εξωτερική» διγλωσσία δεν έχουμε πια δύο συγγενείς ποικιλίες, αλλά δυο μη (τουλάχιστον άμεσα) συγγενείς γλώσσες, οι οποίες χρησιμοποιούνται διαφορετικά σε μία γλωσσική κοινότητα, δηλ. διακρίνονται κι αυτές (μεταξύ άλλων) από την συμπληρωματική κατανομή που προαναφέρθηκε. Στην Παραγουάη, λ.χ., η ισπανική λειτουργεί ως Υ, ως γλώσσα υψηλού κύρους, ενώ η γλώσσα των ιθαγενών, η γκουαρανί, λειτουργεί ως Χ, ως γλώσσα χαμηλού κύρους.⁵ Η περαιτέρω τυπολογική επέκταση του όρου diglossia, λ.χ. «μακροδιγλωσσία», «μικροδιγλωσσία», «διπλή αλληλοεπικαλυπτόμενη διγλωσσία», «διδιομία», «διδαλία» κ.λπ., δεν αφορά άμεσα την παρούσα θεματική και δεν θα μας απασχολήσει στη συνέχεια, παραπέμπει όμως σε κοινωνιολογικές συνθήκες – συχνές λ.χ. στην Αφρική και την Ινδία – που φανερώνουν μεταξύ άλλων πόσο περίπλοκες μπορεί να είναι οι σχέσεις μεταξύ δύο ή/και περισσότερων γλωσσών/ποικιλιών στην ίδια γλωσσική κοινότητα.⁶

(2) Η αναφορά στον Fishman και την εξωτερική διγλωσσία μάς οδηγεί απευθείας στο δεύτερο σημείο που χρειάζεται διευκρίνιση, την απόδοση του όρου στη νέα ελληνική. Ο όρος diglossia υιοθετήθηκε⁷ για να είναι σαφής η διάκριση από τον (λατινογενή) όρο bilingualism που δήλωνε και δηλώνει την «παράλληλη» κατάκτηση/χρήση δύο γλωσσών από ένα άτομο ή μια γλωσσική κοινότητα. Στα ελληνικά έχουν προταθεί για την απόδοση του όρου diglossia ως επί το πλείστον τα εξής:⁸ «διμορφία», «διωφία», «κοινωνική διγλωσσία» και «διπλογλωσσία».⁹ Τα «διμορφία» και «διωφία» έχουν το μειονέκτημα ότι από πλευράς λεξήματος εστιάζουν στην έννοια «μορφή» και «ύφος» αντίστοιχα, συσκοτίζοντας και στρεβλώνοντας έτσι τη θεμελιώδη σημασία του όρου diglossia, καθώς παραπέμπουν σε ζητήματα *ύφους, ιδιολέκτου και λειτουργικών ποικιλιών* (register). Επίσης, θέλοντας να αποδώσουμε την εξωτερική διγλωσσία, θα έπρεπε να καταφύγουμε στο παράδοξο και ακατανόητο «εξωτερική διμορφία/διωφία». Και μόνο γι' αυτούς τους λόγους οι όροι «διμορφία/διωφία» είναι μάλλον ακατάλληλοι.¹⁰ Ως εκ τούτου η επιλογή θα έπρεπε, νομίζω, να εστιαστεί στους όρους *διγλωσσία, κοινωνική διγλωσσία και διπλογλωσσία*. Ο «φυσικός» συνειρμός της λέξης «διγλωσσία» με την συνύπαρξη δύο διαφορετικών γλωσσών (bilingualism) μάς επιβάλλει, νομίζω, να κρατήσουμε για το bilingualism τον όρο «διγλωσσία», οπότε η «κοινωνική διγλωσσία» και η «διπλογλωσσία» φαίνονται προς το παρόν οι πιο κατάλληλοι όροι. Ο όρος «κοινωνική διγλωσσία» είναι ιδιαίτερα σαφής, συμπίπτει όμως με τον όρο societal bilingualism/soziale Zweisprachigkeit που χρησιμοποιείται

⁴ Fishman 1967.

⁵ Βασικό ζητούμενο του Fishman ήταν εν προκειμένω η σχέση μεταξύ diglossia/κοινωνικής διγλωσσίας και bilingualism/διγλωσσίας (για τα προβλήματα της ελληνικής ορολογίας βλ. παρακάτω). Προσοχή: Οι εν λόγω κοινωνιολογικο-γλωσσολογικές συνθήκες, δηλ. diglossia και bilingualism, ουσιαστικά αλληλοαναιρούνται· η «συνύπαρξη» που αναλύει ο Fishman είναι καταχρηστική, αφού στην ουσία της αφορά τη λειτουργία της «διγλωσσίας»/bilingualism ως «κοινωνικής διγλωσσίας»/diglossia, δηλ. την περίπτωση όπου δύο διαφορετικές γλώσσες χρησιμοποιούνται «άνισα» και συμπληρωματικά (κάτι που σε συλλογικό επίπεδο δεν χαρακτηρίζει τη διγλωσσία/bilingualism), εξ ου και η ανάγκη δημιουργίας του όρου «εκτεταμένη/εξωτερική διγλωσσία», για να οριοθετηθεί με σαφήνεια η σχέση μεταξύ diglossia και bilingualism. Πρβλ. και την επόμενη υποσημείωση.

⁶ Για μια συνοπτική παρουσίαση βλ. Dittmar 1997: 139 κ.ε. Αξιοσημείωτες είναι και οι ενστάσεις που έχουν διατυπωθεί σχετικά με την διεύρυνση/επέκταση του όρου diglossia/κοινωνική διγλωσσία προς την κατεύθυνση της διγλωσσίας-bilingualism και άλλων συναφών κοινωνιολογικών συνθηκών. Βλ. ενδεικτικά Daltas και αναλυτικά (με περαιτέρω βιβλιογραφία) Hudson 2002, ο οποίος θεωρεί σκόπιμο να περιοριστεί ο όρος diglossia/κοινωνική διγλωσσία αποκλειστικά στην κλασική του μορφή, στο σχήμα του Ferguson, δηλ. στη συνύπαρξη δύο γλωσσικών ποικιλιών της *ίδιας* γλώσσας (εσωτερική διγλωσσία).

⁷ Η πρώτη επιβεβαιωμένη χρήση του όρου γίνεται από τον Ε. Ροϊδη το 1885 και στη συνέχεια από τον Γ. Ψυχάρη, βλ. Mackridge 2009: 27 κ.ε.· για τη χρήση του όρου πριν τον Ferguson βλ. Kremnitz 1987. Σύμφωνα με το λεξικό του Κουμανούδη (Κουμανούδης 1900) τον όρο, όμως, έπλασε και χρησιμοποίησε για πρώτη φορά ο Κ. Οικονόμου ήδη το 1830 (από τη χρονολογία που παραθέτει ο Κουμανούδης προφανώς στη μελέτη του *Περί της γνησίας προφοράς της ελληνικής γλώσσας βιβλίων*. Πετρούπολις: Εν τη τυπογραφία του επί της Δημοσίας Παιδείσεως Υπουργείου).

⁸ Το πρόβλημα της απόδοσης ελληνικών ή ελληνογενών όρων από μια ξένη γλώσσα στα νέα ελληνικά επιφέρει συχνά μεταφραστικές δυσκολίες, όταν στη γλώσσα-πηγή συνυπάρχουν με διαφοροποιημένη σημασία μια λατινική/λατινογενής και μια ελληνική/ελληνογενής λέξη, λ.χ. nation : ethnic, republic : democratic κτλ., δυσκολίες που έχουν λυθεί/λύνονται άλλοτε με περισσότερη, άλλοτε με λιγότερη επιτυχία.

⁹ Για τη χρήση των επιμέρους προτάσεων-όρων βλ. Σελλά-Μάξη 2001: 84 κ.ε., Αρχάκης/Κονδύλη 2004: 101 κ.ε., Κωστόυλα-Μακράκη 2001: 48 κ.ε. Ας προστεθεί εδώ και η πρόταση «αμφιγλωσσία» για το bilingualism στο Σταύρου/Τζεβελέκου 2006: 31 (υποσημείωση 4).

¹⁰ Σε κάποιες περιπτώσεις ο όρος «διμορφία» αποτέλεσε και αποτελεί αντικείμενο ιδεολογικοποίησης –σε συνδυασμό με τον «στιγματισμό» του όρου «διγλωσσία»/diglossia ως (υποτίθεται) δηλωτικού της αντίστιξης ανάμεσα σε δύο διαφορετικές γλώσσες– και προκρίθηκε με το επιχείρημα ότι αποφεύγει το συνειρμό της συνύπαρξης δύο διαφορετικών γλωσσών (βλ. λ.χ. Μπαμπινιώτης 1979: 28, 86 κ.ε., 96· 2011: 17 κ.ε.). Πέραν του ότι η κλασική/εσωτερική διγλωσσία δεν συνεπάγεται ως γνωστόν τη συνύπαρξη διαφορετικών *γλωσσών*, αλλά *ποικιλιών* της ίδιας γλώσσας, το θέμα της πρόσληψης της νέας ελληνικής ως διαφορετικού γλωσσικού συστήματος δεν είναι θεμιτό να επηρεάζει την απόδοση του όρου diglossia στα ελληνικά.

τις τελευταίες δεκαετίες για να δηλώσει τη συνύπαρξη δυο ανεπτυγμένων/επεξεργασμένων γλωσσών, οι οποίες όμως ούτε άνισα χρησιμοποιούνται ούτε συμπληρωματικά. Η Φραγκουδάκη χρησιμοποίησε, λ.χ., τον όρο *societal bilingualism* για να περιγράψει την κοινωνιογλωσσολογική κατάσταση στη νεότερη Ελλάδα από την περίοδο του μεσοπολέμου μέχρι το 1976,¹¹ αντιπαραβάλλοντάς την αφενός με την κατάσταση από τα τέλη του 18^{ου} αιώνα ως το 1880, αφετέρου με την περίοδο από το 1880 ως το μεσοπόλεμο, από τις οποίες την πρώτη αποκαλεί «χαρακτηριστική περίπτωση κοινωνικής διγλωσσίας» (typically diglossic), τη δεύτερη «μεταβατική κοινωνική διγλωσσία» (transitional diglossia).¹² Η επικάλυψη αίρεται, πάντως, σε ικανοποιητικό βαθμό, αν υιοθετήσουμε για το *societal bilingualism* τον όρο «συλλογική διγλωσσία». Όλα αυτά κάπως υπαινικτικά, αλλά για να δοθεί το στίγμα των λίγο πολύ γνωστών προκλήσεων που αφορούν τη σχετική ορολογία στα ελληνικά.

2. Κοινωνική διγλωσσία

Μολονότι ο Ferguson αναφέρθηκε ρητά και αποκλειστικά στη νέα ελληνική, ορίζοντας τη δημοτική και την καθαρεύουσα ως X και Y αντίστοιχα, το θέμα της «διγλωσσίας» είχε απασχολήσει λογίους, φιλόλογους και γλωσσολόγους ήδη τον 19^ο αιώνα. Βέβαια, με αυστηρά κοινωνιογλωσσολογικούς όρους η diglossia χρησιμοποιήθηκε από τον Ferguson και ύστερα (1959), όμως η αρχή έγινε από τον Ε. Ροϊδη και τον Γ. Ψυχάρη, και η σχετική συζήτηση, μέσω Γ. Χατζιδάκι, Κ. Krumbacher και Μ. Τριανταφυλλίδη, οδηγεί σχεδόν απευθείας στο κλασικό άρθρο του Ε. Κριαρά για τη «διγλωσσία» στο Βυζάντιο.¹³ Στο συγκεκριμένο, λοιπόν, πλαίσιο η έννοια της κοινωνικής διγλωσσίας «αποδεσμεύτηκε» από τα συμφραζόμενα του γλωσσικού ζητήματος και τη νεότερη Ελλάδα και συνδέθηκε με δύο άλλες περιόδους της ελληνικής γλωσσικής ιστορίας: την ελληνιστική κοινή και τη μεσαιωνική ελληνική.

Συγκεκριμένα: Για τη μεν ελληνιστική κοινή αποτελεί *communis opinio* η άποψη πως υπήρχαν συνθήκες κοινωνικής διγλωσσίας με Y την αττική ή αττικίζουσα ελληνική και X την καθομιλουμένη της εποχής, μια κατάσταση που συνδέεται άμεσα με το κίνημα του αττικισμού. Για τη δε μεσαιωνική ελληνική κυριαρχεί η άποψη πως η κοινωνική διγλωσσία είναι (ακόμη) πιο ξεκάθαρη, με Y την αττικίζουσα γλώσσα της βυζαντινής γραμματείας (π.χ. Μ. Ψελλός, Α. Κομνηνή) ή έστω τον λεγόμενο ενδιάμεσο γλωσσικό τύπο των χρονογράφων (π.χ. Ι. Μαλάλας, Θεοφάνης), και X τη λεγόμενη δημώδη γλώσσα της βυζαντινής γραμματείας (π.χ. *Διγενής Ακρίτης*, *Πτωχοπροδρομικά*).

Στόχος του παρόντος άρθρου είναι να θέσει προς συζήτηση την εν λόγω σύνδεση αμφισβητώντας την στα βασικά της σημεία. Το ερώτημα που τίθεται εν προκειμένω είναι κατά πόσο είναι δικαιολογημένη η χρήση του όρου κοινωνική διγλωσσία για τις κοινωνιογλωσσολογικές συνθήκες των δύο αυτών περιόδων. Στο σημείο αυτό θεωρώ πως υπάρχουν δύο περιοριστικές παράμετροι που είτε μας εμποδίζουν να χρησιμοποιήσουμε τον όρο κοινωνική διγλωσσία (λ.χ. για την ελληνιστική κοινή) είτε μας αναγκάζουν να τον χρησιμοποιήσουμε με σαφείς περιορισμούς (λ.χ. για τη μεσαιωνική ελληνική). Το πρόβλημα εστιάζεται σε δύο σημεία, από τα οποία, λόγω περιορισμένου χώρου, θα δοθεί μεγαλύτερη βαρύτητα στο πρώτο.

2.1 Εγγραμματισμός και γλωσσική κοινότητα στο Βυζάντιο

Το πρώτο σημείο αφορά την Y και τον εγγραμματισμό της γλωσσικής κοινότητας, οι πτυχές του οποίου θα αναλυθούν με αφετηρία τη μεσαιωνική ελληνική.

Ξεκινώντας από τη μεσαιωνική ελληνική είναι, νομίζω, θεμελιώδες να υπογραμμίσουμε προκαταρκτικά την εξής αντίφαση, η οποία δεν αποτελεί μεν τμήμα του βασικού συλλογισμού και των ενστάσεων του παρόντος άρθρου, αλλά είναι ακόμη ευρύτερα διαδεδομένη –τόσο σε φιλολογικά όσο και σε γλωσσολογικά δημοσιεύματα– και ως εκ τούτου στοιχειοθετεί ένα επιπλέον πρόβλημα για τη σύνδεση της κοινωνικής διγλωσσίας με το Βυζάντιο: Πρόκειται για την χρήση του όρου κοινωνική διγλωσσία στο πλαίσιο της βυζαντινής γραμματείας, κι όχι στο πλαίσιο της γλωσσικής κοινότητας.

¹¹ Frangoudaki 2002: 101.

¹² Frangoudaki 2002: 101. Αν και σε κάποια σημεία η διάκριση αυτή δεν ανταποκρίνεται στα κοινωνιογλωσσολογικά δεδομένα της εποχής, καθώς αγνοεί τον καταλυτικό ρόλο που έπαιξε η ίδρυση του νεοελληνικού κράτους και ο γλωσσικός σχεδιασμός που εκείνο άσκησε τις δεκαετίες που ακολούθησαν (βλ. παρακάτω: αναλυτική πραγμάτευση του θέματος στο Karvounis 2013), η περιοδολόγηση της νεοελληνικής διγλωσσίας, την οποία επιχειρεί η Φραγκουδάκη, είναι θεμελιώδης, γιατί δεν προσανατολίζεται (όπως όλες οι μέχρι τώρα προσεγγίσεις) στα δεδομένα του γλωσσικού ζητήματος, αλλά στην κοινωνιογλωσσολογική κατάσταση της εποχής.

¹³ Κριαράς 1976. Για την ιδεολογικοποίηση της «διγλωσσίας» από την εποχή των *Ειδώλων* του Ε. Ροϊδη μέχρι τον Γ. Χατζιδάκι και τον Μ. Τριανταφυλλίδη βλ. Karvounis 2013.

Μιλώντας κανείς για κοινωνική διγλωσσία στο Βυζάντιο (με ελάχιστες εξαιρέσεις)¹⁴ αναφέρεται στη διαφοροποίηση της *γραφτής* γλώσσας, δηλ. στη συνύπαρξη τριών γραπτών (λειτουργικών;) «ποικιλιών», που μετά τον 12^ο αιώνα χρησιμοποιήθηκαν εκ παραλλήλου, δηλ. τη λόγια, την «ενδιάμεση» και τη δημόδη. Στο σημείο αυτό, όμως, πρέπει να λάβουμε υπόψη μας τουλάχιστον τα εξής: 1) Και οι τρεις «ποικιλίες» είναι γραπτές, δηλ. εκφράζουν αντιθέσεις και συμβάσεις του γραπτού λόγου, οπότε δεν στοιχειοθετούν τη συνήθη για την κοινωνική διγλωσσία αντίστιξη «γραφτός : προφορικός» λόγος, μια αντίστιξη που δεν αναφέρεται ρητά ως προϋπόθεση από τον Ferguson, όμως χαρακτηρίζει σε μεγάλο βαθμό την κοινωνική διγλωσσία: γεγονός, το οποίο σχετικά πρόσφατα επεσήμανε ο Coulmas.¹⁵ Η κοινωνική διγλωσσία αποτελεί σε γενικές γραμμές την αντίστιξη της προφορικότητας προς έναν παραδοσιακό και ως εκ τούτου υψηλού κύρους γραπτό κώδικα. Και μολονότι οι γραπτές «ποικιλίες» της βυζαντινής γραμματείας χαρακτηρίζονται σαφώς από στοιχεία αξιολόγησης και απαξίωσης, δεν ανταποκρίνονται βέβαια στην αντίθεση «προφορικός : γραπτός» λόγος, η οποία διακρίνει συνήθως την κοινωνική διγλωσσία. 2) Στα ίδια συμφοραζόμενα, η λεγόμενη X, δηλ. η δημόδης (γραφτή) γλώσσα της βυζαντινής γραμματείας, δεν αποτελεί έναν ενιαίο γλωσσικό τύπο, αλλά ένα συμβατικό άθροισμα γλωσσικών τύπων που ήταν πολύ διαφορετικοί μεταξύ τους, κι όπου αυτή η διαφορετικότητα ξεπερνάει κατά πολύ τις διαφορές ύφους και γραμματειακού είδους. Αν συγκρίνουμε λ.χ. τη γλώσσα του *Διγενή Ακρίτη* με την γλώσσα των υποτιτικών μυθιστορημάτων (π.χ. *Βέλθανδρος και Χρυσάντζα*) έχουμε να κάνουμε με ουσίως γλωσσικές διαφορές που δεν μπορούν να ερμηνευτούν με βάση την λεγόμενη ποικιλομορφία της μεσαιωνικής ελληνικής. 3) Η λεγόμενη X της βυζαντινής γραμματείας αποτελούσε σε πολλές περιπτώσεις μια γραπτή τυποποιημένη (λογοτεχνική) κοινή, αλλά σε καμία περίπτωση δεν ήταν η ή έστω μία ομιλούμενη δημόδης της εποχής, η οποία θα μπορούσε να ταυτιστεί με την X της κοινωνικής διγλωσσίας. Ως εκ τούτου η λεγόμενη κοινωνική διγλωσσία του Βυζαντίου είναι μια «διγλωσσία εγγραμματοςμού», μια εναλλαγή γραπτών «ποικιλιών», η οποία σε αυτή τη μορφή δεν ανταποκρίνεται στο κοινωνιογλωσσολογικό μοντέλο της κοινωνικής διγλωσσίας.¹⁶

Παρόλα αυτά η αντίστιξη *δημόδης προφορική ποικιλία* από τη μια πλευρά και *αττικίζουσα γραπτή* από την άλλη πρέπει να θεωρηθεί δεδομένη για τη μεσαιωνική ελληνική, μια κατάσταση που αναντίρρητα ενείχε βασικά στοιχεία της κοινωνικής διγλωσσίας: Η αττικίζουσα, λ.χ., γραπτή ποικιλία (είτε στον λόγιο είτε στον ενδιάμεσο τύπο της) είχε λογοτεχνική παράδοση, υψηλό κύρος, η απόκτησή της προϋπέθετε συστηματική διδασκαλία, χρησιμοποιούνταν σε συγκεκριμένα πεδία και σε συγκεκριμένες περιστάσεις, υπήρξε αντικείμενο γλωσσικής ανάλυσης και, ασφαλώς, δεν ήταν η φυσική γλώσσα κανενός. Η καθομιλούμενη ή οι καθομιλούμενες από την άλλη ήταν αναντίρρητα ποικιλία/ποικιλίες χαμηλού κύρους. Δεν διέθεταν γραπτή και λογοτεχνική παράδοση (τουλάχιστον μέχρι ενός σημείου), χρησιμοποιούνταν σε συγκεκριμένο περιβάλλον, ήταν απαξιωμένες και ήταν, βέβαια, φυσικές γλώσσες. Τα δεδομένα λοιπόν που στοιχειοθετούν μια κατάσταση κοινωνικής διγλωσσίας μπορούμε να πούμε ότι υπήρχαν. Εδώ όμως υπεισέρχεται μια θεμελιώδης διαφορά, το εύρος της χρήσης της Y και το επίπεδο εγγραμματοςμού της γλωσσικής κοινότητας: ή, με καθαρά κοινωνιογλωσσολογικούς όρους, το ζήτημα της εναλλαγής των ποικιλιών/κωδίκων. Σε τυπικές καταστάσεις κοινωνικής διγλωσσίας θεμελιώδης χαρακτηριστικό αποτελεί η εναλλαγή των γλωσσικών ποικιλιών. Συγκεκριμένα, η γλωσσική κοινότητα πρέπει α) είτε να είναι κατά ένα δημογραφικά σημαντικό ποσοστό σε θέση να χρησιμοποιεί και τις δύο ποικιλίες, και πιο συγκεκριμένα την Y, άσχετα αν αυτό εξαρτάται από το εκάστοτε επίπεδο μόρφωσης του χρήστη (όπου βέβαια η χρήση της υψηλής ποικιλίας μπορεί να είναι άριστη, πολύ καλή, επαρκής, ικανοποιητική ή περιορισμένη), β) τουλάχιστον να *αντιλαμβάνεται* και να *αναγνωρίζει* την Y ως ποικιλία υψηλού κύρους. Διαφορετικά δεν μπορούμε να μιλάμε καν για συνύπαρξη, πόσο μάλλον για συμπληρωματική κατανομή των λειτουργιών. Στην γερμανόφωνη Ελβετία, λ.χ., η πρότυπη γερμανική, μολονότι δεν χρησιμοποιείται επαρκώς από όλους τους ομιλητές, αποτελεί ωστόσο μια σταθερά της γλωσσικής κοινότητας, καθώς είναι η γλώσσα του τύπου και γενικότερα των MME, της εκπαίδευσης, του πολιτικού λόγου κ.λπ. Η αλλαγή του γλωσσικού κώδικα, εν προκειμένω η αλλαγή από την X στην Y και αντίστροφα, πέραν του ότι είναι εθιμική ή εν μέρει και θεσμοθετημένη, αποτελεί βασική γλωσσική πρακτική για το μεγαλύτερο ποσοστό της γλωσσικής κοινότητας. Αν και σαφώς όχι στην ίδια έκταση, η αλλαγή της ποικιλίας (ή έστω η επίγνωση της αλλαγής) αποτελεί ουσιώδες χαρακτηριστικό τόσο για τις αραβικές γλωσσικές κοινότητες όσο και για διάφορες άλλες κοινότητες, στις οποίες υπάρχει κοινωνική διγλωσσία. Εδώ έγκειται και η διαφορά προς τις αρχαίες/μεσαιωνικές κοινωνίες –όπως επίσης και τις κοινωνίες της νεότερης (προβιομηχανικής) εποχής– τις οποίες εκλαμβάνουμε ως καταστάσεις κοινωνικής διγλωσσίας. Δηλαδή: Το επίπεδο εγγραμματοςμού (με την σημερινή σημασία του όρου)

¹⁴ Σύντομη, αλλά σαφής διαφοροποίηση στο Eideneier 2000: 6.

¹⁵ Coulmas 1994.

¹⁶ Αναλυτικότερα στο Karvounis 2013.

στις μεσαιωνικές (και όχι μόνο) γλωσσικές κοινότητες και η χρήση της Υ ήταν όχι απλά περιορισμένα, αλλά περιλάμβαναν ένα ιδιαίτερα μικρό ποσοστό της γλωσσικής κοινότητας, το οποίο δεν ξεπερνούσε το 5%. Ακόμα κι αν συμπεριλάβουμε ανθρώπους με εντελώς στοιχειώδη «μόρφωση», δηλ. ανθρώπους που μπορούσαν να διαβάσουν μερικές σειρές μιας επιγραφής, μια πινακίδα ή και να γράψουν το όνομά τους, το ποσοστό αυτό δεν ξεπερνούσε το 10% και παραμένει εντυπωσιακά περιορισμένο ως προς το σύνολο της γλωσσικής κοινότητας.¹⁷ Βασική παράμετρος στο σημείο αυτό είναι βέβαια η γραφή και η διάδοσή της. Και κατ' επέκταση η διάδοση της Υ, η οποία σε μια τεχνολογικά εξελιγμένη κοινωνία είναι πανταχού παρούσα, κυρίως μέσω της γραφής, αλλά όχι μόνο –το ραδιόφωνο και η τηλεόραση μπορούν ως γνωστόν να λειτουργήσουν στο σημείο αυτό καταλυτικά. Το βασικό ζήτημα είναι, λοιπόν, ο βαθμός διείσδυσης της Υ σε όλα τα κοινωνικά στρώματα¹⁸ και γενικότερα η πολυπλοκότητα της γλωσσικής εφαρμογής.¹⁹ Ας θυμηθούμε τα πεδία χρήσης της Υ του Ferguson: λειτουργία/κήρυγμα στην εκκλησία, αλληλογραφία, πολιτικός λόγος, πανεπιστημιακή παράδοση, ειδήσεις στο ραδιόφωνο, ανακοινώσεις, επίσημα σχόλια, υπότιτλοι σε εικόνες, λογοτεχνία. Τα περισσότερα από αυτά προϋποθέτουν μια εγγραμματοσμένη, «μοντέρνα»²⁰ κοινωνία με κυρίαρχη την αίσθηση του δημόσιου λόγου. Ας σταθούμε στην έννοια του *δημόσιου λόγου*, γιατί, πέραν του ότι είτε προϋποθέτει είτε προάγει τη γλωσσική τυποποίηση, αποτελεί μια αναφαίρετη κοινωνιογλωσσολογική σταθερά σε μια «μοντέρνα» γλωσσική κοινότητα. Αν εξαιρέσουμε το ραδιόφωνο όλα τα υπόλοιπα προαναφερθέντα πεδία μπορούμε, βέβαια, να τα βρούμε σε οποιαδήποτε εγγραμματοσμένη κοινωνία, και φυσικά σε εκείνη των Βυζαντινών. Η διαφορά έγκειται, όμως, στο ότι ο «δημόσιος λόγος», η πρότυπη/«επίσημη» γλώσσα, επιβάλλεται τρόπον τινά σε μια «μοντέρνα» κοινωνία μέσω θεσμικών λειτουργιών και τεχνολογικών μέσων (τύπος, εκπαιδευτικό σύστημα, κρατικός μηχανισμός, ραδιόφωνο κ.λπ.) και στοχεύει στο *σύνολο της γλωσσικής κοινότητας*, ενώ σε μια μεσαιωνική (ή νεότερη προβιομηχανική) κοινωνία λείπει ακριβώς αυτό το υπόβαθρο, οπότε η Υ περιορίζεται εκ των πραγμάτων και συνειδητά στον πολύ περιορισμένο κύκλο των εγγραμμάτων. Κατά συνέπεια το 90% έως 95% της γλωσσικής κοινότητας είτε αγνοεί την ύπαρξη της υψηλής ποικιλίας είτε απλά δεν ξέρει να την χρησιμοποιήσει. Το ερώτημα που τίθεται, λοιπόν, είναι κατά πόσο μπορούμε να μιλάμε για κοινωνική διγλωσσία σε κοινωνίες που ο εγγραμματοςμός αφορά τη μειονότητα και η εναλλαγή της Υ και της Χ δεν είναι ίδιον της γλωσσικής κοινότητας συνολικά, αλλά της *κοινότητας των εγγραμμάτων*.

Αντίθετα, σε μια «μοντέρνα» κοινωνία, λ.χ. στην νεότερη Ελλάδα προς τα τέλη του 19^{ου} αιώνα, είναι προφανές ότι η Υ, ή έστω πτυχές της, εισβάλλει πια ποικιλοτρόπως στη γλωσσική κοινότητα, την οποία επηρεάζει σταδιακά στο σύνολό της, καθώς παγιώνει ένα αξιολογικό σύστημα και διαπλάθει μια συγκεκριμένη γλωσσική συνείδηση με σαφείς απόψεις για την «ορθή»/«επίσημη» και ως εκ τούτου πρότυπη γλώσσα, ακόμα και σε ανθρώπους που γνωρίζουν υποτυπωδώς ανάγνωση και γραφή.²¹

Ως εκ τούτου είναι ίσως ασφαλέστερο να μιλάμε για κοινωνική διγλωσσία, αφ' ης στιγμής η Υ αποκτήσει *ερείσματα* στο *σύνολο* της γλωσσικής κοινότητας, λ.χ. από τη στιγμή που ο «αναλφάβητος χωρικός» (ας συγχωρεθεί εδώ η συμβατική αυτή γενίκευση) έχει επίγνωση ότι τα «αφτιά» λέγονται και (ή πρέπει να λέγονται/γράφονται) «ώτα», τα «κουτιά» «κυτία», τα «γάντια» «χειρόκτια», το «σε» «εις» κ.ο.κ. – δηλαδή μια κοινωνιογλωσσολογική κατάσταση που σαφώς δεν χαρακτηρίζει τη βυζαντινή γλωσσική κοινότητα.

Αν η ερμηνεία αυτή είναι σωστή και η συνειδητότητα της Υ είναι ένα φαινόμενο που συνδέεται άμεσα και άρρηκτα με σύγχρονους κοινωνικούς, τεχνολογικούς και οικονομικούς όρους, λ.χ. την ύπαρξη οργανωμένου κράτους, το οποίο συνεπάγεται οργανωμένο, ενιαίο εκπαιδευτικό σύστημα, γλωσσικό σχεδιασμό, κρατικό μηχανισμό, (εθνικό;) στρατό, ΜΜΕ, δημόσιο λόγο, εγγραμματοςμό και γενικότερα τρόπους διείσδυσης της Υ στον σύνολο της γλωσσικής κοινότητας, τότε δεν μπορούμε

¹⁷ Για το ελληνικό κράτος βλ. Τσουκαλάς 2006: 393 (πίνακας 61). Για τον εγγραμματοςμό στη (δυτική) Ευρώπη μεταξύ Αναγέννησης και Διαφωτισμού βλ. Houston 2001. Συνοπτικά Houston 2011. Για τον εγγραμματοςμό γενικότερα βλ. Ong.

¹⁸ Το ότι σε κάποιες περιπτώσεις μόνο ένα μικρό ποσοστό της γλωσσικής κοινότητας κατέχει την Υ (Schiffman 1997: 206) δεν αίρει την ένσταση, το ζήτημα είναι η σχέση του υπόλοιπου της γλωσσικής κοινότητας με την Υ. Περισσότερα στο Karvounis 2013.

¹⁹ Για τον ίδιο λόγο δεν μπορούμε, βέβαια, να εκλάβουμε ως κοινωνική διγλωσσία τις συνθήκες εναλλαγής γλωσσών σε καλλιεργημένες κοινωνικές ελίτ, λ.χ. στην τσαρική Ρωσία (γαλλικά : ρωσικά) (το παράδειγμα είναι του Fishman) ή στον κύκλο των Φαναριωτών (γαλλικά : ελληνικά / τουρκικά), καθώς δεν μπορούμε να μιλάμε για τη γλωσσική κοινότητα στο σύνολό της, αλλά μάλλον για «μόδα» και γλωσσική συμπεριφορά μιας κοινωνικής ελίτ.

²⁰ Με την σημασία του ότι αυτή έχει βιώσει τις μεταβολές που χαρακτηρίζουν τις «ανεπτυγμένες» σύγχρονες κοινωνίες, λ.χ. ανάπτυξη αστικής τάξης, αστικοποίηση, βιομηχανική επανάσταση, υποχρεωτικό και ενιαίο εκπαιδευτικό σύστημα για το σύνολο της κοινωνίας, ανεπτυγμένη οικονομία, δημόσιος/κρατικός διοικητικός μηχανισμός, τύπος, ανεπτυγμένο νομικό σύστημα κ.α.

²¹ Για την κοινωνική διγλωσσία και το γλωσσικό ζήτημα στο νεοελληνικό κράτος βλ. Σταυρίδη-Πατρικίου 1976, Hering 1987 και Mackridge 2009.

εύκολα να μιλήσουμε για κοινωνική διγλωσσία σε προβιομηχανικές κοινωνίες²² ή γενικότερα σε κοινωνίες που δεν διακρίνονται από τα παραπάνω (ή έστω τα περισσότερα από αυτά) χαρακτηριστικά, αλλά μάλλον για μια κοινωνική διγλωσσία της κοινότητας των εγγραμμάτων.

2.2 Διακριτές ποικιλίες στην ελληνιστική κοινή

Το δεύτερο σημείο, η δεύτερη ένσταση αφορά αποκλειστικά την περίοδο της ελληνιστικής κοινής. Η σύνδεση της κοινωνικής διγλωσσίας με την ελληνιστική εποχή και τον αττικισμό συζητήθηκε ήδη από τον Γ. Χατζιδάκι, αλλά κυρίως από τον Μ. Τριανταφυλλίδη, ο οποίος αφιέρωσε στο θέμα ένα σχετικό άρθρο.²³ Αφετηρία της όλης συζήτησης είναι, βέβαια, σήμερα κυρίως η διατριβή του Niehoff-Panagiotidis 1994, ο οποίος πραγματεύτηκε το θέμα με σύγχρονους όρους, καταλήγοντας σε γενικές γραμμές σε παρόμοια συμπεράσματα με τους προγενέστερους μελετητές, ότι δηλ. τον 2^ο περίπου αιώνα μ.Χ. (παίρνοντας ως παράδειγμα τον Σέξτο Εμπειρικό κι ένα συγκεκριμένο χωρίο του έργου του *Κατά Μαθηματικών*) μπορούμε να μιλάμε για κοινωνική διγλωσσία με την αττική ή αττικίζουσα γλώσσα ως Υ και την καθομιλουμένη ως Χ.

Πέραν του ότι οι περιοριστικές παράμετροι που προαναφέρθηκαν ισχύουν, βέβαια, και για την ελληνιστική εποχή, υπάρχει και μια επιπλέον ένσταση που αφορά πολύ συγκεκριμένα την αποδειξιμότητα δύο διακριτών γλωσσικών ποικιλιών στην ιστορία της ελληνικής γλώσσας. Καταρχάς να δούμε το θέμα των ποικιλιών στο πλαίσιο της κοινωνικής διγλωσσίας. Αν και δεν ορίστηκε ρητά από τον Ferguson ούτε μελετήθηκε επαρκώς στο πλαίσιο της κοινωνικής διγλωσσίας (τουλάχιστον όσο γνωρίζω), οι διακριτές ποικιλίες αποτελούν θεμελιώδη προϋπόθεση για την ύπαρξη κοινωνικής διγλωσσίας. Ένα ιδιαίτερα καίριο και ελάχιστο συζητημένο θέμα είναι το σημείο σύγκλισης ή απόκλισης των εν λόγω ποικιλιών. Πρόκειται για ποικιλίες, γλωσσικά συστήματα ή γλώσσες; Ερωτήματα που και σε επίπεδο θεωρίας της κοινωνιογλωσσολογίας δεν μπορούν να απαντηθούν πάντοτε με σαφήνεια, καθώς το θέμα ξεφεύγει συχνά από τα όρια της γλωσσολογίας και εμπίπτει στον χώρο της πολιτικής. Ως εκ τούτου η διαφορετικότητα των καταστάσεων κοινωνικής διγλωσσίας δεν επιτρέπει πάντοτε την διατύπωση καθολικών ορισμών. Για να μείνουμε στα κλασικά παραδείγματα του Ferguson: Ακόμη και αν οι γερμανόφωνοι Ελβετοί θεωρούν ή θεωρήσουν ότι η ελβετική γερμανική είναι διαφορετική γλώσσα από την πρότυπη γερμανική, δεν μπορεί εύκολα να ειπωθεί το ίδιο για την περίπτωση της αραβικής. Στο σημείο αυτό υπεισέρχεται και το γεγονός ότι η (δι)γλωσσική κοινότητα αντιλαμβάνεται συνήθως το γλωσσικό σύστημα διαφορετικά απ' τους γλωσσολόγους. Ως δεδομένο πρέπει, πάντως, να θεωρήσουμε ότι η κοινωνική διγλωσσία ως κοινωνιογλωσσολογικό φαινόμενο προϋποθέτει τη συνύπαρξη δύο μεταξύ τους σαφώς διακριτών ποικιλιών, οι οποίες (σε σημαντικό βαθμό) δεν είναι αμοιβαία κατανοητές. Όπως κι αν χαρακτηρίσουμε, πάντως, την κοινωνιογλωσσολογική κατάσταση στο Βυζάντιο από τον 12^ο αιώνα και ύστερα, αυτή προϋποθέτει τη σαφή διάκριση δύο ποικιλιών, ουσιαστικά δύο διαφορετικών γλωσσικών συστημάτων, αφενός της λεγόμενης δημώδους, την οποία συνήθως ταυτίζουμε με τη φυσικά εξελισσόμενη ελληνική της εκάστοτε εποχής, αφετέρου της αττικίζουσας γραπτής γλώσσας της βυζαντινής γραμματείας. Η διάκριση αυτών των ποικιλιών συμπίπτει με την οριοθέτηση της νέας ελληνικής. Δηλ. από τη στιγμή που εμφανίζεται σε γραπτό επίπεδο η δημώδης, ας πούμε η Χ, θεωρούμε ότι ξεκινά η νέα ελληνική, δηλ. από τον 11^ο ή τον 12^ο αιώνα, σύμφωνα με την παραδεδομένη αντίληψη.

Το ερώτημα λοιπόν είναι κατά πόσο μπορούμε να μιλάμε για δύο σαφώς διακριτές ποικιλίες της ελληνικής τον δεύτερο μεταχριστιανικό αιώνα. Οι πηγές της ελληνιστικής εποχής, άμεσες και έμμεσες (λ.χ. λεξικογράφοι), επιβεβαιώνουν ξεκάθαρα μια γλωσσική παρέκκλιση της καθομιλουμένης από της αττικίζουσα γλώσσα της λογοτεχνίας, σε αυτό δεν χωράει αμφιβολία. Ενώ όμως στη βυζαντινή γραμματεία η δημώδης γραπτή ποικιλία, λ.χ. η γλώσσα του *Διγενή Ακρίτη* ή του *Χρονικού* του Λ. Μαχαιρά, αποτελεί μια σαφώς διακριτή ποικιλία ως προς την αττικίζουσα της Άννας Κομνηνής –με αποτέλεσμα να μπορεί κανείς να μιλά για δύο διαφορετικά γλωσσικά συστήματα–, στην ελληνιστική κοινή η δημώδης, τουλάχιστον εκείνη που μαρτυρούν οι γραπτές πηγές, δεν φαίνεται να ήταν ακόμη τόσο διαφορετική από την αττικίζουσα ή την λογοτεχνική κοινή της εποχής. Παρά τις εμφανείς διαφορές, οι οποίες διακρίνουν, λ.χ., την γλώσσα της *Καινής Διαθήκης* από την λογοτεχνική κοινή του Πολύβιου, βασικά δομικά στοιχεία, όπως π.χ. η χρήση του απαρεμφάτου, η χρήση της δοτικής ή η μετοχή, συνεχίζουν να αποτελούν δομικά συστατικά της δημώδους, κάτι που σε γενικές γραμμές επιβεβαιώνεται και από τις ιδιωτικές επιστολές της εποχής. Αντιπαραθέτοντας δηλ. τη γλώσσα της

²² Αναφορά σε προβιομηχανικές κοινωνίες γίνεται και στο Hudson 2002: 20 κ.ε., αλλά αυτή περιορίζεται στις διαφορές που αφορούν το ζήτημα της συμπληρωματικής κατανομής, η οποία απουσιάζει σε προβιομηχανικές κοινωνίες.

²³ Τριανταφυλλίδης 1963.

Καινής Διαθήκης προς τη λογοτεχνική κοινή της εποχής δεν μπορούμε να μιλήσουμε για δύο διαφορετικά γλωσσικά συστήματα, αλλά μάλλον για μια κατάσταση όπου η δημόδης ποικιλία (όσο μπορούμε να την συλλάβουμε μέσα από τις γραπτές πηγές) διαφοροποιείται μεν εμφανώς από την λογοτεχνική κοινή της εποχής, αλλά όχι τόσο ώστε να αποτελεί διακριτό γλωσσικό σύστημα. Η σύγκριση με την εξέλιξη των ρομανικών γλωσσών είναι στο σημείο αυτό πολύ χρήσιμη. Μολονότι η παρέκκλιση της δημόδους από την κλασική λατινική ανάγεται ήδη στο *Σατυρικόν* του Πετρώνιου (1^{ος} αιώνας μ.Χ.) οι ρομανικές γλώσσες ως διακριτές ποικιλίες μαρτυρούνται περίπου από τον 9^ο αιώνα μ.Χ. και ύστερα. Αν θεωρήσουμε π.χ. το λεγόμενο *Γρίφο της Βερόνας* ή την επιγραφή στην κατακόμβη της Commodilla ως τα πρώτα μνημεία της ιταλικής (9^{ος} αιώνας),²⁴ γεγονός που σαφώς στοιχειοθετεί τις προϋποθέσεις κοινωνικής διγλωσσίας, συνειδητοποιούμε ότι οι προϋποθέσεις αυτές είναι άρρηκτα συνδεδεμένες με τη διακριτότητα δύο γλωσσικών ποικιλιών/συστημάτων, μια κατάσταση που δεν μπορεί, βέβαια, να αναχθεί στον 2^ο και 3^ο μεταχριστιανικό αιώνα. Εφόσον στην περίπτωση της ελληνικής, σύμφωνα με τα ισχύοντα, δεν μπορούμε να μιλάμε για διακριτές ποικιλίες πριν τον 11^ο ή 12^ο αιώνα, φαίνεται αρκετά δύσκολο να υποθέσουμε ότι τον 2^ο αιώνα μ.Χ. υπήρχαν οι (καθαρά) γλωσσικές προϋποθέσεις κοινωνικής διγλωσσίας.²⁵

Συμπερασματικά καταλήγουμε πως η σύνδεση της κοινωνικής διγλωσσίας με τα κοινωνιογλωσσολογικά δεδομένα της μεσαιωνικής ελληνικής και της ελληνιστικής κοινής δεν ευσταθεί για δύο λόγους. Αφενός επειδή η χρήση της Υ ήταν περιορισμένη στο 5% έως 10% της γλωσσικής κοινότητας, οπότε ελάχιστα την επηρέαζε στο σύνολό της –κυρίως λόγω των κοινωνικοοικονομικών δομών κάθε προβιομηχανικής κοινωνίας και την απουσία κρατικής οργάνωσης, όπως την αντιλαμβανόμαστε από τον 18^ο ή 19^ο αιώνα και ύστερα–, άρα στην καλύτερη περίπτωση θα μπορούσαμε να μιλήσουμε για κοινωνική διγλωσσία της *κοινότητας των εγγραμμάτων*. Αφετέρου, προκειμένου για την ελληνιστική κοινή και μολονότι οι διαφορές μεταξύ δημόδους και αττικίζουσας είναι σαφείς και πολλές, επειδή κατά τον 2^ο αιώνα μ.Χ. οι πηγές δεν στηρίζουν την ύπαρξη δύο δομικά σαφώς διακριτών ποικιλιών, άρα και οι καθαρά γλωσσικές προϋποθέσεις για την ύπαρξη κοινωνικής διγλωσσίας δεν φαίνεται να υπήρχαν.

²⁵ Στο σημείο αυτό αξίζει να αναφερθούμε στο θέμα της αμοιβαίας κατανόησης. Το ότι ένας αναλφάβητος χωρικός δεν κατανοούσε, λ.χ., (πλήρως) τη γλώσσα του Ιωάννη του Χρυσόστομου δεν οφειλόταν μόνο στην αττικίζουσα δομή της γλώσσας του τελευταίου, αλλά και στον *εγγραμματισμό* ως *τρόπο/λειτουργία*, με την έννοια της konzeptionelle Schriftlichkeit των Koch/Österreicher 1994 (σε αντίθεση με τον *εγγραμματισμό* ως *μέσον/δίαυλο* [οι όροι *τρόπος/λειτουργία*, *μέσον/δίαυλος* με καθαρά κοινωνιογλωσσολογική σημασία]), δηλ. στην επεξεργασία/καλλιέργεια του γραπτού λόγου και στις ιδιότητές του ως απομακρυσμένης/«αποστασιοποιημένης»/ (Distanzsprache, πάλι σύμφωνα με τον όρο των Koch/Österreicher 1985) γλώσσα/λειτουργικής ποικιλίας.

ABSTRACT

The aim of this article is the study of etymology within the framework of dialect lexicography. We will present the problems encountered during the collection and processing of diachronic and synchronic dialect data, proposing methodological principles for dialect etymology. Our discussion will be based on data from the dialect of Cythera. Apart from the theoretical approach, the present paper hopes to contribute to the study of the dialect of Cythera and other MG dialects, by suggesting new or improved etymologies for several dialect words.

Λέξεις κλειδιά: διαλεκτικά λεξικά, διαλεκτική ετυμολογία, διαδιαλεκτικός, ενδοδιαλεκτικός, μεταλεξικογραφική μελέτη.

1. Εισαγωγή- Στόχοι και Δομή της εργασίας

Είναι γενικώς αποδεκτό ότι ήδη από τα τέλη του εικοστού αιώνα έχει ιδιαίτερα αναπτυχθεί το ενδιαφέρον για τις νεοελληνικές (ν.ε.) διαλέκτους, το οποίο εκφράζεται με την αυξημένη παραγωγή διαλεκτικών λεξικογραφικών εργασιών. Όπως παρατηρεί μάλιστα η Κατσογιάννου (2008: 654), από τη δεκαετία του '80 και εξής η διαλεκτική λεξικογραφία περνά από τα χέρια των ειδικών φιλολόγων και γλωσσολόγων, που μέχρι τότε συνέγραφαν λεξικά-εργαλεία για την έρευνα και δεν απευθύνονταν στον μέσο χρήστη (ό.π.: 651), στα χέρια και των μη ειδικών που συνδέονται βιωματικά με το ιδίωμα που περιγράφουν λεξικογραφικώς. Αυτές οι εκλαϊκευμένες εργασίες έχουν τη μορφή λεξικών ή γλωσσαρίων (βλ. παρακάτω). Σε αυτές τις περιπτώσεις, τον ρόλο του εκδότη αναλαμβάνουν διάφορες τοπικές οργανώσεις και σύλλογοι, ενώ δεν λείπουν και οι περιπτώσεις αυτοέκδοσης (Κατσογιάννου 2008: 654-655, Κατσούδα 2012α: 90)¹.

Εντούτοις, αν και οι λεξικογραφικές εργασίες έχουν κατά κόρον αυξηθεί, διότι η παραδοσιακή διαλεκτική έρευνα ασχολείται κατεξοχήν με το λεξιλόγιο γεωγραφικών ποικιλιών, είναι ελάχιστες οι μεταλεξικογραφικές μελέτες (πρβλ. Κατσογιάννου 2008: 649).

Μεταλεξικογραφικής φύσης είναι και το παρόν άρθρο με αντικείμενο το ζήτημα της ετυμολόγησης στον χώρο της διαλεκτικής λεξικογραφίας. Συγκεκριμένα, θα εντοπιστούν τα προβλήματα που εμφανίζουν λεξικά και γλωσσάρια στις φάσεις α) της συλλογής και β) της επιστημονικής επεξεργασίας του συγχρονικού ή διαχρονικού διαλεκτικού υλικού, με κύριο στόχο να αναδειχθούν μεθοδολογικές προϋποθέσεις αλλά και απαραίτητα «εργαλεία» κατά την ετυμολογική έρευνα. Συγκεκριμένα στα κεφ. 4,5 και 6 παρουσιάζονται τα βασικότερα προβλήματα της διαλεκτικής ετυμολογίας, ενώ στα υποκεφάλαια του κεφ. 4 αναπτύσσονται οι βασικές ετυμολογικές προϋποθέσεις και εργαλεία που θα προαγάγουν τη διαλεκτική ετυμολογία. Στην προσπάθειά μας αυτή θα αξιοποιήσουμε σύγχρονες μελέτες για την ελληνική ετυμολογία (βλ. Μωυσιάδης 2005 και 2011). Λόγω του αχανούς διαλεκτικού υλικού, θα περιοριστούμε σε παραδείγματα από το κυθηραϊκό ιδίωμα, τα οποία θα αποτελέσουν τη βάση της συζήτησής μας. Αυτά αποδελτιώθηκαν α) από λεξικογραφικές εργασίες (Κασιμάτης 1993, Κόμης 1995)², β) από μελέτες για το ιδίωμα (ενδεικτικά, Κοντοσόπουλος 1981, Βαγιακάκος 1988), γ) από το ΙΑΝΕ, δ) από το αρχείο του ΚΕΝΔΙ, ε) καθώς και από προφορικό υλικό

¹ Παρόμοια κατάσταση περιγράφουν για την Ιταλία οι Barbato & Varvaro (2004: 430), οι οποίοι μας πληροφορούν ότι και εκεί η διαλεκτική λεξικογραφική παραγωγή ανθεί: λεξικά γράφονται από ερασιτέχνες, τα οποία εκδίδονται ή χρηματοδοτούνται από τοπικές αρχές και συμβούλια.

² Για τη λεξικογραφική παραγωγή σχετικά με όλες τις νεοελληνικές διαλέκτους και ιδιώματα, βλ. Κατσούδα 2012β. Ειδικά, για τα λεξικά και γλωσσάρια του κυθηραϊκού ιδιώματος, βλ. Κατσούδα (2012β: 489).

κυθήριων πληροφορητών που συγκεντρώθηκε κατά τη διάρκεια προσωπικής επιτόπιας έρευνας. Δεδομένου ότι το κυθηραϊκό λεξιλόγιο –πλούσιο τόσο σε αρχαιοπινείς λέξεις όσο και σε δάνειες (βενετικές, ιταλικές και λιγότερο τουρκικές) – παρουσιάζει μεγάλες ομοιότητες με τα ιδιώματα της Κρήτης, της Μάνης, των Κυκλάδων, και λιγότερο με τα ιδιώματα των Επτανήσων (Κοντοσόπουλος 1981: 137), είναι αναπόφευκτη η σύγκριση του παραπάνω συλλεγέντος υλικού με το αντίστοιχο άλλων γεωγραφικών ποικιλιών.

Σε καμία περίπτωση δεν θέλουμε να κρίνουμε τη λεξικογραφική και ετυμολογική επάρκεια των λεξικογραφικών εργασιών που θα αναφερθούν παρακάτω. Όπως ήδη έχουν επισημάνει οι Barbato & Varvaro (2004: 430, 432), ακόμη και η πιο ερασιτεχνική προσπάθεια προσφέρει ενδιαφέροντα δεδομένα, πόσο μάλλον οι αντίστοιχες εργασίες που συντάχθηκαν από ειδικούς (φιλόλογους ή γλωσσολόγους).

Πέρα από τη θεωρητική προσέγγιση του ζητήματος, με αυτή την ανακοίνωση θα συμβάλουμε στη μελέτη του κυθηραϊκού ιδιώματος αλλά και άλλων διαλεκτικών ποικιλιών, καθώς 1) θα ετυμολογήσουμε λέξεις του ιδιώματος οι οποίες δεν έχουν ετυμολογηθεί μέχρι στιγμής (π.χ. *σόρτσος* κ.ά.) και 2) θα προτείνουμε ετυμολογήσεις διαφορετικές απ' αυτές που έχουν ήδη προταθεί για λέξεις που απαντούν τόσο στο κυθηραϊκό ιδίωμα όσο και σε άλλες ν.ε. διαλέκτους ή ιδιώματα (π.χ. *σούρδιση*, *καβαγιάδα* κ.ά.).

2. Είδη διαλεκτικών λεξικών³

Τα διαλεκτικά λεξικά⁴, τα λεξικά δηλαδή που καταγράφουν το λεξιλόγιο μιας γεωγραφικής ποικιλίας, είναι μια κατηγορία περιορισμένων λεξικών (limited), συνήθως μονόγλωσσων (monolingual), που αντιδιαστέλλονται στα γενικά λεξικά (βλ. Ξυδόπουλος 2008: 287-294). Πολλά απ' αυτά είναι απλώς γλωσσάρια, δηλ. έργα μικρής έκτασης που παραθέτουν μόνο μεταφραστικά ισοδύναμα, χωρίς να παρέχουν μορφολογικές ή σημασιολογικές πληροφορίες (βλ. Ξυδόπουλος 2008: 342, Κατσογιάννου 2008: 654).

Ανάλογα με τη γεωγραφική έκταση που καλύπτουν τα διαλεκτικά λεξικά, σύμφωνα με τους Barbato & Varvaro (2004: 432) διακρίνονται σε α) τοπικά λεξικά (regional) που με τη σειρά τους διαιρούνται στα λεξικά 1) μεμονωμένου τόπου (of single locality) ή 2) μιας μικροπεριοχής (of microarea), και σε β) πανδιαλεκτικά λεξικά (pan-dialect).

Ανάλογα με το αν ο λεξικός πλούτος μιας γεωγραφικής ποικιλίας καταγράφεται σε μια συγκεκριμένη χρονική φάση ή περιγράφεται μέσα στον χρόνο, τα λεξικά κατηγοριοποιούνται σε α) συγχρονικά και β) διαχρονικά. Τα διαχρονικά λεξικά με τη σειρά τους υποδιαιρούνται σε 1) ιστορικά όπου καταγράφονται όλες οι μορφολογικές, φωνολογικές και σημασιολογικές μεταβολές του διαλεκτικού λεξιλογίου, 2) ετυμολογικά όπου καταγράφεται η προέλευση κάθε λέξης (βλ. Κατσοῦδα 2012α: 82-83, Ξυδόπουλος 2008: 290). Σ' αυτό σημείο πρέπει να πούμε ότι –λόγω της γοητείας που ασκεί η ετυμολογία– αρκετά συγχρονικά λεξικά ετυμολογούν περιστασιακά.

Τέλος, με κριτήριο το είδος του συντάκτη τους τα διαλεκτικά λεξικά μπορούν να διακριθούν, σύμφωνα με τους Barbato & Varvaro (2004: 432), σε συνταγμένα α) από εξειδικευμένους συντάκτες, και β) από ερασιτέχνες κυρίως δασκάλους, διαλεκτικούς ποιητές ή εραστές της τοπικής ιστορίας και κουλτούρας⁵. Εδώ ανήκει ενδεικτικά το κυθηραϊκό λεξικό του Κόμη (1995), για τη σύνταξη του οποίου συνεργάστηκαν εκπαιδευτικοί, δημοσιογράφοι, λογοτέχνες, δικηγόροι, ακόμη κι ένας ορκωτός λογιστής (ό.π.: 11).

3. Η ετυμολογία στα ετυμολογικά διαλεκτικά λεξικά

Τα συνταγμένα από ειδικούς διαλεκτικά λεξικά ακολουθούν επιστημονικά κριτήρια, αναζητούν την πρώτη εμφάνιση της λέξης, εξηγώντας φωνολογικές και μορφολογικές μεταβολές και ετυμολογώντας τα συστατικά στοιχεία από τα οποία παράγεται μια λέξη (επιθήματα, προθήματα κτλ.), ενώ παράλληλα παραπέμπουν σε επιστημονικές εργασίες και σε λεξικογραφικά έργα αναφοράς. Η αδυναμία –ενίοτε– εύρεσης του ορθού ετύμου οφείλεται κυρίως σε δύο αιτίες: α) αρκετές φορές ακόμη και αυτά τα λεξικά

³ Περισσότερα για την κατηγοριοποίηση των διαλεκτικών λεξικών, βλ. Κατσοῦδα (2012α: 79-84).

⁴ Καταγραφή σημαντικών λεξικών και αυτοτελών γλωσσάρων βρίσκουμε στη Μυτούλα (http://www.greeklanguage.gr/greekLang/medieval_greek/bibliographies/idiomatic/contents.html). Βλ. επίσης Παπαναστασίου 2001: 193, Ξυδόπουλος 2008: 432-344.

⁵ Οι Barbato & Varvaro (2004: 432) διακρίνουν και μια ενδιάμεση κατηγορία διαλεκτικών λεξικών, εκείνη που περιλαμβάνει λεξικά συνταγμένα από ειδικούς σε συνεργασία με ερασιτέχνες.

δεν λαμβάνουν υπ' όψιν τους δεδομένα από προγενέστερα ή σύγχρονά τους λεξικογραφικά έργα αναφοράς, μελέτες και άρθρα ή δεν ερευνούν συστηματικά τις πρωτογενείς πηγές και β) τα νέα επιστημονικά δεδομένα και η ανανεωμένη βιβλιογραφία έρχονται να θέσουν υπ' αμφισβήτηση αρκετές ετυμολογικές προτάσεις.

Από την άλλη πάλι, τα ερασιτεχνικά ετυμολογικά λεξικά έχουν τις περισσότερες φορές εγγενή προβλήματα, αφού α) συντάσσονται χωρίς συγκεκριμένη μέθοδο. Τις περισσότερες φορές ετυμολογούν στατικά, χωρίς να αναζητούν την πρώτη εμφάνιση της λέξης και χωρίς να ετυμολογούν όλα τα στοιχεία από τα οποία παράγεται η λέξη. Συνήθως αναδεικνύουν απλώς τις σημασιολογικές σχέσεις που συνέχουν το λεξιλόγιο σε δεδομένη συγχρονία⁶, β) δεν αξιοποιούν τις πρωτογενείς πηγές, γ) δεν συμβουλευονται λεξικογραφικές εργασίες αναφοράς, γι' αυτό η παρατιθέμενη βιβλιογραφία στο τέλος του λεξικού είναι συνήθως ελλιπέστατη. Αντιθέτως συχνά παρουσιάζονται ως ετυμολογικές προτάσεις αστήρικτες προσωπικές εικασίες, που οδηγούν σε παρετυμολογήσεις. Όπως καταλαβαίνουμε, τα προβλήματα είναι ακόμη μεγαλύτερα στα συγχρονικά λεξικά που μόνο κατά περίπτωση προσφέρουν ετυμολογικές πληροφορίες.

Εν γένει τα ετυμολογικά προβλήματα στα διαλεκτικά λεξικά δεν αποτελούν μόνο απόρροια της άγνοιας ή της ελλιπούς εφαρμογής επιστημονικών κριτηρίων, δεν εμφανίζονται δηλαδή μόνο κατά την επεξεργασία του υλικού, αλλά προκύπτουν λόγω ελλείψεων και κατά τη συλλογή του διαλεκτικού συγχρονικού και διαχρονικού υλικού. Παρακάτω θα επισημάνουμε συγκεκριμένα προβλήματα από τη συζήτηση των οποίων θα προκύψουν μεθοδολογικές προϋποθέσεις, απαραίτητες για τη ορθότερη δυνατή ετυμολόγηση διαλεκτικού υλικού.

4. Προβλήματα κατά τη συλλογή και επεξεργασία του διαλεκτικού υλικού

4.1 Η αξιοποίηση ενδοδιαλεκτικών και διαδιαλεκτικών τύπων του ίδιου λήμματος

Σε όσο περισσότερες γλώσσες μαρτυρείται ένας τύπος, τόσο αυξάνονται οι πιθανότητες επιτυχημένης ετυμολόγησης μιας λέξης. Το ίδιο ισχύει και για τους διαλεκτικούς τύπους: όσο περισσότερους τύπους έχουμε –ενδοδιαλεκτικούς (από την ίδια γεωγραφική ποικιλία) αλλά και διαδιαλεκτικούς (από γειτονικές ή μη γεωγραφικές ποικιλίες), τόσο περισσότερο αυξάνονται οι πιθανότητες εύρεσης του σωστού ετύμου.

4.1.1 Η συλλογή ενδοδιαλεκτικών τύπων του ίδιου λήμματος

Συχνά τα διαλεκτικά λεξικά θέτουν ως λήμμα-κεφαλή έναν διαλεκτικό τύπο, χωρίς να καταγράφουν παράλληλους τύπους.

Παράδειγμα 1: Στον Κόμη (1995) βρίσκουμε το λήμμα *ίντικα* 'υάκινθος'. Ενώ αρχικά πιστεύαμε ότι η ετυμολογία σχετίζεται με το βενετικό *giacinto* / *jacinto*, η έρευνά μας στράφηκε προς άλλη κατεύθυνση, όταν οι πληροφορητές μάς διαβεβαίωσαν ότι το συγκεκριμένο λουλούδι λέγεται και *ίνδικα*. Ανάμεσα στις τοπικές ονομασίες του *polyanthes tyberosa*, ο Heldreich (1926: 116) καταγράφει τον κερκυραϊκό τύπο *ίνδιτσι*. Τόσο το κυθηραϊκό *ίντικα* και *ίνδικα* όσο και το κερκυραϊκό *ίνδιτσι* αποτελούν αντιδάνεια που προέρχονται από το ιταλ. *indaco*/ *indico* 'ένα από τα επτά χρώματα της ίριδος, ανάμεσα στο γαλάζιο και το βιολετί', το οποίο προέρχεται από το α.ε. *ίνδικός* (πρβλ. *ινδικό* λόγ. 'το λουλάκι' ΛΝΕΓ 2008³). Σύμφωνα με τους Cortelazzo & Cortelazzo (2004: λήμμα *indaco*), ο αρχαιότερος τύπος *indico* μαρτυρείται μέχρι το 1598 στο τότε εκδεδωμένο λεξικό του Florio, ενώ στη σύγχρονη ιταλική έχει επικρατήσει πλέον μόνο ο τύπος *indaco*. Δεδομένου ότι υπάρχει και το φυτό *ινδικοφόρος* (πρβλ. ιταλικό *indigofero*), από το οποίο προέρχεται το λουλάκι, αντιλαμβανόμαστε ότι το χρώμα έδωσε το όνομα και στο φυτό. Στο κυθηραϊκό ιδίωμα το αντιδάνειο μεταπλάστηκε σε θηλυκό κατ' αναλογία προς πολλά φυτά και λουλούδια θηλυκού γένους, ενώ το κερκυραϊκό *ίνδιτσι* προήλθε με προσαρμογή του αντιδανείου σε ουδέτερο και τσιτακισμό του /k/ (πρβλ. κερκυραϊκό *τσιιλίχουρδα* 'κοιλιά και έντερα αιγοπροβάτων', *τσιντάω* 'κεντώ', βλ. Χυτήρης 1987).

4.1.2 Η συνεξέταση των διαδιαλεκτικών τύπων του ίδιου λήμματος

Οι συντάκτες διαλεκτικών λεξικών δεν έχουν εποπτεία του διαλεκτικού υλικού στο σύνολό του. Ελέγχοντας την ετυμολογία ενός συγκεκριμένου λήμματος οφείλουν να συλλέξουν υλικό πρώτα από

⁶ Σχετικά με τη στατική ετυμολογία βλ. Μουσιάδης 2005: 39-45.

τα γειτονικά ιδιώματα και να επεκταθούν στη συλλογή υλικού από πιο απομακρυσμένες γεωγραφικές ποικιλίες σε περίπτωση που από την έρευνα φανεί ότι το υλικό έχει ευρύτερη γεωγραφικώς χρήση. Εδώ, προσθέτουμε ότι και η γνώση της τοπικής ιστορίας είναι απαραίτητη για την κατανόηση των σχέσεων που διαμορφώθηκαν με άλλα ιδιώματα και για τον εντοπισμό των πιθανών ξένων πηγών που δανειοδότησαν γλωσσικώς το ιδίωμα⁷.

Παράδειγμα 2: Ο Κόμης ληματογραφεί *ξενοφανώ* ‘έχω ανήσυχο ύπνο’ και ετυμολογεί *ξένα* + *φαίνομαι*. Δεδομένου ότι το κυθηραϊκό ιδίωμα παρουσιάζει πολλές ομοιότητες με τα ιδιώματα της Κρήτης (Κοντοσόπουλος 1981: 137) αλλά και της Μάνης⁸ (Κοντοσόπουλος 1981: 137, Βαγιακάκος 1988), ελέγξαμε το παραδομένο υλικό αυτών των δύο γειτονικών ιδιωμάτων⁹. Στο ιδίωμα της Ανατολικής Κρήτης απαντά το *ξενοφωνώ* που αποτελεί αρχαϊσμό με αρχική σημασία ‘μιλάω σε ξένη γλώσσα, λέω ακατάληπτες λέξεις, επαναφέρω κάποιον απομακρυσμένο από τον τόπο μου καλώντας τον’ (βλ. Andriotis 1974: 397). Το *ξενοφωνώ* στην πορεία απέκτησε τη σημασία ‘έχω ανήσυχο ύπνο’, δεδομένου ότι ο ανήσυχος ύπνος συνδέεται και με το παραμιλητό, ενώ ο τύπος μετατράπηκε παρετυμολογικώς σε *ξενοφανώ*.

4.2 Η αξιοποίηση του διαλεκτικού φωνολογικού και μορφολογικού συστήματος

Κάθε ιδίωμα και διάλεκτος αποτελεί ένα ιδιαίτερο σύστημα με δικά του φωνολογικά και μορφολογικά χαρακτηριστικά που το διαφοροποιούν από εκείνο της επίσημης γλώσσας. Όμως, η έλλειψη γραμματικών περιγραφών (πρβλ. Κατσογιάννου 2008: 660) των γεωγραφικών ποικιλιών οδηγεί σε μερική και συνήθως εμπειρική γνώση του συστήματος κι επομένως σε προβλήματα ετυμολόγησης.

Παράδειγμα 3: το λήμμα *φαλαγγούνα* ‘1. αράχνη με τον ιστό της, 2. σκορπιός’, ετυμολογείται από το *φαλάγγι* (Κόμης 1995). Η λέξη όντως συνδέεται ετυμολογικώς με το αρχαίο ουσιαστικό *φαλάγγιον* ‘είδος δηλητηριώδους αράχνης’ (Liddell & Scott 1996⁹: λήμμα *φαλάγγιον*, βλ. και ΑΚΝ 2007⁷: λήμμα *φαλάγγι* και ΑΝΕΓ 2008³: λήμμα *φαλάγγι*). Το *-ούνα*, που –σε αντίθεση με το επίθημα *-ούνι-* δεν ληματογραφείται στον Κόμη (ό.π.), αποτελεί ένα χαρακτηριστικό επίθημα του κυθηραϊκού ιδιώματος. Προέρχεται από το ουδέτερο επίθημα *-ούν(ι)*¹⁰ + το κλιτικό επίθημα *-α* και σχηματίζει θηλυκά ονόματα κατεξοχήν [+έμφυχο] [+ανθρώπινο], π.χ. *χωριατούνα* ‘χωριάτισσα’, *σπαλετούνα* ‘αυτή που φοράει το σπαλέτο’, *κλωσσούνα* ‘κλώσσα’.

4.3 Η αξιοποίηση των παλαιότερων και νέων πηγών και έργων αναφοράς

Στο οπλοστάσιο του ετυμολόγου πρέπει να βρίσκονται τόσο οι πρωτογενείς πηγές όσο και σημαντικά λεξικά αναφοράς από όλες τις φάσεις της ελληνικής γλώσσας, μέσα από τα οποία μπορούμε να βρούμε την πρώτη εμφάνιση της λέξης αλλά και ετυμολογικές προτάσεις ή στοιχεία πολύτιμα για την ετυμολόγηση. Όσο μένουν αναξιοποίητα αυτά τα όπλα, τόσο μεγαλύτερος είναι ο κίνδυνος εσφαλμένης ετυμολογίας. Γι’ αυτό κρίνεται απαραίτητη η συνεχής αποδελτίωση νεότερων δημοσιεύσεων διαλεκτολογικού περιεχομένου, όπως τοπικών γλωσσариών, διδακτορικών διατριβών, επιστημονικών άρθρων, λογοτεχνικών έργων με διαλεκτικό χρώμα κτλ. (βλ. Γιακουμάκη et al. 2004: 6).

Παράδειγμα 4: Στον Κόμη (1995) βρίσκουμε χωρίς ετυμολογική πληροφορία το λήμμα *μπόμπολας* και *μπόμπολος* ‘1. κοχλίας 2. θαλάσσιος κοχλίας (σαν τα σαλιγκάρια με σκληρό καβούκι)’. Ο Πάγκαλος (1994-2003) σημειώνει ότι είναι αγνώστου ετύμου, ενώ ο Ξανθινάκης (2001) το ετυμολογεί από το μεσαιωνικό *πόπολον* (πολύς λαός, μεγάλο πλήθος) < λατ. *populus* με τροπή του /p/ > /b/. Και στο ιδίωμα των Κυθήρων έχουμε παράδειγμα διπλής ηχηροποίησης του άηχου /p/ > /b/, βλ. *ποπολάνος* και *μπομπολάνος* ‘χωρικός’. Όμως η ετυμολόγηση του Ξανθινάκη (2001) δεν ικανοποιεί το σημασιολογικό κριτήριο, γιατί η σύνδεση των δύο σημασιών είναι αυθαίρετη. Παρόλο που το έργο εκδόθηκε το 2001, ο συγγραφέας δεν ανέτρεξε στους μέχρι τότε εκδεδομένους τόμους του Κριαρά (1969 κ.εξ.), όπου ληματογραφείται η λέξη *μπόβολος* ‘σαλιγκάρι’, η οποία μαρτυρείται τον 17^ο αι.:

«ήττονε ἕνας μπόβολος ἀποτ’ ἐκείνους ὅπου ἔχουν τέσσερα κέρατα» Μπερτολδίνος 166-167.

⁷ Τη σημασία της γνώσης της ιστορίας και τη γεωγραφίας ως προϋποθέσεων ετυμολογίας αναδείχθηκαν από τους Brunot & Bruneau (1949⁵: 124-125). Πρβλ. το χωροχρονικό κριτήριο του Μωυσιάδη (2005: 174 κ.εξ.).

⁸ Στα Κύθηρα μαρτυρούνται από τον 11^ο αι. εποικίσεις Μανιατών: μετά από την ερήμωση του νησιού από επιδρομές πειρατών και Τούρκων, οι Βενετοί εποίκισαν το βόρειο τμήμα με Μανιάτες (Βαγιακάκος 1988: 179-182).

⁹ Ο Πιτυκάκης (1971) παρετυμολογεί, υποθέτοντας ότι η λέξη προέρχεται από τα μυρκαστικά ζώα που δεν βολεύονται σε ξένο τόπο και φωνάζουν όλη τη νύχτα. Αντιθέτως, ο Πάγκαλος (1994-2003) ετυμολογεί σωστά.

¹⁰ Για την ετυμολογία του επιθήματος *-ούνι*, βλ. Χατζιδάκης (1907: Β’, 307-308) και ΑΚΝ (2007⁷).

Ο *μόβολος* αποτελεί βενετικό δάνειο (< bonolo ‘σαλιγκάρι, κοχλίας’) (βλ. Boerio 1856)¹¹ και προσαρμόστηκε στο κλιτικό παράδειγμα της ν.ε. με κλιτικό επίθημα -ος.

Παράδειγμα 5: η κυθηραϊκή λέξη *φαγκλί* ‘φανάρι με το οποίο οι κυνηγοί τη νύχτα κυνηγούν ορτύκια’ καταγράφεται στον Κόμη (1995). Η λέξη μάλιστα απαντά και σε αρκετά μεγάλο αριθμό παραγώγων και συνθέτων, όπως *φαγκλάτορας* ‘κυνηγός με φαγκλί’, *φαγκλιάζω* ‘θαμπώνω τα ορτύκια με το φως του φαγκλιού’, *φαγκλοφάναρο*, *φαγκλώνω* ‘ετοιμάζω το φαγκλί’. Σύμφωνα με το αρχείο του KENΔΙ, η λέξη έχει ευρύτατη γεωγραφική κατανομή, από την Ανατολική Θράκη μέχρι την Κρήτη, κυρίως υπό τον τύπο *φάκλα* και *φακλί* και με τις σημασίες ‘φλόγα, λάμψη, δάδα, μεγάλη ζέστη, πυροφάνι’. Ο Πιτυκάκης (1971) την ετυμολογεί πιθανόν από το *φάω* ‘λάμπω’ + -κλα, επίθημα που όμως δεν μαρτυρείται στο ιδίωμα, ενώ το μαρτυρούμενο επίθημα -άκλα έχει μεγεθυντική σημασία. Ενδιαφέρον πάντως έχει ότι η λέξη εντοπίζεται και σε βαλκανικές γλώσσες, βλ. τη ρουμανική λέξη *facie* και τη βουλγαρική *faklija* με σημασία ‘πυρσός, λαμπάδα’. Η λέξη προέρχεται από το λατινικό *facula* ‘μικρή δάδα’, υποκοριστικό του ουσιαστικού *fax* ‘δάδα’, ετυμολογία στην οποία φτάσαμε με τη βοήθεια παλαιότερων λεξικογραφικών εργασιών: ο Γαζής (1835-1837) στο λήμμα *σχίζα* δίνει ως ερμηνευμα «λέγεται έτι και τὸ λεπτῶς ἐσχισμένον ξύλον, τὸ ὁποῖον μεταχειρίζονται ἀντὶ κηροῦ ἢ λύχνου οἱ χωρικοί, *φάκλα*, λαμπάδα». Η λέξη απαντά επίσης και σε ακόμη παλαιότερες λεξικογραφικές εργασίες, όπως στον DuCange στο λήμμα *φάκλη* (*facula*). Πέρα όμως από τα ίδια τα λεξικά, και η αρθρογραφία επιβεβαιώνει την ετυμολογία της: ο Κουκουλές (1952: 373) συνδέει ετυμολογικώς τη *φάκλα* (*facula-facula*) με το *φαγκλί* που δηλώνει «τὴν ἐσχάραν, ἐφ’ ἧς κατὰ τὸ κυνήγιον τῶν ὀρτυκίων ἀνάπτουσι πρὸς φωτισμὸν ξύλα».

4.4 Η αξιοποίηση νέων τεχνολογιών για τη συλλογή διαλεκτικού υλικού

Σε αυτό το σημείο πρέπει να επισημάνουμε ότι εξαιρετικό εργαλείο στα χέρια του λεξικογράφου είναι και το ίδιο το διαδίκτυο. Αναφερόμαστε, τόσο στα σώματα κειμένων όπως είναι το σώμα του Thesaurus Linguae Graecae (TLG) ή τα σώματα επιγραφών και παπύρων, όσο και στις μηχανές αναζήτησης, μέσω των οποίων είναι πλέον δυνατόν να εντοπίσουμε πολύτιμο υλικό υπό τη μορφή δυσεύρετων –ψηφιοποιημένων πια– λεξικών, περιοδικών και μελετών.

Παράδειγμα 6: η λέξη *ζουρίο* ‘μέρος του υδρόμυλου όπου τρέχει το νερό’ απαντά στο κυθηραϊκό ιδίωμα (Κόμης 1995). Κυριολεκτικώς πρόκειται για το σημείο εξόδου του νερού που θέτει σε κίνηση τον νερόμυλο. Η λέξη, η οποία έχει μεγάλη πανελλήνια γεωγραφική κατανομή¹², προέρχεται σύμφωνα με τον Πάγκαλο (1994-2003) από το αμαρτυρο **γυρείον* (> *γυρείο* > *γυρίο* > *γιουρίο* > *ζιουρίο*), ενώ σύμφωνα με τον Ξανθινάκη (2001) ετυμολογείται από τη λέξη *ζούρα* (< ιταλ. *usura*). Και οι δύο προτάσεις έχουν προβλήματα. Η πρόταση του Πάγκαλου στηρίζεται σ’ έναν αμαρτυρο τύπο με σημασιολογική μεν συνάφεια προς τους διαλεκτικούς τύπους, χωρίς όμως να λαμβάνεται υπ’ όψιν ότι όλοι οι παραδεδομένοι πανελληνίως τύποι διατηρούν το <ζ>. Η *ζούρα* του Ξανθινάκη –που καταγράφεται στον Κριαρά (1969 κ.εξ.)– έχει μόνο τη σημασία ‘τοκογλυφία’. Από το ηλεκτρονικό σώμα παπύρων (<http://epigraphy.packhum.org/inscriptions/main>) εντοπίσαμε τη λέξη *ζωρύα* ‘υδρορροή’ η οποία μαρτυρείται σε επιγραφή της Τροιζήνας του 4^{ου} αι. π.Χ. «ζωρύας, ὡς τὸ ὕδωρ ἐπὶ τὸν ναὸν μὴ ῥέη» IG IV 823 (βλ. και Liddell & Scott 1996⁹). Από τη *ζωρύα* σχηματίστηκε με μεταπλασμό του γένους το *ζωρύο* και κατόπιν το *ζωρνό* με συνίζηση για αποφυγή της χασμωδίας. Με την ίδια ακριβώς σημασία ο Κόμης (ό.π.) λημματογραφεί χωριστά και τη λέξη *σβουρείο* (sic), λέξη με μεγάλη διάδοση σε ν.ε. ιδιώματα σύμφωνα με το αρχείο του KENΔΙ. Ο τύπος προέρχεται από την παρετυμολογική επίδραση της λέξης *σβούρα* στη λέξη *ζουρίο*, ετυμολογία που επιβάλλει τόσο την ορθογράφηση *σβουρίο*, όσο και την ενοποίησή του με το λήμμα *ζουρίο*.

Το διαδίκτυο μέσω των μηχανών αναζήτησης μπορεί να μας παράσχει ακόμη και «πληροφορητές» κάποιου ιδιώματος. Είναι αυτονόητο ότι κάθε διαδικτυακή πληροφορία απαιτεί ιδιαίτερα εξονυχιστικό έλεγχο.

Παράδειγμα 7: Στον Κόμη (1995) βρίσκουμε λημματογραφημένη τη λέξη *σούρντιση* ‘διάρροια’. Η *σούρντιση* ή *σούρδιση* έχει κι αντίστοιχο ρήμα *σουρδίζω/ σουρντίζω* ‘παθαίνω διάρροια’. Ρήμα και ουσιαστικό έχουν πανελλήνια εξάπλωση σύμφωνα με το αρχείο του KENΔΙ. Ο Πάγκαλος (1994-2003) ετυμολογεί το ρήμα *σουρδίζω* της Α. Κρήτης από το γαλλικό *sourdre* ‘αναβλύζω’. Αφενός η μεγάλη γεωγραφική διάδοση του τύπου από τις Κυκλάδες (Σύρο, Πάρο, Μήλο, Άνδρο), τη Στερεά Ελλάδα, τη Σκύρο, μέχρι την Κω και τη Βιθυνία, αφετέρου η μη ικανοποίηση του φωνολογικού και

¹¹ Η αποδελτίωση του Boerio δίνει ετυμολογικές απαντήσεις για πολλές κυθηραϊκές λέξεις, π.χ. το *πασαρί* ‘σκανδάλη’ < βενετικό *el passarin*’.

¹² Στο αρχείο του KENΔΙ βρήκαμε τους εξής τύπους: *ζιρίο* Κοζάνη, *ζορίο* Άνδρος, Φθιώτιδα κ.α. *ζουρκόν* Κύπρος, *αζουρίο* Ζάκυνθος.

μορφολογικού¹³ και σημασιολογικού κριτηρίου, μας έκανε να αμφισβητήσουμε την πρόταση περί γαλλικού δανείου και να στραφούμε προς την αναζήτηση άλλης πηγής δανεισμού, πιο συγκεκριμένα στην τουρκική γλώσσα. Αναζητώντας τη λέξη στο διαδίκτυο, βρήκαμε ένα πολύ ενδιαφέρον κείμενο¹⁴, στο οποίο δίνεται η πληροφορία ότι η *σούρδιση* σημαίνει και 'πορδή'. Όντως στην τουρκική υπάρχει ρήμα *osurtmak* 'πέρδομαι' από το οποίο παρήχθη το διαλεκτικό ρήμα. Από το αοριστικό θέμα *osurdu* + παραγωγικό επίθημα *-ίζω* και με σίγηση του άτονου αρκτικού /o/ σχηματίστηκε αρχικώς το ρήμα *σουρδίζω*, που απέκτησε τη διευρυμένη σημασία 'παθαίνω διάρροια' και κατόπιν από αυτό σχηματίστηκε και το ουσιαστικό *σούρδιση*.

4.5 Τήρηση ετυμολογικών κριτηρίων & αρχών - επανέλεγχος παλαιότερων προτάσεων

Η ετυμολογία προϋποθέτει την τήρηση αυστηρότατων ετυμολογικών κριτηρίων και αρχών (πβ. Μωυσιάδης 2005, Μωυσιάδης 2011)¹⁵, για να αποφευχθεί ο κίνδυνος παρετυμολόγησης. Ιδιαίτερα πολλές παρετυμολογήσεις απαντούν στα ερασιτεχνικώς συνταγμένα διαλεκτικά λεξικά, οι οποίες – ενίοτε – φαντάζουν πειστικές.

Παράδειγμα 8: Ο Κόμης (1995) ετυμολογεί τη λέξη *ζόρτσι* και *ζόρτσιο* 'ποντικός' από το *εξόρκιον*. Η ετυμολογία φαντάζει ενδιαφέρουσα, καθώς μπορεί μορφοφωνητικά να προκύψει ο τύπος *ζόρτσι* από τον μεσαιωνικό *εξόρκι(ο)ν* (βλ. LBG, λήμμα *εξόρκιν*), με σίγηση του αρκτικού άτονου /e/ και του ληκτικού /o/ και με τσιτακισμό του /k/¹⁶. Η παραπάνω ετυμολόγηση βρίσκει και σημασιολογικά ερείσματα, γιατί στο κερκυραϊκό ιδίωμα είναι πολύ διαδεδομένη η λέξη *μιερό*, *μνιερό* και *μυγερό*, που σύμφωνα με τον Κρεκούκια (2003: 261) προέκυψε με ουσιαστικοποίηση από αρχαίο επίθετο *μιαρός/μιερός*, -όν, με τη σημασία 'ποντίκι' «που, ό,τι αγγίζει το μιάνει» (ό.π.). Εντύπωση όμως προκαλεί ότι το *ζόρτσι(ο)* έχει τη σημασία 'ποντίκι' μόνο στο κυθηραϊκό ιδίωμα. Με μια προσεκτικότερη εξέταση του κυθηραϊκού λεξιλογικού, θα παρατηρήσουμε ότι λημματογραφείται και η λέξη *σόρτζος* και πάλι με τη σημασία 'ποντίκι'. Η λέξη προέρχεται από το βενετικό *sorze/ sorgio* 'αρουραίος' ή το ιταλικό *sorcio* 'αρουραίος', από το οποίο προέκυψε και ο τύπος *ζόρτσιο* με παρετυμολογία προς το *ζόρκι* λόγω των δεινών που προκαλούν τα ποντίκια.

Παρετυμολογήσεις εντούτοις βρίσκουμε και στα συνταγμένα από ειδικούς λεξικά, συχνά γιατί επαναλαμβάνουν χωρίς επανέλεγχο τις ετυμολογικές προτάσεις άλλων.

Παράδειγμα 9: Στον Κόμη (1995) βρίσκουμε το λήμμα *καβαλιάδα* 'πλούσιο ανασηκωμένο μαλλί', χωρίς να ετυμολογείται. Μετά από έρευνα βρήκαμε την ακόλουθη ετυμολογική πρόταση του Κοραή ('Ατακτα IV, 188): «ἴσως ἦτο τὴν ἀρχὴ καβαλιάδα, (ἀπὸ τὸ ἰταλικὸ *cavallo*, 'ἵππος') κί ἐσήμαινε κυρίως τὴν χαίτην τοῦ ἵππου, ἔπειτα μετεφέρθη καὶ εἰς τὴν κόμην». Ο ετυμολόγος πριν καταλήξει στην υιοθέτηση του αμάρτυρου *καβαλιάδα*, οφείλει να ελέγξει τόσο τις πηγές του όσο και τα βασικά λεξικά. Δεδομένου ότι ο τύπος απαντά στα Επτάνησα και στη Δυτική Ελλάδα, ανατρέξαμε στον Boerio (1856) και όντως εντοπίσαμε το λήμμα *cavegiara/ cavegiera* 'quantita di capelli che una persona ha sulla testa'. Η *καβαλιάδα* προέρχεται από το βενετικό *cavegiara* με εξακολουθητική αφομοίωση του /e/ > /a/ και με τροπή του /t/ σε /ð/ αναλογικώς προς το πλήθος θηλυκών ονομάτων σε -άδα.

5. Προβλήματα ετυμολογίας στα συγχρονικά λεξικά

Τα συγχρονικά διαλεκτικά λεξικά καταγράφουν το λεξιλόγιο μιας γλωσσικής γεωγραφικής ποικιλίας σε μια συγκεκριμένη χρονική φάση και δεν περιλαμβάνουν ετυμολογικές πληροφορίες. Πρέπει όμως να τονίσουμε ότι είναι μύθος ότι η συγγραφή ενός καλού συγχρονικού λεξικού δεν απαιτεί ετυμολόγηση. Αντιθέτως, η ετυμολόγηση προαπαιτείται για την ορθή λημματογράφηση. Η ανεπαρκής ή λανθασμένη ετυμολόγηση που προηγείται της λημματογράφησης οδηγεί σε προβλήματα όπως α)

¹³ Τα γαλλικά, προβηγκιανά, ιταλικά, βενετικά δάνεια αφομοιώθηκαν στην Ελληνική κυρίως μέσω του απαρεμφατικού τύπου με κλιτικό επίθημα -ω, π.χ. *αἰδάρω* 'βοηθώ' < βενετικό *aidar*. Η Κυπριακή διάλεκτος τα αφομοιώνει συχνά με κλιτικό επίθημα -ιάζω, π.χ. *αγιδιάζω* 'βοηθώ' < ιταλικό *aitare*.

¹⁴ «[...] της λέγανε "αέρας η κόρη σας, αέρας!" (Δεν ξέρω αν εξυπονούσανε κοπανιστός ή της πορδής [...]) Η εν λόγω, ήταν αυτό που λένε στις Κυκλάδες "σούρδιση" (http://highvoltagepress.blogspot.com/2010/06/blog-post_21.html).

¹⁵ Σύμφωνα με τον Μωυσιάδη (2005: 82 κ.εξ.) η ετυμολόγηση πρέπει να βασίζεται σε πέντε κριτήρια, το φωνολογικό, το μορφολογικό, το σημασιολογικό, το χωροχρονικό και το αναλογικό. Κάθε κριτήριο διέπεται από τις δικές του αρχές.

¹⁶ Τύπος *ζόρκιο* 'ζόρκι, επωδή', σύμφωνα με το αρχείο του ΚΕΝΔΙ, απαντά στην Κέρκυρα και στην Λακωνία (Άρνα, Ζελίνα).

δυσορθογραφίες β) διάσπαση τύπων του ίδιου λήμματος σε διαφορετικά λήμματα, γ) συγχώνευση ομόηχων λημάτων.

Παράδειγμα 10: Ο Κόμης (1995) ληματογραφεί *συναλλήκια* ‘συναναστροφή, δοσοληψία’, χωρίς να ετυμολογεί τη λέξη. Ωστόσο, η επιλεγμένη ορθογραφία παραπέμπει τον μη ειδικό αναγνώστη στη συνώνυμη *συναλλαγή*. Η λέξη προέρχεται από το τουρκικό *asinalik* ‘γνωριμία, εξοικείωση’ και οφείλει να γράφεται με <ι>, όπως άλλωστε ληματογραφείται στο ΙΑΝΕ (1933-1989: λήμμα *άσινάλικι*).

6. Διαλεκτικό υλικό & επίσημη γλώσσα: Το πρόβλημα της αντιθετικής μεθόδου

Η λεξικογραφική πρακτική των συγχρονικών και διαχρονικών ετυμολογικών διαλεκτικών λεξικών στηρίζεται στη αντιθετική μέθοδο (contrastive method), σύμφωνα με τη οποία καταγράφεται και εξηγείται κάθε γλωσσικό στοιχείο το οποίο στην υπό μελέτη τοπική διάλεκτο ή ιδίωμα διαφέρει από ό,τι θεωρείται επίσημη ποικιλία (Zgusta 1971: 205). Όπως υποστηρίζει ο Zgusta (ό.π.), αν και η μέθοδος αυτή δεν είναι η καλύτερη, εντούτοις, χρησιμοποιείται κατά κόρον για πρακτικούς λόγους. Η λεξικογραφική οικονομία για την αποφυγή επανάληψης πληροφοριών που παρέχονται από τα γενικά λεξικά καθιστά αυτή τη μέθοδο προτιμητέα.

Ο Zgusta (ό.π.) αντιθέτως σημειώνει ότι επαρκέστερη μέθοδος είναι εκείνη που περιγράφει πλήρως την υπό εξέταση γεωγραφική ποικιλία. Θα συμφωνήσουμε με την παραπάνω άποψη, γιατί πιστεύουμε ότι με την αποσιώπηση στοιχείων για λόγους οικονομίας δίνεται ελλιπής εικόνα του ιδιώματος. Απώλειες στην πληροφορία έχουμε και στην ετυμολογία, καθώς το κοινό λεξιλόγιο ανάμεσα σε μια περιγραφόμενη γεωγραφική ποικιλία και την επίσημη γλώσσα δεν αποτελεί κατά κανόνα αντικείμενο μελέτης των διαλεκτικών ετυμολογικών λεξικών. Χάνεται επομένως όποια ευκαιρία κατάθεσης μιας ετυμολογικής πρότασης για προβληματικές και δυσεπίλυτες περιπτώσεις του γενικού λεξιλογίου¹⁷.

Παράδειγμα 10: η λ. *φακλάνα* ‘πόρνη, άσχημη και παχύσαρκη γυναίκα, γυναίκα με χυδαία εμφάνιση και συμπεριφορά’, την οποία κυθήριοι πληροφορητές επιβεβαίωσαν ότι γνωρίζουν και χρησιμοποιούν, είναι αγνώστου ετύμου σύμφωνα με το ΑΚΝ (2007⁷) και ΑΝΕΓ (2008³)¹⁸. Η λέξη, εντούτοις δεν είναι αμάρτυρη. Απαντά στην παραλλαγή D της έντυπης βενετικής έκδοσης (ανατύπωση 1553) του Σπανού, του γνωστού ανώνυμου βωμολοχικού έργου του 14^{ου}-15^{ου} αι.:

«*Ἡμεῖς, ὃ τε παπᾶ_Φιλίσκος ἀπὸ τοὺς Φιλίππους ἔτι δὲ καὶ ≤ή≥ κυρὰ*

Κουμμερτικίνα ἢ Κατσικοπορδοῦ ἀπὸ τὴν Ἀσφάμιαν, παπαδία του,

παραδίδομεν εἰς τὸν γαμβρὸν ἡμῶν κὺρ Λέοντα τὸν Κατσαρέλην ἀπὸ τὴν

*Πέργαμον τὴν γνήσιαν ἡμῶν καὶ φιλότατην θυγατέρα ὀνόματι **Φακλάνα***» Σπαν. (Eideneier)1681.

Στο κείμενο του Σπανού απαντούν και ομόρριζοι σχηματισμοί, σύνθετοι και παράγωγοι, όπως *φακλανάτος*, *φακλανίζω*, *φακλανοπορδοτσουφάτος* κ.ά. Όλες οι παραπάνω τύποι αποτελούν κατασκευασμένο υβριστικό λεξιλόγιο που αφορά σωματικές ανθρώπινες ανάγκες. Η *Φακλάνα* ήταν το λογοτεχνικό όνομα μιας βδελυρής στην εμφάνιση και στη συμπεριφορά γυναίκας που πιθανόν προέκυψε από τη σύμφυση των ρηματικών θεμάτων *φά(ω)* + *κλάν(ω)* + με κλιτικό επίθημα -α.

7. Επίλογος

Πέρα από τις συγκεκριμένες ετυμολογήσεις ή επανετυμολογήσεις λέξεων του κυθηραϊκού ιδιώματος, διαπιστώνουμε ότι τα προβλήματα ετυμολόγησης σε διαλεκτικά λεξικά εμφανίζονται υπό τη μορφή ελλείψεων τόσο κατά τη συλλογή του συγχρονικού και διαχρονικού διαλεκτικού υλικού όσο και κατά την επεξεργασία του. Η αξιοποίηση ενδοδιαλεκτικών και διαδιαλεκτικών τύπων του ίδιου λήμματος, η αξιοποίηση του φωνολογικού και μορφολογικού διαλεκτικού συστήματος, η αποδελτίωση πρωτογενών πηγών, παλαιότερων και νεότερων έργων αναφοράς και η αξιοποίηση των δυνατοτήτων του διαδικτύου αποτελούν βασικές προϋποθέσεις για την ετυμολόγηση σε διαλεκτικά λεξικά.

Όπως παρατηρεί η Κατσογιάννου (2008: 661-662), η αύξηση του ενδιαφέροντος για τη διαλεκτολογία μάς επιτρέπει να αναμένουμε σημαντικές βελτιώσεις. Περισσότερες μεταλεξικογραφικές μελέτες για τη διαλεκτική λεξικογραφία, περισσότερες περιγραφές του γραμματικού συστήματος ν.ε. ιδιωμάτων, ενασχόληση περισσότερων γλωσσολόγων με τη διαλεκτική λεξικογραφία, θα αποτέλεσουν βάσεις για καλύτερη λεξικογραφική παραγωγή.

¹⁷ Οι Γιακουμάκη et al. (2004: 6) έχουν επισημάνει ήδη ως πρόβλημα την αναζήτηση, καταγραφή και αποδελτίωση του σπάνιου.

¹⁸ Το ΕΑΝΕΓ (2009) δεν περιέχει στο ληματολόγιό του τη συγκεκριμένη λέξη.

ΜΕΤΑΞΥ ΣΥΝΘΕΤΩΝ ΚΑΙ ΦΡΑΣΕΩΝ*

Μαρία Κολιοπούλου

Πανεπιστήμιο Πατρών

mkoliop@upatras.gr

ABSTRACT

This paper deals with certain structures in Modern Greek which can not be classified as neither compounds nor syntactic phrases, being located in the “grey area” between two components of the grammar, specifically between morphology and syntax. In particular, I am referring to three different kinds of noun structures constituted by an adjective and a noun or two nouns. I examine the degree of lexical integrity that they display in order to differentiate them from each other. For their theoretical analysis I adopt a continuum between morphology and syntax in Kiparsky’s (1982) terms.

Λέξεις κλειδιά: μορφολογία, σύνταξη, σύνθετα, φράσεις, λεξική ακεραιότητα, λεξικοποίηση, συνεχές.

1. Εισαγωγή

Στην παρούσα εργασία μελετώνται ονοματικές δομές της Νέας Ελληνικής¹ για την ανάλυση των οποίων απαιτείται ο συνδυασμός φαινομένων από δύο τομείς, τη μορφολογία και τη σύνταξη. Λόγω της αδυναμίας ένταξής τους σε έναν από τους δύο τομείς χαρακτηρίζονται ενίοτε και ως ενδιάμεσες δομές². Συγκεκριμένα, πρόκειται για σχηματισμούς που αποτελούνται από δύο λέξεις, ένα επίθετο και ένα ουσιαστικό (π.χ. *μαύρη αγορά*, *παιδική χαρά*) ή δύο ουσιαστικά. Οι περιπτώσεις αλληλουχίας δύο ουσιαστικών διαχωρίζονται σε δομές όπου το δεύτερο συστατικό είναι σε γενική πρώτη (π.χ. *οίκος ανοχής*, *εκπομπή αερίων*) και σε δομές όπου τα δύο ουσιαστικά είναι ομοιόπρωτα (π.χ. *λέξη κλειδί*, *ηθοποιός - τραγουδιστής*). Όπως προκύπτει από τα βασικά αυτά δομικά χαρακτηριστικά τους, οι υπό εξέταση σχηματισμοί έχουν τη μορφή συντακτικής φράσης. Ο παραλληλισμός με τις συντακτικές φράσεις βασίζεται και στα φωνολογικά τους χαρακτηριστικά, εφόσον αποτελούνται από δύο φωνολογικές λέξεις, ο συνδυασμός των οποίων σχηματίζει μία φωνολογική φράση. Εντούτοις, η μορφή των δομών αυτών δεν επαρκεί για το χαρακτηρισμό τους ως συντακτικές φράσεις.

Η ανάλυση των ιδιοτήτων τους οδηγεί στο συμπέρασμα ότι πρόκειται για δομές που δεν είναι απόλυτα ορατές στη σύνταξη και επομένως δεν εφαρμόζονται όλες οι συντακτικές διεργασίες που επιτελούνται στις συντακτικές φράσεις. Συγκεκριμένα, οι υπό εξέταση δομές παρουσιάζουν διακύμανση στο βαθμό επίδρασης των διαφόρων συντακτικών φαινομένων. Δηλαδή εντοπίζονται σχηματισμοί των οποίων η εσωτερική δομή είναι μη ορατή στη σύνταξη, όπως για παράδειγμα συμβαίνει στους μορφολογικούς σχηματισμούς των συνθέτων. Αντίθετα, υπάρχουν δομές στις οποίες επιτελούνται σχεδόν όλοι οι δυνατοί συντακτικοί μετασχηματισμοί και επομένως προσεγγίζουν περισσότερο τις συντακτικές φράσεις. Επιπλέον, απαντούν σχηματισμοί που βρίσκονται σε μια ενδιάμεση κατάσταση, καθώς επιτρέπουν την παρεμβολή της σύνταξης στην εσωτερική δομή τους ως κάποιο βαθμό. Επομένως, η ανάλυση των υπό εξέταση ονοματικών σχηματισμών και η κατηγοριοποίησή τους βασίζεται στο βαθμό λεξικής ακεραιότητας (lexical integrity, βλ. Anderson, 1992: 84) που τις χαρακτηρίζει και συγκεκριμένα στο κατά πόσο είναι ορατή η εσωτερική δομή τους στη σύνταξη, ή αλλιώς στο κατά πόσο οι δομικές τους ιδιότητες προσεγγίζουν τις ιδιότητες των συνθέτων ή των συντακτικών φράσεων.

* Θα ήθελα να ευχαριστήσω την Αγγελική Ράλλη, Καθηγήτρια Γλωσσολογίας του Πανεπιστημίου Πατρών για την υποστήριξή της κατά τη διάρκεια ενασχόλησής μου και το συγκεκριμένο θέμα, καθώς και την Ιώ Μανωλέσσου, Ερευνήτρια Β΄ της Ακαδημίας Αθηνών, για τις πολύτιμες παρατηρήσεις της κατά τη διάρκεια συγγραφής αυτού του άρθρου.

¹ Τα δεδομένα αποτελούνται από 226 ονοματικές δομές της Νέας Ελληνικής, τα οποία συγκεντρώθηκαν για τις ανάγκες της μεταπτυχιακής μου διατριβής (Κολιοπούλου 2006) τόσο από τη σχετική βιβλιογραφία όσο και από τον καθημερινό τύπο κατά το διάστημα 01-03/2006.

² Ενδιάμεσες δομές (intermediate structures) απαντούν και στην Ιταλική, τις οποίες οι Bisetto και Scalise (1999) χαρακτηρίζουν με τον όρο “compound-like phrases”, δηλαδή ως φράσεις που μοιάζουν με σύνθετα.

Η δομική ανάλυση στη δεύτερη ενότητα έχει δύο βασικούς στόχους. Αφενός συνοψίζει πορίσματα προηγούμενων μελετών που ασχολούνται με αυτούς τους ονοματικούς σχηματισμούς, μιας και έχουν απασχολήσει ήδη αρκετούς γλωσσολόγους, έστω και σε μελέτες που αφορούν μόνο σε συγκεκριμένα είδη και όχι σε όλα, όπως επιχειρείται στην παρούσα μελέτη. Αφετέρου αναδεικνύονται ιδιότητες που οδηγούν την ανάλυση σε έναν ακόμα πιο ακριβή διαχωρισμό των συγκεκριμένων ονοματικών δομών, με βάση πάντα το βαθμό εσωτερικής συνοχής που εμφανίζουν. Μετά τη λεπτομερή αυτή δομική ανάλυση ακολουθεί, στην τρίτη ενότητα, η θεωρητική πλαισίωση του φαινομένου και συγκεκριμένα επιχειρείται η επακριβής κατάταξη των ονοματικών αυτών δομών στα όρια ενός συνεχούς μεταξύ των τομέων της μορφολογίας και της σύνταξης.

2. Ανάλυση δομών

Οι υπό εξέταση σχηματισμοί της Νέας Ελληνικής κέντρισαν το ενδιαφέρον αρκετών γλωσσολόγων λόγω της ιδιαιτερότητας της δομής τους, σε μια γλώσσα μάλιστα που τα σύνθετα είναι πολύ παραγωγικά (βλ. Mackridge 1985, Αναστασιάδη - Συμεωνίδη 1986, 1994, 1996, Ράλλη 1991, 2005, 2007, Ralli 1992, in print, Γαβριηλίδου 1995, 1996, 1997, Christophidou 1997, Ralli & Stavrou 1997, 1998, Συμεωνίδης 2000, Νάκας & Γαβριηλίδου 2005, Κολιοπούλου 2006, Κολιοπούλου 2007, 2008). Συγκεκριμένα, η Αναστασιάδη - Συμεωνίδη (1986, 1994) μελετώντας νεολογισμούς της Νέας Ελληνικής επισημαίνει ότι τέτοιου είδους δομές έχουν εισέλθει ως μεταφραστικά δάνεια από την Αγγλική και τη Γαλλική. Υποστηρίζει ότι η χρήση τους είναι ιδιαίτερα διαδεδομένη στο δημοσιογραφικό λόγο και η παραγωγικότητά τους αυξάνεται καλύπτοντας ανάγκες ορολογίας. Επιπλέον, τις χαρακτηρίζει ως «λεξικές φράσεις», όρο που στη συνέχεια υιοθετεί και η Ράλλη (1991). Αργότερα, η Αναστασιάδη - Συμεωνίδη (1996) μελετά αυτές τις δομές σε αντιπαραβολή με τα μονολεκτικά σύνθετα και τις περιγράφει ως «πολυλεκτικά σύνθετα». Σε τελευταίες μελέτες της η Ράλλη (2005, 2007, Ralli in print) υιοθετεί τον όρο «χαλαρά πολυλεκτικά σύνθετα» (loose multi word compounds) τα οποία στη συνέχεια διαχωρίζει από τις ειδικές ονοματικές φράσεις (special noun phrases) και τους ονοματικούς σχηματισμούς (noun constructs). Η τριχοτόμηση αυτή των ονοματικών μορφο-συντακτικών δομών, όπως δίνεται στο (1), υιοθετείται και στην παρούσα εργασία και βασίζεται στο βαθμό λεξικής ακεραιότητας που εμφανίζουν, κάτι που θα αναλυθεί διεξοδικά και ακολούθως.

- (1) Είδη των ονοματικών μορφο-συντακτικών δομών:
- α) χαλαρά πολυλεκτικά σύνθετα (loose multi-word compounds)
 - β) ειδικές ονοματικές φράσεις (special noun phrases)
 - γ) ονοματικοί σχηματισμοί (noun constructs)

Συγκεκριμένα, όσον αφορά στο πρώτο είδος, δηλαδή στα χαλαρά πολυλεκτικά σύνθετα, αποτελούνται από επίθετο - ουσιαστικό [E O], όπως τα παραδείγματα *τρίτος κόσμος*, *δημόσιος υπάλληλος* κ.ά. του (2α) ή πρόκειται για μια αλληλουχία δύο ουσιαστικών όπου το δεύτερο βρίσκεται πάντα σε γενική πτώση [O O_{GEN}], όπως τα παραδείγματα *ζώνη ασφαλείας*, *οίκος ανοχής* και *άρμα μάχης* του (2β). Το δομικό σχήμα των χαλαρών πολυλεκτικών συνθέτων [λέξη λέξη] απαντά κυρίως στους αμιγείς συντακτικούς σχηματισμούς, δηλαδή στις φράσεις, αλλά και στα μονολεκτικά σύνθετα. Πιο αναλυτικά, και στα τρία αυτά είδη σχηματισμών απαντούν συνδυασμοί επιθέτου και ουσιαστικού ή δύο ουσιαστικών, όπως φαίνεται στα αντίστοιχα παραδείγματα των (3) και (4). Εντούτοις, οι ιδιότητες των χαλαρών πολυλεκτικών συνθέτων διαφέρουν τόσο από αυτές των συνθέτων όσο και των φράσεων, καθώς μοιράζονται μεταξύ μορφολογίας και σύνταξης.

- (2) α. [E O]: τρίτος κόσμος, δημόσιος υπάλληλος, ελεύθερο επάγγελμα, μαύρη αγορά
 β. [O O_{GEN}]: ζώνη ασφαλείας, οίκος ανοχής, άρμα μάχης

	α. <i>Σύνθετα</i>	β. <i>Χαλαρά πολυλεκτικά σύνθετα</i>	γ. <i>Φράσεις</i>
(3) E + O	ελαφρόπετρα	μαύρη αγορά	ψηλό δέντρο
(4) O + O	νυχτοπούλι	ζώνη ασφαλείας	θήκη γυαλιών

Τη συνύπαρξη μορφο-συντακτικών ιδιοτήτων στα χαλαρά πολυλεκτικά σύνθετα επισήμαναν αρχικά οι Αναστασιάδη - Συμεωνίδη (1986) και Ράλλη (1991, 2005, 2007) μελετώντας τα επιμέρους χαρακτηριστικά τους γνωρίσματα. Συγκεκριμένα, οι δομές αυτές αποτελούνται από δύο ανεξάρτητες λέξεις και φέρουν δύο κύριους τόνους. Επομένως, φέρουν τη μορφή φράσης γι' αυτό και χαρακτηρίζονται ως πολυλεκτικά. Αντίθετα, τα σύνθετα της Νέας Ελληνικής είναι μονολεκτικά, δηλαδή αποτελούνται από δύο θέματα, φέρουν έναν κύριο τόνο και εμφανίζουν το συνδετικό στοιχείο

-ο-, όπως φαίνεται στα παραδείγματα *ελαφρόπετρα* (3α) και *νυχτοπούλι* (4α) των αντίστοιχων δομών [EO] και [OO]. Η ύπαρξη δύο ανεξάρτητων συστατικών στα πολυλεκτικά σύνθετα έχει ως αποτέλεσμα τη χαλαρή σύνδεση των συνθετικών μερών, γι' αυτό και χαρακτηρίζονται ως χαλαρά. Επιπλέον, στις δομές [E O] εμφανίζεται εσωτερική κλίση και κατά συνέπεια υπάρχει συμφωνία σε γένος, αριθμό και πτώση. Στους σχηματισμούς [O O_{GEN}] υπάρχει απόδοση γενικής πτώσης από το πρώτο στο δεύτερο συστατικό. Τα χαρακτηριστικά που περιγράφηκαν ως τώρα αποδεικνύουν τη συντακτική φύση των πολυλεκτικών συνθέτων, καθώς απαντούν και σε συντακτικές φράσεις αντίστοιχης δομής, όπως στα παραδείγματα *ψηλό δέντρο* (3γ) και *θήκη γυαλιών* (4γ).

Η θέση της κεφαλής³ των χαλαρών πολυλεκτικών συνθέτων της δομής [O O_{GEN}] συμπληρώνει τις ομοιότητες με τους συντακτικούς σχηματισμούς, καθώς βρίσκεται στα αριστερά, όπως ακριβώς συμβαίνει και στις ονοματικές φράσεις της Νέας Ελληνικής. Αντίθετα, τα πολυλεκτικά σύνθετα της δομής [E O] έχουν την κεφαλή στα δεξιά, όπως και τα μονολεκτικά σύνθετα της Νέας Ελληνικής. Επιπλέον, και τα δύο είδη δομών εμφανίζουν υψηλό βαθμό σημασιολογικής αδιαφάνειας, όπως για παράδειγμα ο σχηματισμός *μαύρη αγορά* που δηλώνει δοσοληψίες με δυσμενείς οικονομικούς όρους. Το στοιχείο της σημασιολογικής αδιαφάνειας αποτελεί χαρακτηριστικό γνώρισμα των μορφολογικών σχηματισμών των συνθέτων, ενώ σε ορισμένες περιπτώσεις το ποσοστό σημασιολογικής αδιαφάνειας των πολυλεκτικών συνθέτων ξεπερνά και αυτό των μονολεκτικών συνθέτων.

Ένα επιπλέον χαρακτηριστικό που ενισχύει τις μορφολογικές τους ιδιότητες είναι η συμμετοχή των πολυλεκτικών συνθέτων [E O] σε παραγωγικές διαδικασίες και συγκεκριμένα στη διαδικασία της επιθηματοποίησης. Πιο αναλυτικά, τα παραγωγικά επιθήματα -ικ-, -ια- και -ιτη- προσκολλώνται σε ονοματικά θέματα που προκύπτουν από τα συστατικά των πολυλεκτικών συνθέτων [E O]. Για το σχηματισμό αυτών των θεμάτων παρεμβαίνει ένας διορθωτικός κανόνας αποκοπής (readjustment truncation rule) ο οποίος, σύμφωνα με τη Ράλλη (2007: 233-234), είναι υπεύθυνος για την αποκοπή της εσωτερικής κλίσης της δομής. Έτσι, σχηματίζονται παράγωγα, όπως τα παραδείγματα του (5) (βλ. επίσης Κολιοπούλου 2006). Τα πολυλεκτικά σύνθετα [O O_{GEN}] δε σχηματίζουν παράγωγα καθώς, όπως υποστηρίζει η Ράλλη (2007: 232-233), φέρουν την κεφαλή στα αριστερά, αντίθετα απ' ότι συμβαίνει στα παράγωγα που μόλις περιγράφηκαν όπου το επίθημα προσκολλάται στην κεφαλή της βάσης που βρίσκεται στα δεξιά.

- (5) ψυχροπολεμ-ικός < ψυχρός πόλεμος
 τριτοκοσμ-ικός < τρίτος κόσμος
 δημοσιοϋπαλληλ-ικός < δημόσιος υπάλληλος
 νεοταξ-ικός < νέα τάξη
 ελευθεροεπαγγελματ-ίας < ελεύθερο επάγγελμα
 μαυραγορ-ίτης < μαύρη αγορά
 αγιοταφ-ίτης < Άγιος Τάφος
 νεοεποχ-ίτης < νέα εποχή

Συνοψίζοντας, αναφέρω ότι στα χαλαρά πολυλεκτικά σύνθετα απαντούν τόσο συντακτικές όσο και μορφολογικές ιδιότητες. Συγκρίνοντας τις δύο δομές των χαλαρών πολυλεκτικών συνθέτων εντοπίζω περισσότερα μορφολογικά στοιχεία στις δομές [E O], καθώς φέρουν την κεφαλή στα δεξιά, όπως οι μορφολογικοί σχηματισμοί των συνθέτων και των παραγώγων της Νέας Ελληνικής και επιπλέον συμμετέχουν και σε παραγωγικές διαδικασίες, δηλαδή στην επιθηματοποίηση. Με βάση κυρίως τα μορφολογικά χαρακτηριστικά των χαλαρών πολυλεκτικών συνθέτων, η Ράλλη (1991: 152-153) προτείνει τον κανόνα σχηματισμού «λέξη → λέξη λέξη», όπως φαίνεται στο (6), ο οποίος αντιστοιχεί στα μονολεκτικά σύνθετα της Νέας Ελληνικής που αποτελούνται από ανεξάρτητες λέξεις, όπως το παράδειγμα *πολυμιλάω*.

- (6) Κανόνας σχηματισμού χαλαρών πολυλεκτικών συνθέτων:
 λέξη → λέξη λέξη

Περνώντας στο δεύτερο είδος ενδιάμεσων ονοματικών σχηματισμών της Νέας Ελληνικής, τις ειδικές ονοματικές φράσεις, οι Ralli και Stavrou (1997, 1998) αναφέρουν ότι πρόκειται για δύο είδη όπου το ένα αποτελείται από επίθετο και ουσιαστικό και το άλλο από δύο ουσιαστικά, το δεύτερο σε γενική. Επιπλέον, μελετώντας τις δομές [E O] αναφέρουν ότι σε κάποιες περιπτώσεις το επίθετο φέρει το ρόλο ορίσματος της κεφαλής που αποτελεί ρηματικό παράγωγο, όπως στα παραδείγματα *θεατρική κριτική* και *πυρηνική δοκιμή* του (7α). Σε άλλες πάλι περιπτώσεις το επίθετο βρίσκεται σε ταξινομική

³ Η έννοια της κεφαλής στη συγκεκριμένη μελέτη προσδιορίζει τόσο τα μορφοσυντακτικά όσο και τα σημασιολογικά χαρακτηριστικά μιας δομής.

σχέση με το ουσιαστικό, όπως στα παραδείγματα *βιομηχανική ζώνη* και *ψηφιακό κύκλωμα* του (7α). Όσον αφορά στις ειδικές ονοματικές φράσεις [Ο Ο_{ΓΕΝ}], η μη κεφαλή, δηλαδή το ουσιαστικό σε γενική, λειτουργεί επίσης ως όρισμα της κεφαλής, όπως φαίνεται στα παραδείγματα *επεξεργασία δεδομένων* και *εκπομπή αερίων* του (7β).

- (7) α. [Ε Ο]: θεατρική κριτική, πυρηνική δοκιμή, βιομηχανική ζώνη, ψηφιακό κύκλωμα
β. [Ο Ο_{ΓΕΝ}]: επεξεργασία δεδομένων, εκπομπή αερίων

Από τα παραπάνω παρατηρεί κανείς ότι οι ειδικές ονοματικές φράσεις φέρουν τα ίδια δομικά σχήματα με τα χαλαρά πολυλεκτικά σύνθετα. Επομένως, υπάρχει αντιστοιχία στη θέση της κεφαλής και στα συντακτικά χαρακτηριστικά συμφωνίας και απόδοσης πτώσης. Επιπλέον, όπως και τα χαλαρά πολυλεκτικά σύνθετα, εμφανίζουν συνθετότητα στη σημασία. Ενδεικτικά αναφέρω ότι ο σχηματισμός *βιομηχανική ζώνη* δε δηλώνει ένα είδος ζώνης, αλλά μια περιοχή που κατακλύζεται από εργοστάσια. Τα κοινά χαρακτηριστικά των δύο αυτών ενδιάμεσων ονοματικών σχηματισμών, τα οποία δίνονται σχηματικά στο (8), οδηγούν στο συμπέρασμα ότι οι ειδικές ονοματικές φράσεις, όπως και τα χαλαρά πολυλεκτικά σύνθετα, διαφέρουν τόσο από τα σύνθετα όσο και από τις φράσεις.

- (8) Ειδικές ονοματικές φράσεις ≈ χαλαρά πολυλεκτικά σύνθετα:

- θέση κεφαλής
- συντακτικά χαρακτηριστικά συμφωνίας και απόδοσης πτώσης
- σημασιολογική αδιαφάνεια

Επιπλέον, δημιουργείται προβληματισμός ως προς τη διαφοροποίηση των δύο αυτών ειδών. Η διαφοροποίηση αυτή προκύπτει από τα αποτελέσματα που φέρουν στην εφαρμογή ορισμένων τεστ ελέγχου συντακτικής αυτονομίας, όπως αυτά που εφαρμόζει η Ράλλη (2007). Συγκεκριμένα, δοκιμάζεται (α) η δυνατότητα σύνταξης της μη κεφαλής με προσδιοριστικό στοιχείο, (β) η παρεμβολή στοιχείου μεταξύ των συστατικών, (γ) η ανατροπή της σειράς των συστατικών καθώς και (δ) η δυνατότητα επανάληψης του άρθρου. Επίσης, (ε) στις δομές [Ο Ο_{ΓΕΝ}] δοκιμάζεται το αν η μη κεφαλή μπορεί να αποτελέσει αντικείμενο συναναφοράς. Στα παραδείγματα (9) ως (13) παραθέτω ενδεικτικές περιπτώσεις από το κάθε ένα τεστ που αποδεικνύουν ότι τα δύο αυτά είδη ενδιάμεσων δομών φέρουν διαφορετικές ιδιότητες.

Χαλαρά πολυλεκτικά σύνθετα	≠	ειδικές ονοματικές φράσεις:
(9) προσδιοριστικό στοιχείο		
α. *πολύ ψυχρός πόλεμος		β. εκπομπή βλαβερών αερίων
(10) παρεμβολή στοιχείου		
α. *η μαύρη, όπως φαντάζεστε, αγορά		β. το ψηφιακό, όπως βλέπετε, κύκλωμα
(11) αναστροφή όρων		
α. *κόσμος τρίτος χαρακτηρίζεται ...		β. ζώνη βιομηχανική χαρακτηρίζεται ...
(12) επανάληψη άρθρου		
α. *το ελεύθερο το εγγράμμα είναι ...		β. ?η πυρηνική η δοκιμή πέτυχε
(13) συναναφορά		
α. *το άρμα μάχης _i [η οποία] _i πραγματοποιήθηκε		
β. επεξεργασία δεδομένων _i [τα οποία] _i συλλέχθηκαν		

Συγκεκριμένα, από τα χαλαρά πολυλεκτικά σύνθετα προκύπτουν αντιγραμματικές δομές, κάτι που επιβεβαιώνει ότι οι σχηματισμοί, παρά τα συντακτικά χαρακτηριστικά τους, εμφανίζουν σε κάποιο βαθμό λεξική ακεραιότητα. Αντίθετα, η θετική ανταπόκριση των ειδικών ονοματικών φράσεων στα τεστ αποδεικνύει ότι πρόκειται για συντακτικές δομές, όπως άλλωστε υποστηρίζει και η Ράλλη (2007: 243). Εντούτοις, μοιάζουν στα χαλαρά πολυλεκτικά σύνθετα αφενός γιατί εμφανίζουν τα ίδια δομικά σχήματα και αφετέρου γιατί μοιράζονται το χαρακτηριστικό της σημασιολογικής αδιαφάνειας.

Περνώντας στο τρίτο είδος ενδιάμεσων δομών αναφέρομαι στους ονοματικούς σχηματισμούς δύο ουσιαστικών [Ο Ο] τα οποία μάλιστα είναι ομοιόπρωτα. Τα συστατικά αυτών των δομών απαντούν είτε σε σχέση εξάρτησης⁴, όπως στα παραδείγματα *νόμος πλαίσιο*, *λέξη κλειδί*, *εταιρία μαϊμού* και *λεωφορείο φάντασμα* του (14α), είτε σε σχέση παράταξης όπως στα παραδείγματα *μεταφραστής - διερμηνέας*, *ηθοποιός - τραγουδιστής* και *δικηγόρος - πολιτικός* του (14β).

⁴ Οι σχηματισμοί αυτοί αποτελούν συνήθως μεταφραστικά δάνεια από τη Γαλλική, όπως έχει ήδη αναφερθεί νωρίτερα. Επιπλέον, ο Mackridge (1985: 328-329) αναφέρει ότι τέτοιες δομές απαντούν και στη δημοτική και φέρει ως παραδείγματα τους σχηματισμούς *παιδί μάλαμα* και *θάλασσα λάδι*.

- (14) α. με σχέση εξάρτησης: νόμος πλαίσιο, παίκτης κλειδί, εταιρία μαϊμού, λεωφορείο φάντασμα, ταξίδι αστραπή, πάρτι έκπληξη, χώρα μέλος, άντρας πρότυπο
 β. με σχέση παράταξης: μεταφραστής - διερμηνέας, ηθοποιός - τραγουδιστής, δικηγόρος - πολιτικός, παρουσιάστρια - μοντέλο

Οι ονοματικοί σχηματισμοί με σχέση εξάρτησης φέρουν την κεφαλή στα αριστερά, όπως επίσης και οι δομές [Ο Ο_{GEN}] των δύο προηγούμενων ενδιάμεσων ειδών. Οι δομές με σχέση παράταξης είναι παραθετικοί σχηματισμοί, η κεφαλή των οποίων δεν ορίζεται σε ένα από τα δύο ουσιαστικά, όπως αντίστοιχα συμβαίνει και στα παρατακτικά σύνθετα που απαντούν σε αρκετές ευρωπαϊκές γλώσσες. Συγκεκριμένα, οι Fabb (1998), Olsen (2001) και Bisetto και Scalise (2005) υποστηρίζουν ότι τα συστατικά των παρατακτικών συνθέτων μοιράζονται τα ίδια γραμματικά χαρακτηριστικά και ανήκουν στην ίδια σημασιολογική κατηγορία. Επομένως, και τα δύο συστατικά φέρουν ιδιότητες κεφαλής, όπως στο παράδειγμα *αλατοπίπερο*. Κατά αντιστοιχία προς τα παρατακτικά σύνθετα και οι ονοματικοί παραθετικοί σχηματισμοί, των οποίων τα συστατικά μοιράζονται τα ίδια γραμματικά και σημασιολογικά χαρακτηριστικά, φέρουν δύο κεφαλές.

Επιπλέον, οι ονοματικοί σχηματισμοί [Ο Ο] έχουν τη μορφή συντακτικής φράσης, εφόσον αποτελούνται από δύο ανεξάρτητες λέξεις που φέρουν κλιτικά επιθήματα. Για να διαγνωσθεί με ακρίβεια ο βαθμός της μορφολογικής τους συνοχής και να διαπιστωθεί κατά πόσο αυτές οι δομές διαφοροποιούνται από τα χαλαρά πολυλεκτικά σύνθετα και τις ειδικές ονοματικές φράσεις εφαρμόζονται διάφορα τεστ τόσο στους σχηματισμούς με σχέση εξάρτησης όσο και στους σχηματισμούς με σχέση παράταξης (βλ. επίσης Γαβριηλίδου 1995 και Gavrilidou 1997). Συγκεκριμένα, δοκιμάζεται (α) η δυνατότητα σύνταξης ενός συστατικού με προσδιοριστικό στοιχείο, (β) η παρεμβολή στοιχείου μεταξύ των συστατικών, και (γ) η σύνταξη ενός συστατικού ως αντικείμενο συναναφοράς. Επιπλέον, εφαρμόζεται (δ) το τεστ της ανατροπής της σειράς των συστατικών.

Τα παραδείγματα (15) ως (18) δείχνουν στην πλειονότητά τους την αρνητική ανταπόκριση των δομών στα προαναφερθέντα τεστ. Αυτό σημαίνει ότι οι ονοματικοί σχηματισμοί εμφανίζουν σε κάποιο βαθμό μορφολογική συνοχή, παρότι έχουν τη μορφή συντακτικών φράσεων. Επιπλέον, θα πρέπει να επισημανθεί ότι οι ονοματικοί σχηματισμοί με σχέση εξάρτησης εμφανίζουν κάποιο βαθμό σημασιολογικής αδιαφάνειας, όπως φαίνεται στο παράδειγμα *εταιρία μαϊμού* που δηλώνει μια ψεύτικη εταιρία. Το στοιχείο αυτό ενισχύει τα μορφολογικά χαρακτηριστικά τους σε σχέση με τους ονοματικούς παραθετικούς σχηματισμούς.

- (15) προσδιοριστικό στοιχείο
 α. *επιχείρηση σωστό μαμού
 β. *μεταφραστής ικανός διερμηνέας
 (16) παρεμβολή στοιχείου
 α. ?μέτρα, όπως αντιλαμβάνεστε, ανάσα ...
 β. *ο ηθοποιός, όπως βλέπετε, τραγουδιστής ...
 (17) συναναφορά
 α. *μελέτησε την υπόθεση κλειδί_i [το οποίο]_i, άνοιξε το δρόμο για ...
 β. *συνάντησε τον ηθοποιό τραγουδιστή_i [ο οποίος]_i, τραγουδούσε τζαζ
 (18) αναστροφή όρων
 α. μαϊμού εταιρία, *κλειδί λέξη
 β. τραγουδιστής - ηθοποιός

Παρά τις μορφολογικές ιδιότητες που εντοπίσαμε με τη βοήθεια των τεστ κυρίως στις δομές με σχέση εξάρτησης, δε θα μπορούσαμε να ισχυριστούμε ότι οι ονοματικοί σχηματισμοί [Ο Ο] φέρουν τον ίδιο βαθμό λεξικής ακεραιότητας που εμφανίζουν και τα χαλαρά πολυλεκτικά σύνθετα, κάτι που υποστηρίζει και η Ράλλη (2007). Πρώτη ένδειξη γι' αυτό τον ισχυρισμό αποτελεί η εν μέρει θετική ανταπόκριση ορισμένων ονοματικών σχηματισμών με σχέση εξάρτησης στο τεστ αναστροφής όρων, όπως ενδεικτικά δηλώνει το παράδειγμα *μαϊμού εταιρία* του (18α). Σε προηγούμενες μελέτες (βλ. Κολιοπούλου 2006, Κολιοπούλου 2008, 2009) διαπιστώθηκε ότι η δυνατότητα αναστροφής της σειράς των όρων απαντά στους σχηματισμούς με μη κεφαλή τις λέξεις *μαϊμού* και *φίλη*, όπως φαίνεται στα παραδείγματα του (19). Η παρατήρηση αυτή μας οδηγεί στο συμπέρασμα ότι μόνο σε περιορισμένες περιπτώσεις διαταράσσεται η δομική συνοχή των σχηματισμών, στις οποίες είναι πιθανό να παίζει ρόλο η αυξημένη συχνότητα εμφάνισης των μη κεφαλών, κυρίως όσον αφορά στη λέξη *μαϊμού*.

- (19) αυτοκίνητο μαϊμού – μαϊμού αυτοκίνητο
 χώρα φίλη – φίλη χώρα

Για τον περαιτέρω έλεγχο των μορφοσυντακτικών ιδιοτήτων των ονοματικών σχηματισμών με σχέση εξάρτησης δοκιμάζεται η δυνατότητα μεταβολής των κλιτικών χαρακτηριστικών της μη κεφαλής σε διάφορα συντακτικά περιβάλλοντα (βλ. επίσης Κολιοπούλου 2006, Κολιοπούλου 2009). Συγκεκριμένα, στο (20) ελέγχεται η μεταβλητότητα της μη κεφαλής *κλειδί* στη δομή *λέξη κλειδί*. Όπως αποδεικνύεται, η μη κεφαλή επηρεάζεται από τα κλιτικά χαρακτηριστικά της κεφαλής μόνο στην ονομαστική πληθυντικού (20β), ενώ αντίθετα στα υπόλοιπα συντακτικά περιβάλλοντα η μη κεφαλή παραμένει αμετάβλητη.

- (20) α. λέξη_{ON,EN} κλειδί_{ON,EN}
 β. λέξεις_{ON,PL} κλειδιά_{ON,PL}
 γ. λέξης_{GEN,EN} κλειδί_{ON,EN}
 δ. *λέξης_{GEN,EN} κλειδιού_{GEN,EN}
 ε. λέξεων_{GEN,PL} κλειδί_{ON,EN}
 στ. *λέξεων_{GEN,PL} κλειδιά_{ON,PL}
 ζ. *λέξεων_{GEN,PL} κλειδιών_{GEN,PL}

Συγκρίνοντας τις ονοματικές δομές με σχέση εξάρτησης με τα χαλαρά πολυλεκτικά σύνθετα [*O* *O*_{GEN}] που επίσης φέρουν την κεφαλή στα αριστερά, παρατηρεί κανείς ότι η μη κεφαλή αυτών των πολυλεκτικών συνθέτων δεν παρουσιάζει καμία δυνατότητα συντακτικής αυτονομίας. Δηλαδή, βρίσκεται πάντα σε γενική πτώση ενικού αριθμού, ανεξαρτήτως των κλιτικών χαρακτηριστικών της κεφαλής, όπως φαίνεται και στα παραδείγματα του (21). Αντίθετα, διαπιστώθηκε ότι η μη κεφαλή των ονοματικών σχηματισμών παρουσιάζει σε κάποιο βαθμό συντακτική αυτονομία, έστω και αν αυτή είναι ιδιαίτερα περιορισμένη. Η παρατήρηση αυτή στηρίζει την άποψη περί διαφοροποίησης των ονοματικών σχηματισμών από τα χαλαρά πολυλεκτικά σύνθετα, καθώς οι ονοματικοί σχηματισμοί φέρουν περισσότερα συντακτικά χαρακτηριστικά (βλ. επίσης Κολιοπούλου 2006).

- (21) Χαλαρά πολυλεκτικά σύνθετα [*O* *O*_{GEN}]

- α. άρμα_{ON,EN} μάχης_{GEN,EN}
 άρματα_{ON,PL} μάχης_{GEN,EN}
 *άρματα_{ON,PL} μαχών_{GEN,PL}
 β. οίκος_{ON,EN} ανοχής_{GEN,EN}
 οίκοι_{ON,PL} ανοχής_{GEN,EN}
 *οίκοι_{ON,PL} ανοχών_{GEN,PL}

Επιπλέον, θα πρέπει να επισημανθεί ότι οι ονοματικές δομές με σχέση εξάρτησης δεν εμφανίζουν ενιαία ανταπόκριση στα τεστ που περιγράψαμε νωρίτερα. Χαρακτηριστικό παράδειγμα αποτελεί ο σχηματισμός *νόμος πλαίσιο*, ο οποίος εμφανίζει αρνητική ανταπόκριση στα περισσότερα τεστ, όπως φαίνεται στα παραδείγματα του (22) (βλ. επίσης Κολιοπούλου 2006, Κολιοπούλου 2009). Συγκεκριμένα, σε σύγκριση με αντίστοιχους σχηματισμούς η δομή αυτή δεν επιτρέπει την αντιστροφή της σειράς των όρων, κάτι που σε άλλες περιπτώσεις είναι επιτρεπτό (βλ. παραδείγματα 18, 19). Επιπλέον, στο τεστ συντακτικής αυτονομίας της μη κεφαλής στο (22ε), η μη κεφαλή *πλαίσιο* επιδεικνύει αυτονομία σε κλιτικό περιβάλλον γενικής ενικού, όπου απαντά ως *νόμου πλαισίου*. Αντίθετα, στη δομή για παράδειγμα *λέξη κλειδί* η μη κεφαλή παρουσιάζει δυνατότητα μεταβολής των κλιτικών της χαρακτηριστικών σε περιβάλλον ονομαστικής πληθυντικού (βλ. παράδειγμα 20β).

- (22) α. προσδιοριστικό στοιχείο
 *νόμος μεγάλο πλαίσιο
 β. παρεμβολή στοιχείου
 *ο νόμος, όπως γνωρίζετε, πλαίσιο
 γ. συναναφορά
 *ο νόμος πλαίσιο, [το οποίο], περιλαμβάνει
 δ. αναστροφή όρων
 *πλαίσιο νόμος
 ε. συντακτική αυτονομία μη κεφαλής
 νόμοι_{ON,PL} πλαίσιο_{ON,EN}
 ?νόμοι_{ON,PL} πλαίσια_{ON,PL}
 νόμου_{GEN,EN} πλαίσιο_{ON,EN}
 νόμου_{GEN,EN} πλαισίου_{GEN,EN}
 νόμων_{GEN,PL} πλαίσιο_{ON,EN}

*νόμων_{GEN,ΠΑ} πλαίσίων_{GEN,ΠΑ}*νόμων_{GEN,ΠΑ} πλαισίου_{GEN,EN}

Όπως αποδεικνύεται από τα παραπάνω, οι ονοματικοί σχηματισμοί με σχέση εξάρτησης εμφανίζουν μη συστηματικότητα ανταπόκρισης στα διάφορα τεστ ελέγχου του βαθμού συντακτικής αυτονομίας που διαθέτουν. Έτσι ενισχύεται η άποψη ότι αυτές οι δομές θα πρέπει να διαχωρίζονται από τα χαλαρά πολυλεκτικά σύνθετα, τα οποία παρουσιάζουν παγιωμένες ιδιότητες αμεταβλητότητας της μη κεφαλής. Σε σχέση με τη φύση των ονοματικών αυτών σχηματισμών, οι διακυμάνσεις στα αποτελέσματα των τεστ αποδεικνύουν ότι οι μορφο-συντακτικές τους ιδιότητες δεν έχουν ακόμα αποκρυσταλλωθεί. Επομένως, υιοθετείται η άποψη της Ράλλη, η οποία υποστηρίζει ότι βρίσκονται σε στάδιο μορφολογοποίησης (morphologization) και συγκεκριμένα αποσυντακτικοποίησης (desyntacticization) με τους όρους του Joseph (2003: 473). Η διαδικασία της αποσυντακτικοποίησης σημαίνει ότι οι σχηματισμοί αυτοί χάνουν σταδιακά τη συντακτική αυτονομία που διαθέτουν και αποκτούν μορφολογικές ιδιότητες. Η ενίσχυση της εσωτερικής τους συνοχής συνάδει και με την αύξηση χρήσης αυτών των δομών, κυρίως σε περιπτώσεις ορολογίας, όπως ακριβώς συμβαίνει με το παράδειγμα *νόμος πλαίσιο*.

Η δομική ανάλυση των τριών ονοματικών μορφο-συντακτικών σχηματισμών που προηγήθηκε αποδεικνύει ότι οι μεταξύ τους διαφορές κυμαίνονται όχι μόνο ανά κατηγορία, αλλά και μεταξύ των διαφορετικών δομών της ίδιας κατηγορίας. Για παράδειγμα στις δομές [E O] και [O O_{GEN}] των χαλαρών πολυλεκτικών συνθέτων το πρώτο είδος εμφανίζει περισσότερα μορφολογικά χαρακτηριστικά από ότι το δεύτερο εφόσον συμμετέχει και στη διαδικασία της παραγωγής. Επίσης, στους ονοματικούς σχηματισμούς [O O] με σχέση εξάρτησης παρατηρείται διακύμανση ιδιοτήτων και συγκεκριμένα σταδιακή εξασθένηση των συντακτικών χαρακτηριστικών τους. Με βάση αυτό το δεδομένο δημιουργείται η ανάγκη μιας θεωρητικής πρότασης η οποία θα έχει τη δυνατότητα να αναδείξει την ποικιλία στα είδη ιδιοτήτων που παρουσιάζουν αυτοί οι σχηματισμοί.

3. Θεωρητική προσέγγιση

Μια θεωρητική πρόταση που περιλαμβάνει σχηματισμούς που μοιάζουν με φράσεις (“phrase-like units”) σε γλώσσες όπως η Ιταλική, η Κινεζική και η Νέα Εβραϊκή είναι αυτή των Gaeta και Ricca (2009), στην οποία υιοθετούν μια κλίμακα τεσσάρων επιπέδων. Τα επίπεδα διαμορφώνονται σύμφωνα με το θετικό ή αρνητικό πρόσημο των χαρακτηριστικών «μορφολογικό» και «λεξικοποιημένο⁵». Τον όρο «μορφολογικό» αποδίδουν οι ερευνητές σε δομές που προκύπτουν από μορφολογικές διαδικασίες, όπως για παράδειγμα της σύνθεσης, ενώ ο όρος «λεξικοποιημένο» αποδίδεται σε δομές, λέξεις ή φράσεις, που εμφανίζουν δομικά ή σημασιολογικά ιδιοσυγκρασιακά συστατικά και επομένως έχουν προκύψει από τη διαδικασία της λεξικοποίησης. Τα λεξικοποιημένα στοιχεία, λόγω της μη προβλέψιμης μορφής και σημασίας τους, καταχωρούνται στο λεξικό και ο βαθμός λεξικοποίησης κυμαίνεται ανάλογα με τη δυνατότητα, ή μη, που εμφανίζουν για συμμετοχή σε μορφολογικές διαδικασίες. Με βάση τα δύο αυτά χαρακτηριστικά οι Gaeta και Ricca (2009: 38) παρουσιάζουν την ακόλουθη κλίμακα.

- (23) α. [+ μορφολογικό], [+ λεξικοποιημένο]
 β. [+ μορφολογικό], [- λεξικοποιημένο]
 γ. [- μορφολογικό], [+ λεξικοποιημένο]
 δ. [- μορφολογικό], [- λεξικοποιημένο]

Στα δύο πρώτα επίπεδα εντάσσονται οι μορφολογικοί σχηματισμοί των συνθέτων με τη διαφορά ότι στο πρώτο επίπεδο (23α) οι σχηματισμοί φέρουν και κάποια ιδιοσυγκρασιακά στοιχεία, ενώ στο δεύτερο (23β) περιλαμβάνονται πολύ παραγωγικά σύνθετα, οι δομές των οποίων είναι πλήρως απαλλαγμένες από λεξικοποιημένα χαρακτηριστικά. Στο τρίτο επίπεδο (23γ) εντάσσονται σχηματισμοί που μοιάζουν με φράσεις και βρίσκονται στα όρια μορφολογίας και σύνταξης διαθέτοντας ιδιοματική σημασία και μη επιτρέποντας την παρεμβολή άλλων στοιχείων στο εσωτερικό της δομής. Τέλος, στο τέταρτο επίπεδο (23δ) περιλαμβάνονται συντακτικές φράσεις.

Υιοθετώντας αυτή την κλίμακα για τους μορφο-συντακτικούς ονοματικούς σχηματισμούς της Νέας Ελληνικής θα αντιμετώπιζε κανείς το ζήτημα της κατάταξής τους σε κάποιο από τα τέσσερα επίπεδα. Από τη δομική τους όμως ανάλυση μπορεί κανείς να συμπεράνει ότι μια θεωρητική περιγραφή απλά

⁵ Ως «λεξικοποιημένο» μεταφράζω τον όρο “lexical” που στο πλαίσιο της μελέτης των Gaeta και Ricca (2009) χρησιμοποιείται για τα λεξικοποιημένα (lexicalized) στοιχεία.

με την ύπαρξη ή μη μορφολογικών και λεξικοποιημένων στοιχείων δεν είναι ικανοποιητική για το λόγο ότι σε όλους αυτούς τους σχηματισμούς υπάρχουν και τα δύο αυτά χαρακτηριστικά, σε διαφορετικό όμως βαθμό ανά δομή, καθώς πρόκειται για ενδιάμεσες δομές. Τα χαρακτηριστικά [-μορφολογικό] και [+λεξικοποιημένο] που προτείνουν οι Gaeta και Ricca (2009) στο τρίτο επίπεδο της κλίμακας θα μπορούσαν να αποδοθούν σε άλλου είδους πολυλεκτικές φράσεις της Νέας Ελληνικής, όπως τα παραδείγματα *ούτως ή άλλως* και *πήγαινε έλα*. Όπως αναφέρει η Ράλλη (2005: 84-85) οι περιπτώσεις αυτές φέρουν ιδιωματική σημασία καθώς έχουν λεξικοποιηθεί και επομένως αποτελούν παγιωμένες εκφράσεις. Οι δομές όμως αυτές δε θα μπορούσαν να χαρακτηριστούν ως ενδιάμεσες, εφόσον δε φέρουν μορφολογικά χαρακτηριστικά. Επομένως, δημιουργείται η ανάγκη ανεύρεσης μιας θεωρητικής πρότασης που θα πληροί όλες τις περιπτώσεις αλληλεπίδρασης μορφο-συντακτικών χαρακτηριστικών που διαπιστώσαμε στις υπό εξέταση ονοματικές δομές της Νέας Ελληνικής.

Για την πληρέστερη κάλυψη όλων των εκφράσεων του φαινομένου συνύπαρξης μορφο-συντακτικών χαρακτηριστικών υιοθετείται η έννοια ενός συνεχούς, το οποίο έχει αναφερθεί και σε προηγούμενες μελέτες (βλ. Ράλλη 2007, Κολιοπούλου 2006). Η έννοια του συνεχούς εντάσσεται στο πλαίσιο μιας γραμμικής διάταξης μορφολογίας - σύνταξης, με τη μορφολογία να προηγείται της σύνταξης, όπως υποστηρίζει ο Kirarsky (1982). Η ασαφής οριοθέτηση των δύο τομέων δικαιολογεί τη διάχυση μορφο-συντακτικών ιδιοτήτων. Συγκεκριμένα, στο πλαίσιο ενός συνεχούς μεταξύ μορφολογίας και σύνταξης τα τρία είδη ενδιάμεσων ονοματικών δομών διατάσσονται σύμφωνα με το πλήθος των μορφολογικών και συντακτικών τους χαρακτηριστικών. Ορίζοντας ως άκρα αυτού του συνεχούς τα μονολεκτικά σύνθετα και τις ονοματικές φράσεις, τα χαλαρά πολυλεκτικά σύνθετα τοποθετούνται εγγύτερα στον τομέα της μορφολογίας, ενώ οι ειδικές ονοματικές φράσεις και οι ονοματικοί σχηματισμοί απαντούν πλησιέστερα προς τη σύνταξη. Με βάση την ανάλυση των ιδιοτήτων που προηγήθηκε προκύπτει η ακόλουθη διάταξη:

(24)

<div style="display: flex; flex-direction: column; align-items: center;"> <div>ΜΟΡΦΟΛΟΓΙΑ</div> <div style="margin: 10px 0;"> <div style="width: 20px; height: 20px; border: 1px solid black; margin: 0 auto;"></div> <div style="width: 2px; height: 50px; background: linear-gradient(to top, transparent 49%, black 49%, black 51%, transparent 51%); margin: 0 auto;"></div> <div style="width: 20px; height: 20px; border: 1px solid black; margin: 0 auto;"></div> </div> <div>ΣΥΝΤΑΞΗ</div> </div>	μονολεκτικά σύνθετα
	<i>χαλαρά πολυλεκτικά σύνθετα [E O]</i>
	<i>χαλαρά πολυλεκτικά σύνθετα [O O_{GEN}]</i>
	<i>ονοματικοί σχηματισμοί [O O] με σχέση εξάρτησης</i>
	<i>ονοματικοί σχηματισμοί [O O] με σχέση παράθεσης</i>
	<i>ειδικές ονοματικές φράσεις</i>
	ονοματικές φράσεις

4. Συμπεράσματα

Η παρούσα έρευνα συνοψίζει όλα τα είδη ενδιάμεσων ονοματικών σχηματισμών που απαντούν στη Νέα Ελληνική. Η ανάλυση των ιδιοτήτων αυτών των σχηματισμών επιβεβαιώνει αφενός τη συνύπαρξη μορφο-συντακτικών χαρακτηριστικών, αφετέρου τη διάκριση μεταξύ τριών κατηγοριών, όπως έχει ήδη προταθεί στη σχετική βιβλιογραφία. Επιπλέον, η ανάλυση στην παρούσα έρευνα αποδεικνύει ότι ακόμα και τα διαφορετικά είδη δομών μίας κατηγορίας εμφανίζουν διακύμανση μορφο-συντακτικών συντακτικών. Δηλαδή, ο βαθμός δομικής συνοχής που επιδεικνύουν αυτοί οι σχηματισμοί ποικίλει όχι μόνο ανά κατηγορία αλλά και ανάμεσα στα διαφορετικά είδη δομών που ανήκουν στην ίδια κατηγορία. Μάλιστα, σε ένα συγκεκριμένο είδος, αυτό των ονοματικών σχηματισμών [O O] με σχέση εξάρτησης, η διακύμανση της εσωτερικής συνοχής παρατηρείται και μεταξύ των διαφορετικών παραδειγμάτων, καθώς, όπως έχει υποστηριχθεί, πρόκειται για μια περίπτωση σχηματισμών που βρίσκεται σε διαδικασία μορφολογοποίησης. Με δεδομένο αφενός τη συνύπαρξη μορφο-συντακτικών χαρακτηριστικών και αφετέρου την έντονη διακύμανσή τους επιχειρώ τη θεωρητική τους ανάλυση με βάση την πρόταση των Gaeta και Ricca (2009) που υποστηρίζουν για αντίστοιχες δομές της Ιταλικής, της Κινεζικής και της Νέας Εβραϊκής. Διαπιστώνω όμως ότι είναι ανεπαρκής για τα δεδομένα της Νέας Ελληνικής και έτσι υποστηρίζω και στην παρούσα μελέτη την υιοθέτηση ενός συνεχούς μεταξύ μορφολογίας και σύνταξης στο οποίο διατάσσω με ακρίβεια τους υπό εξέταση σχηματισμούς, σύμφωνα με τις ιδιότητές τους.

ΠΕΡΙΛΗΨΗ

Recently, several TV commercials use dialects (Cretan and Pontiac dialect), as well as Provincial Greek (Epirus, Thessaly, and Central Greece's language systems) to advertise products within the Greek market. In these TV commercials it is noted that at times the advertisers opt to subtitle these language systems in Modern Greek while at others they do not. This paper intends to examine whether this choice of, in essence, intralingual translation carries some semiotic dimensions that they will help us to understand not only the position, but also the connotative value these language systems have within the context of everyday life. This study shows that classifying language variety as dialect or accent does not seem to influence the subtitling of the dialect systems under scrutiny. Moreover, subtitling seems to be used as a linguistic tool to understand the signified, but also as a semiotic practice to disseminate targeted positive connotations through TV commercials.

Λέξεις κλειδιά: intralingual translation, subtitling, advertisement, Greek dialects and accents.

1. Εισαγωγή

Τα τελευταία χρόνια, πολλές τηλεοπτικές διαφημίσεις χρησιμοποιούν διαλεκτικά συστήματα της ελληνικής για να διαφημίσουν τα προϊόντα τους στην ελληνική αγορά. Η επιλογή αυτή φαίνεται ενδιαφέρουσα εάν λάβουμε υπόψη ότι δεν χρησιμοποιείται η πρότυπη γλώσσα, η Κοινή Νεοελληνική, αλλά διαλεκτικά συστήματα η γνώση των οποίων δεν είναι γενικευμένη, γεγονός που περιορίζει το κοινό στο οποίο απευθύνονται τα συγκεκριμένα διαφημιστικά μηνύματα. Για τη μελέτη αυτού του φαινομένου επιλέξαμε πέντε τηλεοπτικά διαφημιστικά μηνύματα που χρησιμοποιούν γλωσσικά συστήματα από την Ήπειρο, τον Πόντο και την Κρήτη. Η μεθοδολογική προσέγγιση συνίσταται στη συγκριτική αντιπαραβολή τους σε μία προσπάθεια να αποσαφηνίσουμε δύο στοιχεία. Το πρώτο στοιχείο έχει να κάνει με το λόγο για τον οποίο τηλεοπτικά διαφημιστικά μηνύματα που χρησιμοποιούν την ίδια γλωσσική ποικιλία, άλλη φορά υποτιτλίζονται και άλλη φορά όχι (όπως για παράδειγμα συμβαίνει στην περίπτωση των διαφημιστικών μηνυμάτων που χρησιμοποιούν τα γλωσσικά συστήματα της Ηπείρου και της Κρήτης). Συνάμα, εξετάζουμε εάν η επιλογή αυτής της ενδογλωσσικής - στην ουσία - μετάφρασης έχει κάποια σημειωτική διάσταση που θα μας βοηθήσει να κατανοήσουμε, όχι μόνο τη θέση, αλλά και τη συνδηλωτική αξία που έχουν τα συγκεκριμένα διαλεκτικά συστήματα της Ελληνικής στην ελληνική καθημερινότητα. Το δεύτερο στοιχείο που επιδιώκουμε να αποσαφηνίσουμε έχει να κάνει με το κατά πόσο ο υποτιτλισμός επηρεάζεται από την κατηγοριοποίηση ενός διαλεκτικού συστήματος ως *διαλέκτου* ή *ιδιώματος*.

Ειδικά, για το δεύτερο αυτό θέμα, αξίζει να σημειώσουμε ότι η διάκριση αυτή δεν είναι παγιωμένη. Αρκετοί ερευνητές, όπως ο Trudgill (2003: 49), θεωρούν ως διαλέκτους της ελληνικής την Ποντιακή, τα Τσακωνικά, τα Ελληνικά της Κάτω Ιταλίας και την Καπαδοκική, κατηγοριοποιώντας όλα τα υπόλοιπα νεοελληνικά γλωσσικά συστήματα ως ιδιώματα¹. Στην καθημερινή πρακτική, όμως, διαλέκτους αποκαλούν και τις γλωσσικές ποικιλίες της Κρήτης, της Κύπρου και των Επτανήσων,

¹ Άλλοι ερευνητές προσθέτουν και άλλες γλωσσικές ποικιλίες στην κατηγορία της διαλέκτου (βλ. Trudgill, 2003: 50).

καθώς υιοθετείται η θέση ότι η διάλεκτος έχει γραπτή μορφή στην οποία έχουν γραφεί σημαντικά πνευματικά έργα και χαρακτηρίζεται από σημαντική απόκλιση σε επίπεδο λεξιλογίου σε σχέση με την πρότυπη γλώσσα. Έτσι, ο Μπασλής (2000: 38) αναφέρει ότι “στη συνείδηση του Έλληνα *διάλεκτος* είναι ένα γεωγραφικό γλωσσικό ιδίωμα, όπως π.χ. το Κρητικό, Κυπριακό, Ποντιακό, κτλ. που μιλιέται δηλαδή από τους Έλληνες μίας ορισμένης γεωγραφικής περιοχής”. Για την διάκριση των όρων *διάλεκτος* και *ιδίωμα* στην παρούσα έρευνα υιοθετείται η θέση ότι ως *τοπικό ιδίωμα* χαρακτηρίζεται η ποικιλία με μικρό αριθμό αποκλίσεων, οι οποίες πολλές φορές περιορίζονται στο επίπεδο της φωνητικής και του λεξιλογίου, ενώ ως *διάλεκτος* χαρακτηρίζεται η γεωγραφική ποικιλία με μεγαλύτερο βαθμό διαφοροποίησης ή και μία ομάδα τοπικών ιδιωμάτων (Κοντονάτσου 1994: 36, Δελβερούδη, 2001: 54, Αρχάκης & Κονδύλη 2002: 58, κ.ά.)

2. Η σημειωτική και γλωσσική διάσταση του υποτιτλισμού

Ο υποτιτλισμός ορίζεται ως η μεταφραστική πρακτική κατά την οποία η μετάφραση εμφανίζεται σε γραπτή μορφή στο κάτω μέρος της οθόνης (Diaz Cintas & Remael, 2007: 8). Ως κύρια χαρακτηριστικά του υποτιτλισμού ο Gottlieb (1994: 269) αναφέρει το γεγονός ότι υπάρχει επαρκής χρόνος για τη μετάφραση και τη δημιουργία υποτίτλων πριν από την προβολή τους στο κοινό, ο προσωρινός και παροδικός τους χαρακτήρας καθώς εμφανίζονται στιγμιαία στην οθόνη, η προσβασιμότητα στο πρωτότυπο που επιτυγχάνεται κατά τη διάρκεια προβολής της μετάφρασης στην οθόνη, το γεγονός ότι ο υπότιτλος είναι συμπτυγμένη μετάφραση οι αποδέκτες της οποίας δεν είναι γνωστοί στον υποτιτλιστή, καθώς και ότι δεν υπάρχει η δυνατότητα αμφίδρομης επικοινωνίας.

Ο υποτιτλισμός, όμως, δεν είναι μία απλή μορφή μετάφρασης, αλλά έχει έντονο σημειωτικό χαρακτήρα. Έτσι, μελετητές του υποτιτλισμού όπως οι Gottlieb (1994: 269) και Pérez González (2009: 14) θεωρούν τον υποτιτλισμό ως ένα διασημειωτικό είδος μετάφρασης² λόγω της αλλαγής που παρατηρείται από τον προφορικό στο γραπτό κώδικα. Το σημειωτικό χαρακτήρα του υποτιτλισμού υπογραμμίζει και ο Munday (2009: 6) που παρατηρεί ότι ο υποτιτλισμός είτε είναι ενδογλωσσικός, είτε διαγλωσσικός, αποτελεί επίσης και μία μορφή διασημειωτικής μετάφρασης, η αντικατάσταση ενός γλωσσικού κώδικα πηγή με ένα κείμενο στόχο που γράφεται σε ένα γλωσσικό κώδικα που συνοδεύεται με άλλα οπτικά και ακουστικά σημεία. Για το λόγο αυτό και, όπως θα δούμε στη συνέχεια, στις περιπτώσεις υποτιτλισμού που μελετούμε σημαντική είναι η συνδρομή και των μη γλωσσικών σημειωτικών συστημάτων στην επιτυχία του διαφημιστικού μηνύματος.

Το γεγονός, όμως, ότι ο γλωσσικός κώδικας συνοδεύεται και από μη γλωσσικά σημεία, δεν παραγνωρίζει ένα άλλο γεγονός: ο υποτιτλισμός αποτελεί κατά βάση μία γλωσσική πράξη. Στα τηλεοπτικά διαφημιστικά μηνύματα που θα εξετάσουμε παρακάτω θα διαπιστώσουμε, όμως, μία ιδιαιτερότητα στην λειτουργία του. Οι υπότιτλοι δεν αποδίδουν μία ξένη γλώσσα στην Κοινή Νεοελληνική, δεν λειτουργούν, δηλαδή, διαγλωσσικά, αλλά ενδογλωσσικά. Ο Jakobson (2004 [1959]: 139) χαρακτηρίζει ως *ενδογλωσσική μετάφραση* ή *αναδιατύπωση* “την ερμηνεία γλωσσικών σημείων με άλλα σημεία της ίδιας γλώσσας”. Κατά τη γνώμη μας, στις περιπτώσεις που θα εξετάσουμε στη συνέχεια, μπορούμε να κάνουμε λόγο για ενδογλωσσική μετάφραση ή, ακριβέστερα, για ενδογλωσσικό υποτιτλισμό, καθώς τα διαλεκτικά συστήματα που υποτιτλίζονται στην Κοινή Νεοελληνική αποτελούν γεωγραφικές ποικιλίες της ελληνικής γλώσσας (κρητική διάλεκτος, ποντιακή διάλεκτος, ηπειρώτικο ιδίωμα). Καθώς, λοιπόν, παραμένουμε στο ίδιο γλωσσικό σύστημα, στην ελληνική γλώσσα, το ερώτημα που τίθεται συνακόλουθα είναι ποιος είναι ο λόγος της επιλογής αυτών των γλωσσικών συστημάτων στα διαφημιστικά μηνύματα και ποιος είναι ο λόγος που κάποιες φορές υποτιτλίζονται³. Θεωρούμε ότι η απάντηση έγκειται στο γεγονός ότι ο θεατής στην περίπτωση αυτή έχει ταυτόχρονα πρόσβαση στο πρωτότυπο κείμενο. Έτσι, όμως, προκύπτει ένα νέο ερώτημα: γιατί ο θεατής πρέπει να έχει πρόσβαση στο πρωτότυπο κείμενο;

² Είναι ενδιαφέρον ότι οι Delisle, Lee-Jahnke & Cormier (2008: 92) αφήνουν εκτός της μεταφραστικής διαδικασίας την περίπτωση της διασημειωτικής μετάφρασης χαρακτηρίζοντας ως *μετάφραση* μόνο την ενδογλωσσική και τη διαγλωσσική διεργασία.

³ Ο Peeters (1999: 188) παρατηρεί ότι “ο διαλεκτισμός της γλώσσας βρίσκεται στην καρδιά της μετάφρασης”.

3. Διαλεκτικά συστήματα και υποτιτλισμός στον κινηματογράφο και στην τηλεόραση

Πριν απαντήσουμε στο ερώτημα που μόλις θέσαμε, έχει ενδιαφέρον να εξετάσουμε εάν η χρήση διαλεκτικών συστημάτων, και πολύ περισσότερο ο υποτιτλισμός τους, αποτελεί μία καινούργια ή μία παλιά πρακτική στα ΜΜΕ. Η γλώσσα των ΜΜΕ απασχόλησε και απασχολεί τους μελέτες σε διαφορετικές εποχές, καθώς “η γλώσσα των ΜΜΕ είναι *ένοχη*, αφού σε συγκεκριμένες χρήσεις της εμπεριέχεται ιδεολογία, δηλαδή ρητή ή (συνήθως) υπόρρητη αναπαράσταση αντικρουόμενων κοσμοειδώλων” (Πολίτης, 2001: 119). Το φαινόμενο της χρήσης διαλεκτικών ποικιλιών της Ελληνικής στα ΜΜΕ δεν είναι καινούργιο και μπορούμε να ισχυριστούμε ότι εμφορείται με ιδεολογία. Ο Κοντοσόπουλος (1985: 70) αναφέρει ότι “οι διάλεκτοι και τα ιδιώματα και γενικά ο τρόπος ομιλίας των επαρχιωτών έδωσαν γραφή στην πέννα των δημοσιογράφων, των λαογράφων και άλλων λογίων της επαρχίας, για να δημοσιεύσουν διαλεκτικά κείμενα με χαρακτήρα χιουμοριστικό και σατυρικό συνήθως στον τοπικό τύπο”. Η περίπτωση, όμως, του κινηματογράφου και της τηλεόρασης είναι πολύ διαφορετική, καθώς, ειδικά η τηλεόραση, αποτελεί μέρος της ανθρώπινης καθημερινότητας, και, όχι, συνειδητή και επιλεκτική επιλογή όπως ο τύπος. Επίσης, τόσο ο κινηματογράφος στην αρχή, όσο και η τηλεόραση αργότερα, έχουν ένα σημαντικό πλεονέκτημα: την εικόνα.

Από τη δεκαετία του '60 μέχρι και τη δεκαετία του '80, αρκετοί ηθοποιοί χρησιμοποίησαν στον κινηματογράφο, και μετέπειτα στην τηλεόραση, διαλεκτικά συστήματα της ελληνικής (Κώστας Χατζηρήστος, Σπύρος Καλογήρου, Άννα Βαγενά, Κώστας Βουτσάς, Λάκης Λαζόπουλος, κ.ά.). Κατά την περίοδο αυτή, διαλεκτικά γλωσσικά συστήματα - κυρίως η επαρχιακή ελληνική - χρησιμοποιήθηκαν με χιουμοριστικό τρόπο για να εκφράσουν γλωσσο-εικονικά μια περιθωριοποιημένη κοινωνικά τάξη, αυτή των *Βλάχων*, δηλαδή, των αμόρφωτων και κακόγουστων επαρχιωτών, των μη αστών, ενώ η επαρχιακή ελληνική ταυτίστηκε με τα βόρεια ιδιώματα⁴.

Στη δεκαετία του '90, όμως, παρατηρήθηκε μία αλλαγή καθώς έκαναν την εμφάνισή τους τηλεοπτικές σειρές, όπως, παραδείγματος χάριν, η τηλεοπτική σειρά «Εμείς και Εμείς» (σε σκηνοθεσία Π. Αμαραντίδη και Σ. Μεταλληνού), όπου η ηθοποιός Νατάσα Γερασιμίδου υποδύεται την ομογενή ποντιακής καταγωγής από το Κιλκίς. Στη περίπτωση αυτή, και για πρώτη φορά, όταν η ηθοποιός ομιλεί στην ποντιακή διάλεκτο, υπάρχει υποτιτλισμός στην Κοινή Νεοελληνική! Κατά τη γνώμη μας, ο υποτιτλισμός δικαιολογείται από τα εκτεταμένα τμήματα λόγου στην ποντιακή διάλεκτο, καθώς για αρκετά λεπτά ο τηλεθεατής που δεν γνωρίζει τη διάλεκτο δεν μπορεί να καταλάβει τι λέγεται. Επίσης, με τον υποτιτλισμό επιχειρείται να δοθεί από τους συντελεστές της εκπομπής έμφαση σε ένα κοινωνικό γεγονός, αυτό του δεύτερου κύματος, μετά το 1920, μετανάστευσης Ποντίων στην Ελλάδα, που συντελούνταν κατά τη διάρκεια προβολής της σειράς. Αξίζει να σημειωθεί ότι τα τμήματα λόγου στην ποντιακή διάλεκτο υποτιτλίζονται όταν η ηθοποιός φέρεται να ομιλεί τη διάλεκτο με άλλους ηθοποιούς που υποδύονται, επίσης, Ποντίους.

Η χρήση διαλεκτικών συστημάτων του ελλαδικού χώρου συνεχίστηκε και στην επόμενη δεκαετία, χωρίς πάντα αυτά να υποτιτλίζονται. Έτσι, στην τηλεοπτική σειρά «Επτά θανάσιμες πεθερές» (σε σκηνοθεσία Γρηγόρη Πετρινιώτη), μονολόγι εμφανίζονται πολύ τύποι Ελληνίδων πεθερών⁵, δεν υποτιτλίζονται τα τμήματα λόγου σε διαλεκτική ποικιλία, όπως συμβαίνει σε άλλες τηλεοπτικές σειρές όπου εμφανίζονται διαλεκτόφωνοι. Οι Στάμου & Ντίνας (2011: 301) παρατηρούν για το θέμα αυτό ότι στις σειρές αυτές “η γεωγραφική προέλευση παρουσιάστηκε ως δυναμικό και όχι ως πάγιο χαρακτηριστικό της ταυτότητας των ομιλητών (συχνή εναλλαγή μεταξύ γεωγραφικής και πρότυπης ποικιλίας), δίνοντας τη θετική εντύπωση ότι οι ομιλητές αυτοί είναι ευέλικτοι και όχι μονολιθικοί”. Αντίθετα, στην τηλεοπτική σειρά «Τύχη βουνό» (σε σκηνοθεσία Δημήτρη Αρβανίτη), σε κάποια σημεία υποτιτλίστηκε η ποντιακή διάλεκτος, ώστε να είναι κατανοητή από τον τηλεθεατή-ομιλητή της πρότυπης γλώσσας.

Σε όλες αυτές τις περιπτώσεις η χρήση του διαλεκτικού συστήματος συνοδεύεται και από τη χρήση και άλλων ενδεικτών ταυτότητας, γλωσσικών και μη γλωσσικών. Στους γλωσσικούς δείκτες ανήκουν τα ονόματα των πρωταγωνιστών και τα τοπωνύμια, στους μη γλωσσικούς, η ένδυση, το μακιγιάζ, η κόμμωση, τα εξαρτήματα και η κινητική των διαλεκτόφωνων⁶. Στο θέμα της ταυτότητας εστιάζουν και οι Στάμου & Ντίνας (2011) που μελέτησαν έξι τηλεοπτικές σειρές στις οποίες γινόταν χρήση κάποιας

⁴ Ο Μπασλής (2000: 131) αναφέρει ότι “όταν ένας ηθοποιός π.χ. στην επιθεώρηση, υποδύεται το ρόλο ενός αγράμματος χωριάτη, χρησιμοποιεί το βόρειο γλωσσικό ιδίωμα, κι αν ακόμη υποτίθεται ότι ο χωριάτης είναι από τη Γαστούνη, και είναι φυσικό να μην έχει καμία σχέση με το βόρειο ιδίωμα”. Βλέπε και Κουρδής (2007: 34-38).

⁵ Για παράδειγμα, η Πολίτισσα πεθερά, η Κρητικιά πεθερά, η Θεσσαλονικιά πεθερά, η Μανιάτισσα πεθερά, κ.ά.

⁶ Οι Andersson & Trudgill (1990: 79) επισημαίνουν ότι η γλώσσα ως κώδικας, όπως και ο τρόπος ένδυσης, μπορεί να λειτουργεί ως εισητήριο στην ομάδα ή, αντίθετα, να είναι κριτήριο αποκλεισμού από αυτή.

γεωγραφικής ποικιλίας κατά την περίοδο 2006-2007. Οι δύο ερευνητές (2011: 303) κατέληξαν στο συμπέρασμα ότι “η τηλεοπτική αναπαράσταση των γεωγραφικών ποικιλιών της ελληνικής γλώσσας μέσα από τον επιλεκτικό χειρισμό του γλωσσικού της πλούτου αποκαλύπτει τον ιδεολογικό ρόλο των ΜΜΕ στη συγκρότηση μιας κοινής εθνικής ταυτότητας”. Αξίζει να δούμε στη συνέχεια μέσα από τη μελέτη των τηλεοπτικών διαφημιστικών μηνυμάτων πως ξεδιπλώνεται αυτός ο ιδεολογικός ρόλος της τηλεόρασης αναφορικά με τα διαλεκτικά συστήματα της ελληνικής.

4. Διαφημιστικά μηνύματα στο ιδίωμα της Ηπείρου

Η πρώτη τηλεοπτική διαφήμιση (διαφημιστικό μήνυμα 1) που μελετούμε είναι των Αλλαντικών ΒΙΚΗ (Βιομηχανία Κρέατος Ηπείρου). Η εταιρεία που έχει έδρα στην Άρτα πολύ συχνά χρησιμοποιεί τοπία και ντοπιολαλιές (προφορές) της περιοχής σε μία προσπάθεια να συνδηλώσει την αγνότητα και την ποιότητα των προϊόντων της. Στο συγκεκριμένο διαφημιστικό μήνυμα υποτιτλίζεται το τμήμα λόγου που εκφωνείται στο ηπειρώτικο ιδίωμα και που κατατάσσεται στα λεγόμενα βόρεια ιδιώματα⁷.

Η σκηνή εκτυλίσσεται στην πλατεία ενός γραφικού χωριού (στο τέλος της διαφήμισης προχωρούμε στην υπόθεση ότι πρόκειται για ένα χωριό της Ηπείρου). Σε αντίθεση με άλλα διαφημιστικά μηνύματα της εταιρείας όπου ο πρωταγωνιστής ομιλεί αποκλειστικά στο ιδίωμα της Ηπείρου - προτού ο εκφωνητής χρησιμοποιήσει στο κλείσιμό του μηνύματος την πρότυπη ποικιλία - στο συγκεκριμένο διαφημιστικό μήνυμα κυριαρχεί ο διάλογος. Ο διάλογος αυτός φέρεται να πραγματοποιείται ανάμεσα σε ένα νεότερο πρωταγωνιστή που ομιλεί την πρότυπη ποικιλία και σε ένα μεγαλύτερο σε ηλικία που φέρεται να είναι θείο του και να ομιλεί το τοπικό ιδίωμα της Ηπείρου.

Διαφημιστικό μήνυμα 1 Τηλεοπτική διαφήμιση αλλαντικών ΒΙΚΗ

Η επιλογή αυτή της προβολής της συγγενικής σχέσης θεωρούμε ότι δεν είναι τυχαία, αλλά ότι συνδηλώνει την ελληνική πραγματικότητα, όπου οι νεότεροι σε ηλικία διαμένουν μόνιμα στα αστικά κέντρα και δεν κατανοούν μεγάλο μέρος από τα τοπικά ιδιώματα, ακόμη και εκείνο της περιοχής από την οποία έλκουν την καταγωγή τους. Κατά τη ροή της διαφήμισης ο ανιψιός που χρησιμοποιεί την πρότυπη γλώσσα ερωτά έναν από τους συνομιλητές του για τη σημασία της λέξης «θεραπευτήκα». Η μετάφραση της λέξης δίνεται ενδογλωσσικά μέσα από τον υποτιτλισμό ως «ευχαριστήθ'κα». Αλλά και στη συνέχεια, ο εκφωνητής της διαφήμισης προχωρά στο τέλος και προφορικά σε ενδογλωσσική μετάφραση λέγοντας ότι «στην Ήπειρο *θεραπευτήκα* σημαίνει *ευχαριστήθηκα*». Οι de Linde & Kay (1999: 13) αναφέρουν ότι “όταν οι προφορές [...] συμβάλλουν στην κατανόηση της ταινίας από τους θεατές πρέπει να εμφανίζονται σε υπότιτλους”⁸. Στην προκειμένη περίπτωση πιστεύουμε ότι εάν οι

⁷ Με τον όρο βόρειοι διάλεκτοι (ή βόρεια νεοελληνικά ιδιώματα) εννοείται η παραλλαγή της Νέας Ελληνικής που χρησιμοποιείται και ακούγεται από τη βόρεια ακτή του κορινθιακού κόλπου ως τα βόρεια σύνορα της ελληνικής επικράτειας, αλλά και σε ένα τμήμα της Άνδρου και της Τήνου (εξαιρείται ένα μικρό μέρος της Μακεδονίας και ο νομός Θεσπρωτίας (Συμεωνίδης, 1977: 94).

⁸ Για το λόγο αυτό και η αγγλική ταινία «Trainspotting» όπου ο ηθοποιός μιλάει αγγλικά με σκοτσέζικη προφορά, διανεμήθηκε με υπότιτλους στις ΗΠΑ (Anderman & Rogers, 2003:203).

διαφημιστές δεν προχωρούσαν σε υποτιτλισμό του εκφωνήματος στο ιδίωμα της Ηπείρου θα δημιουργούνταν, έστω και στιγμιαία, πρόβλημα στην κατανόηση της διαφήμισης, μέχρι ο εκφωνητής να επαναλάβει τη σημασία της λέξης στο κλείσιμο του τηλεοπτικού μηνύματος (βλέπε παρακάτω):

Διάλογος	Εκφωνητής
<ul style="list-style-type: none"> - Θείε μου ! Τι κάνεις θείε μου. - Ααα ! Θεραπεύ'κα. - Τι ; Θερα..., τι; - Θεραπεύ'κα, λέω. - Δεν καταλαβαίνω εγώ, πως το είπες; - Θε-ρα-πεύ'-κα. - Είδες τι έπαθες για να μη τρως υγιεινά όπως εγώ ! - Τι έπαθα; - Κουφάθηκες ! 	<p>Στην Ήπειρο, <i>θεραπεύ'κα</i> σημαίνει <i>φ'χαριστήθηκα</i>. Αλλαντικά Ωμέγα από τη ΒΙΚΗ. Πλούσια στα ευεργετικά πολυακόρεστα λιπαρά Ωμέγα 3 και Ωμέγα Ε. Και πλούσια γεύση για να τα απολαμβάνετε ... με την καρδιά σας. ΒΙΚΗ από την Ήπειρο. Ας φάμε σαν άλλοτε.</p>

Αξίζει να σημειώσουμε ότι κατά τη διάρκεια του υποτιτλισμού στην οθόνη εμφανίζεται ένα πρόσωπο που ταυτοποιείται από τον τηλεθεατή ως ο ντόπιος Ηπειρώτης θεός του ερωτώμενου, ενώ κατά τη διάρκεια της επεξήγησης που δίνει ο εκφωνητής εμφανίζονται στην οθόνη προϊόντα των αλλαντικών ΒΙΚΗ. Επίσης, η έκφραση του εκφωνητή «... για να τα απολαύσετε ... με την καρδιά σας» δεν έχει μόνο δηλωτική, αλλά και συνδηλωτική σημασία, καθώς δεν σημαίνει μόνο ότι όσοι δοκιμάσουν το προϊόν θα το απολαύσουν, αλλά και ότι λόγω των ευεργετικών πολυακόρεστων λιπαρών θα είναι υγιείς, χωρίς καρδιακά προβλήματα.

Ο υποτιτλισμός, όμως, εκφωνημάτων του ιδιώματος της Ηπείρου, σε διαφημιστικά μηνύματα δεν υιοθετείται πάντα. Σε τηλεοπτική διαφήμιση της Εταιρείας Sanofi Aventis που προωθεί το φαρμακευτικό σκεύασμα Maalox εμφανίζονται δύο άνδρες από την Ήπειρο⁹ οι οποίοι τραγουδούν τοπικά τραγούδια της περιοχής σε ένα γάμο (διαφημιστικό μήνυμα 2). Η εικόνα που προβάλλεται είναι οικεία στους τηλεθεατές και αποσκοπεί στο να ενεργοποιήσει συνδηλωτικά θετικά συναισθήματα για ένα ευχάριστο γεγονός που εορτάζεται με παραδοσιακό τρόπο. Εντούτοις, οι διαφημιστές δεν επέλεξαν να υποτιτλίσουν τα λόγια του τραγουδιού που είναι στο τοπικό ιδίωμα (ο δεύτερος μουσικός εμφανίζεται να παίζει μόνο το μουσικό όργανο και οι παρεμβάσεις του γίνονται στην πρότυπη γλώσσα), το οποίο έχει ως εξής:

πρώτος μουσικός (τραγουδί)	δεύτερος μουσικός
Δε μπορώ Δημήτρη 'μ, δε μπορώ έχω βάρος, πως να σηκωθώ.	-
-	Το βλέπω !
Λέτε να φταίει, τόσο αρνί, ή αυτή η κοντούλα, η Πάργιανη	-
-	Σύρτε φέρτε ένα Maalox βρε παιδιά.
Μάλλον το αρνί θα φταίει.	-
-	Ε, βέβαια

Η επιλογή αυτή των διαφημιστών φαίνεται να υπακούει στη λογική ότι τα εκφωνήματα που χρησιμοποιούνται στη διαφήμιση δεν αποκλίνουν πολύ από την πρότυπη γλώσσα, άρα δεν δημιουργείται κάποιο στιγμιαίο κενό στην κατανόησή τους¹⁰. Αξίζει, όμως να υπογραμμίσουμε ότι στην τηλεοπτική διαφήμιση της εταιρείας ΒΙΚΗ, οι θετικές συνδηλώσεις που δομούνται με τα μη γλωσσικά σημεία θα ήταν ελλιπείς χωρίς το γλωσσικό σύστημα. Για αυτό το λόγο και όλη η διαφήμιση δομείται γύρω από το γλωσσικό σύστημα (μιλάμε τη γλώσσα των παππούδων μας, άρα παράγουμε και τα προϊόντα με αγνό τρόπο όπως οι παππούδες μας) και αυτό το σκοπό εξυπηρετεί εμφατικά και ο υποτιτλισμός του. Στην περίπτωση του φαρμακευτικού σκευάσματος Maalox, όμως, το γλωσσικό

⁹ Βλ. και <http://www.marketingweek.gr/default.asp?pid=9&la=1&cID=&arId=29789&remind=5>.

¹⁰ Αντίθετα, σε τηλεοπτική διαφήμιση της ίδιας εταιρείας, αλλά αυτή τη φορά με πρωταγωνιστές δύο Πόντιους μουσικούς, οι διαφημιστές προχώρησαν στον υποτιτλισμό του ποντιακού τραγουδιού, καθώς ο σκοπός που προαναφέρθηκε δεν φαινόταν δυνατό να επιτευχθεί.

σύστημα έρχεται ως επιστέγασμα μίας σειράς θετικών συνδηλωτικών σημείων που είχαν ήδη αποκωδικοποιηθεί και ερμηνευτεί (γάμος με παραδοσιακά όργανα στην ηπειρωτική Ελλάδα), μην αποτελώντας, έτσι, το γλωσσικό σύστημα το σημείο εκκίνησης αυτής της αποκωδικοποίησης, ή αλλιώς, το κεντρικό σημείο.

Διαφημιστικό μήνυμα 2 Τηλεοπτική διαφήμιση της Sanofi Aventis

5. Διαφημιστικό μήνυμα στην ποντιακή διάλεκτο

Το τρίτο διαφημιστικό μήνυμα προωθεί στην αγορά μία κούκλα της Εταιρίας AS που αναπαριστά έναν Πόντιο που το ένα μάτι του καλύπτεται από μία κορδέλα (διαφημιστικό μήνυμα 3). Ο ηθοποιός που πρωταγωνιστεί είναι ο γνωστός ηθοποιός ποντιακής καταγωγής Παύλος Κοντογιαννίδης, ο οποίος στέκεται ακίνητος¹¹ κρατώντας αυτή την κούκλα (σημείο προξικμότηας), ενώ την ίδια στιγμή ο τηλεθεατής ακούει ένα τραγούδι με ποντιακό στίχο. Πιο συγκεκριμένα, τα εκφωνήματα στο διαφημιστικό μήνυμα και ο υποτιτλισμός τους έχουν ως εξής:

Διάλογος στα ποντιακά

- Νε πες, ποιος είσαι;
- Πόντιος και έναν ομμάτ.
- Αδά τερέν αβούτοι. Θα παλανόνε μας. Ουι ...!
- Καλατζεύβν' και λέει αστεία. Τραγώδι πα.
- Πόντιος είμαι σκυρός σεβνταλής και παλαλός.
- Μπιούτιφουλ. Πόντιος και έναν ομμάτ. Από την AS. Να μην ξεχνάμε και τις ρίζες.

Υποτιτλισμός στην ΚΝΕ

- Εσύ ποιος είσαι;
-
- Κοίτα εδώ ! Αυτοί θα μας τρελάνουν !
- Μιλάει και λέει αστεία σαν και εμένα !
- Τραγουδάει κιόλας !
-
- ...Έμορφα !!!

Αξίζει να σημειώσουμε ότι στο συγκεκριμένο διαφημιστικό μήνυμα υπάρχει εναλλαγή τριών γλωσσικών συστημάτων (ποντιακής διαλέκτου, Κοινής Νεοελληνικής και αγγλικής γλώσσας). Αυτή η γλωσσική επαφή θέτει εξαρχής την ανάγκη για μετάφραση. Ο Mounin (1963: 4) διερωτώμενος γιατί πρέπει να μελετήσουμε τη μετάφραση μέσα από το πρίσμα της γλωσσικής επαφής, απαντά 'διότι είναι ένα και το αυτό'. Το πέρασμα αυτό από ένα περιορισμένο γλωσσικό κώδικα (ποντιακή διάλεκτος) σε ένα ηγεμονικό και ξένο γλωσσικό κώδικα (αγγλική γλώσσα) στηρίζεται στη ρητορική της αντίθεσης και προκαλεί σημειωτικά από μόνο του ένα χιουμοριστικό γεγονός. Η Κοινή Νεοελληνική που ακολουθεί μειώνει χρονικά κάπως αυτήν τη σημειο-γλωσσική απόσταση, και, κατά τη γνώμη μας, χρησιμοποιείται για να εξασφαλίσει την κατανόηση του κυρίου διαφημιστικού μηνύματος, στοιχείο

¹¹ Οι de Linde & Kay (1999 :76) παρατηρούν ότι "τα αποσπάσματα που παρουσιάζουν έναν ομιλητή σε στατικότητα έχουν την τάση να αποσπούν λιγότερο την προσοχή του τηλεθεατή".

που υποδηλώνει ότι οι διαφημιστές στοχεύουν στη συνδήλωση της παράδοσης, προβάλλοντας το παρελθόν στο καθημερινό παρόν.

Διαφημιστικό μήνυμα 3 Τηλεοπτική διαφήμιση της AS Company

Παρατηρώντας τον υποτιτλισμό της συγκεκριμένης διαφήμισης διαπιστώνουμε ότι η ποντιακή διάλεκτος δεν υποτιτλίζεται πάντα. Έτσι, δεν υποτιτλίζονται τα εκφωνήματα «Πόντιος και έναν ομμάτ», «Πόντιος είμαι σκυρός σεβνταλής και παλαλός» και το επιφώνημα «οὐί...», ενώ το εκφωνήμα στην αγγλική γλώσσα «beautiful» υποτιτλίζεται στην ποντιακή διάλεκτο «έμορφα». Το τελευταίο αυτό στοιχείο μετατρέπει μεταφρασεολογικά την ποντιακή γλώσσα από γλώσσα πηγή σε γλώσσα στόχο. Αξίζει, επίσης, να σημειώσουμε ότι στο συγκεκριμένο διαφημιστικό μήνυμα δεν λαμβάνει χώρα διαλογική συζήτηση - δεδομένου ότι ο δεύτερος συμμετέχοντας στη διαφήμιση είναι μία κούκλα - παρόλο που φέρεται να απαντά σε κάποιες ερωτήσεις που θέτει ο ηθοποιός. Όμως, είναι αυτά ακριβώς τα τμήματα λόγου στην ποντιακή διάλεκτο που δεν υποτιτλίζονται. Επιπλέον, δεν υποτιτλίζονται τα εκφωνήματα στην Κοινή Νεοελληνική «από την AS» και «να μην ξεχνάμε και τις ρίζες». Κανονικά, τα εκφωνήματα αυτά, θα έπρεπε να εκφραστούν από ένα άλλο πρόσωπο, ίσως ένα σχολιαστή, όπως γίνεται σε άλλα διαφημιστικά μηνύματα που μελετούμε, και αυτό αποτελεί μία καινοτομία της διαφήμισης, καθώς ο ίδιος ηθοποιός εναλλάσσει τρία γλωσσικά συστήματα. Επίσης, το διαφημιστικό μήνυμα έχει επενδυθεί μουσικά με ένα ποντιακό τραγούδι που συμβάλλει στη συσσώρευση ποντιακών σημείων¹² (ηθοποιός ποντιακής καταγωγής, ποντιακή ενδυμασία, κούκλα με ποντιακή ενδυμασία που ομιλεί ποντιακά, μουσική επένδυση στα ποντιακά) σε επίπεδο συνδήλωσης.

6. Διαφημιστικά μηνύματα στην Κρητική διάλεκτο

Το ακόλουθο τηλεοπτικό μήνυμα (διαφημιστικό μήνυμα 4) με τίτλο «οι Κρητικοί» της εταιρείας Q Telecom υποτιτλίζει την κρητική διάλεκτο. Στη διαφήμιση δεν πρωταγωνιστούν ηθοποιοί, αλλά δύο ανθρωπόμορφες φιγούρες, και κυριαρχούν εύκολα αναγνωρίσιμα μη γλωσσικά σημεία της Κρήτης, όπως το κρητικό μαντήλι, το μουστάκι και το σπαθί. Αναφορικά με τα γλωσσικά σημεία, στη διαφήμιση κυριαρχούν εκφωνήματα που συναντώνται στην κρητική διάλεκτο όπως το «όφου» και το «γιάντα», φωνητικά γνωρίσματα της διαλέκτου όπως το «τσε» (και) και το παχύ «σ» και η χαρακτηριστική επιτόνιση του κρητικού τρόπου ομιλίας. Πρόκειται για ιδιαίτερα γνωρίσματα της κρητικής διαλέκτου που μας επιτρέπουν να αναγνωρίσουμε τους συγκεκριμένους ομιλητές ως Κρητικούς. Όπως επισημαίνει και η Δελβερούδη (2001: 54), “υπάρχουν [...] ιδιαίτερα γνωρίσματα σε μία ιδιόλεκτο που χαρακτηρίζουν εξίσου και άλλους ομιλητές, κατά τρόπο ώστε να είναι εφικτή η ταξινόμησή τους σε σύνολα ή σε γλωσσικές ποικιλίες στο εσωτερικό μίας γλώσσας, ταξινόμηση που μπορεί να γίνει σύμφωνα με τη γεωγραφική περιοχή ή την κοινωνική ομάδα στην οποία απαντά το εκάστοτε γνώρισμα”.

¹² Ο Pedersen (2005: 13) χαρακτηρίζει αυτή τη συσσώρευση σημειωτικών πληροφοριών ως *διασημειωτικό πλεονασμό*, κάνοντας λόγο για σημειωτικά κανάλια που είναι φορείς σημειωτικής πληροφορίας όπου υπάρχει, μερικές φορές, ένας κάποιος βαθμός επικάλυψης.

Διαφημιστικό μήνυμα 4 Τηλεοπτική διαφήμιση της Q Telecom

Ο διάλογος που λαμβάνει χώρα στην κρητική διάλεκτο υποτιτλίζεται στην Κοινή Νεοελληνική. Αξίζει να σημειώσουμε ότι στον υποτιτλισμό η λέξη «μπόνους» εμφανίζεται στην αγγλική γλώσσα, στοιχείο που αποτελεί εναλλαγή γλωσσικού κώδικα στον υποτιτλισμό. Αν, όμως, η λέξη «bonus» συμβάλλει στη δημιουργία ενός ανάλαφρου ύφους στη διαφήμιση καθώς δεν έχει σχέση με στοιχεία που αποδίδονται πολιτισμικά στην Κρήτη, η αμέσως επόμενη λέξη «επανάσταση» κάνει ακριβώς το αντίθετο, καθώς ενεργοποιεί ιστορικές συνδηλώσεις λόγω της επανάστασης της Κρήτης (1866-1869), της μάχης της Κρήτης (1941) και του αδούλωτου φρονήματος που αποδίδεται στους κατοίκους της. Είναι ενδιαφέρον, λοιπόν, ότι ένα από τα πιο γνωστά ρητορικά σχήματα, αυτό της *αντίθεσης*, μπορεί να πραγματωθεί μέσα από πολιτισμικές συνδηλώσεις¹³ που ενεργοποιούνται μέσα από συγκεκριμένα γλωσσικά στοιχεία και μεταφέρονται από τον προφορικό λόγο στον γραπτό μέσα από τον υποτιτλισμό, όπως διαπιστώνουμε παρακάτω:

Πρώτος Κρητικός	Δεύτερος Κρητικός
- Όφου τι θα γίνει με τέτοιο bonus. Επανάσταση!	
- Επανά...σταση !	- Τσε...
- Τι τσε μωρέ λες;	- Τσε μωρέ λέω !
	- Τσε γιάντα δεν παίρνουμε όλοι Q;

Επάνω στα χαρακτηριστικά στοιχεία της κρητικής διαλέκτου δομείται και το επόμενο τηλεοπτικό διαφημιστικό μήνυμα της εταιρείας NOVA (διαφημιστικό μήνυμα 5). Σε αυτό το μήνυμα με τίτλο «οι Κρητικοί (ο υποπόταμος)» πρωταγωνιστούν δύο Κρητικοί οι οποίοι μέσα σε μία ανδρική τουαλέτα ομιλούν μεταξύ τους για μία γυναίκα. Το όνομα του ενός είναι Μανούσος, ένα από τα πιο διαδεδομένα αντρικά ονόματα στην Κρήτη. Οι Κρητικοί αυτοί παρουσιάζονται ντυμένοι με κοστούμι και γραβάτα και έχουν και οι δύο μουστάκι, προβάλλοντας μια μάλλον στερεοτυπική εικόνα των κατοίκων της Κρήτης. Αν και ακούγονται εκφωνήματα στην κρητική διάλεκτο – άλλα περισσότερο και άλλα λιγότερο γνωστά – όπως «εκουζουλάθηκες» (τρελάθηκες), «εξάνοιξες» (κοίταξες), «παντέρμη» (παντέρημος), ακούγεται το χαρακτηριστικό «τς-» της κρητικής διαλέκτου, μία επιτόνιση που αποδίδεται στα χαρακτηριστικά της διαλέκτου και εκφωνήματα που δεν ακούγονται συχνά στην πρότυπη γλώσσα, όπως το «ωσάν».

¹³ Ο Κεντρωτής (1996: 164), αναφερόμενος τη λογοτεχνική μετάφραση, παρατηρεί για την κρητική διάλεκτο ότι μπορεί να μεταφραστεί άνευ ετέρου, αλλά εκείνο που δεν μπορεί να μεταφραστεί ποτέ είναι το «κρητικό» στοιχείο της ομιλίας, και ας επιτελεί αυτό το στοιχείο τη λειτουργία της συνδήλωσης στο υπό μετάφραση κείμενο.

Διαφημιστικό μήνυμα 5 Τηλεοπτική διαφήμιση της NOVA

Κατά τη γνώμη μας, η συγκεκριμένη τηλεοπτική διαφήμιση δεν υποτιτλίστηκε καθώς είναι κατανοητή στον ομιλητή της πρότυπης ποικιλίας. Αυτό συμβαίνει επειδή οι διαφημιστές επέλεξαν να διαφοροποιηθούν από την πρότυπη ποικιλία, κυρίως σε επίπεδο φωνητικής, και όχι σε επίπεδο λεξιλογίου, γεγονός που θα δημιουργούσε πρόβλημα κατανόησης (βλέπε παρακάτω). Επίσης, παρατηρούμε ότι οι διαφημιστές εστιάζουν στην ευρεία χρήση μη γλωσσικών σημείων που ταυτοποιούνται από τους αναγνώστες ως χαρακτηριστικά του κρητικού τρόπου ζωής. Το ίδιο παρατηρούμε και με άλλα διαφημιστικά μηνύματα που φέρονται να χρησιμοποιούν την κρητική διάλεκτο, όπως αυτή του ΟΤΕ με τίτλο «e-raki» όπου μάλιστα υπάρχει και εναλλαγή γλωσσικού κώδικα (κρητική διάλεκτος-αγγλική γλώσσα) ή η διαφήμιση της Sanofi Aventis που προωθεί το φαρμακευτικό σκεύασμα Maalox μέσα από ένα κρητικό τραγούδι.

Πρώτος Κρητικός	Δεύτερος Κρητικός (Μανωλός)
- Βρε Μανούσο! Άκουσα καλά μωρέ! Επάντρεύτηκες του Ασημάκη τη θυγατέρα;	- Εκουζουλάθηκες μωρέ; Εξάνοιξές τηνε καλά; Ω την παντέρμη ! Ολο τρώει, και τρώει, και τρώει και φαρδαίνει. Εκατήντησε ωσάν τον ιπποπόταμο. Θηλαστικό τσι ζούγκλας. Αμφίβιο. Φτάνει τα 5 μέτρα μήκος και τσι 3 τόνους σε βάρος. Ζει στις ζούγκλες του Ζαΐρ, του Νίγηρα και τσι Ναμίμπιας. Τρώει ωσαμε 68 κιλά χόρτα την ημέρα. Α, και η ουρά του φτάνει τσι 50 πόντους... και βάλε !!

7. Βασικές διαπιστώσεις

Οι απόψεις των γλωσσολόγων για την αποδοχή των διαλεκτικών συστημάτων από την κοινή γνώμη δίστανται. Έτσι, οι Στάμου & Ντίνας (2011: 302) παρατηρούν ότι “από σημειωτική άποψη, οι γεωγραφικές ποικιλίες συνδέθηκαν με θετικά στερεότυπα”. Αντίθετη άποψη έχει ο Μπασλής (2000: 131), ο οποίος θεωρεί ότι “[...] είναι υποτιμητικό να μιλάει κανείς με κρητική, κυπριακή, βόρεια προφορά”¹⁴. Οι θέσεις αυτές έχουν και οι δύο βάση εάν αναλογιστούμε ότι είναι διαφορετικές οι συνδηλώσεις που ενεργοποιούνται με τη χρήση του διαλεκτικού συστήματος στην καθημερινή ζωή όπου γίνεται άμεσα σύγκριση με την πρότυπη ποικιλία, και διαφορετικές αυτές που ενεργοποιούνται υπό την καθοδήγηση των διαφημιστών στις τηλεοπτικές διαφημίσεις, όπου απομονώνονται, συνήθως,

¹⁴ Βεβαίως, υπάρχει και εσωτερική διαφοροποίηση στην αποδοχή των διαλεκτικών συστημάτων. Έτσι, ο Μπασλής (2000: 129) αναφέρει ότι “όσα ιδιώματα έχουν γραπτή παράδοση, όπως π.χ. το Κυπριακό, το Κρητικό κτλ., είναι πιο καταξιωμένα από εκείνα που δεν έχουν γραπτή παράδοση, όπως είναι τα βορειοελλαδίτικα ιδιώματα”.

οι θετικές. Αυτή η απομόνωση των θετικών συνδηλώσεων στηρίζεται στην παράμετρο της ταχύτητας. Η Lippi-Green (1997: 81) παρατηρεί ότι οι ταινίες χρησιμοποιούν τη γλωσσική ποικιλία και την προφορά για να παρουσιάσουν/σκιαγραφίσουν γρήγορα ένα χαρακτήρα βασιζόμενες στις καθιερωμένες προκαταλήψεις που συνδέονται με συγκεκριμένες τοπικές σχέσεις, εθνικές, φυλετικές ή οικονομικές συμμαχίες. Πολύ περισσότερο στα τηλεοπτικά διαφημιστικά μηνύματα όπου ο χρόνος είναι πολύ πιο περιορισμένος σε σχέση με τις κινηματογραφικές ταινίες.

Η παρατήρηση αυτή επιβεβαιώνεται και μέσα από την παρούσα μελέτη, καθώς η χρήση των διαλεκτικών συστημάτων στα διαφημιστικά μηνύματα που μελετήθηκαν, είτε υποτιτλίζονται, είτε όχι, συμβάλλουν στη δημιουργία μίας ευχάριστης ατμόσφαιρας. Επίσης, θεωρούμε ότι οι διαφημιστές δεν θα διακινδύνευαν να χρησιμοποιήσουν για την προώθηση του διαφημιζόμενου προϊόντος γλωσσικά συστήματα που θα ενεργοποιούσαν αρνητικές συνδηλώσεις, καθώς κάτι τέτοιο θα έθετε σε κίνδυνο την προώθηση του προϊόντος στην αγορά, μειώνοντας το εύρος του αγοραστικού κοινού. Παρατηρούμε, επίσης, ότι ακόμη και στην περίπτωση της χρήσης βορείων ιδιωμάτων που θεωρούνται χαμηλού γλωσσικού κύρους, οι διαφημιστές κατορθώνουν να επικεντρώνονται σε θετικές συνδηλώσεις της κάθε γεωγραφικής ποικιλίας.

Παράλληλα, ο υποτιτλισμός έρχεται στην ουσία να άρει τη ρητορική στρατηγική του *μη ακροαματικού σχεδιασμού* (Χατζησαββίδης, 2000: 122-123) που χρησιμοποιείται και στα ελληνικά ΜΜΕ για τη διάχυση συνδηλώσεων. Σύμφωνα με την πρακτική αυτή ο παραγωγός του προφορικού λόγου επιδιώκοντας τη δημιουργία κάποιου αποτελέσματος χρησιμοποιεί κάποιο γλωσσικό σύστημα, χωρίς να ενδιαφέρεται εάν τα σημειώματα των εκφωνημάτων του - σε επίπεδο τουλάχιστον καταδήλωσης - γίνονται κατανοητά από τους αποδέκτες. Σύμφωνα με τον Bell (1993: 126) στον οποίο ανήκει και ο όρος (*referee design*), ο μη ακροαματικός σχεδιασμός χρησιμοποιείται μέσα σε συμφορματικά και ιδίως σε αφηγηματικό και χιουμοριστικό λόγο, στοιχεία που φαίνεται να έχουν εφαρμογή στις περιπτώσεις που μελετήσαμε. Μάλιστα ο Bell αναφέρει ότι στη ρητορική αυτή στρατηγική μπορεί να χρησιμοποιηθούν όχι μόνο γλωσσικά στοιχεία άλλων κοινωνικών ομάδων του παρόντος (π.χ. διάλεκτοι και ιδιώματα), αλλά ακόμη και του παρελθόντος (νεκρές γλώσσες).

Επίσης, η κατηγοριοποίηση της γλωσσικής ποικιλίας ως *διαλέκτου ή ιδιώματος* δεν φάνηκε να επηρεάζει τον υποτιτλισμό των διαλεκτικών συστημάτων που μελετήσαμε. Αν και θεωρήθηκε αρχικά ότι ο υποτιτλισμός θα αποτελούσε την κύρια επιλογή των διαφημιστών στην περίπτωση που χρησιμοποιούνταν στο διαφημιστικό μήνυμα μια διάλεκτος, λόγω της μεγαλύτερης απόκλισης της διαλέκτου από την πρότυπη γλώσσα, η υπόθεση αυτή δεν επιβεβαιώνεται. Με εξαίρεση τα διαφημιστικά μηνύματα στην ποντιακή διάλεκτο, ο υποτιτλισμός δεν φαίνεται να αποτελεί σταθερή επιλογή των διαφημιστών στα υπόλοιπα διαφημιστικά μηνύματα. Κατά τη γνώμη μας το γεγονός αυτό οφείλεται στο ότι το κύριο χαρακτηριστικό της ποντιακής διαλέκτου είναι, αφενός, η μεγάλη απόκλισή της από την πρότυπη γλώσσα σε επίπεδο λεξιλογίου, και αφετέρου, η μη εξοικείωση του μη ποντιακού κοινού με τη διάλεκτο. Οι διαφημίσεις στην ποντιακή διάλεκτο στηρίζονται περισσότερο σε γλωσσικά και λιγότερο σε μη γλωσσικά στοιχεία. Δεν πρέπει, επίσης, να ξεχνούμε ότι η ποντιακή διάλεκτος είναι μία διάλεκτος του εξωελλαδικού χώρου που ομιλείται από Έλληνες που διαβιούν στον ελλαδικό χώρο. Έτσι, εμφανίζονται μεγάλα τμήματα λόγου στην ποντιακή διάλεκτο, ενώ στα διαφημιστικά μηνύματα που χρησιμοποιούν βόρεια ιδιώματα ή άλλες διαλέκτους όπως την Κρητική, αρκούν ένα με δύο εκφωνήματα και πολλά περισσότερα μη γλωσσικά στοιχεία για να “χτιστεί μία διαλεκτόφωνη ατμόσφαιρα”. Κατ’ αυτόν τον τρόπο, σε επίπεδο γλώσσας, οι διαφημιστές περιορίζονται, κυρίως, σε φωνητικά χαρακτηριστικά των διαλέκτων και λιγότερο σε λεξικολογικά, ενώ όπου αυτή η αρχή δεν τηρείται γίνεται υποτιτλισμός του διαλεκτικού συστήματος.

8. Αντί επιλόγου

Η μελέτη του υποτιτλισμού των διαλεκτικών συστημάτων στα διαφημιστικά μηνύματα καταδεικνύει ότι η διαφημιστική αυτή επιλογή εναρμονίζεται με ένα ευρωπαϊκό μοντέλο, όπου, στη διαφήμιση, οι τοπικές γλωσσικές μορφές μετατρέπονται σε συμβολικό κεφάλαιο στην πιστοποίηση προϊόντων ή γεωγραφικών περιοχών, όπως εύστοχα παρατηρεί ο Androutsopoulos (2010:744). Έτσι, ο υποτιτλισμός χρησιμοποιείται ως γλωσσολογικό εργαλείο για την κατανόηση των σημαινόντων, αλλά ταυτόχρονα χρησιμοποιείται και ως σημειωτική πρακτική για τη διάχυση στοχευμένων συνδηλώσεων μέσα από τα τηλεοπτικά διαφημιστικά μηνύματα.

ABSTRACT

This paper explores the use of Greeklish in Chat Rooms based on the analysis of a nationwide survey of 4174 children, aged between 14-16 years old. The analysis shows that the majority of children uses Greeklish while writing in chat rooms. It is revealed also that variables connected with the socioeconomic status of the children, and consequently with the degree of computer literacy and fluency in English, play an important role.

Λέξεις κλειδιά: λατινοελληνικά, παγκοσμιοποίηση, γραφηματικά συστήματα, Κοινωνική Σημειωτική

1. Εισαγωγή

Η μερική χρήση της λατινικής γραφής κατά την παραγωγή γραπτού ελληνικού λόγου σε ψηφιακά περιβάλλοντα, παρότι έχει απασχολήσει και απασχολεί αρκετά τα μέσα ενημέρωσης, έχει απασχολήσει σαφώς λιγότερο την επιστημονική κοινότητα. Παρά τη μικρή ωστόσο, από ποσοτική άποψη, βιβλιογραφική παραγωγή, ο ως τώρα επιστημονικός προβληματισμός φαίνεται να έχει καλύψει ποικίλα σημαντικά ζητήματα (βλ. αναλυτικά, ενότητα 2).

Παρά την ενδιαφέρουσα αυτή επιστημονική συζήτηση, μένουν πολλά ακόμη ζητήματα ανοιχτά προς διερεύνηση. Καταρχάς, μένει ακόμη αδιευκρινισμένο το εύρος της χρήσης των λατινοελληνικών, αφού δεν διαθέτουμε ποσοτικά δεδομένα που να προέρχονται από τη νέα γενιά χρηστών των ψηφιακών μέσων, η οποία κοινωνικοποιήθηκε στην Ψηφιακή¹ Διαμεσολαβημένη Επικοινωνία² (ΨΔΕ) μετά από την καθιέρωση του Unicode. Δεν έχει συζητηθεί αν ποικίλες μεταβλητές, όπως το φύλο και το κοινωνικο-οικονομικό στάτους –που στην περίπτωση του γραμματισμού γνωρίζουμε ότι διαδραματίζουν τεράστιο ρόλο (Κουτσογιάννης 2011)– παίζουν κάποιο ρόλο και στην περίπτωση αυτή. Μας λείπουν επίσης προσεγγίσεις που δίνουν ιδιαίτερη βαρύτητα στο ρόλο των κοινωνικών πρωταγωνιστών σε μια εποχή έντονων τοπικών και παγκόσμιων μεταβολών, όπου ενδεχομένως θα μπορούσαν να γίνουν κατανοητά και φαινόμενα πρακτικών νέου γραμματισμού, επομένως και της χρήσης των λατινοελληνικών. Τέλος, χρειάζεται περισσότερη ερευνητική αναζήτηση προς την κατεύθυνση της σύνδεσης ενός τοπικού φαινομένου, όπως η χρήση των λατινοελληνικών, με την παγκόσμια πραγματικότητα της Τεχνολογικά Διαμεσολαβημένης Επικοινωνίας (ΤΔΕ) και της επικοινωνίας, συνολικότερα.

Στο παρόν κείμενο επιχειρείται να συζητηθεί μέρος των ζητημάτων αυτών μέσω της παρουσίασης των αποτελεσμάτων ποσοτικής έρευνας με ερωτηματολόγιο που συμπληρώθηκε το 2006 από 4.174 παιδιά ηλικίας 14-16 χρόνων από όλη την Ελλάδα. Το ερωτηματολόγιο αυτό είχε ως στόχο τη διερεύνηση των πρακτικών ψηφιακού γραμματισμού παιδιών εφηβικής ηλικίας (βλ. Κουτσογιάννης 2011) και στο πλαίσιο αυτό υπήρχε ερώτημα ως προς το γραφηματικό σύστημα που χρησιμοποιούν, όταν (και εάν) γράφουν σε περιβάλλοντα σύγχρονης επικοινωνίας – Chat Rooms. Η διερεύνηση των ζητημάτων που προαναφέρθηκαν πραγματοποιείται μέσω της συνδυαστικής αξιοποίησης θεωριών που

¹ Με τη χρήση του επιθέτου ψηφιακός παραπέμπω στην ΤΔΕ (βλ. σημείωση 2) που πραγματοποιείται με ψηφιακά μέσα. Χρησιμοποιώ εναλλακτικά και τον όρο νέα Τεχνολογικά Διαμεσολαβημένη Επικοινωνία.

² Χρησιμοποιώ τον όρο Τεχνολογικά Διαμεσολαβημένη Επικοινωνία (*technologically mediated communication*), προκειμένου να παραπέμπω στη χρήση της γραφής για επικοινωνία, ανεξάρτητα αν αυτό σχετίζεται με συμβατικά περιβάλλοντα επικοινωνίας (έντυπο, μολύβι και χαρτί) ή με ψηφιακά περιβάλλοντα (Κουτσογιάννης 2011). Βρίσκω στη χρήση του όρου αυτού δύο σημαντικά πλεονεκτήματα: αποφεύγεται συνειδητά ο ευρύτατα χρησιμοποιούμενος όρος *Computer Mediated Communication*, επειδή παραπέμπει σε παλιότερες μορφές ΨΔΕ, οι οποίες δεν ανταποκρίνονται πάντα στη σημερινή πραγματικότητα (βλ. και Georgakopoulou 2006): παράλληλα δίνεται η δυνατότητα να αναγνωρίζεται με σαφήνεια η συνέχεια που υπάρχει ανάμεσα στις ποικίλες μορφές ΤΔΕ και να αξιοποιείται η πλούσια παράδοση των σπουδών σε ζητήματα (νέου) γραμματισμού (βλ. υποσημείωση 4).

στηρίζονται στην παράδοση των *Σπουδών του (νέου) Γραμματισμού* και παραδόσεων που ανήκουν, κυρίως, στον ευρύτερο χώρο της *κοινωνικής σημειωτικής* και της *Κριτικής Ανάλυσης Λόγου*.

2. Θεωρητικό πλαίσιο και ανασκόπηση της βιβλιογραφίας

Τρία είναι, κατά τη γνώμη μου, τα ζητήματα που είναι απαραίτητο να αντιμετωπιστούν κατά τη μελέτη των λατινοελληνικών, όπως και κάθε ζητήματος που έχει σχέση με την ΨΔΕ. Το ένα έχει σχέση με το επιστημονικό πλαίσιο που θα επιλεγεί, ο ρόλος του οποίου είναι πολύ σημαντικός, αφού προκαθορίζει τα όρια του επιστημονικά ορατού, για να παραφράσουμε τον Bernstein (1996), προσδιορίζει επομένως καθοριστικά το πώς θα προσεγγιστούν τα επόμενα δύο ζητήματα. Το δεύτερο έχει σχέση με την περιγραφή αυτού καθ' εαυτού του υπό μελέτη φαινομένου: της έκτασής του, των ψηφιακών περιβαλλόντων στα οποία εμφανίζεται περισσότερο, των αιτιών που το προκάλεσαν και το προκαλούν, της σχέσης του με άλλες πρακτικές γραμματισμού, συμβατικές ή ψηφιακές, κλπ. Το τρίτο, τέλος, σημαντικό ζήτημα είναι η σύνδεση της συγκεκριμένης εκδοχής διγραφίας³ στην ελληνική γλώσσα με άλλες εξελίξεις που έχουν σχέση με τη γραφή, το γραμματισμό γενικότερα, σε ένα διεθνές πλαίσιο. Τα ζητήματα δύο και τρία, όπως θα επιχειρήσουμε να αναδείξουμε στα συμπεράσματα, είναι αλληλένδετα.

Η παρούσα εργασία και έρευνα στηρίζεται θεωρητικά στη μίξη δύο επιστημονικών παραδόσεων: των σπουδών σε ζητήματα γραμματισμού⁴ και των πρόσφατων αναζητήσεων που κινούνται στο ευρύτερο πλαίσιο της κοινωνικής σημειωτικής (Kress, 2010, Fairclough 2003, Van Leeuwen 2005). Αντλώντας από τις συγκεκριμένες παραδόσεις, θεωρώ τα γραφηματικά συστήματα ως διαθέσιμους κοινωνικο-πολιτισμικούς σημειωτικούς πόρους (semiotic resources). Οι πόροι αυτοί αποκτούν συμβολικό στάτους στο πλαίσιο της κοινωνίας και των κοινωνικών ομάδων από τις οποίες χρησιμοποιούνται (Kress 2010, βλ. και Sebba 2007, 2009), η οποία όμως (κοινωνία) επηρεάζει και επηρεάζεται από τις παγκόσμιες αλλαγές των τελευταίων δεκαετιών και στο ζήτημα της επικοινωνίας (Fairclough 2003, 2006, Kress 2010, Machin & van Leeuwen 2007, Heller 2003). Η εξέλιξη αυτή επιβάλλει την εγγραφή και ανάγνωση οποιουδήποτε τοπικού σημειωτικού φαινομένου στο παγκόσμιο πλαίσιο των σύγχρονων δεδομένων της επικοινωνίας (π.χ. κυριαρχία της Αγγλικής και των ψηφιακών μέσων στην επικοινωνία κλπ.). Θεωρώ τους κοινωνικούς πρωταγωνιστές ως ενεργούς «σχεδιαστές» που αξιοποιούν τους σημειωτικούς αυτούς πόρους (Kress 2010), όχι μόνο για να ανταποκριθούν στις καθημερινές ρητορικές προκλήσεις, αλλά και για λόγους ταυτοτικών πραγματώσεων (Κουτσογιάννης 2010). Για την ανάγνωση των πραγματώσεων αυτών δίνω ιδιαίτερη βαρύτητα στο ρόλο που έχει η προσωπική εγγράμματη διαδρομή των κοινωνικών πρωταγωνιστών, το προσωπικό εγγράμματο *habitus* θα μπορούσαμε να πούμε, ενώ παράλληλα αναγνωρίζω ως σημαντικό το ρόλο που έχει το προσωπικό τους κίνητρο για αξιοποίηση των όποιων σημειωτικών πόρων. Αξιοποιώ επίσης την προσέγγιση του Fairclough (2003) στην κατανόηση των *λόγων* (discourses), προκειμένου να ταξινομήσω την όλη ως τώρα συζήτηση στα ζητήματα της ΨΔΕ και κυρίως σε αυτό των λατινοελληνικών.

Με βάση λοιπόν το συγκεκριμένο θεωρητικό πλαίσιο, διακρίνω δύο *λόγους*⁵ (discourses) στην ως τώρα βιβλιογραφία για το ζήτημα της χρήσης του λατινικού αλφαβήτου κατά την παραγωγή ψηφιακού ελληνικού λόγου⁶. Εξυπακούεται ότι οι μίξεις είναι αναμενόμενες, όπως και τα όρια μπορεί να είναι ρευστά ή και να συγχέονται στο ίδιο κείμενο.

Ένα μέρος των απόψεων που διατυπώνονται εντάσσονται σε αυτόν που αποκαλώ *εργαλειολόγο* (instrumentalist discourse). Ο λόγος αυτός προσεγγίζει τα γραφηματικά συστήματα, τον κόσμο της γραφής και το γραμματισμό, γενικότερα, ως κάτι αποκομμένο από το ευρύτερο κοινωνικο-πολιτισμικό και ιστορικό συγκείμενο στο οποίο ανήκουν (βλ. και Street 1984). Θα μπορούσαμε να διακρίνουμε δύο *υπολόγους* (sub-discourses) στην περίπτωση των λατινοελληνικών και της νέας ΤΔΕ, γενικότερα. Ο ένας αντιμετωπίζει πτυχές της νέας ΤΔΕ (και τα λατινοελληνικά στην περίπτωσή μας) ως σημαντική

³ Της παράλληλης δηλαδή χρήσης του ελληνικού και λατινικού γραφηματικού συστήματος για την παραγωγή γραπτού λόγου στην ίδια γλώσσα, την ελληνική.

⁴ Δεν εννοώ αποκλειστικά το γνωστό διεθνώς επιστημονικό ρεύμα ως *New Literacy Studies* (*Νέες Σπουδές στο Γραμματισμό*), αλλά και ποικίλες άλλες απόψεις που στέκονται κριτικά προς το συγκεκριμένο ρεύμα (Collins & Blot 2003, Κουτσογιάννης 2011), εστιάζουν όμως το ενδιαφέρον τους σε ζητήματα ψηφιακού ή έντυπου γραμματισμού.

⁵ Οι αναλογίες με το *αυτόνομο* και το *ιδεολογικό μοντέλο γραμματισμού* (Street 1984) είναι προφανείς. Χρησιμοποιώ ωστόσο την έννοια των *λόγων*, γιατί είναι πιο δυναμική, αφού: δίνει την ευχέρεια να αξιοποιηθεί η πλούσια παράδοση της (κριτικής) ανάλυσης λόγου, δίνει τη δυνατότητα να εντοπιστούν διαφορές που ανήκουν στο ίδιο *μοντέλο* (με όρους του Street 1984) και κυρίως καθιστά ευκολότερη τη σύνδεση με τις ταυτότητες, τις στρατηγικές και τη γενικότερη κινητικότητα των κοινωνικών πρωταγωνιστών (Fairclough 2003).

⁶ Προσαρμόζω εδώ την ανάλογη προσέγγιση που έχω ακολουθήσει για τη μελέτη της βιβλιογραφίας των πρακτικών ψηφιακού γραμματισμού των παιδιών (βλ. Κουτσογιάννης 2011).

απειλή για τον ελληνικό γραπτό λόγο και σε κάποιες περιπτώσεις για την ελληνική γλώσσα, γενικότερα. Χαρακτηριστικά προς αυτή την κατεύθυνση είναι πολλά δημοσιεύματα στον ελληνικό τύπο, τα οποία θεωρούν τα λατινοελληνικά ως «απειλή για την ελληνική γλώσσα» (Koutsogiannis & Mitsikopoulou 2003). Ο συγκεκριμένος υπολόγος έχει ισχυρή διεθνή παρουσία και συναντάται πρωτίστως στις συζητήσεις ως προς τις επιπτώσεις που έχει η γνώση ως γλώσσα του διαδικτύου και των στιγμιαίων μηνυμάτων στις σχολικές γλωσσικές επιδόσεις των παιδιών (βλ. Anis 2007:111, Thurlow 2006).

Ο δεύτερος υπολόγος θεωρεί τη γραφή ως κάτι ουδέτερο, ως ένα μέσο απλής κωδικοποίησης του προφορικού λόγου, χωρίς περαιτέρω σύνδεση με άλλες κοινωνικές και πολιτισμικές διαστάσεις. Πρόκειται για μια ισχυρή γλωσσολογική παράδοση που προσεγγίζει τα ζητήματα της γραφής και της ορθογραφίας⁷ αποκομμένα από κοινωνικοπολιτισμικές και ιστορικές μεταβλητές. Έρευνά μας έδειξε ότι ο υπολόγος αυτός έχει ισχυρή αντιπροσώπευση και στις συζητήσεις στον ελληνικό τύπο για τα λατινοελληνικά, όχι όμως τόσο από μια γλωσσολογική όσο από μια τεχνολογική αφετηρία. Στο πλαίσιο αυτό η λατινική γραφή θεωρείται ως κάτι προσωρινό που σχετίζεται με τεχνολογικές αδυναμίες και δεν πρέπει να δίνεται ιδιαίτερη βαρύτητα στο ποιο γραφηματικό σύστημα χρησιμοποιείται (Koutsogiannis & Mitsikopoulou 2003).

Οι δύο αυτές εκδοχές του *εργαλειακού λόγου* φαίνονται τελείως διαφορετικές μεταξύ τους, αλλά δεν είναι: τις συνδέει η έμφαση στη γραφή ως μια τεχνολογία η οποία δεν συνδέεται με άλλες πτυχές της σύνθετης πραγματικότητας.

Το μεγαλύτερο μέρος του επιστημονικού προβληματισμού ωστόσο κινείται σε αυτόν που αποκαλώ *κοινωνικοπολιτισμικό*⁸ λόγο (sociocultural discourse). Ο συγκεκριμένος λόγος αντιλαμβάνεται το νέο γραμματισμό, την ΨΔΕ και τα λατινοελληνικά, κατά προέκταση, ως μέρος του νέου τεχνολογικού και κοινωνικοπολιτισμικού γίγνεσθαι, μελετάει δε το φαινόμενο στο πλαίσιο των κοινωνικών πρακτικών και των συμβάντων γραμματισμού (literacy events) όπου εντοπίζεται. Η στενή σχέση με το «ιδεολογικό μοντέλο γραμματισμού» του Street (1984) είναι προφανής και έχει αξιοποιηθεί ήδη στη βιβλιογραφία (Androutsopoulos 2009, Sebba 2007).

Το μεγαλύτερο μέρος της βιβλιογραφίας αυτής κινείται σε θεωρητικό επίπεδο στο χώρο της κοινωνιογλωσσολογίας και μελετάει ποικίλες πτυχές του ζητήματος. Οι Tseliga (2007) και Androutsopoulos (2009) εντάσσουν το φαινόμενο των λατινοελληνικών στη διγραφία μέσω υπολογιστή (computer-mediated digraphia): ο Ανδρουτσόπουλος έχει επισημάνει την ποικιλότητα με την οποία εμφανίζεται και έχει καταγράψει δύο σχήματα μεταγραφής, το φωνητικό και το ορθογραφικό (Ανδρουτσόπουλος 2000). Ο ίδιος (Androutsopoulos, 2009) υποστηρίζει την υπόθεση ότι η ποικιλότητα αυτή θα αποκτά σταδιακά χαρακτηριστικά σταθερότητας, από τη στιγμή που οι χρήστες θα προσαρμόζονται με την πάροδο του χρόνου στις πρακτικές γραφηματικού γραμματισμού (“transliteration standards”) της ομάδας ή της κοινότητας στην οποία συμμετέχουν και από τη στιγμή που η επιλογή αυτή θα αποτελεί ταυτοτική πραγμάτωση του συνανήκειν (“act of identity”).

Από την έρευνα δεν είναι απολύτως ξεκάθαρο το εύρος της χρήσης του λατινικού αλφαβήτου και η ενδεχόμενη σύνδεσή του με συγκεκριμένα ψηφιακά περιβάλλοντα ή πρακτικές. Ο Androutsopoulos (2009) υποστηρίζει ότι «τα τελευταία χρόνια παρατηρείται μια μείωση των περιβαλλόντων και γενικότερα της συχνότητας της χρήσης της λατινικής υπέρ της ελληνικής» και προβλέπει ότι η λατινική γραφή θα χρησιμοποιείται περισσότερο μεταξύ των Ελλήνων της διασποράς. Η Spilioti (2009), αναλύοντας σώμα 447 στιγμιαίων μηνυμάτων που προήλθαν από νέους 15-25 χρόνων και ζούσαν στην Αθήνα, διαπιστώνει ότι η νόρμα είναι να χρησιμοποιείται το ελληνικό αλφάβητο και όχι το λατινικό.

Ενδιαφέρουσες διαπιστώσεις προκύπτουν και από την έρευνα της Tseliga (2004, 2007) σε σώμα ηλεκτρονικών μηνυμάτων (E-mails), η οποία δείχνει, μεταξύ άλλων, ότι οι χρήστες των λατινοελληνικών ενσωματώνουν στα μηνυμάτα τους σε μεγαλύτερη έκταση λεξιλόγιο που δεν προέρχεται από την ελληνική γλώσσα (κυρίως από την Αγγλική) (βλ. και Spilioti 2009), ότι χρησιμοποιούν σε μεγαλύτερη έκταση πολυτροπικά στοιχεία (π.χ. emoticons) και ότι υιοθετούν σε μεγαλύτερο βαθμό στρατηγικές λόγου, όπως απλοποιήσεις, μη τυπικότητα και απόκλιση. Η ίδια συνδέει την εμμονή στη χρήση της λατινικής γραφής, παρά τις τεχνολογικές εξελίξεις, και με την ταχύτητα στο γράψιμο, από τη στιγμή που η ελληνική ορθογραφία είναι απαιτητική, ενώ με τη χρήση του λατινικού αλφαβήτου η παραγωγή λόγου γίνεται πιο γρήγορα, χωρίς αυστηρές συμβάσεις και χωρίς να είναι αναγκαστική η συχνή μετάβαση από το ελληνικό στο αγγλικό γραφηματικό σύστημα. Ενδιαφέρον παρουσιάζει και ο προβληματισμός (Tseliga 2004) ως προς την ενδεχόμενη σχέση που μπορεί να έχουν επιλογές στο γραφηματικό σύστημα με την ιδιαιτερότητα που παρουσιάζει η αναπαράσταση του νοήματος στην οθόνη (Kress

⁷ Για μια κριτική στην προσέγγιση αυτή βλ. Sebba 2007.

⁸ Χρησιμοποίησα και τον όρο «οικο-κοινωνικός λόγος», γιατί ανταποκρίνεται περισσότερο στο πώς προσεγγίζονται οι γενικότερες πρακτικές ψηφιακού γραμματισμού των παιδιών από μέρος της βιβλιογραφίας (Κουτσογιάννης 2011).

2010) (μεγαλύτερος βαθμός πειραματισμού, ο ρόλος της αισθητικής στην παραγωγή γραπτού λόγου κλπ.).

Τέλος, οι Koutsogiannis & Mitsikopoulou (2003) διερευνούν το ενδιαφέρον και τις έντονες συζητήσεις που προκαλεί στον τύπο η χρήση των λατινοελληνικών, αναδεικνύοντας την ποικιλία των αντιδράσεων και των απόψεων που καταγράφονται για το συγκεκριμένο ζήτημα. Ενδιαφέρον έχει επίσης το γεγονός ότι το φαινόμενο της διγραφίας επεκτείνεται και σε άλλες πρακτικές γραμματισμού που δεν έχουν σχέση με την ΨΔΕ (Koutsogiannis 2004, βλ. και Annis 2007:111), ενώ πρόσφατη έρευνα εστιάζει και στο γεγονός ότι η έλλειψη «περιορισμών» που εξασφαλίζει η χρήση του λατινικού αλφαβήτου κατά την παραγωγή λόγου στο διαδίκτυο, διευκολύνει τη χρήση της ομιλούμενης κυπριακής διαλέκτου (Themistocleous 2009).

Από τη σύντομη αυτή βιβλιογραφική ανασκόπηση είναι εμφανές ότι έχουν διερευνηθεί σημαντικές παράμετροι και έχουν αναδειχθεί ενδιαφέρουσες πτυχές της χρήσης των λατινοελληνικών. Επισημάνθηκε ήδη ότι η έρευνα είναι περιορισμένη και γι' αυτό υπάρχουν αρκετές παράμετροι που δεν έχουν ή έχουν διερευνηθεί εν μέρει. Αναφέρω κυρίως αυτές που σχετίζονται με τους στόχους της παρούσας έρευνας.

Ένα πρώτο εμφανές ερευνητικό κενό σχετίζεται με την έλλειψη στοιχείων ως προς την έκταση του φαινομένου και το συσχετισμό του με μεταβλητές, όπως η κοινωνική διαστρωμάτωση. Η παρούσα έρευνα, λόγω του εύρους του δείγματος που χρησιμοποιεί, μπορεί να συνεισφέρει εν μέρει στην κάλυψη αυτού του κενού. Θα ήθελα να υπογραμμίσω το «εν μέρει», γιατί τα δεδομένα μου αφορούν παιδιά εφηβικής ηλικίας και εστιάζουν αποκλειστικά στα σύγχρονα περιβάλλοντα επικοινωνίας.

Σημαντικό είναι και το ζήτημα της ανάγνωσης του φαινομένου από μια κοινωνιογλωσσολογική οπτική «ευαίσθητη στην παγκοσμιοποίηση» (Coupland 2003), όπου θα δίνεται ιδιαίτερη βαρύτητα στον παγκόσμιο ρόλο των αγγλικών σήμερα, αλλά και γενικότερα στη σύνδεση του τοπικού με το παγκόσμιο (Koutsogiannis & Mitsikopoulou 2003, Tsiplakou 2009). Προς αυτή την κατεύθυνση υπάρχουν, όπως είδαμε, έρευνες που συνδέουν τα λατινοελληνικά και με το σημαντικό ρόλο της παγκόσμιας κυριαρχίας της Αγγλικής (Spilioti 2009, Tseliga 2007). Η Tseliga (2007), για παράδειγμα, επισημαίνει ότι «τα λατινοελληνικά αποτελούν ένα παράδειγμα της ικανότητας του σύγχρονου ευέλικτου ανθρώπου να επιδεικνύει γλωσσική δημιουργικότητα, προκειμένου να προσαρμόζεται στις επείγουσες ανάγκες των παγκόσμιων και των τοπικών δικτύων επικοινωνίας». Η Spilioti (2009), επίσης, διασυνδέει, όπως είδαμε, τη χρήση του λατινικού αλφαβήτου με την αξιοποίηση αγγλόφωνου λεξιλογίου, γεγονός που το ερμηνεύει και ως συμβολική τάση διασύνδεσης με την παγκόσμια νεανική κουλτούρα.

Η κατεύθυνση αυτή, προς την αναζήτηση της σχέσης που υπάρχει με άλλες παγκόσμιες εξελίξεις στο ζήτημα του γραμματισμού, χρειάζεται κατά τη γνώμη μου μεγαλύτερη επιμονή. Ένα εμφανές υπερτοπικό στοιχείο έχει σχέση με την ευρύτητα της λατινοποίησης του διαδικτύου (βλ. Palfreyman & Khalil 2003). Ένα δεύτερο στοιχείο που επισημαίνεται είναι η σύνδεση της γραφής και της ορθογραφίας με την αστάθεια στη γραφή και την ορθογραφία που παρατηρείται σήμερα σε παγκόσμιο επίπεδο (Sebba 2007).

Στο παρόν κείμενο θα επιχειρηθεί να διαβαστεί η χρήση των λατινοελληνικών από τα παιδιά σε συνδυασμό με το γεγονός ότι λόγω των νέων παγκόσμιων δεδομένων στις μέρες μας μεταβάλλεται το περιεχόμενο του γραμματισμού με ισχύ. Εκεί που παλιότερα ο γραμματισμός με ανταλλακτική αξία (Bourdieu 1991) ταυτιζόταν με το σχολικό γραμματισμό, τώρα προστίθεται η ανάγκη της χρήσης της Αγγλικής ως δεύτερης γλώσσας και η ανάγκη κατάκτησης του νέου γραμματισμού των ψηφιακών μέσων. Πρόκειται για ιδιαίτερα σημαντικό γεγονός που, όπως θα διαπιστώσουμε, προκαλεί διαφορετικές ταχύτητες αντίδρασης στους κοινωνικούς πρωταγωνιστές (παιδιά, γονείς, σχολεία), όπου μπορούμε να κατανοήσουμε εν μέρει και τη χρήση των λατινοελληνικών.

3. Η έρευνα

Τα ποσοτικά δεδομένα που παρουσιάζονται στο παρόν κείμενο προέρχονται από ερωτηματολόγιο το οποίο συμπληρώθηκε το 2006 από δομημένο δείγμα 4.174 παιδιών εφηβικής ηλικίας, 14-16 χρόνων (2118 κορίτσια και 2056 αγόρια). Η ηλικία αυτή επιλέχθηκε συνειδητά, γιατί ήταν από τις πρώτες που κοινωνικοποιήθηκε σε μια περίοδο κατά την οποία τα ποικίλα διαδικτυακά περιβάλλοντα είχαν πια διαδοθεί ευρέως και η πρώτη που θα μπορούσε να χρησιμοποιήσει το ελληνικό γραφηματικό σύστημα χωρίς ιδιαίτερους τεχνικούς περιορισμούς. Τα 2.337 από τα παιδιά του δείγματος προέρχονται από δημόσια σχολεία των δύο μεγαλύτερων πόλεων, Αθήνας και Θεσσαλονίκης, ενώ 1078 παιδιά προέρχονται από επαρχιακές πόλεις και κωμοπόλεις. Γενικά, το σύνολο των παιδιών που προέρχονται από δημόσια σχολεία ανέρχονται στα 3415 από τα οποία 1737 είναι κορίτσια και 1678 αγόρια. Η επιλογή των δημόσιων σχολείων των δύο μεγάλων πόλεων έγινε με κριτήρια γεωγραφικά, τα οποία είναι εν τέλει και κοινωνικά, έτσι ώστε να αντιπροσωπεύονται στο δείγμα μας ισομερώς σχολεία από όλες τις

περιοχές (κέντρο, ανατολικά, δυτικά και βόρεια προάστια). Η επιλογή των επαρχιακών σχολείων πραγματοποιήθηκε με κριτήρια μεγέθους (μεγάλα και μικρά αστικά κέντρα) και γεωγραφικά (διαφορετικές περιοχές της χώρας).

Δόθηκε ιδιαίτερη βαρύτητα στο να συμπεριληφθούν στο δείγμα παιδιά που φοιτούν σε πολύ γνωστά ιδιωτικά σχολεία, με ιδιαίτερα υψηλό στάτους στην ελληνική κοινωνία και υψηλά δίδακτρα, των οποίων οι γονείς ανήκουν, όπως έδειξε και ο στατιστικός έλεγχος (Κουτσογιάννης 2011), σε προνομιούχα από μορφωτική και οικονομική άποψη κοινωνικά στρώματα. Έτσι, 759 παιδιά (381 κορίτσια και 378 αγόρια) προέρχονται από τα σχολεία αυτά. Είναι χρήσιμο να επισημανθεί εδώ ότι στα σχολεία αυτά δίνεται ιδιαίτερη βαρύτητα στη χρήση της αγγλικής γλώσσας και των Νέων Τεχνολογιών, γι' αυτό και τα χρησιμοποιούμε ως μία σημαντική μεταβλητή με συγκεκριμένα χαρακτηριστικά.

Θα μπορούσαμε εν κατακλείδι να πούμε ότι το δείγμα ανταποκρίνεται σε δύο σημαντικές προϋποθέσεις: είναι αντιπροσωπευτικό, παρότι κατά την επιλογή του ακολουθήθηκαν γεωγραφικά και όχι αυστηρά στατιστικά κριτήρια αντιπροσωπευτικότητας, ενώ παράλληλα αντιπροσωπεύει συνειδητά τις κοινωνικο-οικονομικές αντιθέσεις της ελληνικής κοινωνίας.

Το ερωτηματολόγιο που δόθηκε αποτελούνταν από 59 ερωτήματα τα οποία στόχευαν στο να διερευνήσουν τις εξωσχολικές πρακτικές ψηφιακού γραμματισμού των παιδιών. Μία μόνο ομάδα ερωτήσεων εστίαζε στη συχνότητα, στο εύρος και στο πώς αξιοποιούνται τα κανάλια σύγχρονης διαδικτυακής επικοινωνίας (ΚΣΔΕ) (chat rooms) και στο πλαίσιο αυτό τέθηκε και το ερώτημα αν και με ποια συχνότητα χρησιμοποιούν τα παιδιά τη λατινοελληνική γραφή. Παρότι το ερώτημα είναι ένα, πολύ μεγάλο ενδιαφέρον έχει, όπως θα διαπιστώσουμε στη συνέχεια, η διασταύρωση των απαντήσεων με άλλα ερωτήματα του ερωτηματολογίου.

Είναι χρήσιμο να επισημανθούν εδώ τα εξής: 1. Τα περιβάλλοντα σύγχρονης διαδικτυακής επικοινωνίας μεταβάλλονται και σαφώς δεν είναι αυτά που ήταν το 2006, όταν πραγματοποιήθηκε η έρευνα. 2. Υπάρχουν περισσότερες από μία επιλογές: παλιότερα χρησιμοποιούνταν περισσότερο το IRC (Internet Relay Chat), ενώ σήμερα χρησιμοποιείται περισσότερο η ενσωματωμένη σε άλλα περιβάλλοντα δυνατότητα για σύγχρονη γραπτή επικοινωνία (π.χ. στο Facebook) και το msn. Η ρευστότητα και η ποικιλία αυτή θέτει σημαντικά ζητήματα. Το πρώτο έχει σχέση με το πώς θα μπορούσε να τεθεί το ερώτημα στα παιδιά. Σε αυτό ακολουθήσαμε τον όρο που χρησιμοποιούσαν (και χρησιμοποιούν) τα ίδια τα παιδιά, όπως διαπιστώθηκε κατά το πιλοτικό στάδιο της έρευνας. Ο όρος «κάνω chat» που χρησιμοποιούσαν εστιάζει στο είδος του συμβάντος γραμματισμού και όχι σε συγκεκριμένο διαδικτυακό περιβάλλον και αυτό ακολουθήσαμε. Το δεύτερο ζήτημα που τίθεται είναι γενικότερο και αφορά την εγκυρότητα που μπορεί να έχει μια έρευνα που διεξήχθη το 2006, όταν τα τεχνολογικά δεδομένα ήταν διαφορετικά. Όπως επισημάνθηκε, και όπως θα φανεί και κατά την ανάλυση, η έρευνα δεν εστιάζει στη ρευστότητα των περιβαλλόντων, θέμα εξίσου ενδιαφέρον, αλλά στη σύνδεσή τους με κοινωνικές μεταβλητές. Τέτοιους είδους συνδέσεις και κυρίως η σύνδεση με το είδος της αναστοχαστικότητας (reflexivity) που επιδεικνύουν οι κοινωνικοί πρωταγωνιστές στα εκάστοτε νέα δεδομένα της γραφής και επικοινωνίας είναι ζητήματα περισσότερο κοινωνικά παρά τεχνολογικά, έχουν επομένως διαχρονικό ενδιαφέρον.

4. Αποτελέσματα

Πριν προχωρήσουμε στην κύρια εστίαση του θέματος, είναι χρήσιμο να παρατεθούν κάποια γενικότερα στοιχεία σε σχέση με τη συχνότητα χρήσης των περιβαλλόντων σύγχρονης επικοινωνίας από τα παιδιά. Από τις απαντήσεις προκύπτει ότι τα περιβάλλοντα αυτά χρησιμοποιούνται από τα μισά περίπου παιδιά (50,7%) του δείγματός μας, από τα οποία το μεγαλύτερο ποσοστό συμμετέχει ευκαιριακά (50,8%), ένα μικρότερο ποσοστό δηλώνει ότι συμμετέχει μερικές φορές τη βδομάδα (29,2%) και το μικρότερο ποσοστό (15,9%) δηλώνει ότι συμμετέχει κάθε μέρα. Τα αποτελέσματα επομένως που παρουσιάζονται στη συνέχεια αφορούν τα μισά περίπου παιδιά του δείγματος, αφού αυτά δήλωσαν ότι συμμετέχουν σε Κανάλια Σύγχρονης Διαδικτυακής Επικοινωνίας (ΚΣΔΕ).

Το κύριο ερώτημα το οποίο αφορούσε στο θέμα μας (ερώτημα 44) ήταν το παρακάτω:

Αν μπαίνεις σε ελληνικά κανάλια, γράφεις ... (κύκλωσε ό,τι ανταποκρίνεται σε σένα):

1. Με ελληνικούς χαρακτήρες
2. Ελληνικά αλλά με λατινικούς χαρακτήρες (greeklish)
3. Και με τα δύο, ανάλογα με την περίπτωση

Από τον παρακάτω πίνακα (πίνακας 1) προκύπτει ότι το μεγαλύτερο ποσοστό των παιδιών του συνόλου του δείγματός μας χρησιμοποιεί τη λατινοελληνική γραφή (43,3%), έναντι 27,9% που χρησιμοποιεί το ελληνικό αλφάβητο και 28,8% που χρησιμοποιεί και τα δύο, ανάλογα με την περίπτωση. Το

αποτέλεσμα αυτό έχει ιδιαίτερο ενδιαφέρον, αν λάβουμε υπόψη μας το γεγονός ότι τα παιδιά αυτά εξοικειώθηκαν με τις Νέες Τεχνολογίες μετά από το 2000, όταν δηλαδή τα προβλήματα με την ελληνική γραφή σε ψηφιακά περιβάλλοντα θα έπρεπε λογικά να έχουν ξεπεραστεί σε σημαντικό βαθμό λόγω της υποστήριξής της από το διεθνές πρότυπο κωδικοποίησης των συστημάτων γραφής, το unicode.

Η δεύτερη διαπίστωση είναι ότι η χρήση του λατινικού αλφαβήτου δεν αποτελεί απλώς μια γραφηματική ποικιλία, που χρησιμοποιείται γενικώς από τα νέα παιδιά σε συγκεκριμένες ηλεκτρονικές χρήσεις. Φαίνεται να σχετίζεται περισσότερο με συγκεκριμένες κοινωνικές κατηγορίες παιδιών. Από τον πίνακα 1, όπου διασταυρώνεται η χρήση των λατινοελληνικών με τον τύπο σχολείου στον οποίο φοιτούν τα παιδιά, διαπιστώνουμε ότι παιδιά που φοιτούν στα ιδιωτικά σχολεία του δείγματός μας χρησιμοποιούν το λατινικό αλφάβητο σε πολύ μεγαλύτερη έκταση (63,9%) έναντι των παιδιών που φοιτούν στα δημόσια σχολεία (38,6%). Η διαφορά είναι εντυπωσιακή, στατιστικά σημαντική ($\chi^2=91,373$, $df=2$, $P\text{-value}<0,001$), χρειάζεται δε περαιτέρω διερεύνηση και ερμηνεία. Το γεγονός ότι η συγκεκριμένη κοινωνική ομάδα έχει κάποια ιδιαίτερα χαρακτηριστικά, όπως η ταχύτητα με την οποία επιχειρεί να εξοικειώσει τα παιδιά της με τα δύο νέα δεδομένα του παγκόσμιου γραμματισμού -της ευρείας δηλαδή χρήσης της Αγγλικής ως δεύτερης γλώσσας και της λειτουργικής κατάκτησης του ψηφιακού γραμματισμού- (Κουτσογιάννης 2011), μας οδήγησε στο να εστιάσουμε τη διερεύνησή μας προς αυτές κυρίως τις κατευθύνσεις.

Πίνακας 1. Γράψιμο σε ΚΣΔΕ						
			Αν μπαίνεις σε ελληνικά κανάλια γράφεις			
			Με ελληνικό αλφάβητο	Με λατινικούς χαρακτήρες	Και τα δύο, εξαρτάται	Σύνολο
	Δημόσια σχολεία	%	31,5	38,6	29,9	100,0
	Ιδιωτικά σχολεία	%	12,1	63,9	23,9	100,0
	Σύνολο	%	27,9	43,3	28,8	100,0

Από τη διασταύρωση με τις απαντήσεις του ερωτήματος «Πόσο συχνά επισκέπτεσαι Chats;» προκύπτει (στατιστικά σημαντική η διαφορά, $\chi^2=36,681$, $df=4$, $p\text{-value}<0,001$) ότι τα παιδιά τα οποία χρησιμοποιούν πιο συχνά τη σύγχρονη επικοινωνία είναι αυτά που χρησιμοποιούν σε μεγαλύτερη έκταση και τη λατινική γραφή. Είναι ενδεικτικό ότι το ποσοστό των παιδιών που γράφει ελληνικά με λατινικούς χαρακτήρες και χρησιμοποιεί τη σύγχρονη επικοινωνία «ευκαιριακά» είναι 38,8% έναντι 43,6% όσων τη χρησιμοποιούν «κάποιες φορές τη βδομάδα» και 57,7% όσων τη χρησιμοποιούν «κάθε μέρα».

Από τη διασταύρωση αυτή προκύπτει ότι ο βαθμός εξοικείωσης με το συγκεκριμένο περιβάλλον διαδραματίζει σημαντικό ρόλο. Αυτό συναρτάται σε σημαντικό βαθμό και με μια άλλη μεταβλητή, το χρόνο απόκτησης υπολογιστή. Από την ανάλυση προκύπτει ότι η χρήση της λατινικής γραφής συνδέεται ευθέως με την εμπειρία που έχουν τα παιδιά στη χρήση του υπολογιστή ($\chi^2=36,440$, $df=6$, $P\text{-value}<0,001$). Δίνονται κάποια ενδεικτικά ποσοστά⁹ από τη διασταύρωση του βασικού ερωτήματος με το «πότε απόκτησες υπολογιστή»: παιδιά που απέκτησαν υπολογιστή την ίδια χρονιά της έρευνας χρησιμοποιούν λατινοελληνικά σε ποσοστό 31,8%, ποσοστό που αυξάνεται σε 42,5% και 44,7% σε όσα παιδιά απέκτησαν υπολογιστή «μέσα στην τελευταία διετία» και «πριν από 4-5 χρόνια», αντίστοιχα, για να φτάσει στο 55,1% στα παιδιά που είχαν υπολογιστές για περισσότερα από πέντε χρόνια.

Από τη μέχρι τώρα ανάλυση προκύπτει με σαφήνεια ότι τα λατινοελληνικά αποτελούν γραφηματική ποικιλία που συναρτάται με την έκταση της χρήσης των ΚΣΔΕ αλλά και το βαθμό της εμπειρίας που έχουν τα παιδιά, γενικότερα, στη χρήση των υπολογιστών. Θα μπορούσαμε να πούμε δηλαδή ότι χαρακτηρίζει τις πρακτικές ψηφιακού γραμματισμού κυρίως όσων κινούνται με μεγαλύτερη άνεση στη χρήση των ΤΠΕ.

Μια άλλη σημαντική μεταβλητή που φαίνεται από τα αποτελέσματα να παίζει καθοριστικό ρόλο είναι η ευρύτητα της χρήσης των Αγγλικών από τα παιδιά. Στον πίνακα 2 που ακολουθεί διασταυρώνεται η έκταση της χρήσης των λατινοελληνικών με τη συμμετοχή των παιδιών σε ΚΣΔΕ, όπου χρησιμοποιείται η αγγλική γλώσσα¹⁰, και προκύπτει με στατιστικά σημαντική διαφορά ($\chi^2=36,304$, $df=2$, $p\text{-value}<0,001$) ότι τα παιδιά που χρησιμοποιούν Αγγλικά σε μεγαλύτερη έκταση χρησιμοποιούν και λατινοελληνικά σε μεγαλύτερη έκταση.

⁹ Αποφεύγουμε για λόγους οικονομίας την αναλυτική παράθεση πινάκων.

¹⁰ Το ερώτημα (43) ήταν:

Μπαίνεις συνήθως ... (κύκλωσε όποια από τις απαντήσεις ανταποκρίνεται σε σένα ή περισσότερες από μία απαντήσεις):

α. σε ελληνικά chat rooms,

β. Σε chat rooms αγγλικής γλώσσας

γ. σε chat rooms άλλης γλώσσας (αν ναι, γράψε ποια ή ποιες)

value<0,001) ότι τα παιδιά αυτά χρησιμοποιούν σε μεγαλύτερη έκταση τη λατινική γραφή (49,7%), έναντι 40,8% των άλλων παιδιών.

Πίνακας 2. Συμμετοχή σε αγγλόφωνα ΚΣΔΕ και λατινοελληνικά					
			Συμμετοχή σε αγγλόφωνα Chat		
			Όχι	Ναι	Σύνολο
Αν μπαίνεις σε ελληνικά ΚΣΔΕ, γράφεις	Με ελληνικούς χαρακτήρες	Αριθμός	465	106	571
		%	31,7%	18,4%	27,9%
	Με λατινικούς χαρακτήρες	Αριθμός	599	286	885
		%	40,8%	49,7%	43,3%
	Και με τα δύο, ανάλογα με την περίπτωση	αριθμός	405	184	589
		%	27,6%	31,9%	28,8%
	Σύνολο	Αριθμός	1469	576	2045
		%	100,0%	100,0%	100,0%

Προκειμένου να ενισχύσουμε περισσότερο τη διαπίστωση αυτή, διαμορφώσαμε ένα υποσύνολο, από το σύνολο των ιδιωτικών σχολείων, τα οποία είναι γνωστό ότι δίνουν ιδιαίτερη βαρύτητα στη χρήση της Αγγλικής γλώσσας. Πρόκειται για 579 παιδιά, από τα οποία 291 χρησιμοποιούν τα ΚΣΔΕ. Οι διαφορές είναι θεαματικές: παιδιά που φοιτούν στα συγκεκριμένα σχολεία γράφουν ελληνικά με λατινικούς χαρακτήρες σε ποσοστό 66,3% έναντι 39,5% των παιδιών που φοιτούν σε δημόσια σχολεία ($\chi^2=84,729$, $df=2$, $p\text{-value}<0,001$).

Τα δεδομένα μας ως εδώ δείχνουν ότι η εμπειρία στη χρήση των νέων μέσων σε συνδυασμό με το βαθμό εξοικείωσης με τη χρήση της Αγγλικής γλώσσας, εντός ή και εκτός του διαδικτύου (τα δύο είναι αλληλένδετα), αποτελούν σημαντικές μεταβλητές για το θέμα μας. Παραθέτουμε στη συνέχεια κάποια ακόμη δεδομένα που δείχνουν ότι το ζήτημα είναι πιο σύνθετο.

Διασταυρώσαμε το κύριο ερώτημα με το ερώτημα «Πόσους υπολογιστές έχετε στο σπίτι (οι οποίοι να είναι σε χρήση);». Από τη διασταύρωση προκύπτει ότι τα παιδιά με περισσότερους από έναν υπολογιστές στο σπίτι χρησιμοποιούν σε πολύ μεγαλύτερη έκταση το λατινικό γραφηματικό σύστημα (59,5%) έναντι 45,9% όσων έχουν δύο και 41% όσων έχουν έναν ($\chi^2=27,741$, $df=4$, $P\text{-value}<0,001$). Από πολλές άλλες διασταυρώσεις μας είναι γνωστό (βλ. Κουτσογιάννης 2011) ότι τα παιδιά που έχουν πολλούς υπολογιστές στο σπίτι ανήκουν σε προνομιούχα κοινωνικά στρώματα, όπως και τα παιδιά που έχουν υπολογιστή για μεγάλο χρονικό διάστημα. Επισημάναμε ήδη ότι σε προνομιούχα κοινωνικά στρώματα ανήκουν και τα παιδιά που φοιτούν στα ιδιωτικά του δείγματός μας. Δεν είναι επομένως τυχαίο που και τα συγκεκριμένα παιδιά χρησιμοποιούν σε πολύ μεγαλύτερη έκταση τη λατινική γραφή στη σύγχρονη διαδικτυακή επικοινωνία, όπως είδαμε στον πρώτο πίνακα. Στην επόμενη ενότητα θα επιχειρηθεί να συζητηθούν και να ερμηνευτούν οι διαπιστώσεις αυτές.

5. Συμπεράσματα και συζήτηση

Η χρήση των λατινοελληνικών κατά την επικοινωνία σε ψηφιακά περιβάλλοντα παρουσιάζει ιδιαίτερο επιστημονικό ενδιαφέρον και έχει απασχολήσει την κοινωνιολογιστική, κυρίως, έρευνα. Το παρόν κείμενο, αξιοποιώντας ευρείας έκτασης ποσοτικά δεδομένα, εστίασε το ενδιαφέρον του στη χρήση τους σε περιβάλλοντα σύγχρονης διαδικτυακής επικοινωνίας (Chat Rooms) από παιδιά ηλικίας 14 – 16 χρόνων (συλλογή δεδομένων το 2006). Πρόκειται για παιδιά που γεννήθηκαν ανάμεσα στο 1990-1992, είναι επομένως η πρώτη γενιά που μεγάλωσε με το διαδίκτυο και που δεν πρέπει λογικά να έχει τους τεχνικούς περιορισμούς στη χρήση του ελληνικού αλφαβήτου, με δεδομένο το γεγονός ότι το Unicode καθιερώνεται από τα τέλη της δεκαετίας του 1990 και ύστερα.

Από την ανάλυση που προηγήθηκε αναδεικνύονται ενδιαφέροντα στοιχεία που ενισχύουν κάποιες διαπιστώσεις άλλων ερευνών, αλλά αναδεικνύουν και νέα ζητήματα. Το πρώτο από αυτά έχει σχέση με τη συχνότητα χρήσης: προκύπτει με σαφήνεια ότι το λατινικό αλφάβητο χρησιμοποιείται σε πολύ μεγαλύτερη έκταση σε σχέση με το ελληνικό στα περιβάλλοντα σύγχρονης επικοινωνίας και αυτό είναι ανεξάρτητο από τον τύπο σχολείου στο οποίο φοιτούν τα παιδιά και την κοινωνική ομάδα στην οποία ανήκουν. Η διαπίστωση αυτή έχει ιδιαίτερο ενδιαφέρον, αν λάβουμε υπόψη ότι τα παιδιά αυτά εξοικειώθηκαν με τις Νέες Τεχνολογίες μετά από το 2000, όταν δηλαδή τα προβλήματα με την ελληνική γραφή ξεπεράστηκαν σε σημαντικό βαθμό. Δεν διαθέτουμε προηγούμενες ευρείας έκτασης ποσοτικές έρευνες για να διαπιστώσουμε αν υπάρχει αύξουσα ή φθίνουσα τάση, μπορούμε όμως να πούμε πια με

μεγαλύτερη βεβαιότητα ότι η χρήση του λατινικού αλφαβήτου δεν σχετίζεται απλά και μόνο με τεχνικούς περιορισμούς.

Το δεύτερο συμπέρασμα είναι ότι τα λατινοελληνικά δεν αποτελούν απλώς μια γραφηματική ποικιλία που χρησιμοποιείται γενικώς από τα νέα παιδιά. Χρησιμοποιείται πρωτίστως από την ομάδα των παιδιών που έχουν δύο βασικά χαρακτηριστικά: έχουν μακροχρόνια και σε μεγαλύτερο βαθμό εξοικείωση με τους υπολογιστές και χρησιμοποιούν σε μεγαλύτερη έκταση την αγγλική γλώσσα (βλ. Spilioti 2009, Tseliga 2007) στην καθημερινότητά τους. Αλλά αυτά τα παιδιά προέρχονται από πιο προνομιούχες κοινωνικές ομάδες, όπως έχει διαπιστωθεί και από την ανάλυση του συνόλου των δεδομένων της συγκεκριμένης έρευνας (Κουτσογιάννης 2011). Το ερώτημα, επομένως, είναι εύλογο: γιατί αυτές οι κοινωνικές ομάδες να χρησιμοποιούν σε μεγαλύτερο βαθμό το λατινικό και όχι το ελληνικό αλφάβητο;

Λαμβάνοντας υπόψη και τα συνολικά δεδομένα της συγκεκριμένης έρευνας (Κουτσογιάννης 2011), θα μπορούσαμε να πούμε ότι η συγκεκριμένη κοινωνική ομάδα αντιλαμβάνεται πολύ πιο γρήγορα τις αλλαγές που παρατηρούνται στους γραμματισμούς της εποχής μας με ισχύ και αναπτύσσει στρατηγικές προσαρμογής των παιδιών της στα νέα δεδομένα. Έτσι, παράλληλα με τον παραδοσιακό σχολικό γραμματισμό, αναπτύσσουν πρωτοβουλίες λειτουργικής εξοικείωσης των παιδιών τους με δύο άλλους παγκόσμιους γραμματισμούς: αυτόν που σχετίζεται με τον κόσμο των Νέων Τεχνολογιών και αυτόν που έχει σχέση με την αγγλική γλώσσα ως παγκόσμια γλώσσα επικοινωνίας. Η παρούσα έρευνα έδειξε ότι οι συγκεκριμένοι γονείς αναπτύσσουν στρατηγικές συστηματικής προετοιμασίας των παιδιών τους από μικρή ηλικία μέσω της αγοράς υπολογιστών και μέσω της εκμάθησης της Αγγλικής. Στο πλαίσιο των στρατηγικών αυτών επιλέγουν και τα συγκεκριμένα ιδιωτικά σχολεία, τα οποία υπόσχονται να ανταποκριθούν καλύτερα στις νέες αυτές ανάγκες τους (Κουτσογιάννης 2011, Koutsogiannis & Adampa 2012, Bulfin & Koutsogiannis 2012). Έτσι, τα συγκεκριμένα παιδιά εξοικειώνονται σε μεγαλύτερα ποσοστά και από πολύ πιο νωρίς με τον ψηφιακό γραμματισμό και το γραμματισμό της Αγγλικής ως παγκόσμιας γλώσσας.

Δεν θεωρώ, βέβαια, ότι το φαινόμενο των λατινοελληνικών είναι αποτέλεσμα της στρατηγικής αυτής. Θεωρώ ότι τα λατινοελληνικά έχουν μετατραπεί πια σε νεανική γραφηματική ποικιλία που σηματοδοτεί το σταδιακό πέρασμα από το συμβατικό κόσμο της γραπτής επικοινωνίας στον κόσμο της διαδικτυακής επικοινωνίας (βλ. και Androutsopoulos 2009), κυρίως της σύγχρονης με βάση τα δεδομένα της παρούσας έρευνας. Το πέρασμα αυτό σηματοδοτείται από την υιοθέτηση όψεων των δύο γραμματισμών με παγκόσμια ισχύ: αυτόν που έχει σχέση με τις Νέες Τεχνολογίες και αυτόν που έχει σχέση με την αγγλική γλώσσα, αφού χρησιμοποιείται το δικό της αλφάβητο. Το βήμα της συμβολικής ταύτισης με τα νέα παγκόσμια δεδομένα στο χώρο του γραμματισμού είναι που κατά βάθος πραγματώνει η ελληνική νεολαία, υιοθετώντας τη χρήση των λατινοελληνικών (βλ. και Tseliga 2007, Spilioti 2009). Πρόκειται για συμβολική πράξη του συνανήκειν σε μια νεανική κοινότητα¹¹ που τείνει να αυτοπροσδιορίζεται και με άξονα συγκεκριμένες γραφηματικές πρακτικές γραμματισμού, οι οποίες μεταφέρουν συγκεκριμένο αξιακό φορτίο.

Με βάση τις παραπάνω διαπιστώσεις θα μπορούσαμε να πούμε ότι διαγράφεται η εξής δυναμική: με δεδομένο το αξιακό φορτίο που μεταφέρει η συγκεκριμένη γραφηματική επιλογή για τα νέα παιδιά, όσο περισσότερο εξοικειώνονται οι νέοι με τη χρήση των υπολογιστών και την ευρεία χρήση της αγγλικής στο διαδίκτυο, τόσο και πιο αυτονόητη θα θεωρείται η χρήση των λατινοελληνικών στα σύγχρονα περιβάλλοντα επικοινωνίας. Το γεγονός ότι τα συγκεκριμένα παιδιά της συγκεκριμένης κοινωνικής ομάδας χρησιμοποιούν τη λατινική γραφή σε μεγαλύτερη έκταση σχετίζεται με το γεγονός ότι πληρούν τις δύο αυτές προϋποθέσεις από πολύ πιο νωρίς και σε πολύ μεγαλύτερο βαθμό σε σχέση με τα άλλα.

Η παραπάνω διαπίστωση δεν σημαίνει ότι η δυναμική αυτή προδιαγράφει απολύτως και το μέλλον της λατινικής γραφής κατά την παραγωγή ελληνικού λόγου σε ψηφιακά περιβάλλοντα. Ποικιλία παραγόντων μπορεί να παίξει σημαντικό ρόλο σε αυτό και να μεταβάλει το αξιακό φορτίο της συγκεκριμένης επιλογής ως σημειωτικού πόρου, κάτι που δεν μπορεί να είναι προβλέψιμο.

ABSTRACT

Today Arta Avlona (Vlorë) is the northernmost Greek-speaking village in the Albanian territory. The linguistic findings of an on-site research, in conjunction with supplementary historical and ethnographic data, point to an independent idiom of Modern Greek, sharing certain characteristics with the other idioms, without, however, identifying itself with any of them. Its archaic character is reflected in the vocabulary and in the specific concordances with the Greek dialect of South Italy, the idioms of Ionian Islands, Epirus etc., as well as in the early and continuous contacts and interactions with other languages in the specific geographic region.

Keywords: Greek-speaking areas in Albania, Greek dialects, Contact linguistics

Αντικείμενο της ανακοίνωσης αυτής αποτελεί το γλωσσικό ιδίωμα της Άρτας Αυλώνα (αλβ. Nártë) και δευτερευόντως του διπλανού χωριού Σβερέτζι (αλβ. Zvërnéc), που από κοινού απαρτίζουν τη βορειότερη –εντός της Αλβανίας- ελληνόφωνη εστία.

Χάρτης με τις ελληνόφωνες εστίες της Αλβανίας. Από βορρά προς νότο: 1. Άρτα Αυλώνα και Σβερέτζι 2. Χιμάρα-χωριό, Δρυμάδες, Παλιάσα 3. Περιοχή Αγίων Σαράντα, Δελβίνου, Δρόπολης, Πωγωνίου.

Αναφερόμενος στην Άρτα Αυλώνα (στο εξής ΑΑ), ο Αραβαντινός (1856 Β': 121-122) την καταγράφει ως *Παλαιά Άρτα* και σημειώνει: «Κώμη τοῦ Αὐλῶνος κειμένη $\frac{3}{4}$ τῆς ὥρας μακρὰν τῆς ἀκτῆς ὅπου ὄρμος τις Πόρτο Νόβον καλούμενος, ἐν ᾧ σώζονται ἐρείπια ἀρχαίας ἀκροπόλεως τῆς πάλαι Ἀρνίσης, ἐξ ἧς καὶ ὠνομάσθη Ἄρτα, ἢ τοῦ Ὀρεστικοῦ Ἄργους, ἐφ' ᾧ καὶ κατὰ μίμησιν τῆς Ἀμφιλοχικῆς Ἄρτης προσηγορεύθη οὕτως καὶ αὕτη».

Επίσης, σύμφωνα με έκθεση του Ελληνικού Προξενείου Αυλώνας προς το Υπουργείο Εξωτερικών, της 9 Μαΐου 1903, «Τό χωρίον Ἄρτα μίαν ὥραν τοῦ Αὐλῶνος ἀπέχον, οἰκεῖται ὑπὸ χιλίων κατοίκων ἀπάντων ἐλληνοφόνων καὶ ὀρθοδόξων. Ἡ ἀλβανικὴ γλῶσσα ἐν αὐτῷ εἶναι ἄγνωστος. Ἔχει δύο ἐκκλησίας καὶ σχολεῖον» (Κόντης 1995: I 103).

Άρτα Αυλώνα (Nartë) και Σβερέτσι (Zvërnec).

Βασικές δραστηριότητες των κατοίκων της ΑΑ υπήρξαν η αλιεία, η παραγωγή αλατιού και η γεωργία. Το χωριό βρίσκεται δίπλα στη λιμνοθάλασσα που φέρει το ίδιο όνομα, ενώ παλαιότερα, σύμφωνα με τα λεγόμενα των ηλικιωμένων, αποτελούσε νησίδα μέσα στη λίμνη, εξασφαλίζοντας καλύτερες συνθήκες άμυνας για τους κατοίκους του. Το ελληνικό σχολείο στην ΑΑ έκλεισε μετά την ίδρυση του ανεξάρτητου αλβανικού κράτους. Στα χρόνια του κομμουνιστικού καθεστώτος απαγορευόταν η δημόσια χρήση της ελληνικής και η αναφορά στην ελληνικότητα των κατοίκων του χωριού. Με τον τρόπο αυτό, μέχρι το 1990, οι Αρτινοί μιλούσαν το τοπικό τους ιδίωμα ανεπηρέαστοι από τη γραπτή αλλά και από την προφορική κοινή νεοελληνική (ΚΝΕ). Το άνοιγμα των συνόρων και οι συχνές επαφές με την Ελλάδα οδήγησαν στη γρήγορη διάδοση της ΚΝΕ στους νεότερους και στη

συρρίκνωση του ιδιώματος. Οι Αρτινοί είναι γνωστοί στην ευρύτερη περιοχή για τη φιλομάθεια και την εργατικότητα τους¹.

Σε προηγούμενη εργασία μας (Κυριαζής & Σπύρου, υπό έκδοση), με σημείο αναφοράς τα ισόγλωσσα που προτείνει ο Τζίτζιλής για την κατάταξη των νεοελληνικών διαλέκτων (Τζίτζιλής, υπό έκδοση), σκιαγραφήσαμε τα βασικά γλωσσικά χαρακτηριστικά του ιδιώματος της ΑΑ, τα οποία επιγραμματικά είναι:

1. Βόρειος φωνηεντισμός (με αρκετές εξαιρέσεις). 2. Έρρινη προφορά των συμπλεγμάτων *μπ*, *ντ*, *γκ* / *γγ*. 3. Ουρανοφανειακά προστριβόμενα *tʃ*, *dʒ* : [*dʒadés*] και τριβόμενα *ʃ*, *ʒ* : *ισάδα* [*iʃáða*], *ζούσαν* [*zúsan*]. 4. Έλλειψη φωνολογικής διάκρισης μεταξύ των απλών και διπλών συμφώνων. 5. Έλλειψη ουράνωσης με τη μορφή τσιτακισμού. 6. Απουσία ασυνίζητων τύπων. 7. Τήρηση του νόμου της τρισυλλαβίας. 8. Τάση για ανοιχτές συλλαβές: *ότανε*, *τον ταβάνε*, *την στιάνε*. 9. Μη διατήρηση του τελικού *-ν* των ουσιαστικών ουδετέρου γένους. 10. Έλλειψη της μορφολογικής διάκρισης ανάμεσα στην ονομαστική και στην αιτιατική πληθυντικού των αρσενικών σε *-ος* (...*ήφερνε τς κεφάλοι τέτοιους...* *Φυλακή εβανάνε καμπόσοι* [=καμπόσους]) και *-ός* (*οι Αρτινοί*, *τς Αρτινοί*). Το χαρακτηριστικό αυτό έχει επεκταθεί και στα αρσενικά σε *-ας* και *-ης*, στο βαθμό που σχηματίζουν τον πληθυντικό όμοια με τα δευτερόκλιτα (*ι άντρας*, *οι άντριοι*, *τς άντριοι*· *ι στρατιώτς*, *οι στρατιώτ(οι)*, *τς στρατιώτ(οι)*). 11. Ερωτηματική αντωνυμία *τί*. 12. Χρήση ενός κατά βάση διμελούς συστήματος δεικτικών αντωνυμιών. Τα δεικτικά ενισχύονται πολλές φορές από την παρουσία του δεικτικού/επιτατικού μορίου *-για*. Στην ΑΑ η αντωνυμία *εκείνος*, αντίθετα από την *τούτος*, χρησιμοποιείται πολύ σπάνια και στη θέση της μπαίνει η *αυτός*, η οποία έχει διττή λειτουργία, κοντινής και μακρινής, ανάλογα με την περίπτωση, δείξης. 13. Μη ανάπτυξη /*γ*/ στη ρηματική κατάληξη *-έω* (*-βω*). 14. Ρηματικές καταλήξεις *-ουν* και *-αν* του *γ'* πληθ. του ενεργητικού ενεστώτα και των παρελθοντικών χρόνων: *γράφ(ου)νε*, *εγραψάν*, *εγραψάν* (Vido 2000: 109). 15. Χρήση της κατάληξης *-έτε* στο β' πληθ. του ενεργητικού παρατατικού και αορίστου: *εγραφέτε*, *εγραφέτε* (Vido 2000: 109). 16. Μεσοπαθητικός αόριστος σε *-ηκα*. 17. Σχηματισμός του ενικού των οξύτονων ρημάτων της α' τάξης με φωνηεντικές επεκτάσεις: *τραβάει το τουμάρ' απ' τα χέλια...* *Τα χτυπάει με τν ουρά*. 18. Τα οξύτονα ρήματα της α' τάξης σχηματίζουν σιγματικό παρατατικό: *πουρβατούσαν*, *αβδούσαν*. 19. Τάση διατήρησης της άτονης συλλαβικής αύξησης (*επάντρεψα*, *επήρα*, *εκανάμ*, *ελεγάμε*, *εβανάμε*, *αλλά και πηγαινάμ*, *βανάμ*, *τέκνεψα*, κ.ά.). 20. Στερητικά επίθετα σε *-(σ)τος* (*άβραστος*, *αχάλαστος*, *αδούλευτος*). 21. Έλλειψη χρήσης πρωτότυπων ουσιαστικών στη θέση υποκοριστικών της Κοινής ή και αντίστροφα: *αυλί* 'τεμάχιο από καλάμι που χρησιμοποιείται για να κατασκευαστεί το δίχτυ της τράτας' αντί για *αυλός*. 22. Εκφορά έμμεσου αντικειμένου συνήθως στη γενική: *Όσο* [=ακόμη] *και καζάν τσ-ό-δναμε τς κοπέλας*. 23. Πρόταξη των αδύνατων τύπων της προσωπικής αντωνυμίας σε όλες τις εγκλίσεις, εκτός από την προστακτική. 24. Στις εκφράσεις του μη πραγματικού, στο ιδίωμα της ΑΑ φορέας της χρονικής βαθμίδας είναι το ρήμα και όχι το γραμματικοποιημένο μόριο (*Δα πήγαινε ι Γκάκιους*, *δα πήγαινε... αν ήξερε...*).

Εκτός από τα παραπάνω, το ιδίωμα της ΑΑ παρουσιάζει και τις εξής ιδιαιτερότητες: παρατηρείται υπερωική προφορά του *λ*, το οποίο σε ορισμένες περιπτώσεις, και ευρισκόμενο δίπλα σε *α* ή *ο*, τρέπεται σε *μ* (*μαλώ* 'λαλώ', *βάμτος* 'βάλτος', *άμος* 'άλλος', *κμώθω* 'κλώθω' κτλ.). Σε άλλες περιπτώσεις το *λ* αποβάλλεται: *ουρί* 'λουρί', *όντζα* 'λόντζα', *κουκούθ* 'κολοκούθι', *λιμοπούα* 'λιμνοπούλα', *απαριά* 'απλαριά', *κουσαριά* 'κλώσσα' πβ. *κλωσσαριά*, *βράχους* 'βράχλος', *δάχους* 'δάχτυλος'. Όμως *καλός*, *τέν δούβλωνε* 'των τούβλων' κ.ά. Στη σημερινή κατάσταση του ιδιώματος η τροπή αυτή δεν φαίνεται να έχει πλέον γενικό χαρακτήρα κι αυτό οφείλεται είτε στην πίεση της ΚΝΕ είτε σε ενδοσυστημικούς μηχανισμούς που πρέπει να διερευνηθούν. Αντίστοιχη προφορά εντοπίζεται στα ιδιώματα Δρυμού-Μελισσοχωρίου Θεσσαλονίκης, της Α. Ρωμυλίας, στην Τσακωνική κ.ά. (Αλμπανούδης 2009: 129, όπου και η σχετική βιβλιογραφία). Το χαρακτηριστικό αυτό του ιδιώματος ΑΑ δεν φαίνεται να αποκτήθηκε σε συνθήκες γλωσσικής επαφής, αφού η αλβανική παρουσιάζει παρόμοιες τροπές μόνο σε απομακρυσμένα γεωγραφικά ιδιώματά της, όπως είναι τα αρβανίτικα (Γιοχάλας 2011: 131-32).

Ένα κεντρικό φωνήεν *ə* εμφανίζεται σε δύο περιπτώσεις: α) ως αναπτυκτικό πριν από υστερογενή συμπλέγματα με πρώτο μέλος υγρό (*καρφά* 'κρυφά', *έπάλνα* 'έπλυνα') και β) ως αποτέλεσμα κεντροποίησης των *ο*, *ε* δίπλα σε ένηχο ή συριστικό (*τέν δούβλωνε*, *επέρνάνε*, *γκέζεριζε* 'γκιζέριζε', *εμείς-ε*, *ομπρός-ε*, *ι καμμένος-ε*). Σημειώνουμε ότι στο τέλος της *λ*, εμφανίζεται συχνά και το *ι* (*κάλτσες* *μάλλινεσ-ι*, *εμάς-ι*, *από αυτουνούσ-ι*).

¹ Χρήσιμες πληροφορίες για την ιστορία του χωριού, τη γλώσσα και τις παραδόσεις του, βρίσκει κανείς στα έργα του Βασίλη Βίντου (Vido 2000, 2009). Το βασικό του έργο (2000) μεταφράζεται ήδη στην ελληνική. Από τη θέση αυτή θα ήθελα να τον ευχαριστήσω για την πολλαπλή βοήθεια που μου προσέφερε κατά τη συλλογή γλωσσικού υλικού από την ΑΑ.

Από τις τροπές συμφώνων και συμφωνικών συμπλεγμάτων αναφέρουμε: $\gamma > \chi$ (*ψυγείο > ψυχείο*), $\delta > \theta$ (*δαγκωσιά > αγκουσιά*), $\theta > \delta$ (βλ. μόριο *δα* του μέλλοντα, που απαντά ευρύτερα στα βόρεια ιδιώματα), $\chi > \theta$ (*χειμ(ι)κό > θειμ(ν)ικό*), *mn > m* (*λιμν' – λιμ, πβ. και λιμπούα*), $\chi n > n$ (*έριχνα – έρινα*), $pj > [c]$ *Αμ' ισύ κια (=πια)* (Vido 2000: 113), *st > ks* (*στερνά - ξερνά*), *sf > fs > ps* (*σφαχτό > *φσαχτό > πασχτό. Σάββατο εψαζάμ τα πασχτά*). Η μετάθεση *sf > fs* που πιστοποιείται από τον τύπο *φσογγίζω* του ιδιώματος απαντάται και σε μικρασιατικά ιδιώματα (καπαδοκικά κ.ά.) και στη Β. Πάφο.

Οι ακολουθίες *-Φsis* και *-Φzis* εξελίσσονται σε *-Φis*: *θα τα βράεις (βράσεις)...* *Να τς κεράεις (κεράσεις)...* *Πιανς αλατίς (αλατίζεις)*.

Διαφορετικά από άλλα ηπειρωτικά ιδιώματα, στην ΆΑ διατηρούνται τα συμπλέγματα *ρν* και *λν* (*παίρνω, κιτέρνης, χαλνώ* αντί για *παίρω, κίτερος, χαλώ*).

Ένα άλλο γνώρισμα του ιδιώματος είναι η τάση αποβολής του τελικού *ε* από τους ρηματικούς τύπους *α'* προσώπου πληθυντικού στον παρατατικό και τον αόριστο (που απαντά και στα θρακοβιθυνικά): *εγραφτάμ(ε), εγραψάμ(ε), ηθελάμ, ηγλεπάμ(ε)*. *Ελεγάμε, ελεγάμ παραμύθια*. Σχετικά με την επικράτηση του τόνου στην παραλήγουσα και μετά την αποβολή του ληκτικού *ε* στη λήγουσα, έχουμε να παρατηρήσουμε ότι πρόκειται για μεταγενέστερη εξέλιξη τύπων με διπλό τονισμό: *εγραψάμ - εγραψάμε – εγραψάμ*, που αποβάλλουν τον αρχικό τόνο και διατηρούν τον δευτερεύοντα (βλ. Τζίτζιλής, *Εισαγωγή*).

Σε μορφοσυντακτικό επίπεδο ξεχωρίζει η γενικευμένη χρήση του αρσενικού άρθρου *i* (και σπανιότερα *u*), που διαφοροποιεί το ιδίωμα ΆΑ από τα υπόλοιπα ηπειρωτικά ιδιώματα². Η υποχώρησή του στις νεότερες κυρίως ηλικίες είναι αποτέλεσμα της επίδρασης της KNE.

Απαντάνε τ. πληθ. *φίλματα* 'ταινίες' [πβ. αλβ. *filma* 'ταινίες'], *ατόματα, κομμουνιστέ, κομμουνιστέοι*, γενικές του τ. *αντρού μου, τ' αλογού, των κοπελώνε* κτλ. και αιτιατικές όπως *Αϊ-Δημητρίτη, Αϊ-Νικολίτη, Σκούρτη, Μάρτη* κ.ά.

Άλλο σημείο διαφοροποίησης του ιδιώματος είναι και ο σχηματισμός του συγκριτικού βαθμού των επιθέτων με το μόριο (*α*)κόμα (π.χ. *κόμα καλός* αλλά και *κόμα καλύτερος*). Σημειώνουμε ότι παράλληλη δομή, με τη χρήση του *akoma*, βρίσκουμε και στην αλβανική: *akoma më i mirë* 'ακόμα πιο καλός, όμως **akoma i mirë* 'ακόμα καλός'.

Χρησιμοποιείται το επίθετο *μέγας* δίπλα στο *μεγάλος* (*είχαμε ένα όβορον μέγαν, αυλή μεγάλη*) καθώς και η επιθετική κατάληξη *-ιά* αντί για *-ή* (*ακριβιά, χοντριά, χ(λ)ωριά, Αρτνιά, Μπερατνιά* κ.ά.). Επίσης, στα επίθετα διατηρείται η κατάληξη *-ένος* (*-ένιος* στην KNE): *λουμένο* 'αλουμινένιο' (Vido 2000: 127), *βακρένος* 'χάλκινος', *λασπέινος* (Vido 2000: 127), *χουλέινος* 'στο χρώμα της χολής' (Vido 2000: 143) κ.ά.

Σε ό,τι αφορά τις αντωνυμίες, σε λίγες περιπτώσεις διαπιστώσαμε τη χρήση των τύπων *τούνος* και *τούνους* της *τίνος*, που απαντούν και σε άλλα ιδιώματα (θρακοβιθυνικά και αλλού). Αξιοσημείωτη είναι και η ιδιότυπη χρήση από ηλικιωμένα άτομα του *μόνος μου/μας*, χωρίς να γίνεται μορφολογική διάκριση γένους και αριθμού: *Τα δουλενάμ μόνος μας εμείς [τα πανιά], τ' αρματόναμ μόνος μας να το πούμε...* *Έχω πάρει μια φορά έν' αρνί μαναχή μου, μόνος μου...* Η χρήση αυτή οφείλεται πιθανότατα σε επίδραση της αλβανικής, όπου οι αντίστοιχες δομές σχηματίζονται με την αντωνυμία *vetë* (vetë unë 'μόνος/μόνη', vetë ne 'μόνοι/μόνες μας'). Μέσα από παρόμοιες διαδικασίες φαίνεται να προέκυψε και η δομή *Του 'χε μειν καρφί αυτηής*, όπου το *του* έχει επικρατήσει του *της*, όπως στην αλβανική: *i kishte mbetur peng...* (του/της είχε μείνει...).

Από τα αριθμητικά αναφέρουμε χρήσεις όπως *δεκατρίο* *δεκατρίο* (πινακίδα λεωφορείου) ή *ήταν στο δωμάτιο το τέσσορο* καθώς και έναν ιδιόζοντα τρόπο αρίθμησης των εκατοντάδων: *τέσσερις φορές από εκατό ρίζες είχε...* *Οχτώ φορές από εκατό σπίτια...*

Στο ρηματικό σύστημα, αξιοσημείωτη είναι η μορφολογία του ρήματος *είμαι*, του οποίου παραθέτουμε το κλιτικό παράδειγμα ενεστώτα και παρατατικού οριστικής:

Είμαι / είσαι / εν (έντους, έντη, έντο) // *Είμαστε / είστε / εν* και *Ήμαμ / ήσαν / ήταν* (και *ήμαν, ημουνάνε*) // *Ημανέσαν* (και *ημναμέσανε*) / *ησανάσαν / ητανάν*.

Στο ιδίωμα φαίνεται να υπάρχει μια προτίμηση στο σχηματισμό συντελικών χρόνων με το βοηθητικό *είμαι* + μετοχή: *Η κληματιά εν βλασταρισμέν* (Vido 2000: 117), *Εγώ γεννημένη είμαι τον γερό τ' Zog. Το 1918 εγώ είμαι γεννημένη...* *Τα ζούζαλα... εν πιημένα, έχνε πει...*

Αξιοσημείωτοι είναι και οι τύποι *α'* ενικού παρατατικού μεσοπαθητικής: *καθουμνάμ, ερχομνάμ, αφκραζομουνάμ* αλλά και του *α'* ενικού παρατατικού του *είμαι* (*ήμαμ*).

Σε χρήσεις όπως *Εμείς θέλνε να δώκουμ προίκα...* *Όσο και καζάν τσ-ό-δναμε [της νύφης]...* τα ευρύτερα συμφραζόμενα δείχνουν ότι το ρ. *θέλνε* φέρει τη σημασία 'έπρεπε' και συνεπώς έχει γραμματικοποιηθεί. (Πβ. αντίστοιχα την πρόταση *Αυτά θέλ(ου)νε κόψιμο*).

² Στην Ήπειρο, το αρσενικό άρθρο *i* απαντά μόνο στα τουρκογιαννιώτικα.

Από τη μορφολογία του ρήματος αξιοπρόσεκτοι είναι οι τ. *κρυβήνω/-ομαι* (*Κρυβήνουν το ρακί στα μπρούτσα... Κρυβήθηκαν [τα ψάρια] στ' μαλάπα*), καθώς και *ποτώ* 'ποτίζω', *θυμώ* 'θυμάμαι'. Η κατάληξη –*εύ* εμφανίζεται δίπλα σε βάσεις που συνήθως παίρνουν άλλες καταλήξεις: *κερδεύω*, *λοθεύω* (<θολεύω 'θολώνω'), *τεκνεύω* 'αποκτώ παιδιά', ενώ η ύπαρξή της στην ελληνική συμβάλλει στο να εντάσσονται στο συγκεκριμένο κλιτικό παράδειγμα δάνεια ρήματα όπως το αλβανικό *kursej* 'κάνω οικονομία', του οποίου το θέμα του αορίστου είναι *kursev-*: *Μηχανή που κουρσεύ' πολύ [καύσιμα]... Βάλε κι άλλο κρασί. Μη με κουρσεύς εμένα*. Οι –*άρω* και –*έρνω* χρησιμεύουν για τη μορφολογική προσαρμογή ρημάτων από άλλες γλώσσες: –*άρω*: *ντεμασκάρω*, *οπεράρω* 'κάνω εγχείριση', –*έρνω*: *Το λαβράκι ... κοντρολέρνει το δόλο, υποπτεύετ'... Μπούκα, να το πουμ, μπουκέρνει το νιρό... Γετέρνω* (<αλβ. *jetoj* 'ζω'). Από το υλικό μας ξεχωρίζουμε ακόμη προστακτικές του τ. *χώστατε* αντί *χώστε τα*. Παρόμοιες δομές απαντούν σε πολλά νεοελληνικά ιδιώματα.

Στην ακολουθία *να + μη(ν) + Ρ* παρατηρείται η τάση πρόταξης του αρν. μορίου, που είναι συχνή και στην προφορική αλβανική: *Εβανάμ ξβαν... Ήταν μη να βγει και τρίχα στο πρόσωπο... Μη να 'χ' τέτοια καθόλου... Από μας μη να μειδκ' ποδάρ'... Να σ' τα πω, πώς μη να σ' τα πω...! να ριχτώ [ή] μη να ριχτώ...*

Στο ιδίωμα της ΆΑ η έμφαση επιτυγχάνεται συχνά με τη δομή *Ρ + και + Ρ*: *...όλο απ' τη Μιζεκιά επαιρνάνε [νυφάδες]. Βλαχιά δεν επαιρνάν και δεν επαιρνάν... Το κρασί τόπινε και τόπινε το κρασί... Γενοντάν και γενοντάν άσκημα πράγματα...*

Παρόμοια δομή με την παραπάνω, με τη διαφορά ότι το επαναλαμβανόμενο ονομαστικό στοιχείο διαθέτει στη β' εμφάνισή του ένα επιπλέον επιτατικό συστατικό, εντοπίζεται και στα σχήματα *χάρε κι δυόχαρε* 'διάβoλε και τριςδιάβoλε' (Vido 2000: 121), *ορς κι περόρς* 'horr dhe kaluar horrit = αλήτης κι αληταράς' (Vido 2000: 132). Στο ουσ. *Τραντάνφ* 'νυφίτσα' (Vido 2000: 140) ως πρώτο συνθετικό εμφανίζεται, υποθέτουμε, το αριθμητικό τριάντα με επιτακτική χρήση (πβ. τη λ. *Πεντάμορφη*).

Στο ιδίωμα παρατηρείται μεγάλη ποικιλία συνδέσμων: *οσουγκιάν* 'όσο και να 'ναι' (Vido 2000: 132), *δικιμή, δικαυμή* [<εί δέ καὶ μή] *Θα δως τα λεφτά, λέει. Δικαυμή δα τα πληρώσω εγώ...* (Βλ. Andriotis 1974: 222), *πότε* 'όταν' (*Πότε ήμν εγώ κοπέλα, οχτακόσα σπίτια ητανάν*), *όντε* 'όταν' (*Οντε το βγανάμ απ' τον Καβαλλιόνα, να το πνες με τον δενεκέ [το νερό]*), *όνταν* 'όταν' (*Ονταν πήγαινε στον Καβαλλιόνα, έβανε τν δήρα...*), *φάντα* 'όταν' (*Φάντα η καμπάνα απαγορεύκε...*), *μότι* 'μόλις' (*Μότι είχε αρραβωνιαστεί...*), *μόνδι* 'μόλις' (*Μόνδι αντάμωνε τν τράτα...*) κ.ά.

Το μόριο *μη*, σε ορισμένες περιπτώσεις φαίνεται να χρησιμοποιείται διαζευκτικά στη θέση του συνδέσμου είτε: *[Επαιρνάμ απ' το βαρέλι] με τα λιγιένια ... μη κρασί μη τσίπρο...*

Τρεις φορεξές είχα... Κάνα δυο [κουστούμα] τάτζα μεταξωτά φάρε. Ένα κουστούμ μη στα λιγνά μη τέτοια...

Από τα επιρρήματα είναι χαρακτηριστική η (συχνή) χρήση του *πολό* αντί του *πολύ* (*πολό βαρύ τ' αλάτι*), του *βαριτά* αντί *βαριά* (*μορχετάν βαριτά*), του *αλβανά* αντι *αλβανικά* (*μιλούσε αλβανά*), καθώς και επιρρηματικών φράσεων όπως *όπου κι αν* 'παντού' (*έβγαινε [φύτρωνε] όπου κι αν αυτό*), *ένα λοβ* 'μία φορά, κάποτε', *βρουασιές-βρουασιές* 'αρμαθιαστά', *τς καινουργιάς* 'εκ νέου' κ.ά.

Στους ηλικιωμένους παρατηρείται εκτεταμένη χρήση της λ. *μακάρ* ως πραγματολογικού δείκτη: *Τν Τετράδ δεν ετρωγάμ, μακάρ, κρέας... Χτήματα: Είχε, μάκαρ... Το πρωί, το βραδ, μακάρι, πότε θέλανε.*

Στο ιδίωμα γίνεται χρήση του συγκρ. μορίου *σαν* με ονομαστική πτώση, γνωστή κι από άλλα ιδιώματα: *Είναι σαν ι αχνός... Φευγς σαν ι νόρος εθύ*. Αξιοσημείωτη είναι επίσης η χρήση της πρόθεσης *ζον* με ονομαστική: *ζον αυτός μια φουρά* 'αυτός μια φορά ξεχωρίζει' (Vido 2000: 132).

Ενδιαφέρον παρουσιάζουν οι τύποι *να νάρθει...* *Θέλω να νάρθω*, που είναι αποτέλεσμα λαθεμένης επανανάληψης (απαντούν και σε άλλα ιδιώματα), καθώς και οι φαινομενικά πλεοναστικοί τύποι *απ' απ' έκ'* *Στέτο... απ' απ' εδώ* *Ζελιάτων*. ... *Μέχρ'* *ίσα με το μαγαζί*, που προέρχονται από συνδυασμό της πρόθεσης με παγιωμένες επιρρηματικές δομές.

Οι λεξιλογικοί αρχαϊσμοί είναι ένα άλλο βασικό γνώρισμα του ιδιώματος ΆΑ. Παραθέτουμε λίγα μόνο παραδείγματα από τους τομείς αλιείας και αμπελοκαλλιέργειας:

αυλί (<*αυλός*) 'κομμάτι καλάμι που χρησιμοποιείται για να κατασκευάσουμε το δίχτυ της τράτας'. Πβ. Andriotis 1974: 165.

βρούτα 'ψαράκι, μπάφα' (Vido 2000: 118). ΆΑ: *τ' βρούτα, πουν εχ' τς αράδες... [και] ... έχει το κουφάρ σαν μαύρο. Τη λέμε καμιά φορά και βουζοκόκκινο*. Η λ. δεν καταγράφεται από το Ιστ. Λεξ. της Ακαδημίας Αθηνών. Η λ. έχει περάσει και στα διπλανά αλβανικά ιδιώματα: *vrūdë* 'ιδ.' *lloj qefulli me kokë të vogël dhe me vija të zeza në trup*' (Nushi 1991: 269). Η λ. ανάγεται μάλλον στο *βρύττος*: *είδος έχίνου πελαγίου, ὃς φησιν Ἀριστοτέλης· οἱ δὲ ἰχθῶν* Ησύχιος.

γάστρος < *γάστρον* πβ. Andriotis 1974: 193, Psara u.a. eine Fischart. Σύμφωνα με το ΙΑ Δ/2 259, *γάστρος* (ο) 'ο ἰχθύς κέφαλος...' Λευκ., Σάμ., Στερελλ. τ. *γάστρος* στο Μεσολόγγι... Η λ. στο αλβ. ιδίωμα της Μουζακιάς: *gastro*, -ja αρσ. 'είδος κεφαλόπουλου' (Nushi 1991: 72).

γνέφια ‘σύννεφα’, πβ. Andriotis 1974: 392, *νέφιον*, όπου τ. *γνέφι* Ereik, Kerk, Oth, Pelop, *γνέφ’* Leukas.

λασά ‘λέγεται το κύμα, που χτυπάει και πάνει αλάργα’ < αρχ. *ελασία* Andriotis 1974: 232, όπου διαφ. ιδίωμ. τύποι *‘λασά Kythn, ‘λασά Sam*. Η σημασία αυτή απαντά μόνο στην ΑΑ. Η λ. *ελασία* στη Bona.

νησσάρ’ ‘πάπια’, Andriotis 1974: 393, λ. *νησσάριον*, όπου *νησσάρι* Ep, Ereik., Kerk, Oth. Pax u.a. *τούμπανος* ‘πελεκάνος’, cf. *τύπανος* ‘an unknown bird’ LSJ 1834. Η λ. και στο ελλ. ιδίωμα της Θεσπρωτίας με την ίδια σημ. (Μπόγκας 1966 Β’: 188).

Από το χώρο της αμπελουργίας και γενικότερα των καλλιέργειών:

βράγα ‘ρόγα’. Ο Rohlf (1964: 435, λ. *ράζ (ράγα)*), δίνει για Τάραντα τ. *νράνα, νρά, grá* ‘chicco di uva’, που τους ανάγει σε αρχ. τ. **βράγα* (vielleicht aus *φράγα* ?).

βρούκουλους ‘ακρίδα’ (*βροῦκος* ‘*ἀκρίδων εἶδος*. Ησύχιος, Andriotis 1974: 188, λ. *βρούκος*).

μάχτρα ‘σκάφη για την παρασκευή ψωμιού’ (Ησύχιος, Andriotis 1974: 364, λ. *μάκτρα*).

Σημειώνουμε ότι το ιδίωμα της ΑΑ με τις τελευταίες λέξεις δημιουργεί επιμέρους λεξιλογικά ισόγλωσσα με τα ελληνικά της Κάτω Ιταλίας κι αυτό αποτελεί μια ισχυρή ένδειξη της διαχρονικής παρουσίας του στο συγκεκριμένο γεωγραφικό χώρο. Επίσης, διαπιστώνουμε πολλά κοινά λεξιλογικά στοιχεία με τα υπόλοιπα ιδιώματα της Ηπείρου, με εκείνα των Επτανήσων και της υπόλοιπης ελληνόφωνης επικράτειας. Για παράδειγμα, εκτός από τις λ. *γνέφια, λασά, νησσάρ’*, που αναφέρθηκαν ήδη, τη λ. *βράχους* (< *βλάχρον*, Ησύχιος) της ΑΑ τη βρίσκουμε είτε ως προσηγορικό είτε ως τοπωνύμιο στην Κ. Ιταλία: *to lāhri, Lahrito* (Rohlf 1964: 87, λ. *βλάχριον*, και **λάχριον* 291)· στη Χιμάρα-χωριό: *βράχνα η* (Μπόγκας 1966 Β’: 82)· στην Κέρκυρα: *βράχλο το, βλάχλα η, βράχλα η*· στους Παζούς: *βράχλος ο*· στην Ικαρία *βλήχα*· στην Τσακωνία *βάσα* (Andriotis 1974: 177, λ. *βλάχρον*)· στην Πολίτσιανη Πωγωνίου και τη Δούβιανη Δρόπολης: *Βράχλα* (Κουλίδας 2005 : 73, 168)· στη Δρόβιανη: *Βλαχούρια* (Κουλίδας 2005: 264) κτλ.

Η λ. *βρούκος* (>*βρούκουλους*) απαντά σε Απουλία, Κύπρο, Πελοπόννησο (Μάνη) καθώς και (ως *βρούχος*) σε Χίο, Κρήτη, Ρόδο, Τσακωνία (*βρούχο*) κτλ. Η λ. *βρούλλο* (<αρχ. *βροῦλλον*), πβ. *βρουαδιά* ‘αρμαθιά’ στην ΑΑ, σε Καρπαθο, Ρόδο, Απουλία, Καλαβρία, Καπαδοκία (Andriotis 1974: 188).

Άλλοι λεξιλογικοί αρχαϊσμοί του ιδιώματος ΑΑ είναι και οι λ. *σύν’φο* ‘κουινάδα’ (<αρχ. *σύννυφος*, Andriotis 1974: 536) και *τύμπανος* ‘ρόδα με ντουλαπάκια, για την άντληση νερού απ’ τη λίμνη και το πέρασμά του στο αυλάκι’, πβ. *τύμπανον* ... III. (In a machine) ‘drum, roller’ (LSJ 1834), καθώς και *τουμπάν’* ‘αυλή της εκκλησίας’ (Vido 2000: 140), πβ. *τύμπανον* IV. (Archit.) ‘the sunken triangular space enclosed by the cornice of the pediment, the square panel of a door’ (LSJ 1834).

Στο λεξιλόγιο του ιδιώματος βρίσκουμε ίχνη της λατινικής και των νεολατινικών γλωσσών, όπως: *βλίκους* ‘αφαλός’ < λατ. *umbilicus*, *φρούγκους* ‘δοθήνη’ < λατ. *furunculus* (Vido 2000: 149), *γιουβάρ’* ‘βιβάρι’ < λατ. *vivarium*, *μπουνόρα* ‘νωρίς’ < ιτ. *a buon ora*, κτλ.

Λόγω της γεωγραφικής του θέσης, το ιδίωμα φαίνεται να έχει δεχτεί πρώιμες σλαβικές επιδράσεις τόσο από τα βορειοδυτικά όσο κι από τα νοτιοανατολικά της Βαλκανικής. Και τα γύρω αλβανικά ιδιώματα είναι έντονα επηρεασμένα από τη σλαβική. Από το λεξιλόγιο της αλιείας και τις ονομασίες που σχετίζονται με τη λιμνοθάλασσα, αναφέρουμε ενδεικτικά:

γκλάβους (γκλάβος) ‘χοντρό χέλι’ (Vido 2000: 119). Η λ. δεν μαρτυρείται σε άλλα ελληνικά ιδιώματα (το ΙΛ, E/1 230, δίνει μόνο τη λ. *γκλάβα* ‘κεφάλι’ < σλ. *glava*), αλλά τη βρίσκουμε στο Κοσσυφοπέδιο (*gllavo* ‘Fischart’, Ylli 1997: 81, *gllavë*).

λοβ ‘φορά’ *ένα λοβ* ‘μια φορά, κάποτε’ (Η λιμ *έχ’* ψοφής *ένα λοβ* και το καλοκαίρ που θυμούμαι εγώ...), «ενδημική» λέξη που σχετίζεται με τη σλαβ. λ. *лов* ‘κυνήγι, άγρα’, παλαιοβουλγ. *ловъ* (БЕР 3, 419)³.

νόρος ‘πλι κι αυτό. Βουτάλ’, στο γκρι. ‘Έχ’ τα πόδια στραβά’ < σερβ. *нор* ‘Vogelart am Shkodrasee’ (Ylli 1997: 173, *nor*).

Στο ιδίωμα ΑΑ έχει εισχωρήσει επίσης και το σλαβικό επίθημα –οβ-, το οποίο σχηματίζει όχι μόνο ανδρωνυμικά (*Παντελόβα, Καμπερόβα*) αλλά και ουσιαστικά και επίθετα θηλυκού γένους (*ακτσόβα* ‘γυναίκα που μαγειρεύε σε γάμους’, *μπουνταλόβα* ‘χαζή’ κ.ά.).

Τα τούρκικα δάνεια του ιδιώματος παρουσιάζουν ενίοτε τύπους που δεν τους βρίσκουμε στα όμορα αλβανικά ιδιώματα και στα άλλα ιδιώματα της Ηπείρου:

μπαχτσάς ‘μπαχτσές’, πβ. διαλ. τ. *bahca* της λ. *bahçe* (Redhouse) καθώς και αλβ. *bahçe*,

³ Ευχαριστώ τον καθηγητή Χρ. Τζιτζιλή για την επισήμανση.

νισαστάς / *νισεστάς* ‘νισεστές’, πβ. τ. *nišasta* της περσικής αρχής λ. *nišasta* ‘starch (from wheat etc., used for food’ (Redhouse) και αλβ. *nisheshte*. Το λεξικό του Redhouse δεν έχει τ. *hazna* δίπλα στη λ. *hazne* ‘reservoir’, αλλά η ύπαρξή του δεν αποκλείεται, αφού στην ΑΑ απαντά λ. *χασνάς*.

Ευρισκόμενο σε αλβανόφωνο κυρίως περίγυρο, το ιδίωμα ΑΑ δέχτηκε πολλές επιδράσεις από την αλβανική, που φαίνονται σε όλα τα γλωσσικά επίπεδα, και ιδιαίτερα στο λεξιλόγιο. Τις τελευταίες δεκαετίες του 20ού αι., ιδίως κατά την περίοδο 1945-1990, διαμορφώθηκαν συνθήκες μιας όλο και πιο ασύμμετρης διγλωσσίας. Αποτέλεσμα της κατάστασης αυτής είναι και η σχετικά συχνή εμφάνιση γραμματικών λέξεων αλβανικής προέλευσης, όπως οι *φάρε* ‘καθόλου, διόλου, εντελώς’ (<fare), *ας* ... *ας* ‘ούτε ... ούτε’ (<as), *μεζί* ‘μετά βίας’ (<mezi), *dot, dótis* (*Δεν τηραζάμ dot...* ‘δεν μπορούσαμε να δούμε’), καθώς και λ. με συχνή εμφάνιση *β(ου)λά* ‘αδερφέ’ και *βουλάκο* ‘αδερφάκι’ (< vëlla, vëllako), *μπίγια* ‘κόρη’ (< bijë), *βάσα* ‘κοπελιά’ (<vashë), που χρησιμοποιούνται για δήλωση οικειότητας.

Η νεότερη γενιά της εποχής «τς παρτίας» (του κόμματος) είχε συνηθίσει σε ένα ιδιότυπο, πολλές φορές υβριδικό και «πλούσιο» σε σημασιολογικούς αλβανισμούς, λεξιλόγιο: *α-šfriřetëzár-istos* ‘ανεκμετάλλευτος’ (<shfrytëzj ‘εκμεταλλεύομαι’), *ψένομαι* ‘ωριμάζω’ (για φρούτα) κατά το αλβ. *riqem, en για βγάλσιμο τα μάτια κι αυτή* ‘είναι διαβόλου κάλτσα’, κατά το *ësht’ për t’i nxjerrë sytë* κτλ.

Πολλά είναι και τα ελληνικά στοιχεία στα όμορα αλβανικά ιδιώματα. Για παράδειγμα, ο Nushi (1991: 71, 269) καταγράφει στη Μουζακιά λέξεις όπως *galishá* [gališá] ‘άμπωτη’ και *vrúdë* [vrúda] ‘είδος κεφαλόπουλου’, που επιχωριάζουν στην ΑΑ ως *βγαλσά* και *βρούτα*. (Για περισσότερα παραδείγματα βλ. Tzitzilis 1997).

Το τοπωνύμιο Narda⁴ το βρίσκουμε για πρώτη φορά καταγεγραμμένο το 1520 σε χάρτη τούρκου περιηγητή (Vido 2009: 49), ενώ δεν απαντά στο χρυσόβουλο του Ανδρόνικου Παλαιολόγου Β΄, του 1307, που αφορούσε ζητήματα δικαιοδοσίας της επισκοπής Κανίνων. Όμως στο χρυσόβουλο αυτό αναφέρονται τα «εις τὸν Αὐλῶνα ἀλκυῆς τηγάνια τέσσαρα» (Alexander 1941: 180), που σημαίνει ότι οι αλυκές της Άρτας λειτουργούσαν την εποχή εκείνη. Στην ΑΑ, για την ακρίβεια σε σημείο του λόφου όπου βρίσκεται σήμερα το Σβερέτς, οι ψαράδες αναφέρουν το τοπωνύμιο *Παδιακουτήρ*, που το ονομάζουν και *Μπούντα* (< ιταλ. punta). Πιστεύουμε ότι η λ. *Παδιακουτήρ* αναλύεται ως **Πάγιο Ακροτήρι*⁵, και με βάση το δεδομένο αυτό σχετίζουμε την ονομασία Άρτα ή Narta με τη σλαβική λ. *гътъ*, που σύμφωνα με τον Šmilauer (1970: 155) ως τοπωνύμιο απαντά με τις σημ. “Bergspitze, Anhöhe – μύτη βράχου, ύψωμα” και “Кар - κάβος”. Τοπωνύμιο Narta βρίσκουμε και σε άλλα σημεία του σλαβόφωνου χώρου (Šmilauer ό.π.). Σημειώνουμε ότι ο Malingoudis (1981: 98) ανάγει στη ρίζα αυτή και το τοπωνύμιο Άρτος (ein steiler Hügel ‘απόκρημνος λόφος’) της Πελοποννήσου.

Ξεκινώντας και πάλι από τις ιδιότητες της ακτής ή και των υδάτων δίπλα σ’ αυτή, το οικωνύμιο Σβερέτς, τ. *Зβјрѣтс*, αλβ. *Zvërnéc*, που μέχρι σήμερα το συνέδεαν με την παλαιосλαβική λ. *звѣрь* ‘αγρίμι’ (БЕР I 625), μπορεί να ερμηνευθεί διαφορετικά. Ο Šmilauer (1970: 191) ανάγει το τοπωνύμιο *Zvirec* (που απαντάει στη Σλοβενία) στην παλαιосλαβική λ. *вирь*, η οποία έχει δευτερο τύπο *извирь* και σημ. ‘νεροστρόβιλος, βαθύ μέρος στη λίμνη, ποτάμι, βάλτος, πηγή’. Ονομασίες με παραπλήσιο περιεχόμενο απαντάνε στην ευρύτερη περιοχή της ΑΑ (βλ. το αρχ. *Αυλών*⁶, αλλά και το *Πόρος*).

Η παραπάνω ερμηνεία του τοπωνυμίου Άρτα θέτει σε νέα βάση την παράδοση που συνδέει την ίδρυση της Άρτας Αυλώνα με την εγκατάσταση στο σημείο αυτό ελληνόφωνων πληθυσμού που ήρθε από την Άρτα του Αμβρακικού κατά τα χρόνια της Τουρκοκρατίας.. Το γεγονός ότι έχουμε μια συνέχεια στη διαχρονική ονομασία του συγκεκριμένου σημείου (**Πάγιο Ακροτήρι* > *Παδιακουτήρ* – *Άρτα* - *Μπούντα*)⁷ συνάδει και με τις γλώσσες των αλλόφωνων πληθυσμών που πέρασαν από ή εγκαταστάθηκαν στα μέρη αυτά.

Κλείνοντας τη σύντομη αυτή παρουσίαση, θα θέλαμε να τονίσουμε ότι το γλωσσικό ιδίωμα της ΑΑ προσφέρεται για περαιτέρω διερεύνηση και μελέτη, τόσο από τη σκοπιά της ιστορικής γλωσσολογίας όσο και από τη σκοπιά των γλωσσικών επαφών.

Πρώτο και βασικό χαρακτηριστικό του ιδιώματος αυτού είναι η συντηρητικότητά του, που ερμηνεύεται με βάση την περιφερειακή γεωγραφική του θέση. Χάρη σε αυτήν παρουσιάζει επιμέρους

⁴ Στο πρόβλημα της καταγωγής του οικωνυμίου Άρτα/Narta δεν έχει δοθεί μέχρι σήμερα ικανοποιητική ερμηνεία. Βλ. Δελόπουλος 1977.

⁵ Είναι από τα λίγα σταθερά σημεία δίπλα στη λιμνοθάλασσα, τα όρια της οποίας άλλαζαν λόγω των προσχώσεων. Η αρχ. λ. *πάγος* ‘βράχος’ διασώζεται μάλλον στο τοπωνύμιο Paguria (Παγούρια), όνομα χωραφίου στο μούλκι της ΑΑ.

⁶ Είναι αξιοσημείωτο το ότι στο ιδίωμα ΑΑ διασώζεται το τοπωνύμιο αυτό σε αρσενικό γένος: ο *Αυλώνας* – στον *Αυλώνα*, ενώ στην αλβανική είναι θηλυκού γένους (Vlonë / Vlorë). Για τη λ. αυτή βλ. Demiraj 2008: 149 κε.

⁷ Σημειώνουμε ότι και η τουρκική συμμετέχει στην αλληλουχία αυτή, δεδομένου ότι απέναντι από τον Αυλώνα υπάρχει το *Καραμπουρούνι* (< kara burun), το «Μαύρο Ακροτήρι», που χωρίζει το Ιόνιο από την Αδριατική.

ισόγλωσσα με τα ελληνικά της απέναντι Κάτω Ιταλίας, των Επτανήσων και της Ηπείρου, αλλά και με τις απόμακρες εστίες ελληνοφωνίας της Κύπρου, της Θράκης και της Μ. Ασίας.

Δεύτερο χαρακτηριστικό είναι η ενδιαφέρουσα λεξιλογική του διαστρωμάτωση και η συνύπαρξη λέξεων ελληνικής αρχής με δάνεια άλλων γλωσσών, αποτέλεσμα διαδοχικών επαφών των κατοίκων της ΑΑ με ξενόγλωσσους πληθυσμούς. Η διαχρονική του παρουσία επιβεβαιώνεται κι από τις λέξεις που δάνεισε στα γειτονικά ιδιώματα της αλβανικής.

Αν θεωρήσουμε ότι στο γεωγραφικό αυτό σημείο η ελληνική διαθέτει βάθος χρόνου που αγγίζει την αρχαιότητα, θα πρέπει να ερευνήσουμε και να ερμηνεύσουμε πώς και πότε η συγκεκριμένη εστία ελληνοφωνίας απέκτησε χαρακτηριστικά βόρειου φωνηεντισμού. Οφείλεται αυτό σε μια μεταγενέστερη, κατά τα χρόνια πιθανόν της πρώιμης Τουρκοκρατίας, μαζική εγκατάσταση πληθυσμού που μιλούσε βόρειο ιδίωμα⁸; Ή μήπως ήταν η ίδια η εσωτερική δυναμική του ιδιώματος που οδήγησε σε αυτή την εξέλιξη⁹; Σημειώνουμε ότι οι ενδυμασίες των γυναικών της ΑΑ και η συνήθειά τους να κουβαλάνε αντικείμενα τοποθετώντας τα πάνω στο κεφάλι, προσιδιάζουν με αυτά της νησιωτικής Ελλάδας (Επτανήσα) και της Κάτω Ιταλίας. Η σύνθετη προβληματική που αναδύεται δεν μπορεί να αντιμετωπιστεί παρά μόνο με μια διεπιστημονική προσέγγιση.

Δείγμα κειμένου από το ιδίωμα ΆΑ

Εγώ με λέγνε Θανασούλα Στέτο. Είμαι ογδόντα εννιά. Τς πέντε τ' Απριλιού σώνω τα ογδόντανιά και μπαίνω τα νενήντα.

Ου πατέρας μου γέρασε εκατόν δύο χορνών. ... Μονέ χωρς γναίκα. Τ' απέθανε η γναίκα γλήγορα. Η γυνάικα τόκαμε δεκαέξ' τέκνα. Εγώ έκαμα εφτά τέκνα.... Κείνα τα χρόνια έκαναν πολλά τέκνα. [Γιατί;] Δεν ηζεράνε. Δεν τοτζεράνε. Χάλενε γιατρικό η μάνα μου, όπως ήλεγε ι πατέρας μου. Όπως μας-ού-λεγε. «Βρες λίγο ιλιάτς να μη κινήσω βαριά πλιά... Λεγάν βαριά το έγκυος.

Μες στον βατέρα μου έκατσα ίσαμ τα δεκαεννιά χορνών. Δεκαεννιά χορνών με πάντρεψε. ... Μούρθαν πορζενιές μακάρι, πο [αλλά] μούρθαν απ' όζω το χωριό. Στου Ζβερέτς, με χαλευάνε ένας πρώτος απ' το Ζβερέτς...

Μ' λέει εμένα, ταρνάζον λίγο, μωρ' κοπέλα, μ' λέει μένα 'ντός. Να σε ιδούμε λίγο. Ταράχτκα εγώ.

Πού έν' ι πατέρας, λέει.

Είχαμ ένα αμπέλι στην Παναγιά. Μέγα αμπέλι. ... Τόχει ι Δήμος τώρα. Ικεί δούλεναμ. Δεν πήγε αλλούθε π'τ' αμπέλι μου. Δεν τσι βγάνω τς τζούπρες, ήλεγε ι πατέρας μου, χώρια απ' το πράμα μου. Πήγαιναμ στο πράμα μας, μέρα-νύχτα εκεί. Στάρι έκανε, μίσιρ έκανε, καλαμπόκι το λέγμε εμείς, και ζούσαμ καλά.

ΠΕΡΙ ΠΡΟΒΛΗΜΑΤΩΝ ΤΗΣ ΚΑΤΑΡΤΙΣΗΣ ΤΟΥ ΓΕΩΡΓΙΑΝΟ- ΝΕΟΕΛΛΗΝΙΚΟΥ ΛΕΞΙΚΟΥ ΤΩΝ ΙΔΙΩΤΙΣΜΩΝ

Irina Lobzhanidze

Ilia State University,
Georgia

irina_lobzhanidze@iliauni.edu.ge

ABSTRACT

In this paper we present the structure of Georgian-Modern Greek Dictionary of Idioms. This is a first attempt in Georgian Lexicography to compile a dictionary of that type. It has been compiled within the framework of the project of the Presidential Grant for Young Scientists financed by the Foundation for Georgian Studies, Humanities and Social Sciences (Shota Rustaveli National Science Foundation). The paper reports on the results of the project (in other words the compilation of the dictionary, which consists of 11801 idiomatic expressions), methodological principles, the main features, the macrostructure and the microstructure of the dictionary. The compilation of the Georgian-Modern Greek Dictionary has a practical value for a wide range of readers.

Λέξεις κλειδιά: ιδιωτικές εκφράσεις, λεξικογραφία.

1. Εισαγωγή

Ιδιωματικές εκφράσεις υπάρχουν σε πολλές γλώσσες και, βέβαια, το πλαίσιο της χρησιμοποίησής τους είναι αρκετά ευρύ και σε αντίθεση με τον ελεύθερο συνδυασμό των λέξεων, είναι «σταθερές, παγιωμένες» μονάδες.¹ Γενικά η μετάφραση των ιδιωτισμών από μια γλώσσα σε άλλη, προκαλεί πολλές δυσκολίες. Αυτό εξηγείται από το γεγονός, ότι πολλές ιδιωματικές εκφράσεις ανήκουν στη νοοτροπία του λαού και έχουν καθαρά εθνικό χαρακτήρα. Επομένως, η βασική ιδιαιτερότητα των ιδιωτισμών είναι εκφραστικότητα και ειδικά εθνικά στοιχεία, κάτι που δημιουργεί πολλά προβλήματα κατά τη μετάφρασή τους. Παίρνοντας υπόψη ότι μέχρι σήμερα δεν υπήρχε Γεωργιανό-Νεοελληνικό λεξικό των Ιδιωτισμών, έχουμε συνθέσει το λεξικό των Γεωργιανών ιδιωτικών εκφράσεων που αποτελείται από 11801 ιδιωματικές εκφράσεις (1462 σελίδες). Στο λεξικό υπάρχει κατάλληλη μετάφραση στα Νέα Ελληνικά,

Η σύνταξη του Γεωργιανό-Νεοελληνικού Λεξικού των Ιδιωτισμών εκπονήθηκε στο πλαίσιο του Προγράμματος του Εθνικού Επιστημονικού Ιδρύματος του Σώτα Ρουσταβέλι (Shota Rustaveli National Science Foundation). Στο πρόγραμμα έπαιρναν μέρος Shukia Apridonidze (επιμέλεια του Γεωργιανού μέρους) και Svetlana Berikashvili (επιμέλεια του Ελληνικού μέρους). Στο άρθρο ταυτόχρονα με τα αποτελέσματα του προγράμματος θα παρουσιάζονται η μεθοδολογία κατάρτισης του λεξικού και η δομή του (μακροδομή και μικροδομή) με βασικά χαρακτηριστικά.

Κάθε λεξικό πρέπει να εξεταστεί ως βάση δεδομένων, η οποία περιλαμβάνει συγκεκριμένες γλωσσικές μονάδες, στην περίπτωση μας, ιδιωματικές εκφράσεις. Η διαδικασία της αποθήκευσης θα πρέπει να πραγματοποιηθεί έτσι ώστε ο χρήστης (ανεξάρτητα από τη μορφή: σε ηλεκτρονική ή σε έντυπη μορφή) να μπορεί να χρησιμοποιήσει τις πληροφορίες που λαμβάνει για τις δικές του ανάγκες.

Είναι γνωστό ότι η σύνταξη του λεξικού περιλαμβάνει τη συγκεκριμένη σειρά και αποτελείται από διάφορα στάδια. Η δημιουργία ενός δίγλωσσου λεξικού, συνήθως καλύπτει τα ακόλουθα στάδια: επιλογή των μονάδων, λίστα των λημμάτων (στην περίπτωση μας, η λίστα των ιδιωτισμών), προσδιορισμός της

¹ “λέξεις χωρίς σημασία”, λέξεις-μορφές που έχουν λειτουργικότητα μόνο στα πλαίσια μιας συνταγματικής ενότητας, σ’ ένα ορισμένο και αυστηρά καθορισμένο γλωσσικό περιβάλλον”, (Μότσιου 1994, 60).

μορφής του άρθρου του λεξικού και των σημειώσεων, δημιουργία του σώματος κειμένων, αναζήτηση των ιδιωτισμών με συμφραστικούς πίνακες (Concordances), κλπ.

2. Πηγές για την κατάρτιση του λεξικού

Σύμφωνα με τη σύγχρονη λεξικογραφική μεθοδολογία (Sinclair 1991, Atkins 2008), η κατάρτιση του λεξικού βασίστηκε σε σώματα κειμένων που χρησιμοποιήθηκαν για την επιλογή των ιδιωτισμών προς εισαγωγή στο λεξικό, τον εντοπισμό και την εξαγωγή ιδιωματικών εκφράσεων, παραδειγμάτων κτλ. Χρησιμοποιήσαμε το σώμα των Γεωργιανών Λογοτεχνικών κειμένων που συντάχθηκε στο πρόγραμμα TextSTAT (386 κείμενα, κάθε 40000 λέξεις) και το Εθνικό Θησαυρό Ελληνικής Γλώσσας (ΕΘΕΓ)².

3. Σύντομη Περιγραφή

Οι ιδιωματικές εκφράσεις πολύ συχνά έχουν διάφορες σημασίες και αυτό, βέβαια, δυσχεραίνει σε μεγάλο βαθμό τη μετάφρασή τους. Επομένως, ο μεταφραστής είναι υποχρεωμένος όχι μόνο να κατανοήσει τους ιδιωτισμούς μέσα στα συμφραζόμενα, αλλά και να τους αναλύσει λαμβάνοντας υπόψη τις πολιτιστικές, ιστορικές και υφολογικές απόψεις του πρωτότυπου κειμένου.

Η σημασία των ιδιωματικών εκφράσεων δεν είναι ίδια με τη σημασία των μονάδων, από τις οποίες αποτελείται η έκφραση (Τακισβίλι 1961:40). Οι ιδιωματικές εκφράσεις θεωρούνται ότι είναι «ομάδες λέξεων που έχουν διαφορετική σημασία απ' ό,τι έχει καθεμία λέξη ξεχωριστά» (Collins 2000).³ Επομένως, η βασική ιδιαιτερότητα των ιδιωτισμών που είναι η εκφραστικότητα και ιδιαίτερα εθνικά στοιχεία, δημιουργούν πολλά προβλήματα κατά τη μετάφρασή αυτών των γλωσσικών στοιχείων. Αλλά η μετάφραση των ιδιωτισμών μπορεί να πραγματοποιηθεί με κατάλληλους τρόπους (π.χ. αλλαγή, περίφραση κτλ.).

Η δημιουργία του δίγλωσσου λεξικού περιλαμβάνει τα εξής τρία επίπεδα: τη δημιουργία του σώματος κειμένων, τη μετάφραση των δεδομένων και τον ορισμό της μορφής. Η βάση αυτών των επιπέδων στην περίπτωση του δίγλωσσου λεξικού είναι σώματα των παράλληλων ή των συγκεκριμένων κειμένων.

Οι παραπάνω δύο τύποι των σωμάτων διαφέρουν μεταξύ τους έτσι ώστε στην πρώτη περίπτωση, πρέπει να έχουμε μεταφρασμένα κείμενα (από την Γεωργιανή στη Νεοελληνική γλώσσα), στη δεύτερη περίπτωση - παρόμοια κείμενα και στις δύο γλώσσες (στην Ελληνική και στη Γεωργιανή). Ήταν αδύνατο να δημιουργηθεί το δεύτερο είδος σωμάτων κειμένων, γιατί δεν υπάρχουν παρόμοια αμετάφραστα κείμενα στη Γεωργιανή και Ελληνική γλώσσα.

Όσον αφορά την πρώτη κατηγορία σωμάτων κειμένων, θα ήταν δυνατό να δημιουργηθεί ένα μέσο στο πρόγραμμα του ParaConc⁴, αλλά σε αυτή την περίπτωση η ποσότητα των μεταφρασμένων κειμένων δεν θα ήταν αρκετή και περιελάμβανε ένα πεζογραφικό έργο (Ο «HELLADOS» – ένα Ελληνάκι του Καυκάσου η μεταφράστρια Θάμαρ Μέσχι), ποιήματα που δημοσιεύτηκαν σε διάφορα χρονικά διαστήματα, καθώς και μια ανθολογία της γεωργιανής ποίησης (Ανθολογία Γεωργιανής Ποίησης, 19^{ος} – 20^{ος} αιώνας, μετάφραση από τα γεωργιανά Άνι Τσικοβάνι, δημοσιεύτηκε το 2002) και μερικά θρησκευτικά έργα. Ωστόσο, η ποσότητα των κειμένων δεν θα ήταν αρκετή με βάση τους στόχους μας.

Ο αρχικός στόχος ήταν να δημιουργηθεί όσο δυνατόν πληρέστερη βάση δεδομένων. Έχοντας υπόψη ότι τα συστατικά στοιχεία των ιδιωτισμών αποτελούν σημασιολογικά μια ενότητα, χρειαζόμασταν σώμα κειμένων για να μπορέσουμε να διαλέξουμε τα απαραίτητα στοιχεία. Αρχικά ενσωματώσαμε στο TextSTAT το σώμα Γεωργιανών κειμένων⁵, μετά το εισήγαμε στο AntConc⁶. Επιπλέον, συμπληρώσαμε το υλικό στη Γεωργιανή γλώσσα με στοιχεία από διάφορα λεξικά (Λεξικό της Γεωργιανής γλώσσας), Σαχόκια και Ονιάνι. Όσον αφορά την Νεοελληνική γλώσσα, χρησιμοποιήσαμε τον Εθνικό Θησαυρό Ελληνικής Γλώσσας (ΕΘΕΓ, <http://hnc.ilsp.gr>).

Η μακροδομή του λεξικού περιλαμβάνει:

² βλ. <http://hnc.ilsp.gr/find.asp>

³ “...a group of words which have a different meaning when used together from the one it would have if the meaning of each word were taken individually”.

⁴ βλ. <http://www.athel.com/para.html>

⁵ βλ. <http://neon.niederlandistik.fu-berlin.de/textstat/>

⁶ βλ. <http://www.antlab.sci.waseda.ac.jp/software.html>

1. την εισαγωγή που καλύπτει α) τον ορισμό της έννοιας του ιδιωτισμού, β) τον ορισμό της κατασκευής του λεξικού,
2. 11801 λήμματα τα οποία καλύπτουν τους ιδιωτισμούς της Γεωργιανής γλώσσας,
3. τον κατάλογο των συντομεύσεων, καθώς και
4. τη βιβλιογραφία.

Όσον αφορά τη μικροδομή του λεξικού, τα λήμματα περιλαμβάνουν τα εξής στοιχεία:

1. Τον ιδιωτισμό στη Γεωργιανή γλώσσα
2. Την ερμηνεία του ιδιωτισμού στην Γεωργιανή γλώσσα
3. Ένα παράδειγμα από την λογοτεχνία στην Γεωργιανή γλώσσα
4. Τη μετάφραση του γεωργιανού ιδιωτισμού στην Ελληνική γλώσσα
5. Τη μετάφραση του παραδείγματος

Όλα τα παραπάνω στοιχεία σχηματίζουν το επόμενο πίνακα:

	Λήμμα	გული გაუქვავდება [guli gaukvavdeba]
	Λήμμα №	2091
	Σημασία	ულმობელი გახდება [ulmobeli gaxdeba]
	Μετάφραση	1) κάνω την καρδιά μου πέτρα 2) θα γίνω σκληρόκαρδος
	Μετάφραση κατά λέξη	η καρδιά θα γίνει πέτρα
1	Γεωργιανό παράδειγμα	... ბატკნებს ჰვლავენ საადგომოდ და სასურველია პაწია ბავშვებს არ აცქერინონ ამ სურათზე, რათა მათ გული არ გაუქვავდეს, სიხლს არ შეეჩვიონო (ჭ. ლომთ. „თეთრი ღამე“) [... bat'k'nebs hk'laven saagdomod da sasurvelia pats'ia bavshvebs ar atskerinon am suratze, rata mat guli ar gaukvavdes, sixls ar sheechviono (ch. lomt. "tetri game")]
	Μετάφραση	... θυσιάζουν αρνάκια την Ανάσταση και καλύτερο να μην το δουν μικρά παιδιά για να μην γίνει η καρδιά τους πέτρα, να μην συνηθίζουν το αίμα (Τσ. Λομτ. «Ασπρη νύχτα»)
	Νεοελληνικό παράδειγμα	«Μόνο ο Ρότσα, ως υπεύθυνος προπονητής, συναισθανόμενος ότι πρέπει, λόγω καθήκοντος, να κάνει την καρδιά του πέτρα και να ετοιμάσει την ομάδα όσο το δυνατόν καλύτερα, είπε, από...υποχρέωση περισσότερο, δύο κουβέντες» (Χ.Κ. Τεγόπουλος Εκδόσεις «Με βαριά καρδιά»)

Table 1 Μικροδομή του λεξικού

Αρχικά, ο συνολικός αριθμός των γεωργιανών ιδιωτισμών ανέρχονταν σε 12 821. Μετά την επιδιόρθωση του υλικού, ο αριθμός μειώθηκε σε 11801 μονάδες. Επιπλέον, αναπτύξαμε την δομή του λεξικού (μακροδομή και μικροδομή) με βασικά χαρακτηριστικά. Μετά τη δημοσίευση του λεξικού θα βγάλουμε από το προαναφερόμενο σχήμα τη μετάφραση κατά λέξη και τα Νεοελληνικά παραδείγματα από τον ΕΘΕΓ, τα οποία χρησιμοποιούνται για να διευκολύνουν την δουλειά κατά την επιδιόρθωση.

Επιπλέον, προσοχή έπρεπε να δοθεί σε διάφορα ζητήματα που έπρεπε να ληφθούν κατά τη δημιουργία του λεξικού. Ειδικότερα, εστίασαμε την προσοχή μας στα εξής ζητήματα:

α) Ρηματικό ουσιαστικό⁷ ή ρήμα. Το κύριο μέρος των Γεωργιανών ιδιωτισμών αποτελείται από ιδιωτισμούς με δυο συστατικά στοιχεία (6.704 μονάδες). Πρέπει να σημειώσουμε ότι μέχρι σήμερα υπήρχαν δύο τρόποι παρουσίασης των ρηματικών ιδιωτισμών στη Γεωργιανή γλώσσα: α) με μορφή του ρηματικού ουσιαστικού ή β) με μορφή του ρήματος σε τρίτο πρόσωπο. Δεν θεωρήσαμε σωστή την παρουσίαση των ιδιωτισμών με μορφή του ρηματικού ουσιαστικού, παρά το γεγονός ότι μερικές προηγούμενες εκδόσεις έχουν εκδοθεί με την προαναφερομένη μορφή. Επειδή στη λογοτεχνία ή στην προφορική γλώσσα οι ιδιωτισμοί δεν εμφανίζονται ποτέ με τη μορφή του ρηματικού ουσιαστικού, για παράδειγμα:

გუნებაში გავლება – გაფიქრება, აზრად მოსვლა, გულში *gavleba* [*gunebashi gavleba – gapiqreba, azrad mosvla, gulshi gavleba*]

გუნებაში გაუვლის – გაიფიქრებს, აზრად მოუვა: “აღელვებულმა სვიმონმა მხურვალედ დაჰკოცნა თავის შვილები და გუნებაში გაუარა ფიქრმა: “ვინ იცის, კიდევ ელირება თქვენს მშობელს თქვენი მკერდთან მიკვრა?” (ა. ყაზბ., “ელგუჯა”) *gunebashi gauvli – gapiqrebs, azrad mouva: “agelvebulma svimonma mxurvaled dahk’otsna tavis shvilebi da gunebashi gauara pikrma: “vin itsis, kidev egirseba tkvens mshobels tkveni mkerdtan mik’vra?” (a. q’azb., “elguja”)*]

μετάφραση: έχω κατά νουν, συλλογίζομαι από καιρό, μετάφραση κατά λέξη: στο νου γλιστρήσει, «Αγχωμένος Σβίμον φίλησε τα παιδιά του και συλλογίστηκε: “Ποιος ξέρει άραγε θα έχει την ευκαιρία ο γονέας σας να σας χαϊδέψει ζανά;”» (Α. Κάτζ., «Ελγκούτζα»).

β) Αδιαίρετες και Διαιρετές Μονάδες. Ένα από τα προβλήματα είναι το ζήτημα των αδιαίρετων και διαιρετών ιδιωτισμών. Αυτό το ζήτημα αφορά τον αριθμό των συστατικών στους ιδιωτισμούς (στη γεωργιανή γλώσσα ο αριθμός των συστατικών κυμαίνεται από δύο ως πέντε). Διαιρετές μονάδες κυρίως συναντιούνται στους ιδιωτισμούς με τρία ή περισσότερα συστατικά. Π.χ

გულში ცეცხლი ტრიალებს (წუხს, ღელავს) [*gulshi tsetskhli trialebs (ts’ukhs, gelavs)*] – είναι διαιρετή μονάδα, διότι ένα από τα συστατικά μπορεί να αλλάξει εύκολα τη θέση, αλλά διατηρεί τη σημασιολογική ενότητα. Π.χ.: “გამწარებული ყმაწვილის გულში ცეცხლი ტრიალებდა, მისი ტვინი წისქვილის ბორბალივით მოუსვენრად ბრუნავდა, რომ რამე ხერხი მოეგონა...” (დ. კლდ., “სამანიშვილის დედინაცვალი”), შდრ. “კარგი, ბებერო, დაწყნარდი, ჰკვიანი ადამიანი ხარ და ვერ მიმხვდარხარ, რა ცეცხლი ტრიალებს ჩემ გულში” (ვ. ბარნ., “ისნის ცისკარი”) [*“gamtsarebuli q’mats’vilis gulshi tsetskhli trialebda, misi t’vini ts’iskvilis borbalivit mousvenrad brunavda, rom rame kherkhi moegona...” (d. kld., “samanishvilis dedinatsvali”), “kargi, bebero, datsq’nardi, ch’k’viani adamiani khar da ver mimkhvdarkhar, ra tsetskhli t’rialebs chem gulshi” (v. barn., “isnis tsisk’ari”)*].

μετάφραση: νευριάζω, μετάφραση κατά λέξη: περιστραφέιτε το φώς στην καρδιά: «Στην καρδιά του πικραμένου νέου άναψε φωτιά, ο μυαλός του δούλευε σαν η ρόδα του μύλου, για να βρίσκει κάτι τι να κάνει...» (Ντ. Κλντ., «Η μητριά του Σαμανισβίლი») «Εν τάξει γέροντα, ησύχασε, έξυπνος άνθρωπος είσαι και δεν κατάλαβες τι φωτιά είναι στην καρδιά μου» (Β. Μπαρν. «Η αυγή του Ισάνι»).

ბედის ანაბარა (მხოლოდ ბედის იმედით დარჩენილი) [*bedis anabara (mkholod bedis imedit darchenili)*] – η φράση είναι αδιαίρετη από σημασιολογική πλευρά, η χρήση του κάποιου συστατικού χωρίς τον άλλο ή η αλλαγή της θέσης των γραμματικών συστατικών χάνει το νόημα του ιδιωτισμού. Π.χ.: “ვერ დარჩება თავის დახაშმულ ბედის ანაბარად, მარტო ვერ გასწევს ცხოვრების უღელს!” (მ. ჯავახ., “ჯავოს ხიზნები”) [*“ver darcheba tavis dakhashmul bedis anabarad, mart’o ver gasts’evs tskhovrebis ugels!” (m. javakh., “jaq’os khiznebi”)*].

μετάφραση: μένω στην ελπίδα της τύχης, μετάφραση κατά λέξη: μόνο για λογαριασμό της τύχης: «Δεν θα μείνει μόνο στην ελπίδα της τύχης, δεν θα μπορέσει να τα βγάξει πέρα μόνος του!» (Μιχ. Τζაβ., «Οι μετατοπισμένοι του Τζάκο»).

თმა ყალყზე დაუდგება (შიშისაგან თმა აეშლება) [*tma q’alq’ze daudgeba (shishisagan tma aeshleba)*] – Λαμβάνοντας υπόψη το γεγονός ότι η λέξη “ყალყი” βρίσκεται μόνο σ’αυτό τον ιδιωτισμό, αυτός ο ιδιωτισμός είναι σημασιολογικά αδιαίρετος, αν και γραμματικά είναι εντελώς διαιρετός. Π.χ.: “თმა ყალყზე დამიდგა, თრთოლა-კანკალმა შემოიპყრო...” (ჭ. ლომ., “თეთრი ღამე”), ანდა, “იმ წუთას ყველას ყალყზე დაგვიდგა თმა, თითქოს ნამდვილი ჯოჯოხეთი ვიხილეთ საკუთარი

⁷ Μοιάζει με απαρέμφατο των ινδοευρωπαϊκών γλωσσών

შვავლეშოო!” (ა. როჟბ., ”ჯოჯოხეთის ბურჯაშვო”) “[tma q'alq'ze damidga, trtola-k'ank'alma shemip'q'ro...]” (ch'. lom., “tetri game”), “im ts'utas q'velas q'alq'ze dagvidga tma, titkos namdvili jojokheti vikhilet sak'utari tvalebit!” (a. riun., “jojokhetis suratebi”)].

μετάφραση: εκνευρίζομαι, σηκώνονται οι τρίχες μου, μετάφραση κατά λέξη: οι τρίχες του στο τέλος θα σηκωθούν: «Σηκώθηκαν οι τρίχες μου, τρώμαξα» (Τσ. Λομτ., «Άσπρη νύχτα») ή «Εκείνη τη στιγμή σηκώθηκαν οι τρίχες μου, όλοι φοβηθήκαμε σαν να είχαμε δει την κόλαση με τα μάτια μας!» (Α. Ριουν., «Οι εικόνες της κόλασης»).

Το κύριο πρόβλημα σχετίζεται με διαιρετές και μισοδιαιρετές δομές των ιδιωτισμών. Βάση αναλύσεων που είχαμε εκπονήσει βάλαμε στο λεξικό και διαιρετές και μισοδιαιρετές δομές των ιδιωτισμών (όπου αυτοί υπάρχουν φυσικά).

γ) Η μετάφραση κατά λέξη. Παρά το γεγονός ότι υπάρχουν διαφορετικά επίπεδα των ιδιωτισμών (π.χ. ιδιωτισμοί του 1. Lexical Level με παρόμοιες λεξικές μονάδες στην Νεοελληνική και Γεωργιανή). 2. Semi-Lexical Level με επιμέρους παρόμοιες λεξικές μονάδες και 3. Post-Lexical Level με διαφορετικές λεξικές μονάδες και σε δυο γλώσσες), κάθε ιδιωτισμός (εκτός από κάποιους ιδιωτισμούς λεξιλογικού επιπέδου) μπορεί να ξεχωριστεί με την εκφραστικότητα και ειδικά εθνικά στοιχεία του. Για αυτό το λόγο, κάθε άρθρο παρέχει και τη μετάφραση κατά λέξη για τη διευκόλυνση της διόρθωσης. Αυτή η μετάφραση δεν θα παραμένει στην έντυπη έκδοση του λεξικού.

δ) Παραδείγματα. Αξιοσημείωτο είναι, ότι υπάρχει μια μακρόχρονη ιστορία της μελέτης των ιδιωτικών εκφράσεων της Γεωργιανής γλώσσας και υπάρχουν πολλά μονόγλωσσα ή δίγλωσσα λεξικά με διάφορα παραδείγματα από τα λογοτεχνικά έργα. Για να είχαμε αποφύγει την ταυτολογία, στις περισσότερες περιπτώσεις βάλαμε στο λεξικό νέα παραδείγματα, εκτός από κάποιες περιπτώσεις, όταν χρησιμοποιήσαμε τα παραδείγματα από άλλα λεξικά (5% του συνόλου).

Στο πλαίσιο του προγράμματος του Εθνικού Επιστημονικού Ιδρύματος του Σώτα Ρουσταβέλι, έχουμε ολοκληρώσει το λεξικό. Η ηλεκτρονική μορφή αυτού του λεξικού, αποτελεί μια σημαντική βάση δεδομένων που μπορεί να χρησιμοποιηθεί για να δημιουργηθεί ένα ηλεκτρονικό λεξικό ή για έρευνα.

ABSTRACT

The present paper illustrates neological clues of Odyssey's vocabulary, revealing the productive character of Nikos Kazantzakis and defines a typology in order to classify linguistic elements and lots of unknown words of the epic poem. Neologisms and undictionaried words, which someone encounters in the poem, form an unfamiliar poetic language. The writer consciously attempt to compose his personal language and to create a pan-hellenic demotic. Kazantzakis sketches a multi-lexical puzzle, involving idiolects and neologisms or dialectic and idiomatic or derived and compounding words. Thus, pragmatic, semantic and stylistic difficulties make Odyssey as a quite incomprehensible epic poem.

Keywords: neologisms, undictionaried words, poetic grammar, Kazantzakis, Odyssey, poetic diction

1. Εισαγωγή

Η *ΟΔΥΣΣΕΙΑ*¹ του Νίκου Καζαντζάκη είναι μια σύγχρονη επική δημιουργία η οποία ουσιαστικά αποτελεί τη συνέχεια της *ΟΔΥΣΣΕΙΑΣ* του Ομήρου. Το ποίημα αποκαλύπτει την αγωνία και τον αγώνα του συγγραφέα να δημιουργήσει ένα έπος προκειμένου να θεωρηθεί ως ένα από τα σπουδαιότερα έργα της (sic) «λευκής φυλής» (Πρεβελάκης 1984) και να γίνει ισάξιο της ομηρικής δημιουργίας. Μετά από δεκατρία ολόκληρα χρόνια σκληρής δουλειάς, ο Καζαντζάκης, ως άλλος Οδυσσεύς, περιπλανώμενος σε χιλιάδες στίχους, ανάμεσα σε εκατοντάδες λέξεις, αναγράφοντας την ποιητική του ιδέα εφτά φορές, αναζητά την αθάνατη πηγή, την προσωποποίηση του Θεού, καταλήγοντας *μονιάς* στην τελική μορφή του μεγαλειώδους έργου των εικοσιτεσσάρων (24) ραψωδιών και των τριάντα τριών χιλιάδων τριακοσίων τριάντα τριών (33.333) στίχων.

Μέγα το χρέος του ποιητή και μέγας ο άθλος των μελετητών να ασχοληθούν με την *ΟΔΥΣΣΕΙΑ*, όπως τονίζει ο Πρεβελάκης (1958) αφού «ελάχιστοι την έχουν διαβάσει ολόκληρη». Και ειλικρινά πώς να καταπιαστεί κανείς με την «γλωσσική πλημμυρίδα της *ΟΔΥΣΣΕΙΑΣ*» (Γιακουμάκη 1982), πέρα από τα άλλα επίπεδα ανάγνωσής της –όπως υφολογικό, φιλοσοφικό κ.ά. Η *ΟΔΥΣΣΕΙΑ* στο μεταίχμιο έντονων κοινωνικο-πολιτικών αλλαγών εκφράζει με ρυθμό γεωμετρικής προόδου τη δυναμική αποτύπωση της γλώσσας και την προσπάθεια της δημοτικής να κυριαρχήσει στη Νεοελληνική Γραμματεία της σύγχρονης ιστορίας.

Στην *ΟΔΥΣΣΕΙΑ* οι γλωσσικές ιδιαιτερότητες αποτελούν τον μορφικό πυρήνα του έπους και κυριαρχούν μέσα από τη μοναδικότητα της επιλογής των λέξεων από τον ποιητή για την σύνθεση του έπους. Η δύναμη της γλώσσας της *ΟΔΥΣΣΕΙΑΣ* βρίσκεται στους τύπους των λέξεων που επέλεξε ο ποιητής να τοποθετήσει άλλοτε περίτεχνα και ποιητικά κι άλλοτε τεχνικά και κατασκευαστικά (Πρεβελάκης 1958, Ανδριώτης 1959, Γιακουμάκη 1982, Sideras 1983). Ο Μανδηλαράς (1987) σημειώνει ότι «το αίσθημα της λέξης είναι πολύ αναπτυγμένο στον Καζαντζάκη» και συνεχίζει

¹ Επισημαίνεται ιδιαιτέρως εμφατικά ότι υιοθετείται η γραφή του τίτλου του καζαντζακικού έπους *ΟΔΥΣΣΕΙΑ* σε κεφαλαίοι γράμματα γραφή και με ένα “Σ”, από τη μία ως ένδειξη σεβασμού στη βούληση του ίδιου του συγγραφέα να τιτλοφορήσει με τον συγκεκριμένο τρόπο γραφής το ποίημά του στην πρώτη του έκδοση (1938) και από την άλλη ως διακριτό σημείο προς αποφυγή σύγχυσης με τον τίτλο του γνωστού έπους του Ομήρου, *Οδύσσεια*, η οποία γράφεται με δύο “Σ”.

λέγοντας ότι «χωρίς ιδιαίτερες γλωσσολογικές σπουδές παρά μόνο με τα εφόδια που απέκτησε με την προσωπική του μελέτη [...] συλλαμβάνει με τον δικό του τρόπο τα γλωσσικά φαινόμενα».

Οι λέξεις στην καζαντζακική *ΟΔΥΣΣΕΙΑ* είναι μια πραγματική αποκάλυψη αθησαύριστων λέξεων που κατακυριεύουν κάθε αναγνώστη ποιητικά, νοητικά, συναισθηματικά, ψυχικά μέχρι το σημείο που δοκιμάζουν τη φαντασία και τη λογική του. Δεν είναι μόνο η ατέρμονη αγωνία του ποιητή να επιλέξει τη μία και μοναδική λέξη για την κατάλληλη θέση μέσα στην ποιητική του δημιουργία και την αποτύπωση της τέχνης του. Όπως σημειώνει ο Χαραλαμπίδης (1999) «οι λέξεις παίζουν καθοριστικό ρόλο στο γλωσσικό σκεπτικισμό του Καζαντζάκη», που τον βασανίζει συνεχώς η έννοια της κάθε λέξης. Ο Καζαντζάκης, συνεχίζει ο Χαραλαμπίδης, συγκινείται ιδιαίτερα από τις «παρθένες λέξεις» και γοητεύεται από τη δημιουργία –μορφική και σημασιολογική– ενός νέου συλλογισμού που τον οδηγεί στην απόδοση μιας νέας μορφής, που δεν απέχει από την έννοια του νέο-λογισμού, μιας νέας σκέψης, μιας νέας ιδέας που αποτυπώνεται σε μια νέα αχρησιμοποίητη μορφή που είτε κατασκευάζεται παραγωγικά είτε του δίδεται λεξιθηρικά «από το στόμα του λαού» (Πρεβελάκης 1958 1984). Ο Καζαντζάκης αποτελεί ένα αντιπροσωπευτικό δείγμα ενός διανοητή συγγραφέα που αναζητούσε συνεχώς την καταλληλότερη εκφραστικά και την πιο δυσεύρετη λέξη για να αποδώσει με ακρίβεια και σαφήνεια την ποιητική του ιδέα –όπως παρουσιάζεται από την πλούσια επιστολογραφία του (Πρεβελάκης 1984, Αλεξίου-Αποσκίτου 1978, Καζαντζάκης 1993, Καζαντζάκη 1998)–, αναδεικνύοντας όχι μόνο τη μοναδικότητα της λέξης αλλά και την πολυεπίπεδη διάσταση της ίδιας της γλώσσας. Στόχος του ποιητή ήταν να δημιουργήσει μια πανελλήνια γλώσσα βασιζόμενη σε όλες τις ελληνικές διαλέκτους με θεμελιακή διάλεκτο την κρητική (Bien 1927, Γιακουμάκη 1982, Δετοράκης 2002).

Εντάσσεται λοιπόν στη γλωσσική ταυτότητα του Καζαντζάκη ένας νέος όρος, ο νεολογισμός σε συνάρτηση με τον ποιητικό νεολογισμό και τις νεολογικές αθησαύριστες λέξεις, που όπως παρατηρείται παρακάτω, αποτελεί βασικό μέρος της ποιητικής δημιουργίας και τέχνης του συγγραφέα. Στο σημείο αυτό όμως χρήζει αναγκαιότητας η οριοθέτηση της συγκεκριμένης ορολογίας προκειμένου να διερευνηθεί επαγωγικά μέσα στο ποίημα της *ΟΔΥΣΣΕΙΑΣ*.

2. Νεολογία και Νεολογισμοί

Η Αναστασιάδη-Συμεωνίδη (1986) ασχολείται διεξοδικά με το φαινόμενο της νεολογίας και ορίζει ότι *νεολογία* είναι η διαδικασία, η πράξη, το φαινόμενο της λεξιλογικής ανανέωσης κι αντίστοιχα, ότι *νεολογισμός* είναι το αποτέλεσμα, το προϊόν της λεξιλογικής ανανέωσης. Παρακολουθεί τη νεολογική δημιουργία καταγράφοντας τον νεοελληνικό λόγο και διατυπώνοντας μια συστηματική τυπολογία για την κατηγοριοποίηση των νεολογικών ευρημάτων της. Η ίδια σημειώνει ότι αποκλείονται από την τυπολογία της οι *λογοτεχνικοί νεολογισμοί*, «οι γεμάτες φαντασία αλλά εφήμερες δημιουργίες λογοτεχνών» (1986), ενώ συμπληρώνει ότι «ο δημιουργός του λογοτεχνικού νεολογισμού αναζητά νέους εκφραστικούς τρόπους» με αποτέλεσμα να καταφεύγει στις πολλές δυνατότητες που διαθέτει το σύστημα της γλώσσας. Ο λογοτέχνης, ο ποιητής, ο δημιουργός πλάθει νέους τρόπους με κύριο σκοπό του την επικοινωνία πομπού και δέκτη με τη μετάδοση του μηνύματος που δεν είναι «αναγκαστικά πρωτότυπο».

Στη συνέχεια η Χριστοφίδου (2001) υποστηρίζει ότι οι νεολογισμοί που δημιουργούνται κατά τη διάρκεια της ποιητικής διαδικασίας είναι νέες αποτυπώσεις που έχουν άμεση αλληλεξάρτηση με το περικείμενο και ορίζει ως *περικείμενους νεολογισμούς*, τους μη κωδικοποιημένους μορφολογικούς σχηματισμούς, οι οποίοι «δημιουργούνται ad hoc σύμφωνα με τις ανάγκες και τους περιορισμούς του περικειμένου ή του επικοινωνιακού περιβάλλοντος», τονίζοντας ότι «η σχέση περικειμένων νεολογισμών και κειμένου είναι αμφίδρομη». Ακόμη θεωρεί τους *ποιητικούς νεολογισμούς* «ως ένα υποσύνολο των περικειμένων νεολογισμών» και τους αντιδιαστέλλει προς τους νεολογισμούς, οι οποίοι είναι σχηματισμοί που είτε έχουν πρόσφατα κωδικοποιηθεί στο λεξιλόγιο της ελληνικής είτε έχουν αρχίσει να χρησιμοποιούνται από ένα μεγάλο μέρος των φυσικών ομιλητών της ελληνικής.

Συγκρίνοντας τους παραπάνω ορισμούς για το αποτέλεσμα της νεολογικής ποιητικής δημιουργίας, οι λέξεις-κλειδιά που προκύπτουν είναι: μη κωδικοποίηση, μορφολογικός σχηματισμός, ανάγκη περικειμένου, περιορισμός περιβάλλοντος. Ακολουθώντας, συσχετίζοντας τις παραπάνω λέξεις-κλειδιά, προκύπτει η ανασύνθεση ενός περιγραφικού ορισμού ότι ποιητικοί (ή λογοτεχνικοί) νεολογισμοί είναι μορφολογικοί σχηματισμοί οι οποίοι είναι μη κωδικοποιημένοι συστηματικά, δημιουργούνται από τις ανάγκες του περικειμένου και τους περιορισμούς –που τυχόν προκύπτουν– του επικοινωνιακού περιβάλλοντος.

3. Ποιητικοί νεολογισμοί ή Αθησαύριστες λέξεις στην περίπτωση της *ΟΔΥΣΣΕΙΑΣ* του Καζαντζάκη

Η εξέταση του φαινομένου της νεολογίας και ειδικότερα η διερεύνηση νεολογισμών στο ποιητικό έργο *ΟΔΥΣΣΕΙΑ* του Καζαντζάκη αποτελεί ένα εγχείρημα που δεν έχει μέχρι σήμερα πραγματοποιηθεί, ίσως γιατί το επικό μέγεθος του ποιήματος αλλά και ο όγκος των αθησαύριστων λέξεων δημιουργούν σημαντικό πρόβλημα στη γλωσσολογική μελέτη.

Μια τέτοια γλωσσολογική προσέγγιση ενός ποιήματος που είναι «ένα ανεπανάληπτο *crescento*» γλωσσικών ιδιαιτεροτήτων, όπως το χαρακτηρίζει η Γιακουμάκη (1982), και το οποίο έχει δημιουργήσει άπειρες συζητήσεις γεμάτες αντιφάσεις, αποτελεί πραγματικά ένα επιστημονικό παρατόλμημα που ελλοχεύει πολλούς κινδύνους. Όμως, η μελέτη της ποιητικής γλώσσας αλλά και των γλωσσικών ιδιαιτεροτήτων ποιητικών δημιουργημάτων, όπως η *ΟΔΥΣΣΕΙΑ*, θεωρούμε ότι αποτελεί σημαντικό πεδίο έρευνας όχι μονάχα για το χώρο της λογοτεχνίας αλλά κυρίως για τον κλάδο της γλωσσολογίας. Άλλωστε, όπως διαπιστώνει κι ο Jakobson (1998) η ποιητική της λογοτεχνίας αποτελεί αναπόσπαστο κομμάτι της γλωσσολογίας, αφού η ποιητική ενός κειμένου αποκαλύπτει τη συνεργασία των πολυεπίπεδων λειτουργιών της γλώσσας.

Αμφίδρομα, οι λειτουργίες της γλώσσας και τα επίπεδα ανάλυσής της αποδεικνύουν την έντονη ποιητικότητά της ως ανθρώπινο φαινόμενο της έκφρασης και της επικοινωνίας. Οι επιλογές και οι αποκλίσεις των συγγραφέων δίνουν ανανεωτική πνοή στη γλώσσα φανερώνοντας την αισθητική δύναμη του γλωσσικού φαινομένου με αποτέλεσμα να υπάρχει η δυνατότητα αποκάλυψης για εκείνο που ονομάζεται ποίηση της γλώσσας και γλώσσα της ποίησης (Jakobson 1981). Επομένως, οι λεξιλογικές επιλογές κάθε συγγραφέα αποτελούν την ιδιαίτερη ποιητική του γραμματική (*poetic grammar*, Jakobson 1981 1998), την αποτύπωση της προσωπικής του ταυτότητας κατά τη διαδικασία από τη σύλληψη της συγγραφικής του ιδέας, της μετατροπής του ερεθίσματος σε θέμα και σε τελική έκφραση του μηνύματος προς τους αναγνώστες (Μπαμπινιώτης 1991, Χαραλαμπίδης 2001).

Η ποιητική γραμματική του κάθε συγγραφέα δεν αποτελεί την παθητική παρατήρηση ενός φαινομένου ή ενός γεγονότος αλλά αποτελεί τον μοχλό ενεργοποίησης μηχανισμών που έγκειται τόσο στην ανάγνωση και φυσικά στην κατανόηση ενός λογοτεχνικού κειμένου αλλά κυρίως στη μάθηση νέων μεθόδων έκφρασης. Για το λόγο αυτό η σύγχρονη γλωσσολογία έχει στραφεί στη διερεύνηση της ποιητικής πράξης από γλωσσολογική σκοπιά με κυρίαρχο σκοπό την ανάδειξη των ιδιαίτερων χαρακτηριστικών της γραφής των λογοτεχνών. Παράδειγμα αποτελεί η περίπτωση του Καζαντζάκη που αγωνίζεται συνεχώς για την ποιητική του επιβίωση και μάχεται ανάμεσα σε χιλιάδες λέξεις, ενισχύοντας την πρωτότυπη γραφή του και το ιδιосυγκρασιακό του λεξιλόγιο (Μαθιουδάκης 2010, Μαθιουδάκης & Καμπάκη-Βουγιουκλή 2011, Μαθιουδάκης 2012).

Το λεξιλόγιο της *ΟΔΥΣΣΕΙΑΣ* είναι ιδιαίτερα ποιητικό με την έννοια της δημιουργικότητας, το οποίο χαρακτηρίζεται ως ένα έπος με στοιχεία έντονης νεολογικής ποιητικότητας. Κάθε λέξη στο έπος παρουσιάζεται ξεχωριστά εικονοποιώντας έννοιες και καταστάσεις. Παρόλο που ο ίδιος ο ποιητής (Καζαντζάκης 1938) ισχυρίζεται ότι έχει δημιουργήσει ελάχιστες λέξεις, ο κάθε τύπος που παρουσιάζεται στο έπος θα μπορούσε να χαρακτηριστεί ποιητικός νεολογισμός.

Σύμφωνα, λοιπόν, με τους ορισμούς για τον νεολογισμό της Αναστασιάδη-Συμεωνίδη (1986) και για τον ποιητικό νεολογισμό της Χριστοφίδου (2001), διαπιστώνεται ότι στην *ΟΔΥΣΣΕΙΑ* συναθροίζεται ένα πλούσιο υλικό ποιητικών νεολογισμών, δηλαδή μη κωδικοποιημένων μορφολογικών σχηματισμών της ελληνικής γλώσσας. Όμως, αυτός ο ισχυρισμός θα μπορούσε να αποδειχθεί μονάχα στην περίπτωση ενδελεχούς εξέτασης κάθε λέξη του ποιήματος σε λεξικά της κοινής ελληνικής, σε διαλεκτικά λεξικά και φυσικά στο αρχείο του Ιστορικού Λεξικού της Ακαδημίας Αθηνών.

Η παρούσα μελέτη δεν ασχολείται με τις νεολογικές ανασημασιολογήσεις οι οποίες θα μπορούσαν να αποτελέσουν διαφορετικό πεδίο έρευνας. Ακόμη, σημειώνεται ότι τα νεολογικά ποιητικά αθησαύριστα του Καζαντζάκη πιθανόν να περικλείουν και λεξικούς τύπους που είναι διαλεκτικές ή ιδιωματικές λέξεις οι οποίες συμπεριλαμβάνονται σε ορισμένα διαλεκτικά λεξικά. Παρόλα αυτά όμως εξαιτίας του πλήθους των λεξικών τύπων που αποτελούν το υλικό προς διερεύνηση, η τεκμηρίωση του σώματος αθησαύριστων λέξεων της *ΟΔΥΣΣΕΙΑΣ* θα μπορούσε να αποτελέσει μια μελλοντική εργασία προκειμένου να απομακρυνθούν και τα διαλεκτικά ή ιδιωματικά λήμματα.

Η συγκεκριμένη έρευνα, λοιπόν, επικεντρώνεται σε μορφικές και μορφολογικές ιδιαιτερότητες της γλωσσικής επένδυσης του καζαντζακικού έπους και ιδιαίτερα ασχολείται με τα νεολογικά αθησαύριστα, δηλαδή με λέξεις που δεν έχουν καταγραφεί στα βασικά λεξικά της κοινής ελληνικής με αποτέλεσμα να παρουσιάζουν νεολογικό χαρακτήρα αλλά δεν μπορούν να χαρακτηρισθούν ως νεολογισμοί.

3.1 Καταγραφή και επεξεργασία λεξιλογικού υλικού.

Πρώτο μέλημα της έρευνάς μας ήταν να διαβάσουμε προσεχτικά, στίχο-στίχο, ολόκληρη την *ΟΔΥΣΣΕΙΑ* του Νίκου Καζαντζάκη, να σημειώσουμε και να καταγράψουμε κάθε λέξη που απόκλινε από το κοινό γλωσσικό αίσθημα –σύμφωνα πάντα με το προσωπικό μας γλωσσικό αισθητήριο–, ακολουθώντας ως πρότυπο τις δυο παλαιότερες ανολοκλήρωτες έρευνες που είχαν γίνει από τον Πρεβελάκη το 1932 (στον Μαρινάκη 2004) και από τη Γιακουμάκη το 1978 (στη Γιακουμάκη 1982) για την *ΟΔΥΣΣΕΙΑ* του Καζαντζάκη, καθώς και τη μελέτη της Χριστοφίδου το 1991 (στη Χριστοφίδου 2001) πάνω στο έργο του Ελύτη.

Κατά την ανάγνωση, σημειώναμε οποιαδήποτε λέξη παρουσίαζε γλωσσική ιδιαιτερότητα και δεν ήταν σύμφωνη με το γλωσσικό αίσθημα της κοινής ελληνικής. Με τον τρόπο αυτό δημιουργήθηκαν 3 μεγάλες κατηγορίες λέξεων: α) οι απλές λέξεις β) οι σύνθετες (και πολυσύνθετες) λέξεις και γ) οι λέξεις που παρουσίαζαν μικρές γλωσσικές διαφοροποιήσεις σε φωνολογικό ή μορφολογικό επίπεδο.

Κατά την επεξεργασία, καταγράφαμε τις λέξεις ανά ραψωδία με τη σειρά που τις συναντούσαμε στο κείμενο. Οπότε δημιουργήσαμε ένα ειδικό λεξικό του οποίου η μικροδομή είχε τη μορφή:

λέξη > ραψωδία > στίχος > συγκείμενο.

Οι πληροφορίες για την κάθε λέξη αποτελούν ένα ενδεικτικό παράδειγμα για τη χρήση της μέσα στο έπος και δεν περιγράφουν τη συχνότητα εμφάνισης της συγκεκριμένης λέξης στο ποίημα. Έτσι, δημιουργήθηκε η αρχική μορφή ενός ηλεκτρονικού σώματος λέξεων (lexical corpus) περίπου 14.000 λημμάτων!

Στη συνέχεια, ελέγξαμε τον κατάλογο των τύπων λέξεων λέξη προς λέξη σε τέσσερα λεξικά της κοινής νέας ελληνικής, προκειμένου να αφαιρέσουμε κάποιες λέξεις που πιθανότατα να αποτελούν κωδικοποιημένες λέξεις της ελληνικής. Συγκεκριμένα τα λεξικά που χρησιμοποιήσαμε ως μεθοδολογικά εργαλεία ήταν α. η ηλεκτρονική μορφή του *Λεξικού της Κοινής Νεοελληνικής* του Ινστιτούτου Νεοελληνικών Σπουδών (1998-2002), β. το *Λεξικό της Νέας Ελληνικής Γλώσσας* του Μπαμπινιώτη (2008), γ. το *Λεξικόν της Νέας Ελληνικής Γλώσσας* της Πρωίας (1933) και δ. το *Μέγα λεξικόν όλης της Ελληνικής Γλώσσας* του Δημητράκου (1964). Η επιλογή των λεξικών έγινε με σκοπό να καλύπτει συγχρονικά και διαχρονικά τον λεξικογραφικό μας έλεγχο, οπότε επιλέξαμε δύο λεξικά σύγχρονα του συγγραφέα στα οποία θα μπορούσε να έχει πρόσβαση και δύο λεξικά της σημερινής εποχής.

Μετά την τελική επεξεργασία, το ηλεκτρονικό σώμα λέξεων αποτελείται από περίπου 7.500 λήμματα κι αποτελεί την τελική μορφή του πίνακα λέξεων στην *ΟΔΥΣΣΕΙΑ* του Καζαντζάκη. Σημειώνουμε εδώ ότι, εκτός από τις λέξεις που βρέθηκαν μέσα στα λεξικά, αφαιρέθηκαν τύποι που επαναλαμβανόντουσαν και επίσης τύποι που παρουσίαζαν μικρές διαφοροποιήσεις από την ελληνική ή είχαν έντονη διαλεκτική χροιά και θεωρήσαμε ότι δεν μπορούμε να τους κατατάξουμε σε ένα σώμα ποιητικών λέξεων, όπως γήλιος, χρουσό, γαίματα κá.

3.2 Τυπολογία των αθησαύριστων λέξεων

Το σώμα αθησαύριστων λέξεων της *ΟΔΥΣΣΕΙΑΣ* του Καζαντζάκη αποτελεί ένα ειδικό λεξιλόγιο όπου περιέχει: παράγωγες λέξεις, σύνθετες λέξεις, διαλεκτικές λέξεις, ιδιοματισμούς, ονοματοποιήσεις, ιδιόλεκτα. Με βάση το σύνολο του λεξιλογίου της *ΟΔΥΣΣΕΙΑΣ* χαρακτηρίζονται ποιητικές νεολογικές αθησαύριστες λέξεις εκείνες που είναι μη κωδικοποιημένες στην Κοινή Νέα Ελληνική (ΚΝΕ). Στη μελέτη του γλωσσικού υλικού της *ΟΔΥΣΣΕΙΑΣ* έχουμε σκοπό να εξετάσουμε τον τρόπο κατανόησης των δύσκολων και δυσνόητων λέξεων που αποτελούν τη μαγιά του ποιητή να καταγράψει και να μεταφέρει την δημιουργική του ιδέα. Δεν μας απασχολεί η σχολαστική και συστηματική κατηγοριοποίηση των ποιητικών νεολογισμών και των αθησαύριστων λέξεων για να αποδώσουμε την καταγωγή τους ή της σημασία τους.

Στόχος μας είναι να κατηγοριοποιήσουμε τους ποιητικούς τύπους σε μια τυπολογία για να μπορέσουμε να διερευνήσουμε το φαινόμενο της νεολογικής δημιουργίας στην *ΟΔΥΣΣΕΙΑ* του Καζαντζάκη. Βασιστήκαμε κυρίως στην πληρέστατη και περιγραφική τυπολογία της Αναστασιάδη-Συμεωνίδη (1986) που αφορά την νέα ελληνική καθώς και σε βασικά σημεία στις τυπολογίες των Guiraud (1967 1971) και Guilbert (1973 1975).

Προσαρμόσαμε τις παραπάνω τυπολογίες νεολογισμών στο γλωσσικό υλικό που συντάξαμε όπως περιγράψαμε παραπάνω και καταλήξαμε να προτείνουμε μια τυπολογία που να εφαρμόζεται στα

νεολογικά αθησαύριστα της *ΟΔΥΣΣΕΙΑΣ* του Καζαντζάκη. Επομένως, διακρίνουμε τρεις μεγάλες κατηγορίες νεολογικών τύπων: Α) παραγωγικότητα, Β) δάνεια, Γ) ονοματοποιία. Κάθε μία από τις κατηγορίες αυτές περιλαμβάνουν υποκατηγορίες τις οποίες θα περιγράψουμε παρακάτω.

Αξίζει, στο σημείο αυτό, να σημειώσουμε τις βασικές αρχές μας για τη δημιουργία της συγκεκριμένης τυπολογίας: η πρώτη αρχή μας είναι ότι διακρίναμε τις κατηγορίες των ποιητικών λέξεων σύμφωνα με τους διάφορους τρόπους δημιουργίας λέξεων. Ανατρέξαμε στις διεργασίες που ενεργεί η γλώσσα για την δημιουργία νέων λεξικών σχηματισμών και προσδιορίσαμε αυτές τις κατηγορίες που τις θεωρούμε και τα βασικά λεξικογενετικά είδη: ακολούθως, η δεύτερη αρχή μας έχει σχέση με τον τρόπο που αντιμετωπίζουμε κι αντιλαμβανόμαστε τις λέξεις. Η γλώσσα –όπως υπενθυμίζει κι ο Guiraud– δεν αποτελείται από τις λέξεις, αλλά από κατηγορίες λέξεων που η καθεμιά τους αποτελείται από ομάδα λέξεων με κοινά χαρακτηριστικά. Σε αντίθεση με τον Guiraud, εμείς κατατάξαμε τις περιπτώσεις των αθησαύριστων τύπων της *ΟΔΥΣΣΕΙΑΣ* του Καζαντζάκη με μορφολογικά και λεξικογενετικά κριτήρια, με σκοπό να αποδώσουμε την τυπολογία των ποιητικών αθησαύριστων.

Η *παραγωγικότητα* η οποία αποτελεί την πρώτη κατηγορία, όπως φαίνεται και στον παρακάτω πίνακα, υποδιαιρείται σε δύο βασικές κατηγορίες: στις περιπτώσεις που έχουν τη μορφή ‘βάση+επίθημα’ (Α1) και στις περιπτώσεις που έχουν τη μορφή ‘πρόθημα ή α’συνθετικό+βάση’ (Α2)· στην πρώτη υποκατηγορία εντάσσουμε περιπτώσεις όπως τα παράγωγα (Α1α) και τα παρασύνθετα (Α1β), ενώ στη δεύτερη υποκατηγορία εντάσσουμε περιπτώσεις όπως τα απλά σύνθετα (Α2α) και τα πολυσύνθετα (Α2β).

Τα *δάνεια*, τα οποία αποτελούν τη δεύτερη κατηγορία, χωρίζονται σε δύο μεγάλες υποκατηγορίες: τα εξωτερικά δάνεια (Β1) και τα εσωτερικά δάνεια (Β2). Στα εξωτερικά δάνεια εντάσσουμε περιπτώσεις όπως τα προσαρμοσμένα (συμμορφωμένα) δάνεια (Β1α), τα απροσάρμοστα (ασυμμόρφωτα) δάνεια (Β1β) και οι δάνειες λεκτικές μονάδες (μεταφραστικά δάνεια) (Β1γ), ενώ στα εσωτερικά δάνεια εντάσσουμε περιπτώσεις αλλαγής σημασίας σε λεκτικές μονάδες της ίδιας γλωσσικής ομάδας (Β2).

Τέλος, στην τρίτη κατηγορία εντάσσουμε τις περιπτώσεις που είναι αποτελέσματα του φαινομένου της *ονοματοποιίας*, δηλαδή τη δημιουργία γλωσσικών τύπων που προσπαθούν να αποδώσουν ένα φυσικό ήχο.

Σχηματικά η τυπολογία παρουσιάζεται όπως ακριβώς διαμορφώθηκε ως εξής:

Α) Παραγωγικότητα: 1. βάση+επίθημα: α. παράγωγα β. παρασύνθετα 2. πρόθημα ή α’συνθετικό+βάση: α. απλά σύνθετα β. πολυσύνθετα
Β) Δάνεια: 1. Εξωτερικά: α. προσαρμοσμένα (συμμορφωμένα) β. απροσάρμοστα (ασυμμόρφωτα) γ. δάνειες λεκτικές μονάδες (μεταφραστικά δάνεια) 2. Εσωτερικά: αλλαγή σημασίας σε λεκτικές μονάδες της ίδιας γλωσσικής ομάδας
Γ) Ονοματοποιία

Πίνακας 1 Τυπολογία νεολογικών αθησαύριστων λέξεων

4. Παραδείγματα από την *ΟΔΥΣΣΕΙΑ*

Στο συγκεκριμένο σημείο παρατίθενται μερικά παραδείγματα μέσα από την *ΟΔΥΣΣΕΙΑ* του Καζαντζάκη προκειμένου να αποδοθεί με ευκρίνεια η θεωρητική σκέψη ως προς την ποιητική νεολογική διαδικασία σύμφωνα με την τυποποίηση των αθησαύριστων λέξεων που περιγράφηκε παραπάνω. Οι λέξεις παρουσιάζονται με το συγκεκριμένο στο οποίο είναι ενσωματωμένες για την καλύτερη σημασιολογική τους κατανόηση:

δοξάρας	Ο <u>δοξάρας</u> γελάει ταντανιστά, ξεσκίστηκε ο λαιμός του: «Εσείς, μωρέ, γρικόατε ποταμό, και δεν το κόβει ο νους σας πως η ψυχή 'ναι ο ποταμός, ψυχή μονάχα ανηφορούμε' κι αν ξεπεζέψω απόψε απ' το κορμί, πάλε η στρατεία δε χάθη!»
κοσμοπαρωρίτη	Όλο το μέγα σώμα ξάχνισε του <u>κοσμοπαρωρίτη</u> , κι αργά, χιονοκαράβι, βλάμηδες και πωρικά και μνήμη, σαν καταχνιά στο πέλαο σαλέψαν κι ως δροσουλίτες σβήσαν.
θαλασσόφρυδο	Μα τότε, μπρούμυτα ως αρπάζουνταν ο Χάλικας στην πλώρα, ξεχώρισε μες στο αφροπέλαγο γαλάζο κορφοβούνι γυαλιστερό, στο <u>θαλασσόφρυδο</u> ν' ανεβοκατεβαίνει.
χεραγκαλιά	Οι πέτρες πέταξαν γαρούφαλα, τα σαμιαμίθια μπόι, σαν άρχοντας με τα χρουσά σκουτιά κατέβη ο μέγας ήλιος <u>χεραγκαλιά</u> με τη γυναίκα του τη φεγγαροντυμένη και μοίραζε φτερά στους σκούληκους κι ανθούς στα χορταράκια.
φεγγαροστάζουν	Μυρίζει η γης το κρινογιασεμί, γυμνές κοπέλες γέρνουν κι απλοχερούν κρασί στους άρχοντες και ρόδα στις κεράδες· πηχτά <u>φεγγαροστάζουν</u> τα δεντρά, σταθήκαν οι χορεύτρες κι ευωδιαστός ιδρώτας δροσερός παχνίζει τα κορμιά τους.
ντιντινίζουν	Κι οι νύχτες άρμोजαν τ' αστέρια τους στις μαύρες τραχηλιές τους, κι ως άγριες χήρες, αραπόχηρες, στον όχτο κατεβαίνουν, και <u>ντιντινίζουν</u> τα βραχιόλια τους τ' αστρομαργελωμένα.
φουρφουριστά	Τα κύματα αλαφριά, <u>φουρφουριστά</u> , με το λαλάρι επιάζαν, τα όρνια κοπάδια σαν αρνιά βαριά στα βράχια κοντοπήδουν, κι αρχοντικά σεριάνουν με κοιλιές χορτάτες οι κοράκοι.

Πίνακας 2 Παραδείγματα αθησαύριστων τύπων

Ακόμη, στον παρακάτω πίνακα παρατίθεται ενδεικτικά ένα μέρος του σώματος των αθησαύριστων λέξεων. Συγκεκριμένα, οι λέξεις είναι από την Α' ραψωδία της *ΟΔΥΣΣΕΙΑΣ* του Καζαντζάκη και παρουσιάζονται σε αλφαβητική σειρά, ενώ αριθμητικά φαίνεται και ο στίχος στον οποίο εμφανίζεται η λέξη στη συγκεκριμένη ραψωδία:

αγεροβοσκολόγαε	520	αδικοσκορπισμένο	652	ακρολοχεύει	1155
αγιουπίσια	1258	αιματοκόματα	1216	ακρολυγούσαν	164

Πίνακας 3 Σώμα Αθησαύριστων Λέξεων της ραψωδίας Α΄ της ΟΔΥΣΣΕΙΑΣ

5. Αντί επιλόγου

Με την παρουσίαση μέρους του ποιητικού γλωσσικού πλούτου της ΟΔΥΣΣΕΙΑΣ ανακαλύψαμε την αξόδυνη φαντασία της τέχνης και της τεχνικής του Καζαντζάκη όπως αυτή φωλιάζει και αργοσέρνεται στις νεολογικές λεξιλογικές επιλογές του έπους του. Ο συγγραφέας αποκαλύπτεται ως ένας μαέστρος των εσωτερικών ρυθμικών δομών των ποιητικών λέξεων, ως ένας ζωγράφος όπου «η λέξη μιλάει με την εικόνα» και ακολούθως «η σκέψη» του αποδίδεται «ολοένα σε ζωγραφιές» (Πρεβελάκης, 1958) και τέλος, ως ένας δημιουργός-ποιητής που πάλευε ασταμάτητα να μαγέψει τη λέξη, να ανανεώσει την σημασία της, να τη μεταμορφώσει σε μια άλλη νεολογική ορμή χαρίζοντας της μια νέα δομή, μια νέα μορφή, μια νέα ποιητική δύναμη· θαρραλέος πολεμιστής λέξεων, φράσεων και νοημάτων, ο Καζαντζάκης δεν σταματά να γράφει την ΟΔΥΣΣΕΙΑ με απλά υλικά που ουσιαστικά αποτελούν ένα οπλοστάσιο νεολογικής και ποιητικής δημιουργικότητας· δεν σταματά, δεν πνίγεται, δεν χορταίνει:

*Ψυχή μεγάλη, η γης δεν σε χωράει, τα σπίτια σε φοβούνται,
καλά το πεθυμούσες τέλεψες και το άχτι σου έβγαλές το.*

(Καζαντζάκης 1967:Θ 751-752)

Ένας δημιουργός που δεν χωράει στη γη που και ακόμα τώρα που έχει τελειώσει την ποιητική του δημιουργία είναι αμφίβολο αν διαφαίνεται ότι έβγαλε το άχτι του.

Ο Καζαντζάκης αποκαλύπτεται ως ένας συγγραφέας με ιδιαίτερη σχέση με το λεξικό πλούτο· μια σχέση Καζαντζάκη και Λέξης ερωτική και συνάμα σχέση απόρριψης· γιατί η νέα πρωτότυπη άγραφη λέξη, η αποτύπωση του κάθε νεολογικού τύπου είναι για αυτόν η απόλυτη ικανοποίηση και η επιστημονική ανακάλυψη:

*Να γυρίζεις την Ελλάδα, με τεντωμένο το αυτί, ν' ακούς από
το στόμα του λαού τη λέξη παρθένα ακόμα, χιλιάδες χρόνια
αμουντζάλωτη από το μελάνι, και να την παίρνεις μαζί σου,
όπως κλέφτουμε τη γυναίκα που αγαπούμε, με κουρσάρικη
αναγάλια! Να σκαρφαλώνεις βουνά, να πεινάς, να διψάς,
να 'σαι κατάσκοπος, και ξαφνικά να τα ξεχνάς όλα γιατί
αντάμωσες ένα βοσκό και σε φίλεψε μιαν άγνωστη
“περίλαμπρη” λέξη.*

(Καζαντζάκης 1941:106)

Τις «περίλαμπρες» λέξεις της *ΟΔΥΣΣΕΙΑΣ* προσπαθήσαμε να σας μετα-δώσουμε όπως αυτές εντάσσονται στη γλωσσολογική κατανομή των νεολογικών αθησαύριστων. Οι λέξεις είναι μορφικά στοιχεία του ποιητικού λόγου του Καζαντζάκη που φαίνονται και υπάρχουν· που μπορούμε να τις μετρήσουμε, να τις καταγράψουμε και να τις κατηγοριοποιήσουμε.

Η ψυχή της ποιητικής του Καζαντζάκη, όμως, είναι αζόδευτη· ταξιδεμένη κι αταξίδευτη μέσα σε γνωστές-άγνωστες λέξεις. Οδοιπόρος της γλώσσας ο Καζαντζάκης μέσα στην ποιητική του δημιουργία, περιπλανώμενοι κι εμείς στους οδυσσειακούς του στίχους:

*Είδες νερά πολλά, ταξίδεψες, είδες πολλούς ανθρώπους,
και πεταλούδισες αχόρταγο σε κάθε γης λουλουδι
κι αργά πιπίλισες το μέλι του και το φαρμάκι εφράθης·
και τώρα σαν αιτόπουλο κουρνιαξ στα κράκουρα του νου μου,
κι η γης πολλά στενή σου φαίνεται και τ' όζω πλούτος φτώχεια,
κι αναγυρνάς φλογάτο, στρογγυλό στο μέσα αγριμολόι·
ας είσαι βλογημένο, μάτι μου, που χορτασμό δεν έχεις!*

(Καζαντζάκης 1967:Π 495-501)

γλωσσικής ομάδας

Γ) Ονοματοποιία

[6]

Παραδείγματα μέσα από την ΟΔΥΣΣΕΙΑ

δεξιάς:
Ο δεξιάς γελει ταντασισά, ξεκόσμηκε ο λαιμός του:
«Εσείς, μωρέ, γρηάτε ποταμό, και δεν το κόβει ο νους σας
πως η κική! Ύαι ο ποταμός, ψική μονάχα αντιφασίμ
κι αν ξεπεζαίω απόψε απ' το κορμί, πόλε η στρατιά δε χάτη!»

κοσμοπαρηγόρη:
Όλο το μέγα σώμα ελάνησε του κοσμοπαρηγόρη
κι αργό, χιονοκαρόβι, βλαμνίδες και πυρικό και ιντήπι,
σαν καταγνώ στο πάλο σάλεσαν κι ως δροσυλίες φθίγαν.

θαλασοσφύριδο:
Με τόση, μπορούσαν ως αρπάζονταν ο Χάλας στην πλώρα,
δεχόμινε μες στο αεροπέλαγο γαλίζο κοροβονί
γυλιωτό, στο θαλασοσφύριδο ν' ανεβοκατέβαινε.

χεραγκαλιά:
Οι πέτρες πέταξαν γερόφυλα, τα σμειομένα μπόι,
σαν άρχοντας με τα χροιά σκαυτά κατάνη ο μέγας ήλιος
καταρραυά με τη γυναικα του τη φασεροντυμένη
και μοίραζε φτερά στους σκούληκους κι ανθρώι στα χορταράκια.

φειγαροστάζουν:
Μυρίζει η γης το κρινογασμί, γυνινές κοπέλες γένωνται
κι απλογερών κροστ' στους άρχοντας και ρόδα στις κεράδες
πλητά φαιγαροστάζουν τα δεινρά, σπύθην οι χροαίρες
κι ελωδισσάς ιδρώας δροσπός παχνίζι τα κορμιά τους.

νιπτινίζον:
Κι οι νύχτες άρμωζαν τ' αστέρια τους στις μαύρες τροχλίες τους,
κι ως άγριες χήρες, αροπόληρες, στον όχτο κατέβαιναν,
και σπασαύαν τα βροχόλο τους τ' αστρομυρμελάκινα.

φουφρουριτά:
Το κύματα αλαφρά, φουφρουριτά, με το ήλαρι σπάζαν,
τα όρνια κολλάδα σαν αρνά βαριά στα βράγια κοντοπάζαν,
κι αρχοντά σπριάνουν με κοιλίες χορτάτες οι κοράκια.

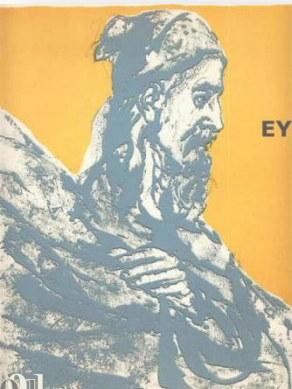

[7]

*Είδες νερά πολλά, ταξίδεψες, είδες πολλούς
και πεταλούδισες αχόρταγο σε κάθε γης λουλουδι
κι αργά πιπιλίσες το μέλι του και το φαρμάκι
εφραθής
και τώρα σαν αιτόπουλο κουνριάς στα κράκουρα
/ του νου μου,
κι η γης πολλά στενή σου φαίνεται και τ' άω
πλούτος φτώχεια,
κι αναγυρνάς φλογάτο, στρογγυλό στο μέσα
σνιμολοί
ας είσαι βλογημένο, μάτι μου, που χορτασμό δεν
έχει!*

ABSTRACT

The present paper illustrates the lexicographical formalization of the unedited notebook by Nikos Kazantzakis which has been composed in order to assist the author in his lexical selections during the writing of ODYSSEY. The inventory of the Cretan writer has been systematically formalized according to the Lexique actif du français (LAF) of Mel'èuk και Polguère (2007). The compilation of the Active Lexicon of ODYSSEY Notebook (ALON) by Nikos Kazantzakis is systematically described. Through this description the writing process that the author followed from the conception of an idea to its representation is elucidated.

Keywords: active lexicon, LAF, unedited notebook, Odyssey, Kazantzakis, poetic grammar

1. Εισαγωγή

Η συγγραφή ενός ποιήματος και γενικότερα ενός λογοτεχνικού κειμένου παραμένει ένας από τους άλυτους γρίφους της δημιουργικής σκέψης, ένα σκοτεινό μυστήριο της ανθρώπινης έκφρασης και διανόησης. Οι επιστήμες της λογοτεχνίας και της γλωσσολογίας συνεργάζονται προκειμένου να φωτίσουν τις άγνωστες πτυχές του φαινομένου της έκφρασης, δίνοντας τη δυνατότητα σε κλάδους όπως η υφολογία και η ποιητική –οι οποίοι θεωρούνται αναπόσπαστο κομμάτι και των δύο επιστημών– να αναδειξουν τα κύρια σημεία και τις ειδοποιούς διαφορές του έντεχνου λόγου από τις άλλες τέχνες και από τα άλλα είδη της γλωσσικής συμπεριφοράς. Η υφολογία και η ποιητική προσπαθούν να χαρτογραφήσουν την ασαφή περιοχή του ποιητικού φαινομένου και να εξηγήσουν επαρκώς το λογοτεχνικό γεγονός και τους κανόνες που το διέπουν.

Πολλοί επιστήμονες που ασχολούνται με το ύφος υποστηρίζουν ότι είναι επιτακτική ανάγκη η μελέτη ενός λογοτεχνικού κειμένου όχι μόνο εξωγενώς κρίνοντας τα βασικά χαρακτηριστικά του αλλά και ενδογενώς προσπαθώντας να αποκαλυφθούν, όσο είναι βέβαια δυνατόν, οι συνθήκες και οι παράγοντες που οδήγησαν στην λογοτεχνική σύλληψη και μετέπειτα στην ποιητική αποτύπωση. Απόκρυφα λογοτεχνικά κείμενα, χειρόγραφες σημειώσεις, ανέκδοτα πρωτόλεια δημοσιεύονται κατά καιρούς τα οποία δύνανται να αποτελέσουν την πηγή στοιχείων και πληροφοριών που αποκαλύπτουν τη θέση και τη σκέψη του συγγραφέα απέναντι στο δημιούργημά του.

Το αδημοσίευτο σημειωματάριο του Νίκου Καζαντζάκη αποτελεί ένα αδιάψευστο επιχείρημα σχετικά με το ζήτημα της λεξιθηρικής συνήθειας των συγγραφέων προτού εκφράσουν την έμπνευσή τους και ποιήσουν την ιδέα τους. Μιας έλλογης συνήθειας που θα μπορούσαμε να την παρομοιάσουμε με την προετοιμασία του πολεμιστή που οχυρώνεται και σπλίζεται με κατάλληλα εφόδια για να μπορέσει να αγωνιστεί και να επικρατήσει στη μάχη. Με τον ίδιο ακριβώς τρόπο ο κάθε συγγραφέας εμπλουτίζει και ενισχύει το γλωσσικό του οπλοστάσιο, αναζητώντας λέξεις και φράσεις που θα μπορούσαν να τον βοηθήσουν στη συγγραφή του ποιητικού του μηνύματος.

Ο Καζαντζάκης αποτελεί ένα αντιπροσωπευτικό δείγμα ενός διανοητή συγγραφέα που αναζητούσε συνεχώς την καταλληλότερη εκφραστικά και την πιο δυσεύρετη λέξη για να αποδώσει με ακρίβεια και σαφήνεια την ποιητική του ιδέα (Αλεξίου-Αποσκίτου 1978, Καζαντζάκης 1993, Καζαντζάκη 1998), αναδεικνύοντας όχι μόνο τη μοναδικότητα της λέξης αλλά και την πολυεπίπεδη διάσταση της ίδιας της γλώσσας. Παρόμοιες λεξιλογικές αναζητήσεις μαρτυρούνται είτε από χειρόγραφες σημειώσεις είτε

από μελέτες και άρθρα για αρκετούς έλληνες συγγραφείς όπως ο Κοραΐς, ο Σολωμός, ο Παλαμάς, ο Ελύτης.

Οι λειτουργίες της γλώσσας και τα επίπεδα ανάλυσής της αποδεικνύουν την έντονη ποιητικότητα της ως ανθρώπινο φαινόμενο της έκφρασης και της επικοινωνίας. Οι επιλογές και οι αποκλίσεις των συγγραφέων δίνουν ανανεωτική πνοή στη γλώσσα φανερώνοντας την αισθητική δύναμη του γλωσσικού φαινομένου με αποτέλεσμα να υπάρχει η δυνατότητα αποκάλυψης για εκείνο που ονομάζεται ποίηση της γλώσσας και γλώσσα της ποίησης (Jakobson 1981). Επομένως, οι λεξιλογικές επιλογές κάθε συγγραφέα αποτελούν την ιδιαίτερη ποιητική του γραμματική (poetic grammar, Jakobson 1981 1998), την αποτύπωση της προσωπικής του ταυτότητας κατά τη διαδικασία από τη σύλληψη της συγγραφικής του ιδέας, της μετατροπής του ερεθίσματος σε θέμα και σε τελική έκφραση του μηνύματος προς τους αναγνώστες (Μπαμπινιώτης 1991, Χαραλαμπίδης 2001).

Η ποιητική γραμματική του κάθε συγγραφέα δεν αποτελεί την παθητική παρατήρηση ενός φαινομένου ή ενός γεγονότος αλλά αποτελεί τον μοχλό ενεργοποίησης μηχανισμών που έγκειται τόσο στην ανάγνωση και φυσικά στην κατανόηση ενός λογοτεχνικού κειμένου αλλά κυρίως στη μάθηση νέων μεθόδων έκφρασης. Για το λόγο αυτό η σύγχρονη γλωσσολογία έχει στραφεί στη διερεύνηση της ποιητικής πράξης από γλωσσολογική σκοπιά με κυρίαρχο σκοπό την ανάδειξη των ιδιαίτερων χαρακτηριστικών της γραφής των λογοτεχνών. Παράδειγμα αποτελεί η περίπτωση του Καζαντζάκη που αγωνίζεται συνεχώς για την ποιητική του επιβίωση και μάχεται ανάμεσα σε χιλιάδες λέξεις, —όπως αποκαλύπτεται και μέσα από το αδημοσίευτο σημειωματάριο του που περιγράφεται αναλυτικά στη συνέχεια—, ενισχύοντας την πρωτότυπη γραφή του και το ιδιοσυγκρασιακό του λεξιλόγιο (Μαθιουδάκης 2010, Μαθιουδάκης & Καμπάκη-Βουγιουκλή 2010).

Η αγωνία της έκφρασης και ο ακατάπαυστος αγώνας του Καζαντζάκη με τον εσωτερικό του κόσμο αποκαλύπτεται σε έναν στίχο που καταγράφεται στην αρχή του ανέκδοτου σημειωματαρίου του ως μια μορφή προμετωπίδας: «Εργάτης είμαι, εργάτης κ' δουλέβω / στην άβυσσο της Μοίρας κρεμασμένος!».

2. Περιγραφή σημειωματαρίου

2.1 Τυπογραφική περιγραφή

Το *Σημειωματάριο του Νίκου Καζαντζάκη* (ΣΝΚ) αποτελεί ένα ιδιόγραφο προσωπικό λεξικό που στην πραγματικότητα είναι ένα ημερολόγιο γαλλικού εκδοτικού οίκου του έτους 1931 (*Agenda pour 1931*), το οποίο ανήκει στο αρχειακό υλικό του Μουσείου Νίκου Καζαντζάκη (ΑΥΤ. 218), στο χωριό Μυρτιά, στην Κρήτη. Το ΣΝΚ είναι αχρονολόγητο, αλλά μπορούμε να προσδιορίσουμε ότι ο κρητικός συγγραφέας το χρησιμοποίησε κοντά στα τέλη του έτους 1930, ίσως και μέχρι το 1938 (οπότε εκδόθηκε η *ΟΔΥΣΣΕΙΑ*).

Το ΣΝΚ έχει ένα χοντρό εξώφυλλο κατασκευασμένο από μπορντό δέρμα και βρίσκεται σε χάρτινη θήκη πολυτελείας. Στις πρώτες σελίδες (Εικόνα 1) του αναγράφεται μια ιδιόχειρη σημείωση του συγγραφέα, ως μορφή τίτλου «Words, words, words.» ενώ από κάτω δηλώνει ότι «(μονάχα ότι μπορεί να χρειαστεί για την ΟΔΥΣΣΕΙΑ και ΑΚΡΙΤΑ)». Οι αγγλικές λέξεις «words» είναι γραμμένες με κόκκινο μολύβι όπως και η λέξη «ΑΚΡΙΤΑ», δημιουργώντας την υποψία ότι προστέθηκαν μεταγενέστερα από την αρχική σύνταξη του ΣΝΚ. Άλλωστε το έργο ΑΚΡΙΤΑΣ είναι μια ιδέα του Καζαντζάκη για τη συγγραφή ενός έπους δίδυμου της *ΟΔΥΣΣΕΙΑΣ* το οποίο ποτέ δεν υλοποιήθηκε (Πρεβελάκης 1984:483-490).

Η εσωτερική δομή του είναι χωρισμένη σε ένα μεγάλο αριθμό θεματικών ενότητων. Πρόκειται για έναν αληθινό γλωσσικό θησαυρό έκτασης 383 σελίδων χειρόγραφου (σύμφωνα με την ιδιόχειρη αρίθμηση του συγγραφέα με μολύβι). Οι σελίδες αριθμούνται στη δεξιά σελίδα μονάχα με μονούς αριθμούς (3, 5, 7, κοκ), ενώ δεν αναγράφονται καθόλου οι ζυγοί αριθμοί (2, 4, 6, κοκ). Στο συνολικό αριθμό των σελίδων του ΣΝΚ βρίσκονται 151 κενές/άγραφες σελίδες, ενώ υπάρχουν 12 ανακρίβειες και ανακολουθίες σελίδων εξαιτίας λανθασμένης αρίθμησης. Ο Καζαντζάκης καταγράφει το κυρίως υλικό του με μαύρο μελάνι εκτός από ορισμένες διορθώσεις, ενώ υπάρχουν και ορισμένα αποκόμματα φύλλων χαρτιού με διάφορες λεξιλογικές πληροφορίες ενσωματωμένα στις σελίδες του ΣΝΚ.

Ο Καζαντζάκης καταγράφει τις σημειώσεις του ακολουθώντας τις ορθογραφικές του απόψεις. Για τις ορθογραφικές ιδιαιτερότητες του συγγραφέα οι οποίες αποτελούν ένα είδος ορθογραφικού «πιστεύω» γίνεται αναλυτική αναφορά από τον ίδιο στην εισαγωγή του *Λεξιλογίου* που συνόδευε την πρώτη έκδοση της *ΟΔΥΣΣΕΙΑΣ* (1938). Συγκεκριμένα αναφέρει ότι «σημαδέβεται ένας μονάχα τόνος, η οξεία, που μπαίνει στην τονιζόμενη συλλαβή· αν όμως η λέξη τονίζεται στη λήγουσα δε σημαδέβεται ο τόνος. Μερικές μονοσύλλαβες λέξεις παίρνουν τόνο για να ξεχωρίσουν από τις ομώνυμές τους: να, τί; πού; πώς; ως (έως) γιά (ή) μά (ορκοτικό) κλπ. Και μερικές πολυσύλλαβες: γιατί; ωχού, αχού, αλοί, καταπού; κλπ. Απλοποιήθηκε λίγο η ορθογραφία· καταργήθηκαν τα διπλά σύμφωνα· μονάχα, επειδή

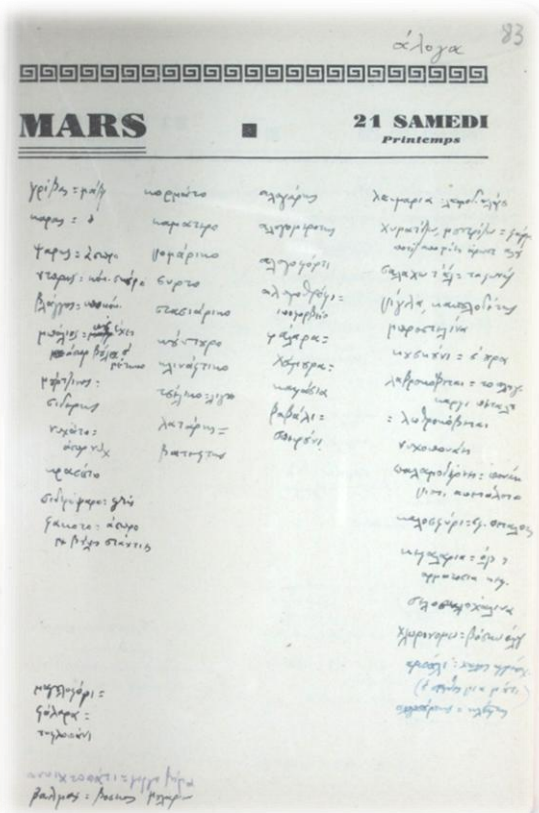

υπάρχει ανάγκη προφοράς, διατηρήθηκαν τα διο γ: αγγίζω, φαλάγγι κλπ» (Καζαντζάκης 1938). Ο συγγραφέας παρόλο που αναφέρει ο ίδιος τις «ορθογραφικές πρωτοτυπίες» του, αποσιωπά την ύπαρξη και μερικών άλλων (Bien 1972) όπως είναι:

- i. η απλοποίηση του γράμματος $-ω$, π.χ. στην περίπτωση των ρημάτων (αλλά και στα παράγωγά τους) που λήγουν σε $-ώνω$ τα οποία τα γράφει ως $-όνω$ ή του χρονικού επιρρήματος που το γράφει *τόρα* αντί *τόρω*,
- ii. η απαλοιφή $-σχεδόν$ οριστική του γράμματος $-υ$, π.χ. το αριθμητικό 2 το γράφει ως *διο* αντί *δυο* ή στους διφθόγγους που φωνολογικά προφέρεται ως [f] ή ως [v], το αντικαθιστά με τα σύμφωνα $-φ$ ή $-β$ αντίστοιχα.

Το ΣΝΚ παραμένει μέχρι και σήμερα αδημοσίευτο και επιστημονικά ανεξερεύνητο, ενώ αποτελεί ένα σώμα δεδομένων αθησαύριστων λέξεων, το οποίο ο ίδιος ο συγγραφέας συνέλεξε από κάθε μεριά της Ελλάδας με σκοπό να συμπεριλάβει τμήμα του στους στίχους του έπους του, της *ΟΔΥΣΣΕΙΑΣ*. Ο Καζαντζάκης αποθησαύριζε και κατέγραφε λέξεις «από το στόμα του λαού» (Πρεβελάκης 1958 1984) με κύριο μέλημα του να τις διασώσει και να τις κληροδοτήσει στους απόγονους νεοέλληνες.

Εικόνα 1 Εσώφυλλο ΣΝΚ

Εικόνα 2 Λήμμα άλγοιο (ΣΝΚ, σελ. 83)

2.2 Περιγραφή περιεχομένου

Το γλωσσικό υλικό είναι οργανωμένο από τον ίδιο το συγγραφέα σε 121 διαφορετικές θεματικές ενότητες (λχ. μέλη του σώματος, επαγγέλματα, εργαλεία, ζώα, φυτά, πράγματα, συναισθήματα, φράσεις, εκφράσεις, παροιμίες, λήμματα από λεξικά, αποσπάσματα από άλλα λογοτεχνικά έργα κá), όπως αυτές θα του ήταν χρήσιμες κατά την ποιητική του δημιουργία. Ενδεικτικά μία σελίδα του ΣΝΚ (Εικόνα 2) έχει την ονομασία της θεματικής ενότητας και από κάτω σε κάθετες στήλες περιλαμβάνει

λέξεις με ή χωρίς τη σημασία τους σχετιζόμενες μεταξύ τους και με την ενότητα. Συνολικά, σε όλες τις σελίδες του ΣΝΚ υπάρχουν περίπου 10.000 λεξικές μονάδες.

Στον παρακάτω πίνακα καταγράφονται οι τίτλοι/τα θέματα των ενότητων με τις αντίστοιχες σελίδες του σημειωματαρίου όπως αυτοί είναι γραμμένοι σύμφωνα με τις ορθογραφικές ιδιαιτερότητες του συγγραφέα. Ορισμένοι τίτλοι έχουν καταγραφεί περισσότερες από μία φορές αφού ο συγγραφέας αφιέρωσε για το συγκεκριμένο θέμα μεγαλύτερη έκταση, ενώ υπάρχουν και 69 σελίδες με γλωσσικό υλικό χωρίς την επισήμανση κάποιου θεματικού τίτλου.

Συγκεκριμένα οι θεματικές ενότητες του ΣΝΚ είναι:

σώμα - κόκαλα	2	στολή	45	ήλιος	100
σώμα	3	χρώματα	46	άστρα	101
χέρι, πόδι	4	χρώματα	47	καιροι	103

Πίνακας 1 Αναλυτικά οι θεματικές ενότητες του σημειωματαρίου

Οι ενότητες του ΣΝΚ αποτελούν μια μορφή ειδικού λεξικού ή αλλιώς ποιητικού λεξιλογίου στο οποίο ο συγγραφέας κατηγοριοποίησε τις λέξεις που επρόκειτο να χρησιμοποιήσει σε ομάδες ανάλογα με τις σημασιολογικές τους σχέσεις, προκειμένου να του είναι εύκολο προς αναζήτηση τις κατάλληλης λέξης τη στιγμή της δημιουργίας, τη στιγμή της αποτύπωσης του ερεθίσματος ή της έμπνευσης του σε μορφή μηνύματος με αποδέκτη τον κάθε αναγνώστη.

Ο ανεπίσημος αυτός κατάλογος λέξεων του Καζαντζάκη είναι μια προσπάθεια άτυπης μορφής σύνταξης ενός λεξικού το οποίο θα μπορούσε να φανεί χρήσιμο αφού παραμένει μια πηγή γλωσσικού υλικού τόσο για τους γλωσσολόγους όσο και για τους μελετητές του έργου του συγκεκριμένου συγγραφέα.

Επομένως αποφασίσαμε να μελετήσουμε συστηματικά και να καταγράψουμε επιστημονικά το σύνολο του υλικού του ΣΝΚ, ώστε να δημιουργήσουμε ένα λεξικό σύμφωνα με τα μοντέλα της σύγχρονης λεξικολογίας. Το λεξικογραφικό μας εγχείρημα αυτό για μια συστηματική καταγραφή του αδημοσίετου ΣΝΚ ενσαρκώνεται στο *Ενεργό Λεξικό της ΟΔΥΣΣΕΙΑΣ του Καζαντζάκη* (ΕΛΟΚ).

3. Θεωρητικό πλαίσιο κατασκευής του ΕΛΟΚ

Θεωρητικό υπόβαθρο για την εκπόνηση του ΕΛΟΚ αποτέλεσε το *Ενεργό Λεξικό των Γαλλικών* (*Lexique actif du français, LAF*) των Mel'čuk και Polguère (2007), το οποίο αναπτύχθηκε στα πλαίσια της θεωρίας *Έννοιας ⇔ Κειμένου* (*Meaning ⇔ Text Theory, MTT*) (Mel'čuk et al 1995) με βασικό πρωτεργάτη τον Igor Mel'čuk.

Η επιλογή του συγκεκριμένου λεξικογραφικού μοντέλου έγκειται στην πλήρη εναρμόνιση των τεσσάρων βασικών του χαρακτηριστικών (Mel'čuk & Polguère 2007:14-17) με τον κύριο στόχο της μελέτης μας:

- i. Είναι ένα εξειδικευμένο λεξικό (*C'est un dictionnaire spécialisé*)
- ii. Είναι ένα λεξικό που βοηθά στην έκφραση (*C'est un dictionnaire qui aide à s'exprimer*)
- iii. Είναι ένα τυποποιημένο λεξικό (*C'est un dictionnaire formalisé*)
- iv. Είναι ένα λεξικό-δείγμα (*C'est un échantillon de dictionnaire*)

Πιο συγκεκριμένα, η εξειδίκευση του LAF αναφέρεται στην επικέντρωση της λεξικογραφικής περιγραφής στο φαινόμενο της σημασιολογικής παραγωγής και των ημιδεσμευμένων φρασμάτων¹. Επίσης, επισημαίνεται ο κατεξοχήν ενεργητικός χαρακτήρας του λεξικού, καθώς προτείνεται ως ένα υποβοηθητικό μέσο έκφρασης λόγου. Συνεπώς, η δομή του λεξικού αρθρώνεται με αμιγώς σημασιοσυντακτικά κριτήρια, γεγονός που καθιστά το μοντέλο αυτό ένα αξιόπιστο μέσο για την κατάδειξη της πορείας που ακολούθησε ο Καζαντζάκης από τη σύλληψη μιας έννοιας στη

¹ Ο όρος *ημιδεσμευμένα φράσματα* αντιστοιχεί στον όρο *semi-phrasemes* (Mel'čuk 1998) κι αναφέρεται στα δεσμευμένα φράσματα στα οποία το σημασιόμενο μιας εκ των συστατικών τους λέξης αλλάζει βάσει της συνεμφάνισής της με μια άλλη λέξη του φρασήματος.

σημασιολογική της αποτύπωση και ακολούθως στη σημασιολογική παραγωγή και στις λεξικογραφικές του επιλογές.

Το τρίτο χαρακτηριστικό αναφέρεται στην τυποποίηση, δηλαδή στη συνέπεια και τη σαφήνεια των συμβάσεων που χρησιμοποιούνται ούτως ώστε ο μεγάλος όγκος των λεξικογραφικών πληροφοριών να καταγράφεται με ένα συστηματικό, ακριβή και περιεκτικό τρόπο, συμβάλλοντας, αδιαμφισβήτητα, στην αποτελεσματικότητα της χρήσης του λεξικού. Τέλος, με το τέταρτο χαρακτηριστικό τονίζεται ότι το *LAF* αποτελεί ένα δείγμα. Με τον όρο αυτό οι συγγραφείς (Mel'ëuk & Polguère 2007) επισημαίνουν ότι το *LAF* αποτελεί ένα πειραματικό λεξικό που έχει ως στόχο να προτείνει ένα νέο λεξικογραφικό μοντέλο και να αποτελέσει ένα παιδαγωγικό λεξικογραφικό πρότυπο για την εκμάθηση του λεξιλογίου². Επομένως, σύμφωνα με τα δύο τελευταία χαρακτηριστικά, το *LAF* μας προσφέρει τη δυνατότητα συστηματικής περιγραφής του λεξιλογίου του Καζαντζάκη και του προσυγγραφικού σταδίου της *ΟΔΥΣΣΕΙΑ* του.

4. Δομή του ΕΛΟΚ

Η δομή του ΕΛΟΚ παρουσιάζει την ακόλουθη μορφή:

ΑΛΟΓΟ, ουσιαστικό, ουδέτερο,

I ΘΗΛΑΣΤΙΚΟ ΖΩΟ

II ΕΛΛΕΙΨΗ ΛΟΓΙΚΗΣ

I ΘΗΛΑΣΤΙΚΟ ΖΩΟ | σ. 83 |

Το άλογο ιππεύεται από ένα άτομο X

Α. με τρίχωμα χρώματος **μαύρου γρίβας, καρας** Α. με τρίχωμα χρώματος **άσπρου ψαρης** Α. με τρίχωμα χρώματος **κόκκινου σκούρου ντορης** Α. με τρίχωμα χρώματος υποκόκκινου/λίγο κόκκινου **βλάγγος** Α. που έχει **άσπρη βούλα στο μέτωπο μπόλιος** Α. με τρίχωμα χρώματος **σιδερί σιδερής, μούρτζινος** Α. με **άσπρο νύχια νυχάτο** Α. με τρίχωμα χρώματος κόκκινου του κρασιού **κρασάτο** Α. με τρίχωμα χρώματος **gris σιδερόψαρο** Α. με τρίχωμα χρώματος μαύρου **γρίβας** Α. με τρίχωμα χρώματος **άσπρου με σταχτιές βούλες φακοτο** Α. με γερό και στητό σώμα **κορμάτο** Α. που είναι εργατικό **καματερο** Α. σωματώδες **γομάρικο** Α. οικόσιτο, που το οδηγούν στη βοσκή, σύρνοντάς το με το σκονί **συρτο** Α. που ιδρώνει **στασιάρικο** Α. χωρίς πολύ τρίχωμα και κοντή ουρά ή που του έχει αποκοπεί μέρος της ουράς **κούντουρο** Α. με πεσμένα αυτιά ή με κλειστά αυτιά **κλινάφτικο** Α. **λιγνό τσέλικο** Α. επιβήτορας **λατάρης, βατεφτης** Χ. που ιππεύει το Α. **αλογάρης** Χ. που εξημερώνει το Α. **αλογομεροτης** φορτίο που μεταφέρει το Α. **αλογοφόρτι** μέρος όπου εκτρέφονται τα Α. **αλογοθρόφι, υποφορβείο** στολίδι του μετώπου, του χαλινარიού ή των ηνίων του Α. **φάλαρα** σαγή του Α. **χάμουρα, καφάσια** ηνία, χαλινό, παρωπίδες και συναφή εξαρτήματα του Α. **χάμουρα** μεταλλική αιχμή ή τροχίσκος που προσαρμόζεται στις φτέρνες των υποδημάτων του ατόμου Χ για να κεντρίζει το Α. **βαβάλι, σπειρούνη λαιμοδέτης** του Α. **λαιμαργιά φάρμ. ποτίζ** από **μύτη άρωστ αλογ.** Α. **χυματίζω, μουντρίζω φωνάζω** τα Α. **σαλαχω τ'** Α. το δερμάτινο πλατύ λουρί του σωματιού Α. **γίγλα** στολίδι για το δέσιμο των καπουλιών του Α. **καπουλοδέτης** στολίδι για το μπροστινό μέρος του Α. **μπροστελίνα** στολίδι για την ουρά του Α. **κουσκούνη** το πληγ καρφι πετάλου του Α. **λαβροκόβεται, λωθορόκόβεται, νυχοπονάει** το Α. **πονάει γιατί** (είναι) **απετάλοτο παλαμοδέρνει σφυρί του πεταλοτή** για το Α. **καλοσφύρι** όλη η αρματοσιά του κεφαλιού του Α. **κεφαλαριά,** αρματοσιά του Α. **σελοσκαλογάλινα βόσκω** Α. **χλωρονομώ χαλος αγριοχ** (στο στήθος για μάτι) **αρπάλι κλέφτης** Α. **αλογοσούρτης** γοργό βήμα Α. **ανοιχτοπάτι** πανί που κλείνουν τα μάτια του επιβήτορα Α. **τυφλοπάνι** πανί που καλύπτει τα μάγουλα του αλόγου **μαγουλοφόρι**

Ε σύντροφε, άλογο καματερο, το μερομόχτι ας πάψει! (Α, 815),

Και πάμε οι δυο και σεριανίζουμε καβάλα στ' άλογα μας (Β, 1326)

◇ «τα' άλογα γυρνω»

II ΕΛΛΕΙΨΗ ΛΟΓΙΚΗΣ

ενικός

© **τρέλα, ξετρελεμός, φρενιά, φρένιασμα, μούρλα, ζούρλα, βούρλισμα, αφορμάγρα, στρίψη, βίδα, λόξα, πετρία, θεοζάλια**

το να συμπεριφέρεται κτ με τρόπο Α. **φυρομιαλίζω, φεγγαριάζομαι, αλαλογω, μουρλαίνομαι** Α. σε ηλικιωμένο άνθρωπο **ξεμώραμα, ξεκούτιασμα, ξεκουρκούτιασμα**

Πίνακας 2 Δομή του λήμματος 'ΑΛΟΓΟ' στο ΕΛΟΚ

² Παιδαγωγικές εφαρμογές του *LAF* για την ελληνική γλώσσα βλ. Papadopoulou (2010 2011).

4.1 Μακροδομή

Τα λήμματα επιλέχθηκαν από τις θεματικές ενότητες του σημειωματαρίου με καθαρά σημασιολογικά κριτήρια σημασιολογικού πλούτου αλλά και με τον περιορισμό να παρουσιαστεί ένα λήμμα ανά γράμμα της ελληνικής αλφαβήτου.

Το ΕΛΟΚ, στο αρχικό στάδιο της κατασκευής του, αποτελείται από ένα μικρό ποσοτικά αριθμό εικοσιτεσσάρων λημμάτων:

1. ΑΛΟΓΟ	9. ΙΜΑΤΙΟ	17. ΡΑΦΤΗΣ
2. ΒΟΥΝΟ	10. ΚΑΡΑΒΙ	18. ΣΥΓΓΕΝΗΣ
3. ΓΑΜΟΣ	11. (Ε)ΛΙΑ	19. ΤΡΙΧΑ
4. ΔΟΝΤΙ	12. ΜΑΤΙΑ	20. ΥΠΝΟΣ
5. ΕΡΩΤΑΣ	13. ΝΕΟΓΕΝΝΗΤΟ	21. ΦΕΙΓΤΑΡΙ
6. ΖΩΓΡΑΦΟΣ	14. ΞΥΠΝ(Ι)ΟΣ	22. ΧΤΙΣΤΗΣ
7. ΗΛΙΟΣ	15. ΟΝΕΙΡΟ	23. ΨΑΡΑΣ
8. ΘΥΜΟΣ	16. ΠΟΛΕΜΟΣ	24. ΩΡΑ

Πίνακας 3 Λήμματα του ΕΛΟΚ

Η εκ πρώτης όψεως περιορισμένη μακροδομή αντιδιαστέλλεται από την πλούσια μικροδομή του, δεδομένου ότι κάθε λήμμα του ενεργού λεξικού αντιστοιχεί στο σύνολο των λεξικών μονάδων που έχουν το ίδιο σημαίνων και το σημαινόμενά τους συνδέονται άμεσα ή έμμεσα συμπεριλαμβανομένου ένα μεγάλο αριθμό σημασιολογικών παραγώγων και συμπαραθέσεων (Blanco, αδημοσίευτο). Ενδεικτικό παράδειγμα αποτελεί το λήμμα ‘ΑΛΟΓΟ’ (Πίνακας 2), το οποίο παρουσιάζει 75 διαφορετικές λεξικές συνδέσεις.

4.2 Μικροδομή

Η μικροδομή του ΕΛΟΚ εμπεριέχει τη λεπτομερή περιγραφή των λεξικογραφικών πληροφοριών του λήμματος, οι οποίες διακρίνονται σε έξι κύρια μέρη και οι οποίες θα παρουσιαστούν εδώ για λόγους συστηματικότητας σε συνάρτηση με το λήμμα ‘ΑΛΟΓΟ’ (Πίνακας 2):

- i. Γραμματικές πληροφορίες.
- ii. Σημασιολογικές ετικέτες.
- iii. Δομή καθορισμένων στοιχείων.
- iv. Σημασιολογικά παράγωγα και συμπαραθέσεις.
- v. Παραδείγματα.
- vi. Πλήρως δεσμευμένα φρασήματα.

Οι γραμματικές πληροφορίες αφορούν τη δήλωση του μέρους του λόγου στο οποίο ανήκει το λήμμα ‘ουσιαστικό’ και το γένος του ‘ουδέτερο’. Έπειτα, ακολουθεί η σημασιολογική περίληψη του λήμματος, η οποία αποτελείται από τις σημασιολογικές ετικέτες ‘ΘΗΛΑΣΤΙΚΟ ΖΩΟ’ και ‘ΕΛΛΕΙΨΗ ΛΟΓΙΚΗΣ’, δηλαδή από τα σημαινόμενα που ορίζουν τις λεξικές μονάδες που συνδέονται με το λήμμα. Αξίζει να σημειωθεί ότι οι σημασιολογικές ετικέτες ορίστηκαν σύμφωνα με το πρότυπό μας, το LAF, με τις αντίστοιχες προσαρμογές στις ανάγκες του λημματολογίου μας. Στη συνέχεια της μικροδομής, παρουσιάζεται η δομή των καθορισμένων στοιχείων της εκάστοτε λεξικής μονάδας ‘Το άλογο ιππεύεται από ένα άτομο X’.

Το τέταρτο μέρος της μικροδομής καταλαμβάνει τη μερίδα του λέοντος, καθώς σε αυτό παρατίθενται τα σημασιολογικά παράγωγα ‘ανοιχτοπάτι’ και τα ημιδεσμευμένα φρασήματα ‘φακοτο’ της κάθε λεξικής μονάδας με τον αντίστοιχο τυποποιημένο ορισμό τους. Για τον ορισμό που συνοδεύει τόσο τα παράγωγα όσο τα ημιδεσμευμένα φρασήματα ‘Α. που έχει άσπρη βούλα στο μέτωπο’, βασιστήκαμε ως προς την τυποποίηση στο LAF και ως προς το περιεχόμενο κυρίως στις σημειώσεις του ίδιου του Καζαντζάκη, οι οποίες σημειώνονται με πλάγια γράμματα (‘κόκκινου σκούρου’), και σε λεξικά τόσο της κοινής νεοελληνικής (α. στην ηλεκτρονική μορφή του *Λεξικού της Κοινής Νεοελληνικής* του Ινστιτούτου Νεοελληνικών Σπουδών (1998-2002), β. στο *Λεξικό της Νέας Ελληνικής Γλώσσας* του Μπαμπινιώτη (2008), γ. στο *Λεξικόν της Νέας Ελληνικής Γλώσσας* της Πρωίας (1933) και

δ. στο *Μέγα λεξικόν όλης της Ελληνικής Γλώσσας* του Δημητράκου (1964)) όσο και σε διαλεκτικά της κρητικής διαλέκτου (α. στο *Περί του γλωσσικού ιδιώματος της Κρήτης* του Πάγκαλου (1994-2002), β. στο *Γλωσσικό ιδίωμα της ανατολικής Κρήτης* του Πιτυκάκη (1983), γ. στο *Λεξικό Ερμηνευτικό και Ετυμολογικό του δυτικοκρητικού γλωσσικού ιδιώματος* του Ξανθινάκη (2009), δ. στο *Κρητικόν Λεξιλόγιον* του Κονδυλάκη (1990)).

Τέλος, ακολουθούν ενδεικτικά παραδείγματα χρήσης της κάθε λεξικής μονάδας ‘*Και πάμε οι δυο και σεριανίζουμε καβάλα στ’ άλογα μας*’ μέσα από την τέταρτη έκδοση της *ΟΔΥΣΣΕΙΑΣ*³ (1967) των εκδόσεων Ελένης Καζαντζάκη, όπως, επίσης, πλήρως δεσμευμένα φρασήματα⁴ που εμπεριέχουν την εν λόγω λεξική μονάδα ‘*τ’ άλογα γυρνώ*’.

5. Επίλογος

Η λεπτομερής μελέτη του περιεχομένου του ΣΝΚ –προκειμένου να αναδειχθεί η ιδιαίτερη γλωσσική ευαισθησία και η λεξιθηρική δεινότητα του μεγάλου δημιουργού κατά το στάδιο προετοιμασίας συγγραφής της *ΟΔΥΣΣΕΙΑΣ*– αποτέλεσε για μας πρωτόγνωρη επιστημονική πρόκληση. Μετά την δημοσίευση των 24 λημμάτων, στόχος μας είναι η συστηματική λεξικογραφική καταγραφή ολόκληρου του αδημοσίετου ΣΝΚ, το οποίο αναμένεται να αποτελέσει ένα χρήσιμο εργαλείο για τους μελετητές, στους οποίους θα δοθεί η δυνατότητα να παρακολουθήσουν την πορεία που ακολουθούσε ο συγγραφέας από τη σύλληψη της ποιητικής ιδέας μέχρι τη γλωσσική επένδυσή της με την κάθε λεξική επιλογή του. Η μελέτη και η δημοσίευση παρόμοιων χειρόγραφων σημειώσεων κι άλλων ελλήνων συγγραφέων ανοίγει ακόμη μια πολύ σημαντική δίοδο ανάμεσα στην επιστήμη της γλωσσολογίας και την επιστήμη της νεοελληνικής λογοτεχνίας, προκειμένου να αναδειχθούν οι ποιητικές ιδιαιτερότητες των συγγραφέων και να διαφωτιστούν ορισμένα σκοτεινά σημεία που αφορούν τον κλάδο της υφολογίας.

Ευχαριστίες

Το ΣΝΚ αποτελεί μέρος του αρχαιικού υλικού του Μουσείου Νίκου Καζαντζάκη, στο χωριό Μυρτιά, στην Κρήτη. Ευχαριστούμε θερμά τη διευθύντρια, Βαρβάρα Τσάκα, και τον υπεύθυνο προγραμματισμού και ανάπτυξης, Αντώνη Λεβέντη, καθώς και τον Γιώργο Γραμματικάκη, πρόεδρο του Διοικητικού Συμβουλίου του Μουσείου Νίκου Καζαντζάκη για την ευγενική παραχώρηση του ΣΝΚ και του συνοδευτικού φωτογραφικού υλικού. Τέλος, θα θέλαμε να ευχαριστήσουμε τον γραφίστα Γιώργο Μπλατσή (giorgos.blatsis@hotmail.com) για την αισθητική επιμέλεια της αφίσας (poster) της παρουσίασης.

³ Η *ΟΔΥΣΣΕΙΑ* του Νίκου Καζαντζάκη από τη δεύτερη έκδοση (1957) και μετά τιτλοφορείται ως *ΟΔΥΣΣΕΙΑ* μετά από απαίτηση των εκδοτικών οίκων της εποχής για απόλυτη συμμόρφωση στη νεοελληνική γραμματική.

⁴ Ο όρος *πλήρως δεσμευμένα φρασήματα* αντιστοιχεί στον όρο *full phrasemes* (Mel’čuk 1998) κι αναφέρεται στα δεσμευμένα φρασήματα των οποίων το σημαϊνόμενο δεν αποτελεί το άθροισμα των σημαϊνομένων των επιμέρους συστατικών του φρασήματος.

Σημειώματα Νίκου Καζαντζάκη (ΣΝΚ)

Το τεράστιο σπέρμα του Νίκου Καζαντζάκη (ΣΝΚ) αποτελεί ένα διάφορο προσωπικό λεξικό που στην πραγματικότητα είναι ένα ημερολόγιο γλωσσικό εθνομαιικού του έτους 1931 (April to June 1931). Το ΣΝΚ είναι ασυνολόγητο, αλλά μπορούμε να προσδιορίσουμε ότι ο κριτικός συγγραφέας το χρησιμοποίησε κατά τα τέλη του έτους 1930, ίσως και μέχρι το 1938 (όπου εκδόθηκε η Οδύσσεια). Το ΣΝΚ παρουσιάζει μέτρα και σύμμετρα οδοντομετρίας και επεξεργασίας επιλεγμένης.

Πρόκειται για ένα αληθινό γλωσσικό θησαυρό έκτακτο 383 σελίδων χειρόγραφου (σύμφωνα με την έκδοση ορισμένη του Καζαντζάκη), τον οποίο ο ίδιος ο συγγραφέας συνέλεξε από κάθε μέρη της Ελλάδας με σκοπό να συμπληρώσει τμήμα του στους στίχους του έπους του, της Οδύσσειας. Ο Καζαντζάκης αποφασίζει και κατηγορεί λέξεις «από το στόμα του λαού» (Πριεβόλνικ, 1938 & 1984) και κέρδι μάλιστα του να τις διακρίνει από τις κληροδοτούμενες στους σπάνιους νεαλόνες.

Το γλωσσικό υλικό είναι οργανωμένο από τον ίδιο τον συγγραφέα σε 121 διαφορετικές θεματικές ενότητες (π.χ. μέτρα, τα σημεία, επεξεργασίες, αρχαίες, όμοι, αντί, πλάγια, σωματικά, φρονίες, κινήσεις, παροχές, μύμια από λέξεις, αποσπάσματα από άλλα λογοτεχνικά έργα κλπ, όπως αυτές θα του ήταν χρήσιμες κατά την ποίηση του δημιουργού). Συνολικά, σε όλες τις σελίδες του ΣΝΚ έχουμε 10.000 περίπου λέξεις/φράσεις.

Το ΣΝΚ αποτελεί μέρος του αρχείου υλικού του Μουσείου Νίκου Καζαντζάκη, στο χωριό Μορίτι, στην Κρήτη. Επισκοπείται θετικά η διερεύνηση και η διοικητική Συμβολή του Μουσείου Νίκου Καζαντζάκη για την παραγωγή του ΣΝΚ, καθώς και του φωνητικού υλικού.

Ενταγμένο Λεξικό Οδύσσειας Καζαντζάκη (ΕΛΟΚ)

Το λεξικό μας εγγράφη για μια συστηματική καταγραφή του οδοντομετρικού σημειωματολογίου του Καζαντζάκη (ΣΝΚ) αναφέρονται στο λεγόμενο λεξικό της Οδύσσειας του Καζαντζάκη, στο ΕΛΟΚ. Θεωρητικό υπόβαθρο για την εκπόνηση του ΕΛΟΚ αποτελεί το *Ενταγμένο Λεξικό των Ελλήνων* (Léxico entré des Grecs, LAF) των Μανώλη και Ρούμπερ (2007), το οποίο διαφέρει βάσει σημασιολογικής παραγωγής. Συνεπώς, η υιοθέτηση του λεξικογραφικού μοντέλου του LAF έρχεται να εκπληρώσει τον απώτερο στόχο μας που δεν είναι άλλος από την κατάδειξη της προσυγγραφικής διαδικασίας που ακολουθεί ο συγγραφέας, όπως αυτή καταγράφεται από τον ίδιο στο ΣΝΚ.

Μεθοδολογία

Η μεθοδολογία του ΕΛΟΚ αποτελείται από 24 μύμια (ένα λέμμα για κάθε γράμμα της αλφάβητου, Α-Ω). Πρόκειται για ένα περιορισμένο υπόστυλο καθόλου ευκαταφρόνητο αριθμό λέξεων, αν λάβουμε υπόψη ότι κάθε λέμμα του λεξικού αντιστοιχεί στο σύνολο των λέξεων μύμιας που έχουν το ίδιο σημείο και τα σημειωμένα τους συνδυάζονται μέσω ή ήμιας (βλ. παρακάτω) συμπεριλαμβανομένου ένα μεγάλο αριθμό σημασιολογικών παραγωγών και συμπεριφορών. Ενδεικτικό παράδειγμα αποτελεί το λέμμα «ΑΛΟΓΟ» (βλ. παρακάτω), το οποίο παρουσιάζει 75 διαφορετικές λέξεις/φράσεις.

Τα 24 μύμια του ΕΛΟΚ είναι: ΑΛΟΓΟ, ΒΟΥΤΟ, ΓΑΜΟΣ, ΚΟΝΤΙ, ΕΡΠΙΤΑΙ, ΣΙΓΓΡΑΦΟΣ, ΗΛΙΟΣ, ΟΥΤΟΣ, ΜΕΛΑΤΟ, ΚΑΡΑΒΙ, ΕΛΑ, ΕΛΑΛ, ΚΑΠΑ, ΉΘΕΛΕΝΗΤΟ, ΣΥΝΤΟΝ, ΣΥΝΤΟΝ, ΟΝΕΙΡΟ, ΠΟΛΕΜΟΣ, ΡΑΦΤΗΣ, ΣΥΓΓΕΝΕΙΑ, ΤΡΙΧΑ, ΥΠΝΟΣ, ΘΕΓΓΑΡ, ΤΙΣΤΗΣ, ΒΑΡΑΣ, ΟΡΑ.

Μεθοδολογία

Η μεθοδολογία του ΕΛΟΚ ακολουθεί αυτή του προτύπου του, του LAF, αρθρώνοντας τις πληροφορίες του μύμιας σε 6 κύρια μέρη:

- Γραμματικές πληροφορίες
- Σημασιολογικές επιπτώσεις
- Δομή καθορισμένων στοιχείων
- Παραδείγματα
- Ιδιωματισμούς

Η ΕΛΛΗΝΙΣΤΙΚΗ ΛΟΓΙΚΗ

Τρέλα, ξετρελμένος, φρενιά, φρένιασμα, μουρλα, ζουρλα, βουρλιασμα, αφορμάρια, στρώση, βίδα, λόλα, πετρία, θεοζάλα

το να συμπεριφέρεται κτ με τρόπο Α. φουρμαλίζω, φεγγαροζώωμαι, αλαλαγω, μουρλαίνωμαι Α. σε ηλικιωμένο άνθρωπο ξεμυρλα, ξεκουτάσμαι, ξεκουρούτσμαι

Αναφορές...

Η λεξικογραφική μελέτη του παραγράμμου του ΣΝΚ προκειμένου να αναδειχθεί η έκταση γλωσσική ευαισθησία και η λεξικογραφική δυνατότητα του μεγάλου δημιουργού κατά το στάδιο πρακτικής συγγραφής της Οδύσσειας, αποτελεί για μας πρωτόγνωρη επιστημονική πρόκληση. Μετά τη δημοσίευση των 24 μύμιων, όπως μας είναι ευνόητο, λεξικογραφική καταγραφή ολόκληρου του οδοντομετρικού ΣΝΚ, το οποίο αναμένεται να αποτελέσει ένα χρήσιμο εργαλείο για τους μελετητές, στους οποίους θα δοθεί η δυνατότητα να παρακολουθήσουν την πορεία που ακολουθεί ο συγγραφέας από τη συλλογή της ποίησης ιδέας μέχρι τη γλωσσική επένδυση της με την κάθε λέξη επιλογής του.

ABSTRACT

The Conversation Analytic concept of repair, variously realized as self-/other-initiated self-/other-repair, is investigated as instanced in direct/indirect address, i.e. as person reference and, occasionally, as membership categorization (MCD), in authentic Greek conversational interaction, with a view to locating currently problematic areas and their articulation with cultural norms. The analysis shows Greeks oscillating between familiarity and distance (due to/despite the cultural default for solidarity). It also documents the persistence of linguistic/sociocultural ambivalence towards women, who are often addressed/referred to/categorized in glaringly sexist ways.

Keywords: repair, address/reference, minimization, recognitions, MCDs, familiarity/distance, gender

1. Η έννοια της διόρθωσης

Σύμφωνα με την οπτική της εθνομεθοδολογικής *Ανάλυσης της Συνομιλίας* (Sacks et al. 1974), η σχετικότητα της πρακτικής της *διόρθωσης* είναι δυνατόν να προκύψει σε σχέση με οποιοδήποτε στοιχείο της συνομιλίας —καθώς δεν περιορίζεται στην αποκατάσταση λαθών, γραμματικών ή άλλων— ενώ είναι, επίσης, πιθανόν να αδρανήσει παρά την οφθαλμοφανή διάπραξή τους (Schegloff et al. 1977). Επιπλέον, είναι δυνατόν να εγερθεί από ένα οποιοδήποτε μέλος και να πραγματοποιηθεί από το ίδιο ή από άλλο μέλος, και έτσι διακρίνεται σε *αυτοεγχειρόμενη/ετεροεγχειρόμενη*, και σε *αυτοδιόρθωση/ετεροδιόρθωση*.

Για την πραγμάτωση κάθε μίας από αυτές τις τέσσερις εκδοχές που προκύπτουν συνδυαστικά, προβλέπεται διαφορετικός γλωσσικός σχεδιασμός και συγκεκριμένες θέσεις στη *διορθωτική αλληλουχία*, η οποία εκτείνεται σε τουλάχιστον τρεις συνεισφορές (ό.π.).¹ Στη βάση της αρχής της *προτίμησης*, προκρίνεται η αυτοδιόρθωση έναντι της ετεροδιόρθωσης και η αυτοέγερση έναντι της ετεροέγερσης, και έτσι η αυτοεγχειρόμενη αυτοδιόρθωση αποτελεί την πλέον *προτιμητέα* ή ασημάδευτη επιλογή, ενώ η ετεροεγχειρόμενη ετεροδιόρθωση την πλέον *σημαδεμένη*,² καθώς συχνά λειτουργεί ως προάγγελος επικείμενων *μη-προτιμητέων* δεύτερων μελών των *γεινιαστικών ζευγών*,³ π.χ. της διαφωνίας (Pomerantz 1984). Συγχρόνως, όμως, η ετεροέγερση δημιουργεί χώρο για αυτοδιορθωτικές κινήσεις, ώστε να αποτραπεί κατά το δυνατόν η πραγματοποίηση της ετεροδιόρθωσης (Schegloff 2007a, 103). Ωστόσο, η τελευταία δρα και ‘εκπαιδευτικά’ ως μέσο κοινωνικοποίησης των νεότερων μελών —εξού και η συχνή χρήση της σε διδακτικά περιβάλλοντα. Εν ολίγοις, η διόρθωση δεν αφορά μόνο την οργάνωση της γλωσσικής συμπεριφοράς, αλλά και της κοινωνικής, αφού καταμερίζει δικαιώματα στα συνομιλούντα μέλη, εναρμονίζει τύπους δράσης με συγκεκριμένες συμπεριφορές, και

¹ 1η Συνεισφορά (ομιλήτρια/ομιλητής Α): εμφάνιση προβλήματος ή εμφάνιση προβλήματος + έγερση διόρθωσης + επιτέλεση διόρθωσης. 2η Συνεισφορά (ομιλήτρια/ομιλητής Β): έγερση ή έγερση + επιτέλεση. 3η Συνεισφορά (ομιλήτρια/ομιλητής Α): επιτέλεση. 4η Συνεισφορά (ομιλήτρια/ομιλητής Β): έγερση + επιτέλεση.

² 1η Προτίμηση: αυτοέγερση + αυτοδιόρθωση, εντός της 1ης συνεισφοράς [Θέση 1]. 2η Προτίμηση: αυτοέγερση + αυτοδιόρθωση, μεταξύ 1ης και 2ης συνεισφοράς [Θέση 2]. 3η Προτίμηση: ετεροέγερση στη 2η συνεισφορά, και αυτοδιόρθωση στη 3η συνεισφορά [Θέση 3]. 4η Προτίμηση: ετεροέγερση + ετεροδιόρθωση, στη 2η συνεισφορά [Θέση 3].

³ Το γεινιαστικό ζεύγος αποτελεί ακολουθία δύο διαδοχικών εκφωνημάτων από διαφορετικά πρόσωπα, με το πρώτο εκφώνημα να εγκαθιστά αναμονές σχετικά με το (προτιμητέο/μη-προτιμητέο) δεύτερο (Schegloff and Sacks 1973), π.χ. *αποτίμηση-συμφωνία/διαφωνία*.

αποτελεί συστατικό στοιχείο στη διαδραστική διαχείριση βασικών οργανωτικών δομών, όπως η συμφωνία και διαφωνία (Schegloff 1987, 213).

2. Διόρθωση, (ευ)εξηγητότητα και διυποκειμενικότητα

Στη βάση αυτή, η διαδραστική πρακτική της διόρθωσης, αποτελεί την πηγή της (ευ)εξηγητότητας⁴ των πρακτικών δράσεων, ή εθνομεθόδων των μελών, η οποία ορίζει τις καθημερινές πράξεις τους ως «πρόδηλα λογικές και περιγράψιμες για κάθε πρακτικό σκοπό» (Garfinkel 1967, vii) —με δυο λόγια, *παρατηρήσιμες και περιγράψιμες* (Lynch 1993, 14).

Τα μέλη προσανατολίζονται ανάλογα, οργανώνοντας τις δράσεις τους ως κανονιστικά και αναδραστικά ευεξηγήτες, έτσι ώστε να ανταποκρίνονται στην κατάσταση συγκροτώντας την, και συντονίζονται με σκοπό να επιτευχθεί η *διυποκειμενικότητα*, η αμοιβαιότητα δηλαδή της οπτικής (Garfinkel 1967, 30· Schutz 1962), η οποία δεν θεωρείται απλώς σύμπτωση (υποκειμενικών) κοινών παραδοχών και αξιών που πηγάζουν από μια (αντικειμενική) κοινή κουλτούρα, αλλά μαρτυρείται διαδραστικά ως ένα 'εγχείρημα' (Garfinkel 1967, 30), ως μία διαρκής ενεργητική διαδικασία η οποία εξελίσσεται βήμα βήμα (Hilbert 2005, 253-254). Με αυτήν την έννοια, οι αλληλουχικές τοποθεσίες της διόρθωσης αποτελούν σημεία διατομής των κοινωνικών μακροδομών με τις μικροδομές της καθημερινής (συνομιλιακής) διάδρασης (Schegloff 1987), και επομένως προπύργια της διυποκειμενικότητας (Schegloff 1992, 1333).

3. Προσφώνηση και αναφορά

Οι κοινωνιογλωσσικές παράμετροι της νεοελληνικής προσφώνησης (οικειότητα, ηλικία, φύλο, ιεραρχία κ.λπ.) έχουν μελετηθεί διεξοδικά σε προηγούμενες έρευνες (Μακρή-Τσιλιπάκου 1984· Πέτριτς 1989· Petrits 1989). Η παρούσα μελέτη εστιάζει σε διορθωτικά φαινόμενα σε σχέση με την άμεση ή έμμεση *προσφώνηση*, δηλαδή με την *αναφορά σε πρόσωπα*, με σκοπό να εντοπισθούν οι προβληματικές περιοχές και οι ισχύουσες νόρμες.

Η αναφορά (σε πρόσωπο) απασχολεί την Ανάλυση της Συνομιλίας ως μία από τις απαντήσεις στο καθολικής ισχύος ερώτημα «Γιατί αυτό τώρα;» (Schegloff and Sacks 1973, 299). Ως επιλογή, δηλαδή, από την/τον ομιλήτρια/ομιλητή της καταλληλότερης γλωσσικής έκφρασης, ώστε να επιτευχθεί η αναγνώρισή της από τα συνομιλούντα μέλη —πάντοτε σε σχέση με την επί μέρους διαδραστική ακολουθία που επιτελείται (π.χ. εισαγωγή/κλείσιμο θέματος, αφήγηση προβλημάτων/ιστοριών κ.ά.), και εντός της εκάστοτε συγκεκριμένης συνομιλίας, (ό.π.: Sacks and Schegloff 1979). Σχετικά διαπιστώνεται ότι η αναφορά υπακούει σε δύο *αρχές προτίμησης*: την αρχή της *ελαχιστοποίησης* και την αρχή της *αναγνωρισιμότητας*, από τα υπόλοιπα μέλη, των εκφράσεων που επιλέγονται από την/τον ομιλήτρια/ομιλητή για να πραγματώσουν την αναφορά —στον βαθμό που συμπίπτουν οι εκατέρωθεν συναγωγές για το τι θεωρείται αμοιβαία αναγνωρίσιμο (Sacks and Schegloff 1979, 16-7).

Η πρώτη αρχή προκρίνει τους μονολεκτικούς όρους (π.χ. αυτή, κάποια, φοιτήτρια, Μυρτώ) έναντι των πολυλεκτικών αναφορικών εκφράσεων (π.χ. η γειτόνισσα της μαμάς μου), με περαιτέρω ροπή προς τη χρήση του κύριου ονόματος (ως πρωτοτυπικά αναγνωρίσιμου), το οποίο είναι δυνατό να χρησιμοποιηθεί και χωρίς να ικανοποιείται η αρχή της αναγνωρισιμότητας, αλλά προοικονομώντας υστερότερες χρήσεις (17). Η δεύτερη αρχή προτίμησης αποτελεί την εξειδίκευση, στον χώρο της αναφοράς, του καθολικού *παραληπτικού σχεδιασμού* (recipient design) (Sacks et al. 1974), ο οποίος συνοψίζει τον αδιάλειπτο διαδραστικό προσανατολισμό της/του ομιλήτριας/ομιλητή προς τα εκάστοτε συγκεκριμένα υπόλοιπα συνομιλούντα μέλη, προς τα οποία συντονίζει κάθε φορά τη συγκρότηση της συνεισφοράς της/του. Στην περίπτωση, τώρα, που οι δύο αρχές προτίμησης συγκρούονται, προβλέπεται σταδιακή *χαλάρωση* (αλλά όχι *αναίρεση*) της ελαχιστοποίησης προς όφελος της αναγνωρισιμότητας, η οποία και θεωρείται ισχυρότερη για προφανείς λόγους (Sacks and Schegloff 1979, 19).

Επιπλέον, αναγνωρίζονται συναρτήσεις των αναφορικών εκφράσεων με τις αλληλουχικές τοποθεσίες στις οποίες εμφανίζονται ως *τοπικά αρχικές* ή *τοπικά ακόλουθες* (Schegloff 1996, 450). Έτσι, οι αρχικές αναφορές συνήθως διεκπεραιώνονται (ασημάδευτα) από πλήρεις ονοματικές φράσεις ενώ οι ακόλουθες από αντωνυμίες. Ο διαχωρισμός της γλωσσικής μορφής της αναφοράς από την αλληλουχική της τοποθέτηση επιτρέπει την ανάδυση συγκεκριμένων διαδραστικών νοημάτων όταν υπάρχει αναντιστοιχία μορφής και θέσης, και επομένως σημαδεμένη χρήση (450-1).

⁴ Μεταφράζω έτσι τον εθνομεθοδολογικό όρο *accountability*, αποφεύγοντας τον προφανέστερο, αλλά ανεπαρκή, όρο 'κοινωνική λογοδοσία', καθώς καλύπτει μόνο ένα τμήμα του συνολικού εύρους του.

4. Πώς να σε/σας προσφωνήσω;

Τα δεδομένα της έρευνας προέρχονται από τηλεοπτικά προγράμματα λόγου. Η χρήση τηλεοπτικών δεδομένων αποτελεί καταξιωμένη, πλέον, κοινωνιογλωσσολογική/συνομιλιο-αναλυτική πρακτική, λόγω της μεγάλης διάχυσής τους και, επομένως, του ρόλου τους ως πρότυπων χρήσεων για το κοινό, τη συμπεριφορά του οποίου περιγράφουν αναδραστικά (Tagliamonte and Roberts 2005· Hutchby 2006· Tolson 2006). Προφανώς, το θεσμικό πλαίσιο ορίζει ως ένα βαθμό την επιλογή προσφώνησης/αναφοράς, η οποία, όμως, επιπλέον στοιχειοθετεί συγκεκριμένο κοινωνικο-πολιτισμικό προσανατολισμό (Stivers 2007, 73). Ο τηλεοπτικός λόγος, πάλι, εμφανίζει (δευτερογενή) προφορικότητα (Ong 1997), ενώ η διόρθωση αποτελεί πεδίο γενικότερης κοινωνιογλωσσικής επίγνωσης, όπως επιχειρηματολογήθηκε νωρίτερα.

Ένας μεγάλος αριθμός διορθωτικών περιστατικών πραγματοποιείται από και προς την οικειότητα/επισημότητα, καταδεικνύοντας μια διαρκή διαπραγμάτευση των δύο αυτών παραμέτρων από τα μέλη. Στο πρώτο απόσπασμα (βλ. παράρτημα), οι συντελεστές της πρώτης περιόδου του ραδιοσταθμού *Αθήνα 9,84* —που εγκαινίασε την ελεύθερη ραδιοφωνία (1987)— αφηγούνται σχετικά περιστατικά. Ο δημοσιογράφος Νίκος Ευαγγελάτος (1967)⁵ απευθύνεται διευκρινιστικά στον ιδρυτικό διευθυντή Γιάννη Τζανετάκο (1940):

Απόσπασμα 1 [23/1/2011, NET, ΟΙ ΠΑΡΕΕΣ ΓΡΑΦΟΥΝ ΙΣΤΟΡΙΑ]

NE: Κύριε διευθυντά–Γιάννη, ο Έβερτ ήταν ((συνεχίζει))

Η ιδιότητα του Τζανετάκου ως τότε προϊσταμένου του λειτουργεί ως αυτόματος πιλότος για τον Ευαγγελάτο, ο οποίος όμως αλλάζει απότομα πλεύση με αυτοδιακοπή και αυτοδιόρθωση, αμέσως μετά την προβληματική προσφώνηση (Θέση 1), προσαρμοζόμενος στη συντροφική κατάσταση, και παρά τη σημαντική διαφορά ηλικίας. Η προβληματικότητα της πρώτης διατύπωσης της αναφοράς στοιχειοθετείται και δομικά ως αντιστροφή της αρχής της ελαχιστοποίησης. Φαίνεται ότι η έκφραση σεβασμού αρχικά υπερκεράζει την προτίμηση για χρήση της πρωτοτυπικής αναφοράς με τη μορφή του μονολεκτικού κύριου ονόματος, το οποίο θα αποτελούσε και την ασημάδευτη επιλογή ως μη αρχική αναφορά, εφόσον η (φιλική) συζήτηση ήδη διεξάγεται για αρκετή ώρα. Σημειώστε, πάντως, τη (λόγια) κλητική κατάληξη «διευθυντ-ά». Θα την ξανασυναντήσουμε παρακάτω.

Ανάλογο είναι και το επόμενο περιστατικό, αυτή τη φορά με έμμεση προσφώνηση σε (παρόν) πρόσωπο και με σχολιασμένη την άμεση αυτοδιόρθωση, τόσο από τον ομιλητή, «hh... (h)... συγγνώμη» (σ. 1), όσο και από το πρόσωπο αναφοράς, ((γέλιο)) (σ. 2). Ως μέλος της παρέας των πολεμικών ανταποκριτών και ανταποκριτριών που αφηγούνται τα δεινά και τα ευτράπελα των αποστολών τους, ο φωτορεπόρτερ Γιάννης Μπεχράκης (1960) αναφέρεται στον δημοσιογράφο Κώστα Βαξεβάνη (1966), απευθυνόμενος στον παρουσιαστή της εκπομπής, Σεραφείμ Φυντανίδη (1937):

Απόσπασμα 2 [5/6/2011, NET, ΟΙ ΠΑΡΕΕΣ ΓΡΑΦΟΥΝ ΙΣΤΟΡΙΑ]

- 1 ΓΜ: Έλεγε ο κ. Βαξεβάνης προηγουμένως–hh ο Κώ(h)στας [συγγνώμη
2 KB: [(γέλιο)]

Η επίσημη αναφορά στον Βαξεβάνη (κύριε+επώνυμο), πιθανόν επηρεάζεται από τη διαμεσολαβητική συμμετοχή του Φυντανίδη, ο οποίος πέρα από τον θεσμικό του ρόλο ως συνεντευξιαστή συμβαίνει να είναι και ο γηραιότερος, και ίσως και ‘σεβαστότερος’ από τα μέλη της παρέας. Στην προσπάθειά του να τηρήσει την αρχή του παραληπτικού σχεδιασμού, ο ομιλητής φαίνεται ότι αμφιταλαντεύεται ως προς την αναγνωρισιμότητα της επιλογής του, η οποία αναγκαστικά έχει δύο παραλήπτες: αφενός τον άμεσο συνομιλητή του (με τον οποίο συνάγουμε ότι έχει τυπικές σχέσεις), και αφετέρου το (οικείο και σχεδόν συνομήλικο) πρόσωπο αναφοράς που συμβαίνει να είναι και παρόν —για να μην αναφερθούμε και στο τηλεοπτικό κοινό. Τελικά υπερτερεί η οικειότητα με τη μορφή του απλούστερου δυνατού όρου, σύμφωνα και με την αρχή της ελαχιστοποίησης η οποία είχε αρχικά υποχωρήσει, καθώς δεν κινδύνευε η αναγνωρισιμότητα διότι είχαν ήδη γίνει γνωστά τα πλήρη ονόματα όλων.

Στην επόμενη συνομιλία ανάμεσα στον ηθοποιό Αργύρη Αγγέλλου (1978) —και περιστασιακό χορευτή στο *Dancing with the stars* (ANT1)— και στον εκδότη/δημοσιογράφο Πέτρο Κωστόπουλο (1954), οικοδεσπότη βραδινής εκπομπής, η επίσημη προσφώνηση, με τη μορφή πληθυντικού ευγενείας στην κατάληξη του ρήματος (και επομένως ενός υπονοούμενου «εσείς»), εγκαλείται ως προβληματική

⁵ Ημερομηνία γέννησης ή ηλικία κατά προσέγγιση κατά την εποχή του παρατιθέμενου περιστατικού.

από τον παραλήπτη, ο οποίος πραγματοποιεί ετεροέγερση με ψευδοδιευκρινιστική ερώτηση (σ. 7), προοιωνίζοντας επικείμενη διαφωνία. Ως αποτέλεσμα, προκαλείται απολογία (σ. 10) και εντέλει αυτοδιόρθωση (σ. 19) από τον Αγγέλλου, μετά από εκτενή σχολιασμό (σ. 9) —που αναδιατυπώνει μεταγλωσσικά τη συνεισφορά/οπτική του ΑΑ—, και με τη μορφή ψευδοαπειλής για επικείμενη τροποποίηση του τρόπου διαχείρισης της συνομιλίας (σ. 11, 14):

Απόσπασμα 3 [26/5/2011, ALPHA, ΒΡΑΔΥ]

- 20 και πάρα πολύ χαρούμενος. Ένα χειμώνα περίμενα να έρθεις στο Ρε:ντ ((συνεχίζει με ευχαριστίες))

Προφανώς το ζήτημα της ηλικίας είναι ευαίσθητο (βλ. Poullos 2011), και ο 57χρονος Κωστόπουλος —που προωθεί για τον εαυτό του εικόνα cool νεότερου άνδρα, με αποτέλεσμα να σχολιάζεται σε διάφορα blogs— αρνείται να τον εντάξουν στην ομάδα όσων προσφωνούνται με πληθυντικό από τους τριαντάρηδες, με ό,τι αυτό συνεπάγεται. Για τον λόγο αυτό, η διόρθωση είναι *έκθετη* (Jefferson 1987), καθίσταται δηλαδή θέμα συζήτησης, ως ανοικτή διαπραγμάτευση της συνομιλιακής και, επομένως, της κοινωνικής ταυτότητας των μελών.

Η φορά διόρθωσης μπορεί, ωστόσο, να είναι και αντίστροφη: από την οικειότητα στην επισημότητα, όπως στην περίπτωση της δημοσιογράφου Όλγας Τρέμη (1951), που απευθύνεται στον βουλευτή Μιλτιάδη Βαρβιτσιώτη (1969):

Απόσπασμα 4 [28/4/2011, MEGA, ΕΙΔΗΣΕΙΣ]

ΟΤ: Κύριε Μιλτιάδη— >κύριε Βαρβιτσιώτη< εσείς τι λέτε;

Είναι πιθανόν ή Τρέμη να γνωρίζει και κατ' ιδίαν τον Βαρβιτσιώτη ή ίσως και να οδηγείται στην εκ παραδρομής χρήση του μικρού ονόματός του από τη σχεδόν εικοσάχρονη ηλικιακή διαφορά, αλλά ο συνδυασμός με το «κύριε» οδηγεί σε τύπο προσφώνησης ο οποίος δυσχεραίνει όσες/όσους γλωσσολογούν —διότι θεωρείται απευκταίος ως άκομψος(;), επειδή ίσως φέρει έκδηλα τη λαϊκότερη προέλευσή του (;) (πρβ. «κυρ-Γιάννη», «κυρά-Μαρία»). Παρόλα αυτά, φαίνεται να ικανοποιεί την ανάγκη μιας ενδιάμεσης θέσης ανάμεσα στην οικειότητα και την απόσταση (λόγω ηλικίας ή/και διαφοράς θέσης). Παρενθετικά, η χρήση αυτή μοιάζει να κερδίζει έδαφος καθώς, προσωπικά, την εισπράττω ολοένα και συχνότερα από νεαρά άτομα: επίσης, η κατεύθυνση δεν είναι αποκλειστικά από τα νεότερα προς στα γηραιότερα μέλη, αλλά και αντιστρόφως.⁶ Δεν αρμόζει, όμως ούτε στην

⁶ [14/3/2010, NET, ΣΑΒΒΑΤΟΚΥΡΙΑΚΟ ΣΤΗ NET] Ο καθηγητής εργατικού δικαίου Αλέξης Μητρόπουλος (1952) συζητά το ασφαλιστικό με τους δημοσιογράφους Τάκη Σπηλιόπουλο και Αλεξάνδρα Δουβαρά (35±), στην οποία και απευθύνεται:

περίσταση ούτε και στον θεσμικό ρόλο της Τρέμης ως ειδησεογραφικής συνεντευξιάστριας, που απαιτεί ‘τυπική ουδετερότητα’ (Heritage and Greatbatch 1991) —άρα ίσες αποστάσεις. Η αυτοδιόρθωση, πέρα από την εναρμόνιση με το είδος λόγου και το χρηστικό επίπεδο, ικανοποιεί τον παραληπτικό σχεδιασμό, πρωτίστως σε σχέση με το τηλεοπτικό κοινό, καθώς επιλέγεται η περισσότερο γνωστή δημόσια ονομασία του προσώπου.

Στο προηγούμενο απόσπασμα, η άμεση (Θέση 1) αυτοδιόρθωση υπαγορεύεται από το μέσο/είδος και το χρηστικό επίπεδο που προβλέπεται, το οποίο όμως είναι δυνατόν και να υπερβούν τα μέλη, για τους δικούς τους κάθε φορά λόγους, όπως στο επόμενο περιστατικό όπου δύο πανεπιστημιακοί καθηγητές αυτοδιορθώνονται από την (ασημάδευτη για την περίπτωση) επίσημη προσφώνηση προς την οικεία. Η συνομιλία —με αφορμή το τότε επικείμενο νομοσχέδιο για την ανώτατη παιδεία, για το οποίο και έχουν κληθεί να συζητήσουν τηλεοπτικά— είναι ανάμεσα στον πρότανη του ΑΠΘ Γιάννη Μυλόπουλο (1958), καθηγητή στο οικείο Πολυτεχνείο, και ήδη δριμύ επικριτή του νομοσχεδίου, και στον ομότεχνο του Βασίλη Παπάζογλου (55-60), καθηγητή στο Μετσόβιο, ο οποίος στην παρούσα φάση έχει και αρμοδιότητες Ειδικού Γραμματέα του Υπουργείου Παιδείας για την τριτοβάθμια εκπαίδευση, και επομένως υπερασπιστή του νομοσχεδίου:

Απόσπασμα 5 [4/7/2011, NET, ΠΡΩΙΝΗ ΕΝΗΜΕΡΩΣΗ]

- | | | |
|---|-----|----------------------------|
| 1 | ΒΠ: | Καλημέρα κύριε Μυλόπουλε. |
| 2 | ΓΜ: | Καλημέρα κύριε Παπάζογλου. |
| 3 | ΒΠ: | Καλημέρα <u>Γιάννη</u> ! |
| 4 | ΓΜ: | Καλημέρα Βασίλη! |

Η διορθωτική πρωτοβουλία ανήκει στον θεσμικά ισχυρότερο και ελαφρώς γηραιότερο ΒΠ, σε ένδειξη ίσως καλής θέλησης, ο οποίος και αυτοδιορθώνεται από το κύριε+επίθετο προς το κύριο όνομα του συνομιλητή του, στην 3η κατά σειρά συνεισφορά (Θέση 3) (σ. 3). Η συγκεκριμένη αλληλουχική τοποθέτηση δεν προϋποθέτει αναγκαστικά εντοπισμό προβλήματος στις προηγηθείσες δύο συνεισφορές —είτε από τον ίδιο τον ομιλητή είτε από τον συνομιλητή του—, αλλά αποτελεί την τελευταία ευκαιρία προάσπισης της διυποκειμενικότητας (Schegloff 1992). Η αυτοδιόρθωση του ΒΠ προκαλεί, εν είδη ετεροέγερσης, και την αυτοδιόρθωση (επίσης στην αντίστοιχη 3η συνεισφορά) του δεύτερου συνομιλητή ΓΜ (σ. 4), ο οποίος με τη σειρά του, και με τον τρόπο αυτό, καταθέτει διαδραστικά τη συμφωνία του στην πρόσκληση να συνομιλήσουν ως συνάδελφοι καθηγητές, και όχι ως εκφραστές αντίπαλων δυνάμεων. Αμέσως μετά, και εν μέσω αδιαπραγμάτευτης διαφωνίας, η οικεία προσφώνηση εγκαταλείπεται άρδην και από τους δύο, καθώς οχυρώνονται πίσω από τους θεσμικούς τους ρόλους, μετακινούμενοι έτσι σε μια νέα αμοιβαιότητα οπτικής, σε σχέση με τη συγκρότηση της συγκεκριμένης διαδραστικής περίπτωσης.

Παρόλο που η οικειότητα μοιάζει να είναι πολιτισμική προεπιλογή (Makri-Tsilipakou 1991· 2001), η μετάβαση σε οικειότερη επιλογή δεν γίνεται πάντοτε αποδεκτή, όπως στην περίπτωση του Θανάση Πάτρα (37) —συμπαρουσιαστή, με τη Νάντια Μπουλέ (1984), πρωινής εκπομπής—, ο οποίος απορρίπτει τη σχετική ετεροδιόρθωση-πρόσκληση του συνομιλητή τους (σ. 3), για τους λόγους που εξηγεί (σ. 4-5). Ίσως, όμως, να έχει σχέση και η διαφορά ηλικίας, μια που ο εργολάβος κηδειών Φάνης Μπαμπούλας είναι μεγαλύτερος (52), ή ακόμη και με την απόπειρά του να εκμαιεύσει (πλασματική) εγγύτητα με τον Πάτρα και την Μπουλέ —όχι αδικαιολόγητα, αν λάβουμε υπόψη το είδος των ερωτήσεων και σχολίων τους (π.χ. σ. 7-9), τα οποία εγκατέστησαν ένα ευτράπελο κλίμα, παρά το γεγονός ότι η συζήτηση έχει, τύποις, να κάνει με την αύξηση του ΦΠΑ ακόμη και στις κηδείες:

Απόσπασμα 6 [19/8/2011, ANT1, ELLATE]

- | | | |
|---|-----|---|
| 1 | ΘΠ: | Πάντως κύριε Μπαμπούλα επειδή φαντάζομαι κι εσείς λόγω επαγγελματικής διαστροφής: |
| 2 | | [((βήχας)) και |
| 3 | ΦΜ: | [<u>Φάνη</u> να με λέτε <u>Φάνη</u> = |
| 4 | ΘΠ: | = ((με επιτόνιση συμφωνίας)) Ωραία. ((χειρονομεί)) Κύριε ΜπαΜΠΟΥΛΑ! |
| 5 | | [(.) Λοιπόν. Δε: βα:—δε πάει τώρα. Είμαστε μακριά <u>δε</u> γνωριζόμαστε. (.) Επειδή = |
| 6 | ΦΜ: | [((κατάφαση με το κεφάλι)) Χε χε χε |
| 7 | ΘΠ: | = φαντάζομαι λόγω επαγγελματικής διαστροφής κι εσείς βλέπετε και στην πόλη σας και |
| 8 | | σε άλλες πόλεις αντίστοιχα γραφεία τελετών. Ποιο <u>όνομα</u> σας έχει κάνει εντύπωση όλα |
| 9 | | αυτά τα χρόνια; |

ΑΜ: Αν γίνει αυτό, κυρία Αλεξάνδρα, τότε θα μπορούμε να μιλάμε για ...

Στην επόμενη περίπτωση, η οικειότητα απορρίπτεται και πάλι με απερίφραστη ετεροδιόρθωση (4η Προτίμηση), η οποία καθίσταται και πάλι θέμα συζήτησης (έκθετη), αυτή τη φορά όμως επειδή εκλαμβάνεται ως συγκαταβατικά υπεροπτική εν μέσω «άγριου καυγά», όπως τιτλοφορήθηκε το περιστατικό στο YouTube. Πρόκειται για ένα επεισόδιο στο σίριαλ των τηλεοπτικών αψιμαχιών μεταξύ της δημοσιογράφου και βουλευτριάς του ΚΚΕ Λιάνας Κανέλλη (1954) και του σχεδόν συνομήλικου της δημοσιογράφου Μανώλη Καψή (50-55), παρουσία του οικοδεσπότη Γιάννη Πρετεντέρη (1954):

Απόσπασμα 7 [MEGA, ΕΙΔΗΣΕΙΣ, 2/2008]

- 1 ΛΚ: Δημόσιο αγαθό δεν είναι η επικοινωνία; [Από πού πουλάκι μου;
2 ΜΚ: [() είναι η τηλεΘΕΑση δημόσιο-κατ' αρχήν μη
3 με λες [πουλάκι! Εγώ δεν είμαι: (.) [κανένα: τσιράκι σου. Έτσι; (.) Έτσι μπράβο:!] =

6 ΛΚ: = [[μου. °Κύριε Καψή μου°
7 ΛΚ: = Συγγνώμη, [σε πείραξε η γρίπη των πτηνών; (.) ((ανασηκώνει του ώμους της)) =
8 ΜΚ: [ΠΟΥ~~Δ~~Α:κι μου!
9 ΛΚ: = Σε πείραξε [η γρίπη [των πτηνών. Έ:λεος. [Έλεος. =
10 ΓΠ: [Λιάνα; [ΛΙΑνα! [
11 ΜΚ: = [Σε παρακαλώ κυρία [μου! Σε [παρακαλώ κυρία μου! =
12 ΓΠ: [°Λιάνα.°
13 ΛΚ: = Έχεις προηγού[μενα μαζί μου λόγω[: της:: =
14 ΜΚ: [Δεν έχω κανένα [προηγούμενο μαζί σου, να είσαι =
15 ΛΚ: = [οΞΕΙΑς πασοκίας σου αλλά =
16 ΜΚ: = [[ευγενής αγαπητή μου. Έτσι; [Να είσαι ευγενής. (.) Αν δεν μπορείτε να συμπεριφέρεστε =
17 ΛΚ: = [[δεν είναι πρόβλημα μου. [Έχεις οΞΕΙΑ ΠΑΣΟΚΙΑΣΗ. ΕΙΣΑΙ ΑΠΟ ΤΟΥΣ =
18 ΓΠ: [Σας παρακαλώ και τους δύο
19 ΜΚ: = [[ανθρωπινά (.) να μην εμφανίζεστε στην τηλεόραση
20 ΛΚ: = [[ΑΝΘΡΩΠΟΥΣ ΠΟΥ ΕΧΩ ΦΥΓΕΙ ΑΠΟ ΤΗΝ ΕΚΠΟΜΠΗ ΤΟΥΣ
(συνέχεια και κλιμάκωση)

Η οικεία προσφώνηση αντικρούεται (σ. 2-3) ως ανάρμοστη από τον ΜΚ, ο οποίος επικαλείται έλλειψη συγχρωτισμού με τη ΛΚ (σ. 3) και μη συμμόρφωση της τελευταίας με την (δημόσια τηλεοπτική) κατάσταση της επικοινωνίας (σ. 5), όπου κανείς/καμία οφείλει να είναι «ευγενής» (σ. 16). Και ενώ αρχικά παρασύρεται από το υποκοριστικό και πραγματοποιεί την έκθετη ετεροδιόρθωσή του σε δεύτερο ενικό πρόσωπο (σ. 3) —και με ανάλογη λαϊκή («τσιράκι») και απειλητική διατύπωση («μπράβο», σ. 5, βλ. Makri-Tsilirakou 2001)—, υιοθετώντας άθελά του, και λόγω μεγάλης φόρτισης, το οικείο ύφος της συνομιλητριάς του, στη συνέχεια στιγμιαία αποκαθιστά την απόσταση μεταξύ τους με επιδεικτική χρήση πληθυντικού και «καθώς πρέπει» προσφώνησης («αγαπητή μου», σ. 5), για να ξανακυλήσει και πάλι στο ενικό (σ. 11, 14, 16), και ξανά πάλι στον πληθυντικό (σ. 16, 19). Είναι προφανές ότι η μεταπική σύγκρουση έχει διαταράξει τις προσωπικές του προδιαγραφές σε σχέση με τον ενδεικνυόμενο (για ευγενή αστό) τύπο/αριθμό προσφώνησης, σε αντίθεση με τη ΛΚ, η οποία διεκπεραιώνει με υφολογική συνέπεια την αντίθεσή της, και τον οικοδεσπότη που συντηρεί την οικειότητα (σ. 10, 12). Η θρυαλλίδα της διένεξης, τώρα, η υποκοριστική προσφώνηση «πουλάκι μου», ως δείκτης οικειότητας πέρα από την προφανή συνδήλωση της τρυφερότητας/συμπάθειας, πολύ συχνά λειτουργεί και ως προάγγελος ή/και φορέας αντιπαλότητας, στοιχειοθετώντας και το αμφιλεγόμενο πολλών νεοελληνικών εκφράσεων (βλ. Makri-Tsilirakou 1991).

5. Πώς να σε/σας κατηγοριοποιήσω;

Στη βάση και του προηγούμενου αποσπάσματος, έχει γίνει πλέον προφανές ότι η προσφώνηση ή αναφορά πολύ συχνά, αν όχι πάντα, εμπλέκουν ζητήματα κατηγοριοποίησης των προσώπων (Schegloff 2007b), ως μετεχόντων σε ομάδες ή συνομοταξίες, οι οποίες αντιστοιχίζονται με συγκεκριμένες ιδιότητες και χαρακτηριστικά και από τις οποίες απορρέουν σχετικές δραστηριότητες.

Αναφέρομαι στον *μηχανισμό μετοχικής κατηγοριοποίησης μελών* (membership categorization device) του Harvey Sacks (1992, 1:40–48, 236–66), ο οποίος περιλαμβάνει, αφενός μια οποιαδήποτε συλλογή κατηγοριών —όπου έστω και μία κατηγορία αντιστοιχίζεται με έστω και ένα πρόσωπο)— καθώς και κανόνες εφαρμογής: της *οικονομίας*, βάσει του οποίου αρκεί η απόδοση μίας

μόνο κατηγορίας ώστε να επιτευχθεί επαρκής αναφορά σε πρόσωπο· και της *συνέπειας* που επιτρέπει τη χρήση μιας κατηγορίας που έχει ήδη αποδοθεί σε ένα μέλος για την ένταξη στην ίδια ομάδα ή συλλογή και πρόσθετων μελών από τον ίδιο πληθυσμό. Σχετικά είναι τα δύο αξιώματα που απορρέουν: της *ακρόασης* και της *θέασης*, βάσει των οποίων τα μέλη αναγνωρίζουν ('ακούν') διαφορετικές κατηγορίες ως τμήματα της ίδιας συλλογής ή μηχανισμού, και συνδέουν ('βλέπουν') μία κατηγοριακά συναρτημένη δραστηριότητα με την αρμόδια κατηγορία, αντίστοιχα. Η μεθοδική χρήση των κατηγοριών οργανώνει την κοινή γνώση —που μπορούμε να ονομάσουμε και πολιτισμό (245)—, και έτσι αποτελεί μια συμβατική βάση απόδοσης δραστηριοτήτων και χαρακτηριστικών στα μέλη, επιτρέποντας τη συναγωγή συμπερασμάτων για τα ίδια, καθώς και για τη διαδραστική κατάσταση που συγκροτούν διά της συμμετοχής τους (41, 69). Συχνά, οι κατηγορίες οργανώνονται σε *τυποποιημένα σχεσιακά ζεύγη* (326-7) (π.χ. άνδρας-γυναίκα [*sic*]), λειτουργώντας ως βασικός μηχανισμός κοινωνικού ελέγχου (48). Αξίζει να τονισθεί ιδιαίτερα ότι οι κατηγορίες δεν αποτελούν νοητικές αναπαραστάσεις αλλά ενσώματες πρακτικές, εξού και η δυνατότητα πολλαπλής αλλά και μεταβαλλόμενης και, εντέλει, ρευστής και ενδεικτικής (*indexical*) απόδοσης κατηγοριακής ιδιότητας στα μέλη (46, 525), σε μία αθεράπευτα αναδραστική σχέση ανάμεσα στην κατηγορία και στην εκάστοτε συγκεκριμένη δράση και διάδραση (Butler and Fitzgerald 2010, 2462).

Οι συνέπειες της υπαγωγής των μελών σε συγκεκριμένες κατηγορίες έχουν γίνει εμφανείς στα προηγούμενα αποσπάσματα, όπου η αποδοχή ή απόρριψη της οικείας/επίσημης προσφώνησης/αναφοράς έχει αντίκτυπο στην εξέλιξη της αλληλουχίας των συνεισφορών, αφού για παράδειγμα βάζει το ζήτημα ως τι —και επομένως πώς— μιλάει ένα μέλος (ως συνάδελφος ή αντίπαλος;), αν πρέπει να το «γυρίσουμε στο τσάμικο», ή αν ο Καψής είναι εντέλει «πουλάκι» ή, κατά την ανάγνωσή του, «τσιράκι» της Κανέλλης, με τις ανάλογες διαδραστικές και κοινωνικές συνέπειες.

Στο δεδομένο που ακολουθεί, ο παρουσιαστής πολιτικής εκπομπής Αλέξανδρος Τριανταφυλλίδης (40-45), με θέμα *Ο κύβος ερρίφθη για το μεσοπρόθεσμο*, δίνει τον λόγο στον καθηγητή συνταγματικού δικαίου ΑΠΘ, Κωνσταντίνο Χρυσόγονο (1961):

Απόσπασμα 8 [10/6/2011, ET3, ΛΑΒΥΡΙΝΘΟΣ]

- | | | |
|---|-----|---|
| 1 | AT: | Κύριε Χρυσόγονε; (.) Κύριε καθηγητά; Η: προσέγγιση τώρα η νομική: στο: συγκεκριμένο |
| 2 | | δε- δεν ξέρω αν: η: η πολιτική ιστορία έχει αναδείξει έτσι: αυτό το μοντέλο ψηφίζω άρθρο |
| 3 | | μόνο πλαίσιο, και μετά εφαρμοστικούς νόμους >είχαμε συνηθίσει να ψηφίζονται <u>νόμοι</u> < οι |
| 4 | | οποίοι παρέπεμπαν σε προεδρικά διατάγματα. Ε: <u>δεν</u> ξέρω αν αυτό είναι ένα: νέο μοντέλο |
| 5 | KX: | Κοιτάξτε. (.) Το: μεσοπρόθεσμο πρόγραμμα (.) είναι στην ουσία ένας πενταετής |
| 6 | | προϋπολογισμός. Μεταξύ άλλων θέτει όρια δαπανών ((συνεχίζει εξηγώντας και καταλήγει ότι ο πενταετής προϋπολογισμός αποτελεί παραβίαση του συντάγματος)) |

Η χρήση κύριε+επώνυμο δεν κρίνεται αρκετή από τον ομιλητή (αν και παρίσταται μόνο ένας Χρυσόγονος), και συμπληρώνεται ανασκευαστικά από την ιδιότητα, η οποία προετοιμάζει συγκεκριμένη ροή της συνομιλίας. Το γεγονός αυτό στοιχειοθετείται από ό,τι ακολουθεί ως εγκατάσταση ενός πρώτου μισού γειτνιαστικού ζεύγους (ερώτηση) (σ. 1-4). Ο συνταγματολόγος ανταποκρίνεται ανάλογα με τη σχετική γνώση του (σ. 5-6), στην οποία έχει γίνει επίκληση μέσω της προσφώνησης/κατηγορίας «Κύριε καθηγητά», και αποφαίνεται ανάλογα. Σημειώστε ότι η ειδική γνώση και το κύρος του κατόχου συμπυκνώνονται στην κατάληξη -ά, η οποία καθιστά περιττό τον προσδιορισμό πανεπιστημιακός (καθηγητής), ενώ ο συγκεκριμένος τύπος δεν είναι ισοδύναμος με τον (σπάνιο) άλλο τύπο «Κύριε καθηγητή» (που μπορεί να αφορά σε εκπαιδευτικούς Μέσης ή το πολύ ΤΕΙ), και δεν συγκροτεί ισότιμο σχεσιακό ζεύγος με το (ουσιαστικά ανύπαρκτο) «Κυρία καθηγήτρια», το οποίο εκφέρεται μόνο ως σαρκασμός/αμφισβήτηση της γνώσης/κύρους. Και έτσι, παρόλο που είμαι και εγώ καθηγήτρια Πανεπιστημίου δεν προβλέπεται να αξιωθώ ποτέ μιας αναλόγου βαρύτητας σεβαστικής προσφώνησης/κατηγοριοποίησης —ατύχησα λόγω φύλου!

Παρόμοιας λογικής ετεροδιόρθωση, αυτή τη φορά, παρατηρείται στην υποδοχή (έμμεση προσφώνηση) της Κατερίνας Μπατζελή (1958) από την παρουσιάστρια Μάριον Μιχελιδάκη (40+) και τον παρουσιαστή Τάκη Σπηλιόπουλο (50±) της ενημερωτικής εκπομπής της NET.

Απόσπασμα 9 [2/7/2011, NET, ΣΑΒΒΑΤΟΚΥΡΙΑΚΟ ΣΤΗ NET]

- | | | |
|---|-----|--|
| 1 | MM: | Να καλωσορίσουμε την κυρία Μπατζελή. = |
| 2 | ΤΣ: | = Βουλευτίνα του Πασόκ! |
| 3 | MM: | Βουλευτίνα του Πασόκ βεβαίως. |

Μια πρώτη παρατήρηση είναι η παρουσίαση της προσκεκλημένης απλώς με το (κυρία+)επώνυμο και όχι και με την ιδιότητά της, και μάλιστα από την παρουσιάστρια. Είναι γνωστό και

πολυδιατυπωμένο ότι οι γυναίκες είναι πρώτα από όλα γυναίκες και μετά μπορεί να έχουν και επάγγελμα, αξίωμα κ.λπ. (βλ. Μακρή-Τσιλιπάκου 1996, 2010). Μία δεύτερη, είναι η άμεση ετεροδιόρθωση από τον παρουσιαστή, ή οποία παρέχει τη σχετική πληροφορία και η επακόλουθη υιοθέτησή της από τη παρουσιάστρια, το «βεβαίως» της οποίας μοιάζει να υπονοεί ότι περιττεύει η αναφορά, ως πολύ γνωστή, ίσως(;). Μια τρίτη παρατήρηση αφορά στο τι *δεν* λέγεται, και αυτό είναι ότι η καλεσμένη διατέλεσε Υπουργός Αγροτικής Ανάπτυξης και Τροφίμων (10/2009–9/2010), με πολύ έντονη προβολή στα μέσα λόγω των τότε κινητοποιήσεων των αγροτών, ενώ αμέσως πριν είχε υπάρξει και μέλος του Ευρωπαϊκού Κοινοβουλίου, γεγονός λιγότερο γνωστό. Η πρακτική που συνήθως υιοθετείται από όσες/ους παρουσιάζουν ανάλογες εκπομπές είναι να χρησιμοποιούν τον τίτλο του υψηλότερου αξιώματος, ακόμη και αν έχει πάψει να ισχύει. Για παράδειγμα, ο Νίκος Χατζηνικολάου (1962) υποδέχεται στο δελτίο ειδήσεων (Alter 5/5/2010) τον Νίκο Δένδια (1959) ως εξής: «Να καλησπερίσω τον βουλευτή της Νέας Δημοκρατίας και πρώην υπουργό κύριο Νίκο Δένδια. Καλησπέρα κύριε Υπουργέ και σε σας». Η προσφώνηση/αναφορά στα συγκεκριμένα πρόσωπα με την υπαγωγή τους σε διαφορετικούς μηχανισμούς κατηγοριοποίησης, δηλαδή στη συλλογή ‘ενήλικας’ (εξού «κυρία Μπατζελή»), ή/και ‘Κοινοβούλιο’ («βουλευτίνα») ή/και ‘Κυβέρνηση’ («υπουργός»), καθιστά σχετικές διαφορετικές προσδοκίες και συναγωγές εκ μέρους όλων των μελών που συμμετέχουν στη συνομιλία και, εξίσου (και ίσως σπουδαιότερο στη συγκεκριμένη περίπτωση), από το τηλεοπτικό κοινό.

Σε προηγούμενο απόσπασμα, θίξαμε και ζητήματα γλωσσικής πραγμάτωσης του ίδιου όρου (λήμματος) μιας κατηγορίας, διαχωρίζοντας το «Κύριε καθηγητ-ά» από το «Κύριε καθηγητ-ή» (και δευτερευόντως από το «Κυρία καθηγήτρια»). Και στην περίπτωση Μπατζελή δεν είναι απίθανο να εμπλέκονται τέτοια ζητήματα που οδηγούν σε αποφυγή λόγω συνεχιζόμενης (εξήντα χρόνια μετά τη μελέτη του Τριανταφυλλίδη (1953)!) δυσκολίας επιλογής του σχετικού τύπου: *βουλευτής*;, *βουλευτίνα*;, *βουλευτρία*; Βέβαια, τέτοια επιλογή δεν μπαίνει καν για την υπουργό (*υπουργίνα*; *υπουργέσσα*; *υπουργή*;). Παρεμπιπτόντως, εντόπισα στο διαδίκτυο 10.800 αποτελέσματα για το λήμμα *υπουργίνα* — όλα (στον βαθμό που μπόρεσα να ελέγξω) μειωτικά/ειρωνικά.

Δυσκολία παρατηρείται και στην επιλογή ανάμεσα σε διαφορετικές όρους της ίδιας κατηγορίας ή μήπως πρόκειται για διαφορετικές κατηγορίες (της ίδιας συλλογής); Ο παρουσιαστής του μουσικού σόου *Just the two of us*, Γιώργος Καπουτζίδης (1972) απαντά σε ερώτηση της οικοδέσποινας Ναταλίας Γερμανού σχετικά με τον πολυσχολιασμένο καυγά ανάμεσα στο μέλος της κριτικής επιτροπής δημοσιογράφο/ραδιοφωνική παραγωγό/συγγραφέα Αθηναίδα Νέγκα (1974) και τη διαγωνιζόμενη ηθοποιό Μαριάννα Πολυχρονίδη (1980):

Απόσπασμα 10 [13/3/2011, ALPHA, ΜΕΣ ΣΤΗΝ ΚΑΛΗ ΧΑΡΑ]

ΓΚ: (...) μια διαφωνία που προέκυψε σε δύο κορίτσια–κυρίες–σε δύο γυναίκες ((συνεχίζει))

«Κορίτσια–κυρίες–γυναίκες»: ποιο να είναι καταλληλότερο ως κατηγορία με συνάρτηση τη διαφωνία; Προηγουμένως, ο ΓΚ τις είχε αποκαλέσει «κορίτσια», όπως έκανε και κατά τη διάρκεια του on air διαπληκτισμού: «Σας παρακαλώ κορίτσια, επειδή με φέρνετε σε δύσκολη θέση, καλύτερα είναι να σταματήσουμε εδώ». Αντίστοιχο «*Σας παρακαλώ αγόρια...» δεν προβλέπεται!

Παρόμοιο, αν και αζεπέραστο σε πολυτυπία, είναι το περιστατικό σε πρωινή εκπομπή, όταν η περιγραφή/σχολιασμός της τελετής του αγιασμού των υδάτων —με τη συμμετοχή και γυναικών ως επίδοξων διεκδικητριών του σταυρού (μέχρι πρόσφατα παρουσία ανήκουστη/απαγορευμένη)—, προκαλεί συνεχόμενους μετασχηματισμούς της αναφοράς/κατηγοριοποίησης, ως αυτοδιόρθωσης/ετεροδιόρθωσης: από τον ρεπόρτερ (40–45), τους παρουσιαστές Γιώργο Καραμέρο (1974) και Σπύρο Χαριτάτο (1973), τον Βασίλη Δρυμούση (40–45) και μια άλλη Πανελίστρια (±35), καθώς και την αστρολόγο Λίτσα Πατέρα (64). Ο αένας αυτοί μετασχηματισμοί δεν υπαγορεύονται από τη θέση της αναφοράς ως αρχικής ή ακόλουθης, αλλά καταγράφουν δυσκολία σε σχέση με την επιλογή του/της όρου/κατηγορίας σε (ρητή) συνάρτηση με τις συγκεκριμένες δραστηριότητες και χαρακτηριστικά, όπως, την ποιότητα («εξαιρετικές», σ. 8), αναποφασιστικότητα (σ. 9), αναποτελεσματικότητα (σ. 14, 15), κατωτερότητα σε σχέση με τους άνδρες (σ. 17) και φυσική αδυναμία (σ. 20) —σύμφωνα με το αξίωμα της θέαςης:

Απόσπασμα 11 [6/1/2011, ANT1, 10 ME 1 MAZI]

- | | | |
|---|-----|---|
| 1 | P: | Ήτανε και μια κοπέλα εκεί δίπλα μου είχε βουτήξει και πέρσι |
| 2 | P: | Είναι πάνω η κοπέλα εκεί πάνω |
| 3 | ΣΧ: | A: είναι η κοπελιά που βλέπαμε |
| 4 | P: | Η κοπελιά πίσω |
| 5 | P: | Και η κοπελιά |

- 6 ΣΧ: Α! είναι δύο κυρίες. Βλέπουμε μία και μία εκεί. Είναι δύο κυρίες είναι
7 Ρ: Έχετε δίκιο είναι δύο οι κοπέλες
8 ΓΚ/ΣΧ: Εξαίρετικές κυρίες
9 Ρ: Είναι και η κοπελιά που βουτήξε πέρσι αποφάσισε τελικά να βουτήξει και φέτος
10 ΓΚ/ΣΧ: Πάντως είναι ενδιαφέρον είναι εκεί οι φίλοι μας και οι κυρίες όπως περιμένουν να
11 βουτήξουν τι συζητάνε μεταξύ τους
12 (): ((μετά την ανάκτηση του σταυρού)) Άντρας ή γυναίκα;
13 ΑΠ: Η κοπελίτσα τι έγινε;
14 Π: Η κοπελίτσα δεν έφτασε ακόμη τον σταυρό
15 ΒΔ: Η κοπελίτσα ακόμα κολυμπάει κυρία Λίτσα. Δεν είναι τώρα πράγματα!
16 ΑΠ: Έλα τώρα την κοπέλα!
17 ΒΔ: Να το δώσεις στην κοπέλα τώρα να φανεί ανώτερος
18 Π: Να και η κυρία!
19 ΓΚ: Να και η κυρία με;
20 Ρ: Είναι μέλη της ελληνικής ομάδας διάσωσης τη γυναίκα να τη βοηθήσουμε τώρα για να ανέβει

Αν στο προηγούμενο απόσπασμα η δυσκολία μοιάζει να πηγάζει από την αντιστοίχιση με τις ανά κατηγορία συναρτούμενες ιδιότητες/δραστηριότητες, στο τελευταίο απόσπασμα ο ομιλητής δεν έχει καμιά απολύτως αμφιβολία τόσο για την κατηγορία που ενεργοποιεί όσο και για τις συναρτούμενες ιδιότητες και καταθέτει αμφότερα, ρητά και ετεροδιορθωτικά:

Απόσπασμα 12 [11/7/2011, MEGA ΚΟΙΝΩΝΙΑ ΩΡΑ MEGA]

- 1 ΚΚ: Να σας διαβάσω τι λέει το ελεγκτικό συμβούλιο.
2 ΓΚ: Δεν πρόκειται για ελεγκτικό συμβούλιο. Είναι μία κοπέλα εκεί που δεν ξέρει τι
3 της γίνεται.

Ο δικηγόρος και πρώην δήμαρχος Ζωγράφου, Γιάννης Καζάκος (70±), ο παράτυπος δανεισμός του οποίου έβαλε σε κίνδυνο την καταβολή δόσης από το ΔΝΤ, αντιδικεί με τον νυν δήμαρχο Κώστα Καλλίρη, ο οποίος τον κατηγορεί ότι δεν εξασφάλισε, ως όφειλε, την έγκριση του Ελεγκτικού Συμβουλίου. Η κατηγορία «ελεγκτικό συμβούλιο» του μηχανισμού κατηγοριοποίησης ‘θεσμοί του κράτους’, που εμφανίζεται στην πρώτη συνεισφορά (σ. 1), αντικαθίσταται από την κατηγορία «κοπέλα» (σ. 2), του μηχανισμού ‘ηλικία’ ή/και ‘φύλο’ που συσχετίζεται από τον ομιλητή με έλλειψη γνώσης/αδυναμία θεσμικής εκπροσώπησης. Η εκδοχή ‘φύλο’ προβάλλει ισχυρότερη αν σκεφτούμε ότι ένα αντίστοιχο εκφώνημα με τη κατηγορία «παλικάρι» (το άλλο μέλος του καθιερωμένου σχεσιακού ζεύγους, π.χ. «Είναι ένα παλικάρι εκεί που δεν ξέρει τι του γίνεται»), ακούγεται αντιφατικό, λόγω της θετικής αξιολόγησης και σύνδεσης του όρου με αξιέπαινες δραστηριότητες· ενώ η εκδοχή «Είναι ένας νεαρός/νεαρή...» δεν θα δημιουργούσε κανένα πρόβλημα, διότι τώρα πρωτίστως ενεργοποιείται ο μηχανισμός ‘ηλικία’ με απορρέουσα ιδιότητα την απειρία. Επομένως, στην περίπτωση μας το έλλειμμα (επαγγελματικής) γνώσης/θεσμικής εκπροσώπησης είναι γένους θηλυκού, και βάσει του κανόνα της συνέπειας ισχύει για όλες τις «κοπέλες».

6. Επίλογος

Τα φαινόμενα που εξετάσαμε, και που προέκυψαν ως μία αυτόνομη περιοχή εντός μιας γενικότερης έρευνας της διόρθωσης, καταγράφουν μια όψη της νεοελληνικής διαχείρισης της οικειότητας/απόστασης και της έμφυλης διαφοράς στο πεδίο της προσφώνησης/αναφοράς-κατηγοριοποίησης. Πολλά περιστατικά εμφανίστηκαν με τη μη-προτιμητέα μορφή της (έκθετης) ετεροδιόρθωσης, γεγονός που καταγράφει την κρίσιμη ποιότητα των χρήσεων. Τα μέλη αμφιταλαντεύονται και αυτοδιορθώνονται ανάλογα ή ανακαλούνται ετεροδιορθωτικά στην τάξη από όσα άλλα μέλη αξιολογούν την εκάστοτε χρήση ως παραβατική των τοπικο-συνομιλιακών/κοινωνικών συμβάσεων, ώστε να επιτευχθεί εντέλει η κοινή οπτική. Προκύπτει ότι η οικειότητα, ως πολιτισμική προεπιλογή, όταν δεν τίθεται αναγκαστικά σε δεύτερη μοίρα λόγω της ισχύος της αρχής της αναγνωρισιμότητας ή δεν υπερκεράζεται από τον σεβασμό, συχνά διεμβολίζει τη θεσμικότητα της περίπτωσης, και διεκδικείται, απονέμεται ή απορρίπτεται —κάποτε με άλλοθι τις θεσμικές προδιαγραφές. Επιπλέον, τα δεδομένα καταγράφουν τη συνεχιζόμενη νεοελληνική αμήχανη αμφιθυμία προς τις γυναίκες (βλ. Μακρή-Τσιλιπάκου 1996), οι οποίες εξακολουθούν να εισπράττουν άνισες, σε σχέση με τους άνδρες, αναφορές/κατηγοριοποιήσεις και με ανάλογες στερεοτυπικές συναρτήσεις, πρακτικές που στοιχειοθετούν την αντοχή των έμφυλων διακρίσεων.

ABSTRACT

This paper presents a dictionary use research conducted with 351 Greek native speakers, students of senior primary school. The aim of the research is to evaluate the effectiveness of traditional defining approaches (i.e. analytical definitions, definitions by synonyms, morphological definitions) and contemporary defining approaches (i.e. full-sentence definitions), as they are represented by three Greek monolingual dictionaries, measuring students' performance in two tasks: the production and the identification of specific words' meaning and usage. In both tasks, the full-sentence definitions yielded 72,4% correct answers, while the traditional definitions with difficult and less difficult vocabulary yielded 22,9% and 26,6% respectively.

Λέξεις κλειδιά: ελληνικά μονόγλωσσα λεξικά, ορισμοί, χρήση λεξικού, εμπειρική έρευνα

1. Εισαγωγή

Ο ορισμός φαίνεται να κατέχει προνομίους θέση σε σχέση με οποιαδήποτε άλλη πληροφορία των λεξικών. Αν και υπάρχουν λεξικά που δεν περιέχουν ορισμούς, όπως τα ορθογραφικά, τα ετυμολογικά ή τα δίγλωσσα λεξικά, η σύνταξη των ορισμών θεωρείται το πρωτοτυπικό έργο ενός λεξικογράφου. Το τι σημαίνουν οι λέξεις και πώς ορίζονται έχει αποτελέσει αντικείμενο πολλών εργασιών από την πλευρά της λογικής, της φιλοσοφίας και της γλωσσολογικής σημασιολογίας. Ωστόσο, πολύ λίγα έχουν γραφεί, είτε στο πλαίσιο θεωρητικών λεξικογραφικών μελετών (βλ. Atkins and Rundell 2008) είτε στο πλαίσιο εμπειρικών ερευνών (βλ. ενδεικτικά McKeown 1993, Nesi and Meara 1994, Nesi 1998), για το πώς οι χρήστες ερμηνεύουν τους ορισμούς και το πώς και πόσο αποτελεσματικά χρησιμοποιούν την πληροφορία που αντλούν από αυτούς.

Η έρευνα που παρουσιάζεται αποτελεί μέρος ευρύτερης μελέτης (βλ. Μάντζαρη 2011), στην οποία συζητούνται παραδοσιακές και σύγχρονες προσεγγίσεις στη διατύπωση των λεξικογραφικών ορισμών με βάση τη διάσταση του χρήστη. Εξετάζονται παραδοσιακές τεχνικές σύνταξης των ορισμών, όπως οι αναλυτικοί, οι μορφολογικοί και οι ορισμοί με συνώνυμα, με τις ειδικότερες συμβάσεις που τις συνοδεύουν (π.χ. αρχή της υποκαταστασιμότητας, σύμβαση του κενού συμπληρώματος, χρήση παρενθέσεων, χρήση τυποποιημένων δηλώσεων), και το πιο σύγχρονο μοντέλο των ορισμών με πλήρεις προτάσεις (full-sentence definitions) ή αλλιώς των προτασιακών ορισμών.

Η έρευνα εντάσσεται στο επίκαιρο και αναπτυσσόμενο πεδίο της λεξικογραφίας που αφορά τη χρήση του λεξικού. Ειδικότερα, εντάσσεται στην κατηγορία μελετών που διερευνούν τη σχέση της χρήσης του λεξικού (και ειδικότερα της χρήσης του ορισμού ως στοιχείου της μικροδομής του λεξικού) με την παραγωγή και την κατανόηση κειμένου¹.

Στόχος είναι να διερευνηθεί ποιες στρατηγικές διατύπωσης των ορισμών, έτσι όπως εκπροσωπούνται από τρία μονόγλωσσα ελληνικά παιδαγωγικά λεξικά, το Λεξικό Μπαμπινιώτη για το σχολείο και το γραφείο (ΛΣΓ, 2004), το Ερμηνευτικό λεξικό νέας ελληνικής Α΄, Β΄, Γ΄ Γυμνασίου (ΕΛΝΕ, 2007)² και το Λεξικό της ελληνικής ως ξένης γλώσσας για μαθητές της δευτεροβάθμιας

¹ Για την κατηγοριοποίηση των ερευνών στο πλαίσιο της χρήσης του λεξικού βλ. Hulstijn and Atkins (1998) και Dolezal and McCreary (1996).

² Για τις αρχές σύνταξης του λεξικού βλ. Γαβριηλίδου κ.ά. (2008).

εκπαίδευσης (ΛΕΞΓ, 2007), μπορούν να συμβάλουν στην αποτελεσματικότερη κατανόηση της σημασίας και της χρήσης των λέξεων από μαθητές των τελευταίων τάξεων του δημοτικού. Τα αποτελέσματα της έρευνας μπορούν να αξιοποιηθούν στη διατύπωση προτάσεων σχετικά με ζητήματα σχεδιασμού των ορισμών στα μονόγλωσσα ελληνικά παιδαγωγικά λεξικά και με ζητήματα διδακτικής αξιοποίησης των ορισμών.

2. Συναφείς έρευνες

Περιορισμένος είναι ο αριθμός των ερευνών σχετικά με τους ορισμούς. Οι έρευνες αυτές αφορούν την αγγλική γλώσσα και έχουν στόχο την αξιολόγηση της αποτελεσματικότητας των διαφορετικών ορισμών με βάση την επίδοση των χρηστών σε συγκεκριμένες δοκιμασίες/τεστ (βλ. Miller and Gildea 1987, Cumming *et al.* 1994, Nesi and Meara 1994, Nesi 1998, McKeown 1993)³. Παρουσιάζουν ωστόσο μεταξύ τους επιμέρους διαφορές: α) ως προς το ερευνητικό εργαλείο (π.χ. ερωτηματολόγιο, βλ. MacFarquhar and Richards 1983, τεστ βλ. McKeown 1993, Miller and Gildea 1987, Nesi and Meara 1994, ερωτηματολόγιο και τεστ βλ. Cumming *et al.* 1994, Nesi 1998), β) ως προς το γλωσσικό υλικό (π.χ. ορισμοί από υπάρχοντα λεξικά για φυσικούς ομιλητές ή λεξικά εκμάθησης (learner's dictionaries), ορισμοί εκ νέου διατυπωμένοι για τις ανάγκες της έρευνας βλ. McKeown 1993) και γ) ως προς την ηλικία του ελεγχόμενου δείγματος (π.χ. φυσικοί ομιλητές μαθητές του δημοτικού βλ. McKeown 1993, Miller and Gildea 1987, ενήλικες μαθητές της αγγλικής).

3. Μέθοδος

3.1 Υποκείμενα

Στην έρευνα συμμετείχαν 351 μαθητές (n=351) των δύο τελευταίων τάξεων του δημοτικού, φυσικοί ομιλητές της ελληνικής χωρίς διαγνωσμένες μαθησιακές δυσκολίες (από το Δημοτικό Σχολείο της Ελληνογερμανικής Αγωγής και από το 2ο Δημοτικό Σχολείο Διονύσου).

3.2 Ερευνητικό εργαλείο

Η έρευνα αρθρώνεται σε τέσσερα (4) επιμέρους έργα, δύο βασικά, στα οποία χρησιμοποιείται το τεστ, και δύο συμπληρωματικά, στα οποία χρησιμοποιείται το ερωτηματολόγιο. Τα δύο βασικά έργα (Έργο 2 και Έργο 3) ελέγχουν την αποτελεσματικότητα των διαφορετικών τύπων ορισμού στην κατανόηση της σημασίας κατά την παραγωγή προτάσεων (Έργο 2) και κατά την αναγνώριση της ορθής σημασίας και χρήσης των ελεγχόμενων λ.μ. (Έργο 3)⁴. Στο Έργο 2 οι μαθητές συμβουλευονται τους ορισμούς 6 λ.μ. και συντάσσουν μία πρόταση για καθεμία από αυτές. Στο Έργο 3 ζητείται από τους μαθητές να αναγνωρίσουν τη σωστή σημασία ή/και τη σωστή χρήση για κάθε ελεγχόμενη λ.μ. σε ασκήσεις πολλαπλών επιλογών, αφού συμβουλευτούν τους ορισμούς 9 λ.μ.⁵ Στα δύο συμπληρωματικά έργα (Έργο 1 και Έργο 4) ζητείται από τους μαθητές να αξιολογήσουν αντίστοιχα τον βαθμό οικειότητάς τους με τις 15 ελεγχόμενες λ.μ. και το πόσο βοηθητικούς βρήκαν τους ορισμούς που συμβουλευτήκαν.

Το δείγμα χωρίζεται σε τρεις ομάδες (Α, Β, και Γ) με ίσο αριθμό συμμετεχόντων: Η Ομάδα Α χρησιμοποιεί τους παραδοσιακούς ορισμούς με δύσκολο λεξιλόγιο από το ΛΣΓ η Ομάδα Β τους παραδοσιακούς ορισμούς με απλούστερο λεξιλόγιο από το ΕΛΝΕ και η Ομάδα Γ τους προτασιακούς ορισμούς από το ΛΕΞΓ.

3.3 Γλωσσικό υλικό

Όσον αφορά την επιλογή του λεξιλογίου, καταρτίστηκε αρχικός κατάλογος με 30 λ.μ. οι ορισμοί των οποίων θα αποτελούσαν το γλωσσικό υλικό της έρευνας. Οι επιλεγμένες λ.μ. πληρούσαν τα εξής κριτήρια: α) περιλαμβάνονταν και στα τρία λεξικά της μελέτης, β) αντανάκλυναν διαφορετικές

³ Εξάιρεση αποτελεί η έρευνα των MacFarquhar and Richards (1983), που περιορίζεται στην αξιολόγηση των διαφορετικών ορισμών με βάση τις προτιμήσεις των χρηστών.

⁴ Χρησιμοποιούμε τον όρο λεξική μονάδα (λ.μ.) για να αναφερθούμε στη λέξη-κεφαλή σε καθεμία από τις σημασίες της, όπως ορίζεται από τον Cruse (1986).

⁵ Το τεστ στο Έργο 3 στηρίχτηκε σε προηγούμενα τεστ (βλ. McCreary and Dolezal 1999, McCreary 2002) και προσαρμόστηκε στις ανάγκες της παρούσας έρευνας.

τεχνικές στους ορισμούς τους, γ) προέρχονταν από τις τρεις βασικές κατηγορίες των λέξεων περιεχομένου (ουσιαστικά, επίθετα και ρήματα) και δ) ήταν πιθανόν όχι πολύ οικείες στους μαθητές. Μετά από προκαταρκτική έρευνα σε 25 μαθητές που δε συμμετείχαν στην κυρίως έρευνα επιλέχθηκαν οι ακόλουθες 15 λ.μ., που ήταν τους ήταν λιγότερο οικείες: α) για το Έργο 2: τα ουσιαστικά: *βλέφαρο*, *χειραψία*, τα επίθετα: *απόλυτος*, *φτασμένος*, τα ρήματα: *κλίνω*, *συγχέω*), β) για το Έργο 3: τα ουσιαστικά: *ανία*, *ετοιμότητα*, *βιότοπος*, τα επίθετα: *αυθάδης*, *αστικός*, *αιχμηρός*, τα ρήματα: *προσβάλλω*, *καταβάλλω*, *εκβάλλω*.

Στους ορισμούς των επιλεγμένων λ.μ. που αντλήθηκαν από τα λεξικά ΛΣΓ και ΕΛΝΕ αντανακλώνται οι ακόλουθες παραδοσιακές λεξικογραφικές τεχνικές και συμβάσεις διατύπωσης:

1. Αναλυτικοί ορισμοί: Ορισμοί στους οποίους δίνεται έμφαση στη δήλωση του γένους και των διαφοροποιητικών χαρακτηριστικών, π.χ.:

(1) *ανία*: *δυσάρεστο συναίσθημα που δημιουργείται από την έλλειψη ενδιαφέροντος για ό,τι συμβαίνει (ΕΛΝΕ)*

(2) *βλέφαρο*: *καθεμία από τις δερμάτινες πτυχές που καλύπτουν και προστατεύουν τα μάτια (ΛΣΓ)*

2. Ορισμοί με συνώνυμα: Ορισμοί στους οποίους η περιγραφή της σημασίας γίνεται μέσω ενός ή περισσότερων συνωνύμων, π.χ.:

(3) *ανία*: *πλήξη (ΛΣΓ)*

(4) *απόλυτος*: *άκαμπτος στη γνώμη (ΛΣΓ)*

(5) *αυθάδης*: *αυτός που είναι υπερβολικά θρασύς, αναιδής (ΕΛΝΕ)*

3. Μορφολογικοί ορισμοί: Ορισμοί στους οποίους η σημασία της οριζόμενης λ.μ. περιγράφεται με παράγωγες λέξεις που ανήκουν στην ίδια οικογένεια. Στους επιλεγμένους ορισμούς η σημασιολογική σύνδεση των μορφολογικά συγγενικών λέξεων γίνεται με τη χρήση τυποποιημένων φράσεων, π.χ.:

(6) *αυθάδης*: *αυτός που χαρακτηρίζεται από αυθάδεια (ΛΣΓ)*

(7) *ετοιμότητα*: *η κατάσταση στην οποία κάποιος είναι έτοιμος (ΕΛΝΕ)⁶*

4. Σύμβαση του κενού συμπληρώματος (hole convention): Στους ορισμούς όπου εφαρμόζεται η συγκεκριμένη σύμβαση παραλείπεται οποιαδήποτε ένδειξη για το υποχρεωτικό συμπλήρωμα της οριζόμενης λ.μ., π.χ.:

(8) *προσβάλλω*: *προκαλώ ή προξενώ βλάβη (ΛΣΓ), (ΕΛΝΕ)*

(9) *εκβάλλω*: *(για ποταμούς κτλ.) χύνω τα νερά μου (ΕΛΝΕ)*

5. Η δήλωση των περιορισμών επιλογής ή των σημασιολογικών προτιμήσεων μιας λ.μ. μέσω της χρήσης παρενθέσεων στην αρχή ή στο τέλος των ορισμών, π.χ.:

(10) *φτασμένος*: *(για επαγγελματία) πολύ επιτυχημένος στον χώρο του (ΛΣΓ)*

(11) *εκβάλλω*: *(για ποταμούς) καταλήγω σε (θάλασσα, λίμνη) (ΛΣΓ)*

6. Η έλλειψη δήλωσης περιορισμών επιλογής, π.χ.:

(12) *φτασμένος*: *αυτός που έχει πετύχει επαγγελματικά (ΕΛΝΕ)*

(13) *προσβάλλω*: *προκαλώ ή προξενώ βλάβη (ΛΣΓ), (ΕΛΝΕ)*

(14) *αστικός*: *αυτός γίνεται ή κινείται εντός των ορίων μιας πόλης (ΛΣΓ)*

(15) *αστικός*: *αυτός που αφορά την επικοινωνία μέσα σε μια πόλη (ΕΛΝΕ)*

7. Ασαφής δήλωση της συντακτικής συμπεριφοράς της οριζόμενης λ.μ., η οποία άλλοτε μπορεί να συμπίπτει με αυτή της ορίζουσας λ.μ. (βλ. παράδειγμα 16) ενώ άλλοτε μπορεί να αποκλίνει από αυτή (βλ. παραδείγματα 17 και 18), π.χ.:

(16) *κλίνω*: *εμφανίζω ροπή προς κάτι (ΛΣΓ)*

(17) *κλίνω*: *προτιμώ κάτι από άλλα (ΕΛΝΕ)*

⁶ Με τον ορισμό της λ.μ. *ετοιμότητα* ελέγχεται η τεχνική του μορφολογικού ορισμού όταν η ορίζουσα λ.μ. είναι πολύσημη.

- (18) *συγχέω*: μπερδεύω κάτι, κυρίως κατά την προσπάθεια να το αντιληφθώ σωστά (ΕΛΝΕ)
8. Δύσκολο λεξιλόγιο: Ελέγχονται περιπτώσεις όπου στον ορισμό χρησιμοποιούνται λ.μ. πιο δύσκολες από την οριζόμενη, π.χ.:
- (19) *βλέφαρο*: καθεμία από τις δερμάτινες πτυχές που καλύπτουν και προστατεύουν τα μάτια (ΛΣΓ)
(20) *απόλυτος*: (για πρόσ.) αυτός που δεν αφήνει περιθώρια για κριτική ή συμβιβασμό (ΕΛΝΕ)
9. Ασαφής ορισμός: Ορισμός που δεν παρέχει επαρκή σημασιολογική πληροφορία για την ολοκληρωμένη αναπαράσταση της οριζόμενης λ.μ. (βλ. McKeown 1993: 20). Να σημειωθεί ότι συχνά οι ασάφειες στη διατύπωση των ορισμών συνοδεύονται συχνά από χρήση δύσκολου λεξιλογίου.
- (21) *βιότοπος*: το φυσικό περιβάλλον που παρέχει τις απαραίτητες συνθήκες για την εκπλήρωση μέρους ή ολόκληρου του κύκλου ζωής των φυτικών ή ζωικών οργανισμών (ΛΣΓ)
(22) *βιότοπος*: το φυσικό περιβάλλον που εξασφαλίζει σταθερούς όρους διαβίωσης σε ορισμένο σύνολο ζώων και φυτών (ΕΛΝΕ)
- Στους ορισμούς των επιλεγμένων λ.μ. που αντλήθηκαν από το ΛΕΞΓ αντανακλώνονται οι ακόλουθες βασικές τεχνικές και συμβάσεις του μοντέλου των προτασιακών ορισμών:
1. Δήλωση των συνηθισμένων/πρωτοτυπικών χαρακτηριστικών μιας λ.μ., π.χ.:
- (23) *βλέφαρο*: τα βλέφαρα είναι τα δύο κομμάτια δέρματος που σκεπάζουν τα μάτια μας όταν είναι κλειστά
(24) *χειραψία*: όταν δύο άνθρωποι κάνουν ή ανταλλάσσουν χειραψία, δίνει ο καθένας το δεξί του χέρι στον άλλο και σφίγγουν τα χέρια τους για λίγο, συνήθως για να χαιρετήσει ο ένας τον άλλο ή για να δείξουν ότι έκλεισαν μια συμφωνία
2. Δήλωση της συντακτικής συμπεριφοράς ή του συγκείμενου της οριζόμενης λ.μ. σε ρέοντα φυσικό λόγο χωρίς παρενθέσεις ή άλλες συμβάσεις, π.χ.:
- (25) *κλίνω*: όταν θέλουμε κάτι πιο πολύ από κάτι άλλο, λέμε ότι κλίνουμε προς αυτό
(26) *συγχέω*: όταν συγχέουμε κάτι με κάτι άλλο παρόμοιο ή όταν συγχέουμε δύο παρόμοια πράγματα, πιστεύουμε λάθος ότι το ένα είναι το άλλο
3. Δήλωση των σημασιολογικών προτιμήσεων της οριζόμενης λ.μ., π.χ.:
- (27) *φτασμένος*: όταν κάποιος είναι φτασμένος καλλιτέχνης, δικηγόρος κτλ., όλοι αναγνωρίζουν τις ικανότητές του και έχει μεγάλη φήμη
(28) *εκβάλλει*: ένας ποταμός εκβάλλει σε θάλασσα ή λίμνη όταν τα νερά του χύνονται εκεί
4. Χρήση απλού λεξιλογίου για την περιγραφή της σημασίας, π.χ.:
- (29) *ανία*: όταν νιώθουμε ανία, βαριόμαστε, επειδή δεν κάνουμε κάτι ενδιαφέρον ή επειδή κάνουμε συνεχώς τα ίδια πράγματα
(30) *βιότοπος*: ο βιότοπος είναι μια περιοχή, φυσική ή τεχνητή, που είναι κατάλληλη για την ανάπτυξη και την προστασία σπάνιων ζώων και φυτών
(31) *αυθάδης*: όταν κάποιος είναι αυθάδης, φέρεται στους άλλους με αγένεια και χωρίς σεβασμό

3.4 Διαδικασία

Η έρευνα πραγματοποιήθηκε τον Απρίλιο 2009 και στη διεξαγωγή της συμμετείχαν οι εκπαιδευτικοί της Ε΄ και Στ΄ τάξης του Δημοτικού της Ελληνογερμανικής Αγωγής και του 2^ο Δημοτικού Σχολείου Διονύσου. Οι εκπαιδευτικοί διάβασαν δυνατά τις εκφωνήσεις για κάθε έργο και εξήγησαν στους μαθητές πώς έπρεπε να συμπληρώσουν τις απαντήσεις τους. Η συμπλήρωση του φυλλαδίου ολοκληρώθηκε σε μία διδακτική ώρα.

4. Βαθμολόγηση και στατιστική επεξεργασία

Στόχος της έρευνας είναι να ελεγχθεί η συσχέτιση της ανεξάρτητης μεταβλητής «τύπος ορισμού», όπως εκπροσωπείται από τα τρία διαφορετικά λεξικά (ΛΣΓ, ΕΛΝΕ, ΛΕΞΓ), με τις εξαρτημένες μεταβλητές: α) ικανότητα των μαθητών να χρησιμοποιούν σωστά τη λ.μ. στα συμφραζόμενα, συντάσσοντας δικές τους προτάσεις (Έργο 2), β) ικανότητα των μαθητών να αντιλαμβάνονται στοιχεία που αφορούν τη σημασία και τη χρήση της λ.μ. μέσα σε ήδη διατυπωμένες προτάσεις, επιλέγοντας μέσα από ασκήσεις πολλαπλής επιλογής τη σωστή (Έργο 3). Ο έλεγχος της αποτελεσματικότητας των τριών λεξικογραφικών προσεγγίσεων έγινε για καθεμία από τις 15 ελεγχόμενες λ.μ. και για καθεμία από τις 3 γραμματικές κατηγορίες (ουσιαστικά, επίθετα, ρήματα) που αυτές εκπροσωπούν. Συμπληρωματικά ελέγχθηκε το πώς οι ίδιοι οι μαθητές προσδιορίζουν το βαθμό οικειότητά τους με τις ελεγχόμενες λ.μ., πριν να συμβουλευτούν τους ορισμούς, και το πώς αξιολογούν τη συνεισφορά του κάθε ορισμού μετά τα τεστ.

Οι απαντήσεις των μαθητών στα παραπάνω έργα έλαβαν τους χαρακτηρισμούς: α) *Σωστό*, β) *Λάθος*⁷, και γ) *Δεν ξέρω*.

Στο Έργο 1, για τη μέτρηση του βαθμού οικειότητας των μαθητών της κάθε ομάδας με κάθε λ.μ., οι τιμές *Καθόλου*, *Λίγο*, *Καλά* και *Πολύ καλά* αντικαταστάθηκαν από τους αριθμούς 1-4 αντίστοιχα και εξήχθη για καθεμία από αυτές η μέση τιμή. Στο Έργο 4, για να εξαχθεί η μέση τιμή για κάθε ορισμό οι τιμές *Καθόλου*, *Λίγο*, *Πολύ*, *Πάρα πολύ* αντικαταστάθηκαν, όπως και στο Έργο 1, από τους αριθμούς 1-4 αντίστοιχα.

Κατά τη στατιστική επεξεργασία έγιναν συγκρίσεις μεταξύ των απαντήσεων των τριών ομάδων ανά ζεύγη (Ομάδα Α vs. Ομάδα Β, Ομάδα Β vs. Ομάδα Γ, Ομάδα Α vs. Ομάδα Γ) για κάθε ελεγχόμενη λ.μ., για κάθε γραμματική κατηγορία και για το σύνολο των λ.μ.. Οι στατιστικοί έλεγχοι πραγματοποιήθηκαν μέσω των τεστ χ^2 και Fischer κατά περίπτωση⁸. Οι διαφορές των ποσοστών μεταξύ των εκάστοτε δύο ομάδων θεωρήθηκαν στατιστικώς σημαντικές για επίπεδο σημαντικότητας $p=0,05$.

Η στατιστική επεξεργασία των δεδομένων έγινε με το πρόγραμμα SPSS (έκδοση 16.0.1). Η ανάλυση των δεδομένων επαληθεύτηκε με γραφικές παραστάσεις.

5. Αποτελέσματα

Στο Γράφημα 1 παρουσιάζονται τα ποσοστά των σωστών απαντήσεων που έδωσαν και οι τρεις ομάδες για κάθε λ.μ. στο Έργο 2 (παραγωγή προτάσεων).

Γράφημα 1 Ποσοστά σωστών απαντήσεων ανά ομάδα για κάθε λ.μ. στο Έργο 2

⁷ Στο Έργο 2 οι λανθασμένες απαντήσεις χαρακτηρίστηκαν ειδικότερα με τις τιμές: *Λάθος_σημασιολογικό*, *Λάθος_χρήσης* και *Λάθος_μη_εμφάνισης_λ.μ.* όταν στις προτάσεις των μαθητών δεν εμφανιζόταν η ελεγχόμενη λ.μ.

⁸ Το τεστ Fischer χρησιμοποιήθηκε για τις απαντήσεις *Δεν ξέρω* όταν οι απόλυτες τιμές τους ήταν μικρότερες του 10.

Η Ομάδα Γ, που συμβουλευτήκε τους προτασιακούς ορισμούς, παρουσίασε σε όλες τις λ.μ. σημαντικά υψηλότερα ποσοστά σωστών απαντήσεων (*βλέφαρο*: 71,5%, *χειραψία*: 77,2%, *απόλυτος*: 63,4%, *φτασμένος*: 70,7%, *κλίνω*: 49,6%, *συγχέω*: 51,2%) από τα αντίστοιχα ποσοστά της Ομάδας Α (*βλέφαρο*: 36,6%, $p=0,001$, $p<0,05$, *χειραψία*: 36,6%, $p=0,001$, $p<0,05$, *απόλυτος*: 33,0%, $p=0,001$, $p<0,05$, *φτασμένος*: 14,3%, $p=0,001$, $p<0,05$, *κλίνω*: 3,6%, $p=0,001$, $p<0,05$, *συγχέω*: 8,9%, $p=0,001$, $p<0,05$).

Επίσης, σε όλες τις λ.μ. η Ομάδα Γ παρουσίασε σημαντικά υψηλότερα ποσοστά σωστών απαντήσεων και από την Ομάδα Β (*βλέφαρο*: 31,9%, $p=0,001$, $p<0,05$, *χειραψία*: 52,6%, $p=0,001$, $p<0,05$, *απόλυτος*: 24,1%, $p=0,001$, $p<0,05$, *φτασμένος*: 8,6%, $p=0,001$, $p<0,05$, *κλίνω*: 6,9%, $p=0,001$, $p<0,05$, *συγχέω*: 25%, $p=0,001$, $p<0,05$).

Το συνολικό ποσοστό των σωστών απαντήσεων της Ομάδας Γ στο Έργο 2 ανήλθε στο 64%, ενώ της Ομάδας Α στο 22,2% και της Ομάδας Β στο 21,6%.

Στο Γράφημα 2 που ακολουθεί παρουσιάζονται τα ποσοστά των σωστών απαντήσεων που έδωσε καθεμία από τις τρεις ελεγχόμενες ομάδες στο Έργο 3 (αναγνώριση της σωστής σημασίας).

Γράφημα 2 Ποσοστά σωστών απαντήσεων ανά ομάδα για κάθε λ.μ. στο Έργο 3

Όσον αφορά το ποσοστό των σωστών απαντήσεων, η Ομάδα Γ, που συμβουλευτήκε τους προτασιακούς ορισμούς, παρουσίασε σε όλες τις λ.μ. σημαντικά υψηλότερα ποσοστά σωστών απαντήσεων (*ανία*: 94,3%, *βιότοπος*: 81,3%, *ετοιμότητα*: 71,5%, *αυθάδης*: 88,8%, *αστικός*: 75,6%, *αιχμηρός*: 67,5%, *προσβάλλω*: 83,7%, *καταβάλλω*: 91,9%, *εκβάλλω*: 72,4%) από τα αντίστοιχα ποσοστά της Ομάδας Α (*ανία*: 16,1%, $p=0,001$, $p<0,05$, *βιότοπος*: 28,6%, $p=0,001$, $p<0,05$, *ετοιμότητα*: 27,7%, $p=0,001$, $p<0,05$, *αυθάδης*: 26,8%, $p=0,001$, $p<0,05$, *αστικός*: 11,6%, $p=0,001$, $p<0,05$, *αιχμηρός*: 13,4%, $p=0,001$, $p<0,05$, *προσβάλλω*: 35,7%, $p=0,001$, $p<0,05$, *καταβάλλω*: 26,8%, $p=0,001$, $p<0,05$, *εκβάλλω*: 25%, $p=0,001$, $p<0,05$).

Επίσης, σε όλες τις λ.μ. η Ομάδα Γ παρουσίασε σημαντικά υψηλότερα ποσοστά σωστών απαντήσεων και από την Ομάδα Β (*ανία*: 28,4%, $p=0,001$, $p<0,05$, *βιότοπος*: 29,3%, $p=0,001$, $p<0,05$, *ετοιμότητα*: 30,2%, $p=0,001$, $p<0,05$, *αυθάδης*: 36,2%, $p=0,001$, $p<0,05$, *αστικός*: 29,3%, $p=0,001$, $p<0,05$, *αιχμηρός*: 35,3%, $p=0,001$, $p<0,05$, *προσβάλλω*: 35,3%, $p=0,001$, $p<0,05$, *καταβάλλω*: 38,8%, $p=0,001$, $p<0,05$, *εκβάλλω*: 20,7%, $p=0,001$, $p<0,05$).

Σημαντικά υψηλότερο στο Έργο 3 ήταν και το συνολικό ποσοστό των σωστών απαντήσεων της Ομάδας Γ (80,8%) σε σύγκριση με αυτό της Ομάδας Α (23,5%) και της Ομάδας Β (31,5%).

Όπως φαίνεται στα Γραφήματα 3 και 4, η επίδοση της Ομάδας Γ είναι σημαντικά υψηλότερη και στα ουσιαστικά και στα επίθετα και στα ρήματα από την επίδοση της Ομάδας Α και της Ομάδας Β και στα δύο έργα. Η παρατήρηση αυτή αποδεικνύει τη μεγαλύτερη αποτελεσματικότητα των προτασιακών ορισμών σε όλες τις γραμματικές κατηγορίες έναντι των παραδοσιακών ορισμών.

Γράφημα 3 Ποσοστά σωστών απαντήσεων ανά ομάδα για κάθε γραμματική κατηγορία στο Έργο 2

Γράφημα 4 Ποσοστά σωστών απαντήσεων ανά ομάδα για κάθε γραμματική κατηγορία στο Έργο 3

Στο Έργο 1 η σύγκριση της διαφοράς των μέσων τιμών των απαντήσεων που έδωσε η κάθε ομάδα για κάθε λ.μ. αναδεικνύει την πολύ μικρή απόκλιση μεταξύ τους όσον αφορά το βαθμό οικειότητας με τις ελεγχόμενες λ.μ. Η παρατήρηση αυτή επιβεβαιώνει την ομοιογένεια του δείγματος όσον αφορά το γλωσσικό επίπεδο. Η μέση τιμή για τη γνώση των λ.μ. κυμαίνεται από 1,7 έως και 3,8 για όλες τις ομάδες, αποτέλεσμα που δείχνει μια σχετικά καλή γνώση (2,8) των ελεγχόμενων λ.μ.. Ωστόσο, το αποτέλεσμα αυτό δε συμφωνεί με την πραγματική επίδοση των μαθητών στα βασικά έργα της έρευνας.

Στο Έργο 4 η σύγκριση της διαφοράς των μέσων τιμών μεταξύ των ομάδων δείχνει ότι οι προτασιακοί ορισμοί της Ομάδας Γ συγκέντρωσαν σε όλες τις λ.μ. υψηλότερες τιμές από ό,τι οι παραδοσιακοί ορισμοί, αν και οι τιμές αυτές δε συνιστούν σημαντική στατιστική διαφορά. Η μέση τιμή αξιολόγησης των ορισμών -2,9 για την Ομάδα Α, 3 για την Ομάδα Β και 3,2 για την Ομάδα Γ- δείχνει ότι οι μαθητές και των τριών ομάδων έκριναν ότι οι ορισμοί που συμβουλευτήκαν τους βοήθησαν πολύ, πόρισμα που δε συμφωνεί με την πραγματική επίδοσή τους στα τεστ.

6. Συζήτηση

Με βάση τα συνολικά ποσοστά επίδοσης της κάθε ομάδας και στα δύο έργα της έρευνας (Ομάδα Α: 23,5%, Ομάδα Β: 26,6%, Ομάδα Γ: 72,4%) οι προτασιακοί ορισμοί συνέβαλαν αποτελεσματικότερα και στην παραγωγή προτάσεων και στην αναγνώριση της ορθής σημασίας και χρήσης των λ.μ. από ό,τι οι παραδοσιακοί ορισμοί. Τα αποτελέσματα συμφωνούν με τα αποτελέσματα της έρευνας της McKeown (1993).

Επίσης, οι προτασιακοί ορισμοί αποδείχθηκαν αποτελεσματικότεροι από τους παραδοσιακούς ορισμούς σε όλες τις γραμματικές κατηγορίες και στα δύο έργα, γεγονός που, τουλάχιστον όσον αφορά

τα ουσιαστικά, αντικρούει την κριτική που δέχονται οι συγκριμένοι ορισμοί γι' αυτή τη γραμματική κατηγορία, ότι δηλαδή δεν προσφέρουν πιο χρήσιμη πληροφορία από ό,τι οι παραδοσιακοί αναλυτικοί ορισμοί, έτσι ώστε να αντισταθμίζεται το μειονέκτημα της μεγάλης έκτασής τους (βλ. Rundell 2008: 207).

Η υιοθέτηση των πρωτοτυπικών ή συνήθων χαρακτηριστικών συνέβαλε στη δημιουργία μιας σαφούς εικόνας για τις περιγραφόμενες σημασίες, οδηγώντας τους μαθητές σε λιγότερα σημασιολογικά λάθη και σε μειωμένα ποσοστά σύγχυσης με άλλες λ.μ. (π.χ. σύγχυση της λ.μ. *βλέφαρο* με τη *βλεφαρίδα* και το *φρύδι*) κατά την παραγωγή προτάσεων, αλλά και σε επιτυχέστερη αναγνώριση της ορθής σημασίας στο Έργο 3. Επίσης, η εστίαση του ορισμού στα πρωτοτυπικά χαρακτηριστικά (βλ. παράδειγμα 23: *βλέφαρο*) ενεργοποίησε στους μαθητές παραγωγικούς μηχανισμούς σύνδεσης της περιγραφόμενης σημασίας με ποικιλία περιστάσεων στις οποίες αυτή συνήθως χρησιμοποιείται, όπως φαίνεται στις απαντήσεις των μαθητών της Ομάδας Γ (π.χ. *ανοιγοκλείνω τα βλέφαρα, κλείνουν τα βλέφαρα όταν νυστάζω, κλείνουν τα βλέφαρα από την κούραση*).

Η δήλωση των συμφραστικών και των σημασιολογικών προτιμήσεων μιας λ.μ. σε ρέοντα φυσικό λόγο αντί σε παρενθέσεις, όχι μόνο στους ορισμούς των ρημάτων (βλ. παραδείγματα 24: *κλίνω*, 25: *συγγέω*, 27: *εκβάλλει*) και των επιθέτων (βλ. παράδειγμα 27: *φτασμένος*), αλλά και των ουσιαστικών (βλ. παράδειγμα 24: *χειραψία*), συνέβαλε στην ορθή κατανόηση της σημασίας και της χρήσης των σχετικών λ.μ. από τους μαθητές της Ομάδας Γ και στην αποφυγή λαθών όπως αυτά που αποτυπώθηκαν στις προτάσεις των μαθητών της Ομάδας Α και της Ομάδας Β (π.χ. **δίνω χειραψία, *φτασμένος στο ποδόσφαιρο, *φτασμένος στην επιχείρηση, *ο μπαμπάς μου είναι φτασμένος*). Ειδικότερα, στο έργο της παραγωγής προτάσεων ευνόησε την ενεργοποίηση συνδέσεων μεταξύ συστηματικών σημασιολογικών σχέσεων (π.χ. υπερωνυμίας), που οδήγησαν τους μαθητές σε παραγωγικότερη χρήση των σχετικών λ.μ. στις δικές τους προτάσεις, όπως φαίνεται στα παραδείγματα των προτάσεων της Ομάδας Γ (π.χ. *φτασμένος καλλιτέχνης, φτασμένος ζωγράφος, φτασμένος ποιητής, φτασμένος τραγουδιστής*). Επίσης, στο πλαίσιο των παραδοσιακών ορισμών η δήλωση των περιορισμών επιλογής σε παρένθεση αποδείχτηκε περισσότερο αποτελεσματική στην αποτύπωση της χρήσης της λ.μ. κατά την παραγωγή προτάσεων (βλ. παράδειγμα 10: *φτασμένος*) από την έλλειψη της δήλωσής τους (βλ. παράδειγμα 12: *φτασμένος*).

Η δήλωση της συντακτικής συμπεριφοράς στο κείμενο του ορισμού των ρημάτων και των επιθέτων βοήθησε τους μαθητές να αναπαραγάγουν σε ικανοποιητικό βαθμό τη συντακτική δομή των ελεγχόμενων λ.μ. στις δικές τους προτάσεις και να αποφύγουν λανθασμένες συντακτικές δομές στην παραγωγή προτάσεων, όπως αυτές που αποτυπώνονται στις απαντήσεις των μαθητών της Ομάδας Α και της Ομάδας Β (π.χ. **κλίνω το κολύμπι, *κλίνω το άσπρο από το μαύρο χρώμα, *συγγέω την άσκηση*), αλλά και να εντοπίσουν σε υψηλό ποσοστό τη σωστή σημασία και τη σωστή συντακτική χρήση των ελεγχόμενων λ.μ. στο Έργο 3. Οι λανθασμένες απαντήσεις των μαθητών στην Ομάδα Α και στην Ομάδα Β αναδεικνύουν δύο βασικούς κινδύνους που ελλοχεύουν στους παραδοσιακούς αναλυτικούς των ρημάτων: α) δημιουργία της παραπλανητικής εντύπωσης ότι οι δύο λέξεις, η οριζόμενη και η ορίζουσα, ταυτίζονται όχι μόνο ως προς τη γραμματική κατηγορία αλλά και ως προς τη συντακτική δομή, κάτι το οποίο συχνά δεν ισχύει (πρβλ. τις διαφορές στο συντακτικό σθένος μεταξύ της οριζόμενης λ.μ. *κλίνω* και της ορίζουσας λ.μ. *προτιμώ* στο παράδειγμα 17 ή τις διαφορές ανάμεσα στο *συγγέω* και στο *μπερδεύω* στο παράδειγμα 18) και β) δημιουργία της παραπλανητικής εντύπωσης ότι η ταύτιση δεν είναι μόνο συντακτικής αλλά και σημασιολογικής υφής, όπως παρατηρήθηκε στις προτάσεις των μαθητών της Ομάδας Β, όπου αποδόθηκε λανθασμένα στο *συγγέομαι* η μέση σημασία του *μπερδεύομαι* (π.χ. **συγγέομαι όταν λύνω ασκήσεις, *συγγέομαι με τα γερμανικά, *συγγέστηκα στη διαίρεση*)⁹.

Οι ορισμοί με συνώνυμα (βλ. παραδείγματα 3: *ανία* και 5: *αυθάδης*) στέρησαν από τους μαθητές της Ομάδας Α και της Ομάδας Β αντίστοιχα την αυτονόητη συνεισφορά του ορισμού, δηλαδή την αυτοτελή περιγραφή της σημασίας. Με τους ορισμούς αυτούς όσοι από τους μαθητές δε γνώριζαν τη συνώνυμη λ.μ. *πλήξη* (84% στην Ομάδα Α) οδηγήθηκαν είτε σε λανθασμένες απαντήσεις είτε σε αδυναμία επιλογής κάποιας απάντησης.

Οι μορφολογικοί ορισμοί (βλ. παράδειγμα 5: *αυθάδης* και παράδειγμα 7: *ετοιμότητα*) ανέδειξαν τη διπλή παγίδα που τους χαρακτηρίζει: α) στέρηση της αυτοτελούς περιγραφής της λ.μ. και στήριξη της ερμηνευτικής τους ισχύος στην προϋποτιθέμενη γνώση της συγγενικής λ.μ. και β) στέρηση της αναμφισήτητης και άρα αβίαστης και προσιτής ερμηνείας της οριζόμενης λ.μ. όταν αυτή είναι πολύσημη (βλ. παράδειγμα 7: *ετοιμότητα*).

Το απλό λεξιλόγιο και η απλή διατύπωση συνέβαλαν στο να γίνεται η περιγραφή της σημασίας πιο προσιτή και άρα πιο εύκολα κατανοητή, χωρίς να απαιτείται από τους μαθητές να κάνουν πολλά

⁹ Για αντίστοιχη παρατήρηση βλ. Ιορδανίδου και Μάντζαρη (2004).

βήματα μέχρι την ερμηνεία της. Αν και η χρήση απλού λεξιλογίου και λέξεων γνωστότερων από την οριζόμενη λ.μ. στους ορισμούς της Ομάδας Β για τις λ.μ. *βλέφαρο*, *κλίνω* και *συγχέω*, δεν απέτρεψε σημασιολογικά λάθη που αφορούσαν τη σύγχυση με άλλες λ.μ., συνέβαλε όμως αποτελεσματικότερα στη μείωσή τους (π.χ. σύγχυση της λ.μ. *βλέφαρο* με τη *βλεφαρίδα*, σύγχυση της λ.μ. *κλίνω* προς με τα ομώνυμα *κλείνω* και *κλίνω*, σύγχυση της λ.μ. *συγχέω* με το *συγχαίρω*). Αντίθετα, η χρήση στους ορισμούς λ.μ. δυσκολότερων από την οριζόμενη ενίσχυσε προηγούμενες συγχύσεις στην Ομάδα Α (π.χ. *βλέφαρο* με *βλεφαρίδα*, *κλίνω* προς με *κλίνω* και *κλείνω*) ή προκάλεσε νέες (π.χ. *κλίνω* προς με την περίφραση *έχω κλίση*).

Η ανάλυση των αποτελεσμάτων στο Έργο 1 και στο Έργο 4 αναδεικνύει την αδυναμία των μαθητών να εφαρμόσουν μεταγνωσιακές στρατηγικές (metacognitive strategies) κατά τη χρήση του λεξικού (βλ. Scholfield 1999: 14). Στο Έργο 1 δεν μπορούν να αναγνωρίσουν αν έχουν κάποιο λεξιλογικό πρόβλημα ή πόσο καλά γνωρίζουν μια λέξη, ενώ αντίστοιχα στο Έργο 4 δεν είναι σε θέση να αξιολογήσουν ορθά την πληροφορία που προσέλαβαν από τους λεξικογραφικούς ορισμούς. Ειδικά για το Έργο 4, η υψηλή βαθμολόγηση που έλαβαν οι παραδοσιακοί ορισμοί αποτυπώνει με χαρακτηριστικό τρόπο τη θετική στάση των χρηστών, ακόμη και αυτής της ηλικίας, απέναντι στη μορφή και στο περιεχόμενο των παραδοσιακών ορισμών, με τους οποίους φαίνεται ότι αισθάνονται οικεία (βλ. Rundell 1988: 131).

Η διδασκαλία χρήσης του λεξικού και η ένταξη της χρήσης του στη σχολική τάξη στο πλαίσιο της διδασκαλίας της γλώσσας, συμβάλλοντας στην ανάπτυξη της κριτικής σκέψης και της αυτόνομης μάθησης των μαθητών, θα μπορούσε να βοηθήσει στην καλλιέργεια των σχετικών μεταγνωσιακών στρατηγικών αλλά και στην αντικειμενική αξιολόγηση των λεξικών και της πληροφορίας που αντλούν από αυτά.

7. Επίλογος

Τα συμπεράσματα της παρούσας έρευνας ενισχύουν την κυρίαρχη απαίτηση στη σύγχρονη λεξικογραφική βιβλιογραφία ο σχεδιασμός λεξικογραφικών προϊόντων να στηρίζεται και σε ερευνητικά δεδομένα. Ταυτόχρονα, τα συμπεράσματα αυτά επιβεβαιώνουν και ενισχύουν την απαίτηση για υιοθέτηση φιλικότερων και χρηστικότερων προσεγγίσεων κατά το σχεδιασμό λεξικών και για φυσικούς ομιλητές. Σε ό,τι αφορά την περιγραφή της σημασίας των λέξεων, το μοντέλο των προτασιακών ορισμών αποδεικνύεται αποτελεσματικότερο από τις αντίστοιχες παραδοσιακές λεξικογραφικές στρατηγικές, γιατί βοηθά τους χρήστες των λεξικών να αντλήσουν από τους ορισμούς τις πληροφορίες που χρειάζονται για την καλύτερη κατανόηση και χρήση της σημασίας των λέξεων. Βέβαια, παρά τα ευνοϊκά ερευνητικά πορίσματα, η μεγάλη έκταση των ορισμών αυτών φαίνεται ότι εμποδίζει την εκτεταμένη υιοθέτησή τους στις έντυπες εκδόσεις λεξικών. Για το λόγο αυτό, τα πλεονεκτήματα και τα μειονεκτήματα στην εφαρμογή τους θα πρέπει να επανεξεταστούν και να επανασταθμιστούν με βάση και τις νέες προοπτικές που διαγράφονται στο λεξικογραφικό τοπίο με τη διάδοση της χρήσης του σύγχρονου ηλεκτρονικού λεξικού.

Ωστόσο, η ανάλυση των αποτελεσμάτων ανέδειξε και κοινές συμπεριφορές των μαθητών ανεξάρτητα από το είδος των ορισμών που συμβουλευτήκαν (π.χ. σύγχυση με άλλες λ.μ., σύγχυση με διαφορετικές σημασίες μιας λ.μ., καλύτερη επίδοση στα ουσιαστικά από ό,τι στα επίθετα και στα ρήματα, αδυναμία αξιοποίησης συμφραστικών και σημασιολογικών πληροφοριών και στους προτασιακούς ορισμούς).

Οι συμπεριφορές αυτές υποδεικνύουν την αναγκαιότητα για την καλλιέργεια ειδικών δεξιοτήτων σχετικά με τη χρήση και την αξιοποίηση των ορισμών. Η καλλιέργεια αυτών των ειδικών δεξιοτήτων θα πρέπει να αποτελεί μέρος μιας ευρύτερης διδακτικής προσέγγισης για τη χρήση του λεξικού στη σχολική τάξη, που θα πρέπει να στηριχθεί σε συγκεκριμένο πρόγραμμα διδασκαλίας και σε αντίστοιχο διδακτικό υλικό (βλ. Stark 1990, Αναστασιάδη-Συμεωνίδη 1997, Bishop 2001, Chi 2003, Μάντζαρη 2011).

ABSTRACT

The present paper examines an important isogloss in Modern Greek dialectology, that of double (geminate) consonants. Issues addressed include: a) the detailed geographical distribution of geminate consonants b) the specific realization of geminate consonants in each area c) the diachronic data relating to the appearance of geminate consonants.

Λέξεις κλειδιά: διαλεκτολογία, φωνητική, ισόγλωσσο, διπλά σύμφωνα

1. Εισαγωγικά

1.1 Στόχοι-πλαίσιο

Η παρούσα μελέτη αποτελεί μέρος ευρύτερης έρευνας που διεξάγεται από το Κέντρο Ερεύνης των Νεοελληνικών Διαλέκτων και Ιδιωμάτων της Ακαδημίας Αθηνών με στόχο την πιστότερη φωνητική αντιπροσώπευση των διαλεκτικών τύπων στο *Ιστορικόν Λεξικόν τῆς Νέας Ἑλληνικῆς* (ΙΑΝΕ), του οποίου ο νέος τόμος βρίσκεται υπό προετοιμασία σύμφωνα με τον νέο Κανονισμό Συντάξεως που μόλις ολοκληρώθηκε (Κανονισμός 2012).

Συγκεκριμένα, ο Κανονισμός προβλέπει για πρώτη φορά φωνητική μεταγραφή των διαλεκτικών τύπων με το ΔΦΑ, παράλληλα με την συμβατική απόδοσή τους με το ελληνικό αλφάβητο, συμπληρωμένο με ειδικά φθογγόσημα¹. Η μεθοδολογική αυτή επιλογή της φωνητικής μεταγραφής στόχο έχει να προωθήσει σημαντικά την χάραξη φωνητικών ισογλωσσών, κάτι που ανέκαθεν αποτελούσε βασικό ζητούμενο της ελληνικής διαλεκτολογίας και που είναι δυνατόν να πραγματοποιηθεί μόνο με την αξιοποίηση του πλούσιου αρχειακού υλικού του ΙΑΝΕ, το οποίο καλύπτει χρονικό διάστημα άνω των 100 ετών και περιλαμβάνει όλες τις ελληνοφώνες περιοχές.

Για το σκοπό αυτό καταρτίζονται γλωσσογεωγραφικοί πίνακες κατανομής βασικών φωνητικών φαινομένων, οι οποίοι καταγράφουν αναλυτικά την κατά τόπους πραγμάτωση, έτσι ώστε να χρησιμοποιούνται ως οδηγοί για τους συντάκτες του ΙΑΝΕ. Τέτοια φαινόμενα είναι π.χ. τα διπλά σύμφωνα, η ουράνωση/τσιτακισμός², η προερρίνωση των ηχηρών κλειστών, ο βόρειος φωνηεντισμός κλπ. Οι πίνακες αυτοί συμπληρώνονται βάσει του εναποτεθειμένου στο Αρχείο του ΙΑΝΕ πρωτογενούς διαλεκτικού υλικού αλλά και βάσει δευτερογενών πηγών όπως διαλεκτολογικές μελέτες, γλωσσάρια κ.τ.ό.

1.2 Δυσκολίες-προβλήματα

Ένα τέτοιο εγχείρημα παρουσιάζει πληθώρα δυσκολιών, οι σημαντικότερες των οποίων είναι οι εξής (βλ. Μανωλέσσου, Μπέης και Μπασέα-Μπεζαντάκου (2012), όπου και συγκεκριμένα παραδείγματα):

1) **Ανεπάρκεια πηγών.** Δεν υπάρχουν πληροφορίες για την πραγμάτωση κάποιου φαινομένου σε όλες τις περιοχές του ελληνοφώνου χώρου· ορισμένες περιοχές είναι ελάχιστα ή καθόλου μελετημένες ή έχουν

¹ Για το θέμα αυτό βλ. αναλυτικά Μανωλέσσου, Μπέης και Μπασέα-Μπεζαντάκου (2012).

² Για την έρευνα του ΙΑΝΕ γύρω από το φαινόμενο αυτό βλ. Μανωλέσσου και Παντελίδης (υπό έκδ.).

μεν μελετηθεί αλλά όχι ως προς το υπό εξέταση φαινόμενο. Για τις περιοχές αυτές απαιτούνται αποστολές συλλογής γλωσσικού υλικού, γεγονός που λαμβάνεται υπ' όψη στον ετήσιο προγραμματισμό των αποστολών του ΚΕΝΔΙ.

2) **Ασάφεια πηγών.** Οι παλαιότερες πηγές, είτε πρόκειται για (χειρόγραφες) καταγραφές διαλεκτικού λόγου είτε για διαλεκτολογικές μελέτες, δεν χρησιμοποιούν το Διεθνές Φωνητικό Αλφάβητο, με αποτέλεσμα ορισμένα φαινόμενα να μην δηλώνονται καθόλου ή να δηλώνονται με σύμβολα που δεν είναι πλέον κατανοητά. Αυτό συμβαίνει κυρίως με διαλεκτικούς φθόγγους που δεν υπάρχουν στην ΚΝΕ, όπως «παχείς» συριστικοί φθόγγοι, ή εν προκειμένω, τα διπλά σύμφωνα³. Παρομοίως, και η ορολογία που χρησιμοποιείται στις παλαιότερες μελέτες είναι αδόκιμη και συχνά «ερασιτεχνική», και δεν διευκολύνει την κατανόηση της αρθρωτικής ή ακουστικής φύσεως του φαινομένου. Τα ίδια σύμβολα ή όροι έχουν συχνά διαφορετική αξία στις διάφορες πηγές, ακόμα και αν αυτές αναφέρονται στο ίδιο ή συγγενές ιδίωμα. Σημειωτέον ότι ενώ το πρόβλημα είναι ως ένα βαθμό κατανοητό και αντιμετωπίσιμο για τις παλαιότερες πηγές, είναι οξύτερο για τις νεότερες πηγές που έχουν συνταχθεί χωρίς γλωσσολογικό υπόβαθρο· αυτό αφορά κυρίως τα διάφορα «ερασιτεχνικά» γλωσσάρια και διαλεκτικά λογοτεχνήματα, τα οποία δίνουν μικρή σημασία στην φωνητική απόδοση. Το επίπεδο της φωνητικής είναι αυτό που «υποφέρει» περισσότερο από την γλωσσολογική ανεπάρκεια του πρωτογενούς υλικού, καθώς η μορφολογία και η σύνταξη μπορούν να αποτυπωθούν αξιόπιστα με το ελληνικό αλφάβητο χωρίς την ανάγκη ειδικότερου συμβολισμού, αλλά και καθώς είναι πιο εύκολα αντιληπτές από τον μη εξειδικευμένο συλλογέα από ό,τι οι ακουστικές διαφοροποιήσεις (π.χ. ευκολότερα αντιλαμβάνεται κανείς ένα εναλλακτικό κλιτικό επίθημα από μια διαφορετική πραγμάτωση φθόγγου).

3) **Ασυνέπεια πηγών.** Οι πρωτογενείς πηγές συχνά παρουσιάζουν ασυνέπεια στην καταγραφή των φωνητικών φαινομένων: η ίδια λέξη ή φθόγγος μπορεί να καταγράφεται με διαφορετικούς τρόπους ή συμβολισμούς στην ίδια πηγή. Η ασυνέπεια μπορεί να αντικατοπτρίζει μια πραγματική ελεύθερη εναλλαγή μεταξύ δύο πραγματώσεων εκ μέρους του πληροφορητή, οφειλόμενη ενδεχομένως σε παρεμβολή της ΚΝΕ· δεν αποκλείεται όμως να οφείλεται και σε ανακριβή καταγραφή εκ μέρους του συλλογέα. Ενίοτε μάλιστα οι συλλογείς καταγράφουν τύπους όχι όπως τους αντιλαμβάνονται ακουστικά, αλλά σύμφωνα με κάποιο παλαιότερο πρότυπο που θεωρείται έγκυρο, γεγονός που οδηγεί σε διαιώνιση ανακριβών καταγραφών. Οι παλαιότερες πηγές επίσης συχνά δεν παραθέτουν πλήρη στοιχεία των πληροφοριών, ενίοτε μάλιστα ούτε καν σημειώνουν την αλλαγή ομιλητή, οπότε η ποικιλία (variation) μπορεί να αποδοθεί και σε διαφορετικούς ομιλητές και άρα σε γεωγραφικές ή κοινωνιογλωσσικές παραμέτρους.

Φυσικά όταν το πρωτογενές υλικό συνοδεύεται από ηχογραφημένα δεδομένα, μέρος των προβλημάτων αυτών εξαλείφεται· γι' αυτό καταβάλλεται προσπάθεια οι πίνακες κατανομής φαινομένων να στηρίζονται κυρίως σε ηχητικό υλικό. Παραταύτα, αυτό δεν είναι πάντοτε δυνατόν, είτε διότι το πρωτογενές υλικό προέρχεται από εποχές κατά τις οποίες δεν υπήρχε η υλικοτεχνική υποδομή για ηχογραφήσεις, είτε διότι το ηχητικό υλικό έχει υποστεί φθορές από το πέρασμα του χρόνου.

2. Τα διπλά σύμφωνα στις νεοελληνικές διαλέκτους

2.1 Στόχοι

Το υπό εξέταση φαινόμενο είναι η πραγμάτωση των διπλών συμφώνων, ένα από τα βασικά διαφοροποιητικά γνωρίσματα των νεοελληνικών διαλέκτων στο επίπεδο της φωνητικής/φωνολογίας. Με τον όρο «διπλά (geminate) σύμφωνα» εννοούμε συμφωνικούς φθόγγους που εμφανίζουν αυξημένη διάρκεια εκφοράς εν συγκρίσει προς αντίστοιχους «απλούς», η οποία γίνεται αντιληπτή είτε ως επιμήκυνση είτε ως επανάληψη, ή πραγματώνεται ως διάσπαση σε δύο φθόγγους με διαφορετική άρθρωση (δάσυνση, προστριβοποίηση)⁴.

³ Το πρόβλημα του ασαφούς συμβολισμού των διπλών συμφώνων με την ιστορική ορθογραφία ακόμα και σε διαλεκτολογικές μελέτες επισημαίνεται ήδη από τον Seiler (1958: 210-211).

⁴ Δεν θα μας απασχολήσει εδώ ο φωνολογικός ορισμός των διπλών συμφώνων, και ιδίως το μείζον ερώτημα του κατά πόσον πρόκειται για μακρά (long) σύμφωνα ή για επάλληλες πραγματώσεις απλών συμφώνων, για το οποίο υπάρχει εκτεταμένη βιβλιογραφία, με επικέντρωση όμως στην κυπριακή (βλ. Arvaniti 2010: 115-121, Armosti 2011: 33-34 για μια επισκόπηση). Φωνολογική προσέγγιση δύσκολα εφαρμόζεται σε μια δια-διαλεκτική εξέταση, καθώς τα διαφορετικά διαλεκτικά φωνολογικά συστήματα είναι πιθανό να παρουσιάσουν διαφορετικά γνωρίσματα και ιδιότητες.

Τα ερωτήματα που διερευνήθηκαν στο πλαίσιο της παρούσας μελέτης αφορούσαν τόσο την ακριβέστερη γεωγραφική κατανομή των διπλών συμφώνων (ανά κατηγορία φθόγγων και ανά αιτία δημιουργίας τους) όσο και την ακριβέστερη φωνητική πραγμάτωσή τους (ανά περιοχές και ανά θέση εντός της λέξεως). Τέλος, διερευνήθηκε η κατανομή του φαινομένου σε παλαιότερες ιστορικές περιόδους. Περιορισμοί έκτασης της παρούσας δημοσίευσης δεν επιτρέπουν την αναλυτική παρουσίαση όλων των παραπάνω θεμάτων· σε μελλοντική δημοσίευση θα δοθούν περισσότερα στοιχεία, καθώς και οι σχετικοί πίνακες.

2.2 Γεωγραφική εξάπλωση

Η βιβλιογραφικώς και αρχειακώς τεκμηριωμένη κατανομή των διπλών συμφώνων είναι η εξής: Κάτω Ιταλία (Καλαβρία και Απουλία), Κυκλάδες (Σέριφος, Σίφνος, Κίμωλος, Ηρακλεία, Δονούσα, Σχινούσα, Κουφονήσια, Αμοργός, Φολέγανδρος), Κύμη Ευβοίας και γύρω οικισμοί, Χίος (με εξαίρεση ορισμένων χωριών, βλ. Κατσουλέας 1996-1997), Ικαρία, Δωδεκάνησα, Αλικαρνασός, Λιβύσσι, Κύπρος. Σημειωτέον ότι η διαλεκτολογική βιβλιογραφία ομόφωνα αποκλείει την Πάτμο από την κατηγορία των διπλωτικών διαλέκτων, στηριζόμενη στην σχετική μελέτη του Α. Καραναστάση (1956: 212)· όμως ο ίδιος ο Καραναστάσης στο *χφ.* που κατέθεσε στο αρχείο του ΙΑΝΕ σημειώνει διπλά σύμφωνα στο πατμιακό ιδίωμα (ενδολεξικά και όχι σε συνεκφορά, π.χ. *γόφφος*, *πολ-λύχρονος*, *μπαρούττ'ες*, *καππ'αρός*, *νεροπιάν-νει*, ΧΙΛ 690-[1956]), ενώ και οι παλαιότερες ιστορικές πηγές μαρτυρούν το φαινόμενο στο τοπικό ιδίωμα (βλ. παρακάτω 3). Εξάλλου κάποια φαινόμενα όπως η πραγμάτωση του /z/ ως [dz] και η δάσυνση του [k] προ του [r] (πχ. *κχριάρι*, *κχρύο*, Καραναστάσης (1956: 214)) αποτελούν έμμεση ένδειξη παλαιότερης παρουσίας διπλώσεως. Επομένως, η εξαίρεση της Πάτμου από τις διπλωτικές διαλέκτους θα πρέπει να αναθεωρηθεί, ή τουλάχιστον να θεωρηθεί αποτέλεσμα πρόσφατων εξελίξεων⁵.

Σε ορισμένες περιοχές το τοπικό ιδίωμα είτε έχει σιγήσει (Λιβύσσι, Αλικαρνασός, Κύμη), είτε είναι σε άκρως φθίνουσα πορεία, επηρεασμένο από την ΚΝΕ, και πιθανώς επιβιώνει μόνο στην ομιλία ολιγαριθμών ηλικιωμένων (κυρίως στις Κυκλάδες: Κίμωλος, Σέριφος, Φολέγανδρος)⁶. Αντίθετα, αλλού το ιδίωμα επιβιώνει σε καθαρή μορφή και άρα τα διπλά σύμφωνα αποτελούν πάγιο χαρακτηριστικό του (Κύπρος, Κ. Ιταλία). Τα Δωδεκάνησα αποτελούν ενδιάμεση περίπτωση, με αρκετά καλή διατήρηση του φαινομένου αλλά με την επερχόμενη απειλή της Κοινής ΝΕ για τις νεότερες γενεές.

Ορισμένες γενικές παρουσιάσεις συμπεριλαμβάνουν στην ομάδα των διπλωτικών διαλέκτων και την Καππαδοκική, την Ποντιακή και την Τσακωνική, λόγω του ότι διαθέτουν άηχα κλειστά δασέα σύμφωνα ([p^h t^h k^h]) τα οποία είναι φωνητικώς όμοια με τα «διπλά» άηχα κλειστά ορισμένων διπλωτικών διαλέκτων (π.χ. Κάλυμνος). Πράγματι, αρκετά ιδιώματα της ποντιακής παρουσιάζουν κλειστά δασέα [p^h t^h k^h] ως ελεύθερες παραλλαγές των απλών αήχων κλειστών [p t k], με ενδοδιαλεκτικές διαφοροποιήσεις: άλλοτε μόνο σε λέξεις τουρκικής προελεύσεως (π. χ. [t^hembelts] 'τεμπέλης') και άλλοτε και σε ελληνικής (π.χ. [p^htaman] 'πράγμα'). Διαπιστώνεται επίσης και ποικιλία στην πραγμάτωση, δηλ. η ίδια λέξη μπορεί να εμφανίζεται και με δασύ και άνευ (π.χ. [t^hembelts] ~ [tembelts])⁷. Στην Καππαδοκική τα άηχα κλειστά δασέα εμφανίζονται και πάλι με ενδοδιαλεκτική διαφοροποίηση, κυρίως σε λέξεις τουρκικής προελεύσεως, και κυρίως σε αρκτική θέση (π.χ. [k^hervan] 'καραβάνι'), αν και καταγράφονται περιπτώσεις ελληνικών λέξεων (π.χ. 'λτ'ίνος' 'αληθινός', *δέκ-κα* 'δέκα')· στην Καππαδοκική επίσης καταγράφεται, σε ορισμένα ιδιώματα, σποραδική εμφάνιση διπλών [m n l] αποδιδόμενων και πάλι σε τουρκική επίδραση (π.χ. *εμ-μί* 'θείος', *χαζίλ-λατίζω*)⁸. Τέλος η Τσακωνική χαρακτηρίζεται από συστηματική παρουσία αήχων κλειστών δασέων ως μελών του φωνολογικού συστήματος, που έχουν προκύψει είτε από αρχαία διπλά κλειστά (π.χ. *κόκκος* > [kók^ho]), είτε από αφομοιώσεις συμπλεγμάτων, κυρίως με το [s] (π.χ. *στόμα* > t^huma, *μόσχος* > mok^ho), αν και σε ορισμένες περιπτώσεις εντοπίζεται και δάσυνση απλού κλειστού συμφώνου (π.χ. *ποτέ* >

⁵ Σήμερα πράγματι δεν απαντούν πλέον διπλά (Παπαδοπούλου 2004-2005).

⁶ Για την Φολέγανδρο οι καταγραφές μαρτυρούν μόνο δίπλωση του [l] ~ [ʎ] και του [t] και εκφορά του /z/ ως [dz], π.χ. *λουλ-λούδι*, *πουλ-λιά*, *ούλδη*, *μελόπιτ-τες*, *Λάντζαρος*, *τζάχαρη* (ΧΙΛ 780-[1960]). Για την Κίμωλο, ήδη ο Βογιατζίδης (1925: 115-116) σημειώνει υποχώρηση της διπλωτικής προφοράς, αν και οι καταγραφές από τη δεκαετία του '60 (ΧΙΛ 829-[1963]) σημειώνουν κανονικά τα διπλά σύμφωνα. Για τη Σέριφο οι πληροφορίες αναφέρουν σημαντική υποχώρηση του ιδιώματος (Κοντοσόπουλος 1995), αλλά για τη Σίφνο ακόμα και σχετικά πρόσφατες καταγραφές επισημαίνουν το φαινόμενο (ΧΙΛ 1294-[1989], ΧΙΛ 1414-[2000]).

⁷ Βλ. Χατζησαββίδης (1985: 77-81), Drettas (1997: 52-53, 56).

⁸ Βλ. Ανδριώτης (1948: 26), Κεσίσογλου (1951: 97), Φωστέρης & Κεσίσογλου (1960: 1), Costakis (1964: 15).

[po^he]) (Mirambel 1960: 59-62). Συνεπώς, δεν θα εξετασθούν οι τρεις αυτές διάλεκτοι, εφόσον η παρουσία των διπλών συμφώνων σε αυτές α) είναι περιορισμένη σε υποσύνολο των συμφώνων (άηχα κλειστά και σπανίως έρρινα-υγρά) και β) με την εξαίρεση της τσακωνικής, είναι μη συστηματική, εναλλασσόμενη και οφειλόμενη σε εξωτερικές επιδράσεις.

2.3 Φωνητική πραγμάτωση

2.3.1 Έρρινα σύμφωνα

Πρόκειται για την «απλούστερη» περίπτωση δίπλωσης. Εμφανίζεται ομοιόμορφη σε όλα τα διπλωτικά ιδιώματα, ως παρατεταμένη διάρκεια. Ομοιομορφία παρουσιάζουν επίσης τα περιβάλλοντα εμφάνισης νεωτερικών ερρίνων: δίπλωση εμφανίζεται σε όλα τα ιδιώματα στα ρηματικά παραγωγικά επιθήματα -ώνω και γενικότερα -νω (π.χ. *βκαίνω*, *πιάνω*, *φορτών-νω*, *δίν-νω*, Παντελίδης 1929: 29). Ο Pernot (1907: 406) για την Χίο, ο Τσοπανάκης (1940: 158) για την Ρόδο και ο Κουρούνης (1982:458) για τη Νίσυρο εξαιρούν τα ρήματα σε -αίνω που σχηματίζουν αόριστο σε -να, π.χ. *μαραίνω*, *φαίνω*, *γιαίνω* (< *ύγιαίνω*), *παχαίνω* και ο έλεγχος στα σχετικά λήμματα για τα ιδιώματα της Κάτω Ιταλίας (Καραναστάσης 1984-1992) επιβεβαιώνει την εξαίρεση αυτή, αν και ο Καραναστάσης στη *Γραμματική* (1997: 48) δηλώνει ότι η δίπλωση γίνεται «χωρίς καμία εξαίρεση» στα ρήματα σε -αίνω. Το θέμα απαιτεί ενδελεχέστερη λεξιλογική διερεύνηση και στις λοιπές διπλωτικές διαλέκτους, καθώς θα οδηγήσει σε χρήσιμα συμπεράσματα αναφορικά με το ρόλο της αναλογίας στο φαινόμενο της δίπλωσης. Η μεταλεξική δίπλωση των ερρίνων σε συνεκφορά με ληκτικό [n] αποτελεί επίσης χαρακτηριστικό όλων των υπό εξέταση ιδιωμάτων.

2.3.2 Υγρά

Η δίπλωση του /r/ παρουσιάζει ανομοιομορφία, καθώς υπάρχουν σαφείς μαρτυρίες για κάποιες διαλέκτους ότι δεν διπλώνεται ποτέ ή διπλώνεται σπανιότατα (Κύπρος, Χίος, Νίσυρος βλ. Pernot 1907: 401, Συμεωνίδης 2006: 181, Κουρούνης 1982: 450, 457) ή ότι διπλώνεται μόνο στη συνεκφορά με τελικό [n], δηλ. η δίπλωση είναι μόνο μεταλεξική/συγχρονική (Κάρπαθος, Κίμωλος, Σύμη, Χάλκη, Ρόδος, Καστελλόριζο, Ικαρία, Λιβύσσι: Βογιατζίδης 1925: 116, Tsopanakis 1940: 155, Καραναστάσης 1964: 74, Μηνάς 1970: 69, Χατζιδάκης 1907: 242, Ανδριώτης 1961: 51). Για άλλες διαλέκτους όμως καταγράφεται και λεξική δίπλωση του /r/ (Κως, Κάτω Ιταλία, Κύμη, Κάσος, Τήλος). Παραδείγματα: *σαρρατσηνοί* [sar:atʃini] Κως (Seiler 1958: 214), *χείμαρρος* (Κάλυμν.), *ηρρίζασι* (Κως) (Παντελίδης 1929: 29), *κορριός* (Κύμη, Caratzas 1958: 292).

Η δίπλωση του /l/ είναι ιδιαίτερα ενδιαφέρουσα περίπτωση, καθώς παρουσιάζει την μεγαλύτερη ποικιλία διαλεκτικής διαφοροποίησης. Υπάρχει έντονη τάση για πιο οπίσθια προφορά του /l/, η οποία πραγματώνεται ως: υπερωικό [ɬ] (Κάλυμνος, Σύμη, μέρη της Κω)⁹, διπλή άρθρωση [ld] (Σίφνος, Κίμωλος, Φολέγανδρος, Κως, Κάρπαθος, Κάσος, Λέρος, Τήλος, Ρόδος, Καστελλόριζο)¹⁰, ως διπλή άρθρωση [lt] (Αστυπάλαια, Κάρπαθος, Dieterich 1908: 81, Παντελίδης 1929: 29, Καραναστάσης 1958: 118) ή ως ολοκληρωμένα κλειστή ανακεκαμμένη πραγμάτωση [d:] (Κ. Ιταλία)¹¹. Οι καταγραφές για τα Δωδεκάνησα δείχνουν ότι η πραγμάτωση μπορεί να ποικίλλει ανάμεσα στην «απλή» πλευρική πραγμάτωση [l:] και την πιο οπίσθια. Η ποικιλότητα δεν εξαρτάται από το φωνητικό περιβάλλον· ίσως οφείλεται σε υποχώρηση της παλαιότερης, πλέον αποκλίνουσας προφοράς. Επίσης αξιοσημείωτο είναι ότι τα ιδιώματα διαφέρουν ως προς το κατά πόσον η οπίσθια προφορά προκύπτει μεταλεξικά, δηλ. ως αποτέλεσμα αφομοίωσης στη συνεκφορά. Έτσι, στην Κ. Ιταλία το ανακεκαμμένο [d:] και στη Ρόδο το [ld] υπάρχει μόνο ενδολεξικά (Katsoyannou 1995: 119, Tsopanakis 1940: 157), ενώ το αποτέλεσμα της συνεκφοράς είναι [l:]· αντίθετα στην Αστυπάλαια το [lt] και στην Κάρπαθο το [ld] προκύπτει και από συνεκφορά (π.χ. *την λάμπα* > *τηλ δάμπα* Μηνάς 1970: 3, Καραναστάσης 1958: 118).

⁹ Μαμαλίγκα (1994: 98), Κοντοσόπουλος (1998: 167).

¹⁰ Δεν είναι σαφές από τις καταγραφές αν υπάρχει κάποια διαφορά διάρκειας μεταξύ των φθόγγων που συμβολίζονται ως <ld, ʎd> και ως <lld, ʎ-ʎd>, αλλά είναι μάλλον απίθανο.

¹¹ Rohlf's (1972: 70-72), Katsoyannou (1995: 119-120).

2.3.3 Άηχα κλειστά

Τα άηχα κλειστά αποτελούν την πλέον πολύπλοκη κατηγορία διπλών συμφώνων, καθώς η πραγμάτωσή τους συνήθως συνοδεύεται από δασύτητα ή προστριβοποίηση, και ποικίλλει ως προς την διάρκεια επιμήκυνσης του κλειστού (Caratzas 1958: 81). Δυστυχώς φωνητικές μελέτες των δασέων κλειστών, συνοδευόμενες από ενόργανες μετρήσεις, υπάρχουν μόνον για την Κύπρο (Arvaniti 2010, Armosti 2011 όπου και προγενέστερη βιβλιογραφία) και την Κάλυμνο (Καρδιόλακα 1984-85, 1992), και εν μέρει τα διαγράμματα του Pernot (1907: 384-389) για την Χίο. Οι μετρήσεις δείχνουν διαφορά πραγματώσεως στην Κύπρο (επιμήκυνση του κλειστού, Armosti 2011) και στην Κάλυμνο και τη Χίο (μη επιμήκυνση, Pernot 1907: 409-415). Οι παλαιότερες περιγραφές είναι άκρως ασαφείς, και δεν είναι δυνατόν να διαπιστωθεί εάν αντιλαμβάνονται επιμήκυνση του κλειστού συμφώνου ως επιπλέον χαρακτηριστικό (κάτι τέτοιο είναι πιθανό π.χ. για τη Ρόδο και τη Σύμη, Tsopanakis 1940: 158-159) ή προσλαμβάνουν τα διπλά κλειστά ως απλά άηχα δασέα. Μεγαλύτερο πρόβλημα προκύπτει από τις περιγραφές που εντοπίζουν προστριβοποίηση των αήχων κλειστών δασέων σε ομοργανικά συμπλέγματα [p^f], [t^θ], [k^x] (Σέριφος, Σίφνος, Αστυπάλαια, Κάλυμνος, Σύμη, Νίσυρος, βλ. Παντελίδης 1929: 28, Πούλος 1939: 145, Καραναστάσης 1958: 117, Δράκος 1982: 42, Κουρούνης 1982: 450-451). Ειδικά για το [k^x], επειδή η άρθρωση του υπερωϊκού [x] με το γλωττιδικό [h] είναι πολύ κοντινή, δεν θεωρούμε ότι υφίσταται πραγματική διαφορά στην πραγμάτωση. Κάποιοι μελετητές, π.χ. Newton (1972: 91) αμφιβάλλουν για την ύπαρξη τέτοιων ομοργανικών προστριβών, και πράγματι οι γραπτές πηγές εμφανίζουν ποικιλότητα στην καταγραφή (<π'>, <π-π'>, <ππ> και <πφ>), χωρίς να είναι σαφές εάν αυτό οφείλεται σε πραγματική διαφοροποίηση της εκφοράς. Παράδειγμα χαρακτηριστικό η Νίσυρος, για την οποία η παλαιότερη βιβλιογραφία καταγράφει, πάντοτε με μη παγιωμένη φωνητική ορολογία, πέντε διαφορετικές πραγματώσεις του διπλού [p], δηλαδή: [p^f p^f: p^h p^h: p:] (Tsopanakis 1940: 160, Seiler 1958: 213, Κουρούνης 1982: 451).

Σε ορισμένες περιπτώσεις η σύγχρονη επιτόπια έρευνα δίνει απαντήσεις, δημιουργώντας όμως ταυτόχρονα και νέα ερωτήματα. Αυτή είναι π.χ. η περίπτωση της Καλύμνου, η οποία καταγράφεται ομόφωνα στην παλαιότερη βιβλιογραφία ως διαθέτουσα προστριβή [p^f], [t^θ], [k^x]. Η πλέον πρόσφατη αποστολή του ΙΑΝΕ στην Κάλυμνο (ΧΙΑ 1489-[2011]) κατέδειξε με πλούσιο ηχογραφημένο υλικό ότι η πραγμάτωση [t^θ] πράγματι υφίσταται, σε εναλλαγή όμως με την απλή δασεία εκφορά [t^h], ενώ πραγματώσεις [p^f], [k^x] δεν εντοπίστηκαν (αυτό είχε διαπιστώσει και η φωνητική μελέτη της Καρδιόλακα 1992). Είναι αξιοπερίεργο μάλιστα ότι ο Ν. Δράκος, ο συγγραφέας του λεξικού του ιδιώματος (Δράκος 1982) γράφει πάντοτε <πφ τθ κχ>, αλλά ο ίδιος ως πληροφορητής σε ηχογράφηση της Καρδιόλακα (Cardiolacas 1984-85) προφέρει [p^h k^h t^θ]. Και εδώ τίθεται το ερώτημα εάν οι καταγραφές <πφ κχ> αντικατοπτρίζουν παλαιότερο στάδιο εκφοράς το οποίο δεν υφίσταται πλέον, ή εάν εξαρχής η υπόθεση περί [p^f], [k^x] ήταν εσφαλμένη κατ' αναλογία του όντως υπαρκτού [t^θ], λόγω ανεπάρκειας των δυνατοτήτων φωνητικής καταγραφής του περασμένου αιώνα. Η καταγραφή της εκφοράς αυτής σε σύγχρονες περιγραφές της διαλέκτου συχνά δεν αποτελεί παρά επανάληψη της παλαιότερης βιβλιογραφίας, λόγω του κύρους των παλαιών ερευνητών.

Παρόμοιος προβληματισμός μπορεί να διατυπωθεί για τα ιδιώματα της Κ. Ιταλίας. Οι ειδικές φωνητικές μελέτες σημειώνουν πάντοτε δασύτητα στα διπλά άηχα κλειστά για την Καλαβρία (Katsoyannou 1995: 101) αλλά όχι για την Απουλία (Profili 1984, Romano 2011)· στο Λεξικό όμως των ιδιωμάτων της Κ. Ιταλίας (Καραναστάσης (1984-1992)) η δασύτητα σημειώνεται ασυνεπώς σε τύπους και των δύο ιδιωμάτων, και μάλιστα σε λέξεις της ίδιας οικογένειας από τον ίδιο τόπο.

Ποικιλότητα όσον αφορά τα άηχα κλειστά εντοπίζεται και στα φωνητικά περιβάλλοντα που προκαλούν την εμφάνισή τους. Σε ορισμένες περιοχές διπλά άηχα κλειστά συνοδευόμενα από δασύτητα εμφανίζονται και προ υγρών ([pr], [tr], [kl] κλπ – Κάσος, Τήλος, Χάλκη, Πάτμος, βλ. Τσοπανάκης 1949: 40-42, Καραναστάσης 1956: 214) ενώ σε άλλες εμφανίζονται και από αφομοίωση τελικού [n] και τελικού [s] (Κάσος, Νίσυρος, Απουλία, Μηνάς (1987[2004]: 325-326, Rohlf 1977: 40-42, 48).

2.3.4 Ηχηρά κλειστά

Η κατηγορία αυτή συμφώνων δεν εμφανίζεται ποτέ με δίπλωση (Pernot 1907: 390), εκτός από την Καλαβρία, όπου προκύπτει από αφομοίωση συμπλεγμάτων και από συνεκφορά του ληκτικού [s] με ακόλουθα ηχηρά διαρκή, π.χ. *rad-di* 'ραβδί', *te ddixaterendu* 'τες θυγατέρες του' (Rohlf 1977: 25, 49). Επίσης μαρτυρείται σε ένα ιδίωμα της Ρόδου από πλήρη αφομοίωση ερρίνου (π.χ. *θαμπός* > *θαbbός*, Tsopanakis 1940: 131). Μαρτυρίες υπάρχουν και για το ιδίωμα Κύμης από συνεκφορά, αλλά δεν είναι

δυνατόν πλέον να ελεγχθούν εφόσον το ιδίωμα έχει σιγήσει (π.χ. στη *Ggούμη*, *τούτον ddon bbeθαμένο*, ΧΙΛ 501-[1931]).

2.3.5 Συριστικά

Το /z/ αποτελεί ιδιάζουσα περίπτωση διπλώσεως, καθώς σε αρκετές διπλωτικές διαλέκτους απαντά πάντοτε ως διπλό, χωρίς να υπάρχει αντίστοιχο απλό (π.χ. Κύπρος, Κάλυμνος, Ρόδος, Κύμη, Tsorpanakis 1940: 161, Caratzas 1958: 292, Arvaniti 1999: 174). Το ηχητικό υλικό δείχνει ότι σε ορισμένες περιοχές η εκτεταμένη διάρκεια δεν είναι το μόνο διαφοροποιητικό χαρακτηριστικό του /z/ σε σχέση με αυτό της ΚΝΕ, αλλά πρόκειται επιπλέον και για διαφορετικό τόπο αρθρώσεως (πιο πρόσθιο, [z:] ή [z̥:] – Κάλυμνος, ΧΙΛ 1489-[2011]). Σε άλλες περιοχές, η δίπλωση του /z/ αντιστοιχεί σε προστριβοποίηση σε [dz] ή [ndz] (π.χ. Κ. Ιταλία, Χίος, Λέρος, Πάτμος, Σίφνος, Σύμη, Dieterich 1908: 58, Παντελίδης 1929: 41, Πούλος 1939: 146-148). Θα πρέπει να επισημανθεί η διαφορά, σε ορισμένες διαλέκτους, μεταξύ ενδολεξικής δίπλωσης του /z/ σε [(n)dz] και μεταλεξικής δίπλωσης από συνεκφορά αρκτικού /z/ σε [z:], π.χ. *αγοράντζω*, *μαντζί αλλά τηζ ζωή*, *έ ζ-ζυμών-νει* (Αστυπάλαια, Καραναστάσης 1958: 120-121).

Το /s/ σε περίπτωση διπλώσεως μπορεί επίσης να πραγματωθεί ως απλώς επιμηκυτό /s:/, ως επιμηκυτό και προσθιωμένο (Κάλυμνος, Λιβύσσι, Μεγίστη, Ικαρία), αλλά και ως προστριβές /ts/ (π.χ. Σίφνος, Αστυπάλαια, Λέρος, Πάτμος, Παντελίδης 1929: 42, Καραναστάσης 1958: 118). Μόνον ο Seiler σημειώνει δασύτητα ως συνοδευτικό χαρακτηριστικό του διπλού [s:] στην Ρόδο, την Κω και τη Νίσυρο (1958: 214), κάτι τέτοιο όμως πρέπει να ελεγχθεί εργαστηριακά. Ορισμένες διάλεκτοι διαθέτουν και ουρανοφανιακό συριστικό [ʃ], το οποίο είναι δυνατόν να υποστεί δίπλωση (κυρίως προκύπτει από αφομοίωση του συμπλέγματος [sk], π.χ. Κύπρος, Ρόδος, Κ. Ιταλία).

2.3.6 Άηχα διαρκή

Μεγάλη ποικιλότητα επικρατεί στην πραγμάτωση του διπλού οδοντικού /θ/, καθώς σε ορισμένες περιοχές καταγράφονται τέσσερις ή και πέντε διαφορετικές πραγματώσεις: διπλό [θ:], διπλό [t:], προστριβές [t^θ], ή απλώς δασύ [t^h] (Κάλυμνος, Νίσυρος, Χίος, Καστελλόριζο, Σύμη) οι οποίες άλλοτε οφείλονται σε διαφορετικά υπο-ιδιώματα¹² και άλλοτε σε ποικιλότητα εντός του ίδιου υπο-ιδιώματος (Κάλυμνος). Διαφοροποίηση επίσης είναι δυνατόν να υφίσταται μεταξύ λεξικής δίπλωσης σε [t^θ] στο εσωτερικό της λέξης και μεταλεξικής δίπλωσης σε [θ:] από συνεκφορά, π.χ. *ξαπθός αλλά έθ θέλω* (Νίσυρος, Κουρούνης 1982: 451), ενώ σε άλλα ιδιώματα η πραγμάτωση [t^θ] εμφανίζεται σε όλα τα περιβάλλοντα, π.χ. *τη θάλασσα* (Αστυπάλαια, Καραναστάσης 1958: 117-118).

Το [f] πραγματώνεται παντού ως απλώς επιμηκυτό, και υπάρχει μόνον η μαρτυρία του Seiler (1958: 214) για συνοδεία δασύτητας στην Ρόδο, τη Νίσυρο και την Κω, κάτι που δεν έχει ως τώρα διαπιστωθεί από άλλους. Και του [x] η εκφορά είναι παντού ομοιόμορφη, ως απλή επιμήκυνση, με πιθανότητα τροπής σε κλειστό δασύ [k^h] στην Χίο και τη Νίσυρο (Pernot 1907: 409).

2.3.7 Ηχηρά διαρκή

Τα [v ð γ] ως διπλά έχουν μικρή συχνότητα εμφάνισης διότι σε πολλά διπλωτικά ιδιώματα π.χ. Δωδεκάνησα, Κύπρος, Χίος, Ικαρία, τα μεσοφωνηεντικά ηχηρά διαρκή αποβάλλονται (Παντελίδης 1929: 31-32) και άρα δεν μπορούν να υποστούν νεωτερική δίπλωση (σε μεσοφωνηεντική θέση λόγω τόνου). Αυτό αποτελεί εμμέσως ένδειξη για τη χρονολόγηση της διπλώσεως αυτής, καθώς εαν τα σύμφωνα αυτά είχαν διπλωθεί πρώιμα, η αποβολή τους θα ήταν δύσκολη λόγω ισχυρής προφοράς. Επιπλέον, τα ηχηρά διαρκή κανονικά δεν μπορούν να υποστούν αφομοίωση με προηγούμενο έρρινο, όπως τα αντίστοιχα άηχα (*νύμφη* > *νύφφη*) καθώς η ομαλή εξέλιξη της νεότερης ελληνικής θα οδηγούσε σε αυτές τις περιπτώσεις σε διατήρηση της αρχαίας κλειστής προφοράς [b d g] (*κίνδυνος* > *κίντυνος* και όχι *κίδδυνος*). Παραταύτα δίπλωση από αφομοίωση εμφανίζεται σε ορισμένα ιδιώματα ενδολεξικά (*συββουλή*, *εββόλιο*, *εδδειχτικό*, *σύδδεσμος*-Ρόδος, Καστελλόριζο, Κάρπαθος, Νίσυρος, Tsorpanakis 1940: 126, Μηνάς 1970: 73,

¹² Βλ. π.χ. την ενδο-διαλεκτική διαφοροποίηση στην Κύπρο όπως καταγράφεται στον ισογλωσσικό χάρτη του Κοντοσόπουλου (1970: 109).

Κουρούνης 1982: 448). Οι περιπτώσεις αυτές πρέπει να ερμηνευθούν ως λόγιες λέξεις που εισήλθαν στο ιδίωμα με την κοινή προφορά τους (*συμβουλή*, *ενδεικτικό* κλπ.) και υπέστησαν κατόπιν αφομοίωση αντίστοιχη με των αήχων τριβομένων- και πάλι δηλαδή πρόκειται για ένα φαινόμενο πρόσφατο. Η αφομοίωση σε συνεκφορά (π.χ. *ένα β-βασιλιά*, *το δ-δάσκαλο*) είναι το μόνο περιβάλλον όπου υπάρχει κανονικότητα. Η πραγμάτωση των ηχηρών τριβομένων είναι όμοια παντού, ως απλή επιμήκυνση.

3. Ιστορική θεώρηση

Το ερώτημα «από πότε υπάρχουν διπλά σύμφωνα» δεν μπορεί να απαντηθεί, εφόσον η διατήρηση των διπλών συμφώνων αποτελεί ως ένα βαθμό αρχαϊσμό, δηλ. διατήρηση ενός χαρακτηριστικού της Αρχαίας Ελληνικής, το οποίο για τις υπόλοιπες περιοχές του ελληνόφωνου χώρου θα πρέπει να είχε απολεσθεί ως τον 3^ο αι. μ.Χ.¹³. Διατήρηση διπλών στις θέσεις που υπήρχε ιστορικά στην ΑΕ δεν μπορεί να τεκμηριωθεί γραφηματικά, καθώς η ιστορική ορθογραφία αποκρύπτει την γλωσσική εξέλιξη. Η «ορθή», διπλή, γραφή των ιστορικών διπλών θα μπορούσε απλώς να είναι συμβατική, και να μην αντιστοιχεί στην φωνητική πραγματικότητα. Ο Καρατζάς (1958) προσπάθησε εξετάζοντας τις χριστιανικές επιγραφές της Κ. Ιταλίας να αποδείξει ότι εκεί δεν απαντά η απλή γραφή των διπλών συμφώνων, κάτι που θα υπεδείκνυε ότι το φαινόμενο της απώλειας των διπλών δεν συνέβη ποτέ στην συγκεκριμένη περιοχή. Όμως, πέραν του ότι ο αριθμός των επιγραφών αυτών είναι ελάχιστος και του ότι εν τω μεταξύ έχουν ευρεθεί αρκετές ακόμη, οι οποίες δεν έχουν εξετασθεί από τον Καρατζά (βλ. π.χ. Guillou 1996), η απουσία απλογραφίας των διπλών συμφώνων στις επιγραφές αποτελεί και πάλι μόνο ένδειξη και όχι απόδειξη. Δυστυχώς αντίστοιχο εγχείρημα με του Καρατζά δεν επαναλήφθηκε για άλλη διπλωτική περιοχή, δηλ. δεν έχει συγκεντρωθεί και αναλυθεί το επιγραφικό υλικό της μεσαιωνικής περιόδου από γλωσσολογικής απόψεως, ούτε γενικότερα ούτε ειδικότερα ως προς το θέμα των διπλών συμφώνων.

Αυτή η έλλειψη έρευνας στην κρίσιμη περίοδο των σκοτεινών αιώνων δυσχεραίνει και την χρονολόγηση της εμφανίσεως των νεωτερικών διπλών, δηλ. αυτών που οφείλονται σε αφομοίωση ή ένταση του τόνου. Κατ' αρχάς, η εμφάνιση μη ιστορικών διπλών σε γραπτές πηγές δεν συνεπάγεται αναγκαστικά διπλωτική προφορά· μπορεί να πρόκειται απλώς για ορθογραφικά λάθη ομιλητών που δεν διαθέτουν διπλά στο φωνολογικό τους σύστημα αλλά γνωρίζουν αμυδρά ότι η ελληνική ορθογραφία απαιτεί την διπλή γραφή κάποιων συμφώνων. Για να θεωρηθεί η διπλή γραφή ένδειξη διπλωτικής προφοράς θα πρέπει να εμφανίζει κάποια συστηματικότητα και κανονικότητα, δηλ. να απαντά σταθερά σε μορφολογικά περιβάλλοντα που είναι γνωστό από τις σημερινές διπλωτικές διαλέκτους ότι η δίπλωση είναι αυτόματα (π.χ. στις ρηματικές καταλήξεις *-αίνω*, *-ώνω*, στα παραθετικά *-τερος*) ή να απαντά σε περιβάλλοντα που θα ήταν αδιανόητη για την ιστορική ορθογραφία, π.χ. σε αρκτική θέση. Επιπλέον, θα πρέπει να απαντά με σχετική συχνότητα σε λέξεις που είναι γνωστό από τις σημερινές διπλωτικές διαλέκτους ότι πράγματι εκφέρονται διπλά.

Για τους σκοτεινούς αιώνες μέχρι περίπου τον 11^ο δεν έχουμε πληροφορίες για τέτοιες νεωτερικές διπλώσεις· δυσχεραίνει σε αυτό, όπως προαναφέρθηκε, και η έλλειψη έρευνας των επιγραφών, οι οποίες όμως ούτως ή άλλως είναι ολιγάριθμες και απομακρυσμένες από την καθημερινή γλώσσα. Από τον 11^ο αι. και εξής σαφείς πληροφορίες για διπλωτική προφορά (αφομοίωση εντός λέξεως και σε συνεκφορά, νεωτερικά διπλά υπό την επίδραση του τόνου σε πάγιες μορφολογικές θέσεις) διαθέτουμε από την Κ. Ιταλία (βλ. και Μηνάς 1994: 69)¹⁴.

τὴν λλέπραν (έτους 1076) Guillou (1963: 46)

καταναίνει εις στράτα καὶ κλήννει (έτους 1092) Trinchera (1865: 71)

τῆς Καθθοῦσα (έτους 1053) Trinchera (1865: 50)

ἔσσω (έτους 1146) Cusa (1868: 618)

¹³ Ο Mayser (1923: 211-219) δίνει παραδείγματα από τους πολεμαϊκούς παπύρους ήδη από τον 3ο αι. π.Χ. παρατηρώντας ότι το φαινόμενο είναι συχνότερο στα διαρκή [m n l r s] και σπανιότερο στα κλειστά [p t k]. Ο Gignac (1976: 154-146) δίνει παραδείγματα για όλα τα σύμφωνα, από τον 1ο μ.Χ. αι. Οι αττικές επιγραφές και όστρακα εμφανίζουν απλογραφία των διπλών συμφώνων ήδη από την αρχαϊκή εποχή (6ος αι. π.Χ.), ως απλή γραφηματική σύμβαση ανεξάρτητη από τη φωνολογία της διαλέκτου (Threatte 1980: 511), γεγονός που καθιστά δυσχερή την διερεύνηση του φαινομένου προ της ελληνιστικής περιόδου.

¹⁴ Τα δεδομένα από τον 11ο ως τον 17ο αι. συγκεντρώθηκαν με τη βοήθεια της βάσης δεδομένων του ερευνητικού προγράμματος Grammar of Medieval Greek του Πανεπιστημίου Cambridge (βλ. σχετικά <http://www.mml.cam.ac.uk/greek/grammarofmedievalgreek/>).

Για την Κύπρο οι τέτοιου τύπου μαρτυρίες ξεκινούν από τον 14ο αιώνα, παρά το γεγονός ότι και προγενέστερα έργα έχουν χαρακτηριστεί κυπριακά: σε αυτά δεν απαντά το φαινόμενο. Στην κυπριακή διαλεκτική γραμματεία (Μαχαιράς, Βουστρώνιος κλπ) το φαινόμενο απαντά με κανονικότητα:

λαμβάνει παρκάτω (έτους περ. 1300) Simon (1973: 31)
τοῦ ρρὲ Οὐγκου (έτους περ. 1306) Constantinides και Browning (1993: 172)
εἰς το νησσίν (έτους 1326) Darrouzes (1953: 93)
ἔππεσεν Μαχ. 66.32
τῆς πεθερᾶς Μαχ. 403.36
εἰς κουφοῦ πόρταν ἔσυντύχανεν Μαχ. 44.16-17
ποττέ Βουστρ. Α 14.8

Για τα Δωδεκάνησα υπάρχουν μαρτυρίες από τον 15^ο αι και εξής (μόνο για τη Ρόδο, την Κω και την Πάτμο), ενώ για την Χίο από τον 17^ο (βλ. και Pernot 1905: 250 υποσημ. 2):

ὁσηταλλ(ίου) (έτους 1487, Ρόδος) Lefort (1981: 66)
τὸ νησσην τῆς ρόδου (έτους 1493, Ρόδος) Τσοπανάκης (1970: 55)
ἰστηλὲμ με το Νικόλα (έτους 1638, Πάτμος) Στεφανίδου (1996: 403)
ρεάλλια (έτους 1638, Πάτμος) Στεφανίδου (1996: 403)
ἄρνιττα (έτους 1684, Ρόδος) < τοπων. Ἀρνίθ-θα Παπαχριστοδοῦλου (1976: 3)
ἡσματοπόλλα (έτους 1705, Κως) Καμμάς (1974: 136)
σσεπάρνιν (έτους 1678, Χίος) Κανελλάκης (1890: 453)

Για τις Κυκλάδες οι δημοσιευμένες ως τώρα γραπτές πηγές από τα νησιά με διπλωτικά ιδιώματα (Σίφνο, Φολέγανδρο, Σέριφο, Αμοργό), όπως και για την Ικαρία δεν περιέχουν το φαινόμενο. Αυτό οφείλεται τόσο στον μικρό αριθμό των πηγών από τις συγκεκριμένες περιοχές όσο και στην ποιότητα των εκδόσεων, οι οποίες έχουν συνήθως εξομαλυσμένη ορθογραφία. Για όλες τις περιοχές βέβαια η χρονολογία αφορά τη στιγμή από την οποία εμφανίζονται πηγές γραμμένες σε αυτό το ιδίωμα, δηλ. δεν αποκλείεται (ή μάλλον είναι αρκετά πιθανό) το φαινόμενο να υπήρχε και νωρίτερα. Για ορισμένες περιοχές δεν υπάρχουν καθόλου γραπτές μαρτυρίες προγενεστέρων περιόδων (Λιβύσσι, Αλικαρνασός, Κύμη). Σημειωτέον επίσης ότι δεν μαρτυρούνται εξίσου όλα τα διπλωτικά φαινόμενα: η δίπλωση των ερρίνων και υγρών είναι επαρκώς μαρτυρημένη (όχι όμως για το [r]), ενώ από τα άηχα τριβόμενα επαρκείς μαρτυρίες υπάρχουν για το [θ], κυρίως λόγω της παρουσίας του σε ρηματικές καταλήξεις, και λιγότερο για τα [x] και [f]. Τα άηχα κλειστά μαρτυρούνται σχετικά καλά, αλλά χωρίς το φαινόμενο της δάσυνσης, για το οποίο έχουμε σαφείς γραφηματικές μαρτυρίες μόνο από τον 18^ο αι.¹⁵, π.χ. *παγκίρι* ‘μπακίρι’ (1796, Σύμη, Καρανικόλας 1974: 136), *γκελίμι κόγκινο* ‘κίλιμι κόκκινο’ (1796, Σύμη, Καρανικόλας 1974: 136).

Τα ηχηρά διαρκή [v ð γ] επίσης μαρτυρούνται πολύ σπάνια, ενώ ανομοιοτικές διπλώσεις του τύπου [ld], [lt] [pf], [tθ] δεν μαρτυρούνται πριν τις καταγραφές του 19^{ου} αι.

Όσον αφορά στην υποχώρηση του φαινομένου των διπλών συμφώνων, η διερεύνηση του πρωτογενούς υλικού επιτρέπει τις εξής παρατηρήσεις: το φαινόμενο δεν υποχωρεί συνολικά, δηλ. δεν εξαφανίζεται η δυνατότητα διπλώσεως από το φωνολογικό σύστημα, αλλά σταδιακά, ανά κατηγορίες συμφώνων. Την ισχυρότερη αντίσταση προβάλλουν τα έρρινα, το [l] και το [z], τα οποία είναι αισθητά ακόμα και στο λόγο ομιλητών που σκοπίμως προσπαθούν να αποβάλουν το ιδίωμα. Αντίθετα, πρώτα χάνονται τα [v ð γ], τα οποία ούτως ή άλλως είναι σπάνια και προκύπτουν μόνο μεταλεξικά.

4. Συμπεράσματα

Δεν ήταν δυνατόν στα σύντομα πλαίσια της παρούσας μελέτης να εκτεθούν αναλυτικά τα αποτελέσματα της έρευνας για ένα τόσο ευρύ θέμα. Πιστεύουμε όμως ότι καταδείξαμε ότι μια τέτοια έρευνα είναι και δυνατή και απαραίτητη. Στην παρούσα εργασία δίδονται για πρώτη φορά συγκεντρωτικά και συγκριτικά δεδομένα για το φαινόμενο των διπλών συμφώνων, βασισμένα σε μεγάλο εύρος πηγών και με την πληρέστερη δυνατή αξιοποίηση της δευτερογενούς βιβλιογραφίας. Σημαντικά επιμέρους νέα στοιχεία που

¹⁵ Κακός ο Μηνάς (2004: 244) θεωρεί την λατινική μεταγραφή *Cachos Jalos* (Κακός Γιαλός) σε ροδιακό έγγραφο του 15^{ου} αι. ως πρώιμη ένδειξη του φαινομένου, καθώς α) η λ. *κακός* δεν παρουσιάζει νεότερη διπλωση στα υπό εξέταση ιδιώματα και β) η γραφή <ch> αντί απλού <c> με την αξία [k] είναι σύνηθες φαινόμενο για τις λατινικές μεταγραφές της εποχής, βλ. π.χ. Καραντζόλα (2005: 271).

προέκυψαν είναι τα εξής: η παρουσία διπλών συμφώνων στην Πάτμο, η επισήμανση της δυνατότητας διαφορετικής πραγμάτωσης των λεξικών από τα μεταλεξικά διπλά, η επισήμανση της προσθιότερης πραγμάτωσης των διπλών συριστικών συμφώνων και ο μη διπλασιασμός του [n] σε μια υποκατηγορία των ρημάτων σε -αίνω.

Καταλήγουμε τονίζοντας την μεγάλη ανάγκη εντατικοποίησης της επιτόπιας έρευνας και αξιόπιστης φωνητικής καταγραφής των ιδιωμάτων, όσο κάτι τέτοιο είναι ακόμα δυνατόν. Σε μελλοντικό χρόνο η έρευνα θα πρέπει να υπεισέλθει και στο ζήτημα του κατά πόσον η δίπλωση εμφανίζεται στις ίδιες λέξεις και στο ίδιο σημείο της λέξεως σε όλες τις διπλωτικές περιοχές. Εδώ η συνεισφορά του *Ιστορικού Λεξικού* αναμένεται να είναι σημαντική, αφού το διαλεκτικό υλικό είναι κατατεταγμένο λεξιλογικά, και καταγράφεται η κατά τόπους πραγμάτωση όλων των λέξεων.

ABSTRACT

In phraseological theory it is customary to draw a distinction between semantic and pragmatic phrasemes (Cowie, 1998, 2001, 2006· Mel'čuk, 1998· Baranov & Dobrovolskij, 2003 etc.). This paper focuses on pragmatic phrasemes: first we consider some difficulties and problems that occur within the established classes and types. Then an attempt to revisit the general categorization has been made. We suggest that the divisions should be explicitly based on the communicative function of pragmatic phrasemes.

Λέξεις κλειδιά: πραγματολογικοί φρασεολογισμοί, συνομιλιακές φόρμουλες, φόρμουλες ρουτίνας, προσλεκτικές φόρμουλες, φόρμουλες-σχόλια

1. Εισαγωγικά

Μια από τις πιο γνωστές και αποδεκτές διακρίσεις των φρασεολογισμών (phrasemes, phraseologisms, phraseological units, set phrases, fixed expressions κ.ά.) είναι αυτή στην οποία αναγνωρίζεται μια αρχική διαίρεσή τους σε *σημασιολογικούς* και *πραγματολογικούς φρασεολογισμούς* (Cowie 1998, 2006· Mel'čuk, 1998· Gläser, 1998 κ.ά.). Η ορολογία που υιοθετείται δεν είναι ομοιογενής, λ.χ. οι σημασιολογικοί φρασεολογισμοί αναφέρονται ως *semantic phrasemes* (Mel'čuk, 1998), ως *nominations* (Gläser, 1998), ή *semantic combinations/ composites* (Cowie, 1998). Παρά τις διαφορές στη χρήση της ορολογίας, παρατηρείται μια γενική αποδοχή ως προς τον ορισμό του περιεχομένου των δύο παραπάνω κατηγοριών. Κατά τον Cowie και μια μεγάλη ομάδα λεξικολόγων οι φρασεολογισμοί (ΦΡ) μπορούν να χωριστούν σε δύο ομάδες: στη μία – αυτή των σημασιολογικών φρασεολογισμών (ΣΦ) – εντάσσονται «...ενότητες που μοιάζουν με λέξεις (“word-like units”: Cowie, 1998: 4) οι οποίες λειτουργούν συντακτικά στο επίπεδο της απλής πρότασης ή και κάτω από αυτό ως κατηγορήματα, ονοματικές ή επιρρηματικές φράσεις, συνεισφέροντας στη δηλωτική / περιγραφική σημασία»¹ [μτφ. από τη συγγραφέα]. Στην άλλη ομάδα –αυτή των πραγματολογικών φρασεολογισμών (ΠΦ) – εντάσσονται «...ενότητες που μοιάζουν με προτάσεις (“sentence-like units”: Cowie, 1998: 4) οι οποίες λειτουργούν στο επίπεδο της πρότασης ως παροιμίες, συνθήματα και σλόγκαν»² [μτφ. από τη συγγραφέα]. Σημειώνουμε ότι οι παραπάνω διακρίσεις, καθώς και οι υποκατηγοριοποιήσεις –κυρίως για την ομάδα των σημασιολογικών φρασεολογισμών– είναι επηρεασμένες σημαντικά από τις απόψεις της ρωσικής φρασεολογικής παράδοσης (π.χ. Vinogradov, 1947).

Το μεγαλύτερο μέρος της μελέτης των φρασεολογισμών αφορά την κατηγορία των σημασιολογικών φρασεολογισμών. Οι περισσότεροι λεξικολόγοι αποδέχονται τη βασική κατηγοριοποίησή τους σε *ιδιωτισμούς* και *δεσμευμένες/περιορισμένες συμπαραθέσεις* (ή *συνάψεις*) (*idioms – restricted collocations*)³. Οι ιδιωτισμοί είναι παγιωμένες εκφράσεις που χαρακτηρίζονται από σημασιολογική αδιαφάνεια υψηλού βαθμού (δεν επιδέχονται σημασιακή ανάλυση / δεν έχουν αθροιστική σημασία) και ανελευθερία ως προς το συνδυασμό των συστατικών τους (μορφική σταθερότητα), π.χ. *έφαγα χυλόπιτα*. Στις δεσμευμένες συμπαραθέσεις, που αποτελούν λίγο πολύ παγιωμένους συνδυασμούς λέξεων, δε χάνεται η σημασιακή αυτονομία των συστατικών και η

¹ “...semantic combinations, which function syntactically at or below the level of the simple sentence – as predicates, noun phrases, propositional phrases and the like – and contribute to their referential meaning” (Cowie, 2001: 1; Cowie, 2006: 583).

² “...pragmatic combinations, which operate sententially as proverbs, catchphrases and slogans” (Cowie, 2001: 1; Cowie, 2006: 583).

³ Η αρχική διάκριση ανάγεται στους Bally (1921) και Vinogradov (1942).

σταθερότητα της μορφής είναι χαλαρή. Ο όρος καλύπτει πολλές διαφορετικές περιπτώσεις ως ένα μόνο βαθμό σταθερών λεξικών συνδυασμών, όπου συνήθως ένα συστατικό έχει ιδιωματική / μεταφορική σημασία, η οποία εμφανίζεται ως τέτοια μόνο με την συνεμφάνιση και των άλλων συστατικών του συνδυασμού, π.χ. *δίνω προσοχή, παίρνω θέση*. Επιπλέον, πολλοί μελετητές όπως οι Howarth (1996) και Cowie (1998) κάνουν τη διαφοροποίηση ανάμεσα σε *καθαυτό ιδιωτισμούς* (pure idioms) και *μεταφορικούς ιδιωτισμούς* (figurative idioms). Στους μεταφορικούς ιδιωτισμούς, παρά την ιδιωματικότητα της σημασίας, όταν δηλ. η τελική σημασία δεν μπορεί να εξαχθεί από τη σύνθεση των σημασιών των συστατικών, και παρά την ανελευθερία του συνδυασμού τους, διακρίνεται μια μεταφορική βάση που μπορεί μερικώς να αιτιολογήσει τη σημασία του λεξικού συνόλου. Η σημασία αυτή είναι ως ένα βαθμό εξαγωγή από τις κυριολεκτικές σημασίες (παραδείγματα μεταφορικών ιδιωτισμών αποτελούν οι εκφράσεις *με παίρνει από κάτω, ανάβω και κορώνω* – σε αντίθεση με τις εκφράσεις *πιάνω στα πράσα, μου τη δίνει* οι οποίες αποτελούν καθαυτό ιδιωτισμούς όπου ο δεσμός ανάμεσα στο κυριολεκτικό και το μη κυριολεκτικό έχει χαθεί). Η διάκριση είχε πραγματοποιηθεί ήδη από τον Vinogradov (1942) ο οποίος είχε προτείνει το διαχωρισμό σε *φρασεολογικές συμφύσεις* (καθαυτό φρασεολογισμοί) και *φρασεολογικές ενότητες* (εν μέρει αιτιολογημένοι φρασεολογισμοί), οι οποίες αντιπαρατίθενται με μια τρίτη κατηγορία, αυτή των *φρασεολογικών συνδυασμών* (συμπαραθέσεις). Φυσικά, έχει επανειλημμένα επισημανθεί ότι οι παραπάνω διακρίσεις αποτελούν ζήτημα διαβάθμισης χωρίς να υπάρχουν σαφή όρια. Δε θα αναφερθούμε με περισσότερες λεπτομέρειες στους ΣΦ και τα κριτήρια της υποκατηγοριοποίησής τους, καθώς οι πραγματολογικοί φρασεολογισμοί είναι αυτοί που αποτελούν το αντικείμενο της παρούσας ανακοίνωσης.

2. Πραγματολογικοί φρασεολογισμοί: παλαιότερες ταξινομήσεις

Οι ΣΦ υποκαθιστούν στον παραδειγματικό άξονα μια σημασιακή μονάδα χωρίς εσωτερική δομή (λέξη), έχουν περιγραφική σημασία και, επομένως, αποτελούν έναν τρόπο κατονομασίας του κόσμου με σχετικά υψηλή συμφραστική ανεξαρτησία. Αντίθετα, οι ΠΦ εκφράζουν σε μεγάλο βαθμό τη στάση ενός ομιλητή και εμφανίζονται παρενθετικά στο λόγο· δε λειτουργούν ως λέξεις ενώ η χρήση και η ερμηνεία τους έχει στενή σχέση με τα γλωσσικά και εξωγλωσσικά συμφραζόμενα (βλ. *Σιγά τα αίματα!*, *Αμήν και τότε!* κ.ά. παρόμοιοι ΠΦ, σε αντίθεση με τα: *Μου ανέβηκε το αίμα στο κεφάλι, Είμαι με το ένα πόδι στον τάφο* κ.ά. [ΣΦ]).

Η κατηγορία των ΠΦ έχει μελετηθεί πολύ λιγότερο από αυτή των ΣΦ, παρότι τα κύρια χαρακτηριστικά της και πολλά παραδείγματα υπάρχουν στη δουλειά καταξιωμένων στο χώρο ερευνητών, όπως η Gläser, ο Cowie, ο Mel'čuk, ο Pawley, ο Dobrovolskij κ.ά. Μια πιο συστηματική ταξινόμηση των ΠΦ επιχειρείται από τον Cowie (2001) ο οποίος διακρίνει στους «πραγματολογικούς συνδυασμούς» (ΠΦ) τις υποκατηγορίες *Παροιμίες* κτλ. (Proverbs etc.) και *Φόρμουλες* (Formulae). Ο Cowie ασχολείται περισσότερο με το β' είδος (Φόρμουλες), όπου και διακρίνει τις *συνομιλιακές φόρμουλες* ή *φόρμουλες ομιλίας* (speech formulae) και τις *φόρμουλες ρουτίνας* (routine formulae)⁴. Οι φόρμουλες ρουτίνας (π.χ. *how do you do?* / *see you later* ή ελλην. *τι έγινε;* / *τα λέμε!*)⁵ χρησιμοποιούνται για αναφορά σε ευρύτερα συμφραζόμενα (περικείμενο της περίπτωσης), δεν απαιτούν την υποστήριξη του άμεσου γλωσσικού περιβάλλοντος. Με λίγα λόγια, δεν είναι *διεπιδραστικές* (interactive), απλά ελέγχουν την επικοινωνία. Αντίθετα, οι συνομιλιακές φόρμουλες (π.χ. *you know what I mean* / *I beg your pardon* / *no problem* ή ελλην. *με πιάνεις;* / *κανένα πρόβλημα*) αναφέρονται σε συγκεκριμένα μέρη ενός εκφώνηματος ή κειμένου, έχουν άμεση σχέση με το συνομιλητή και τα λεγόμενά του (π.χ. είναι απάντηση σε κτ. που κτ. είπε πριν), άρα διαθέτουν πολύ υψηλό βαθμό διεπιδραστικότητας / επικοινωνιακότητας. Ο Cowie (2001) επιχειρεί και μια περαιτέρω υποδιαίρεση της κατηγορίας *συνομιλιακές φόρμουλες*, σε *επιρρηματικές φόρμουλες* (adverbials) και σε *‘καθαυτό’ συνομιλιακές*, με βάση γραμματικά και επικοινωνιακά κριτήρια. Οι *επιρρηματικές* αποτελούν εξαρτημένες προτάσεις ή φράσεις με επιρρηματική λειτουργία (π.χ. *for goodness sake!* / *to put it another way* ή ελλην. *για όνομα του Θεού!* / *για να το θέσω αλλιώς*) οι οποίες δεν είναι επικοινωνιακά διαδραστικές στον ίδιο βαθμό που είναι οι καθαυτό συνομιλιακές, γιατί δεν εμπλέκουν πάντα άμεσα τον συνομιλητή.

Συνοψίζοντας, η ταξινόμηση των ΠΦ διακρίνει ανάμεσα σε *Παροιμίες* κτλ. και *Φόρμουλες*. Απ' ό, τι φαίνεται, η εσωτερική ταξινόμηση στην πρώτη κατηγορία γίνεται βάσει των παραδοσιακά ορισμένων τάξεων *παροιμία, ρήση, συνθηματική φράση* κτλ. Στη δεύτερη κατηγορία η εσωτερική

⁴ Στη βιβλιογραφία οι δυο όροι χρησιμοποιούνται ενίοτε εναλλάξ (π.χ. οι συνομιλιακές φόρμουλες του Pawley (1996) εμπεριέχουν τις φόρμουλες ρουτίνας· οι φόρμουλες ρουτίνας της Gläser (1998) καλύπτουν και τις συνομιλιακές).

⁵ Όλα τα παραδείγματα στα αγγλικά είναι από τον Cowie (2001).

ταξινόμηση γίνεται βάσει λειτουργικών / επικοινωνιακών κριτηρίων σε *φόρμουλες ρουτίνας* και *συνομιλιακές φόρμουλες*, ενώ ένας επιπλέον διαχωρισμός γίνεται ανάμεσα σε *‘καθαυτό’ συνομιλιακές* και *επιρρηματικές φόρμουλες* με κριτήρια βασικά γραμματικά. Τα προβλήματα που προκύπτουν από την παραπάνω ταξινόμηση των ΠΦ είναι, κατά τη γνώμη μας, τα παρακάτω:

1. Τα κριτήρια της αρχικής υποδιαίρεσης σε δύο κατηγορίες (*Παροιμίες – Φόρμουλες*) είναι ασαφή. Έτσι, η περιγραφή της κατηγορίας *Φόρμουλες* από τον Cowie (2001: 1) ως «...εκφράσεις, συνήθως μεγέθους πρότασης, που χρησιμοποιούνται για να οργανώσουν το λόγο ... εκφράζουν τη στάση των ομιλητών απέναντι στους συμμετέχοντες και τα λεγόμενά τους, και γενικά, διευκολύνουν την επικοινωνία» [μτφ. από τη συγγραφέα] θα ταίριαζε εξίσου και στην κατηγορία *Παροιμίες*.

2. Όσον αφορά την υποδιαίρεση της κατηγορίας *‘Φόρμουλες’* σε *φόρμουλες ρουτίνας* και *συνομιλιακές*, καθώς και τη διάκριση ανάμεσα σε *[καθαυτό] συνομιλιακές* και *επιρρηματικές φόρμουλες*, θεωρούμε ότι και εδώ τα κριτήρια, εκτός από ανομοιογενή (γραμματικά για το διαχωρισμό *συνομιλιακές – επιρρηματικές φόρμουλες*, λειτουργικά/ επικοινωνιακά για το διαχωρισμό *φόρμουλες ρουτίνας – συνομιλιακές*), είναι επίσης ασαφή. Επιπλέον, τα παραδείγματα που παρατίθενται ανααιρούν πολλές φορές τα κριτήρια των διακρίσεων· για παράδειγμα, αγγλ. *hold your horses, how are you* που εμφανίζονται ως *φόρμουλες ρουτίνας*, θα έπρεπε να συμμορφώνονται με την περιγραφή «μη διεπιδραστικά, που δεν εμπλέκουν άμεσα το συνομιλητή» με την έννοια ότι «δεν απαιτούν απάντηση ή δε χρησιμοποιούνται ως απάντηση», πράγμα το οποίο μάλλον δεν συμβαίνει στις παραπάνω περιπτώσεις. Ένας μεγάλος αριθμός ΦΡ δεν μπορεί να ενταχθεί στη μία ή την άλλη κατηγορία με αυτό το κριτήριο: το *χαιρέτα μας τον πλάτανο* ή *από την πόλη έρχομαι και στην κορφή κανέλα* εμπλέκουν τον συνομιλητή ή απλώς ελέγχουν την επικοινωνία; Υποστηρίζονται από άμεσα ή ευρύτερα γλωσσικά και εξωγλωσσικά συμφραζόμενα; Κατά τον ίδιο τρόπο, ασάφειες δημιουργούν και τα κριτήρια διαχωρισμού σε *[καθαυτό] συνομιλιακές – επιρρηματικές φόρμουλες*: οι συνομιλιακές χαρακτηρίζονται από συντακτική ανεξαρτησία ή λειτουργούν ως γλωσσικές πράξεις αν δεν υπάρχει ρήμα (π.χ. *κανένα πρόβλημα*), σε αντίθεση με τις εξαρτημένες επιρρηματικές φόρμουλες που είναι δομές με επιρρηματική λειτουργία (π.χ. *για όνομα του Θεού*). Επιπλέον, οι επιρρηματικές θεωρούνται ότι δεν εμπλέκουν άμεσα τον ομιλητή, αλλά διεπιδρούν «...με κάτι από τη μορφή ή τη σημασία της πρότασης στην οποία εμφανίζονται ή με κάτι στα ευρύτερα κειμενικά συμφραζόμενα της πρότασης» [μτφ. από τη συγγραφέα] (Cowie, 2001: 4, 9-10). Από τα παραδείγματα δεν προκύπτουν σαφείς διαφορές: η επιρρηματική φόρμουλα είναι σαφώς γλωσσική πράξη και πολλές φορές εμπλέκει άμεσα το συνομιλητή.

Θεωρούμε, επομένως, ότι τα κριτήρια των «άμεσων # ευρύτερων συμφραζομένων» (τα οποία δεν ορίζονται με σαφήνεια) και του «βαθμού της διεπιδραστικότητας» (για το οποίο δεν ορίζεται μέτρο, αλλά ούτε και είναι εύκολο να οριστεί) δημιουργούν σύγχυση και δεν επαρκούν για την ένταξη ενός μεγάλου αριθμού μελών της κατηγορίας *Φόρμουλες* στο ένα ή το άλλο είδος.

Μια λιγότερο γνωστή ταξινόμηση προέρχεται από την εργασία των Baranov & Dobrovol'skij (2003). Επισημαίνοντας την ανεπάρκεια των σημασιολογικών κριτηρίων για την ταξινόμηση όλων των τύπων των ΦΡ⁶, οι συγγραφείς προτείνουν το διαχωρισμό σε *φρασεολογισμούς αυτόνομους σε σχέση με τα συμφραζόμενα* και *φρασεολογισμούς δεσμευμένους από τα συμφραζόμενα*.⁷ Για την ομάδα των συμφραστικά δεσμευμένων ΦΡ (αντιστοιχεί στους ΠΦ) προτείνεται η ονομασία *Συνομιλιακές Φόρμουλες* και επιχειρείται μια υποκατηγοριοποίηση σε *σχολιασμούς*, *γλωσσικές πράξεις*, *συναισθηματικούς σταθεροποιητές*, *φόρμουλες ερώτησης* και *απάντησης*. Σημειώνουμε ότι οι παροιμίες δεν συμπεριλαμβάνονται στην κατηγορία *Συνομιλιακές φόρμουλες*, καθώς, κατά την άποψη των συγγραφέων, είναι συμφραστικά ανεξάρτητες σε σχέση με την ερμηνεία τους. Η παραπάνω ταξινόμηση έχει πιο επικοινωνιακά και ενιαία κριτήρια, ωστόσο δεν στερείται ελαττωμάτων: για παράδειγμα, μπορεί οι παροιμίες να αποτελούν ένα αυτόνομο σημασιακό σύνολο, αλλά η τελική ερμηνεία τους επιτυγχάνεται με αναφορά στα συμφραζόμενα, και λειτουργούν ακριβώς όπως και τα σχόλια· και άλλες κατηγορίες π.χ. *φόρμουλες απάντησης* (π.χ. *έξισ και ξερός*) λειτουργούν στην ουσία ακριβώς όπως οι *φόρμουλες-σχολιασμοί* (πρβ. *άλλη όρεξη δεν είχα*).

3. Πραγματολογικοί φρασεολογισμοί: προτεινόμενη ταξινόμηση

Στη συνέχεια θα προτείνουμε μια ταξινόμηση των ΠΦ με ενιαία λειτουργικά / επικοινωνιακά κριτήρια που βασίζονται στο **είδος της λειτουργίας** των ΦΡ σε συνθήκες χρήσης και ισχύουν για όλα τα μέλη της ομάδας – παροιμίες, γνωμικά, ρητά, διάφορων ειδών συνομιλιακές φόρμουλες.

⁶ Π.χ. την ένταξη σε εννοιακά πεδία σε ένα λεξικό-thesaurus.

⁷ Ο διαχωρισμός μοιάζει με την κατηγοριοποίηση σε ΣΦ και ΠΦ, και το περιεχόμενο του όρου *‘συμφραζόμενα’* αντιστοιχούν στο περιεχόμενο του όρου *‘περικείμενο της περίπτωσης’*.

Οι ΠΦ, σε αντίθεση με τους ΣΦ, είναι συμφραστικά εξαρτημένοι⁸. Γι' αυτό, εξάλλου, το ερμηνευμά τους στα λεξικά είναι συνήθως της μορφής «λέγεται για καταστάσεις όπου...» γεγονός είναι επίσης ότι δεν παραφράζονται και έχουν ενίοτε 'θολό' περιγραφικό περιεχόμενο (βλ. αντίθετα, ιδιωτισμοί), γι' αυτό και δεν μπορούν να ταξινομηθούν σε σημασιοεννοιακές κατηγορίες (τύπου thesaurus, π.χ. *μου ανέβηκε το αίμα στο κεφάλι* [ΣΦ] = θύμωσα [σημασιοεννοιακό πεδίο ΘΥΜΟΣ]). Επομένως, τα κριτήρια ταξινόμησής τους θα πρέπει να είναι λειτουργικά / επικοινωνιακά. Βάσει της λειτουργίας τους κατά τη χρήση ξεχωρίζουν δύο μεγάλες κατηγορίες:

1. οι ΦΡ που **δημιουργούν** ένα «καταστασιακό» συμφραστικό πλαίσιο ('συμφραζόμενα' με την ευρύτερη έννοια) και είναι φορείς προσλεκτικής δύναμης (π.χ. *'στο σταυρό που σου κάνω': όρκος, 'εγώ στο πηγάδι κατούρησα;': διαμαρτυρία, 'τα λέμε': αποχαιρετισμός, κ.ά.*)

2. οι ΦΡ που **«δείχνουν»** τα γλωσσικά / εξωγλωσσικά συμφραζόμενα ως σχόλια (π.χ. *κεριά και λιβάνια!, για όνομα του Θεού!, όσα δε φτάνει η αλεπού τα κάνει κρεμαστάρια, χαιρέτα μας τον πλάτανο κ.ά.*)

Θα ονομάσουμε την πρώτη κατηγορία *Προσλεκτικές Φόρμουλες* και τη δεύτερη *Φόρμουλες-Σχόλια*.

Η μεγαλύτερη ομάδα είναι αυτή των σχολίων. Οι ΦΡ αυτοί δηλώνουν την άμεση 'επιτόπου' δημιουργία αντίδρασης (σε αντίθεση με τους ΣΦ): δεν 'φτιάχνουν' ένα υπο-πλαίσιο συνομιλίας⁹ ως φορείς προσλεκτικής δύναμης, αλλά **δείχνουν** ως σχόλια κάτι στα συμφραζόμενα, γλωσσικά και μη. Από αυτή την άποψη, οι φόρμουλες-σχόλια έχουν ένα είδος δεικτικού χαρακτήρα: *κεριά και λιβάνια* (σχόλιο ενόχλησης που 'δείχνει' το προηγούμενο εκφώνημα του συνομιλητή), *το 'χασες; / για όνομα του Θεού!* (σχόλιο -διαφωνίας / έκπληξης- που 'δείχνει' κάτι από την προηγούμενη συμπεριφορά του συνομιλητή, το εκφώνημα ή ευρύτερα συμφραζόμενα (περικείμενο της περίπτωσης) – όπως κάνουν και οι περισσότερες παροιμίες). Οι ΦΡ αυτού του είδους είναι σημασιακά εξαρτημένοι από το περιβάλλον, και συγκεκριμένα από τις προηγούμενες εκφορές: είναι κατά κάποιο τρόπο αποκρίσεις, που δείχνουν την ύπαρξη στάσης/ αντίδρασης του ομιλητή σε κάποιον συγκεκριμένο παράγοντα ή όψη του (γλωσσικού ή εξωγλωσσικού) περιβάλλοντος που μόλις προηγήθηκε, και προερχόταν από τον ίδιο ή από τον/τους συνομιλητή/-ές.

Ο δεικτικός χαρακτήρας των φρασεολογισμών-σχολίων έχει να κάνει με το γεγονός ότι παραπέμπουν αλλού, σε κάτι που προηγήθηκε στο σύμπαν της συνομιλίας, και αναγκάζουν τον αποδέκτη να εστιάσει εκεί την προσοχή του, προκειμένου να ολοκληρωθεί η σημασιακή τους εικόνα. Βέβαια, ο βαθμός εξάρτησης των φρασεολογικών σχολίων από το περιβάλλον (η πρόσδεση σε άμεσα, παρόντα ερεθίσματα) και η σχετική ασάφεια του περιγραφικού περιεχομένου (θολή, διάχυτη σημασία) είναι κάτι που ποικίλλει και κάνει την ομάδα να φαίνεται ανομοιογενής: από τη μια οι επιφωνηματικές εκφράσεις (*α γεια σου! μη χειρότερα!*), που "...καταγράφουν, δείχνουν αντιδράσεις στα τεκταινόμενα του διαλόγου, με μεγάλη πρόσδεση στο πλαίσιο και συρρίκνωση-διάχυση του περιγραφικού περιεχομένου, ...που δεν μπορούν -χωρίς να παραβιαστούν- να παραφραστούν σε δομημένη προτασιακή γλώσσα" (Χριστίδης, 2002: 95-96, 147-148), με έντονη τη συναισθηματική φόρτιση - ανάλογη της έλλειψης σαφούς περιγραφικού περιεχομένου. Από την άλλη, παροιμιώδεις εκφράσεις όπως *"παπός απ' την πόλη, παπαδιά μολογεί"* ή *"χαιρέτα μας τον πλάτανο"*, που αποτελούν δείγματα σαφώς πιο δομημένης προτασιακής γλώσσας, και εμφανίζουν λιγότερο διάχυτη σημασία και πρόσδεση σε άμεσα συμφραζόμενα: εντούτοις, όλα τα μέλη της ομάδας *Φόρμουλες-Σχόλια* διακρίνονται από παρόμοια -δεικτικά- χαρακτηριστικά και λειτουργία, όπως τα περιγράψαμε πιο πάνω.

Τέλος, για να ολοκληρωθεί η προτεινόμενη ταξινόμηση θα πρέπει να πραγματοποιήσουμε και μια εσωτερική υποκατηγοριοποίηση της κάθε ομάδας: για παράδειγμα, οι προσλεκτικές φόρμουλες μπορούν να ομαδοποιηθούν με τα κριτήρια ταξινόμησης των γλωσσικών πράξεων (λ.χ. Searle, 1979): ουσιαστικά, η σημασία τους είναι η ίδια η προσλεκτική δύναμη που δημιουργεί επί τόπου μια πράξη-κατάσταση: *θα σου πω εγώ τι εστί βερίκοκο!* (κατευθυντικές, απειλή), *πριτς κοκό!* (δεσμευτικές, άρνηση), *εγώ στο πηγάδι κατούρησα;* (εκφραστικές, διαμαρτυρία) κ.ά.

4. Επίλογος

Ο κύριος λόγος για την παρουσίαση αυτής της εργασίας ήταν ο λεξικογραφικός προβληματισμός για την ταξινόμηση των φρασεολογισμών μιας γλώσσας σε ένα εννοιολογικά προσανατολισμένο λεξικό. Η ένταξη των ΦΡ σε σημασιοεννοιακά πεδία/ τάξεις (λ.χ. *δαγκώνω τη λαμαρίνα*: ΕΡΩΤΑΣ· *είμαι στο χείλος του γκρεμού*: ΚΙΝΔΥΝΟΣ κ.ά.) που συναντώνται σε φρασεολογικά λεξικά τύπου thesaurus, είναι πιο εύκολη για την ομάδα των σημασιολογικών φρασεολογισμών και πολύ δυσκολότερη για την

⁸ *Περικείμενο* με τη γενική έννοια του όρου· συγκεκριμένα μέρη ενός εκφώνηματος / κειμένου ή της περίπτωσης

⁹ Αν και αναφέρονται και αυτοί στα ευρύτερα συμφραζόμενα.

ομάδα των πραγματολογικών φρασεολογισμών, όπου τα σημασιοεννοιακά κριτήρια δεν επαρκούν (λ.χ. σε ποια κατηγορία θα μπορούσε να καταταχθεί η έκφραση *πέρα βρέχει*, ή *κάτι τρέχει στα γύφτικα* ή *πριτς κοκό*;). Στην ομάδα αυτή, η ερμηνεία και η χρήση των φρασεολογισμών είναι ενίοτε αδύνατη χωρίς την παραπομπή στις συνθήκες επικοινωνίας. Για το λόγο αυτό, επιχειρήθηκε μια περιγραφή των πραγματολογικών φρασεολογισμών με λειτουργικά-επικοινωνιακά κριτήρια, η οποία θα μπορούσε να ληφθεί υπόψη κατά την κατασκευή ενός εννοιολογικού φρασεολογικού λεξικού. Με αυτόν τον τρόπο, ο χρήστης θα πληροφορείται όχι μόνο για το πώς **περιγράφονται** διαφορετικές όψεις μιας κατηγορίας, π.χ. ΑΠΕΙΛΗ/ ΕΚΦΟΒΙΣΜΟΣ (*απειλώ θεούς και δαίμονες, βάζω το μαχαίρι στο λαιμό κπ.* – και άλλοι ΣΦ) αλλά και, επιπλέον, πώς **εκφράζεται η απειλητική διάθεση εδώ και τώρα** (ΠΦ όπως *θα σου δείξω εγώ !...[πόσα απίδια χωράει ο σάκος]*). Η παρούσα εργασία, επομένως, αποτελεί μια προσπάθεια δημιουργίας ενός θεωρητικού υπόβαθρου με πρακτικό προσανατολισμό, το οποίο απαιτείται για την κατασκευή ενός εννοιολογικού φρασεολογικού λεξικού.

ΠΕΡΙΛΗΨΗ

This study investigates degrees of incorrectness in Multiple Choice items, and examines empirically a method for increasing “fairness” in the evaluation of incorrect responses given by test takers. The MC test used, consisted of questions extracted from a known computer adaptive test. The subjects completed the tests in conventional printed form and three scoring methods were applied. The proposed method of scoring examined empirically seems to increase precision of scoring and enhances sensitivity in the fairness of individualized computer adaptive testing and standards setting by professional examiners.

Λέξεις κλειδιά: πολλαπλή επιλογή, «δικαιοσύνη», βαθμολόγηση, βαθμοί ορθότητας

1. Εισαγωγή

Το σκεπτικό για την ενασχόληση με την παράμετρο της *δικαιοσύνης*¹ σε γλωσσικά τεστ, προέκυψε κυρίως από το γεγονός ότι ανάλογα τεστ χρησιμοποιούνται συχνά ως κύρια όργανα, βάσει των οποίων λαμβάνονται αρκετά σημαντικές αποφάσεις για τη ζωή των αξιολογούμενων, είτε ‘εισαγωγής’ σε ιδρύματα, είτε ‘εξαγωγής’ συμπερασμάτων για την απόκτηση πιστοποιητικού γλωσσικής επάρκειας. Βασικός στόχος της παρούσης έρευνας είναι η διερεύνηση της βαθμολόγησης των δοκιμασιών πολλαπλής επιλογής, που χρησιμοποιούνται σε ανάλογα τεστ, με κριτήριο την παράμετρο της *δικαιοσύνης* ως προς την βαθμολόγηση και τα τελικά συμπεράσματα που εξάγονται από αυτήν.

Σε αυτές τις περιπτώσεις, ειδικά όταν ο αριθμός των συμμετεχόντων είναι μεγάλος, οι αξιολογητές οδηγούνται στην υιοθέτηση, καταρχήν, δοκιμασιών που επιτρέπουν τη σύντομη βαθμολόγηση και τη δυνατότητα διεξαγωγής της εξεταστικής διαδικασίας με τη χρήση ηλεκτρονικών υπολογιστών. Παραδείγματα εξετάσεων αυτού του είδους είναι το GMAT ή το TOEFL. Οι δοκιμασίες πολλαπλής επιλογής αποτελούν ίσως την πιο διαδεδομένη, την ιδανική λύση αρκετών αξιολογητών, όπου η βαθμολόγηση ακολουθεί συχνότερα το μοντέλο 0 – 1, όπου το μηδέν αφορά στην λανθασμένη απάντηση και η μονάδα χρησιμοποιείται για τη σωστή ή αναμενόμενη επιλογή. Ασφαλώς, υπάρχει και το μοντέλο +1 -1, γνωστό ως αρνητική βαθμολόγηση, όπου για κάθε λανθασμένη απάντηση μειώνεται το τελικό αποτέλεσμα κατά μία μονάδα.

Το πρόβλημα εντοπίζεται στο γεγονός ότι οι επιλογές που προτείνονται (εκτός από τη σωστή ή αναμενόμενη απάντηση) δεν είναι εξίσου λανθασμένες. Η πιθανή αιτία, για την οποία οι αξιολογητές καταφεύγουν σε αυτήν τη λύση, είναι ότι δεν κρίνεται επιθυμητό η σωστή απάντηση να ξεχωρίζει, να γίνεται ευδιάκριτη, έτσι ώστε να μην επιλέγεται από όλους τους εξεταζόμενους. Σε μία τέτοια

¹ Ο όρος *δικαιοσύνη*, προτείνεται ως η ελληνική απόδοση του όρου *fairness*, όπως εντοπίστηκε - μαζί με τον όρο *αμεροληψία* - στο ελληνικό κείμενο των οδηγιών καλής πρακτικής της EALTA)
<http://www.ealta.eu.org/documents/archive/guidelines/powerpoint/Greek.ppt>

περίπτωση, κατά την οποία η σωστή απάντηση επιλέγεται από όλους τους εξεταζόμενους, το συγκεκριμένο ερώτημα δεν θα προσέφερε καμία πληροφορία που θα βοηθούσε στην διάκριση των αξιολογούμενων και κατά συνέπεια κάτι τέτοιο δεν θα βοηθούσε στην ουσιαστική αξιολόγηση των εξεταζόμενων, καθώς όλοι θα απαντούσαν σε όλα τα ερωτήματα. Το αντίθετο, δηλαδή κανείς να μην απαντάει σωστά σε καμία ερώτηση, δεν θα ήταν επίσης επιθυμητό. Συνήθως, στις δοκιμασίες πολλαπλής επιλογής ακολουθείται μια κλίμακα όπου η μία ή δύο από τις υπόλοιπες επιλογές είναι πολύ κοντά στη σωστή απάντηση, αλλά θεωρούνται λανθασμένες λόγω πολύ μικρών λεπτομερειών. Στην κλίμακα αυτή τα άκρα θα εκτείνονταν από το *σχεδόν αποδεκτή* έως το *εντελώς λανθασμένη* με δύο ενδιάμεσες στάσεις (*σχετικά αποδεκτή* και *λανθασμένη*), στην περίπτωση που οι επιλογές είναι πέντε (μία σωστή και τέσσερις λάθος).

Εδώ ακριβώς εντοπίζεται και το ηθικό δίλημμα που δημιουργεί και τα βασικά ερωτήματα: α) οι εξεταζόμενοι που επιλέγουν μία σχεδόν αποδεκτή απάντηση δεν θα έπρεπε να ξεχωρίζουν από αυτούς που επιλέγουν την εντελώς λανθασμένη; β) δεν θα έπρεπε ως εκ τούτου να επιβραβεύονται για την επιλογή τους, καθώς δείχνουν να βρίσκονται σε υψηλότερο επίπεδο κατανόησης της γλώσσας από αυτούς που επιλέγουν την εντελώς λανθασμένη απάντηση; Βέβαια, από την άλλη πλευρά δεν θα ήταν επιθυμητό αλλά ούτε και σκόπιμο το αποτέλεσμα με διαφορετική βαθμολόγηση να αλλοιώνε σημαντικά την αξιοπιστία του ίδιου του τεστ. Όπως καταλαβαίνει κανείς η γραμμή στην οποία θα πρέπει να κινηθούν οι βαθμολογητές είναι πραγματικά λεπτή.

Η παρούσα μελέτη αποτελεί μόνον ένα μέρος από μία γενικότερη πιλοτική μελέτη στο θέμα της *δικαιότητας* (δημοσιεύονται ακόμη δύο στην αγγλική). Παράλληλος στόχος είναι και η εξέταση της μεθόδου που χρησιμοποιήθηκε για το πείραμα, όπου δοκιμάζονται οι υποθέσεις (καταγράφονται στο τέλος αυτής της παραγράφου) αλλά και τα εργαλεία που χρησιμοποιήθηκαν για την συλλογή των δεδομένων. Παράλληλα, δοκιμάζονται τα στατιστικά τεστ που επιλέχθηκαν για την ανάλυση των δεδομένων (τυπική απόκλιση, συντελεστές συσχέτισης, τεστ συσχετισμένων / σχετικών τιμών) με κύρια επιδίωξη να διευκρινιστεί αν όντως αυτά είναι τα κατάλληλα για να απαντηθούν τα βασικά ερωτήματα που τίθενται παρακάτω και εάν όντως υπάρχει έρεισμα για μία μεγαλύτερη και συστηματικότερη έρευνα στο θέμα με την συμμετοχή περισσότερων υποκειμένων. Σε αυτήν την μελέτη τα αποτελέσματα εξετάζονται μόνον συνολικά και διερευνάται η μεταξύ τους σχέση. Όπως διαφαίνεται και από τον τίτλο, ο βασικός άξονας επάνω στον οποίο θα κινηθούμε στην παρούσα μελέτη είναι η *δικαιότητα* στην γλωσσική αξιολόγηση και ιδιαίτερα στις δοκιμασίες πολλαπλής επιλογής. Αυτό που δεν φαίνεται από τον τίτλο, αλλά αποτελεί τον τρόπο με τον οποίο θα διερευνήσουμε τον παράγοντα *δικαιότητα*, είναι η διαδικασία της βαθμολόγησης των δοκιμασιών με διαφορετικές μεθόδους. Όπως και σε κάθε εμπειρική έρευνα η ακολουθία σε αυτή την εργασία είναι η θεωρητική αρχικά προσέγγιση του όρου *δικαιότητα* και της *βαθμολόγησης* στις δοκιμασίες πολλαπλής επιλογής μέσα από την σχετική βιβλιογραφία (δευτερογενής έρευνα) και στην συνέχεια το εμπειρικό μέρος, με το πείραμα που σχεδιάστηκε και εφαρμόστηκε για τον έλεγχο των αρχικών μας υποθέσεων. Ειδικότερα, υποθέτουμε ότι υπάρχει διαφορά στο τελικό αποτέλεσμα ενός τεστ που προκύπτει από τη διαφορετική βαθμολόγηση των δοκιμασιών πολλαπλής επιλογής και εξετάζουμε εάν η διαφορά που προκύπτει από την βαθμολόγηση είναι ικανή να αντιστρέψει το τελικό αποτέλεσμα και συνεπώς τα συμπεράσματα που εξάγονται από αυτό.

2. Γλωσσική Αξιολόγηση και Δικαιότητα

Η *δικαιότητα* μπορεί να σχετίζεται με τέσσερις μεταβλητές που ενυπάρχουν σε κάθε μορφή αξιολόγησης: α) την εξεταστική διαδικασία, β) τους υποψηφίους, γ) τα γλωσσικά τεστ και δ) τη βαθμολόγηση. Παρακάτω θα συζητηθεί η έννοια της *δικαιότητας* σε κάθε τομέα ξεχωριστά, αν και όπως θα γίνει φανερό κατά τη συζήτηση οι τομείς αυτοί αλληλοεπηρεάζονται:

α) *Εξεταστική διαδικασία*. Τα χαρακτηριστικά της εξεταστικής διαδικασίας περιλαμβάνουν τα χαρακτηριστικά του περιβάλλοντος της εξεταστικής διαδικασίας (χώρος και εξοπλισμός, προσωπικό, χρόνος και φυσικές συνθήκες), τα χαρακτηριστικά των κανόνων/του τελετουργικού της εξεταστικής διαδικασίας (προδιαγραφές, κατανομή του χρόνου, βαθμολόγηση, ορθότητα και σαφήνεια των διαδικασιών και των οδηγιών), τα χαρακτηριστικά του υλικού της εξεταστικής διαδικασίας (μορφή του τεστ, ταχύτητα και ποσότητα υλικού, οργανωτικά χαρακτηριστικά, πραγματολογικά χαρακτηριστικά αλλά και κοινωνιογλωσσολογικά χαρακτηριστικά), τα χαρακτηριστικά της αναμενόμενης απάντησης (τους περιορισμούς στην απάντηση και τη σχέση ανάμεσα στο υλικό και την απάντηση)². Με βάση το πλαίσιο των παραπάνω χαρακτηριστικών, καταγράφονται στη διεθνή βιβλιογραφία και τα παρακάτω κριτήρια αξιολόγησης που οφείλει να πληροί η εξεταστική διαδικασία σε κάθε γλωσσικό τεστ όπου

² Βλ. Bachman, 1990:119.

εμφανίζεται και η έννοια της *δικαιοσύνης*: αξιοπιστία, εγκυρότητα, πρακτικότητα (*test practicality*), αυθεντικότητα, διαφάνεια, ανάδραση, σταθερότητα/ελαστικότητα, διαδραστικότητα, δικαιοσύνη/αμεροληψία (*fairness*). Ως συμπέρασμα θα μπορούσαμε να καταγράψουμε ότι στον τομέα της εξεταστικής διαδικασίας η *δικαιοσύνη* φαίνεται να σχετίζεται με τις εν γένει συνθήκες οι οποίες θα πρέπει να υποβοηθούν τον εξεταζόμενο να αποδώσει σύμφωνα με τις δυνατότητές του.

β) *Οι υποψήφιοι*. Σύμφωνα με τον Bachman (1990), υπάρχουν τέσσερις (4) κατηγορίες επιρροής που αφορούν στην επίδοση σε ένα γλωσσικό τεστ και αυτές είναι: η επικοινωνιακή γλωσσική ικανότητα, τα χαρακτηριστικά του τεστ, τα χαρακτηριστικά των υποψηφίων και τυχαίοι παράγοντες. Αν εξαιρέσουμε την επικοινωνιακή γλωσσική ικανότητα, καθώς αποτελεί το χαρακτηριστικό που επιθυμούμε να αξιολογήσουμε, αλλά και τους τυχαίους παράγοντες που θα μπορούσαν ως ένα ποσοστό να εξουδετερωθούν, απομένουν τα χαρακτηριστικά του τεστ και τα χαρακτηριστικά των υποψηφίων. Καθώς για τα χαρακτηριστικά του τεστ θα μιλήσουμε παρακάτω, εδώ θα επικεντρωθούμε στα χαρακτηριστικά των υποψηφίων. Οι υποψήφιοι έρχονται στο σκηνικό της εξεταστικής διαδικασίας φέροντας μαζί τους συγκεκριμένα προσωπικά χαρακτηριστικά, τα οποία μπορεί να επηρεάσουν την επίδοσή τους στο γλωσσικό τεστ, αν και θεωρείται σήμερα ως απολύτως απαραίτητο για τον υπολογισμό της επίδοσης της γλωσσικής ικανότητας του υποψηφίου να μην παρεμβαίνουν άλλοι παράγοντες που μπορεί να επηρεάσουν το αποτέλεσμα. Αυτά τα χαρακτηριστικά μπορεί να αποδειχτούν σημαντικές ρυθμιστικές μεταβλητές της επίδοσης στο γλωσσικό τεστ. Ο Weir (2005: 48), αναφερόμενος ειδικά σε αυτό το θέμα, υποστηρίζει ότι οι κατασκευαστές, αλλά και οι χρήστες των τεστ, πρέπει να εξετάσουν το εξής ερώτημα: *πώς αντιμετωπίζονται από τα τεστ τα φυσικά/φυσιολογικά, ψυχολογικά και εμπειρικά χαρακτηριστικά των υποψηφίων*; Από το ερώτημα αυτό φαίνεται να προκύπτει και το επόμενο που σχετίζεται με τη *δικαιοσύνη* και ο ίδιος συγγραφέας διατυπώνει: *τα χαρακτηριστικά των δραστηριοτήτων του τεστ καθώς και η όλη διεξαγωγή του είναι δίκαια για τους υποψηφίους*; Η σημασία που δίνεται εδώ στην έννοια της *δικαιοσύνης* αφορά στη διασφάλιση της εγκυρότητας του αποτελέσματος σε σχέση με τα χαρακτηριστικά των υποψηφίων και την εξεταστική διαδικασία αλλά και στα χαρακτηριστικά του εργαλείου εξέτασης, του τεστ. Την επίδραση της μεθόδου που επιλέγεται για την εξεταστική διαδικασία στα χαρακτηριστικά των υποψηφίων τονίζει και ο Bachman (1990:156), καταλήγοντας ότι πρόκειται για μεταβλητή που μπορεί να επηρεάσει ευνοϊκά ή δυσμενώς την επίδοση των υποψηφίων στο γλωσσικό τεστ. Τέλος, γίνεται κατανοητό ότι εφόσον άλλοι παράγοντες παρεμβαίνουν στον υπολογισμό της επίδοσης το αποτέλεσμα μπορεί να θεωρηθεί ως μη έγκυρο.

γ) *Τα γλωσσικά τεστ*. Τα ίδια τα τεστ παρουσιάζουν κάποια συγκεκριμένα χαρακτηριστικά, στα οποία μπορεί να οφείλεται και ένα σημαντικό μέρος της διακύμανσης (*test-score variation*) στην επίδοση. Οι Bachman & Palmer (1996:66) τονίζουν ότι τα τεστ πρέπει να σχεδιάζονται με τέτοιο τρόπο, ώστε να αντλούν την καλύτερη επίδοση/απόδοση των εξεταζομένων. Ο Κώδικας για Δίκαιες Εφαρμογές της Αξιολόγησης στην Εκπαίδευση (2004:2) της Επιτροπής Εφαρμογών Αξιολόγησης αναφέρει ότι τα τεστ πρέπει να είναι δίκαια απέναντι στους υποψηφίους ανεξάρτητα από ηλικία, φύλο, αναπηρία, καταγωγή, εθνικότητα, θρησκεία, σεξουαλικές προτιμήσεις, γλωσσικό υπόβαθρο και άλλα προσωπικά χαρακτηριστικά. Όταν αναφερόμαστε στη *δικαιοσύνη* σε ότι αφορά στο τεστ, οι πρώτες σκέψεις που έρχονται στο μυαλό είναι σχετικές με την αμεροληψία, την καταγωγή, τις ειδικές ανάγκες, το φύλο και την εθνικότητα. Ο Kunnan (2000) εντοπίζει τρεις βασικές περιοχές που εμπλέκονται στο θέμα της *δικαιοσύνης* και αφορούν στο τεστ. Αυτές είναι, η εγκυρότητα (κυρίως η εγκυρότητα δομής), η προσβασιμότητα και η επίδραση/ο αντίκτυπος. Παράλληλα, ο Κώδικας για Δίκαιες Εφαρμογές της Αξιολόγησης στην Εκπαίδευση του 1998 προτρέπει τους ερευνητές και τους σχεδιαστές γλωσσικών τεστ να επιβεβαιώσουν και ερευνητικά ότι οι διακυμάνσεις στη γλωσσική επίδοση σε ένα τεστ οφείλονται σε διαφοροποιήσεις στο βαθμό γνώσης της γλώσσας και όχι σε άλλους παράγοντες.

δ) *Βαθμολόγηση*. Η μέτρηση της επικοινωνιακής γλωσσικής ικανότητας θα πρέπει να είναι όσο το δυνατό πιο ακριβής και δίκαιη και υπό αυτήν την έννοια, ο δημιουργός ενός τεστ έχει την υποχρέωση να κάνει τα πάντα για να πετύχει τα υψηλότερα ποσοστά *δικαιοσύνης*, έτσι ώστε να μην υπάρχουν υποψήφιοι που θα μειονεκτούν ή θα πλεονεκτούν έναντι των άλλων. Αυτό ακριβώς το θέμα θα μας απασχολήσει περισσότερο στο αμέσως επόμενο κεφάλαιο.

Παρά το σημαντικό ενδιαφέρον που έχει για τους ερευνητές το θέμα της *δικαιοσύνης* στα γλωσσικά τεστ, δεν υπάρχει κάποιος στατιστικός τρόπος ή δείκτης που μπορεί να χρησιμοποιηθεί για να αποδείξει ότι τα ερωτήματα ενός τεστ αλλά και ολόκληρο το τεστ είναι δίκαια. Ο μόνος στατιστικός έλεγχος της *δικαιοσύνης* θα ήταν μέσα από τον έλεγχο του bias - DIF (Differential Item Functioning) σύμφωνα με συγκεκριμένες μεταβλητές, έτσι ώστε να διασφαλιστεί ότι το τεστ είναι δίκαιο ως προς κάποιες μεταβλητές κάθε φορά. Όπως προέκυψε από την σχετική βιβλιογραφική ανασκόπηση, και πιο

συγκεκριμένα από την αναφορά του Zieky (2002:2)³, η *δικαιότητα* ενός τεστ εκφράζεται με διαφορετικούς τρόπους μέσα από την κατασκευή, διεξαγωγή και βαθμολόγηση ενός τεστ. Στα πλαίσια της παρούσας μελέτης θα εξετάσουμε τη *δικαιότητα* μέσα από το πρίσμα της βαθμολόγησης του τεστ και όχι μέσα από την κατασκευή και τη διεξαγωγή του, και πιο συγκεκριμένα μέσα από τη διαδικασία βαθμολόγησης ερωτημάτων πολλαπλής επιλογής.

3. Τεστ Πολλαπλής Επιλογής και Βαθμολόγηση

Τα εργαλεία που χρησιμοποιούνται στην γλωσσική αξιολόγηση ονομάζονται τεστ. Οι Carroll (1968) και Bachman (2004) ορίζουν το τεστ ως το εργαλείο που στοχεύει στην πρόκληση μιας συγκεκριμένης συμπεριφοράς βάσει της οποίας αξιολογούνται οι ενδιαφερόμενοι. Ένα γλωσσικό τεστ συνήθως περιέχει “ένα σύνολο δοκιμασιών που κάποιος ετοίμασε είτε για να καταγράψει/μετρήσει τη γλωσσομάθεια κάποιου άλλου, είτε για να διαγνώσει/ελέγξει το βαθμό επίτευξης συγκεκριμένων στόχων ενός εκπαιδευτικού προγράμματος” ενώ ο όρος δοκιμασία χρησιμοποιείται για να περιγράψει το “υποσύνολο των θεμάτων εξέτασης ή γλωσσικού τεστ” και “αποτελείται από ένα ή περισσότερα ερωτήματα ή ‘ζητούμενα’ (items)” (Τσοπάνογλου & Υψηλάντης 2011:9-10). Στον Τσοπάνογλου (2010:95) παρουσιάζονται σε πίνακα οι συνηθέστεροι τύποι δοκιμασιών σε γλωσσικά τεστ που ο συγγραφέας διαχωρίζει σε δύο κατηγορίες: α) συγκλίνουσας παραγωγής λόγου όπου όλοι οι εξεταζόμενοι απαντούν με τον ίδιο ακριβώς (αναμενόμενο) τρόπο και β) αποκλίνουσας παραγωγής λόγου όπου μπορεί να υπάρξει διαφοροποίηση ως προς την απάντηση.

ΣΥΓΚΛΙΝΟΥΣΑ ΠΑΡΑΓΩΓΗ ΛΟΓΟΥ	Επιλογή	Σωστό/ λάθος

Πίνακας 1 Τύποι Δοκιμασιών Γλωσσικών Τεστ από τον Τσοπάνογλου (2010:95)

Οι δοκιμασίες πολλαπλής επιλογής ανήκουν στις δοκιμασίες συγκλίνουσας παραγωγής λόγου και αποτελούνται από δύο μέρη. Το πρώτο αφορά στο ερώτημα-στέλεχος (stem) και το δεύτερο στις επιλογές, ανάμεσα στις οποίες υπάρχει η σωστή ή αναμενόμενη απάντηση και οι λανθασμένες απαντήσεις που ονομάζονται παραπλανητές (distracters ή distractors), καθώς έχουν ως στόχο να παραπλανήσουν τον εξεταζόμενο. Το ερώτημα-στέλεχος μπορεί να παρουσιάζεται με τη μορφή ερωτήματος ή μιας ελλιπούς πρότασης. Οι Bachman και Palmer (1996:202) διαχώρισαν δύο τύπους αποδεκτών απαντήσεων, την καλύτερη (δυνατή) απάντηση (*best answer*) και τη σωστή απάντηση (*correct answer*), υπονοώντας στη δεύτερη περίπτωση ότι αυτή είναι η μοναδική σωστή απάντηση και

³ The best way to ensure test fairness is to build fairness into the development, administration, and scoring processes” Zieky (2002: 2).

⁴ Ο Τσοπάνογλου (2010:92) αναφέρει ότι οι δοκιμασίες της μετακωδικοποίησης θα μπορούσαν να περιλαμβάνουν και δοκιμασίες «διαμεσολάβησης». Ο ίδιος αναφέρει ότι η μετακωδικοποίηση “βρίσκεται στα όρια μεταξύ δοκιμασιών συγκλίνουσας και αποκλίνουσας παραγωγής λόγου”.

όχι αυτή που ταιριάζει καλύτερα από αυτές που προσφέρονται. Το συγκεκριμένο είδος δοκιμασίας παρουσιάζει πολλά πλεονεκτήματα καθώς θεωρείται πολύ αξιόπιστο⁵, πρακτικό και οικονομικό (παρέχει εύκολη και γρήγορη διόρθωση) με την προϋπόθεση ότι τα ερωτήματα είναι σωστά. Καθώς τα ερωτήματα της πολλαπλής επιλογής στη συντριπτική τους πλειοψηφία βαθμολογούνται ως σωστά-λάθος (dichotomous scoring), θα έπρεπε και γλωσσικά να είναι ξεκάθαρο από άποψη περιεχομένου ότι μόνο μια απάντηση είναι σωστή και οι υπόλοιπες το ίδιο λάθος. Για λόγους, όμως, που συζητήθηκαν στην εισαγωγή του άρθρου, αυτό δεν συμβαίνει πάντα, όπως επιβεβαιώθηκε και στο άρθρο των Tsopanoglou, Ypsilandis & Mouti (submitted1). Στο συγκεκριμένο άρθρο οι συγγραφείς εντόπισαν, σε ένα σύνολο 80 ερωτημάτων πολλαπλής επιλογής, που εξήχθησαν από ηλεκτρονικό προσαρμοστικό τεστ γνωστού εκδοτικού οίκου, 25 ερωτήματα για τα οποία θα μπορούσε να υπάρξει μία εναλλακτική περισσότερο ακριβής λύση με 'μερική' βαθμολόγηση. Στη σχετική βιβλιογραφία προτείνεται αυτή η 'μερική' βαθμολόγηση (partial credit scoring) για τις δοκιμασίες πολλαπλής επιλογής που απαιτούν την καλύτερη απάντηση (best answer), όπως πραγματοποιείται και στις δοκιμασίες ανοιχτού τύπου.

Ένα θέμα που συζητήθηκε εκτενώς και αφορά στις δοκιμασίες πολλαπλής επιλογής είναι η πιθανότητα του εύστοχου εντοπισμού (αναφέρεται ως παράγοντας «τύχη») της σωστής απάντησης από μέρους των εξεταζόμενων κατά τη συμπλήρωση του τεστ. Καθότι η συγκεκριμένη διαδικασία δεν θεωρείται επιθυμητή, έχουν διατυπωθεί διαφορετικοί τρόποι για την αντιμετώπιση της με στόχο να την εξαλείψουν. Ιδιαίτερα: α) οι Alderson, Clapham and Wall (1995:48) προτείνουν τη χρήση περισσότερων επιλογών (τουλάχιστον τεσσάρων), καθώς η ύπαρξη περισσότερων επιλογών μπορεί να ελαχιστοποιήσει το φαινόμενο. β) Οι ίδιοι συγγραφείς προτείνουν την αρνητική βαθμολόγηση (+1-1), η οποία ποινικοποιεί το λάθος και αφαιρεί βαθμούς στην περίπτωση επιλογής των λανθασμένων απαντήσεων. γ) Ο Τσοπάνογλου (2010) προτείνει τη χρήση της στατιστικής. Στον αντίποδα οι Bachman και Palmer (1996:205) ξεχωρίζουν δύο είδη τυχαίου εντοπισμού: την τυφλή επιλογή, η οποία βασίζεται αποκλειστικά στον παράγοντα «τύχη» και δεν είναι επιθυμητή και ένα δεύτερο είδος το οποίο βασίζεται σε μερική γνώση του αντικειμένου και στη χρήση μεταγνωστικών στρατηγικών. Ο όρος που χρησιμοποιείται εδώ, είναι 'συμπερασματική στρατηγική' (inferencing), η οποία χαρακτηρίζεται ως ιδιαίτερα χρήσιμη στην γλωσσική παιδεία (καθώς είναι σχεδόν αδύνατη η 100% κατάκτηση της ξένης γλώσσας). Επιπλέον, η επιτυχής ανεύρεση μίας απάντησης δείχνει ένα υψηλό βαθμό γλωσσικής επίγνωσης και οι εν λόγω συγγραφείς θεωρούν ότι οι εξεταζόμενοι ενός γλωσσικού τεστ θα πρέπει να ανταμείβονται για αυτό, μέσω της μερικής απόδοσης βαθμολογίας έτσι ώστε να ενθαρρύνονται να επιστρατεύουν τη συγκεκριμένη στρατηγική. Οι Tsopanoglou, Ypsilandis και Mouti (submitted1) προχωρώντας ένα βήμα παραπάνω καταλήγουν ότι η εντελώς τυχαία ανεύρεση είναι στην πραγματικότητα σχεδόν ανύπαρκτη καθώς όλοι οι υποψήφιοι διαβάζουν τουλάχιστον το ερώτημα και τις επιλογές και υποσυνείδητα ενεργοποιείται η γλωσσική τους επίγνωση (γνώση που διαθέτουν για την γλώσσα στόχο).

Η απόδοση μερικής βαθμολογίας, σύμφωνα με τους βαθμούς ορθότητας, μπορεί να αποτελέσει έναν τρόπο αξιοποίησης του «θετικού και εποικοδομητικού» εύστοχου εντοπισμού και της μεγαλύτερης εμπλοκής των αξιολογούμενων στην διαδικασία αξιολόγησης. Αυτή η διαδικασία είναι ήδη αποδεκτή και χρησιμοποιείται στις δοκιμασίες ανοιχτού τύπου ή σε δοκιμασίες συμπλήρωσης και προτείνουμε να εφαρμοστεί και στα ερωτήματα πολλαπλής επιλογής (εδώ εξετάζεται εμπειρικά).

4. Μέθοδος

Σχεδιασμός και διαδικασία: Για να ελεγχθούν οι υποθέσεις που κατεγράφησαν στο εισαγωγικό κεφάλαιο, αρχικά δημιουργήθηκε ένα τεστ με ερωτήματα πολλαπλής επιλογής, σε συμβατική έντυπη μορφή. Τα ερωτήματα εξήχθησαν από ένα ηλεκτρονικό προσαρμοστικό τεστ γνωστού εκδοτικού οίκου. Αρχικά τα ερωτήματα ταξινομήθηκαν από έναν κριτή σύμφωνα με τους βαθμούς ορθότητας των επιλογών σε μία σκάλα Likert με άκρα τη σωστή απάντηση από την μία μεριά και την εντελώς απαράδεκτη από την άλλη και ενδιάμεσες στάσεις, από αριστερά προς τα δεξιά τις: *πολύ πιθανή, πιθανή και λανθασμένη*. Στην συνέχεια το τεστ δόθηκε για συμπλήρωση στα υποκείμενα που έλαβαν μέρος σε αυτή την μελέτη και το τεστ βαθμολογήθηκε με τρεις διαφορετικές μεθόδους, την παραδοσιακή διχοτομική βαθμολόγηση (σωστό 1 – λάθος 0), την πειραματική πολυτομική βαθμολόγηση (σωστό 2, πολύ πιθανό 1, πιθανό 0,5, λανθασμένο 0), και την αρνητική πολυτομική βαθμολόγηση (σωστό 2, πιθανό 1, λανθασμένο 0 και εντελώς λανθασμένο -1). Τα αποτελέσματα καταγράφηκαν και μελετήθηκαν στατιστικά. Για λόγους οικονομίας θα αναφερόμαστε σε αυτές ως παραδοσιακή, πειραματική και αρνητική αντίστοιχα.

⁵ Στην παρούσα έρευνα έμμεσα τίθεται σε αμφισβήτηση η αξιοπιστία των αποτελεσμάτων της δοκιμασίας.

Υποκείμενα: Ως υποκείμενα της έρευνας χρησιμοποιήθηκαν 18 φοιτητές τριτοβάθμιας εκπαίδευσης που παρακολουθούσαν το ίδιο πρόγραμμα σπουδών. Η ηλικία τους κυμαίνονταν από 19 έως 21 έτη.

Εργαλεία: Το εργαλείο που χρησιμοποιήθηκε για την έρευνα ήταν ένα τεστ με 80 ερωτήματα πολλαπλής επιλογής από ένα δείγμα εξετάσεων TOEFL CAT γνωστού εκδοτικού οίκου. Τα ερωτήματα προέκυψαν και κατεγράφησαν μετά από πολλαπλή και με διαφορετικούς τρόπους χρήση τους τεστ από τους ερευνητές. Το στατιστικό πρόγραμμα που χρησιμοποιήθηκε για την ανάλυση ήταν το SPSS, έκδοση 18.

5. Αποτελέσματα

Σε προηγούμενα άρθρα τους, οι Tsopanoglou, Ypsilandis και Mouti (submitted1+2) επιβεβαίωσαν την ύπαρξη διχοτομικών και πολυτομικών ερωτημάτων στο τεστ που χρησιμοποιήθηκε και σε αυτή τη μελέτη ως το εργαλείο συλλογής των δεδομένων μέσω της κρίσης φυσικού ομιλητή, έμπειρου εξεταστή του Cambridge Proficiency. Στα συγκεκριμένα άρθρα ολοκληρώθηκε τόσο η περιγραφική στατιστική που αφορούσε στο σύνολο των ερωτημάτων και των απαντήσεων όσο και στις απαντήσεις που δόθηκαν από κάθε υποκείμενο ξεχωριστά. Σε αυτό το άρθρο, θα συζητηθούν μόνο τα αποτελέσματα όπως αυτά προέκυψαν από τους τρεις τρόπους βαθμολόγησης συνολικά καθώς και οι σχέσεις των τελικών αποτελεσμάτων μεταξύ τους.

	Mean	N	SD
Παραδοσιακή	61,111	18	16,799
Πειραματική	64,444	18	15,523
Αρνητική	47,444	18	22,786

Πίνακας 2 Αποτελέσματα Τριών Μεθόδων Βαθμολόγησης

Όπως καταγράφεται και στον πίνακα 2, οι μέσοι όροι της παραδοσιακής και της πειραματικής βαθμολόγησης είναι υψηλότεροι από αυτόν της αρνητικής. Αυτό δείχνει ότι με την αρνητική βαθμολόγηση τα υποκείμενα αμείβονται με μικρότερη βαθμολογία. Παράλληλα, γίνεται από εδώ ήδη φανερό ότι οι δύο πρώτες βαθμολογήσεις (παραδοσιακή και πειραματική) δεν διαφέρουν μεταξύ τους (61,111 και 64,444) ενώ η διαφορά αυξάνει κατά την τρίτη αρνητική βαθμολόγηση (47,44). Η τυπική απόκλιση (SD) είναι ένα μέτρο διασποράς (οι στατιστικολόγοι τη θεωρούν το σπουδαιότερο μέτρο διασποράς), μία τιμή που δείχνει πόσο κατά μέσο όρο διαφέρουν (πόσο πολύ απομακρύνονται) οι τιμές μιας μεταβλητής από τον μέσο όρο τους. Όσο μικρότερη είναι η τιμή, τόσο μικρότερη είναι η απόκλιση από τον μέσο όρο. Στις πρώτες δύο βαθμολογήσεις, οι τιμές της τυπικής απόκλισης βρίσκονται κατά μέσο όρο στο 16,7 και 15,5 αντίστοιχα, τιμές που είναι σχετικά μικρές, ενώ στην αρνητική βαθμολόγηση, η τιμή της τυπικής απόκλισης φτάνει κατά μέσο όρο το 22,7 που αν και δεν είναι μια ιδιαίτερα μεγάλη τιμή, είναι σαφώς μεγαλύτερη από τις δύο προηγούμενες. Αυτό δείχνει ότι οι βαθμολογήσεις των υποκειμένων με τις δύο πρώτες μεθόδους δεν παρουσιάζουν μεγάλη διασπορά από τον μέσο όρο.

Επίσης, υπολογίστηκαν οι συντελεστές συσχέτισης (Pearson r) μεταξύ των τριών μεθόδων βαθμολόγησης. Ο συντελεστής συσχέτισης είναι ένα αριθμητικό μέτρο μεταξύ δύο συνόλων τιμών. Σε μέγεθος μπορεί να κυμανθεί από +1 έως -1.

Pearson r , Correlation		
	Παραδοσιακή	Πειραματική
Παραδοσιακή		
Πειραματική	,993(,000)	
Αρνητική	,978(,000)	,985(,000)

Πίνακας 3 Συσχετισμοί Τριών Μεθόδων Βαθμολόγησης

Όπως φαίνεται και στον παραπάνω πίνακα, σε όλες τις περιπτώσεις έχουμε μια σχεδόν απόλυτη θετική συσχέτιση πολύ κοντά στο +1 ανάμεσα στις μεθόδους βαθμολόγησης, δηλαδή, οι τιμές μίας μεταβλητής αυξάνονται όταν αυξάνονται και οι τιμές της άλλης. Αυτό το γεγονός δείχνει ότι στην αξιολόγηση βάσει νόρμας δεν θα είχαμε κάποια σημαντική διαφοροποίηση στα αποτελέσματα καθώς ο αξιολογούμενος που πήρε υψηλή βαθμολογία με τον ένα τρόπο βαθμολόγησης παίρνει υψηλή βαθμολογία και με τον άλλο.

Παρακάτω, πραγματοποιήθηκαν συγκρίσεις δύο δειγμάτων συσχετισμένων/σχετικών τιμών (paired sample t-test).

T-test, paired differences		
	Παραδοσιακή	Πειραματική
Παραδοσιακή		
Πειραματική	Mean= 3,333 t=6,288 DF=17 Sig.= ,000	
Αρνητική	Mean= 13,666 t= 8,005 DF=17 Sig.= ,000	Mean= 17,000 t=9,041 DF=17 Sig.= ,000

Πίνακας 4 T-test Τριών Μεθόδων Βαθμολόγησης

Ο έλεγχος αυτός (t-test) χρησιμοποιείται για την εκτίμηση της στατιστικής σημαντικότητας της διαφοράς των μέσων όρων δύο συνόλων τιμών. Με απλά λόγια μας δίνει πληροφόρηση για το αν ο μέσος όρος ενός συνόλου τιμών διαφέρει από τον μέσο όρο ενός άλλου συνόλου. Συνήθως η μηδενική υπόθεση δεν προβλέπει διαφορά μεταξύ των μέσων όρων των δειγμάτων συνεπώς με αυτό το τεστ μπορούμε να εξετάσουμε ακριβώς αυτή τη διαφορά. Όπως όμως διαφαίνεται και από τα αποτελέσματα του t-test, στην δική μας περίπτωση, ο μέσος αριθμός ανάμεσα στην παραδοσιακή και στην πειραματική βαθμολόγηση διαφέρει σημαντικά ($t= 6,2$, $DF^6 = 17$, $p<0.001$) όπως επίσης στατιστικά σημαντική είναι και η διαφορά για τις επόμενες δύο δυνάδες, την παραδοσιακή και την αρνητική ($t= 8$, $DF = 17$, $p<0.001$) αλλά και στην δυνάδα της πειραματικής με την αρνητική ($t= 9$, $DF = 17$, $p<0.001$). Στην αξιολόγηση βάσει κριτηρίου αυτό θα δημιουργούσε πρόβλημα καθώς παρατηρούμε από τα t-test, ότι έχουμε στατιστικά σημαντικές διαφοροποιήσεις που μπορεί να έπαιζαν καταλυτικό ρόλο στην περίπτωση που η απόφαση που θα έπρεπε να ληφθεί ήταν σημαντική, όπως η χορήγηση ενός πιστοποιητικού γλωσσομάθειας ή η χορήγηση μιας άδειας διαμονής.

Στο παρακάτω πολύγωνο συχνοτήτων, γίνεται εμφανής η παραπάνω παρατήρηση που οδηγεί στα ίδια αποτελέσματα και με τις τρεις βαθμολογήσεις, αναφορικά με τη συγκρισιμότητα των επιδόσεων των υποψηφίων. Από το ίδιο πολύγωνο συχνοτήτων φαίνεται και η μεγάλη διαφοροποίηση ανάμεσα στην αρνητική βαθμολογία και τις άλλες δύο μεθόδους. Αντίθετα, ανάμεσα στον παραδοσιακό και τον πειραματικό τρόπο βαθμολόγησης οι διαφοροποιήσεις είναι μικρότερες ενώ σε κάποιες περιπτώσεις ταυτίζονται.

Γράφημα 1 Πολύγωνο Συχνοτήτων Τριών Τρόπων Βαθμολόγησης

⁶ DF είναι οι βαθμοί ελευθερίας (Degrees of Freedom) που αφορά στον αριθμό των υποκειμένων μείον 1.

6. Συμπεράσματα

Ως προς την κύρια υπόθεση που διερευνήθηκε, θα μπορούσαμε να καταλήξουμε ότι η ανάλυση των δεδομένων δεν φαίνεται να την υποστηρίζει, καθώς και οι τρεις μέθοδοι βαθμολόγησης δεν αλλάζουν σημαντικά την σειρά των υποκειμένων με βάση τα αποτελέσματα αλλά ούτε αντιστρέφεται σημαντικά το τελικό αποτέλεσμα. Παρατηρήθηκε όμως, ότι ο τρόπος βαθμολόγησης αποτελεί ένα χαρακτηριστικό που μπορεί να επηρεάσει την αποτύπωση της επίδοσης των υποκειμένων στην αξιολόγηση βάσει κριτηρίου και συνεπώς τα αποτελέσματα που εξάγονται από αυτό. Ο προτεινόμενος πολυτομικός τρόπος βαθμολόγησης δείχνει να αποτελεί μια δικαιότερη προσέγγιση προσθέτοντας μεγαλύτερη ακρίβεια και ευαισθησία στο αποτέλεσμα, καθώς αποτυπώνει με κάθε λεπτομέρεια το γλωσσικό επίπεδο ή το βαθμό επίτευξης των γλωσσικών στόχων των υποκειμένων. Επίσης, θα μπορούσε να θεωρηθεί ότι η συγκεκριμένη μέθοδος βαθμολόγησης μπορεί να ωθήσει τους υποψηφίους να εμπλακούν περισσότερο στην διαδικασία αξιολόγησης επιστρατεύοντας την *συμπερασματική στρατηγική* αντί αυτήν της τυφλής επιλογής. Με αυτήν την έννοια, γίνεται χρήση οποιασδήποτε γνώσης και γλωσσικής επίγνωσης διαθέτει ο εξεταζόμενος. Υποθέτουμε ότι το να γνωρίζουν οι υποψήφιοι ότι μπορεί να αμειφθούν βαθμολογικά για τις περιπτώσεις που επιλέξουν περισσότερο συγγενικές απαντήσεις θα τους κάνει να είναι περισσότερο προσεκτικοί στην απάντηση που θα δώσουν. Αυτό θα έχει ως αποτέλεσμα να βαθμολογείται παράλληλα όχι μόνο η γνώση των εξεταζόμενων αλλά και η γλωσσική τους επίγνωση. Τέλος, προτείνεται οι κατασκευαστές ανάλογων τεστ να επιδιώξουν την δημιουργία πολυτομικών ερωτημάτων που θα επιτρέπουν τη χρήση πολυτομικής βαθμολόγησης στα ερωτήματα πολλαπλής επιλογής.

Τα στατιστικά τεστ που επιλέχθηκαν για την ανάλυση των δεδομένων (τυπική απόκλιση, συντελεστές συσχέτισης και τεστ συσχετισμένων / σχετικών τιμών) δείχνουν να είναι κατάλληλα για έρευνες όπου συγκρίνονται διαφορετικοί τρόποι βαθμολόγησης. Αν και ο αριθμός των υποκειμένων ήταν ιδιαίτερα μικρός φαίνεται να υπάρχει έρεισμα για μία συστηματικότερη έρευνα στο θέμα με μεγαλύτερο αριθμό συμμετεχόντων.

ΜΙΑ ΠΡΩΤΗ ΠΡΟΣΕΓΓΙΣΗ ΤΟΥ ΙΔΙΩΜΑΤΟΣ¹ ΤΟΥ ΙΑΣΜΟΥ ΚΟΜΟΤΗΝΗΣ

Γεώργιος Μπατζάκας

Ίασμος, Κομοτηνή

geobatzakas@gmail.com

ABSTRACT

Iasmos is a small town, situated in northeastern Greece, in the province of Komotini, Thrace. The original settlement inhabited by Greeks dates back to the medieval times. During the ottoman period it was called "Yassikioi". The language variety spoken in Iasmos is a Modern Greek dialect preserving medieval and ancient Greek items in its vocabulary as well as certain influences by other languages including Turkish, Albanian and Slavic. This study aims to offer a preliminary description of the local dialectic variety which has been hardly studied although it is still used in everyday life, focusing primarily on the various influences on its vocabulary.

Keywords: Thrace, Iasmos, dialectic variety, βόρεια ιδιώματα

1. Εισαγωγή

Οι διαλεκτικές ποικιλίες της Θράκης αποτελούν εξέλιξη της ελληνιστικής κοινής, όπως άλλωστε και όλες οι νεοελληνικές διάλεκτοι και ιδιώματα, αλλά έχουν και αρκετές λέξεις από την βουλγαρική και την τουρκική. Αξιοσημείωτο είναι ότι, παρόλο που πολλά από τα ιδιώματα αυτά διατηρούνται μέχρι σήμερα ζωντανά και χρησιμοποιούνται τόσο στο ιδιωτικό όσο και στο δημόσιο βίο, τα περισσότερα από αυτά δεν έχουν καταγραφεί από κάποιο επίσημο φορέα. Από την άλλη πλευρά, οι λίγες καταγραφές που αναφέρονται έχουν γίνει από μη ειδικούς. Όπως χαρακτηριστικά αναφέρει ο Ν. Ανδριώτης για τα ιδιώματα της Θράκης (1943-44: 141), «είναι λυπηρό πως οι εργασίες, έντυπες και χειρόγραφες έχουν γίνει σχεδόν όλες από μη ειδικούς δηλ. όχι από γλωσσολόγους, παρά από ερασιτέχνες λόγιους και δασκάλους, που δεν ενδιαφέρθηκαν ή δεν ήξεραν ν' αποδώσουν με μεγάλη φωνητική ακρίβεια το ιδίωμα που μελετούσαν [...] παρ' όλες τις ελλείψεις τους είναι οι μόνες στις οποίες μπορούμε να στηριχθούμε [...] κι όταν σιγήσουν αυτά τα ιδιώματα, τότε η ευγνωμοσύνη των ερευνητών θα είναι μεγάλη».

Παρόλο που τα τελευταία χρόνια υπάρχει αναζωπύρωση του ενδιαφέροντος για τη μελέτη των τοπικών ιδιωμάτων, ελάχιστα πράγματα έχουν αλλάξει για τη γλωσσική χαρτογράφηση της Θράκης από την εποχή του Ανδριώτη. Αξίζει να σημειώσουμε ότι ακόμη και σήμερα αρκετές περιοχές της Θράκης παραμένουν γλωσσικά αχαρτογράφητες, ενώ υπάρχουν και αρκετές γλωσσικές τοπικές ποικιλίες που συρρικνώνονται βαθμιαία από γενιά σε γενιά και κανένας δεν γνωρίζει για πόσο ακόμη θα διατηρηθούν. Η παρούσα μελέτη γίνεται με σκοπό να κάνει ευρύτερα γνωστή μία από αυτές τις γλωσσικές ποικιλίες, το Ιδίωμα του Ιάσμου, και να προκαλέσει το ενδιαφέρον των διαλεκτολόγων, έτσι ώστε να μελετήσουν διεξοδικότερα τη γλωσσολογική κατάσταση της περιοχής.

1.1 Ιστορικά στοιχεία για τον Ίασμο

Σύμφωνα με την Παπαγεωργίου (1995), η ημιορεινή κωμόπολη του Ιάσμου βρίσκεται κτισμένη στους πρόποδες της Ροδόπης, στο μέσο της επαρχιακής οδού Ξάνθης-Κομοτηνής, περίπου στη θέση της αρχαίας Εγνατίας οδού. Οι πρώτοι κάτοικοι του Ιάσμου είναι απόγονοι των κατοίκων του Βυζαντινού

¹ Ως ιδίωμα θεωρούμε τη «γλωσσική ποικιλία που είναι χαρακτηριστική ενός τόπου, αλλά δεν παρουσιάζει σημαντικές διαφορές από την κοινή, ώστε να μπορεί να θεωρείται διάλεκτός της. Ιδιώματα της ελληνικής μπορούν να θεωρηθούν τοπικές παραλλαγές, όπως της Σύμης, της Χίου, των Δωδεκανήσων, του βορειοελλαδικού χώρου, των Κυκλάδων, της Σαμοθράκης κλπ». Ορισμός διαθέσιμος στο <http://www.komvos.edu.gr/glwssa/Lexiko/I/IDIOMA.htm>. Βλ. και Αρχάκης και Κονδύλη (2002: 58).

φρουρίου 'Περιθεώριον' ή 'Αναστασιουπόλεως'. Το φρούριο κατακτήθηκε και καταστράφηκε από τους Τούρκους μεταξύ 1360-1400 μ.Χ. κι έτσι οι κάτοικοι μετακινήθηκαν ανατολικότερα. Σύμφωνα με άλλες μαρτυρίες, ο λόγος της μετακίνησής τους οφείλεται σε επιδρομές πειρατών, μιας και η Αναστασιούπολη ήταν λιμάνι μέσα στη λιμνοθάλασσα της Βιστωνίδας και υπέφερε από τις επιδρομές. Σύμφωνα με τον Οθωμανό περιηγητή Εβλιγιά Τζελεμπί (Παπαγεωργίου, 1995 και Ημερολόγιο Ιάσμου, 1996), ο οποίος πέρασε από την περιοχή γύρω στα 1600 με 1660, ο Ίασμος κατά τη διάρκεια της Οθωμανικής Αυτοκρατορίας ονομαζότανε Γιασί-κιοϊ. Αξίζει βέβαια να σημειωθεί ότι σύμφωνα με μαρτυρίες, το Γιασί-κιοϊ από το οποίο πέρασε ο εν λόγω περιηγητής βρισκόταν δυτικότερα από το σημερινό, αλλά λόγω έλλειψης πόσιμου νερού, είναι δυνατόν να μετακινήθηκε στην σημερινή του θέση γύρω στα τέλη του 1700 και στις αρχές του 1800. Το γεγονός ότι ο πολιούχος του Ιάσμου είναι ο Άγιος Νικόλαος δεν είναι συνηθισμένο για ημιορεινή κωμόπολη και ίσως αποτελεί ένδειξη του ότι ο Ίασμος έλκει την καταγωγή του από την παραθαλάσσια περιοχή της Αναστασιούπολης. Το τοπωνύμιο 'Ίασμος' δημιουργήθηκε μετά την απελευθέρωση από τους Τούρκους και προήλθε από τη γνωστή και αρκετά συνηθισμένη διαδικασία εξελληνισμού τουρκικών τοπωνυμίων. Πιο συγκεκριμένα, η τουρκική ονομασία Γιασί-κιοϊ σημαίνει 'χωριό που βρίσκεται σε πλάτωμα και προέρχεται από τις λέξεις *yassı* 'πλάτωμα' και *kiöi* 'χωριό': πβλ. και τα τοπωνύμια Πλατόκαμπος και Πλατοχώρι), αλλά παραπέμπει ακουστικά (δηλ. ανακαλεί συνειρμικά) λόγω φωνητικής ομοιότητας του πρώτου συνθετικού την ελληνική λέξη 'γιασεμί'. Όπως αναφέρει ο Συμεωνίδης (2010), μετά την απελευθέρωση, υπήρξε προσπάθεια εξελληνισμού των τοπωνυμίων ή οικωνυμίων, η οποία έδειχνε, σε γενικές γραμμές, μια προτίμηση στις πιο αρχαιοπρεπείς λέξεις. Ειδικότερα, στην ονομασία Γιασί-κιοϊ, στην οποία το πρώτο συνθετικό 'yassı' παρέπεμπε φωνητικά στην ελληνική λέξη 'γιασεμί', η λέξη *γιασεμί* αντικαταστάθηκε από το *Ίασμος* με σκοπό να γίνει η ονομασία περισσότερο αρχαιοπρεπής και λόγια.

Το Γιασί-κιοϊ υπήρξε επί Οθωμανικής Αυτοκρατορίας Ναχίες, δηλαδή 'αγροτικός δήμος', στο οποίον κατοικούσαν 2000 γηγενείς Έλληνες και τριάντα (30) τουρκικές οικογένειες. Οι τουρκικές οικογένειες μετανάστευσαν στην Τουρκία μετά την ανταλλαγή των πληθυσμών. Γύρω στα 1850 εγκαταστάθηκαν στο χωριό δεκαπέντε (15) οικογένειες εμπόρων και τεχνιτών πέτρας από την Ήπειρο. Με την ανταλλαγή των πληθυσμών, εγκαταστάθηκαν στο χωριό εβδομήντα (70) οικογένειες προσφύγων, κυρίως από την Ανατολική Θράκη. Έτσι, το τοπικό ιδίωμα του Ιάσμου, διαμορφώθηκε από τους γηγενείς, τους πρόσφυγες και τους Ηπειρώτες. Μετά το 1950 εγκαταστάθηκαν στον Ίασμο είκοσι τρεις (23) οικογένειες Σαρακατσάνων, οι οποίες δεν επηρέασαν το τοπικό ιδίωμα σε μεγάλο βαθμό, ενώ από το 1960 και μετά, αρχίζουν να εγκαθίστανται στην περιοχή και αρκετές οικογένειες Πομάκων, οι οποίες μετακινήθηκαν από ορεινότερες περιοχές. Πομάκων. Στον Ίασμο κατοικούν ακόμη ορισμένες οικογένειες Αθίγγανων, ενώ από το 1992 και εξής, εγκαταστάθηκαν στην περιοχή περίπου δέκα (10) οικογένειες Ελλήνων από το Σοχούμι της Γεωργίας.

Αξίζει τέλος να αναφέρουμε ότι για το ιδίωμα του Ιάσμου δεν υπάρχουν προηγούμενες μελέτες, με αποτέλεσμα να είναι εξαιρετικά δύσκολο να γίνει σύγκριση της τωρινής μορφής του ιδιώματος με την ντοπιολαλιά που χρησιμοποιούσε ο γηγενής πληθυσμός πριν την άφιξη των προσφύγων.

1.2 Περί του ιδιώματος του Ιάσμου

Στην περιοχή του Ιάσμου φαίνεται να πληρούνται τα περισσότερα κριτήρια που χαρακτηρίζουν το φαινόμενο της *διμορφίας* (Αρχάκης & Κονδύλη 2002:112-113, Μοσχονάς 2002:6-10) ή *διαδialeκτισμού* (Κακριδή 1986), υπάρχει δηλαδή παράλληλη χρήση δύο κωδίκων, της κοινής νεοελληνικής και του τοπικού ιδιώματος. Όπως είναι αναμενόμενο, η συχνότητα χρήσης του κάθε κώδικα εξαρτάται από το βαθμό της γνώσης των ομιλητών. Όταν υπάρχει επαρκής γνώση και των δύο γλωσσικών συστημάτων, η διγλωσσική συμπεριφορά (διμορφία) των ομιλητών χαρακτηρίζεται από συμπληρωματική κατανομή (δηλ. συγκεκριμένα περιβάλλοντα ή και θέματα απαιτούν μια συγκεκριμένη γλωσσική συμπεριφορά). Παράλληλα με τους διγλωσσους ομιλητές, υπάρχει ένας περιορισμένος αριθμός μονόγλωσσων ομιλητών, που χρησιμοποιούν μόνο τον διαλεκτικό κώδικα. Πρόκειται κυρίως για γυναίκες και ηλικιωμένους, των οποίων ο αριθμός μειώνεται σταδιακά.

Όπως προκύπτει από τα στοιχεία που παραθέσαμε στην προηγούμενη παράγραφο, το ιδίωμα του Ιάσμου προήλθε κυρίως από την ανάμιξη των ιδιωμάτων που μιλούσαν οι Έλληνες κάτοικοι του Περιθεωρίου (Αναστασιουπόλεως), οι Έλληνες πρόσφυγες της Ανατολικής Θράκης και οι έμποροι ή τεχνίτες Ηπειρώτες που εγκαταστάθηκαν στην περιοχή. Όπως είναι αναμενόμενο, το λεξιλόγιο του τοπικού ιδιώματος παρουσιάζει μεγάλη ποικιλία. Περιλαμβάνει λέξεις της αρχαίας και μεσαιωνικής ελληνικής (π.χ. *κοντυλάω*), αλλά και λέξεις που προέρχονται από τα ιδιώματα των Ελλήνων της Ανατολικής Θράκης και τα βλάχικα. Υπάρχουν επίσης δάνειες λέξεις από την ιταλική, την βουλγαρική (π.χ. *έντζαμου*) και την τουρκική (π.χ. *γυμπάς*), πάντα κατά την προσωπική ερμηνεία του ερευνητή.

Τέλος, θα πρέπει να αναφερθεί ότι στον Ίασμο ομιλείται επίσης μαζί με το ελληνικό ιδίωμα και η πομάκικη γλώσσα. Πρόκειται για μια γλώσσα που μιλιέται από τους Έλληνες μουσουλμάνους (Πομάκους) που κατοικούν στον Ίασμο και σε άλλες περιοχές της Θράκης, η οποία έχει ως βάση της τη βουλγαρική και την τουρκική γλώσσα, με πολλές ελληνικές προσμειξεις (Παναγιωτίδης 1997). Αποτελεί γεγονός αδιαμφισβήτητο ότι συγκριτική μελέτη του ιδιώματος του Ιάσμου και της πομακικής θα ήταν ιδιαίτερα χρήσιμη όχι μόνο από γλωσσολογική αλλά και από ιστορική άποψη.

1.3 Η καταγραφή του ιδιώματος του Ιάσμου

Η προσπάθεια καταγραφής του τοπικού ιδιώματος του Ιάσμου έχει ξεκινήσει εδώ και εννέα χρόνια. Καρπός αυτής της προσπάθειας είναι ένα γλωσσάριο το οποίο περιλαμβάνει μέχρι στιγμής περίπου 2.000 μονολεκτικά και πολυλεκτικά λήμματα, δηλαδή λέξεις και εκφράσεις. Το γλωσσάριο βασίζεται σε υλικό που συλλέγει ο συγγραφέας με βάση προφορικές μαρτυρίες της οικογένειάς του καθώς και του ευρύτερου συγγενικού και κοινωνικού κύκλου μέσα από την προσωπική επαφή που έχει καθημερινά με όλους τους κατοίκους του Ιάσμου. Η προσπάθεια ολοκλήρωσης του γλωσσαρίου δυσχεραίνεται μεταξύ άλλων από το γεγονός ότι όλο και λιγότεροι ομιλούν πλέον το ιδίωμα. Οι περισσότεροι ομιλητές του ιδιώματος είναι ηλικιωμένοι ομιλητές, γεγονός που δείχνει ότι το ιδίωμα κινδυνεύει να εξαφανιστεί. Οι ομιλητές που βρίσκονται στην ηλικία των σαράντα ετών χρησιμοποιούν ορισμένες μόνο λέξεις του ιδιώματος, ενώ οι νεότεροι ομιλητές δεν το χρησιμοποιούν καθόλου. Αξιοσημείωτο είναι το γεγονός ότι το ιδίωμα χρησιμοποιείται και διασώζεται κατά κάποιον τρόπο από αυτούς που έχουν μετακομίσει σε μεγαλύτερες πόλεις (π.χ. Αθήνα, Θεσσαλονίκη) ή στο εξωτερικό.

Τα λεξικογραφικά άρθρα του γλωσσαρίου του ιδιώματος του Ιάσμου περιλαμβάνουν εξής:

- (1) τον ληματικό τύπο (ή λήμμα)
- (2) την γραμματική κατηγορία του λήματος (ουσιαστικό, ρήμα, επίρρημα, κλπ.)
- (3) την προφορά του λήματος σύμφωνα με το Διεθνές Φωνητικό Αλφάβητο
- (4) το ερμήνευμα (ορισμό) του λήματος
- (5) ένα παράδειγμα χρήσης από την καθομιλουμένη του χωριού
- (6) συνώνυμα και αντώνυμα
- (7) ετυμολογία, όπου αυτό είναι δυνατό

Στις επόμενες ενότητες επιχειρείται μια πρώτη περιγραφή ορισμένων φωνολογικών, μορφολογικών, συντακτικών και λεξιλογικών χαρακτηριστικών του ιδιώματος με βάση την υπάρχουσα βιβλιογραφία και το υλικό που συλλέχθηκε για το λεξικό του ιδιώματος του Ιάσμου.

2. Γενικά χαρακτηριστικά του ιδιώματος

Το ιδίωμα του Ιάσμου ανήκει στα βόρεια νεοελληνικά ιδιώματα, όπως η πλειοψηφία των ιδιωμάτων της Μακεδονίας και της Θράκης (Ανδριώτης 1943: 146)². Σύμφωνα με τον Χατζιδάκι (1905) τα νεοελληνικά ιδιώματα χωρίζονται σε δύο μεγάλες κατηγορίες τα *βόρεια* και τα *νότια* με μια διαχωριστική γραμμή, η οποία τυχαία ταυτίζεται με τον 38ο παράλληλο. Η γραμμή αυτή περνά από τον Κορινθιακό κόλπο, από τα σύνορα Αττικής-Βοιωτίας, κόβει στην μέση την Εύβοια, διασχίζει το Αιγαίο περνώντας μεταξύ Χίου και Σάμου και καταλήγει στη Μ. Ασία, στα βόρεια της Σμύρνης (βλ. και Ανδριώτης, 1943-44:131-185)

Βασικό χαρακτηριστικό των βορείων ιδιωμάτων είναι ο μειωμένος φωνηεντισμός, δηλαδή η στένωση των άτονων φωνηέντων [e] και [o] και η τροπή τους σε [i] και [u] αντίστοιχα, καθώς και η σίγηση του τελικού [i] και των [i] και [u] μέσα στη λέξη, όταν δεν τονίζονται (π.χ. *ου λόγους, έρχιτι, π'λί, β'νό, χ'λιαρ'*). Στη Θράκη, τα σύνορα του βορείου φωνηεντισμού, αρχίζουν από τη Ραιδεστό, και περνούν ανατολικά του Λουλέ Μπουργκάζ και δυτικά των Σαράντα Εκκλησιών. Από βόρειο φωνηεντισμό επίσης χαρακτηρίζονται τα ιδιώματα και οι διαλεκτικές ποικιλίες της ελληνικής (δυτικής) Θράκης. Κατά συνέπεια το ιδίωμα του Ιάσμου συγκαταλέγεται στα βόρεια ιδιώματα και παρουσιάζει τα συγγεκριμένα χαρακτηριστικά όπως αναφέρονται παραπάνω

2 Ο Ανδριώτης (1943:146) κατατάσσει στα βόρεια ιδιώματα της Θράκης αυτά της περιοχής της Κομοτηνής, ενώ παράλληλα αναφέρει: «για τα ιδιώματα της Δυτικής Θράκης είχε προτείνει ο Σ. Κυριακίδης την υποδιαίρεση σε τρεις περιοχές, α) Κομοτηνής-Ξάνθης, β) Μαρώνας-Χιρκί, γ) Σουφλίου.»

2.1 Φωνητική-φωνολογία

Η ενότητα αυτή περιλαμβάνει ορισμένες φωνητικές/φωνολογικές παρατηρήσεις για το ιδίωμα με βάση την υπάρχουσα βιβλιογραφία και το υλικό που συλλέχθηκε για το λεξικό του ιδιώματος του Ιάσμου.

Βασικά χαρακτηριστικά του ιδιώματος είναι τα εξής:

- (1) *Κώφωση*: Τροπή των άτονων φωνηέντων [e] σε [i] π.χ. *έπεσε* [épesɛ] > *έπισι* [épisi] και [o] σε [u] π.χ. *ψωνίζαμε* > *ψούν'ζαμι* [psúnizami].
- (2) *Συγκοπή*: Αποβολή πρωτογενών άτονων φωνηέντων, δευτερογενών και καταλήξεων των φωνηέντων [i] και [u]. π.χ. *αψηλοτένταρος* > *αψ'λοτένταρος* > [apʃlotédaros] (ο ψηλός), *τηγάνι* > *τ'γαν'* [tɣáñ], *τσεκούρι* [tsekouri] > *τσ'κούρ'* [tʃkúr].
- (3) *Ανάπτυξη ευφωνικού φθόγγου* [j]: Σε ορισμένες περιπτώσεις έχουμε ανάπτυξη ευφωνικού φθόγγου γί [j] κάτι που μπορούμε να βρούμε, σύμφωνα με τον Ψάλτη (1905: 38-40), σε όλα τα Θρακικά ιδιώματα. π.χ. *αγαρεία* > *αγαργιά* [agargjá], *δες* > *αδιέ* [aðje], *δες* > *διέ* [ðje].
- (4) *Ανάπτυξη ευφωνικού ή προθετικού* [a] Παρατηρούμε την ανάπτυξη ευφωνικού [a]³ μπροστά από ορισμένες λέξεις, π.χ. *αψ'λά*, *αψ'λός*. Ακόμη στο γλωσσάρι του Μπατζάκα για το ιδίωμα του Ιάσμου συναντάμε το λήμμα *αψ'λοτένταρος* < *αψηλός* + *τεντωμένος*, *αβάτσ'νο* > *ανάτ'νο*, *αδρένιο* > *αδρέño*.
- (5) Με την αποβολή των άτονων [i] και [u] και τη δημιουργία νέων συμφωνικών συμπλεγμάτων που προκύπτουν από αυτή, όπως αναφέρει ο Ανδριώτης (1943-44:134-135) «γεννιούνται α) διάφορες νέες αλλοιώσεις στα σύμφωνα, καθώς είναι συμμορφώσεις των νέων συμφωνικών συμπλεγμάτων στους βασικούς φωνητικούς νόμους της Νέας Ελληνικής που δεν ανέχονται κοντά δύο σύμφωνα εξακολουθητικά ή δύο στιγμικά και αλλοιώνουν το ένα, π.χ. *δ(ι)λάβι* > *ντ'λάβ'*» (έτσι και στον Ίασμο *δ(ι)χάλι* > *τ'χάλ'*) - «α.1) ή αφομοιώσεις ηχηρών συμφώνων προς άηχα, π.χ. *δ(ι)κός* > *θ'κός*, *β(ου)τσι* > *φ'τσι*» (το ίδιο και στον Ίασμο), «α.2) ή άηχων προς ηχερά, π.χ. *π(η)γάδι* > *β'γάδ'*» (πβλ. *ποντικός* > *βουδκός* στον Ίασμο), «β) Διάφορες νέες αποβολές συμφώνων από νέα δυσκολοπρόφερτα συμφωνικά συμπλέγματα, π.χ. *κάρβουνα* > *κάρνα*, *κουράστ(η)κα* > *κράσκα*, *κρύφτ(η)κα* > *κρύφ'κα*» (και στον Ίασμο), «γ) απλοποιήσεις ομοίων συμφώνων, π.χ. *δώς(η)ς* > *δώς'*, *δέν(ου)ν* > *δέν'*» (και στον Ίασμο), «δ) Διάφορες αναπτύξεις νέων φωνηέντων σε δυσκολοπρόφερτα νέα συμφωνικά συμπλέγματα, ιδίαν στο τέλος των λέξεων, π.χ. *αλεύρ(ι)* > *αλεύρ* ([alevir])» (βλ. και *παίξεις* > *παίειζ*, Ίασμος).
- (6) *Εκκρουση ασθενέστερου φωνήεντος* π.χ. *αββερβελλωσιά* > *αββερβελλωσά* [avɛrvelošá], *εκεινάς* > *εκ'νάς* [eknás], *ετσινάς* > *ετσ'νάς* [etsnás], *γαϊδούροφόρτι* > *γαδροφόρτ'* [ɣadɾofórt].
- (7) Ακόμη παρατηρούνται α) αφαίρεση αρχικού [ε], *ελαφρύς* > *λαφρύς* β) τροπή αρχικού ε > ο, *Εβραίος* > *Οβραίός*, γ) τροπή ε > ου, *περπάτα* > *πουρπάτει*, κλπ., ενώ έχει εκλείψει πλέον η ρηματική κατάληξη σε [u], π.χ. *νταγιαντίζω* και όχι *νταγιαντίζου*, όπως παλιότερα.
- (8) Παρατηρείται ο τονισμός της τέταρτης από το τέλος συλλαβής π.χ. *έπαιζαμι*, *έφαγαμι*, *έκαναμι* (βλ. και Ντελόπουλος, 2000:337).

2.2 Μορφολογία -Σύνταξη

Ας σταθούμε τώρα λίγο παραπάνω σε μορφολογικά και συντακτικά χαρακτηριστικά του ιδιώματος του Ιάσμου. Θα δώσουμε έμφαση εδώ τόσο σε ζητήματα παραγωγής (υποκοριστικά) όσο και κλίσης (δίνοντας κυρίως έμφαση στη μορφολογία του ρήματος). Επίσης, θα γίνει σύντομη αναφορά στη μορφή του άρθρου.

2.2.1 Υποκοριστικά επιθήματα

Σχεδόν σε όλη την περιοχή της Θράκης και σε όλα τα ιδιώματα τα υποκοριστικά επιθήματα είναι ίδια: *-οὐδ'ς* (*-οὐδης*), *-έλ'ς* (*-έλης*). Ας δούμε ορισμένες περιοχές:

3 Ονομάζεται και προθετικό -α- : βλ. Χαραλαμπίκη (1999:232).

Ίμβρος (Ανδριώτης 1930:185) : -οὐδ' και πιο σπάνια -έλ'λ', -αρ', -ιδ':

αβιλούδ' , χουραφούδ'* – πιδέλ'λ', διδρέλ'λ'*⁴

Λήμνος (Κοντοσόπουλος 2008:70) : -οὐδ' και -έλ', που θυμίζουν Λέσβο

χειρούδ' , πλούδ'* , πουδαρέλ'**

Λήμνος (Κοντονάτσιου 1989:79β) :

μκριλούδ' (μικράλ'+ουδ'), θμαρέλ'

Θάσος (Τομπαΐδης 1967:38-39) : -οὐδ'ς, -οὐδα, -οὐδ' και -ελλ', -έλ'λ'ς

Μανουλούδ'ς , αργονούδα, δασκαλούδ' – τσκρέλ'λ', Κμπαρέλ'λ'ς*

Σαμοθράκη (Κατσάνης 1996:33) : -οὐδ' και -έλ'

ψουμούδ' , κταβούδ'* – λαδέλ', κουρτσαδέλ'**

Ειδικότερα, στο ιδίωμα του Ιάσμου χρησιμοποιούνται τα εξής επιθήματα:

α) -οὐδ', -οὐδα :

αγουρούδ', γατούδ', φανταούδα , αραμπούδα

β) -έλα, -έλ' (-έλι), *πληθ.* -έλια:

κορτσέλα, μπαρμπαδέλ', σβολ'τσέλια (μικροί σβόλοι)

2.2.2 Ρήμα

Ειδικότερα, για το ρήμα παρατηρούνται τα εξής:

α. Υπάρχει μεταπλασμός των ρημάτων από -αίνω σε -ίσκω, πχ. *πεθαίνω>πηθνίσκω, υγιαίνω>γιανίσκω*

β. Η προστακτική του β' ενικού στο ιδίωμα του Ιάσμου είναι ως εξής:

- β' ενικό πρόσ.: *πλύθτσι / κοιμήθ'τσι / ντύνουσ'*, (πλύσου / κοιμήσου / ντύσου)

- β' πληθυντικό πρόσ.: *πλύθτσιτι / κοιμήθτσιτι* (πλυθείτε, κοιμηθείτε)

2.2.3 Επίρρημα

Παρατηρείται επίρρημα με δεικτικό <να> ή προέκταση της αιτιατικής του ενικού των αντωνυμιών κατά ένα -να (Ντελόπουλος 2000: 336):

άλλο + να > άλλονα (λήμμα από την γλώσσα του Καβάφη, Μηνάς 2004: 58)

αυτή + να > αυτηνιά, αυτής + να > αυτηνιάς (αυτηνιάς είναι)

αυτοί + να > αυτοινοί (αυτοινοί θα τα μάσουν),(τί γράφουν απάν' τ'ς αυτοινοί;)

γενική πληθ. αυτοί + να > αυτοινών

εκεί + να > εκεινά > εκ'νά > εκνά, εκεί + να + ζ > εκεινάς > εκ'νάς > εκνάς,

εκεί + να > εκεινά > 'κ'να > κ'na,

έτσι + να > ετσινά > ετσ'νά > etšná, έτσι + να + ζ > ετσινάς > ετσ'νάς > etšnás,

όλοι + να > ουλ'νοί, με κώφωση του αρχικού άτονου -ο- σε -ου-

πολοί + να > πουλ'νοί, με κώφωση του αρχικού -ο- σε -ου-

τόσο + να > τοσονά > tosoná,

τόσο + να + ζ > τοσονάς > tosonás

(πληθ.) τόσο + να > τοσονοί > tosoní

(πληθ.) τούτα + να > τουτανά > tutaná

(πληθ.) τούτα + να + ζ > τουτανάς > tutanás

2.2.4 Το άρθρο

Το άρθρο του αρσενικού γένους μπορεί να είναι είτε [u] <ου>, δηλαδή με στένωση του <ο>, είτε [i] <η>, δηλαδή ίδιο με το θηλυκό, είτε να λείπει τελείως. Ενώ στον Αποστολίδη (1941:280-285) διαβάζουμε: «Τα γένη, καθώς συνέβαινε και στην αρχαία γλώσσα, τα ονόματα ήτανε τριών γενών και άλλαζαν αδιαφόρως το γένος τους από αναλογία προς άλλα όμοια τους πχ. τα αρσενικά γίνονται θηλυκά και ουδέτερα: *η αχερώνα* (και στον Ίασμο), *η φράχτ'*, τα θηλυκά γίνονται αρσενικά και ουδέτερα: *η νυχικιά > το νυχικό* (και στον Ίασμο), κι ακόμη *η γρίπη > ο γρίπος, ο ζάχαρ'ς*, τα ουδέτερα

4 Με [*] σημειώνονται οι λέξεις που απαντώνται και στο ιδίωμα του Ιάσμου.

γίνονται αρσενικά και θηλυκά, το στόμα> ο στόμας (και στον Ίασμο), μερικά ονόματα απαντούσαν σε δύο γένη, ο γρόθος κ' η γροθιά, το βράδυ κ' η βραδιά.

2.3 Λεξιλόγιο

Ας στρέψουμε τώρα την προσοχή μας σε λέξεις και εκφράσεις που περιλαμβάνονται στο υπό έκδοση λεξικό του ιδιώματος του Ιάσμου:

- | | | |
|----|--|--|
| 1. | η γιμπας ουμι τσαρακμάν'ς,
τσαέζ ντο καιρό, να βγει η τσιτσ'μούδα, | ο πατέρας μου αδύνατος
κάθεται σε στάση προσοχής και σύμφωνα με τον
ίσκιο που ρίχνει ο ήλιος στο σώμα του,
προσπαθεί να υπολογίσει τι ώρα είναι |
| 2. | η γήμα, στη κβέτσα έκανε τζ'βιά, | η μάνα, στην πήλινη χύτρα έβραζε κρεμμύδια |
| 3. | ο μπασάς, σ' ένα κουρπάτσ' απάν',
τσακτσάν'ζι κουτσανούδια, | ο μεγάλος αδερφός, σε ένα κομμένο κορμό
επάνω έσπαζε αμύγδαλα |
| 4. | κι η άμια, πολέμαγε, | και η θεία, προσπαθούσε, |
| 5. | τ'ς κουτρούβες να βάλ' στην αράδα. | τις γλάστρες να βάλει στη σειρά. |
| 6. | τα τσ'κούρια τ' έχασε; | τι δουλειά είχε εκεί πέρα; |
| 7. | το καλοκαιρούδ' του Θεοχαρούδ' | καλοκαιρία μέσα στον Οκτώβρη |
| 8. | τα κάμσι | πέθανε |
| 9. | τσαταλών' η μπρίτσκος κι ανεβαίν' ο μαυρογιάν'ς τι είναι; Η πυροστιά και το καζάνι,
(παλιό αίνιγμα) | |

2.3.1 Αρχαίες ελληνικές λέξεις στο ιδίωμα του Ιάσμου

Το ιδίωμα του Ιάσμου διασώζει πολλές λέξεις που φαίνεται να προέρχονται από την αρχαία ελληνική, οι οποίες είναι σε ευρεία χρήση ακόμη και σήμερα από τους κατοίκους αυτής της κωμόπολης. Αυτές οι λέξεις περιλαμβάνουν, μεταξύ άλλων, και τις παρακάτω:

- (1) *λάγγιρος*, ο, ουσιαστικό [lágiros]
η μύρα, το λευκό κρασί και γενικά κάθε ξανθό αλκοολούχο ποτό πχ. *πώς μπορείτε και ντο πίν'τε αυτό ντο λάγγιρο;*
(το λάγκερο και ο λάκυρος = το κρασί από τσίπουρο, Ντελόπουλος, 2000:338 / ο λάγγερας = ο στεμφυλίτης οίνος, το τσίπουρο Πάπυρος Λεξ. / λάγκυρος: το δριμύ, όξος, όπερ προσφάτως κατεσκευάσθη εκ σταφυλίων, η λέξη εν χρήσει εν Στενημάχω (Λαμπουσιάδης, 1933:310). Ως λάκυρος>λάγκερος, αναφέρεται στην Αρτάκη κατά τον Φιλήντα (1933:360).

- (2) *καμτσουρίζω*, ρήμα [kamtsurízo]
έχω λίγη δύναμη, είμαι άτονος - αναφέρεται για φώτα, λάμπες ή μπαταρίες πχ. *η μπαταρία είναι πεσμέν' και τα φώτα καμτσουρίζουν*
(καμμύζω+τσιρίζω, σαν μισοκλείνω τα μάτια, καμμύω, απαντάται και στη γλώσσα του Σκεπαστού Αν. Θράκης κατά τον Πετρόπουλο (1943-44:219).

- (3) *κοντυλάω*, ρήμα [kodiláo]
νυστάζω, δεν μπορώ να κρατήσω το κεφάλι μου όρθιο και μπερδεύομαι πχ. *αφού κοντυλάς, για δε πα να κοιμηθείς;*

Και κει που χάσκει αθύρωτο το πόρταλο, στη μέση
του τοίχου, όπου κονδυλά κάθε στιγμή να πέση,
μεσ' στο σκοτάδι το βαθύ,
άγρια γλαμπυρίζουνε, σαν κάρβουν' αναμμένα,
και σημαδεύουν τη φωτιά δυό μάτια λυσσιασμένα
(Γ. Βιζυηνός, 1996:243, "Η μητέρα των επτά")

(κοντυλώ=χτυπώ με τα κέρατα (Ντελόπουλος, 2000:338), στις Σαράντα Εκκλησιές απαντάται ως ταλαντεύομαι όπως το κοντύλι του καλαμιού (Παπαχριστοδούλου, 1929:457).

(4) *ανγκανός*, ο, ουσιαστικό [anganós]

το ασπράγκαθο, το γαϊδουράγκαθο (στη βοτανική *Notobasis syriaca*, της οικογενείας συνθέτων-*Compositae*). Πρόκειται για λέξη της Ανατολικής Θράκης, που φέρανε μαζί τους οι πρόσφυγες και δεν χρησιμοποιούν οι ντόπιοι

(Ως γαϊδουράγκαθο, απαντάται στις Σαραντά Εκκλησιές (Παπαχριστοδούλου, 1933 :324). Αγκανός: είναι ο μτγν. ὁ ἄκον, τοῦ ἄκανος: «ὁ ἄκον ὁ ἐν τῷ Λιβάνῳ», Βασίλ. Δ, δ' 9, «καί συνεπάτησαν τὴν ἄκανα» (αφτού). Το -κ- γίνεται -γκ- από επίδραση του ν αγκάθι, Φιλήντας, Θρακικά τόμος 4ος, σελ.275. Στο γλωσσάρι Τσακηλίου, αγκανός = θάμνος ακανθωτός χρησιμοποιούμενος προς περιφραξιν κήπων (Χουρμουζιάδης, 1940:369). Στη Σωζόπολη, είναι «φυτό μονοετές ακανθώδες, αλλαχού γαϊδουράγκαθο (Παπαϊωαννίδου, 1944:290) ενώ στην κυπριακή απαντάται στο *αγκανίζω* = *γκαρίζω* (Μηνάς, 2004:418).

(5) *ζνίχ'ι*, το, ουσιαστικό [žnīh]

ο σβέρκος, παλιά όταν όλοι τους φορούσαν ποτούρια, όταν έπρεπε να κάνουνε την ανάγκη τους, έλυναν το υφασμάτινο ζωνάρι τους και το κρεμούσαν στον σβέρκο τους, πχ. *α! το ζνίχ' σ' / τον άρπαξε απ' το ζνίχ' / έκατσε πανωθιό στο ζνίχι μ' / τον πήρε στο ζνίχι τ' πάνω και τον έκανε τσουτσ'κα* = *καβαλαρία έκανε πάνω στο σβέρκο του ένα μικρό παιδί* (πρβ Κ. Βάρναλης «στο κρουστό σου ζνίχι το μαυριδερό»). Ετυμολογικά: ζνίχι < αρχ. ζνίχιον = *δερμάτινη λωρίδα, λουρί παπου-τσιού* <ζεύγνιμι<ΙΕ. ρ. *jeug*=ενώνω. Με την ίδια σημασία συναντάται και στα Άβδηρα (Δανδαλίδης, 1993:105).

2.3.2 Λέξεις από τη σλαβική/βουλγαρική

(1) *έντζαμου*, επίρρ. [éndžamu]

έτσι, άρα, λοιπόν, με τα πολλά, που λέτε, ας πούμε. Πχ. *έντζαμου, τι έχ' να πεις; / έντζαμου έφτασε κάποια στιγμή.*

Βουλγάρικο *imam enja* = έχω έννοια, προσέχω, δάνειο από την ελληνική λέξη ‘έννοια=έννοια’ (Ντελόπουλος, 2000:335).

συν.: ήλεμ

(2) *μλέτσκα*, μετοχή άκλιτη [mlétška]

βρέχομαι, γίνομαι μούσκεμα, συνήθως στην φράση *ίνγκα μλέτσκα*, ως εξής: *έγινα μούσκεμα< γίνηκα μούσκεμα <'ινκ'α μλέτσκα* [ingamletška]

(3) *πούχνε*, προστακτική [rúxne]

μη μιλάς, βούλωσε το πχ. *πούχνε συ πάλι*

(βουλγ. *лыкам* = σκάω)

συν. μούλνε

(4) *ζαμακώνω*, ρήμα [zamakóno]

αορ. ζαμάκωσα

χώνω, προσθέτω, προσπαθώ με δόλο να δώσω ή να πουλήσω κάτι χαμηλής ποιότητας ακριβά. Πχ. *ποιος στα ζαμάκωσε αυτά τα φαπούλια, δεν βράζουν με τίποτε*

(σλαβ. ζαμόκ = κλειδαριά, αυτολεξεί σημαίνει κλειδώνω (Παπαχριστοδούλου,

1934:212 και

Φιλήντας, 1933:279).

Στο Σαρανταεκκλησιώτικο γλωσσάριον α) *βάζω* έναν στη γωνία και τον περιορίζω, β) *χτυπώ* γροθιές, βαρώ γ) *κάνω* κάτι ξένο δικό μου δ) *χορταίνω* (Παπαχριστοδούλου, 1934:212) ενώ στα Άβδηρα, το *ζαμακώνω*, έχει την έννοια του αρπάζω, οικειοποιούμαι (Δανδαλίδης, 1933:104).

(5) *σορβάτκα*, η. ουσ. [sorvátka]

το ξινόγαλο ή ποτό το οποίο έχει ξινίσει, το οξύ, το τσουχτερό ποτό.

πχ. *πιάσε μια σορβάτκα / δεν πίνεται, σορβάτκα ίνκε* (δεν πίνεται, πολύ ξινό έγινε).

(βουλγ. *Сорватка*)

«Το υπόλειμμα του γαλάτου, μετά την αφαίρεση του βουτύρου είναι το δουρβανιστόν οξύγαλον του Πτωχοπρ. Ήτο υδρόγαλα του Δουκάγγ. Αυτό οι Πανορμιώτες το λένε: η τσορβάτκα, λέξη σλαβική (Φιλήντας, 1933:273)».

2.3.3 Λέξεις από την τουρκική⁵

- (1) *γιμπάς*, η, ουσιαστικό άκλιτο [jbas]
ο πατέρας, ο μπαμπάς πχ. *αύριο η γιμπάσουμ, έχ' γενέθλια*
Η χρήση του θηλυκού αποκλειστικά άρθρου παρά το ότι αναφέρεται σε αρσενικό γένος είναι ένα σύνηθες φαινόμενο στα ιδιώματα της Θράκης - και όχι μόνο. Στη συνέχεια έχουμε ανάπτυξη ευφωνικού [j], άρα το άρθρο γίνεται γη + μπας (από το τουρκ. bas = αρχηγός, με την έννοια 'ο αρχηγός επί της γης' (Σταγάκη, 2003:35:α). Ενδιαφέρον είναι ότι η λέξη δεν κλίνεται, παρότι ουσιαστικό.
- (2) *γιαριά* επίρρημα [jarjá]
μισά-μισά πχ. *γιαργιά φλουριά δε μετράς {παροιμία}*
(τουρκ.yari =μισό (Σταγάκη, 2003:337:α)
- (3) *γνάρια* τα, ουσιαστικό πάντα πληθ. [jária]
το βραχύδες βουνό, ιδίως η τοποθεσία Αστραία, όπου βρίσκονται τα Θρακικά Μετέωρα.
Στην Κρήτη συναντάται το τοπωνύμιο Άσπρα Γυάρια, μιας και το σχήμα των βράχων μοιάζει κυλινδρικό, όπως αναφέρει ο Μηνάς (2004:142) πχ. *θα πάμε στα γνάρια* (τουρκ. yar = κυλινδρικό μεταλλικό μέτρο των δημητριακών).
- (4) *κοτ*, το, άκλιτο ουσιαστικό [kot]
το μικρό βουβαλάκι καθώς και άτομο πολύ λερωμένο, επειδή το βουβαλάκι κυλιέται στις λάσπες
πχ. *Ίδιο το κότ 'ίνκις, μ' ήρθαν κότια, μεσ' στις λάσπες*
(τουρκ.kot =το τζίνι)
συν.: μαλάκ', μπ'ντέκα
- (5) *κουλτανίζω* (ρήμα) [kultańízo]
αορ. *κουλτάν'σα*,
ανακατεύω κάτι ταρακουνώντας το, πχ. *κουλτάν'σει το γιαούρτ' και το 'κανε σίρκα*
Μέσ. φων. *κουλτανίζομαι*, αορ. *κουλτανίσκα*, μτχ. *κουλταν'σμένος -η-ο* ανακατεύονται τα σωθικά μου με χτυπήματα, ιδίως όταν είμαστε καβάλα σε ζώο ή πάνω σε όχημα.
πχ. *τα τζιέρια μ' κουλτανίσκαν*
(κουλτούμι< τουρκ. koltuk = μασχάλη

2.3.4 Λέξεις από την αλβανική

- (1) *χαλές* ο, ουσιαστικό [xalés]
το αποχωρητήριο, ο καμπινέζ
πχ. *έχ' ένα στόμα ίδιο χαλέ*
(αλβαν.hale)
συνώνυμα: άκρη, κραδιάστρα
- (2) *γκέγκα* η, ουσιαστικό [géga]
η γκλίτσα του βοσκού
πχ. *έβαλ' τα χερίά τ' πάν' σνη γκέγκα και κ'μούνταν όρθιος*
(αλβ. gege=ονομασία Αλβανικής φυλής)

2.3.5 Ισόγλωσσα

Στην παράγραφο αυτή παραθέτουμε τον πίνακα του Κατσάνη (1996:33), που περιλαμβάνει κοινές λέξεις των ιδιωμάτων της βόρειας Ελλάδας και των νησιών, συμπεριλαμβάνοντας και λέξεις από το ιδίωμα του Ιάσμου.

⁵ Η διασταύρωση των λημμάτων έγινε με τη βοήθεια του ΤΟΥΡΚΟ-ΕΛΛΗΝΙΚΟΥ Λεξικού, εκδ. Καλοκάθη 2003, επιμέλεια Μ. Σταγάκη

Σαμοθράκη	Ίμβρος	Λήμνος	Θάσος	Λέσβος	Θράκη	Ίασμος
Γύλαμινους: ύλη φερτη από νερά	ίλαμινους	Ύλαμινους	Λαμώνω	-	-	λαμώνω: μπαζώνω
Ακάλλου: το κάλλαιον	ακάλλους	Κάλλους	-	-	κάλλους	κάλλους
Σφίδα: η πίθος	σφίδα	Σφίδα	Σφίδ	σφίδα,-ούλα	-	σφίδα
Ψιακή: η φαρμάκι	ψιακή	Ψιακή	Ψιακή	Ψακή	-	ψακί:(το)

Πίνακας Κοινές λέξεις μεταξύ ιδιώματος Ιάσμου, ιδιωμάτων Β. Ελλάδας και νησιών

3. Αντί επιλόγου

Η εργασία αυτή αποτελεί περισσότερο μια πρώτη απόπειρα παρουσίασης στην επιστημονική κοινότητα κάποιων από τα χαρακτηριστικά του ιδιώματος του Ιάσμου, ενός βορείου ιδιώματος, που μιλιέται στην περιοχή της Θράκης, παρά μια προσπάθεια για εξαντλητική περιγραφή του ιδιώματος από φωνολογική, μορφολογική και συντακτική σκοπιά. Αποτελεί μέρος μιας ευρύτερης προσπάθειας καταγραφής του ιδιώματος η οποία θα ολοκληρωθεί με την έκδοση ενός γλωσσarium του ιδιώματος, το οποίο κινδυνεύει να χαθεί κάτω από τη σαρωτική επίδραση της πρότυπης νεοελληνικής, παρά το γεγονός ότι σήμερα ακόμη χρησιμοποιείται ευρέως από τους μεγαλύτερους. Όμως μία γλωσσική μορφή επιβιώνει μόνο όταν τη μιλούν οι νέοι και, δυστυχώς, όπως και με τις περισσότερες περιπτώσεις, έτσι και με την υπό μελέτη, οι νεότεροι πλέον τη χρησιμοποιούν μόνο περιστασιακά. Στην παρούσα δημοσίευση δόθηκε κυρίως έμφαση σε φωνολογικά, μορφολογικά, συντακτικά και λεξιλογικά χαρακτηριστικά του ιδιώματος του Ιάσμου, το οποίο διαμορφώθηκε από την ομιλία των γηγενών, των προσφύγων και των Ηπειρωτών και αξίζει να μελετηθεί από ειδικούς διαλεκτολόγους, προκειμένου να γίνει καλύτερα κατανοητός ο τρόπος με τον οποίο τα θρακικά ιδιώματα εξελίχθηκαν μέσα στον χρόνο.

ABSTRACT

This paper attempts a diachronic investigation of the indefinite pronouns also known as ka- existential quantifiers, focusing on their development in Mediaeval Greek. It addresses three main topics: 1) How the ancient particle kan ('even') gave rise to the formation of the ka- elements, 2) How these quantifiers acquired new semantic values, shifting from 'concession' to 'indifference' or 'indefiniteness', 3) Why the ka- elements dropped the final -n (of kan), as they developed into compounds, and why the quantitative kamposos retained the original structure (a new solution is proposed).

Λέξεις κλειδιά: αόριστες αντωνυμίες, αναφορικές αντωνυμίες, ποσοδείκτες, γραμματικοποίηση, αναλογία, ετυμολογία, αποσημασιοποίηση, σημασιολογική μεταβολή

1. Εισαγωγή

Το σύνθετο σύστημα των αορίστων αντωνυμιών και επιρρημάτων της Μεσαιωνικής Ελληνικής διαρθρώθηκε σε δύο βασικές κατηγορίες: 1) στους ποσοδείκτες με αφετηρία το αρχαίο μόριο *κάν*: *κάποιος, κάπου, κάποτε, κάπως, κάτι, κανείς* κτλ. (σειρά *κα-*), και 2) στα αντωνυμικά στοιχεία που έχουν ως αφετηρία τα αντίστοιχα αρχαία αναφορικά: *όποιος (όποιος), όπου, όποτε (όποτε), όπως, ό,τι* (σειρά *ο-*).

Η σειρά *κα-* σχηματίστηκε από το μόριο *κάν* και τα ερωτηματικά στοιχεία (*ποιος, ποῦ, πότε* κτλ.) που χρησιμοποιήθηκαν κατόπιν και ως αοριστολογικά, απαντά δε με όλο και μεγαλύτερη συχνότητα από τη μεσαιωνική εποχή, οπότε συνυπάρχει μέχρι ενός σημείου με το αρχ. *τις* και με το παράγωγό του *τινάς*². Η νέα σειρά δηλώνει οποιονδήποτε ή οτιδήποτε ακαθόριστο, απροσδιόριστο ή απλώς αόριστο.

Ενώ η πορεία σχηματισμού φαίνεται ξεκάθαρη, τρία καίρια ζητήματα ανακύπτουν κατά τη διαχρονική ανάλυση. Πρώτον, πώς το παραχωρητικό μόριο *κάν* συνέβαλε στον σχηματισμό αοριστολογικών ποσοδεικτών; Δεύτερον, πώς τεκμηριώνεται η σημασιολογική μεταβολή από την παραχώρηση προς την αδιαφορία ή αοριστία, η οποία εκφράζεται πλέον από τη νέα σειρά *κα-*; Τρίτον, πώς ερμηνεύεται η απουσία οποιουδήποτε ίχνους τού *-ν* (του *κάν*) στη σύνθεση και γιατί επικρατούν οι τύποι από *κα-* (*κά-ποιος* αντί *κάμ-ποιος*, *κά-ποτε* αντί *κάμ-ποτε* κτλ.);

2. Ο σχηματισμός των αοριστολογικών ποσοδεικτών

Τα μέλη της σειράς *κα-* (παραδοσιακά αποκαλούνται *αντωνυμίες*, αλλά ορίζονται εύστοχα και ως *ποσοδείκτες* [quantifiers]) ακολούθησαν σε μεγάλο βαθμό τη σημασιολογική εξέλιξη του μορίου *κάν*. Η διαδρομή τού αρχαίου παραχωρητικού συνδέσμου *κάν* (< *καί ἄν*) διαγράφεται ως πορεία από τη ριζική παραχώρηση (πολικότητα) προς την αδιαφορία ή αοριστία (παραμετρικότητα), από την ολική

¹ Ευχαριστώ θερμά τους δύο ανώνυμους κριτές για τις χρήσιμες παρατηρήσεις τους σε ορισμένα σημεία τού άρθρου.

² Για τη λειτουργία των (ό)κάποιος, τινάς και κανένας ως προδρόμων τού αορίστου άρθρου, βλ. τη διαχρονική εξέταση της Χειλά-Μαρκοπούλου (2000: 123). Βλ. επίσης Lavidas & Papangeli 2007: 8, υποσημ. 7· Jannaris 1897: 165 §598b. Η σύνθεση του μορίου *κάν* με τα αριθμητικά (*καν-είς / καν-ένας, κα(μ)μία, καν-ένα*), η οποία γραμματικοποιήθηκε αρκετά νωρίτερα, δεν αποτελεί αντικείμενο του παρόντος άρθρου.

άγνοια σχετικά με την πραγματοποίηση ενός γεγονότος ως την αδιαφορία σχετικά με τις λεπτομέρειές του (Βελούδης 1996: 373· 2003: 617).

Κατά τη διαχρονική του εξέλιξη, το μόριο *κάν* παρουσιάζει σαφείς ενδείξεις γραμματικοποίησης, η οποία ξεκίνησε από τις αποφαιτικές εκφορές και κορυφώθηκε με τον σχηματισμό των σύνθετων ποσοδεικτών. Σύμφωνα με τη θεωρία της γραμματικοποίησης, η απώλεια της έμφασης οδηγεί σε σταδιακή δέσμευση του στοιχείου σε φράσεις ή συντακτικά σχήματα (Bybee, Perkins & Pagliuca 1994: 284· Lehmann 1995 [1982]: 164). Αυτό συνεπάγεται, όχι απλώς τον σχηματισμό περιφραστικών δομών, αλλά και τη βαθμιαία απώλεια μορφολογικών ιδιοτήτων, η οποία διευκολύνει τη φωνολογική μείωση. Πρόκειται ουσιαστικά για προέκταση της αρχής της εικονικότητας, αφού, όπως σημειώνει η McMahon, «η μορφική γραμμική εγγύτητα σημασιολογικά συγγενών τύπων διευκολύνει τη συγχώνευσή τους» (2003 [1994]: 247). Ως αποτέλεσμα, οι συγχωνευμένοι τύποι υφίστανται σημασιολογική εξασθένηση, η οποία επιφέρει γενίκευση, δηλαδή σύνδεση του στοιχείου με ευρύτερα περιβάλλοντα.

Η διαδικασία αυτή περιγράφεται ως σειρά βημάτων ή μηχανισμών της γραμματικοποίησης, οι οποίοι αποτυπώνονται στην περίπτωση των αοριστολογικών ποσοδεικτών (Heine 2003: 579· 1997: 66 κ.εξ.):

α) *αποσημασιοποίηση* [desemanticisation], γνωστή επίσης ως *αποχρωματισμός* [bleaching]: το *κάν* σταδιακά χάνει την εμφοτική λειτουργία της ριζικής παραχώρησης. Παράλληλα, το αρχ. επίθετο *ποιός*, που αρχικά σήμαινε «ορισμένου είδους ή μορφής», αποτέλεσε κατάλληλο συμπλήρωμα του *κάν* στη νέα αοριστολογική του λειτουργία (Horrocks 2006 [1997]: 428).

β) *επέκταση* [extension]: το *κάν* αποστασιοποιείται από τους περιορισμούς τροπικότητας και, καθώς συνοδεύεται και από άλλες εγκλίσεις, διευρύνει το συντακτικό του περιβάλλον.

γ) *αποκατηγοριοποίηση* [decategorialisation]: το *κάν* χάνει τον μορφοσυντακτικό ρόλο του ως συνδέσμου, πράγμα που ευνοεί τη συγχώνευσή του με άλλα στοιχεία (εν προκειμένω, αοριστολογικά και αριθμητικά), με τα οποία συνεκφερόταν. Πρόκειται για συνήθη επιλογή κατά τον σχηματισμό των ποσοδεικτών, όταν έχει προηγηθεί η ερωτηματική ή η αρνητική λειτουργία³.

δ) *διάβρωση* [erosion] ή *φωνητική μείωση* [phonetic reduction]: το *κάν* χάνει μέρος της φωνητικής του υπόστασης κατά τη σύνθεση (το τελικό του -ν). Οι όροι υπό τους οποίους συμβαίνει αυτό εξετάζονται παρακάτω στην ενότητα 4.

3. Συνθήκες της γραμματικοποίησης και σημασιολογική αλλαγή

Οι ποσοδείκτες της σειράς *κα-* συναντώνται εκτεταμένα στα μεσαιωνικά κείμενα μετά τον 12^ο αιώνα, όταν εμφανίζονται και πάλι κείμενα σε δημόδη γλώσσα⁴, ευνοημένοι και από το γεγονός ότι το αρχ. *τίς* δεν διέθετε μορφολογικά διακριτούς τύπους για το αρσενικό και το θηλυκό (Jannaris 1897: 165 §597). Επιπλέον, τα αρχαία αοριστολογικά *που*, *πως*, *ποτέ* κτλ. συχνά κατελάμβαναν τη δεύτερη θέση στην πρόταση και λειτουργούσαν ως εγκλιτικά, με αποτέλεσμα η συνεκφορά τους με τον προηγούμενο σύνδεσμο να ενισχύεται από το συντακτικό περιβάλλον. Ο Χατζιδάκις είχε διατυπώσει ως εξής αυτή την παρατήρηση: «...καὶ ἐν τῇ Ἑλληνικῇ καὶ ἐν τῇ Λατινικῇ καὶ ἐν ταῖς ἄλλαις ἀδελφαῖς γλώσσαις οἱ ἐγκλιτικοὶ τύποι τῶν ἀντωνυμιῶν, καθὼς καὶ ἄλλα πολλὰ ἄκλιτα λεξίδια ἐκπαλαὶ ἐξεφέροντο συνηθέστατα ἐν τῇ 2^α θέσει τῆς προτάσεως» (1917-8: 12)⁵. Στην πραγματικότητα η δεύτερη θέση των εγκλιτικών αντωνυμιῶν τύπων πολλές φορές υπερίσχυε της άμεσης σύνδεσης με τη λέξη αναφοράς [Beziehungswort] (Schwyzer 1950: 186)⁶.

Η θέση των αοριστολογικών στην πρόταση ευνοεί ιδιαίτερα τη συνεκφορά τους με το αρχ. *κάν*, ακόμη και ενόσω λειτουργεί ως παραχωρητικός σύνδεσμος. Το μόριο αυτό αποκτά ήδη από την αρχαιότητα τη σημασία «τουλάχιστον», οι δε εισαγόμενες με το *κάν* παραχωρητικές προτάσεις σπανίζουν πλέον στους ελληνιστικούς παπύρους (Χατζιδάκις, AA3: 221· Mayser 1934: 92, 120). Τα παραδείγματα σημασιολογικής μετακίνησης στις συνεκφορές αυξάνονται όσο προχωρούμε στην

³ Ο Lehmann σημειώνει σχετικά: «...negation appears to be the principal context in many languages, which allows atonic interrogatives to be used as indefinites, the negator and the interrogative-indefinite then frequently coalescing to a negative pronoun» (2002²: 47).

⁴ Για το κενό ως προς την παράδοση δημωδών κειμένων και την επανεμφάνισή τους τον 12^ο αιώνα βλ. Browning 1991 [1983²]: 88· Ανδριώτη 1995: 79-80.

⁵ Παρόμοια συμπεριφορά των αοριστολογικών εγκλιτικών συναντούμε και αργότερα (Eideneier 2004 [1999]: 77, 109).

⁶ Σε τέτοιες συνεκφορές έχει την αφετηρία του και ο σύνδεσμος *μήπως* (< *μή πως* «μήπως με κάποιον τρόπο»).

ελληνιστική εποχή και οι συνδυασμοί αυτοί αποκτούν την επιπρόσθετη σημασία «οποιοσδήποτε – οπουδήποτε – οσοσδήποτε» και παρόμοια, παρέχοντας ενδείξεις της αοριστολογικής γενίκευσης⁷.

Χαρακτηριστικές είναι οι ακόλουθες περιπτώσεις:

κᾶν + ποιος

(1) *δείκνυσιν αὐτὸ καὶ ἐπὶ τοῦ σχήματος, ἐπειδὴ κᾶν ποιὸν ἔστιν, ἀλλὰ πολλὴν ἔχει πρὸς μέγεθός τε καὶ ποσότητα κοινωνίαν* (6^{ος} αἰ. μ.Χ., Σιμπλίκιος, *Εἰς τὸ τῆς Ἀριστοτέλους φυσικῆς ἀκροάσεως ὑπόμνημα* 9.689) [εννοεῖ «ἐπειδὴ κάποιο σχῆμα υπάρχει, ὅποιο και αν εἶναι αὐτό»]

κᾶν + που

(2) *κᾶν που ἀποδημῆς, οὐδ' ἐπὶ τῆς ἀλλοδαπῆς ἀγνώως οὐδ' ἀφανῆς ἔση* (2^{ος} αἰ. μ.Χ., Λουκιανός, *Περὶ τοῦ ἐνυπνίου* 11.8-10) [εννοεῖ «ὅπου και αν ἀποδημήσεις»]

(3) *τὴν παρ' αὐτοῦ ζητοῦσι βοήθειαν, κᾶν ποῦ τι σαλεύεται κύμα* (4^{ος} αἰ. μ.Χ., Κύριλλος, *Εἰς Ψαλμούς* 69.833) [εννοεῖ «ὅπου και αν σηκωθεί κύμα / και αν κάπου σηκωθεί κύμα»]

κᾶν + πως

(4) *οὐκοῦν ὅσα ἐπικριτικὰ καὶ βεβαιότητες διανοίας, ἐπικρίσεις ἂν λέγοντο εἰκότως, κᾶν πως ἑτέρως ἐξαγγελλεῖεν* (11^{ος} αἰ., Ἰωάννης Ρήτωρ, *Σχόλια εἰς τὸ Ἑρμογένους Περὶ ἰδεῶν* 6.233-4) [εννοεῖ «ἀκόμη και αν ἐξαγγελθούν κάπως διαφορετικά, ὅπως και αν ἐξαγγελθούν»· ἀξιοπρόσεκτη ἡ μὴ ἀναμενόμενη ευκτική, με τὴν ὁποία ἐπιχειρεῖται νὰ ἐνισχυθεῖ ἡ ἐξασθενημένη τιμὴ τῆς παραχώρησης τοῦ *κᾶν*]

κᾶν + τι

(5) *ἐπεῖπερ ἦν καὶ προαπειλούμενος σφόδρα πρὸς αὐτοῦ τοῦ ἀσεβάρχου, εἰ εὐρεθείη κᾶν τι μικρὸν ὑπαίτιος, μηκέτι ζῆν* (8^{ος} αἰ. μ.Χ., Θεόδ. Στουδίτης, *Ἐπιστολαί* 415.13-4) [εννοεῖ «ἔστω και σε κάτι μικρό, ὅσο μικρό και αν εἶναι»]

(6) *τοσοῦτον δέ μοι χάρτην ἐτοίμασον (...), ἵνα κᾶν τι μόνιον δυνήσωμαι ἐντάξει ὅσον κατὰ τὴν ἔνσωμον ὕλην* (5^{ος} αἰ. μ.Χ., Ολυμπιόδωρος, *Εἰς τὸ κατ' ἐνέργειαν ζωσίμου* 2.97) [εννοεῖ «ἀκόμη και το παραμικρὸ μόνιον»]

(7) *γράφω ἐπισχέιν τοῖς ἔργοις τοῖς ἐν ἀγρῷ ἵνα μὴ ἀμεληθῇ κᾶν τι ἦν ἀμελούμενον* (1^{ος} – 2^{ος} αἰ. μ.Χ., Πάπυρος Οἰξυρρύγχου, p.oxv 55.3808) [εννοεῖ «οτιδήποτε παραμελημένο, ξεχασμένο»]

(8) *φροντίσας ὅπως μὴ ἐνδεεῖς ὦμεν καὶ ἐλαδίου καὶ κᾶν τί σοι ἄλλο φαίνεται* (3^{ος} αἰ. π.Χ., Πάπυρος Ζήνωνος, psi. 4.418) [εννοεῖ «ὅ,τι ἄλλο, οτιδήποτε ἄλλο»]

Ἡ παράθεση αὐτῶν τῶν παραδειγμάτων ἀποσαφηνίζει τὶς συμφραστικές συνθήκες ποὺ ὥθησαν στὸν σχηματισμὸ τῶν ποσοδευτικῶν τῆς σειράς *κα-* ὑπὸ τοὺς ὅρους τῆς γραμματικοποίησης, ὅπως παρουσιάστηκαν προηγουμένως. Ἀπὸ τὴν ὅλη πορεία προκύπτει ὅτι με τὴν ἐμφάνιση τῆς συγκεκριμένης σειράς ἀρχίζουν νὰ ἀποκτοῦν ὑπόσταση στὴ μεσαιωνικὴ γλῶσσα τρία νέα αοριστολογικὰ συστήματα:

α) Ἡ σειρά *κα-* + αοριστολογικά (< ἐρωτηματικές ἀντωνυμίες): *κάποιος, κάπου, κάποτε, κάτι, κάμποσος*.

β) Ἡ σειρά *κα-* + ἀριθμητικά: *κανεῖς / κανέννας – κα(μ)μία – κανένα*.

γ) Ἡ σειρά *ο-* τῶν αορίστων ἀναφορικών: *ὅποιος, ὅπου, ὅποτε, ὅπως, ὅ,τι*.

Ἡ συμμετρικὴ ἀνάπτυξη τῶν συστημάτων αὐτῶν, ἡ ὁποία ἐδραιώθηκε κατὰ τοὺς μεσαιωνικοὺς χρόνους, σταδιακὰ ἀντικατέστησε τὶς ἐπιλογές ποὺ ἦταν διαθέσιμες στὴν ἀρχαία γλῶσσα γιὰ τὴ δήλωση τῶν ἀντίστοιχων λειτουργιῶν. Ἡ συνύπαρξή τοὺς θὰ συντελέσει, ὅπως θὰ φανεῖ στὴν ἐπόμενη ἐνότητα, ὥστε νὰ δοθεῖ ικανοποιητικὴ ἀπάντηση σὲ ἓνα δυσεπίλυτο ἐτυμολογικὸ πρόβλημα.

4. Το πρόβλημα τοῦ -ν. Ἑρμηνευτικές προσεγγίσεις

Ἡ ἀπουσία οἰοιοῦδήποτε ἰχνους τοῦ τελικοῦ -ν (τοῦ *κᾶν*) ἀπὸ τὰ περισσότερα μέλη τῆς σειράς *κα-* δὲν ἦταν ἀναμενόμενη και ἔχει ἐξηγηθεῖ ποικιλοτρόπως ἀλλὰ χωρὶς πειστικότητα. Τὸ βασικὸ πρόβλημα εἶναι ὅτι ὁ σχηματισμὸς αὐτὸς προσκρούει σὲ ὅλες τὶς ἄλλες γνωστὲς περιπτώσεις συνθέσεως, κατὰ τὶς ὁποῖες τὸ τελικὸ -ν παρουσιάζει ἀφομοίωση τόπου ἀρθρώσεως πρὸς τὸ ἀκόλουθο ἀήχο κλειστὸ (πβ. μεσν. *ἄμποτε* < φρ. *ἂν ποτέ*, μεσν. *μπᾶς καὶ...* < φρ. *μὴν πᾶς καὶ...*, μεσν. *μήμπα* < φρ. *μὴν πάη...*), σύμφωνα με τὸ ἀρχαῖο πρότυπο. Ὁ Horrocks, σχολιάζοντας τὴ νέα αοριστολογικὴ σειρά, ἀποφεύγει

⁷ Οἱ Roberts & Roussou (2003: 162-3) ὑποστηρίζουν ὅτι τὰ ἀρχαῖα αοριστολογικὰ ἐπαναυλῶθηκαν στὴ Νέα Ἑλληνικὴ ὡς ἀποκλειστικῶς ἐρωτηματικά, πράγμα ποὺ ἄφησε χώρο γιὰ τὴν ἐδραίωση τῆς ἀντίθεσης μεταξὺ ποσοδευτικῶν (*κάποιος, κάπου, κάποτε...*) και στοιχείων ἀρνητικῆς πολικότητας (*κανεῖς, πούθενά, ποτέ, τίποτε*).

οποιαδήποτε ερμηνευτική προσέγγιση: «Το στοιχείο *κᾶν* (με το -ν να διατηρείται μόνο σε προφωνηεντική θέση και στον τύπο *κάμ-ποσος*) συντέθηκε τότε μαζί με άλλες αρχαίες αόριστες αντωνυμίες και επιρρήματα, για να δημιουργηθεί το σύνολο των σύγχρονων αόριστων τύπων» (2006 [1997]: 427).

4.1 Οφείλεται σε επανανάληψη και επέκταση του *κα-*;

Οι ερμηνευτικές προσεγγίσεις αυτής της απροσδόκητης εξέλιξης υπήρξαν ελάχιστες και αυτό ίσως οφείλεται στη βαρύνουσα υπόσταση που είχε εξαρχής η γνώμη τού Γεωργίου Χατζιδάκι, η οποία υιοθετήθηκε κατόπιν από αρκετά λεξικογραφικά έργα (π.χ. *Ετυμολογικό Λεξικό* Ανδριώτη, ΛΚΝ). Ο Χατζιδάκις υποστήριξε συγκεκριμένα ότι το θηλ. *κα(μ)μία* / *κα(μ)μιά* (που, όπως υπογραμμίστηκε, είχε γραμματικοποιηθεί σε πρωιμότερο στάδιο) επανααναλύθηκε, με αποτέλεσμα να αποσπαστεί το τεμάχιο *κα-* και να επεκταθεί πρώτα στο θηλ. *κά-ποια* και κατόπιν στο *κά-ποιος*, από όπου επέδωσε ομοιοτρόπως σε όλη τη σειρά των αοριστολογικών ποσοδεικτών (MNE 2: 405, υποσημ.)⁸.

Η ερμηνεία αυτή προσκρούει σε διάφορα εμπόδια. Εν πρώτοις, δεν προκύπτει από τα μεσαιωνικά κείμενα ότι το θηλ. *καμμία* είχε αποκτήσει τέτοια γενικευτική χρήση, ώστε να αποτελέσει την αφετηρία της σειράς *κα-*. Ακόμη και αν δεχτούμε ότι οι χρονικές του σημασίες (μεσν. *καμμία φορά* «κάποτε», ομοίως στη διάλεκτο του Πόντου⁹) υπήρξαν ιδιαίτερα εκτεταμένες, θα ήταν ευλογοφανέστερη η λήψη ως προτύπου τού αντωνυμικού *καν-ένας*, το οποίο ανήκε στο λεξιλόγιο υψηλής συχνότητας (σημασίες «κάποιος – καθένας – οποιοσδήποτε – ούτε ένας») και έφερε αυξημένο λειτουργικό βάρος σε σχέση με το θηλ. *καμμία*¹⁰. Επιπρόσθετα, η εξήγηση αυτή αποτυγχάνει να ερμηνεύσει πειστικά την αντίθετη εξέλιξη που παρατηρήθηκε στο ομοίως σχηματισμένο *κάμ-ποσος* / *καμ-πόσος*, όπου το τελικό -ν δεν σιγήθηκε χωρίς ίχνη. Ο Χατζιδάκις υποστήριξε ότι «ἐκ τοῦ *κά-μμία* ληφθέντος τοῦ *κά-* ἐλέχθη (...) καὶ *κά-ποιος*, *κά-που*, *κά-πως*, *κά-ποτε*, ἐνῶ τὸ *κάμ-πόσος* φαίνεται ἄλλης ἰδίας κατασκευῆς, ἐξ αὐτοῦ τοῦ *κᾶν* – *ποτέ* [sic]» (MNE 2: 463· η λέξη *ποτέ* στο τέλος της πρότασης πρέπει μάλλον να αποδοθεί σε αβλεψία, καθώς ο συγγραφέας προφανώς εννοούσε *πόσος*). Ωστόσο, το σχόλιο αυτό δεν προσφέρει διέξοδο στο εξεταζόμενο ετυμολογικό πρόβλημα ούτε ανταποκρίνεται στη σύγχρονη εμφάνιση και κατόπιν διαφοροποίηση των διαλαμβανόμενων τύπων.

4.2 Οφείλεται σε αφομοίωση του *ερρίνου* προς τα *άηχα* κλειστά;

Διαφορετική ερμηνευτική προσέγγιση αποτελεί η υπόθεση που βασίζεται σε μελέτη τού Κωνσταντίνου Μηνά σχετικά με την αφομοίωση του *ερρίνου* από τους *άηχους* κλειστούς φθόγγους. Το αξιόλογο αυτό μελέτημα δεν πραγματεύεται ειδικά τη σειρά *κα-*, αναφέρεται όμως στους τύπους *κάποσον*, *καπόσουσ* της κυπριακής διαλέκτου (1987: 260 κ.εξ.) με επιχειρήματα για την ασθενή πραγμάτωση των *ερρίνων* (ενήχων) πριν από τα *άηχα* κλειστά, όπως τεκμηριώνεται ήδη από την ελληνιστική εποχή (ελνστ. *προσῆνεκκεν*, *ἀνενεκεῖν*, *συκκατέστη*· πβ. διαλεκτικούς τύπους της νησιωτικής ζώνης κατά τον Μεσαίωνα, Μαχαιράς: *ἀππέζω*, Γλυκάς: *ἡπορῶ*, Κάτω Ιταλία: *σάτι* < *ώσάν τι*, Πόντος: *κα(μ)πόσος*). Η συγκέντρωση όλων των στοιχείων σχετικά με την έκταση του φαινομένου αφήνει περιθώριο να αναρωτηθούμε μήπως αιτία της απουσίας τού -ν από τη σειρά *κα-* στάθηκε ότι διαδόθηκαν κυρίως από τα ανατολικά και νησιωτικά ιδιώματα, όπου η εν λόγω αφομοίωση παρουσίαζε ιδιαίτερη επίδοση (ΕΛΝΕΓ, λ. *κάποιος*).

Ωστόσο, η εξέταση των στοιχείων δεν ενισχύει την εκδοχή αυτή. Τα λεξικογραφικά δεδομένα της μεσαιωνικής γλώσσας δείχνουν ότι τα μέλη της σειράς *κα-* εμφανίζονται μαζικά στα δημώδη κείμενα, χωρίς περιορισμό ως προς τη γλωσσολογική αφετηρία. Ας σημειωθεί επιπλέον ότι το ίδιο το μεσαιωνικό κυπρ. *κάποσος*, που αποτελεί το επίκεντρο του επιχειρήματος της αφομοίωσης, είναι ακριβώς αυτό που δεν διατηρήθηκε στη Νέα Ελληνική, εφόσον επικράτησε η *έρρινη* παραλλαγή (*κάμ-ποσος*, *καμ-πόσος*), αποδεικνύοντας ότι το φαινόμενο της αφομοίωσης δεν πρέπει να τοποθετηθεί στη ρίζα τού ετυμολογικού προβλήματος.

⁸ Την παλαιά αυτήν άποψη επανέλαβε ο Mendez-Dosuna σε βιβλιοκριτικό άρθρο του για τον Horrocks [1997], προτείνοντας την ερμηνεία της αναλογικής επέκτασης από τα *κάνεις* > *κα-νείς*, *κα(μ)-μία* (2000: 292).

⁹ Ανδριώτης 1951: 890· Οικονομίδης 1958: 246, 252.

¹⁰ Για τον ίδιο λόγο δεν ευσταθεί η υπόθεση του Pernot ότι το *κα-* προήλθε από ανομοίωση του σποραδικά εμφανιζόμενου τύπου *κάντινα* (αιτιατικής τού *κάντις*), από όπου επεκτάθηκε στους υπόλοιπους παρόμοιους σχηματισμούς (1946: 241).

4.3 Οφείλεται σε φωνολογική μείωση;

Τα στάδια της γραμματικοποίησης που εξετάστηκαν σε προηγούμενη ενότητα παρέχουν αξιόπιστο ερμηνευτικό πλαίσιο για τον σχηματισμό των σύνθετων ποσοδεικτών. Με αφετηρία αυτή τη θεωρητική προσέγγιση, ο Βελούδης απέδωσε τη σύγηση του -ν σε φωνολογική μείωση, η οποία συνεπάγεται απώλεια της ακεραιότητας του στοιχείου (όπως στο γνωστό παράδειγμα του *θα < θέλει ἵνα* ως δείκτη του μέλλοντα). Επειδή το *κάν* χάνει το ειδικό βάρος που είχε ως παραχωρητικός σύνδεσμος, καθώς και την έμφαση της ριζικότητάς του, τα φωνολογικά του χαρακτηριστικά εν συνθέσει αμβλύνονται και η μορφή του «στρογγυλεύεται»¹¹. Ολοκληρώνοντας το επιχείρημά του, ο Βελούδης υπογραμμίζει ότι «καταβάλλοντας το /n/ του, το πρόθημά μας εξαγοράζει τη δυνατότητα να εμφανίζεται και σε μη τροπικά, σε ‘επεισοδικά’ (episodic) περιβάλλοντα πραγμάτευσης, δηλαδή σε συμφραζόμενα αληθειακής αναφοράς στον τρέχοντα γνωστό μας κόσμο» (2003: 623).

Παρ’ ότι η φωνολογική μείωση ή διάβρωση αποτελεί χαρακτηριστικό της γραμματικοποίησης, θα ήταν δύσκολο να δεχτούμε ότι οποιοδήποτε τέτοιο βήμα θα συνέβαινε με τρόπο που αντιβαίνει στους φωνολογικούς κανόνες της γλώσσας. Σε προϊόντα αυτής της διαδικασίας, γνωστά στη μεσαιωνική γλώσσα, το προϊόν είναι πάντοτε φωνολογικά ερμηνεύσιμο, όταν συμβαίνει ως βήμα της διαδικασίας της συνθέσεως (π.χ. *μπᾶς καὶ... < μὴν πᾶς καὶ..., ἵνα < τί ἐναι τὰ...*). Ακόμη, ο αναβιβασμός του τόνου στο *κα-* (*κά-ποιος, κά-που, κά-ποτε...*) φαίνεται να προσθέτει έμφαση, εξισορροπώντας την σύγηση του ληκτικού τεμαχίου του, η δε εξήγηση του Βελούδη (1996: 375), ότι σκοπός της μετάθεσης τόνου είναι να υπογραμμιστεί η απώλεια της έμφασης από το ερωτηματικό β’ συνθετικό και να προωθηθεί στο προσκήνιο η «έλλειψη ενδιαφέροντος», αποδίδει στη μεταβολή τελεολογικό χαρακτήρα. Τέλος, για άλλη μια φορά μένει ανερμήνευτος ο αποκλίνων τύπος *κάμ-ποσος / καμ-πόσος*, για τον οποίο δεν προτείνεται καμμία εξήγηση.

4.4 Μια πρόταση

Αναζητώντας την αιτία της αντίρροπης και απροσδόκτης αυτής εξέλιξης, είναι σκόπιμο να συγκεντρώσουμε το μεσαιωνικό υλικό, ώστε να αποκτήσουμε εποπτεία της ποικιλίας των τύπων. Τα δεδομένα ως προς τα μέλη της σειράς *κα-*, συνοδευόμενα από ενδεικτικές χρήσεις, έχουν ως εξής:

- (9) *κάποιος, όκάποιος (όκάποιος ἦλθεν*, Χρονικό Μορέως Η 934)
- (10) *κάπου, όκάπου (τέως όκάπου ἠῦρηκα τὸ ταρτερόν*, Πρόδρομος ΙΙΙ 149· *μόνον γὰ τοῦτον κάπου ἀναστενάζω*, Κυπρ. ερωτικά 655)
- (11) *κάποτε, όκάποτε, όκάμποτε, όκαποτέ (τὴν μάχην τὴν εἶχαμεν όκάποτε μετὰ τοὺς Γενοβήσους*, Λ. Ντελλαπόρτας *Ερωτήματα* 1362· *ἂν τύχη κάποτε εἰς καιρόν*, Σπανέας Β 49)
- (12) *κάτι, όκάτι(ν) – κάτις, κάντις, όκάτις (> κάτς*, διάλεκτος Πόντου) (*όκάτι νὰ σᾶς εἶπω*, Σπανέας Β 406· *όκάτι ἐπιδεξιώτερος*, Χρονικό Μορέως Η 1376)
- (13) *κάμποσος, καμπόσος, κάποσος, καπόσος, όκάμποσος, όκάποσος (ἀπέραςεν καιρὸς καμπόσος*, Χρονικό Μορέως Ρ 5979)
- (14) *κάπως* (δεν μαρτυρείται στις διαθέσιμες μεσαιωνικές πηγές)

Η μεσαιωνική ποικιλία καταδεικνύει την ταλάντευση των μελών της σειράς *κα-*, προτού επικρατήσουν οι άρρινοι τύποι (εκτός του *κάμποσος*). Επιπρόσθετα, κάτι που χαρακτηρίζει όλη τη σειρά και θα αποδειχθεί κλειδί στο εξεταζόμενο ετυμολογικό ζήτημα είναι η παρουσία του προθεματικού *ό-*: *όκάποιος, όκάπου, όκάποτε, όκάτι, όκάμποσος*. Το προθεματικό *ό-* μάλλον δεν σχετίζεται με τις έναρθρες συνεκφορές (μεσν. *ό κάποτε* «πρώην»), αλλά προφανώς επεκτάθηκε από τη σειρά των αορίστων αναφορικών αντωνυμιών (*όποιος, όπου, όποτε...*), οι οποίες εισάγουν ελεύθερες αναφορικές προτάσεις (Horrocks 2006 [1997]: 513· Χειλά-Μαρκοπούλου 1990-1: 31-2, υποσημ. 59· Χατζιδάκις ΜΝΕ 2: 594-7). Συνεπώς, οι νεοεμφανιζόμενοι στη μεσαιωνική γλώσσα σύνδεσμοι *όπου, πού, ό ποῖος, ό όποῖος*, με τους οποίους εισάγονται οι αναφορικές συμπληρωματικές προτάσεις, συμβάλλουν στην αποσαφήνιση των νέων συστημάτων¹².

Εν προκειμένω, το *ό-* λειτούργησε ως δείκτης αοριστίας στους τύπους των αορίστων αντωνυμιών, με αποτέλεσμα να εδραιωθεί σταδιακά η αντιδιαστολή: *ό-* αοριστολογικό ~ *Ο* ερωτηματικό,

¹¹ Βελούδης 1995: 400· 1996: 371, 375-6. Σημειώνει επίσης ότι στην απώλεια του -ν ενδέχεται να συνέβαλε και το *καθόλου* (με επανανάληψη ή εσφαλμένο μορφολογικό χωρισμό).

¹² Μεθοδική και αναλυτική εξέταση των νέων δομών, της συμβολής των ρομανικών γλωσσών και του ρόλου της γραμματικοποίησης πραγματοποιείται στα αξιόλογα μελετήματα της Μανωλέσσου (2004· 2008: 258-60), όπου ανασκοπούνται και οι παλαιότερες ερμηνευτικές προσεγγίσεις.

σχηματίζοντας αντίστοιχα ζεύγη: *ὅποιος – ποιος, ὅπου – ποῦ, ὅπως – πῶς, ὅποτε – πότε, ὅτι – τι*. Η παρουσία τού *ὁ-* και στη σειρά *κα-*, ὅπως προέκυψε από τα στοιχεῖα, επιτρέπει να συμπεράνουμε ότι η σειρά *κα-* επηρεάστηκε αξιοσημείωτα από τη σειρά *ὁ-*. Ως εκ τούτου, οι ποσοδείκτες έχασαν το ληκτικό *-ν* του *α'* συνθετικού, ώστε να είναι διαφανέστερο το δεύτερο μέρος τους¹³. Επομένως, παρά την αρχική τάλαντευση, επικράτησαν οι τύποι *κά-ποιος* (κατά το *ὁ-ποιος*), *κά-που* (κατά το *ὁ-που*), *κά-ποτε* (κατά το *ὁ-ποτε*), *κά-πως* (κατά το *ὁ-πως*) και *κά-τι* (κατά το *ὁ-τι*).

Με βάση την προτεινόμενη αναλογική αντιστοιχία μπορούμε να εξηγήσουμε ικανοποιητικά τη διατήρηση του ερρίνου στον τύπο *κάμ-ποσος / καμ-πόσος*. Επειδή η αρχαία αντωνυμία *ὁπόσος* δεν διατηρήθηκε, αλλά υποκαταστάθηκε από το *πόσος* (στην ερωτηματική λειτουργία) και το *ὅσος* (στην αναφορική-αοριστολογική λειτουργία), εξέλιπε το αντισταθμιστικό φορτίο που θα ενίσχυε την αναλογία, προκειμένου να επικρατήσει ο τύπος *κά-ποσος / κα-πόσος* (κατά το *ὁ-πόσος*). Η μεσαιωνική ποικιλία παραχώρησε γρήγορα τη θέση της στους ἑρρινούς τύπους *κάμ-ποσος / καμ-πόσος*, οι οποίοι επικράτησαν κατόπιν στη Νέα Ελληνική.

5. Επίλογος

Τα διαθέσιμα στοιχεῖα αποκαλύπτουν μέρος των παραγόντων που συνετέλεσαν στην ανάπτυξη των αοριστολογικών συστημάτων και ποσοδεικτών κατά τη μεσαιωνική περίοδο. Η γραμματικοποίηση, η αναλογική επέκταση, η αποσημασιοποίηση και η γενίκευση διαμόρφωσαν καθοριστικά τον σχηματισμό τῆς σειράς *κα-*, προσφέροντας έτσι επαρκείς απαντήσεις τόσο για το πλαίσιο όσο και για τις λεπτομέρειες της εμφανίσεώς τους.

ABSTRACT

A descendant of the AG active present participle –a declinable form functioning both as a verb and as a noun (adjective)–, the MG indeclinable forms in -οντας / -ώντας, after a long and successive evolution, combine (‘participate in’) the characteristics of both a verb and an adverb, thus having still claims on the term ‘participle’. Instead, the use of a term such as ‘converb’ (Haspelmath 1995, Moser 2006, ²2009) is leading to confusion. As far as the term gerund is concerned, Moser (2006:48) is right to argue that «historically, Greek never possessed a gerund» and the similarity in some of the use of the forms in -οντας / -ώντας to that of the Romance gerund «is no adequate reason for the adoption of an essentially misleading term». Besides, MG forms in -οντας / -ώντας do not correspond either to the so-called English gerund, which is so different from the standard form of the Latin gerund, that, according to A Comprehensive Grammar of the English Language (§§3.56, 15.12-14, 17.54, passim), “it is not useful to distinguish a gerund from a participle”, and, terminologically, all the -ing items must be classed as participles”.

Λέξεις κλειδιά: modus gerundivus, gerundium, gerundivum, converb, άκλιτη vs. κλιτή μετοχή, ονοματικότητα, επιρρηματικότητα, ρηματικότητα.

1. Ένας χρηστικός κανόνας για την άκλιτη μετοχή στη Νέα Ελληνική

Σε δύο προηγούμενα δημοσιεύματα (Νάκας 2003 και 2007 –όπου και άλλα, παλαιότερα σχετικά δημοσιεύματα) προσπάθησα, με μια διδακτική σκόπευση, να προτείνω ένα χρηστικό κανόνα για την άκλιτη μετοχή στη σύγχρονη Νέα Ελληνική. (Με ποια κριτήρια σταθμίστηκε αυτός ο κανόνας, είναι μια συζήτηση που ξεπερνά τα χωρικά όρια αυτής της ανακοίνωσης).

Είναι ένας κανόνας δέκα σημείων: ο τύπος σε -οντας / -ώντας

[Α] είναι άκλιτος σε όλες τις περιπτώσεις (αναφέρεται *λογικά* σε υποκείμενα και των τριών γενών και των δύο αριθμών, χωρίς να μεταβάλλεται *μορφολογικά*).

[Β] σχηματίζεται πάντοτε από το ‘μη συνοπτικό’ θέμα του ρήματος (λ.χ. *γράφοντας* / **γράφοντας*) από το οποίο σχηματίζεται και ο ενεστώτας, ο παρατατικός και ο (επιτούτου λεγόμενος ‘εξακολουθητικός’) μέλλοντας· μολοντί μορφολογικά κατάγεται από την ενεργητική ενεστωτική μετοχή, συγχρονικά φαίνεται να δηλώνει ‘ποιόν ενέργειας’ (διάρκεια, επανάληψη, εξέλιξη κ.ά.) αλλά όχι και χρονική βαθμίδα·

[Γ] χρησιμοποιείται πάντοτε ισοδύναμα με ‘επιρρηματικές εκφράσεις’ (κυρίως επιρρήματα, λ.χ. *τα έλεγε ψιθυρίζοντας*: πβ. ... *ψιθυριστά* –ή, συνηθέστερα, επιρρηματικές δευτερεύουσες προτάσεις, με τις οποίες και αναλύεται, λ.χ. *βλέποντας ότι δεν θα τα καταφέρει, εγκατέλειψε την προσπάθεια*: πβ. ...*επειδή έβλεπε* ...).

[Δ] –που προκύπτει από το [Γ]– δεν επιδέχεται ανάλυση με αναφορική δευτερεύουσα πρόταση (λ.χ. **να έρθει στον πίνακα κάποιος γράφοντας ωραία γράμματα* / **...που (να) γράφει* ...).

[Ε] –που προκύπτει από το [Δ]– δεν συνοδεύεται από το άρθρο (οριστικό ή αόριστο –λ.χ. *αυτός είναι *ο / *ένας γράφοντας ωραία γράμματα*).

[ΣΤ] χάρη στη ρηματικότητά του, δέχεται συντακτικά εξαρτήματα (ΥΠΟΚΕΙΜΕΝΟ, ΑΝΤΙΚΕΙΜΕΝΟ-Ο/-Α, ΠΡΟΣΔΙΟΡΙΣΜΟ-Ο/-ΟΥΣ) που είναι τα ίδια / ομόλογα με το ομόρριζο ρήμα·

[Z] είτε δέχεται συντακτικά εξαρτήματα είτε όχι (ανάλογα με το ιδιοσυγκρασιακό ‘σημασιολογικό ποιόν’ και το ‘σθένος’), συνιστά πυρήνα / κεφαλή φράσης (ΜΦ = ‘μετοχική φράση’ ή ‘φράση μετοχής’).

[H] ως προς το υποκείμενο, κατά κανόνα συνάπτεται λογικά (‘ταυτότητα αναφοράς’) με το υποκείμενο του ρήματος εξάρτησης (του ρήματος της πρότασης από την οποία εξαρτάται η ΜΦ): για τις ελάχιστες, συγκεκριμένες εξαιρέσεις αυτού του κανόνα (ΜΦ ‘απόλυτη’ / μη συνημμένη ή συνημμένη με άλλον, εκτός από το υποκείμενο, όρο της εξαρτώσας πρότασης) βλ. Νάκα 2007.

[Θ] αντίθετα με ό,τι ισχύει για το ρήμα, οι αδύνατοι τύποι των προσωπικών αντωνυμιών δεν προτάσσονται αλλά επιτάσσονται / έπονται της μετοχής (προκαλώντας, στην περίπτωση της προπαροξυτονίας της, και την εμφάνιση δευτερεύοντος λεξικού τόνου, λ.χ. **με** ακολουθεί, **σας** βλέπει, **του** μιλάει αλλά: *ακολουθώντας με, βλέποντάς σας, μιλώντας του*).

[Ι] η άρνηση ενπροκειμένω είναι πάντοτε το *μη(ν)*.

Σε ό,τι αφορά τις συχνότερες σημασίες που εκφράζει η άκλιτη αυτή μετοχή σε *-οντας* / *-ώντας*, θυμίζω επιτροχάδην (για λεπτομέρειες βλ. τα δύο δημοσιεύματα εδώ πιο πάνω) ότι μπορεί να είναι: (I.i) τροπική (κυρίως τροπική) ή (I.ii) τροπική του (αφηρημένου) μέσου· (II) συνοδευτική (της ‘συνοδευτικής περίπτωσης’). (III.i) χρονική ‘του ταυτόχρονου’ ή (III.ii) χρονική ‘του προτερόχρονου’ ή (πολύ σπάνια) (III.iii) χρονική ‘του υστερόχρονου’· (IV.i) αιτιολογική (‘του αναγκαστικού αιτίου’) ή (IV.ii) τελική (‘του τελικού αιτίου’ ή ‘του σκοπού’ ή (IV.iii) αποτελεσματική (του αποτελέσματος ή ‘του αιτιατού’· (V.i) υποθετική ή (V.ii) εναντιωματική· (VI) ‘μεικτής σημασίας’: χρονική + αιτιολογική, χρονική + υποθετική, τροπική + τελική, τροπική + αποτελεσματική, τροπική του μέσου + υποθετική, τροπική του μέσου + αιτιολογική, κ.ο.κ.

Αντί του όρου ‘άκλιτη μετοχή’ (παράλληλα με το ‘κλιτή μετοχή’, που εισηγούμαστε για τη Νέα Ελληνική –βλ. τον πίν. 8-B στο τέλος), ο όρος ‘γερούνδιο’, αφοτου τον εισηγήθηκε η εξελληνισμένη (1999) *Γραμματική της Ελληνικής Γλώσσας* των Holton, Mackridge και Φιλιππάκη,¹ υιοθετήθηκε σε όλες σχεδόν τις επιστημονικές εργασίες που γράφονται (κυρίως) με το θεωρητικό μοντέλο της μετασηματιστικής γραμματικής και αφορούν τον άκλιτο τύπο σε *-οντας* / *-ώντας*.²

Σχετικά με αυτό το θέμα, θα ήθελα να θυμίσω, με κάποια χρονικά άλματα, ορισμένα περιστατικά.

2. Γερούνδιο και (ενεργητική) ενεστωτική μετοχή στη Λατινική

‘Γεουντίβο’ (δηλαδή, στην ουσία, γεουνδιακό) είχε αποκαλέσει, περιστασιακά (δηλαδή μία μόνο φορά: *Απαντα*, τόμ. 6, σ. 339 σημ.), την άκλιτη μετοχή ο Τριανταφυλλίδης –χωρίς, όμως, να υιοθετήσει τελικά τον όρο, και μάλιστα στη *Νεοελληνική Γραμματική* του 1941.³ Στον όρο αυτόν, με τη γαλλική του εκδοχή, επανήλθε ο Mirambel, στη γνωστή μελέτη του (1961) “Participe et gérondif en grec medieval et moderne”. Για την ακρίβεια, ο όρος ‘γεουντίβο / gérondif’ (όπως και αν εννοείται στα Γαλλικά –θα δούμε πιο κάτω), αποδίδει το λατινικό ‘gerundivum’, ένα ρηματικό επίθετο παθητικής διάθεσης (λ.χ. [βλ. πίν. 1-A] *lauda-ndus, -nda, -ndum*), ομόλογο με το επίθετο σε *-τέος -τέα -τέον*, και, πάντως, εντελώς εκτός τόπου, όταν γίνεται λόγος για τη μετοχή της Ελληνικής, κλιτή ή άκλιτη. Το ‘gerundivum’ –που τελικά εξελληνίσθηκε όχι ως ‘γεουντίβο’ αλλά ως ‘γεουνδιακό(ν)’– θα μπορούσε να υιοθετηθεί για τα επίθετα σε *-τέος -τέα -τέον* της Ελληνικής (λ.χ. *επαινετέος*), όπως και για τα επίθετα σε *-(a/i)ble* (λ.χ. *lovable*) της Αγγλικής, κάτι που, και στις δύο αυτές γλώσσες, για ιστορικούς ή άλλους λόγους, δεν συνέβη έως σήμερα και που δεν υπάρχει και το πρακτικό (ή επιστημονικό) όφελος για να συμβεί.⁴ Στις γαλλόφωνες γραμματικές της Λατινικής το γεουνδιακό ονομάζεται (Ernout and Thomas, §§ 277, 285, passim) «adjectif en ‘-ndus’», δεδομένου ότι το (κυρίως ειπείν) γεούνδιο ονομάζεται ‘gérondif’.

Πάμε στον όρο ‘γερούνδιο’ (ιταλ. ‘gerundio’, αγγλ. ‘gerund’), που αποδίδει το λατινικό ‘gerundium’, ένα ρηματικό ουσιαστικό που κλίνεται μόνο στις πλάγιες πτώσεις του ενικού και (κατ’ ουσίαν) προσφέρει κλίση στο απαρέμφατο [βλ. πάλι τον πίν. 1-A]– Ονομαστική, δεν υπάρχει:

¹ Έναν πρώτο, πρόχειρο κριτικό σχολιασμό βλ. στον Νάκα 2010.

² Κλαίρης και Μπαμπινιώτης (§394): «[] τη λειτουργία της ενεργητικής επιρρηματικής (χρόνου, αιτίας, τρόπου κ.λπ.) μετοχής επιτελούν οι τύποι σε *-οντας* / *-ώντας* [], η μόνη δε μορφή μετοχής είναι η μετοχή του μεσοπαθητικού παρακειμένου σε *-μένος, -μένη, -μένο* [] χρησιμοποιούνται μερικές φορές και μετοχές μεσοπαθητικού ενεστώτα, σπάνια δε (με ορισμένα ρήματα) και μεσοπαθητικού αορίστου».

³ Εδώ (§§976-80) γίνεται λόγος για: Α) ενεστωτική ή ενεργητική μετοχή· Β) μετοχή παθητικού παρακειμένου ή παθητική μετοχή· Γ) («σπάνια») μετοχή παθητικού ενεστώτα.

⁴ «[] the word *gerundive* has accordingly no proper function in English grammar» (Fowler, 224).

υποκαθίσταται στη θέση του το απαρέμφατο (*laudare*)· Γενική, υπάρχει: *laudandi*· Δοτική, ναι: *laudando*· Αιτιατική, ή απαρέμφατο: (*laudare*) ή υποχρεωτικά εμπρόθετο γερούνδιο: *ad laudandum*· Αφαιρετική: *laudando* (μοιάζει με τη Δοτική). Η δομή στο σύνολό της παραβάλλεται με το σύνναρθρο απαρέμφατο της Αρχαίας Ελληνικής, που ακριβώς αποκτά πτώσεις με τη βοήθεια της κλίσης του άρθρου: *τὸ ἐπαινεῖν, τοῦ ἐπαινεῖν, τῷ ἐπαινεῖν*. Θα έλεγε κανείς ότι, προκειμένου για τη Λατινική, τόσο με τον όρο ‘modus gerundivus’ όσο και με τον όρο ‘gerundium’ δηλώνεται η ίδια λεξική κατηγορία, που στην πρώτη περίπτωση πραγματώνεται ως επίθετο ενώ στη δεύτερη περίπτωση ως ουσιαστικό, με δυνατότητα εναλλαγής μεταξύ τους (το γερουνδιακό, ως αποτέλεσμα της λεγόμενης ‘γερουνδιακής έλξης’, υποκαθίσταται στη θέση του γερουνδίου, υποχρεωτικά σε ορισμένα περιβάλλοντα ή προαιρετικά σε άλλα). Η κοινή αυτή λεξική κατηγορία σχηματίζεται με την προσθήκη στο ενεστωτικό θέμα [βλ. τον πίν. 1-B] του επιθήματος *-(e)nd-*, λ.χ. *volu-end-us* (<**volu-end-os*), *lauda-nd-us*, παράλληλου με το επιθήμα *-(e)nt-* της ενεστωτικής μετοχής, λ.χ. *volu-en-s* (<**volu-ent-s*), *lauda-n-s* (γνκ. *volu-ent-is*, *lauda-nt-is*). Ειδικά το γερουνδιακό έχει και τροπική σημασία, εκφράζει λ.χ. μια ‘δεοντική τροπικότητα’ που δεν δηλώνει ούτε το γερούνδιο ούτε η μετοχή.

‘modus gerundivus’				
(πβ. ΑΕ ρηματικό επίθετο σε -τέος, -τέα, -τέον, λ.χ.) <i>επαινε-τέος, επαινε-τέα, επαινε-τέον</i> γαλλ. <i>lav-able</i> αγγλ. <i>lov-able</i>	gerundivum [γερουνδιακό]	gerundium [γερούνδιο]		(πβ. ΑΕ)

Πίνακας 1-B

Το γερούνδιο πραγματώνει πολλές από τις λειτουργίες του ονόματος, ιδιαίτερα στη γενική πτώση (λ.χ. [στον πίν. 2-A]: *ars scribendi* –πβ. *η τέχνη του γράφειν*), δεδομένου ότι σε αυτή την περίπτωση δεν εξαρτάται ποτέ άμεσα από ρήμα για να θεωρηθεί κάποιου είδους συμπλήρωμα ή προσδιορισμός (επιρρηματικός ή άλλος) του ρήματος. Στις άλλες πτώσεις ([βλ. πίν. 2-B]: στο 3 και 4 σε πτώση δοτική // στο 5 έως 8 σε εμπρόθετη αιτιατική, ως το συντακτικό εξάρτημα διαφορετικών προθέσεων: *ad, inter, propter* αλλά και *ad, in, ob* κτλ., // και στο 9 και 10 σε αφαιρετική, που και αυτή μπορεί να εκφέρεται εμπροθέτως με *ab, de, ex, in, pro* κ.ά. προθέσεις) –σ’ αυτές τις άλλες πτώσεις, εκτός της γενικής, ως εξάρτημα ρήματος ή και επιθέτου, εξέφραζε κάποιες επιρρηματικές σημασίες, ειδικά τον ‘σκοπό’ στη δοτική, και την ‘αφηρημένη συνοδεία’ ή το ‘αφηρημένο μέσο / όργανο’ στην αφαιρετική.

Ένα ειδικότερο σχόλιο γι’ αυτή την τελευταία περίπτωση που μας δείχνουν τα παραθέματα 9 και 10: *hominis mens* (ο ανθρώπινος νους) *alitur* (τρέφεται) *discendo et cogitando* (διά του μανθάνειν και διά του συλλογίζεσθαι, επί λέξει). Τη σημασία της αφαιρετικής του μέσου / οργάνου απέδιδε με ακρίβεια στην Αρχαία Ελληνική ένα σύνναρθρο απαρέμφατο σε πτώση ‘δοτική του μέσου’ (λ.χ. *νίκησον ὄργην τῷ λογιζέσθαι καλῶς*), αλλά εξίσου καλά την απέδιδε και η ενεστωτική μετοχή, ενεργητική (λ.χ. *μανθάνων*) και μεσοπαθητική, και μάλιστα των αποθετικών ρημάτων (λ.χ. *συλλογιζόμενος* –πβ. και *ληζόμενοι ζῶσι* [διά του ληστεύειν, διά της ληστείας]). Εάν στο 10 λάβουμε υπόψην και τη γερουνδιακή έλξη: *loquendi elegantia* [η κομψότητα του ομιλείν] *augetur* [αυξάνεται / καλλιεργείται] *legendō* [διά του αναγινώσκειν] *oratores et poetas* [ρήτορας και ποιητάς –διαπιστώνουμε ότι εδώ το *legendō* έχει ως αντικείμενο το *oratores et poetas*], αλλά μόλις μετατραπεί σε *legendis oratoribus et poetis* [δι’ αναγνώστέων ρητόρων και ποιητών, κατά λέξη], μετατρέπεται, ως αποτέλεσμα της

γερουνδιακής έλξης, σε παρονομαστικό εξάρτημα του δικού του αντικειμένου –κάτι που ενισχύει την ονομαστικότητα του γερουνδίου, ακόμη και όταν προσδιορίζει ρήμα.

Και η ενεργητική ενεστωτική μετοχή / το *participium praesens* της Λατινικής; Εάν στις εμπρόθετες χρήσεις του γερουνδίου ο κατάλογος των επιρρηματικών σημασιών είναι διευρυμένος, αυτό οφείλεται στο ότι η όποια επιρρηματική λειτουργία και σημασία δεν καθορίζεται από το γερούνδιο αλλά από το σημασιολογικό ποιόν της πρόθεσης (*ad*, *in*, *ob* κτλ.) από την οποία εξαρτάται το γερούνδιο, σε συνδυασμό με το σημασιολογικό ποιόν του κύριου ρήματος (ή του επιθέτου) από το οποίο εξαρτάται ολόκληρη η εμπρόθετη φράση.

ΣΤΗ ΓΕΝΙΚΗ (πάντοτε ονομαστική χρήση)

3. <i>praeesse agro colendo</i> < [πριν από την υποχρεωτική γερουνδιακή έλξη:] <i>praeesse agrum colendo</i>	
4. <i>rei gerendae diem dicere</i> < [πριν από την υποχρεωτική γερουνδιακή έλξη:] <i>rem gerendo diem dicere</i>	
5. <i>ad dicendum</i>	
6. <i>ad verba dicenda</i> [< <i>ad verba dicendum</i>]	
7. <i>inter rem agendam istam</i>	
8. <i>propter auspicia repetenda</i>	
9. <i>hominis mens discendo alitur et cogitando</i>	
10. <i>loquendi elegantia</i> [] <i>augetur legendo oratores et poetas</i> [> <i>legendis oratoribus et poetis</i> , μετά τη γερουνδιακή έλξη].	
[[νίκησον ὄργην τῷ λογίζεσθαι καλῶς / ληζόμενοι ζῶσι]]	

Πίνακας 2-B

ΜΕΤΟΧΕΣ	
1. <i>nam et secundas res splendoriores facit amicitia et adversas partiens communicansque</i> (μερίζουσα τε καὶ κοινωνοῦσα –πβ. τῷ μερίζειν τε καὶ κοινωνεῖν) <i>leviores</i>	
2. <i>quam serpentem multiplici lapsu et erratico ferro amputans</i> (τέμνουσα) <i>coercet ars agricularum</i>	
3. <i>hi enim omnes diu cogitantes</i> (σκοποῦντες) <i>de rebus humanis intellegebant eas nequaquam pro opinione volgi esse extimescendas</i>	

Πίνακας 3

Η μετοχή, αντιθέτως, από μόνη της, χωρίς το δεκανίκι κάποιας πρόθεσης, εξέφραζε ένα πλήθος ‘επιρρηματικές’ λεγόμενες ‘σημασίες’, μπορούσε να είναι χρονική, τροπική, συνοδευτική, αιτιολογική, υποθετική, εναντιωματική κτλ. –μπορούσε δηλαδή να εκφράζει και σημασίες που κατά κανόνα δεν εξέφραζε το γερούνδιο. Παρατηρήθηκε, εξάλλου, ότι, σε όλες τις περιόδους της Λατινικής, όταν το δηλούμενο μέσον ή ὄργανο (η κατεξοχήν γερουνδιακή σημασία) ήταν συνεχόμενο ή επαναλαμβανόμενο, η μετοχή ήταν καταλληλότερη να το εκφράσει, χάρη στο γεγονός (λένε οι έγκριτες γραμματικές της Λατινικής) ότι, δίπλα στο γερούνδιο και το γερουνδιακό, η μετοχή μπορεί να αναλαμβάνει σαφέστερα τη ρηματική σύνταξη (στον πίν. 3 δίνονται κάποια σχετικά παραδείγματα, που δεν θα τα σχολιάσω, για να μην υπερβώ τα χωρικά όρια αυτής της ανακοίνωσης) –και, μάλιστα, σ’ αυτή την περίπτωση, γίνεται

λόγος ειδικά για ‘γερούνδιακή μετοχή’ (ορολογική σύγχυση ολκής, στην οποία θα επανέλθω στο τέλος).

Κάποια πρώτα εξαγόμενα από την εξέταση που προηγήθηκε, είναι ότι στη Λατινική: Το γερούνδιο μετακινείται από την ονοματικότητα προς την επιρρηματικότητα, ‘καταπατώντας’ ζωτικό χώρο της επιρρηματικής μετοχής, χωρίς όμως καθόλου ν’ απειλήσει τα κυριαρχικά της δικαιώματα. Αντιθέτως, η ενεργητική ενεστωτική μετοχή διατηρεί την ονοματικότητά της (στην Αρχαία Ελληνική είναι ακόμη πιο ενισχυμένη, λόγω και της παρουσίας του άρθρου που δεν έχει η Λατινική), όπως διατηρεί την επιρρηματικότητα και τη ρηματικότητά της (με την έννοια ότι δέχεται τα ίδια συντακτικά εξαρτήματα με το ομόρριζο ρήμα και ότι μπορεί να χρησιμεύει ως ένα μη παρεμφατικό συμπλήρωμα του ρήματος).

in edita assurgens [ενν. *incendium*] *et rursus inferiora populando* [= *populans*] *anteiit remedia*.
[πβ. το πυρ κατακαίον τα ανώτερα στρώματα και πάλι κατατρώνοντας τα κατώτερα πρόλαβε κατά πολύ την κατάσβεση]

γαλλ. (*en*) *chantant* < *cantando* (γερούνδιο του λατιν. ρ. *canto*, α’ συζυγίας)
γαλλ. *chantant* < αιτιατ. *cantantem* του *cantans* (μετοχή του λατιν. ρ. *canto*, α’ συζυγίας)

Πίνακας 4-B

Από τη συνδυαστική χρήση, στα ίδια συμφαζόμενα, μιας ‘κλιτής’ μετοχής με ένα ‘άκλιτο’ γερούνδιο, όμοιας σημασίας, συνδυαστική χρήση που ξεκινάει ήδη από τη μεταγενέστερη Λατινική και γενικεύεται αργότερα, όπως στο παράδειγμα του πίν. 4-A: ... *assurgens* [μετοχή με εννοούμενο υποκείμενο: *incendium*] *et* ... *populando* [αντί της μετοχής: *populans*... –ας πούμε, στα ελληνικά: το πυρ κατακαίον τα ανώτερα στρώματα και πάλι κατατρώνοντας τα κατώτερα πρόλαβε κατά πολύ την κατάσβεση], παίρνουμε μια μικρή ιδέα (απλουστεύω, κατ’ ανάγκην, λόγω χωρικών περιορισμών) για το πώς στις νεολατινικές γλώσσες (Ιταλική, Γαλλική, Ισπανική κτλ.) η ενεργητική ενεστωτική μετοχή χάνει σταδιακά την κλίση της (καθώς εξομοιώνεται μορφολογικά με το άκλιτο γερούνδιο). Μάλιστα, σε κείμενα που μεταφράζονται την εποχή αυτή από τα Ελληνικά, οι μετοχές του ελληνικού κειμένου αποδίδονται στα Λατινικά συχνότατα με γερούνδιο. Από μορφολογική άποψη, το γερούνδιο κληροδοτείται και επιζεί στις νεολατινικές γλώσσες με γενίκευση του τύπου της α’ συζυγίας (ακόμη και αν το ρήμα ανήκει σε άλλη συζυγία), λ.χ. (πίν. 4-B): γαλλ. (*en*) *chantant* < *cantando* (γερούνδιο του λατιν. ρ. *canto*, α’ συζυγίας), αλλά και μετοχή *chantant* < αιτιατ. *cantantem* του *cantans* (μετοχή του ίδιου ρήματος). Στα Γαλλικά, μετοχή και γερούνδιο είναι όχι μόνο και τα δύο άκλιτα αλλά συμπίπτουν και στην κατάληξή τους. Παρ’ όλ’ αυτά, δεν εξισώνονται ως προς την επιρρηματική τους χρήση –θα έλεγε, μάλιστα, κανείς ότι ο κατάλογος των επιρρηματικών σημασιών της μετοχής είναι ευρύτερος. Εξάλλου, η άκλιτη μετοχή στη Γαλλική, εκτός από επιρρηματική, χρησιμοποιείται και ως ονοματική (επιθετική- αναφορική, κυρίως επιθετική κτλ.).

Προτού περάσουμε στα Ελληνικά, απαιτείται η διατύπωση ενός δεύτερου εξαγόμενου από όσα προηγήθηκαν, και συγκεκριμένα ότι μετοχή και γερούνδιο, έστω και με ανακατανομή των ρόλων τους, διατηρούνται στις νεολατινικές γλώσσες ως αποτέλεσμα ιστορικής εξέλιξης από τη μητρική Λατινική. «Στην Ελληνική», όμως –και εδώ συνεχίζω τη διατύπωση με τα λόγια της Μόζερ (2006:48), με την οποία συμφωνώ–, «η οποία δεν διέθετε ποτέ γερούνδιο, η ομοιότητα και μόνον ως προς τη χρήση των τύπων σε -οντας με το γερούνδιο των Ρομανικών γλωσσών δεν είναι επαρκής λόγος για την υιοθέτηση ενός όρου που για τα Ελληνικά είναι παραπλανητικός (misleading)».

3. Αναντιστοιχία του άκλιτου τύπου σε -οντας /-ώντας με το γερούνδιο της Αγγλικής

Το ίδιο, φυσικά, ισχύει και για τη συσχέτιση των τύπων σε -οντας /-ώντας με το γερούνδιο της Αγγλικής. Ακολουθούν ορισμένες σχετικές επισημάνσεις.

Σε μετάφραση του Σεφέρη από δοκίμιο του Έλιοτ περιλαμβάνεται και το εξής [βλ. πίν. 5-A]: «Η ποίηση αρχίζει ίσως, τολμώ να πω [λέει ο Έλιοτ], μ’ ένα άγριο χτύπημα ενός τυμπάνου μέσα στη ζούγκλα», κάτι που δε βγάζει και πολύ νόημα –και βέβαια, δεδομένου ότι ο Έλιοτ δεν έγραψε αυτό που νόμιζε ότι διάβαζε ο Σεφέρης, δηλαδή: *with a savage beating of a drum*, γερούνδιο με μια γενική προσδιοριστική, αλλά: *with a savage beating a drum*, μετοχή με κατ’ αιτιατικήν αντικείμενο, που μεταφρασμένο κατά λέξη έχει ως εξής: μ’ έναν άγριο κτυπώντα ένα τύμπανο.

Αλλά και για τους φυσικούς ομιλητές της Αγγλικής δημιουργείται πολλές φορές σύγχυση [όπως βλέπουμε στον πίν. 5-B]: το *Women **having** the vote* στο [α] αντιστοιχεί με ελληνικό: *γυναίκες έχουσαι / κατέχουσαι δικαίωμα ψήφου* [ή μάλλον, αφού είναι άκλιτο: *γυναίκες κατέχοντας δικαίωμα ψήφου*] –μοιράζονται [λέει στη συνέχεια, ρήμα στον πληθυντικό] *την πολιτική εξουσία με τους άνδρες*. Στο [β] το *Women’s **having** the vote* αντιστοιχεί, περίπου, με ελληνικό: *το κατέχειν δικαίωμα ψήφου από πλευράς γυναικών* –*περιορίζει* [συνεχίζει τώρα, ρήμα στον ενικό: *reduces*] *την πολιτική εξουσία των ανδρών*. Τέλος, στο [γ] γίνεται η σύγχυση, αποτέλεσμα σύμφυρσης των δύο προηγούμενων: ^[*]*Women **having** the vote reduces men’s political power* που, κατά λέξη, σημαίνει: ^[*]*γυναίκες κατέχουσαι δικαίωμα ψήφου περιορίζει την πολιτική εξουσία των ανδρών*. Αυτό, κατά τις παραδοσιακές γραμματικές της Αγγλικής, είναι ένας αφόρητος σολοικισμός που φέρει ακριβώς το όνομα ‘fused participle’ (Fowler, 215-218).

[Σεφέρης]
<i>Poetry begins [] with a savage beating of a drum in a jungle</i>
[Ελιστ]
<i>Poetry begins [] with a savage beating a drum in a jungle</i>

Πίνακας 5-A

[α] {participle}
<i>Women having the vote</i> share political power with men
[β] {gerund}
<i>Women’s having the vote</i> reduces men’s political power
[γ] {fused participle}
^[*] <i>Women having the vote</i> reduces men’s political power

Πίνακας 5-B

[α]
[Σεφέρης]
<i>ήταν ένας Βορειοηπειρώτης μιλώντας πλέρια και καθαρά ελληνικά (μιλώντας... ≡ που μιλούσε...)</i> (πβ. *έχω κι εγώ ένα φίλο μιλώντας τέλεια αγγλικά)
[Ελύτης]
<i>ο σκυλεύοντας την ηδονή / η δαμάζοντας το δαίμονα / ο νικήσαντας τον Άδη και τον Έρωτα σώσαντας αυτός ο πρίγκηπας των κρίνων είμαι</i>
[β]
[Σεφέρης]
<i>...η ακοή αυτή βρίσκεται, μιλώντας γενικά [πβ. αγγλ. speaking generally], σε χαμηλότερο επίπεδο και από το μέσον όρο λ.χ. των Επτανησίων στον καιρό του Σολωμού []</i>
[γ]
[δημοτικό τραγούδι] <i>Ν’ ακούσουν τα βλαχόπουλα λαλώντας τις φλογέρες</i>
[Ελύτης] <i>Και είδα / κόρες όμορφες [] να φυσούν όρθιες μέσα στην Κοχύλα και άλλες γράφοντας με κιμωλία λόγια παράξενα, αινιγματικά</i>
[Βαρβέρης] <i>Φαντάσου ακόμη γάτες να δρασκελάν τις σάρκες, γάτες βυθίζοντας το πιο μεγάλο νύχι μέσα στις ουλές</i>

Πίνακας 5-Γ

Να θυμίσω, με την ευκαιρία, ότι από ασύνειδη επίδραση της Αγγλικής, ο Σεφέρης γέμισε, όχι μόνο τα ποιήματά του, αλλά και τα πεζά και τα δοκίμιά του με εκφράσεις του τύπου: *ήταν ένας Βορειοηπειρώτης **μιλώντας** πλέρια και καθαρά ελληνικά* όπου το: *μιλώντας...* ερμηνεύεται: *που μιλούσε...*, ισοδυναμεί δηλαδή με αναφορική πρόταση, μια ονομαστική χρήση αποκλίνουσα σε ό,τι αφορά τον άκλιτο τύπο σε -οντας της Νέας Ελληνικής (όπως είδαμε στην ενότητα 1), αλλά απολύτως κανονική σε ό,τι αφορά την Αγγλική. Από μια προκλητική, θα έλεγα, επιδίωξη δημιουργίας ύφους, ο Ελύτης προχωρεί σε διπλή απόκλιση, με ονομαστική αλλά και έναρθη επιπλέον χρήση του άκλιτου τύπου (*ο **σκυλεύοντας** την ηδονή ή η **δαμάζοντας** το δαίμονα*), ακόμη και σε τριπλή απόκλιση (*ο **νικήσαντας** τον Άδη*), αφού επιπροσθέτως τον σχηματίζει αντικανονικά με βάση το συνοπτικό θέμα. Από αγγλική επίδραση, ο Σεφέρης καταφεύγει, ενίοτε, και σε απόλυτες (δηλαδή χωρίς σύναψη με το υποκείμενο) χρήσεις του άκλιτου νεοελληνικού τύπου, όπως το *μιλώντας γενικά* [*generally speaking*,

στον πίν. 5-Γβ]. Δεν λείπουν και τα παραδείγματα άκλιτων τύπων σε χρήση ρηματικού συμπληρώματος (κατηγορηματικής μετοχής), σε εξάρτηση βεβαίως από ειδικά ρήματα (βλ. τα παραθέματα στο 5-Γγ: ν' ακούσουν τα βλαχόπουλα **λαλώντας** τις φλογέρες, δηλαδή να λαλούν τις φλογέρες), στα οποία καταφεύγουν ορισμένοι λογοτέχνες ακολουθώντας μια παλιότερη παράδοση.⁵ Βεβαίως, οι γλωσσικές αποκλίσεις της λογοτεχνίας πρέπει ν' αντιμετωπίζονται γι' αυτό που είναι, και, με αυτή την έννοια, μόνο έμμεσα μπορούν να αφορούν τη διαμόρφωση ενός κοινού χρηστικού κανόνα για τον άκλιτο μετοχικό τύπο της Νέας Ελληνικής, κανόνα τον οποίο προσπάθησα να προσδιορίσω στην ενότητα 1).

4. Αναντιστοιχία του γερούνδιου της Αγγλικής ακόμη και με το γερούνδιο της Λατινικής

Προτού προχωρήσουμε, πρέπει, βεβαίως, να κλείσουμε το θέμα της σχέσης με το γερούνδιο της Αγγλικής. Στη γνωστού κύρους *A Comprehensive Grammar of the English Language*, την οποία υπογράφει η συγγραφική τετράδα Quirk, Greenbaum, Leech και Svartvik, αναπτύσσεται (§§ 15.10 και .12) εκτενής επιχειρηματολογία γύρω από την αναντιστοιχία μεταξύ Αγγλικής και Λατινικής, σε ό,τι αφορά το λεγόμενο 'γερούνδιο', που καταλήγει στο να απορρίψει τον όρο 'γερούνδιο' για την Αγγλική.

Στην επιχειρηματολογία περιλαμβάνονται, μεταξύ άλλων, διαφορές ως προς την τροπικότητα (την οποία μπορεί να εκφράζει μόνο το γερούνδιο της Αγγλικής, αλλά όχι και της Λατινικής). Κυρίως, όμως, επισημαίνονται οι διαφορές ως προς τους σημασιολογικούς ρόλους, δεδομένου ότι στην Αγγλική ο κατάλογος είναι ευρύτερος. Στον πίν. 6-Α βλέπουμε ότι το γερούνδιο της Αγγλικής μπορεί να λειτουργεί, όπως και το απαρέμφατο, ως: υποκείμενο (στο [i]), αντικείμενο (στο [ii]), κατηγορούμενο (στο [iii]), ονοματική παράθεση (στο [iv]), συντακτικό εξάρτημα επιθέτου (στο [v]), ή πρόθεσης (στο [vi]).

	nominal <i>-ing</i> participle clauses
subject:	[i] Watching television keeps them out of mischief
direct object:	[ii] He enjoys playing practical jokes
subject complement:	[iii] His first job had been selling computers
appositive:	[iv] His current research, investigating attitudes to racial stereotypes, takes up most of his time
adjectival complementation:	[v] They are busy preparing a barbecue
prepositional complement:	[vi] I'm responsible for drawing up the budget

Πίνακας 6-Α

***errandum** [ΥΠΟΚΕΙΜ] *humanum est*
(**errare** *humanum est*)
*(**ad**) **errandum** [ΑΝΤΙΚΕΙΜ] *non volebat*
(**errare** *non volebat*)

Πίνακας 6-Β

[1α] **To paint** a child is difficult
[1β] **To paint** a child I bought a new canvas

[2α] **Painting** a child is difficult
[2β] **Painting** a child that morning, I quite forgot the time

Πίνακας 6-Γ

Η ονοματικότητα του αγγλικού γερούνδιου αποδεικνύεται ενισχυμένη, απέναντι ακόμη και στο Λατινικό, το οποίο, ως σημειωθεί, επειδή στερούνταν την ονομαστική και την αιτιατική πτώση, δεν

⁵ Βλ. Νάκας ⁵2004, κεφ. ΙΧ: "Μετοχικά (ή πώς χρησιμοποιούν τη μετοχή ο Σεφέρης, ο Μακρυγιάννης, ο Ελύτης κ.ά.)".

μπορούσε να χρησιμεύσει ως όρισμα με λειτουργία είτε υποκειμένου είτε αντικειμένου, όπως μας δείχνουν και τα παραδείγματα του πίν. 6-B: έναντι του *errare humanum est* (το πλανάσθαι ανθρώπινον) το **errandum humanum est*, με γερούνδιο ως υποκείμενο, είναι προκλητικά αντιγραμματικό στη Λατινική· το ίδιο ισχύει και για το **(ad) errandum non volebat*, με γερούνδιο ως αντικείμενο, έναντι του *errare non volebat*.

Ξεχωριστή επισήμανση γίνεται (A Comprehensive Grammar..., § 17.54 note) σχετικά και με την εξής αναντιστοιχία (βλ. πίν. 6-Γ): το απαρέμφατο (*to paint*) παραμένει απαρέμφατο τόσο στο [1α] όπου λειτουργεί ως υποκείμενο: *to paint a child is difficult*, όσο και στο [1β], όπου λειτουργεί επιρρηματικά: *to paint a child I bought a new canvas*. αντιθέτως, το *painting* στο [2α], όπου λειτουργεί ονομαστικά, και μάλιστα ως υποκείμενο: *Painting a child is difficult* θεωρείται γερούνδιο, αλλά στο [2β] όπου λειτουργεί επιρρηματικά: *Painting a child that morning, I quite forgot the time* (σε ελεύθερη μετάφραση: ζωγραφίζοντας ένα παιδί εκείνο το πρωινό, ξεχάστηκα τελείως) θεωρείται μετοχή· καταγράφεται, επομένως, μια διαφοροποίηση ως προς τη γραμματική κατηγορία (το ‘μέρος του λόγου’). Για να εξαλείψει αναντιστοιχίες αυτού του τύπου, η ενλόγω γραμματική, εγκαταλείποντας τον όρο ‘γερούνδιο’, υιοθετεί τον όρο ‘μετοχική φράση’ / ‘-ing participle phrase’, και στην περίπτωση [2β], όπου λειτουργεί επιρρηματικά (: ‘adverbial -ing participle phrase’), και στην περίπτωση [2α], όπου λειτουργεί ονομαστικά (όπως, εξάλλου, και σ’ όλες τις περιπτώσεις του πιν. 6-A: ‘nominal -ing participle phrase’).

Ο ταλαίπωρος άκλιτος τύπος σε -οντας / -ώντας της Νέας Ελληνικής, με βάση την αποκλειστικά επιρρηματική του λειτουργία, αντιστοιχεί μόλις με την περίπτωση [2β] του πίν. 6-Γ, ενώ στερείται όλες τις ονομαστικές λειτουργίες του πίν. 6-A.

Η Τσιμπλή (2000), η οποία επίσης υιοθετεί τον όρο ‘γερούνδιο’ / ‘gerund’ για τον άκλιτο μετοχικό τύπο της Νέας Ελληνικής, έδειξε πειστικά ότι δεν μπορεί να χρησιμεύσει ως όρισμα, με λειτουργία ούτε υποκειμένου ούτε αντικειμένου ούτε άλλου ρηματικού συμπληρώματος. Τα παραδείγματα αντιγραμματικότητας του πίν. 7 είναι τα δικά της: **(To) ψηφίζοντας μικρά κόμματα βοηθάει τη δημοκρατία* ή **Αντιπαθώ (το) πηγαίνοντας για ψώνια* ή **Θυμάμαι το Γιάννη οδηγώντας* (κ.ά.ό.).

Το ερώτημα (που τίθεται και σε ό,τι αφορά την εργασία της Τσιμπλή) παραμένει: με βάση ποια χαρακτηριστικά θα μπορούσε να ονομαστεί γερούνδιο;

5. Καταληκτικές διαπιστώσεις για τον τύπο σε -οντας / -ώντας της Νέας Ελληνικής

Περνώντας στην κατακλείδα, ας επικεντρωθούμε αποκλειστικά στον νεοελληνικό τύπο. Κατ’ ανάγκην, πάλι απλουστεύοντας, θα θυμίσω ότι μέσα σε ένα καθεστώς μορφολογικής αναδόμησης και εξομαλισμού, με πολλούς μεταπλάσμούς, ιδίως από την πολύπλοκη Γ’ κλίση προς τις άλλες δύο, τα πρώτα σημάδια (τον 4^ο έως 6^ο μ.Χ. αι.) μη μορφολογικής διαφοροποίησης της μετοχής ανάλογα με το γένος ή τον αριθμό, που θα οδηγήσουν στην κατοπινή της ακλίσια, δεν οφείλονται στην εξομοίωση προς κάποιο ανύπαρκτο άκλιτο γερούνδιο της Ελληνικής, αλλά (θα τολμούσα να πω) σε ένα... γραμματικό λάθος, τη σταδιακή δηλαδή επικράτηση του τύπου του αρσενικού γένους, τόσο πάνω στο ουδέτερο (λ.χ. *θηρίον περωτόν έχοντα* [αντί: *έχον*] *τρεις κεφαλάς*) όσο και στο θηλυκό (λ.χ. *είδον γυναίκες ομνύοντας* [αντί: *γυναίκας ομνουσας*]), με μεταπλάσμο και του ουσιαστικού *γυνή* κατά τα πρωτόκλιτα (*η γυναίκα < τη γυναίκα, τις γυναίκες < οι γυναίκες*, κ.ο.κ.).⁶ Έχουμε ακόμη και σήμερα δείγματα αυτής της επικράτησης, λ.χ. *(*)των εκτελεσθέντων εργασιών* ή, λεγόμενο από γυναίκα, *(*)είμαι γεννηθείς μετά τον πόλεμο* ή *(*)είμαι κι εγώ παθών κ.τ.ό.*,⁷ γι’ αυτό θεωρείται ένας ισχυρός λόγος γι’ αυτή την εξέλιξη.

<i>θηρίον περωτόν έχοντα</i> [αντί: <i>έχον</i>] <i>τρεις κεφαλάς</i> <i>είδον γυναίκας ομνύοντας</i> [αντί: <i>γυναίκας ομνουσας</i>]

Πίνακας 8-A

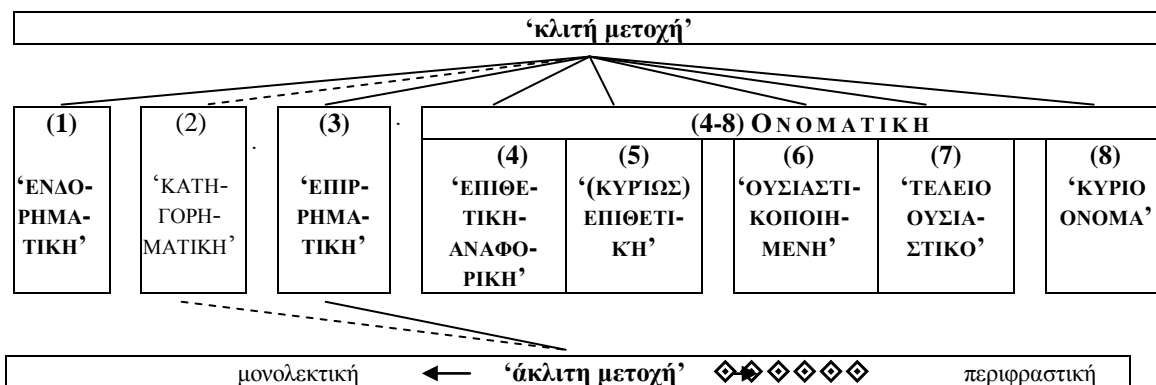

Σε ό,τι αφορά, τώρα, την εξέλιξη στον σημασιολογικό τομέα, ο πίν. 8-B μας βοηθάει ν’ αποτυπώσουμε την κατάσταση που προέκυψε. Βλέπουμε ότι ο τύπος σε -οντας / -ώντας έχει απολέσει όλες τις ονομαστικές λειτουργίες (4-8), διατηρώντας, στην ουσία, μόνον την επιρρηματική (βλ. το (3) στον πίν. 8-B). Στην ενότητα 1. παραθέσαμε τον κανόνα των δέκα σημείων που συνήθως τηρείται κατά τη

⁶ Άφθονο σχετικό υλικό βλ. στη μελέτη της Manolesou.

⁷ Βλ. και Νάκα 2003.

χρήση του άκλιτου αυτού τύπου, μαζί με τις συχνότερες σημασίες που μπορεί να εκφράζει. Χρησιμοποιώ, έναντι του ‘κλιτή μετοχή’, τον όρο ‘άκλιτη (αλλά) μετοχή’, για να υποδηλώσω ότι, εκτός από την επιρρηματικότητα, διατηρεί, έστω μη παρεμφατικά, και τη ρηματικότητά της (εφόσον δέχεται σε ίση μοίρα όλα τα συντακτικά εξαρτήματα του ομόρριζου ρήματος). Άρα, το μόνο στο οποίο δεν (συμ)μετέχει, είναι η ονοματικότητα.

Θέλω να θυμίσω εδώ ότι τόσο για τη μορφολογική όσο και για τη σημασιολογική εξέλιξη στην οποία μόλις αναφέρθηκα, έχουμε από το 2005 την πολύ εμπειριστατωμένη και με άφθονο υλικό μελέτη της Ιώς Μανωλέσσου. Η συναδέλφισσα πιστεύει ότι υπήρξε μια γενικότερη εξέλιξη, τόσο της κλιτής μετοχής προς το επίθετο, όσο και της άκλιτης προς το γερούνδιο, γι’ αυτό και τιτλοφορεί τη μελέτη της “από τις μετοχές στα γερούνδια”. Ως προς αυτό το τελευταίο, να μου επιτρέψει, με όλο το θάρρος, να πιστεύω ότι καταλληλότερος τίτλος θα ήταν: από τη μετοχή στο επίρρημα (άλλωστε, με βάση την κομβικής σημασίας υποσημείωση 2. της μελέτης της, η ίδια δεν επιμένει στον όρο ‘γερούνδιο’, ο οποίος τη διευκόλυνε απλώς στη διαγλωσσική της μελέτη, εφόσον χρησιμοποίησε στοιχεία και από τις ρομανικές κ.ά. γλώσσες).

Πίνακας 8-B

Και πώς πρέπει να αντιμετωπιστεί η προσέγγιση (του Haspelmath κ.ά.), κατά την οποία ο καταλληλότερος ενπροκειμένος όρος δεν είναι μετοχή (participle), αλλά ‘converb’, τον οποίο Μανωλέσσου και Μόξερ εξελληνίζουν ως ‘ρηματικό επίρρημα’; Απαντώ ευθαρσώς: στα Ελληνικά δημιουργεί περισσότερα προβλήματα από όσα υποτίθεται ότι έρχεται να λύσει, δεδομένου, άλλωστε, ότι προκαλεί ορολογική σύγχυση. Λέγοντας ‘ρηματικό επίρρημα’ είναι σαν να λες ‘ονοματική αντωνυμία’, ‘γερονδιακή μετοχή’ ή και ‘γερονδιακό τύπο μετοχής’ κ.ά. παρόμοια. Καταντάει εξωφρενικό (και είπαμε από την αρχή: «far from the madding gerund»!).

Προφανώς, όπως προκύπτει από την προηγούμενη συζήτηση, από τους εκλεκτούς συναδέλφους που ασχολούνται με τα σχετικά ζητήματα, προσωπικά συντάσσομαι με εκείνους που θεωρούν ότι το ν’ αποκαλούμε ‘γερούνδιο’ την άκλιτη μετοχή σε -οντας / -ώντας της Νέας Ελληνικής αποτελεί ιστορική και επιστημονική ανακρίβεια, από την οποία πρέπει να απαλλαγούμε το συντομότερο και από την οποία, πρωτίστως, πρέπει να απαλλάξουμε τη διδασκαλία της Ελληνικής, ως μητρικής και ως δεύτερης / ξένης.

ABSTRACT

The aim of this paper is to propose a different kind of morphological classification for the adjectives of Modern Greek language in order to contribute to the deeper analysis of the language system. Our description is based on the theory of Paradigm Function Morphology (Stump 2001), which is an inferential-realizational theory of inflection. First we take a look at the former classifications of Greek adjectives, then we present our own categorization and finally we present a table of the prototypical and the peripheral adjective categories, according to our corpus-based research findings.

Keywords: paradigm function morphology, adjectives, classification, prototypical, peripheral categories

1. Εισαγωγή

Στόχος της εργασίας αυτής είναι να επιχειρήσει μια νέα μορφολογική ταξινόμηση των επιθέτων της νέας ελληνικής, η οποία στηρίζεται στην ακόλουθη αρχή: ότι σε κάθε γλώσσα που περιλαμβάνει κλίση κάθε λέξη που κλίνεται μεταφέρει ένα σύνολο μορφοσυντακτικών ιδιοτήτων (Stump, 2001) και ότι το κλιτικό παράδειγμα (paradigm), δηλαδή το σύνολο των κλιτών τύπων μιας λέξης, συνιστά κεντρικό στοιχείο στην περιγραφή και την ανάλυση του κλιτικού συστήματος μιας γλώσσας. Μετά από μία σύντομη ανασκόπηση των ταξινομήσεων που έχουν προταθεί μέχρι σήμερα, η καθεμιά από τις οποίες παρουσιάζει τα δικά της πλεονεκτήματα, παρουσιάζουμε τη δική μας πρόταση, η οποία στηρίζεται στη θεωρία των παραδειγματικών συναρτήσεων (Stump, 2001) και συμβαδίζει με μία αντίστοιχου τύπου ταξινόμηση των ουσιαστικών της νέας ελληνικής από την Αναστασιάδη-Συμεωνίδη (2011, υπό έκδοση). Στη συνέχεια, στην προσπάθειά μας να αναδείξουμε τις τάσεις του συστήματος όσον αφορά την παραγωγή και τη χρήση των επιθέτων κατά τη συγχρονία που διανύουμε, χωρίζουμε τις κατηγορίες των επιθέτων σε πρωτοτυπικές και περιφερειακές και κλείνουμε το άρθρο μας απαριθμώντας τα πλεονεκτήματα της ταξινόμησής μας και τις προοπτικές επέκτασης της έρευνάς μας.

2. Ανασκόπηση

2.1 Ταξινόμηση Μανόλη Τριανταφυλλίδη (1996) [1941]

Σύμφωνα με τον Τριανταφυλλίδη, η κλίση των επιθέτων ακολουθεί αυτήν των ουσιαστικών που έχουν τις ίδιες καταλήξεις. Οι βασικές κατηγορίες που αναφέρονται είναι οι ακόλουθες:

- επίθετα σε -ος, -η, -ο, π.χ. καλός
- επίθετα σε -ος, -α, -ο, π.χ. βιταμινούχος, νέος
- επίθετα σε -ος, -ια, -ο, π.χ. φτωχός
- επίθετα με το αρσενικό σε -ύς, -ιά, -ύ/-ής, -ιά, -ί, π.χ. αψύς, σταχτής
- επίθετα σε -ης, -α, -ικο, π.χ. ζηλιάρης

Ενώ η ταξινόμηση αυτή χαρακτηρίζεται από οικονομία, κατά τη γνώμη μας είναι ελλιπής, επειδή παρακάμπτει τους λόγιους τύπους της τέταρτης κατηγορίας (π.χ. ευθύς-ευθέος, πρβλ. του παχέος εντέρου), οι οποίοι είναι παρόντες στη συγχρονική χρήση της γλώσσας, και επειδή δεν περιλαμβάνει

τις κατηγορίες λόγιων επιθέτων που λήγουν σε -ων, -ων, -ον, -ης, -ης, -ες, -ων, -ουσα, -ον. Όπως θα δούμε και στη συνέχεια, παρότι στην περιφέρεια του συστήματος, οι κατηγορίες αυτές παραμένουν ενεργές, καθώς είναι παρούσες στο φαινόμενο της νεολογίας. Αν παραλειφθούν, οδηγούν σε ανακριβή περιγραφή της γλωσσικής πραγματικότητας στη συγχρονία που διανύουμε, όπου ακόμη είναι διάχυτη η συνύπαρξη του λαϊκού με το λόγιο/αρχαιότροπο στοιχείο.

2.2 Ταξινόμηση Φυλιππάκη-Holton-Makridge (1997)

Η ταξινόμηση γίνεται με βάση τις καταλήξεις των επιθέτων και στα τρία γένη. Από αυτήν προκύπτουν δώδεκα κατηγορίες, στις οποίες συγκαταλέγεται και το παραδοσιακά χαρακτηρισμένο «ανώμαλο» *πολύς-πολλή-πολύ*. Οι κλιτικές τάξεις είναι οι ακόλουθες:

1	επίθετα σε -ος, -η, -ο
2	επίθετα σε -ος, -α, -ο, με υποκατηγορία για τα δικατάληκτα
3	επίθετα σε -ος, -ία, -ο
4	επίθετα σε -ύς, -ία, -ύ
5	επίθετα σε -ύς, -εία, -ύ
6	επίθετα σε -ής, -ία, -ί
7	το επίθετο (ποσοδεικτικό) <i>πολύς</i>
8	επίθετα σε -ής, -ές
9	επίθετα σε -ης, -α, -ικο
10	επίθετα σε -άς/-ής, -ού, -άδικο/-ούδικο/-ήδικο
11	επίθετα σε -ων, -ουσα, -ον
12	επίθετα σε -ων/-ονας, -ον

Γίνεται αναφορά στην πιο συχνή κατηγορία (-ος, -η, -ο), ενώ συζητιούνται ζητήματα λογιότητας των μονάδων (π.χ. τα επίθετα σε -ύς, -εία, -ύ), υφολογικών διαφορών ανάμεσα σε γραμματικά ισοδύναμους τύπους (*βόρειος/βόρεια Αμερική*), διαφαινόμενων τάσεων του συστήματος (*οι έγκυες, η έγγεια ιδιοκτησία*) και περιπτώσεων παγίωσης στη χρήση, που έχουν καταγραφεί ως παραδείγματα ονοματοποίησης (*η εγκύκλιος*)¹.

2.3 Ταξινόμηση του Λεξικού του Ιδρύματος Μανόλη Τριανταφυλλίδη (1998)

Στους πίνακες κλιτικών παραδειγμάτων που παρατίθενται στο παράρτημα, γίνεται κατηγοριοποίηση των επιθέτων με βάση τις καταλήξεις τους στα τρία γένη, τη διάκρισή τους σε τρικατάληκτα, δικατάληκτα και μονοκατάληκτα και τη θέση του τόνου (διάκριση σε οξύτονα, παροξύτονα και προπαροξύτονα επίθετα), π.χ. τα επίθετα *καλός, -ή, -ό* και *άσπρος, -η, -ο* τοποθετούνται σε διαφορετικές κατηγορίες. Σε υποομάδες της ίδιας κλιτικής τάξης τοποθετούνται οι αρχαιοκλίτες μετοχές ενεστώτα ή αορίστου, που λήγουν σε -ων, -ουσα, -ον (τονισμένο και άτονο), -ών, -ούσα, -ούν, -ων, -ώσα, -ων, -είς, -είσα, -έν, -ας, -ασα, -αν, καθώς και τα επίθετα που προέρχονται από τα συνηρημένα β' κλίσης της αρχαίας (π.χ. *βραδύνους, ταχύπλους* κτλ.). Στο κλιτικό παράδειγμα επισημαίνονται και οι ποικιλίες που σχετίζονται με τη μετακίνηση του τόνου στη γενική ενικού και πληθυντικού (π.χ. *του διαδίκου, του διάδικου*), ενώ η διάκριση σε λόγια/μη λόγια επίθετα αναφέρεται στη μικροδομή του λεξικού (π.χ. στη μετοχή *λήζας*). Συνολικά οι κατηγορίες και υποκατηγορίες που αναφέρονται είναι 24, με το επίθετο *πολύς-πολλή-πολύ* να εξαιρείται από την ταξινόμηση ως ανώμαλο.

2.4 Ταξινόμηση Κλαίρη-Μπαμπινιώτη (2005)

Στη γραμματική των Κλαίρη-Μπαμπινιώτη γίνεται προσπάθεια να ταξινομηθούν τα επίθετα με βάση τις καταλήξεις τους και τους συνδυασμούς τύπων που παρουσιάζουν. Για τα επίθετα που παρουσιάζουν ομοιότητες στον τρόπο σχηματισμού τους εισάγεται ο όρος «μορφολογικές δέσμες». Για παράδειγμα, τα επίθετα *μεγάλος-πλούσιος-γλυκός* εντάσσονται στην ίδια μορφολογική δέσμη, ενώ οι ορθογραφικές ιδιαιτερότητες του θηλ. επιθέτου *γλυκιά* το τοποθετούν σε μία μορφολογική υποδέσμη. Στην ουσία έχουμε επανάληψη των κλασικών επιθετικών κατηγοριών, με τη διαφορά ότι

¹ Για την ονοματοποίηση, βλ. και Θωμαδάκη (2009: 104).

αυτή τη φορά συντελείται μια εσωτερική ομαδοποίηση με βάση την κατανομή των θεμάτων. Έτσι σε κάθε κατηγορία εξετάζονται και τα τρία γένη των επιθέτων που ανήκουν σε αυτήν και στη συνέχεια δίνονται και άλλα επίθετα που παρουσιάζουν δομική συνάφεια. Π.χ. περιγράφονται τα επίθετα *γκρινιάρης-γκρινιάρια-γκρινιάρικο* και κατόπιν κλίνονται στον ίδιο πίνακα τα *υπναράς, τζαμπατζής, μικρούλης*.

	αρσενικό	θηλυκό	ουδέτερο
ονομαστική ενικού	γκρινιάρης-ς	γκρινιάρια-0	γκρινιάρικο -0
αιτιατική ενικού	-0	-0	-0
γενική ενικού	-0	-ς	γκρινιάρικ -ου
ονομαστική πληθυντικού	-δες	γκρινιάρ -ες	-α
αιτιατική πληθυντικού	-δες	-ες	-α
γενική πληθυντικού	-δων		-ων

Ενώ συμφωνούμε με την ομαδοποίηση, εντούτοις δε γίνεται σαφής η θεματική αλλομορφία στο ληκτικό φωνήεν του θέματος, ώστε η σχηματική αναπαράσταση να περιλαμβάνει όλους τους δυνατούς συνδυασμούς της συγκεκριμένης κατηγορίας. Τέλος, σημειώνουμε την απουσία της κατηγορίας *-ων, -ων, -ον, -ον*, η οποία, όπως θα φανεί και παρακάτω, ανήκει στην περιφέρεια του συστήματος, αλλά εξακολουθεί να είναι ζωντανή.

2.5 Ταξινόμηση Κυριακοπούλου (2005)

Περίπου 32.000 επίθετα καταχωρίζονται στα ηλεκτρονικά λεξικά της κοινής νέας ελληνικής που σχεδιάστηκαν και αναπτύσσονται από τη μονάδα αυτόματης επεξεργασίας φυσικών γλωσσών (<http://linginfo.frl.auth.gr>) του Εργαστηρίου Μετάφρασης και Επεξεργασίας του Λόγου υπό την εποπτεία της αναπληρώτριας καθηγήτριας του Α.Π.Θ. Τίτας Κυριακοπούλου (Κυριακοπούλου et al., 2002). Η επεξεργασία των μονάδων στα λεξικά αυτά γίνεται με το πρόγραμμα αυτόματης κλίσης *GenereFlexion*, το οποίο, με την προσθήκη κωδικών, παράγει όλους τους κλιτούς τύπους των καταχωρισμένων γλωσσικών μονάδων. Οι κατηγορίες των επιθέτων, σε καθεμιά από τις οποίες αντιστοιχεί κι ένας κωδικός, είναι πάνω από 50 και ενσωματώνουν κάθε ποικιλία που παρατηρείται στη χρήση των επιθέτων (π.χ. διπλοτυπίες, πτώση του τόνου, τύποι που εμφανίζονται άπαξ, ουσιαστικά που σπάνια λειτουργούν ως επίθετα κι έχουν καταγραφεί ως τέτοια κτλ.). Η επεξεργασία είναι σαρωτική, αλλά, καθώς βασίζεται στις κατάληξεις των επιθέτων και στη θέση του τόνου, δεν προσφέρει οικονομία στην περιγραφή των δεδομένων ούτε δίνει τη δυνατότητα για πρόβλεψη της κλίσης νέων μονάδων.

2.6 Ταξινόμηση Ράλλη (2008)

Κατά τη Ράλλη, «σε γενικές γραμμές τα επίθετα προσαρμόζουν τα κλιτικά τους παραδείγματα στο πρότυπο των ουσιαστικών» (2008: 122). Η Ralli (2000) προτείνει έναν διαχωρισμό των ουσιαστικών και των επιθέτων σε κλιτικές τάξεις σύμφωνα με δύο κριτήρια:

- 1) τη συστηματική αλλομορφική ποικιλία των θεμάτων και
- 2) τη μορφή του συνόλου των κλιτικών επιθημάτων που συνδέονται με αυτά. Σύμφωνα με τα δύο αυτά κριτήρια, αναγνωρίζει 5 κλιτικές τάξεις, οι οποίες είναι οι ακόλουθες:

KT1: αρσενικά, π.χ. *καλός, ωραίος* (πρόκειται γι' αυτά που δεν παρουσιάζουν θεματική αλλομορφία)

KT2: θηλυκά, π.χ. *καλή, ωραία*

KT3: ουδέτερα, π.χ. *καλό, ωραίο*

KT4: αρσενικά και θηλυκά δικατάληκτα, π.χ. *ευσεβής*

KT5: ουδέτερα σε -ες, π.χ. *ευσεβές*

Η ταξινόμηση της Ράλλη μάς βρίσκει γενικά σύμφωνους ως προς το πνεύμα της τυποποίησης και της μορφολογικής ανάλυσης. Ωστόσο, λόγω περιφερειακότητας στη συγχρονική χρήση κάποιων κατηγοριών επιθέτων (βλ. και Αναστασιάδη-Συμεωνίδη, 2003), π.χ. των επιθέτων σε *-ύς*, δε γίνεται προσπάθεια τυποποίησής τους. Επίσης, δεν αναφέρονται τα ενδιάμεσης συχνότητας χρήσης αρσενικά επίθετα σε *-ης*, π.χ. *κοντούλης* και *-άς*, π.χ. *υπναράς*.

2.7 Ταξινόμηση Χατζησαββίδη (2009)

Ο Χατζησαββίδης διακρίνει τα επίθετα σε τρεις ευρείες κατηγορίες με βάση τον αριθμό των καταλήξεων που εμφανίζουν για κάθε γένος (τρικατάληκτα, μονοκατάληκτα, δικατάληκτα). Επιπλέον στις δύο πρώτες κατηγορίες προχωρεί και σε μία ακόμη διαφοροποίηση, ανάλογα με τον αριθμό των συλλαβών που διατηρούνται σε κάθε πτώση, διακρίνοντας τα επίθετα σε ισοσύλλαβα και ανισοσύλλαβα. Όσον αφορά την κλίση των επιθέτων, τα ταξινομεί με βάση τις καταλήξεις τους και στα τρία γένη σε έντεκα κατηγορίες, ακολουθώντας σε μεγάλο βαθμό την περιγραφή των Φιλίππκη-Holton-Mackridge. Οι μεταβολές στη θέση του τόνου προσλαμβάνουν υφολογικό χαρακτήρα, ενώ η μετακίνηση του τόνου στο αρσενικό στη γενική ενικού ενίοτε συνδέεται με την ουσιαστικοποίηση του επιθέτου μέσα στο λόγο (π.χ. του αρρώστου). Αριθμητικά δεδομένα δεν αναφέρονται, επισημαίνεται ωστόσο ότι η κατηγορία των επιθέτων σε -ος, -η, -ο (περιλαμβάνονται και τα τονισμένα και τα άτονα) είναι η συνηθέστερη στη νέα ελληνική.

α/α	Καταλήξεις		Παραδείγματα	
	ενικός	πληθυντικός	ενικός	πληθυντικός
1	-ος, -η, -ο	-οι, -ες, -α	έντιμος, ταπεινός	έντιμοι, ταπεινοί
2	-ος, -α, -ο	-οι, -ες, -α	νέος, τίμιος	νέοι, τίμιοι
3	-ος, -ιά, -ο	-οι, -ες, -α	φτωχός	φτωχοί
4	-ύς, -ιά, -ύ	-ιοί, -ιές, -ιά	βαθύς	βαθιοί
5	-ύς, -εία, -ύ	-είς, -είες, -έα	ευθύς	ευθείς
6	-ής, -ιά, -ί	-ιοί, -ιές, -ιά	χρυσαφής	χρυσαιοί
7	-ης, -α, -ικο	-ηδες, -ες, -ικα	κοντούλης	κοντούληδες
8	-άς, -ού, -άδικο	-άδες, -ούδες, -άδικα	υπναράς	υπναράδες
9	-ης, -ης, -ες	-εις, -εις, -η	επιμελής, συνήθης	επιμελείς, συνήθεις
10	-ων, -ουσα, -ον	-οντες, -ουσες, -οντα	μέλλων, παρών	μέλλοντες, παρόντες
11	-ων, -ων, -ον	-ονες, -ονες, -ονα	μετριόφρων	μετριόφρονες

2.8 Ταξινόμηση Θωμαδάκη (2009)

Στη Θωμαδάκη γίνεται αντιστοίχιση των τάξεων των επιθέτων προς τις τάξεις των ουσιαστικών, με την επισήμανση ότι ένα επίθετο, λόγω της εγγενούς διάκρισής του σε τρία γένη (τουλάχιστον στις ομαλές περιπτώσεις), διαθέτει τύπους σε περισσότερα από ένα κλιτικά παραδείγματα ταυτόχρονα, π.χ. ο νέος → ο λόχος, η νέα → η εφημερίδα, το νέο → το ξύλο. Και εδώ γίνεται προσπάθεια να συνυπολογιστούν στην κατάρτιση των κατηγοριών το θεματικό φωνήεν των λεξημάτων, καθώς και το ληκτικό τεμάχιο του θέματος (2009: 108). Αναφέρεται λ.χ. ότι η ποικιλία των μορφών του θηλυκού γένους περιορίζεται στην εμφάνιση των θεματικών φωνηέντων /i/ και /a/, πράγμα με το οποίο συμφωνούμε κι εμείς. Ωστόσο, η περιγραφή της Θωμαδάκη δεν είναι αυστηρά σχηματική, καθώς εμπλέκει και άλλου τύπου πληροφορίες, όπως χαρακτηριστικά στη χρήση κάποιων επιθέτων (εναλλακτικοί τύποι, τάση προς ακλισία), τη σχέση κάποιων τύπων με διαδικασίες παραγωγής (π.χ. *ζηλιάρης* με το επίθημα -*άρης*) ή το κατά πόσο κάποιες κατηγορίες επιθέτων παραμένουν ενεργές ή όχι (ύπαρξη κλειστών σειρών²).

3. Νέα πρόταση ταξινόμησης

3.1 Θεωρητικό πλαίσιο: η θεωρία των παραδειγματικών συναρτήσεων

Η θεωρία των παραδειγματικών συναρτήσεων (Paradigm Function Morphology) βασίζεται στο μορφολογικό πρότυπο περιγραφής «Λέξη και Παράδειγμα³» όπου βασική μονάδα του συντακτικού επιπέδου θεωρείται η λέξη, με το μόρφωμα να διαδραματίζει δευτερεύοντα ρόλο⁴: η λέξη

² Επειδή οι κλειστές σειρές αναφέρονται σε λειτουργικά (γραμματικά) στοιχεία της γλώσσας (πχ. συνδέσμους), προτιμούμε τον όρο *μη διαθέσιμες σειρές*, για να δηλώσουμε την απουσία εισδοχής νέων μελών στις τάξεις αυτές.

³ Σε αντιδιαστολή προς τα πρότυπα «στοιχείο και διάταξη», όπου η γλώσσα παρουσιάζεται ως ένα σύνολο στοιχείων διαφόρων επιπέδων σε συγκεκριμένους συνδυασμούς (το μόρφωμα εδώ παίζει κεντρικό ρόλο ως η μη περαιτέρω αναλύσιμη μονάδα) και «στοιχείο και διαδικασία» όπου τα θεωρούμενα ως βασικά στοιχεία της γλώσσας υποβάλλονται σε διαδικασίες για την παραγωγή των μη βασικών τύπων.

⁴ Βασικό επιχείρημα των υποστηρικτών αυτού του μοντέλου περιγραφής είναι ότι σε διάφορες γλώσσες, όπως τα ελληνικά, που χαρακτηρίζεται διαχτυκή γλώσσα (fusional), τα μορφολογικά τεμάχια που πραγματώνουν

συγκεντρώνει στο σώμα της τα μορφήματα, στα οποία και προσδίδει συγκεκριμένη έννοια και λειτουργικότητα. Με άλλα λόγια «η σημασιολογική συμβολή του στοιχείου εξαρτάται από τη λέξη μέσα στην οποία λειτουργεί⁵», γι' αυτό και το κλιτικό παράδειγμα, δηλ. το σύνολο των κλιτών τύπων μιας λέξης, δεν αποτελεί ένα απλό μορφολογικό επιφανόμενο αλλά βασικό παράγοντα προσδιορισμού και περιγραφής του μορφολογικού συστήματος μιας γλώσσας. Οι μορφολογικές θεωρίες αυτού του τύπου ονομάζονται θεωρίες πραγμάτωσης (realizational), και αντιδιαστέλλονται προς τις αθροιστικές θεωρίες (incremental), σύμφωνα με τις οποίες οι ρίζες και τα αρχικά θέματα των κλιτών λέξεων δεν συνδέονται με μορφοσυντακτικές ιδιότητες, αλλά τις αποκτούν κάθε φορά που προστίθεται/επικολλάται σε αυτά ένα πρόσφυμα που κουβαλά συγκεκριμένη/-ες ιδιότητα/-ες.

Πλεονέκτημα των θεωριών πραγμάτωσης είναι ότι δεν προϋποθέτουν τη μονοσήμαντη αντιστοιχία μορφοσυντακτικής ιδιότητας και μορφολογικού σημαδέματος: η ίδια ιδιότητα μπορεί να οδηγήσει στην εισαγωγή ενός αριθμού μορφολογικών στοιχείων σημαδέματος/εκπροσώπων (exponents). Η θεωρία των παραδειγματικών συναρτήσεων, λοιπόν, η οποία αναπτύσσεται τις τελευταίες δύο δεκαετίες περίπου, ξεκινά από την αρχή ότι, στις γλώσσες που παρουσιάζουν κλίση, κάθε κλιτή λέξη είναι φορέας μορφοσυντακτικών ιδιοτήτων (Stump, 2001). Πρόκειται για μια επαγωγική θεωρία (inferential), καθώς οι κλιτές λεξικές μονάδες προκύπτουν από συγκεκριμένους βασικούς τύπους, τα θέματα, (basic roots and stems) με την επένεργεια κανόνων (rules), και δεν απορρέουν από το λεξικό, όπως υποστηρίζουν λεξικοκεντρικές θεωρίες (lexical theories).

3.2 Κλιτικές κατηγορίες

Στην κατάρτιση των κλιτικών τάξεων με βάση την κατανομή των θεμάτων των επιθέτων, σημαντική υπήρξε η συμβολή της κ. Άννας Αναστασιάδη-Συμεωνίδη, η οποία προτείνει τέτοιου τύπου θεωρητική ταξινόμηση για τα ουσιαστικά της κοινής νεοελληνικής (2011). Επισημαίνουμε στο σημείο αυτό ότι το πέρασμα από το ένα θέμα στο άλλο σε κάθε κλιτική κατηγορία γίνεται με την εισαγωγή μορφοφωονολογικών κανόνων. Τα διαφοροποιημένα θέματα, τα οποία αποτελούν κομμάτι του λεξήματος και συμμετέχουν στην παραγωγή των κλιτών τύπων (στην περίπτωση μας των επιθέτων), αποτελούν τον θεματικό χώρο της κάθε μονάδας. Για την κατασκευή κάθε κλιτού τύπου επιλέγεται ένα συγκεκριμένο θέμα από τα διαθέσιμα που συνιστούν τον θεματικό χώρο⁶. Η επένεργεια μορφοφωονολογικών κανόνων καθορίζει και την τοποθέτηση του τόνου στους πραγματωμένους τύπους. Σε ένα μεταγενέστερο στάδιο της έρευνας φιλοδοξούμε να παρουσιάσουμε τα συνολικά αποτελέσματα της ταξινόμησής μας, με τη βοήθεια ενός ηλεκτρονικού εργαλείου αναπαράστασης (Datr), στο οποίο και θα ελέγχεται η πληρότητα και η εγκυρότητα της προτεινόμενης κατηγοριοποίησης.

Προτού παρουσιάσουμε τις κατηγορίες που προκύπτουν από τη νέα ταξινόμηση με βάση την εναλλαγή των θεμάτων, παραθέτουμε τον θεματικό χώρο των επιθέτων, ο οποίος υφίσταται μια εσωτερική υποδιαίρεση: τα θέματα διακρίνονται (α) σε **πρωτοτυπικά** και **ενδιάμεσα**, τα οποία συμμετέχουν στη δημιουργία των επιθέτων που είτε βρίσκονται στον πυρήνα του συστήματος (π.χ. *όμορφος*) είτε παρουσιάζουν κλιτική συμμόρφωση με το σύστημα της κοινής, σχετική διαθεσιμότητα⁷ αλλά μικρότερη συχνότητα από τα κεντρικά στοιχεία (π.χ. *υπναράς*) και (β) σε **περιφερειακά**, τα οποία επιλέγονται για τους κλιτούς τύπους των επιθέτων που δεν κατέχουν κεντρική θέση στο σύστημα (π.χ. *ευθύς*). Η τοποθέτηση των πρωτοτυπικών και των ενδιάμεσων επιθέτων στην ίδια κατηγορία έγινε επίσης με βάση το κριτήριο των ομαδικών λαθών (βλ. και 3.3) στη χρήση των επιθέτων από τους φυσικούς ομιλητές, το οποίο κατά την Αναστασιάδη-Συμεωνίδη (2003: 27) προσφέρει πολύ χρήσιμες πληροφορίες για το ποιες δομές είναι κεντρικές και ποιες όχι. Ενώ, δηλαδή, τα πολύ συχνά επίθετα σε -ός, -ή, -ό και τα λιγότερο συχνά σε -ης, -α, -ικο, εναρμονίζονται στην κλίση τους με τις καταλήξεις της κοινής νεοελληνικής, τα επίθετα π.χ. σε -ής, -ής, -ές παρουσιάζουν σημαντικές παρεκκλίσεις, στις οποίες οφείλονται κατά την Μακρή-Τσιλιπάκου (1997⁸: 533) η αβίαστη εκφορά λαθεμένων τύπων από τους χρήστες, ο δισταγμός, η καθυστέρηση, η τροποποίηση και η ματαίωση στη χρήση των «προβληματικών» αρχαιοκλιτών επιθέτων. Θεωρούμε πως σε ένα μεταγενέστερο στάδιο της έρευνας, με τη διεύρυνση των δεδομένων μας, θα είμαστε σε θέση να παρουσιάσουμε με μεγαλύτερη ευκρίνεια

μορφοσυντακτικές κατηγορίες δεν έχουν σταθερή έννοια, αν εξεταστούν έξω από το κλιτικό παράδειγμα μιας λέξης (βλ. και Φιλιππάκη-Warburton, 1992: 84).

⁵ Βλ. και Φιλιππάκη-Warburton, 1992: 84.

⁶ Βλ. και Bonami et al., 2004.

⁷ Κατά την Αναστασιάδη-Συμεωνίδη (2003: 30), η διαθεσιμότητα είναι «η δυνατότητα ενός στοιχείου να κατασκευάζει νέες μη μαρτυρημένες λέξεις».

τη θέση και τη λειτουργία των επιμέρους δομών για τα επίθετα της νέας ελληνικής⁸. Εάν, λοιπόν, θεωρήσουμε ότι *X* είναι το θέμα του λεξήματος, τότε ο θεματικός χώρος έχει ως εξής:

(α) πρωτοτυπικά, ενδιάμεσα

- Θ1: *X* (π.χ. *καλ-*)
 Θ2: *X* + φωνήεν (π.χ. *καλο-*, *καλη-*)
 Θ3α: *X* + φωνήεν + δ (π.χ. *υπναρουδ-*)
 Θ3β: *X* + j + φωνήεν (π.χ. *γλυκιά*)
 Θ3γ: *X* + j (π.χ. *τραχι-*)
 Θ4α: *X* + ικ (π.χ. *ζηλιαρικ-*)
 Θ4β: *X* + φωνήεν + δ + ικ (π.χ. *υπναρουδ-*) και

(β) περιφερειακά

- Θ1: *X* (π.χ. *ευθ-*)
 Θ2: *X* + υ (π.χ. *ευθυ-*)
 Θ3: *X* + ε (π.χ. *ευθε-*)
 Θ4α: *X* + ον (π.χ. *ευγνωμον-*)
 Θ4β: *X* + οντ (π.χ. *παροντ-*)

Οι κλιτικές κατηγορίες που δημιουργούνται είναι οι ακόλουθες⁹:

ΚΤ 1: καλός, έντιμος, φτωχός, νέος

Θέματα: Θ1 = *καλ-*, Θ2 = *καλο-*

Ενικός	Πληθυντικός
Ονομ: Θ2-ς	Ονομ: Θ1-οι
Γεν: Θ1-ου	Γεν: Θ1-ων
Αιτ: Θ2 ο	Αιτ: Θ1-ους
Κλητ: Θ1-ε	Κλητ: Θ1-οι

ΚΤ 2: καλή, έντιμη, φτωχή, νέα, τραχιά, υπναρού

Θέματα: Θ1 = *καλ-*, Θ2 = *καλη*, νεα, Θ3β = *γλυκια*, φτωχια, Θ3γ = *τραχι-*, Θ3α = *υπναρουδ-*

καλή, νέα

Ενικός	Πληθυντικός
Ονομ: Θ2 ο	Ονομ: Θ1-ες
Γεν: Θ2-ς	Γεν: Θ1-ων
Αιτ: Θ2 ο	Αιτ: Θ1-ες
Κλητ: Θ2ο	Κλητ: Θ1-ες

τραχιά

Ενικός	Πληθυντικός
Ονομ: Θ3β ο	Ονομ: Θ3γ-ες
Γεν: Θ3β -ς	Γεν: Θ3γ-ων
Αιτ: Θ3β ο	Αιτ: Θ3γ-ες
Κλητ: Θ3βο	Κλητ: Θ3γ –ες

γλυκιά (και για τα θηλυκά επιθέτων που λήγουν σε *-κος*, *-κός* ή *-χός*, π.χ. *φρέσκος*, *φτωχός*, *θηλυκός*, *ευγενικός*, *μαλακός*, *γνωστικός* κτλ.)

3.3 Πρωτοτυπικότητα και περιφερειακότητα των επιθέτων

Σύμφωνα με την Αναστασιάδη-Συμεωνίδη (2011: 124), η μορφολογική δομή της νέας ελληνικής περιλαμβάνει ένα σύστημα κλίσης και ένα σύστημα κατασκευής νέων λέξεων, στο οποίο εντάσσονται

τα φαινόμενα της παραγωγής, της σύνθεσης και του μεταπλασμού ή μετάπλασης ή μετατροπής (βλ. και Ράλλη, 2008: 83). Αυτή η μορφολογική δομή δεν είναι ομοιογενής, αλλά αποτελείται από στοιχεία πρωτοτυπικά, στοιχεία ενδιάμεσης φύσης και στοιχεία περιφερειακά, τα οποία αντανakλούν τη δυναμική του συστήματος σε μία δεδομένη συγχρονία. Κατά την Αναστασιάδη-Συμεωνίδη (2003, 2011), η κεντρικότητα ή η περιφερειακότητα των γλωσσικών στοιχείων, στην περίπτωση μας των κλιτικών κατηγοριών που σχηματίζουν τα επίθετα, μπορεί να αποκαλυφθεί από το σύστημα που αναπτύσσουν τα παιδιά κατά την κατάκτηση της μητρικής τους γλώσσας, από το διαγλωσσικό συνεχές όσων μαθαίνουν μια γλώσσα ως δεύτερη/ξένη, από τις ελεύθερα εναλλασσόμενες μορφές (δηλ. τα μορφήματα που βρίσκονται σε σχέση ελεύθερης ποικιλίας), από τα ομαδικά λάθη των χρηστών στο πλαίσιο μιας γλωσσικής κοινότητας, από τους κανόνες παραγωγής καινούργιων μονάδων, τους κανόνες εφαρμογής του ταξικού σηματοδότη (Αναστασιάδη-Συμεωνίδη, 1992), καθώς και τους κανόνες προσαρμογής των δάνειων μονάδων στο μορφολογικό σύστημα της γλώσσας. Κατά την Αναστασιάδη-Συμεωνίδη (2003: 26), οι πρωτοτυπικές κατηγορίες επιθέτων περιλαμβάνουν τα επίθετα που λήγουν σε *-ος/-ός, -η/-ή, -ο/-ό*¹⁰.

Στην προσπάθειά μας να αποκρυπτογραφήσουμε τις τάσεις του συστήματος και να αναδείξουμε τις ισχυρότερες τάξεις των στοιχείων του στην κατηγορία των επιθέτων, συλλέξαμε κατά τα εξήμισι τελευταία χρόνια (2005-αρχές 2011) 586 νεολογικά επίθετα (κατασκευασμένα και δάνεια)¹¹, τα οποία και ταξινομήσαμε με βάση τις παραδοσιακές κλιτικές κατηγορίες, ώστε να φανεί ανάγλυφα ποιες από αυτές παραμένουν στον κεντρικό πυρήνα του συστήματος και ποιες ανήκουν στην περιφέρεια του γλωσσικού συστήματος ή σε μια ενδιάμεση θέση, μπολιάζοντας τη δημοτική με λόγια στοιχεία και εμπλουτίζοντας τα επίπεδα ύφους των ομιλητών¹². Θυμίζουμε ότι, ενώ στα περισσότερα έργα αναφοράς που εξετάσαμε στο πρώτο μέρος της εργασίας μας γίνεται κάποια νύξη ως προς το ποιες κλιτικές κατηγορίες είναι οι συχνότερες (π.χ. η *ος, -η, -ο/-ός, -ή, -ό*), εντούτοις σε κανένα από αυτά δεν εφαρμόζονται δομικά κριτήρια που να επιρρωννύουν τα ποσοτικά δεδομένα που αντλούνται από τα καταγεγραμμένα λήμματα στα λεξικά.

■ 2005-2006 (σύνολο: 90)

Πρωτοτυπικά: *-ος, -η, -ο* (24), *-ός, -ή, -ό* (45)

Ενδιάμεσης κατηγορίας/περιφερειακά: *-ος, -α, -ο* (2), *-ής, -ής, -ές* (2), *-ος, -α, -ικο* (1)

Άκλιτα: δάνειας προέλευσης, π.χ. *κόζι* (11), *άλλα*¹³ (5)

■ 2007-2008 (σύνολο: 230)

Πρωτοτυπικά: *-ος, -η, -ο* (66), *-ός, -ή, -ό* (119)

Ενδιάμεσης κατηγορίας/περιφερειακά: *ος, -α, -ο* (22), *-ής, -ής, -ές* (9), *-ης, -α, -ικο* (3),

-ων, -ων, -ον (2)

Άκλιτα: δάνειας προέλευσης (7), *άλλα* (2)

¹⁰ Η έννοια της πρωτοτυπικότητας των επιθέτων μάς παραπέμπει στη θεωρία των πρωτοτύπων (ή προτύπων/στερεοτύπων), η οποία βρήκε ευρεία εφαρμογή στην ψυχολογία, την ψυχολογία και τη σημασιολογία. Όταν μιλούμε για πρωτοτυπικά επίθετα, στην ουσία αναφερόμαστε στα πιο χαρακτηριστικά μέλη της δηλούμενης κατηγορίας, αυτά που τα παιδιά με μητρική γλώσσα την ελληνική κατακτούν πρώτα σε σχέση με άλλες ομάδες επιθέτων, αυτά για τα οποία οι χρήστες αισθάνονται μεγαλύτερη σιγουριά και ασφάλεια στις γλωσσικές τους πραγματώσεις. Όπως συμβαίνει και στο πεδίο της γλωσσικής σημασίας, η έννοια του πρωτοτύπου μάς βοηθά να κατανοήσουμε τη σχετικότητα από την οποία χαρακτηρίζονται οι γλωσσικές δομές, οι οποίες δεν επιδέχονται απόλυτες τιμές αλλά τοποθετούνται σε ένα συνεχές ανάλογο με τα χαρακτηριστικά που παρουσιάζει σε κάθε συγχρονική φάση η γλωσσική χρήση. Περισσότερα για τη θεωρία του πρωτοτύπου, βλ. Συμεωνίδου-Χρηστίδου, 1998 και Kleiber, 1990.

¹¹ Για τα κριτήρια και τις πηγές της συλλογής, όπως και το σχολιασμό και τη σχηματοποίηση των δεδομένων, βλ. Anastasiadis-Symeonidis et al., 2006, 2009.

¹² Κατά τη Ράλλη (2008: 122), η κλίση των λόγιων επιθέτων βρίσκεται σε «κάποιο μεταβατικό στάδιο αναδιάρθρωσης», γι' αυτό και δεν συμπεριλαμβάνεται στην τυποποίησή της. Εμείς διαφωνούμε με τον χαρακτηρισμό αυτό, καθώς κατά τη γνώμη μας τα αρχαιόκλιτα επίθετα βρίσκονται απλώς στην περιφέρεια του κλιτικού συστήματος, δεν μεταβάλλονται σε κάτι άλλο (τουλάχιστον κατά τη συγχρονία που διανύουμε) και είναι ενίοτε παρόντα στην παραγωγή καινούργιων μονάδων.

¹³ Εδώ εντάσσονται τα κατασκευασμένα (παράγωγα ή σύνθετα), τα οποία περιέχουν ένα δάνειο συστατικό, π.χ.: *μεταπόπ, λαγνογκλάμορους, υπερνοπέ* κτλ.

■ 2009-2010-2011 (σύνολο: 266)

Πρωτοτυπικά: -ος, -η, -ο (73), -ός, -ή, -ό (130)

Ενδιάμεσης κατηγορίας/περιφερειακά: -ος, -α, -ο (31), -ής, -ής, -ές (12), -ων, -ουσα, -ον (2), -ης, -ης, -ες (1)

Ακλιτα: δάνειας προέλευσης (10), άλλα (7)

3.4 Πλεονεκτήματα ταξινόμησης

Η ταξινόμηση που προτείνουμε, μολονότι δεν έχει ακόμη ολοκληρωθεί και ελεγχθεί με υπολογιστικά μέσα, θεωρούμε ότι συμπληρώνει τις προηγούμενες ταξινομήσεις των επιθέτων και παρουσιάζει τα εξής πλεονεκτήματα:

(1) χαρακτηρίζεται από περισσότερη οικονομία στην περιγραφή, αφού προβλέπει σημαντικά λιγότερες κλιτικές κατηγορίες (θυμίζουμε ότι στις κλασικές κατηγοριοποιήσεις οι κατηγορίες που προβλέπονται περιλαμβάνουν και άλλες υποκατηγορίες κλίσης για τα θηλυκού και ουδέτερου γένους επίθετα)

(2) αποτελεί ανάλυση που επιτρέπει περαιτέρω έρευνα του μορφολογικού συστήματος της γλώσσας, π.χ. εξέταση φαινομένων παραγωγής και σύνθεσης

(3) συνυπολογίζει την κεντρικότητα ή την περιφερειακότητα των τάξεων των επιθέτων, προσφέροντας πιθανές απαντήσεις σε ζητήματα συνδυασμού στοιχείων

(4) αναδεικνύει αμεσότερα την εξέλιξη και τις τάσεις του γλωσσικού συστήματος κατά τη συγχρονία που διανύουμε

(5) παρουσιάζει τη δυνατότητα εφαρμογής σε ηλεκτρονικά εργαλεία γλωσσικής επεξεργασίας για την αυτόματη παραγωγή τύπων σε χρήση και την πρόβλεψη κλίσης νεολογικών τύπων

(6) μπορεί να αξιοποιηθεί στη διδακτική της ελληνικής ως δεύτερης/ξένης γλώσσας για δύο λόγους: η οικονομική περιγραφή διευκολύνει την εκμάθηση των κλιτών τύπων από τους σπουδαστές, ενώ η επισήμανση των κεντρικών μονάδων επαναπροσδιορίζει τις προτεραιότητες της διδασκαλίας, ανάλογα με το επίπεδο γλωσσομάθειας και τις ανάγκες των σπουδαστών.

4. Επίλογος-Συμπεράσματα

Στην εργασία αυτή ασχοληθήκαμε με τη μορφολογική ανάλυση των επιθέτων της νέας ελληνικής, με βάση τη μορφολογική θεωρία των παραδειγματικών συναρτήσεων. Καταλήξαμε στη δημιουργία εννέα κλιτικών κατηγοριών, στη διαμόρφωση των οποίων πρωτεύοντα ρόλο διαδραμάτισε όχι η τριμερής διάκριση των επιθέτων σε γένη, όπως στις κλασικές ταξινομήσεις, αλλά η συμμετοχή των διαφορετικών λεξηματικών θεμάτων στον σχηματισμό των κλιτών τύπων των επιθέτων. Το αποτέλεσμα είναι μια πιο οικονομική περιγραφή των επιθέτων, η οποία δίνει τη δυνατότητα πρόβλεψης του κλιτικού παραδείγματός τους, με τη βοήθεια του προσδιορισμένου θεματικού χώρου των λεξημάτων και των ομαδοποιημένων καταλήξεων. Τέλος, με τη συλλογή νεολογικών επιθέτων και την ένταξή τους στο μορφολογικό σύστημα της νέας ελληνικής, είμαστε σε θέση να διαπιστώσουμε ποιες είναι οι κεντρικές κατηγορίες επιθέτων και ποιες οι περιφερειακές και να αξιοποιήσουμε τα ευρήματά μας τόσο στη θεωρητική έρευνα όσο και στη διδασκαλία της ελληνικής ως δεύτερης/ξένης γλώσσας.

ABSTRACT

*The main aim of this study is to investigate the L2 acquisition of complementizers in Greek. Sentences introduced with *oti*, *pu* and *na*, used as complements to matrix verbs that are compatible with more than one complementizer, are studied through an experiment with intermediate and advanced Greek L2 learners and a control group of Greek native speakers. Based on the results of an acceptability judgment task, it is argued that L2 learners seem to have problems with the *oti-pu* distinction and the complementizer selection with perception and psych verbs. More difficulties emerge when the choice involves propositional operators.*

Λέξεις κλειδιά: εκμάθηση/κατάκτηση δεύτερης γλώσσας, συμπληρωματικές προτάσεις, συμπληρωματικοί δείκτες, ρήματα εξάρτησης, προτασιακά συμπληρώματα

1. Εισαγωγή

Το ζήτημα των συμπληρωματικών προτάσεων στη Νέα Ελληνική (ΝΕ) έχει εξεταστεί εκτενώς σε γραμματικές,¹ μονογραφίες και μελέτες τις τελευταίες δεκαετίες (βλ. μεταξύ άλλων, Agouraki 1991, Βαρλοκώστα 1994α,β, 1995, Βελούδης και Φιλιππάκη-Warburton 1984, 1985, Ingria 1981, Ρούσσου 1992, 1994, 2009α,β, 2010, Χριστίδης 1982, 1984, 1985, 1990), συνεχίζει να απασχολεί τη σύγχρονη έρευνα, ενώ τα τελευταία χρόνια υπάρχει μεγαλύτερο ενδιαφέρον και σε σχέση με τη γλωσσική κατάκτηση. Η βιβλιογραφία αναφέρεται εκτενώς στις ιδιότητες του κάθε στοιχείου που χρησιμοποιείται ως δείκτης εισαγωγής μιας συμπληρωματικής πρότασης, στη θέση του στο σύστημα των συμπληρωματικών δεικτών της ΝΕ και στη σχέση του με τα ρήματα στα οποία οι εξαρτημένες προτάσεις λειτουργούν ως συμπλήρωμα (ρήματα εξάρτησης). Τα χαρακτηριστικά που φέρει ο κάθε δείκτης τον διαφοροποιούν από τους υπόλοιπους καθορίζοντας παράλληλα την κατανομή του, καθώς η σημασιολογική συμβατότητα μεταξύ δείκτη και (κατηγο)ρήματος εξάρτησης είναι υποχρεωτική. Έτσι, ένα ρήμα μπορεί να έχει περισσότερους από έναν πιθανούς τύπους προτασιακού συμπληρώματος εφόσον το επιτρέπει η σημασία του και η σχέση μεταξύ ρήματος και τύπου συμπληρωματικής πρότασης δεν είναι αποκλειστική σε πολλές περιπτώσεις. Η επιλογή του δείκτη, επιπλέον, αποτελεί συνάρτηση της παρουσίας προτασιακών τελεστών, του χρόνου και άλλων χαρακτηριστικών της πρότασης εξάρτησης.

Όσον αφορά την κατάκτηση της ΝΕ ως δεύτερης γλώσσας (Γ2), η ανάγκη για πειραματική διερεύνηση των συμπληρωματικών προτάσεων με δυνατότητα παρουσίας περισσότερων του ενός δείκτη προκύπτει από την εμπειρία των διδασκόντων/ διδασκουσών² της ΝΕ ως Γ2 και από ευρήματα προηγούμενων ερευνών (πβ. Θεοφανοπούλου-Κοντού κ.ά. 1998, Νουχουτίδου 2010, Σπυρόπουλος και Τσαγγαλίδης 2005). Οι Βαρλοκώστα και Τριανταφυλλίδου (2003), εξετάζοντας τον προφορικό λόγο εφήβων μαθητών Γυμνασίου με Γ1 την Αλβανική και τη Ρωσική, επισημαίνουν την εμφάνιση ρημάτων με προτασιακά συμπληρώματα στα διάφορα στάδια γλωσσικής κατάκτησης. Πιο συγκεκριμένα, οι προτάσεις με *ότι* που συμπληρώνουν ρήματα λεκτικά και αισθήσεως εμφανίζονται στο επίπεδο των αρχαρίων και αυτές που συμπληρώνουν ρήματα δοξαστικά και γνωστικά στο μέσο

¹ Βλ. για παράδειγμα, Τζάρτζανος (1946/1963), Holton, Mackridge και Φιλιππάκη-Warburton (1999), Mackridge (1990), Κλαίρης και Μπαμπινιώτης (2005), όπου υπάρχουν και διαφορετικοί τρόποι ταξινόμησης των συμπληρωματικών προτάσεων.

² Για λόγους οικονομίας, χρησιμοποιείται το αρσενικό γένος και για τα δύο φύλα.

επίπεδο· οι προτάσεις με *να* εμφανίζονται ήδη στο επίπεδο των αρχαρίων και οι προτάσεις με *που* απαντούν στο μέσο επίπεδο με ρήματα αισθήσεως και ψυχικού πάθους ως ρήματα εξάρτησης. Στο προχωρημένο επίπεδο οι μαθητές χρησιμοποιούν χωρίς προβλήματα δομές πλαγίου λόγου με συμπληρωματικές προτάσεις με *ότι* και *να*.

Για τη σχέση ρήματος εξάρτησης και προτασιακού συμπληρώματος, ειδικότερα, έχει υποστηριχθεί (Nouchoutidou 2008) ότι η επιλογή του δείκτη εισαγωγής μιας συμπληρωματικής πρότασης δεν αποτελεί πρόβλημα για τους ρωσόφωνους προχωρημένους ενήλικους μαθητές της NE ως Γ2 όταν το ρήμα εξάρτησης δέχεται μόνο ένα συγκεκριμένο δείκτη ως εισαγωγικό στοιχείο της συμπληρωματικής πρότασης, π.χ.

1. Η Μαρία μου αποδεικνύει ότι/*που/*να οδηγεί πολύ γρήγορα.
2. Τα παιδιά απογοητεύτηκαν που/*ότι/*να χάνει η ομάδα τους.
3. Επιλέξαμε να/*ότι/*που κάνουμε διακοπές σε νησί.

ενώ υπάρχουν δυσκολίες όταν το ρήμα εξάρτησης είναι συμβατό με περισσότερους δείκτες εισαγωγής έχοντας διαφορετική σημασία σε κάθε περίπτωση (βλ. παραδείγματα 5-12).

Στην παρούσα μελέτη επιχειρείται η πειραματική προσέγγιση της κατάκτησης των *ότι*, *που* και *να* ως εισαγωγικών δεικτών συμπληρωματικών προτάσεων, από ενηλίκους μέσου και προχωρημένου επιπέδου που μαθαίνουν τη NE ως Γ2, με ειδικότερο αντικείμενο εξέτασης την επιλογή του δείκτη εισαγωγής της συμπληρωματικής πρότασης από ρήματα εξάρτησης που είναι συμβατά με περισσότερους (από έναν) δείκτες.

2. Η παρούσα έρευνα: συμμετέχοντες, δοκιμασίες, διαδικασία

Για τη διερεύνηση του ζητήματος δημιουργήθηκε ένα γραπτό ερωτηματολόγιο με δύο δοκιμασίες που απαντήθηκε ανώνυμα από μαθητές της NE ως Γ2.

Στη συμπλήρωση του ερωτηματολογίου συμμετείχαν 71 μαθητές που φοιτούσαν σε τάξεις μέσου επιπέδου στο Διδασκαλείο Νέας Ελληνικής του Πανεπιστημίου Αθηνών και 43 μαθητές προχωρημένου επιπέδου. Ήταν όλοι ενήλικοι και είχαν καταταχθεί στα αντίστοιχα επίπεδα με βάση το ίδιο τεστ κατάταξης. Προϋπόθεση για να συμπεριληφθεί κάποιος στην έρευνα ήταν να μην είχε μάθει/αρχίσει να μαθαίνει καμία άλλη γλώσσα πέρα από τη μητρική του πριν από τα επτά του χρόνια και να μην είχε αρχίσει την εκμάθηση της NE πριν από τα 17 του χρόνια. Δεν έγινε καμία διάκριση ή επιλογή σχετικά με τη μητρική γλώσσα των μαθητών. Η ηλικία των μαθητών μέσου επιπέδου ήταν 28 (κατά μέσο όρο) και των προχωρημένων μαθητών ήταν 29,9. Ως ομάδα ελέγχου χρησιμοποιήθηκαν 23 ενήλικοι, φυσικοί ομιλητές της NE, κάτοικοι της Αθήνας,³ ηλικίας 39,8 ετών κατά μέσο όρο.

Το ερωτηματολόγιο περιείχε δύο ασκήσεις, μία άσκηση συμπλήρωσης κενών (cloze task) και μία άσκηση ελέγχου αποδεκτότητας (acceptability judgment task), καθώς και μια σειρά σύντομων ερωτήσεων με στόχο τη συγκέντρωση πληροφοριών για τις γλώσσες που γνωρίζει ο μαθητής και ειδικότερα τη γνώση και την εμπειρία του όσον αφορά τα NE. Στην παρούσα μελέτη παρουσιάζονται τα αποτελέσματα της άσκησης ελέγχου αποδεκτότητας, η οποία είχε στόχο να ελέγξει εάν και σε ποιο βαθμό συμφωνούν οι κρίσεις των μαθητών μέσου και προχωρημένου επιπέδου μεταξύ τους και με αυτές των φυσικών ομιλητών. Στην άσκηση υπήρχαν 85 προτάσεις συνολικά: 50 πειραματικές και 35 παραπλανητικές (distractors). Οι πειραματικές προτάσεις περιλάμβαναν μία κύρια/ανεξάρτητη πρόταση και μία συμπληρωματική πρόταση, π.χ.

4. Η Αγγελική ξέρει ότι οι τράπεζες είναι κλειστές σήμερα.

Για κάθε ρήμα υπήρχαν τρεις πειραματικές προτάσεις, μία με συμπληρωματική πρόταση την οποία εισήγαγε το *ότι*, μία με το *να* και μία με το *που*.⁴ Όσον αφορά το ρηματικό τύπο, τα ρήματα βρίσκονταν σε ενεστώτα και σε τρίτο πρόσωπο. Οι παραπλανητικές προτάσεις που συμπλήρωναν την άσκηση είχαν αντίστοιχο αριθμό λέξεων με τις πειραματικές και συμφωνούσαν με αυτές όσον αφορά τα χαρακτηριστικά των ρηματικών τύπων που περιείχαν.

Στις πειραματικές προτάσεις, η επιλογή των ρημάτων εξάρτησης έγινε με βάση τις αναλύσεις των Θεοφανοπούλου-Κοντού κ.ά. (1998) και Ρούσσου (2006) για τα χαρακτηριστικά των δεικτών

³ Πβ. Nicholas (1998, 2001) και Ρούσσου (2006, 2009β), για διαφοροποιήσεις στις διαλέκτους της NE σχετικές με τους συμπληρωματικούς δείκτες.

⁴ Στην άσκηση ελέγχου αποδεκτότητας δε χρησιμοποιήθηκε σε καμία πρόταση το *πως*, καθώς βρίσκεται σε σχέση ελεύθερης κατανομής με το *ότι* (βλ. Τζάρτζανος 1963: §238).

εισαγωγής συμπληρωματικών προτάσεων και την ταξινόμηση σε κατηγορίες των ρημάτων που μπορούν να λειτουργήσουν ως ρήματα εξάρτησης με κάθε δείκτη. Επιλέχθηκαν 13 ρήματα που μπορούν να συνδυαστούν με τους δύο από τους τρεις ή και με τους τρεις δείκτες και των οποίων η σημασία διαφοροποιείται με την επιλογή του δείκτη εξαιτίας των ιδιαίτερων χαρακτηριστικών που αυτός φέρει. Πρόκειται για τα λεκτικά ρήματα⁵ *λέω* και *συμφωνώ*, τα γνωστικά *ξέρω* και *μαθαίνω*, τα δοξαστικά *πιστεύω*, *νομίζω* και *ελπίζω*, τα ρήματα αντίληψης *θυμάμαι* και *ξεχνάω*, τα ρήματα αισθήσεως *βλέπω* και *ακούω* και τα ρήματα ψυχικού πάθους *χαίρομαι* και *λυπάμαι*. Επιπλέον, αυτά τα ρήματα, όπως και το υπόλοιπο λεξιλόγιο που χρησιμοποιήθηκε στο ερωτηματολόγιο, περιλαμβάνονται στο αναλυτικό πρόγραμμα για τη διδασκαλία της ΝΕ ως Γ2 για τα επίπεδα Α1 και Α2 (βλ. Διατμηματικό Πρόγραμμα 1998, Ευσταθιάδης κ.ά. 2001 και στο δικτυακό τόπο για την Πιστοποίηση της Ελληνομάθειας).

Το ερωτηματολόγιο συμπληρώθηκε μέσα στις τάξεις διδασκαλίας μετά από συνεννόηση με το διδάσκοντα. Για τη συγκεκριμένη άσκηση, δόθηκαν οδηγίες συμπλήρωσης, παρατέθηκαν σχετικά παραδείγματα και οι μαθητές εξοικειώθηκαν με την κλίμακα αξιολόγησης. Επρόκειτο για μια επταβάθμια κλίμακα, από το 1 (που αντιστοιχούσε σε μία απόλυτα μη αποδεκτή πρόταση) έως το 7 (που αντιστοιχούσε σε απόλυτα αποδεκτή πρόταση). Οι μαθητές καλούνταν να διαβάσουν και να ακούσουν κάθε πρόταση και στη συνέχεια να την αξιολογήσουν όσον αφορά την αποδεκτότητά της. Οι προτάσεις είχαν ηχογραφηθεί με κενό χρόνο 10'' από τη στιγμή που τελείωνε μία πρόταση μέχρι να ακουστεί η επόμενη και η συνολική διάρκεια της άσκησης ήταν 20'. Η επιλογή να δοθεί παράλληλα με τη γραπτή και ηχογραφημένη μορφή των προτάσεων σχετίζεται με την προσπάθεια (α) να χρησιμοποιηθεί συγκεκριμένος επιτονισμός για κάθε πρόταση, (β) να διασφαλιστεί ότι οι συμμετέχοντες στην έρευνα διάβαζαν και άκουγαν με ακρίβεια την κάθε πρόταση παρά την ταχύτητα με την οποία καλούνταν να την κρίνουν και (γ) να ακολουθηθεί συγκεκριμένος ρυθμός συμπλήρωσης της άσκησης από όλους (βλ. Hawkins και Chan 1997).

3. Αποτελέσματα – Συζήτηση

Από τις αποτελέσματα που προέκυψαν από τη στατιστική ανάλυση,⁶ γίνεται αναφορά σε όσα δείχνουν στατιστικά σημαντική διαφορά μεταξύ των ομάδων με τουλάχιστον μεσαίο μέγεθος επίδρασης (effect size). Οι διαφορές εντοπίζονται κυρίως μεταξύ των φυσικών και των μη φυσικών ομιλητών της ΝΕ και δευτερευόντως μεταξύ των μέσων και προχωρημένων μη φυσικών ομιλητών και αφορούν: (i) την επιλογή μεταξύ των *ότι* και *που* στις περισσότερες ρηματικές ομάδες, (ii) ειδικότερα προβλήματα που εμφανίζονται στα ρήματα αντίληψης, τα ρήματα ψυχικού πάθους και τα ρήματα αισθήσεως και (iii) την επιλογή του συμπληρωματικού δείκτη που εξαρτάται από την παρουσία προτασιακού τελεστή.

3.1 Η επιλογή μεταξύ *ότι* και *που*

Η δυσκολία στην επιλογή μεταξύ των δεικτών *ότι* και *που* αφορά όλα τα ρήματα που εξετάστηκαν (για τη διάκριση *ότι-που*, βλ., μεταξύ άλλων, Βαρλοκώστα 1994α,β, Ρούσσου 1994, 2010, Χριστίδης 1982). Πιο συγκεκριμένα, στην Κοινή ΝΕ με τα λεκτικά και τα γνωστικά ρήματα το προτασιακό συμπλήρωμα μπορεί να εισάγεται με *ότι* αλλά όχι με *που*, π.χ.⁷

5. Ο Γιάννης λέει *ότι*/**που* θα φύγει νωρίς

6. Η Ελένη ξέρει *ότι*/**που* τα μαγαζιά είναι κλειστά σήμερα

Σύμφωνα με τις απαντήσεις που δόθηκαν στο ερωτηματολόγιο για τα λεκτικά ρήματα *λέω* και *συμφωνώ* και για τα γνωστικά ρήματα *ξέρω* και *μαθαίνω*, η επιλογή του δείκτη *ότι* είναι αποδεκτή από τους φυσικούς ομιλητές της ΝΕ και η επιλογή του *που* είναι μη αποδεκτή, όπως ήταν αναμενόμενο. Από την άλλη πλευρά, οι μη φυσικοί ομιλητές αποδέχονται και το *ότι*, αλλά και το *που* (σε μικρότερο βαθμό σε σύγκριση με το *ότι*, βλ. πίνακα 1).

⁵ Για πρακτικούς λόγους, στο κείμενο υιοθετούνται οι παραδοσιακοί όροι για τις ρηματικές ομάδες, αλλά δεν ακολουθείται η παραδοσιακή ταξινόμηση.

⁶ Για την επεξεργασία των δεδομένων χρησιμοποιήθηκε το πρόγραμμα SPSS 19 (τεστ Kruskal-Wallis και Mann-Whitney).

⁷ Για να θεωρηθούν γραμματικές οι δομές με *που* στην Κοινή ΝΕ πρέπει να υπάρχει έμφαση στο ρήμα εξάρτησης (βλ. Holton κ.ά. 1999, Ρούσσου 2006). Στην προφορική μορφή των προτάσεων δεν υπήρχε έμφαση στο ρήμα εξάρτησης, με στόχο να αποκλειστεί, όσο ήταν δυνατόν, η εναλλακτική ερμηνεία.

Η διαφορά των φυσικών ομιλητών της NE με τις δύο ομάδες των μη φυσικών ομιλητών όσον αφορά το *που* είναι στατιστικά σημαντική και για τα δύο λεκτικά ρήματα (λέω: $\chi^2(2)=11,75$, $p=0,003$ / συμφωνώ: $\chi^2(2)=15,1$, $p=0,001$)· αυτό ισχύει και για τους μέσους (λέω: $U=448,5$, $p=0,001$, $r=0,33$ / συμφωνώ: $U=401,5$, $p<0,001$, $r=0,38$) και για τους προχωρημένους μη φυσικούς ομιλητές της NE (λέω: $U=269$, $p=0,001$, $r=0,38$ / συμφωνώ: $U=245$, $p<0,001$, $r=0,42$). Το ίδιο ισχύει για το ρήμα *ξέρω* ($\chi^2(2)=14,38$, $p=0,001$) –στη σύγκριση των φυσικών ομιλητών και με τους μέσους ($U=437,5$, $p=0,001$, $r=0,35$) και με τους προχωρημένους μη φυσικούς ομιλητές της NE ($U=233$, $p<0,001$, $r=0,44$)– αλλά όχι για το *μαθαίνω* ($\chi^2(2)=5,15$, $p=0,07$).

	Φυσικοί ομιλητές NE		Μέσοι μη φυσικοί ομιλητές NE		Προχωρημένοι μη φυσικοί ομιλητές NE	
	M	SD	M	SD	M	SD

Πίνακας 1 Λεκτικά και γνωστικά ρήματα

Όσον αφορά την ομάδα των δοξαστικών ρημάτων που περιλαμβάνονται στο ερωτηματολόγιο (βλ. πίνακα 2), το *ελπίζω* είναι συμβατό και με *ότι* και με *να*⁸ (παράδειγμα 7). Τα ρήματα *νομίζω* και *πιστεύω* μπορούν να έχουν προτασιακό συμπλήρωμα που εισάγεται με *ότι*, επίσης, ενώ για να δεχτούν συμπλήρωμα με *να* πρέπει να πληρούνται συγκεκριμένες προϋποθέσεις (βλ. 3.3). Το *που* δεν μπορεί να εισάγει προτασιακό συμπλήρωμα όταν οποιοδήποτε από τα τρία ρήματα χρησιμοποιείται ως ρήμα εξάρτησης (παράδειγμα 8).

7. Ελπίζει ότι/να έγραψε καλά στο τεστ

8. Ελπίζω/Πιστεύω/Νομίζω ότι/*που τα σχολεία λειτουργούν κανονικά σήμερα

Σημαντική διαφορά στις απαντήσεις μεταξύ των φυσικών και των μη φυσικών ομιλητών της NE υπάρχει για όλα τα ρήματα, καθώς οι φυσικοί ομιλητές απορρίπτουν το *που* ως συμπληρωματικό δείκτη αλλά δεν συμβαίνει το ίδιο με τους μη φυσικούς ομιλητές (*ελπίζω*: $\chi^2(2)=23,93$, $p<0,001$ / *πιστεύω*: $\chi^2(2)=11,73$, $p=0,003$ / *νομίζω*: $\chi^2(2)=14,25$, $p<0,001$). Η διαφορά είναι στατιστικά σημαντική μεταξύ των φυσικών ομιλητών και (α) των μέσων μη φυσικών ομιλητών (*ελπίζω*: $U=277,5$, $p<0,001$, $r=0,49$ / *πιστεύω*: $U=451$, $p=0,001$, $r=0,34$ / *νομίζω*: $U=385$, $p<0,001$, $r=0,38$) και (β) των προχωρημένων μη φυσικών ομιλητών (*ελπίζω*: $U=264$, $p=0,002$, $r=0,39$ / *πιστεύω*: $U=276,5$, $p=0,003$, $r=0,37$ / *νομίζω*: $U=237,5$, $p=0,001$, $r=0,41$).

Υπάρχουν, επιπλέον, επιμέρους διαφορές που αφορούν τα ρήματα *ελπίζω* και *πιστεύω* όταν έχουν *ότι*-συμπλήρωμα. Στη σύγκριση των τριών ομάδων για τη δομή *ελπίζω ότι*, προέκυψε στατιστικά σημαντική διαφορά ($\chi^2(2)=6,34$, $p=0,041$), η οποία αφορά τις ομάδες των μέσων και των φυσικών ομιλητών που διαφέρουν σημαντικά ($U=561$, $p=0,016$, $r=0,25$). Επίσης, σημαντική διαφορά υπάρχει και για τη δομή *πιστεύω ότι* ($\chi^2(2)=12,86$, $p=0,002$), η οποία εντοπίζεται στις επιμέρους συγκρίσεις των μέσων μη φυσικών ομιλητών με τους προχωρημένους ($U=1137,5$, $p=0,015$, $r=0,23$) και με τους φυσικούς ομιλητές ($U=472,5$, $p=0,001$, $r=0,33$). Πρέπει να σημειωθεί ότι στις τρεις αυτές περιπτώσεις φαίνεται να υπάρχει διαφορά μεταξύ των μέσων μη φυσικών ομιλητών και των δύο άλλων ομάδων,

⁸ Επίσης, η διαφορά στη σημασία των δύο δομών είναι δυσδιάκριτη, σε αντίθεση με τα λεκτικά και γνωστικά ρήματα, για τα οποία η χρήση του *ότι* έναντι του *να* προκαλεί σαφή διαφοροποίηση (Θεοφανοπούλου-Κοντού κ.ά. 1998).

καθώς οι μέσοι μη φυσικοί ομιλητές αποδέχονται λιγότερο το *ότι* ως συμπληρωματικό δείκτη, αλλά το μέγεθος της επίδρασης είναι μικρό προς μεσαίο.

	Φυσικοί ομιλητές NE		Μέσοι μη φυσικοί ομιλητές NE		Προχωρημένοι μη φυσικοί ομιλητές NE	
	M	SD	M	SD	M	SD
<i>ελπίζω ότι</i>	6,43	0,99	5,7	1,45	6,07	1,31

<i>ελπίζω να</i>	6,39	0,78	5,56	1,83	6,37	1,38

Πίνακας 2 Δοξαστικά ρήματα

3.2 Ρήματα αισθήσεως, ψυχικού πάθους και αντίληψης

Ειδικότερα προβλήματα για τους μη φυσικούς ομιλητές της NE υπάρχουν στα ρήματα αισθήσεως, τα ρήματα ψυχικού πάθους και τα ρήματα αντίληψης.

Τα ρήματα αισθήσεως (*βλέπω* και *ακούω*) είναι συμβατά με τους δείκτες *ότι*, *να* και *που*, π.χ.

9. Είδα ότι ήρθε ο Κώστας/ τον Κώστα να έρχεται/ τον Κώστα που ερχόταν

Αν και υπάρχει διαφοροποίηση μεταξύ των *να/που*, με τα οποία δηλώνεται η άμεση αίσθηση, και του *ότι* που δηλώνει γνώση που μπορεί να προέρχεται και έμμεσα (βλ. μεταξύ άλλων, Holton κ.ά. 1999, Μοσχονάς 1989, Ρούσσου 2006, 2010, Χριστίδης 1982), με τη συγκεκριμένη δοκιμασία δεν ήταν δυνατόν να ελεγχθεί κατά πόσον οι μαθητές της NE κάνουν αυτή τη διάκριση. Εντούτοις, τα αποτελέσματα δείχνουν ότι οι μαθητές του μέσου επιπέδου είναι λιγότερο εξοικειωμένοι με τα ρήματα αισθήσεως, ενώ λιγότερες διαφορές υπάρχουν στους προχωρημένους μαθητές (βλ. πίνακα 3).

Ειδικότερα, στατιστικά σημαντική διαφορά υπάρχει όταν τα *βλέπω* και *ακούω* έχουν προτασιακό συμπλήρωμα που εισάγεται με *να* (*βλέπω*: $\chi^2(2)=17,73$, $p<0,001$ / *ακούω*: $\chi^2(2)=18,82$, $p<0,001$). Και για τα δύο ρήματα, οι μέσοι μη προχωρημένοι ομιλητές διαφέρουν από τους φυσικούς ομιλητές της NE (*βλέπω*: $U=416,5$, $p<0,001$, $r=0,38$ / *ακούω*: $U=326,5$, $p<0,001$, $r=0,45$). Επιπλέον, για το *βλέπω* υπάρχει στατιστικά σημαντική διαφορά και ανάμεσα σε μέσους και προχωρημένους ($U=416,5$, $p=0,001$, $r=0,29$), ενώ για το *ακούω* υπάρχει στατιστικά σημαντική διαφορά ανάμεσα στους προχωρημένους και τους φυσικούς ομιλητές ($U=331$, $p=0,015$, $r=0,3$).

Όταν τα *βλέπω* και *ακούω* έχουν προτασιακό συμπλήρωμα που εισάγεται με *που*, οι απαντήσεις των ομάδων διαφέρουν σημαντικά (*βλέπω*: $\chi^2(2)=13,11$, $p=0,001$ / *ακούω*: $\chi^2(2)=8,11$, $p=0,016$). Υπάρχει στατιστικά σημαντική διαφορά ανάμεσα στους μη φυσικούς ομιλητές μέσου και προχωρημένου επιπέδου (*ακούω*: $U=1111$, $p=0,013$, $r=0,24$, μικρό μέγεθος επίδρασης/ *βλέπω*: $U=1111$, $p=0,024^9$) και ανάμεσα στους φυσικούς ομιλητές και τους μέσους μη φυσικούς ομιλητές για το ρήμα *βλέπω* ($U=439,5$, $p<0,001$, $r=0,35$).

Επομένως, τόσο για τα προτασιακά συμπληρώματα που εισάγονται με *να* όσο και για αυτά που εισάγονται με *που*, φαίνεται ότι υπάρχει ιδιαίτερη δυσκολία στη συγκεκριμένη δομή για τους μη φυσικούς ομιλητές της NE, όπως και ότι υπάρχει βελτίωση όσο αυξάνει το επίπεδο γνώσης της NE. Στην περίπτωση του *να*, χρειάζεται να επισημανθεί ότι, με τα ρήματα αισθήσεως δεν φέρει τροπικότητα (βλ. Θεοφανοπούλου-Κοντού κ.ά. 1998, Ιακώβου 1999, Ρούσσου 2010), σε αντίθεση με άλλα ρήματα εξάρτησης στα οποία η χρήση του *να* συνδέεται με την τροπικότητα. Πιθανόν, η διαφορά αυτή να παίζει ρόλο στις δυσκολίες που υπάρχουν με τη συγκεκριμένη ρηματική ομάδα.

⁹ Η διαφορά δε θεωρείται στατιστικά σημαντική, αλλά αναφέρεται γιατί προσεγγίζει το όριο (διόρθωση Bonferroni, $p<0,0167$) και δείχνει ότι χρειάζεται περαιτέρω διερεύνηση με χρήση περισσότερων προτάσεων ή/και ρημάτων.

	Φυσικοί ομιλητές NE		Μέσοι μη φυσικοί ομιλητές NE		Προχωρημένοι μη φυσικοί ομιλητές NE	
	M	SD	M	SD	M	SD
βλέπω ότι	6,26	0,92	5,9	1,64	6,3	1,19

ακούω που	6,17	0,78	5,15	1,85	6,05	1,36

Πίνακας 3 Ρήματα αισθήσεως

Για τα ρήματα που δείχνουν συναισθηματική κατάσταση, τα λεγόμενα ψυχικού πάθους, οι δομές με συμπληρωματική πρόταση με δείκτη εισαγωγής *που* και *να* είναι γραμματικές (βλ. Χριστίδης 1985 για τη διαφορά στη σημασία). Στην Κοινή NE οι προτάσεις με *ότι* είναι αντιγραμματικές ως συμπληρώματα αυτής της ομάδας ρημάτων (βλ. Nicholas 1998, Ρούσσου 2006, Τζάρτζανος 1963), π.χ.

10. Λυπάται που/ότι είπε ψέματα

11. Χαίρεται να πηγαίνει σινεμά με τους φίλους της

Η δυσκολία που αντιμετωπίζουν οι μη φυσικοί ομιλητές αφορά την επιλογή μεταξύ *ότι* και *που*, η οποία υπάρχει και σε άλλες ρηματικές ομάδες, καθώς και οι δύο συμπληρωματικοί δείκτες γίνονται εξίσου αποδεκτοί.

Ειδικότερα, ενώ οι φυσικοί ομιλητές της NE αποδέχονται απόλυτα, όπως ήταν αναμενόμενο, το *που* ως συμπληρωματικό δείκτη, οι μη φυσικοί ομιλητές το δέχονται σε σημαντικά μικρότερο βαθμό (*χαίρομαι*: $\chi^2(2)=6,63$, $p=0,033$ / *λυπάμαι*: $\chi^2(2)=8,07$, $p=0,015$).¹⁰ Θα πρέπει, ακόμη, να επισημανθεί ότι υπάρχει μεγαλύτερη εγγύτητα στις απαντήσεις των προχωρημένων και των φυσικών ομιλητών. Από την άλλη πλευρά, το *ότι* θεωρείται γραμματικό στα προτασιακά συμπληρώματα από τους μη φυσικούς ομιλητές αλλά απορρίπτεται από τους φυσικούς ομιλητές της NE (*χαίρομαι*: $\chi^2(2)=10,84$, $p=0,005$ / *λυπάμαι*: $\chi^2(2)=19,58$, $p<0,001$). Η διαφορά είναι στατιστικά σημαντική στη σύγκριση των φυσικών ομιλητών και με τους μέσους (*χαίρομαι*: $U=473,5$, $p=0,002$, $r=0,32$ / *λυπάμαι*: $U=333$, $p<0,001$, $r=0,44$) και με τους προχωρημένους μη φυσικούς ομιλητές (*χαίρομαι*: $U=279,5$, $p=0,002$, $r=0,36$ / *λυπάμαι*: $U=224,5$, $p<0,001$, $r=0,45$).

Ενδιαφέρον παρουσιάζει και το *να*, καθώς για το ρήμα *χαίρομαι* η διαφορά μεταξύ των ομάδων είναι στατιστικά σημαντική ($\chi^2(2)=30,91$, $p<0,001$) και διαφορές εντοπίζονται μεταξύ όλων των ομάδων: μέσων και προχωρημένων ($U=1083,5$, $p=0,011$, $r=0,24$), μέσων και φυσικών ομιλητών ($U=196,5$, $p<0,001$, $r=0,57$) και προχωρημένων και φυσικών ομιλητών ($U=283$, $p=0,002$, $r=0,39$). Το ρήμα *λυπάμαι*, όμως, δεν προκαλεί διαφορετικές κρίσεις από τις ομάδες που συμμετείχαν στην έρευνα, με αποτέλεσμα να είναι απαραίτητη η επέκταση της έρευνας με διεύρυνση της ομάδας των εξεταζόμενων ρημάτων.

λυπάμαι να	5,87	1,42	5,32	1,8	5,28	2,13

Πίνακας 4 Ρήματα ψυχικού πάθους

¹⁰ Η διαφορά για το *χαίρομαι που* εντοπίζεται μεταξύ των δύο ομάδων των μη φυσικών ομιλητών ($U=1157,5$, $p=0,018$ –μεγαλύτερο από το όριο (0,0167) της διόρθωσης Bonferroni). Στην περίπτωση του *λυπάμαι που* διαφέρουν οι φυσικοί και οι μέσοι μη φυσικοί ομιλητές ($U=489$, $p=0,003$, $r=0,3$).

Τα ρήματα αντίληψης *θυμάμαι* και *ξεχνάω* αποτελούν μία ξεχωριστή ομάδα καθώς μπορούν να συνδυαστούν με συμπληρωματικές προτάσεις και με τους τρεις δείκτες που εξετάζονται, με διαφορές στη σημασία (βλ., μεταξύ άλλων, Βαρλοκώστα 1994β, Ρούσσου 1992, Χριστίδης 1982, 1985), π.χ.

12. Η Μαρία ξέχασε ότι είχε κλείσει το παράθυρο/ να κλείσει το παράθυρο/ που έκλεισε το παράθυρο

Οι κρίσεις φυσικών και μη φυσικών ομιλητών διαφέρουν στην περίπτωση που ο συμπληρωματικός δείκτης ότι εισάγει το προτασιακό συμπλήρωμα (*θυμάμαι*: $\chi^2(2)=9,18$, $p=0,01$ / *ξεχνάω*: $\chi^2(2)=8,46$, $p=0,013$) και οι επιμέρους συγκρίσεις δείχνουν ότι οι μέσοι μη φυσικοί ομιλητές είναι αυτοί που διαφέρουν σε στατιστικά σημαντικό βαθμό από τους φυσικούς ομιλητές (*θυμάμαι*: $U=541$, $p=0,005$, $r=0,28$ / *ξεχνάω*: $U=499$, $p=0,005$, $r=0,29$). Για τη δομή *ρήμα αντίληψης + που* οι απαντήσεις όλων των ομάδων είναι περίπου στο μέσο της κλίμακας αποδεκτότητας και αυτό έρχεται σε αντίθεση με τη γραμματικότητα των προτάσεων. Πέρα από την απαραίτητη περαιτέρω διερεύνηση του ζητήματος, θα πρέπει να ληφθεί υπόψη ότι η προφορική μορφή των προτάσεων, στην οποία δεν υπήρχε έμφαση στο ρήμα εξάρτησης, πιθανόν να επηρέασε τις απαντήσεις.

Ακόμη, διαφορετικές κρίσεις μεταξύ φυσικών και μη φυσικών ομιλητών υπάρχουν για το ρήμα *ξεχνάω* όταν έχει προτασιακό συμπλήρωμα που εισάγεται με *να* ($\chi^2(2)=18,15$, $p<0,001$). Οι διαφορές εντοπίζονται στη σύγκριση των φυσικών ομιλητών και με τους μέσους ($U=350,5$, $p<0,001$, $r=0,44$) και με τους προχωρημένους μη φυσικούς ομιλητές ($U=249,5$, $p<0,001$, $r=0,44$). Το ρήμα *θυμάμαι* δεν εμφανίζει αντίστοιχη διαφορά αλλά αυτό πιθανόν να σχετίζεται με άλλους παράγοντες (π.χ. με την επιστημική ερμηνεία που μπορεί να έχει, βλ. 3.3).

Πίνακας 5 Ρήματα αντίληψης

3.3 Επιπλέον παράγοντες που καθορίζουν την επιλογή του δείκτη

Πέρα από τη συμβατότητα μεταξύ ρήματος εξάρτησης και συμπληρωματικού δείκτη, δύο από τους παράγοντες που μπορούν να επιτρέψουν την παρουσία ενός δείκτη είναι το πρόσωπο του ρήματος εξάρτησης και η παρουσία ενός προτασιακού τελεστή, όπως είναι η άρνηση, στην πρόταση εξάρτησης (βλ. Ρούσσου 2010, Χριστίδης 1985).

Για την εξέταση της επίδρασης που μπορεί το πρόσωπο να ασκήσει στην επιλογή δείκτη, χρησιμοποιήθηκε το δοξαστικό ρήμα *πιστεύω*. Σύμφωνα με τη βιβλιογραφία (Ρούσσου 2006), όταν το πιστεύω ως ρήμα εξάρτησης είναι σε πρώτο πρόσωπο η δομή *πιστεύω+να-συμπληρωματική* είναι γραμματική ενώ με τα άλλα πρόσωπα είναι αντιγραμματική, π.χ.

13. *Οι φίλοι μου πιστεύουν να έρθουν

14. Πιστεύω να προλάβω το τρένο

Η στατιστική ανάλυση των αποτελεσμάτων δεν έδειξε διαφορές στις αντιγραμματικές προτάσεις και στη μία από τις δύο γραμματικές προτάσεις (*πιστεύω να 1*: $\chi^2(2)=13,6$, $p=0,001$ / *πιστεύω να 2*: $\chi^2(2)=3,34$, $p=0,19$). Στην πρόταση που υπάρχει διαφορά, αυτή εντοπίζεται στους μέσους μη φυσικούς ομιλητές σε σύγκριση με τους φυσικούς ομιλητές ($U=432,5$, $p<0,001$, $r=0,37$). Με βάση τα αποτελέσματα, δεν είναι δυνατόν να υποστηριχθεί ότι υπάρχει διαφορά στις κρίσεις των ομιλητών με διαφορετικό επίπεδο γνώσης της ΝΕ.

	Φυσικοί ομιλητές NE		Μέσοι μη φυσικοί ομιλητές NE		Προχωρημένοι μη φυσικοί ομιλητές NE

πιστεύω να	6,65	0,78	5,39	1,77	5,84	1,8
πιστεύω να	6,04	1,11	5,1	1,91	5,14	2,17

Πίνακας 6 Επιπλέον παράγοντες - πρόσωπο

Το πρόσωπο σε συνδυασμό με την άρνηση ως προτασιακό τελεστή που επιτρέπει την παρουσία του να παίζει ρόλο και στην περίπτωση του ρήματος *νομίζω*. Όταν το *νομίζω* αποτελεί ρήμα εξάρτησης, είναι συμβατό με προτασιακό συμπλήρωμα που εισάγεται με *να*, μόνο εάν βρίσκεται σε πρώτο πρόσωπο και έχει άρνηση (Ρούσσου 2006), π.χ.:

15. *(Δε) νομίζω να έχουμε γνωριστεί

Οι συμμετέχοντες στο πείραμα κλήθηκαν να κρίνουν πέντε προτάσεις, σε τρεις από τις οποίες δεν υπήρχε άρνηση (μία πρόταση με το *νομίζω* σε τρίτο πρόσωπο και δύο προτάσεις με το *νομίζω* σε πρώτο πρόσωπο), ενώ στις υπόλοιπες δύο υπήρχε άρνηση στο ρήμα εξάρτησης (το οποίο βρισκόταν σε πρώτο πρόσωπο).

Όπως ήταν αναμενόμενο, οι φυσικοί ομιλητές απέρριψαν τις προτάσεις που δεν περιείχαν άρνηση στο ρήμα εξάρτησης αλλά αποδέχτηκαν τις προτάσεις με άρνηση. Οι μη φυσικοί ομιλητές απορρίπτουν μόνο μία από τις τρεις αντιγραμματικές προτάσεις (*νομίζουν να: $\chi^2(2)=14,96, p=0,001$ / νομίζω να 1: $\chi^2(2)=27,33, p<0,001$ / νομίζω να 2: $\chi^2(2)=0,95, p=0,63$*) και αποδέχονται επίσης μία από τις γραμματικές προτάσεις αλλά σημαντικά λιγότερο συγκριτικά με τους φυσικούς ομιλητές (*δε νομίζω να 1: $\chi^2(2)=7,35, p=0,021$ / δε νομίζω να 2: $\chi^2(2)=17,88, p<0,001$*).

Στις αντιγραμματικές προτάσεις, η διαφορά μεταξύ φυσικών και μέσων μη φυσικών ομιλητών είναι στατιστικά σημαντική (*νομίζουν να: $U=422,5, p=0,001, r=0,36$ / νομίζω να 1: $U=237, p<0,001, r=0,53$*), όπως επίσης μεταξύ φυσικών και προχωρημένων μη φυσικών ομιλητών (*νομίζουν να: $U=228, p<0,001, r=0,45$ / νομίζω να 1: $U=184, p<0,001, r=0,52$*). Το μέγεθος της επίδρασης είναι μεσαίο στην πρώτη περίπτωση και μεγάλο στη δεύτερη, εύρημα που απαιτεί περαιτέρω διερεύνηση για να εξακριβωθεί ο λόγος για τον οποίο διαφέρει η τρίτη πρόταση της ομάδας. Στις γραμματικές προτάσεις, η διαφορά μεταξύ φυσικών και μέσων μη φυσικών ομιλητών είναι στατιστικά σημαντική (*δε νομίζω να 2: $U=312, p<0,001, r=0,46$*), όπως επίσης μεταξύ φυσικών και προχωρημένων μη φυσικών ομιλητών (*δε νομίζω να 2: $U=184, p<0,001, r=0,34$*).¹¹

νομίζω *να	2,09	1,44	2,54	1,88	2,23	1,43
δε νομίζω να	6,35	1,11	5,41	2	6,28	1,39
δε νομίζω να	5,87	1,49	3,78	1,91	4,3	2,23

Πίνακας 7 Επιπλέον παράγοντες – πρόσωπο και άρνηση

Μία ακόμη περίπτωση που ένας προτασιακός τελεστής επηρεάζει τη συμβατότητα του ρήματος εξάρτησης είναι αυτή του ρήματος *θυμάμαι* όταν χρησιμοποιείται με επιστημική σημασία (σε αυτή την περίπτωση το πρόσωπο δεν επηρεάζει τη γραμματικότητα της δομής) και έχει προτασιακό συμπλήρωμα το οποίο εισάγεται με *να*. Η ύπαρξη επιστημικής ερμηνείας είναι δυνατή μόνο όταν υπάρχει άρνηση ή ερώτηση στο *θυμάμαι* (Ρούσσου 2006) π.χ.

16. *(Δε) θυμάται να έκλεισε το παράθυρο

¹¹ Στην άλλη γραμματική πρόταση, αν και υπάρχει στατιστικά σημαντική διαφορά στη συνολική σύγκριση, στις επιμέρους συγκρίσεις δεν εντοπίζονται σημαντικές διαφορές.

Στο ερωτηματολόγιο υπήρχαν δύο προτάσεις με άρνηση στο ρήμα εξάρτησης, οι οποίες έγιναν αποδεκτές από τους φυσικούς ομιλητές (βλ. πίνακα 8), και δύο προτάσεις χωρίς άρνηση που απορρίφθηκαν. Οι μη φυσικοί ομιλητές απέρριψαν όλες τις προτάσεις¹² με αποτέλεσμα να υπάρχει στατιστικά σημαντική διαφορά στην περίπτωση των γραμματικών προτάσεων (δε θυμάμαι να 1: $\chi^2(2)=18,65, p<0,001$ / δε θυμάμαι να 2: $\chi^2(2)=26,81, p<0,001$). Η διαφορά μεταξύ φυσικών και μέσων μη φυσικών ομιλητών είναι στατιστικά σημαντική (δε θυμάμαι να 1: $U=356,5, p<0,001, r=0,42$ / δε θυμάμαι να 2: $U=235, p<0,001, r=0,53$), όπως επίσης μεταξύ φυσικών και προχωρημένων μη φυσικών ομιλητών (δε θυμάμαι να 1: $U=234, p<0,001, r=0,44$ / δε θυμάμαι να 2: $U=253, p=0,001, r=0,41$).

	Φυσικοί ομιλητές NE		Μέσοι μη φυσικοί ομιλητές NE		Προχωρημένοι μη φυσικοί ομιλητές NE	
	M	SD	M	SD	M	SD
θυμάμαι *να	3,74	1,98	2,69	1,92	2,37	2,02
θυμάμαι *να	3,57	1,38	3,57	2,03	3,05	2
δε θυμάμαι να	5,7	1,55	3,75	1,96	3,3	2,44
δε θυμάμαι να	5,74	1,36	3,13	1,87	3,93	2,15

Πίνακας 8 Επιπλέον παράγοντες – άρνηση

Συνεξετάζοντας τις τρεις περιπτώσεις δομών στις οποίες η συμβατότητα ενός ρήματος εξάρτησης με κάποιο συμπληρωματικό δείκτη εξαρτάται, εκτός από τα σημασιολογικά χαρακτηριστικά του ρήματος, και από άλλους παράγοντες, διαφαίνεται ότι οι μη φυσικοί ομιλητές της ΝΕ δε λαμβάνουν υπόψη τη λειτουργία τέτοιων παραγόντων.

4. Συμπέρασμα

Η πειραματική εξέταση της επιλογής των δεικτών εισαγωγής συμπληρωματικών προτάσεων *ότι, να και που* επικεντρώθηκε στις περιπτώσεις των ρημάτων που είναι συμβατά με δύο ή περισσότερους δείκτες. Από τη συγκριτική ανάλυση των ομάδων των ομιλητών προκύπτουν διαφορές που αφορούν την επιλογή μεταξύ *ότι και που* με ρήματα εξάρτησης λεκτικά, γνωστικά, δοξαστικά και ψυχικού πάθους. Η δυσκολία των μη φυσικών ομιλητών της ΝΕ είναι να διακρίνουν τις αντιγραμματικές δομές και ισχύει και για τους μέσους και για τους προχωρημένους. Όσον αφορά τις ρηματικές ομάδες, τα ρήματα ψυχικού πάθους και τα ρήματα αισθήσεως εμφανίζουν επιπλέον προβλήματα. Με αυτά ως ρήματα εξάρτησης, οι μη φυσικοί ομιλητές αποδέχονται σε μικρό βαθμό τα (γραμματικά) προτασιακά συμπληρώματα με *να*, ιδιαίτερα στο μέσο επίπεδο, εμφανίζοντας βελτίωση στο προχωρημένο επίπεδο. Μία ακόμη δυσκολία για όσους μαθαίνουν τη ΝΕ ως Γ2 είναι ο ρόλος της άρνησης (ως προτασιακού τελεστή) στη συμβατότητα ρημάτων εξάρτησης και συμπληρωματικών δεικτών, τον οποίο τόσο οι μέσοι όσο και οι προχωρημένοι μη φυσικοί ομιλητές φαίνεται μην γνωρίζουν. Για να δοθεί ερμηνεία σε αυτά τα ζητήματα και για να εξεταστούν άλλα επιμέρους προβλήματα, η διερεύνηση του θέματος είναι απαραίτητο να διευρυνθεί με τη μελέτη περισσότερων ρημάτων εξάρτησης για κάθε ρηματική ομάδα, χρησιμοποιώντας ποικίλες μεθόδους συλλογής δεδομένων και περιλαμβάνοντας όλα τα επίπεδα γνώσης της ΝΕ ως Γ2.

ABSTRACT

*This paper deals with the Standard Modern Greek suffix *-(ι)λίκι* within D. Corbin's theoretical framework. After presenting the sources and the classification of the data, we look into the forms of the suffix, as far as their availability and hierarchy at the derivational stages are concerned. Then, we co-examine the bases and the derivatives in relation to the types of lexical units, the morphosyntactic and semantic features, as well as the register. The conclusions are summarized in a Lexeme Formation Rule.*

Λέξεις κλειδιά: επίθημα, βάση, λεξική μονάδα, διαθεσιμότητα, μορφοσυντακτικά χαρακτηριστικά, σημασιολογικά χαρακτηριστικά, χρηστικό επίπεδο.

1. Εισαγωγή

Η παρούσα ανακοίνωση έχει ως θέμα το επίθημα *-(ι)λίκι* στην κοινή νεοελληνική (ΚΝΕ). Καταρχάς, παρουσιάζουμε το θεωρητικό πλαίσιο, τις πηγές και την ταξινόμηση του γλωσσικού υλικού. Έπειτα, ασχολούμαστε με τις μορφές του επιθήματος, όσον αφορά την ιεράρχηση κατά τα στάδια παραγωγής και τη διαθεσιμότητα. Στη συνέχεια, συνεξετάζονται οι βάσεις και τα παράγωγα ως προς τα είδη των λεξικών μονάδων (ΛΜ)², τα μορφοσυντακτικά και σημασιολογικά χαρακτηριστικά, καθώς και το χρηστικό επίπεδο. Τα συμπεράσματα συνοψίζονται σε έναν κανόνα κατασκευής ΛΜ (ΚΚΛΜ).

2. Θεωρητικό πλαίσιο

Σύμφωνα με το μοντέλο της Corbin (1987, 1989), όπως αυτό έχει παρουσιαστεί και εφαρμοστεί στην ΚΝΕ (Αναστασιάδη-Συμεωνίδη 1992, 1993, 1995, 1997, 1999, 2000β, 2009· Αναστασιάδη-Συμεωνίδη και Γαλανή 1995· Γαλανή 1993· Ευθυμίου 1995, 1997, 1998, 1999· Φυνδάνης 2003), το λεξιλόγιο νοείται ως οργανωμένο σύστημα, όπου κάθε ΚΚΛΜ κατασκευάζει συγχρόνως τη μορφολογική δομή και τη σημασία μιας κατασκευασμένης ΛΜ (ΚΛΜ), η οποία είναι συνθετική ως προς τη μορφολογική δομή (συζευκτικότητα). Η αρχή αυτή αφενός συνεπάγεται ένα σαφή προσδιορισμό του όρου «ΚΛΜ», αφετέρου επιβάλλει την αρχή της διαστρωμάτωσης, κατά την οποία το κατασκευασμένο λεξιλόγιο στηρίζεται σε ένα σύνολο διαστρωματωμένων κανόνων, αρχών και περιορισμών. Η διαστρωμάτωση αφορά (α) τη μορφή μιας ΚΛΜ, καθώς τα στοιχεία της περνούν διαδοχικά από τα υποσυστατικά του διαστρωματωμένου λεξιλογικού συστατικού, (β) την προβλεπτή σημασία μιας ΚΛΜ, η οποία είναι συνάρτηση της σημασιολογικής πράξης του ΚΚΛΜ, της σημασιολογικής οδηγίας του προσφύματος και των σημασιολογικών χαρακτηριστικών της βάσης, (γ) τις όποιες ανωμαλίες στη μορφή και τη σημασία. Επομένως, η μορφολογική ανάλυση είναι δυαδική, μη γραμμική, στη δομή βάθους, ενώ μια ΚΛΜ χαρακτηρίζεται ως προς το είδος της κατασκευής με κριτήριο την τελευταία από μια σειρά πράξεων, η οποία καθορίζεται βάσει της σημασίας. Επιπλέον, ενδιαφερόμαστε για το σύνολο των ΚΛΜ, τόσο των μαρτυρημένων, όσο και των δυνάμει (υπεργενετικότητα).

Από τις διαδικασίες κατασκευής ΛΜ μάς αφορά η παραγωγή (προσφυματοποίηση) και ειδικότερα η επιθηματοποίηση, κατά την οποία ένα επίθημα εφαρμόζεται σε μια βάση, σύμφωνα με κάποιον ΚΚΛΜ, με αποτέλεσμα το σχηματισμό μιας νέας ΚΛΜ, που ονομάζεται παράγωγη ΛΜ ή απλώς πα-

¹ Ευχαριστώ θερμά την καθηγήτρια κ. Άννα Αναστασιάδη-Συμεωνίδη για τις χρήσιμες παρατηρήσεις της.

² Προκρίνοντας τη σημασία και τη λειτουργία έναντι της μορφής, υιοθετούμε ως μονάδα της λεξικολογίας όχι τη λέξη, αλλά τη ΛΜ (Αναστασιάδη-Συμεωνίδη 1986).

ράγωγο. Ο ΚΚΑΜ περιλαμβάνει τέσσερα συστατικά, μια δομική πράξη, μια σημασιολογική πράξη, ένα μορφολογικό παράδειγμα και ποικίλους περιορισμούς. Η βάση είναι φορέας λεξικής σημασίας (λεξικό μόρφημα), εντάσσεται σε μία κύρια κατηγορία και έχει συντακτικές ιδιότητες. Βάση και ΑΜ δεν ταυτίζονται, έστω και αν κάποτε φαινομενικά συμπίπτουν. Το επίθημα είναι μόρφημα μη ελεύθερο (υπολεξική μονάδα), με γραμματική σημασία και συγκεκριμένα σημασιολογική οδηγία, το οποίο εντάσσεται στο μορφολογικό παράδειγμα ενός ΚΚΑΜ. Η εφαρμογή δηλαδή ενός επιθήματος σε μια βάση δεν πραγματοποιείται αυθαίρετα, αλλά υπακούει σε κανόνες και περιορισμούς.

3. Γλωσσικό υλικό

Το υλικό αντλήθηκε στην πλειονότητά του από το ΑΛΝΕ (Αναστασιάδη-Συμεωνίδη 2002). Συμπληρωματικά, ανατρέξαμε σε βιβλιογραφικές πηγές, συγκεκριμένα σε λεξικά (Σταματάκος 1952· Κριαράς 1995· ΑΚΝ 1998· Ανδριώτης 2001· Georgakas 2005· Μπαμπινιώτης 2006), γραμματικές (Φιλήντας 1907· Τριανταφυλλίδης [1941] 2005· Mackridge 1989· Τσοπανάκης 1994· Κλαίρης και Μπαμπινιώτης 2005· Ράλλη 2005), άρθρα και έρευνες (Kazazis 1972· Tzitzilis 1997· Σετάτος 1998· Κυρανούδης 2009), καθώς και σε διαδικτυακές πηγές (Google 2011· ΕΘΕΓ 2011).

Από το σύνολο του υλικού (293 ΑΜ που λήγουν σε *-(ι)λίκι*), μας αφορούν 218 ΚΑΜ που κατασκευάζονται με το επίθημα *-(ι)λίκι* (παράγωγα με επιθηματοποίηση) π.χ. *δικηγόρ(ος)* → *δικηγοριλίκι*, *διευθυντ(ής)* → *διευθυντιλίκι*³. Δεν εμπίπτουν στην ανάλυσή μας:

- [-κατασκευασμένες] ΑΜ που συγχρονικά αναλύονται ως «θέμα+ληκτικό -ι». Από διαχρονικής άποψης, είναι άμεσα λεξικά δάνεια, κατά κανόνα από την τουρκική, π.χ. *τερλίκι* (τουρκ. *terlik*), *χαρτζιλίκι* (τουρκ. *harçlık*) ή προήλθαν από παλαιότερα υποκοριστικά με το επίθημα *-ιον* π.χ. *χαλίκι* (< *χαλίκ-ιον < χάλιζ), *σταλίκι* (< *σταλίκ-ιον < στάλιζ).
- [-κατασκευασμένες] [+περίπλοκες] ΑΜ που συγχρονικά συνδέονται με κάποιες ΑΜ οι οποίες δεν μπορούν να θεωρηθούν βάσεις τους λόγω σημασιολογικών περιορισμών, όπως θα αποδειχθεί παρακάτω. Από διαχρονικής άποψης, πρόκειται για άμεσα λεξικά δάνεια, κατά κανόνα από την τουρκική, π.χ. *σελαχλίκι/σιλαχλίκι* (τουρκ. *silâhlik*), *τζαμ(ι)λίκι* (τουρκ. *camlik*), που συγχρονικά συνδέονται αντιστοίχως με τα *σελάχι/σιλάχι* (τουρκ. *silâh*), *τζάμι* (τουρκ. *cam*), ή για παλαιότερα παράγωγα με θέμα σε *-λ-* και το μεσαιωνικό επίθημα *-ίκι(ον)* τα οποία δεν υπέστησαν επανανάλυση με το επίθημα *-(ι)λίκι*, όταν το μεσαιωνικό *-ίκι(ον)* κατέστη μη διαθέσιμο, με αποτέλεσμα να μετατραπούν από [+κατασκευασμένες] σε [-κατασκευασμένες] ΑΜ π.χ. *καβαλίκι* (< *καβάλ(α)* + *-ίκι(ον)*), *ζυλίκι* (< *ζύλ(ο)* + *-ίκι(ον)*), που συγχρονικά συνδέονται αντιστοίχως με τα *καβάλα*, *ζύλο*.
- ΚΑΜ που με βάση την τελευταία πράξη κατασκευής δεν πρέπει να χαρακτηριστούν επιθηματοποιημένες π.χ. το σύνθετο *αλλαξοβασιλίκι* (← *βασιλίκι*).

4. Μορφές του επιθήματος

Το επίθημα, δάνειο από την τουρκική, απαντά στην ΚΝΕ με τις μορφές *-λίκι*, *-ιλίκι* και *-ίκι* (Κριαράς 1995, λήμματα *-λίκι*, *-ιλίκι*, *-ίκι* I· ΑΚΝ 1998, λήμματα *-λίκι*, *-ιλίκι*, *-ίκι* I, *-ίκι* 2· Ανδριώτης 2001, λήμματα *-λίκι*, *-ιλίκι*, *-ίκι* (II)· Μπαμπινιώτης 2006, λήμματα *-λίκι*, *-ιλίκι*, *-ίκι*· Κυρανούδης 2009, 383-85). Από διαχρονικής πλευράς, φαίνεται ότι προηγείται η μορφή *-λίκι* και έπεται η μορφή *-ιλίκι*, η οποία προέκυψε μέσω επανανάλυσης (ΑΚΝ 1998, λήμμα *-ιλίκι*· Μπαμπινιώτης 2006, λήμμα *-λίκι*· Κυρανούδης 2009, 383-84).

Από συγχρονικής πλευράς, θα μπορούσαμε να υποθέσουμε είτε ότι στη δομή βάθους εφαρμόζεται επί της βάσης το *-λίκι* και προστίθεται στο σημείο του αρμού ένα *-ι-* κατά το πέρασμα από το μεταπαγωγικό υποσυστατικό π.χ.

- (1) α. *ασίκ(ης)* → *ασικλίκι*
β. *αρχηγ(ός)* → *+αρχηγλίκι* => *αρχηγιλίκι*
γ. *μπεκιάρ(ης)* → *μπεκιαρλίκι* => *μπεκιαριλίκι*

³ Χρησιμοποιούμε τα εξής σύμβολα: → πράξη κατασκευής (συγχρονική ανάλυση), () κλιτικό που δε μετέχει στην πράξη κατασκευής, + υποχρεωτική εισαγωγή στο μεταπαγωγικό υποσυστατικό, => πράξη στο μεταπαγωγικό υποσυστατικό, ->> σημασιολογική πράξη (λ.χ. μεταφορά, μετωνυμία, κατάχρηση), > ετυμολογική προέλευση (διαχρονική ανάλυση).

είτε ότι στη δομή βάθους εφαρμόζεται επί της βάσης το -ιλίκι και αφαιρείται από το σημείο του αρμού το -ι- κατά το πέρασμα από το μεταπαραγωγικό υποσυστατικό π.χ.

- (2) α. αρχηγ(ός) → αρχηγιλίκι
β. ασίκ(ης) → +ασικιλίκι => ασικλίκι
γ. μπεκιάρ(ης) → μπεκιαριλίκι => μπεκιαρλίκι

Η επιλογή μεταξύ των δύο δυνατοτήτων δεν είναι εύκολη, αφού υπάρχουν περιπτώσεις όπου (α) το -ι- υπάρχει, ενώ δεν απαιτείται, επειδή η βάση λήγει σε φωνήεν, π.χ. ήρω(ας) → ηρωιλίκι (αντί ηρωλί-κι), ηθοποι(ός) → ηθοποιιλίκι (αντί ηθοποιί-κι), συνηγορώντας υπέρ της δεύτερης δυνατότητας· (β) το -ι- απουσιάζει, ενώ απαιτείται, επειδή προκύπτουν ασυνήθιστα για την ΚΝΕ συμφωνικά συμπλέγματα, π.χ. μπράτιμ(ος) → μπρατιμλίκι (αντί μπρατιμιλίκι), μπεχλιβάν(ης) → μπεχλιβανλίκι (αντί μπεχλιβανιλί-κι), συνηγορώντας υπέρ της πρώτης δυνατότητας. Θα μπορούσαμε, επίσης, να υποθέσουμε ότι ήδη στη δομή βάθους άλλοτε εφαρμόζεται το -λίκι και άλλοτε το -ιλίκι. Όμως, η κατανομή των δύο μορφών δε φαίνεται δυνατό να προσδιοριστεί με αυστηρά συγχρονικά φωνολογικά κριτήρια, εάν λάβουμε υπόψη τις προηγούμενες περιπτώσεις, καθώς και το γεγονός ότι το φωνολογικό περιβάλλον των δύο μορφών είναι σε αρκετές περιπτώσεις κοινό π.χ. μασκαρ(άς) → μασκαρλίκι/μασκαραλίκι/μασκαριλίκι, καραγκι-όζ(ης) → καραγκιοζλίκι/καραγκιοζιλίκι, αλλά ούτε και με σημασιολογικά κριτήρια, εφόσον δεν υπάρ-χει διαφορά στη σημασιολογική τους οδηγία ή στη σημασία των βάσεων όπου η καθεμία εφαρμόζεται.

Από την άλλη, εξετάζοντας το ζήτημα σε σχέση με την ετυμολογία και τη νεολογία, παρατηρούμε ότι η μορφή -λίκι απαντά κυρίως σε παλαιότερα δάνεια τουρκικής προέλευσης από τουρκικής προέ-λευσης βάσεις π.χ. φουκαρά(ς) (τουρκ. *fukara*) → φουκαραλίκι (τουρκ. *fukaralık*), μουσαφίρ(ης) (τουρκ. *misafir*) → μουσαφιλίκι (τουρκ. *misafirlik*), αρσίζ(ης) (τουρκ. *arsız*) → αρσιζλίκι (τουρκ. *arsızlık*). Αντίθετα, νεότερες δάνειες βάσεις από την αγγλοαμερικανική προτιμούν τη μορφή -ιλίκι π.χ. σταρ (αγγλοαμ. *star*) → σταριλίκι, γκάγκστερ (αγγλοαμ. *gangster*) → γκαγκστεριλίκι, μπάρμαν (αγγλοαμ. *barman*) → μπαρμανιλίκι. Επιπλέον, διαπιστώνουμε ότι αφενός η πλειονότητα των νεολογισμών σχηματί-ζεται με τη μορφή -ιλίκι π.χ. διοικητιλίκι, εποπιλίκι, ηθοποιιλίκι, καγκουριλίκι, αφετέρου νεότερα παρά-γωγα με τη μορφή -ιλίκι εμφανίζονται πλάι σε αντίστοιχα παλαιότερα παράγωγα τουρκικής προέλευ-σης με τη μορφή -λίκι π.χ. καραγκιοζλίκι/καραγκιοζιλίκι (τουρκ. *karagözlük*), μασκαριλίκι/μασκαραλίκι (τουρκ. *maskaralık*), χουβαρντιλίκι/χουβαρνταλίκι (τουρκ. *hovardalık*), ανταμιλίκι/ανταμλίκι (τουρκ. *adamlık*). Συνεπώς, φαίνεται ότι στην παρούσα φάση της ΚΝΕ η μορφή -ιλίκι είναι η πλέον διαθέσιμη, ενώ αντίθετα η μορφή -λίκι έχει χάσει σε μεγάλο βαθμό τη διαθεσιμότητά της. Νεολογισμοί όπως χαϊ-λίκι, τρεντιλίκι, ντιτζεϊλίκι, κρεϊλίκι δε συνιστούν αναγκαστικά αντιπαραδείγματα, διότι μπορούν να ερμηνευθούν με το μηχανισμό της απλολογίας· από το ληκτικό -ι- της βάσης και το αρκτικό -ι- του επιθήματος προκύπτει πρόβλημα στο σημείο του αρμού, το οποίο θεραπεύεται με την αποβολή του ενός -ι- π.χ. ντιτζέι → +ντιτζεϊλίκι => ντιτζεϊλίκι.

Τέλος, η μορφή -ίκι, η οποία απαντά πάντοτε με βάσεις που λήγουν σε -λ-, δεν υφίσταται στη δομή βάθους, αλλά προκύπτει από μια πράξη απλολογίας στο μεταπαραγωγικό υποσυστατικό (Αναστασιά-δη-Συμεωνίδη 2000α, 44· Αναστασιάδη-Συμεωνίδη και Χειλά-Μαρκοπούλου 2003, 36σημ48). Αξίζει να σημειωθεί ότι το τελικό εξαγόμενο είναι το ίδιο, είτε δεχθούμε ότι επί της βάσης εφαρμόζεται στη δομή βάθους η μορφή -ιλίκι είτε η μορφή -λίκι π.χ.

- (3) α. δάσκαλ(ος) → +δασκαλilίκι => δασκαλίκι ή
β. δάσκαλ(ος) → +δασκαλλίκι => δασκαλίκι

5. Είδος ΛΜ

Όσον αφορά τα είδη των ΛΜ (Αναστασιάδη-Συμεωνίδη 1986· 1992, 510· 1999, 316-17), η βάση μπο-ρεί να προέρχεται από:

- μονολεκτική [-κατασκευασμένη] ΛΜ, δηλαδή ένα πρωταρχικό λεξικό μόρφημα, ελεύθερο π.χ. ντιτζέι, μπάρμαν, μανάτζερ, σταρ, γκάγκστερ ή ελευθερώσιμο π.χ. άντρας, κιμπάρης, κομ-πάρσος, φαντάρος, μπάτσος.
- μονολεκτική ΚΛΜ παράγωγη π.χ. διευθυντής, κερατάς, παπατζής, σύνθετη π.χ. γεροντοκόρη, ηθοποιός, θαλαμοφύλακας, δημοσιογράφος ή μετατροπισμένη π.χ. αγαπητικός_Ο (← αγαπητικός_Ε), αλκοολικός_Ο (← αλκοολικός_Ε), πολιτικός_Ο (← πολιτικός_Ε).
- μονολεκτική [-κατασκευασμένη] [+περίπλοκη] ΛΜ π.χ. δικηγόρος.

- πολυλεκτική ΛΜ σε πλήρη μορφή π.χ. *δημόσιος υπάλληλος*, με έλλειψη π.χ. *κολλητός*_ο (← *κολλητός φίλος*), *εφοριακός*_ο (← *εφοριακός υπάλληλος*), *αναπληρωτής*_ο (← *αναπληρωτής καθηγητής*) ή ως αρκτικόλεξο/ακρωνύμιο π.χ. *ΕΠΟΠ* (← *επαγγελματίας οπλίτης*).

Μετά την εφαρμογή του επιθήματος -(ι)λίκι στις βάσεις προκύπτουν μονολεκτικές, παράγωγες, επιθηματοποιημένες ΚΛΜ.

6. Μορφοσυντακτικά χαρακτηριστικά

Ως προς τη γραμματική κατηγορία, οι βάσεις ανήκουν στα ουσιαστικά (Τριανταφυλλίδης [1941] 2005, 134· Mackridge 1989, 319-21· ΛΚΝ 1998, λήμμα -*ιλίκι*· Ράλλη 2005, 149· Κυρανούδης 2009, 385), γεγονός που σχετίζεται με το σημασιολογικό χαρακτηριστικό [+ανθρώπινο] (βλ. 7.2). Όπου φαινομενικά η βάση είναι επίθετο, στην πραγματικότητα πρόκειται για ουσιαστικό που προέρχεται από επίθετο, είτε με μετατροπή είτε με έλλειψη (Αναστασιάδη-Συμεωνίδη, Ευθυμίου, και Φλιάτουρας 2012). Επιπλέον, δεν αποτελούν πρόβλημα οι βάσεις που από μορφολογικής πλευράς χαρακτηρίζονται ως μετοχές, όμως από λειτουργικής-σημασιολογικής πλευράς εντάσσονται στα ουσιαστικά π.χ. *προϊστάμενος*.

Ως προς το γραμματικό γένος, η βάση μπορεί να φέρει:

- μόνο αρσενικό γραμματικό γένος π.χ. *άντρας*, *δεσπότης*, *γαμπρός*.
- μόνο θηλυκό γραμματικό γένος π.χ. *βεντέτα*, *τζιβιτζιλού*.
- μόνο ουδέτερο γραμματικό γένος π.χ. *κορόιδο*, *ψώνιο*.
- είτε αρσενικό είτε θηλυκό γραμματικό γένος, τα οποία δε διαφοροποιούνται μορφολογικά π.χ. *ο/η υπάλληλος*, *ο/η ηθοποιός* ή διαφοροποιούνται μορφολογικά με διαφορετικά κλιτικά π.χ. *μπεκρής/μπεκρού*, *χριστιανός/χριστιανή*, *μπατίρης/μπατίρω*, *γκόμενος/γκόμενα*, με διαφορετικά αλλόμορφα του ίδιου επιθήματος π.χ. *φοιτητής/φοιτήτρια*, με επίθημα που παράγει το θηλυκό από το αρσενικό π.χ. *γύφ(ος)* → *γύφτισσα*, *βουλευτ(ής)* → *βουλευτίνα*, *δήμαρχ(ος)* → *δημαρχίνα/δημαρχέσσα*, *ήρω(ας)* → *ηρωίδα*. Εδώ γένος της βάσης είναι κατά κανόνα το αρσενικό, ως ασημάδευτο έναντι του θηλυκού (Αναστασιάδη-Συμεωνίδη 1990, 1994· Αναστασιάδη-Συμεωνίδη και Χειλά-Μαρκοπούλου 2003), εκτός από κάποιες περιπτώσεις όπου στο δίπολο αρσενικό/θηλυκό το θηλυκό είναι ασημάδευτο και το αρσενικό σημαδεμένο π.χ. *γεροντοκόρος/γεροντοκόρη*, *πούτανος/πουτάνα* ή επιλέγεται κατ' εξαίρεση το σημαδεμένο θηλυκό πλάι στο ασημάδευτο αρσενικό π.χ. *πούστ(ης)* → *πουστιλίκι* και *πούστρ(α)* → *πουστριλίκι*.
- είτε ουδέτερο είτε αρσενικό είτε θηλυκό γραμματικό γένος π.χ. *γκαρσόν(ι)/γκαρσόνος/γκαρσόνα*, όπου γένος της βάσης είναι το ουδέτερο ως ασημάδευτο έναντι των άλλων δύο.

Ως προς τις συντακτικές ιδιότητες, οι βάσεις κατέχουν τις κατεξοχήν συντακτικές θέσεις των ουσιαστικών (υποκείμενο, αντικείμενο, κατηγορούμενο κτλ.). Επιπλέον, ορισμένες βάσεις μπορούν να λειτουργούν προσδιοριστικά π.χ. *ταιγκούνης άνθρωπος*, *κιμπάρης άντρας*, *χουβαρντάς σύζυγος* και να σχηματίζουν περιφραστικά παραθετικά (Χειλά-Μαρκοπούλου 1986, 189-211) π.χ. *ταιγκούνης, πιο ταιγκούνης, ο πιο ταιγκούνης*, γεγονός που σχετίζεται με το σημασιολογικό χαρακτηριστικό [+ιδιότητα] (βλ. 7.1). Σε αυτήν την περίπτωση, με γνώμονα την ενιαία και σαφώς προσδιορισμένη κατηγορία της βάσης στη δομή βάθους, θεωρούμε ότι οι βάσεις, παρότι εμφανίζουν κάποια επιθετικά χαρακτηριστικά, εντάσσονται είτε πρωτογενώς είτε δευτερογενώς στην κύρια κατηγορία των ουσιαστικών και όχι των επιθέτων.

Σχετικά με τη γραμματική κατηγορία των παραγώγων, ήδη έχει επισημανθεί ότι τα παράγωγα είναι ουσιαστικά (Τριανταφυλλίδης [1941] 2005, 134· Mackridge 1989, 319-21· Τσοπανάκης 1994, 660-62· ΛΚΝ 1998, λήμματα -*ιλίκι*, -*ικι1*, -*ικι2*· Κλαίρης και Μπαμπινιώτης 2005, 72, 88· Ράλλη 2005, 149· Κυρανούδης 2009, 385). Συνεπώς, η εφαρμογή του επιθήματος δε μεταβάλλει τη γραμματική κατηγορία της βάσης. Όσον αφορά το γραμματικό γένος, παρατηρούμε ότι τα παράγωγα φέρουν πάντοτε ουδέτερο γένος, ανεξάρτητα από το γένος της βάσης (Mackridge 1989, 321· Τσοπανάκης 1994, 660-62· ΛΚΝ 1998, λήμμα -*ιλίκι*· Κλαίρης και Μπαμπινιώτης 2005, 72· Κυρανούδης 2009, 385). Άρα, η εφαρμογή του επιθήματος επιβάλλει στο παράγωγο το ουδέτερο γραμματικό γένος. Ως προς την κλίση, αξιοσημείωτη είναι η απουσία (ή δυσχρηστία) της γενικής πτώσης, η οποία δεν είναι άσχετη με το [-λόγιο] χαρακτήρα των παραγώγων (Αναστασιάδη-Συμεωνίδη 2003, 29) (βλ. 8). Από συντακτικής πλευράς, τα παράγωγα εμφανίζονται στις κατεξοχήν συντακτικές θέσεις των ουσιαστικών, ενώ, σε αντίθεση με κάποιες από τις βάσεις, δεν έχουν τη δυνατότητα προσδιοριστικής λειτουργίας (Κυρανούδης 2009, 398-99) ή περιφραστικού σχηματισμού παραθετικών, απώλεια που αποδίδεται στην εφαρμογή του επιθήματος.

7. Σημασιολογικά χαρακτηριστικά

7.1 [ιδιότητα]

Οι βάσεις κατανέμονται σε ένα πλήθος τομέων, όπως πολιτική π.χ. *πολιτικός, πρωθυπουργός, υπουργός, βουλευτής, διοίκηση* π.χ. *διοικητής, διευθυντής, προϊστάμενος*, εκκλησία-θρησκεία π.χ. *αρχιεπίσκοπος, δεσπότης, παπάς, χριστιανός*, στρατός π.χ. *στρατηγός, φαντάρος, ΕΠΟΠ, στρατιώτης, θαλαμοφύλακας*, εκπαίδευση π.χ. *καθηγητής, φοιτητής, μαθητής, αναπληρωτής, ωρομίσθιος, δάσκαλος, επιστήμη* π.χ. *επιστήμονας, δικηγόρος, αρχιτέκτονας, τέχνη-θέαμα-διασκέδαση* π.χ. *ηθοποιός, τραγουδιστής, καλλιτέχνης, σπαρ, πρωταγωνιστής, βεντέτα, μανάτζερ, σπόνσορας, μπάρμαν, ντιτζέι, οικονομία* π.χ. *επιχειρηματίας, εφοπλιστής, εφοριακός, παραδοσιακό εμπόριο* π.χ. *σαράφης, μανάβης, μπακάλης, αμπατζής, αξιώματα του ιστορικού παρελθόντος* π.χ. *βασιλιάς, αγάς, βεζίρης, κεχαγιάς*, συμπεριφορά-χαρακτήρας π.χ. *αρσίζης, ρουφιάνος, κιμπάρης, κιοτής, κορόιδο, καραγκιόζης, μπελαλής, μπεσαλής, νταής, σερέτης, τεμπέλης, χουζούρλης, χουβαρντάς*, διαπροσωπική σχέση-οικογενειακή κατάσταση π.χ. *αγαπητικός, γκόμενος, κολητός, κουμπάρος, μπεκιάρης, εργένης, γεροντοκόρη, έξη-πάθος* π.χ. *αλκοολικός, χασικλής, θεριακλής, μπεκρής*, εξωτερική εμφάνιση-σωματική διάπλαση π.χ. *ζαρίφης, ασίκης, γόητας, σακάτης*, παράνομη δραστηριότητα π.χ. *νταβατζής, κοντραμπατζής, νονός, γκάγκστερ, παπατζής*, κοινωνική υποομάδα π.χ. *κάγκουρας, γκέι, τραβεστί*, εθνικότητα (με συνυποδηλώσεις) π.χ. *γύφτος, εβραίος*.

Με τις βάσεις μπορεί να δηλώνεται επάγγελμα, αξίωμα και γενικότερα θέση (υψηλή ή χαμηλή) σε μια ιεραρχία (κοινωνική, πολιτική, διοικητική, επαγγελματική, στρατιωτική, εκκλησιαστική, κτλ.) ή διακριτικό γνώρισμα (της εξωτερικής εμφάνισης, της συμπεριφοράς, του χαρακτήρα, κτλ.). Χωρίς δυσκολία μπορούμε να φιλοξενήσουμε αυτό το σύνολο σημασιών υπό το υπερώνυμο [ιδιότητα]. Δηλαδή, για να χρησιμεύσει ένα ουσιαστικό ως βάση, θα πρέπει να δηλώνει ιδιότητα. Από την άλλη, η έμφαση που έχει δοθεί στο χαρακτηριστικό [+επάγγελμα] (Κυρανούδης 2009, 385, 394) θα πρέπει να μετριαστεί, καθώς το χαρακτηριστικό αυτό αφενός αφορά ένα μέρος μόνο και όχι το σύνολο των βάσεων, αφετέρου συνδέεται με το χαρακτηριστικό [ιδιότητα] (Αναστασιάδη-Συμεωνίδη 2000β· Μανουηλίδου 2001), στο οποίο μπορεί να υπαχθεί ως υπώνυμο.

Όπως ακριβώς και οι βάσεις, τα παράγωγα με το επίθημα -(ι)λίκι κατανέμονται σε ένα ευρύ φάσμα τομέων και μπορεί να δηλώνουν επάγγελμα, αξίωμα, θέση (υψηλή ή χαμηλή) σε μια ιεραρχία, γνώρισμα, κατάσταση, τα οποία αντιμετωπίζονται ως υπώνυμα του υπερώνυμου [ιδιότητα]. Δηλαδή, κατά την εφαρμογή του, το επίθημα αντλεί από τη βάση το χαρακτηριστικό της ιδιότητας. Υπάρχουν, βέβαια, περιπτώσεις όπου η σημασία του παραγώγου δε φαίνεται να υπάγεται άμεσα σε αυτό το υπερώνυμο λ.χ. οι σημασίες 'σύνολο' π.χ. *παπαδιλίκι, γυφτιλίκι*, 'χώρος' π.χ. *αρματολίκι, πασαλίκι*, 'αντικείμενο' π.χ. *μπινελίκι, μεζεκλίκι*, 'πράξη' ή 'αποτέλεσμα πράξης' π.χ. *μπακαλίκι, φακιριλίκι, παπατζιλίκι*. Τέτοια φαινομενικά αντιπαραδείγματα ερμηνεύονται ως αποτέλεσμα επενέργειας σημασιολογικών κανόνων, όπως λ.χ. η μετωνυμία, κατά τη μετάβαση από την προβλεπτή στη συμβατική σημασία, π.χ.

- (4) α. *παπάδ(ες)* → *παπαδιλίκι* 'ιδιότητα του παπά' ->> 'σύνολο παπάδων, παπαδαριό' (με δευτερογενή περιληπτική αναφορά και όχι πρωτογενή περιληπτική σημασία [Ευθυμίου 1999]).
β. *φακίρ(ης)* → *φακιριλίκι* 'ιδιότητα του φακίρη' ->> 'πράξη του φακίρη, κόλπο'.
γ. *πασά(ς)* → *πασαλίκι* 'ιδιότητα του πασά' ->> 'περιοχή η οποία υπάγεται στη δικαιοδοσία του πασά'.

7.2 [ανθρώπινο] [έμψυχο] [συγκεκριμένο]

Διαπιστώνουμε ότι οι βάσεις φέρουν τα χαρακτηριστικά [+ανθρώπινο] [+έμψυχο] [+συγκεκριμένο], τα οποία δεν είναι άσχετα μεταξύ τους, καθώς μπορούμε να αντιμετωπίσουμε το χαρακτηριστικό [+ανθρώπινο] ως υπώνυμο του χαρακτηριστικού [+έμψυχο] (Αναστασιάδη-Συμεωνίδη και Χειλά-Μαρκοπούλου 2003, 22σημ25) και το δεύτερο ως υπώνυμο του χαρακτηριστικού [+συγκεκριμένο], με την έννοια ότι κάθε [+ανθρώπινο] είναι και [+έμψυχο] και κάθε [+έμψυχο] είναι και [+συγκεκριμένο]. Επομένως, αρκεί να πούμε ότι ένα ουσιαστικό ιδιότητας, για να χρησιμοποιηθεί ως βάση, θα πρέπει να είναι υποχρεωτικά [+ανθρώπινο]. Σε αυτό το σημείο, διαφοροποιούμαστε από τη βιβλιογραφία, όπου συχνά προτείνονται ως βάσεις ουσιαστικά [-ανθρώπινα] ή [-έμψυχα] ή [-συγκεκριμένα], όπως στα παραδείγματα:

- (5) α. *ζοριλίκι*: *ζόρ(ι)* -*ιλίκι* (ΛΚΝ 1998, λήμμα *ζοριλίκι*)
β. *αλκοολίκι*: *αλκοόλ* -*ικίλ* (ΛΚΝ 1998, λήμματα *αλκοολίκι*, -*ικίλ*), *αλκοολίκι* < *αλκοόλ* (Κυρανούδης 2009, 389, 394)
γ. *ξεφτιλίκι* < *ξεφτίλα* (Κυρανούδης 2009, 391, 394)

δ. *γυφτιλίκι* < *γυφτιά*, *γοητιλίκι* < *γοητεία*, *κοροϊδιλίκι* < *κοροϊδία* και συγχρονικά από ένα υπο-χαρακτηρισμένο ως προς τη γραμματική κατηγορία μόρφημα *γοητ-*, *κοροϊδ-*, *γυφτ-*, αντίστοιχα (Κυρανούδης 2009, 390, 391)

τα οποία αναλύουμε ως:

- (6) α. *ζόρικ(ος)*_ο → *ζοριλίκι* (με απαλοιφή του επιθήματος της βάσης [Γαλανή 1993, 73-75· Αναστασιάδη-Συμεωνίδη και Γαλανή 1995, 523]· παρόμοια τα *αγαπητικ(ός)*_ο → *αγαπητιλίκι*, *πολιτικ(ός)*_ο → *πολιτιλίκι*, *εφοριακ(ός)*_ο → *εφοριλίκι*)
 β. *αλκοολικ(ός)*_ο → *αλκοολίκι* (με απαλοιφή του επιθήματος της βάσης και απλολογία)
 γ. *ξεφτίλ(ας)*_ο → *ξεφτιλίκι* (με απλολογία)
 δ. *γύφτ(ος)* → *γυφτιλίκι*, *γόητ(ας)* → *γοητιλίκι* (και *γό(ης)* → *γοϊλίκι*), *κοροϊδ(ο)* → *κοροϊδιλίκι*

Εν αντιθέσει με τις βάσεις, η συντριπτική πλειονότητα των παραγώγων αποτελείται από [-ανθρώπινα] [-έμψυχα] [-συγκεκριμένα] ουσιαστικά. Αποδίδουμε στην εφαρμογή του επιθήματος την αλλαγή της τιμής αυτών των χαρακτηριστικών. Δηλαδή, το επίθημα δεν επιλέγει τα χαρακτηριστικά [+ανθρώπινο] [+έμψυχο] [+συγκεκριμένο] από τη βάση, με αποτέλεσμα αυτά να απουσιάζουν από το παράγωγο. Μπορούμε, επομένως, να προσδιορίσουμε τη σημασιολογική οδηγία του επιθήματος ως σχηματισμό αφηρημένων ουσιαστικών ιδιότητας από συγκεκριμένα [+ανθρώπινα] ουσιαστικά ιδιότητας, συμφωνώντας με την άποψη του Κυρανούδη (2009, 398) ότι «[...] η ιδιότητα που δηλώνεται από τη βάση [...] και η οποία είχε κάποιο νόημα σε σχέση με κάποιο [+προσωπικό] ΑΑ [Αντικείμενο Αναφοράς], αποκτά μεγαλύτερη ανεξαρτησία από το ΑΑ και νοείται πλέον σαν μια αυθύπαρκτη τάξη, σαν μια ξεχωριστή κατηγορία.»

Όσον αφορά τα λίγα παράγωγα που φέρουν το χαρακτηριστικό [+συγκεκριμένο], δε θεωρούμε ότι πρόκειται για εξαιρέσεις όπου το χαρακτηριστικό αυτό κληροδοτείται απευθείας από τη βάση. Αντιθέτως, προτείνουμε ότι και εδώ το επίθημα μεταβάλλει τη θετική τιμή του χαρακτηριστικού της βάσης σε αρνητική, η οποία με τη σειρά της μεταβάλλεται σε θετική λόγω επενέργειας σημασιολογικών κανόνων κατά το πέρασμα από την προβλεπτή στη συμβατική σημασία. Υπέρ αυτής της άποψης συνηγορεί το γεγονός ότι τα παράγωγα αυτά είναι [-ανθρώπινα] [-έμψυχα], κάτι που δε θα έπρεπε να συμβαίνει, εάν επρόκειτο για χαρακτηριστικό της βάσης που προβάλλεται στο παράγωγο, π.χ.

- (7) α. *μεζεκλ(ής)* [+ανθρώπινο] [+έμψυχο] [+συγκεκριμένο] → *μεζεκλίκι* ‘ιδιότητα του μεζεκλή’ [-ανθρώπινο] [-έμψυχο] [-συγκεκριμένο] ->> ‘νόστιμος μεζές’ [-ανθρώπινο] [-έμψυχο] [+συγκεκριμένο].
 β. *μπινέ(ς)* [+ανθρώπινο] [+έμψυχο] [+συγκεκριμένο] → *μπινελίκι* ‘ιδιότητα του μπινέ’ [-ανθρώπινο] [-έμψυχο] [-συγκεκριμένο] ->> ‘γλυκό, μεζές’ [-ανθρώπινο] [-έμψυχο] [+συγκεκριμένο]⁴.

7.3 [υποκειμενικό] [αξιολογικό]

Αντιμετωπίζουμε το χαρακτηριστικό [υποκειμενικό] ως υπερώνυμο του χαρακτηριστικού [αξιολογικό] και το χαρακτηριστικό [αξιολογικό] ως υπερώνυμο των χαρακτηριστικών [θετικά αξιολογικό] και [αρνητικά αξιολογικό] (Kerbrat-Orecchioni 1980· Αναστασιάδη-Συμεωνίδη 2000β, 71). Θεωρούμε ότι πρόκειται για διαβαθμισμένα και όχι απόλυτα χαρακτηριστικά (Kerbrat-Orecchioni 1980, 72), τα οποία βρίσκονται στο μεταίχμιο του σημασιολογικού και του χρηστικού επιπέδου, καθώς συναρτώνται με παραμέτρους όπως τα γλωσσικά και εξωγλωσσικά συμφραζόμενα ή η πρόθεση του ομιλητή.

Ως προς αυτά τα χαρακτηριστικά, διακρίνουμε βάσεις [-υποκειμενικές], με περιγραφική αλλά όχι εκφραστική σημασία, π.χ. *δήμαρχος*, *βουλευτής*, *αρχιτέκτονας*, *χριστιανός*, *στρατιώτης*, *χορηγός*, *πρόεδρος*, *φοιτητής* και [+υποκειμενικές], με περιγραφική και εκφραστική σημασία, οι οποίες μπορεί να είναι [θετικά αξιολογικές] π.χ. *ασίκης*, *κιμπάρης*, *μπεσαλής*, *τσιφτης*, [αρνητικά αξιολογικές] με μειωτικό, προσβλητικό έως και υβριστικό χαρακτήρα π.χ. *ατζαμής*, *γεροντοκόρη*, *γύφτος*, *καραγκιόζης*, *ρεζίλης*, *ξεφτίλας*, *ρουφιάνος*, *μαλάκας*, *πούστρα*, *πουτάνα*, [θετικά αξιολογικές] ή [αρνητικά αξιολογικές] κατά περίπτωση, π.χ. *μάγκας* ‘ικανός/ψευτοπαλικαράς’, *χουβαρντάς* ‘γενναιόδωρος/σπάταλος’.

Εδώ είναι σκόπιμο να αναφερθούμε και στο χαρακτηριστικό [+κοινωνικό γόητρο], το οποίο έχει προταθεί ως ένα από τα βασικά σημασιολογικά χαρακτηριστικά των βάσεων των παραγώγων με το επίθημα -(ι)λίκι (Kazazis 1972, 103· Tzitzilis 1997, 111· Κυρανούδης 2009, 394-96). Παρατηρούμε ότι το επίθημα εφαρμόζεται σε βάσεις χωρίς κοινωνικό γόητρο π.χ. *μανάβης*, *τσοπάνης*, *κομπάρσος*, *μπε-*

⁴ Και παράλληλα *μπινελίκι* ‘ιδιότητα του μπινέ’ ->> ‘κατηγορία, βρισιά’ [-ανθρώπινο] [-έμψυχο] [-συγκεκριμένο].

τατζής, γκαρσόν, ΕΠΟΠ, μαθητής, φαντάρος (βλ. και παραπάνω τις [+υποκειμενικές] [αρνητικά αξιολογικές] βάσεις). Επομένως, η θετική τιμή του χαρακτηριστικού δεν αποτελεί προϋπόθεση για την εφαρμογή του επιθήματος, εφόσον δεν ισχύει για το σύνολο των βάσεων.

Όσον αφορά τα παράγωγα, η βιβλιογραφία (Kazazis 1972, 103· Tzitzilis 1997, 111· ΛΚΝ 1998, λήμμα -*λικί*· Μπαμπινιώτης 2006, λήμμα -*ίκι*· Κυρανούδης 2009, 396-99) κατά κύριο λόγο αναφέρεται με χαρακτηρισμούς όπως «μειωτικό», «ειρωνικό», «υποτιμητικό» κτλ., δίνοντας έμφαση στην ομάδα εκείνη των [+υποκειμενικών] [αρνητικά αξιολογικών] παραγώγων και στην [+υποκειμενική] [αρνητικά αξιολογική] σημασιολογική οδηγία του επιθήματος. Ωστόσο, διαπιστώνουμε ότι τα χαρακτηριστικά [υποκειμενικό] και [αξιολογικό] των παραγώγων είναι συνάρτηση τόσο της βάσης, η οποία μπορεί να είναι περισσότερο ή λιγότερο υποκειμενική, φέροντας σαφή ή λανθάνοντα στερεοτυπικά χαρακτηριστικά κατά το λαϊκό ορισμό (Taylor 1995, 68-74· Αναστασιάδη-Συμεωνίδη 1993, 245· 1999, 320· 2009, 68-69), όσο και του επιθήματος, η σημασιολογική οδηγία του οποίου είναι εγγενώς [+υποκειμενική] [αρνητικά αξιολογική], θεωρώντας αυτονόητη και τη συμβολή των (γλωσσικών και εξωγλωσσικών) συμφραζομένων. Αναλυτικότερα:

- Σε μια [-υποκειμενική] βάση επιβάλλεται η [+υποκειμενική] [αρνητικά αξιολογική] σημασιολογική οδηγία του επιθήματος, η οποία επιτείνεται ή αμβλύνεται ανάλογα με τις λανθάνουσες στερεοτυπικές συνυποδηλώσεις της βάσης (λ.χ. αυθαιρεσία, απληστία, κατάχρηση, ευζωία) π.χ. *βουλευτ(ής)* → *βουλευτλίκι*, *δημόσι(ος)* *υπάλληλ(ος)* → *δημοσιούπαλληλίκι*, *ωρομίσθι(ος)* → *ωρομισθλίκι*, *φοιτητ(ής)* → *φοιτητλίκι*.
- Μια [+υποκειμενική] [θετικά αξιολογική] βάση συγκρούεται με τη [+υποκειμενική] [αρνητικά αξιολογική] σημασιολογική οδηγία του επιθήματος, οπότε η θετική σημασία της βάσης φαίνεται να υπερισχύει (Αναστασιάδη-Συμεωνίδη 2000β, 71), με αποτέλεσμα τα παράγωγα να είναι [+υποκειμενικά] [θετικά αξιολογικά] π.χ. *κιμπάρ(ης)* → *κιμπαρλίκι*, *ασίκ(ης)* → *ασικλίκι*, *ντερβίσ(ης)* → *ντερβισλίκι*.
- Μια [+υποκειμενική] [αρνητικά αξιολογική] βάση συμφωνεί με την [+υποκειμενική] [αρνητικά αξιολογική] σημασιολογική οδηγία του επιθήματος, με αποτέλεσμα την παραγωγή [+υποκειμενικών] [αρνητικά αξιολογικών] παραγώγων π.χ. *κιωτ(ής)* → *κιωτλίκι*, *κορόιδ(ο)* → *κοροϊδλίκι*, *νταβατζ(ής)* → *νταβατζλίκι*, *ρουφιάν(ος)* → *ρουφιανλίκι*.
- Για μια [-υποκειμενική], κατά περίπτωση [θετικά αξιολογική]/[αρνητικά αξιολογική] βάση ισχύει ό,τι στη δεύτερη ή την τρίτη περίπτωση, αντίστοιχα, με το βάρος να μετατοπίζεται στα συμφραζόμενα και την πρόθεση του ομιλητή, π.χ. *μάγκ(ας)* → *μαγκλίκι* 'ικανότητα//ψευτοπαλικαριά', *χουβαρντά(ς)* → *χουβαρνταλίκι* 'γενναιοδορία//σπατάλη'.

8. Το χαρακτηριστικό [λόγιο] - χρηστικό επίπεδο

Ακολουθώντας τους Αναστασιάδη-Συμεωνίδη και Φλιάτουρα (2003), αντιμετωπίζουμε το χαρακτηριστικό [λόγιο] από συγχρονική σκοπιά και σε συνάρτηση με το χρηστικό επίπεδο, ως ένα διαβαθμισμένο πραγματολογικό χαρακτηριστικό, η τιμή του οποίου για κάθε μόρφημα είναι συγκεκριμένη, καταγεγραμμένη στο νοητικό λεξικό και εμπλέκεται στις διαδικασίες κατασκευής ΛΜ.

Όσον αφορά τις βάσεις, εντοπίζονται [+/-λόγιες] βάσεις π.χ. *άντρας*, *αναπληρωτής*, *αρχιτέκτονας*, *δήμαρχος*, *βουλευτής*, *δάσκαλος*, *δημοσιογράφος*, *ηθοποιός*, *μαθητής*, *νομάρχης* και [-λόγιες] βάσεις π.χ. *φαντάρος*, *μπάτσος*, *κάγκουρας*, *κιμπάρης*, *νταβατζής*, *αγαπητικός*, *αρσίζης*, *θεριακλής*. Δε φαίνεται να υπάρχουν [+λόγιες] βάσεις. Οι [+λόγιες] κατά το ετυμολογικό κριτήριο βάσεις είναι [+/-λόγιες] από χρηστικής πλευράς π.χ. *πρύτανης*, *επίκουρος*, *κοσμήτορας*, *πρωθυπουργός*. Αξίζει να σημειωθεί ότι μεγάλο μέρος των βάσεων έχει περιπέσει σε αχρηστία ή επιβιώνει κυρίως σε ιστορικά συμφραζόμενα και στο πεδίο της ονοματολογίας π.χ. *αμπατζής*, *ζεβζέκης*, *γκεβεζές*, *καδής*, *κοτζαμπάσης*, *σούμπασης*, *τσορμπατζής*.

Όσον αφορά τα παράγωγα, όλα ανεξαιρέτως είναι [-λόγια]. Θεωρούμε ότι το επίθημα φέρει αρνητική τιμή του χαρακτηριστικού, γεγονός που σχετίζεται με την ξένη προέλευσή του (Anastassiadis-Symeonidis 2010) και μάλιστα από την τουρκική. Έτσι, μπορεί να εφαρμόζεται σε βάσεις [-λόγιες] ή [+/-λόγιες] για την κατασκευή [-λόγιων] παραγώγων, αλλά κανονικά δεν είναι συμβατό με [+λόγιες] βάσεις⁵. Ένα μέρος των παραγώγων έχει περιπέσει σε αχρηστία ή τουλάχιστον χαρακτηρίζεται παρωχημένο, όπως ακριβώς και οι αντίστοιχες βάσεις, π.χ. *αμπατζλίκι*, *γκεβεζελίκι*, *ζαριφλίκι*, *κιωτλίκι*. Θα μπορούσαμε, μάλιστα, να αντιμετωπίσουμε ορισμένα από αυτά τα παράγωγα ως [-κατασκευασμένες] ΛΜ, στο βαθμό που αμφισβητείται η ύπαρξη της βάσης τους στην παρούσα συγχρονία της ΚΝΕ π.χ.

⁵ Χωρίς ωστόσο να αποκλείεται ένας τέτοιου είδους συνδυασμός για παικτικούς λόγους (Αναστασιάδη-Συμεωνίδη και Φλιάτουρας 2003, 14σημ3).

σαλτανατλ(ής) → σαλτανατλίκι. Από την άλλη, παρατηρείται πλήθος νεολογικών παραγώγων, τόσο από μη νεολογικές βάσεις π.χ. φαντάρ(ος) → φανταριλίκι, φοιτητ(ής) → φοιτητιλίκι, πρωταγωνιστ(ής) → πρωταγωνιστιλίκι, όσο και από νεολογικές π.χ. κάγκουρ(ας) → καγκουριλίκι, τρέντι → τρεντιλίκι, Ε-ΠΟΠ → εποπιλίκι, πράγμα που φανερώνει την εξαιρετικά υψηλή διαθεσιμότητα του επιθήματος. Τέλος, ως προς τα είδη λόγου (genres), το γεγονός ότι το σύνολο των παραγώγων φέρει το χαρακτηριστικό [-λόγιο] και η πλειονότητα των παραγώγων το χαρακτηριστικό [+υποκειμενικό] καθιστά τα παράγωγα ακατάλληλα για επίσημες επικοινωνιακές περιστάσεις ή για λόγο που απαιτεί αντικειμενικότητα λ.χ. επιστήμη, διοίκηση, όμως αρκετά αποτελεσματικά σε ανεπίσημες επικοινωνιακές περιστάσεις ή σε λόγο με υποκειμενική σκοπιά λ.χ. πολεμική, δημοσιογραφία, λογοτεχνία (Αναστασιάδη-Συμεωνίδη 2000β, 71· Κυρανούδης 2009, 401).

9. Επίλογος

Κλείνοντας, ανακεφαλαιώνουμε την ανάλυσή μας στο πλαίσιο ενός ΚΚΑΜ:

- Η δομική πράξη του ΚΚΑΜ ορίζεται ως κατασκευή μετουσιαστικών ουσιαστικών και προσδιορίζεται ειδικότερα ως επιθηματοποίηση.
- Η σημασιολογική πράξη του ΚΚΑΜ κατασκευάζει την κοινή σημασία όλων των μετουσιαστικών ουσιαστικών.
- Προκειμένου μια βάση να επιλεγεί από το επίθημα -(ι)λίκι, θα πρέπει να ανήκει στη γραμματική κατηγορία των ουσιαστικών εγγενώς ή δευτερογενώς, να φέρει τα σημασιολογικά χαρακτηριστικά [+ιδιότητα], [+ανθρώπινο] ([+έμψυχο], [+συγκεκριμένο]) και το πραγματολογικό χαρακτηριστικό [+/-λόγιο] ή [-λόγιο]. Αντίθετα, τα χαρακτηριστικά [υποκειμενικό] [αξιολογικό], [κοινωνικό γόητρο], καθώς και το χαρακτηριστικό [επάγγελμα], το οποίο υπάγεται ως υπόνυμο στο χαρακτηριστικό [ιδιότητα], δεν είναι ορίζοντα χαρακτηριστικά της βάσης, εφόσον μπορούν να φέρουν θετική ή αρνητική τιμή, χωρίς αυτό να επιβάλλει ή να απαγορεύει την εφαρμογή του επιθήματος.
- Το επίθημα -(ι)λίκι, εφαρμοζόμενο στη βάση, κατασκευάζει ένα ουσιαστικό ουδέτερου γένους, αντλώντας από τη βάση το χαρακτηριστικό της ιδιότητας, μεταβάλλοντας την τιμή του χαρακτηριστικού [ανθρώπινο] ([έμψυχο], [συγκεκριμένο]) από θετική σε αρνητική και επιβάλλοντας το πραγματολογικό χαρακτηριστικό [-λόγιο]. Ο υποκειμενικός και αξιολογικός χαρακτήρας του παραγώγου είναι συνάρτηση της [αρνητικά αξιολογικής] σημασιολογικής οδηγίας του επιθήματος και των σχετικών χαρακτηριστικών/συνυποδηλώσεων της βάσης.

ABSTRACT

The analysis of the Greek present participle or gerund in -ontas is related to pragmatic parameters and to the informational value of the message. The presentation of its syntactic characteristics in recent grammars and researches points out its functional particularity, given that it offers, due to its innate polysemy, the possibility to the speaker to express his point of view in a less direct way. The application, however, of effective functional criteria and the selection of a reliable corpus can ensure to a large extent the interpretation of its semantic meaning and the further detection of various semantic nuances, which could clarify different aspects of the communicative procedure.

Λέξεις κλειδιά: ρηματικός τύπος σε -οντας, επιρρηματικές λειτουργίες, επικοινωνιακή προσέγγιση

1. Εισαγωγή

Η διερεύνηση της λειτουργίας του άκλιτου ρηματικού τύπου σε -οντας καταδεικνύει την ιδιαιτερότητά του, η οποία αποτυπώνεται γλαφυρά και στο ζήτημα της προτεινόμενης κατά καιρούς ορολογίας. Η συνοπτική παρουσίαση, ωστόσο, διαφορετικών τοποθετήσεων σε σχέση με την ορολογία και η προσέγγιση των δυο βασικών καταγεγραμμένων λειτουργιών του, της επιρρηματικής και της απόλυτης, δεν αποτελούν εδώ παρά τη βάση για την περαιτέρω μελέτη των ιδιαίτερων σημασιολογικών και συντακτικών χαρακτηριστικών του. Απώτερος στόχος είναι η απόπειρα ερμηνείας του κατά παράδοση μετοχικού τύπου σε διαφορετικά περιβάλλοντα, η αποτύπωση στο μέτρο του δυνατού της συνεισφοράς του στη δήλωση διαφορετικής φύσεως εξειδικεύσεων.

Ειδικότερα, επιδιώκεται, με σημείο αναφοράς την έννοια της εξειδίκευσης, η ανάδειξη του ρόλου των επικοινωνιακών / πραγματολογικών παραμέτρων στην αποκωδικοποίηση του μηνύματος, η οποία δυσχεραίνεται σ' αυτήν την περίπτωση, σε μικρότερο ή μεγαλύτερο βαθμό, από την εγγενή πολυσημία του υπό επεξεργασία τύπου. Καθώς η επιλογή αυτής της μορφής εξειδίκευσης (Κλαίρης et al 2005: 742) είναι εύλογα συνειδητή από μέρους του ομιλητή και σχετίζεται με δεδομένες επικοινωνιακές ανάγκες, ο εντοπισμός των διαφορετικών λειτουργιών προϋποθέτει, παράλληλα με την εφαρμογή αξιόπιστων λειτουργικών κριτηρίων, τη διερεύνηση συγκεκριμένων σημασιολογικών σχέσεων με άξονα πάντοτε τη συλλογή ενός αυθεντικού σώματος γλωσσικών δεδομένων¹.

2. Η ιδιαιτερότητα του τύπου σε –οντας

Ο ρηματικός τύπος σε -οντας κατέχει μια ξεχωριστή θέση στο ρηματικό σύστημα της ελληνικής, με αποτέλεσμα η συστηματική επεξεργασία του να οδηγεί στη διατύπωση διαφορετικών επιστημονικών τοποθετήσεων αναφορικά με τη λειτουργία και την ερμηνεία του σε διαφορετικά περιβάλλοντα. Οι διαφοροποιήσεις αυτές αποτυπώνονται, άλλωστε, και στην προτεινόμενη ορολογία η οποία απομακρύνεται συχνά από τον παραδοσιακό και ευρέως γνωστό χαρακτηρισμό του ως μετοχής. Ειδικότερα, εκτός από τον όρο *άκλιτη ενεστωτική μετοχή* που διατηρείται ακόμη (Τσοπανάκης 1994, Κλαίρης et al 2005) και επικρατεί στο πλαίσιο της εκπαιδευτικής διαδικασίας και για λόγους διδακτικούς² (Τριανταφυλλίδης 1941, Τζάρτζανος 1946, Χατζησαββίδης et al 2009) προτείνονται και

¹ Στοιχεία αντλήθηκαν εδώ κατά κύριο λόγο από το *Σώμα Ελληνικών Κειμένων* (<http://sek.edu.gr/search.php>) και τον *Εθνικό Θησαυρό Ελληνικής Γλώσσας* (<http://hnc.ilsp.gr/>), το *Σώμα Κειμένων* (Corpus του ΙΕΛ).

² Είναι απολύτως κατανοητό να παρουσιάζονται ορισμένα δύσκολα γλωσσικά φαινόμενα σε απλουστευμένη μορφή στα σύγχρονα σχολικά εγχειρίδια, ειδικά όταν αυτά απευθύνονται σε μικρούς μαθητές (Φιλίππακη-

αυτοί του *γερουνδίου* και του *ρηματικού επιρρήματος* (converb) από τους, μεταξύ άλλων, Holton et al 1997, Tsimpli 2000, Tantalou 2004 και Moser 2006 αντίστοιχα.

Το ακανθώδες ζήτημα της ορολογίας είναι συνυφασμένο με την ανάλυση δεδομένων σημασιολογικών και συντακτικών χαρακτηριστικών που διαφοροποιούν εμφανώς το συγκεκριμένο τύπο από το σύνολο των εν χρήσει μετοχών της ελληνικής. Έτσι, παρόλο που προέρχεται από την ενεστωτική μετοχή της αρχαίας σε -ων, -ουσα, -ον (Manolessou 2005), δε συνδέεται, όπως οι υπόλοιποι τύποι, μορφολογικά με την κατηγορία των ονομάτων ή των επιθέτων (Moser 2006: 45), αλλά παραμένει άκλιτος. Δε φαίνεται επίσης να περιορίζεται στη δήλωση της χρονικής βαθμίδας του παρόντος, καθώς ο σχηματισμός του από το μη συνοπτικό θέμα της ενεργητικής φωνής δεν παρεμποδίζει τελικά την εμφάνισή του με ρήματα όλων των χρόνων (π.χ. *διαβάζει / διάβαζε/ θα διαβάσει/ διάβασε ακούγοντας μουσική*).

Αρκετές από αυτές τις δυσκολίες αντιμετωπίζονται με την εφαρμογή διαδεδομένων (Greenbaum 1969, Νάκας 1987, Guimier 1996, Molinier et al 2000) λειτουργικών κριτηρίων, που υιοθετούνται συχνά για το σύνολο των επιρρηματικών υποβοηθώντας την περαιτέρω υποκατηγοριοποίησή τους. Ενδεικτικά, εκτός από το κατεξοχήν σύνηθες κριτήριο (1) της ερώτησης (Χατζησαββίδης 2009: 100, Φίλιππακη-Warburton et al 2011: 163) και του εντοπισμού της εστίας της άρνησης (2), εξετάζεται η δυνατότητα ή μη μετακίνησης του επιρρηματικού στοιχείου στην αρχή του εκφωνήματος (3), καθώς και η δυνατότητα παράφρασης και αντικατάστασής του (4) κατά περίπτωση από άλλα ομοειδή στοιχεία ή *αντ-επιρρήματα* (Νάκας 1988: 100, Quirk 1991: 427). Υπό αυτό το πρίσμα, διαφαίνεται πως ο άκλιτος τύπος σε -όντας μπορεί να ενταχθεί στην ίδια κατηγορία με τα υπόλοιπα επιρρηματικά, καθώς εκφράζει από κοινού συγκεκριμένες, με βάση και το βαθμό ενσωμάτωσής του στη δομή της πρότασης (Quirk et al, 1972: 268-269), επιρρηματικές σχέσεις.

1. Ερώτηση

Διέσχισε το Αιγαίο *κολυμπώντας*. –*Πώς; -Κολυμπώντας*.

2. Εστία της άρνησης

Δε διέσχισε *κολυμπώντας* το Αιγαίο, αλλά *εν πλω*.

3. Μετακίνηση

Δεν ήρθε *τρέχοντας*. **Τρέχοντας*, δεν ήρθε.

4. Παράφραση και αντικατάσταση

4.1. Δε θα του αλλάξεις γνώμη *επικρίνοντάς τον* (= με τις συνεχείς επικρίσεις σου).

4.2. Ήρθε *τρέχοντας* (=τροχάδην). Έτσι, είχα καταφτάσει και εγώ.

Η πιο συστηματική επεξεργασία αποδεικνύει, ωστόσο, πως οι υπό εξέταση τύποι, εκτός από την αδυναμία τους σε κάθε περίπτωση να επωμιστούν τη λειτουργία του ορίσματος (5.1-3) (Tsimpli 2000: 134), παρουσιάζουν σημαντικές διαφοροποιήσεις αναλόγως της λειτουργίας τους ως *επιρρηματικών* ή *απόλυτων* αντίστοιχα (Panagiotidis, 2006: 2). Συνοπτικά, όταν λειτουργούν επιρρηματικά, προσδιορίζουν συντακτικά το ρηματικό πυρήνα, απορρίπτοντας τη φραστική άρνηση με τα *μην* και *δεν* (6) και αδυνατούν συγχρόνως να χωριστούν δια της στίξης ή του επιτονισμού από την υπόλοιπη πρόταση, την οποία συνήθως ακολουθούν (7). Η στενή σχέση που διατηρούν με αυτήν καθίσταται εμφανής και στην περίπτωση του υποκειμένου τους (8), που απουσιάζει, γιατί ελέγχεται στην πραγματικότητα από το υποκείμενο της βασικής πρότασης (Tsimpli 2000: 156, Tantalou 2004: 4). Αυτός είναι, άλλωστε και ο λόγος που η αφαίρεση της «μετοχικής φράσης» (9) οδηγεί συχνά σε αντιγραμματικές προτάσεις (Tantalou 2004: 3).

5.1. * (Το) *οδηγώντας* με ευχαριστεί.

5.2. *Μισώ (το) *περιμένοντας* στη στάση.

5.3. *Είδα την Ελένη *διαβάζοντας* ένα καλό βιβλίο.

6. *Κατέφθασε *μην/ δεν τρέχοντας*, γιατί είχε χρόνο.

7. Πρβ: Προχωρούσε *περπατώντας* αργά, για να μη γίνει αντιληπτός.

*Προχωρούσε, *περπατώντας* αργά, για να μη γίνει αντιληπτός.

8.1. Η Μαρία κατάφερε να *φτάσει* εκεί *περπατώντας*.

8.2. Η Μαρία είδε την Ελένη *τρέχοντας* (= * να τρέχει).

9.1. Δεν έφυγε *τρέχοντας* (γιατί είχε χρόνο). (= *Δεν έφυγε.)

9.2. -*Πώς κατέφτασε *τρέχοντας*;

Warburton et al 2011: 5). Υπενθυμίζουμε, άλλωστε, ότι και στην προκήρυξη για τη συγγραφή μιας νέας επίσημης γραμματικής για το Γυμνάσιο (ΥΕΠΘ/ Π.Ι. 2003: 64) είχε επισημανθεί ότι η νέα πρόταση έπρεπε ν' αποτελεί «αναμορφωμένη έκδοση της *Νεοελληνικής Γραμματικής* του Μανόλη Τριανταφυλλίδη», ενσωματώνοντας βέβαια συγχρόνως και νεότερα ερευνητικά δεδομένα.

Αντίθετα, διαφορετική φαίνεται πως είναι η λειτουργία των ρηματικών τύπων σε *-οντας*, όταν λειτουργούν ως απόλυτοι. Στην περίπτωση αυτή, τα υποκείμενά τους είναι δυνατόν είτε να ελέγχονται και να καθορίζονται από το υποκείμενο του κύριου ρηματικού τύπου (10), είτε να εμφανίζονται επιτασσόμενα σε ονομαστική πτώση (11). Η γερονδιακή φράση, η οποία δεν απορρίπτει εδώ την *μην* άρνηση (12), προηγείται συνήθως της υπόλοιπης πρότασης, από την οποία χωρίζεται κατά κανόνα με τη βοήθεια της στίξης ή του επιτονισμού (13). Το ζήτημα της συμφωνίας, ωστόσο, του υποκειμένου του άκλιτου ρηματικού τύπου με αυτό της υπόλοιπης πρότασης εγείρει και το ζήτημα της υποκειμενικής στάσης, καθώς αρκετοί ομιλητές φαίνεται πως απορρίπτουν την απουσία κοινής αναφοράς, η οποία αναφέρεται, με άξονα απρόσωπα ρήματα του τύπου *ξημερώνει* και λογοτεχνικές περισσότερο παραπομπές, ήδη από τον Τζάρτζανο (1946: 333-6). Όπως αναφέρει και η Moser (2006: 50), σε αρκετές περιπτώσεις η επιλογή της αντίστοιχης εξαρτημένης πρότασης θα μπορούσε να άρει τις όποιες ενστάσεις και αντιρρήσεις (η αντικατάσταση στην περίπτωση του 11, για παράδειγμα, του *βγαίνοντας* από τη χρονική πρόταση *καθώς / ενώ έβγαине*), οι οποίες σχετίζονται ενδεχομένως και με το ρυθμιστικό χαρακτήρα της γλωσσικής διδασκαλίας και την επιθυμία γενικά των ομιλητών της ελληνικής να υιοθετούν δεδομένα γλωσσικά πρότυπα.

10. *Βγαίνοντας ο Νίκος από το σχολείο, έπεσε.*

11. *Βγαίνοντας ο Νίκος από το σχολείο, άρχισε να χιονίζει.*

12. *Μη μπορώντας να συγκρατήσει τα δάκρυά της, ξέσπασε.*

13. *Βλέποντας τον πίνακα στο βάθος της αίθουσας, έμεινα άφωνος.*

3. Η ερμηνεία του τύπου σε *-οντας*

Ένα άλλο σημαντικό ζήτημα που ανακύπτει κατά τη μελέτη του ρηματικού τύπου σε *-οντας* είναι και το εύρος των σημασιολογικών αποχρώσεων που εκφράζει, καθώς η διαδικασία της αποκωδικοποίησης ενέχει συχνά υψηλό βαθμό υποκειμενισμού και καθορίζεται στην πράξη από την επιλογή συγκεκριμένων ερευνητικών προς επεξεργασία δεδομένων. Ωστόσο, η υιοθέτηση λειτουργικών κριτηρίων, που εφαρμόζονται άλλωστε ήδη για το σύνολο των επιρρηματικών, καθώς και η διερεύνηση βάσει σώματος δεδομένων των εκφραζόμενων κάθε φορά σημασιολογικών σχέσεων μπορούν να καταδείξουν με μεγαλύτερη σαφήνεια το ρόλο των πραγματολογικών παραμέτρων στην ερμηνεία του μηνύματος.

3.1 Η λειτουργία της εξειδίκευσης

Παραδοσιακά, η αποσαφήνιση των σημασιολογικών σχέσεων επιτυγχάνεται, όπως είδαμε, με τη βοήθεια της παράφρασης και της αντικατάστασης του άκλιτου τύπου από άλλα ομοειδή επιρρηματικά. Δια αυτής της οδού, οδηγηθήκαμε, ως αποτέλεσμα και της γλωσσικής αλλαγής, στον περιορισμό με την πάροδο του χρόνου των υποκατηγοριών –υπενθυμίζουμε πως ο Τζάρτζανος (1953: §209-10) αναγνωρίζει 8 είδη ενεστωτικών μετοχών– και στον προσδιορισμό βασικών λειτουργικών αξόνων, οι οποίοι διαφάνηκε ήδη πως αφορούν κυρίως την έκφραση του τρόπου ή του μέσου και βεβαίως του χρόνου (Holton et al, 1999: 234).

Ωστόσο, οι όποιες δυσκολίες σε επίπεδο ερμηνείας σχετίζονται ενδεχομένως και με τη φύση του ίδιου του γλωσσικού μέσου, το οποίο προσφέρει τη δυνατότητα στον ομιλητή να καταφεύγει κατά βούληση σε μια *μη ρητή δήλωση* (Κλαίρης et al 2005: 743) των εξειδικευτικών πληροφοριών που επιθυμεί να προβάλει. Ειδικότερα, ο ομιλητής μπορεί να εμπλουτίσει το μήνυμά του με σειρά εξειδικεύσεων, οι οποίες, αναφερόμενες κατά βάση στον πυρήνα του μηνύματος, αναδεικνύουν διαφορετικές κάθε φορά πτυχές της ρηματικής δράσης (Κλαίρης et al, 2005: 733, Κλαίρης et al, 2001). Η επιλογή, υπό αυτήν την έννοια, του τύπου σε *-οντας* από το σύνολο των γλωσσικών μέσων δε μπορεί παρά να είναι συνειδητή από μέρους του ομιλητή και δηλωτική των προθέσεων του. Δεν είναι, άλλωστε, τυχαίο πως αυτός αξιοποιείται συχνά και στο χώρο της λογοτεχνίας, λόγω των υφολογικών δυνατοτήτων που εξασφαλίζει και της εγγενούς του πολυσημίας (Δέτσης 1983: 49-64, Νάκας 1985). Κατά συνέπεια, η περιγραφική ανάλυση των διαφορετικών λειτουργιών του δεν μπορεί εκ των πραγμάτων να περιοριστεί σε αμιγώς συντακτικές παρατηρήσεις, καθώς υπεισέρχονται εδώ εμφανώς και πραγματολογικές παράμετροι (Tsimpli 2000:137-9), που άπτονται διαφορετικών συνιστωσών της επικοινωνιακής διαδικασίας.

3.2 Η δήλωση του τρόπου και του χρόνου

Η καταγραφή, βέβαια, των δυο βασικών λειτουργιών της μορφής σε -οντας, της απόλυτης και της επιρρηματικής, αποτελεί ήδη σημείο αναφοράς για την περαιτέρω διερεύνηση των σημασιολογικών σχέσεων που εκφράζονται σε διαφορετικά περιβάλλοντα, καθώς η επιρρηματική φαίνεται πως είναι άρρηκτα συνδεδεμένη με την έκφραση του τρόπου, ενώ η απόλυτη με αυτήν του χρόνου, αλλά και άλλων κατά περίπτωση εννοιών (Tsimpli 2000, Haidou et al 2002). Σε ένα πλαίσιο δομολειτουργικό, η πιο συστηματική εφαρμογή λειτουργικών κριτηρίων θα μπορούσε να συμβάλει, λόγω και της σημασιολογικής απροσδιοριστίας του μέσου, στον εντοπισμό και άλλων επιμέρους σημασιολογικών αποχρώσεων και στην υιοθέτηση εναλλακτικών ενδεχομένως προσεγγίσεων.

Έτσι, η δήλωση του τρόπου και άλλων συγγενών προς αυτόν εννοιών αποσαφηνίζεται μέσω της αντιπαράβολής των δυο ρηματικών τύπων, του κυρίου ρήματος και του τύπου σε -οντας και, ειδικότερα, μέσω της ελέγχου της συνάφειας των πληροφοριών που μεταφέρουν. Ο τρόπος με την αυστηρή έννοια του όρου εκφράζεται, όταν οι δυο τύποι ανήκουν στο ίδιο ή σε συγγενικό σημασιολογικό πεδίο, γιατί τότε μόνο δίνεται η δυνατότητα στη «μετοχική φράση» να εξειδικεύει, όπως και τα επιρρήματα του τρόπου, δεδομένες πτυχές της ρηματικής ενέργειας ή διαδικασίας (14-17). Όταν οι δυο συγκρινόμενες έννοιες δε μπορούν εμφανώς να συσχετιστούν σημασιολογικά, δεν προβάλλεται στην πραγματικότητα ο τρόπος επιτέλεσης της ρηματικής δράσης, αλλά οι επανομαζόμενες *συνοδευτικές συνθήκες* (18-20). Στην περίπτωση αυτή, περιγράφεται, δηλαδή, «μια κατάσταση, διαδικασία, ενέργεια ή πράξη κτλ. την οποία εμφανίζει η μετοχή ότι εξελίσσεται παράλληλα σε μια κατάσταση, διαδικασία, ενέργεια ή πράξη που δηλώνει το ρήμα» (Νάκας 2000: 78-82, Holton et al, 1998: 235), γεγονός που αποδεικνύεται και βάσει του κριτηρίου της παράφρασης (*ρήμα+ τύπος σε -οντας= ρήμα + και ταυτοχρόνως + ρήμα*).

14. Φρενάρισε κι αυτή και τον είδε να κατεβαίνει απ' την νταλικά και να 'ρχεται τρέχοντας προς το μέρος της. Κρατούσε χαρτί και μολύβι. (ΕΘΕΓ, Λογοτεχνία, Τορόση Ε., 2002, *Η μπαλάντα των πορτοκαλιών*, Εξάντας)

15. Μπήκε μαζί με την αχώριστη γραμματέα του Kathrin ακροπατώντας αθόρυβα σαν γάτος. (Μπίστικα Ε., "Daniel Day Lewis, φως και σκιά, ο άνθρωπος και ο ηθοποιός", *Καθημερινή*, 17/02/2008)

16. Σας συνιστούμε να *αρχίσετε αφαιρώντας* τρίχες από την περιοχή των ποδιών. (Οδηγίες χρήσης προϊόντος Veet)

17. "Η Ευρώπη είναι ο Παράδεισος!", για τον Ουμάρ από την Αφρική, που ονειρεύεται να *διασχίσει κολυμπώντας* τα 25 χιλιόμετρα που τον χωρίζουν από τον ιδανικό προορισμό του. (ΕΘΕΓ, Σχολιαστικό άρθρο, Κατσούνακη Μ., "Ο Ουμάρ, ο Μάρεκ, η Μαλίκα, η Παϊμάν...", *Καθημερινή*, 27/03/2005)

18. Ανακατεύουμε καλά όλα τα υλικά, εκτός του ελαιολάδου, με κουτάλι να ενωθούν και κατόπιν *ρίχνουμε* λίγο λίγο το ελαιόλαδο, *χτυπώντας* συνέχεια το μείγμα, ώσπου ν' αποκτήσει κρεμώδη υφή. (Διαδίκτυο, Συνταγές μαγειρικής, περιοδικό *Αθηνόραμα*). Διαθέσιμο σε ηλεκτρονική μορφή (προσπελάστηκε στις 23/09/2012): <http://www.athinorama.gr/umami/choices/default.aspx?id=4214&sec=Umamifood>.

19. *Μπαινοβγαίνουν* σε καταστήματα *ρωτώντας*... Χιλιόμετρα κάθε μέρα, ώρες ατέλειωτες σε τηλεφωνικούς θαλάμους *ψάχνοντας* στις μικρές αγγελίες. Οτιδήποτε, οποιαδήποτε δουλειά. (ΕΘΕΓ, Σχολιαστικό άρθρο, Κατσούνακη Μ., "Ο Ουμάρ, ο Μάρεκ, η Μαλίκα, η Παϊμάν...", *Καθημερινή*, 27/03/2005)

20. Σε ολόκληρο το διάστημα των τεσσάρων ετών ο Ουέλς *πηγαινοερχόταν* στην Αμερική, στο Μαρόκο και στην Ιταλία, *επιβλέποντας* την πορεία των γυρισμάτων και *αναζητώντας* χρήματα για την ολοκλήρωσή τους, καθώς και σε άλλες χώρες, που απαιτείτο να βρίσκεται για άλλες ταινίες. (ΕΘΕΓ, Σχολιαστικό άρθρο, Παναγόπουλος Π., "Σαϊξπηρ με τη ματιά του Όρσον Γουέλς", *Καθημερινή*, 20/02/2005)

Συνήθης (Κρητικού 2008: 415), τέλος, φαίνεται πως είναι η συγγενής προς τον τρόπο δήλωση του μέσου (21-23), όπως προκύπτει από την χωρίς ιδιαίτερες δυσκολίες αντικατάσταση του τύπου σε -οντας από άλλα ομοειδή από λειτουργική άποψη μέσα (κυρίως από τα προθετικά σύνολα με +αιτ. και δια /μέσω + γενική).

21. Σε συνέντευξη στην εφημερίδα Die Welt, καλεί τη Γερμανία να *αποτολμήσει* τη «φυγή προς τα εμπρός», *εκδίδοντας* ένα ισχυρό νόμισμα του Βορρά μαζί με άλλες τέσσερις χώρες [...]. ("Ευρώ του Βορρά και του Νότου προτείνει ο Μάρκους Κέρμπερ", *Καθημερινή*, Οικονομία, 18/08/2012)

22. Γιατί *ανακυκλώνοντας* μέταλλα όπως το ατσάλι «*κερδίζουμε*» πολλούς εκατοντάδες τόνους στην κατεύθυνση της μείωσης των εκπομπών CO₂. (Αξιώτης Δ., "Ανακυκλώνοντας το μέλλον μας", *Ροή Up*, 21/09/2012)

23. Στην πράξη, όμως, αυτό που συμβαίνει είναι ότι διατηρούν το ίδιο επίπεδο πραγματικής κερδοφορίας, *μειώνοντας* τη φορολογική επιβάρυνση. (ΕΘΕΓ, Σχολιαστικό άρθρο, Κωνσταντινίδης Σ., "Η μείωση της φορολογίας προέκυψε από λάθη!", *Καθημερινή*, 13/05/2005).

Εν τούτοις, είναι γεγονός ότι δεν μπορεί να αποκλειστεί με βεβαιότητα η εμφάνιση αμφισημιών ή η διατύπωση διαφορετικών τοποθετήσεων για την ερμηνεία δεδομένων εκφωνημάτων (Κλαίρης et al, 2005: 743). Η σημασιολογική ευρύτητα, άλλωστε, της έννοιας του τρόπου, ο εντοπισμός της οποίας συνδέεται και για διδακτικούς λόγους (Φιλιππάκη et al, 2011: 163) με την εφαρμογή του *πώς* κριτηρίου, καλύπτει και συχνά υποσκελίζει στην πράξη άλλες επιμέρους σημασιολογικές κατηγορίες ή αποχρώσεις. Έτσι, ως σημασιολογική κατηγορία φαίνεται πως αφομοιώνει πλέον τη δήλωση των συνοδευτικών συνθηκών, ενώ ενδέχεται να ενσωματώνει κάποιες φορές στους κόλπους της την έννοια του μέσου ή ακόμη και αυτήν της αιτίας (Μπακάκου - Ορφανού 1999: 28-9), η οποία υποβόσκει κάποιες φορές ως υπονήμα (24-5).

24. Πέτυχε το στόχο του μελετώντας σκληρά (= με τη σκληρή μελέτη, δια της σκληρής μελέτης ή ακόμη και επειδή / αφού μελέτησε σκληρά).

25. Έπεισε το ακροατήριο μιλώντας (=επειδή μίλησε, αφού μίλησε, αλλά και με την ομιλία του και δια της ομιλίας του) για τις αρνητικές συνέπειες του φαινομένου.

Η λειτουργία της μορφής σε -οντας ως *απόλυτης*, από την άλλη, εμπλέκει σε μεγαλύτερο βαθμό πραγματολογικές παραμέτρους και αφορά, όπως διαφάνηκε, την έκφραση κατά βάση χρονικών σχέσεων (Κλαίρης et al 2005: 70, Haidou et al 2002, Tantalou 2004). Και εδώ η εφαρμογή του κριτηρίου της ερώτησης, η δυνατότητα ή μη εμφάνισης στο ίδιο εκφώνημα και άλλων επιρρηματικών ενδείξεων (26. 2), αλλά και η αντικατάσταση από δεδομένες εξαρτημένες προτάσεις συμβάλλει, μεταξύ άλλων, στην αποσαφήνιση της σημασιολογικής σχέσης που ο υπό εξέταση άκλιτος τύπος διατηρεί κάθε φορά με την υπόλοιπη πρόταση (25). Η ευελιξία του άλλωστε, σε συνδυασμό με τη θέση που καταλαμβάνει, αφήνει εδώ περιθώρια για περισσότερες ερμηνείες, δεδομένου ότι εμφανίζεται χωρίς προβλήματα με παρελθοντικούς και μη παρελθοντικούς ρηματικούς τύπους, δηλώνοντας, όμως, παράλληλα το ταυτόχρονο και σ' ορισμένες περιπτώσεις (26) και το προτερόχρονο (Tsimpli 2000: 138-139).

25.1. Ξανακοίταξα μερικά πρωινά την τζαμαρία, περνώντας από τη Φωκίωνος Νέγρη με το παπί. (ΕΘΕΓ, Σχολιαστικό άρθρο, Ξυδάκης Γ.Ν., "Η ζωή από το παράθυρο", *Καθημερινή*, 03/04/2005)

–Πότε; –Ενώ περνούσα, τη στιγμή που περνούσα από τη Φωκίωνος Νέγρη.

25.2. Παιζοντας και τρέχοντας (= όταν παίζουν και τρέχουν) αναπνέουν ταχύτερα από τους ενηλίκους, το δε επίπεδο εισόδου του αναπνευστικού τους συστήματος είναι πολύ πιο κοντά στη γη, από ό,τι των ενηλίκων. (ΕΘΕΓ, Σχολιαστικό άρθρο, Γιάνναρου Λ., "Νέφος: 60.000 θάνατοι ετησίως", *Καθημερινή*, 05/12/2005)

26.1. Ακούγοντας (= αφού άκουσε, επειδή άκουσε) αυτές τις νηφάλιες διαπιστώσεις του Γιαπωνέζου αξιωματούχου, συνάδελφος από πρώην κομμουνιστική χώρα της Ανατολικής Ευρώπης σχεδόν εξεμάνη. (ΕΘΕΓ, Σχολιαστικό άρθρο, Παπακωνσταντίνου Π., "Το ιστορικό στοίχημα Κίνας-Ιαπωνίας", *Καθημερινή*, 15/05/2005)

26.2. Μαθαίνοντας τα νέα (= όταν έμαθε, επειδή έμαθε), η μητέρα κατέρρευσε.

Αλλά: *Μαθαίνοντας τα νέα το 2000, η μητέρα κατέρρευσε το 2005.

Ωστόσο, η έκφραση του προτερόχρονου, την οποία επωμίζεται κατεξοχήν ο περιφραστικός τύπος (27), μπορεί να συνδέεται και με την ανάπτυξη αιτιολογικών ή υποθετικών σχέσεων (28), εφόσον τόσο η αιτία όσο και η υπόθεση προϋπάρχουν αναγκαστικά του αποτελέσματος (Moser 2006: 51-55).

27.1. Επιπροσθέτως, κατά τη διάρκεια της μακρόχρονης σταδιοδρομίας του, λειτούργησε σε σημαντικά πόστα στην αμερικανική κυβέρνηση έχοντας υπηρετήσει, με το βαθμό του υφυπουργού, στο υπουργείο Άμυνας κατά τη διάρκεια της προεδρίας του Μπίλ Κλίντον. (ΕΘΕΓ, Σχολιαστικό άρθρο, Κουλουμπής Θ., "Αντίδοτο στο δόγμα του προληπτικού πολέμου", *Καθημερινή*, 06/02/2006)

27.2. Κανείς όμως δεν μπόρεσε μέχρι σήμερα να δώσει μία απάντηση στα εκατομμύρια των επενδυτών που έζησαν για λίγο την απατηλή λάμψη της Σοφοκλέους, έχοντας γευτεί το μεγάλο πειρασμό της ζωής τους: «να επιζητήσουν το μέγιστο με το μικρότερο δυνατό κόστος». (ΕΘΕΓ, Σχολιαστικό άρθρο, Ντόκας Α., "Η απατηλή λάμψη της Σοφοκλέους", *Καθημερινή*, 06/02/2005)

28.1. Διαβάζοντας (= αφού διαβάσει κανείς, εάν διαβάσει) ένα τεύχος του «Σικάγο Ριβιού» αφιερωμένο στη γερμανική λογοτεχνία, για παράδειγμα, μαθαίνει κανείς τι απασχολεί τους τριαντάχρονους ή τους σαραντάχρονους Γερμανούς συγγραφείς σήμερα. (ΕΘΕΓ, Σχολιαστικό άρθρο, Μιχαλόπουλου Α., "Μεταφραστική πολιτική", *Καθημερινή*, 15/05/2005)

28.2. Ωστόσο, επειδή προσωπικά μου είναι αδύνατο, να αισθάνομαι ανακόλουθος με τα πιστεύω μου και σε όσα διεκήρυττα ως Τομεάρχης Εργασίας της Ν.Δ., προτίμησα να αποχωρήσω από την κυβέρνηση, μη θέλοντας (= επειδή δε θέλησα) να της δημιουργώ εγγενή προβλήματα από την αρχή

κιάλας του βίου της. ("Παραιτήθηκε ο υφυπουργός Εργασίας, Ν. Νικολόπουλος, στη θέση του ο Ν. Παναγιωτόπουλος", *Καθημερινή*, Πολιτική, 24/09/2012)

Τέλος, η έννοια της εξειδίκευσης αναδεικνύει και την κειμενική διάσταση της λειτουργίας του ρηματικού τύπου σε -οντας, όταν αυτός αφορά, όπως και οι υπόλοιποι δείκτες, «μεγαλύτερα τμήματα κειμένου, συνολικά θεωρουμένου» (Κλαίρης et al, 2005: 748), όταν, δηλαδή, εμφανίζεται ως κατά κανόνα εναρκτήριο στοιχείο (Γούτσος 2009: 762), προσδίδοντας στο κείμενο συνοχή και συνεκτικότητα. Αναφέρουμε, ενδεικτικά, τη δυνατότητά του να συμβάλλει στον εντοπισμό της ακριβούς θέσης κάθε μονάδας σε μια αλληλουχία (αρχή, μέση, τέλος), παραπέμποντας στην ουσία σε μια άλλη διάσταση του χρόνου, σ' «ένα δεύτερο χρόνο» (Halliday et al, 1976: 265), στο παρόν της επικοινωνιακής πράξης (29). Με τη βοήθεια αυτών των γλωσσικών μέσων εξασφαλίζεται, έτσι, η γραμμική ανάπτυξη και οργάνωση του κειμένου, ενώ παράλληλα καθίστανται γνωστές οι προθέσεις του ομιλού, ο οποίος άλλοτε ιεραρχεί απλώς τα δεδομένα του και άλλοτε προσκομίζει διαφορετικής φύσεως πληροφορίες, με στόχο την καλύτερη κατανόηση του μηνύματός του (29.5).

29.1. Θα το επιχειρήσουμε εμείς, *αρχίζοντας από τη σημειωτική* [...]. (ΣΕΚ³: Βιβλίο, κειμενικό είδος: Κοινωνικά-Οικονομικά-Πολιτικά, Ελλάδα)

29.2. *Ξεκινώντας από το Ιράκ*, δεν αντέχει κανείς στον πειρασμό να υπενθυμίσει ότι η Φαλούτζα «απελευθερώθηκε» για τρίτη φορά μέσα σε ενάμιση χρόνο –την πρώτη, ύστερα από το «Σοκ και Δέος» που κατέληξε στην ανατροπή του Σαντάμ, τη δεύτερη ύστερα από τον τερματισμό της μεγάλης εξέγερσης, τον περασμένο Απρίλιο– και ουδείς γνωρίζει πόσες φορές ακόμη θα χρειασθεί να «απελευθερωθεί» στο μέλλον. (ΕΘΕΓ, Σχολιαστικό άρθρο, Παπακωνσταντίνου Π., "Μ. Ανατολή: ρόδινο το μέλλον του πολέμου", *Καθημερινή*, 21/11/2004.)

29.3. Επομένως, *ολοκληρώνοντας*, Κύριε Πρόεδρε, καταγγέλλουμε [...]. (ΣΕΚ, Προφορικός λόγος, κειμενικό είδος: Δημόσιες Ομιλίες, Κύπρος)

29.4. *Τελειώνοντας*, χαίρομαι να πω ότι ο Γιώργος Κέντρος ήταν ένας μετρημένος, ψυχολογημένος, δραματικός, «επιστημονικός», στέρεα διαλεκτικός Φρόνιτ, που χάραξε μέσα στο έργο την αληθοφανέστερη –και δυσκολότερη– ερμηνευτική τροχιά. (ΕΘΕΓ, Σχολιαστικό άρθρο, Βερβέρης Γ., "Φρόνιτ, Γιούνγκ και Μπέκετ", *Καθημερινή*, 13/03/2005)

29.5. *Συμπεραίνοντας*, είναι απαραίτητο για τους παραπάνω λόγους, ώστε να αξιοποιηθεί η κτηθείσα πείρα και να προετοιμασθεί το ευρωπαϊκό σύστημα ελέγχου των συγκεντρώσεων για την αντιμετώπιση των προκλήσεων των επομένων ετών, να ξεκινήσει μια διαδικασία αναθεώρησης. (ΕΘΕΓ, Επίσημα, Αδιευκρίνιστο, "com2001_074501", *Ευρωπαϊκή Ένωση*, 11/12/2001)

4. Συμπεράσματα

Η συστηματική μελέτη της σχέσης που διατηρεί ο άκλιτος ρηματικός τύπος σε -οντας με τον πυρήνα του μηνύματος, η εξέταση, με άλλα λόγια, του βαθμού ενσωμάτωσής του στη δομή της πρότασης, οδηγεί με κάποια βεβαιότητα, σε συνδυασμό πάντοτε με την εφαρμογή και άλλων κριτηρίων, στη σκιαγράφηση των βασικών αξόνων της λειτουργίας του. Ωστόσο, τα ιδιαίτερα μορφολογικά και συντακτικά χαρακτηριστικά και η δυνατότητά του να καλύπτει ένα ευρύ φάσμα σημασιολογικών σχέσεων δημιουργούν συχνά προβλήματα κατά την ερμηνεία του, στην οποία υπεισέρχεται σ' ένα βαθμό και το υποκειμενικό στοιχείο.

Καθοριστική προς αυτήν την κατεύθυνση μπορεί να θεωρηθεί η συνεισφορά της έννοιας της *εξειδίκευσης*, καθώς συμβάλλει στη συγκεκριμενοποίηση των εξειδικευτικών επιρρηματικών πληροφοριών και στην ουσιαστικότερη κατανόηση των σημασιολογικών σχέσεων που αναπτύσσονται κάθε φορά σε δεδομένα γλωσσικά περιβάλλοντα. Έτσι, μέσα και από την κριτική προσέγγιση των διαφορετικών μορφών εξειδίκευσης, προκύπτει πως η χρήση του συγκεκριμένου γλωσσικού μέσου, παρόλο που "επιτρέπει ανάλογη ανάπτυξη της εξειδίκευσης με αυτήν που προσφέρει η εξαρτημένη πρόταση" (Κλαίρης et al: 744), συνδέεται στην πραγματικότητα με τη συνειδητή επιλογή του ομιλητή να καταφεύγει σε μια ρητή δήλωση της φύσης αυτών των εξειδικεύσεων. Ωστόσο, διαφάνηκε πως, παρόλο που η εγγενής πολυσημία του τύπου δυσχεραίνει αναπόφευκτα τη διαδικασία της ερμηνείας, η επιλογή του αφορά τελικά κυρίως τη δήλωση της έννοιας του χρόνου και του τρόπου ή του μέσου, στην ευρύτητά τους, χωρίς ν' αποκλείονται παράλληλα και άλλες επιμέρους σημασιολογικές αποχρώσεις.

³ Για το *Σώμα Ελληνικών Κειμένων* (www.sek.edu.gr), παραπέμπουμε και στο: Γούτσος, Διονύσης. 2003. «Σώμα Ελληνικών Κειμένων: Σχεδιασμός και υλοποίηση». Πρακτικά του 6^{ου} Διεθνούς Συνεδρίου Ελληνικής Γλωσσολογίας. Πανεπιστήμιο Κρήτης.

Σε κάθε περίπτωση, η συλλογή και επεξεργασία αυθεντικού γλωσσικού υλικού αποτελεί βασική προϋπόθεση για την περαιτέρω διερεύνηση της χρήσης και της ερμηνείας του κατά παράδοση μετοχικού τύπου σε διαφορετικά είδη κειμένου. Σε ευρεία κλίμακα, θα προσδιόριζε, με όρους επικοινωνιακούς, με μεγαλύτερη σαφήνεια τη συνεισφορά του στην ανάδειξη της πληροφοριακής αξίας του μηνύματος, προβάλλοντας συγχρόνως και τις υφολογικές του δυνατότητες, ενώ, σε μια δεύτερη φάση, θα συνέβαλε στην ανίχνευση της προθετικότητας του πομπού και στη σφαιρική προσέγγιση των μηχανισμών παραγωγής και κατανόησης τόσο του γραπτού όσο και του προφορικού λόγου.

ABSTRACT

Is it possible for genres to be conceived, taught and obtained in classroom? Are there specific, static and predetermined criteria to be used for genres? The purpose of this paper is to present the concerns raised regarding the identification and classification of genres. The presence of Description and Narration in 3rd Class Lyceum students' Argumentation essays determines the means of persuasion and modulates the quality of Argumentation in the texts.

Λέξεις κλειδιά: επιχειρηματολογία, κειμενικό είδος, Λύκειο, μαθητικά γραπτά, περιγραφή, αφήγηση

1. Εισαγωγή

Χαρακτηριστικό στοιχείο πολλών εκπαιδευτικών προγραμμάτων διεθνώς τα τελευταία χρόνια στάθηκε η διαμόρφωση του προσανατολισμού της γλωσσικής διδασκαλίας βάσει της θεωρίας των Κειμενικών Ειδών (Johns, 2002), η εφαρμογή των εκπαιδευτικών προεκτάσεων της οποίας φαινόταν να ευαγγελίζεται αποτελεσματική και δημιουργική γλωσσική ανάπτυξη των μαθητών με ενεργό συμμετοχή στη σχολική και ευρύτερη κοινωνία τους. Η συγκεκριμένη εκπαιδευτική ανακατεύθυνση προέκυψε ως συνέπεια μιας σειράς ερευνών στον τομέα της Κειμενικής ανάλυσης (de Beaugrand & Dressler, 1981) και της Διαδικασίας γραφής (Grabe & Kaplan, 1996) και των συνακόλουθων αλλαγών στην αντίληψη περί γλωσσικής επάρκειας και γλωσσικής διδασκαλίας.

Σε αντιστοιχία με αυτές τις εξελίξεις κινήθηκε και το ελληνικό εκπαιδευτικό σύστημα μεταβαίνοντας από τα γραμματικο-συντακτικά στα επικοινωνιακά και κειμενοκεντρικά μοντέλα διδασκαλίας. Τα κειμενικά είδη της περιγραφής, της αφήγησης και της επιχειρηματολογίας, ως διακριτά είδη λόγου σταθερής δομής και συγκεκριμένων κειμενικών χαρακτηριστικών, εντάχθηκαν στο πρόγραμμα γλωσσικής διδασκαλίας όλων των βαθμίδων, με αυτό της επιχειρηματολογίας να κυριαρχεί στις λυκειακές τάξεις τόσο στην επεξεργασία όσο και στην παραγωγή λόγου.

Δεδομένου του επικοινωνιακού και κειμενοκεντρικού προσανατολισμού της γλωσσικής διδασκαλίας στην ελληνική εκπαίδευση, αντικείμενο ενδιαφέροντος αποτέλεσε η 'ποιότητα' των παραγόμενων από τους μαθητές κειμενικών ειδών και συγκεκριμένα της επιχειρηματολογίας, ειδικά στην τελευταία τάξη της Δευτεροβάθμιας εκπαίδευσης. Θεωρήθηκε πως μία από τις παραμέτρους [αυτή που προσεγγίζεται στην παρούσα εργασία] που καθορίζουν την ποιότητα του παραγόμενου επιχειρηματολογικού λόγου είναι – σύμφωνα με τις εκπαιδευτικές συνισταμένες της θεωρίας των Κειμενικών Ειδών – η τήρηση των δομικών συστατικών μερών του κειμενικού είδους της επιχειρηματολογίας.

Ακολούθως παρουσιάζεται ο προσδιορισμός του κειμενικού είδους γενικά και του κειμενικού είδους του επιχειρήματος κατά τη Συστημική Λειτουργική Γραμματική (στο εξής ΣΛΓ) – λόγω αντιστοιχίας με την ελληνική διδακτική προσέγγιση-, ο τρόπος διδακτικής προσέγγισής του στην ελληνική Δευτεροβάθμια εκπαίδευση, καθώς και ο ρόλος που διαδραματίζουν κειμενικά στοιχεία περιγραφής και αφήγησης στην αποτελεσματικότητα και ακεραιότητα των δομικών συστατικών μερών του συγκεκριμένου κειμενικού είδους βάσει των ερευνητικών δεδομένων μας.

2. Κειμενικά είδη και το Κειμενικό Είδος του επιχειρήματος

Τα κειμενικά είδη γενικά συνιστούν υλική πραγμάτωση του λόγου, διαφορετικά είδη του οποίου πραγματώνονται σε διαφορετικούς τύπους κειμένων με διαφορετικές δομές, ανάλογους των κοινωνικών διαδικασιών και συμβάσεων τις οποίες αντανακλούν και υπηρετούν. Κάθε κειμενικό είδος αποτελεί ένα ειδικής μορφής πεδίο γνώσης και δράσης, το οποίο χαρακτηρίζεται από συγκεκριμένο θεματικό περιεχόμενο, ύφος και δομή (Bakhtin, 1986) που απορρέει και εγγράφει λειτουργίες, σκοπούς και νοήματα των κοινωνικών αναγκών και περιστάσεων βάσει των οποίων συγκροτείται.

Η έννοια του κειμενικού είδους αναπτύχθηκε βασικά στο πλαίσιο τριών θεωρητικών κατευθύνσεων με αντίστοιχες εκπαιδευτικές προεκτάσεις. Πρόκειται για τη Συστημική Λειτουργική Γραμματική (SFL), τη Νέα Ρητορική¹ και τη Διδακτική της Αγγλικής γλώσσας για ειδικούς σκοπούς (ESP)², καθεμιά από τις οποίες εστιάζει σε διαφορετικές πτυχές των λειτουργιών του κειμενικού είδους. Ακολουθώντας τις θεωρητικές παραδοχές και των τριών κατευθύνσεων θα μπορούσαμε να πούμε πως τα κειμενικά είδη είναι πραγμάτωση διαφορετικών ειδών λόγου, περιέχουν μορφές και έννοιες οι οποίες απορρέουν και εγγράφουν τις λειτουργίες, τους σκοπούς και τα νοήματα κοινωνικών περιστάσεων μιας κοινότητας σε μία δεδομένη ιστορική στιγμή (Μητσκοπούλου, 2006), υπηρετούν συγκεκριμένους και διακριτούς μεταξύ τους στόχους και εμφανίζουν σχετικά σταθερά, επαναλαμβανόμενα και αναγνωρίσιμα γλωσσικά μορφώματα.

Στο πλαίσιο της ΣΛΓ το κειμενικό είδος νοείται ως μία κοινωνική διαδικασία με πολιτισμικά και ιδεολογικά προσδιορισμένη κειμενική δομή, που χρησιμοποιείται για διάφορους σκοπούς σε διάφορα κειμενικά πλαίσια. Στην αυστραλιανή εκπαίδευση αποτέλεσε τον κύριο σκοπό του σχολικού προγράμματος και οδήγησε στην ανάπτυξη της εκπαίδευσης των κειμενικών ειδών (genre based education), βάσει ενός διπλού σκεπτικού: πρώτον ότι υπάρχει υψηλού βαθμού ομοιότητα μεταξύ γνωστικού αντικείμενου διδασκαλίας και κειμενικών ειδών παιδαγωγικού λόγου και δεύτερον ότι η εξοικείωση με κοινωνικές χρήσεις της γλώσσας μέσω των κειμενικών ειδών βοηθά στην αντιμετώπιση της κοινωνικής αδικίας. Με τη συγκεκριμένου είδους εκπαίδευση θεωρήθηκε ότι οι μαθητές ενδυναμώνονται όχι μόνο για τη σχολική, αλλά και τη μελλοντική κοινωνική επιτυχία τους και επιπλέον ότι αποκτούν δυνατότητα πρόσβασης σε συγκεκριμένους χώρους κοινωνικής επιρροής και εξουσίας χάρη στη γνώση ορισμένων κειμενικών ειδών.

Στο πλαίσιο, λοιπόν, της ΣΛΓ και σύμφωνα με τον ορισμό του Martin (1984:25) το κειμενικό είδος μπορεί να οριστεί ως μία *σταδιακή, σκόπιμη και στοχοθετημένη κοινωνική διαδικασία, η οποία λεκτικοποιείται με γλωσσικά κυρίως κείμενα και αναπαριστά σε αφαιρετικό επίπεδο τις γλωσσικές στρατηγικές που χρησιμοποιούνται για την πραγμάτωση ποικίλων ειδών κοινωνικών στόχων*.

Στην ευρύτερη κατηγορία των επιχειρηματολογικών κειμένων ανήκουν η *εξήγηση* και η *επιχειρηματολογία*, όπως ορίζονται από τους Knapp & Watkins (2005) και αντίστοιχα η *έκθεση* και η *εξήγηση*, όπως ορίζονται από τον Martin (1989). Αυτές οι δύο κατηγορίες παρουσιάζουν τις μεγαλύτερες αναλογίες με την σχολική άσκηση της Έκθεσης, όπως η τελευταία έχει διαμορφωθεί ως άσκηση παραγωγής λόγου στο Λύκειο και ως πανελλαδικώς εξεταζόμενο μάθημα, στο τμήμα που αφορά στην παραγωγή λόγου.

Η δομή του κειμενικού είδους του επιχειρήματος ποικίλει αναλόγως του σκοπού και του περιεχομένου. Διακριτικό χαρακτηριστικό του επιχειρήματος – σε όλες τις κειμενικές μορφές του – είναι μία άποψη ή πρόταση που ακολουθείται από ανάπτυξη και περιλαμβάνει αιτιολόγηση, αξιολόγηση και πειθώ. Στο σχολείο τα γραπτά επιχειρήματα εστιάζουν συνήθως σε δύο βασικούς τύπους, την *έκθεση* (exposition) και τη *συζήτηση* (discussion). Χαρακτηριστικό της *έκθεσης* είναι η ξεκάθαρη εστίαση στο σκοπό του επιχειρήματος, που δεν είναι άλλος από την παρουσίαση μιας άποψης και των συνοδευτικών στοιχείων στήριξής της. Τα δομικά στοιχεία της συνίστανται στη Θέση, το στάδιο των Επιχειρημάτων και το Συμπέρασμα.

Στους προχωρημένους συγγραφείς η ανάπτυξη της *Θέσης* ή η παρουσία υποστηρικτικών δηλώσεων δεν πραγματοποιείται στην ίδια με αυτή πρόταση, ενώ η συνθετότητα του σταδίου αυξάνει στην περίπτωση που εκτός από την άποψη του γράφοντος περιλαμβάνεται και *Προεπισκόπηση* (Preview) των υποστηρικτικών στοιχείων που θα χρησιμοποιηθούν, δομικό στοιχείο που συμβάλλει στην προετοιμασία και καθοδήγηση των αναγνωστών στα επιχειρήματα που ακολουθούν (Knapp & Watkins, 2005: 193).

Η *Θέση* ακολουθείται από το στάδιο των επιχειρημάτων, του οποίου η πολυπλοκότητα επηρεάζεται με την εξέλιξη των μαθητών στη συγγραφή επιχειρημάτων μέσω της αύξησης του αριθμού των υποστηρικτικών στοιχείων και του ποσοστού λεπτομερειών της ανάπτυξης (Knapp & Watkins, 2005: 192). Η πιθανή απουσία προσθετικών ή αιτιολογικών (causal connectives) συνδετικών εξισορροπείται

¹ Βλέπε σχετικά Freedman & Medway, 1994, Graff & Winn, 2006, Perelman, 1969, Tindale, 2006.

² Βλέπε σχετικά Swales, 1990, Bhatia, 1993.

μέσω της παρουσίασης των λογικών σχέσεων μεταξύ των υποστηρικτικών στοιχείων βάσει της σειράς των προτάσεων (Knapp & Watkins, 2005: 198). Διακριτικό γνώρισμα της ώριμης γραφής στο συγκεκριμένο στάδιο είναι η παρουσία αντεπιχειρημάτων ως ρητορικών μέσων κατεύθυνσης του αναγνώστη (Knapp & Watkins, 2005: 192). Το τελευταίο στάδιο της *έκθεσης* είναι η συμπερασματική δήλωση, κατά την οποία υπάρχει αναδιτύπωση της *Θέσης*, συνοδευόμενη από περίληψη στην περίπτωση των πιο σύνθετων κειμένων.

3. Η προσέγγιση του κειμενικού είδους της επιχειρηματολογίας στο Λύκειο

Η κατεύθυνση διδασκαλίας του γλωσσικού μαθήματος στο Λύκειο είναι επικοινωνιακή με έντονα τα στοιχεία της κειμενοκεντρικής προσέγγισης. Στις οδηγίες διδασκαλίας των φιλολογικών μαθημάτων στο Λύκειο (<http://www.pi-schools.gr/lessons/hellenic>, 2002) γίνεται λόγος για κείμενα που παρουσιάζουν συγκεκριμένη μορφή, εξυπηρετούν συγκεκριμένο στόχο, απευθύνονται σε συγκεκριμένο δέκτη και εντάσσονται σε συγκεκριμένο κοινωνικο-πολιτισμικό πλαίσιο. Η έμφαση που δίνεται στην καλλιέργεια τόσο του προφορικού όσο και του γραπτού λόγου καταδεικνύει την αναγνώριση της επικοινωνιακής λειτουργίας που υπηρετούν τα διάφορα κειμενικά είδη, εφόσον ο γραπτός και ο προφορικός λόγος συνιστούν βασικές εκφάνσεις της επικοινωνιακής διάστασης της γλώσσας (Κωστούλη, 2005). Η διαμόρφωση του γραπτού κειμένου δε νοείται σαν αποπλαισιωμένη διαδικασία (Clark & Ivanic, 1997), αλλά η παραγωγή του θεωρείται αποτελεσματική σε σχέση με ένα σύνολο δομικών και επικοινωνιακών συμβάσεων που προσδιορίζουν την έννοια της επικοινωνίας σε ένα συγκεκριμένο τύπο κειμένου (Bhatia, 1993).

Μέσα σε αυτό το πλαίσιο αντικείμενο μελέτης της ερευνητικής εργασίας αποτέλεσε συγκεκριμένα το κειμενικό είδος της επιχειρηματολογίας, όπως αυτό προσεγγίζεται στη Λυκειακή εκπαίδευση και όπως πραγματώνεται σε μαθητικά γραπτά της ίδιας βαθμίδας. Βασικός στόχος ήταν η διαπίστωση της ύπαρξης συνάφειας μεταξύ διδακτικών σκοπών/στόχων του γλωσσικού μαθήματος και υλικής πραγμάτωσης του αντικειμένου. Προκειμένου να καταστεί εφικτή η εξακρίβωση (ή μη) αυτής της συνάφειας, κρίνεται σκόπιμο να παρουσιαστεί σε αυτό το σημείο ο τρόπος προσέγγισης του συγκεκριμένου κειμενικού είδους στα εγχειρίδια γλωσσικής διδασκαλίας.

Το κειμενικό είδος της επιχειρηματολογίας διδάσκεται σε διακριτές ενότητες στα σχολικά εγχειρίδια της Α' και Γ' Λυκείου. Ο τύπος των στοιχείων και το είδος της ανάλυσης που καλλιεργείται στις δύο τάξεις κινείται σε διαφορετικά επίπεδα, με αυτά της Α' τάξης να περιστρέφονται κυρίως γύρω από στοιχεία γενικής οργάνωσης του λόγου και δομής και αυτά της Γ' τάξης να επικεντρώνονται στον τρόπο της λογικής οργάνωσης του περιεχομένου.

Συγκεκριμένα, στην Α' Λυκείου διδάσκεται η οργάνωση του λόγου στην πειθώ γενικά, στο επιχείρημα και στην αιτιολόγηση και τέλος παρουσιάζεται η οργάνωση της έκθεσης με αιτιολόγηση (Τσολάκης, κ.α., 2003:69-80). Οι μαθητές εισάγονται στην έννοια του επιχειρήματος με ένα απόσπασμα λόγου του Δημοσθένη, το οποίο παρουσιάζει αδρομερώς την τυπική δομή ενός επιχειρήματος, όπως αρθρώνεται στον αρχαιοελληνικό επιδεικτικό λόγο [απόφανση – διασάφηση και αιτιολόγηση – συμπέρασμα] (ό.π. σελ.70). Κέντρο της διδακτικής ενότητας αποτελεί ένα κείμενο για την αξία της γλωσσομάθειας, υπόδειγμα για την οργάνωση έκθεσης με αιτιολόγηση, ουσιαστικά εκτεταμένη πραγμάτωση του επιχειρηματολογικού δομικού σχήματος του λόγου του Δημοσθένη. Παράλληλα προτείνεται μία σειρά εργασιών για το σχολείο και το σπίτι, με ζητούμενο την παραγωγή διαφόρων τύπων κειμένου (διαφημιστικό φυλλάδιο, επιστολή), ενταγμένων σε συγκεκριμένο κάθε φορά επικοινωνιακό πλαίσιο, σύμφωνα και με τις οδηγίες των φιλολογικών μαθημάτων (<http://www.pi-schools.gr/lessons/hellenic>, 2002: 103) και απώτερο σκοπό την πειθώ. Η ανάθεση, άλλωστε, γραπτής εργασίας στο σπίτι θεωρείται απαραίτητη και μάλιστα υπό τη «μορφή επικοινωνιακού κειμένου, δηλαδή κειμένου που απευθύνεται σε συγκεκριμένο δέκτη, γράφεται για συγκεκριμένο σκοπό και παίρνει μία ορισμένη μορφή (ό.π., σελ. 105), έχει δηλαδή το κατάλληλο «ύφος» (ό.π., σελ. 108).

Στην Γ' τάξη η επιχειρηματολογία προσεγγίζεται σύμφωνα με τις αρχές της Λογικής και της Φιλοσοφίας. Παρουσιάζονται οι μέθοδοι πειθούς (επίκληση στη λογική, στο συναίσθημα, στην αυθεντία, στο ήθος του πομπού και επίθεση στο ήθος του αντιπάλου) και τα μέσα πειθούς (παραδείγματα, στατιστικά στοιχεία, αυθεντίες, έρευνα, αλήθειες). Δίνεται, επίσης, ο ορισμός του συλλογισμού και η διάκριση των συλλογισμών ως προς τον αριθμό των προκειμένων προτάσεων (άμεσοι, έμμεσοι), το είδος της συλλογιστικής πορείας (παραγωγικοί, επαγωγικοί, αναλογικοί) και ως προς τη μορφή (κατηγορικοί, υποθετικοί, διαζευκτικοί). Ιδιαίτερη έμφαση δίνεται στη διάκριση των ειδών του επαγωγικού συλλογισμού (τέλεια και ατελής επαγωγή, επαγωγή με γενίκευση, με αίτιο αποτέλεσμα και αναλογία). Ακόμη, παρατίθενται στοιχεία ελέγχου επάρκειας και αξιοπιστίας των συλλογισμών (κριτήρια εγκυρότητας, αλήθειας, ορθότητας), ενώ γίνεται λόγος και για τους

παραλογισμούς, δηλαδή για επιχειρήματα που φτάνουν στο συμπέρασμα με λογικό άλμα από τις προκειμένες.

Στα συνοδευτικά του κεφαλαίου κείμενα ζητείται από τους μαθητές ο εντοπισμός και η αξιολόγηση επιχειρημάτων, η ανίχνευση των τρόπων πειθούς σε κείμενα φιλοσοφικά, διαφημιστικά, πολιτικά, επιστημονικά και η αναζήτηση αντίθετων θέσεων στα υπό διαπραγμάτευση ζητήματα. Τα προτεινόμενα για συζήτηση και έκθεση-έκφραση θέματα περιστρέφονται γύρω από την τεκμηριωμένη υποστήριξη ή απόρριψη μίας θέσης.

Από τα παραπάνω γίνεται σαφές πως στην Α' και Γ' τάξη οι μαθητές/μαθήτριες έρχονται σε επαφή με το κειμενικό είδος της επιχειρηματολογίας και με τις θεμελιώδεις γνώσεις της μορφικής, δομικής και λογικής οργάνωσης του είδους. Πρέπει, ωστόσο, να σημειωθεί πως τόσο στο κείμενο για την αξία της γλωσσομάθειας στην Α' όσο και σε όλα τα κείμενα του εγχειριδίου της Γ' η αποδόμηση των κειμενικών χαρακτηριστικών έγκειται στην επεξεργασία που υφίστανται τα κείμενα μέσα στην τάξη. Αυτό προβλέπεται και στις οδηγίες διδασκαλίας των φιλολογικών μαθημάτων, όπου αναφέρεται πως «θα παρουσιάζεται στους μαθητές (προφορικά ή γραπτά) από το διδάσκοντα ένας ενδεικτικός τρόπος σύνταξης του συγκεκριμένου είδους κειμένου» (ό.π., σελ. 104). Πέρα, λοιπόν, από την παρουσίαση του θεωρητικού πλαισίου της επιχειρηματολογίας, δεν υπάρχει για κάποιο κείμενο ενδεικτικό σχεδιάγραμμα της ανάπτυξης και άρθρωσης των επιχειρημάτων, των συλλογισμών και των μέσων πειθούς που χρησιμοποιούνται, ούτε και αντίστροφα, επιχειρήματα, τεκμήρια [στοιχεία που αναφέρονται σε ορισμένη εμπειρία: παραδείγματα, αλήθειες, γεγονότα, στατιστικά/επιστημονικά στοιχεία, εξακριβωμένα και επεξεργασμένα (Τσολάκης, κ.α., 2003: σσ.12,20)] και συλλογισμοί που να συνέχονται ενδεικτικά σε ένα επικοινωνιακά αποτελεσματικό κείμενο πειθούς.

Πίνακας 1 Δομικά μέρη επιχειρηματολογίας

Από την παρουσίαση των δομικών συστατικών μερών του κειμενικού είδους της έκθεσης που έγινε στην προηγούμενη ενότητα και της αντίστοιχης διδακτικής προσέγγισής του στο ελληνικό εκπαιδευτικό σύστημα, καθίσταται προφανής η σαφής και συγκεκριμένη σύστασή του, στην οποία δε συμπεριλαμβάνονται γνωρίσματα άλλων κειμενικών ειδών, όπως της περιγραφής ή της αφήγησης. Ωστόσο, από τη μελέτη των μαθητικών γραπτών που συλλέχθηκαν στο πλαίσιο ευρύτερης έρευνάς μας, εντοπίστηκαν χαρακτηριστικά του περιγραφικού και αφηγηματικού λόγου³. Το ερευνητικό πλαίσιο και τα συναφή ερευνητικά ευρήματα παρουσιάζονται στην ενότητα που ακολουθεί.

4. Έρευνα - ανάπτυξη επιχειρηματολογίας σε μαθητικά γραπτά

Στο πλαίσιο ευρύτερης δοκιμασίας διερεύνησης και αξιολόγησης δεξιοτήτων επιχειρηματολογίας στην οποία συμμετείχαν μαθητές Γ' τάξης όλων των Ενιαίων Λυκείων της πόλης του Βόλου, ζητήθηκε μεταξύ άλλων από τους/τις μαθητές/μαθήτριες να παραγάγουν δύο κείμενα, ένα που σχετιζόταν με την καθημερινή διαβίωση στην πόλη και ένα που αφορούσε στη σχολική ζωή. Η επιλογή των δύο κατευθύνσεων δεν ήταν τυχαία, καθώς έχει αποδειχθεί πως ζητήματα που αποτελούν αντικείμενο άμεσου ενδιαφέροντος ή στοιχείο της καθημερινότητας που βιώνεται κινητοποιούν ισχυρότερα τα άτομα, ώστε να πάρουν θέση σχετικά με αυτά (Van Eemeren, et al. 1996).

Για το πρώτο κείμενο αφορμή αποτέλεσε η τοποθέτηση από τη δημοτική αρχή κορυνών σε όλους τους κεντρικούς δρόμους της πόλης του Βόλου και ο χωρισμός τους σε δύο λωρίδες κυκλοφορίας.

³ Κειμενικά γνωρίσματα Περιγραφής: αναπαράσταση με λόγο γεγονότος, ενέργειας, κατάστασης, προσώπου, πράγματος, στατικού ή σε εξέλιξη (Τσολάκης, κ.α., 2003, Α', σελ. 140). Κατεξοχήν χρήση Ενεστώτα, συνδετικών ρημάτων (είμαι, έχω), επιθέτων, καθώς και χρονικών και τοπικών επιρρηματικών φράσεων (Knapp & Watkins, 2005: 98κεξ). Κειμενικά γνωρίσματα Αφήγησης: παρουσίαση σειράς πραγματικών ή πλασματικών γεγονότων, πληροφορίες σχετικά με τόπο, χρόνο, πρόσωπα, πιθανά αίτια και αποτελέσματα συμβάντος (Τσολάκης, κ.α., 2003, Α', σσ. 210, 259). Χρήση ιστορικών χρόνων και χρονικών συνδέσμων (Knapp & Watkins, 2005: 221κεξ).

Καθώς η συγκεκριμένη ενέργεια είχε απασχολήσει ιδιαίτερα τον έντυπο και ραδιοτηλεοπτικό τοπικό τύπο και συνεπώς οι μαθητές είχαν εκτεθεί σε συναφή επιχειρηματολογία είτε υπέρ είτε κατά και, επιπλέον, επειδή κινούμενοι καθημερινά μέσα στην πόλη βίωναν αναπόφευκτα τη συγκεκριμένη κατάσταση, αναμενόταν να επιχειρηματολογήσουν με μεγαλύτερη άνεση για το θέμα. Για το δεύτερο κείμενο σημείο εκκίνησης αποτέλεσαν οι πενήμερες εκδρομές που πραγματοποιούνται στην Γ' τάξη Λυκείου. Η σύνδεση του θέματος με τη σχολική ζωή και μάλιστα με την τάξη στην οποία φοιτούσαν οι μαθητές, αναμενόταν να ενεργοποιήσει ευκολότερα την επιχειρηματολογία τους.

Συγκεκριμένα ζητήθηκε από τους μαθητές να γράψουν ένα σύντομο κείμενο (200 περίπου λέξεων) για τη στήλη «Το βήμα του πολίτη» της τοπικής εφημερίδας «Θεσσαλία», η οποία είναι ανοιχτή για όλα τα θέματα που αφορούν στην τοπική κοινωνία, και μία επιστολή (250 περίπου λέξεων) προς τον Υπουργό Παιδείας, με την οποία θα εισηγούνται την κατάργηση των πενήμερων εκδρομών, υποδύομενοι το ρόλο του γονέα. Η συσχέτιση και των δύο θεμάτων με τη βιούμενη πραγματικότητα κατέστησε αναμενόμενη την αξιοποίηση γεγονότων, συμβάντων και περιγραφών ως μέσων τεκμηρίωσης της υιοθετούμενης στάσης, ακόμη και για τη δεύτερη περίπτωση που είναι αντίθετη στις προτιμήσεις της πλειοψηφίας των μαθητών. Ένας, λοιπόν, από τους στόχους της ανάλυσης των μαθητικών γραπτών υπήρξε η διερεύνηση του τρόπου άρθρωσης του κειμενικού είδους της επιχειρηματολογίας σε συνάρτηση με την παρουσία σε αυτό και άλλων κειμενικών ειδών, και συγκεκριμένα της περιγραφής και της αφήγησης.

Στα 222 γραπτά που συγκεντρώθηκαν εντοπίζεται διαφορετικός βαθμός εμφάνισης, αξιοποίησης και ενσωμάτωσης στοιχείων περιγραφής και αφήγησης στη λογική οργάνωσή τους, γεγονός που επηρεάζει ανάλογα την αποτελεσματικότητα των κειμένων. Στη συνέχεια παρουσιάζονται ενδεικτικά κάποια γραπτά, χαρακτηριστικά της επίδρασης που έχουν τα περιγραφικά και αφηγηματικά κειμενικά στοιχεία στα λειτουργικά και δομικά γνωρίσματα του κειμενικού είδους της επιχειρηματολογίας.

6.Γ2/6⁴ «[...]Ένα από τα προβλήματα που σε αρκετά σημαντικό βαθμό **αποτελεί** πρόσκομμα για την **ομαλή** ροή της καθημερινότητας στην πόλη του Βόλου είναι το κυκλοφοριακό πρόβλημα. [...]

Με την τοποθέτηση των κορινών στην πόλη του Βόλου, οι δρόμοι **μίκρυναν** ακόμη πιο πολύ, τα αυτοκίνητα **αδυνατούν** να βρουν διέξοδο σε περίπτωση ανάγκης, **διαδίδεται** πανικός, **δημιουργείται** ηχορύπανση και **δεν επιτυγχάνεται η ομαλή ροή** της καθημερινότητας. Στις περισσότερες περιπτώσεις τέλος οι κορίνες **καταπατώνται** δημιουργώντας την αίσθηση πως στους κεντρικούς δρόμους του Βόλου **επικρατεί ο νόμος της ζούγκλας**. Συνεπώς απαιτείται η κατάργηση των κορινών για την επαναφορά της ηρεμίας και της ομαλής λειτουργίας της πόλης μας».

Στο γραπτό 6.Γ2/6 η αξιοποίηση των στοιχείων της περιγραφής γίνεται καθαρά σωρευτικά με παρατακτική παράθεση των τεκμηρίων που αποδίδουν την πραγματικότητα. Η σύνδεση τους είναι πολύ χαλαρή, καθώς δεν υπάρχουν καν διαρθρωτικές συμπλεκτικές λέξεις ή εκφράσεις, παρά μόνο κόμματα. Αξίζει, βέβαια, να επισημανθεί πως η παράθεση των στοιχείων είναι μεν σωρευτική, ωστόσο κλιμακωτή, καθώς νοηματικά η μία κατάσταση φαίνεται να προκαλεί την άλλη: μικρότεροι δρόμοι → αυτοκίνητα δεν βρίσκουν διέξοδο → σε περίπτωση ανάγκης δημιουργείται πανικός → προκαλείται ηχορύπανση → δεν επιτυγχάνεται ομαλή ροή της καθημερινότητας → αίσθηση πως επικρατεί ο νόμος της ζούγκλας. Η συνάφεια των στοιχείων της περιγραφής με το θέμα εξαρτάται από τη νοηματική αντίθεση που λανθάνει μεταξύ της πρώτης και δεύτερης παραγράφου, καθώς η περιγραφή έρχεται να αποδείξει γιατί η υιοθέτηση του μέτρου είναι απορριπτέα, χωρίς, όμως, να χρησιμοποιείται ένας αντίστοιχος αιτιολογικός αρθρωτής. Επίσης, ο υποστηρικτικός της θέσης ρόλος που διαδραματίζει η περιγραφή επιβεβαιώνεται από τη ληκτική περίοδο του κειμένου, που λειτουργεί ως συμπέρασμα (Συνεπώς) των όσων έχουν ειπωθεί.

3.Γ2/4

«Τον τελευταίο χρόνο στην πόλη του Βόλου έχουν τοποθετηθεί κορίνες σ' όλους τους κεντρικούς δρόμους της πόλης μας. Παρά το η κίνηση αυτή είχε ως στόχο τη διευκόλυνση της κυκλοφορίας τα αποτελέσματα της ήταν ακριβώς αντίθετα.

⁴ Τα μαθητικά γραπτά είναι καταχωρημένα βάσει αλφαριθμητικού προτύπου (π.χ. 1. Γ1/ 4), από το οποίο ο πρώτος αριθμός αντιστοιχεί στο Λύκειο, το Γχ στο τμήμα του Λυκείου και ο αριθμός μετά την κάθετο στον αριθμό του μαθητή – μαθήτριας υποκειμένου. Σημειώνεται πως ακολουθείται η ορθογραφία και η στίξη των μαθητών/τριών.

Πρώτον, οι κορύνες **εμποδίζουν** την **απρόσκοπτη** μετακίνηση των μέσων μαζικής μεταφοράς. Η στενότητα αρκετών δρόμων **αναγκάζει** αρκετά λεωφορεία να προσκρούουν στις κορύνες με αποτέλεσμα την δημιουργία υλικών ζημιών καθώς και αναστάτωσης στους επιβάτες.

Επιπροσθέτως, η τοποθέτηση τους **εμποδίζει** το **συνεχή** ανεφοδιασμό των εμπορικών καταστημάτων, αφού τα φορτηγά που **διακινούν** εμπορεύματα **κωλύονται να σταματήσουν**.

Ακόμη, **εντείνεται** ο κίνδυνος πρόκλησης ατυχημάτων, διότι οι οδηγοί **αναγκάζονται** να κάνουν **επικίνδυνες μανούβρες**, όταν θέλουν να αλλάξουν ρεύμα κυκλοφορίας, προκειμένου να τις αποφύγουν.

Προσωπικά, όμως και η πλειοψηφία των συμπολιτών μου, πιστεύω ότι οι κορύνες πρέπει να απομακρυνθούν, αφού δισχεραίνουν παρά διευκολύνουν την καθημερινή ζωή στην πόλη μας».

Στο 3.Γ2/4 η ανάπτυξη του κειμένου περιστρέφεται γύρω από την ανατροπή του αντιεπιχειρήματος των δεδομένων του θέματος, το οποίο διατυπώνεται από τον ίδιο τον γράφοντα στην αρχή. Στόχος του είναι να πείσει πως με το νέο μέτρο το κυκλοφοριακό πρόβλημα στην πόλη δεν λύθηκε, αλλά έγινε εντονότερο. Η περιγραφή αφορά σε τρεις παραμέτρους του ζητήματος που λειτουργούν αθροιστικά ως προς την απόδειξη της θέσης. Το σημαντικό στην προκειμένη περίπτωση είναι πως τα τεκμήρια, δηλαδή το περιγραφικό μέρος του κειμένου, συνδέονται μεταξύ τους (πρώτον, επιπροσθέτως, ακόμη) και όλα μαζί με τη θέση που υποστηρίζεται ενισχύοντας τη βασιμότητά της. Πρέπει, βέβαια, να σημειωθεί πως και σ' αυτό το γραπτό, όπως και στο προηγούμενο, δεν υπάρχουν αιτιολογικοί σύνδεσμοι ή άλλου τέτοιου είδους αρθρωτές. Ενδιαφέρον είναι πως στη δομή του συγκεκριμένου γραπτού λανθάνει ένας συλλογισμός:

- Η τοποθέτηση κορνών στόχευε στη διευκόλυνση της κυκλοφορίας.
- Αποτελέσματα τοποθέτησης: εμποδίζεται η κίνηση των μέσων μαζικής μεταφοράς, εμποδίζεται ο ανεφοδιασμός των καταστημάτων, υπάρχει κίνδυνος πρόκλησης ατυχημάτων.
- Τα αποτελέσματα δεν διευκόλυναν την κυκλοφορία.

Άρα, η τοποθέτηση των κορνών δεν διευκόλυνε την κυκλοφορία.

Τα δεδομένα – τεκμήρια που διασφαλίζει η περιγραφή έχουν ενταχθεί σε μία ομαδοποιημένη κατηγορία («αποτελέσματα»), γεγονός που καθοδηγεί ξεκάθαρα τον αναγνώστη και τον βοηθά να αντιληφθεί το ρόλο που διαδραματίζουν στην απόδειξη της θέσης, πολύ περισσότερο απ' ό,τι αν χρησιμοποιούνται απλώς οι συνδετικές λέξεις (πρώτον, επιπροσθέτως, ακόμη).

7.Γ2/12

«Κύριε Συντάκτη,

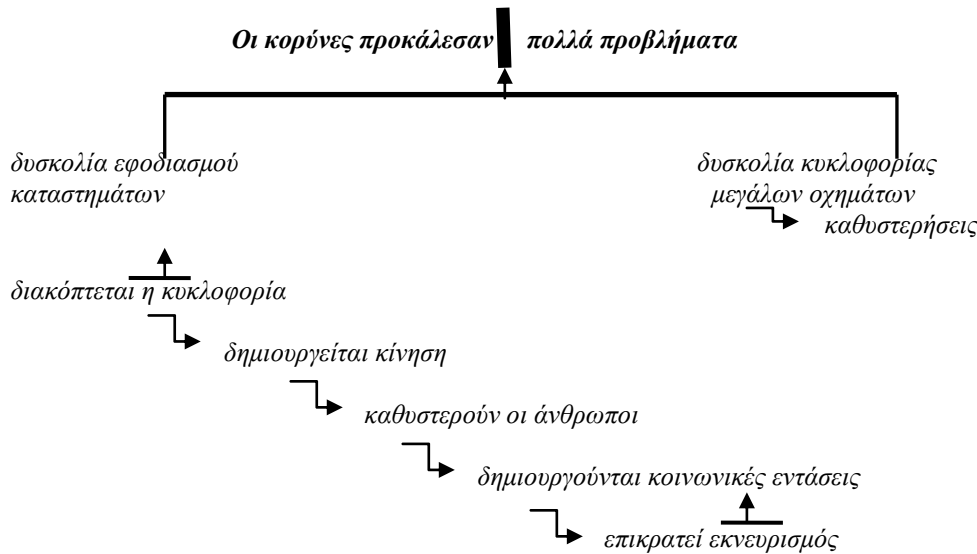

Εδώ και ένα χρόνο στην πόλη μας έχουν τοποθετηθεί κορύνες σε όλους τους κεντρικούς δρόμους, οι οποίες έχουν προκαλέσει ποικίλες αντιδράσεις. Μέσω της επιστολής αυτής θα ήθελα να σας εκθέσω την άποψή μου για το θέμα.

Η τοποθέτηση των κορνών στους δρόμους είχε ως αποτέλεσμα τη δημιουργία πολλών προβλημάτων. Αρχικά, τα καταστήματα της πόλης που βρίσκονται στους κεντρικούς δρόμους, **δεν μπορούν πλέον να εφοδιάζονται ελεύθερα** με τα εμπορεύματά τους, καθώς **διακόπτεται** η κυκλοφορία με αποτέλεσμα να **δημιουργείται** 'κίνηση' στο δρόμο, η οποία όχι μόνο **καθυστερεί** τους ανθρώπους, αλλά **δημιουργεί** και κοινωνικές εντάσεις, καθώς **επικρατεί** ο εκνευρισμός. Επιπλέον, τα μεγάλα σε όγκο οχήματα, όπως είναι τα λεωφορεία και τα φορτηγά, **δυσκολεύονται να κυκλοφορήσουν** μέσα στην πόλη, προκαλώντας καθυστερήσεις. Για τους παραπάνω λόγους, λοιπόν, ίσως θα ήταν προτιμότερο να καταργηθούν οι κορύνες, οι οποίες τοποθετήθηκαν για να λύσουν το πρόβλημα που προκαλούσαν τα σταθμευμένα αυτοκίνητα. Αντί των κορνών ο δήμος θα μπορούσε να αυξήσει την αστυνομική επιτήρηση, ώστε να λυθεί το πρόβλημα.

Σας ευχαριστώ πολύ».

Η αποδεικτική αξία του γραπτού 7.Γ2/12 διαφοροποιείται από τα προηγούμενα στο ότι τα στοιχεία της περιγραφής μετασχηματίζονται και ενσωματώνονται με τέτοιο τρόπο στο κείμενο, ώστε η παρουσία τους είναι σχεδόν μη ανιχνεύσιμη ως διακριτού είδους. Έτσι, ενώ ουσιαστικά χρησιμοποιούνται τα ίδια μέσα πειθούς με τα άλλα γραπτά, το κείμενο καθίσταται πιο αποτελεσματικό επιχειρηματολογικά, γιατί η περιγραφή αξιοποιείται ως βάση-εγγυητής των επιχειρημάτων (Toulmin, 2003). Η διαφορά, συνεπώς, έγκειται τόσο στη διατύπωση όσο και στη αξιοποίηση της περιγραφής, αφού δε χρησιμοποιείται πρωτογενώς και σε απευθείας σύνδεση με την απόφαση του γράφοντος, αλλά δευτερογενώς για διασάφηση και στήριξη των επιχειρημάτων. Διαμορφώνεται, έτσι, ένα πλέγμα τόσο σύνθετο, ώστε τα δεδομένα συνδέονται μεταξύ τους με σχέσεις αιτίου και αιτιατού, αποτελώντας ταυτόχρονα επιχείρημα και βάση στήριξης άλλων επιχειρημάτων, ενώ παράλληλα εξαντλούν το

σύνολο των αιτιολογικών ερωτημάτων (γιατί;) που θα μπορούσαν να τεθούν για την αμφισβήτηση της υποστηριζόμενης θέσης και συμβάλλουν έτσι στην εξασφάλιση της βέβαιης ισχύος της. Αν θέλαμε να αποδώσουμε εικονιστικά τη σχέση απόφασης και υποστηρικτικών στοιχείων, θα ήταν ως εξής:

Σχήμα 1 Γραπτό 7. Γ2/ 1

5.Γ1/15

Κύριε Υπουργέ,

[...]

Όλη η Ελλάδα είχε θρηνήσει όταν έγινε εκείνο το θλιβερό ατύχημα στα Τέμπη πριν από πέντε χρόνια. Οι πληγές των οικογενειών αυτών είναι ακόμη νωπές και θεωρώ πως όλη η κοινωνία είναι ακόμη σοκαρισμένη. Θα ήθελα λοιπόν να σημειώσω πως σε πολλούς άπειρους οδηγούς έχει ανατεθεί η οδήγηση μαθητικών λεωφορείων διακινδυνεύοντας και οι ίδιοι οι οδηγοί τις ζωές τους. Επίσης, οι μαθητές με μεγάλη έλλειψη επιτήρησης ξεφεύγουν από τα όρια και κάνουν απερισκεψίες που μπορούν να τους κοστίσουν τη ζωή. Επιπρόσθετα, οι χρηματικές δαπάνες με τις οποίες επιβαρύνεται η οικογένεια για να πάει το παιδί σε μια τέτοια εκδρομή είναι μεγάλες, και αλοίμονο, δεν έχουν όλες οι οικογένειες οικονομική ευχέρεια τέτοιου μεγέθους. Τέλος, θα ήθελα να τονίσω την ψυχολογική πίεση που δεχόμαστε εμείς οι γονείς, καθώς έχουμε μεγάλη ανησυχία για την ασφάλεια των παιδιών μας.[...]

5.Γ2/9

Αξιότιμε Κ. Υπουργέ,

με την παρούσα επιστολή θα ήθελα να σας ευαισθητοποιήσω σχετικά με τις πενήνήμερες εκδρομές που γίνονται στην Γ' τάξη του Λυκείου και με την προσέγγισή μου στοχεύω να σας μεταλαμπαδεύσω τις απόψεις μου πάνω σε αυτό το σοβαρό ζήτημα.

Είμαι γονέας 17χρονου μαθητή και συνεχώς δέχομαι πιέσεις από το παιδί μου για την πενήνμερη εκδρομή. Οι εκδρομές αυτές θεωρούνται εκπαιδευτικές πράγμα το οποίο είναι άκρως αναληθές. Από γονείς παιδιών παλαιότερων χρονιών πληροφορήθηκα για τα αισχρά πράγματα που γίνονται στις εκδρομές αυτές. Κάθε βράδυ οι μαθητές αφού «ξεσάλωναν» σε νυχτερινά κέντρα, μπουζούκια, «μπαρ» και «κλαμπ», εντελώς κουρασμένοι κοιμούνταν λίγο ή και καθόλου και δεν μπορούσαν να αποδώσουν στα μαθητικά τους καθήκοντα όταν επέστρεφαν από την εκδρομή.

Επίσης, οι μαθητές ξεπερνάν σε αριθμό τους πενήντα και οι καθηγητές που είναι υπεύθυνοι στην εκδρομή είναι το πολύ τρεις. [...]Ακόμα, στις πενήνήμερες αυτές εκδρομές η ελλειπής επίβλεψη ωθεί τους μαθητές σε καταχρήσεις όπως το αλκοόλ, κάπνισμα και πολλά άλλα.

Σε τελική ανάλυση, οι μαθητές ζημιώνονται σε μεγάλο βαθμό και βγαίνουν από το ρυθμό και τη ροή των μαθημάτων τους, με τις εκδρομές αυτές, με αποτέλεσμα να αποτυχαίνουν στις εξετάσεις τους. Έτσι, με όλο το θάρρος σας ζητώ να περιορίσετε ή και να καταργήσετε τέτοιου είδους εκδρομές. Έτσι στο τέλος να έχουμε λαμπρούς νέους να υποδεχτούνε τις θέσεις μας μέσα στην κοινωνία.

Με εκτίμηση,

B. Ξ.

Στα γραπτά 5.Γ1/15 και 5.Γ2/9 εκτός από τα περιγραφικά μέρη υπάρχουν και αφηγηματικά (*Όλη η Ελλάδα είχε θρηνήσει όταν έγινε εκείνο το θλιβερό ατύχημα στα Τέμπη πριν από πέντε χρόνια. Κάθε βράδυ οι μαθητές αφού «ξεσάλωναν ... όταν επέστρεφαν από την εκδρομή*). Ενδιαφέρον σ' αυτές τις περιπτώσεις είναι ότι η αφήγηση επιδρά στη λογική οργάνωση των κειμένων υπηρετώντας ένα διαφορετικό είδος πειθούς απ' ό,τι η περιγραφή. Ενώ, δηλαδή, η περιγραφή φαίνεται σχεδόν συστηματικά να εξασφαλίζει το είδος των τεκμηρίων που είναι απαραίτητα για την επίκληση στη λογική, η αφήγηση μέσα στα επιχειρηματολογικά κείμενα διαμορφώνει την επίκληση στο συναίσθημα, εφόσον επιτυγχάνει τη σύζευξη μίας άμεσης (προσωπικής ή κοινής) εμπειρίας όχι απλά με την απόδειξη μίας θέσης (*σε πολλούς άπειρους οδηγούς έχει ανατεθεί η οδήγηση μαθητικών λεωφορείων. Οι εκδρομές αυτές θεωρούνται εκπαιδευτικές πράγμα το οποίο είναι άκρως αναληθές*), αλλά και με τη συνακόλουθη ευθύνη που θα συνεπαγόταν η μη υλοποίηση των απαραίτητων για το ζήτημα ενεργειών.

5. Συμπεράσματα – συζήτηση

Στόχος των μαθητών/τριών, σύμφωνα και με απαιτήσεις των θεμάτων στα οποία καλούνταν να ανταποκριθούν, ήταν η σύνταξη δύο σύντομων κειμένων με σκοπό την πειθώ. Στο πλαίσιο της παρούσας παρουσίας τα γραπτά δεν αξιολογήθηκαν συνολικά ως προς το σκοπό τους, αλλά μόνο ως προς μία πτυχή, την παρουσία και το ρόλο γλωσσικών στοιχείων κειμενικών ειδών διαφορετικών της επιχειρηματολογίας και συγκεκριμένα της περιγραφής και της αφήγησης.

Σύμφωνα, λοιπόν, με αυτό το τελευταίο κριτήριο διαπιστώνεται πως τα κείμενα επιχειρηματολογίας που παρήγαγαν οι μαθητές δεν είναι αμιγή ως προς τα συνθετικά μέρη τους, αλλά εμφανίζονται ως πολυγενετικά. Ενώ ακολουθούν το τυπικό δομικό σχήμα των επιχειρηματολογικών κειμένων: θέση → επιχειρήματα (υπέρ ή κατά) → συμπέρασμα (Macken – Horarik, 2002, Knapp & Watkins, 2005), στο τμήμα των επιχειρημάτων εμφανίζονται σε μεγάλο βαθμό στοιχεία περιγραφής και αφήγησης ως τεκμήρια των υποστηριζόμενων θέσεων. Η παρουσία των κειμενικών χαρακτηριστικών της περιγραφής και της αφήγησης επηρεάζει την 'ποιότητα' των επιχειρηματολογικών κειμένων, εφόσον με την ένταξή τους σε ευρύτερα επιχειρηματολογικά σχήματα -που δηλώνονται καθαρά με αιτιολογικούς αρθρωτές- διαδραματίζουν το ρόλο της γλωσσικής διερμηνείας των γραφομένων, λειτουργούν δηλαδή ως ανάπτυξη και τεκμηρίωση των επιχειρημάτων. Μάλιστα, στα «πιο επιχειρηματολογικά» γραπτά αυτά τα στοιχεία δεν παρατίθενται παρατακτικά και ασύνδετα, αλλά εμπλέκονται με το υπόλοιπο κείμενο σε τέτοιο βαθμό που η αποδόμησή τους ως μη επιχειρηματολογικών κειμενικών γνωρισμάτων είναι δύσκολη. Από άποψη λογικής οργάνωσης εξασφαλίζουν, στην περίπτωση της περιγραφής, αδιαμφισβήτητα στοιχεία (τεκμήρια) για την ενίσχυση των επιχειρημάτων και στην περίπτωση της αφήγησης μέσα συναισθηματικού επηρεασμού του δέκτη, συνιστώντας ουσιαστικά δύο διαφορετικούς τρόπους πειθούς, την επίκληση στη λογική και την επίκληση στο συναίσθημα αντίστοιχα.

Παρά την αντιστοιχία των διδακτικών στόχων του γλωσσικού μαθήματος για το κειμενικό είδος της επιχειρηματολογίας και της κειμενικής πραγμάτωσής του ως προς τα δομικά συστατικά μέρη από τους μαθητές, η συστηματική παρουσία στα μαθητικά επιχειρηματολογικά κείμενα κειμενικών γνωρισμάτων της περιγραφής και της αφήγησης θέτει υπό αμφισβήτηση την μέχρι τώρα διδασκαλία τους –σε ελληνικό και διεθνές επίπεδο- ως διακριτών κειμενικών ειδών. Η παρουσία κειμενικών γνωρισμάτων άλλων κειμενικών ειδών σε αυτό της επιχειρηματολογίας δεν αίρει την αποτελεσματικότητά της, αλλά φαίνεται να την ενισχύει, ενώ ο επικοινωνιακός σκοπός, η πειθώ, είναι τελικά αυτός που καθορίζει τις γλωσσικές και ευρύτερες κειμενικές επιλογές.

Πανεπιστήμιο Αθηνών, Ελλάδα
npantel@phil.uoa.gr

ABSTRACT

The aim of the present paper is to reexamine the overall issue of one of the major Proto-Greek (or “Pan-Hellenic”) sound changes, namely the loss of intervocalic /s/ (through the intermediate stage [h]). More specifically an attempt is made to explain instances of the exceptions to this sound law as “lautgesetzlich”, i.e. neither as cases of sound change inhibition nor as resulting from a posteriori analogical restorations of intervocalic /s/, but as due to genuine restrictions to the scope of the sound law. The main body of the examination is limited to the future and sigmatic aorist formations.

Λέξεις κλειδιά: σίγηση, εξασθένωση, μεσοφωνηεντικό /s/, «παρεμπόδιση» (inhibition) μεταβολής, αναλογία, μέλλοντας, σιγματικός αόριστος, λαρυγγικοί.

1. Εισαγωγή

1.1 Τροπή του μεσοφωνηεντικού */s/ σε [h] και σίγηση του [h]

Μία από τις σημαντικότερες πρωτο-ελληνικές (ή «πανελληνικές») μεταβολές είναι η σίγηση του αρχικού («γνήσιου») μεσοφωνηεντικού /s/. Η μεταβολή τοποθετείται χρονικά μετά τη συριστικοποίηση του /t/ (όπως π.χ. στο **πέρυτι* > *πέρυσι*, *δίδωτι* > *δίδωσι*), και μετά την τροπή του αρχικού συμπλέγματος **h* σε /s/ (π.χ. **ιοτή-ος* > *τόσος*, **φέρωντιᾶ* > *φέρονσα* > *φέρουσα*), ενώ η ολοκλήρωσή της πιθανότατα προηγήθηκε της απλοποίησης παλαιότερου /ss/ στην Ιωνική-Αττική (όπως π.χ. στο **ἔσ-σομαι* > *ἔσομαι*¹). Η μεταβολή δεν αφορά επίσης δάνεια λεξιλογικά στοιχεία, τα οποία εισήλθαν στην Ελληνική ύστερα από την ολοκλήρωση της μεταβολής (π.χ. *χρῶσός*, *σᾶσαμον* > *σῆσαμον*, *ἀσάμινθος*, *γεῖσον* κ.λπ.)². Στο πρώτο στάδιο της όλης διαδικασίας συνέβη εξασθένωση του /s/ σε [h], στάδιο το οποίο μαρτυρούν και τα μυκηναϊκά κείμενα. Η τροπή του /s/ σε [h] είναι διαγλωσσικώς ευρέως διαδεδομένη, αλλά ενεργοποιείται σε διαφορετικά περιβάλλοντα³. Στην Αρχαία Ελληνική συνέβη μόνο όταν το /s/ βρέθηκε σε θέση έμβασης συλλαβής, επομένως είτε στην αρχή λέξης (π.χ. **sr-* > *hr/rh* <ρ>, **sréFw* > *ρέω*) είτε μεσοφωνηεντικά. Το μεσοφωνηεντικό περιβάλλον θα μας απασχολήσει στην παρούσα μελέτη:

**d^hh₁s-* > **θεσ-ός* > *θεός* (πρβλ. *θέσ-φᾶτος*)

**nes-* → **νέσ-ομαι* > *νέομαι* (πρβλ. *νόσ-τος*)

**ies-* → **ζέσ-ω* > *ζέ-ω* (πρβλ. *ζέσ-τός*)

**h₁es-* → **ἔσ-ω* (υποτακτική) > *ἔω* > *ῶ*

**ǵ enh₁-es-h₂* > **γέν-εσ-α* > *γένεα* > *γένη* (πρβλ. μυκην. *ke-re-a₂* = *σκέλεα* < **σκέλ-εσ-α*)

**kreu₂-h₂-s-* → **κρέF-ᾶσ-ος* (γενική ενικού) > *κρέᾶος* > *κρέως*

**snus-ό-s* > *νῦ-ός* ‘σύζυγος του γιου, νύφη’ (πρβλ. λατ. *nur-us*, αρχ.ινδ. *snus-ā*)

**aiδ-όσ-ος* > *αἰδόος* > *αἰδοῦς*

**μέγ-ιος-ες* > *μέζοες*, αττ. *μείζους* (συναίρεση /oe/ > /o:/ <ου>, ονομ. πληθ. συγκριτικού βαθμού του *μέγας*, **-ιος-* : επίθημα σχηματισμού του συγκριτικού)

¹ Άλλα παραδείγματα: IE **h₁eh₁s-so* > ἦσο (κάθησο), **mes-soi* > ἔσ-σαι (ομην. με διατήρηση του /ss/, πρβλ. αττ. ἡμφί-εσαι, ἔσ-θής, ἔννυμι < **Fέσ-νῦ-μι* κ.λπ.).

² Μερικές από αυτές τις λέξεις (όσων η γλώσσα-πηγή δεν είναι γνωστή) ίσως να πέρασαν στην Ελληνική πριν από την τροπή /s/ > [h]. Στην περίπτωση αυτή το /s/ θα πρέπει να αναχθεί σε κάτι το οποίο την εποχή της μεταβολής /s/ > [h] δεν είχε ακόμη τραπέι σε /s/.

³ Βλ. Ferguson 1990, όπου γίνεται και αναφορά στη μεταβολή της Ελληνικής και σύγκριση με αντίστοιχη μεταβολή της Ισπανικής.

**ἔρχ-ε-σαι* > *ἔρχεαι* > *ἔρχῃ* (2.ENIK. ενεστώτα του *ἔρχομαι*), παρατατικός **ἤρχ-ε-σο* > *ἤρχεο* > *ἤρχου* (2.ENIK.)

1.1 Εξαιρέσεις

Εξαιρέσεις σε αυτόν το φωνολογικό νόμο μπορούν να εντοπιστούν αρκετές και μάλιστα σε συγκεκριμένα μορφολογικά περιβάλλοντα:

(α) Μέλλοντας και σιγματικός αόριστος: Σε αυτές τις περιπτώσεις το μεσοφωνηεντικό /s/ γενικά εμφανίζεται, π.χ. *ἐποίησα*, *ἔλθσα*, *ποίησω*, *λῶσω*, *δώσω*, πρβλ. επίσης μυκην. *do-so-si* = *δῶσονσι*, *a-ke-re-se* = *ἄγρησε* / *ἄγρησει* κ.λπ. Τα παραπάνω ερμηνεύονται συνήθως ως αποτελέσματα αναλογικής επαναφοράς κατά το πρότυπο περιπτώσεων όπως *ἔ-δεια-σα* *ἔ-κοπ-σα* (από ρίζες σε σύμφωνο): **ἔ-λυ-σ-α* > **ἔ-λυ(h)-α* → *ἔ-λυ-σ-α*.⁴

(β) Το 2.ENIK. αθέματων μέσων ενεστώτων της «β' συζυγίας» (ρήματα εις -μι) και παρακειμένων από ρηματικές ρίζες σε φωνήεν. π.χ. *τί-θε-σαι* *ἐτίθεσο*, *δί-δο-σαι* *ἐδίδοσο*, *δείκ-νῦ-σαι* *ἐ-δείκ-νῦ-σο*, *ἔρᾱ-σαι*, *πέτᾱ-σαι*, *ἄγᾱ-σαι*, *μέ-μνη-σαι*, *βέ-βλη-σαι* *κέ-κλη-σαι* κ.λπ. Στον αόριστο το /s/ δεν εμφανίζεται, χωρίς να είναι απολύτως σαφές γιατί ειδικά στους τύπους του αορίστου, που είναι αρκετά σύντομοι και επομένως η αδιαφάνεια που προκύπτει από τη σύγηση του /s/ πιο αυξημένη, δεν επήλθε αναλογική «επαναφορά» του /s/: *(*e*-)*d^hh₁-so* > **ἔ-θε-σο* > *ἔθεο* > *ἔθου*⁵, *(*e*-)*dh₃-so* > **ἔ-δο-σο* > **ἔδοο* > *ἔδου*.

(γ) Το κλιτικό επιθημα -σι της δοτικής πληθυντικού σε περιπτώσεις κατά τις οποίες το /s/ βρισκόταν από παλαιότερα σε θέση μεσοφωνηεντική, π.χ. *θεοῖσι*, *πατράσι*, *ὀνόμασι*, *τρισί*, *χαλκεῖσι* κ.λπ. Στα μυκηναϊκά κείμενα βέβαια τα τέρματα της δοτικής πληθυντικού των θεμάτων σε -ο- και -ᾱ- (η β' και η α' κλίση της παραδοσιακής γραμματικής) μαρτυρούν το πρώτο στάδιο της όλης διαδικασίας, δηλ. την εξασθένωση σε [h], π.χ. *te-o-i* = *θεοῖσι*, *ku-na-ke-ta-i* = *κυνᾱγέτᾱσι* (ENIK. *κυνᾱγέτᾱς*). Στη δοτική πληθυντικού τριτοκλίτων ουσιαστικών όμως το /s/ εμφανίζεται, όπως π.χ. στα αρσενικά σε -εύς π.χ. *ka-ke-u-si* = *χαλκεῖσι*, ή σε θέματα σε υγρό ή ἔρρινο σύμφωνο, π.χ. *tu-ka-ta-si* = *θυγατᾱρσι* < **-j-si* (αττ. *θυγατᾱρσι*), *te-ka-ta-si* = *τέκτᾱσι* < **-η-si* (αττ. *τέκτοσι* με /ο/ αναλογικά προς άλλους κλιτικούς τύπους όπως *τέκτονος*, *τέκτονες* κ.λπ.). Εμφανίζεται επίσης στη δοτική του αριθμητικού *τρεις τρία* : *ti-ri-si* = *τρισί*. Σε ό,τι αφορά περιπτώσεις όπως *τέκτᾱσι* *ὀνόμασι* *πατράσι* είναι πολύ πιθανή η εξαρχής διατήρηση του /s/ αντί για αναλογική επαναφορά του ύστερα από σύγηση σε μεσοφωνηεντική θέση (βλ. πιο κάτω).

(δ) Μεμονωμένα λεξιλογικά στοιχεία όπως π.χ. *θρασύς* *δασύς* (από ινδοευρ. **dh₃sús* **dhsús* αντίστοιχα) κ.λπ.

Η παρουσία του /s/ στις παραπάνω περιπτώσεις (υπ' αριθ. α-γ) αποδίδεται συνήθως σε πρώιμη αναλογική επαναφορά με βάση αντίστοιχους σχηματισμούς από βάσεις σε σύμφωνο, π.χ. *ἔ-δεια-σα* (*ἔδειξα*), *δείκ-σω* (*δείξω*), ΔΟΤ. *ταῖς φλεπ-σί* (*φλεψί*) κ.λπ. Η αναλογική επαναφορά φαίνεται να έχει ήδη ξεκινήσει την εποχή των μυκηναϊκών κειμένων, όπως δείχνουν οι προαναφερθέντες τύποι μέλλοντα, αορίστου και δοτικής πληθυντικού με /s/ (υπό την προϋπόθεση φυσικά ότι δεν έχουμε εδώ διατήρηση του /s/ σε συγκεκριμένα περιβάλλοντα).

Στις εξαιρέσεις πρέπει να παρατηρηθούν τα εξής:

(α) Σε ό,τι αφορά περιπτώσεις δοτικής πληθυντικού όπως *τέκτᾱσι* *ὀνόμασι* *πατράσι* εξαρχής διατήρηση του /s/ (και όχι αναλογική επαναφορά του) είναι πολύ πιθανή, όπως υποστηρίχτηκε πρόσφατα (Manolessou & Pantelidis 2011). Το ίδιο είναι πιθανό και σε περιπτώσεις λεξιλογικών στοιχείων όπως *θρασύς* *δασύς*⁶, με το περιβάλλον να είναι αντίστοιχο με των τύπων της δοτικής πληθυντικού: Σε θέση προτονική μεταξύ συλλαβικού υγρού ή ἔρρινου και φωνήεντος. Σε ό,τι αφορά τους τύπους δοτικής πληθυντικού στα μυκηναϊκά κείμενα, είναι αξιοσημείωτο ότι τα ουσιαστικά στα οποία το /s/ εμφανίζεται, έχουν θέμα σε ημίφωνο, το υλικό όμως των μυκηναϊκών κειμένων είναι μάλλον πενιχρό για την εξαγωγή ασφαλών συμπερασμάτων και τη διατύπωση κανονικοτήτων οποιασδήποτε μορφής.⁷

(β) Σε ό,τι αφορά το 2.ENIK. παρακειμένων και αθέματων ενεστώτων:

Σε κείμενα ακόμη και αττικών δραματικών ποιητών σώζονται και αρκετοί παλαιότεροι τύποι 2.ENIK. ενεστώτα που εμφανίζουν σύγηση του /s/, ενώ στα πεζά κείμενα αττικής διαλέκτου εμφανίζεται στους

⁴ Πρβλ. μεταξύ άλλων Schwyzer 1939:307, Lejeune 1972:97, Rix 1992:217, Hellemanns 2005:102, Sihler 2009:212.

⁵ Τύποι όπως *ἔθεσο* μαρτυρούνται μόνο σε γραμματικούς ή είναι μεταγενέστεροι.

⁶ Ο.π.

⁷ Η υπόθεση του Jiménez Delgado (2008) ότι στη Μυκηναϊκή η αναλογική επαναφορά του /s/ απλώς δεν έχει ακόμη ολοκληρωθεί και δεν έχει επηρεάσει την (παραδοσιακά λεγόμενη) α' και β' κλίση, δε διαθέτει κατά τη γνώμη μου επαρκή βάση, δεδομένης της πολύ σαφούς, για τον τρόπο με τον οποίο συνήθως εξελίσσονται ανάλογες διαδικασίες, κατανομής των /s/ και [h] ανάλογα με την κλιτική τάξη: /s/ στα ουσιαστικά με χαρακτηρισμό (αρχικό) ημίφωνο : [h] στα ουσιαστικά με χαρακτήρα /a:/ και /o/.

ιδίους τύπους το /s/. Τύποι αθέματων ενεστώτων και μέσων παρακειμένων με /s/ (π.χ. *ἐπίστα-σαι*, *ἔρᾱ-σαι*, *πέτᾱ-σαι*, *βέβλη-σαι*, *κέκτη-σαι*, *μέ-μνη-σαι* κ.λπ.) καταγράφονται μόνο σε κείμενα της κλασικής εποχής κ.ε. Η δημιουργία τύπων με /s/ είναι επομένως μια μάλλον σχετικά πρόσφατη διαδικασία και πιθανόν να μην ανάγεται στη 2^η χιλιετία π.Χ., εκτός και αν οι ποιητές, στους οποίους καταγράφονται τύποι χωρίς /s/, άντλησαν αυτούς τους τελευταίους από πολύ παλαιότερα μη σωζόμενα μέχρι τις μέρες μας ποιητικά κείμενα:

ἐπίστα (= *ἐπίσται* < **ἐπίσᾱ-αι* < **ἐπίσᾱσαι*, Πίνδαρος, Αισχύλος)⁸
ἐπίσταο (ιων., Ηρόδοτος), *ἐπίστω* (αττ. με συναίρεση, Σοφοκλής) (< **ἐπίσᾱσο*)
δύνᾱ (= *δύναι* < **δύνᾱ-αι* < **δύνᾱ-σαι*, Ευριπίδης)
μάρναο (προστακτική, ομηρ., *μάρνάμαι*)
ἴσταο (προστακτική, ομηρ., *ἴσᾱμαι*), *ἴστω* (αττ. δρᾶμα)
φάο (ομηρ., προστακτική), *ἔφαο* (μόνο σε γραμματικούς)
δίζηαι (ομηρ., *δίζημαι*, αθέματος ενεστώτας)
βέβλη-αι (ομηρ.), *μέμνη-αι* (ομηρ., ιων.)
ἔσσο (ομηρ.) < **e-k^(w)iu-so* (ομηρ., ριζικός αθέματος αόριστος, ενεστώτας: *σεύομαι*)

(γ) Σε ό,τι αφορά τους μέλλοντες και τους σιγματικούς αορίστους υπάρχουν αρκετά αντιπαραδείγματα στη διαδικασία πρώιμης αναλογικής επαναφοράς του /s/. Το /s/ σιγήθηκε χωρίς να «επανεέλθει» σε περιπτώσεις θεωρούμενων ως παλαιών και υπολειμματικών σιγματικών αοριστικών σχηματισμών όπως **ἐ-γήρᾱ-σ-ε*⁹ > **ἐγήρᾱ(h)ε* > *ἐγήρᾱ* αλλά και σε περιπτώσεις χρονολογικά μάλλον νεότερων, όπως οι *ἔσσευα* και *ἔχευα* (< **-σ-α*, βλ. σχετικά πιο κάτω). Επιπλέον το ίδιο παρατηρείται και σε πολλούς μέλλοντες, στους οποίους δεν «επανεήλθε» το /s/, π.χ. **temh₁-* : **τεμέ-σω* > *τεμέω* > (αττ. με συναίρεση) *τεμῶ*. Βλ. σχετικά πιο κάτω.

Στην παρούσα συμβολή γίνεται απόπειρα να δοθεί ερμηνεία σε μέρος ἔστω των «εξαιρέσεων» η οποία θα ξεφεύγει από το δίπολο «θεραπεία» ή «πρόληψη», με βάση κυρίως την παρουσία ή απουσία του /s/ στους μέλλοντες και σιγματικούς αορίστους, και λιγότερο τους κλιτικούς τύπους της δοτικής πληθυντικού. Θα προηγηθεί σύντομη θεωρητική αναφορά στο ζήτημα «πρόληψη» στη φθογγική μεταβολή. Σε σχέση και με το πλαίσιο αυτό θα ακολουθήσει κατά το δυνατόν εξαντλητική εξέταση των δεδομένων των περιπτώσεων σίγησης και των περιπτώσεων διατήρησης του μεσοφωνηεντικού /s/. Στην εξέταση του θέματος δεν θα συμπεριληφθούν φαινόμενα εξασθένωσης του μεσοφωνηεντικού /s/ σε [h], τα οποία καταγράφονται σε αρκετά μεταγενέστερες εποχές σε διάφορες διαλέκτους, π.χ. αργολική και λακωνική Δωρική, Ηλειακή κ.λπ.¹⁰ Επίσης δεν θα εξεταστούν περιπτώσεις μεσοφωνηεντικού συμπλέγματος **sj*, όπως στη ΓΕΝ.ΕΝΙΚ. των β'-κλίτων **-osjo* και ενεστώτων σε **-jo/e-* από βάσεις σε /s/ (π.χ. **νάσ-ιω* > *ναίω*). Στα πλαίσια της παρούσας μελέτης δεν μπορεί φυσικά να γίνει πλήρης και εξαντλητική αναφορά στο ζήτημα του μεσοφωνηεντικού /s/ στην (πρώιμη) Ελληνική αλλά θα επιχειρηθεί μια πρώτη κατάταξη του υλικού και μερικές προκαταρκτικές παρατηρήσεις, ως έναυσμα για ενδελεχέστερη μελλοντική έρευνα.

2. Το ζήτημα της προληπτικής «παρεμπόδισης» μεταβολής (inhibition of sound change)

Οι εξαιρέσεις στην κανονικότητα των μεταβολών είναι ένα ζήτημα που έχει απασχολήσει αρκετά την έρευνα. Αποδίδονται συνήθως σε αναλογία, διαλεκτική μείξη, γλωσσική επαφή, σποραδική μεταβολή, και άλλους παράγοντες. Η παρεμπόδιση για την αποφυγή της λεγόμενης «καταστροφικής ομωנוμίας» (pernicious homophony)¹¹ σε επίπεδο βέβαια κυρίως λεξιλογίου, δεν έχει θεμελιωθεί επαρκώς με περιπτώσεις από διάφορες γλώσσες. Εξάλλου έχουν εγερθεί σοβαρές θεωρητικές αντιρρήσεις σχετικά με τη δυνατότητα του ομιλητή να προβλέψει τη δυσλειτουργία που θα προκαλέσει στο μέλλον η «ανεμπόδιση» συνέχιση και ολοκλήρωση μιας φωνητικής μεταβολής η οποία για τον ίδιο βρίσκεται ακόμα στο στάδιο της συγχρονικής εναλλαγής (variation)¹².

⁸ Για λόγους χώρου δεν δίνονται τα ακριβή χωρία στα οποία μαρτυρούνται οι διάφοροι τύποι. Ο αναγνώστης παραπέμπεται στο λεξικό Liddell-Scott (1996) καθώς και στην ηλεκτρονική βάση *Thesaurus Linguae Graecae* (TLG).

⁹ Ο τύπος αυτός δεν πρέπει να συγχέεται με πολύ μεταγενέστερους (ελληνιστικούς) αναλογικούς σχηματισμούς.

¹⁰ Βλ. σχετικά Alonso Déniz 2008:16-17.

¹¹ Campbell 1996:77.

¹² Βλ. σχετικά τον καίριο προβληματισμό του Lass (1997: 359-361).

Δεν υπάρχει στη βιβλιογραφία απόλυτη συμφωνία σχετικά με το αν η «εμφάνιση» του μεσοφωνηεντικού /s/ στην Αρχαία Ελληνική εμπίπτει στην «παρεμπόδιση». Σε διαλέκτους της αλφαβητικής Ελληνικής, όπως η λακωνική Δωρική, η τροπή του /s/ σε [h] και η ακόλουθη σίγηση του [h] φαίνεται να προχώρησε χωρίς οποιαδήποτε «παρεμπόδιση» παρά το ότι ίσως θα δημιουργούσε σε διάφορες περιπτώσεις ομωνυμία. Είναι πάντως αρκετά δύσκολο, δεδομένης της έλλειψης επαρκών δεδομένων από τις κρίσιμες χρονικές περιόδους, να διακρίνει κανείς τις διάφορες περιπτώσεις εξαιρέσεων που παρατίθενται από τους Blevins & Wedel (2009:148) ως *ευρετικές* (*heuristics*): απουσία αναλογικής βάσης, σταδιακός χαρακτήρας των φθογγικών μεταβολών, διαλεκτική επαφή και μείξη, προσπάθεια αποφυγής της ομωνυμίας κ.ά. Η μεταβολή πάντως έχει σαφή φωνητική βάση¹³, η οποία φαίνεται να συνδυάζεται όμως και με μορφολογικούς παράγοντες.

Η παρουσία του /s/ αντιμετωπίζεται συνήθως ως αποτέλεσμα αναλογικής επαναφοράς¹⁴, την οποία οι Blevins & Wedel (2009:155) εντάσσουν σε αυτό που ονομάζουν «οιονεί παρεμπόδιση» (*impure inhibited sound change*). Άλλοι μελετητές όμως όπως ο Campbell (2004:318-319), ο Christol (1988) ή ο Colvin (2007), από διαφορετική βάση και με διαφορετικό τρόπο ο καθένας, εξετάζουν το ενδεχόμενο η παρουσία του μεσοφωνηεντικού /s/ να εντάσσεται στο πλαίσιο της «γνήσιας παρεμπόδισης», δηλαδή εξαρχής παρεμπόδισης που αποτρέπει την ομωνυμία (εν προκειμένω του ενεστώτα με τον μέλλοντα). Ο Chantaine αποδέχεται και τις δύο πιθανότητες, αναλογική επαναφορά και «παρεμπόδιση» (1990:216-217). Σε ό,τι αφορά το ζήτημα που εξετάζεται στην παρούσα συμβολή, το [h] στην πρόωμη Ελληνική, μάλλον και στη Μυκηναϊκή, παρά τις κατά καιρούς εκφρασθείσες αντιρρήσεις¹⁵, πιθανότατα είχε το status κανονικού φωνήματος, με ιδιαίτερους περιορισμούς φυσικά στην κατανομή του. Στη Μυκηναϊκή το [h] (< μεσοφωνηεντικό /s/) διατηρείτο ακόμη, έστω και μερικώς, αν και σύμφωνα με τη γενικότερα αποδεκτή άποψη η αναλογική επαναφορά του /s/ έχει ήδη ξεκινήσει. Αυτό σημαίνει ότι τουλάχιστον στην πρόωμη (προ-μυκηναϊκή) Ελληνική δεν υπάρχει, υπό την έννοια της διατήρησης παραδειγματικών αντιθέσεων, επαρκής βάση για αναλογική επαναφορά του /s/, εφόσον το [h] ως φώνημα θα εξασφάλιζε ακόμη τη διάκριση κλιτικών τύπων μεταξύ τους. Στα περισσότερα από τα παραδείγματα που παρατίθενται στην εισαγωγή της παρούσας εργασίας πάντως απουσιάζει το αναλογικό πρότυπο για την επαναφορά του /s/.

Σε ό,τι αφορά την παρουσία του διπλού /ss/ ο Chantaine πολύ σωστά παρατηρεί (αντίθετα με τον Christol 1988 που κάνει λόγο για «προληπτική δίπλωση» / *gémiation prophylactique*) ότι επεβλήθη από τις ανάγκες του μέτρου ενώ θεωρεί ως μία από τις πηγές του την Αιολική (1990:216-217). Στη διαφώτιση του ζητήματος πάντως καθοριστικός είναι ο ρόλος της Μυκηναϊκής, η οποία όμως δεν ήταν φυσικά η μόνη ποικιλία της Ελληνικής την εποχή εκείνη. Επιβάλλεται επομένως προσοχή στις γενικεύσεις που τυχόν θα διατυπωθούν με βάση τα δεδομένα της μόνης γλωσσικής ποικιλίας της Ελληνικής της 2^{ης} χιλιετίας π.Χ. που μαρτυρείται άμεσα.

3. Το υλικό

Στο τμήμα αυτό θα παρατεθεί και θα εξεταστεί το διαθέσιμο υλικό από τους μέλλοντες και τους σιγματικούς αορίστους και θα γίνει απόπειρα να προσδιοριστεί τι κοινό έχουν οι περιπτώσεις, στις οποίες δεν έχει συμβεί σίγηση του μεσοφωνηεντικού /s/, αλλά και αυτές στις οποίες καταγράφεται η σίγηση. Κύρια πηγή για την επανασύνθεση των σχηματισμών της ινδοευρωπαϊκής πρωτογλώσσας (στο εξής στο κείμενο: IE) και γενικότερα για την παλαιότητά τους υπήρξε το *Lexikon der Indogermanischen Verben* (LIV).

3.1 Μέλλοντες

3.1.1 Μέλλοντες χωρίς μεσοφωνηεντικό /s/ από ρίζες της δομής *CeRH- (R=υγρό ή έρρινο)

*demh₂- : *δεμᾶ-σ- → *δεμε-σ-, μυκην. μετοχή *de-me-o-te* = δεμέ(η)οντες

*demh₂- : *δεμᾶ-σει > δαμᾶ (ομηρ.), μετοχή μυκην. *da-ma-o-te* = δαμά(η)οντες (< *δαμά-σοντες)

*d^herh₃- : (;) *θορε-σο- > -θορέονται (πρβλ. ενεστώτες θόρνυμαι θρώσκω)

*kelh₁- : *καλέ-σω > καλέω > καλώ

¹³ Βλ. Blevins 2004:144-147.

¹⁴ Lejeune 1972, Rix 1992, Hellemanns 2005, Alonso Déniz 2007, Colvin 2007, Risch & Hajnal 2007 κ.λπ.

¹⁵ Αυτός είναι και ένας από τους λόγους που προτιμήθηκε στην παρούσα εργασία η προσεκτικότερη γραπτή απόδοσή του ως φωνής (phone).

*temh₁- : *τεμέ-σω > τεμέω > τεμῶ
 *yemh₁- : *Feμέ-σω > έμέω > έμῶ
 *yerh₁- : *Feρέ-σω > έρέω > έρῶ
 *Hemh₃- : *όμό-σομαι > όμοῦμαι

Ο σχηματισμός αυτός που προκύπτει, όπως φαίνεται από τα παραδείγματα, από τη σίγηση του μεσοφωνηεντικού /s/ (με ενδιάμεσο στάδιο την τροπή σε [h]), επεκτάθηκε σε άλλα ρήματα, η ρίζα των οποίων περιλάμβανε υγρό ή έρρινο (π.χ. *men- : μενῶ, *stel- : στελῶ).

Μαρτυρούνται επιπλέον οι εξής μέλλοντες από ρίζες της δομής *CeRH- ή *CeTH- (T = κλειστό σύμφωνο), οι οποίοι αποτελούν μάλλον νεωτερισμούς της Ελληνικής. Οι μέλλοντες αυτοί σχηματίστηκαν αναλογικά προς τους παραπάνω και πιθανόν δημιουργήθηκαν (εάν δεν ανάγονται στην ΙΕ) κατά την περίοδο πριν από την τροπή του /s/ > [h]:

*Kerh₃- : *κορε-σ- > κορέεις, κορέει (ομηρ., πρβλ. κορέννυμι)
 *perh₂- : *περᾶ-σ- > περάαν (ομηρ. απαρέμφατο με διέκταση περᾶ-σ- > απαρ. *περά-η-ε(h)εν > *περάεεν > *περᾶν → περάαν (διέκταση), ενεστώτας: πέρνυμι)
 *peth₁- : *πετε-σ- > *πετέομαι → πεσέομαι (πίπτω)
 *peth₂- : *πετᾶ-σ- > πετῶ (ενεστώτας: πίννυμι, πετάννυμι)
 *(s)kedh₂- : *σκεδᾶ-σ- > σκεδῶ (ενεστώτας: σκίδνυμι, σκεδάννυμι)
 *sterh₃- : *στορε-σ- > στορῶ (ενεστώτας: στόρνυμι, στορέννυμι)

3.1.2 Μέλλοντες με μεσοφωνηεντικό /s/, από ρίζες της δομής *C(R)eH- (και *(C)Ceu- / *(C)Cei-)

Οι παρακάτω μέλλοντες θεωρούνται από το LIV ως παλαιοί (ΙΕ *desiderativa*, δηλ. βουλευτικοί σχηματισμοί):

*b^heh₂- → (;) *b^heh₂-s-o- > φή-σω (φᾶ-μί / φη-μί)
 *d^heh₁- → *d^heh₁-s-o- > θή-σω (τί-θη-μι)
 *dreh₂- → (;) *dreh₂-s-o- > δρᾶ-σο-μαι (δι-δρᾶ-σκω)¹⁶
 *(H)ieh₁- → (;) *(H)ieh₁-s-o- > ἦ-σω (ἴημι)
 *d^heu- → (;) *d^heu-s-o- > θεύσομαι (πρβλ. θέω, θυνέω)
 *neu- → *neu-s-o- > νεύ-σω (νεύω)
 *d_{uei}- → (;) *d_{uei}-s-o- > δείσομαι (πρβλ. δείδω < *δέ-δFoi-α, δέ-δοι-κα)

Σε όλους τους παραπάνω σχηματισμούς το /s/ εμφανίζεται. Μοναδική εξαίρεση θα αποτελούσε η αμφίβολη ρίζα *deH- ‘ανακαλύπτω, βρίσκω, συναντώ’, από την οποία μαρτυρείται στα ομηρικά έπη σχηματισμός *δήεις δήετε δήομεν* (<*deH-s-)¹⁷, που αντιμετωπίζεται γενικά ως μέλλοντας (και όχι ως υποτακτική), ενώ και στον Ησύχιο μαρτυρείται τύπος *έδην· έδρεν*, τον οποίο το LIV προσδιορίζει με επιφύλαξη ως σιγματικό αόριστο¹⁸.

Επίσης σε ό,τι αφορά τους μέλλοντες «συνηρημένων» ρημάτων απουσιάζουν παντελώς καταγραφές τύπων που να εμφανίζουν σίγηση του μεσοφωνηεντικού /s/. Το γεγονός εξηγείται εν μέρει από το ότι πολλά από τα ρήματα αυτά δεν είναι παλαιά, αλλά αποτελούν νεωτερισμούς της Ελληνικής, οι οποίοι μάλιστα θα δημιουργήθηκαν (μαζί με τους αορίστους) μετά το πέρας της μεταβολής /s/ > [h].

3.2 Σιγματικοί αόριστοι.

Ο σιγματικός αόριστος είναι σχηματισμός κληρονομημένος από την ΙΕ, λίγοι όμως σιγματικοί αόριστοι των επιμέρους ΙΕ γλωσσών είναι συγκρίσιμοι μεταξύ τους σε βαθμό ώστε να ανάγονται με

¹⁶ Στο LIV εκφράζεται και η υπόθεση ότι το *δρᾶσομαι* μπορεί να είναι και συνοπτική υποτακτική, ενώ το /s/ θεωρείται ότι επανήλθε αναλογικά.

¹⁷ Πρβλ. *δήεις* N 260, *δήετε* I 418, *δήετε· εύρήσετε* (Ησύχιος).

¹⁸ LIV, σελ.103.

σχετική έστω ασφάλεια στην πρωτογλώσσα¹⁹. Η ρίζα ήταν αρχικά στην εκτεταμένη βαθμίδα στον ενικό της ενεργητικής φωνής, και στην απαθή βαθμίδα στο υπόλοιπο κλιτικό παράδειγμα²⁰.

3.2.1 Σιγματικοί αόριστοι με σίγηση του /s/ από ρίζες της δομής *(C)CeRH-, *Ceī-, *(C)Ceu-, *CeHu-

Οι αόριστοι αυτοί θεωρούνται (βλ. LIV) ως πιθανοί παλαιοί, δηλ. (ύστεροι) ινδοευρωπαϊκοί σιγματικοί αόριστοι και εμφανίζουν σίγηση του μεσοφωνηεντικού /s/:

**gerh₂*- : **e-ġēr_h₂-s-t* → **ē-ġhṛā-σ-ε* > **ē-ġhṛāhe* > **ē-ġhṛāe* > *ē-ġhṛā*²¹
 **k^wei-* : **k^wēi-s-/k^wei-s-* > **k^wei-ha-menos* (μυκην. *qe-ja-me-no*, αττ. *τεισάμενος*, LIV σελ.380²²)
 **h₂leu-* : (:) **h₂leu-s-* > **ālēu-h-* > **ālēūāto* (ομηρ., Γ 360)
 **keh₂u-* : **keh₂u-s-* > **e-kau-s-m̃*²³ > **e-kau-h-a* > **e-kāu-a* (αντέκταση²⁴) > *έκηα*²⁵

Σε ό,τι αφορά ειδικότερα τους μεταπλασμούς παλαιών αθέματων ριζικών αορίστων σε σιγματικούς εντός της Ελληνικής θα μπορούσαν, με βάση την παρουσία ή την απουσία του μεσοφωνηεντικού /s/, να διακριθούν διαφορετικά χρονολογικά στρώματα:

(α) Ένα παλαιότερο στρώμα μεταπλασμών, οι οποίοι θα έλαβαν χώρα κατά την (πρώιμη) Πρωτο-Ελληνική και πρέπει, εξαιτίας της απουσίας του /s/, να τοποθετηθούν χρονικά πριν από την εξασθένωση του μεσοφωνηεντικού /s/ σε [h] (και την ακόλουθη σίγηση του τελευταίου):

IE αμετάβητος αθέματος αόρ. **k^(w)ieu-/k^(w)iū-* (πρβλ. ομηρ. *έσσυ-το/σύ-το*, προστακτική *σύ-θι*) → μεταπλασμός στην Πρωτο-Ελληνική ή «ύστερη (διαλεκτική) IE»²⁶ σε σιγματικό αόρ. **e-k^(w)ieu-s-m̃* > *έσσενα* ‘έθεσα σε κίνηση’ (ομηρ.).²⁷

IE αθέματος αόρ. **ġ^heu-* (πρβλ. ομηρ. *έ-χυν-το*, *έ-χυν-το/χύ-ντο*) → μεταπλασμός στην Πρωτο-Ελληνική σε σιγματικό αόριστο **e-k^heu-s-m̃* > *έχενα* (ομηρ.), σύμφωνα με την πιο διαδεδομένη άποψη.²⁸

(β) Ένα νεότερο στρώμα μεταπλασμών, οι οποίοι θα πραγματοποιήθηκαν μετά την εξασθένωση του μεσοφωνηεντικού /s/ σε [h], γι’ αυτό και οι αόριστοι αυτοί δεν εμφανίζουν τη μεταβολή, π.χ.:

IE αθέματος αόρ. **perh₂*- → *περα-σ(σ)-*²⁹

IE αθέματος αόρ. 3.ENIK. *(*e-*)*k^herh₂-t* → (*έ-*)*κέρα-σε*

IE αθέματος αόρ. **leuH-/luH-* (πρβλ. ομηρ. *λύ-το/λύ-το*, *λύ-ντο*) → *λύ-σ-* (*έλυσα*)³⁰. Το συγκεκριμένο ρήμα, το οποίο χρησιμοποιείται συχνά ως παράδειγμα αναλογικής επαναφοράς του μεσοφωνηεντικού

¹⁹ Στην παρούσα εργασία δεν μπορεί να γίνει πλήρης αναφορά στο ζήτημα της γένεσης του σιγματικού αορίστου και της επέκτασής του στην Ελληνική.

²⁰ Βλ. σχετικά Rix 1992:217. Η Drinka (1990) αντιθέτως θεωρεί ότι δεν στοιχειοθετείται επαρκώς η εκτεταμένη βαθμίδα της ρίζας και ότι ο σιγματικός αόριστος εμφάνιζε αρχικά αστάθεια ως προς αυτό το στοιχείο της μορφολογικής δομής του.

²¹ Βλ. Barton 1982, Hardarsson 1993:72-76.

²² Σχετικά με την πιθανότητα συλλαβογράμματα της σειράς <j> να αποδίδουν συλλαβές που αρχίζουν από [h] ανεξαρτήτως προελεύσεως (είτε από *s είτε από *j) βλ. Risch & Hajnal 2007:§82. Βλ. όμως επίσης Helleman 2005:114-117, ο οποίος δεν δέχεται εξέλιξη *VjV* > *VhV*, που θα οδηγούσε στη χρήση συλλαβογραμμάτων της σειράς <j>- για το μεσοφωνηεντικό [h] ανεξαρτήτως προελεύσεως.

²³ Με τροπή του */e/ > [a] σε περιβάλλον λαρυγγικού (*h₂) και σίγηση του λαρυγγικού.

²⁴ Σχετικά με την ακριβή διαδικασία βλ. Kiparsky 1967.

²⁵ Μη σιγματικός παλαιός αόριστος με ρίζα όμως που περιέχει /s/ ίσως υποκρύπτεται στον ομηρικό *έσβη* ‘έσβησε (αμετάβ.)’, με εξασθένωση του μεσοφωνηεντικού /s/ σε [h] και ακόλουθη σίγηση του τελευταίου (βλ. LIV): **(s)g^wesh₂*- : Αόρ. **e-sg^wesh₂-t* > **e-sg^wehā* > **έσβεα* > *έσβη*. Οι Rix (1992:218) και Hardarsson (1993:210-212) δεν δέχονται όμως την αναγωγή του σε **e-sg^wesh₂-t* με ρίζα σε *h₂.

²⁶ Hardarsson 1993:191. Η δημιουργία σιγματικού αορίστου θα οδήγησε σε εμφανικότερη δήλωση της μεταβατικότητας.

²⁷ Hardarsson 1993:188-193, LIV σελ.394-395. Ο Beekes όμως για φωνολογικούς λόγους δεν δέχεται τον μεταπλασμό αυτό (2010:1352) και θεωρεί την παρουσία του [u] αναλογική προς παλαιότερους σχηματισμούς όπως το ετυμολογικά συγγενές ριζικό αθέματο *σεῦ-ται*.

²⁸ Οι συγκεκριμένοι σχηματισμοί (*έσσενα*, *έχενα*) θεωρούνται αιολισμοί του ομηρικού κειμένου (βλ. Hardarsson 1993:191, 193) γι’ αυτό και δεν εμφανίζουν αντέκταση όπως το *έκηα* (βλ. πιο πάνω). Η εξέλιξή τους με βάση τη διαδικασία, όπως αυτή περιγράφηκε από τον Kiparsky (1967), θα είχε ως εξής: **e-k^heu-s-m̃* > **e-k^hem-h-a* > **ek^hehma* > **ek^hemma* στην Αιολική χωρίς αντέκταση αλλά με αφομοίωση σε διπλό (απόδοση: *έχενα*, πρβλ. επίσης **nāsamos* > **nāsmos* > **nāsmos* δηλ. αιολ. *ναός*, αλλά δωρ. *νάος* με αντέκταση, αττ. *νεός*).

²⁹ Drinka 1990:156, υποσημ. 255.

/s/ στον αόριστο (* $\acute{\epsilon}$ - $\lambda\upsilon$ -σ-α > * $\acute{\epsilon}\lambda\upsilon(h)\alpha \rightarrow \acute{\epsilon}\lambda\upsilon$ -σ-α) σχημάτιζε αρχικά, όπως φαίνεται και από τους καταγεγραμμένους στην Ελληνική τύπους, ριζικό αθέματο αόριστο, και επομένως πρόκειται μάλλον για μεταπλασμό σε έναν ολωσδιόλου νέο σιγματικό αόριστο και όχι για αναλογική επαναφορά του μεσοφωνηεντικού /s/ (πρβλ. και υποσημ.4).

Με βάση τον ίδιο μηχανισμό δημιουργήθηκαν στην Ελληνική και οι σιγματικοί αόριστοι $\acute{\epsilon}$ - $\gamma\acute{\epsilon}\lambda\alpha$ -σα, $\acute{\epsilon}$ - $\kappa\acute{\alpha}\lambda\epsilon$ -σα, $\acute{\epsilon}$ - $\kappa\acute{\omicron}\rho\epsilon$ -σα, $\acute{\epsilon}$ - $\kappa\rho\acute{\epsilon}\mu\alpha$ -σα, $\acute{\epsilon}$ - $\pi\acute{\epsilon}\lambda\alpha$ -σα, $\acute{\epsilon}$ - $\pi\acute{\epsilon}\rho\alpha$ -σα, $\acute{\epsilon}$ - $\pi\acute{\epsilon}\tau\alpha$ -σα, $\acute{\epsilon}$ - $\sigma\kappa\acute{\epsilon}\delta\alpha$ -σα, $\acute{\epsilon}$ - $\sigma\acute{\omicron}\rho\epsilon$ -σα, $\acute{\epsilon}$ - $\tau\acute{\epsilon}\lambda\alpha$ -σσα/ $\acute{\epsilon}$ - $\tau\acute{\alpha}\lambda\alpha$ -σσα. Το /ss/ που εμφανίζουν ορισμένοι από τους παραπάνω αορίστους δεν οφείλεται κατά τη γνώμη μου σε *προληπτική δίπλωση* («gémmination prophylactique»), όπως υποστήριζε ο Christol (1988), αλλά εξυπηρετεί τις ανάγκες του μέτρου στα παλαιότερα ποιητικά κείμενα (βλ. και Chantraine 1990: 216-217).

3.2.2 Σιγματικοί αόριστοι με μεσοφωνηεντικό /s/ από ρίζες της δομής *(C)CeH-, *CReH-, *(C)Ceu-

Οι παρακάτω αορίστοι θεωρούνται (βλ. LIV) ως παλαιοί (IE; (πρώιμοι) πρωτο-ελληνικοί):

* $dreh_2$ - \rightarrow * $dr\acute{\epsilon}h_2$ -s- / $dreh_2$ -s-: $\acute{\epsilon}$ - $\delta\rho\acute{\alpha}$ -σα (δράω > $\delta\rho\acute{\omega}$)

* $d^h eh_1(i)$ - \rightarrow * $d^h \acute{\epsilon}h_1$ -s- / $d^h eh_1$ -s-: θή-σα-το

* $h_1\mu eh_2$ - \rightarrow * $h_1\mu \acute{\epsilon}h_2$ -s- / $h_1\mu eh_2$ -s-: $\acute{\epsilon}\alpha$ -σα

* $mneh_2$ - \rightarrow * $mn\acute{\epsilon}h_2$ -s- / $mneh_2$ -s-: $\acute{\epsilon}\mu\nu\alpha$ -σα > $\acute{\epsilon}\mu\nu\eta\sigma\alpha$ ³¹

* $preh_1$ - \rightarrow (;) * $pr\acute{\epsilon}h_1$ -s- / $preh_1$ -s-: $\acute{\epsilon}$ -πρη-σα

* $pleu$ - \rightarrow * $pl\acute{\epsilon}u$ -s- / $pl\acute{\epsilon}u$ -s- > $\acute{\epsilon}$ -πλευ-σα

(;) * $pneu$ - \rightarrow * $pn\acute{\epsilon}u$ -s- / $pn\acute{\epsilon}u$ -s- > $\acute{\epsilon}$ -πνευ-σα

* $sreu$ - \rightarrow (;) * $sr\acute{\epsilon}u$ -s- / $sr\acute{\epsilon}u$ -s- > $\acute{\epsilon}\rho\rho\epsilon\nu$ -σα

* reh_2u - \rightarrow * $r\acute{\epsilon}h_2u$ -s- / $r\acute{\epsilon}h_2u$ -s- > $\acute{\epsilon}$ -παυ-σα³²

Από τους παραπάνω αορίστους απουσιάζουν εντελώς μαρτυρίες για εξασθένωση του */s/ σε [h] και ακόλουθη σίγηση (π.χ. * $\acute{\epsilon}$ -πλευ- h -α > * $\acute{\epsilon}\pi\lambda\epsilon\nu\alpha$ ή * $\acute{\epsilon}\pi\lambda\epsilon\iota\alpha$ /* $\acute{\epsilon}\pi\lambda\eta\alpha$ κ.λπ.).

3.3 Εξέταση του υλικού

Επί των δεδομένων που αφορούν τους μέλλοντες και τους σιγματικούς αορίστους θα μπορούσαν να γίνουν οι εξής παρατηρήσεις: Η πλειονότητα των θεωρούμενων ως (πιθανών) παλαιών (IE;) σχηματισμών μέλλοντα και σιγματικού αορίστου που εμφανίζουν σίγηση του μεσοφωνηεντικού /s/ είναι σχηματισμοί από ρίζες της δομής *CeRH-. Αντίθετα οι θεωρούμενοι ως (πιθανοί) παλαιοί (IE;) σχηματισμοί μέλλοντα και σιγματικού αορίστου από ρίζες της δομής *CreH- (*CCeH-) δεν εμφανίζουν δείγματα σίγησης του μεσοφωνηεντικού /s/ (με την εξαίρεση του αβέβαιου *δήεις* κ.λπ.). Η διατήρηση του /s/ στις παραπάνω περιπτώσεις θα μπορούσε να σχετίζεται με τη θέση του /s/ μετά από μακρό φωνήεν που προήλθε από *eH (ή/και *ēH). Άγνωστο είναι αν έπαιξε ρόλο και η θέση του τόνου³³. Είναι αξιοσημείωτο ότι και στα μυκηναϊκά κείμενα μαρτυρείται σίγηση του /s/ σε βάσεις της δομής *CeRH- (πρβλ. *da-ma-o-te* και *de-me-o-te* πιο πάνω § 3.1.1) στις οποίες το *H (σε θέση πυρήνα συλλαβής) τράπηκε σε βραχύ φωνήεν³⁴, ενώ το /s/ εμφανίζεται σε βάσεις σε μακρό φωνήεν (από παλαιότερο *eH), π.χ. *do-se do-so-si* (= δώ-σει, δώ-σονσι, IE ρίζα **deh_3*-). Το υλικό των μυκηναϊκών κειμένων είναι βέβαια πενιχρό για να επιτρέψει την εξαγωγή ασφαλών συμπερασμάτων. Επιπλέον στη Μυκηναϊκή το τέρμα της δοτικής πληθυντικού των ουσιαστικών της παραδοσιακής α' κλίσης λήγει σε

³⁰ LIV σελ.417, Hardarsson 1993:188.

³¹ Drinka 1990:165, υποσημ.263, LIV σελ.447.

³² Για τη ρίζα αυτή δεν υπάρχουν βέβαιες αντιστοιχίες εκτός Ελληνικής (βλ. LIV σελ. 462, Beekes 2010 s.v.).

³³ Στους σχηματισμούς από ρίζες της δομής *CeRH- ο τόνος ήταν αρχικά πιο απομακρυσμένος από τη συλλαβή η οποία είχε ως έμβαση το /s/, σε αντίθεση με τους σχηματισμούς από ρίζες της δομής *CreH- στις οποίες ο τόνος προηγείτο άμεσα της συλλαβής αυτής: μέλλοντας *CēRH-so- (θέμα τρισύλλαβο: *Cē.RH.so-) : *CRēH.-so- (θέμα δισύλλαβο).

³⁴ Εδώ μπορούν να ενταχθούν και περιπτώσεις όπως αυτές που αναφέρθηκαν στην §1.1: *(e-)d^hh₁-so > * $\acute{\epsilon}$ - $\theta\epsilon$ -σο > $\acute{\epsilon}$ - $\theta\epsilon$ -ο > $\acute{\epsilon}$ - $\theta\upsilon$, *(e-)dh₃-so > * $\acute{\epsilon}$ - $\delta\omicron$ -σο > $\acute{\epsilon}$ - $\delta\upsilon$, *ἵσταο* < *σι-σά-σο < *sth₂-, *δύναι* < * $\delta\upsilon\nu\acute{\alpha}$ - < **du-n-h₂*- κ.λπ. Επίσης ο τύπος *ἔσσο* με βραχύ φωνήεν που δεν προέρχεται από λαρυγγικό, καθώς και όλοι οι τύποι που αναφέρονται στην εισαγωγή της παρούσας μελέτης. Από την άλλη πλευρά όμως έχουμε *τί- $\theta\epsilon$ -σαι* *δί- $\delta\omicron$ -σαι*, επίσης με βραχέα φωνήεντα (< *H) και μεσοφωνηεντικό /s/.

-a-i, το οποίο συνήθως ερμηνεύεται ως -ā-hi (< *-ā-si, πρβλ. αρχ.ινδ. -ā-su, αττ. *Ἀθήν-ησι*), και επομένως έρχεται σε αντίθεση με την παραπάνω διαπίστωση.

Αν λοιπόν ισχύουν τα παραπάνω, τότε το /s/ θα διατηρήθηκε στην Ελληνική στη θέση μεταξύ μακρού φωνήεντος και φωνήεντος. Αν όμως από την άλλη πλευρά γίνει δεκτό ότι (α) στις παραπάνω περιπτώσεις το /s/ διατηρήθηκε βέβαια και δεν επανήλθε αναλογικά, αλλά και ότι (β) το μεσοφωνηεντικό /s/ σιγήθηκε (μέσω τροπής σε [h]) *ανεξαρτήτως της ποσότητας του φωνήεντος που προηγείται*, τότε αυτό καθιστά πιθανή τη διατήρηση σε πρωιμότερες φάσεις της Ελληνικής των λαρυγγικών της IE (ή έστω ενός λαρυγγικού, στον οποίο θα έχουν συμπίσει οι τρεις αρχικοί) στη θέση εξόδου συλλαβής (**CREH*.-so-). Επιπλέον τοποθετεί τη σίγησή του(ς) στη θέση αυτή (και την έκταση του φωνήεντος που προηγείται) σε χρόνο μεταγενέστερο της τροπής του μεσοφωνηεντικού /s/ σε [h], δηλ.: **CREH*.-so- > **CRV*.-so- *ύστερα* από την τροπή /s/ > [h]. Με άλλα λόγια κατά την εποχή που θα ξεκίνησε η εξασθένωση του μεσοφωνηεντικού /s/ σε [h], η Ελληνική θα διατηρούσε ακόμη σε θέση εξόδου συλλαβής τους λαρυγγικούς (ή τον λαρυγγικό), οπότε και το /s/ δεν θα βρισκόταν ακόμη σε θέση μεσοφωνηεντική (**VH.sV*). Την ύπαρξη λαρυγγικών (ή λαρυγγικού) σε πρώιμες φάσεις της Ελληνικής έχει υποθέσει και ο Meier-Brügger (1992, τόμ.2, σελ.117, και 2010:254-255). Σε σχηματισμούς μέλλοντα από ρίζες της δομής **CeRH*- όμως, όπου οι λαρυγγικοί (ή ο λαρυγγικός) θα αποτελούσαν τον πυρήνα συλλαβής, θα τράπηκαν σε φωνήεν(τα) πριν από τη σίγηση του /s/: **te.mh*₁.-so- > **teme*.-so- > *τεμέ-ω*.

Το γεγονός ότι σε ανάλογο περιβάλλον στη γενική πληθυντικού των ουσιαστικών με θέμα σε *-ā (< *-eh₂-) («ά κλίση») το /s/ φαίνεται να σιγήθηκε (*-ā-*σων*-άων, με κατάληξη από την αντωνυμία³⁵) έρχεται σε αντίθεση με τις παραπάνω διαπιστώσεις. Σε αυτό θα μπορούσε όμως να παρατηρηθεί ότι (α) δεν γνωρίζουμε την ακριβή χρονολογική σχέση της δημιουργίας του τέρματος *-ā-*σων* (κατ' επίδραση της αντωνυμικής κλίσης) με τους μέλλοντες και τους σιγματικούς αορίστους από ρίζες σε μακρό φωνήεν, και ότι (β) δεν είναι καν, κατά τη γνώμη μου, βέβαιη η αναγωγή του -ά-ων (μυκην. -a-o) σε *-ā-*σων* (με κατάληξη *-*σων* από την αντωνυμία) και όχι σε ένα *-ā-ων σχηματισμένο απευθείας με την προσάρτηση της κατάληξης -ων στο θέμα σε -ā.

Τύποι μέσου παρακειμένου π.χ. *βέ-βλη-αι μέ-μνη-αι*, οι οποίοι δε μαρτυρούνται σε αττικές πηγές, φαίνεται επίσης να μην επιβεβαιώνουν την παραπάνω υπόθεση περί διατήρησης του μεσοφωνηεντικού /s/ μετά από μακρό φωνήεν. Ο μέσος παρακειμένος μαρτυρείται βέβαια και στον Όμηρο, είναι όμως πιθανότατα νεωτερισμός της Ελληνικής (Chantraine 1990:223-225). Πιθανόν οι παραπάνω παρακειμένοι πάντως να μπορούν να αναχθούν σε εποχή προ της μεταβολής */s/ > [h].

Τύποι όπως *ἔρᾱ-σαι ἄγᾱ-σαι* κ.λπ. από βάσεις σε βραχύ φωνήεν φαίνεται να μην επιβεβαιώνουν την υπόθεση περί σίγησης του μεσοφωνηεντικού /s/ μετά από βραχύ φωνήεν. Πέραν όμως του ότι οι τύποι αυτοί μαρτυρούνται από την κλασική εποχή κ.ε., οπότε η εμφάνιση του /s/ σε αυτούς θα μπορούσε να είναι το αποτέλεσμα αρκετά μεταγενέστερης αναλογικής εξέλιξης, μαρτυρούνται και παλαιοί τύποι από βάσεις σε βραχύ φωνήεν όπως *ἐπίστᾱι* (< *-στᾱ-σαι), *δύνᾱι* (< *δύνᾱ-σαι) *μάρνᾱο ἱστᾱο ἔσσῶο* (βλ. πιο πάνω §1.1), οι οποίοι φαίνεται να μπορούν να ενταχθούν στην υπόθεση αυτή.

Το /s/ εμφανίζεται επίσης σε σιγματικούς αορίστους από ρίζες της δομής *(C)*Ceu*- (βλ. § 3.2.2), με μακρά δίφθογγο **eu* η οποία διατηρείτο ακόμη σε εποχή κατά την οποία ίσως δεν είχε δράσει ακόμη ο βραχυντικός νόμος του Osthoff. Το γεγονός της σίγησης του /s/ στους σιγματικούς αορίστους *ἄλεῦατο ἔχευα ἔσσευα* (επίσης από ρίζες σε **eu*) θα μπορούσε να σχετίζεται με το γεγονός ότι ο μεν πρώτος ως μέσος αόριστος έτσι και αλλιώς δεν εμφάνιζε αρχικά εκτεταμένη βαθμίδα της ρίζας³⁶ (επομένως μακρά δίφθογγο), ενώ οι υπόλοιποι ως νεωτερισμοί (βλ. §3.2.1) δεν ακολούθησαν τον αρχαιότερο τρόπο σχηματισμού, δημιουργήθηκαν όμως πριν από την τροπή /s/ > [h].

Η διατήρηση του /s/ σε μέλλοντες ρημάτων σε -εῦ-ω (π.χ. *νεύ-σω*) έρχεται σε αντίθεση με ενεστώτες από ρίζες της δομής **Ceus*- (π.χ. **geus*-o- > *γεύ-ομαι*). Ίσως σε περιπτώσεις όπως αυτή να πρόκειται όντως για «επαναφορά» του /s/, πιθανόν όμως ύστερα από την οριστική σίγηση του [h]. Έτσι θα αποφεύχθηκε η άρση της διάκρισης ενεστώτα : μέλλοντα.

4. Συμπεράσματα

Όπως έγινε φανερό, το ζήτημα της εξέλιξης του μεσοφωνηεντικού /s/ στην πρώιμη Ελληνική είναι περίπλοκο, και τα ούτως ή άλλως ανεπαρκή για τις αρχαιότερες περιόδους, και ανισομερώς κατανεμημένα ως προς την κειμενική προέλευση και τη γεωγραφική και χρονική τους τοποθέτηση δεδομένα οδηγούν συχνά σε αντιφατικά συμπεράσματα. Το γεγονός αυτό δείχνει, κατά τη γνώμη μου, ότι η μέχρι σήμερα αντιμετώπιση του ζητήματος είναι απλουστευτική και ότι έχουμε να κάνουμε με

³⁵ Rix 1992:134.

³⁶ Βλ. παραπάνω υποσημείωση 20.

περισσότερα του ενός χρονολογικά στρώματα τροπής του μεσοφωνηεντικού */s/ σε [h] σε συνδυασμό με διαφορετικά χρονολογικά στρώματα σιγματικών αορίστων. Επιπλέον πρέπει να διερευνηθεί και η πιθανότητα η παρουσία του /s/ (εκτός από τις περιπτώσεις μορφολογικού μεταπλασμού, μεταγενέστερου της τροπής /s/ > [h], σε σιγματικούς αορίστους) να οφείλεται σε κανονική διατήρηση του παλαιού /s/ σε συγκεκριμένα φωνολογικά περιβάλλοντα (βλ. §3.3). Με τον τρόπο αυτό θα μπορούσε να ενταχθεί και ένα σημαντικό μέρος των «εξαιρέσεων» σε κανονικότητες αντί να καταφεύγει κανείς σε αναλογίες, οι οποίες σε αρκετές περιπτώσεις δεν φαίνεται να λειτουργούν στην αναμενόμενη έκταση ή να στηρίζεται στην έννοια της εξαρχής παρεμπόδισης της μεταβολής, η οποία δεν είναι ακόμη επαρκώς θεμελιωμένη ερευνητικά. Το ζήτημα παραμένει ανοιχτό στην περαιτέρω έρευνα.

ABSTRACT

This paper proposes a contribution to the geolinguistic mapping of the local idioms of Bithynia. The research is based not only on the material contained in the manuscripts kept at the Research Center for Modern Greek Dialects of the Academy of Athens, but also on linguistic material published in several articles and bibliographies which deal with this particular area. In addition, this study intends to point out and evaluate - from a critical perspective- the various problems which arise in connection to the manuscripts and linguistic material used. Furthermore, a possible parallel has been drawn between Andrioti's views concerning the Thracian local idioms and theories which are mentioned in various studies relating to the local idioms of Bithynia.

Λέξεις κλειδιά: διαλεκτολογία, γλωσσογεωγραφία, μικρασιατικά ιδιώματα, Βιθυνία, Ανατολική Θράκη

1. Εισαγωγή

Η ανακοίνωση επιχειρεί να συμβάλει στη γλωσσογεωγραφική αποτύπωση των ιδιωμάτων της Βιθυνίας, βασιζόμενη στο υλικό των χειρογράφων του Κέντρου Ερεύνης των Νεοελληνικών Διαλέκτων και ιδιωμάτων της Ακαδημίας Αθηνών (ΚΕΝΔΙ), όπως και σε γλωσσικό υλικό που περιλαμβάνεται σε μελέτες, άρθρα και βιβλιογραφία για τα ιδιώματα της περιοχής. Η μελέτη επιχειρεί την κριτική αποτίμηση καθώς και την επισήμανση προβλημάτων που ανακύπτουν σε σχέση με το υλικό που χρησιμοποιήθηκε για την έρευνα. Εν συνεχεία γίνεται παραλληλισμός των σχετικών με τα θρακικά ιδιώματα απόψεων του Ανδριώτη (1943-44: 131-185) με τις απόψεις για τα ιδιώματα της Βιθυνίας, όπως αυτές καταγράφονται σε σχετικές με την περιοχή εργασίες.

2. Το υλικό

Η μελέτη ενός προσφυγικού ιδιώματος έχει την ιδιαιτερότητα ότι εξετάζει ένα ιδίωμα, το οποίο τη στιγμή που μελετάται δεν μιλιέται στην αρχική κοιτίδα του. Έτσι, η ουσιαστική πρόκληση αλλά και το «πρόβλημα» για τον ερευνητή ενός προσφυγικού ιδιώματος είναι η ανεύρεση αντιπροσωπευτικού και ικανού γλωσσικού υλικού προκειμένου να εξαγάγει κατά το δυνατόν ασφαλή συμπεράσματα.

Ένας βασικός προβληματισμός που προκύπτει σε σχέση με το υλικό αφορά το κατά πόσον αυτό αντιπροσωπεύει τα ιδιώματα στην «αυθεντική» τους μορφή, δηλαδή αυτή που μιλιόταν στην κοιτίδα τους. Επιπλέον, όπως μπορεί να παρατηρήσει κανείς από το υλικό που χρησιμοποιήθηκε για την παρούσα μελέτη, το γεγονός ότι αυτό προέρχεται από διάφορες χρονικές περιόδους και από ποικίλες πηγές, εγείρει ερωτήματα για το ποια ακριβώς «εκδοχή» του εκάστοτε ιδιώματος καταγράφεται στις επιμέρους πηγές. Είναι σχεδόν βέβαιο ότι οι πληροφορητές δεν χρησιμοποιούν πια τα ιδιώματα στη μορφή που μιλήθηκαν στη Μικρά Ασία, και σίγουρα έχει αλλοιωθεί ένα μέρος των χαρακτηριστικών τους. Ας σημειωθεί ότι οι φορείς των ιδιωμάτων αυτών είναι σχεδόν έναν αιώνα εκπατρισμένοι και διασπαρμένοι σε όλη την Ελλάδα. Σήμερα οι περισσότεροι από τους πρόσφυγες πρώτης γενιάς έχουν πια πεθάνει, γεγονός που δημιουργεί ιδιαίτερες δυσκολίες όχι μόνο στην ανεύρεση αλλά και στη διασταύρωση των πληροφοριών προκειμένου να ελεγχθεί η αξιοπιστία του ήδη υπάρχοντος υλικού. Συχνά επίσης, για ορισμένα χαρακτηριστικά που έχουν παραμείνει στην ιδιόλεκτο των πληροφορητών, είναι δύσκολο να αποφανθεί κανείς κατά πόσον είναι γνήσια μικρασιατικά ή είναι αποτέλεσμα επίδρασης του νέου περιβάλλοντος. Σε πολλές περιπτώσεις η έλλειψη επαρκών στοιχείων για τους

πληροφορητές (πχ. ηλικία, μόρφωση, επάγγελμα κ.λπ.) στις πηγές υλικού αποτελεί παράμετρο που δυσχεραίνει την αξιολόγηση του υλικού που καταγράφεται στις εκάστοτε συλλογές.

Οι παραπάνω δυσκολίες επιβάλλουν ιδιαίτερη προσοχή όσον αφορά τη μέθοδο προσέγγισης και επεξεργασίας του υλικού, για τη διασφάλιση της αξιοπιστίας των πορισμάτων. Η συστηματική παραβολή των στοιχείων των ποικίλων πηγών υλικού είναι απαραίτητη ώστε να ελεγχθούν τα γλωσσικά φαινόμενα που καταγράφονται. Το υλικό που χρησιμοποιήθηκε στην παρούσα μελέτη προέρχεται κυρίως από το Αρχείο του ΚΕΝΔΙ, ενώ αξιοποιήθηκε και η σχετική βιβλιογραφία (μελέτες και άρθρα) για τα ιδιώματα της περιοχής.

Το γλωσσικό υλικό που αφορά τη Βιθυνία στο Αρχείο του ΚΕΝΔΙ (βλ. τα σχετικά χφ. στον πίνακα που ακολουθεί) προέρχεται κυρίως από τρεις περιοχές. Η πρώτη βρίσκεται στην παραλιακή ζώνη δυτικά της Νικομήδειας απέναντι από τα Πριγκηπόνησα. Η δεύτερη αφορά την περιφέρεια της Προύσας μέχρι τα παράλια, και η τρίτη το τμήμα της Απολλωνιάδας, που περιλαμβάνει την ομώνυμη κωμόπολη και την ομάδα των Πιστικοχωρίων.

Τα χφ. του Αρχείου ΚΕΝΔΙ που καταγράφουν υλικό από τις παραπάνω περιοχές χρονολογούνται από το 1888 έως και το 2003 και μπορούν να χωριστούν σε δύο κατηγορίες. Στα χφ. του Φιλολογικού Συλλόγου Κωνσταντινουπόλεως (ΧΚ) που είναι και τα παλαιότερα (1888-1890), και στα χφ. με υλικό που έχει καταγραφεί (από το 1933-2003) είτε από ερευνητές του ΚΕΝΔΙ που πραγματοποίησαν αποστολές σε περιοχές της κυρίως Ελλάδας όπου βρίσκονται εγκατεστημένοι πρόσφυγες καταγόμενοι από τη Βιθυνία, είτε είναι χφ. ιδιωτών, τα οποία περιέχουν γλωσσικό υλικό και κατατέθηκαν στο Αρχείο του ΚΕΝΔΙ.

Τα χειρόγραφα του Φιλολογικού Συλλόγου Κωνσταντινουπόλεως κατά κύριο λόγο καταγράφουν υλικό από την περιοχή της Νικομήδειας. Θα πρέπει να σημειωθεί ότι πρόκειται για συλλογές από λόγιους της εποχής που περιέχουν πλούσιο υλικό, κυρίως λεξιλόγιο, παραμύθια, παροιμίες, αινίγματα και τραγούδια, δίνουν ωστόσο περιορισμένες πληροφορίες που μπορούν να οδηγήσουν σε συμπεράσματα για τη φωνητική, μορφολογία κ.λπ. των ιδιωμάτων στα οποία αναφέρονται. Έτσι, συμπεράσματα ως προς το φωνηεντισμό κάποιων οικισμών της περιοχής της Νικομήδειας, μπορούν να εξαχθούν κυρίως από μεταγενέστερες συλλογές υλικού που έγιναν από ερευνητές του ΚΕΝΔΙ.

Σε ό,τι αφορά τις συλλογές υλικού των ερευνητών του ΚΕΝΔΙ, μεγάλο τμήμα εξ αυτών συγκεντρώνει υλικό από πρόσφυγες πρώτης γενιάς. Ωστόσο, όπως κανείς μπορεί να διαπιστώσει, το χρονικό εύρος της πραγματοποίησης των αποστολών συχνά δεν αποκλείει την επίδραση των νέων συνθηκών (κοινωνικών / γλωσσικών) στους τόπους εγκατάστασης των πληροφορητών. Έτσι, για παράδειγμα, σε κάποιες περιπτώσεις στα χφ. διαπιστώθηκε ότι το υλικό που καταγράφουν από τον ίδιο τόπο είναι πολύ διαφορετικό. Αυτό πιθανότατα οφείλεται, είτε στη χρονική απόσταση μεταξύ των δύο αποστολών, είτε στο ότι πολύ συχνά στους τόπους έρευνας κατοικεί «μείγμα» προσφύγων από την Βιθυνία και αλλού (π.χ. στα Μουδανιά κατοικούν πρόσφυγες από τους Ελιγμούς, την Καλόλιμνο, το Κουρί, την Κίο, τους Επιβάτες Αν. Θράκης κ.λπ., καθώς και ντόπιοι). Εξ αντικειμένου μία τέτοια πληθυσμιακή σύνθεση δημιουργεί ερωτηματικά για την ταυτότητα των πληροφορητών των χφ. Σε άλλες περιπτώσεις (πχ. στο Κατιρλί) τα χφ. του ΚΕΝΔΙ αποτυπώνουν βόρειο φωνηεντισμό σε μια περιοχή της Βιθυνίας όπου μάλλον αναμένεται νότιος. Το γεγονός αυτό προβληματίζει για το κατά πόσον ο βόρειος φωνηεντισμός που καταγράφεται στα χφ. οφείλεται στην επίδραση του βόρειου φωνηεντισμού στους τόπους εγκατάστασης ή εάν τα χφ. απεικονίζουν πράγματι το φωνηεντισμό του ιδιώματος στη Βιθυνία. Ως εκ τούτου, για τους προαναφερθέντες λόγους, το υλικό που μελετάται δημιουργεί επιστημονική ανασφάλεια.

Ας σημειωθεί εξάλλου ότι οι συλλογές των χειρογράφων που μελετήθηκαν διασώζουν κυρίως τα έντονα φωνητικά φαινόμενα των ιδιωμάτων και λεξιλόγιο, ενώ τα στοιχεία που αφορούν τη μορφολογία και τη σύνταξη άλλοτε είναι αντιπροσωπευτικά και άλλοτε όχι.

Πέρα από το υλικό του ΚΕΝΔΙ ιδιαίτερη αξία για τη μελέτη των ιδιωμάτων της Βιθυνίας, και κυρίως για την περιοχή της Προύσας, έχουν οι διδακτορικές διατριβές, των Δαγκίτση (1943) για το Ντεμίντεσι, Δεληγιάννη (2002) για τα Κουβούκλια και Παπαδοπούλου (2010) για την Τρίγλια, οι οποίες αποτελούν τις μοναδικές ολοκληρωμένες γλωσσικές μελέτες για την περιοχή. Σημαντική συμβολή στην έρευνα των ιδιωμάτων της περιοχής αποτελούν και οι πρόσφατες μελέτες της ερευνήτριας του ΚΕΝΔΙ Μ. Κωνσταντινίδου (2005, 2005^β, 2008, 2009) ενώ στοιχεία για τα ιδιώματα των Πιστικοχωρίων καταγράφονται από τον Α. Μπουσμπούκη (2003). Οι υπόλοιπες αναφορές των ιδιωμάτων της Βιθυνίας, σε άρθρα ή βιβλία ποικίλου περιεχομένου, παρέχουν αποσπασματικά στοιχεία για τη γλωσσική κατάσταση της περιοχής.

Με βάση τα παραπάνω από το υλικό του Αρχείου του ΚΕΝΔΙ επιλέχθηκαν χφ. από τα οποία με σχετική ασφάλεια μπορούμε να αντλήσουμε πληροφορίες για το φωνηεντισμό των οικισμών της περιοχής. Κριτήρια για την επιλογή αποτέλεσαν η παλαιότητα, η ποσότητα του υλικού, ο αριθμός των χφ. για τον ίδιο οικισμό και η δυνατότητα διασταύρωσης του υλικού με πληροφορίες από τη βιβλιογραφία ή από δημοσιευμένο υλικό άλλων πηγών.

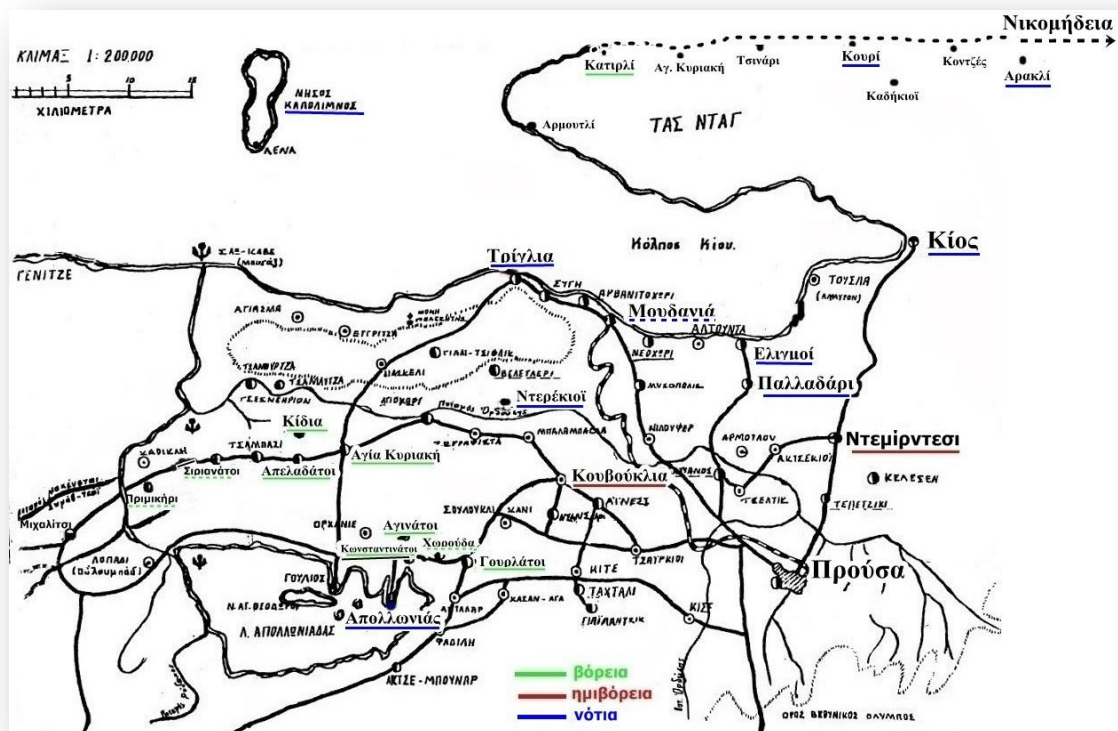

Έτσι, όπως φαίνεται και στον πίνακα που ακολουθεί, οι απαραίτητες επιστημονικές πληροφορίες συγκεντρώθηκαν κυρίως για την περιοχή της Προύσας μέχρι τα παράλια καθώς επίσης και για την περιοχή Απολλωνιάδας-Πιστικοχωρίων, ενώ για τρεις από τους οικισμούς της Νικομήδειας συγκεντρώθηκαν απλώς επαρκή στοιχεία.

* Για τα Μουδανιά, σημειώνω την αντίφαση των χφ.

3. Γλωσσογεωγραφία της Βιθυνίας

Η γλωσσογεωγραφία της Βιθυνίας χαρακτηρίζεται από την ανομοιογένεια των ιδιωμάτων ως προς το φωνηεντισμό, διότι στην περιοχή απαντούν νοτίου, ημιβορείου και βορείου τύπου ιδιώματα.

Με βάση το υλικό που μελετήθηκε και όπως φαίνεται στο χάρτη, στην περιοχή της Βιθυνίας σε γενικές γραμμές διακρίνονται τρεις περιοχές φωνηεντισμού: παράλια (Τρίγλια, Μουδανιά, Κίος, Παλλιαδάρι, Ελιγμοί, Αρακλί, Κουρί, νησί Καλόλιμνος / όπου απαντούν νοτίου τύπου ιδιώματα), ενδοχώρα (Κουβούκλια, Ντεμίρντεσι / χαρακτηριστικά των ημιβορείων), με νησίδα νότιου το Ντερέκιοι που βρίσκεται μεταξύ των δύο περιοχών, ενώ στην ορεινή και γεωγραφικά απομονωμένη περιοχή των Πιστικοχωρίων απαντούν βόρειου τύπου ιδιώματα, με εξαίρεση την Απολλωνιάδα που αποτελεί νησίδα νότιου φωνηεντισμού.

Σε κάποιες περιπτώσεις η ρευστότητα των φαινομένων σε συνδυασμό με τα προβλήματα που προαναφέρθηκαν δημιουργεί επιφυλάξεις ως προς την παραπάνω κατάταξη των ιδιωμάτων της Βιθυνίας. Όπως επισημαίνει χαρακτηριστικά η Κωνσταντινίδου (2008: 302, υποσημ. 75): «*Τα ιδιώματα της Βιθυνίας... με εξαίρεση την ιδιάζουσα περίπτωση των Πιστικοχωρίων, δεν παρουσιάζουν κανονικά την τροπή του άτονου ο > ου, όπως συμβαίνει με τα βόρεια ιδιώματα της Νέας Ελληνικής. Αντίθετα, τα περισσότερα έχουν κυρίαρχο νοτιοελλαδικό φωνηεντισμό, αν και ορισμένα (Κίος, Προύσα, Ντεμίρντεσι, Κουβούκλια) εμφανίζουν, άλλοτε σποραδικά και άλλοτε με μεγαλύτερη συχνότητα, το δεύτερο από τα δύο χαρακτηριστικά των σύγχρονων βορειοελλαδικών ιδιωμάτων, δηλ. την αποβολή των άτονων /i/ και /u/, στοιχείο το οποίο τα συνδέει με τα ημιβόρεια ιδιώματα της ΝΕ, και εγείρει ερωτηματικά σχετικά με την ένταξή τους στα νότια ιδιώματα*». Παρ' όλες τις δυσκολίες, αντιθέσεις και αντιφάσεις, οφείλουμε έναν πρώτο επιστημονικό προσδιορισμό με βάση το υλικό που μέχρι στιγμής έχουμε στη διάθεσή μας.

Η πολυμορφία των ιδιωμάτων της περιοχής στις περιορισμένες βιβλιογραφικές αναφορές που εντοπίστηκαν είτε στις γενικές μελέτες για τα μικρασιατικά ιδιώματα όπως του Dawkins¹ είτε στις ειδικότερες για ιδιώματα της Βιθυνίας, όπως του Δαγκίτση², συχνά αποδόθηκε στην ποικίλη

¹Ο Dawkins (1916), παραθέτει αποσπασματικές αναφορές για κάποια ιδιώματα της Βιθυνίας με βάση γλωσσικό υλικό που είχε συλλέξει από τα χωριά Αρακλειά, Ντεμίρντεσι, Απολλωνιάδα και τους Βουλγαράτους των Πιστικοχωρίων. Όπως αναφέρει στα συμπεράσματα του (1916: 192), εξαιρεί από την έρευνά του τα ιδιώματα της Βιθυνίας καθώς θεωρεί ότι κατά κύριο λόγο οι πληθυσμοί της περιοχής αυτής είχαν μεταφερθεί εκεί από την ευρωπαϊκή πλευρά του Βόσπορου. Βλ. σχετικά και Τριανταφυλλίδης (1938: 273-76).

²Danguitsis (1943: 24-5): «*Έτσι όπως μιλήθηκε από τους πρώτους εποίκους που ήρθαν από τα Άγραφα της Ηπείρου η διάλεκτος αυτή φαίνεται να ανήκει στα βόρεια ... Ωστόσο δεν υπάρχει καμία μαρτυρία του e > i και του ο > u στη διάλεκτο του Ντεμίρντεσι. Μπορούμε να υποθέσουμε ότι είτε αυτό το φαινόμενο της τροπής είναι μεταγενέστερο της αποχώρησης των κατοίκων από τα Άγραφα είτε ότι ήταν ακριβώς στην εκκίνησή του και χάθηκε καθώς εξελίχθηκε σε διάλεκτο. Αντιθέτως, βρίσκουμε τη χρήση του θελά / θαλά για τη διαμόρφωση της υποθετικοδυνητικής έγκλισης*

προέλευση των πληθυσμών που κατά καιρούς εποίκισαν τη Βιθυνία. Ας σημειωθεί ότι ανάλογες απόψεις διατυπώνονται στη βιβλιογραφία και για τα ιδιώματα της Αν. Θράκης από μελετητές όπως ο Ψάλτης³ για το ιδίωμα των Σαράντα Εκκλησιών αλλά και σε άλλες περιπτώσεις, προκειμένου να ερμηνευθούν κοινά φαινόμενα που φαίνεται να συνδέουν τα ιδιώματα γεωγραφικά απομακρυσμένων περιοχών.

Η ερμηνεία της ανομοιογένειας των ιδιωμάτων ως αποτέλεσμα των εποικισμών βασίστηκε εν πολλοίς και στις προφορικές παραδόσεις των κατοίκων οι οποίοι συχνά συνέδεαν την προέλευσή τους με κάποια περιοχή της κυρίως Ελλάδας. Χαρακτηριστική περίπτωση είναι αυτή των Πιστικοχωριών, που αποτελούν μία συμπαγή και ξεχωριστή ομάδα οικισμών στη Βιθυνία, όπου όμως ο βόρειος φωνηεντισμός της περιοχής έρχεται σε αντίθεση με τον νότιο φωνηεντισμό της Μάνης (βλ. Μπουσμπούκης 2001: 363), από την οποία οι κάτοικοι, καθώς και μελετητές (Κλεώνυμος-Παπαδόπουλος 1867: 97-8, Καλπακίδης 1987: 14-17) της περιοχής, θεωρούν ότι έλκουν την καταγωγή τους⁴.

Η περιοχή της Βιθυνίας και ιδιαίτερα η παραλιακή ζώνη κατά καιρούς προσέλκυσε πληθυσμούς από πολλές και διαφορετικές περιοχές και ιδιαίτερα τα νησιά του βορείου Αιγαίου, τη Θράκη, τη Μακεδονία αλλά και τον Πόντο. Ωστόσο όπως διαπιστώθηκε παρ' όλες τις κατά καιρούς μετακινήσεις πληθυσμών από και προς τη Βιθυνία, δεν υπάρχει ιστορικά μαρτυρημένος εποικισμός μεγάλων συμπαγών πληθυσμών, ικανών να επηρεάσουν την εξέλιξη των ιδιωμάτων της περιοχής, ώστε να αποδίδεται η γλωσσική πολυμορφία της στις δημογραφικές μεταβολές. Από τη μελέτη των ιστορικών στοιχείων και των δημογραφικών ανακατατάξεων της Βιθυνίας, προέκυψε ότι η περιοχή κατοικήθηκε από τους αρχαίους χρόνους, ενώ η ύπαρξη γηγενούς πληθυσμού με ιστορική συνέχεια από τους μεσαιωνικούς χρόνους μέχρι τον 20^ο αι. καταγράφεται στις σχετικές μελέτες για την περιοχή⁵. Οι περισσότεροι από τους ερευνητές συμφωνούν πως, τουλάχιστον κατά τη βυζαντινή περίοδο, υπήρχε ήδη ή άρχισε να διαμορφώνεται εκεί το πληθυσμιακό υπόστρωμα των κοινοτήτων της περιοχής, άρα η διερεύνηση της γλωσσικής της εξέλιξης θα πρέπει να έχει ως αφετηρία ένα γλωσσικό υπόστρωμα διαμορφωμένο ήδη από την εποχή αυτή. Χαρακτηριστική είναι η επισήμανση σε χάρτη από τον

που απαντά στη Ήπειρο. Ωστόσο, παρά την ηπειρώτικη καταγωγή του το ιδίωμα του Ντεμίρντεσι δεν ανήκει στα βόρεια νεοελληνικά ιδιώματα γιατί δεν απαντά σ' αυτό παρά μόνο η αποβολή του άτονου i ανάμεσα σε σύμφωνα...» πβ. και Δελγιγιάννης (2002: 38 κ.εξ.), όπου αναπτύσσει τον προβληματισμό του για το θέμα εξετάζοντας το ιδίωμα των Κουβουκλίων.

³ Ψάλτης (1905: 15): «... τα ολίγα τινά δεν δύνανται να μας οδηγήσιν εις τον ασφαλή καθορισμόν του μέρους, όθεν μετέβην εις την νυν πατρίδα εν τούτοις είναι ικανά να δηλώσασιν ότι πάντως ήλθομεν εκ τινος των μεσημβρινών μερών, διότι άλλως δεν εξηγείται η ύπαρξις τοιαύτης ομοιότητος μεταξύ ημών τε και των κατοίκων των μεσημβρινών της Ελλάδος μερών...». Τον αντίλογο στην παραπάνω θέση διατυπώνει ο Ανδριώτης (1943-44: 143) αναφερόμενος στις παραδόσεις καταγωγής των Θρακών από άλλες περιοχές της Ελλάδας: «από προσωπική μου πείρα γνωρίζω ότι τέτοιες παραδόσεις των κατοίκων ενός τόπου για την καταγωγή τους κάποτε έχουν κάποια βάση, συχνότερα όμως αληθεύουν για ορισμένες μόνο οικογένειες που ήρθαν απ' αλλού κι ανακατεύτηκαν με τον παλαιότερο ντόπιο πληθυσμό, και όχι σπάνια προέρχονται από παρανοήσεις και δεν είναι αληθινές. Ο ελληνισμός της Θράκης, εκτός από ενδεχόμενες αλλά άγνωστες περιπτώσεις μετακινήσεων και μεταναστεύσεων περιορισμένης σημασίας, είναι απόγονος του βυζαντινού ελληνισμού της Θράκης, ό,τι απόμεινε από τους εκτουρκισμούς και, αόφτου επάτησαν το πόδι τους οι Τούρκοι στη Θράκη, και από εκβουλγαρισμούς, αόφτου η βόρεια Θράκη παραχωρήθηκε στο βουλγαρικό κράτος».

⁴ Ας σημειωθεί ότι σύμφωνα με την άποψη του Κατζαφέρη (1989: 29-30) οι Πιστικοχωρήτες προέρχονται από τη Θεσσαλία και το Ρουμλούκι Κατερίνης.

⁵ Η Σ. Αναγνωστοπούλου (1997: 211) αναφέρει χαρακτηριστικά: «... η γεωγραφική θέση του βορείου τμήματος των παραλίων, θέση που του επιτρέπει την επαφή με πολλές και διαφορετικές περιοχές –τα παράλια του έχουν συνεχή επαφή με τα νησιά του βορείου Αιγαίου, ενώ το υπόλοιπο επικοινωνεί με τη Θράκη και τη Μακεδονία αλλά και τον Πόντο όπως και με το εσωτερικό της Μικράς Ασίας- δημιουργεί τις προϋποθέσεις για την προσέλκυση πληθυσμών από πολλές και διαφορετικές περιοχές. Αν σε τούτο προσθέσουμε και τις ποικίλες οικονομικές δυνατότητες που προσφέρει η περιοχή λόγω των τεράστιων γεωγραφικών εναλλαγών, ... θα απορροφήσει έναν εξίσου σημαντικό αριθμό μεταναστών, οι οποίοι, αναλόγως της περιοχής που προέρχονται και των επαγγελμάτων που είναι μαθημένοι να εξασκούν, επιλέγουν τον τόπο εγκατάστασής τους: οι προερχόμενοι από τα νησιά, έμποροι και γεωργοί θα εγκατασταθούν στα παράλια και τις εύφορες περιοχές, τους μετανάστες από τον Πόντο θα τους προσελκύσουν οι περιοχές των μεταλλείων, ενώ οι προερχόμενοι από τη Θράκη θα εγκατασταθούν στις περιοχές σηροτροφίας και επεξεργασίας μεταξίου. Όμως η περιοχή παρουσιάζει, ως προς το ρωμείο πληθυσμό της πάντα, και από μian άλλη άποψη ενδιαφέρον...: μπορούμε με απόλυτη σχεδόν βεβαιότητα να αποκαταστήσουμε κάποιες από τις περιοχές όπου ο ορθόδοξος χριστιανικός πληθυσμός επιδεικνύει μεγάλη συνέχεια ύπαρξης, από τους πρώτους οθωμανικούς χρόνους, αν όχι από τους βυζαντινούς μέχρι τον 20^ο αι. χάρη στις μελέτες σημαντικών ερευνητών που αναφέρονται στους 15^ο και 16^ο αιώνες, σε συνδυασμό με τα στοιχεία που μας δίνονται από τις πηγές του 19^{ου} αιώνα, όπου γίνονται εκτενείς αναφορές και στην περίοδο μεταξύ 16^{ου} και 19^{ου} αιώνα, μπορούμε με αρκετή ασφάλεια να εντοπίσουμε τις περιοχές αυτές». Βλ. σχετικά και Παπαδοπούλου (2010: 25-31).

Dawkins (1916) των περιοχών Προύσας, Κίου και Νικομήδειας ως σημεία της Μικράς Ασίας, όπου (μαζί με Πόντο και την Καππαδοκία) μιλιόταν αδιάλειπτα η ελληνική γλώσσα.

Όπως φαίνεται τα ιδιώματα της Βιθυνίας ανήκουν στην ευρύτερη κατηγορία των περιφερειακών ιδιωμάτων, με την ιδιαιτερότητα ότι διαμορφώθηκαν και εξελίχθηκαν σε έναν χώρο γεωγραφικά και ιστοριοπολιτικά ανοιχτό και υπό την έντονη επίδραση της Πόλης. Επιπλέον, σημαντική για την έρευνα είναι η ένταξη των ιδιωμάτων αυτών σε μια γενικότερη ομάδα, αυτή της *Θρακοβιθυνικής Οικογένειας*, όπως ορίστηκε από τον Δεληγιάννη (2002: 41) με βάση την οικονομικοπολιτιστική ενότητα που ανέπτυξε ο ελληνικός πληθυσμός της περιοχής αυτής (Προποντίδα, Αν. Θράκη, Βιθυνία, Δαρδανέλια, Κωνσταντινούπολη) από τους βυζαντινούς χρόνους μέχρι τη Μικρασιατική Καταστροφή. Ο Δαγκίτσης (1943: 25), διευρύνοντας τα όρια, κατατάσσει το ιδίωμα του Ντεμίρντεσι στην ομάδα ιδιωμάτων των δυτικών παραλίων της Μικράς Ασίας και των νησιών του Αρχιπελάγους, με κοινό πνευματικό κέντρο την Κωνσταντινούπολη και ως κύρια γλώσσα την γλώσσα της. Η γεωγραφική γειννίαση με την Πόλη και το «αστικού» τύπου περιβάλλον πιθανότατα έπαιξε σημαντικό ρόλο στην περιοχή και ιδιαίτερα στην παραλιακή ζώνη, όπου ο νότιος φωνηεντισμός είναι πιο σαφής.

Σε μια απόπειρα παράλληλης διερεύνησης της σχέσης των δύο περιοχών (Αν. Θράκης και Βιθυνίας), με βάση τις απόψεις που διατύπωσε για τα ιδιώματα της Θράκης ο Ανδριώτης (1943-44: 145), εύκολα διακρίνει κανείς τους ανάλογους προβληματισμούς τόσο για την ποικιλία του φωνηεντισμού όσο και για την κατανομή και την δυσκολία κατάταξης των ιδιωμάτων: «Από γλωσσογεωγραφική άποψη τα βόρεια ιδιώματα της Θράκης παρουσιάζουν απέναντι στα ημιβόρεια μια γεωγραφική ενότητα συμπαγή. Εξαίρεση κάνει το ιδίωμα του Ακαλάν, που, αν και βόρειο, βρίσκεται απομονωμένο πολύ ανατολικότερα, ανάμεσα σε ιδιώματα ημιβόρεια της περιοχής των Μετρών. Δεν αποκλείεται, μελλοντικές έρευνες να παρουσιάσουν κι άλλες τέτοιες εξαιρέσεις βορείων ή ημιβορείων ιδιωμάτων απομονωμένων έξω από τα σύνορα της ομάδας τους. Αυτό το θεωρώ πιθανό και για τα μεταβατικά σημεία των βορείων ιδιωμάτων προς τα ημιβόρεια, αλλά πολύ πιθανότερο για τα ημιβόρεια ιδιώματα προς την κατεύθυνση των νοτίων της περιοχής της Πόλης, γιατί, όπως ετόνισα, το χαρακτηριστικό των ημιβορείων ιδιωμάτων, δηλ. η αποβολή των άτονων *i* και *u*, δεν παρουσιάζεται παντού με την ίδια συνέπεια, και έτσι δημιουργούνται ημιβόρεια ιδιώματα που αποτελούν μεταβατικούς σταθμούς προς τα νότια, κι άλλα πάλι όπου τόσο αραιά και σποραδική είναι η αποβολή, ώστε δεν μπορεί κανείς ν' αποφασίσει αν πρέπει να τα κατατάξει στα ημιβόρεια ή στα νότια...»

Οι δύο περιοχές, Βιθυνία και Αν. Θράκη, φαίνεται να μοιράζονται από κοινού γλωσσικά φαινόμενα και γλωσσικούς προβληματισμούς. Η ανακοίνωση αυτή περιορίστηκε στην κατανομή των ιδιωμάτων με βάση το φωνηεντισμό. Όπως προκύπτει από μελέτες για την περιοχή (βλ. Kahane 1948: 212-25, Δεληγιάννης 2002: 38-43, Παπαδοπούλου 2010: 260-66) η *Θρακοβιθυνική Οικογένεια* ως γλωσσολογικός ορισμός εμπεδώνεται εάν επεκταθούμε και στα άλλα επίπεδα γλωσσικής ανάλυσης όπου εντοπίστηκαν κάποια χαρακτηριστικά φαινόμενα (πχ. το επίθημα της προστακτ. -ησε, το υποκορ. -οπλο, ιδιωματικές λέξεις που φαίνεται να απαντούν μόνον στις δύο περιοχές κ.λπ.), τα οποία συνδέουν τα ιδιώματα της Βιθυνίας και της Αν. Θράκης, γεγονός που αποτυπώνει και γλωσσικά την οικονομικοπολιτιστική ενότητα που ανέπτυξε ο ελληνικός πληθυσμός των δύο περιοχών από τους βυζαντινούς χρόνους μέχρι το 1922. Η παράλληλη έρευνα των ιδιωμάτων των δύο περιοχών θα ήταν πολύ χρήσιμη για τη συλλογή περισσότερων στοιχείων προς την κατεύθυνση αυτή.

Η ιδιαιτερότητα του μικρασιατικού χώρου ως προς τη δυσκολία ανεύρεσης γλωσσικού υλικού, καθιστά κάθε στοιχείο και διαλεκτικό υλικό που παρέχεται, χρήσιμο για την έρευνα. Γι αυτό, είναι ευπρόσδεκτες νέες έρευνες και πληροφορίες που θα επιβεβαιώσουν, θα συμπληρώσουν ή ακόμα και θα ανατρέψουν τα αποτελέσματα της παρούσας μελέτης.

ABSTRACT

While looking for words of latin origin in the local dialect of the Grammos area in Greece, we came across, among others, two vulgar modern greek verbs: the widely used σκαπουλάρω (skapuláro) and the verb σκαπιάζω (skapiázo) which is used in the cypriot dialect, both of them morphologically, phonetically and semantically connected with σκαπιτώ (skapitó), which is the verb of the research. In the following, the etymological and semantic autonomy of σκαπιτώ is attempted, as well as the understanding of the semantic connection and the possible interactions of the aforementioned verbs.

Λέξεις κλειδιά: paronyms, synonyms, folk etymology, dialects, dialect geography, Latinitas Balcanicum

1. Το λαϊκό ρήμα σκαπιτώ στα ιδιώματα του Γράμμου

Πρόκειται για ένα από τα πλέον συχνόχρηστα ρήματα των ελληνικών ιδιωμάτων και της βλάχικης, το οποίο καλύπτει γεωγραφικά ολόκληρο σχεδόν τον ελλαδικό χώρο.

Στη συνέχεια παρουσιάζουμε μια ιστορική-γεωγραφική του εικόνα: το αντιπαραβάλλουμε τόσο μορφολογικά και φωνητικά όσο και σημασιολογικά με δύο ρήματα της νεοελληνικής, το πανελλήνιο και λαϊκό σκαπουλάρω και το σκαπιάζω της κυπριακής διαλέκτου –με τα οποία συγχέεται σε πολλές περιπτώσεις, προκειμένου να φανεί η ξεχωριστή ετυμολογική αρχή του καθενός, οι υποτιθέμενες αλληλεπιδράσεις, καθώς και οι συνακόλουθες συνωνυμίες και μετασημασιολογήσεις. Παράλληλα, με σημεία αναφοράς ορισμένες αρχές της γλωσσικογεωγραφίας, οι οποίες φαίνεται ότι ισχύουν στην προκειμένη περίπτωση, επιχειρούμε να ερμηνεύσουμε τις διαπιστώσεις στο μέτρο του ασφαλούς. Όπως αναφέρεται πιο πάνω, ο εντοπισμός του «προβλήματος» έγινε στο πλαίσιο έρευνας που διεξάγουμε με αντικείμενο τον εντοπισμό λατινογενών λέξεων στα γλωσσικά ιδιώματα του Γράμμου.

1.1 Μορφή και σημασίες

Στα ιδιώματα του Γράμμου εμφανίζεται με τη μορφή σκαπιτάου, -τώ, για τους χρήστες του Βορείου ιδιώματος που δεσπόζει στην περιοχή, και σκαπετώ για τους χρήστες του Ημιβορείου και Νοτίου ιδιώματος της ίδιας περιοχής:

Σκαπιτάου, -τώ {[ska-pi-táu] αόρ. σκαπέτσα [ska-pé-tsa]}:

1α. αμετάβ. "περνώ την κορυφογραμμή και χάνομαι στον ορίζοντα": του λύκου¹ τον ουρμίνιβαν κι αυτός ί/ιγι: τα πρόβατα σκαπέτσαν, παροιμ. για ισχυρογνώμονα· β. για ουράνια σώματα "δύω": σκαπέτσι ου ήλιους για τ'μάς "ο ήλιος βασίλεψε για μάς· είναι πια αργά", παροιμ, Τσίγκαλ. I 190, 183·
2. μετὰβ. / αμετάβ. "καταπίνω κάτι": μι πουνάει ου λμός κι δε "μπουρώ² να σκαπιτίσου Ρίζοπ.· Μάνος 52· γενικά, "περνά από το άλλο μέρος, ράχης, βράχου, ορίζοντα, ποταμιού".

¹ } : ουρανική προφορά του λ.

² Το μ ως εκθέτης: "μπουρώ [mburó], "μπ [mb], για άρθρωση του προένρινου [b].

Αντίθετο: *ξιμιντανίζου* "ερχόμενος ξεπροβάλλω στην κορυφή πρανούς" (< ξε- + τουρκ. *meydan* "προσκήνιο, ξέφωτο, πλατεία" + παραγ. τέρμα -ίζου).

1.2 Ελάχιστη ενδεικτική γεωγραφική εξάπλωση

Γέρμας Καστοριάς, Βόιο, Γρεβενά, Γιάννενα, Έβρος, Τρίκαλα *σκαπιτάου*, -ώ ~ Θεσπρωτία, Πυρσόγιαννη, Μεσσηνία *σκαπετώ* ~ Κρήτη *σκαπετέρνω* "περνά ύψωμα και εξαφανίζομαι", συνών. *ξεσκαπουλάρω*, *σκαπουλίζω*. Αρκαδία *σκαπετάω* "χάνομαι στον ορίζοντα· διαφεύγω". Κοζάνη *σκαπιτώ* "το σκάω· κρύβομαι". Όλυμπος *σκαπιτώ* "φεύγω, χάνομαι, δραπετεύω, το σκάω". Πήλιο, Σέρρες *σκαπιτίζου* "δραπετεύω". Σάμος *σκαπιτίζου* "διαφεύγω, ξεφεύγω", συνών. *σκαπλάρου*. Αιτωλία: *σκαπετάω* "φεύγω γρήγορα, διαφεύγω". Ήπειρος *σκαπιτάου* "πετάω κάτι· εξαφανίζομαι πίσω από τον λόφο". κοινή ν.ε. και νότια ιδιώματα *σκαπετώ* "εξαφανίζομαι στο ορίζοντα· διαφεύγω, γλιτώνω". βλάχ. *skáritu* "δύω· εξαφανίζομαι στον ορίζοντα· καταπίνω". λαϊκ. ρουμ. *scăpăta* "δύω, βασιλεύω· ξεπέφτω, φτωχαίνω". ιταλ. *scápito*, απρφ. *scapitare*, "χάνω, υστερώ, υπολείπομαι, ζημιώνω οικονομικά ή ηθικά". αλβαν. *shkupetónj*, *kapetónj*, *kapërcëj* "(πηδώντας) υπερβαίνω εμπόδιο, ξεπερνάω". Δεν εντοπίσαμε τη λέξη στις ανατολικές διαλέκτους Κύπρου και Πόντου.

Ετυμολογικό πεδίο

– *σκάπιτον*, του {[skáritu] ους.}: "το αόρατο πίσω μέρος ενός υψώματος· αντιπρανές" Τζώτζη. ΕΕΔ Βόιο *σκάπιτον* ~, Γέρμας, τοπωνύμιο *Σκάπιτον* "όπου υπάρχει καμπή εδάφους". Γρεβενά *σκάπιτους*, ου ~ και, μεταφορικά, *κατάποση*. Όλυμπος *σκάπιτον* "φυγή". Αρκαδία *σκάπετο* ~. Αιτωλία *σκαπέτι*, το "τρέξιμο". Ε < *σκαπιτώ*, ό.π.

1.3 Ιστορία της λέξης – Ετυμολογία – Υποθέσεις

Οι επικρατέστερες εκδοχές συγκλίνουν στο λατινικό ρ. *capito*, ως ετυμολογική αρχή:

ΕΤΥΜ α1. < βλάχ. *skáritu* < μεσν. λατ. *cápito* "τερματίζω, είμαι στο όριο, συνορεύω".

α2. < βλάχ. *skáritu* < λατ. **ex-cápito* "ξεπερνάω το σύνορο", σύνθετο: < πρόθημα *ex-* + μεσν. λατ. ρ. *cápito* "τερματίζω, είμαι στο όριο, συνορεύω", με μετασχηματισμό-υπέρθωση του επιθ. *capitalis* "κεφαλικός" < λατ. *caput* "κεφάλι". Parahagi 49, 1063, 222, 1315· πβλ. Νικολαΐδης 480. Du Cange lat., λ. *capitare*¹.

Η ίδια ετυμολόγηση με το *scáritu* προτείνεται και για το αντίστοιχο ρ. *scăpăta* ~ της ρουμανικής. Du Cange lat. λ. *capitare*¹. www.ducange.enc.sorbonne.fr, λ. Meyer-Lübke 1635· Dex online λ. *scăpăta*· πβλ. Parahagi 49, 1063.

Άλλες υποθέσεις

β. < ιταλ. *scápito* "ζημιώνω οικονομικά ή ηθικά" < **ex-cápito*, ό.π. Battaglia λ. *scapitare*¹. Cortelazzo-Zolli λ. *scapitare*³. Dex online λ. *scăpăta*. Σύγκρινε Meyer-Lübke 2651 και Pianigiani λ. *scapitare*· πβλ. προβηγικανό *descaptar*.

γ. < αρχ. *σκάπετος* "τάφρος" < *σκάπτω*. Βλ. και Λιάπης 404· Chantraine 1011.

Η δεύτερη (β) πρόταση ετυμολόγησης, παρατίθεται ως υπόθεση εργασίας, εφόσον η πρώτη (α) φαίνεται περισσότερο πιθανή, τουλάχιστο για το εξεταζόμενο Ιδίωμα. Ο ιδιοματικός τύπος συμφωνεί με εκείνον της βλάχικης μορφολογικά και σημασιολογικά σε όλο το εύρος των σημασιών του, χωρίς εμφανή σημασιολογική σχέση με τον αντίστοιχο *scápito* της ιταλικής, ο οποίος μαρτυρείται με την ίδια σημασία "ζημιώνω" από τον 13^ο αι. (Cortelazzo-Zolli ό.π.). Σημειώνεται ότι, ενώ ο Parahagi 41, ένας από τους εισηγητές της (α) υπόθεσης υποστηρίζει πως οι ιταλικές λέξεις εισήλθαν στη βλάχικη, κατά κανόνα, μέσω της ελληνικής, στην προκειμένη περίπτωση θεωρεί το *σκαπιτώ* δάνειο της ελληνικής από τη βλάχικη και, περαιτέρω, από τη λατινική, χωρίς αναφορά σε μεσολάβηση της ιταλικής. Η παρουσία του τύπου με τις σημασίες "εξαφανίζομαι στον ορίζοντα· δύω" στα ελληνικά, στα βλάχικα και στα ρουμανικά θα μπορούσε, ίσως, να αιτιολογήσει την υπόθεση ότι το *σκαπιτώ* ως μορφή και σημασία ανάγεται στη μεσαιωνική *βαλκανική λατινική* (*Latinun Balcanicum*)· πβλ. Ντίνας 2006: 225.

Για ό,τι αφορά την (γ) υπόθεση, ο τύπος *skáritu* θα μπορούσε να καταταγεί στο λεξιλόγιο εκείνο της μεσαιωνικής λατινικής, στο οποίο περιλαμβάνονται λέξεις με ρίζες μη λατινικές, προερχόμενες από γλώσσες κατακτημένων λαών, εάν αποδειχτεί ότι ανήκει στο ελληνικό γλωσσικό υπόστρωμα της βλάχικης· όπως δηλαδή οι ομηρικές *τάτας*, *τέτα* και άλλες λέξεις που είναι κοινές σε ελληνικά ιδιώματα, στη βλάχικη και στην ευρύτερη μεσαιωνική λατινική· βλ. Meyer-Lübke 1890: 19· πβλ. Μπουσμπούκης 183.

Ακόμη, θα μπορούσε να διατυπωθεί η υπόθεση ότι οι διαφορές σημασίας του *σκαπιτώ* από το ιταλικό *scárito* θα μπορούσαν να αναζητηθούν στην απόσταση χώρου και χρόνου που διαφοροποίησε χώρισε τους δύο τύπους, κυρίως σημασιολογικά. Η ιστορία στην προκειμένη περίπτωση μας παρέχει τα εξής δεδομένα:

Τα Βαλκάνια –όπως και η Ιβηρία– αποτελούν «πλευρική» και απομονωμένη περιοχή μέσα στον εκτεταμένο λατινόφωνο χώρο της μεσαιωνικής εποχής, σε αντίθεση προς το λεγόμενο γαλλο-ιταλικό κέντρο. Παράλληλα, οι πιο νέοι τύποι περιόριζαν τους αρχαιότερους στα απόμερα σημεία του λατινόφωνου χώρου. Οι συνθήκες αυτές θα μπορούσαν να αιτιολογήσουν την υπόθεση ότι οι βαλκανικοί τύποι *σκαπιτώ* /*scáritu*, *scáráta* μπορεί να είναι παλαιότεροι, λειτούργησαν σε διαφορετικό γεωγραφικό – κοινωνικό περιβάλλον, αποτύπωσαν με διαφορετικό τρόπο την πραγματικότητα και γι' αυτό είχαν αυτόνομη εξέλιξη. Σύμφωνα με την (α) υπόθεση, από τις τέσσερις, τουλάχιστο, διάφορες σημασίες του μεσαιωνικού *capitare* οι Βαλκάνιοι ομιλητές υιοθέτησαν εκείνη που σχετίζεται με την υπέρβαση του ορίζοντα "πέρασμα υψώματος· δύση". Η υπόθεση αυτή υποστηρίζεται από τον συνδυασμό τριών αντίστοιχων «κανόνων» της γλωσσογεωγραφίας: της «απομονωμένης περιοχής», των «πλευρικών περιοχών» και της «μεταγενέστερης περιοχής»· βλ. Coseriu 59 κ.ε.· Du Cange ό.π.

2. Σκαπιτώ, σκαπουλάρω (ε)σκαπιάζω· αλληλεπίδραση, επικάλυψη σημασιών και μετασημασιολόγηση

Από τη «γεωγραφική εξάπλωση» (ό.π.) μπορεί να παρατηρήσει κανείς μια τάση επέκτασης της σημασίας του *σκαπιτώ* από εκείνη της βλάχικης, των ιδιωμάτων του Γράμμου και των περισσότερων, ίσως, περιοχών του ελλαδικού χώρου, ώστε να καλύπτει και τη σημασία "δραπετεύω", χωρίς, βέβαια, να σχετίζεται με τη σημασία του ιταλικού *scárito*. Σε πολλά ιδιώματα και, κυρίως, στην κοινή ν.ε. τείνει να ταυτιστεί με το ρ. *σκαπουλάρω*, με το οποίο σε πολλές περιοχές συμπίπτει σημασιολογικά και χρησιμοποιείται ως συνώνυμό του. Τέλος, σε πολλές περιοχές αποστασιοποιείται τελείως από τη σημασία "περνάω την κορυφογραμμή και χάνομαι στον ορίζοντα· δύω· καταπίνω".

Παράλληλα, σε ελληνικά λεξικά που επιχειρήσαν μέχρι σήμερα ετυμολόγηση της λ. *σκαπετώ* παρατηρείται η αναγωγή της στο ιταλικό *scappáre* "ξεφεύγω, δραπετεύω"· σχετ. βλ. λεξικά Δημητράκου, Σταματάκου, Τεγόπουλου-Φυτράκη και Δορμπαράκη. Σύμφωνα με την ιταλική λεξικογραφία, τουλάχιστο, οι ετυμολογικές αρχές των ρ. *scapoláre* και *scappáre* έχουν, αντίστοιχα, ως εξής:

ι. *σκαπουλάρω* "ξεμπλέκω, διαφεύγω κίνδυνο, γλιτώνω" (Λεξικό Κοινής Νεοελλην., Α.Π.Θ. 2114)
ΕΤΥΜ < ιταλ. απαρέμφ. *scapoláre* "ξεμπλέκω· τα καταφέρνω· γλιτώνω" < παρασύνθετο ρ. ομιλ. λατ. **excapuláre* "βγάζω τη θηλιά, ξεμπλέκω, λύνομαι" < αφαιρ. πρόθημα *ex-* "εκτός" + λατ. *capulus* (< ρ. *carpio*) "σχοινί, θηλιά, αγκόνη"· κατ' επέκτ., το **excapuláre* θα σήμαινε "απελευθερώνομαι από σύλληψη ή γλιτώνω από αγκόνη". Cortelazzo-Zolli, λ. *scapoláre*³. Pianigiani λ. *skapoláre*¹.

ιι. (ε)σκαπιάζω. Το ρήμα αυτό της κυπριακής ελληνικής είναι πιθανό δάνειο του ιταλικού *scappáre* (13^{ος} αι.) ή του προβηγκιανού *escapar* "γλιτώνω, σώζομαι, απελευθερώνομαι".

ΕΤΥΜ < παρασύνθετο ρ. ομιλ. λατ. **excapáre* "βγάζω την κάπα (για να φύγω πιο γρήγορα)" < αφαιρ. πρόθημα *ex-* + *cáppa*. Γιαγκουλλής 23, 85· Cortelazzo-Zolli ό.π.

Από το *excapáre* της ομιλούμενης λατινικής προέρχονται επίσης το βλάχικο *ascáru*, το ισπανικό και πορτογαλικό *escapar*, το γαλλικό *échapper*, το αγγλ. *escape* κ.ά.

3. Συμπεράσματα και απόπειρα ερμηνείας

Σύμφωνα με τα παραπάνω, το *σκαπιτώ* δεν έχει ετυμολογική σχέση με τα *σκαπουλάρω* και (ε)σκαπιάζω, ενώ ιστορικά δεν έχει ούτε σημασιολογική. Αντίθετα, ιστορικά σημασιολογική σχέση συνδέει μόνο τα *σκαπουλάρω* και (ε)σκαπιάζω, μεταξύ τους. Τα τρία ρήματα ανάγονται σε διαφορετική ετυμολογική αρχή το καθένα, εφόσον αντιστοιχούν σε τρία διαφορετικά θέματα.

Κατά τα άλλα, εδώ μπορεί να παρατηρήσει κανείς τα εξής: την παρετυμολόγηση του ρήματος *σκαπιτώ* και την ετυμολογική του σύγχυση με τα (ε)*σκαπιάζω* και –τουλάχιστο τη σημασιολογική– με το *σκαπουλάρω*. τη σύγχυση στη χρήση των λατινογενών θεμάτων *σκαπιτ(ώ)* και *σκαπουλ(-άρω)*, μορφολογικά και σημασιολογικά και, παράλληλα, την τάση σημασιολογικής υποκατάστασης του *σκαπιτώ* από το *σκαπουλάρω* στον ελλαδικό χώρο.

Τα γεγονότα αυτά συνδέονται πιθανόν με παράγοντες που επισημαίνει η γλωσσογεωγραφία, όπως με τη λεγόμενη *παθολογία των λέξεων*, με τον πραγματολογικό παράγοντα και με τη *λαϊκή ετυμολογία*.

Γίνεται εδώ λόγος για «παθολογία λέξης», με την έννοια ότι μια λέξη –εδώ το *σκαπιτώ*– χάνει μέρος της αρχικής της αναφορικής σημασίας στο μέτρο που «καλύπτεται» πλέον σημασιολογικά από το *σκαπουλάρω*. Έτσι, θα μπορούσε να γίνει λόγος για μορφή «σημασιολογικής αφομοίωσης» του *σκαπιτώ* από το *σκαπουλάρω*, με δυναμική ολικής αφομοίωσης δυνάμει του γλωσσικού νόμου της οικονομίας· τέλος, για μορφή κατά προσέγγιση συμφυρμού των ίδιων λέξεων, εφόσον αυτές παρουσιάζουν φωνητική ομοιότητα και, με το πέρασμα του χρόνου, σημασιολογική συγγένεια. Είναι ανάγκη, ωστόσο, να διευκρινίσουμε στο σημείο αυτό ότι, αν λάβει κανείς υπόψη του τις σημασίες των λέξεων *σκαπιτώ*, *σκαπουλάρω* και κατά δεύτερο λόγο, του κυπριακού (ε)*σκαπιάζω*, θα παρατηρήσει ότι το μόνο κοινό σημασιολογικό στοιχείο που είχαν εξαρχής οι λέξεις αυτές είναι η γενική, ουδέτερη έννοια του "φεύγω" (πβλ. και Coseriu 51).

Από πραγματολογική άποψη, για να προσεγγίσουμε τον ειδικό τρόπο διαμόρφωσης των σημασιών του *σκαπιτώ* στον βαλκανικό χώρο, αφενός, και την υποτιθέμενη προϊούσα «παθολογία» τους, αφετέρου, θα επικαλεστούμε τη θέση ότι οι σημασίες των λέξεων διαμορφώνονται με βάση τις συγκεκριμένες γλωσσικές πράξεις· πβλ. Coseriu 50 και Parahagi 43, για λέξεις της συγκεκριμένης περιοχής. Το γεγονός, λοιπόν, ότι η λέξη *σκαπιτώ* προσέλαβε και διατήρησε τις σημασίες "περνώ την κορυφογραμμή και χάνομαι στον ορίζοντα", "δύω", "καταπίνω" οφείλεται προφανώς στη γεωφυσική διαμόρφωση του πεδίου δραστηριοτήτων των χρηστών, το οποίο ήταν επί αιώνες τα βουνά, σε συνδυασμό με την κτηνοτροφία, νομαδική και μη, και τις χειρσαίες μεταφορές. Αντίστροφα, η τάση περιορισμού και υποκατάστασης των σημασιών παρουσιάζεται, ίσως, στο μέτρο που χρήση τους συμπίπτει με τη συρίκνωση της υπαίθριας κτηνοτροφικής ζωής, με τη διάδοση της λέξης και σε μη ηπειρωτικές, πεδινές περιοχές, με την αστικοποίηση και με την πάροδο του χρόνου· με άλλους όρους, στο μέτρο που ο τύπος *σκαπιτώ* ως γλωσσικό σημείο χάνει τα αρχικά σημεία αναφοράς του. Συναφής αιτία με την προηγούμενη θα μπορούσε θεωρηθεί το γεγονός της μίμησης ιδιωμάτων μεγαλύτερης περιωπής, όπως η επικράτηση της κοινής ν.ε. με το πρότυπο της γλώσσας των αστικών κέντρων και των μέσων μαζικής επικοινωνίας.

Στη γλωσσογεωγραφική προσέγγιση λαμβάνεται επικουρικά υπόψη και η συμβολή της λαϊκής ετυμολόγησης των λέξεων στη διαμόρφωση της μορφής / σημασίας τους σε μια δεδομένη χρονική στιγμή. Ενώ δηλαδή για τον γλωσσολόγο το *σκαπιτώ* είναι τύπος που προέρχεται από το *scapito*, είναι πιθανό για τον απλό ομιλητή να συνδέεται με το *scapolo* / *σκαπουλάρω* και με τη σημασία "διαφεύγω, γλιτώνω" του *σκαπουλάρω*, μέσω της ουδέτερης, αλλά κοινής έννοιας του "φεύγω"· πβλ. Coseriu 50 κ.ε.

3.1 Σύνοψη

Από τα στοιχεία που εκθέσαμε, η ετυμολογική αρχή του ρήματος *σκαπιτώ* δεν φαίνεται να συμπίπτει με την αρχή κανενός από τα παρώνυμα ή συνώνυμά του. Το ρήμα αυτό έχει επίσης τη δική του διακριτή σημασία, "ξεπερνώ όριο ή εμπόδιο", "δύω", και διαστέλλεται σημασιολογικά προς τα *σκαπουλάρω* και *εσκαπιάζω*, με μια βασική ειδοποιό διαφορά: δεν έχει όπως εκείνα αρνητική σημασία. Ωστόσο, η λεξικογραφία κατά κανόνα το ανάγει ετυμολογικά στο ιταλικό *scappare*, ενώ σε πολλές περιοχές της Ελλάδας του αποδίδεται η σημασία του *σκαπουλάρω*. Η ταύτιση με το τελευταίο του έχει επιφέρει «σημασιολογική στένωση» στο *σκαπιτώ* και, κυρίως, «υποτίμηση»³ εξαιτίας του αρνητικού φορτίου των εννοιών "το σκάω - δραπετεύω" του *σκαπουλάρω*.

Ας σημειωθεί, τέλος, ότι, πέρα από όσα αναφέραμε, το φαινόμενο της σύγχυσης θεμάτων διάφορων γλωσσών, για διαφορετικούς λόγους, είναι σύνθητες σε περιοχές της Βαλκανικής, όπου επί αιώνες έρχονταν σε επαφή άνθρωποι και γλώσσες, όπως η ελληνική, η βλάχικη, οι ιταλικές διάλεκτοι, η αλβανική και η νοτιοσλαβική.

³ Επίσης *επιδείνωση*: έτσι αποδίδει τον αγγλικό όρο *pejoration* ο Γ. Ξυδόπουλος, μεταφραστής του Λεξικού του Ντ. Κρύσταλ 507, 454, 166, ενώ αντίστοιχα οι Μ. Μητσιάκη και Α. Φλιάτουρας στο Α. McMahon 256 χρησιμοποιούν τη λέξη *χειροτέρευση*. Επίσης, στην ελληνική λεξικογραφία χρησιμοποιείται για τον ίδιο όρο η λέξη *δείνωση*.

ABSTRACT

The present paper focuses on the vocabulary instruction material as well as the vocabulary development and assessment techniques currently used as part of Modern Greek Language courses in Greek junior high schools. Its main aim is to examine whether there is a correlation between the instructors' theoretical assumptions concerning vocabulary and the relevant techniques and materials used by them. A sampling investigation on Greek literature teachers was conducted with the use of a special questionnaire. The results reveal a division of the instructors in two almost equivalent groups: those who regard vocabulary and grammar as equally important and those who consider vocabulary of secondary importance. However, the instructors' theoretical preferences seem to have no major impact on their actual teaching practices. In particular, although many of them claim that they try to work on vocabulary in a systematic way within a communicative model, as far as the teaching materials are concerned, the vast majority of them tend to rely on traditional solutions such as the excessive use of textbooks where vocabulary is approached separately from other language domains.

Λέξεις κλειδιά: νεοελληνική γλώσσα – διδασκαλία, δευτεροβάθμια εκπαίδευση, λεξιλόγιο, γραμματική, τεχνικές ανάπτυξης λεξιλογίου, διδακτικό υλικό, αξιολόγηση λεξιλογίου, αποτελέσματα έρευνας

1. Εισαγωγή

Η πρόβλεψη του νέου Διαθεματικού Ενιαίου Πλαισίου Προγραμμάτων Σπουδών για εφαρμογή της επικοινωνιακής και κειμενοκεντρικής μεθόδου στο μάθημα της Νεοελληνικής Γλώσσας (Γαβριηλίδου κ.α. 2006α, 2006β, ΥΠ.Ε.Π.Θ. - Π.Ι. 2002) προκρίνει την ισότιμη ενασχόληση με τη γραμματική και το λεξιλόγιο (Γούτσος 2006, Μήτσης 1998, Παραδιά κ.α. 2009), γεγονός που συνάδει με τις σύγχρονες γλωσσικές θεωρίες για τη σημασία του λεξιλογίου (Aitchison 1994, Γούτσος 2006, Meara 1997, Μότσιο 1994, Μπακάκου-Ορφανού 2005, Σακελλαρίου 2005, Singleton 1999). Σύμφωνα με τις τελευταίες, το λεξιλόγιο αποτελεί βασικό συστατικό της γλώσσας πάνω στο οποίο βασίζεται η γλωσσική παραγωγή και συνεπώς η γραμματική έρχεται ως ένα σύστημα κανόνων να τακτοποιήσει τις προϋπάρχουσες λεξιλογικές δομές. Η θέση αυτή και την αξία της γραμματικής αναγνωρίζει και τη λεξιλογική φύση της γλώσσας προβάλλει (Coady 1997: 235, Lewis 1993: 51 & 89, Μήτσης 2004: 145, Wilkins 1972: 111). Παρότι, βέβαια, τα περισσότερα ρεύματα διδασκαλίας του λεξιλογίου σχετίζονται κυρίως με τη διδασκαλία της δεύτερης γλώσσας, καθώς σε αυτόν τον χώρο έχουν διενεργηθεί οι περισσότερες επιστημονικές έρευνες, θεωρητικές αναλύσεις και διδακτικές εφαρμογές για το λεξιλόγιο, από αυτά μπορούμε να αντλήσουμε χρήσιμα συμπεράσματα και για τη διδασκαλία του λεξιλογίου της μητρικής γλώσσας (βλ. Γούτσος 2006).

Επιπλέον, άλλες έρευνες (Brown 1993, Coady 1997) αποκάλυψαν την εξής αντίφαση: αφενός οι διδάσκοντες πιστεύουν ότι είναι εύκολο να μάθει κανείς τις λέξεις και γι' αυτό θεωρούν ότι δεν είναι

απαραίτητη η διδασκαλία του λεξιλογίου και αφετέρου οι διδασκόμενοι αποδίδουν ιδιαίτερη σημασία στις λέξεις και τείνουν να τις μάθουν με μεγαλύτερη προθυμία απ' ό,τι τη γραμματική. Εκτός, όμως, από την ανάδειξη της σημασίας του λεξιλογίου στο πλαίσιο του γλωσσικού μαθήματος, η σύγχρονη γλωσσική θεωρία επισημαίνει ότι για να καθιερωθεί το λεξιλόγιο στις συνειδήσεις των εκπαιδευτικών και των μαθητών, θα πρέπει οι πρώτοι να έχουν πάντοτε υπόψη τα τρία βασικά ζητήματα που αφορούν τη διδασκαλία του λεξιλογίου: α) τι λεξιλόγιο θα διδαχθεί (Nation 2001), β) ποια είναι η δομή του (Μπακάκου-Ορφανού 1996, 2005, Nation 2001) και γ) ποιες είναι οι ενδεδειγμένες αρχές και μέθοδοι διδασκαλίας του (Αναστασιάδη-Συμεωνίδη 1996, Γούτσος 2006, Κατσιμαλή 2001, Μήτσης 1996, Μπακάκου-Ορφανού 2003, Nation 2001, Sökmen 1997, Χαραλαμπίκης 1994, Daller et al. 2007).

Στο πλαίσιο των παραπάνω θεωριών, η παρούσα έρευνα θα εστιάσει στις μεθόδους αξιολόγησης του λεξιλογίου και θα εξετάσει τη σχέση τους με τις τεχνικές ανάπτυξης του λεξιλογίου καθώς και με το αντίστοιχο διδακτικό υλικό. Η συσχέτιση αυτή συνάδει με τη θέση ότι η αξιολόγηση του λεξιλογίου και η γενικότερη γλωσσική αξιολόγηση αποτελούν όψεις του ίδιου νομίσματος και ότι πρέπει να συμβάλλουν στην ανάπτυξη της επικοινωνιακής επάρκειας των μαθητών (Μπακάκου-Ορφανού 1996, 2005, Read 2000). Η τελευταία, άλλωστε, λειτουργία της αξιολόγησης του λεξιλογίου καταδεικνύει τη γενικότερη σημασία της αξιολόγησης, η οποία έχει τονιστεί από πολλούς μελετητές¹. Επιπλέον, η παρούσα εργασία αποβλέπει να συμβάλει στην έρευνα σχετικά με τη διδασκαλία του λεξιλογίου στο χώρο της καλλιέργειας της μητρικής γλώσσας, όπου παρατηρείται έλλειψη σχετικών εμπειρικών δεδομένων (Γούτσος 2006).

2. Θεωρητικά ζητήματα για την αξιολόγηση του λεξιλογίου

Η μεγαλύτερη έμφαση στο λεξιλόγιο, συνεπάγεται την ανάγκη για μεγαλύτερη εξοικείωση των εκπαιδευτικών με τον τρόπο ανάπτυξης δοκιμασιών (τεστ) που θα διασφαλίζουν μια αξιόπιστη εκτίμηση της επίδοσης των μαθητών στην εκμάθηση του λεξιλογίου σε άμεση συνάρτηση με τις επικοινωνιακές τους ανάγκες. Βασική προϋπόθεση για την επίτευξη του παραπάνω στόχου είναι να εντάσσεται η αξιολόγηση του λεξιλογίου στη γενικότερη αποτίμηση της γλωσσικής επάρκειας των μαθητών (Read 2000: 4). Άλλωστε, βάσει των σύγχρονων επιστημονικών αντιλήψεων, η καλή γνώση μιας γλώσσας δεν εξαρτάται τόσο από το πόσες λέξεις γνωρίζει κανείς, αλλά από το πόσο αποτελεσματικά τις χρησιμοποιεί, προκειμένου να επιτύχει συγκεκριμένο επικοινωνιακό στόχο. Αυτός είναι ο λόγος που οι σύγχρονες δοκιμασίες γλωσσικής επάρκειας στην πλειονότητά τους προσομοιώνουν πραγματικές επικοινωνιακές περιστάσεις, στις οποίες οι μαθητές είναι πιθανό να εμπλακούν εκτός τάξης. Οι μαθητές θα μπορέσουν με μια καλή γνώση του λεξιλογίου να εκτελέσουν με επιτυχία αυτές τις δραστηριότητες, αλλά η αξιολόγηση δεν θα πρέπει να επικεντρώνεται πρωτίστως ούτε στο λεξιλόγιο ούτε σε κανένα άλλο γλωσσικό επίπεδο. Αντίθετα, οι εκπαιδευτικοί πρέπει να στοχεύουν στην εκτίμηση του βαθμού ανταπόκρισης των μαθητών τους στις συνολικές απαιτήσεις της εκάστοτε γλωσσικής δραστηριότητας. Αυτό δε σημαίνει ότι οι εκπαιδευτικοί πρέπει να περιοριστούν σε δοκιμασίες επικοινωνιακού χαρακτήρα παραγκωνίζοντας τις παραδοσιακές, που εστιάζουν στη γνώση και χρήση των λέξεων ως μεμονωμένων σημασιολογικών μονάδων. Η βέλτιστη αξιολογική πρακτική συνδυάζει επικοινωνιακές και παραδοσιακές πρακτικές κατά τρόπο, ώστε να αλληλοσυμπληρώνονται ανάλογα με τις απαιτήσεις του εκάστοτε διδακτικού στόχου.

Στη συνέχεια, ο Read (2000: 8-13) παρουσιάζει τρεις άξονες της αξιολόγησης του λεξιλογίου, οι οποίοι μπορούν να περιγραφούν εν συντομία ως εξής:

- (α) μεμονωμένη αξιολόγηση: μέτρηση της γνώσης της σημασίας ή χρήσης των λέξεων ως ανεξάρτητων γλωσσικών μονάδων – ενσωματωμένη αξιολόγηση: λεξιλογικές μετρήσεις που αποτελούν μέρος της αξιολόγησης της χρήσης ευρύτερων της λέξης γλωσσικών μονάδων.
- (β) επιλεκτική αξιολόγηση: μέτρηση λεξιλογικής γνώσης που εστιάζει σε συγκεκριμένα λεξικά στοιχεία – εξαντλητική αξιολόγηση: μέτρηση λεξιλογικής γνώσης που λαμβάνει υπόψη το συνολικό λεξιλογικό περιεχόμενο είτε του γλωσσικού υλικού που προσλαμβάνουν (δραστηριότητες κατανόησης γραπτού και προφορικού λόγου) είτε του γλωσσικού υλικού που παράγουν οι εξεταζόμενοι (δραστηριότητες παραγωγής γραπτού και προφορικού λόγου).
- (γ) αξιολόγηση ανεξάρτητη από το περιεχόμενο: μέτρηση λεξιλογικής γνώσης όπου ο εξεταζόμενος μπορεί να παραγάγει την προσδοκώμενη απάντηση χωρίς αναφορά σε οποιοδήποτε περιεχόμενο – αξιολόγηση εξαρτημένη από το περιεχόμενο: μέτρηση λεξιλογικής γνώσης, η οποία αξιολογεί την ικανότητα του εξεταζόμενου να λαμβάνει υπόψη του τις πληροφορίες από τα συμφραζόμενα προκειμένου να παραγάγει την προσδοκώμενη απάντηση.

¹ Βλ. ενδεικτικά Brown 2003, Δημητρόπουλος 1981, Ηλιοπούλου 2009, Huot 2002.

Οι παραπάνω τρεις διαστάσεις, βέβαια, όπως διευκρινίζει ο Read, δεν συνιστούν ένα ολοκληρωμένο πρότυπο αξιολόγησης του λεξιλογίου, αλλά μάλλον ένα ευρύ θεωρητικό πλαίσιο που επιτρέπει μια αδρομερή κατηγοριοποίηση των διαφόρων τύπων αξιολόγησης που χρησιμοποιούνται σήμερα. Ειδικότερα, συμβάλλουν στον εντοπισμό των κοινών σημείων μεταξύ των αξιολογήσεων παραδοσιακού τύπου και των αξιολογήσεων που αποτιμούν το λεξιλόγιο πιο ολιστικά. Πρέπει εδώ να σημειωθεί ότι οι παραπάνω διαστάσεις αξιολόγησης του λεξιλογίου που προτείνει ο Read, έχουν γίνει ευρύτερα αποδεκτές από τους συναφείς επιστημονικούς κύκλους (Schmitt 2000: 172-174).

3. Στόχοι και υπόθεση έρευνας

Βασίζομενη στο παραπάνω θεωρητικό πλαίσιο, η παρούσα έρευνα στοχεύει στην εμπειρική αποτίμηση των γενικότερων διδακτικών αρχών, των ειδών διδακτικού υλικού και των τεχνικών ανάπτυξης και αξιολόγησης του λεξιλογίου που χρησιμοποιούν οι εκπαιδευτικοί Δευτεροβάθμιας Εκπαίδευσης για το μάθημα της Νεοελληνικής Γλώσσας γυμνασίου. Απώτεροι στόχοι είναι: α) να αποτιμηθεί ο βαθμός συνάφειας μεταξύ των χρησιμοποιούμενων τεχνικών ανάπτυξης λεξιλογίου και των σχετικών διδακτικών υλικών αφενός και της αρχής της ισοτιμίας γραμματικής και λεξιλογίου αφετέρου, β) να διαπιστωθεί αν συνδυάζονται ή όχι οι δραστηριότητες παραδοσιακού και επικοινωνιακού χαρακτήρα κατά την εν λόγω αξιολόγηση, γ) να διαπιστωθεί αν όντως ο κάθε τύπος αξιολόγησης του λεξιλογίου μπορεί να συσχετιστεί με συγκεκριμένο/-α είδος/-η διδακτικού υλικού ή με συγκεκριμένη τεχνική ανάπτυξης του λεξιλογίου.

Προκειμένου να εξυπηρετηθούν οι παραπάνω στόχοι, συντάχτηκε ένα ερωτηματολόγιο (βλ. υποενότητα 4.1) με το οποίο επιχειρήθηκε να καλυφθούν όλα τα θέματα που σχετίζονται με τη διδασκαλία του λεξιλογίου. Όσον αφορά τα ερωτήματα σχετικά με τα είδη αξιολόγησης, αντιστοιχούν στους έξι διαφορετικούς τύπους αξιολόγησης του λεξιλογίου που διακρίνει συμβατικά ο Read και οι οποίοι ανά δύο αποτελούν τα άκρα των τριών κύριων αξόνων αξιολόγησης (βλ. ενότητα 2). Τα άκρα αυτών των αξόνων αντιστοιχούν σε δύο βασικές κατηγορίες εκπαιδευτικών. Στο ένα άκρο βρίσκονται οι πιο «παραδοσιακοί» εκπαιδευτικοί, οι οποίοι δίνουν μεγαλύτερη έμφαση στη γραμματική από ό,τι στο λεξιλόγιο και αναμένεται να υιοθετούν τρόπους αξιολόγησης που τείνουν περισσότερο προς την αποτίμηση της γνώσης μεμονωμένων και συγκεκριμένων λεξικών μονάδων και λιγότερο προς την αποτίμηση της χρήσης τους σε συνάρτηση με το γλωσσικό τους περιβάλλον. Αντίθετα, στο άλλο άκρο εντοπίζονται οι εκπαιδευτικοί που ενστερνίζονται μια ισόρροπη ενασχόληση τόσο με τη γραμματική όσο και με το λεξιλόγιο, και αυτοί αναμένεται να τείνουν περισσότερο προς την αξιολόγηση όχι μόνο της γνώσης σημασιών αλλά και της επικοινωνιακής χρήσης των λέξεων, ενταγμένων όμως σε ευρύτερες γλωσσικές μονάδες και σε άμεση συνάρτηση με δεδομένο περιεχόμενο.

4. Μεθοδολογία

4.1 Κατάρτιση ερωτηματολογίου

Το ερωτηματολόγιο² για τη συλλογή του ερευνητικού υλικού καταρτίστηκε βάσει των αναλύσεων των Nation (2001) και Read (2000) για τα αγγλικά και των Ιακώβου κ.α. (2004), Μπακάκου-Ορφανού (2003) και Γούτσου (2006) για τα ελληνικά και ελέγχθηκε, στο βαθμό του δυνατού, τόσο η εγκυρότητά όσο και η αξιοπιστία του. Απευθύνεται στους φιλολόγους που διδάσκουν το μάθημα της Νεοελληνικής Γλώσσας στο Γυμνάσιο και εστιάζει στα εξής:

- (α) στις γενικότερες απόψεις των διδασκόντων για τη θέση του λεξιλογίου στο γλωσσικό μάθημα, για το είδος του λεξιλογίου που πρέπει να διδάσκεται και για τον τρόπο που πρέπει να γίνεται αυτή η διδασκαλία,
- (β) στις τεχνικές που χρησιμοποιούν οι διδάσκοντες για τη διδασκαλία νέων λέξεων,
- (γ) στις τεχνικές που χρησιμοποιούν οι διδάσκοντες για να βελτιώσουν την ικανότητα χρήσης των λέξεων από τους μαθητές τους,
- (δ) στις πηγές άντλησης και στους τρόπους ανάπτυξης του εν χρήσει σχετικού διδακτικού υλικού,
- (ε) στους προτιμώμενους τύπους δραστηριοτήτων κατά τη διδασκαλία του λεξιλογίου,
- (στ) στους τύπους αξιολόγησης του λεξιλογίου που προτιμούν οι εκπαιδευτικοί και
- (ζ) στις προτάσεις που έχουν να καταθέσουν οι εκπαιδευτικοί για βελτίωση των εγχειριδίων και κατ' επέκταση των σχετικών αναλυτικών προγραμμάτων σπουδών σε σχέση με τη διδασκαλία του λεξιλογίου.

² Για το πλήρες κείμενο του ερωτηματολογίου βλ. Παραδία κ.α. (υπό δημοσίευση).

Στην παρούσα έρευνα θα επικεντρωθούμε στα αποτελέσματα που προέκυψαν από τις ερωτήσεις κλειστού τύπου (πολλαπλών επιλογών και ιεράρχησης κατά προτεραιότητα) των πεδίων εστίασης (α), (β), (γ), (δ), (ε) και (στ).

4.2 Μέθοδος συγκέντρωσης του ερευνητικού υλικού και ποσοτικής ανάλυσης

Το ερωτηματολόγιο διανεμήθηκε στους φιλόλογους 117 γυμνασίων σε όλη την Ελλάδα, οι οποίοι διδάσκουν το μάθημα της Νεοελληνικής Γλώσσας. Στην έρευνα τελικά συμμετείχαν συνολικά 529 εκπαιδευτικοί από τα σχολεία αυτά. Μετά τη διενέργεια της δειγματοληψίας και τη συγκέντρωση των συμπληρωμένων ερωτηματολογίων, όλες οι απαντήσεις κλειστού τύπου καταχωρίστηκαν σε βάση δεδομένων δομημένη κατ' αντιστοιχία με τα διάφορα πεδία εστίασης του ερωτηματολογίου. Η ανάλυση των αποτελεσμάτων περιλάμβανε πίνακες και διαγράμματα συχνοτήτων, καθώς οι περισσότερες μεταβλητές του αρχείου δεδομένων ήταν κατηγορικές. Η συνάφεια μεταξύ του είδους των απαντήσεων διδασκόντων και μαθητών και των δημογραφικών ή άλλων παραμέτρων μελετήθηκε με τη χρήση του στατιστικού ελέγχου chi square test (χ^2). Όλοι οι στατιστικοί έλεγχοι πραγματοποιήθηκαν σε επίπεδο σημαντικότητας $\alpha = 5\%$ με τη χρήση του στατιστικού προγράμματος SPSS 13.0 για Windows.

4.3 Περιγραφή του δείγματος

Όσον αφορά τη γενικότερη περιγραφή του δείγματος των συμμετεχόντων στην έρευνα, εκτεταμένη συμμετοχή είχαν τα σχολεία της επαρχίας (αστικές, ημιαστικές και αγροτικές περιοχές) από όπου προέρχεται το 83,9% των εκπαιδευτικών, ενώ μόλις το 16,1% είναι από τα δύο μεγάλα αστικά κέντρα. Επίσης, οι γυναίκες απετέλεσαν την πλειονότητα του δείγματος (79,4% έναντι μόλις του 20,6% των ανδρών). Επιπροσθέτως, το δείγμα των εκπαιδευτικών περιέλαβε όλα τα σχετικά επίπεδα διδακτικής εμπειρίας: α) 43,0% πάνω από 12 έτη, β) 21,6% από 6 έως 11 έτη και γ) 35,4% έως 5 έτη.

5. Αποτελέσματα³

5.1 Βασικά θέματα διδασκαλίας λεξιλογίου

Σχετικά με το ζήτημα για τον ρόλο του λεξιλογίου στη γλωσσική διδασκαλία, οι απόψεις των διδασκόντων παρουσιάζονται διχασμένες, καθώς για το 50,9% των διδασκόντων, η θέση του λεξιλογίου είναι περιφερειακή και επεξηγηματική, ενώ για το 49,1% είναι κεντρικής σημασίας (Γράφημα 1). Την ίδια εικόνα παρουσιάζουν όλες οι δημογραφικές υποομάδες των διδασκόντων.

Γράφημα 1 Η θέση του λεξιλογίου στη γλωσσική διδασκαλία

³ Χάριν συντομίας, σε κάθε μέτρηση αναφέρονται οι τυχόν διαφοροποιήσεις μεταξύ διδασκόντων που υποστηρίζουν την κεντρική θέση του λεξιλογίου και διδασκόντων που υποστηρίζουν την περιφερειακή θέση του στο γλωσσικό μάθημα. Δε γίνεται αναφορά σε καμία άλλη υποομάδα διδασκόντων (διάκριση βάση φύλου, τόπου εργασίας, διδακτικής εμπειρίας κτλ.).

Στο ερώτημα «ποιο είδος λεξιλογίου νομίζετε ότι πρέπει να διδάσκεται;» η συντριπτική πλειονότητα των διδασκόντων (73,0%⁴) θεωρεί ότι τόσο το απαιτητικό (Α=λόγιο) όσο και το μη απαιτητικό (ΜΑ=μη λόγιο) πρέπει να χρησιμοποιούνται, ανάλογα όμως με τον εκάστοτε διδακτικό στόχο και μεθοδολογία (Γράφημα 2). Στη δεύτερη θέση έρχεται η παράλληλη διδασκαλία απαιτητικού και μη απαιτητικού λεξιλογίου ανάλογα με τα ενδιαφέροντα των μαθητών (41,2%). Ακολουθούν η διδασκαλία αποκλειστικά του μη απαιτητικού λεξιλογίου (31,0%), η διδασκαλία του ειδικού λεξιλογίου (30,4%) και η διδασκαλία του απαιτητικού λεξιλογίου (11,5%).

Γράφημα 2 Προτίμηση σε είδος λεξιλογίου που πρέπει να διδάσκεται (%)

Παράλληλα, οι απόψεις των διδασκόντων σε ό,τι αφορά τον τρόπο εκμάθησης του λεξιλογίου ποικίλλουν, με το 50,1%⁵ να υποστηρίζουν τη συστηματική διδασκαλία κειμένων εστιασμένων στο λεξιλόγιο, το 49,1% να προτιμούν εναλλαγή πολλαπλών τρόπων και το 44,2% να υποστηρίζουν τη χρήση προφορικού λόγου, όπως διάλογο ή συζήτηση εστιασμένη στο λεξιλόγιο (Γράφημα 3). Η αξιοποίηση των καταλόγων λέξεων και η τυχαία/απροσχεδίαστη εκμάθηση μέσω της επαφής του μαθητή με το γλωσσικό υλικό συγκεντρώνουν 20,9% έκαστο.

Γράφημα 3 Τρόποι εκμάθησης λεξιλογίου (%)

5.2 Τεχνικές ανάπτυξης για την εκμάθηση της σημασίας των λέξεων

Όσον αφορά τους τρόπους οριοθέτησης της σημασίας των άγνωστων λέξεων στο πλαίσιο της διδακτικής διαδικασίας, τα αποτελέσματα έδειξαν ότι αυτή γίνεται κατά κύριο λόγο με βάση τα συμφραζόμενα, δηλαδή με τη χρήση προτάσεων και παραδειγμάτων με άγνωστες λέξεις (66,2%)⁶. Ακολουθούν η εφαρμογή της ετυμολογίας (48,4%), η εναλλαγή πολλαπλών τρόπων οριοθέτησης

⁴ Ποσοστό όσων ιεραρχούν την αντίστοιχη πρόταση στις δύο πρώτες θέσεις από πλευράς προτεραιότητας.

⁵ Ποσοστό όσων ιεραρχούν την αντίστοιχη πρόταση στις δύο πρώτες θέσεις από πλευράς προτεραιότητας.

⁶ Ποσοστό όσων ιεραρχούν την αντίστοιχη πρόταση στις τρεις πρώτες θέσεις από πλευράς προτεραιότητας.

(37,4%), η χρήση συνωνύμων (35,2%) και η παροχή διευκρινίσεων από τον διδάσκοντα (31,6%). Με χαμηλότερα ποσοστά ακολουθούν η εφαρμογή διαλόγου (29,9%), η χρήση του λεξικού (16,1%) και η χρήση του ορισμού (14,6%) (Γράφημα 4).

Γράφημα 4 Τρόποι οριοθέτησης σημασίας άγνωστης λέξης (%)

Η οριοθέτηση των άγνωστων λέξεων με βάση τα συμφραζόμενα προτιμάται από όλους τους διδάσκοντες. Από την άλλη μεριά, οριακά ενισχυμένη είναι η εναλλαγή πολλαπλών τρόπων οριοθέτησης μεταξύ όσων πιστεύουν ότι το λεξικό κατέχει κεντρική θέση στη γλωσσική διδασκαλία, δηλαδή 41,2%, έναντι του 33,8% όσων θεωρούν ότι κατέχει περιφερειακή θέση ($p < 0,04$). Παρόμοια εικόνα παρουσιάζει και η χρήση της ετυμολογίας, η οποία χρησιμοποιείται από το 51,7% όσων θεωρούν ότι το λεξικό κατέχει περιφερειακή θέση έναντι 45% όσων θεωρούν ότι κατέχει κεντρική θέση ($p < 0,04$).

Ειδικότερα, σε επίπεδο διδακτικής εφαρμογής επικρατέστερη είναι η πρακτική ένταξης των λέξεων σε σημασιολογικά πεδία (π.χ. συνώνυμα/ αντίθετα, υπώνυμα/ υπερώνυμα) σε ποσοστό 72,7%. Ακολουθούν η ομαδοποίηση λέξεων με βάση τα θεματικά πεδία (46,4%), με βάση την ετυμολογία (43,4%) και η σκόπιμη επανάληψη λέξεων σε προτάσεις ή κείμενα (42,4%). Χαμηλότερο ποσοστό συγκεντρώνουν η παροχή διευκρινίσεων σχετικά με την επικοινωνιακή περίσταση/ κειμενικό είδος στην οποία χρησιμοποιείται μια λέξη (38,3%), η ομαδοποίηση λέξεων με βάση τις γραμματικοσυντακτικές δομές (όπως κλίση, τρόπος σύνταξης) (16,1%), η καταγραφή νέων λέξεων σε μορφή καταλόγων (15,5%) και η αναφορά σε άλλες λέξεις με βάση γραμματικοσυντακτικές δομές (11,6%) (Γράφημα 5).

Γράφημα 5 Τεχνικές διδασκαλίας λεξιλογίου

Στο παραπάνω πλαίσιο, η χρήση του περικειμένου για τον προσδιορισμό της σημασίας μιας λέξης, δηλαδή η χρήση των συμφραζομένων και των γενικότερων επικοινωνιακών περιστάσεων είναι μια ευρέως διαδεδομένη πρακτική, καθώς το 67,4% των ερωτηθέντων την εφαρμόζουν πάρα πολύ (30,5%) ή πολύ (36,9%).

5.3 Τεχνικές ανάπτυξης της χρήσης του λεξιλογίου από τους μαθητές

Προκειμένου να αποτιμηθεί η προσπάθεια που καταβάλλουν οι εκπαιδευτικοί ώστε να βελτιώσουν τη χρήση του διδασκόμενου λεξιλογίου από τους μαθητές, τέθηκε ερώτημα για το βαθμό στον οποίο κάνουν αναφορά στις συνυποδηλώσεις (δηλαδή στις δευτερεύουσες ή περιφερειακές σημασίες μιας λέξης) και στις συνηθέστερες λέξεις και λεξικούς συνδυασμούς που χρησιμοποιούνται σε κάθε είδος κειμένου και επικοινωνιακή περίσταση (π.χ. φιλική επιστολή, αίτηση κλπ.).

Και οι δύο παραπάνω πρακτικές, λοιπόν, είναι μερικώς διαδεδομένες, καθώς την πρώτη την εφαρμόζει το 43,1% και τη δεύτερη το 52,9% των διδασκόντων πολύ τακτικά (Γράφημα 6). Παρόμοια αποτελέσματα παρουσίασαν και οι υποομάδες των διδασκόντων, με εξαίρεση τους υποστηρικτές της κεντρικής-περιφερειακής θέσης του λεξιλογίου, οι οποίοι ως προς την αναφορά στις συνυποδηλώσεις παρουσίασαν ποσοστά 51,2% και 35,3% αντίστοιχα ($p < 0,001$).

Γράφημα 6 Τεχνικές ανάπτυξης – χρήση λεξιλογίου (%)

5.4 Διδακτικό υλικό με εστίαση στο λεξιλόγιο

Από μία σειρά πηγών άντλησης γλωσσικού υλικού για τις οποίες ερωτήθηκαν οι διδάσκοντες, τα σχολικά εγχειρίδια (βιβλίο μαθητή/ εκπαιδευτικού) συγκεντρώνουν το υψηλότερο ποσοστό χρήσης (90,2%). Ακολουθούν η επιλογή κειμένων από τον ημερήσιο και περιοδικό τύπο (61,6%) και οι διασκευές κειμένων για τον σκοπό της γλωσσικής διδασκαλίας (53,7%). Οι υπόλοιπες πηγές συγκεντρώνουν χαμηλότερα ποσοστά: κείμενα που έχουν αντληθεί από το διαδίκτυο (29,7%), κείμενα από τους ίδιους τους εκπαιδευτικούς (16,1%), άλλες πηγές επιλεγμένες βάσει των διδακτικών στόχων (11,5%), κείμενα με ειδικό λεξιλόγιο (8,7%) και κείμενα μαθητών (8,5%) (Γράφημα 7).

Γράφημα 7 Πηγές άντλησης γλωσσικού υλικού για τη διδασκαλία λεξιλογίου (%)

Σε ό,τι αφορά τη χρήση προϊόντων της τεχνολογίας ως μέρος του διδακτικού υλικού με έμφαση στο λεξιλόγιο, καταγράφεται περιορισμένη υιοθέτηση σχετικού λογισμικού. Μόλις το 4,9% των

εκπαιδευτικών χρησιμοποιούν πάρα πολύ (1,3%) ή πολύ (3,6%) σχετικό λογισμικό έναντι του 63,4%, που δηλώνει ότι δε χρησιμοποιεί καθόλου σχετικό λογισμικό (Γράφημα 8). Η χρήση λογισμικού παραμένει περιορισμένη σε όλες τις υποομάδες των διδασκόντων.

Γράφημα 8 Χρήση λογισμικού για τη διδασκαλία γλώσσας και λεξιλογίου (%)

5.5 Δραστηριότητες και ασκήσεις λεξιλογίου

Όσον αφορά τις διάφορες διδακτικές δραστηριότητες τις σχετικές με το λεξιλόγιο, η πλειονότητα των εκπαιδευτικών έχει αξιοποιήσει διδακτικά κατά κύριο λόγο τις λεξιλογικές δραστηριότητες/ασκήσεις του βιβλίου μαθητή/εκπαιδευτικού (78,0%). Κατά 15,6% οι διδάσκοντες έχουν σχεδιάσει και αναπτύξει οι ίδιοι δραστηριότητες και ασκήσεις, ενώ το 6,5% χρησιμοποιεί κυρίως δραστηριότητες και ασκήσεις από άλλες πηγές (Γράφημα 9).

Γράφημα 9 Προτιμώμενες πηγές άντλησης διδακτικών δραστηριοτήτων (%)

Επιπλέον, ζητήθηκε από τους εκπαιδευτικούς να προσδιορίσουν εκείνους τους τύπους ασκήσεων που αξιοποιούν κατά κύριο λόγο στο πλαίσιο της διδασκαλίας του λεξιλογίου. Από τις πιο διαδεδομένες ασκήσεις ήταν οι ασκήσεις συνώνυμων/αντίθετων (69,2%)⁷, η αντιστοίχιση λέξεων/σημασιών (62,0%), η δημιουργία προτάσεων από λέξεις (60,3%) και οι ασκήσεις συμπλήρωσης κενών σε κείμενο (57,7%). Χαμηλότερα ποσοστά έλαβαν η διόρθωση λεξικών λαθών σε παραγωγές γραπτού λόγου μαθητών (18,1%), οι ασκήσεις ομαδοποίησης λέξεων με βάση κάποιο κοινό χαρακτηριστικό (16,3%), η δημιουργία ιστοριών με λέξεις (10,0%) και τα παιχνίδια ρόλων (5,5%) (Γράφημα 10).

⁷ Ποσοστό όσων ιεραρχούν την αντίστοιχη πρόταση στις δύο πρώτες θέσεις από πλευράς προτεραιότητας.

Γράφημα 10 Προτιμώμενοι τύποι ασκήσεων για τη διδασκαλία του λεξιλογίου (%)

Είναι αξιοσημείωτο ότι μεταξύ όσων τοποθετούν το λεξιλόγιο σε κεντρική θέση στη γλωσσική διαδικασία, η δημιουργία προτάσεων από λέξεις βρίσκεται στην πρώτη θέση με 66,5% έναντι 54,3% όσων θεωρούν το λεξιλόγιο περιφερειακής σημασίας ($p < 0,01$).

5.6 Τύποι αξιολόγησης του λεξιλογίου

Βάσει των αποτελεσμάτων της έρευνας, προτιμάται κυρίως η ενσωματωμένη αξιολόγηση, δηλαδή η αξιολόγηση της χρήσης των λέξεων στο πλαίσιο προτάσεων, περιόδων κλπ. (90,3%)⁸. Ακολουθεί η πρακτική της αξιολόγησης που εξαρτάται από το περιεχόμενο (56,4%) και η εξαντλητική αξιολόγηση (53,2%), δηλαδή η αποτίμηση της λεξιλογικής γνώσης στο πλαίσιο δραστηριοτήτων κατανόησης και παραγωγής γραπτού και προφορικού λόγου). Με χαμηλότερο ποσοστό ακολουθούν η επιλεκτική αξιολόγηση (42,0%, δηλαδή η αποτίμηση της λεξιλογικής γνώσης που εστιάζεται στη χρήση συγκεκριμένων λέξεων που θεωρούνται σημαντικές), η μεμονωμένη αξιολόγηση (25,2% δηλαδή η αποτίμηση της γνώσης της σημασίας ή χρήσης των λέξεων ως ανεξάρτητων γλωσσικών μονάδων) και η αξιολόγηση ανεξάρτητα από το περιεχόμενο (12,7%) (Γράφημα 11).

Γράφημα 11 Προτιμώμενοι τύποι αξιολόγησης (%)

Τέλος, το είδος της αξιολόγησης του λεξιλογίου δε διαφοροποιείται σημαντικά σε σχέση με την άποψη για τη θέση του λεξιλογίου στη γλωσσική διαδικασία, όπως γίνεται φανερό από τα στοιχεία του πίνακα 1.

⁸ Ποσοστό όσων ιεραρχούν την αντίστοιχη πρόταση στις δύο πρώτες θέσεις από πλευράς προτεραιότητας.

ΑΞΙΟΛΟΓΗΣΗ		ΣΥΝΟΛΟ	Θέση λεξιλογίου	
			Περιφερειακή	Κεντρική
Μεμονωμένη	%	25,2	24,5	25,9
Ενσωματωμένη	%	90,3	87,4	93,4
Επιλεκτική	%	42	42,8	41,3
Εξαντλητική	%	53,2	49,8	56,8
Ανεξάρτητη από το περιεχόμενο	%	12,7	14,9	10,4
Εξαρτημένη από το περιεχόμενο	%	56,4	57,2	55,6

Πίνακας 9 Είδος αξιολόγησης λεξιλογίου βάσει της θέσης που του αποδίδεται στη γλωσσική διδασκαλία

6. Συζήτηση – συμπεράσματα

Οι θεωρητικές τοποθετήσεις των φιλολόγων σχετικά με τη θέση, το περιεχόμενο και τον τρόπο διδασκαλίας του λεξιλογίου γενικότερα, όπως αποτυπώνονται στα αποτελέσματα, φανερώνουν μία αύξηση του ενδιαφέροντος για το λεξιλόγιο. Το γεγονός αυτό επιβεβαιώνεται από: α) το αξιόλογο ποσοστό των εκπαιδευτικών που αναγνωρίζουν το λεξιλόγιο ως τομέα ισότιμο με τη γραμματική, β) την αναγκαιότητα της ταυτόχρονης διδασκαλίας απαιτητικού και μη απαιτητικού λεξιλογίου, γ) την πρόκριση του συστηματικού τρόπου διδασκαλίας του και δ) την αξιοσημείωτη προτίμηση του διαλόγου με έμφαση στο λεξιλόγιο και της εναλλαγής των τρόπων διδασκαλίας. Αντίθετα, οι κατάλογοι λέξεων και η τυχαία/απροσχεδίαστη εκμάθηση του λεξιλογίου, τρόποι που προσιδιάζουν στο παραδοσιακό μοντέλο διδασκαλίας με κέντρο τη γραμματική, προτιμήθηκαν σε πολύ χαμηλότερο ποσοστό από ό,τι οι προηγούμενοι.

Σε επίπεδο επιμέρους τεχνικών οριοθέτησης της λεξικής σημασίας, πρώτη σε προτίμηση έρχεται η χρήση των συμφραζομένων των λέξεων και δεύτερη η ετυμολογική ανάλυση, πρακτική την οποία προτιμούν ιδιαιτέρως οι πιο έμπειροι εκπαιδευτικοί. Επίσης, σε επίπεδο διδακτικών εφαρμογών, παρατηρείται η πρόκριση της χρήσης σημασιολογικών και θεματικών πεδίων εις βάρος της ομαδοποίησης των λέξεων βάσει γραμματικοσυντακτικών δομών. Τα παραπάνω στοιχεία, αφενός, αποτελούν ενδείξεις μιας τάσης για ευρύτερη αξιοποίηση του περιεχόμενου και εστίαση στις επικοινωνιακές περιστάσεις με σκοπό τον προσδιορισμό και την εμπέδωση της σημασίας των λέξεων και, αφετέρου, προβάλλουν ως ακόμη πιο επιτακτική την αναγκαιότητα ενίσχυσης της διδασκαλίας του λεξιλογίου. Εξάλλου, αρκετοί εκπαιδευτικοί επιδιώκουν να αναφέρονται στις συνυποδηλώσεις και στους χαρακτηριστικούς λεξικούς συνδυασμούς για κάθε είδος κειμένου, στοιχεία που θεωρούνται αναγκαία για τη λεξιλογική συγκρότηση των μαθητών.

Σε αντίθεση, όμως, με τα προηγούμενα, οι τύποι διδακτικού υλικού που χρησιμοποιούν οι εκπαιδευτικοί στην τάξη δεν φαίνεται να εναρμονίζονται με το επικοινωνιακό πρότυπο διδασκαλίας του λεξιλογίου και της γλώσσας γενικότερα. Συγκεκριμένα, η σχεδόν ολική επικράτηση των δραστηριοτήτων του σχολικού εγχειριδίου⁹ μεταξύ των πηγών άντλησης διδακτικού υλικού, η οποία αντικατοπτρίζεται εμμέσως στην αρκετά χαμηλότερη προτίμηση υλικού που είτε προέρχεται από το διαδίκτυο είτε δημιουργείται από τους ίδιους τους εκπαιδευτικούς, οδηγούν στον παραγκωνισμό του λεξιλογίου. Ως άμεση συνέπεια αυτής της τάσης έρχεται και η περιορισμένη χρήση σχετικού με τη γλωσσική διδασκαλία και το λεξιλόγιο λογισμικού. Οι λίγες διαφοροποιήσεις που παρατηρήθηκαν σε ορισμένες υποομάδες εκπαιδευτικών δεν είναι ικανές να ανατρέψουν αυτή την κατάσταση.

Πάντως, οι προτιμώμενοι τύποι δραστηριοτήτων κατά κάποιο τρόπο «μοιράζονται» μεταξύ ασκήσεων παραδοσιακού και ασκήσεων επικοινωνιακού ή κειμενοκεντρικού χαρακτήρα, καθώς δύο από τις τέσσερις πρώτες θέσεις καταλαμβάνουν ασκήσεις της πρώτης κατηγορίας, δηλαδή οι ασκήσεις συνωνύμων/αντιθέτων και η αντιστοίχιση λέξεων/σημασιών, ενώ τις επόμενες δύο θέσεις κατέχουν ασκήσεις της δεύτερης κατηγορίας, δηλαδή η συμπλήρωση κενών σε κείμενο και η δημιουργία προτάσεων από λέξεις. Η προτίμηση, μάλιστα, του τελευταίου είδους δραστηριότητας από τους

⁹ Για περισσότερα βλ. Αγγελάκος κ.α. 2006 για την Α΄ Γυμνασίου, Γαβριηλίδου κ.α. 2006α για τη Β΄ Γυμνασίου και Κατσαρού κ.α. 2006 για την Γ΄ Γυμνασίου.

εκπαιδευτικούς που θεωρούν κεντρική τη θέση του λεξιλογίου στο μάθημα της Νεοελληνικής Γλώσσας παρουσίασε στατιστικά σημαντικές τιμές. Την ίδια στιγμή όμως, από τις τέσσερις χαμηλότερες θέσεις προτίμησης, τη μια μόνο καταλαμβάνει άσκηση παραδοσιακού τύπου, ενώ τις τρεις υπόλοιπες καταλαμβάνουν ασκήσεις επικοινωνιακής μορφής, γεγονός που, προφανώς, δεν ευνοεί την ενίσχυση της ενασχόλησης με το λεξιλόγιο και τις επικοινωνιακές του προεκτάσεις.

Οι προτιμήσεις των εκπαιδευτικών σε σχέση με τον τύπο αξιολόγησης του λεξιλογίου θα λέγαμε ότι είναι ανάλογες, τουλάχιστον ποσοτικά, με τις θεωρητικές τοποθετήσεις για το λεξιλόγιο, όπως τις παρουσιάσαμε προηγουμένως. Ωστόσο, δε συμφωνούν με τις τάσεις των σχετικών πρακτικών που ακολουθούνται στην τάξη. Ειδικότερα, η παρατηρούμενη επικράτηση της ενσωματωμένης αξιολόγησης σε συνδυασμό με το γεγονός ότι η αξιολόγηση βάσει του περιεχόμενου καταλαμβάνει τη δεύτερη θέση, δείχνουν ότι και στην αξιολογική διαδικασία το λεξιλόγιο στις περισσότερες περιπτώσεις αντιμετωπίζεται σε συνδυασμό με τα υπόλοιπα γλωσσικά επίπεδα και ότι όλο και περισσότερο αποτιμάται η γνώση του σε ένα ευρύτερο γλωσσικό και επικοινωνιακό πλαίσιο. Παρατηρείται, λοιπόν, μια αντίφαση μεταξύ της αυξημένης προτίμησης αξιολογήσεων επικοινωνιακού τύπου και της σχετικά ισχυρής ακόμη επιμονής σε παραδοσιακού τύπου διδακτικές δραστηριότητες.

Συνεπώς, τα πορίσματα της παρούσας έρευνας καταδεικνύουν την ύπαρξη μιας γενικότερης αντίφασης που διέπει τη σχολική μας πραγματικότητα και στη συγκεκριμένη περίπτωση τη γλωσσική μας εκπαίδευση, σύμφωνα με την οποία οι θεωρητικές αντιλήψεις δεν συνδυάζονται με αντίστοιχες διδακτικές πρακτικές. Μιλώντας ειδικότερα για τη διδασκαλία του λεξιλογίου, θα λέγαμε ότι οι αντιλήψεις των διδασκόντων σε συνδυασμό με πολλές από τις αντίστοιχες προβλέψεις των αναλυτικών προγραμμάτων αποτελούν απλώς θεωρητικές τοποθετήσεις οι οποίες δεν υλοποιούνται σε επίπεδο εφαρμογών. Η αντίφαση αυτή οφείλεται προφανώς τόσο στην καταλυτική επίδραση που ασκεί στον γλωσσικό τομέα η παραδοσιακή αντίληψη, όσο και στην απουσία της απαιτούμενης σχετικής επιμορφωτικής παρέμβασης. Όσον αφορά τις τεχνικές ανάπτυξης του λεξιλογίου, μόνο στην περίπτωση των τεχνικών ανάπτυξης των λεξικών συνυποδηλώσεων, όσοι θεωρούν κεντρική τη θέση του λεξιλογίου τείνουν να τις αναφέρουν συχνότερα από αυτούς που θέτουν το λεξιλόγιο στο περιθώριο. Επιπλέον, όσον αφορά τις τεχνικές ανάπτυξης της κύριας σημασίας των λέξεων, παρατηρήθηκε επίσης οριακή διαφοροποίηση μεταξύ των δύο ομάδων εκπαιδευτικών. Τέλος, ως προς το διδακτικό υλικό, μόνο σε δύο περιπτώσεις παρατηρήθηκαν αξιοσημείωτες διαφοροποιητικές τάσεις μεταξύ των δύο μερίδων των εκπαιδευτικών του δείγματος. Η πρώτη αφορά τις κειμενοκεντρικές δραστηριότητες της συμπλήρωσης κενών σε κείμενο και της ένταξης των λέξεων σε προτάσεις, οι οποίες παρουσίασαν μια αυξημένη προτίμηση από τους εκπαιδευτικούς της πρώτης ομάδας. Η δεύτερη περίπτωση σημαντικής διαφοροποίησης εντοπίζεται στις απαντήσεις που δόθηκαν στο ερώτημα για τον βαθμό αφομοίωσης του λεξιλογικού υλικού από τους μαθητές. Εδώ πιο αρνητικοί εμφανίστηκαν όσοι ακολουθούν περισσότερο παραδοσιακούς τρόπους διδασκαλίας και λιγότερο όσοι ακολουθούν πιο σύγχρονους. Σε όλες τις άλλες περιπτώσεις δεν διαφάνηκε κάποια στατιστικά σημαντική διαφοροποίηση.

Συμπερασματικά, υπάρχει πολύς ακόμη δρόμος να διανυθεί τόσο από πλευράς θεωρίας όσο και από πλευράς διδακτικής πράξης, ώστε να έχουμε ουσιαστική βελτίωση της θέσης του λεξιλογίου στο πλαίσιο του μαθήματος της Νεοελληνικής Γλώσσας, σύμφωνα με τις αρχές και τα πορίσματα της εφαρμοσμένης γλωσσολογίας (Lewis 1997, Nation 2001: 60-112, Gairns-Redman 1995: 73-76 & 115-170). Κατ' αρχάς, οι εκπαιδευτικοί πρέπει να εκτιμήσουν την καθοριστική συμβολή του λεξιλογίου στη γλωσσική συγκρότηση των μαθητών τους και στην επίτευξη κάθε είδους γλωσσικής επικοινωνίας (Schmitt-McCarthy 1997: 85-88, Woolard 2000: 30-31) καθώς και να κατανοήσουν εις βάθος τη συστηματικότητα του λεξιλογίου με όρους σημασιολογικών σχέσεων (συνωνυμία, αντωνυμία, υπωνυμία κτλ., βλ. Μπακάκου 2005: 104 κ.εξ.). Στη συνέχεια, χρειάζεται να εξοικειωθούν και να αποκτήσουν τη δυνατότητα να διακρίνουν σαφέστερα τα διάφορα επίπεδα λεξιλογίου (βασικό λεξιλόγιο, λεξιλόγιο επάρκειας, ειδικό λεξιλόγιο επάρκειας, απαιτητικό λεξιλόγιο, βλ. Μπακάκου-Ορφανού 2003: 157-164), πράγμα που θα τους βοηθήσει να αποφασίζουν τι είδους λεξιλόγιο θα πρέπει να διδάξουν κάθε φορά. Εφόσον αποκτήσουν στέρεη θεωρητική βάση, χρειάζεται να βρουν τρόπους εφαρμογής της στη διδακτική πράξη, δίνοντας έμφαση π.χ. στη σημασία της μορφολογικής ανάλυσης κυρίως των σύνθετων και των παραγώγων λέξεων (προθήματα, επιθήματα, λεξική βάση κτλ., βλ. Ευθυμίου κ.α. 2011) και στη χρήση μεγάλης ποικιλίας αυθεντικών κειμένων για τη διδασκαλία τόσο της μορφής (Ευθυμίου 2011: 161-163) όσο και της σημασίας των λέξεων (Βάμβουκας 2001: 151-153, Κατσιμαλή 2001: 144-150).

Επιπλέον, για την επίτευξη των συγκεκριμένων στόχων κρίνεται απαραίτητη η κατάλληλη προσαρμογή των θεωρητικών βοηθημάτων των εκπαιδευτικών αλλά και των διδακτικών υλικών που αυτοί θα χρησιμοποιήσουν στην τάξη, έτσι ώστε να μπορέσουν να αναθεωρήσουν ουσιαστικά τις διδακτικές πρακτικές τους και να καθοδηγηθούν προς μια σύμμετρη ενασχόληση με τη γραμματική και το λεξιλόγιο (Hatch-Brown 1995: 372-392, Lewis 1993: 133, Nattlinger 1988). Επιπλέον, είναι

απαραίτητο να εφαρμοστεί νέα διαδικασία κατάρτισης των δοκιμών λεξιλογικής αξιολόγησης, ώστε να διαπιστώνεται ο βαθμός επίτευξης των επιδιωκόμενων στόχων, να καθοδηγούνται κατάλληλα οι μαθητές στη χρήση δημιουργικών τρόπων κατάκτησης του λεξιλογίου και να καθορίζεται, βάσει της σχετικής ανατροφοδότησης, η περαιτέρω πορεία της διδασκαλίας.

ABSTRACT

This paper refers to the results of our research on the existential semantic of the verbs ‘έχω/имам’ and ‘είμαι/съм’ in Modern Greek and Bulgarian languages. There is significant data of structures used to express existentiality, characterization, location, possessiveness, in both languages. The main focus of the comparative analysis is on the semantic specificity, the areas of use, the distribution of existential functions, the concurrence between the two verbs. We consider the semantic and syntactic constrains and the interaction with other categories (definiteness/indefiniteness, personality/impersonality, affirmation/negation etc.).

Keywords: existentiality, existential constructions, concept, conceptualizing metaphor.

1. Εισαγωγή

Αντικείμενο της ανακοίνωσης είναι οι υπαρκτικές λειτουργίες των γλωσσικών δομών με τα ρήματα ‘έχω’ και ‘είμαι’ στην ελληνική και στη βουλγαρική γλώσσα. Αποτελεί προσπάθεια για περαιτέρω διερεύνηση των ήδη υπαρχόντων συμπερασμάτων (Buchholz 1989, Nicolova 1990, Assenova 2001, Alexieva 1992) σχετικά με τις ποικίλες ιδιότητες των ‘έχω’ και ‘είμαι’ για τη δήλωση της υπαρκτικότητας (existentiality) στις δυο γλώσσες. Εξετάζονται οι σημασιολογικές ιδιαιτερότητες, η λειτουργική πολυσημαντικότητα των συγκεκριμένων ρημάτων και οι σφαίρες χρήσης τους, η κατανομή των υπαρκτικών λειτουργιών και ο ανταγωνισμός μεταξύ τους, η αλληλεπίδραση τους με άλλες κατηγορίες.

Το γλωσσικό υλικό επικυρώνει την παρατήρησή μας, ότι η έκφραση της υπαρκτικότητας με το ρήμα ‘έχω’ (κοινό γνώρισμα των βαλκανικών γλωσσών και των διαλέκτων τους), εμφανίζεται σε μικρότερο βαθμό στη βουλγαρική γλώσσα σε σχέση με την ελληνική, οι παραλληλισμοί όμως ανάμεσα στις δυο γλώσσες είναι σημαντικοί και σαφώς δείχνουν την πραγμάτωση της ίδιας γνωστικής μεταφοράς: *Σ περιέχει Ρ στο δικό του χώρο*. Η μεταφορά αυτή εκδηλώνεται πέρα από τα όρια του λεξιλογικού επιπέδου, καθώς οι έννοιες ως καθολικές ενοποιήσεις/σύνολα του νοήματος εξαπλώνονται σε όλο το χώρο της γλώσσας. Το παράδειγμα των ‘είμαι’-συνταγμάτων με υπαρκτική σημασία εκπροσωπείται από πολυάριθμες δομές, κάθε μια εκ των οποίων με διαφορετικό τρόπο ορίζεται από περιφερειακά, λιγότερο ή περισσότερο δευτερεύοντα κατηγορήματα όπως τοποθέτηση στον χώρο και στο χρόνο, χαρακτηρισμός, κτητικότητα (Nicolova 1990: 236).

Οι τελευταίες γλωσσο-πολιτισμικές μελέτες εστιάζουν στην πραγματολογική προέλευση του λόγου, στην αλληλεπίδραση της σύνταξης και της σημασίας, στη γλώσσα και στη σκέψη και στο ζήτημα των εννοιολογικών καθολικών. Το λεξιλόγιο και η γραμματική ενώνουν τις προσπάθειές τους και αναπαράγουν από κοινού την ανθρώπινη γνώση, με ένα συνεχές από μεταβάσεις μεταξύ τους, το οποίο πραγματοποιείται στο ενιαίο εννοιολογικό σύστημα της γλώσσας μέσω μεταφορικών και μετωνυμικών μοντέλων (Kaškin 2001: 45).

Καλή απεικόνιση των παραπάνω είναι τα δεδομένα από το συνταγματικό και τον παραδειγματικό άξονα των ρημάτων ‘είμαι’ και ‘έχω’ στις δυο βαλκανικές γλώσσες, οι οποίες αποτελούν αντικείμενο της έρευνάς μας.

2. 'Είμαι/сѣм' και 'έχω/имам' ως πλήρη ρήματα - σημασιολογικές ιδιαιτερότητες

Τα ρήματα 'είμαι/сѣм' και 'έχω/имам' μετέχουν ως δομικό συστατικό σε δυο βασικές ομάδες υπαρκτικών προτάσεων, οι οποίες διαφοροποιούνται με βάση το δηλωτικό περιεχόμενο: προτάσεις δήλωσης γενικευτικής υπαρκτικότητας (generic existentiality) και προτάσεις, οι οποίες εκφράζουν συγκεκριμένη, περιστασιακά καθορισμένη υπαρκτικότητα (situational determinated existentiality). Η διαφορά μεταξύ της γενικευτικής και της συγκεκριμένης υπαρκτικότητας καθορίζεται από το βαθμό σύνδεσης της ύπαρξης του αντικειμένου με μια συγκεκριμένη κατάσταση, συνεπώς αυτός ο διαχωρισμός λειτουργεί εξαρχής υπό όρους (Nicolova 1990: 237).

2.1 Δομές δήλωσης γενικευτικής υπαρκτικότητας

Κοινή ιδιαιτερότητα του βαλκανικού γλωσσικού χώρου, απόλυτα φυσική για την ελληνική, τη βουλγαρική και την αλβανική γλώσσα, είναι η απρόσωπη χρήση του ρήματος 'έχω' για την έκφραση της γενικευτικής υπαρκτικότητας (Nicolova 1990, Buchholz 1989: 329-336, Assenova 1987: 150; Ivanova 2002: 5-24; Kaldieva-Zaharieva 2005: 263). Η ενεργοποίηση της απρόσωπης μορφής του ρήματος έχει τη γνωσιακή εξήγησή της – η υπαρκτικότητα βρίσκεται σε στενή αλληλεπίδραση με την κατηγορία της δείξης¹, τα συστατικά της οποίας εξασφαλίζουν τη σύνδεση της δήλωσης με μια συγκεκριμένη κατάσταση.

Όλες οι δομές που ανήκουν σ' αυτήν την ομάδα βασίζονται σε μοντέλο, όπου η ονοματική φράση, της οποίας η ύπαρξη επιβεβαιώνεται ή ακυρώνεται, έχει θέση άμεσου αντικειμένου, πάντα χωρίς οριστικό άρθρο. Οι υπαρκτικές λειτουργίες του απρόσωπου 'έχει' είναι αναμφισβήτητες, σημασιολογικά οι εν λόγω δομές βρίσκονται σε «συμπληρωματική κατανομή» (complementary distribution) με τις 'είμαι'-δομές. Σε συνταγματικό επίπεδο δεν είναι υποχρεωτική η εμφάνιση τοπικών και χρονικών προσδιορισμών στην επιφανειακή δομή. Όταν η φράση είναι 'περιστασιακά καθορισμένη', ο τοπικός προσδιορισμός γίνεται θέμα της πρότασης και η δομή αποκτά την ακόλουθη μορφή: $V_{imp.} + O_d + A$ (*Έχει λαϊκή στην πόλη/σήμερα.*) ή $A + V_{imp.} + O_d$ (*Στην πόλη/σήμερα έχει λαϊκή.*). Η σύγκριση με γλώσσα, η οποία δεν ανήκει στη Βαλκανική γλωσσική ένωση², επιτρέπει να διακριθεί η ιδιαιτερότητα του γνωσιακού μοντέλου:

Στο δάσος έχει δέντρα. = Τα δέντρα είναι στο δάσος.

В гората има дървета. = Дърветата са в гората.

There are trees in the forest.

Σε διαχρονική προοπτική φανερά διακρίνεται η αλλαγή της σχέσης μεταξύ των ρημάτων 'έχω' και 'είμαι' και στις δυο γλώσσες: η κυριαρχία του 'είμαι' στα αρχαιοελληνικά κείμενα σταδιακά μειώνεται, σήμερα στη καθημερινή γλωσσική πρακτική για τη δήλωση κατάστασης συνηθίζεται η χρήση του ρήματος 'έχει'. Στη βουλγαρική για τη δήλωση ύπαρξης ή τοποθέτησης σε κείμενα του 17-ου αιώνα, τα ρήματα 'είμαι' και 'έχω' αλληλοαντικαθίστανται ακόμη και στα πλαίσια της ίδιας φράσης (Mladenova 2007: 234-238). Διαχρονικά φαίνεται οι δυο γλώσσες να καταλήγουν στο ίδιο προτιμώμενο μοντέλο, το οποίο εύκολα διακρίνεται σε σύγκριση με άλλες γλώσσες³.

Η χαρακτηριστική «βαλκανική» παρουσία των λεξημάτων 'έχω/имам', όπως στην ελληνική, έτσι και στη βουλγαρική γλώσσα, δεν φαίνεται να ελαττώνει την πολυλειτουργικότητα του ρήματος 'είμαι/сѣм'. Η εξέλιξη προς την κατεύθυνση της εξάπλωσης των 'έχω'-συνταγμάτων και στις δυο γλώσσες εξισορροπείται από 'είμαι'-δομές, οι οποίες εξειδικεύονται στην έκφραση της υπαρκτικότητας, αλλά και της τοποθέτησης, του χαρακτηρισμού και της κτητικότητας. Με αυτόν τον τρόπο η νεοελληνική και η βουλγαρική γλώσσα, βρίσκόμενες σε σταυροδρόμι πολιτισμικών χώρων, φαίνεται να βρίσκονται και στην ίδια ζώνη διασταύρωσης γλωσσικών τάσεων.

Στην ελληνική γλώσσα οι υπαρκτικές δομές δήλωσης γενικευτικής υπαρκτικότητας ('κάποτε/κάπου/κάπως υπάρχει κάποιος, κάτι') είναι ως επί το πλείστον χώρος του ρήματος 'είμαι'. Τα γλωσσικά δεδομένα δείχνουν ότι στη νεοελληνική για τη δήλωση γενικευτικής υπαρκτικότητας γίνονται το ίδιο αποδεκτές τόσο οι 'είμαι'-δομές, όσο και οι 'έχει'-δομές, ενώ η βουλγαρική χρησιμοποιεί στο μεγαλύτερο μέρος των περιπτώσεων το ρήμα 'έχω'. Στη νεοελληνική γλώσσα σε υπαρκτικές δομές⁴ δήλωσης γενικευτικής υπαρκτικότητας με σημασία

¹ Είναι γνωστό ότι η τριτοπρόσωπη μορφή του ρήματος χαρακτηρίζεται από μεγαλύτερη ελευθερία σε σχέση με την κατηγορία της οριστικότητας (definiteness) – μπορεί να φέρει πληροφορίες όπως της οριστικότητας, έτσι και της μη οριστικότητας (indefiniteness), σε αντίθεση με τις μορφές του α' και β' προσώπου, οι οποίες απευθύνονται σε γνωστούς μετέχοντες στην επικοινωνία (Ivanova 1981: 59-60).

² Ο όρος χρησιμοποιείται ως απόδοση του γερμανικού όρου Balkanschprachbund (βλ. Τζιτζιλής 2000).

³ Για τη ρουμάνικη γλώσσα δεν είναι χαρακτηριστική η «γενικευτική» και η «περιστασιακά καθορισμένη υπαρκτικότητα. Εξαίρεση αποτελούν οι νότιες διάλεκτοι (βλ. Caragiu-Marioțeanu M., όπως παρατιθ. στο Kaldieva-Zaharieva 2005: 265).

⁴ Ο όρος *υπαρκτική δομή* χρησιμοποιείται συνήθως για δομές με την αναφορική λειτουργία να εγκρίνουν ή να αρνούνται την ύπαρξη μιας ουσίας, χωρίς να εισάγουν συμπληρωματικά υφολογικά ή συναισθηματικά στοιχεία. Εδώ θέτουμε ένα ευρύτερο

‘κάποιος/κάτι υπάρχει, έχει υπόσταση, είναι εν ζωή’ το ρήμα ‘είμαι’ λειτουργεί ως πλήρες υπαρκτικό ρήμα. Η κεντρική δομή είναι δυνατόν να συμπληρώνεται με χρονικούς ή τοπικούς προσδιορισμούς. Όπως είναι φυσικό, στην ελληνική γλώσσα το υποκείμενο είναι στην αόριστη μορφή του και συνδυάζεται είτε με αόριστο άρθρο, είτε με αόριστη αντωνυμία, χωρίς όμως να αποκλείεται η χρήση οριστικού άρθρου.

*Είναι κάποια πράγματα που με ενοχλούν. - Има някои неща, които ме дразнят.
Είναι και άλλοι λόγοι να μην πάω. - Има и други причини да не отида.*

Μια ακόμη επιβεβαίωση του γεγονότος, ότι στη βουλγαρική η γενικευτική υπαρκτικότητα είναι σφαίρα εξειδίκευσης του ρήματος ‘έχω’ αποτελεί η παρατήρηση, ότι ο αριθμός των στερεότυπων εκφράσεων με το ρήμα ‘είμαι’/‘съм’ που δηλώνουν γενικευτική υπαρκτικότητα είναι περιορισμένος (*било каково то било – ό, τι ήταν, ήταν... , тя беше тая, беше то – ήταν αυτό, πάει*).

2.2 Δομές των ρημάτων ‘είμαι/съм’ η ‘έχω/имам’ για τη δήλωση περιστασιακά καθορισμένης υπαρκτικότητας (situational determined existentiality)

2.2.1 Δομές με σημασία ‘κάτι γίνεται, συμβαίνει’

Και τα δυο ρήματα γίνονται αποδεκτά σ’ αυτές τις δομές, με την παρατήρηση ότι η χρήση του ρήματος ‘έχω’ είναι απρόσωπη. Κάνει εντύπωση η ενεργητικότητα και των δυο ρημάτων στην ελληνική, ενώ η βουλγαρική δείχνει σαφή προτίμηση στο ρήμα ‘έχω’:

*Τι είναι;- Какво има? (συγκρ. με αγγλ. What’s up?)
Δεν είναι τίποτα. - Няма нищо.
Έχει συνέλευση (σήμερα/εδώ). - Има събрание (днес/тук). (αγγλ. There is a meeting (today)).*

2.2.2 Δομές δήλωσης χρόνου

Στη θέση του υποκειμένου βρίσκεται ονοματική φράση με σημασία φυσικού φαινομένου, χρονικής περιόδου (ώρα, χρόνος, πρωί, βράδυ, μέρα, νύχτα, χειμώνας, καλοκαίρι κλπ.). Σ’ αυτές τις περιπτώσεις η επιλογή και των δυο γλωσσών είναι το ρήμα ‘είμαι’:

*Τι ώρα είναι;- Колко е часът?
Τι μέρα είναι/έχουμε σήμερα;- Какъв ден/какво е днес? Какво сме днес?
Είναι ώρα να φύγουμε. - Време е да тръгваме.*

2.2.3 Δομές έκφρασης φυσικών φαινομένων και καιρικών καταστάσεων

Και για τις δυο γλώσσες είναι χαρακτηριστική η απρόσωπη χρήση του ρήματος ‘είμαι’ με σημασία ‘επικρατεί’, σε συνδυασμό με ουσιαστικό ή επίρρημα (ένα μέρος των περιπτώσεων εμφανίζει και συνώνυμες ‘έχω’-δομές):

*Είναι κρύο/ζέστη = έχει κρύο/ζέστη - Студено/топло е.
Έχει κρύο, έχει συννεφιά - Студено е, облачно е.
Είναι σκοτεινά - Тъмно е.
Την άνοιξη θα έχει άσχημο καιρό. - През пролетта ще има лошо време.*

2.2.4 Δομές χαρακτηρισμού

Η υπαρκτικότητα συχνά συνοδεύεται από στοιχεία χαρακτηρισμού, κτητικότητας, τοποθέτησης στο χώρο και στο χρόνο, έτσι που στη σημασιολογική δομή μιας υπαρκτικής δήλωσης είναι δυνατόν να εμφανίζονται και άλλα υποχρεωτικά ή δευτερεύοντα κατηγορήματα (Nicolova 1990: 236).

Στις δομές χαρακτηρισμού τα δυο ρήματα «βλέπουν» το αντικείμενο από διαφορετικές οπτικές γωνίες και υπό διαφορετικό πρίσμα. Το ρήμα ‘είμαι’ αποτελεί το σημείο ίσον, το οποίο εξασφαλίζει τη σχέση ταύτισης και

πλαίσιο, στηριζόμενοι στην πεποίθηση, ότι ρητώς ή μη, κάθε δήλωση είναι υπαρκτική. Η υπαρκτικότητα αποτελεί βασική προϋπόθεση της δήλωσης, ανεξάρτητα αν πρόκειται για καθαρή επιβεβαίωση ή άρνηση, ή αν υπάρχει κάποια πρόσθετη απόχρωση (βλ. Nicolova 1990: 236).

λειτουργεί ως συνδετικό. Η γενική σημασία αυτών των δομών είναι: ‘υπάρχω με ορισμένη ιδιότητα ή βρίσκομαι σε ορισμένη κατάσταση – συναισθηματική, φυσική ή διανοητική’.

2.2.4.1 Το ρήμα ‘είμαι/сѣм’ συμμετέχει στο σχηματισμό δομών, οι οποίες δηλώνουν μόνιμη ιδιότητα ή χαρακτηριστικό του υποκειμένου. Η ομάδα αυτή περιλαμβάνει και σημαντικό αριθμό φρασεολογικών μονάδων, η σημασία των οποίων προκύπτει βάσει κάποιας περισσότερο ή λιγότερο σύνθετης μεταφοράς.

Είμαι τάφος - Гроб сѣм

Είμαι πετσά και κόκαλο - Кожѣ и кости сѣм

Στα ‘έχω’-συντάγματα το σημασιολογικό στοιχείο ‘κατέχω’ διακρίνεται ως ιδιόμορφος σημασιολογικός πυρήνας, γύρω από τον οποίον οργανώνεται όλο το σημασιολογικό περιεχόμενο του ρήματος. Η παρουσία της κτητικότητας ως βασικού σημασιολογικού στοιχείου προσδίδει μια ασυνήθιστη όψη στη σημασία των συγκεκριμένων συνταγμάτων, επειδή η σημασία αυτή είναι ουσιαστικά υπαρκτική (συνδεδεμένη με τον χαρακτηρισμό του υποκειμένου, με την έκφραση της κατάστασης, στην οποία βρίσκεται κτλ.). Το αντικείμενο, η ύπαρξη του οποίου επιβεβαιώνεται ή ακυρώνεται, συμπεριλαμβάνεται στον «ιδιόκτητο» χώρο του υποκειμένου ως δικό του κτήμα. Σχεδόν πάντα εμφανίζεται χωρίς οριστικό άρθρο – η αοριστικότητα είναι και δείκτης της μετατροπής του ‘έχω’ σε συνώνυμο του ‘είμαι’ για τη δήλωση της υπαρκτικότητας (βλ. Benveniste 1974: 203-225; Stoyanov 1973: 194-5; επίσης Nicolova 1990: 237). Σε όλες τις εν λόγω δομές το ρήμα χρησιμοποιείται αυτόνομα, η κτητικότητα εκφράζεται σε επιφανειακό επίπεδο. Ταυτόχρονα με τη ρητά δηλωμένη κτητικότητα, είναι παρούσα και η ιδέα της υπαρκτικότητας. Η βασική δομή είναι: S + V_{have} + O_d - με τη δυνατότητα να συμπληρώνεται από στοιχείο προσδιοριστικό της περίπτωσης. Στη θέση του άμεσου αντικειμένου εμφανίζεται ονοματική φράση, πάντοτε μη οριστική, η ύπαρξη της οποίας επιβεβαιώνεται ή αρνείται.

Συνηθισμένες στην ομιλία και των δυο γλωσσικών ομάδων είναι οι ακόλουθες εκδοχές του συγκεκριμένου γνωστικού μοντέλου:

2.2.4.2 Δομή: ‘έχω’ + ονοματική φράση με σημασία ‘φυσικό χαρακτηριστικό του ανθρώπου’:

Έχω κοντά/μακριά μαλλιά, γαλανά μάτια. - Имам дълга коса/сини очи.

Για την έκφραση των φυσικών χαρακτηριστικών του ανθρώπου και για τις δυο γλώσσες είναι το ίδιο φυσικές οι εμπρόθετες ‘είμαι’-δομές με την πρόθεση ‘με’ και ονοματική φράση φυσικού χαρακτηρισμού με την ίδια σημασία ‘διακρίνομαι για κάποια ιδιότητα, χαρακτηριστικό’:

Είναι με γαλανά μάτια και ξανθά μαλλιά. – Със сини очи и руса коса е.

2.2.4.3 Στην ελληνική γλώσσα από την κλασσική περίοδο εμφανίζονται τυποποιημένες οι χρήσεις του ρήματος ‘έχω’ σε συνδυασμό με ουσιαστικό από το πεδίο ‘ένδυμα’: ‘είμαι ντυμένος, φοράω’ (Έχω χιτώνα/κράνη/στολήν - ΛΑΕΓ 419):

Είχε άσπρο πουκάμισο, μαύρη γραβάτα και μια παράξενη κονκάρδα στο ρεβέρ του.

Имаше бяла риза, черна вратовръзка и странна значка на ревера.

2.2.4.4 Η ιδέα της ηλικίας ως κτήμα του υποκειμένου γίνεται αντιληπτή σε παλαιοβουλγαρικά και αρχαιοελληνικά δείγματα, στα οποία εμφανίζεται το ίδιο γνωστικό μοντέλο: пришедъ же нѣ въ вѣтанниѣхъ оверѣте и ѡгътири дѣни юже **имашѣ** въ гробѣ; пати дѣшѣтъ лѣтъ не оу **има(ш)и**; въздрастъ **имѣти**, το οποίο αποτελεί ακριβή αντιστοιχία του αρχαιοελληνικού ‘ηλικίαν έχω’ (CP 634-635).

Η κτητική σημασία της υπαρκτικής δομής στη δήλωση ηλικίας στην ελληνική και στη βουλγαρική γλώσσα είναι αισθητή, ιδιαίτερα αν λάβουμε υπόψη τις ισοδύναμες ‘έχω’-δομές:

Τα έχει τα χρονάκια του. – Има си ги годинките.

‘Είμαι’-δομές για τη δήλωση της ηλικίας, οι οποίες παρουσιάζουν κανονική χρήση και στη νεοελληνική γλώσσα, καταγράφονται στο Λεξικού της Μεσαιωνικής Ελληνικής Δημόδους Γραμματείας: ‘είκοσι χρόνων ήτονε εις μέτρον ηλικίας’, ‘είμαι εις δέκα χρόνους’ ‘έχω ηλικία δέκα χρόνων’. Αντιθέτως, υποχώρησε η έκφραση ‘είμαι του καιρού μου’, την οποία αντικατέστησε η συνώνυμή της ‘έχω την ηλικία μου’.

2.2.4.5 Ιδιαίτερο ενδιαφέρον από γνωσιακή άποψη παρουσιάζουν οι υπαρκτικές δομές, στις οποίες στη θέση του άμεσου αντικειμένου εμφανίζεται ουσιαστικό ή ονοματική φράση που κατονομάζει ανθρώπινο χαρακτηριστικό, κατάσταση, σχέση, συναίσθημα:

Έχω δύναμη (υγεία, θάρρος, αντοχή, ανδρεία, φιλοτιμία, υπομονή, ευφυΐα, μνήμη, ταλέντο, γνώσεις, λογικό).
Имам сила (здраве, смелост, издръжливост, доблест, амбиция, търпение, интелект, памет, талант, знание, ум, разум).

Η διαχρονική ανάλυση αποδεικνύει ότι η προδιάθεση για το σχηματισμό δομών, βασισμένων στο συγκεκριμένο γνωσιακό σχήμα (η ιδιότητα παρουσιάζεται ως κτήμα του υποκειμένου με μεταβατικό το ρήμα 'έχω') κληρονομήθηκε από την αρχαία ελληνική και την παλαιοβουλγαρική γλώσσα:

аще वो кто видѣтъ тѣ ѿи(ж)ца разогнѣ въ тѣх(в)иш(и) вѣзлѣкаца; да и хотѣаште и не хотѣаште, ѿиѣтъ панаѣтъ, и не забѣдѣтъ; ѿиѣростѣ ѿиѣтъ (CP 635-636); *ἀθυμίαν ἔχειν, γνώμην ἔχειν, αἰτίαν ἔχειν* κ.α. (Η πεποίθηση αυτή ενισχύεται ακόμη περισσότερο, αν λάβουμε υπόψη και τα σύνθετα παράγωγα, στη σημασία των οποίων είναι αισθητό το στοιχείο 'κατέχω': *εχέ-θυμος, εχε-μυθέω, εχέ-φρων* κ.α. (ΛΑΕΓ 419). Αυτά και άλλα παρόμοια δεδομένα επιβεβαιώνουν την παρατήρηση ότι τα γλωσσικά σημεία, τα οποία είναι αποτέλεσμα μεταφορικών και μετωνυμικών επεκτάσεων, είναι ανθεκτικά στο χρόνο, επειδή η σημασιολογική εξέλιξή τους βασίζεται σε διαπιστωμένη από τη συνείδηση ομοιότητα, στηριζόμενη από ένα ζωντανό εικονοσχήμα.

2.2.4.6 Εμπρόθετες 'είμαι'-δομές με σημασία 'υπάρχω με ορισμένη ιδιότητα, ικανότητα, σχέση, η οποία κατονομάζεται με ουσιαστικό'. Το υποκείμενο χαρακτηρίζεται έμμεσα μέσω της σχέσης κτήσης⁵. Ο μεγαλύτερος αριθμός αυτών των συνταγμάτων διαθέτει ισοδύναμες 'έχω'-δομές, οι οποίες συνήθως δείχνουν υψηλότερη συχνότητα χρήσης στο λόγο. Η παρουσία του αντικειμένου και η κτήση του προσδίδει στο υποκείμενο κάποιες ιδιότητες, ορισμένα χαρακτηριστικά, σχέσεις, δηλαδή η σχέση κτήσης επεκτείνεται σε χαρακτηρισμό του υποκειμένου:

Είναι άνθρωπος με αξιοπρέπεια – έχει αξιοπρέπεια - Човек с достоинство e = ѿма достоинство
Είναι άνθρωπος με ταλέντο, με πολλές γνώσεις - Човек с талант e = ѿма много знания

2.2.4.7 Δομές του ρήματος 'έχω' με O_d ουσιαστικό το οποίο δηλώνει κατάσταση, σχέση, συναίσθημα: 'βρίσκομαι στην κατάσταση, στη σχέση, την οποία εκφράζει το ουσιαστικό'.

Έχω ενδιαφέρον (ελπίδα, επιθυμία, αγωνία, στενοχώρια, λάθος, εμπιστοσύνη, ντροπή, μίσος, ανάγκη).
Имам интерес (надежда, желание, тревога, притеснение, грешка, доверие, срам, омраза, нужда).

Σ' αυτήν τη σειρά μπορούν να συμπεριληφθούν και οι στερεότυπες εκφράσεις του τύπου *Έχω καλή καρδιά* *Имам добро/златно сърце*. Παρόμοια συντάγματα με υψηλό βαθμό παγίωσης έχουν καταγραφή στην παλαιοβουλγαρική και στην αρχαία ελληνική: *κοιμῶ ἡμεῖς*, *ἐβῆρ ἡμεῖς*, αρχαιοελλ. *έχω πίστιν; νοηκῶ ἡμεῖς*, αρχαιοελλ. *έχω ανάγκην*; Βλ. επιπλέον και τις αρχαιοελληνικές δομές με σημασία 'βρίσκομαι σε ορισμένη κατάσταση, διάθεση': *εὖ (καλῶς) ἔχειν, εὐφρενῶν ἔχειν* (CP 635-637).

Ανταγωνιστικές εμφανίζονται οι 'είναι'-δομές με πρόθεση 'με' σε συνδυασμό με ονοματική φράση η οποία δηλώνει κάποια ψυχική ή πνευματική ιδιότητα:

Είναι άνθρωπος με καλή καρδιά. – Човек с добро сърце e. = Έχει καλή καρδιά – Има добро сърце.

Με αντίθετη αξία είναι και οι δομές χαρακτηρισμού με την πρόθεση 'χωρίς/δίχως' με σημασία 'δεν έχω ορισμένη ιδιότητα, ικανότητα'.

Είμαι δίχως/χωρίς ψυχή = Δεν έχω ψυχή - Без душа съм = Нямам душа

2.2.4.8 Στο ίδιο μοντέλο, με υποχρεωτικά δηλωμένη στην επιφανειακή δομή τοποθέτηση, ανήκουν οι εκφράσεις του τύπου *S + V_{have} + (O_d) + A, :*

Έχω κατά νου – Имам на ум
Έχω στο μάτι - Имам на око (ΛΚΝΕ: 554).
Έχω υπόψη μου - Имам, вземам пред вид (ΛΚΝΕ: 554).

⁵ Για την ύπαρξη όμοιων δομών στη ρουμάνικη γλώσσα βλ. Kaldieva-Zaharieva (2004: 251).

2.2.4.9 Υπαρκτικές ‘είμαι’-δομές με ρητά δηλωμένη κτητικότητα

Στις συχνές χρήσεις του ρήματος ‘είμαι’ ως συνδετικού ανήκει και ο έμμεσος χαρακτηρισμός του υποκειμένου μέσω επισήμανσης της κτήσης. Το στοιχείο της κτητικότητας είναι ιδιαίτερα αισθητό στις ερωτήσεις καθημερινής επικοινωνίας του τύπου:

Τίνος είσαι; Ποιανού παιδί είσαι; – Чий си /Чие дете си?

Είναι της παρέας μας. – От компанията ни е.

Από δομική και από γνωσιακή άποψη παρουσιάζει ενδιαφέρον το διαδεδομένο στην ελληνική γλώσσα μοντέλο, όπου το ρήμα ‘είμαι’ ακολουθείται από ουσιαστικό σε γενική πτώση, συνήθως με αφηρημένη σημασία. Μεγάλο μέρος αυτών των δομών έχουν τις ρίζες τους στην καθαρεύουσα (Mackridge 1990: 123). Σε αρκετές περιπτώσεις είναι δυνατή η αντικατάσταση με δομές με μεταβατικό ρήμα ‘έχω’, όπου το ουσιαστικό εμφανίζεται στη θέση του άμεσου αντικειμένου.

Είναι άνθρωπος εμπιστοσύνης – του έχω εμπιστοσύνη.

Υπάρχουν όμως και ‘είμαι’-δομές χωρίς σημασιολογικά ‘έχω’-ισοδύναμα. Αυτές είναι οι δομές με σημασία ‘το υποκείμενο ανήκει σε ορισμένη τάξη, κατηγορία, σύνολο, εμφανίζοντας κάποιες χαρακτηριστικές ιδιότητες, ιδιαιτερότητες’.

(Δεν) είναι της προκοπής

Είναι της κακιάς ώρας

2.2.4.10 Κοινή βαλκανική ιδιαιτερότητα μπορεί να διαπιστωθεί στις δομές $V_{\text{have}} + O_d$ με γενική σημασία ‘είμαι άρρωστος από την ασθένεια, την οποία κατονομάζει το ουσιαστικό’, όπου το O_d είναι ουσιαστικό με σημασία κάποιας νόσου:

Έχω έλκος (πονοκέφαλο, γρίπη, πυρετό). – Имам язва (главоболуе, грип, температура), ως απάντηση στην ερώτηση: Τι έχεις; – Какво ти е/има? ⁶ - αγγλ. What is the matter with you?

Και στις δυο γλώσσες το συγκεκριμένο μοντέλο δεν είναι καινούργιο, στην παλαιοβουλγαρική έχουν καταγραφεί χρήσεις του ρήματος *имѣти* με σημασία ‘είμαι κατελημμένος από ασθένεια, σωματική ή ψυχική πάθηση, κακό πνεύμα’ – αντανάκλαση των παλαιών αντιλήψεων για την ασθένεια (CP 634-635): *ѣхъ имѣти*, αρχ. *δαιμόνιον ἔχω; болѣхъ имѣти*, αλλά αρχαιοελλ. *ύδρωπικὸς εἰμί*.

Μια άλλη εκδοχή του ιδίου μοντέλου αποτελούν οι δομές με το ρήμα ‘έχω’ και άμεσο αντικείμενο ουσιαστικό, το οποίο ονομάζει το άρρωστο όργανο – *χολή, νεφρά*): *Имам жлъчка (бъбреци)* - ‘Έχω στομάχι (καρδιά, νεφρά). Και στις δυο γλώσσες η συγκεκριμένη χρήση επίσης φαίνεται να είναι παλαιά: *догъхъ неѣжжѣхъ имѣ*, αρχαιοελλ. *ἔχων πνεύμα [τῆς] ἀσθενείας; догъха не имѣ*, αρχ. *ψυχ[ὴν] μ[ὴ] ἔχων* (CP 636).

Η βλάβη ως κτήμα του αντικειμένου γίνεται αντιληπτή σε δομές του τύπου: *Τι έχει το ραδιόφωνο και δεν ακούγεται καλά;* σε αντίθεση με την αγγλ.: *What is the matter with it?* Στη βουλγαρική το ρήμα είναι σε απρόσωπη χρήση: *Какво му има на радиото, че не се чува добре?*

Η βουλγαρική διαθέτει και εναλλακτική ‘είμαι’-δομή με απρόσωπο ρήμα: *Какво му е на радиото, че не се чува добре?*

3. Σημασιολογικές ιδιαιτερότητες των ‘είμαι/съм’ και ‘έχω/имам’ ως βοηθητικών ρημάτων

Εξετάζοντας την κατηγορία της υπαρκτικότητας σε λογικο-φιλοσοφικό πλάνο, ως καθολική σχέση, θα διαπιστώσουμε ότι εξαπλώνεται σε όλο το σύστημα της γλώσσας, συμπεριλαμβανομένης και της γραμματικής. Οντάς τμήμα της γενικής γνώσης, η γλώσσα χρησιμοποιεί τους καθολικούς γνωσιακούς μηχανισμούς και η εκάστοτε γραμματική δομή παρουσιάζει τη δική της γνωσιακή διάσταση (Lakoff 2004: 753). Κάθε διαφορά σε δομικό επίπεδο εκφράζεται και ως διαφορά σε γνωσιακό πλάνο. Η χρήση των ρημάτων ‘έχω’ και ‘είμαι’ στα χρονικά συστήματα των βαλκανικών γλωσσών απεικονίζει και επιβεβαιώνει αυτήν την ιδέα.

⁶ Η κτητική αντωνυμία *ти (σου)* στη βουλγαρική δομή επιπλέον τονίζει την ιδέα της κτήσης. Η δήλωση της υπαρκτικότητας ως κτήμα του υποκειμένου και σε άλλες εκφράσεις είναι δυνατόν να υπογραμμίζεται με κτητική αντωνυμία.

3.1

Το ρήμα 'έχω' στους τύπους του βαλκανικού αναλυτικού παρακειμένου παρουσιάζει μια ατελή απολεξικοποίηση και γραμματικοποίηση. Η κτητική σημασία είναι αισθητή, γι' αυτό και η σχέση *S κατέχει O_d* γίνεται αντιληπτή από τη γλωσσική συνείδηση:

- ('имам' + άκλιτη μορφή της παθητικής μετοχής αορίστου από αμετάβατο ρήμα): *имам дойдено/доаѓано, имам отидено/одено, имам заминато/заминувано, имам влезено/влезувано* (Markovikj 1994: 92).
- ('имам' + άκλιτη μορφή της παθητικής μετοχής αορίστου από μεταβατικό ρήμα): *имам видено/гледаано, имам јадено, имам вечерано, имам пиено* (Markovikj 1994: 93), ελλ. *έχω γραμμένο, το έχω λησμονημένο*.
- ('имам' + κλιτή μορφή της παθητικής μετοχής): *Ние имаме дори взети решения по тези въпроси. Аз имам взети някои изпити*.

Οι χρόνοι αυτοί έχουν υποταχτεί στο γνωσιακό μοντέλο, σύμφωνα με το οποίο η γλωσσική συνείδηση «βλέπει» το αποτέλεσμα της ενέργειας ως κτήμα του υποκειμένου και το εκφράζει με δομή του τύπου *V + O_d*. Η ίδια η φύση του παρακειμένου, με τα στοιχεία της κτητικότητας και της αποτελεσματικότητας που περιέχει, προδιαθέτει τη συνείδηση στο να συνδέσει την αντίληψη της κατάστασης του υποκειμένου με την αντίληψη της κτήσης. Το ίδιο μοντέλο ακολουθεί και ο υπερσυντέλικος.

Η βουλγαρική γλώσσα προτιμά γνωσιακό μοντέλο, το οποίο εστιάζει στην υπαρκτικότητα, δηλούμενη με το ρήμα 'είμαι'. Το ρήμα 'съм' συμμετέχει στο σχηματισμό των αναλυτικών μορφών του παρακειμένου (*писал съм*), του υπερσυντέλικου (*бях ходил*), του συντελεσμένου μέλλοντα (*ще съм носил, ще бѣда носил*).

3.2

Στις μελλοντικές περιφράσεις χάρη στο σήμημα «κατέχω» πραγματοποιείται το ίδιο σενάριο: 'Το υποκείμενο θα κατέχει την ενέργεια, η οποία εκφράζεται με τη δευτερεύουσα πρόταση'. Στο ρήμα 'έχω' οφείλεται και το συμπληρωματικό τροπικό στοιχείο 'του υποχρεωτικού, του αναπόφευκτου', αλλά και της διάρκειας της ενέργειας':

Има много да чакаш. (Έχει να περιμένεις πολύ!) Какви промени, какви чудеса има да стават! (Τι αλλαγές, τι θαύματα έχει να συμβούν!)

Στην ελληνική γλώσσα τα δυο ρήματα 'είμαι' και 'έχω' ανταγωνίζονται στις δομές έκφρασης της σημασίας 'πρέπει, είναι απαραίτητο':

Είναι να πάω την άλλη εβδομάδα;

Ήταν να φύγω αλλά δε μπόρεσα.

Η παρουσία του ρήματος 'έχω' εισάγει την τροπική σημασία 'είναι υποχρεωτικό, αναπόφευκτο, πρόκειται να γίνει':

Μήπως έχω καμιά χαρά να του προσφέρω του παιδιού; (Ε. Αλεξίου) Έχεις να απαντήσεις σ' αυτές τις κατηγορίες.

Εδώ θα πρέπει να κατατάξουμε και τη φράση: *Δεν έχεις να* (δεν επιτρέπεται, δεν κάνει): *Δεν έχεις να πας πουθενά. Αν θέλεις να πετύχεις, δεν έχεις παρά να δουλέψεις σκληρά.*

Στη βουλγαρική το μοντέλο σχηματισμού μελλοντικών περιφράσεων με το ρήμα 'имам' προέρχεται από την παλαιοβουλγαρική:

НЕ ИМАМЪ ПИТИ ЮЖЕ ОТЪ СЕГО ПЛОДА ЛОЗЪНААГО; НЕ ИМАМЪ МАСЪ ЪСТИ ВЪ ВЪКЪ, ...

Σ' αυτές τις δομές το ρήμα 'имам' δεν υπέστη πλήρη γραμματικοποίηση, έχουν καταγραφεί διαφορετικές τροπικές αποχρώσεις: 'σκοπεύω, επίκειται, πρέπει':

СИМОНЕ ИМАМЪ ТИ НЪГЪТО РЕШТИ ЦРЮ, ИМАМЪ ТИ НЪГЪТО СЪВЪШТАТИ. (CP 1: 635); 'μπορώ, είμαι σε θέση': НЕ ВЕУТЕ СЪ ОТЪ ДВИЖАШТИНЪ ТЪЛО, І НЕ ПО ТОМЪ НЕ ИМЪШТЕМЪ, ЛИХА УЕО СЪТВОРИТИ; ЕКЕ ИМЪ СИ СЪТВОРИ (CP 1: 635).

Πλήρως απολεξικοποιημένο εμφανίζεται το ρήμα 'έχω' με κυρίαρχες τις υπαρκτικές λειτουργίες μόνο στις αρνητικές δομές με το μόριο 'няма' (НЕ ИМАМЪ, γ' пр. εν. αρ.) + *да* + ενεστώας⁷.

Η ανάλυση δείχνει ότι στο βάθος των διαφορετικών 'έχω'-συνταγμάτων διαφαίνεται η ιδιαίτερη επικάλυψη των νοητικών χώρων των κατηγοριών της υπαρκτικότητας και της κτητικότητας. Και στις δυο γλώσσες τα

⁷ Η αιτία για την καθιέρωση του ρήματος 'имам' στους αρνητικούς τύπους ενδεχομένως να οφείλεται στην πρώιμη συγχώνευση του μορίου *не* και του ρήματος, με αποτέλεσμα το σχηματισμό του βοηθητικού ρήματος *нямат*.

γνωσιακά μοντέλα των συγκεκριμένων κατηγοριών βρίσκονται σε πολύπλοκη αλληλεπίδραση, η οποία εκφράζεται με διαφορετικό τρόπο σε κάθε μια γλωσσική μονάδα. Το γνωσιακό μοντέλο της κτητικότητας μεταφορικά προβάλλεται στο νοητικό χώρο της υπαρκτικότητας. Το κατηγορήμα φέρει την υπαρκτικότητα, αλλά και την κτητικότητα στη σημασιολογική δομή του. Η παρουσία του σημασιολογικού στοιχείου ‘κατέχω’ στα ρήματα ‘έχω’ και ‘υмам’ εμφανίζεται περισσότερο αισθητή σε σύγκριση με άλλες γλώσσες (βλ. τη σύγκριση του αγγλ. ‘have’ και του βουλγ. ‘υмам’ και τα συμπεράσματα της Alexieva 1992: 89). Το γεγονός αυτό αντιφάσκει με την πολλαπλή εκφραζόμενη πεποίθηση ότι η κτητική σχέση στις ‘habere’-δομές είναι πάντοτε φαινομενική, καθώς οι λειτουργίες του ρήματος είναι εξολοκλήρου υπαρκτικές (Benveniste 1974: 213-216). Τα δεδομένα από τις δυο γλώσσες επιβάλλουν την αίσθηση των όμοιων γνωσιακών διαδικασιών. Εκπληκτική είναι η σημασιολογική και λειτουργική ομοιότητα των ‘έχω’ και ‘υмам’, όπως και η θέση τους στα συστήματα των δυο γλωσσών – όμοια παραδείγματα, τα οποία οδήγησαν σε όμοια πραγμάτωση στο συνταγματικό άξονα. Δεχόμαστε τις ως άνω διαπιστώσεις ως επιβεβαίωση της ιδέας για την προσέγγιση των βαλκανικών γλωσσικών δομών στο επίπεδο της βαθιάς δομής, για οργάνωση της σκέψης με βάση παρόμοιο γνωσιακό σχήμα.

4. Συμπεράσματα

Η επιλογή ανάμεσα στα ρήματα ‘έχω’ και ‘είμαι’ αποτελεί στην ουσία επιλογή ανάμεσα σε δυο διαφορετικά γνωσιακά μοντέλα, μαρτυρεί διαφορετικές γνωσιακές διεργασίες. Επιβεβαιώνεται η παρατήρηση του E. Benveniste, ότι στις δομές με το ρήμα ‘είμαι’ η γλωσσική συνείδηση εστιάζει στην κατάσταση του υποκειμένου που υπάρχει. Η σχέση ανάμεσα στα συστατικά στοιχεία του συντάγματος είναι σχέση ταύτισης. Διαφορετικό είναι το γνωσιακό μοντέλο των συνταγμάτων με το ρήμα ‘έχω’, τα οποία δηλώνουν την κατάσταση ενός υποκειμένου που κατέχει κάτι. Τα δυο μέρη του συντάγματος παραμένουν διαφορετικά, δεν ταυτίζονται, τα συνδέει η εξωτερική σχέση του κατόχου με το αντικείμενο της κτήσης. Το ρήμα συμμετέχει ενεργά στο συγκεκριμένο σενάριο χάρη στη σημασία του (βλ. Benveniste 1974). Η ιδιαιτερότητα των γλωσσών που εξετάζουμε είναι στον τρόπο με τον οποίον συνδυάζουν τις δυο ιδέες.

Η υπαρκτικότητα παρουσιάζεται ως ιδιαίτερη σημασιολογική κατηγορία, γύρω από την οποία διαμορφώνεται σύνθετο λειτουργικό σημασιολογικό πεδίο, αποτελούμενο από γλωσσικά μέσα που αλληλοσυμπληρώνονται σε διαφορετικά επίπεδα. Τα όρια ανάμεσα στη γραμματική και στο λεξιλόγιο εμφανίζονται ως ρευστή μετάβαση από τη μια στην άλλη σφαίρα, όπως αποδεικνύει η γραμματικοποίηση ορισμένων αναλυτικών δομών, οι οποίες εξετάζονται σε διαχρονική προοπτική. Σε γνωσιακό πλάνο οι δυο γλώσσες παρουσιάζουν όμοιο μοντέλο γλωσσικής αντίληψης. Ακολουθώντας αυτήν τη λογική γενικεύσεων των δεδομένων από τη γλωσσική πραγμάτωση της υπαρκτικότητας, μπορούμε να συμπεράνουμε ότι οι δυο γλώσσες τοποθετούνται στη ζώνη ανάμεσα στο „esse” και “habere”, στη ζώνη συνδυασμού δυο διαφορετικών αξιακών προσανατολισμών, στο χώρο εξισορρόπησης δυο διαφορετικών αξιακών συστημάτων.

ΜΕΤΡΙΑΣΜΟΣ ΚΑΙ ΕΠΙΤΑΣΗ ΜΕ ΤΗ ΧΡΗΣΗ ΤΩΝ ΜΟΡΦΗΜΑΤΩΝ *ΨΙΛΟ-* ΚΑΙ *ΘΕΟ-*: ΑΝΑΛΥΣΗ ΣΕ ΣΩΜΑΤΑ ΚΕΙΜΕΝΩΝ¹

ABSTRACT

*The aim of this paper is twofold. Firstly, it aims to investigate the use of the morphemes *ψιλο-* and *θεο-* when they signify mitigation and intensification respectively. Secondly, an attempt is made to demonstrate how the use of corpus linguistics can contribute to the study of morphemes and word formation processes of Modern Greek. The findings point out that a corpus-based study can demonstrate various aspects of a morpheme's behaviour. In addition, the combination of the qualitative and the quantitative analysis underlines and explains regularities and distinctions which can significantly contribute to the study of word formation rules in general.*

Λέξεις-κλειδιά: διαδικασίες σχηματισμού λέξεων, ηλεκτρονικά σώματα κειμένων.

1. Εισαγωγή

Στόχος της παρούσας εργασίας είναι η μελέτη των μορφημάτων *ψιλο-* και *θεο-* με μετριοστική και επιτατική λειτουργία, αντίστοιχα. Παράλληλα, επιχειρείται να διερευνηθεί κατά πόσο τα ηλεκτρονικά σώματα κειμένων (στο εξής ΗΣΚ) μπορούν να συμβάλουν στη μελέτη των διαδικασιών σχηματισμού λέξεων της Νέας Ελληνικής και με ποιούς τρόπους. Αφορμή για την έρευνα αυτή υπήρξε η διαπίστωση ότι τα ΗΣΚ δεν έχουν ακόμη αξιοποιηθεί συστηματικά σε αυτό το πεδίο της γλωσσολογικής έρευνας. Οι υπάρχουσες μελέτες, κυρίως στη διεθνή βιβλιογραφία, εστιάζουν στην ποσοτική ανάλυση και τη διερεύνηση της παραγωγικότητας των μορφημάτων μέσω αυτής (βλ. ενδεικτικά Baayen 2008), ενώ απουσιάζουν μελέτες που συνδυάζουν την ποσοτική με την ποιοτική ανάλυση, με τον τρόπο που θα επιχειρηθεί στην παρούσα εργασία. Από προηγούμενες έρευνες έχει διαπιστωθεί ότι η συμβολή των ΗΣΚ σε αυτή την κατεύθυνση μπορεί να είναι ιδιαίτερα σημαντική (βλ. Σαββίδου 2010, 2012).

Οι διαδικασίες σχηματισμού λέξεων, όπως η παραγωγή και η σύνθεση, διέπονται από μια περίπλοκη γραμματική, δηλαδή ένα σύνολο κανόνων, που περιγράφει τόσο το πραγματωμένο όσο και το δυνάμει λεξιλόγιο (βλ. Αναστασιάδη-Συμεωνίδη 1992). Για τη διερεύνηση των κανόνων αυτών είναι απαραίτητη η μελέτη της συμπεριφοράς των μορφημάτων σε αυθεντικά γλωσσικά περιβάλλοντα.

2. Δεδομένα και μεθοδολογία

Τα δεδομένα της έρευνας προέρχονται από το Σώμα Ελληνικών Κειμένων (ΣΕΚ) (βλ. Γούτσος 2003 για λεπτομέρειες). Συγκεκριμένα, χρησιμοποιήθηκε το σύνολο των δεδομένων του ΣΕΚ, που ανέρχεται στις 30 εκατομμύρια λέξεις περίπου. Ο τρόπος με τον οποίο κατανέμονται στα διάφορα κειμενικά είδη περιγράφεται στον Πίνακα 1 του Παραρτήματος.

Η μεθοδολογία που ακολουθήθηκε διαμορφώθηκε κατά την εκπόνηση της έρευνας και βασίζεται στη μελέτη των συμφραστικών πινάκων των κατασκευασμένων λέξεων που σχηματίζονται με τα υπό εξέταση μορφήματα, των κατασκευασμένων λέξεων σε επίπεδο λεξικής μονάδας και των συχνοτήτων εμφάνισης τόσο συνολικά όσο και ανά κειμενικό είδος. Το πώς κάθε ένας από αυτούς τους τρόπους

¹ Ευχαριστώ θερμά τον καθηγητή μου κ. Διονύση Γούτσο για την πραγματικά πολύτιμη καθοδήγηση κατά τη διάρκεια της συγγραφής της διπλωματικής μου εργασίας, της οποίας ένα τμήμα αποτελεί το παρόν άρθρο. Θερμές ευχαριστίες οφείλω και στον καθηγητή μου κ. Γιώργο Μαρκόπουλο για τα ιδιαίτερα χρήσιμα σχόλιά του.

συμβάλλει στη μελέτη συγκεκριμένων πλευρών της συμπεριφοράς των μορφημάτων καταδεικνύεται στην ανάλυση που ακολουθεί.

3. Σημασιολογικό φορτίο και σημασιολογικά χαρακτηριστικά βάσεων

Αρχικά επιχειρήθηκε να προσδιοριστούν οι σημασίες/χρήσεις με τις οποίες απαντούν τα υπό εξέταση μορφήματα ως συστατικά κατασκευασμένων λέξεων, με εξαίρεση τις παράγωγες λέξεις στις οποίες συνδυάζονται με πρόσφυμα, αποτελώντας τη βάση (π.χ. *ψιλοτύτικος*). Για το στόχο αυτό, μελετήθηκαν τα σημασιολογικά χαρακτηριστικά των βάσεων με τις οποίες συνδυάζονται, σε συνδυασμό με το συγκείμενο των κατασκευασμένων λέξεων που σχηματίζονται με αυτά.

3.1 Σημασίες/χρήσεις μορφήματος *ψιλο-*

Για το μόρφημα *ψιλο-*, διακρίθηκαν οι ακόλουθες σημασίες-χρήσεις:

α) η σημασία της «λεπτομερούς δουλειάς/επεξεργασίας», όπου δηλώνει ότι η ενέργεια που περιγράφεται από τη βάση έχει πραγματοποιηθεί με ιδιαίτερη προσοχή ή ακρίβεια (π.χ. *ψιλοδουλεμένος*, *ψιλοβελονιά* κ.ά.).

β) η σημασία του «υποκορισμού ή της σμίκρυνσης»², όπου δηλώνει ότι το αντικείμενο αναφοράς του προσδιοριζόμενου ή του αντικειμένου προκύπτει σε μικρά κομματάκια μετά την επεξεργασία που υφίσταται από την «ενέργεια» που περιγράφει η βάση (*ψιλοκόβω* και *ψιλοκομμένος*).

γ) η «μετριάστική περιγραφική σημασία», όπου δηλώνει ότι η ενέργεια που εκφράζεται από το β' συνθετικό γίνεται σε μικρό βαθμό ή φέρει χαμηλή ένταση (π.χ. *ψιλόβροχο*, *ψιλόχιονο*, *ψιλοτραγουδώντας* κ.ά.).

δ) η «μετριάστική πραγματολογική λειτουργία», που αποτελεί το αντικείμενο της παρούσας ανακοίνωσης και θα αναλυθεί εκτενώς στη συνέχεια. Η ονομασία της χρήσης αυτής στοχεύει στη διάκρισή της από τη «μετριάστική περιγραφική σημασία».

3.1.1 Μετριάστική πραγματολογική λειτουργία

Σε ένα μέρος των δεδομένων, το *ψιλο-* μετριάζει επίσης το σημασιολογικό περιεχόμενο της βάσης, αλλά η περαιτέρω μελέτη των κατασκευασμένων λέξεων επισημαίνει ότι ο ρόλος του σε αυτές δεν είναι αμιγώς περιγραφικός, αλλά επιτελεί ειδικές πραγματολογικές λειτουργίες. Στην κατηγορία αυτή εντάσσονται τα *ψιλοβαριέμαι*, *ψιλοερωτευμένος*, *ψιλογαϊδούρι*, *ψιλοβλακείες*, *ψιλοκομπίνα*, *ψιλοκουλό*, *ψιλοεγωιστής* κ.ά. Το *ψιλο-* σε αυτή τη χρήση φαίνεται να χρησιμοποιείται ως μέσο μετριάσμού ή αποφυγής της παραβίασης του αξιώματος της ποιότητας³. Με άλλα λόγια, ο ομιλητής αποφεύγει να πει ψέματα με το να μετριάσει την αλήθεια.

Στο συμπέρασμα αυτό οδήγησε η μελέτη των συμφραστικών πινάκων, δηλαδή των συμφραζομένων στα οποία απαντούν οι κατασκευασμένες λέξεις, σε συνδυασμό με τα σημασιολογικά χαρακτηριστικά των βάσεων.

Ειδικότερα, στα συμφραζόμενα απαντούν πολύ συχνά δείκτες που δηλώνουν δισταγμό ή διάθεση μετριάσμού.

Οι δείκτες αυτοί μπορεί να είναι:

α) επιρρήματα, όπως το *βασικά* (π.χ. 1), το *μόνο* (π.χ. 2), το *εντάξει* (π.χ. 1, 3) κ.ά.

(1) ...*πήγατε για κυνήγι; όχι μωρέ εντάξει ψιλο::θέλαμε βασικά να:: ξεκουραστούμε...*

(2) ...*ένα ψιλοξεφτιλίκι μόνο και φτηνά τη γλιτώσαμε...*

(3) ...*εντάξει (.) είναι ψιλοστημένα εκεί τα πράγματα (.) κάπως (.) σαν*

β) Επιφωνήματα που δηλώνουν αμηχανία ή δισταγμό, όπως το *άντε* στο (4), το *μωρέ* στο (1) και το *ε* στο (5).

(4) ...*άντε και με κανένα ψιλοεπεισοδιάκι...*

(5) ...*εντάξει μέχρι να [@@@@ [εψιλοκουλό μου φάνηκε...*

² Οι όροι «υποκορισμός» και «σμίκρυνση» χρησιμοποιούνται με την έννοια του πραγματικού και όχι του συναισθηματικού υποκορισμού (βλ. Μπαμπινιώτης 2002: 1851 για διάκριση).

³ Για τα αξιώματα που συναποτελούν την αρχή της συνεργασίας σύμφωνα με τη θεωρία του Grice (1975) και τον ορισμό του αξιώματος της ποιότητας βλ. Κανάκης (2007: 163-165).

γ) Παύσεις ή παρατεταμένες προφορές φωνηέντων που δηλώνονται με τυπογραφικά σημάδια στα προφορικά δεδομένα και εντοπίζονται είτε στα συμφραζόμενα (π.χ. 3, 6) είτε στο εσωτερικό της κατασκευασμένης λέξης (π.χ. 1).

(6) ...και...: *είχαμε φιλοσοπομακρυνθεί κιόλας και(.) δεν τον έπαιρνα...*

δ) αόριστες αντωνυμίες όπως το *κάτι* στο (7), το *κανένα* στο (4) και το *ένα* στο (8):

(7) ...έχει κάτι *ψιλοελλείψεις στα αγγλικά, αλλά στα θεολογικά...*

(8) ...και σ' αυτό έχει ένα *ψιλοδίκιο η Δήμητρα. Έχει ένα δίκιο.*

ε) αυτοδιόρθωση που προδίδει ότι το *ψιλο-* δηλώνει διάθεση μετριασμού των λεγομένων τόσο όταν φορέας της αυτοδιόρθωσης είναι η κατασκευασμένη λέξη με αυτό (π.χ. 9) όσο και όταν αυτό που «διορθώνεται» είναι αυτό που έχει δηλωθεί με την κατασκευασμένη λέξη (π.χ. 8).

(9) ...να:: *τον αφήσανε ή έχουνε [καυγάδες έχουνε ψιλοκαυγάδες...*

στ) Προσπάθεια επανόρθωσης⁴ που μπορεί να δηλώνεται με διάφορα γλωσσικά μέσα, όπως το *αλλά* στο (7) και το *βέβαια* στο (10).

(10) Αυτό βέβαια *όταν ήμουν μικρότερη.. Τώρα το 'χω ψιλοκόψει...*

ζ) εκφράσεις που δηλώνουν μετριασμό, όπως το *όσο να 'ναι* στο (11):

(11) ...αλλά όσο να 'ναι *τις σούρες μας τις ψιλορίχνουμε. Πιστοί φαν του Ορέστη Μακρή...*

η) συνδυασμός με άλλο πρόσφυμα που δηλώνει μετριασμό/υποκορισμό, όπως στο *ψιλοεπεισοδιάκι* στο (4).

θ) γλωσσικά μέσα που λειτουργούν ως επισχετικές εκφράσεις που αφορούν στο αξίωμα της ποιότητας⁵, δηλαδή ενδέχεται να δηλώνουν ότι ο ομιλητής δεν δεσμεύεται για την αλήθεια των πληροφοριών που μεταδίδει, όπως η χρήση του *νομίζω* στο (12):

(12) ...*μα εγώ ψιλοθυμάμαι νομίζω τα γενέθλιά σου...*

Τα ανωτέρω στοιχεία αποτελούν δείκτες ότι το *ψιλο-* λειτουργεί ως μέσο μετριασμού. Με τη χρήση του ο ομιλητής επιτυγχάνει να αποφύγει να παραβιάσει το αξίωμα της ποιότητας, δηλαδή να πει ψέματα, ή να μετριάσει αυτή την παραβίαση, παρόλο που ενδέχεται να μη θέλει να μεταδώσει «πολλές» πληροφορίες. Στο (13) λ.χ. δεν θέλει να παραδεχτεί ότι το πέναλτι ήταν μαϊμού, αλλά δεν θέλει επίσης να πει ψέματα, γι' αυτό λέει ότι ήταν *ψιλομαϊμού*.

(13) ...*Μια φορά πήραμε κι εμείς ένα πέναλτι ψιλομαϊμού και λυσσάζαν οι βάζελοι!*

Η πραγματολογική λειτουργία του *ψιλο-* έχει επισημανθεί και από προηγούμενες έρευνες. Η Γιαννουλοπούλου (2003: 4) διακρίνει σε αυτό μια «υπονοηματική λειτουργία», σημειώνοντας ότι σε λέξεις όπως *ψιλοβαριέμαι* εκφράζει την προσωπική στάση του ομιλητή και σημαίνει «δεν θέλω να σας πω πόσο πολύ βαριέμαι». Ομοίως, ο Χυδούρουλος (2009: 404) ερμηνεύει το *ψιλοήπια* ως «δεν θέλω να σου πω ότι ήπια (πολύ) αλλά πράγματι ήπια».

Το πραγματολογικό *ψιλο-* περίπου στο 71% των δεδομένων συνδυάζεται με βάσεις με αρνητική σημασιολογική προσωδία ή συνυποδηλώσεις: *ζεφτιλίκι, κομμάτια* (με τη σημασία «κουρασμένος»), *βαριέμαι*, (τα) *παίρνει* (με τη σημασία «εκνευρίζεται»), *βλακείες, δουλεύω* (με τη σημασία «κοροϊδεύω»), *στημένα* (με τη σημασία «προκατασκευασμένα»), *κομπίνα* κ.ά. Η τάση αυτή επιβεβαιώνει την ανωτέρω λειτουργία του, αφού φαίνεται να μετριάζει την απειλή που ενδεχομένως ενέχει το περιεχόμενο της βάσης.

Λιγότερο συχνά συνδυάζεται και με ουδέτερες σημασιολογικά βάσεις (λ.χ. *ψιλοζυπνήσει* με την κυριολεκτική σημασία) ή ακόμη και με θετικές, όπως *σπουδές, γουστάρω, ερωτευμένος*, όπου μάλιστα ενδέχεται να «κληροδοτεί» το ίδιο αρνητικές συνυποδηλώσεις στα παράγωγα, μετριάζοντας τη θετική σημασία της βάσης, όπως στο (14).

(14) ...*πρέπει να έχουν κάνει κάποιες ψιλοσπουδές στην αλλοδαπή ή να πλασάρουν ένα...*

3.2 Σημασίες/χρήσεις μορφήματος *θεο-*

Για το *θεο-* διακρίθηκαν οι ακόλουθες σημασίες/χρήσεις: α) η σημασία *θεός* (*θεόπεμπτος, θεόσταλτος* κ.ά.), β) η επιτακτική λειτουργία. Δεν εντοπίστηκε η μεγεθυντική σημασία⁶, παρόλο που καταγράφεται σε όλες τις υπάρχουσες μελέτες (βλ. λ.χ. Αναστασιάδη-Συμεωνίδη 2008, Γεωργακάς 1935, Συμεωνίδη 1985).⁷ Το στοιχείο αυτό ίσως αποτελεί μια ένδειξη ότι η συγκεκριμένη χρήση έχει υποχωρήσει.

⁴ Διακρίνεται από την αυτοδιόρθωση, καθώς ο ομιλητής δεν αναιρεί τη δήλωσή του, απλώς προσπαθεί να «επανορθώσει» με την αναφορά άλλων στοιχείων, μη αρνητικών.

⁵ Ο όρος «επισχετικές εκφράσεις» αναφέρεται σε μεταγλωσσικά σχόλια που δηλώνουν το βαθμό στον οποίο ο ομιλητής συμμορφώνεται με τα αξιώματα (βλ. Κανάκης 2007: 176).

⁶ Το μεγεθυντικό *θεο-* διακρίνεται από το επιτακτικό, διότι με αυτό δηλώνεται ότι το β' συνθετικό διακρίνεται από μεγάλες (φυσικές) διαστάσεις (π.χ. *θεοβάρελο* είναι το πολύ μεγάλο βαρέλι).

⁷ Ορισμένες, βέβαια, από αυτές τις μελέτες αποδελτιώνουν διαλεκτικό υλικό.

3.2.1. Επιτατική λειτουργία

Στην επιτατική του λειτουργία το *θεο-* επιτείνει το σημασιολογικό περιεχόμενο της βάσης. Εδώ εντάσσονται λέξεις όπως *θεοβρώμικος*⁸, *θεογκόμενα*, *θεόκουφος*, *θεονήστικος*, *θεοπάλαβος*, *θεοσκόταδο*, *θεόστραβος* κ.ά. Το επιτατικό *θεο-* επιλέγει βάσεις που δηλώνουν κατεξοχήν αρνητική ιδιότητα (βλ. και Ευθυμίου 2003, Αναστασιάδη-Συμεωνίδη 2008), η οποία ενδέχεται να συνίσταται σε αδυναμία σωματική (*κουφός* στο 15) ή ψυχική/πνευματική (*τρελός*, *παλαβός*), όταν η λέξη αναφέρεται σε [+έμψυχο], ή γενικότερα σε μια δυσάρεστη κατάσταση ή ένα αρνητικό χαρακτηριστικό (παραδείγματα 16 και 17).

(15) ...είναι γνωστό ότι τα φίδια είναι *θεόκουφα*.

(16) ...*θεόφτωχος* σαν ποντίκι της εκκλησίας...

(17) ...και φαγητά που μυρίζουν *φαρμακίλα* σ' έναν *θεόστενο* διάδρομο...

Εξαίρεση στην τάση συνδυασμού με «αρνητικές» βάσεις θα μπορούσε να θεωρηθεί το *θεογκόμενα* (βλ. Αναστασιάδη-Συμεωνίδη 2008). Οι λέξεις *γκόμενα* και *θεογκόμενα* φέρουν και θετικές συνυποδηλώσεις, δηλώνοντας την πολύ όμορφη γυναίκα. Ωστόσο, η μελέτη των συμφραστικών πινάκων επισημαίνει την παρουσία (και) δεικτών αρνητικής σημασιολογικής προσωδίας στα συμφρασζόμενά τους. Το *γκόμενα* εμφανίζεται συχνά με αρνητικές σημασιολογικά λέξεις (π.χ. 18), καθώς και σε συγκείμενο που προδίδει σεξιστικές αντιλήψεις.

(18) Οι *γκόμενες* τον ξέρουνε κι όλοι οι *νταβατζήδες*.

Η απόδοση των ιδιοτήτων που δηλώνουν οι βάσεις που επιλέγει το *θεο-* φαίνεται να είναι σε κάποιο βαθμό υποκειμενική, καθώς οι λέξεις που αναφέρονται σε [+ανθρώπινα] απαντούν είτε στον πληθυντικό, αποδίδοντας την ιδιότητα που δηλώνεται από τη βάση σε μια ομάδα ανθρώπων συλλήβδην⁹ (π.χ. 19), είτε αποδίδονται από τον ομιλητή στον εαυτό του με διάθεση αυτοσαρκασμού/αστεισμού (π.χ. 20). Στην περίπτωση των *θεότρελος* και *θεοπάλαβος* και οι ίδιες οι βάσεις προδίδουν υποκειμενική αξιολόγηση, καθώς ο αντίστοιχος επιστημονικός όρος δεν θα επιδεχόταν διαβάθμιση με το *θεο-* (π.χ. :*θεοψυχασθενής*).

(19) ...*διακόσιες εβδομήντα δύο* (.) *θεότρελες* (.) και μου λέει *άμα* σε *σκίσω* (.)...

(20) ...*οποίων* και *ο γράφων* που *δήλωσε* από την *αρχή* *θεότρελος*.

Το πιο σημαντικό στοιχείο που προκύπτει από τη μελέτη των λέξεων με το επιτατικό *θεο-* έγκειται στο ότι η σημασιολογική του συνεισφορά δεν αλλάζει επί της ουσίας το σημασιολογικό περιεχόμενο της βάσης. Η επίταση που δηλώνεται με την προσθήκη του δεν έχει ιδιαίτερο σημασιολογικό βάρος, καθώς οι ιδιότητες που δηλώνουν οι βάσεις είναι ήδη σε κάποιο βαθμό ακραίες (βλ. Αναστασιάδη-Συμεωνίδη 2008). Για παράδειγμα, το *μακρύς*, η βάση του *θεόμακρος*, δηλώνει κάτι που έχει μεγαλύτερο μήκος από το σύνθηες, το *φτωχός* κάποιον που βρίσκεται σε μια «ακραία» οικονομική κατάσταση, ενώ το *κουφός*, ακόμη και με τη μεταφορική σημασία του (αυτός που δεν δίνει σημασία σε αυτά που ακούει), εκφράζει μια ιδιότητα στο μέγιστό της βαθμό, όπως και το *θεόκουφος*.

Συνεπώς, το επιτατικό *θεο-* δεν έχει αμιγώς σημασιολογική συνεισφορά, αλλά επιτελεί κυρίως πραγματολογικό ρόλο, που έγκειται στο να δώσει επιπλέον έμφαση σε μια ιδιότητα που ήδη φέρει την έννοια της επίτασης.

4. Γραμματικές κατηγορίες

Το πραγματολογικό *ψιλο-* συνδυάζεται στα δεδομένα με ουσιαστικά (π.χ. *ψιλοελλείψεις*, *ψιλοξεφτιλίκι*), επίθετα (π.χ. *ψιλοάνετος*, *ψιλοεκβιαστικός*), ρήματα (*ψιλογουστάρω*, *ψιλοαπομακρύνομαι*) και επιρρήματα (*ψιλοδιακριτικά*, *ψιλοέτσι*)¹⁰.

Το επιτατικό *θεο-* συνδυάζεται με επίθετα (π.χ. *κουφός*, *νηστικός* κ.ά.), ουσιαστικά (π.χ. *σκοτάδι*, *γκόμενα*) και επιρρήματα (π.χ. *στραβά*).¹¹ Τα επιρρήματα θα μπορούσε να υποστηριχθεί ότι προέρχονται από τα αντίστοιχα επίθετα.

Τα προϊόντα και των δύο υπό εξέταση κανόνων φέρουν τη γραμματική κατηγορία των βάσεων. Επίσης, και τα δύο ανήκουν στα «πολυκατηγοριακά» στοιχεία, εφόσον σχηματίζουν λέξεις που

⁸ Υιοθετείται η ορθογραφία με την οποία απαντά στα δεδομένα.

⁹ Το στοιχείο αυτό αποτελεί ένδειξη υποκειμενικού χαρακτήρα, καθώς συνήθως οι γενικευτικές δηλώσεις είναι ακραίες.

¹⁰ Βλ. και Xydopoulos (2009), καθώς και Γιαννουλοπούλου (2003), όπου, ωστόσο, δεν αναφέρονται τα επιρρήματα.

¹¹ Πρβ. Ευθυμίου (2003), όπου σημειώνεται ότι συνδυάζεται με επίθετα, καθώς ορισμένες ονοματικές βάσεις που μπορούν να κατηγοριοποιηθούν και ως ουσιαστικά (π.χ. *θεογκόμενος/-α*) αντιμετωπίζονται ως επίθετα (2003: 527). Ωστόσο, από την παρούσα έρευνα προκύπτει ότι το *θεο-* συνδυάζεται, λιγότερο συχνά, και με ουσιαστικά που δεν μπορούν να θεωρηθούν επίθετα (π.χ. *σκοτάδι* (*θεοσκόταδο*)).

ανήκουν σε διάφορες γραμματικές κατηγορίες (βλ. Corbin 1999 στο Αναστασιάδη-Συμεωνίδη 2008: 104).

5. Πραγματολογικό χαρακτηριστικό [+/-λόγιο]

Προκειμένου να διερευνηθεί η τιμή των εξέταση στοιχείων ως προς το πραγματολογικό χαρακτηριστικό [+/-λόγιο]¹² μελετήθηκαν οι ακόλουθες παράμετροι:

- α) το επίπεδο ύφους των βάσεων με τις οποίες συνδυάζονται,
- β) το επίπεδο ύφους των συμφραζομένων στα οποία απαντούν οι κατασκευασμένες λέξεις που σχηματίζονται με αυτά και, τέλος,
- γ) οι συχνότητες εμφάνισής τους ανά κειμενικό είδος.

5.1 Πραγματολογικό μετριάστικό ψιλο-

Το πραγματολογικό ψιλο- συνδυάζεται με βάσεις είτε ουδέτερες είτε [-λόγιες]. Με ουδέτερες βάσεις συνδυάζεται περίπου στο 63% των δεδομένων (*ψιλοάνετος*, *ψιλοδιακριτικά* κ.ά.), ενώ με [-λόγιες] ή προφορικές περίπου στο 37% (*ψιλογουστάρω*, *ψιλοκόκαλο* (με τη σημασία «άνανδος/άφωνος»), *ψιλοκουλό* (με τη σημασία «παράξενο/περίεργο» κ.ά.). Αντιθέτως, δεν συνδυάζεται με λόγιες βάσεις.

Τα συμφραζόμενα στα οποία απαντούν τα προϊόντα του είναι είτε ουδέτερα υφολογικά (στο 50% των δεδομένων) είτε εντοπίζονται σε αυτά [-λόγια] ή προφορικά στοιχεία (στο 42% των δεδομένων), που μπορεί να είναι μονολεκτικές μονάδες, όπως το *κωλώνω* στο (21), ή στερεότυπες εκφράσεις (π.χ. 22).

(21) ...θα *κωλώσει* στα δικά μας ψιλοελλείμματα;

(22) ...*την πληρώσουμε και πολύ ακριβά την πίτα. Ένα ψιλοξεφτιλίκι μόνο και φτηνά τη γλιτώσαμε...*

Λόγια στοιχεία εντοπίζονται σε μόλις 4 εμφανίσεις (περίπου στο 8%). Στις δύο μάλιστα από αυτές, εξυπηρετούν την πρόκληση γέλιου (π.χ. 23).

(23) Έχασα τη σύζυγό μου ετών 35 ψιλο-προβληματική, τελευταία φορά *εθεάθη* μπρος στις ρόδες του τζιπ μου.

Τέλος, όπως φαίνεται στο σκιασμένο τμήμα του Πίνακα 2 του Παραρτήματος¹³, τα προϊόντα του πραγματολογικού ψιλο- απαντούν κυρίως στη συνομιλία, την ηλεκτρονική συνομιλία (chat), τη λογοτεχνία και τα άρθρα γνώμης. Επιπλέον, η μοναδική εμφάνιση στα ακαδημαϊκά κείμενα προέρχεται από απόσπασμα από λογοτεχνικό κείμενο. Αξίζει να σημειωθεί ότι το ύφος των λογοτεχνικών κειμένων είναι σε κάποιο βαθμό [-λόγιο], καθώς τα «λογοτεχνικά» στοιχεία συχνά δεν είναι συμβατά με επίσημο ύφος¹⁴.

Συνεπώς, τα προϊόντα αυτού του κανόνα είναι σε κάποιο βαθμό [-λόγια] και αντιστοιχούν σε προφορικό/ανεπίσημο ύφος, καθώς το ψιλο- έλκει βάσεις είτε ουδέτερες είτε [-λόγιες], δεν απαντά σε συμφραζόμενα επίσημου ύφους, ενώ και τα κειμενικά είδη στα οποία εμφανίζεται συχνότερα διακρίνονται σε κάποιο βαθμό από προφορικό ή [-λόγιο] χαρακτήρα.

5.2 Επιτατικό θεο-

Το επιτατικό θεο- συνδυάζεται με ουδέτερες υφολογικά βάσεις περίπου στο 77% των δεδομένων (*θεοσκοτεινος*, *θεόστενος*, *θεόφτωχος* κ.ά.). Στο 23% συνδυάζεται με βάσεις [-λόγιες] ή προφορικές (*θεογόμμενα*, *θεόστραβος*, όταν δηλώνει «αυτόν που δεν βλέπει (καλά)» κ.ά.), ενώ δεν συνδυάζεται με λόγιες βάσεις.

¹² Για τον ορισμό του πραγματολογικού χαρακτηριστικού [+/-λόγιο], βλ. Αναστασιάδη-Συμεωνίδη & Φλιάτουρας (2003).

¹³ Για τον τρόπο παρουσίασης των δεδομένων στους Πίνακες 2 και 3, βλ. τις παρατηρήσεις στην αρχή της ενότητας 6. Εδώ αρκεί να σημειωθεί ότι τα κειμενικά είδη του ΣΕΚ που δεν αναγράφονται είναι αυτά στα οποία τα μορφήματα δεν απαντούν.

¹⁴ Ο συσχετισμός αυτός ανάμεσα στο λογοτεχνικό και τον [-λόγιο] χαρακτήρα υπονοείται και στην ακόλουθη διατύπωση του Κριαρά: «Χρησιμοποιούμε τους τύπους *εκκλησία* και *λευτεριά*, που είναι βέβαια ταυτόσημες με τις αρχαιστικότερες *εκκλησία* και *ελευθερία*, μόνο που οι συνιζήμενοι τύποι ταιριάζουν περισσότερο σε λαϊκότερα ή και λογοτεχνικότερα κείμενα» (1983: 32).

Τα προϊόντα του απαντούν σε συγκεκριμένο είτε ουδέτερο (55% των παραδειγμάτων) είτε [-λόγιο] ή προφορικό (30% των παραδειγμάτων). Και εδώ τα [-λόγια] στοιχεία μπορεί να είναι μονολεκτικές μονάδες (π.χ. *φαρμακίλα*) ή εκφράσεις, όπως το *του πεταματού* στο (24).

(24) *Δεν είμαι δα και καμιά θεογκόμενα, ούτε και του πεταματού όμως.*

Λόγια στοιχεία απαντούν σε 4 παραδείγματα, εξυπηρετώντας και πάλι την πρόκληση γέλιου.

Τέλος, όπως βλέπουμε στον Πίνακα 3 του Παραρτήματος, οι λέξεις αυτής της κατηγορίας απαντούν κυρίως στα ιδιωτικά κείμενα (συγκεκριμένα στο chat), τη ζωντανή συνομιλία, τη λογοτεχνία και τα άρθρα γνώμης.

Συνεπώς, και το επιτατικό *θεο-* φαίνεται να είναι σε κάποιο βαθμό [-λόγιο] ή προφορικό, εφόσον δεν συνδυάζεται με λόγιες βάσεις, δεν εμφανίζεται σε λόγιο συγκεκριμένο και απαντά συχνότερα σε κειμενικά είδη που διακρίνονται από προφορικότητα.

6. Συχνότητα εμφάνισης και παραγωγικότητα

Οι συχνότητες εμφάνισης παρουσιάζονται στους Πίνακες 2 και 3 του Παραρτήματος (βλ. σκιασμένα τμήματα), όπου δίνονται και οι συχνότητες των υπολοίπων χρήσεων των μορφημάτων, που παρουσιάστηκαν συνοπτικά στις ενότητες 3.1. και 3.2. Σημειώνονται οι συχνότητες τόσο συνολικά όσο και ανά κειμενικό είδος, ενώ οι αριθμοί εντός παρενθέσεων είναι τα ποσοστά εμφανίσεων με αναγωγή στο 10⁵ και είναι συγκρίσιμοι μεταξύ τους.¹⁵

Η συχνότητα και των δύο μορφημάτων είναι πολύ χαμηλή. Το πραγματολογικό *ψιλο-* απαντά 52 φορές, ενώ το επιτατικό *θεο-* 27. Εκτός από τον συνολικό αριθμό εμφανίσεων, για την εξαγωγή του οποίου υπολογίστηκαν όλοι οι γραμματικοί τύποι των κατασκευασμένων λέξεων, μελετήθηκε επίσης ο αριθμός των διαφορετικών λημμάτων στα οποία αντιστοιχούν οι συνολικές συχνότητες και διαπιστώθηκε ότι στην περίπτωση του πραγματολογικού *ψιλο-* κάθε εμφάνιση αντιστοιχεί σε ένα ληματικό τύπο. Δηλαδή, κάθε λέξη αυτής της κατηγορίας (*ψιλοτσαμπουκάς*, *ψιλοπροβληματικός* κ.ά.) απαντά μόλις μια φορά στα δεδομένα. Αντίθετα, στις υπόλοιπες σημασίες/χρήσεις του *ψιλο-* ο αριθμός των λημμάτων δεν είναι υψηλός αναλογικά με τη συνολική συχνότητα εμφάνισης. Το ότι στο πραγματολογικό *ψιλο-* κάθε εμφάνιση αντιστοιχεί σε ένα λήμμα οδηγεί στο συμπέρασμα ότι τα προϊόντα αυτού του κανόνα δεν είναι κωδικοποιημένα, δηλαδή δεν έχει διευρυνθεί η χρήση τους¹⁶. Συνεπώς, ο υπό εξέταση κανόνας διακρίνεται από υψηλή παραγωγικότητα. Αυτό επιβεβαιώνεται από το ότι καμία λέξη αυτής της κατηγορίας δεν καταγράφεται στα λεξικά αναφοράς μας (ΛΚΝ 1998 και ΛΝΕΓ 2002). Αντίθετα, στις υπόλοιπες χρήσεις του *ψιλο-* σχεδόν όλες οι λέξεις των δεδομένων καταγράφονται λεξικογραφικά. Μια τρίτη ένδειξη που ενισχύει την υπόθεση της μη κωδικοποίησης των προϊόντων του είναι το ότι σε ορισμένες περιπτώσεις τίθεται μια παύλα μεταξύ του *ψιλο-* και της βάσης, που ενδέχεται να δηλώνει δισταγμό για το αν η λέξη που χρησιμοποιείται είναι υπαρκτή/αποδεκτή (π.χ. *ψιλο-διάστρεμμα*).

Στο επιτατικό *θεο-* επίσης απαντά μεγάλος αριθμός διαφορετικών λημμάτων (συγκεκριμένα 17), σε σχέση με το συνολικό αριθμό εμφανίσεων (27 εμφανίσεις). Αντιθέτως, στη σημασία «θεός», οι 345 εμφανίσεις σε θέση α' συνθετικού αντιστοιχούν σε 45 λήμματα και οι 49 εμφανίσεις σε θέση β' συνθετικού σε 6 λήμματα. Η σύγκριση με τη μακροδομή των λεξικών (ΛΝΕΓ 2002 και ΛΚΝ 1998) επισημαίνει ότι από τις λέξεις των δεδομένων δεν καταγράφονται λεξικογραφικά τα *θεόβαρος*, *θεοβρώμκος*, *θεόμακρος* και *θεόστενος*.

Η χαμηλή συχνότητα των υπό εξέταση μορφημάτων ενδέχεται να συνδέεται με το ότι τα προϊόντα τους είναι σηματοδεδεμένα υφολογικά. Τα σηματοδεδεμένα υφολογικά στοιχεία είναι λιγότερο συχνά, διότι τίθενται περιορισμοί στα περιεχόμενα στα οποία μπορούν να χρησιμοποιηθούν. Επιπλέον, οι υπό εξέταση χρήσεις απαντούν κυρίως στα προφορικά κείμενα, που αποτελούν μόνο το 10% των δεδομένων.

Το γεγονός ότι και τα δύο μορφήματα απαντούν σε μεγάλο αριθμό λημμάτων σε σχέση με τη συνολική συχνότητά τους επισημαίνει ότι είναι ανάγκη να γίνεται διάκριση μεταξύ της κωδικοποίησης ενός κανόνα κατασκευής λέξεων και της κωδικοποίησης των προϊόντων του, καθώς ένας κανόνας κατασκευής ενδέχεται να είναι κωδικοποιημένος, δηλαδή να έχει περάσει από την ατομική στην ομαδική χρήση, αλλά τα προϊόντα του να μην είναι κωδικοποιημένα σε μεγάλο βαθμό. Αυτό φαίνεται αυτονόητο, καθώς με έναν παραγωγικό κανόνα σχηματίζονται νεολογισμοί, που δεν κωδικοποιούνται αμέσως. Ωστόσο, εδώ θεωρούμε ότι η διαφορά ανάμεσα στο βαθμό κωδικοποίησης του κανόνα κατασκευής και των προϊόντων του ερμηνεύεται με άλλον τρόπο. Φαίνεται ότι οι ίδιοι λόγοι που

¹⁵ Η αναγωγή στο 10⁵ έγινε για λόγους παρουσίας των δεδομένων, διότι τα ποσοστά επί τοις εκατό ήταν πολύ χαμηλά.

¹⁶ Για τον ορισμό του όρου *κωδικοποίηση*, βλ. Αναστασιάδη-Συμεωνίδη (1986: 74).

ερμηνεύουν την υψηλή παραγωγικότητα και την κωδικοποίηση των κανόνων εξηγούν και τη μη κωδικοποίηση των προϊόντων τους. Και τα δύο θεωρούμε ότι οφείλονται εν μέρει στο είδος του φορτίου που φέρουν τα υπό εξέταση μορφήματα και ειδικότερα στις πραγματολογικές λειτουργίες που επιτελούν, που κατατάσσουν τα προϊόντα τους στη λεγόμενη συνυποδηλωτική και όχι στη δηλωτική/κατονομαστική νεολογία (βλ. Αναστασιάδη-Συμεωνίδη 1986: 70 για τη διάκριση). Η εμφάνιση των προϊόντων της δηλωτικής νεολογίας συνδέεται με την ανάγκη ονομασίας ενός νέου αντικειμένου αναφοράς και συνεπώς είναι πιο πιθανό να κωδικοποιηθούν. Αντιθέτως, τα υπό εξέταση στοιχεία εξυπηρετούν ανάγκες του ομιλητή όπως το να μετριάσει τα λεγόμενά του ή να δώσει έμφαση. Σε αυτό φαίνεται να οφείλεται η υψηλή παραγωγικότητά τους, καθώς τέτοιες ανάγκες προκύπτουν διαρκώς στην επικοινωνία. Παράλληλα, σε αυτό οφείλεται και η μη κωδικοποίηση των προϊόντων τους, καθώς τα προϊόντα αυτού του είδους της νεολογίας θεωρούμε ότι είναι πιο εύκολο να δημιουργηθούν, αλλά πιο δύσκολο να κωδικοποιηθούν. Επομένως, η λειτουργία αυτών των λέξεων ερμηνεύει τόσο την κωδικοποίηση του κανόνα που τις παράγει όσο και τη μη κωδικοποίηση των ιδίων.

Η διάκριση αυτή είναι ιδιαίτερα σημαντική για την κατανόηση των μηχανισμών δημιουργίας λέξεων. Παράλληλα, είναι σημαντική για τη λεξικογραφική αναπαράσταση των υπολεξικών μονάδων, καθώς οι μη κωδικοποιημένες λέξεις (νεολογισμοί) συνήθως δεν έχουν θέση σε ένα λεξικό. Αντιθέτως, ένας κωδικοποιημένος κανόνας, ακόμη κι αν τα προϊόντα του δεν είναι κωδικοποιημένα, είναι απαραίτητο να εκπροσωπείται με τη λημματοποίηση τόσο της αντίστοιχης υπολεξικής μονάδας όσο και αντιπροσωπευτικού αριθμού κατασκευασμένων λέξεων.

7. Συμπεράσματα και συζήτηση

Πριν προχωρήσουμε στη σύνοψη των συμπερασμάτων, κρίνεται απαραίτητη μια αναφορά στον αριθμό και το είδος των δεδομένων. Θα μπορούσε κάποιος να αντιτάξει στα ευρήματα της παρούσας έρευνας τον μικρό αριθμό των λέξεων που αναλύθηκαν. Πρέπει, ωστόσο, να τονιστεί ότι η μελέτη βασίστηκε σε ένα αντιπροσωπευτικό σώμα κειμένων, αποτελούμενο από 30 εκατομμύρια λέξεις, που αντιστοιχούν σε αυθεντικά γλωσσικά δεδομένα ποικίλων κειμενικών ειδών. Ακόμη και το ποσοστό των προφορικών δεδομένων (10% του συνόλου) ανταποκρίνεται στο αντίστοιχο των ΗΣΚ μεγάλων ευρωπαϊκών γλωσσών (βλ. Γούτσος 2003: 11). Δεδομένου ότι οι υπάρχουσες μελέτες βασίζονται κυρίως σε δεδομένα από λεξικά, η πραγματοποίηση μιας έρευνας βασισμένης σε ένα σώμα αυθεντικών κειμένων μπορεί να συμβάλει σημαντικά στη σκιαγράφηση της συμπεριφοράς των μορφημάτων σε αυθεντικά περιβάλλοντα. Η χαμηλή συχνότητα των στοιχείων καθιστά μεν δύσκολη την εξαγωγή γενικεύσιμων συμπερασμάτων, αλλά σκιαγραφεί τις τάσεις που διέπουν τη συμπεριφορά τους. Για παράδειγμα, το ότι όλα τα προϊόντα του πραγματολογικού *ψιλο-* απαντούν μια φορά μπορεί να μην είναι ενδεικτικό της συχνότητάς τους στη γλωσσική χρήση¹⁷, δηλαδή το στοιχείο αυτό δεν μας πληροφορεί ότι πρόκειται για λέξεις-άπαξ, αλλά δίνει μια σημαντική πληροφορία για τον συγκεκριμένο κανόνα κατασκευής, επισημαίνοντας ότι παρουσιάζει υψηλή κωδικοποίηση σε σχέση με την κωδικοποίηση των προϊόντων του.

Η ανάλυση με τη χρήση ΗΣΚ μπορεί να φωτίσει διάφορες πλευρές της συμπεριφοράς ενός μορφήματος. Ειδικότερα, η μελέτη των συμφραστικών πινάκων, σε συνδυασμό με τα σημασιολογικά χαρακτηριστικά των βάσεων που επιλέγει, συμβάλλει στον προσδιορισμό της σημασιολογικής συνεισφοράς του στις λέξεις που σχηματίζονται με αυτό. Η μελέτη των κατασκευασμένων λέξεων σε επίπεδο λεξικής μονάδας, με αναγωγή στο συγκεκριμένο όπου είναι απαραίτητο, επιτρέπει να διερευνηθούν οι βάσεις με τις οποίες συνδυάζεται ως προς τα σημασιολογικά χαρακτηριστικά, τις γραμματικές κατηγορίες και το επίπεδο ύφους τους. Με τον τρόπο αυτό καθίσταται δυνατή η περιγραφή τόσο του πραγματωμένου όσο και του δυνάμει λεξιλογίου, εφόσον η διερεύνηση των τάσεων ως προς τα χαρακτηριστικά των βάσεων που επιλέγει ένα μόρφημα δίνει πληροφορίες και για τις λέξεις που δύνανται να σχηματιστούν με αυτό. Συνεπώς, παρόλο που, όπως έχει επισημανθεί, ένα ΗΣΚ δεν μπορεί να δώσει πληροφορίες για το εάν κάτι είναι πιθανό ή όχι, παρά μόνο για το εάν είναι συχνό ή όχι (βλ. Hunston 2002: 22), στην περίπτωση των διαδικασιών σχηματισμού λέξεων, ο ερευνητής είναι σε θέση να διατυπώσει υποθέσεις και για το *τι είναι πιθανό* να σχηματιστεί. Επίσης, διαπιστώθηκε ότι το επίπεδο ύφους του μορφήματος μπορεί να διερευνηθεί με τρεις διαφορετικούς τρόπους: τη μελέτη του ύφους των βάσεων με τις οποίες συνδυάζεται, του ύφους των συμφραζομένων στα οποία απαντά και των κειμενικών ειδών στα οποία εμφανίζεται. Έτσι, περιορίζεται κατά το δυνατό το υποκειμενικό κριτήριο που διακρίνει συνήθως την επιλογή των υφολογικών δεικτών. Τέλος, η μελέτη των συχνοτήτων επιτρέπει την εξαγωγή συμπερασμάτων τόσο για τη συχνότητα όσο και για την κωδικοποίηση των υπό εξέταση στοιχείων και των προϊόντων τους.

¹⁷ Αντιθέτως, *ορισμένα* προϊόντα του, όπως λ.χ. το *ψιλοβαριέμαι*, εμφανίζουν υψηλό βαθμό κωδικοποίησης.

Για τα συγκεκριμένα μορφήματα διαπιστώθηκε ότι στις υπό εξέταση χρήσεις τους δεν φέρουν αμιγώς σημασιολογικό φορτίο, αλλά λειτουργούν ως πραγματολογικοί μηχανισμοί, που επιτρέπουν στον ομιλητή να μετριάσει τα λεγόμενά του ή να δώσει έμφαση. Η χαμηλή τους συχνότητα συνδέθηκε κυρίως με το ότι είναι σηματοδεδεμένα υφολογικά, ενώ διαπιστώθηκε ότι εμφανίζουν υψηλή παραγωγικότητα. Επίσης, απαντούν σε μεγάλο αριθμό διαφορετικών λημμάτων σε σχέση με τη συνολική συχνότητά τους. Η σύγκριση με τις υπόλοιπες χρήσεις τους δείχνει ότι αυτή η ιδιαιτερότητα φαίνεται να σχετίζεται με το ότι το φορτίο τους είναι πραγματολογικό και όχι αμιγώς σημασιολογικό.

Ορισμένες από τις κανονικότητες που παρατηρούνται στη συμπεριφορά τους ενδέχεται να σχετίζονται και με το είδος της συνεισφοράς των (παραγωγικών) προσφυμάτων, σε αντιδιαστολή με τη «σημασία» των θεμάτων. Για τα υπό εξέταση μορφήματα έχει υποστηριχθεί ότι τείνουν να μετατραπούν σε προθήματα (βλ. Γιαννουλοπούλου 2003), ενώ για άλλους ερευνητές το επιτατικό *θεο-* είναι ήδη πρόθημα (βλ. Αναστασιάδη-Συμεωνίδη 2008). Στην παρούσα εργασία εσκεμμένα δεν χρησιμοποιήθηκαν όροι που προδίδουν τη φύση τους (π.χ. α' συνθετικό, σύμφυμα ή πρόθημα), καθώς ο προσδιορισμός της δεν περιλαμβάνεται στους στόχους μας¹⁸. Επίσης, έγινε λόγος για διαφορετικές χρήσεις των μορφημάτων, υπονοώντας λ.χ. ότι το *θεο-* με τη σημασία *θεός* και το επιτατικό *θεο-* αντιμετωπίζονται ως διαφορετικές χρήσεις του ίδιου μορφήματος και όχι ως διαφορετικά μορφήματα. Η επιλογή αυτή, ωστόσο, οφείλεται στο ότι πρόκειται για συγχρονική ανάλυση και σε συγχρονικό επίπεδο απαντά ένας τύπος με δύο διαφορετικές χρήσεις (βλ. Αναστασιάδη-Συμεωνίδη 2008: 103). Παρόλο που οι κανονικότητες που παρατηρήθηκαν ενδέχεται να σχετίζονται σε κάποιο βαθμό με την προθηματοποίηση των υπό εξέταση στοιχείων, δεν θεωρούμε ότι η διάκριση πραγματολογικού και σημασιολογικού φορτίου ταυτίζεται με την αντίστοιχη του φορτίου των προσφυμάτων έναντι των θεμάτων, καθώς τα προσφύματα δεν επιτελούν απαραίτητα πραγματολογικές λειτουργίες σαν αυτές που μελετήθηκαν εδώ (π.χ. *-ικ(ός)*).

Ωστόσο, για να διερευνηθεί περαιτέρω η έννοια του πραγματολογικού φορτίου και ο τρόπος με τον οποίον επηρεάζει τη συμπεριφορά των υπολεξικών μονάδων είναι απαραίτητη η μελέτη μεγάλου αριθμού μορφημάτων και σε περισσότερα δεδομένα. Στις προεκτάσεις της παρούσας έρευνας εντάσσουμε επίσης τη διερεύνηση της σχέσης ορισμένων χαρακτηριστικών των υπό εξέταση μορφημάτων με την έννοια της αξιολογικής μορφολογίας, ενώ από το παρόν άρθρο, λόγω έλλειψης χώρου, απουσιάζει και μια «συζήτηση» της υπάρχουσας βιβλιογραφίας, η οποία είναι απαραίτητο να γίνει στο μέλλον.

ΠΕΡΙΛΗΨΗ

This study examines the interpretation of pronouns and reflexives in Greek-speaking children and adults. We employ two different methodological approaches, using the Truth Value Judgment Task and the Picture Selection Task. Our results show a strong task effect, indicating that the interpretation given to strong pronouns differs radically depending on the experimental task used. We analyse these results by appealing to the concept of minimality in pronoun selection, in conjunction with different strategies used by participants in the two task types.

Λέξεις κλειδιά: αναφορική δέσμευση, κατάκτηση, αντωνυμίες, κλιτικά, αυτοπαθή, Καθυστέρηση της Αρχής B, Δοκιμασία Επιλογής Εικόνας, Δοκιμασία Κρίσης Τιμών Αληθείας.

1. Εισαγωγή

Η ερμηνεία των αντωνυμιών και των αυτοπαθών στοιχείων έχει αποτελέσει αντικείμενο εκτεταμένης έρευνας κατά τις τελευταίες δεκαετίες. Βασικό λόγο για αυτό το ενδιαφέρον αποτελεί η ιδιόμορφη συμπεριφορά των στοιχείων αυτών στην κατάκτησή τους από τα παιδιά. Έρευνες σε αρκετές γλώσσες έχουν δείξει πως τα παιδιά έως την ηλικία των έξι περίπου χρόνων προσδίδουν αυτοπαθή ερμηνεία στις προσωπικές αντωνυμίες, ενώ αντίστοιχα προβλήματα δεν παρουσιάζονται με τα αυτοπαθή στοιχεία (Chien & Wexler 1990: Αγγλική, Avrutin & Wexler 1992: Ρωσική, Philip & Coopmans 1996: Ολλανδική κλπ). Για παράδειγμα, μια πρόταση όπως *The princess is painting her* “Η πριγκίπισσα τη βάφει” ερμηνεύεται κάποιες φορές από τα παιδιά ως *The princess is painting herself* “Η πριγκίπισσα βάφει τον εαυτό της”. Η συμπεριφορά αυτή των αντωνυμιών, που περιορίζεται στην κατανόηση και όχι στην παραγωγή προτάσεων, έχει ονομαστεί Φαινόμενο της Καθυστέρησης της Αρχής B (Delay of Principle B Effect), καθώς, στο πλαίσιο της Θεωρίας της Αναφορικής Δέσμευσης (Chomsky 1981, 1986), αποτελεί φαινομενική παραβίαση της αρχής αυτής. Από τις απόπειρες ανάλυσης του φαινομένου, η πιο γνωστή είναι εκείνη των Grodzinsky & Reinhart (1993), η οποία αποδίδει το φαινόμενο σε δυσκολίες των παιδιών με μια πραγματολογική αρχή (Rule I) που ρυθμίζει τη συναναφορά των αντωνυμικών στοιχείων (βλ. επίσης Chien & Wexler 1990).

Πρόσφατες έρευνες με ελληνόπουλα (Varlokosta 1999/2000, 2001) έχουν δείξει πως το φαινόμενο αυτό δεν συναντάται στην Ελληνική. Τα ελληνόπουλα δεν ερμηνεύουν ούτε τα κλιτικά *τον/την* ούτε την αντωνυμία *αυτόν/αυτήν* ως αυτοπαθή στοιχεία (δηλ. ως *τον εαυτό του/τον εαυτό της*). Προβλήματα επίσης δεν παρατηρούνται στην ερμηνεία των αυτοπαθών στοιχείων, παρά μόνο όταν αυτά βρίσκονται σε περιβάλλον με δύο πιθανά αντικείμενα αναφοράς. Σχετική έρευνα έδειξε πως σε μια πρόταση όπου υπάρχουν δύο ουσιαστικά, όπως *Ο δάσκαλος δίπλα στον μαθητή πλένει τον εαυτό του*, τα παιδιά επέλεξαν για την αυτοπαθή αντωνυμία λανθασμένο αντικείμενο αναφοράς (*ο μαθητής*) γύρω στο 30% των περιπτώσεων (Varlokosta 2001). Προβλήματα αυτού του είδους δεν διαπιστώθηκαν σε αντίστοιχη έρευνα στην Αγγλική (Avrutin & Cunningham 1997), και η διαφορά στην κατανόηση των αυτοπαθών ανάμεσα στην Ελληνική και στην Αγγλική δεν έχει λάβει ως τώρα ικανοποιητική εξήγηση. Επίσης, ενώ τα ευρήματα σχετικά με τα κλιτικά είναι σύμφωνα με αντίστοιχα ευρήματα σε άλλες γλώσσες (για παράδειγμα, Ιταλική: McKee 1992), η απουσία δυσκολιών με τον ισχυρό τύπο της προσωπικής

¹ Η έρευνα αυτή πραγματοποιήθηκε με την υποστήριξη μεταδιδακτορικής υποτροφίας του Ιδρύματος Κρατικών Υποτροφιών (IKY) στην ΕΣ.

αντωνυμίας (*αυτόν/αυτήν*) φαίνεται να αποτελεί εξαίρεση στον διαγλωσσικά ισχύοντα κανόνα του Φαινομένου της Καθυστέρησης της Αρχής B.

Η ερμηνεία που έχει δοθεί στην απουσία του φαινομένου με τις ισχυρές αντωνυμίες στα ελληνικά (Varlokosta 1999/2000) είναι ότι, όπως και τα κλιτικά, και σε αντίθεση με τις αντωνυμίες σε άλλες γλώσσες, η αντωνυμία *αυτόν/αυτήν* μπορεί να έχει και μη ανθρώπινο αντικείμενο αναφοράς: για τον λόγο αυτό, πρέπει να δεσμεύεται συντακτικά, όπως και τα κλιτικά, κι έτσι δεν υπόκειται στην πραγματολογική αρχή η οποία είναι υπεύθυνη για την ύπαρξη του φαινομένου κατά τους Grodzinsky & Reinhart (1993). Αυτή η ερμηνεία επιτυγχάνει μια ενιαία ανάλυση για τα στοιχεία που αντιστέκονται στο Φαινόμενο της Καθυστέρησης της Αρχής B, επεκτείνοντας στις ελληνικές ισχυρές αντωνυμίες την προταθείσα ερμηνεία των Baauw *et al.* (1997) για την απουσία του φαινομένου στα κλιτικά διαγλωσσικά.

Μία σταθερά στα αποτελέσματα σχετικών ερευνών, η οποία έχει περάσει σε γενικές γραμμές απαρατήρητη, είναι ότι τα ποσοστά σωστών απαντήσεων για την ισχυρή αντωνυμία *αυτόν/αυτήν* είναι πάντα ελαφρώς χαμηλότερα από τα αντίστοιχα ποσοστά για τα κλιτικά *τον/την*. Για παράδειγμα, στην έρευνα της Varlokosta (1999/2000), τα παιδιά έδωσαν σωστές απαντήσεις στη συνθήκη των κλιτικών στο 95% των περιπτώσεων, ενώ στη συνθήκη των ισχυρών αντωνυμιών στο 87% των περιπτώσεων. Τα αποτελέσματα του ελληνικού τμήματος της έρευνας της Sanoudaki (2004) πάνω στη δίγλωσση κατάκτηση Ελληνικής-Αγγλικής, παρουσίασαν παρόμοια ασυμμετρία: σωστές απαντήσεις για τα κλιτικά και τις ισχυρές αντωνυμίες δόθηκαν από τα παιδιά στο 90% και 80% των περιπτώσεων αντίστοιχα. Η ασυμμετρία αυτή δεν είναι σε καμία έρευνα αρκετά μεγάλη, και θα μπορούσε απλά να αγνοηθεί ως πειραματικός θόρυβος, αλλά η παρουσία της και η κατεύθυνση είναι σταθερή. Εναλλακτικά, θα μπορούσε ίσως να αναλυθεί ως ελαφρύ Φαινόμενο της Καθυστέρησης της Αρχής B, που όμως δεν ήταν αρκετά ισχυρό ώστε να δημιουργήσει μεγάλη διαφορά.

Μια πρόταση για την ερμηνεία αυτής της ασυμμετρίας βρίσκουμε στη Sanoudaki (2004), όπου προτείνεται πως η αιτία για τα ελαφρώς χαμηλότερα ποσοστά στις ισχυρές αντωνυμίες είναι η παραβίαση της Αρχής της Ελαχιστοποίησης (Minimality Condition) στην επιλογή προσωπικής αντωνυμίας (Cardinaletti & Starke 1999). Η αρχή αυτή απαιτεί τη χρήση του ασθενέστερου αντωνυμικού τύπου που επιτρέπεται σε κάθε περιβάλλον. Και καθώς τα κλιτικά είναι πιο ασθενείς τύποι από ό,τι οι ισχυρές αντωνυμίες (Cardinaletti & Starke 1999), έπεται ότι εάν σε ένα περιβάλλον μπορεί να χρησιμοποιηθεί το κλιτικό *τον/τον*, τότε η χρήση της ισχυρής αντωνυμίας *αυτόν/αυτήν* δεν επιτρέπεται. Αυτή η αρχή, υποστηρίζεται στη Sanoudaki (2004), παραβιάζεται στις σχετικές έρευνες πάνω στην κατάκτηση της αναφορικής δέσμευσης στα ελληνικά, καθώς ο ισχυρός τύπος της προσωπικής αντωνυμίας *αυτόν/αυτήν* χρησιμοποιήθηκε σε περιβάλλοντα όπου θα μπορούσε να έχει χρησιμοποιηθεί το κλιτικό *τον/την*. Χαρακτηριστικό παράδειγμα αποτελεί η χρήση της ισχυρής αντωνυμίας στην πρόταση *Ο μπαμπάς έντυσε αυτόν*, σε περιβάλλον όπου θα μπορούσε να έχει χρησιμοποιηθεί το κλιτικό *Ο μπαμπάς τον έντυσε*. Η ανάλυση αυτή υποστηρίζεται από το γεγονός ότι στις περιπτώσεις στις οποίες ο ισχυρός τύπος χρησιμοποιήθηκε σε περιβάλλον όπου η χρήση του κλιτικού δεν επιτρέπεται από τη γραμματική (για παράδειγμα, σε Προθετική Φράση, (1)), τα ποσοστά ήταν υψηλότερα (95%, Varlokosta 2001).

1. *Ο Γκούφν αγόρασε σε αυτόν ένα βιβλίο*

Επίσης, προκαταρκτική έρευνα σε ενήλικες, η οποία χρησιμοποιήσε το ίδιο υλικό που χρησιμοποιήθηκε στην έρευνα κατάκτησης, έδωσε κάποιες ενδείξεις ότι ίσως και οι ενήλικες έχουν αμφιβολίες σχετικά με την ερμηνεία των ισχυρών αντωνυμιών σε κάποια περιβάλλοντα (Sanoudaki 2003). Πλήρης έρευνα σε ενήλικες πάνω στην ερμηνεία των αντωνυμιών σε παρόμοια περιβάλλοντα στα ελληνικά, δεν έχει ως τώρα πραγματοποιηθεί.

Στην παρούσα μελέτη εξετάζεται περαιτέρω το πρόβλημα της ερμηνείας των ισχυρών αντωνυμιών στα ελληνικά, και η ασυμμετρία ανάμεσα στα αποτελέσματα των κλιτικών και των ισχυρών αντωνυμιών στις έρευνες με ελληνόπουλα, με δύο νέα πειράματα. Στο πρώτο πείραμα, θα εξεταστεί για πρώτη φορά ο τρόπος με τον οποίο ερμηνεύουν οι ενήλικες τις ισχυρές αντωνυμίες και τα κλιτικά, με υλικό και μεθοδολογία υπάρχουσας έρευνας με παιδιά (Varlokosta 1999/2000), ώστε να διαπιστωθεί αν η μικρή ασυμμετρία στην ερμηνεία ισχυρών αντωνυμιών και κλιτικών που έχει παρατηρηθεί στον παιδικό λόγο εμφανίζεται και στα δεδομένα των ενηλίκων. Στο δεύτερο πείραμα, αξιοποιώντας πρόσφατα ευρήματα, σύμφωνα με τα οποία τα αποτελέσματα της έρευνας πάνω στην ερμηνεία των αντωνυμιών μπορεί να διαφέρουν ανάλογα με τη μεθοδολογική προσέγγιση (Baauw *et al.* 2011, Conroy *et al.* 2009), θα εξεταστεί η ερμηνεία των ισχυρών αντωνυμιών, των κλιτικών και των αυτοπαθών αντωνυμιών σε παιδιά και ενήλικες με διαφορετική μέθοδο από εκείνη που έχει ως τώρα χρησιμοποιηθεί. Συγκεκριμένα, ενώ οι ως τώρα έρευνες στα ελληνικά έχουν χρησιμοποιήσει κάποια μορφή της Δοκιμασίας Κρίσης των Τιμών Αληθείας ενός Εκφωνήματος (Truth Value Judgment Task,

Chien & Wexler 1990, εφεξής ΔοΚΤΑΕ), θα χρησιμοποιήσουμε τη Δοκιμασία Επιλογής Εικόνας (Picture Selection Task, εφεξής ΔΕΕ). Με τα δύο αυτά πειράματα στοχεύουμε στο να συγκεντρώσουμε υλικό που θα μας επιτρέψει να απαντήσουμε το ερώτημα της ερμηνείας των αντωνυμικών στοιχείων στην Ελληνική.

2. Πείραμα πρώτο

2.1 Στόχος

Με το πείραμα αυτό εξετάζουμε για πρώτη φορά ενήλικες στην ερμηνεία των αντωνυμικών και αυτοπαθών στοιχείων, χρησιμοποιώντας υλικό και μεθοδολογία προϋπάρχουσας έρευνας με ελληνόπουλα (Varlokosta 1999/2000).

2.2 Μέθοδος και Υλικό

Στο πείραμα έλαβαν μέρος δέκα ενήλικες (έξι άνδρες και τέσσερις γυναίκες), ηλικίας 22-65 χρόνων, φουσικοί ομιλητές της Ελληνικής, που μεγάλωσαν σε μονόγλωσσο περιβάλλον και ζουν στην Κρήτη.

Η μέθοδος που ακολουθήθηκε είναι η ΔοΚΤΑΕ με εικόνες. Η ΔοΚΤΑΕ έχει χρησιμοποιηθεί στην έρευνα σχετικά με την κατάκτηση των αντωνυμικών συστημάτων σε διάφορες γλώσσες (για παράδειγμα, Chien & Wexler 1990: Αγγλική), συμπεριλαμβανομένης και της Ελληνικής (Varlokosta 1999/2000), αλλά και σε παιδιά δίγλωσσα (Sanoudaki 2004: Ελληνική-Αγγλική).

Με τη ΔοΚΤΑΕ μπορούμε να εξετάσουμε αν τα παιδιά εκχωρούν σε ένα εκφώνημα μια ερμηνεία η οποία δεν είναι αποδεκτή από τη γραμματική. Η διαδικασία είναι η ακόλουθη: ένας ερευνητής παρουσιάζει μια εικόνα και ρωτάει μια ναι-όχι ερώτηση σχετικά με το τι συμβαίνει στην εικόνα. Οι εικόνες παρουσιάζουν έναν χαρακτήρα να ζωγραφίζει, να πλένει, να αγγίζει κλπ. κάποιον άλλο χαρακτήρα ή τον εαυτό του. Για παράδειγμα, σε μια απεικόνιση μιας μάγισσας και μιας πριγκίπισσας να βάφει τον εαυτό της, μια εισαγωγική πρόταση παρουσιάζει τους χαρακτήρες (*Εδώ βλέπουμε μια πριγκίπισσα και μια μάγισσα.*), ακολουθούμενη από μια ερώτηση (*Η πριγκίπισσα τη βάφει;*). Η ερώτηση του ερευνητή δίνει στο παιδί δυο ζεύγη ερμηνείας-εκφώνηματος, εκ των οποίων το ένα είναι ακριβές (αληθές) περιγραφή του τι συμβαίνει στην εικόνα αλλά αντίθετο με κάποια γραμματική αρχή (ερμηνεία α), ενώ το δεύτερο είναι ψευδές αλλά σύμφωνο με τη γραμματική (ερμηνεία β). Κάθε θετική απάντηση εκ μέρους του παιδιού λαμβάνεται ως ένδειξη ότι το παιδί δεν γνωρίζει τη γραμματική αρχή. Αντίθετα, αν το παιδί απαντήσει αρνητικά, η απάντησή του λαμβάνεται ως ένδειξη ότι το παιδί γνωρίζει την αρχή.

2. Ερμηνεία α: * η πριγκίπισσα_i τη_i βάφει (αντίθετο με τη γραμματική αλλά αληθές)
(=η πριγκίπισσα βάφει τον εαυτό της)

Ερμηνεία β: η πριγκίπισσα_i τη_κ βάφει (σύμφωνο με τη γραμματική αλλά ψευδές)

(=η πριγκίπισσα βάφει τη μάγισσα)
το εκφώνημα απαιτεί αρνητική απάντηση

Στο παρόν πείραμα, ακολουθήσαμε το πρότυπο της έρευνας της Varlokosta (1999/2000): είχαμε τρεις συνθήκες δοκιμασίας, μία για τα κλιτικά, μία για τις ισχυρές αντωνυμίες και μία για τις αυτοπαθείς. Για κάθε συνθήκη δοκιμασίας υπήρχε και μία συνθήκη ελέγχου, στην οποία η ερμηνεία β, η σύμφωνη με τη γραμματική, είναι αληθής, ενώ η ερμηνεία α, η αντιγραμματική, είναι ψευδής (δηλ. σωστή απάντηση “ναι”). Κάθε συνθήκη δοκιμασίας και ελέγχου εξετάστηκε σε τέσσερις προσπάθειες. Επίσης υπήρχε μια συνθήκη που περιλάμβανε μόνο ουσιαστικά (έξι προσπάθειες με σωστή απάντηση “ναι” κι έξι προσπάθειες με σωστή απάντηση “όχι”).

Οι προτάσεις παρουσιάστηκαν σε δύο διαφορετικές σειρές, κάθε σειρά για τους μισούς συμμετέχοντες. Η ολοκληρωμένη λίστα των υλικών που χρησιμοποιήθηκαν, οργανωμένα σε μία από τις δύο σειρές, παρατίθεται στο Παράρτημα 1.

2.3 Αποτελέσματα

Τα ποσοστά σωστών απαντήσεων για κάθε συνθήκη παρουσιάζονται στο Γράφημα 1.

Γράφημα 1 Ποσοστό σωστών απαντήσεων σε κάθε συνθήκη ελέγχου και δοκιμασίας, για ουσιαστικά, κλινικά, αυτοπαθή και ισχυρές αντωνυμίες

Όπως φαίνεται παραπάνω, τα ποσοστά σωστών απαντήσεων ήταν πολύ υψηλά σε όλες τις πειραματικές συνθήκες. Στη συνθήκη των ισχυρών αντωνυμιών τα ποσοστά ήταν ελαφρώς χαμηλότερα, αλλά πάντα πάνω από 90%.

3. Πείραμα δεύτερο

3.1 Στόχος

Στο πείραμα αυτό εφαρμόζουμε για πρώτη φορά τη ΔΕΕ στην έρευνα της ερμηνείας των ισχυρών αντωνυμιών, των κλιτικών και των αυτοπαθών αντωνυμιών στα ελληνικά από παιδιά και ενήλικες. Φιλοδοξούμε με τον τρόπο αυτό να αποκτήσουμε μια πιο ολοκληρωμένη εικόνα της ερμηνείας των σχετικών στοιχείων, συλλέγοντας υλικό που θα μας βοηθήσει να ερμηνεύσουμε την ασυμμετρία ανάμεσα στα κλιτικά και στις ισχυρές αντωνυμίες που ανιχνεύθηκε σε προηγούμενα πειράματα.

3.2 Συμμετέχοντες

Δεκαεννέα παιδιά τυπικής ανάπτυξης (εννέα κορίτσια και δέκα αγόρια, ηλικίας 4,5 – 6,3) συμμετείχαν σε αυτό το πείραμα. Τα παιδιά εξετάστηκαν σε τρία νηπιαγωγεία στο Ηράκλειο Κρήτης. Όλα τα παιδιά μεγαλώνουν σε μονόγλωσση ελληνόφωνη οικογένεια και δεν έχουν ιστορικό πρόβληματος αναπτυξιακού ή γλωσσικού. Ως επιπλέον μέτρο της γλωσσικής ανάπτυξης των συμμετεχόντων παιδιών, κάθε παιδί πραγματοποίησε τμήμα του Ελληνικού Διαγνωστικού Τεστ Λεκτικής Νοημοσύνης (Diagnostic Test of Verbal Intelligence DVIQ, Stavrakaki & Tsimpli 2000) πριν από την πειραματική δοκιμασία. Συγκεκριμένα, δόθηκαν στα παιδιά τα τμήματα παραγωγής λεξιλογίου και κατανόησης μορφοσύνταξης του τεστ. Ο μέσος όρος και η τυπική απόκλιση για κάθε τμήμα του τεστ δίνονται στον Πίνακα 1.

Παραγωγή λεξιλογίου (Μέγιστη βαθμολογία=27)		Κατανόηση μορφοσύνταξης (Μέγιστη βαθμολογία=31)	
Μέσος όρος	Τυπική απόκλιση	Μέσος όρος	Τυπική απόκλιση
19.18	2.01	20.68	3.76

Πίνακας 1 Αποτελέσματα Τεστ Λεκτικής Νοημοσύνης

Επίσης, εξετάστηκε μια ομάδα ενηλίκων αποτελούμενη από δεκαοκτώ ενήλικες (δεκατρείς γυναίκες και πέντε άντρες), ηλικίας 23-67 χρόνων. Όλοι οι συμμετέχοντες είναι φυσικοί ομιλητές της

Ελληνικής, που μεγάλωσαν σε μονόγλωσσο περιβάλλον και ζουν στην Κρήτη. Κανείς από τους συμμετέχοντες δεν είχε λάβει μέρος στο προηγούμενο πείραμα.

3.3 Μέθοδος και Υλικό

Σε αυτό το πείραμα ακολουθήσαμε τη ΔΕΕ. Η μέθοδος αυτή έχει χρησιμοποιηθεί στην εξέταση διαφόρων πτυχών της κατάκτησης μορφοσυντακτικών αντιθέσεων, συμπεριλαμβανομένης και της αναφορικής δέσμευσης (Baauw *et al.* 2011, Deutsch *et al.* 1986, Varlokosta & Nerantzini 2011).

Οι συμμετέχοντες άκουσαν προτάσεις και διάλεξαν, δείχνοντας με το δάχτυλο, μία από δύο εικόνες για κάθε πρόταση. Σε κάθε ζεύγος εικόνων, μία εικόνα έδειχνε ένα άτομο που επιτελούσε μια πράξη (π.χ. πλύσιμο) σε ένα άλλο άτομο, ενώ η άλλη έδειχνε το ίδιο άτομο να επιτελεί την πράξη αυτή προς τον εαυτό του, παρουσία του δεύτερου ατόμου.

Υπήρχαν τέσσερις συνθήκες δοκιμασίας: μία για κλιτικά, μία για ισχυρές αντωνυμίες, μία για αυτοπαθή και μία για αυτοπαθή με δύο πιθανά αντικείμενα αναφοράς. Συμπεριλήφθηκε και μια συνθήκη ελέγχου, με ουσιαστικά μόνο. Κάθε συνθήκη εξετάστηκε σε εννέα προσπάθειες, ώστε συνολικά υπήρχαν σαρανταπέντε προσπάθειες. Στον Πίνακα 2 παρουσιάζεται ένα παράδειγμα για κάθε συνθήκη.

Πειραματική συνθήκη	Αριθμός προσπαθειών	Παράδειγμα
ΚΛΙΤ	9	Ο πρίγκιπας τον σκεπάζει
ΑΝΤ	9	Η μαμά σκουπίζει αυτήν
ΑΥΤΟΠ	9	Η γιαγιά αγκαλιάζει τον εαυτό της
ΑΥΤΟΠ2	9	Ο βασιλιάς δίπλα στον μάγο πλένει τον εαυτό του
ΟΥΣ	9	Η μάγισσα χτενίζει τη βασίλισσα

Πίνακας 2 Πειραματικές συνθήκες

Χρησιμοποιήθηκαν εννέα ρήματα: *πλένω*, *χτενίζω*, *βάφω*, *γλύφω*, *σκουπίζω*, *σκεπάζω*, *αγκαλιάζω*, *αγγίζω*, *ζωγραφίζω*. Κάθε ρήμα χρησιμοποιήθηκε σε όλες τις συνθήκες δοκιμασίας καθώς και στη συνθήκη ελέγχου. Υπήρχε ένα ακόμα ρήμα, *βρέχω*, σε δύο εισαγωγικές προσπάθειες για ζέσταμα.

Κάθε πρόταση διαβάστηκε από τον ερευνητή καθώς ο συμμετέχων έβλεπε το αντίστοιχο ζεύγος εικόνων σε οθόνη φορητού υπολογιστή 15.6 ιντσών. Πριν από κάθε πειραματική πρόταση προηγήθηκε μια εισαγωγική πρόταση, η οποία παρουσίαζε τους χαρακτήρες.

Εισαγωγική πρόταση	Πειραματική πρόταση
Εδώ βλέπουμε έναν πρίγκιπα κι έναν νάνο	Ο πρίγκιπας τον σκεπάζει

Οι εικόνες που χρησιμοποιήθηκαν έχουν δημιουργηθεί για την εξέταση της αναφορικής δέσμευσης διαγλωσσικά στο πλαίσιο του Ευρωπαϊκού Ερευνητικού Προγράμματος COST Action A33 (2006-2010).

Ως επιπλέον κριτήριο για την επιλογή των παιδιών ορίστηκε η επίδοση στη συνθήκη ελέγχου. Μόνο το υλικό των παιδιών που έδωσαν τουλάχιστον επτά σωστές απαντήσεις (από τις εννέα) στη συνθήκη ελέγχου συμπεριλήφθηκε στο πείραμα. Οι απαντήσεις παιδιών που έδωσαν λιγότερες σωστές απαντήσεις στη συνθήκη ελέγχου δεν μετρήθηκαν κατά τον υπολογισμό των αποτελεσμάτων.

Οι προτάσεις παρουσιάστηκαν στους συμμετέχοντες σε δύο διαφορετικές σειρές. Η πρώτη σειρά ήταν τυχαία, ενώ η δεύτερη ήταν αντίθετη της πρώτης. Κάθε σειρά παρουσιάστηκε στους μισούς από τους συμμετέχοντες. Στο Παράρτημα 2 παρατίθεται η μία από τις δύο σειρές.

3.4 Αποτελέσματα

Τα αποτελέσματα για τις ομάδες των παιδιών και των ενηλίκων παρουσιάζονται στο Γράφημα 2.

Γράφημα 2 Ποσοστό σωστών απαντήσεων για τις δύο ομάδες σε κάθε συνθήκη: ουσιαστικά, κλιτικά, αυτοπαθή, αυτοπαθή με δύο πιθανά αντικείμενα αναφοράς και ισχυρές αντωνυμίες

Όπως φαίνεται στο Γράφημα 2, τα παιδιά έδωσαν λιγότερες σωστές απαντήσεις όταν το αυτοπαθές βρισκόταν σε περιβάλλον με δύο πιθανά αντικείμενα αναφοράς (ΑΥΤΟΠ2). Επιπλέον, έδωσαν αυτοπαθή ερμηνεία στην ισχυρή αντωνυμία στο 26% των περιπτώσεων στη σχετική συνθήκη (ΑΝΤ). Τα αποτελέσματα της ομάδας των ενηλίκων δείχνουν ότι και οι ενήλικες επιτρέπουν την αυτοπαθή ερμηνεία της ισχυρής αντωνυμίας: αυτό παρατηρήθηκε στο 38% των περιπτώσεων. Σε όλες τις άλλες συνθήκες τα αποτελέσματα είναι πολύ υψηλά, τόσο για την ομάδα των παιδιών όσο και των ενηλίκων.

4. Συζήτηση

Η παρούσα έρευνα εξετάζει την αναφορική δέσμευση στα ελληνικά χρησιμοποιώντας δύο διαφορετικές μεθοδολογικές προσεγγίσεις. Στο πρώτο πείραμα εξετάσαμε την ερμηνεία κλιτικών, ισχυρών αντωνυμιών και αυτοπαθών σε ενήλικες εφαρμόζοντας τη ΔοΚΤΑΕ, κατά το πρότυπο της έρευνας της Varlokosta (1999/2000) σε παιδιά. Τα αποτελέσματα αναπαράγουν τα αντίστοιχα της Varlokosta (1999/2000), δείχνοντας ελαφρώς χαμηλότερα ποσοστά στη συνθήκη των ισχυρών αντωνυμιών. Η ελαφρά αυτή ασυμμετρία θα μπορούσε ξανά να ερμηνευθεί ως πειραματικός θόρυβος, παρά το ότι η παρουσία της είναι σταθερή, αν δεν είχαμε τα αποτελέσματα του δεύτερου πειράματος.

Στο δεύτερο πείραμα χρησιμοποιήσαμε τη ΔΕΕ για να εξετάσουμε την ερμηνεία κλιτικών, ισχυρών αντωνυμιών, αυτοπαθών και αυτοπαθών με δύο αντικείμενα αναφοράς σε παιδιά και ενήλικες. Τα αποτελέσματα των απαντήσεων των παιδιών αναπαράγουν εκείνα της Varlokosta (1999/2000) ως ένα σημείο. Με την παρούσα δοκιμασία, όπως και με τη ΔοΚΤΑΕ, τα παιδιά έχουν δυσκολίες στην ερμηνεία των αυτοπαθών όταν υπάρχουν δύο πιθανά αντικείμενα αναφοράς στην πρόταση, επιλέγοντας αντικείμενο αναφοράς που καθιστά την πρόταση αντιγραμματική. Αντίθετα, στη συνθήκη των ισχυρών αντωνυμιών, τα παρόντα αποτελέσματα διαφέρουν ριζικά από εκείνα των ερευνών που εφαρμόσαν τη ΔοΚΤΑΕ (Sanoudaki 2004, Varlokosta 1999/2000, 2001). Η χρήση της ΔΕΕ στην παρούσα έρευνα είχε ως αποτέλεσμα την απόδοση αυτοπαθούς ερμηνείας στην ισχυρή αντωνυμία *αυτόν/αυτήν* περίπου στο ένα τρίτο με ένα τέταρτο των περιπτώσεων τόσο από τα παιδιά όσο και από τους ενήλικες.

Παρατηρούμε ότι η επιλογή δοκιμασίας επέδρασε καταλυτικά στην απόδοση ερμηνείας στην αντωνυμία και στις δύο ομάδες, δημιουργώντας ένα ενδιαφέρον παράδοξο. Η ΔοΚΤΑΕ είναι σχεδιασμένη ώστε να ελέγχει αν μια ερμηνεία είναι διαθέσιμη στους συμμετέχοντες ή όχι (βλ. μεθοδολογία παραπάνω), ενώ η ΔΕΕ ελέγχει ποια από τις (πιθανόν διαθέσιμες) ερμηνείες είναι η προτιμητέα, εφόσον αφήνει ελεύθερους τους συμμετέχοντες να επιλέξουν όποια εικόνα πιστεύουν πως ταίριαζει καλύτερα στο εκφώνημα. Το παράδοξο έγκειται στο ότι η παρούσα έρευνα φαίνεται να δείχνει πως μια ερμηνεία η οποία δεν είναι διαθέσιμη (στα παιδιά αλλά ούτε στους ενήλικες) είναι εκείνη που συχνά (στο ένα τρίτο περίπου των περιπτώσεων) προτιμάται.

Υποστηρίζουμε ότι το παράδοξο αυτό μπορεί να ερμηνευθεί ικανοποιητικά μόνο αν εξεταστεί σε συνδυασμό με την Αρχή της Ελαχιστοποίησης στην επιλογή των αντωνυμιών των Cardinaletti & Starke (1999). Τα αποτελέσματα της παρούσας έρευνας δείχνουν ότι η ελαφρά ασυμμετρία στα αποτελέσματα των προηγούμενων ερευνών με ΔοΚΤΑΕ δεν μπορεί να οφείλεται σε ελαφρύ Φαινόμενο της Καθυστερήσης της Αρχής Β, εφόσον παρατηρείται και σε ενήλικες. Επίσης, η ερμηνεία της ως πειραματικού θορύβου θα ήταν προβληματική, εφόσον θα δημιουργούσε τη μη επιθυμητή ανάγκη για διαχώριση στην ερμηνεία των αποτελεσμάτων των δύο μεθόδων: η διαφορά στα αποτελέσματα της ΔΕΕ ήταν μεγάλη και δεν θα μπορούσε να ερμηνευθεί ως πειραματικός θόρυβος. Αντίθετα, η ερμηνεία της ως αποτέλεσμα της παραβίασης της Αρχής της Ελαχιστοποίησης, κατά τη Sanoudaki (2004), όχι μόνο είναι δυνατή, αλλά, σε συνδυασμό με μια εξέταση της διαφορετικής φύσης των δύο δοκιμασιών, μπορεί να μας βοηθήσει να ερμηνεύσουμε και το παρόν παράδοξο.

Ας θυμηθούμε πως κατά τη ΔοΚΤΑΕ, οι συμμετέχοντες καλούνται να κρίνουν εάν ένα εκφώνημα είναι αληθές ή όχι. Η συνθήκη των ισχυρών αντωνυμιών στα σχετικά πειράματα παρουσιάζει μια πρόταση αντιγραμμιακή, όποια τιμή αληθείας κι αν δοθεί στο εκφώνημα: η ερμηνεία της αντωνυμίας ως αυτοπαθής στην πρόταση *η πριγκίπισσα βάφει αυτήν* παραβιάζει την Αρχή Β, ενώ η μη αυτοπαθής ερμηνεία παραβιάζει την Αρχή της Ελαχιστοποίησης στην επιλογή αντωνυμιών (καθώς στο περιβάλλον αυτό θα απαιτούνταν η χρήση κλιτικού). Τα αποτελέσματα φανερώνουν πως οι συμμετέχοντες σέβονται την καθαρά συντακτική αρχή (Αρχή Β), έναντι της εν μέρει πραγματολογικής αρχής (Αρχή της Ελαχιστοποίησης), επιλέγοντας μη αυτοπαθή ερμηνεία για την αντωνυμία. Σύμφωνα με την ερμηνεία αυτή, τα ελαφρώς χαμηλότερα ποσοστά στις σχετικές συνθήκες μπορούν να αναλυθούν ως περιπτώσεις όπου η πραγματολογική αρχή λαμβάνει προτεραιότητα έναντι της συντακτικής αρχής. Στη ΔΕΕ, αντίθετα, οι συμμετέχοντες είναι ελεύθεροι να επιλέξουν ποια εικόνα ταιριάζει περισσότερο με το εκφώνημα. Εάν η πρόταση είναι αντιγραμμιακή, οποιαδήποτε εικόνα κι αν διαλέξουν, υποστηρίζουμε ότι οι συμμετέχοντες μπορούν να εφαρμόσουν διαφορετικές στρατηγικές επιδιόρθωσης. Στην παρούσα περίπτωση, ακούγοντας το εκφώνημα *Η πριγκίπισσα βάφει αυτήν*, πιθανή στρατηγική θα ήταν η επιδιόρθωση της παραβίασης της Αρχής της Ελαχιστοποίησης, με τη μετατροπή της ισχυρής αντωνυμίας (*αυτήν*) σε κλιτικό (*την*), και τη συνακόλουθη επιλογή της εικόνας όπου η πριγκίπισσα βάφει τη μάγισσα. Άλλη στρατηγική θα ήταν η εισαγωγή αυτοπάθειας στην πρόταση, με τη βοήθεια του στοιχείου *την ίδια* που επιτρέπει την αυτοπαθή ερμηνεία της αντωνυμίας *αυτήν* (*βάφει αυτήν την ίδια = βάφει τον εαυτό της*), ακολουθούμενη από την επιλογή της εικόνας όπου η πριγκίπισσα βάφει τον εαυτό της.

Υποστηρικτικό της παραπάνω ανάλυσης είναι το γεγονός ότι μεγάλο ποσοστό των ενηλίκων συμμετεχόντων που έδωσαν αυτοπαθή ερμηνεία στο εκφώνημα διόρθωσαν την πρόταση λέγοντας *αυτήν την ίδια* στις σχετικές προσπάθειες, ενώ, αντίστοιχα, αρκετοί από τους ενήλικες συμμετέχοντες που έδωσαν μη αυτοπαθή ερμηνεία διόρθωσαν την πρόταση λέγοντας *τη βάφει* (κλιτικό), *βάφει τη μάγισσα* (ουσιαστικό), ή *τη βάφει τη μάγισσα* (διπλασιασμός του κλιτικού), δημιουργώντας προτάσεις που δεν παραβιάζουν την Αρχή της Ελαχιστοποίησης, ενώ ταυτόχρονα διατηρούν μη αυτοπαθή ανάγνωση. Ενώ κανένα από τα παιδιά δεν έδωσε λεκτικές ενδείξεις για τις στρατηγικές επιδιόρθωσης, με βάση την ομοιότητα των αποτελεσμάτων στις δύο ομάδες, παιδιά και ενήλικες, μπορούμε να υποθέσουμε ότι είναι πιθανόν παρόμοιες στρατηγικές να ακολουθήθηκαν και από τα παιδιά.

5. Συμπεράσματα

Με την παρούσα έρευνα μπορούμε πλέον με βεβαιότητα να υποστηρίζουμε ότι οι ισχυρές αντωνυμίες στην Ελληνική δεν υπόκεινται στο Φαινόμενο της Καθυστερήσης της Αρχής Β. Ιδιαίτερα σημαντικό εύρημα είναι η επίδραση της επιλογής διαφορετικής μεθοδολογίας στα αποτελέσματα της έρευνας πάνω στην αναφορική δέσμευση. Η χρήση της ΔΕΕ μας βοήθησε να συμπεράνουμε ότι μικρές ασυμμετρίες που θεωρούντο πειραματικός θόρυβος σε προηγούμενες έρευνες είναι στην πραγματικότητα αποτέλεσμα της παραβίασης της Αρχής της Ελαχιστοποίησης στην επιλογή αντωνυμιών, και μας δίνουν τη δυνατότητα να αμφισβητήσουμε την ορθότητα της συνήθους πρακτικής να αγνοούνται μικρές ασυμμετρίες ως ‘απλώς’ πειραματικός θόρυβος.

ABSTRACT

The systemic contrastive analysis of translation shifts in selected textual instances allows the examination of translational behaviour on the level of sociolects and of certain features of the translation act, in terms of both process and function, and on the level of the translation product as such. Such a systemic view of translation is envisaged in the so-called probabilistic laws of interference and growing standardisation, proposed by Gideon Toury. This paper focuses on interference, by analysing synchronically the lexicosemantic and stylistic performance of trainee translators in technical and scientific discourse. My aim is also to posit methodological and didactic conclusions.

Λέξεις-κλειδιά: Πιθανολογικοί νόμοι της μετάφρασης, Μεταφραστική συμπεριφορά, Παρεμβολή, Αύξουσα τυποποίηση, Περιγραφικές μεταφραστικές σπουδές, Λεξικοραμματική ανάλυση, Διδακτική της μετάφρασης.

1. Εισαγωγή

Στη μετάφραση, αλλά και κατ' επέκταση στις Μεταφραστικές Σπουδές, συχνή είναι η αναφορά στις έννοιες της (αύξουσας) τυποποίησης¹ και της παρεμβολής². Με απαρχή τις διαπολιτισμικές σπουδές, αλλά και τη μελέτη της εκφοράς των δίγλωσσων ατόμων, στη μετάφραση τα φαινόμενα αυτά ανάγονται στη μεταφορά (ή την εκτύπωση) τεμαχίων λόγου (discourse transfer) μεταξύ των γλωσσικών συστημάτων που έρχονται σε επαφή κατά την πράξη ομιλίας (parole) του δίγλωσσου ατόμου (Σελλά 2001: 55). Στις Περιγραφικές Μεταφραστικές Σπουδές θεμελιώνεται το θεώρημα των δύο πιθανολογικών νόμων περιγραφής και ερμηνείας της μεταφραστικής συμπεριφοράς (Toury 1995: 267–279), ήτοι (α) της αύξουσας τυποποίησης (growing standardization) και (β) της παρεμβολής (interference). Αφ' ενός, η παρεμβολή εντοπίζεται στο επίπεδο της εκφοράς μεταφραστικού λόγου. Με αναφορά, δε, στον πιθανολογικό νόμο της αύξουσας τυποποίησης, δηλ. εν συνόψει ότι οι κειμενικές σχέσεις που εγγράφονται στο Κείμενο–Πηγή (ΚΠ) είναι συχνά μεταβλητές και ασταθείς. Ορισμένες δε φορές, οι σχέσεις αυτές αγνοούνται πλήρως από το μεταφραστή, επ' ωφελεία επιλογών στη Γλώσσα–Στόχος (ΓΣ), τις οποίες ο μεταφραστής θεωρεί περισσότερο συνήθεις ή κατάλληλες για την εκάστοτε επικοινωνιακή περίπτωση. Η θεώρηση αυτή, θα μπορούσαμε να υποστηρίξουμε, αντιστοιχεί στην –κοινώς νοούμενη– διάρρηξη της υφής του πρωτοτύπου κειμένου προς όφελος μίας περισσότερο «στοχοκεντρικής» προσέγγισης της μεταφραστικής διαδικασίας. Κατ' αυτήν την έννοια, προκύπτει τάση για μεγαλύτερη τυποποίηση και περιορισμό της ποικιλομορφίας στις υφολογικές επιλογές του Κειμένου–Στόχος (ΚΣ), ή, τουλάχιστον, για υιοθέτηση προτύπων που εγγράφονται προδήλως στον πολιτισμό–στόχος. Το φαινόμενο αυτό της γλωσσικής και πολιτισμικής προσαρμογής, εκδηλώνεται περισσότερο εάν η μετάφραση, είτε ως λειτουργία (function) είτε και ως επιτέλεσμα (product), καταλαμβάνει περιθωριακό ρόλο στο σύστημα–στόχος (πβ. Munday 2008: 114–115). Κατ' αναλογία,

¹ Ο Toury (1995: 268) διατυπώνει το νόμο της αύξουσας τυποποίησης ως εξής: «Στη μετάφραση, οι κειμενικές σχέσεις που υφίστανται στο πρωτότυπο, συχνά τροποποιούνται, ορισμένες δε φορές έως του σημείου να αγνοούνται πλήρως, προς όφελος [περισσότερο] συνήθων νομών του ρεπερτορίου–στόχος».

² Στην πλέον γενική διατύπωσή του, ο νόμος της παρεμβολής αντιστοιχεί στην τάση «στη Μετάφραση, φαινόμενα που ανάγονται στην οργάνωση και τη μορφή του ΚΠ να μεταφέρονται στο ΚΣ» (Toury 1995: 275).

αντιστοιχεί στο σύνολο των επιλογών του μεταφραστή, ώστε το κείμενό του να εναρμονίζεται με τις υφολογικές συμβάσεις και συνήθειες που διέπουν αντίστοιχα είδη κειμένων στη ΓΣ (Μπατσαλιά & Σελλά 2010). Εν συνόψει, *παρεμβολή* και *αύξουσα τυποποίηση* αποτελούν παραπληρωματικά μεγέθη και αποτυπώνουν σε γενικές γραμμές την επίδραση της επαφής μεταξύ δύο γλωσσικών συστημάτων, ή κατ' επέκταση δύο ή περισσότερων γλωσσικών κοινοτήτων, προσδίδοντάς της, κατά κύριο λόγο, αρνητικό πρόσημο.

Στόχος της παρούσας εργασίας είναι η διερεύνηση του φαινομένου της παρεμβολής, μέσω της ανάλυσης και ερμηνείας της εκφοράς διδασκομένων μεταφραστών, και με επικέντρωση στις λεξιλογικές, σημασιολογικές και υφολογικές επιλογές τους. Η εργασία έχει βασιστεί σε *corpus* παραλλήλων κειμένων Αγγλικής-Ελληνικής. Για την ανάλυση των λεξικογραμματικών ευρημάτων γίνεται χρήση, μεταξύ άλλων, *ad hoc* προτύπου σχήματος γλωσσολογικού σχολιασμού (annotation) δύο επιπέδων. Τέλος, για την πιθανολογική ερμηνευτική σύνθεση, η παρούσα προσέγγιση συνδυάζεται με την κλασική αντιπαραβολική ανάλυση των Vinay & Darbelnet (1977). Διατρέχουμε λειτουργικώς τις βασικές έννοιες του περιγραφικού μοντέλου (παρεμβολή, αύξουσα τυποποίηση) και εστιάζουμε στις κρίσιμες συστημικές μεταβλητές τους και τις πειραματικές μεθόδους που προτείνονται για την προσπέλασή τους (ενότητες 2, 3). Στη συνέχεια (ενότητα 4), επιχειρούμε μια σχηματοποίηση της λειτουργίας των μηχανισμών αυτών στη μεταφραστική πράξη. Η πειραματική διερεύνηση της παρούσας εργασίας αναπτύσσεται στην ενότητα 5, όπου αναλύεται η διαστρωμάτωση (layering) και η μεθοδολογία του γλωσσολογικού σχολιασμού στο λογισμικό GATE. Ο συγκερασμός και η μεταφρασιολογική ερμηνεία των ευρημάτων εκτίθενται στις υποενότητες 5.3.1 έως 5.3.6.

2. Η Παρεμβολή στις Συστημικές–Μεταφραστικές Σπουδές

Με βάση το μοντέλο του Gideon Toury, θεμελιωτή των Περιγραφικών Μεταφραστικών Σπουδών, η παρεμβολή αποτελεί προταγματικό, πιθανολογικό νόμο της μεταφραστικής συμπεριφοράς: πρόκειται για φαινόμενο σύμφυτο του μεταφράζειν (Newmark 1991: 78) και ως εκ τούτου αναπόφευκτο, όπως λίγο–πολύ συμβαίνει στα δίγλωσσα άτομα. Αν και συνήθως προσδιορίζεται ως αρνητική³, η τάση για παρεμβολή μπορεί εξ άλλου να ιδωθεί και ως στοχευμένη ή θετική⁴. Η αρνητική ή θετική αποτίμηση της παρεμβολής γίνεται σε κάθε περίπτωση ανατρέχοντας σε «γλωσσικές σταθερές», που διαλαμβάνονται ρητώς ή υπορητώς ως επίπεδα αναφοράς.

Εξ άλλου, η παρεμβολή ως συστημικό φαινόμενο προσδιορίζεται ειδικότερα στο πεδίο των διαπολιτισμικών σπουδών από τον Itamar Even–Zohar (ιδ. 1990a, 1990b, 2005) και εκδηλώνεται μεταξύ δύο γλωσσικών συστημάτων, ή ορθότερα γραμματειών,

«[...] όταν τα στοιχεία ή τα μοντέλα που έχουν μεταφερθεί από τη μία στην άλλη αρχίζουν να χρησιμοποιούνται στην τελευταία χωρίς αναφορά στην πηγή τους» (Domínguez Pérez 2010: 8).

Από τις «αρχές» της διαπολιτισμικής παρεμβολής του Even–Zohar (2005)⁵, εστιάζουμε στα εξής:

- (1) Η παρεμβολή δεν είναι πάντοτε ορατή στο γλωσσικό σύστημα του πολιτισμού υποδοχής, καθώς οι δίαυλοι της διαπολιτισμικής μεταφοράς μπορεί να βρίσκονται στην «περιφέρειά» του. Τα αποτελέσματα της *διαγλωσσικής παρεμβολής* κατά κανόνα δεν είναι ορατά στα αρχικά στάδια της εμφάνισής της, ενώ τα φαινόμενα που εντοπίζονται δεν αιτιολογούνται υπό το πρίσμα της γενικευμένης διάδρασης μεταξύ των συστημάτων, αλλά είναι πιθανό να αντιμετωπίζονται ως τυχαία (πρώτη «αρχή»).

³ Η *αρνητική* παρεμβολή εκδηλώνεται υπό μορφή «αποκλίσεων από τις συνήθειες, κωδικοποιημένες πρακτικές του συστήματος–στόχος» (Toury 1995: 275).

⁴ Σε άλλους όρους, *θετική* παρεμβολή παρατηρείται όταν υπάρχει «μεγαλύτερη πιθανότητα επιλογής [γλωσσικών] στοιχείων τα οποία ούτως ή άλλως υπάρχουν και χρησιμοποιούνται» (Toury 1995: 275).

⁵ Οι «αρχές» εν συνόψει διακρίνονται σε τρεις ομάδες και είναι (Α) Γενικές: Α1. Η παρεμβολή είναι πάντοτε άμεση, Α2. Η παρεμβολή είναι κυρίως μονομερής, Α3. Η παρεμβολή μπορεί να περιορίζεται σε ορισμένα πεδία. (Β) Λειτουργικές ως προς την εμφάνιση και εκδήλωση της παρεμβολής: Β4. Η δια πολιτισμική επαφή, αργά ή γρήγορα, θα προκαλέσει παρεμβολή εάν δεν υπάρξει αντίσταση, Β5. Η παρεμβολή παρατηρείται σε ένα σύστημα που χρειάζεται να εισαγάγει στοιχεία στο ρεπερτόριό του, Β6. Το κύρος ενός πολιτισμού λειτουργεί ως γενεσιουργός παράγοντας παρεμβολής, Β7. Η επικυριαρχία ενός πολιτισμού λειτουργεί ως γενεσιουργός παράγοντας παρεμβολής. (Γ) Διεργασιακές: Γ8. Η παρεμβολή μπορεί να λαμβάνει χώρα μόνον σε τμήμα του πολιτισμού–στόχος, και Γ9. Ένα ιδιοποιούμενο ρεπερτόριο (appropriated repertoire) δεν διατηρεί απαραίτητως τις λειτουργίες του πολιτισμού αφετηρίας. Στην εργασία του, ο Even–Zohar παραδειγματίζει εκτενώς τις «αρχές» αυτές (Even–Zohar 2005).

- (2) Κατά τη δεύτερη «αρχή», η ασυμμετρία στο επίπεδο της διαπολιτισμικής συστημικής επαφής δημιουργεί αντίστοιχες σχέσεις ασυμμετρίας και στην κατεύθυνση των μεταφερόμενων γλωσσικών και πολιτισμικών στοιχείων. Κατά τον Even-Zohar, στα επί μέρους πεδία εξέτασης του φαινομένου, ο πολιτισμός αφετηρίας είναι αυτός που κατά κύριο λόγο, και δη μονόδρομα, ωθεί τον πολιτισμό-στόχο να υιοθετήσει τα μεταφερόμενα στοιχεία. Επισημαίνουμε ωστόσο πως η ασυμμετρία μεταξύ των συστημάτων θα πρέπει να εξετάζεται τόσο υπό το πρίσμα του κύρους (*prestige*), όσο και υπό το πρίσμα της επικράτησης (*dominance*). Η διττή περιγραφική υπόσταση των παραγόντων είναι κατά τη γνώμη μας ουσιώδης: το «αλγεβρικό άθροισμα» των παραγόντων αυτών προσδιορίζει την έκταση και την ένταση του φαινομένου της παρεμβολής, συγχρονικά ή και διαχρονικά, στα εν επαφή συστήματα, ενώ η μεταξύ τους σχέση δεν πρέπει να αντιμετωπίζεται πάντοτε και *a priori* ως ετεροβαρής⁶. Εξ άλλου, με βάση την προσέγγισή μας, η ασυμμετρία καταλύεται και από παράγοντες μη αναφερόμενους κατ' ανάγκη στη διαχρονική (ή τη συγχρονική) σχέση μεταξύ των εν επαφή γλωσσικών συστημάτων, αλλά στη θέση της μετάφρασης μέσα στο *λογοτεχνικό πολυσύστημα* (*literary polysystem*) της ΓΣ, καθώς και σε συνδυασμό πληθώρας ιστορικών και συγκυριακών παραγόντων⁷. Τέλος, η ασυμμετρία αυτή θα πρέπει να εξετάζεται ασφαλώς και στο επίπεδο των γνωστικών και τελεστικών παραγόντων που ενέχονται στη μεταφραστική πράξη⁸. Με άλλα λόγια, η «ανοχή» στο φαινόμενο της παρεμβολής, κυρίως όταν αυτή προσδιορίζεται ως αρνητική, μπορεί να εξηγηθεί τόσο με αναδρομή σε κοινωνιογλωσσικούς παράγοντες, όσο και εξετάζοντας το «κύρος» των διαφορετικών γλωσσικών συστημάτων: η ανοχή είναι μεγαλύτερη όταν η μετάφραση επιτελείται από γλώσσα ή πολιτισμό περιβεβλημένο με «κύρος», ιδιαιτέρως εάν η ΓΣ ή ο πολιτισμός-στόχος έχουν «ελάσσονα» σημασία (Toury 1995: 278· πβ. και Munday 2008: 114).
- (3) Κατά την τρίτη «αρχή», η παρεμβολή είναι δυνατό να μην παρατηρείται σε όλα τα επίπεδα του πολιτισμού και της γλώσσας, αλλά να δημιουργεί διαστρωματώσεις, και να αποτυπώνεται σε συγκεκριμένες κοινωνιολέκτους, παραμένοντας σε αυτές επί μακρόν προτού αναδυθεί στη σφαίρα της επίσημης ή κυρίαρχης γλώσσας.
- (4) Τέλος, κατά την πέμπτη «αρχή» η παρεμβολή παρατηρείται σε ένα σύστημα που χαρακτηρίζεται από την ανάγκη προσπορισμού στοιχείων, τα οποία δεν διαθέτει ή δεν μπορεί να παραγάγει μόνο του.

2.1 Προσεγγίσεις της έννοιας της παρεμβολής

Η παρεμβολή είναι μία από τις γενικές τάσεις της Μετάφρασης, και δη φαινόμενο που εξετάζεται σε υψηλό επίπεδο αφαίρεσης, ακριβώς επειδή θεωρούμε ότι *λαμβάνει χώρα σε κάθε γλωσσικό ζεύγος που εμπλέκεται στη Μετάφραση* (Mauganen 2004: 79). Έτσι, δεν θα πρέπει να υποθέσουμε ότι η μελέτη της παρεμβολής μπορεί να υποκαταστήσει τα «παραδοσιακά» μοντέλα ανάλυσης της σχέσης ΚΠ–ΚΣ στο επίπεδο των μεταφραστικών επιλογών. Ακόμη, δεν υιοθετούμε τη γενίκευση του Newmark (1991), κατά την οποία *κάθε μετατόπιση* ανάγεται στην επίδραση της παρεμβολής. Εάν υπάρχει κάποια γενίκευση, αυτή θα πρέπει πιστεύουμε να αναζητηθεί σε δεύτερο χρόνο, επαγωγικά και ερμηνευτικά, ξεκινώντας από παρατηρήσιμα και απτά «στιγμιότυπα» της μεταφραστικής πράξης.

Κατά συνέπεια, η εμπειρική εξέταση του φαινομένου στο εσωτερικό ενός γλωσσικού ζεύγους, στο επίπεδο της γενικής γλώσσας ή στο εσωτερικό των υπογλωσσών της, προϋποθέτει:

⁶ Καθώς η σχέση μεταξύ των γλωσσικών και πολιτισμικών συστημάτων που έρχονται σε επαφή δεν θεωρείται πάγια και διαχρονική σε όλα τα επίπεδα και τα είδη της επικοινωνίας, δεχόμαστε ότι τα κατά εξεταζόμενη περίπτωση «ήσσονος» σημασίας συστήματα τείνουν να παράγουν και να κάνουν δεκτά κείμενα με διακριτά υβριδικά χαρακτηριστικά (Zauberga 2001: 269).

⁷ «Ένα παράδειγμα του πιθανού νόμου που διέπει τις σχέσεις [μεταξύ γλωσσό-πολιτισμικών συστημάτων] στο δίπολο της ισχύος, καθώς και αναφορικά με την ύπαρξη ή την απουσία ρεπερτορίου θα ήταν το ακόλουθο: εάν το πολυσύστημα της ΓΣ είναι ασθενές έναντι του πολυσυστημίου της ΓΠ, τότε οι μη υπαρκτές λειτουργίες είναι πιθανό να υπόκεινται σε *οικειοποίηση* [*domestication*] [...], υπό τον όρο ότι το σύστημα της μετάφρασης καταλαμβάνει κεντρικό ρόλο στο πολυσύστημα της ΓΣ» (Even-Zohar 1990a: 78 σημ. 2).

⁸ Για παράδειγμα, η ασυμμετρία στο επίπεδο της γλωσσικής ικανότητας δίγλωσσων ομιλητών, έχει δειχθεί πειραματικά ότι προκαλεί παρεμβολή στο επίπεδο των εννοιών στην κατεύθυνση Γ1–Γ2 και στο επίπεδο του λεξιλογίου στην κατεύθυνση Γ2–Γ1 (Kroll et al. 1994: 168). Σε μία υστερογενή θέση του φαινομένου, η *κυριαρχία* που παρατηρείται μεταξύ των συστημάτων απλώς στο επίπεδο του γλωσσικού κώδικα, λόγω του ότι εκδηλώνεται στο επίπεδο των εννοιών, μπορεί να εκληφθεί ως *πολιτισμική*, με την ευρεία έννοια, *κυριαρχία* της ΓΠ στη ΓΣ.

- (1) Πρόσβαση σε διαφόρους τύπους συγκρίσιμου κειμενικού υλικού: πρωτοτύπων κειμένων στη ΓΣ, όσο και μεταφρασμάτων από διαφορετικές ΓΠ (Mauranen 2004: 79). Ως συγκρίσιμα ΣΚ είναι δυνατό να χρησιμοποιηθούν κείμενα της γενικής ή της ειδικής γλώσσας που συλλέγονται *ad hoc* από ανοικτές πηγές, π.χ. το Διαδίκτυο.
- (2) Μεθοδολογική πορεία, η οποία να διακρίνει την παρεμβολή από τη διαγλωσσική μεταφορά στο επίπεδο ΚΠ–ΚΣ, και να επιχειρεί τη συσχέτισή τους στο στάδιο της σύνθεσης, αφ' ετέρου δε να προβλέπει ανατροφοδοτική, κυκλική πορεία ελέγχου των ευρημάτων και των πιθανών συμπερασμάτων.
- (3) Διδακτική στόχευση, τουτέστιν δυνατότητα επιμερισμού σε κειμενικά είδη, αφ' ενός, και πρόβλεψη για συστηματοποίηση των πορισμάτων στη διδακτική πράξη της Μετάφρασης, αφ' ετέρου.

3. Αύξουσα τυποποίηση. Μεθοδολογική σύνθεση

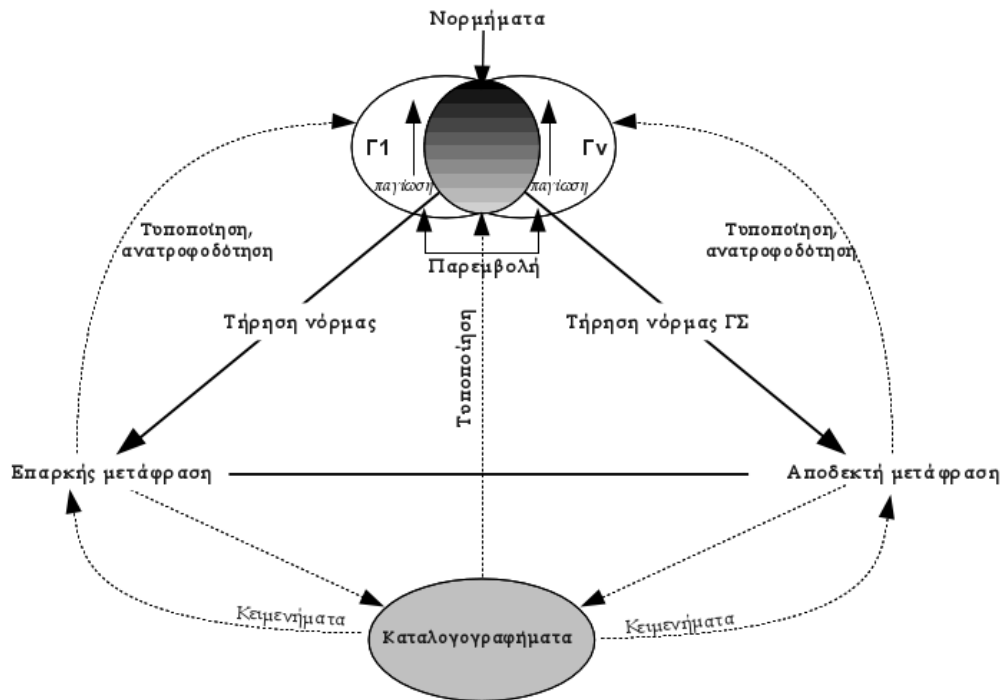

Εξ άλλου, *αύξουσα τυποποίηση* κατά την οικεία προσέγγιση είναι η τάση για διάρρηξη της υφής του πρωτοτύπου κειμένου, προς όφελος μίας περισσότερο «στοχοκεντρικής» προσέγγισης της μεταφραστικής διαδικασίας. Δηλαδή, ο περιορισμός της ποικιλομορφίας στις υφολογικές επιλογές του ΚΣ, ή η υιοθέτηση προτύπων που εγγράφονται προδήλως στον πολιτισμό–στόχος. Στη μη λογοτεχνική μεταφραστική παραγωγή, ορίζουμε την *αύξουσα τυποποίηση* ως τη *σύγκλιση γύρω από τις νόρμες της ΓΣ*, βεβαίως και λόγω της «ασφάλειας» που προσφέρουν οι λεξικογραμματικές παγιώσεις σε είδη κειμένων τα οποία εκ των πραγμάτων περιορίζουν τη δημιουργικότητα του μεταφραστή.

Τέλος, ο πιθανολογικός νόμος της τυποποίησης περικλείει ένα ανοικτό σύνολο, πολλών και ποικιλόμορφων προσδιοριστικών της εκφοράς: όταν τα μεταφράσματα συγκρίνονται με μη-μεταφράσματα, τα πρώτα είναι απλούστερα, περισσότερο ομαλά και κοινότυπα, λιγότερο περίπλοκα συντακτικώς, λιγότερο αμφίσημα (ή ασαφή), περισσότερο συνήθη, κ.ο.κ.

Κατά μία έννοια, η *αύξουσα τυποποίηση* εμπεριέχει ίσως τα καλούμενα καθολικά της μετάφρασης (Baker 1993). Ωστόσο, θεωρούμε ότι και αυτός ο νόμος κινείται σε υψηλότερο βαθμό γενίκευσης και, όπως και στην περίπτωση της παρεμβολής, είναι δυνατό να επιμεριστεί σε γλωσσικά ζεύγη και υπογλώσσες. Εν τέλει, και στο μέτρο του ερμηνευτικώς δυνατού, η πιθανολόγηση της τυποποίησης μπορεί να διευκρινίσει το θέμα της *προσαρμογής* (adaptation) στη Μετάφραση (Toury 1995: 270, πβ. Pym 2008: 316), έννοια αντιδιαστελλόμενη στη *μεταφορά* (transfer). Εξ ου και ο παραπληρωματικός χαρακτήρας της με την παρεμβολή.

4. Σχηματική δομή των πιθανολογικών νόμων, στη μεταφραστική «κοινωνιόλεκτο»

Οι μηχανισμοί λογογένεσης (*sensu* Halliday & Matthiessen 1999: 18) που προκρίνονται με αναφορά στη μεταφραστική επιτέλεση κατά τα παραπάνω και που ανάγονται στα εδώ εξεταζόμενα (καθολικού τύπου) φαινόμενα της *παρεμβολής* και της *τυποποίησης*, θα μπορούσαν εν κατακλείδι να παρασταθούν ως ακολούθως. Στο Σχήμα παρεκτείνουμε το μοντέλο του Toury για την τήρηση της νόρμας της ΓΠ, ή την επιλογή της νόρμας της ΓΣ (πβ. Munday 2008: 113):

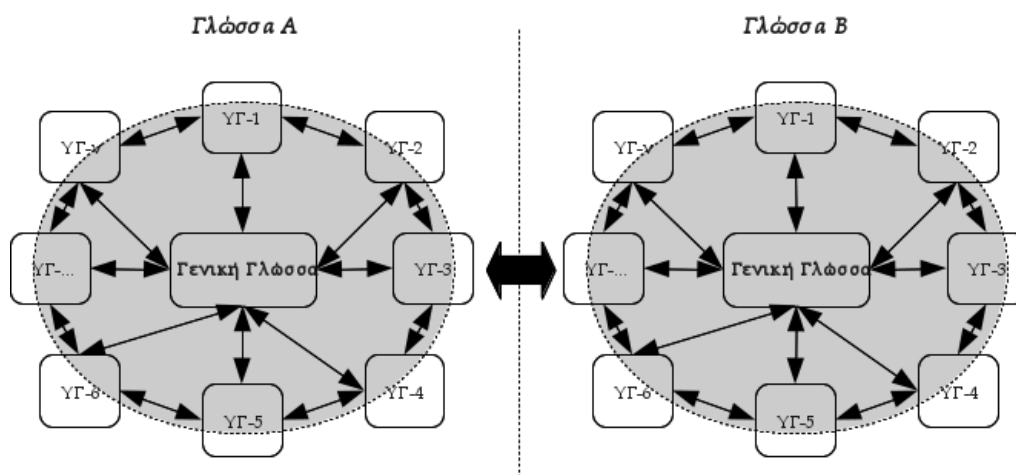

Εικόνα 1 Τα νορμήματα ως αρχική νόρμα, το συνεχές της επαρκούς και αποδεκτής μετάφρασης του Toury και η επενέργεια των πιθανολογικών νόμων της παρεμβολής και της τυποποίησης

Στο Σχήμα, η πρωταρχική «νόρμα» είναι διαγλωσσική και επηρεάζεται από τη διαγλωσσική παρεμβολή, μέσω της επαφής των γλωσσικών συστημάτων, αλλά και μέσω της Μετάφρασης. Οι «κοινοί τόποι» ορίζονται ως «νορμήματα», ως στοιχεία δηλαδή της νόρμας, με κυμαινόμενο βαθμό παγίωσης ανά πεδίο [field, *sensu* Halliday 1978] (ή ευρύτερα, ανά υπογλώσσα εκφοράς).

Περαιτέρω, η μεταφραστική επιτέλεση δημιουργεί ένα δικό της προσωρινό ρεπερτόριο («Καταλογογραφήματα»), από το οποίο ο μεταφραστής αντλεί κειμενήματα, ήτοι τεμάχια κειμένου (νοηματικές μονάδες κειμένου) τα οποία θεωρεί *ad hoc* ότι αρμόζουν στην κειμενική πραγμάτωση, σε μια δεδομένη επικοινωνιακή συνθήκη, για την κάλυψη της *διαπροσωπικής* (interpersonal) και *κειμενικής* (textual) μεταλειτουργίας της εκάστοτε (μεταφραστικής) διαγλωσσικής επιτέλεσης, με «δεδομένη» ασφαλώς την *ιδεική* (ideational) μεταλειτουργία αυτής (Halliday 1978: 221–223, Hatim 1997: 25 κε). Τα κειμενήματα αυτά ανατροφοδοτούν τη μεταφραστική πράξη, αλλά και λειτουργούν σε δεύτερο χρόνο τυποποιητικά στη νόρμα του πεδίου εκφοράς του λόγου. Η μεταφραστική επιτέλεση, με τη σειρά της, δημιουργεί τυποποιητικές τάσεις στη διαγλωσσική νόρμα και την ανατροφοδοτεί για ένα νέο κύκλο μεταφραστικής επιτέλεσης.

Εξ άλλου, η κορυφή του ανωτέρω σχήματος θα μπορούσε να αναλυθεί περαιτέρω, σε ό,τι αφορά στη διάδραση των φυσικών γλωσσών και των υπογλωσσών τους, τόσο στο πολυσυστημικό εσωτερικό ενός κώδικα όσο και διαγλωσσικά, διασυστημικά, με το σχήμα της Εικ. 2, αποτυπώνοντας την πολυστρωματική και πολύπλευρη υπόσταση των πιθανολογικών νόμων της μεταφραστικής συμπεριφοράς.

Εικόνα 2 Η λειτουργική σχέση μεταξύ δύο φυσικών γλωσσών και των υπογλωσσών τους (Σαριδάκης 2010: 42)

5. Πειραματική διερεύνηση στο ζεύγος γλωσσών Αγγλικής–Ελληνικής

Επιμερίζοντας τα ανωτέρω ζητούμενα από τη διερεύνηση των πιθανολογικών νόμων της μεταφραστικής συμπεριφοράς στο επίπεδο του λεξιλογίου και των συντακτικών δομών, επιχειρήσαμε να διερευνήσουμε *συγχρονικά* την επιτέλεση εκπαιδευομένων μεταφραστών σε δείγματα τεχνικού–επιστημονικού λόγου στο ζεύγος γλωσσών Αγγλικής–Ελληνικής. Καταγράψαμε τις επιλογές τους κατά τεμάχιο λόγου, στο λεξιλογικό–σημασιολογικό και στο υφολογικό επίπεδο (Μπατσαλιά & Σελλά 2010), και προσπαθήσαμε να υπεισέλθουμε σε ορισμένες λειτουργικές πτυχές της επιτέλεσης, όπως αυτή καταγράφεται και από τους ίδιους τους μεταφραστές.

Δύο τεχνικά κείμενα (ΚΠ_Α: 417 λ., ΚΠ_Β: 901 λ.) δόθηκαν αντιστοίχως ως κείμενο εξέτασης και ως κείμενο άσκησης σε φοιτητές του Ε΄ Εξαμήνου του Τμήματος Ξένων Γλωσσών, Μετάφρασης και Διερμηνείας του Ιονίου Πανεπιστημίου, οι οποίοι παρακολουθούν το μάθημα Τεχνική Μετάφραση EN–EL I και θεωρείται ότι έχουν, κατά το χρόνο εκπόνησης των μεταφράσεων, ικανό υπόβαθρο γνώσεων, τόσο ως προς τα πεδία τα οποία πραγματεύονται τα κείμενα, όσο και στο επίπεδο της μεταφραστικής μεθόδου και θεωρίας, ώστε να αντεπεξέλθουν με σχετική επιτυχία στις απαιτήσεις των κειμένων.

Στο δεύτερο κείμενο άσκησης (ΚΠ_Β) ζητήθηκε επιπλέον από τους φοιτητές να εκθέσουν προβληματισμό ως προς τη *λειτουργία* (function) και τη *διεργασία* (process) της επιτέλεσής τους. Στόχος μας είναι, *ex post facto*, οι φοιτητές να αιτιολογήσουν τις επιλογές τους στο λεξιλογικό και το συντακτικό επίπεδο κυρίως, ώστε να συσχετίσουμε τα ειδικότερα λεξικογραμματικά στοιχεία της μεταφραστικής εκφοράς που άπτονται του επιπέδου του λόγου με (α) την κάλυψη της ιδεϊκής μεταλειτουργίας των κειμένων και (β) το βαθμό ανταπόκρισης των μεταφρασμάτων στη διαπροσωπική και την κειμενική μεταλειτουργία των κειμένων.

Στα ευρήματα του σχολιασμού αυτού των διδασκομένων (συνολικά: 2.950 λ.) αντιπαραβάλλουμε τα δικά μας πιθανολογικά πορίσματα για το φαινόμενο της παρεμβολής στα μεταφράσματα αυτά καθεαυτά. Επίσης, αντιπαραβάλλουμε τις περιπτώσεις αυτές απουσίας παρεμβολής, για τις οποίες πιθανολογούμε την έκφανση της τυποποίησης, στις συγκεκριμένες πραγματώσεις λόγου.

Εν συνόλω, στην παρούσα πιλοτική έρευνα έχουν αξιολογηθεί και σχολιαστεί, αυτοτελώς και σε μεταξύ τους αντιβολή, δέκα μεταφράσματα, Α1–Α5 (2.329 λ.) και Β1–Β5 (4.907 λ.), ήτοι δέκα δεικνύμενα (bitexts) {ST_A: TT_A₍₁₋₅₎, ST_B: TT_B₍₁₋₅₎}. Ο σχολιασμός (annotation) των μεταφρασμάτων έγινε με ανάπτυξη προσαρμοσμένου τυπολογικού–ταξινομικού σχήματος στην πλατφόρμα GATE⁹, τόσο στο επίπεδο των μεταφραστικών σφαλμάτων¹⁰, όσο και στο επίπεδο της

⁹ (<http://gate.ac.uk>).

¹⁰ Η κωδικοποίηση των σφαλμάτων που έχουμε αναπτύξει βασίζεται στο περιγραφικό αξιολογικό μοντέλο του Institute of Linguists (IoL) της Βρετανίας (DiplTrans, 2006, βλπ. Κωστοπούλου & Σαριδάκης 2011: 232) και

θεωρούμενης λεξιλογικής-σημασιολογικής και συντακτικής παρεμβολής και της τυποποίησης. Η στατιστική επεξεργασία των δεδομένων έγινε με το λογισμικό LibreOffice Calc.

5.1 Πρωταρχικό επίπεδο κωδικοποίησης: Μεταφραστικά σφάλματα

Οι δείκτες που χρησιμοποιούμε στο σχολιασμό των κειμενιμάτων περιγράφονται συνοπτικώς στον Πίνακα 1. Επισημαίνουμε σε κάθε περίπτωση τον μη κλειστό και μη απόλυτο –και συνεπώς σε μεγάλο βαθμό υποκειμενικό– χαρακτήρα των κατηγοριών, που παραπέμπουν σε κάθε περίπτωση αδήλως σε μια ιδεατή –κανονιστικού τύπου (prescriptive)– επιτέλεση. Ακόμη, πρέπει να σημειώσουμε ότι τόσο στην αρχή της έρευνας, όσο και μετά από την ανάλυση των εμπειρικών δεδομένων, προκύπτουν αισθητές επικαλύψεις μεταξύ των ταξινομικών κατηγοριών, ενώ το εύρος της γενίκευσης δεν είναι όμοιο σε όλες τις κατηγορίες. Η επικάλυψη ανακύπτει στο επίπεδο της ερμηνευτικής-αιτιολογικής εξέτασης των ευρημάτων της έρευνας και αντανακλά την ερμηνευτική και περιγραφική ποικιλομορφία του πεδίου των Μεταφραστικών Σπουδών, που είναι πρόδηλη ακόμη και στο εσωτερικό της ίδιας «θεωρίας» ή σχολαστικής παράδοσης. Η επικάλυψη αυτή, επίσης, αντανακλά τη σχετικότητα και τη σημαντική υποκειμενικότητα των ερμηνειών των επί μέρους φαινομένων, κατά εξεταζόμενη μονάδα ή τεμάχιο λόγου, όσο και τη σημαντική εξάρτηση των ερμηνειών αυτών από τη συνολική κειμενική επιτέλεση. Τούτο μπορεί να σημαίνει επιφανειακή αναντιστοιχία στο σχολιασμό μορφολογικώς όμοιων τεμαχίων μεταξὺ κειμένων. Τέλος, η διαφοροποίηση του βαθμού γενίκευσης μεταξύ των κατηγοριών:

- (1) αντικατοπτρίζει τον σχετικώς μικρό βαθμό ωριμότητας του περιγραφικού εργαλείου, κυρίως στις κατηγορίες της παρεμβολής και της τυποποίησης, και
- (2) εκφράζει την προσπάθειά μας οι κατηγορίες αυτές να διατηρηθούν ανοικτές σε περιγραφικό σχολιασμό, ώστε να περιοριστεί ο κίνδυνος να αγνοηθούν φαινόμενα ή και να παρεισφρήσουν λάθη ερμηνείας.

Δείκτης	Περιγραφή
DEC	Σοβαρό έλλειμμα αποκωδικοποίησης του προτασιακού ή κειμενικού νοήματος του ΚΠ. Συχνά (συνάγεται ότι) οφείλεται σε εσφαλμένη αποκωδικοποίηση της μορφοσυντακτικής δομής του ΚΠ στο εξεταζόμενο τεμάχιο λόγου (discourse segment), για τούτο και επισημαίνεται ως GR+DEC. Αντιστοίχως, όταν το έλλειμμα πιθανολογείται ή συνάγεται ότι οφείλεται σε εσφαλμένη αποκωδικοποίηση του σημειομένου ενός λεξήματος στο ΚΠ, επισημαίνεται ως TERM+DEC. Στην τελευταία περίπτωση, η διάκριση με το φαινόμενο TERM+ENC είναι λεπτή και συχνά δυσχερής· ωστόσο, η διδακτική προσέγγιση διαφέρει σημαντικά, καθώς το έλλειμμα ανακύπτει σε διαφορετικό στάδιο της διαδικασίας της μετάφρασης, για τούτο και πρέπει να επιδιώκεται η αποσαφήνιση.
ENC	Σοβαρό έλλειμμα εκφοράς του προτασιακού ή κειμενικού νοήματος στο εξεταζόμενο τεμάχιο λόγου, εστιαζόμενο στο επίπεδο της επανέκφρασης στη ΓΣ. Η μετατόπιση μπορεί να απαντάται κυρίως στο σημασιολογικό και το μορφοσυντακτικό επίπεδο και δεν ερμηνεύεται ως ελλιπής αποκωδικοποίηση του τεμαχίου στο ΚΠ (DEC). Κατ' ουσίαν, αποτελεί υπερσύνολο του REG, με συμπερίληψη πλέον και του πεδίου (field), ήτοι της ιδεικής μεταλειτουργίας του κειμενήματος, στο κατά Halliday μοντέλο θέασης του νοήματος της εκφοράς (discourse semantics). Μπορεί να συνδυάζεται αιτιακά ή σωρευτικά με τα TERM, GR.
GR	Συντακτικές δομές ΚΠ ή ΚΣ, με ελάσσονα (υποσημειούμενη) επίπτωση στην επιτέλεση.
GR+DEC	Βλπ. DEC
GR+ENC	Βλπ. ENC
GR+REG	Βλπ. REG
LEXINT	Ένδειξη λεξιλογικής παρεμβολής.

συστηματοποιείται ειδικότερα ως προς το επίπεδο του λόγου (register) σύμφωνα με το κατά Halliday τρίπτυχο {πεδίο (field), πλαίσιο (tenor) και τρόπος (mode)} – βλπ. και Hatim 1997: 25 κε.

Δείκτης	Περιγραφή
REG	Αναντιστοιχία επιπέδου λόγου (register), κυρίως δε και στο <i>πλαίσιο</i> (tenor) και τον <i>τρόπο</i> (mode) μεταξύ ΓΣ–ΚΣ, ήτοι στο επίπεδο των διαπροσωπικών και των κειμενικών λειτουργιών. Εν ολίγοις, εκφορά (μεταφραστικού) λόγου αναντίστοιχη της προσδοκίας του (θεωρούμενου) πρωταρχικού αναγνωστικού κοινού (πβ. Rym 1992) ¹¹ . Ανάλογα με το θεωρούμενο γενεσιουργό αίτιο (ή το ειδικό βάρος) της αναντιστοιχίας, μπορεί να συνδυάζεται με τους δείκτες GR και TERM. Συνδυάζεται ακόμη με τον δείκτη ENC, για να δηλωθεί η ανεπιτυχής ισορροπία, στο επίπεδο της εκφοράς στη ΓΣ, μεταξύ πεδίου, πλαισίου και τρόπου (Hatim & Mason 1990: 64–65· πβ. Σαριδάκης 2010: 72–74)
STAND	Ένδειξη πιθανολογούμενης τυποποίησης, με αναφορά σε ευρύτερο <i>ad hoc</i> Σώμα Κειμένων ή με επιλεκτική αναδρομή στο συγκρίσιμο ΣΚ των εκάστοτε πηγών τεκμηρίωσης στο μεταφραστικό περιβάλλον και σε εξωτερικές γενικές πηγές αναφοράς (π.χ. EUR–LEX και αναζητήσεις παραθέσεων σε μηχανές διαδικτυακής αναζήτησης). Αφορά σε ευρύτερα τεμάχια λόγου και μπορεί να χαρακτηρίσει την όλη <i>υφή</i> (texture) του ΚΣ.
SYNTINT	Ένδειξη πιθανολογούμενης συντακτικής παρεμβολής.
TERM	Ανεπαρκής ή εσφαλμένη χρήση λεξήματος, με αναφορά είτε στο κειμενικό νόημα του ΚΠ, είτε σε αυτό του ΚΣ, στο σημαίνον ή στο σημαινόμενο. Καλύπτει κυρίως ζητήματα ορολογίας και ορολογικής/λεξιλογικής ισοδυναμίας. Συνδυάζεται αιτιακά με τα GR (σημασιοσυντακτική μετατόπιση), REG (όταν η λεξιλογική επιλογή επιδρά στο επίπεδο του λόγου), DEC (όταν η ελλιπής αποκωδικοποίηση του εξεταζόμενου λεξήματος στη ΓΠ επιδρά στην αποκωδικοποίηση του νοήματος της <i>εκτεταμένης νοηματικής μονάδας</i> [Sinclair]), ENC (όταν η ελλιπής κωδικοποίηση του λεξήματος αλλοιώνει το προτασιακό ή κειμενικό νόημα στο ΚΣ).
TERM+ENC	Βλπ. TERM
TERM+REG	Βλπ. TERM

Πίνακας 1 Συνοπτική κατηγοριοποίηση μεταφραστικών σφαλμάτων. Η παρεμβολή και η τυποποίηση επισημαίνονται σε δεύτερο και τρίτο επίπεδο αντιστοίχως

5.2 Σχολιασμός δευτέρου επιπέδου: Λεξιλογική και συντακτική παρεμβολή, νόημα και τυποποίηση

Σε δεύτερο χρόνο, το γλωσσικό υλικό σχολιάζεται ως προς τα τμήματα λόγου αυτά τα οποία, κατά την κρίση του ερευνητή, αποτελούν εκφάνσεις των δύο εν θέματι πιθανολογικών νόμων, με βάση (α) τη θεωρητική οριοθέτηση που έχει προηγηθεί και (β) την καταγραφή της μεταφραστικής *διαδικασίας* (process) και την αποτίμηση της κειμενικής *λειτουργίας* (function) την οποία κάνουν οι ίδιοι οι μεταφράζοντες, τόσο στο επίπεδο του κειμένου (ΚΠ_Β) όσο και με αναφορά σε επί μέρους λεξιλογικές–σημασιολογικές και δομικές επιλογές τους. Επισημαίνεται ότι, στο πιλοτικό *corpus* της έρευνάς μας, οι γενικότερες επιλογές των μεταφραστών στα επίπεδα της κειμενικής και της διαπροσωπικής λειτουργίας των κειμένων, όπως σχολιάζονται στο δεύτερο κείμενο (ΚΠ_Β), αποτελούν οδηγό για την κωδικοποίηση και την αιτιολογική ερμηνεία των πορισμάτων αναφορικά με τις επιλογές τους και στο ΚΠ_Α, στο οποίο δεν είχε ζητηθεί σχετικός σχολιασμός.

¹¹ «Η χρήση των [κειμενικών επικοινωνιακών] ειδών σχετίζεται κατά κανόνα με σαφώς προσδιορισμένους τύπους κοινωνικών περιστάσεων [...] Από τη σκοπιά της γνώσης που επιδεικνύει το μέρος της επικοινωνίας, είναι πιθανό να υπάρχουν περιστάσεις στις οποίες οφείλει να χρησιμοποιήσει τις συμβάσεις ενός συγκεκριμένου κειμενικού είδους, άλλες περιστάσεις στις οποίες η χρησιμοποίηση αυτή είναι προαιρετική και άλλες στις οποίες είναι πιθανή» (Luckman 1989: 11 στο Günthner & Luckmann 2001: 61).

Θεσιπαγείς υπηρεσίες (LBS) **μπορούν να οριστούν** οι υπηρεσίες που ενσωματώνουν στη γεωγραφική θέση μιας κινητής συσκευής άλλες πληροφορίες ώστε να παρέχουν **επιπλέον** ανέσεις στο χρήστη. **Υπό αυτό το σκεπτικό**, τα LBS επιβάλλεται να διαθέτουν **Συστήματα Γεωγραφικών Περιοχών (GIS)** και Παγκόσμια Συστήματα Εντοπισμού Θέσης (GPS) με σκοπό να παρέχουν πληροφορίες που είναι γεωγραφικά πλησιέστερες στην τοποθεσία που βρίσκεται ο χρήστης. Οι εφαρμογές που διαθέτουν (τα LBS) χρησιμοποιούνται ευρέως στην ανίχνευση τοποθεσίας, στην **παροχή βοήθειας** στους τουρίστες, τον έλεγχο και την παρακολούθηση της κίνησης καθώς και την ασφάλεια.

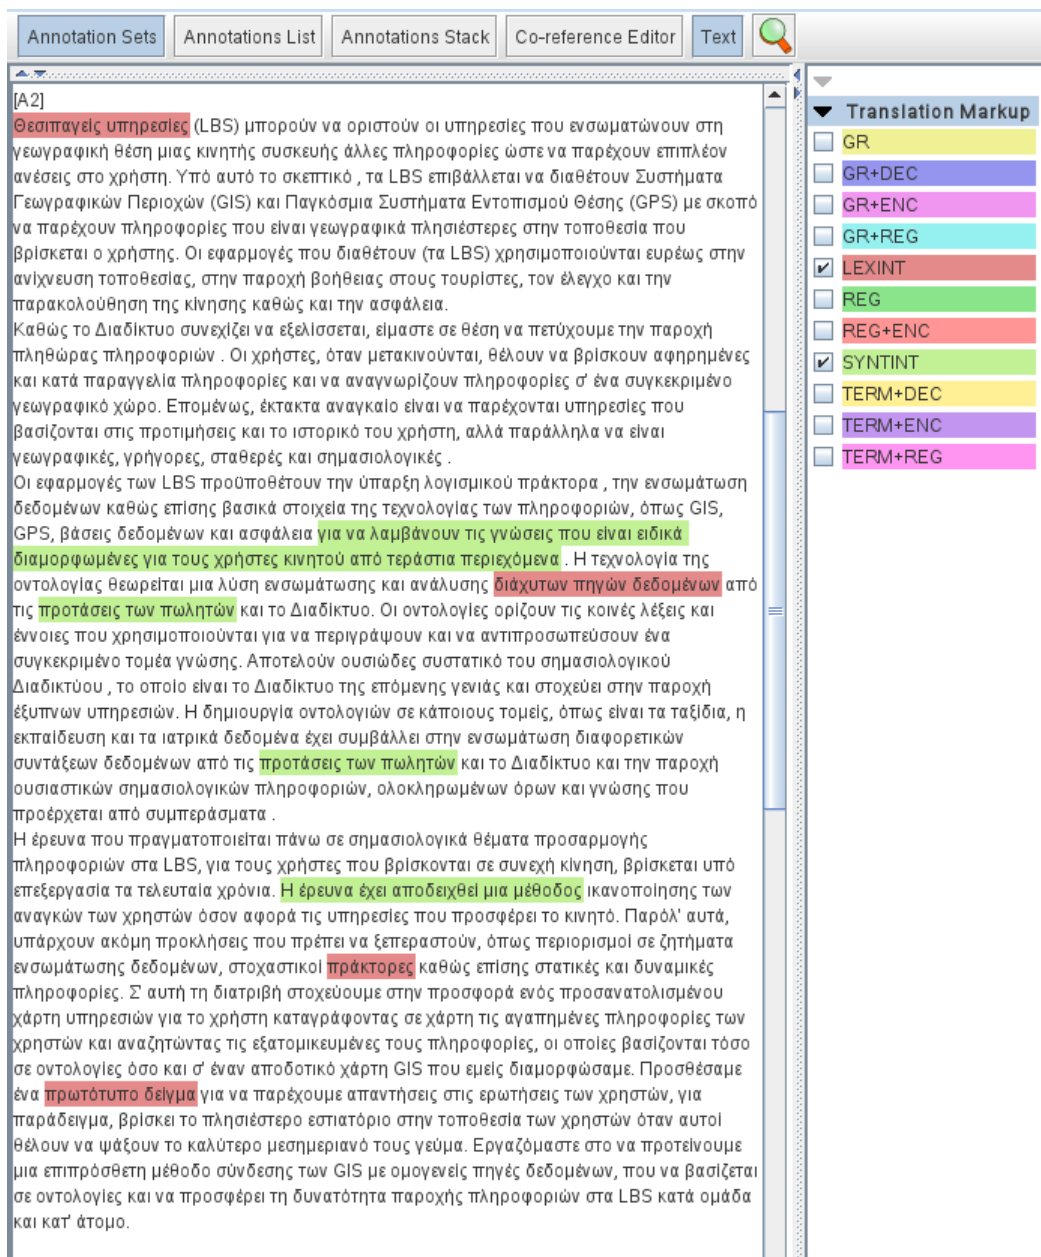

Καθώς το Διαδίκτυο συνεχίζει να εξελίσσεται, **είμαστε σε θέση να πετύχουμε την παροχή πληροφορίας πληροφοριών**. Οι χρήστες, όταν μετακινούνται, θέλουν να βρίσκουν **αφηρημένες και κατά παραγγελία πληροφορίες** και να αναγνωρίζουν πληροφορίες σ' ένα συγκεκριμένο γεωγραφικό χώρο. Επομένως, **έκτακτα αναγκαίο** είναι να παρέχονται υπηρεσίες που βασίζονται στις προτιμήσεις και το ιστορικό του χρήστη, αλλά παράλληλα να είναι **γεωγραφικές, γρήγορες, σταθερές και σημασιολογικές**.

Οι εφαρμογές των LBS προϋποθέτουν την ύπαρξη **λογισμικού πράκτορα**, την **ενσωμάτωση δεδομένων καθώς επίσης βασικά στοιχεία** της τεχνολογίας των πληροφοριών, όπως GIS, GPS, βάσεις δεδομένων και ασφάλεια για να λαμβάνουν τις γνώσεις που είναι ειδικά διαμορφωμένες για τους χρήστες κινητού **από τεράστια περιεχόμενα**. Η τεχνολογία της οντολογίας θεωρείται μια λύση ενσωμάτωσης και ανάλυσης διάχυτων πηγών δεδομένων από τις προτάσεις των **πωλητών** και το Διαδίκτυο. Οι οντολογίες ορίζουν τις κοινές λέξεις και έννοιες που χρησιμοποιούνται για να περιγράψουν και να αντιπροσωπεύσουν ένα συγκεκριμένο τομέα γνώσης. Αποτελούν ουσιώδες συστατικό του **σημασιολογικού Διαδικτύου**, το οποίο είναι το Διαδίκτυο της επόμενης γενιάς και στοχεύει στην παροχή έξυπνων υπηρεσιών. Η δημιουργία οντολογιών σε κάποιους τομείς, όπως είναι τα ταξίδια, η εκπαιδευση και τα ιατρικά δεδομένα έχει συμβάλει στην ενσωμάτωση διαφορετικών **συντάξεων δεδομένων** από τις **προτάσεις των πωλητών** και το Διαδίκτυο και την παροχή ουσιαστικών σημασιολογικών πληροφοριών, ολοκληρωμένων όρων και γνώσης που **προέρχεται από συμπεράσματα**.

Η έρευνα που πραγματοποιείται πάνω σε σημασιολογικά θέματα προσαρμογής πληροφοριών στα LBS, για τους χρήστες που βρίσκονται σε συνεχή κίνηση, βρίσκεται υπό επεξεργασία τα τελευταία χρόνια. Η έρευνα έχει **αποδειχθεί** μια μέθοδος ικανοποίησης των αναγκών των χρηστών όσον αφορά τις **υπηρεσίες που προσφέρει το κινητό**. Παρόλ' αυτά, υπάρχουν ακόμη προκλήσεις που πρέπει να ξεπεραστούν, όπως περιορισμοί σε ζητήματα **ενσωμάτωσης δεδομένων, στοχαστικοί πράκτορες** καθώς επίσης στατικές και δυναμικές πληροφορίες. Σ' αυτή τη **διατριβή** στοχεύουμε στην προσφορά ενός **προσανατολισμένου χάρτη υπηρεσιών** για το χρήστη καταγράφοντας σε χάρτη τις αγαπημένες πληροφορίες των χρηστών και αναζητώντας τις εξατομικευμένες τους πληροφορίες, οι οποίες βασίζονται τόσο σε οντολογίες όσο και σ' έναν αποδοτικό χάρτη GIS που εμείς διαμορφώσαμε. Προσθέσαμε ένα **πρωτότυπο δείγμα** για να παρέχουμε απαντήσεις στις ερωτήσεις των χρηστών, για παράδειγμα, βρίσκει το πλησιέστερο εστιατόριο στην τοποθεσία των χρηστών όταν αυτοί θέλουν να φάσουν το **καλύτερο μεσημεριανό** τους γεύμα. Εργαζόμαστε στο να προτείνουμε μια επιπρόσθετη μέθοδο σύνδεσης των GIS με ομογενείς πηγές δεδομένων, που να βασίζεται σε οντολογίες και να προσφέρει τη δυνατότητα παροχής πληροφοριών στα LBS κατά ομάδα και κατ' άτομο.

Εικόνα 4 Σχολιασμός κειμένου (A2) δευτέρου επιπέδου στο GATE

5.3 Ευρήματα και μεταφρασιολογικός σχολιασμός

5.3.1 Συμβατική επαναγραφή, τυποποίηση

Το ερευνητικό *corpus*, παρά το μικρό μέγεθός του και παρά την απουσία συστηματικού ΣΚ αναφοράς, αναδεικνύει τεμάχια στα οποία η προσαρμογή, κυρίως στο υφολογικό επίπεδο, προς μια εκφορά που θεωρείται από τους διδασκόμενους «ουδέτερη» και περισσότερο «παραδεκτή» αναδεικνύεται ορισμένες φορές σε ζητούμενη στρατηγική:

(1) [CB5]

[ο μεταφραστής] οφείλ[ει], μεταξύ άλλων, να υποτάξ[ει] [το κείμενο] στις ιδέες και τις αξίες της γλώσσας- στόχου και κατ' επέκταση του πολιτισμού υποδοχής, θέτοντας ως πρώτιστο μέλημα το μετάφρασμα να μη μορρίζει 'μετάφραση'.

[...] παρά τη στενότητα επιλογών που επιβάλλει η τεχνική γλώσσα, ο συντάκτης επιδιώκει να προσδώσει αμεσότητα στο κείμενο με τη χρήση ανεπίσημου λόγου (*informal expressions*) και αυτό διατηρήθηκε στο μέγιστο δυνατό βαθμό στο μετάφρασμα

Εξ άλλου, στο (2), η νορμαλιστική τάση επιβεβαιώνεται από την ύπαρξη συνταγματικής και παραθετικής (*collocational*) συσχέτισης των {[εισάγω], [κώδικας]} σε (γενικό) συγκρίσιμο ΣΚ (διαδικτυακές πηγές). Κατά την έννοια αυτή, η μετατόπιση που παρατηρούμε εδώ αντιστοιχεί σε παρεμβολή *in absentia*, τουτέστιν σε μη εκτύπωση στο ΚΣ του λεξιλογικώς και υφολογικώς δημιουργικού τεμαχίου {before you bury it in code} του ΚΠ. Σε άλλους και πιθανόν περισσότερο αναλυτικούς όρους, η μετατόπιση στο ανωτέρω δείγμα θα μπορούσε να θεωρηθεί ότι αντιστοιχεί στο λεγόμενο καθολικό της εξομάλυνσης (*normalisation*) ή συντηρητικής επαναγραφής, στο πλαίσιο της «τάσης προς κειμενική συμβατικότητα» (Vanderauwera 1985 στο Laviosa 1998: 289–290, πβ. Σαριδάκης 2010: 193–201). Ο μεταφραστής αιτιολογεί την επιλογή του σε (γενικούς) όρους λειτουργικής μεταφραστικής θεωρίας, θεωρώντας επιβεβλημένα τη λεξιλογική και υφολογική μετατόπιση.

(2) [B5]

For instance, this chapter introduces you to a number of utilities – some of them created by one of the authors, Jan – that let you test and debug a regular expression before you bury it in code where errors are harder to find.

Για παράδειγμα, το κεφάλαιο αυτό σας παρουσιάζει μια σειρά από βοηθητικά προγράμματα – κάποια από τα οποία δημιούργησε ένας από τους συγγραφείς, ο Jan Goyvartjes- τα οποία σας επιτρέπουν να ελέγξετε και να αποσφαλματώσετε μια κανονική έκφραση πριν την εισάγετε στον κώδικά σας, όπου τα σφάλματα εντοπίζονται δυσκολότερα.

5.3.2 Κειμενική λειτουργία (function) και «μεταφραστική κοινωνιόλεκτος»

Ακόμη, και ανεξαρτήτως του βαθμού επιτυχίας της προσπάθειας τους και του θεωρητικού μοντέλου στο οποίο ανατρέχουν, οι διδασκόμενοι αναγνωρίζουν σε γενικές γραμμές την ανάγκη για σύγκλιση προς λεξικογραμματικές επιλογές «κοινωνικώς παραδεκτές» στη ΓΣ, βάσει της πιθανολογούμενης λειτουργίας του κειμένου στον πολιτισμό υποδοχής. Προσδιορίζουν δε, την ανάγκη αυτή ως καταλύτη των επιλογών τους. Χαρακτηριστικά τα σχόλια στα (3), (4).

(3) [CB4]

επειδή ακριβώς ο στόχος του [κειμένου] είναι να εξηγήσει λεπτομερώς και με όσο πιο απλά βήματα και λόγια την κάθε έννοια ή ενέργεια που αναλύει, αυτό επηρεάζει και την λιτότητα στην έκφραση όπως επίσης και την χρήση απλού λεξιλογίου, πράγμα που πρέπει να διατηρηθεί και στο μετάφρασμα του κειμένου.

(4) [CB3]

η απόδοση του [κειμένου] θα πρέπει να εξοπληρεί την λειτουργία που έχει επιλέξει για το κείμενο ο συγγραφέας. Έτσι, έχει διατηρηθεί το β' πληθυντικό πρόσωπο, καθώς είναι σημαντικό για να επιτευχθεί αμεσότητα και να γίνεται εύκολα αντιληπτό από τον αναγνώστη. Επίσης, το ύφος του κειμένου παρέμεινε λιτό και έχοντας απλή σύνταξη, ώστε να εξοπληρεί την πληροφοριακή λειτουργία του κειμένου και να συντελεί στην σταδιακή εξοικείωση του αναγνώστη με το αντικείμενο ανάλυσης.

5.3.3 Δανεισμός, κατά λέξη μετάφραση, έκτυπα (calques)

Σε γενικές γραμμές, μπορούμε να κατατάξουμε τις μείζονες εκφάνσεις του φαινομένου της παρεμβολής, αντιστοίχως σε δάνεια, σε κατά λέξη μεταφράσματα και σε δομικά και εκφραστικά έκτυπα (Vinay & Darbelnet 1977).

Στα (5), (6), ιδίως στην επανεκφορά του τεμαχίου [B5] (6), είναι πρόδηλη η προσπάθεια του μεταφραστή να αποσαφηνίσει το δηλούμενο του ΚΠ, όπως το έχει συλλάβει. Στο συγκεκριμένο παράδειγμα, μπορούμε να εικάσουμε ότι η επιλογή του εκφραστικού εκτύπου είναι συνειδητή, καθώς ο μεταφραστής επιχειρεί να μεταφέρει το πραγματολογικό φορτίο του τεμαχίου στη ΓΣ, εντάσσοντάς το στο περικειμενικό ή και καταστασιακό πλαίσιο του (Vinay & Darbelnet 1977: 9).

(5)

[SA05] The research has been demonstrated as a method [...]

[A1] Η έρευνα παρουσιάζεται ως μια μέθοδος

[A2] Η έρευνα έχει αποδειχθεί μια μέθοδος

[A3] Η έρευνα αποδείχτηκε ως μια μέθοδος

(6)

[SB21], [LB17] You can use them to verify whether input fits into the text pattern, to find text that matches the pattern within a larger body of text [...] **and to shoot yourself in the foot.**

[B1] Μπορείς να το χρησιμοποιήσεις για να επαληθεύσεις το κατά πόσον η εισαγωγή δεδομένων ταιριάζει στο κείμενο-υπόδειγμα, για να βρεις κείμενα που να ταιριάζουν στο κείμενο-υπόδειγμα σε ένα μεγαλύτερο σώμα κειμένου [...] ή ακόμη και για να πυροβολήσεις το πόδι σου!

[B5] Μπορείτε να χρησιμοποιήσετε τις κανονικές εκφράσεις για να επαληθεύσετε αν μια εισαγωγή ταιριάζει στο πρότυπο κειμένου, να βρείτε κείμενο που να ταιριάζει στο πρότυπο εντός ενός μεγαλύτερου σώματος κειμένου [...] **αλλά και να κάνετε πειραματισμούς με ακολουθίες κειμένου όπως της «shoot yourself in the foot».**

Με βάση τα ανωτέρω ευρήματα, πιστεύουμε περαιτέρω ότι είναι άξια διερεύνησης σε ευρύτερο corpus δεδομένων η ερμηνευτική συσχέτιση της παρεμβολής με το καλούμενο καθολικό της αποσαφήνισης (βλπ. Σαριδάκης 2010: 170–182).

5.3.4 Στατιστική Κατανομή στο corpus

Με ειδικότερη αναφορά στην παρεμβολή, η εκτεθείσα αρχική διάκριση του φαινομένου σε (πρωταρχικώς) λεξιλογική και (πρωταρχικώς) συντακτική, δίνει την ακόλουθη κατανομή στα μεταφράσματα που εξετάσαμε:

	A1	A2	A3	A4	A5	B1	B2	B3	B4	B5	Corpus	CTY	CTTR
SINT (1)	6	3	4	4	1	11	10	5	6	3	53	22	41.51
LINT (Tokens) (2)	11	5	4	3	8	8	7	5	5	7	63		
LINT (Types)	8	5	4	3	4	7	7	5	5	7	55	31	56.36
TTR_LINT	72.73	100	100	100	50.00	87.50	100	100	100	100	87.30		
TINT (1+2)	17	8	8	7	9	18	17	10	11	10	116		

(CTY: *Corpus Types*; CTTR: *Corpus TTR*, SINT: *Syntactic Interference*, LINT: *Lexical Interference*, TINT: *Total Interference*)

Πίνακας 2 Κατανομή της παρεμβολής στο corpus

Εξ άλλου, παρά το μικρό δείγμα του ερευνητικού corpus, οι σχετικά χαμηλοί λόγοι TTR¹², με αναφορά τόσο στη συντακτική όσο και στη λεξιλογική παρεμβολή, υποδεικνύουν τάση συγκέντρωσης των εκφάνσεων του φαινομένου γύρω από συγκεκριμένα τεμάχια λόγου μεταξύ των μεταφραστών. Αναμφίβολα, η παρατήρηση αυτή έχει τόσο γνωσική όσο και κοινωνιογλωσσολογική υπόσταση και είναι δεκτική περαιτέρω διερεύνησης. Στους κατωτέρω Πίνακες δεικνύεται η συχνότητα εμφάνισης των εκφάνσεων αυτών στο ερευνητικό corpus.

Πίνακας 6 Εκφάνσεις λεξιλογικής παρεμβολής κατά τεμάχιο, ΚΠ_B

Επισημαίνεται ότι οι εμφανιζόμενες επικαλύψεις μεταξύ τεμαχίων λόγου (π.χ. SB21, LB17) οφείλονται στο ότι η ταξινόμησή μας λαμβάνει ως βάση την εκφορά του ΚΣ και το στοιχείο (δομικό ή λεξιλογικό) το οποίο βάσει των δεδομένων μας πιθανολογούμε κατά περίπτωση ότι μεταφέρεται πρωταρχικώς σε αυτό (ΚΣ).

5.3.5 Παρεμβολή και μεταφραστικά σφάλματα

Στην αναλυτική προσέγγιση του πιθανολογούμενου φαινομένου της παρεμβολής, σημαντική είναι η συνεμφάνιση της παρεμβολής με τα καλούμενα «συνήθη» μεταφραστικά σφάλματα. Όπως είναι αναμενόμενο, τα σημεία στα οποία εντοπίζεται συντακτική παρεμβολή εμφανίζουν υψηλή συσχέτιση με σφάλματα στην αποκωδικοποίηση ή την ανακωδικοποίηση της συντακτικής δομής του κειμένου (GR+DEC, GR+ENC), ενώ τα σημεία στα οποία εντοπίζεται λεξιλογική παρεμβολή συσχετίζονται κυρίως με σφάλματα στην αποκωδικοποίηση ή την ανακωδικοποίηση των γλωσσικών σημείων του κειμένου (TERM+DEC, TERM+ENC). Σχεδόν ομοιόμορφη είναι μεταξύ των δύο γενικών κατηγοριών η κατανομή των (πολυάριθμων) σφαλμάτων που συσχετίζονται με το επίπεδο του λόγου του κειμένου (REG).

Τα σωρευτικά ποσοτικά δεδομένα των σφαλμάτων που συσχετίζονται με το φαινόμενο της παρεμβολής δίνονται στον ακόλουθο Πίνακα.

ST	DEC	GR+DEC	GR+ENC	GR+REG	REG	TERM+DEC	TERM+ENC	TERM+REG	Total
ST_A	0	5	1	2	1	8	13	3	33
ST_B	0	7	3	1	7	13	7	6	44
Total	0	12	4	3	8	21	20	9	77

Πίνακας 7 Σωρευτικά δεδομένα μεταφραστικών σφαλμάτων κατά ΚΠ

Η αρχική μας παραδοχή, περί διακριτής επί πλέον ομαδοποίησης στη ρουμπρίκα της παρεμβολής, των «μεταφραστικών σφαλμάτων», και ανεξαρτήτως του ερμηνευτικού πλαισίου στο οποίο εντάσσονται τα σφάλματα, μοιάζει να επιβεβαιώνεται από τα δεδομένα. Σχεδόν όλες οι εκφάνσεις της παρεμβολής θεωρούνται όμορες ή επικαλυπτόμενες με συγκεκριμένες (μη κλειστές) κατηγορίες σφαλμάτων. Επίσης, χαρακτηριστική είναι η επανάληψη των συσχετίσεων αυτών στα επί μέρους μεταφράσματα. Η «ανωμαλία» των εξαιρέσεων που αναδεικνύονται στα κείμενα, δηλαδή οι

περιπτώσεις λεξιλογικής ή συντακτικής παρεμβολής που δεν συσχετίζονται με άλλη κατηγορία «ελλειμματικής» μεταφραστικής επιτέλεσης, θα πρέπει προς το παρόν να αποδοθεί στο μικρό εύρος του ερευνητικού *corpus* και στο πρώιμο, πιλοτικό, στάδιο της πειραματικής μεθόδου. Αναμφίβολα ωστόσο, τα ευρήματα είναι δεκτικά περαιτέρω ανάλυσης, με βαθύτερη διερεύνηση των γνωστικών και διαδικαστικών *διεργασιών* (processes) που ενεργοποιούνται κατά τη μεταφραστική επιτέλεση και με εξέταση, ασφαλώς, μεγαλύτερου *corpus* ερευνητικών δεδομένων.

5.3.6 Νόρμα και αποκλίσεις

Σημαντικό είναι, τέλος, το ποσοστό των αποκλίσεων των μεταφρασμάτων από τη λογιζόμενη ως νόρμα της κοινωνιολέκτου, κατά εξεταζόμενα τεμάχια λόγου. Συγκεκριμένα, από το σύνολο των 77 καταγραφόμενων μεταφραστικών σφαλμάτων που συσχετίζονται με το φαινόμενο της παρεμβολής, τα 20 (25,97% επί του συνόλου) έχουν ως μοναδικό ή δευτερογενές χαρακτηριστικό τους τη δυσαρμονία μεταξύ εξεταζόμενης και ιδεατής μεταφραστικής εκφοράς κυρίως στο *πλαίσιο* (tenor) και τον τρόπο (mode) του εκφωνήματος. Οι λόγοι της δυσαρμονίας αυτής θα πρέπει ασφαλώς να αναζητηθούν και στο επίπεδο μεταφραστικής-τελεστικής επάρκειας των διδασκομένων.

Παραδείγματα:

(10)
[SB17] before you start or when you get frustrated by your use of regular expressions and want to bolster your understanding
[B2] πριν αρχίσετε ή όταν θα έχετε μπερδευτεί με τον τρόπο που χρησιμοποιείτε τις κανονικές εκφράσεις και θα θέλετε να τις διασαφηνίσετε

(11)
[SB23] If your job involves manipulating or extracting text on a computer, a firm grasp of regular expressions **will save you plenty of overtime.**
[B3] Εάν η εργασία σας συμπεριλαμβάνει επεξεργασία ή εξαγωγή κειμένου σε υπολογιστή, μια βαθιά κατανόηση των κανονικών εκφράσεων **θα σας γλιτώσει από πολλές υπερωρίες.**
[B4] Εάν η εργασία σας συμπεριλαμβάνει την επεξεργασία ή εξαγωγή κειμένων σε έναν υπολογιστή, μια βαθιά κατανόηση και αφομοίωση των κανονικών εκφράσεων **θα σας γλιτώσει από πολλές υπερωρίες.**

(12)
[LB10] the practical regular expressions are listed and described in Chapters 4 through 8.
[B2] οι πρακτικές κανονικές εκφράσεις είναι γραμμένες σε λίστα και περιγράφονται αναλυτικά στα κεφάλαια 4 και 8.
[B3] οι πρακτικές κανονικές εκφράσεις έχουν αναρτηθεί σε λίστες και περιγράφει στα Κεφάλαια 4 έως 8.

6. Συμπεράσματα

Από την πειραματική έρευνα, και με αναφορά στο υποκείμενο θεωρητικό πλαίσιο αυτής, προκύπτουν εν συνόψει τα ακόλουθα συμπεράσματα:

1. Πολλές από τις μεταφραστικές επιλογές των διδασκομένων μπορούν να ιδωθούν και υπό το πρίσμα των πιθανολογικών νόμων της παρεμβολής και της αύξουσας τυποποίησης, κατά την οικεία προσέγγιση. Τούτο συνάγεται και από τη συσχέτιση που κάνουν οι εκπαιδευόμενοι μεταξύ των επιλογών τους και του καταστασιακού πλαισίου εκφοράς του ΚΣ, αλλά και από τη συσχέτιση, κατά σημεία, των εκδηλώσεων των πιθανολογικών νόμων με μια περισσότερο συμβατική προσέγγιση της τυπολογίας των μεταφραστικών σφαλμάτων.

2. Οι πιθανολογικοί νόμοι της παρεμβολής και της αύξουσας τυποποίησης προβάλλουν κατά συνέπεια ως ένα επιπρόσθετο, αλλά ασφαλώς όχι αποκλειστικό, επίπεδο ερμηνείας της μεταφραστικής επιτέλεσης. Επίπεδο, το οποίο αναφέρεται στα δύσβατα πεδία της δυναμικής συγχρονίας και της

κοινωνιολογίας της εκφοράς και συνδυάζει την κλασική, αντιπαραβολική θέαση της ισοδυναμίας, με τις κοινωνικο-πολιτισμικές συνθήκες στις οποίες επιτελείται μία μετάφραση (Toury 1995: 275). Τα ευρήματα της έρευνάς μας στοχεύεται να συμπληρωθούν από αντίστοιχη διερεύνηση και σε άλλα κειμενικά είδη, όσο και στην εκφορά και άλλων μεταφραστών, και όχι μόνον διδασκομένων.

3. Αναδεικνύεται ήδη η ανάγκη για περαιτέρω ανάλυση των «γενικών» κατηγοριών στις οποίες επιμερίζονται οι εκφάνσεις των πιθανολογικών νόμων της παρεμβολής και της αύξουσας τυποποίησης. Έτσι πιστεύουμε ότι θα υπερκεράσουμε σταδιακά την ασάφεια του ερμηνευτικού πλαισίου, αλλά και θα μπορέσουμε να διατυπώσουμε περιγραφικά συμπεράσματα σχετικά με την καλούμενη μεταφραστική συμπεριφορά, και να εντάξουμε τη μελέτη των φαινομένων αυτών στη διδακτική, και εκ τούτου σε μεγάλο βαθμό κανονιστική, προσέγγιση της Μετάφρασης.

4. Εξίσου περισσότερο λεπτομερειακή θα πρέπει να είναι η αναζήτηση και η καταγραφή των γενεσιουργών αιτιών των εξεταζόμενων πιθανολογικών νόμων. Η συσχέτιση με τη γνωστική πτυχή της μεταφραστικής επιτέλεσης, με την υπέρθεση των εκφάνσεων των πιθανολογικών νόμων στο επίπεδο των μεταφραστικών σφαλμάτων αναδεικνύει μόνον μία πτυχή του φαινομένου. Οι μεταφραστικές επιλογές κατά τεμάχιο λόγου θα πρέπει να συγκριθούν με αντίστοιχες επιλογές, «ίσης» στοχευόμενης λειτουργίας, από εκτενή κειμενικά δεδομένα φυσικής εκφοράς λόγου στη ΓΣ, στα εξεταζόμενα κειμενικά είδη. Περαιτέρω, οι επιλογές αυτές θα πρέπει να συγκριθούν με αντίστοιχες επιλογές από μεταφρασμένα κείμενα και να επιχειρηθεί η κατηγοριοποίησή τους σε συνειδητές και μη. Τέλος, οι κανονικότητες που θα αναδειχθούν θα πρέπει να εξεταστούν και στο πλαίσιο της στοχευμένης σύγκλισης, ή αύξουσας τυποποίησης.

5. Τέλος, η διεύρυνση του ερευνητικού υλικού και η αντιπαραβολή του με εκτενές, *ad hoc* Σώμα Κειμένων Αναφοράς θα επιτρέψει τη λειτουργική συσχέτιση με τα πιθανολογούμενα καθολικά της Μετάφρασης (αποσαφήνιση, εξομάλυνση, εξοδεδέρωση, κ.ο.κ.), σε ένα ρεαλιστικό πλαίσιο εξέτασης της μεταφραστικής επιτέλεσης, στα συγκεκριμένα κειμενικά είδη και τα γλωσσικά ζεύγη που θα καλύπτονται από το ερευνητικό *corpus*.

Σημείωση: το σύνολο του ερευνητικού υλικού, τα κείμενα της έρευνας, καθώς και τα αναλυτικά στατιστικά δεδομένα της παρούσας έρευνας δημοσιεύονται στη δ/ση: <https://e-class.ionio.gr/modules/document/document.php?openDir=%2FICGL2010> (η πρόσβαση απαιτεί διαπιστευτικά πρόσβασης που διατίθενται από τον συγγραφέα)

ABSTRACT

Our main aim in this paper is to explore how Greeks conceptualize politeness and impoliteness and whether these perceptions have changed over the last twenty five years. Another aim is to investigate whether Greeks believe that their society has become more or less polite than before and delve into the reasons of any such change. Our findings indicate that informants view impoliteness as being different from, and not the opposite of, politeness. Another finding is that, for most informants, impoliteness is expressed verbally, whereas the reverse is true of politeness. Finally, informants view their society as becoming less polite than it used to be.

Λέξεις κλειδιά: γλωσσική (ευ)(α)γένεια, εξω-γλωσσική (ευ)(α)γένεια

1. Εισαγωγή

Η έρευνα για θέματα ευγένειας παρουσιάζει τεράστια ανάπτυξη τα τελευταία τριάντα πέντε χρόνια, με κύριο έναυσμα την προσέγγιση των Brown & Levinson (1978/1987). Όπως κάθε θεωρία με τεράστια απήχηση, έτσι και η θεωρία των Brown & Levinson (1978/1987) απέκτησε ένθερμους υποστηρικτές αλλά δέχτηκε και έντονη κριτική, αρχικά με προτάσεις για τροποποιήσεις και βελτιώσεις του μοντέλου (βλ. π.χ., Spencer-Oatey 2000), ενώ αργότερα αμφισβητήθηκε η ίδια η υπόστασή του μέσα και στο πλαίσιο της γενικότερης στροφής προς το μεταμοντερνισμό (βλ. π.χ., Eelen 2001, Mills 2003, Watts 2003).

Η κριτική στη θεωρία των Brown & Levinson (1978/1987) αφορά διάφορες πτυχές της, στις οποίες δεν θα αναφερθούμε αναλυτικά. Ενδεικτικά μόνο να αναφέρουμε ότι δέχτηκε κριτική για το ότι επικεντρώνεται στη μελέτη της αρμονικής επικοινωνίας μέσα από μεμονωμένες κατασκευασμένες προτάσεις, και όχι σε αυθεντικό λόγο, και για το ότι δίνει έμφαση στον ομιλητή και αγνοεί τον ακροατή. Δέχτηκε επίσης έντονη κριτική για το ότι αγνοεί το γλωσσικό περιβάλλον του εκφωνήματος καθώς και τη συγκρουσιακή συμπεριφορά. Στο θεωρητικό αυτό πλαίσιο, η αγένεια γίνεται αντιληπτή απλά ως απουσία ευγένειας (δηλαδή το αντίθετό της) και, επομένως, δεν χρήζει μελέτης με αποτέλεσμα τα θέματα αγένειας να αρχίσουν να αποτελούν αντικείμενο έρευνας μόνο πολύ πρόσφατα (βλ. π.χ., Culpeper 1996, 2011, Eelen 2001, Mills 2003, Watts 2003, Bousfield 2008, Bousfield & Locher 2008,).

Η κριτική αυτή καθώς και η γενικότερη στροφή προς το μεταμοντέρνο συνέβαλε στη διεύρυνση των υπό διερεύνηση θεμάτων, όπως:

- η επέκταση σε ευρύτερες έννοιες, όπως «διαδραστικότητα» (facework, relational work, rapport management, βλ. π.χ., Spencer-Oatey 2000, Watts 2003, Locher 2004), δηλαδή τα νεότερα θεωρητικά πλαίσια δεν περιορίζονται στις έννοιες «ευγένεια», «πρόσωπο» και «απειλητικές προς το πρόσωπο πράξεις»,
- η ευγένεια και η αγένεια μελετώνται μαζί μέσα από το ίδιο θεωρητικό πλαίσιο ως σύνθετα διαδραστικά φαινόμενα και
- συμπεριλαμβάνεται και ο ακροατής, εφόσον η διάδραση συνεπάγεται τουλάχιστον δύο συμμετέχοντες.

Ιδιαίτερη έμφαση δίνεται στο ότι το τι είναι ευγενικό ή αγενές δεν είναι εγγενές στα εκφωνήματα και προκαθορισμένο, αλλά αποτέλεσμα της διάδρασης των συνομιλητών/τριών, οι οποίοι/ες διαπραγματεύονται και αξιολογούν τα όσα διαμείβονται. Δεν αφορά, δηλαδή, απλά και μόνο την πρόθεση ή την παραγωγή λόγου του/της ομιλητή/τριας αλλά συμπεριλαμβάνει και την αξιολόγηση που γίνεται από το/τη συνομιλητή/τρια.

Έτσι η αξιολόγηση αποτελεί βασική αρχή στο καινούργιο τοπίο. Όπως λέει ο Eelen (2001: 109), η (ευ)(α)γένεια δεν αφορά τόσο τη συμπεριφορά του/της ομιλητή/τριας όσο την αξιολόγησή τους από το/τη συνομιλητή/τρια. Η έννοια της αξιολόγησης αναφέρεται κυρίως στην αποτίμηση που γίνεται στις καθημερινές διεπιδράσεις, επιτρέπει όμως την επέκτασή της σε αυτό που ο Eelen (2001: 35) ονομάζει «μεταπραγματολογική ευγένεια», δηλαδή, την ευγένεια ως έννοια, για αυτό που οι καθημερινοί άνθρωποι αντιλαμβάνονται ως ευγένεια.

Η μεταμοντέρνα στροφή στη σχετική έρευνα τονίζει ότι η μελέτη θεμάτων ευγένειας και αγένειας πρέπει να στηρίζεται στις αντιλήψεις των καθημερινών ανθρώπων, όπως πραγματώνονται στις καθημερινές τους διεπιδράσεις, και όχι σε εκ των προτέρων θεωρητικές κατασκευές (βλ. π.χ., Eelen 2001, Mills 2003, Watts 2003). Μάλιστα, ο Watts (2003), μεταξύ άλλων, προτείνει μια διάκριση μεταξύ «πρώτης τάξης» (first order) και «δεύτερης τάξης» (second order) ευγένειας (ή E1 και E2, αντίστοιχα). Η δεύτερη αφορά θεωρητικές κατασκευές της έννοιας ενώ η πρώτη τις αντιλήψεις των καθημερινών ανθρώπων. Ο Eelen (2001: 32) παρατηρεί ότι μπορούν να εντοπιστούν δύο πλευρές στην E1: η δραστική (action-related) και η αντιληπτική (conceptual). Η πρώτη αφορά την (ευ)(α)γένεια όπως πραγματώνεται στις καθημερινές διεπιδράσεις μεταξύ των συνομιλητών/τριών ενώ η δεύτερη αφορά τις γενικότερες απόψεις των καθημερινών ανθρώπων.¹

Στο βαθμό που γνωρίζουμε, οι διάφορες μελέτες έχουν ασχοληθεί σχεδόν αποκλειστικά με λεπτομερείς αναλύσεις συγκεκριμένων γλωσσικών διεπιδράσεων σε συγκεκριμένα περιβάλλοντα με στόχο να εντοπιστεί και να κατανοηθεί η αξιολόγηση που γίνεται από τους/τις συνομιλητές/τριες σε συγκεκριμένες διεπιδράσεις. Με τον τρόπο αυτό, υποστηρίζεται ότι αποφεύγονται και οι γενικεύσεις και οι ισχυρισμοί για καθολικότητα πρακτικών που απετέλεσαν ένα άλλο σημείο έντονης κριτικής που δέχτηκε η θεωρία των Brown & Levinson (1978/1987). Στο κείμενο αυτό δεν θα ασχοληθούμε με την ανάλυση συγκεκριμένων γλωσσικών διεπιδράσεων αλλά με το πώς καθημερινοί άνθρωποι αντιλαμβάνονται και ορίζουν την ευγένεια και την αγένεια, δηλαδή με αυτό που ο Eelen (2001: 32) ονομάζει αντιληπτική πλευρά και η Mills (2003: 12) θεωρεί σημαντική πληροφορία για την ανάλυση φαινομένων ευγένειας και αγένειας. Η άντληση απόψεων από μη γλωσσολόγους έχει χρησιμοποιηθεί συστηματικά στην κοινωνιογλωσσολογία (βλ. π.χ., Niedzielski & Preston 2003) και έχει αρχίσει να χρησιμοποιείται και στην πραγματολογία, όπως αναφέρει ο Pinto (2011: 217), ο οποίος προσθέτει ότι αυτό συμβάλλει στην κατανόηση της ευγένειας «πρώτης τάξης». Αντλώντας από τον Preston (2005), ο Pinto (2011: 218) επισημαίνει ότι ακόμα και εάν οι περιγραφές των καθημερινών ανθρώπων είναι ανακριβείς και βασίζονται σε στερεότυπα και προκαταλήψεις, τα δεδομένα που θα συγκεντρωθούν από αυτούς παραμένουν πολύτιμα καθώς αντανάκλουν διαδεδομένες πεποιθήσεις και συμπεριφορές.

Στο σημείο αυτό θα πρέπει να αναφέρουμε ότι θεωρούμε την ευγένεια και την αγένεια ευρύτερα φαινόμενα που αφορούν τόσο τη γλωσσική όσο και την εξω-γλωσσική συμπεριφορά και εκδηλώνονται κυρίως σε κοινωνικό επίπεδο. Αξίζει να σημειωθεί εδώ ότι οι περισσότερες μελέτες έχουν επικεντρωθεί στο γλωσσικό και στο ατομικό επίπεδο και, κατά συνέπεια, έχει αγνοηθεί το εξω-γλωσσικό και το κοινωνικό (βλ. Mills 2009 για το τελευταίο).

Ο κύριος στόχος της παρούσας έρευνας είναι να διερευνήσουμε πώς νεαροί/ές Έλληνες/ίδες αντιλαμβάνονται την ευγένεια και την αγένεια και να δούμε εάν και κατά πόσον οι αντιλήψεις αυτές έχουν αλλάξει τα τελευταία είκοσι πέντε χρόνια. Ένας άλλος στόχος της έρευνάς μας είναι να διερευνήσουμε εάν οι πληροφορητές/τριές μας πιστεύουν ότι η κοινωνία τους έχει γίνει περισσότερο ή λιγότερο ευγενική από ό,τι ήταν στο παρελθόν και να εντοπίσουμε τους λόγους στους οποίους αποδίδεται η όποια αλλαγή.

2. Δεδομένα

Τα δεδομένα μας προέρχονται κυρίως από ένα ερωτηματολόγιο (βλέπε Παράρτημα), το οποίο κατασκευάσαμε με βάση το ερωτηματολόγιο που χρησιμοποιήθηκε πάνω από είκοσι πέντε χρόνια πριν για τη διερεύνηση του πώς αντιλαμβάνονται οι Έλληνες/ίδες την έννοια της ευγένειας (Sifianou 1992).

¹ Σε διάφορα σημεία της μελέτης του, ο Eelen (2001) επισημαίνει τη δυσκολία σαφούς διαχωρισμού μεταξύ E1 και E2, ενώ η Terkourafi (2011) τονίζει την αναγκαιότητα κατανόησης της στενής σχέσης μεταξύ των δύο και, κατά συνέπεια, την άντληση πυρηνικών στοιχείων από την E1 για την κατασκευή ενός θεωρητικού πλαισίου.

Στο σχεδιασμό των εν λόγω ερωτηματολογίων, ο στόχος μας δεν ήταν να αντλήσουμε γλωσσικά δεδομένα για ανάλυση, αλλά να διερευνήσουμε τις αντιλήψεις των ερωτηθέντων/θεισών για το τι συνιστά ευγένεια και τι αγένεια. Από τους/τις πληροφορητές/τριές μας ζητήθηκε να ορίσουν τι σημαίνει ευγένεια και να απαριθμήσουν κάποια από τα χαρακτηριστικά ενός ευγενικού ανθρώπου. Τους ζητήθηκε επίσης να δώσουν παραδείγματα συμπεριφοράς που τους εντυπωσίασε ως ευγενική και ως αγενής. Πέντε από τις ερωτήσεις ήταν οι ίδιες στο προηγούμενο και στο πρόσφατο ερωτηματολόγιο (1-4, 7), για να διασφαλιστεί η συγκρισιμότητα των αποτελεσμάτων, αλλά προστέθηκαν και δύο επιπλέον ερωτήσεις (5-6): μία που ζητούσε από τους/τις πληροφορητές/τριές μας να μας πουν εάν πιστεύουν ότι οι Έλληνες/ίδες έχουν γίνει περισσότερο ή λιγότερο ευγενικοί/ές από ό,τι ήταν στο παρελθόν και μία άλλη που είχε στόχο να διερευνήσουμε εάν οι πληροφορητές/τριές μας διαφοροποιούν την τυπικότητα από την ευγένεια, θέμα με το οποίο όμως δεν θα ασχοληθούμε εδώ.

Το ερωτηματολόγιο διανεμήθηκε σε 78 προπτυχιακούς/ές φοιτητές/τριες του Τμήματος Αγγλικής Γλώσσας και Φιλολογίας του Πανεπιστημίου Αθηνών, οι οποίοι/ες δεν είχαν καμία προηγούμενη ακαδημαϊκή ενασχόληση με θέματα σχετικά με την ευγένεια και την αγένεια.

Παρόλο που τα συμπεράσματα που μπορεί κανείς να εξάγει από ευρήματα ερωτηματολογίων είναι περιορισμένης γενίκευσης, και παρόλο που οι αντιλήψεις των πληροφορητών/τριών περί ευγένειας και αγένειας σε συγκεκριμένα αυθεντικά περιβάλλοντα είναι σημαντικές, θεωρούμε ότι αξίζει να διερευνηθεί η πιθανότητα ανίχνευσης πιο γενικών και ενδεχομένως κοινών αντιλήψεων. Στην πραγματικότητα, θα μπορούσαμε να ισχυριστούμε ότι, όπως είναι αναμενόμενο να ορίζουν οι ερευνητές/τριες τις έννοιες που ερευνούν, κατά τον ίδιο τρόπο θα πρέπει να δίνεται η ευκαιρία και στο γενικό κοινό να προτείνει τους δικούς του ορισμούς και τις δικές του γενικές αντιλήψεις και όχι μόνο συγκεκριμένες εκτιμήσεις που γίνονται σε συγκεκριμένα περιβάλλοντα. Αυτό βέβαια δεν σημαίνει ότι οι αντιλήψεις του γενικού κοινού θα πρέπει να αποτελούν βάση για την ανάπτυξη μιας θεωρίας, αλλά ότι θα πρέπει να λαμβάνονται ως χρήσιμες ενδείξεις για κατευθύνσεις που αξίζει να τύχουν περαιτέρω θεωρητικής διερεύνησης.

3. Συζήτηση και αποτελέσματα

Σε σχέση με το ερώτημα του πώς νεαροί/ές Έλληνες/ίδες αντιλαμβάνονται την ευγένεια και την αγένεια, η μελέτη μας έδειξε τα εξής:

3.1 Αντιλήψεις για την έννοια της ευγένειας

Και στο προηγούμενο και στο τρέχον δείγμα, υπάρχει γενική συναίνεση ότι ευγένεια σημαίνει εκτίμηση και σεβασμός προς τους άλλους και σε κάποιο βαθμό «καλοί τρόποι». Ωστόσο, έννοιες, όπως «εκτίμηση» και «σεβασμός», μπορούν να λάβουν διάφορες πραγματώσεις και να αφορούν τη διατήρηση κοινωνικής απόστασης ή την έκφραση οικειότητας και αλληλεγγύης. Αυτό είναι εμφανές από το εύρος των χαρακτηριστικών που θεωρείται ότι διακρίνουν ένα ευγενικό άτομο στο προηγούμενο και στο τρέχον δείγμα. Και στα δύο δείγματα αναφέρονται χαρακτηριστικά ευγένειας που θα μπορούσαν να περιγραφούν καλύτερα ως δείγματα αλτρουισμού, γενναιοδωρίας και αυταπάρνησης, δηλαδή ως δείγματα προσφοράς και βοήθειας προς τον άλλον άνθρωπο που έχει ανάγκη. Και στις δύο περιπτώσεις είναι σαφές ότι η ευγένεια δεν συσχετίζεται με τη διατήρηση κοινωνικών αποστάσεων αλλά με την έκφραση οικειότητας και αλληλεγγύης. Με άλλα λόγια, αντικατοπτρίζει τον συχνά αποδιδόμενο προσανατολισμό της ελληνικής κοινωνίας προς τη θετική ευγένεια (βλ. π.χ., Sifianou 1992, Pavlidou 1994, Makri-Tsilipakou 2001, Tzanne 2001, Economidou-Kogetsidis 2003). Μερικοί/ές πληροφορητές/τριες ανέφεραν ότι τα εν λόγω χαρακτηριστικά συνοδεύονται από «καλούς τρόπους», ενώ για άλλους/ες οι «καλοί τρόποι», είναι ένα προσωπείο που δεν υποδηλώνει κατ' ανάγκη έναν ευγενικό άνθρωπο. Για κάποιους/ες πληροφορητές/τριές μας ακόμα και οι γνωστοί δείκτες ευγένειας «παρακαλώ» και «συγνώμη» είναι δείγματα προσποιητής (και όχι αληθινής) ευγένειας, που υποδηλώνει υποκρισία και ανειλικρίνεια, αντίληψη που δεν είναι σπάνια (βλ. π.χ. Watts 2003: 2). Όπως και στο παρελθόν, μερικοί/ές πληροφορητές/τριες θεωρούν την ευγένεια έμφυτη ιδιότητα που πηγάζει από την ψυχή (βλ. Ogiermann & Suszczyńska 2011: 211 για παρόμοιες αντιλήψεις στην Πολωνία και Blum-Kulka 1992: 261 στο Ισραήλ) ανεξάρτητα από το κοινωνικό ή μορφωτικό υπόβαθρο και διαφοροποιούν μεταξύ έμφυτης ευγένειας και αποκτούμενων «καλών τρόπων».

Τα περισσότερα παραδείγματα ευγένειας και αγένειας παραπέμπουν σε γενικά πρότυπα συμπεριφοράς ή την απουσία τους, αντίστοιχα, όπως η παραχώρηση θέσης στα μέσα μαζικής μεταφοράς και η παροχή βοήθειας σε ένα ηλικιωμένο ή τυφλό άτομο να διασχίσει το δρόμο. Άλλα

παραδείγματα ευγενικών πράξεων σχετίζονται με φτωχούς ανθρώπους που βοηθούν άλλους που έχουν ανάγκη, με την παράδοση ανευρεθέντων αντικειμένων και με παιδιά που συγκεντρώνουν χρήματα για φιλανθρωπικούς σκοπούς. Με βάση τα παραπάνω, θα μπορούσε να πει κανείς ότι η ευγένεια γίνεται γενικά αντιληπτή ως παροχή κάθε είδους βοήθειας.

Αυτό φαίνεται να συνδέεται και με ένα άλλο ενδιαφέρον εύρημα, εφόσον είναι προφανές ότι η βοήθεια που παρέχεται είναι κατά κανόνα έμπρακτη. Η πλειονότητα (70,5%) των πληροφορητών/τριών μας αντιλαμβάνεται την ευγενική συμπεριφορά, ως αυστηρά εξω-γλωσσική.² Το εύρημα αυτό συμφωνεί με την παρατήρηση της Hirschon (2001: 31) ότι, στην ελληνική πραγματικότητα η ευγένεια δεν είναι μόνο γλωσσικό θέμα εφόσον πολύ σημαντικός είναι και ο ρόλος της εξω-γλωσσικής συμπεριφοράς. Αυτή η αντίληψη της ευγένειας ως κατ' εξοχήν εξω-γλωσσικής συμπεριφοράς έρχεται σε αντίθεση με εκείνη που αφορά την αγενή συμπεριφορά, όπου οι μισοί/ές πληροφορητές/τριές μας θεωρούν τη γλωσσική συμπεριφορά να εμπλέκεται στην έκφραση της αγένειας, όπως γίνεται σαφές στο Γράφημα 1:

Γράφημα 1 Μορφές ευγένειας και αγένειας

Η παρατηρούμενη αντίθεση ενδέχεται να υποδηλώνει ότι οι πληροφορητές/τριές μας αντιλαμβάνονται την ευγένεια και την αγένεια ως διαφορετικά, αλλά όχι αντίθετα είδη συμπεριφοράς, παρά το γεγονός ότι οι γλώσσες έχουν την τάση να τις αντιμετωπίζουν ως αντίθετες έννοιες (π.χ., im / politeness και ευ-γένεια / α-γένεια). Το εύρημα αυτό έχει ιδιαίτερο ενδιαφέρον, αν σκεφτεί κανείς ότι μόνο η πρόσφατη βιβλιογραφία (βλ. π.χ., Mills 2003: 124) τονίζει ότι η ευγένεια και η αγένεια δεν θα πρέπει να θεωρούνται ως ακριβή αντίθετα.

3.2 Αντιλήψεις για την έννοια της αγένειας

Από τους/τις πληροφορητές/τριες που συνδέουν την αγένεια με τη γλωσσική συμπεριφορά, αρκετοί/ές (22%) θεωρούν ότι οι ύβρεις και η χρήση άσχημης γλώσσας είναι περιπτώσεις αγενούς συμπεριφοράς, ενώ αρκετοί/ές άλλοι/ες (17%) πιστεύουν ότι το να είσαι σαρκαστικός ή απαιτητικός και να διακόπτεις τα άτομα με τα οποία συνομιλείς αποτελούν δείγματα αγένειας. Είναι ενδιαφέρον να σημειωθεί ότι ορισμένοι/ες πληροφορητές/τριες (8%) βρίσκουν την απουσία συμβατικών δεικτών ευγένειας (π.χ., «ευχαριστώ» - «παρακαλώ») εξίσου αγενή συμπεριφορά. Αυτό παραπέμπει στην επισήμανση των Brown & Levinson (1987: 5) για τους οποίους η ευγένεια πρέπει να εκφράζεται και η απουσία της μπορεί να συνεπάγεται την απουσία ευγενικής συμπεριφοράς.

Σε αντίθεση με άλλες έρευνες (βλ. π.χ., Lakoff 2005, Cameron 2007), ένας πολύ μικρός αριθμός των πληροφορητών/τριών (3%) συνδέουν την έλλειψη τυπικότητας με την αγένεια και αυτό με πολύ περιορισμένη σημασία, δηλαδή, τη χρήση του δεύτερου ενικού προσώπου αντί για το δεύτερο πρόσωπο του πληθυντικού σε κοινωνικά μη οικείες σχέσεις. Αυτό είναι ενδιαφέρον, δεδομένου ότι στον ελληνικό δημόσιο λόγο, η τυπικότητα εξακολουθεί να έχει ισχυρή θέση (βλ. π.χ., Sifianou &

² Ίσως έχει ενδιαφέρον να αναφέρουμε εδώ ότι σε σχετική έρευνα (Ogiermann & Suszczyńska 2011) και οι Πολωνοί/ίδες πληροφορητές/τριες έδωσαν ορισμούς για την ευγένεια που δεν περιλαμβάνουν σχεδόν καθόλου στοιχεία γλωσσικής συμπεριφοράς ενώ αντίθετα για την αγένεια τα γλωσσικά στοιχεία υπερίσταν.

Tzanne 2001, Sifianou 2010). Στο Γράφημα 2 παρουσιάζονται αναλυτικά οι απαντήσεις των πληροφορητών/τριών μας σε σχέση με τη γλωσσική αγένεια.³

Γράφημα 2 Περιπτώσεις γλωσσικής αγένειας

Μεταξύ αυτών που εμφανίζονται να συνδέουν την αγένεια με εξω-γλωσσική συμπεριφορά, αρκετοί/ές (22%) αναφέρουν παραδείγματα από μέρη όπου συχνάζουν πολλοί άνθρωποι, όπως οι τράπεζες, τα σουπερ μάρκετ ή τα μέσα μαζικής μεταφοράς (ΜΜΜ). Σε αυτό το πλαίσιο, κατατάσσουν την παραβίαση της σειράς προτεραιότητας ή τη μη παραχώρηση θέσης σε έγκυες ή ηλικιωμένους/ες στα μέσα μεταφοράς, στις περιπτώσεις αγένειας. Στο Γράφημα 3 παρουσιάζονται οι απαντήσεις των πληροφορητών/τριών μας σε σχέση με τη συμπεριφορά των ατόμων που επιδεικνύουν εξω-γλωσσική αγένεια.

Γράφημα 3 Περιπτώσεις εξω-γλωσσικής αγένειας

3.3 Εκτιμήσεις σε σχέση με την ευγένεια ή την αγένεια των Ελλήνων/ίδων

Μια σημαντική διαφορά μεταξύ του προηγούμενου και του παρόντος δείγματος προέκυψε σε σχέση με τις απόψεις για το βαθμό της ευγένειας των Ελλήνων/ίδων. Στο προηγούμενο δείγμα, λίγα άτομα (7,4%) αξιολόγησαν τους/τις Έλληνες/ίδες ως «πολύ ευγενικούς», ενώ στο παρόν δείγμα το ποσοστό έχει πέσει στο 2,5%. Ωστόσο, αυτό που φαίνεται αξιοσημείωτο είναι ότι ενώ στο προηγούμενο δείγμα το ένα τέταρτο των πληροφορητών/τριών αξιολόγησε τους συμπατριώτες τους ως «μη ευγενικούς», στο τρέχον δείγμα το ποσοστό αυτό έχει μειωθεί σημαντικά (9%).

Η συντριπτική πλειονότητα των ερωτηθέντων/θεισών (84,5%) αξιολογούν τους συμπατριώτες τους ως λιγότερο ευγενικούς από ό,τι ήταν πριν. Είναι όμως ενδιαφέρον, ότι ένα μη αμελητέο ποσοστό πληροφορητών/τριών (15,5%) τους απεικονίζει ως πιο ευγενικούς. Αν κοιτάξει κάποιος προσεκτικά τα ποσοστά, φαίνεται να υπάρχει μια αντίφαση. Από τη μία πλευρά, η πλειονότητα των σημερινών πληροφορητών/τριών μας (84,5%) αξιολογεί τους συμπατριώτες τους ως λιγότερο ευγενικούς από παλιά και από την άλλη, ο αριθμός των πληροφορητών/τριών (9%) που τους αξιολογούν ως μη ευγενικούς είναι σημαντικά χαμηλότερος από εκείνον του προηγούμενου δείγματος (25,9%). Αυτό οφείλεται κατά πάσα πιθανότητα στο γεγονός ότι η ηλικία των πληροφορητών/τριών μας (20 ετών κατά μέσο όρο) δεν επιτρέπει απόψεις με βάση την προσωπική τους εμπειρία και πιθανότατα

³ Τα στοιχεία του υπομνήματος παρουσιάζονται με φθίνουσα σειρά, δηλαδή το πρώτο στοιχείο αντιστοιχεί στο μεγαλύτερο κομμάτι της πίτας, το δεύτερο στοιχείο στο δεύτερο μεγαλύτερο κομμάτι και ούτω καθεξής.

αντικατοπτρίζει γενικά στερεότυπα. Μια άλλη πιθανή εξήγηση είναι ότι οι πληροφορητές/τριές μας δεν θεωρούν το «λιγότερο ευγενικός» ως ταυτόσημο του «μη ευγενικός», προφανώς αντιλαμβανόμενοι το διάστημα μεταξύ ευγένειας και αγένειας ως διαβαθμισμένο. Το Γράφημα 4 παρουσιάζει τα ευρήματα αυτά σχηματικά.

Γράφημα 4 Βαθμός ευγένειας των Ελλήνων/ίδων

4. Εξηγήσεις για τις αλλαγές

Η αντίληψη ότι η ελληνική κοινωνία είναι λιγότερο ευγενική από ό,τι ήταν παλιότερα φαίνεται να απηχεί παρόμοιες απόψεις που ακούγονται τόσο στην Ελλάδα όσο και σε άλλες κοινωνίες (βλ. π.χ., Lakoff 2005, Truss 2005, Gorji 2007, Bolívar 2008), οι οποίες παραπέμπουν στα «παλιά καλά χρόνια», όταν οι άνθρωποι (υποτίθεται ότι) ήταν πιο ευγενικοί ο ένας προς τον άλλο (Mills 2009: 1054). Τέτοιες απόψεις εκφράζονται συχνά σε άρθρα εφημερίδων και περιοδικών, καθώς και σε ιστολόγια (blogs) και τείνουν να επισημαίνουν την εξαφάνιση της ευγένειας στην εποχή μας, συνήθως παραδειγματίζοντας με συγκεκριμένες περιπτώσεις και γενικεύοντας για ολόκληρη την κοινωνία. Τέτοιες απόψεις αντανakλούν στερεοτυπικές αντιλήψεις και, ενδεχομένως, το φόβο αλλαγής αλλά δεν βασίζονται σε αποτελέσματα έρευνας, όπως επισημαίνει η Mills (2009).

Στην περίπτωση μας, οι ερωτηθέντες/θείσες παραθέτουν μια σειρά από λόγους για να αιτιολογήσουν την αγένεια των συμπατριωτών τους. Πολλοί (40%) αποδίδουν την υποτιθέμενη έκπτωση της ευγένειας στις δυσκολίες που αντιμετωπίζουν οι άνθρωποι, το άγχος και τους εντατικούς ρυθμούς της σύγχρονης ζωής, που τους κάνει πιο ανυπόμονους και οξύθυμους. Αρκετοί (28%) πιστεύουν ότι η στροφή στην αγένεια συνδέεται με το ότι η ελληνική κοινωνία έχει γίνει ατομικιστική και ο καθένας ενδιαφέρεται μόνο για τον εαυτό του, με αποτέλεσμα την αποξένωση, ιδιαίτερα στις μεγάλες πόλεις. Ο χρόνος είναι χρήμα και οι περίπλοκες διατυπώσεις είναι απλά χάσιμο χρόνου. Ένας αριθμός των ερωτηθέντων/θεισών (18%) εξηγεί την αύξηση της αγένειας με βάση τη γενική παρακμή της σημερινής κοινωνίας και την έκπτωση των ηθικών αξιών της, ενώ κάποιοι άλλοι (9%), την αποδίδουν στα αισθήματα ανασφάλειας που σχετίζονται με την ξενοφοβία. Κάποιοι (9%) υποστηρίζουν ότι το αυξημένο επίπεδο αγένειας που παρατηρείται στην Ελλάδα σήμερα είναι πιθανόν να οφείλεται στην έλλειψη παιδείας και σωστής διαπαιδαγώγησης των νέων ανθρώπων. Το Γράφημα 5 συνοψίζει τις διάφορες εξηγήσεις που έδωσαν οι πληροφορητές/τριές μας για την αύξηση της αγένειας.

Γράφημα 5 Εξηγήσεις για την αύξηση της αγένειας

Οι ερωτηθέντες/θείσες που αξιολόγησαν τους συμπατριώτες τους ως πιο ευγενικούς από ό,τι ήταν στο παρελθόν αποδίδουν την αύξηση κυρίως στην πρόσβαση στην εκπαίδευση από περισσότερους ανθρώπους, αλλά και στην παγκοσμιοποίηση, δηλαδή την επιρροή του δυτικού κόσμου, κυρίως ως αποτέλεσμα της ένταξης της Ελλάδας στην Ευρωπαϊκή Ένωση. Ως άλλοι λόγοι αναφέρονται η ενασχόληση των Ελλήνων/ίδων με τον τουρισμό και η πρόσφατη εμπειρία της διοργάνωσης των Ολυμπιακών Αγώνων «Αθήνα 2004». Το Γράφημα 6 συνοψίζει τις διάφορες εξηγήσεις που δόθηκαν για την αύξηση της ευγένειας.

Γράφημα 6 Εξηγήσεις για την αύξηση της ευγένειας

Ως μια πρώτη προσπάθεια να εξετάσουμε το βαθμό κατά τον οποίο τα ευρήματά μας σχετίζονται με την ηλικία των πληροφορητών/τριών, δώσαμε το ερωτηματολόγιο και σε ένα δείγμα 20 ατόμων ηλικίας 43-60 ετών. Παρόλο που θεωρούμε την έρευνα σε αυτό το πολύ μικρό δείγμα ως το πρώτο βήμα προς τη διερεύνηση ενός ευρέος και περίπλοκου ζητήματος, αξίζει, πιστεύουμε, να αναφέρουμε ότι, παρόλο που αρχικά υποθέσαμε ότι η ηλικία θα ήταν ένας καθοριστικός παράγοντας στη διαμόρφωση αντιλήψεων για την ευγένεια και την αγένεια, τα αρχικά ευρήματα δείχνουν ότι δεν υπάρχουν σημαντικές διαφορές μεταξύ των δύο ηλικιακών ομάδων (18-22 και 43-60).⁴ Για παράδειγμα, όπως και η νεότερη ηλικιακή ομάδα, έτσι και η πλειονότητα των μεγαλύτερων πληροφορητών/τριών (63%) αντιλαμβάνονται την ευγενική συμπεριφορά ως εξω-γλωσσική, ενώ μόνο μια πολύ μικρή μειονότητα (5.2%) την αντιλαμβάνεται ως γλωσσική. Μια άλλη ομοιότητα μεταξύ των δύο ηλικιακών ομάδων έγκειται στο ότι το ίδιο ποσοστό πληροφορητών/τριών (22%) και από τις δύο ομάδες θεωρεί αγένεια τις ύβρεις, ενώ αρκετά άτομα και από τις δύο ομάδες συμφωνούν ότι η αγένεια είναι εξω-γλωσσική συμπεριφορά (νεότεροι: 32%, μεγαλύτεροι: 40%). Επίσης, όπως και οι νεότεροι/ες πληροφορητές/τριες, έτσι και η πλειονότητα των μεγαλύτερων (84.2%) συμφωνούν ότι οι Έλληνες/ίδες είναι λιγότερο ευγενικοί/ές από πριν, ενώ λίγα άτομα από αυτή την ηλικιακή ομάδα (15.8%) τους/τις θεωρούν πιο ευγενείς. Το Γράφημα 7 συνοψίζει κάποιες από τις αντιλήψεις των δύο ηλικιακών ομάδων (όπου «Ε» είναι η ευγένεια και «Α» η αγένεια).

Γράφημα 7 Αντιλήψεις περί (ευ)(α)γένειας και ηλικία

⁴ Ίσως αξίζει να σημειωθεί εδώ ότι και η Fukushima (2011) δεν εντοπίζει σημαντικές διαφορές μεταξύ των ηλικιακών ομάδων των Ιαπώνων που διερευνά.

Αναμφίβολα χρειάζεται να γίνει περισσότερη έρευνα και να μελετηθούν περισσότερες και πολυπληθέστερες ηλικιακές ομάδες προκειμένου να είμαστε σε θέση να γενικεύσουμε τα συμπεράσματά μας και να μιλήσουμε για τις επικρατούσες τάσεις στις αντιλήψεις των Ελλήνων/ίδων σχετικά με την (ευ)(α)γένεια. Παρόλα αυτά, το γεγονός ότι οι τωρινοί/νές πληροφορητές/τριες αντιλαμβάνονται την (ευ)(α)γένεια κατά τον ίδιο περίπου τρόπο με τον οποίο την αντιλαμβάνονταν οι πληροφορητές/τριές μας είκοσι πέντε χρόνια πριν μας επιτρέπει να εξάγουμε κάποια γενικά συμπεράσματα με αρκετή βεβαιότητα και να επισημάνουμε μια περιοχή που αξίζει να διερευνηθεί περαιτέρω, δεδομένου μάλιστα ότι οι ομοιότητες και οι διαφορές ανάμεσα σε διαφορετικές ηλικιακές ομάδες δεν έχουν απασχολήσει σχεδόν καθόλου την έρευνα για θέματα (ευ)(α)γένειας.

5. Συμπερασματικές παρατηρήσεις

Συνολικά, η μελέτη αυτή προσπάθησε να διερευνήσει πώς μια ομάδα νεαρών Ελλήνων/ίδων αντιλαμβάνονται την ευγένεια και την αγένεια, αποφεύγοντας υπεργενικεύσεις για το τι ισχύει σε ολόκληρη την ελληνική κοινωνία. Όπως επισημαίνει η Mills (2009: 1056), μεταξύ άλλων, πρέπει να αναγνωρίσουμε την ετερογένεια των κοινωνικών ομάδων και όχι να υποθέτουμε ότι οι κοινωνίες είναι ομοιογενείς. Ένα ενδιαφέρον παράδειγμα αυτής της επισήμανσης είναι η προσφορά θέσης στα μέσα μαζικής μεταφοράς. Παρά το γεγονός ότι πολλοί από τους/τις ερωτηθέντες/θείσες συμφωνούν ότι μια τέτοια πράξη υποδηλώνει ευγένεια, μερικοί/ές ηλικιωμένοι/ες την αντιλαμβάνονται ως «επιθετική» κίνηση εφόσον τονίζει τη δική τους αδυναμία, και μπορεί, κατά συνέπεια, να εκληφθεί ως προσβλητική (Hirschon 2001: 26).

Αξίζει να σημειωθεί ότι συγκρίνοντας τις απαντήσεις στο παρόν ερωτηματολόγιο με αυτές που δόθηκαν πάνω από είκοσι πέντε χρόνια πριν (Sifianou 1992: 86-94) δεν εντοπίσαμε σημαντικές διαφορές ούτε στους ορισμούς της ευγένειας που δόθηκαν ούτε στα χαρακτηριστικά που αποδίδονται στους ευγενικούς και τους αγενείς ανθρώπους. Οι περισσότεροι ορισμοί είναι ευρείς, αντίληψη που παραπέμπει στο εύρος της θετικής ευγένειας. Αυτό το εύρος αντικατοπτρίζεται και στα παραδείγματα που αναφέρονται ως ενδεικτικά της ευγενικής και της αγενούς συμπεριφοράς.

Οι απαντήσεις των ερωτηθέντων/θεισών δείχνουν ότι, συνολικά, αντιλαμβάνονται την ευγένεια ως παροχή βοήθειας προς τον άλλον και, κατά συνέπεια, ως εξω-γλωσσική συμπεριφορά σε μεγάλο βαθμό (70,5%). Σε αντίθεση, οι μισοί/ές πληροφορητές/τριες θεωρούν ότι η αγένεια εκφράζεται γλωσσικά και οι άλλοι/ες μισοί/ές εξω-γλωσσικά. Αυτό υποδηλώνει ότι οι πληροφορητές/τριές μας αντιλαμβάνονται την αγένεια ως κάτι διαφορετικό αλλά όχι το ακριβώς αντίθετο της ευγένειας. Αυτό που αξίζει να σημειωθεί, ωστόσο, είναι ότι και οι δύο έννοιες σχετίζονται με κανόνες και προσδοκίες κοινωνικής συμπεριφοράς σε συγκεκριμένα πλαίσια. Αυτό μπορεί να σημαίνει ότι η ευγένεια και η αγένεια σε κοινωνικό επίπεδο συνδέονται περισσότερο με συμβάσεις σωστής κοινωνικής συμπεριφοράς.

Έχει επίσης ενδιαφέρον να αναφέρουμε ότι οι πληροφορητές/τριές μας τείνουν να αποδίδουν χαρακτηριστικά αγένειας στους άλλους, χρησιμοποιώντας το τρίτο πρόσωπο (*οι Έλληνες είναι*) και όχι το πρώτο πρόσωπο του πληθυντικού (*είμαστε*). Επομένως, φαίνεται ότι υπόρρητα αποδίδουν στους εαυτούς τους την ταυτότητα του ευγενικού ανθρώπου που είναι σε θέση να επιδοκιμάζει την ευγένεια και να καταδικάζει την αγένεια των άλλων.

Τέλος, όπως ήταν μάλλον αναμενόμενο, οι πληροφορητές/τριές μας θεωρούν ότι η κοινωνία μας έχει γίνει λιγότερο ευγενική από ό,τι ήταν στο παρελθόν, αντίληψη που απαντάται σε πολλές κοινωνίες σήμερα.

ABSTRACT

The present paper reports on the contextualization of repair through codeswitching in Albanian-Greek preschoolers' bilingual discourse. The subjects of the study were eight bilingual Kindergarten students, aged 4:3 to 6:1, who were observed and tape-recorded during various school activities. Code alternation in their speech was subsequently analysed following conversational analytical principles (cf. Auer 1995, 1998, Shin and Milroy 2000, etc.). With regard to repair, our subjects were found to produce examples of self-initiated and other-initiated self-repair, mainly in order to return to the appropriate code of the conversation or to abide by the interlocutor's choice of code.

Λέξεις κλειδιά: δίγλωσσα νήπια, ελληνική ως δεύτερη γλώσσα, αλβανικά-ελληνικά, εναλλαγή κωδίκων, συνομιλιακή διόρθωση, επικοινωνιακή δεξιότητα

1. Εισαγωγή

Η εναλλαγή κωδίκων (*code-switching*) συνίσταται στη χρήση ποικίλων και διαφορετικών συνδυασμών δύο ή περισσότερων γλωσσικών συστημάτων (ή ποικιλιών) στην ίδια συζήτηση ή πρόταση (Gardner-Chloros 2009, 4). Αποτελεί πολυδιάστατο και πολυεπίπεδο φαινόμενο του διγλωσσικού λόγου, που εξετάζεται από ποικίλες οπτικές γωνίες (ψυχολinguιστικές, γραμματικές, κοινωνιο-γλωσσολογικές, πραγματολογικές, βλ. Gardner-Chloros 2009, 7, Σελλά-Μάζη 2001,70).

Στα πλαίσια της πραγματολογικής προσέγγισης του φαινομένου, πολλοί ερευνητές έχουν αξιοποιήσει την Ανάλυση Συνομιλίας (Conversation Analysis) ως ερμηνευτικό μοντέλο για την ανάλυση της εναλλαγής κωδίκων κατά τη διγλωσσική επικοινωνία (Auer 1984, 1995, 1998, 2005, Alfonzetti 1998, Cromdal 2004, Li Wei 1994, 1998, 2002, 2005, Li Wei and Milroy 1995, Sebba and Wootton 1998, Steensig 2003).

Στην παρούσα εργασία παρουσιάζουμε δεδομένα από μία έρευνα που κινείται επίσης στο πλαίσιο της Ανάλυσης Συνομιλίας και εστιάζει στην αξιοποίηση της εναλλαγής κωδίκων ως μηχανισμού *συνομιλιακής διόρθωσης*. Τα δεδομένα μας προέρχονται από αυθεντικό λόγο δίγλωσσων νηπίων αλβανικής καταγωγής, ο οποίος μελετήθηκε στο πλαίσιο εκπόνησης διδακτορικής διατριβής στο Πανεπιστήμιο Κρήτης (Σιταρένιου 2011, Χατζηδάκη και Σιταρένιου 2009). Στόχος μας είναι να παρουσιάσουμε το πώς εμφανίζεται το φαινόμενο της διόρθωσης στις διγλωσσικές συνομιλίες των υποκειμένων.

2. Θεωρητικό πλαίσιο

2.1 Η συνομιλιακή διόρθωση στη διγλωσσική συνομιλία: ο ρόλος της εναλλαγής κωδίκων

Η συνομιλία συνιστά ένα σύστημα αλληλεπίδρασης το οποίο επικυρώνεται αμοιβαία και ρυθμίζεται από ένα ορισμένο τυπικό (Γεωργακοπούλου και Γούτσος 1999, 232) με αρχές και αξιώματα, όπως η αλλαγή της σειράς, τα ζεύγη γειτνίασης και η οργάνωση της προτίμησης (Levinson 1983). Η

οργάνωση της προτίμησης αποτελεί βασικό άξονα ανάλυσης στην Ανάλυση Συνομιλίας. Εφαρμόζεται συνήθως στις δευτερές σειρές τις υποκειμένες στην πρώτη σειρά της εναλλαγής (Levinson 1983, 339), αλλά και στη δομή και διάρθρωση των πρώτων σειρών, στην εν συνεχεία οργάνωση των επόμενων και, γενικά, ανάμεσα στις ακολουθίες που εμφανίζονται στη συνομιλία (ό.π., 345). Πεδίο της οργάνωσης της προτίμησης και κεντρικό συνομιλιακό μηχανισμό αποτελεί η *συνομιλιακή διόρθωση* (βλ. Schegloff, Jefferson and Sacks 1977). Η οργάνωσή της περιλαμβάνει τη λειτουργία επανορθωτικών μηχανισμών, όπως είναι η αυτοδιόρθωση και η ετεροδιόρθωση, που υλοποιούνται, λόγω χάρη, μέσω της επαναδιατύπωσης (Γεωργακοπούλου και Γούτσος 1999, 232).

Σύμφωνα με τον Levinson (1983, 340), η συστηματοποίηση των περιπτώσεων διόρθωσης στη συνομιλία (Schegloff, Jefferson and Sacks 1977, 364-378) έχει αναδείξει δύο σημαντικές διαστάσεις: η πρώτη αφορά το εάν η διόρθωση γίνεται μετά από διαμεσολάβηση ή πρωτοβουλία άλλου συνομιλητή ή όχι και η δεύτερη το εάν η διόρθωση γίνεται από τον ίδιο τον ομιλητή ή από κάποιον συνομιλητή του. Από το συνδυασμό των παραπάνω διαστάσεων προκύπτουν οι ακόλουθες τρεις περιπτώσεις (από την συχνότερα εμφανιζόμενη προς την σπανιότερη, σύμφωνα με τον Levinson (1983, 341):

- (α) η αυτοδιόρθωση με πρωτοβουλία του ίδιου του ομιλητή (self-initiated self-repair)
- (β) η αυτοδιόρθωση με πρωτοβουλία άλλου (other-initiated self-repair) και
- (γ) η ετεροδιόρθωση με πρωτοβουλία άλλου (other-initiated other-repair).

Οι ερευνητές που μελετούν την εναλλαγή κωδικών στο πλαίσιο της Ανάλυσης Συνομιλίας περιγράφουν τρόπους ανάλυσης της διόρθωσης (α) ανάλογα με τους τρόπους οργάνωσης της συνομιλίας και τις συνεισφορές των ομιλητών κατά την εναλλαγή της σειράς, (β) ανάλογα με το ρόλο της εναλλαγής κωδικών ως *πλαίσιο συγκεκριμενοποίησης* της διόρθωσης, και (γ) σε συνδυασμό των δύο παραπάνω προσεγγίσεων.

Για παράδειγμα, σύμφωνα με τον Auer (1984, 1995, 1998) η εναλλαγή κωδικών ως διόρθωση του κώδικα αναδεικνύει γενικά την *προσαρμογή του συνομιλητή* στη γλώσσα επικοινωνίας, ενώ για την Alfonzetti (1998) οι περιπτώσεις διόρθωσης του κώδικα αφορούν τη *αποκατάσταση ενός 'προβληματικού σημείου'* μέσω της παροχής διευκρινίσεων, της επαναδιατύπωσης κ.λπ. Αντίστοιχα, ο Li Wei και η Lesley Milroy (Li Wei 1994, 1998, 2002, Li Wei and Milroy 1995) υιοθετούν ένα πιο 'ανοιχτό' πλαίσιο στη μελέτη της εναλλαγής κωδικών σε σχέση με τη διόρθωση. Συγκεκριμένα, δίνουν έμφαση στον τρόπο με τον οποίο η εναλλαγή κωδικών επιτυγχάνει τη συγκεκριμενοποίηση (contextualization) της διόρθωσης: η εναλλαγή του κώδικα ενδέχεται αφενός να αναφέρεται στη διόρθωση αυτή καθαυτή (με την αντικατάσταση στην άλλη γλώσσα του γλωσσικού στοιχείου που πρέπει να διορθωθεί) και αφετέρου να διαμορφώνει το πλαίσιο που 'πυροδοτεί' τη διόρθωση σε άλλη σειρά. Παράλληλα, παίζει ρόλο και το ποιος είναι εκείνος που *κάνει τη διόρθωση* αλλά και το ποιος είναι εκείνος που την *προκαλεί*. Με βάση τη διασταύρωση των δύο αυτών οπτικών γωνιών κατά την ανάλυση της συνομιλίας, προκύπτουν τρία βασικά σχήματα που περιγράφουν το πώς η εναλλαγή κωδικών συγκεκριμενοποιεί την διόρθωση (Li Wei and Milroy 1995, 291-3):

Η εναλλαγή κωδικών μπορεί (α) να αφορά το *γλωσσικό στοιχείο που προκαλεί τη διόρθωση* (οπότε η διόρθωση υλοποιείται στην γλώσσα της συνομιλίας) ή (β) να αφορά το *ίδιο το προς διόρθωση γλωσσικό σημείο*, το οποίο και αντικαθίσταται με ένα άλλο σε άλλη γλώσσα. Και στα δύο σχήματα, υπάρχουν επιμέρους υπο-περιπτώσεις ανάλογα με το ποιος κάνει ή προκαλεί τη διόρθωση: Μπορεί λ.χ. ο ομιλητής να αναδιατυπώσει το εκφώνημά του ή να παράσχει κάποια διευκρίνιση ανταποκρινόμενος σε σχετικό αίτημα του συνομιλητή του (που έχει γίνει σε άλλη γλώσσα). Επίσης, μπορεί ο ίδιος ο ομιλητής να αντικαταστήσει το σημείο που χρειάζεται διόρθωση χωρίς την παρέμβαση άλλων (λ.χ. όταν, ενώ μιλά τη γλώσσα X, αντιλαμβάνεται ότι ένας όρος που χρησιμοποιεί δεν αποδίδει ακριβώς το νόημα που θέλει και στρέφεται στη γλώσσα Ψ για το συγκεκριμένο γλωσσικό σημείο). Ακόμη, ενδέχεται ο ομιλητής να χρησιμοποιήσει προσωρινά μια άλλη γλώσσα, προκειμένου να στρέψει την προσοχή του συνομιλητή του σε ένα προβληματικό σημείο (λ.χ. δεν ξέρει πώς να εκφράσει ένα νόημα στη γλώσσα της συνομιλίας), οπότε ο συνομιλητής παρέχει την κατάλληλη φράση στη γλώσσα X αποκαθιστώντας το πρόβλημα.

Υπάρχει κι ένα τρίτο σχήμα, σύμφωνα με το οποίο ο ομιλητής χρησιμοποιεί μία γλώσσα X και εντάσσει μέσα στο λόγο του μία τυποποιημένη φράση μιας άλλης γλώσσας (λ.χ. προκειμένου για τα αγγλικά, τις εκφράσεις "you know" right", "see"), με στόχο να προσελκύσει την προσοχή του συνομιλητή σε κάποιο σημείο του λόγου του.

Το παραπάνω πλαίσιο ανάλυσης φαίνεται ιδιαίτερα ελκυστικό, καθώς επιτρέπει να προσεγγίσουμε ερμηνευτικά το ρόλο της εναλλαγής κωδικών ως μηχανισμού συνομιλιακής διόρθωσης από περισσότερες από μία οπτικές γωνίες. Ωστόσο, το γεγονός ότι τα δεδομένα προέρχονται από συνομιλία μεταξύ ενηλίκων μάς αναγκάζει να έχουμε καταρχήν επιφυλάξεις ως

προς τη δυνατότητα εφαρμογής του ίδιου ακριβώς πλαισίου και στην περίπτωση νηπίων. Στην επόμενη ενότητα θα συζητήσουμε το ζήτημα της εναλλαγής κωδίκων σε σχέση με τη συνομιλιακή διόρθωση σε ομιλητές νεαρής ηλικίας και θα προτείνουμε ένα πλαίσιο ανάλυσης που προσφέρεται ιδιαίτερα για την περίπτωση μας.

2.2. Η αξιοποίηση της εναλλαγής κωδίκων από τα δίγλωσσα παιδιά: ο μηχανισμός της διόρθωσης

Η εναλλαγή κωδίκων αποτελεί ένα σημαντικό χαρακτηριστικό γνώρισμα της γλωσσικής συμπεριφοράς των δίγλωσσων παιδιών και από πραγματολογική άποψη. Πλήθος ερευνών έχει καταδείξει ότι οι μικροί ομιλητές, ακόμη και όταν έχουν σημαντική διαφορά γλωσσικής επάρκειας ανάμεσα στους δύο κώδικες, κάνουν χρήση των δύο γλωσσών και εναλλαγή κωδίκων με στόχους που εμπίπτουν στην οργάνωση της συνομιλίας: τον καθορισμό/αποκλεισμό των συνομιλητών, την αλλαγή του θέματος ή του 'σκηνικού' της περιστασης επικοινωνίας, την έκφραση συναισθημάτων, κ.α. (Bauer Bouchereau et al. 2002, Bolonyai 2005, Moffatt and Milroy 1992, Paugh 2005, Shin 2005, Thompson 2000).

Όσον αφορά το φαινόμενο της συνομιλιακής διόρθωσης, οι έρευνες δείχνουν ότι η δεξιότητα αυτή αναπτύσσεται σχετικά νωρίς στα μονόγλωσσα παιδιά (Κατή 2001, Pan and Snow 1999). Ακόμη και τα πολύ μικρά παιδιά είναι ικανά να ανταποκριθούν στα ποικίλα αιτήματα του συνομιλητή για διόρθωση, επεξήγηση ή επιβεβαίωση, και να προσαρμόσουν το λόγο τους ανάλογα.

Αντίστοιχα αποτελέσματα έχουν προκύψει από έρευνες σε δίγλωσσα παιδιά. Στις έρευνες του Peter Auer (1984) στη δίγλωσσική συμπεριφορά παιδιών Ιταλών μεταναστών στη Γερμανία παρατηρήθηκε αρκετά συχνά η διόρθωση μέσα από την εναλλαγή του κώδικα και την επανάληψη, ιδιαίτερα ανάμεσα στα μικρότερα παιδιά. Πιο πρόσφατες έρευνες σε δίγλωσσα παιδιά δείχνουν ότι η εναλλαγή του κώδικα ως μηχανισμός διόρθωσης μπορεί να ανταποκρίνεται στο αίτημα για επεξήγηση ή για επαναδιατύπωση (Comeau et al. 2007, Lanza 1992) ή ότι χρησιμεύει για να δώσει το σήμα για επικείμενη διόρθωση (Montanari 2005). Τέλος, και στην έρευνα της Reyes (2004) αναφέρονται περιπτώσεις όπου το παιδί προχωρεί σε αυτοδιόρθωση με την εναλλαγή του κώδικα και σε αποσαφήνιση μετά από πρωτοβουλία του συνομιλητή.

Από τα παραπάνω προκύπτει ότι και τα παιδιά προσχολικής και πρωτοσχολικής ηλικίας είναι σε θέση να αξιοποιήσουν ποικιλοτρόπως την εναλλαγή κωδίκων ως μηχανισμό συνομιλιακής διόρθωσης. Ιδιαίτερο ενδιαφέρον παρουσιάζει η έρευνα των Sarah Shin και Lesley Milroy, η οποία, σε αντίθεση με τις περισσότερες από τις παραπάνω έρευνες, κινείται στο πλαίσιο της Ανάλυσης Συνομιλίας (Shin and Milroy 2000).

Τα υποκείμενα της έρευνάς τους ήταν παιδιά εξήμιση έως επτάμισι ετών, δίγλωσσα στα κορεατικά και στα αγγλικά. Μολονότι σε κάποιο βαθμό οι ερευνήτριες υιοθετούν την προσέγγιση των Li Wei & Milroy (1995) σχετικά με την συγκεκριμενοποίηση της διόρθωσης, η ανάλυσή τους δεν ταυτίζεται απόλυτα με εκείνη. Άλλωστε, τα σχήματα εναλλαγής κωδίκων ως μηχανισμού διόρθωσης στα δικά τους δεδομένα είναι πιο περιορισμένα σε σχέση με αυτά που εμφανίζονται στα δεδομένα που αφορούν ενήλικες ομιλητές, πιθανότατα λόγω της διαφοράς ηλικίας και 'ωρίμανσης' των επικοινωνιακών δεξιοτήτων.

Για τις Shin and Milroy (2000), η εναλλαγή στοχεύει είτε στη διόρθωση και προσαρμογή του ομιλητή στον κώδικα της συνομιλίας είτε στην επίλυση προβληματικών σημείων στην επικοινωνία με την αποσαφήνιση του σημείου. Αναλυτικότερα: η εναλλαγή -και η συνεπαγόμενη διόρθωση από τον ίδιο τον ομιλητή με τη μορφή της επανάληψης- άλλοτε αφορά την αλλαγή του κώδικα με σκοπό την επιστροφή στη γλώσσα της συνομιλίας (ό.π., 364) και άλλοτε γίνεται όταν ο ομιλητής παίρνει την πρωτοβουλία της εναλλαγής για να προλάβει ενδεχόμενη αρνητική αντίδραση εκ μέρους του συνομιλητή του (ό.π., 378). Πρόκειται και στις δύο περιπτώσεις για *αυτοδιόρθωση με πρωτοβουλία του ίδιου του ομιλητή*. Υπάρχει δε και μία τρίτη περίπτωση (*αυτοδιόρθωση με πρωτοβουλία του συνομιλητή*), στην οποία τα παιδιά διορθώνουν τον κώδικα που τα ίδια χρησιμοποιούσαν σε προηγούμενη σειρά και αποκαθιστούν μέσω της εναλλαγής το προβληματικό σημείο ανταποκρινόμενα στο αίτημα του συνομιλητή τους για επιβεβαίωση, επαναδιατύπωση ή επεξήγηση (ό.π., 376-378).

Το συγκεκριμένο πλαίσιο θα αποτελέσει και το πλαίσιο ανάλυσης των δεδομένων μας, καθώς κρίνεται καταλληλότερο για το είδος της συνομιλίας που συναντούμε σε αυτά (συνομιλία μεταξύ νηπίων, σε συγκεκριμένες επικοινωνιακές περιστάσεις), όπως θα φανεί παρακάτω.

3. Η έρευνα

Η έρευνα αποτελούσε *μελέτη περίπτωσης* (case study) (Βάμβουκας 1998: 84,225), το ερευνητικό σκέλος της οποίας πραγματοποιήθηκε από τον Νοέμβριο του 2005 έως και τον Δεκέμβριο του 2006. Το δείγμα μας αποτέλεσαν οκτώ παιδιά με γονείς Αλβανούς μετανάστες, τα οποία φοιτούσαν σε νηπιαγωγείο κοινότητας του νότου του Ν. Ρεθύμνου. Οι οικογένειές τους κατοικούσαν και εργάζονταν στη γύρω περιοχή, όπως και ένας αρκετά μεγάλος αριθμός Αλβανών οικονομικών μεταναστών.

Το συγκεκριμένο νηπιαγωγείο επιλέχτηκε διότι: (α) φοιτούσαν σε αυτό αρκετοί μαθητές αλβανικής καταγωγής, πράγμα που το καθιστούσε κατάλληλο για την έρευνα, (β) σύμφωνα με την νηπιαγωγό, τα παιδιά χρησιμοποιούσαν αβίαστα την εθνοτική γλώσσα στη μεταξύ τους επικοινωνία (κάτι που δεν συμβαίνει πάντα), και (γ) η νηπιαγωγός ήταν πρόθυμη να συμβάλει στην διεξαγωγή της έρευνας.

Η συλλογή των δεδομένων της έρευνας πραγματοποιήθηκε με τον συνδυασμό τριών προσεγγίσεων. Βασική προσέγγιση ήταν η μαγνητοφώνηση¹ αυθεντικού λόγου των παιδιών του δείγματος ενόσω εμπλέκονταν σε ποικίλες δραστηριότητες. Το σύνολο των ωρών μαγνητοφωνημένου λόγου φτάνει τις 34 ώρες. Η μαγνητοφώνηση πραγματοποιήθηκε ταυτόχρονα με συμμετοχική παρατήρηση της ερευνήτριας στο χώρο του νηπιαγωγείου. Επιπλέον, η ερευνήτρια συνέλεξε πληροφορίες για τη γλωσσική ικανότητα παιδιών και γονέων, τις γλωσσικές πρακτικές της οικογένειας, καθώς και άλλα στοιχεία αναφορικά με την οικογένεια μέσα από ημιδομημένες συνεντεύξεις² με τους γονείς των παιδιών.

Τα υποκείμενα της έρευνας ήταν οκτώ παιδιά που φοιτούσαν στα δύο τμήματα του τοπικού νηπιαγωγείου (στο ένα τμήμα φοιτούσαν ένα κορίτσι και τρία αγόρια, ενώ στο δεύτερο ένα αγόρι και τρία κορίτσια). Η ηλικία τους κυμαινόταν από 4:3 έως 6:1 κατά την έναρξη της έρευνας. Επίσης, υπήρχαν σημαντικές διαφορές ανάμεσά τους αναφορικά με το πότε είχαν έρθει για πρώτη φορά σε επαφή με την ελληνική γλώσσα. Κανένα παιδί δεν είχε γεννηθεί στην Ελλάδα, αλλά ένα κορίτσι, η Ερμελίντα³, είχε έρθει στην Ελλάδα σε ηλικία ενός έτους, ενώ άλλα δύο παιδιά, ο Μάρκο και ο Μίρι, είχαν έρθει σε ηλικία δύο ετών. Τέσσερα από τα παιδιά είχαν έρθει στην Ελλάδα γύρω στα τέσσερα, ενώ υπήρχε και ένας μαθητής, ο Φερμόν, ο οποίος είχε μόλις έξι μήνες στην Κρήτη και ήταν και ο μεγαλύτερος σε ηλικία.

Πέρα από τη διαφοροποίηση ως προς το χρόνο έκθεσης στη δεύτερη γλώσσα και την ηλικία πρώτης επαφής με αυτήν, τα παιδιά διαφοροποιούνται κάπως και ως προς την ανάπτυξη των γλωσσικών δεξιοτήτων τους στις δύο γλώσσες. Οι γονείς τους κλήθηκαν να αξιολογήσουν τις γλωσσικές τους δεξιότητες ως προς τις δύο γλώσσες με κριτήριο την ικανότητά τους να πραγματοποιούν τρεις δραστηριότητες: *‘μιλάει’*, *‘καταλαβαίνει μια συζήτηση’*, *‘καταλαβαίνει εκπομπές στην τηλεόραση’*. Με εξαίρεση την Ερμελίντα, που σύμφωνα με τους γονείς της, έχει μια πολύ καλή γνώση και των δύο γλωσσών, στις υπόλοιπες περιπτώσεις, υπερισχύει η ικανότητα στην Αλβανική, ενώ οι παραπάνω δεξιότητες φαίνεται να είναι ‘λίγο’ έως ‘αρκετά καλά’ ανεπτυγμένες στην Ελληνική.

Αναφορικά με τη χρήση των δύο γλωσσών, φαίνεται ότι στο επικοινωνιακό ρεπερτόριο των παιδιών η Αλβανική διατηρεί μια σταθερά κυρίαρχη θέση με επιμέρους διαφοροποιήσεις ανάλογα με τον συνομιλητή: τα περισσότερα παιδιά φαίνεται να μιλούν μόνο αλβανικά με τους γονείς τους, ενώ χρησιμοποιούν σε μικρότερο ή μεγαλύτερο βαθμό και τα ελληνικά με τα αδέρφια τους και άλλους συνομηλίκους από την Αλβανία.

Από τη συνολική έρευνα προέκυψε ότι τα συγκεκριμένα παιδιά, ιδιαίτερα όσα φοιτούν στο πρώτο τμήμα του νηπιαγωγείου, κάνουν αρκετά συχνά εναλλαγή κωδικών στη μεταξύ τους επικοινωνία για λόγους που σχετίζονται και με την οργάνωση της συνομιλίας (Σιταρένιου 2011, Χατζηδάκη και Σιταρένιου, 2009). Στην παρούσα εργασία εστιάζουμε στο πώς αναδεικνύεται η χρήση της εναλλαγής κωδικών ως μηχανισμού διόρθωσης στα δεδομένα μας, ως ενδεικτική της γλωσσικής συμπεριφοράς νηπίων με παρόμοιο προφίλ διγλωσσίας.

¹ Χρησιμοποιήθηκαν ατομικά μικρόφωνα μικρού μεγέθους τα οποία κατέγραφαν σε ατομικές κασέτες ειδικού τύπου τις συνομιλίες των παιδιών.

² Ο οδηγός συνέντευξης βασίστηκε σε ερωτηματολόγιο που χρησιμοποιήθηκε σε προηγούμενη εργασία μας (Χατζηδάκη 2005, 2007α,β).

³ Σε όλη την έρευνα και τις σχετικές δημοσιεύσεις τα παιδιά αναφέρονται με ψευδώνυμα.

4. Η εναλλαγή κωδίκων ως μηχανισμός διόρθωσης στα δεδομένα μας

Μία πρώτη παρατήρηση σχετικά με τα σχήματα συγκειμενοποίησης της συνομιλιακής διόρθωσης στα δεδομένα μας είναι ότι εμφανίζονται μόνο περιπτώσεις *αυτοδιόρθωσης*: ο ίδιος ο ομιλητής προχωρά στη διόρθωση, είτε με δική του πρωτοβουλία είτε μετά από πρωτοβουλία άλλου. Το στοιχείο αυτό εμφανίζεται και σε άλλες έρευνες με παιδιά (Comeau et al. 2007, Lanza 1992, Montanari 2005), κάτι που μας κάνει να συμπεραίνουμε ότι ο συγκεκριμένος τρόπος εμπλοκής των συνομιλητών στο μηχανισμό της διόρθωσης απαιτεί είτε δεξιότητες που κατακτώνται σε μεγαλύτερη ηλικία είτε άλλες επικοινωνιακές συνθήκες (ή, πιθανόν, και τα δύο). Άλλωστε, η ετεροδιόρθωση αποτελεί ούτως ή άλλως τη σπανιότερα εμφανιζόμενη μορφή συνομιλιακής διόρθωσης, τόσο στη μονογλωσσική (Levinson 1983) όσο και στη διγλωσσική συνομιλία (Auer 1984, 1998).

Το σχήμα που αφορά τη διόρθωση στη συνομιλία μέσω της εναλλαγής κωδίκων *χωρίς τη διαμεσολάβηση του συνομιλητή* αποτελεί συχνή πρακτική στη γλωσσική συμπεριφορά των υποκειμένων μας. Αποτελεί, άλλωστε, μία συνηθισμένη πρακτική στη διγλωσσική συνομιλία (Alfonzetti 1998, Auer 1984, Li Wei 1994, Li Wei and Milroy 1995, Shin and Milroy 2000).

Το πρώτο παράδειγμα (*Απόσπασμα 1*) παρουσιάζει μία περίπτωση κατά την οποία ο ομιλητής προβαίνει σε αυτοδιόρθωση με δική του πρωτοβουλία. Τα δύο παιδιά που συμμετέχουν στο συγκεκριμένο συνομιλιακό επεισόδιο είναι η Ερμελίντα και ο Φερμόν, η πλέον 'ισορροπημένα' διγλωσση ομιλήτρια και ο λιγότερο καλός κάτοχος της Ελληνικής αντίστοιχα. Κάποια από τα υποκείμενα συζητούν για τα κασετόφωνάκια που τους έχει δώσει η ερευνήτρια, ενώ δίπλα τους είναι οι Έλληνες συμμαθητές τους.

Απόσπασμα 1

- 01 Ερμ: Ο Μάρκο μπλε και-
 02 Φερ: *Marko ka* (.) ο Μάρκο έχει ίδιο με μένα.
 ('Ο Μάρκο έχει')
 03 Ερμ: Άου! ((ο Φερμόν την τραβάει))
 04 Φερ: Ίδιο για τα κορίτσια. Δύο κορίτσια εδώ.

Στη σειρά 01 η Ερμελίντα αναφέρεται στο χρώμα του κασετόφωνου που φορά ένα άλλο παιδί, ο Μάρκο, μιλώντας ελληνικά. Ο Φερμόν τη διακόπτει (σειρά 02) παίρνοντας το λόγο για να αναφερθεί στο ίδιο παιδί, ξεκινώντας όμως το εκφώνημά του στα αλβανικά. Μόλις το συνειδητοποιεί, σπεύδει να 'διορθώσει' την επιλογή γλώσσας μετά από μία μικροπαύση, ξεκινώντας και πάλι τη φράση του, αυτή τη φορά στα ελληνικά. Στη συνέχεια (σειρές 03-04) τα παιδιά συνεχίζουν να συνομιλούν στην ελληνική γλώσσα.

Το επεισόδιο αυτό είναι χαρακτηριστικό της γλωσσικής συμπεριφοράς του Φερμόν, ο οποίος, όπως προαναφέρθηκε, είχε μόνον έξι μήνες παραμονής στην Ελλάδα κατά την έναρξη της έρευνας. Καθώς βρίσκεται στα πρώτα στάδια της εκμάθησης της Ελληνικής, τείνει συχνά να χρησιμοποιεί αλβανικά, ακόμη και όταν είναι παρόντες Έλληνες συνομιλητικοί του. Ωστόσο, συνήθως σπεύδει να αλλάξει τον κώδικα συντασσόμενος με τον άρρητο κανόνα που 'απαιτεί' την Ελληνική σε αυτές τις συνθήκες.⁴

Η δεύτερη περίπτωση που εμπίπτει στο σχήμα της αυτοδιόρθωσης με πρωτοβουλία του ίδιου του ομιλητή δεν αφορά την επαναφορά στη γλώσσα της συνομιλίας αλλά την ευθυγράμμιση της γλωσσικής επιλογής του ομιλητή με αυτής του συνομιλητή. Στο απόσπασμα που ακολουθεί (*Απόσπασμα 2*) τρία από τα υποκείμενα (ο Φερμόν, η Ερμελίντα και ο Μάρκο) παίζουν μαζί με δύο Έλληνες συμμαθητές τους, τη Μαίρη και το Δημήτρη. Τα παιδιά προσποιούνται ότι έχουν πάει επίσκεψη σε ένα φιλικό σπίτι. Η Μαίρη, παίζοντας το ρόλο της οικοδέσποινας, απευθύνεται σε όλους και τους ρωτάει τι φαγητό προτιμούν στο τραπέζι (σειρά 01). Ο Φερμόν αυθόρμητα απαντά στα αλβανικά (σειρά 02), γεγονός που προκαλεί μία παύση δύο δευτερολέπτων από τη Μαίρη (σειρά 03), ως αποτέλεσμα αδυναμίας κατανόησης, έκπληξης, κ.λπ. Ο Φερμόν μάλλον ερμηνεύει την παύση αυτή ως ένδειξη προβληματικού σημείου, ως ένα μήνυμα πως πρέπει να συμμορφωθεί με τη γλώσσα της συνομιλήτριάς του, προκειμένου να συνεχιστεί ο διάλογος. Το αποτέλεσμα είναι ότι αλλάζει γλωσσικό κώδικα στην επόμενη σειρά (04, '*Αβγό*'), αποκαθιστώντας το πρόβλημα που είχε

⁴ Για την ερμηνεία του παραπάνω επεισοδίου υιοθετούμε την ανάλυση των Auer (1984) και Shin and Milroy (2000), σύμφωνα με την οποία η εναλλαγή σηματοδοτεί την προσαρμογή στον κώδικα της επικοινωνίας. Αντίθετα, για τους Alfonzetti (1998) και Li Wei and Milroy (1995), η αλλαγή κώδικα στην ίδια σειρά, μετά από μικροπαύση, στοχεύει στην επαναδιατύπωση ή στη συμπλήρωση του περιεχομένου.

προκύψει. Η συνομιλία συνεχίζεται ομαλά (σειρές 05-07).

Απόσπασμα 2

- 01 Μαί: Μα, τι θα πάρετε;
02 Φερ: *Vejë*. ('Αβγό')
03 Μαί: (2.0)
04 Φερ: Αβγό.
05 Ερμ: Εγώ θα φάω [ένα ντομάτα.
06 Μαρ: [Εγώ θα φάω ένα καρότι.
07 Δημ: Εγώ θα φάω μπιφτέκια.

Στο συγκεκριμένο παράδειγμα, η παύση του συνομιλητή αποτελεί έναν «*next turn repair initiator*» (NTRI, Levinson 1983, 339), καθώς πυροδοτεί τη διόρθωση μέσω της εναλλαγής του γλωσσικού κώδικα. Παρόμοιες περιπτώσεις, στις οποίες η παύση στην επόμενη σειρά θέτει το πλαίσιο συγκειμενοποίησης της διόρθωσης και ο ομιλητής επαναλαμβάνει το προβληματικό εκφώνημα ή σημείο (trouble spot) στην επόμενη σειρά, εμφανίζονται και σε άλλες έρευνες (λ.χ. Auer 1998, 4-5, Shin and Milroy 2000, 378).

Ο Φερμόν, λοιπόν, αυτοδιορθώνεται ευθυγραμμιζόμενος με τη γλώσσα της συνομιλήτριάς του (που, στη συγκεκριμένη περίπτωση, τυχαίνει να είναι και η γλώσσα της συνομιλίας). Πρέπει, βέβαια, να επισημανθεί ότι σε τέτοιες περιπτώσεις συνομιλιακής διόρθωσης η εναλλαγή κώδικα έχει σχεδόν καθολικά μία μονόδρομη κατεύθυνση, αυτή από την πρώτη γλώσσα *προς τη δεύτερη, προς τη γλώσσα του περιβάλλοντος και της πλειονότητας* (Auer 1998,5). Επιβεβαιώνεται έτσι και με αυτόν τον τρόπο ότι τα δίγλωσσα παιδιά συνειδητοποιούν από μικρή ηλικία τις κοινωνιολinguιστικές και πραγματολογικές νόρμες της επικοινωνίας (Baker 2001).

Τέλος, στα δεδομένα μας εμφανίζεται και μία τρίτη περίπτωση αυτοδιόρθωσης, η οποία προκύπτει αυτή τη φορά *μετά από πρωτοβουλία κάποιου συνομιλητή*. Συγκεκριμένα, η εναλλαγή του κώδικα αυτή τη φορά προκύπτει ως ανταπόκριση του ομιλητή στο αίτημα του συνομιλητή για κάποιου είδους επιβεβαίωση ή και επεξήγηση (βλ. Li Wei and Milroy 1995, 287, Shin and Milroy 2000, 376-7).

Στο απόσπασμα που ακολουθεί συμμετέχουν ο Μάρκο και η ερευνήτρια, η οποία, ας σημειωθεί, γνωρίζει κάποια αλβανικά και προσπάθησε αρκετές φορές να συνομιλήσει με τα παιδιά στη γλώσσα αυτή. Κατά συνέπεια, τα παιδιά γνωρίζουν ότι καταλαβαίνει αλβανικά, σε κάποιο βαθμό τουλάχιστον.

Απόσπασμα 3

- 01 Μαρ: Iu! Τι έκανες!
02 Ερευν: Τι έκανε;
03 Μαρ: Έκανε (.) πολύ ωραίο το έκανε.
(η ερευνήτρια πλησιάζει και παρατηρεί το σχέδιο της πλαστελίνης)
04 Μαρ: Είναι μπέμπα. Δεν έχει τίποτα.
(2.0)
05 Μαρ: *Flut(u)ra*. ('Πεταλούδα')
06 Ερευν: *Flutura*; Αλήθεια τώρα;
07 Μαρ: Όχι (.) πεταλουδί(τσα).

Στην αρχή του αποσπάσματος, ο Μάρκο βλέπει ένα σχέδιο από πλαστελίνη που έφτιαξε ένας συμμαθητής του και εκφράζει το θαυμασμό του με ένα επιφώνημα. Η ερευνήτρια βρίσκει την ευκαιρία να εγκαινιάσει ένα διάλογο μαζί του στα ελληνικά (σειρά 02). Ο Μάρκο συναινεί (σειρά 03) και μάλιστα συμπληρώνει (σειρά 04) πως η πεταλούδα την οποία απεικονίζει το σχέδιο είναι πολύ μικρή ('μπέμπα') σχολιάζοντας το ασυνήθιστο σχήμα της κατασκευής.

Στο σημείο αυτό γίνεται μία παύση δύο δευτερολέπτων, η οποία αποδίδεται στον ίδιο τον ομιλητή. Για κάποιο λόγο ο Μάρκο στη συνέχεια (05) επιλέγει να αναφερθεί στο αντικείμενο χρησιμοποιώντας την αλβανική γλώσσα. Η συνομιλήτρια ανταποκρίνεται (σειρά 06) κάνοντας εναλλαγή κωδικών στην ίδια αλλαγή σειράς ('*Flutura*; Αλήθεια τώρα;'). Η συνομιλήτρια κάνοντας εναλλαγή κώδικα, τον καλεί να επιβεβαιώσει ή να ανασκεύασει το περιεχόμενο του προηγούμενου εκφώνηματος ("είσαι σίγουρος ότι πρόκειται για πεταλούδα;"), πράγμα στο οποίο ο Μάρκο ανταποκρίνεται απαντώντας στα ελληνικά (σειρά 07). Η εναλλαγή κώδικα εδώ λειτουργεί ως μηχανισμός που οδηγεί τον Μάρκο να προβεί σε διόρθωση του προβληματικού σημείου ("δεν είναι πεταλούδα, είναι πεταλουδίτσα"), εφόσον έχει στρέψει την προσοχή του ομιλητή σε ένα σημείο που χρειάζεται διευκρίνιση, επιβεβαίωση, κλπ. Πρόκειται, όπως προαναφέρθηκε, για τυπικό παράδειγμα

αυτοδιόρθωσης με πρωτοβουλία άλλου, που αποτελεί και τον τρίτο τρόπο ‘αξιοποίησης’ της εναλλαγής κωδίκων ως μηχανισμού διόρθωσης, που εντοπίστηκε σε έρευνα με παιδιά αντίστοιχης ηλικίας (Shin and Milroy 2000).

5. Επιλογικά

Στο παρόν άρθρο προσπαθήσαμε να δώσουμε μία εικόνα του πώς μαθητές προσχολικής ηλικίας, δίγλωσσοι στα αλβανικά και στα ελληνικά, χρησιμοποιούν την εναλλαγή κωδίκων ως μηχανισμό συγκεκριμενοποίησης της διόρθωσης κατά τη συνομιλία με μονόγλωσσους και δίγλωσσους συνομιλητές. Ως ερμηνευτικό πλαίσιο υιοθετήθηκε η Ανάλυση Συνομιλίας και ιδιαίτερα κάποιες προσεγγίσεις που αφορούν τη συνομιλία νεαρών δίγλωσσων ομιλητών (Auer 1984, 1998, Shin and Milroy 2000). Τα ευρήματά μας συμφωνούν με τη βιβλιογραφία, πρώτον, ως προς το ότι τα παιδιά προσχολικής ηλικίας είναι σε θέση να αξιοποιούν την εναλλαγή κωδίκων ως μηχανισμό διόρθωσης, είτε κάνοντας εναλλαγή για να αποκαταστήσουν κάποιο προβληματικό σημείο είτε ανταποκρινόμενα στο αίτημα του συνομιλητή για επιβεβαίωση, επαναδιατύπωση, κ.λπ. (Auer 1998, Comeau et al. 2007, Lanza 1992, Shin and Milroy 2000, κ.α.). Δεύτερον, στο δείγμα μας δεν εμφανίζονται περιπτώσεις ετεροδιόρθωσης, κάτι που επίσης παρατηρείται σε συναφείς έρευνες με παιδιά μικρής ηλικίας (λ.χ. Comeau et al. 2007, Lanza 1992, Montanari 2005). Σε κάθε περίπτωση, θεωρούμε ότι από την παρούσα έρευνα αναδεικνύεται για άλλη μια φορά το πώς η διγλωσσία των παιδιών, ακόμη και όταν είναι ανισοβαρώς ανεπτυγμένη, τους παρέχει τη δυνατότητα να αξιοποιούν το πλήρες γλωσσικό τους ρεπερτόριο, προκειμένου να επικοινωνήσουν με επιτυχία.

ABSTRACT

Adopting a qualitative perspective, the present study enriches a previous quantitative analysis of Greek Cypriot primary school students' writings. It was found that the school children of our sample seemed not to be quite familiar with writing conventions, not only because they did not frequently employ them, but primarily because, when they attempted to introduce them in their texts, these writing elements functioned in oral terms, resulting in the production of texts not appropriate for the school writing context. Moreover, the qualitative analysis refined our sociolinguistic hypotheses regarding the social differences governing the production of school written discourse.

Λέξεις κλειδιά: προφορικότητα, γραπτότητα, Κύπρος, γλώσσα του σχολείου, υποτακτική σύνδεση, συνδετικά, μετακειμενικοί δείκτες, κοινωνιογλωσσολογία

1. Εισαγωγή

Η ανάπτυξη των πεδίων της κοινωνιολογίας της εκπαίδευσης και της κοινωνιογλωσσολογίας από τα μέσα της δεκαετίας του 1960 και μετά οδήγησαν στην ανάδειξη της γλώσσας του σχολείου ως κεντρικού μηχανισμού αναπαραγωγής των κοινωνικών ανισοτήτων. Συγκεκριμένα, διαπιστώθηκε πως η εκπαίδευση προωθεί μια συγκεκριμένη γλωσσική ποικιλία η οποία έχει θεμελιώδεις δομικές διαφορές από τον γλωσσικό κώδικα στον οποίο εκτίθενται τα παιδιά στο σπίτι. Σύμφωνα με τον Bernstein (1990), τα παιδιά είναι εξοπλισμένα από το σπίτι τους με τον λεγόμενο «περιορισμένο» (restricted) κώδικα, ενώ το σχολείο απαιτεί τον «επεξεργασμένο» (elaborated) κώδικα. Στο ίδιο πνεύμα, ο Halliday (1999) υποστηρίζει πως τα παιδιά στο σχολείο υφίστανται αναμόρφωση της γλωσσικής τους εμπειρίας, καθώς μεταβαίνουν από «πλαισιωμένους» (contextualized) σε «αποπλαισιωμένους» (decontextualized) πόρους παραγωγής νοήματος. Από την άλλη πλευρά, στον χώρο της εκπαιδευτικής γλωσσολογίας η μετάβαση του παιδιού στο σχολείο προσεγγίζεται ως μια προσπάθεια κατάκτησης του γραπτού λόγου σε αντίθεση με τον προφορικό λόγο που ήδη διαθέτει το παιδί πριν εισέλθει στην εκπαίδευση (π.χ. Stubbs 1986).

Σε κάθε περίπτωση, παρά το γεγονός ότι η σχολική νόρμα συμβάλλει στη συγκρότηση μιας ενιαίας εκπαίδευσης και παρέχει ίσες ευκαιρίες για κοινωνική άνοδο (Κακριδή 2000), αποτελεί μια γλωσσική ποικιλία που έρχεται σε σύγκρουση με το κοινωνιογλωσσικό σύστημα αξιών πολλών μαθητών/τριών οι οποίοι/ές κοινωνικοποιούνται πρωτογενώς σε ανταγωνιστικές προς το σχολείο μορφές κοινωνικής σημασιοδότησης. Με άλλα λόγια, καθώς η (γραπτή) γλώσσα του σχολείου βασίζεται στην κοινωνιόλεκτο των μεσαίων και ανώτερων κοινωνικών στρωμάτων (Trudgill 1975), τα παιδιά των κατώτερων κοινωνικών στρωμάτων έχουν μειωμένες δυνατότητες πρόσβασης στον λόγο της σχολικής γνώσης. Αν και σύγχρονες τάσεις της γλωσσικής διδασκαλίας (π.χ. επικοινωνιακή και κειμενοκεντρική προσέγγιση) δίνουν σημαντική θέση στον προφορικό λόγο, το παραδοσιακό σχολείο —στο πλαίσιο του οποίου τοποθετείται και η παρούσα έρευνα— εξακολουθεί να προωθεί τη γραπτή σχολική γλώσσα. Υπό αυτό το πρίσμα, όπως εύστοχα παρατηρεί και ο Αρχάκης (2008), για να αρθούν οι κοινωνικές διαφορές στο σχολείο, ο γραπτός λόγος είναι αυτός που πρέπει κυρίως να καλλιεργηθεί.

Πράγματι, εμπειρικές έρευνες σε έλληνες/ίδες μαθητές/τριες, τόσο της πρωτοβάθμιας (Archakis & Papazachariou 2000, Κωστούλη 1998), όσο και της δευτεροβάθμιας εκπαίδευσης (Παΐζη & Καβουκόπουλος 2001, Παΐζη & Κονδύλη 2011) κατέδειξαν ότι οι κοινωνικές διαφορές των παιδιών (εργατική εν. μεσοαστική τάξη) στην πρόσβαση στη σχολική νόρμα αντανακλώνται στον γραπτό λόγο

που παράγουν, με τα παιδιά που προέρχονται από τα κατώτερα κοινωνικά στρώματα να έχουν μεγαλύτερη αδυναμία να ανταπεξέλθουν στις συμβάσεις της γραπτότητας και να δομούν σε μεγαλύτερο βαθμό τα κείμενά τους με όρους προφορικότητας (π.χ. επαναλήψεις, ασάφειες, διαδραστικότητα). Από την άλλη πλευρά, μια ανάλογη έρευνα που πραγματοποιήσαμε σε μαθητές/τριες των δύο τελευταίων τάξεων του δημοτικού στο σχολικό πλαίσιο της Κύπρου διαπίστωσε πως στα γραπτά των μαθητών/τριών κυριάρχησαν τα στοιχεία προφορικότητας, ενώ ανέδειξε και έμφυλες διαφορές στην παραγωγή του γραπτού σχολικού λόγου, με τις μαθήτριες να ανταποκρίνονται ικανοποιητικότερα από τους μαθητές στις γλωσσικές απαιτήσεις του σχολείου (Στάμου & Γρίβα 2011). Τέλος, η ερευνητική δραστηριότητα που συνέκρινε μαθητικά γραπτά διαφορετικών τάξεων (Παϊζη & Καβουκόπουλος 2001, Παϊζη & Κονδύλη 2011, Στάμου & Γρίβα 2011) κατέδειξε πως η έκθεση των μαθητών/τριών στη συστηματική διδασκαλία βελτιώνει την ανταπόκρισή τους στις κειμενικές συμβάσεις του σχολείου.

Επικεντρώνοντας σε ορισμένα χαρακτηριστικά προφορικότητας (Archakis & Papazachariou 2000) ή/και γραπτότητας (Παϊζη & Καβουκόπουλος 2001), οι έρευνες που έχουν διεξαχθεί για τον γραπτό λόγο των μαθητών/τριών είχαν κυρίως ποσοτικό προσανατολισμό, επιχειρώντας να καταγράψουν τη συχνότητα χρήσης αυτών των χαρακτηριστικών και της στατιστικής τους συσχέτισης με τα κοινωνικά ή άλλα (π.χ. τάξη) χαρακτηριστικά των συμμετεχόντων/ουσών του εκάστοτε δείγματος. Ωστόσο, εστιάζοντας σε ένα πρωτοτυπικό χαρακτηριστικό του γραπτού λόγου, τις δευτερεύουσες προτάσεις, η Κωστούλη (1998) δεν βρήκε ποσοτική διαφοροποίηση στη συχνότητα χρήσης τους μεταξύ μαθητών/τριών δημοτικού της μεσοαστικής και της εργατικής τάξης, αλλά ανέδειξε ποιοτικές διαφοροποιήσεις μεταξύ των μαθητών/τριών διαφορετικής κοινωνικής προέλευσης ως προς τα είδη δευτερευουσών προτάσεων και τον τρόπο με τον οποίο τις χρησιμοποιούν στις γραπτές τους αφηγήσεις. Με παρόμοιο τρόπο, οι Παϊζη & Κονδύλη (2011) επικεντρώθηκαν στον μηχανισμό της ονοματοποίησης ως βασικού μέσου διατύπωσης του αποπλαισιωμένου γραπτού λόγου και διαπίστωσαν πως οι μαθητές/τριες λυκείου που προέρχονται από οικογένειες χαμηλών κοινωνικών στρωμάτων δεν υπολείπονται μόνο ποσοτικά στη χρήση της ονοματοποίησης αλλά και ποιοτικά, καθώς αδυνατούν να τη χειριστούν, αναπαράγοντας μηχανιστικά στερεοτυπικές διατυπώσεις και επανερχόμενοι/ες στη συνέχεια στην προφορική χρήση της γλώσσας.

Υιοθετώντας επίσης μια ποιοτική προοπτική, στην παρούσα εργασία εστιάζουμε στις συμβάσεις γραπτότητας που έχουν καταγραφεί στα γραπτά των κύπριων μαθητών/τριών μετά από μια προκαταρκτική ποσοτικού τύπου επεξεργασία των δεδομένων μας (Στάμου & Γρίβα 2011), με σκοπό να διερευνήσουμε πώς αυτά τα στοιχεία γραπτότητας λειτουργούν σε κειμενικό επίπεδο. Επίσης, θεωρώντας τους γλωσσικούς πόρους ως λειτουργικά μη ομοιογενείς κατηγορίες, θέλουμε να εξετάσουμε αν οι συγκεκριμένες γλωσσικές συμβάσεις εξυπηρετούν τη γραπτότητα ή λειτουργούν με όρους προφορικότητας, καθώς στα κείμενα των μαθητών/τριών κυριάρχησαν τα στοιχεία προφορικότητας. Επιμέρους στόχοι της εργασίας είναι να διαπιστώσουμε αν η ποσοτική διαφοροποίηση στα χαρακτηριστικά γραπτότητας βάσει του φύλου και της τάξης των μαθητών/τριών που καταγράψαμε στην ποσοτική μας ανάλυση εκφράζεται και ποιοτικά, καθώς και αν η μη ποσοτική διαφοροποίηση σε σχέση με το μορφωτικό επίπεδο και το επάγγελμα των γονέων εκφράζεται ωστόσο σε ποιοτικό επίπεδο.

2. Ερευνητική διαδικασία και μεθοδολογία

2.1 Το κοινωνιογλωσσικό περιβάλλον της Κύπρου

Η κυπριακή γλωσσική κοινότητα συγκεντρώνει όλα τα τυπικά γνωρίσματα της «κοινωνικής διγλωσσίας» (diglossia) κατά Ferguson ή του «διδιαλεκτισμού» (bidialectism) (βλ. π.χ. Arvaniti 2006).¹ Συγκεκριμένα, υπάρχει λειτουργική διαφοροποίηση μεταξύ της υψηλής (δηλ. της νεοελληνικής κοινής) και χαμηλής ποικιλίας (δηλ. της κυπριακής διαλέκτου) ανάλογα με το πεδίο χρήσης (δημόσιο ή ιδιωτικό, επίσημο ή καθημερινό κ.λπ.), η χαμηλή ποικιλία κατακτάται με φυσικό τρόπο ενώ η υψηλή ποικιλία αποτελεί προϊόν συστηματικής διδασκαλίας, και τέλος η υψηλή ποικιλία απολαμβάνει εμφανές γόητρο σε αντίθεση με τη χαμηλή ποικιλία που είναι συνδεδεμένη με αφανές κύρος (π.χ. Papapanlou 1998).²

¹ Η Arvaniti (2002) επισημαίνει πως ορισμένοι γλωσσολόγοι προτιμούν τον όρο “bidialectism” (διδιαλεκτισμός) έναντι του όρου “diglossia” (κοινωνική διγλωσσία), λόγω των αρνητικών συνδηλώσεων που φέρει γενικά.

² Ωστόσο, η αντιμετώπιση της κοινωνικής διγλωσσίας στην Κύπρο ως απόλυτης διχοτομίας μεταξύ νεοελληνικής κοινής (υψηλή ποικιλία) και κυπριακής διαλέκτου (χαμηλή ποικιλία) αποτελεί υπεραπλούστευση (βλ. σχετικά Arvaniti 2002). Αφενός, η κυπριακή διάλεκτος που λειτουργεί ως χαμηλή ποικιλία δεν είναι ομοιογενής αλλά

Στο κυπριακό σχολείο ασκείται πίεση στα παιδιά για τη χρήση της υψηλής ποικιλίας, ενώ η χρήση της χαμηλής ποικιλίας αποθαρρύνεται και στιγματίζεται.³ Ωστόσο, με δεδομένο πως η νέα ελληνική δεν κατακτάται με φυσικό τρόπο στην Κύπρο, οι μαθητές/τριες συχνά παραβιάζουν τους κοινωνιογλωσσικούς κανόνες του σχολείου, με αποτέλεσμα να δημιουργούνται εντάσεις στην τάξη (Ioannidou 2009). Από την άλλη πλευρά, οι εκπαιδευτικοί δηλώνουν πως οι μαθητές/τριες του δημοτικού αντιμετωπίζουν πολλά προβλήματα στην παραγωγή γραπτού λόγου στην υψηλή ποικιλία (Pavlou & Christodoulou 2001). Τέλος, έρευνες στα ίδια τα γραπτά κύπριων μαθητών/τριών έχουν διαπιστώσει παρεμβολές της κυπριακής διαλέκτου στα κείμενα που αυτοί/ές παράγουν (Papapanlou & Yiakoumetti 2003).

Με εξαίρεση την προηγούμενη ποσοτική μας ανάλυση (Στάμου & Γρίβα 2011), η ως τώρα ερευνητική δραστηριότητα έχει μελετήσει τον γραπτό λόγο των κύπριων μαθητών/τριών αποκλειστικά αναφορικά με τις παρεμβολές από την κυπριακή διάλεκτο που αυτός περιλαμβάνει, και όχι σε σχέση με τον βαθμό ανταπόκρισής τους στις συμβάσεις της γραπτότητας και την έκταση των στοιχείων προφορικότητας που αυτά περιλαμβάνουν. Αφενός, η προφορικότητα δεν μπορεί να ταυτιστεί κατ' ανάγκη με την κυπριακή διάλεκτο/ χαμηλή ποικιλία και η γραπτότητα με τη νεοελληνική κοινή/ υψηλή ποικιλία. Αφετέρου, σχετικές εργασίες σε διαλεκτόφωνους/ες μαθητές/τριες διεθνώς (κάτι που επιβεβαιώνεται και από την προηγούμενη ποσοτική μας έρευνα) έχουν δείξει πως τα μεγαλύτερα προβλήματα που αντιμετωπίζουν στον γραπτό λόγο τους είναι η αδυναμία τους να ανταπεξέλθουν στις συμβάσεις της γραπτότητας (π.χ. χρήση δευτερευουσών προτάσεων), παρά οι διαλεκτικές παρεμβολές (π.χ. Williamson & Hardman 1997).

2.2 Συμμετέχοντες

Το δείγμα της παρούσας έρευνας αποτελείται από 321 μαθητές/τριες (154 αγόρια και 167 κορίτσια) 8 δημοτικών σχολείων από αστικές περιοχές της Λεμεσού, στα οποία είχαμε πρόσβαση. Από το σύνολο των συμμετεχόντων/ουσών, 131 μαθητές/τριες φοιτούσαν στην Ε' τάξη και 190 φοιτούσαν στη Στ' τάξη. Όσον αφορά το μορφωτικό επίπεδο των γονέων, το 8,3% των πατεράδων των μαθητών/τριών ήταν απόφοιτοι δημοτικού, το 62,0% γυμνασίου/ λυκείου και το 29,7% ήταν πανεπιστημιακής εκπαίδευσης. Μικρές διαφοροποιήσεις καταγράφηκαν σχετικά με το μορφωτικό προφίλ των μητέρων, καθώς μόλις το 3,9% είχαν απολυτήριο δημοτικό, το 61,2% ήταν απόφοιτες γυμνασίου/ λυκείου και το 34,9% είχαν πτυχίο πανεπιστημίου.

Με βάση τις απαντήσεις των μαθητών/τριών, τα επαγγέλματα των δύο γονέων ομαδοποιήθηκαν από τις ερευνήτριες σε δύο βασικές κατηγορίες: επαγγέλματα «χαμηλής» και «υψηλής αυτονομίας». Τα πρώτα αφορούν επαγγέλματα τα οποία προϋποθέτουν μεγάλη εξάρτηση από την υλική βάση της εργασίας και δεν δίνουν τη δυνατότητα λήψης αποφάσεων καθώς και άσκησης ελέγχου σε άλλους εργαζομένους (π.χ. υπάλληλοι γραφείων ή επιχειρήσεων, τεχνίτες). Αντίθετα, τα επαγγέλματα υψηλής αυτονομίας δεν προϋποθέτουν εξάρτηση από την υλική βάση της εργασίας και προσφέρουν ελευθερία επιλογών στον χώρο της εργασίας και άσκησης ελέγχου σε άλλους εργαζόμενους (π.χ. εκπαιδευτικοί, επιχειρηματίες μικρής ή μεγάλης επιχείρησης, γιατροί-δικηγόροι-μηχανικοί) (Morgeson et al. 2005). Σύμφωνα με την ερευνητική εργασία της Hasan (1989) σε διαλόγους μεταξύ μαμάδων και νηπίων, η δυνατότητα ή όχι επιλογής και καθορισμού του εργασιακού χώρου επηρεάζει τον λόγο που αναπτύσσουν οι γονείς προς τα παιδιά τους, καθώς βρέθηκε πως όσες μαμάδες ασκούσαν επαγγέλματα υψηλής αυτονομίας, στα οποία η γλωσσική διαμεσολάβηση παίζει σημαντικό ρόλο, έτειναν να απευθύνουν έναν πιο αποπλαισιωμένο λόγο προς τα παιδιά τους. Οι γονείς των μαθητών/τριών του δείγματος εξασκούσαν σε υψηλότερο ποσοστό επαγγέλματα χαμηλής αυτονομίας (61,6% των πατεράδων και 78,3% των μητέρων) παρά επαγγέλματα υψηλής αυτονομίας (38,4% των πατεράδων και 21,7% των μητέρων).

2.3 Συλλογή και ανάλυση δεδομένων

Για τους σκοπούς της έρευνας, ζητήθηκε από τους/τις μαθητές/τριες να συνθέσουν ένα σύντομο κείμενο 60-120 λέξεων με θέμα:

αποτελεί ένα διαλεκτικό συνεχές που συγκροτείται από πολλές επιμέρους βασιλέκτους. Αφετέρου, η νέα ελληνική που λειτουργεί ως υψηλή ποικιλία στην Κύπρο δεν ταυτίζεται με την αντίστοιχη πρότυπη ποικιλία που χρησιμοποιείται στην Ελλάδα. Έτσι, γίνεται λόγος για την «πρότυπη κυπριακή» (βλ. σχετικά Arvaniti 2006).

³ Στα νέα υπό συγγραφή αναλυτικά προγράμματα του δημοτικού η κυπριακή διάλεκτος αποτελεί πλέον αντικείμενο διδασκαλίας.

«Γράψε ένα μικρό άρθρο στην εφημερίδα του σχολείου στη στήλη του επαγγελματικού προσανατολισμού για το ποιο επάγγελμα θα επέλεγες μελλοντικά και γιατί».

Η ανάλυση του μαθητικού γραπτού λόγου βασίζεται στη νεότερη αντίληψη που φέρνει το πεδίο των «Σπουδών Νέου Γραμματισμού» (New Literacy Studies: π.χ. Gee 1991), σύμφωνα με την οποία ο γραπτός λόγος δεν σχηματίζει δίπολο με τον προφορικό εξωσχολικό λόγο αλλά ένα συνεχές *γραπτότητας-προφορικότητας* στο οποίο τοποθετούνται τα αυθεντικά κείμενα. Με άλλα λόγια, νεότερες εξελίξεις στη γλωσσολογία έχουν δείξει πως η σαφής διάκριση μεταξύ προφορικού και γραπτού λόγου δεν είναι εύκολο να γίνει σε πραγματικά κείμενα, καθώς αυτά είναι συνήθως υβριδικά. Επομένως, κάποια κείμενα είναι «πιο προφορικά» από κάποια άλλα που είναι «πιο γραπτά» (Πολίτης 2001). Τα πρωτοτυπικά γνωρίσματα της γραπτότητας είναι πως είναι ένας λόγος σχεδιασμένος, αποπλαισιωμένος, απρόσωπος, τυπικός, ενώ η προφορικότητα αφορά μια απροσχεδιάστη, πλαισιωμένη, διαδραστική και μη τυπική μορφή επικοινωνίας (βλ. π.χ. Tannen 1982).

Για τους σκοπούς της ποσοτικής ανάλυσης των γραπτών των κύριων μαθητών/τριών, προσδιορίσαμε ορισμένους «δείκτες προφορικότητας» και «γραπτότητας», με βάση τη σχετική βιβλιογραφία (π.χ. Eggins 1994) καθώς και την ερευνητική δραστηριότητα σε γραπτά ελλήνων μαθητών/τριών (π.χ. Archakis & Papazachariou 2000, Κωστούλη 1998, Παΐζη & Καβουκόπουλος 2001). Από την ανάλυση προέκυψε πως οι κύριοι/ες μαθητές/τριες δομούν σε μεγάλο βαθμό τα κείμενά τους με όρους προφορικότητας, χρησιμοποιώντας κυρίως την παρατακτική σύνδεση και περιλαμβάνοντας στα γραπτά τους πολλές ασάφειες, επαναλήψεις λέξεων και διαδραστικά στοιχεία. Όσον αφορά τα στοιχεία γραπτότητας που κυριάρχησαν στα γραπτά τους αυτά ήταν η υποτακτική σύνδεση και οι επίσημοι γλωσσικοί τύποι, ενώ χρησιμοποίησαν σε μικρότερο βαθμό συνδετικά και μετακειμενικούς δείκτες. Επίσης, καταγράφηκαν ενδιαφέρουσες διασυνδέσεις μεταξύ των ανεξάρτητων μεταβλητών του φύλου και της τάξης και των δεικτών γραπτότητας, με τα κορίτσια και τους/τις μαθητές/τριες της Στ' τάξης να αντλούν από περισσότερες συμβάσεις γραπτότητας από τα αγόρια και τους/τις μαθητές/τριες της Ε' τάξης. Αντίθετα, δεν βρέθηκαν στατιστικά σημαντικές διαφορές με βάση το μορφωτικό επίπεδο και το επάγγελμα γονέων των μαθητών/τριών, πιθανόν γιατί οι μαθητές/τριες του δείγμάτος μας είχαν σχετικά ομοιογενές κοινωνικό προφίλ (για περισσότερα στοιχεία, βλ. Στάμου & Γρίβα 2011).

Έχοντας ως οδηγό την προηγούμενη ποσοτική μας ανάλυση, στην παρούσα εργασία επικεντρωνόμαστε στις συμβάσεις γραπτότητας (δηλ. επίσημοι γλωσσικοί τύποι, υποτακτική σύνδεση, συνδετικά, μετακειμενικοί δείκτες) που καταγράφηκαν στα γραπτά των κύριων μαθητών/τριών, με σκοπό να διερευνήσουμε τον τρόπο λειτουργίας τους σε κειμενικό επίπεδο. Η διερεύνηση αυτή θα γίνει με τη βοήθεια των κριτηρίων κειμενικότητας των de Beaugrande & Dressler (1981). Οι ερευνητές αυτοί προσπάθησαν να προσδιορίσουν τα κριτήρια εκείνα που κάνουν ένα σύνολο προτάσεων να αποτελεί «κείμενο», δηλαδή ένα αυτοτελές επικοινωνιακό συμβάν και όχι μια απλή ακολουθία προτάσεων. Από τα επτά κριτήρια κειμενικότητας των de Beaugrande & Dressler, στην παρούσα εργασία θα αξιοποιήσουμε τη «συνοχή», τη «συνεκτικότητα», την «πληροφοριακότητα» και την «καταστασιακότητα». Η συνοχή αναφέρεται στους επιφανειακούς και ρητούς γλωσσικούς μηχανισμούς μέσω των οποίων τα στοιχεία του κειμένου συνδέονται μεταξύ τους και δημιουργούν μια ενότητα (*κείμενο ως ολότητα γλώσσας*). Η συνεκτικότητα αφορά την υποκείμενη εννοιολογική σύνδεση του κειμένου, η οποία δεν ταυτίζεται απαραίτητα με τη γραμματική (συνοχική) σύνδεση (*κείμενο ως ολότητα νοήματος*). Η πληροφοριακότητα αναφέρεται στην ιδιότητα του κειμένου να μεταδίδει νέες πληροφορίες αξιοποιώντας και ανασύροντας γνωστές και δεδομένες γνώσεις (*κείμενο ως ολότητα πληροφορίας*). Όσο πιο αναμενόμενες και γνωστές είναι οι πληροφορίες που μεταδίδονται, τόσο πιο χαμηλή είναι η πληροφοριακότητα (και άρα και η κειμενικότητα) ενός κειμένου. Τέλος, η καταστασιακότητα αφορά τον προσδιορισμό της επικοινωνιακής περιστασης/ καταστασιακού πλαισίου (π.χ. θέμα, σχέση συνομιλητών/τριών, κανάλι επικοινωνίας) στα οποία παράγεται και προσλαμβάνεται το κείμενο (*κείμενο ως ολότητα καταστάσεων*).

Επίσης, θεωρώντας τους γλωσσικούς πόρους ως λειτουργικά μη ομοιογενείς κατηγορίες, θα εξετάσουμε αν οι συγκεκριμένες γλωσσικές συμβάσεις στις οποίες εστιάζουμε εξυπηρετούν τη γραπτότητα στα δεδομένα μας ή λειτουργούν με όρους προφορικότητας, καθώς στα κείμενα των μαθητών/τριών κυριάρχησαν τα στοιχεία προφορικότητας. Οι έννοιες της «γραπτότητας» και της «προφορικότητας» ορίστηκαν με βάση τα πρωτοτυπικά τους γνωρίσματα που αναφέρθηκαν παραπάνω.

3. Ποιοτική ανάλυση των μαθητικών γραπτών

3.1 Επίσημοι γλωσσικοί τύποι

Στα περισσότερα μαθητικά γραπτά παρατηρήθηκε πως οι μαθητές/τριες χρησιμοποιούσαν μεμονωμένους επίσημους γλωσσικούς τύπους που παρεμβάλλονταν στα γραπτά τους. Αυτό είχε ως αποτέλεσμα την παρείσφρηση στοιχείων γραπτότητας σε ένα κατεξοχήν προφορικό κειμενικό περιβάλλον, καθώς και τη μίξη επίσημου και ανεπίσημου ύφους.⁴ Π.χ. στο (1) παρατηρούμε πως η χρήση του λόγιου αιτιολογικού συνδέσμου «διότι» έρχεται σε αντίθεση με όλα τα υπόλοιπα στοιχεία προφορικότητας της περιόδου, όπως την ασάφεια («να ασχολούμαι με το ρεύμα»), την επανάληψη («μου αρέσει...μου αρέσει») και τις καθημερινές λέξεις («δωρεάν»)⁵. Με παρόμοιο τρόπο στο (2) η ρηματική φράση «μειώνω το έγκλημα» λειτουργεί ως παρεμβολή στο υπόλοιπο περιβάλλον προφορικότητας του αποσπάσματος, όπως είναι ο τύπος που έχει υποστεί έκθλιψη «μ'αρέσει», οι επαναλήψεις («θέλω να γίνω...θέλω να γίνω», «αστυνομικός...αστυνομικός...αστυνομικός») και η έλλειψη σύνδεσης μεταξύ των δύο περιόδων. Αντίθετα, ελάχιστες ήταν οι περιπτώσεις όπου οι μαθητές (αλλά κυρίως οι μαθήτριες με γονείς με υψηλό μορφωτικό επίπεδο και που ασκούσαν επαγγέλματα υψηλής αυτονομίας) εισήγαγαν περισσότερα επίσημα γλωσσικά στοιχεία στα γραπτά τους, με αποτέλεσμα να μην απομονώνονται τα στοιχεία γραπτότητας από το ύφος του υπόλοιπου κειμένου. Π.χ. στο (3) έχουμε ένα σύνολο επίσημων γλωσσικών τύπων όπως το «διότι», «θεωρώ» και «ενδιαφέρον επάγγελμα». Δεν παρατηρήθηκαν ποιοτικές διαφοροποιήσεις βάσει της τάξης των μαθητών/τριών. Από πλευράς κειμενικότητας, διαπιστώνεται πως ο τρόπος χρήσης των επίσημων γλωσσικών τύπων στον γραπτό μαθητικό λόγο θέτει ένα ζήτημα επίτευξης της καταστασιακότητας των κειμένων, καθώς η παρεμβολή των επίσημων γλωσσικών τύπων σε ένα περιβάλλον προφορικότητας δεν εξυπηρετεί μια τυπική περίσταση επικοινωνίας, με την οποία συνδέεται η γραπτότητα, αλλά ένα ανεπίσημο καταστασιακό συμφραζόμενο, το οποίο χαρακτηρίζει την προφορικότητα:

- (1) *«Όταν μεγαλώσω θέλω να γίνω ηλεκτρολόγος διότι μου αρέσει να ασχολούμαι με το ρεύμα και μου αρέσει να βοηθώ τους άλλους δωρεάν»*
 (2) *«Θέλω να γίνω αστυνομικός γιατί μ'αρέσει να πηγαίνω σε επικίνδυνες αποστολές, να μειώνω το έγκλημα. Αστυνομικός θέλω να γίνω γιατί πάντα θαύμαζα την θεία μου που είναι αστυνομικός»*
 (3) *«Θα ήθελα να γίνω δασκάλα ζωγραφικής διότι το θεωρώ ενδιαφέρον επάγγελμα και γιατί μου αρέσει να ζωγραφίζω»*

3.2 Υποτακτική σύνδεση

Το πιο συχνό είδος δευτερευουσών προτάσεων που εντοπίστηκε στα μαθητικά γραπτά ήταν οι αιτιολογικές (59%), μέσω των οποίων οι μαθητές/τριες προσπαθούσαν να παρουσιάσουν τους λόγους επιλογής του μελλοντικού τους επαγγέλματος (βλ. παραδείγματα 4, 5, 6, 7). Αρκετά συχνές ήταν και οι χρονικές προτάσεις (28%), τις οποίες οι μαθητές/τριες χρησιμοποιούσαν για να δηλώσουν τι θα γίνουν «όταν μεγαλώσουν» (π.χ. *«Όταν μεγαλώσω θα ήθελα να σπουδάσω δασονόμος. Μου αρέσει αυτή η δουλειά γιατί βοηθάς τα ζώα, τα δέντρα, τα πουλιά και τη φυσική βλάστηση. Θα έπαιρνα πολλές εμπειρίες από αυτή τη δουλειά»*). Αντίθετα, λιγότερες ήταν οι τελικές προτάσεις (10%), μέσω των οποίων οι μαθητές/τριες στήριζαν περαιτέρω την επιχειρηματολογία τους αναφέροντας τους σκοπούς που έθεταν με την επιλογή του μελλοντικού τους επαγγέλματος (π.χ. *«Που θα μεγαλώσω θα ήθελα το επάγγελμα μου να είναι αστυνομικός για να σώζω τους ανθρώπους και να μη πεθαίνουν»*), και ελάχιστες οι αναφορικές προτάσεις (3%: π.χ. *«Το επάγγελμα που θέλω να κάνω είναι δασκάλα αγγλικών. Επέλεξα δασκάλα αγγλικών γιατί μου αρέσουν πολύ τα Αγγλικά»*).

Εξετάζοντας από μια ποιοτική προοπτική τις αιτιολογικές προτάσεις που επικράτησαν στα δεδομένα μας, παρατηρήθηκε πως η λειτουργία τους ήταν συνήθως προφορική, καθώς η χρήση τους έτεινε να είναι πλεοναστική (π.χ. στο παράδειγμα 4 η δεύτερη αιτιολογική πρόταση στην πρώτη περίοδο: *«γιατί πιστεύω ότι αυτό το επάγγελμα που μου ταιριάζει καλύτερα από όλα»*) ή λανθασμένη (π.χ. στο παράδειγμα 5 η πρώτη αιτιολογική πρόταση: *«γιατί μου αρέσει πάρα πολύ»* και στο

⁴ Στο σημείο αυτό πρέπει να διακρίνουμε μεταξύ της συστηματικής μίξης επίσημων και καθημερινών γλωσσικών στοιχείων ως χιουμοριστικής στρατηγικής που χρησιμοποιούν πολλοί έλληνες συγγραφείς, όπως ο Τριβιζάς (Stamou in pre-printed version) και η Ακρίτα (Canakis 1994), και της μεμονωμένης υφολογικής μίξης, όπως στην περίπτωση μας, η οποία δεν αποτελεί συνειδητή ρητορική επιλογή αλλά έλλειψη εξοικείωσης με τις συμβάσεις της γραπτότητας.

⁵ Διατηρείται η ορθογραφία και τα σημεία στίξης των μαθητών/τριών.

παράδειγμα 6 η δεύτερη αιτιολογική πρόταση της δεύτερης περιόδου: «επειδή η μια δουλειά είναι κυβερνητική και η άλλη είναι ιδιωτική»), με αποτέλεσμα να θυμίζει τον απροσχεδιαστο χαρακτήρα της προφορικότητας. Επίσης, συχνά η αιτιολόγηση περιείχε ασάφειες (π.χ. στο παράδειγμα 5 η αιτιολογική πρόταση: «γιατί στην οικογένεια μου είχα κάποια προβλήματα»), γεγονός που συνάδει με τον πλαισιωμένο προφορικό λόγο. Από πλευράς κειμενικότητας, ο τρόπος χρήσης των αιτιολογικών προτάσεων στα μαθητικά γραπτά δεν εξυπηρετεί τη συνεκτικότητα (συγκρότηση εννοιολογικά ασύνδετων κειμένων) καθώς επίσης και την πληροφωριακότητα των κειμένων (συγκρότηση κειμένων με χαμηλή πληροφωριακότητα λόγω συγκέντρωσης επαναλαμβανόμενης και ασαφούς αιτιολόγησης). Δεν παρατηρήθηκαν ποιοτικές διαφοροποιήσεις βάσει της τάξης των μαθητών/τριών. Αντίθετα, οι μαθήτριες προερχόμενες από οικογένειες επαγγελματιών υψηλής αυτονομίας και πανεπιστημιακής εκπαίδευσης έτειναν να χρησιμοποιούν τις αιτιολογικές προτάσεις με καταλληλότερο τρόπο για το σχολικό γραπτό συγκείμενο (π.χ. βλ. παράδειγμα 7):

(4) «Διάλεξα το επάγγελμα αυτό γιατί πιστεύω ότι μου πάει αυτό το επάγγελμα, γιατί πιστεύω ότι αυτό το επάγγελμα που μου ταιριάζει καλύτερα από όλα. Μου αρέσει να γίνω γιατρός γιατί ο γιατρός σώζει ζωές»
(5) «Όταν μεγαλώσω θέλω να γίνω δικηγόρος γιατί μου αρέσει πάρα πολύ γιατί στην οικογένεια μου είχα κάποια προβλήματα»

(6) «Θέλω να σπουδάσω Ζητάς επειδή μου αρέσει να οδηγώ μοτόρα για να πιάνω τους ανθρώπους. Και θέλω να γίνω ποδοσφαιριστής επειδή μου αρέσει το ποδόσφαιρο. Μου αρέσει επειδή θέλω να με αποθεώνουνε τα άλλα άτομα, επειδή η μια δουλειά είναι κυβερνητική και η άλλη είναι ιδιωτική»

(7) «Το επάγγελμα που θα επιλέξω θα είναι αρχιτέκτονας επειδή είμαι καλή στην τέχνη και στα μαθηματικά. Δεν θα αλλάξω την γνώμη μου γιατί θέλω και εγώ να φτιάχνω ωραία σπίτια, ξενοδοχεία, πολυκατοικίες και να μου λένε μπράβο και συγχαρητήρια»

3.3 Συνδεδετικά

Η «συνδεδετικότητα» (Γεωργακοπούλου & Γούτσος 1999) ή «σύζευξη» (Αρχάκης 2005) (conjunction) αποτελεί έναν από τους τέσσερις βασικούς τύπους συνοχικών δεσμών (βλ. και Halliday & Hasan 1976), στην οποία χρησιμοποιούνται σύνδεσμοι και συνδεδετικές εκφράσεις για τη δήλωση λογικο-σημασιολογικών σχέσεων (π.χ. αιτιακή, αντιθετική, προσθετική, συμπερασματική) μεταξύ των μονάδων του κειμένου. Τα συνδεδετικά αποτελούν τυπικό χαρακτηριστικό του κειμενικού είδους της επιχειρηματολογίας, από το οποίο άντλησαν τα μαθητικά γραπτά του δείγματος. Η λογικο-σημασιολογική σχέση που δηλώθηκε πιο συχνά στα γραπτά ήταν η προσθετική (92%) και σπάνια η συμπερασματική (8%: π.χ. βλ. παράδειγμα 12), ενώ το πιο συχνό συνδεδετικό που χρησιμοποιήθηκε από τους/τις μαθητές/τριες ήταν το «επίσης». Ωστόσο, αντί να συμβάλει στη γραπτότητα, διαπιστώθηκε πως η χρήση των συνδεδετικών εξέφρασε τον απροσχεδιαστο χαρακτήρα της προφορικότητας καθώς ήταν συνήθως λανθασμένη (π.χ. στο παράδειγμα 8 το «επίσης» στην τρίτη περίοδο είναι λανθασμένο καθώς το παιδί θέλει μάλλον να εκφράσει αντιθετική παρά προσθετική σχέση: «Επίσης που θα γίνω ποδοσφαιριστής πρέπει να τρώω υγιεινά πράγματα και να αθλούμαι», και στο παράδειγμα 9 το προσθετικό «ακόμα» και πάλι επιλέγεται λανθασμένα αντί ενός αντιθετικού: «Ακόμα άκουσα πως είναι δύσκολο να το σπουδάσεις στην Κύπρο») ή πλεοναστική (π.χ. στα παραδείγματα 10 και 11 το «επίσης» στην αρχή της τρίτης περιόδου και το «ακόμα» στην αρχή της δεύτερης περιόδου, αντίστοιχα, δεν χρειάζονται). Ο τρόπος με τον οποίο χρησιμοποίησαν οι μαθητές/τριες τα συνδεδετικά δείχνει πως αναπαρήγαγαν μάλλον μηχανιστικά στα κείμενά τους τον κειμενικό μηχανισμό της συνοχής χωρίς όμως τελικά να την αξιοποιήσουν για τη σύσταση συνεκτικών κειμένων. Είναι αξιοσημείωτο πως η πιο αποτελεσματική χρήση των συνδεδετικών έγινε από μαθητές/τριες των οποίων οι γονείς ασκούσαν επαγγέλματα υψηλής αυτονομίας και ήταν κάτοχοι πτυχίου πανεπιστημίου (βλ. παράδειγμα 12). Αντίθετα, δεν διαπιστώθηκαν ποιοτικές διαφοροποιήσεις στη χρήση των συνδεδετικών μεταξύ αγοριών και κοριτσιών ή/και μαθητών/τριών Ε' και Στ' τάξης:

(8) «Όταν μεγαλώσω θα ήθελα να γίνω ποδοσφαιριστής και μου αρέσει πολύ η μπάλα. Επίσης ο ποδοσφαιριστής πιάνει πολλά λεφτά. Εγώ παίζω μπάλα και μου αρέσει πολύ. Επίσης που θα γίνω ποδοσφαιριστής πρέπει να τρώω υγιεινά πράγματα και να αθλούμαι»

(9) «Το αποφάσισα επειδή είδα ότι αυτοί που τα κατασκευάζουν παίρνουν και ένα δωρεάν. Ακόμη άκουσα πως είναι δύσκολο να το σπουδάσεις στην Κύπρο αλλά αν η οικογένεια μου και εγώ είμαστε καλά οικονομικά θα πάω να σπουδάσω στην Αμερική ή στην Ιαπωνία»

(10) «Μου λένε ότι είμαι καλός και ο θείος μου ασχολείται με ηλεκτρονικά. Σπίτι μου σάζω πολλά πράγματα ηλεκτρονικά παιχνίδια μου και φυσικά ο ηλεκτρολόγος πιάνει πολλά λεφτά. Επίσης για να γίνω

ηλεκτρολόγος πρέπει να πάω σε ένα λύκειο ειδικό για τους ηλεκτρολόγους και να πάω σε πανεπιστήμιο που σπουδάζουν ηλεκτρολόγοι»

(11) «Μου αρέσει αυτό το επάγγελμα γιατί θα εξετάζω ανθρώπους, θα γνωρίζω άλλον κόσμο που δεν ξέρω. Ακόμα θα αγοράζα δική μου τσάντα που θα έχει σήραγγες, κόλτες όπου θα έγραφα τα φάρμακα που θα χρειάζονταν οι ασθενείς»

(12) «Όταν μεγαλώσω θα ήθελα να γίνω *graphic designer* γιατί με ενθουσιάζει να κατασκευάζω καινούργια πράγματα. Ακόμη μου αρέσει αυτό το επάγγελμα γιατί δουλεύει πάνω στον ηλεκτρονικό υπολογιστή. Επίσης θα μπορούσα να συνεργαστώ μαζί με την αδερφή μου που λέει ότι θα δουλεύει στην δουλειά του πατέρα μου, δηλαδή θα τυπώνει χαρτομάντιλα, καθαριστικά και νερό. Έτσι θα μπορούσα να της φτιάχνω τα κλισέ»

3.4 Μετακειμενικοί δείκτες

Οι μετακειμενικοί δείκτες, δηλαδή τα γλωσσικά στοιχεία που δείχνουν τα μέρη οργάνωσης ενός κειμένου, ανήκουν επίσης στα πρωτοτυπικά χαρακτηριστικά της γραπτότητας (Πολίτης 2001). Οι δείκτες που χρησιμοποιήθηκαν στα μαθητικά γραπτά ήταν όροι απαρίθμησης, με σκοπό οι μαθητές/τριες να προσδιορίσουν ποσοτικά τους λόγους επιλογής του μελλοντικού τους επαγγέλματος. Παρόλα αυτά, μέσα από την ποιοτική διερεύνηση της χρήσης των μετακειμενικών δεικτών διαπιστώθηκε πως η λειτουργία τους ήταν ως επί το πλείστον προφορική, καθώς χρησιμοποιούνταν με λανθασμένο τρόπο, συμβάλλοντας στον απροσχεδίαστο προφορικό λόγο, ή/και οι λόγοι που προβάλλονταν περιελάμβαναν ασάφειες, εκφράζοντας τον πλαισιωμένο χαρακτήρα της προφορικότητας. Π.χ. στο (13) έχουμε μια περίπτωση λανθασμένης χρήσης όπου, ενώ ο μαθητής αναφέρει αρχικά τους λόγους για τους οποίους θέλει να γίνει ποδοσφαιριστής, στη συνέχεια τους επαναλαμβάνει λίγο διαφορετικά χρησιμοποιώντας αυτή τη φορά και όρους απαρίθμησης. Στο (14) παρατηρούμε πως οι λόγοι που αναφέρει η μαθήτρια για να δικαιολογήσει την επιλογή της να γίνει κομμώτρια περιλαμβάνουν πολλές ασάφειες (π.χ. «έμαθα να τα κάνω τα μαλλιά μου ωραία»). Από την άλλη πλευρά, στο (15) έχουμε περίπτωση λανθασμένης και ασαφούς χρήσης. Ο πρώτος λόγος που αναφέρεται από τον μαθητή είναι ασαφής («πρώτα από όλα θέλω να νιώθω άνετα»), ενώ ο λόγος που παρουσιάζεται ως δεύτερος («και το δεύτερο θέλω να κερδίζω τις κούρσες με μοτόρες ταχύτητας») δεν είναι στην πραγματικότητα λόγος επιλογής επαγγέλματος, και με βάση τη σειρά εμφάνισης αποτελεί τον τρίτο λόγο, καθώς ο δεύτερος λόγος έχει αναφερθεί προηγουμένως («και επίσης μου αρέσει η ταχύτητα που με κάνει να νιώθω ελεύθερος»). Από πλευράς κειμενικότητας, διαπιστώνεται πως ο τρόπος χρήσης των μετακειμενικών δεικτών στα γραπτά των μαθητών/τριών δεν εξυπηρετεί τη συνεκτικότητα και την πληροφοριακότητα των κειμένων, καθώς η μάλλον και πάλι (όπως στην περίπτωση των συνδετικών) παθητική αναπαραγωγή τους οδηγεί στη σύσταση κειμένων με έλλειψη εννοιολογικής σύνδεσης και με χαμηλή πληροφοριακότητα. Ωστόσο, ακόμη και στις περιπτώσεις που ο/η μαθητής/τρια χρησιμοποιεί σωστά τους μετακειμενικούς δείκτες (π.χ. βλ. παράδειγμα 16), η χρήση τους μάλλον αυτο-ακυρώνεται από τη στιγμή που βρίσκονται σε ένα περιβάλλον όπου κυριαρχεί η προφορικότητα, όπως είναι οι επαναλήψεις (π.χ. «δουλεύεις τη νύχτα...δουλεύω τη νύχτα»), οι ασάφειες (π.χ. «να δω μερικά σπίτια»), οι καθημερινές λέξεις (π.χ. «μου έδειξε και λίγο») και η διαδραστικότητα (π.χ. «και εμένα μου αρέσει να δουλεύω τη νύχτα»). Τέλος, δεν παρατηρήθηκαν ποιοτικές διαφοροποιήσεις βάσει του επαγγελματικού-μορφωτικού επιπέδου των γονέων, του φύλου ή/και της τάξης των μαθητών/τριών:

(13) «Θα επέλεγα ποδοσφαιριστής επειδή για μένα είναι μια ωραία δουλειά. Πιάνω πάνω από 90.000 ευρώ και γίνομαι διάσημος και όλοι σε θέλουν. Πρώτος λόγος που διάλεξα αυτή την δουλειά είναι ότι μου αρέσει η μπάλα και δεύτερο μου αρέσει να είμαι γνωστός. Ο παίχτης που μου αρέσει είναι ο Messi»

(14) «Θα ήθελα να σπουδάσω αυτά τα επαγγέλματα γιατί : 1) έμαθα να μπορώ να χτενίζομαι μόνη μου, 2) έμαθα να τα κάνω τα μαλλιά μου ωραία και 3) γιατί μου αρέσει να χτενίζω τους άλλους»

(15) «Όταν μεγαλώσω θέλω να γίνω οδηγός αυτοκινήτου για ράλλι για μοτόρες. Γιατί πρώτα από όλα θέλω να νιώθω άνετα και επίσης μου αρέσει η ταχύτητα που με κάνει να νιώθω ελεύθερος. Και το δεύτερο θέλω να κερδίζω τις κούρσες με μοτόρες ταχύτητας. Επίσης είναι και πολύ επικίνδυνο γιατί μπορείς να πέσεις από την μοτόρα και να σπάσεις το χέρι σου»

(16) «Όταν μεγαλώσω θέλω να γίνω μηχανικός γιατί μου αρέσει αυτή η δουλειά. Επίσης η δουλειά είναι του πατέρα μου και ξέρω την δουλειά και μου έδειξε και λίγο. Άλλος ένας λόγος είναι ότι δουλεύεις την νύχτα και εμένα μου αρέσει να δουλεύω την νύχτα. Ακόμα όλη μέρα θα πηγαίνω συνέχεια με το αυτοκίνητο μου για να δω μερικά σπίτια, όλη μέρα θα πηγαίνω Λευκωσία, Πάφο, Λάρνακα και άλλες πόλεις»

4. Συμπεράσματα

Φωτίζοντας από μια ποιοτική προοπτική τα δεδομένα που προέκυψαν από τα γραπτά κύπριων μαθητών/τριών του δημοτικού, η παρούσα εργασία εμπλουτίζει μια προγενέστερη ποσοτική επεξεργασία των μαθητικών γραπτών. Συγκεκριμένα, διαπιστώνεται πως οι κύπριοι μαθητές/τριες του δείγματος φαίνεται να μην είναι εξοικειωμένοι/ες με τις συμβάσεις γραπτότητας, όχι μόνο γιατί δεν τις χρησιμοποιούν σε μεγάλο βαθμό (όπως διαφάνηκε από την ποσοτική ανάλυση που προηγήθηκε), αλλά κυρίως γιατί όταν επιχειρούν να εντάξουν ορισμένες από αυτές στα γραπτά τους, αυτές λειτουργούν με όρους προφορικότητας, παράγοντας μη αποτελεσματικά (για το σχολικό γραπτό συμφραζόμενο) κείμενα. Έτσι, τα παιδιά φαίνεται να μην είναι σε θέση να αξιοποιήσουν με ενεργητικό τρόπο κειμενικούς μηχανισμούς όπως τα συνδετικά και την υποτακτική σύνδεση, αναπαράγοντάς τα μηχανιστικά στα γραπτά τους. Αυτό το ποιοτικό στοιχείο που προκύπτει —και το οποίο επιβεβαιώνει άλλες ποιοτικές αναλύσεις μαθητικών γραπτών (βλ. π.χ. Παϊζη & Κονδύλη 2011 για τη μηχανιστική χρήση διατυπώσεων που περιλαμβάνουν ονοματοποιήσεις στα γραπτά μαθητών/τριών λυκείου)— μάλλον αναδεικνύει τις αδυναμίες εφαρμογής της επικοινωνιακής-κειμενοκεντρικής προσέγγισης της γλωσσικής διδασκαλίας στο σχολείο, η οποία συχνά γίνεται αποπλαισιωμένα και δεν απέχει και πολύ από την παραδοσιακή γραμματοκεντρική αντίληψη (για μια σύνοψη των κριτικών θεωρήσεων για τα γλωσσικά εγχειρίδια του γυμνασίου που εντάσσονται σε μια τέτοια προσέγγιση, βλ. Αρχάκης 2005).

Η ποιοτική ανάλυση που εφαρμόστηκε στα μαθητικά γραπτά επίσης εμπλούτισε τις κοινωνιογλωσσικές μας υποθέσεις σχετικά με τις κοινωνικές διαφορές που υπάρχουν στην παραγωγή του μαθητικού γραπτού λόγου. Η προγενέστερη ποσοτική μας έρευνα είχε διαπιστώσει πως τα κορίτσια και οι μαθητές/τριες της Στ' τάξης εισάγουν σε μεγαλύτερο βαθμό συμβάσεις γραπτότητας στα κείμενά τους από τα αγόρια και τους/τις μαθητές/τριες της Ε' τάξης. Αντίθετα, δεν είχαν εντοπιστεί ποσοτικές διαφορές στη χρήση στοιχείων γραπτότητας με βάση το μορφωτικό επίπεδο και το επάγγελμα γονέων των μαθητών/τριών. Η ποιοτική διερεύνηση των μαθητικών γραπτών επιβεβαίωσε τις έμφυλες διαφοροποιήσεις που υπάρχουν στη σύσταση της σχολικής γλώσσας, με τα κορίτσια να χρησιμοποιούν όχι μόνο περισσότερο αλλά και αποτελεσματικότερα από τα αγόρια επίσημους γλωσσικούς τύπους και δευτερεύουσες προτάσεις. Αντίθετα, η αυξανόμενη έκθεση των παιδιών στη γραπτή σχολική νόρμα (σύγκριση μεταξύ μαθητών/τριών Ε' και Στ' τάξης) φαίνεται πως βοηθάει τους/τις μαθητές/τριες να χρησιμοποιούν περισσότερο αλλά όχι ικανοποιητικότερα τις συμβάσεις γραπτότητας στα κείμενά τους. Από την άλλη πλευρά, αν και η ποσοτική ανάλυση δεν κατάφερε να καταγράψει στατιστικά σημαντικές διαφορές μεταξύ μαθητών/τριών διαφορετικής κοινωνικο-οικονομικής προέλευσης (ίσως λόγω του περιορισμού του δείγματος σε μαθητές/τριες με σχετικά ομοιογενές κοινωνικό προφίλ), η ποιοτική μας έρευνα ανέδειξε ενδιαφέρουσες διαφοροποιήσεις. Συγκεκριμένα, διαπιστώθηκε πως οι μαθητές (αλλά κυρίως οι μαθήτριες) των οποίων οι γονείς ήταν πανεπιστημιακής εκπαίδευσης και ασκούσαν επαγγέλματα υψηλής αυτονομίας χρησιμοποιούσαν αποτελεσματικότερα από τα παιδιά (και κυρίως τα αγόρια) οικογενειών χαμηλότερου μορφωτικού επιπέδου και επαγγελλμάτων χαμηλής αυτονομίας στα γραπτά τους τα επίσημα γλωσσικά στοιχεία, την υποτακτική σύνδεση και τα συνδετικά. Μάλιστα, από την παρούσα ανάλυση διαφαίνεται —το οποίο βέβαια χρήζει περαιτέρω διερεύνησης— πως όσο πηγαίνουμε σε πιο εκλεπτυσμένους κειμενικούς μηχανισμούς γραπτότητας (όπως είναι τα συνδετικά), οι ταξικές διαφορές μεταξύ των μαθητών/τριών εντείνονται ενώ οι έμφυλες αμβλύνονται. Τέλος, φαίνεται να υπάρχουν συμβάσεις γραπτότητας, όπως οι μετακειμενικοί δείκτες, που οι μαθητές/τριες στο σύνολό τους δεν έχουν κατακτήσει.

Συμπερασματικά, η παρούσα εργασία αναδεικνύει την αξία ποιοτικών αναλύσεων του μαθητικού γραπτού λόγου που να λειτουργούν συμπληρωματικά των ποσοτικών ερευνών, με σκοπό την εκλέπτυνση των ερευνητικών μας υποθέσεων για την κοινωνιογλωσσική συμπεριφορά των παιδιών στο σχολείο. Στους περιορισμούς της έρευνας συγκαταλέγεται η επιλογή του δείγματος, καθώς προήλθε από μια συγκεκριμένη περιοχή της Κύπρου με μαθητές/τριες σχετικά ομοιογενούς κοινωνικού προφίλ. Μέσα στους μελλοντικούς μας στόχους περιλαμβάνεται η διεύρυνση της έρευνας και σε άλλες περιοχές της Κύπρου, καθώς και η σύγκριση του γραπτού λόγου μεταξύ κύπριων και ελλαδιτών/ισών μαθητών/τριών.

ABSTRACT

In this paper we discuss the structural transfer from German to Greek as it is used by bilingual primary school children with Greek origin in Germany. We focus on the transfer of compounds, produced by the pupils during the Greek language classes. The recordings of the pupils' language showed that the pupils tried to translate from German to Greek each of the compound words, and this word by word, which resulted in not existing Greek items. However, the recorded transfers indicate, that the pupils are enabled to compose compounds correctly in both languages and that they use their languages creatively.

Keywords: Greek L2, code-switching, structural transfer, compounds, Germany, primary school
Λέξεις κλειδιά: Ελληνικά Γ2, εναλλαγή κώδικα, δομική μεταφορά, σύνθεση, Γερμανία, Δημοτικό.

0. Εισαγωγή

Στην παρούσα εργασία συζητούμε τη δομική μεταφορά στοιχείων από τη γερμανική γλώσσα στην ελληνική από Έλληνες διγλωσσους μαθητές στη Γερμανία, εστιάζοντας στην περίπτωση της σύνθεσης. Μέσα από την ηχογράφηση αυθεντικού λόγου των μαθητών, όπως αυτός παράγεται κατά τη διάρκεια της διδασκαλίας της ελληνικής ως δεύτερης γλώσσας καταγράφηκαν παραδείγματα απόδοσης στα ελληνικά κάποιων γερμανικών σύνθετων λέξεων, τις οποίες οι μαθητές δε γνώριζαν στα ελληνικά. Στα παραδείγματα αυτά καταδεικνύεται, ότι οι μαθητές παίρνουν ως νοητική υπόθεση ότι ο μηχανισμός σχηματισμού λέξεων που ισχύει στα γερμανικά οφείλει να ισχύει και στα ελληνικά. Έτσι, οδηγούνται στη μεταφορά, ενσωματώνοντας τα δύο συνθετικά των μεταφρασμένων λέξεων στο λόγο τους δημιουργώντας μια νέα λέξη, καταδεικνύοντας παράλληλα ότι έχουν κατακτήσει το μηχανισμό σύνθεσης στην ελληνική γλώσσα.

Η εργασία είναι δομημένη σε τέσσερα μέρη. Αρχικά θα συζητηθούν το θεωρητικό και μεθοδολογικό πλαίσιο της έρευνας, στη συνέχεια τα αποτελέσματα και στο τέλος τα συμπεράσματα και οι διδακτικές προτάσεις.

Τα κύρια ερωτήματα που πραγματευόμαστε είναι:

1. Πώς περνά η κυρίαρχη γλώσσα του περιβάλλοντος (η γερμανική) στον ελληνικό λόγο διγλωσσών μαθητών στο συγκεκριμένο στάδιο της διαγλώσσας τους, παίρνοντας ως παράδειγμα τη δομική μεταφορά στην περίπτωση της σύνθεσης;
2. Πώς μπορεί ο δάσκαλος της ελληνικής ως δεύτερης γλώσσας με αφορμή τη δομική μεταφορά στην περίπτωση της σύνθεσης να βοηθήσει τους μαθητές του να αναπτύξουν και να βελτιώσουν την ελληνομάθειά τους;

1. Θεωρητικό πλαίσιο

Ως πλαίσιο της έρευνας ορίζεται μία διεπιστημονική προσέγγιση που τοποθετείται επιστημονικά στον τομέα της εφαρμοσμένης γλωσσολογίας, λαμβάνοντας υπόψη για τις ανάγκες της εργασίας τόσο τη Γλωσσολογία της Επαφής (Contact Linguistics) όσο και τη Θεωρητική Γλωσσολογία, ως προς τη σύνθεση στην ελληνική αλλά και τη γερμανική γλώσσα καθώς και τις κατευθύνσεις για τη διδασκαλία της ελληνικής ως δεύτερης γλώσσας.

Στις περιπτώσεις που δύο γλώσσες έρχονται σε επαφή σε ένα μεταναστευτικό περιβάλλον ή σε συνθήκες εκμάθησης μιας δεύτερης ή ξένης γλώσσας είναι αποδεκτό από επιστήμονες που εργάζονται στον τομέα της Γλωσσολογίας της Επαφής ότι η μία γλώσσα, συνήθως η γλώσσα του περιβάλλοντος, επηρεάζει με ποικίλους τρόπους το λόγο των ομιλητών στην άλλη γλώσσα.

Έτσι, για παράδειγμα όπως έχουν δείξει αρκετές έρευνες (ενδεικτικά Androutsakis 1994, Gardner-Chloros 1992, Hatzidaki 1993, Stitou 2000, Στύλου 2010, Tamis 1986, 1991) τα ελληνικά των Ελλήνων της διασποράς διαφέρουν σε διάφορα γραμματικά επίπεδα από αυτά των γηγενών Ελλήνων. Οι διαφορές αυτές εκδηλώνονται μέσω της εναλλαγής κώδικα, της μεταφοράς σε λεξιλογικό, δομικό (μορφολογικό και συντακτικό) και φωνολογικό επίπεδο καθώς και μέσω δάνειων λέξεων. Αυτές οι γλωσσικές διαφορές καταγράφονται στο λόγο των μαθητών και κατά τη διάρκεια του μαθήματος της ελληνικής γλώσσας (Στύλου 2010) και όχι μόνο σε καθημερινές φιλικές συνομιλίες.

Η εστίαση στην παρούσα εργασία είναι στη δομική μεταφορά εξετάζοντας στην παραγωγή λέξεων την περίπτωση της σύνθεσης.

Η ελληνική γλώσσα χαρακτηρίζεται από ποικιλία στη σύνθεση και μεγάλο αριθμό συνθέτων, τα οποία σχηματίζονται από το συνδυασμό δύο ή περισσότερων λεξικών θεμάτων (Αναστασιάδη-Συμεωνίδη 1996, Holton D., Mackridge P. & Φιλίππκη-Warburton Eip. 1999 και 2007, Ράλλη 2006). Η σχετική ελευθερία και η ποικιλία στη δυνατότητα συνδυασμού γραμματικών κατηγοριών κατά τη δημιουργία συνθέτων αποτελεί ένα πρόσφορο έδαφος για τη δημιουργική χρήση της γλώσσας και κατά συνέπεια για τη δημιουργία νέων λέξεων.

Ένα από τα κύρια γνωρίσματα της σύνθεσης στην ελληνική γλώσσα είναι η ύπαρξη του δείκτη σύνθεσης αλλά και η δυνατότητα σε κάποιες περιπτώσεις να δημιουργείται σύνθετο με την ένωση των δύο συνθετικών θεμάτων χωρίς δείκτη (Ράλλη 2006: 64-68).

Αντίστοιχα, στη γερμανική γλώσσα η σύνθεση είναι μία ιδιαίτερα συνηθισμένη διαδικασία με μεγάλη ποικιλία στη δυνατότητα συνδυασμού γραμματικών κατηγοριών καθώς και την ύπαρξη διαφόρων δεικτών σύνθεσης ανάμεσα στα συνθετικά (Donalies 2005, Eichinger 2000).

Στην παρούσα εργασία ακολουθούμε ως προς την ορολογία για τη σύνθεση, το σύνθετο, το συνθετικό και τα μονολεκτικά και πολυλεκτικά σύνθετα την Αναστασιάδη-Συμεωνίδη (1996). Έτσι, ως *σύνθεση* ορίζεται η πράξη δημιουργίας ενός συνθέτου, ως *σύνθετο* η λεξική μονάδα που αποτελείται από δύο ή περισσότερα ελευθερώσιμα ή ελεύθερα λεξικά μορφήματα. Έτσι, προκύπτουν από ελευθερώσιμα μορφήματα *μονολεκτικά σύνθετα* π.χ. πετροπόλεμος και από ελεύθερα μορφήματα *πολυλεκτικά σύνθετα* π.χ. παιδική χαρά, γλυκό του κουταλιού. Ως *συνθετικό* ορίζεται κάθε ελευθερώσιμο λεξικό μόρφημα που αποτελεί μέρος ενός μονολεκτικού συνθέτου. Τέλος, τα μονολεκτικά σύνθετα χωρίζονται σε νόθα και γνήσια, όπου τα νόθα είναι αυτά που προκύπτουν από την απλή συνένωση των συνθετικών και τα γνήσια είναι αυτά που μπορούν να κατηγοριοποιηθούν ανάλογα με τη γραμματική κατηγορία του συνθέτου, των συνθετικών καθώς και τη συντακτική σχέση τους.

2. Μεθοδολογικό πλαίσιο

Τα ερευνητικά δεδομένα συγκεντρώθηκαν σε απογευματινό Τμήμα Ελληνικής Γλώσσας (ΤΕΓ) στη Γερμανία, στο πλαίσιο έρευνας για την εκπόνηση της διδακτορικής μας διατριβής όπου μελετήσαμε το λόγο διγλωσσών Ελλήνων μαθητών στη Γερμανία κατά τη διάρκεια του μαθήματος της Ελληνικής Γλώσσας εστιάζοντας στη μελέτη της εναλλαγής κώδικα (Στύλου 2010). Όμως, η παρούσα προσέγγιση και ανάλυση των ερευνητικών δεδομένων από τη συγκεκριμένη οπτική γωνία της δομικής μεταφοράς κατά τη σύνθεση δεν είχε μελετηθεί στη διατριβή και με την έννοια αυτή γίνεται εδώ για πρώτη φορά.

Ως προς τη μεθοδολογία, η έρευνα τοποθετείται στο ερμηνευτικό ερευνητικό παράδειγμα. Συγκεκριμένα, η συλλογή, η ανάλυση και η ερμηνεία των ερευνητικών δεδομένων έγιναν μέσα από το πρίσμα της εξελιγμένης μορφής της Θεμελιωμένης Θεωρίας (Charmaz 2006, Strauss & Corbin 1998) που σημαίνει ότι δεν στηριχθήκαμε σε κάποιες προκατασκευασμένες κατηγορίες.

Στην έρευνα συμμετείχαν οι 24 από τους συνολικά 45 μαθητές του σχολείου και συγκεκριμένα, οι μαθητές των τάξεων Α', Β' και Ε' & ΣΤ' (σε συνδιδασκαλία), καθώς αποφασίσαμε να διεξάγουμε την έρευνα μόνο στα τμήματα στα οποία δίδασκε η ίδια η ερευνήτρια ως δασκάλα. Συνολικά, συγκεντρώθηκαν 87 ώρες ηχογραφημένων διδασκαλιών και παράλληλα χρησιμοποιήθηκαν ως εργαλεία έρευνας το ερωτηματολόγιο και η παρατήρηση.

Στόχος ήταν να ηχογραφηθεί με τον πιο φυσικό τρόπο όσο το δυνατόν πιο αυθεντικός διγλωσσος μαθητικός λόγος κατά τη διδασκαλία της ελληνικής γλώσσας σε ελληνόπουλα στη Γερμανία. Για το λόγο αυτό δεν σχεδιάστηκαν κάποιες ειδικές διδακτικές ενότητες, αλλά ακολουθήθηκε το Πρόγραμμα Σπουδών για την ελληνόγλωσση εκπαίδευση στη διασπορά (Δαμανάκης 2004 επιμ., Δαμανάκης 2006

επιμ.) καθώς και τα σχετικά εγχειρίδια που προβλέπονται από το ΥΠΔΒΜΘ στο βαθμό που αυτά ήταν διαθέσιμα. Στις περιπτώσεις που δεν ήταν διαθέσιμα χρησιμοποιήθηκαν τα εγχειρίδια που προβλέπονται για τη διδασκαλία της ελληνικής ως μητρικής γλώσσας στην Ελλάδα και βοηθητικά φυλλάδια.

Στην παρούσα ανάλυση θα εστιάσουμε μέσα από αποσπάσματα του διγλωσσού λόγου των μαθητών κατά τη διδασκαλία σε παραδείγματα δομικής μεταφοράς στην περίπτωση της σύνθεσης από τα γερμανικά στα ελληνικά.

3. Τα αποτελέσματα της έρευνας

Κατά την επεξεργασία και ανάλυση του καταγεγραμμένου λόγου των μαθητών εντοπίστηκαν μονολεκτικές εναλλαγές κώδικα γερμανικών συνθέτων, τις οποίες οι μαθητές προσπάθησαν με δική τους πρωτοβουλία ή με παρότρυνση της δασκάλας είτε ατομικά είτε συνεργατικά να αποδώσουν στην ελληνική γλώσσα. Στην προσπάθειά τους αυτή οι μαθητές μεταφέρουν το γερμανικό σύνθετο ως δομή στην ελληνική γλώσσα δημιουργώντας ένα σύνθετο της διαγλώσσας τους, ανύπαρκτο στο λεξικό της ελληνικής.

Ενδεικτικά παρουσιάζουμε κάποια αποσπάσματα διαλόγων με παραδείγματα σύνθεσης.

Παράδειγμα 1: τηγανογλυκό & τηγάνι-kuchen/ Pfannkuchen/ κρέπα ή τηγανίτα

Επεισόδιο B17.8 (Pfannkuchen: ενδιαφέρουσα η προσέγγιση της γνώσης και η απόπειρα επιτυχούς μετάφρασης κάθε συνθετικού της λέξης)

1	B2:	↓Pfannkuchen
2	???	
3	B5:	τηγανογλυκό
4	??:	τι;
5	B3:	τηγανογλυκό (γέλιο)
6	???	
7	??:	Pfannkuchen
8	B5:	Pfanne τηγάνι (.) Kuchen γλυκό
9	?:	τηγάνι kuchen
10	B3:	πώς το λένε;↓

Στο επεισόδιο B17.8 καταγράφεται μια ενδιαφέρουσα συζήτηση που αναπτύσσεται μεταξύ των μαθητών με αφορμή τη γερμανική λέξη για “κρέπα” (“Pfannkuchen”) όπου προσπαθούν να την αναλύσουν για να την αποδώσουν στα ελληνικά. Η πρώτη απόδοση έρχεται στη σειρά 3 από τη B5 στην οποία αντιδρά με ένα “τι” κάποια άλλη μαθήτρια. Η B3 επαναλαμβάνει και γελά. Μετά από μια επανάληψη της γερμανικής λέξης, η B5 παρουσιάζει τη σκέψη της και αναλύει τη λέξη στα δύο συνθετικά της και δίνει τη μετάφραση για κάθε λέξη. Στη σειρά 9 κάποιος μαθητής λέει και τη λέξη τηγάνι-**kuchen**. Η δασκάλα δεν εμπλέκεται στη διαδικασία αυτή, αλλά αφήνει τους μαθητές μόνους να ασχοληθούν με την ανάλυση αυτή. Παρόλο που αυτή η διαδικασία δεν οδηγεί πάντα στο σωστό αποτέλεσμα, μπορεί να χαρακτηριστεί ως δημιουργική ενασχόληση εκ μέρους των μαθητών με τη γλώσσα, κατά την οποία οι μαθητές αναλαμβάνουν μεγάλο βαθμό αυτενέργειας.

Αγνοώντας την ελληνική απόδοση, προσπαθούν μέσα από στρατηγικές συγκάλυψης λεξιλογικών κενών και στρατηγικές επικοινωνίας να βρουν τη σωστή λέξη, παίρνοντας ως βάση τη γερμανική σύνθετη λέξη και μεταφράζοντας κάθε συνθετικό για να δημιουργήσουν την αντίστοιχη ελληνική, ενώνοντας τα δύο συνθετικά με το δείκτη σύνθεσης.

Ένα παρόμοιο παράδειγμα είναι το παράδειγμα 2.

Παράδειγμα 2: πορτοκαλοδέντρο/ Orangenbaum/ πορτοκαλιά

Επεισόδιο E1.4 (Πορτοκαλιά)

1	E10:	κυρία; Πώς το λέτε. Orangenbaum ; Πορτοκαλοδέντρο;
2	Δ:	όχι. Πώς το λένε; ΕΜ πες το;
3	E3:	πορτοκαλιά.

(συνεχίζεται)

Στο επεισόδιο E1.4 ο E10 μεταφράζει κάθε συνθετικό της γερμανικής λέξης “Orangenbaum” για “πορτοκαλιά” και δημιουργεί τη νέα λέξη “πορτοκαλοδέντρο”. Με τη μεταφορά αυτή από τα γερμανικά στα ελληνικά ο μαθητής δηλώνει την προσπάθειά του να εκφραστεί στα ελληνικά σε ένα πλαίσιο επικοινωνιακής στρατηγικής και δημιουργικής χρήσης της γλώσσας. Ως προς τον τονισμό του συνθέτου φαίνεται ότι ο τόνος δεν έχει μπει σωστά στην παραλήγουσα, μιας και στα γνήσια σύνθετα ο τόνος μετακινείται προς τα αριστερά του β’ συνθετικού.

Η μεταφορά αυτή μπορεί να αξιοποιηθεί από τον εκπαιδευτικό ώστε να διδαχθεί η σημασιολογική κατηγορία (Θωμαδάκη 1996) με την κατάληξη «-ιά» για την ονομασία δέντρων στα ελληνικά γενικά, αλλά και σε αντιπαράβολή με τη γερμανική γλώσσα, μιας και ο μαθητής φαίνεται να μην γνωρίζει ακόμη τη συγκεκριμένη σημασιολογική κατηγορία.

Στο παράδειγμα 3 καταγράφεται πώς η μαθήτρια ενώνει τα δύο συνθετικά χωρίς να κάνει κάποια αλλαγή σε αυτά.

Παράδειγμα 3: Πασχα-διακοπές/ Osterferien/ διακοπές του Πάσχα

Επεισόδιο B18.1

- | | | |
|----|-----|---|
| 1 | Δ: | γιατί κλείνουν τα σχολεία τώρα; ... Σελ |

| 14 | B2: | Πάσχα-διακοπές |
| 15 | ... | |
| 16 | Δ: | έχουμε διακοπές του Πάσχα (.) ναι; |

Στο επεισόδιο B18.1 η δασκάλα κάνει ΕΚ (σειρά 8) επαναλαμβάνοντας την ΕΚ που προηγήθηκε από μαθητή (σειρά 4). Πρώτα κατευθύνει τους μαθητές να μεταφράσουν τη λέξη χωρίς όμως να επαναλάβει η δασκάλα την ΕΚ της B5 (σειρά 5), αλλά η ερώτηση του B7 την οδηγεί τελικά στην επανάληψη της ΕΚ με μορφή ερώτησης, που καλεί και πάλι σε μετάφραση της λέξης. Έπειτα, στη σειρά 11 η δασκάλα δίνει και πάλι την ΕΚ της B5, με την ελληνική μετάφραση. Στη σειρά 14 η B2 μεταφέρει λανθασμένα από τα γερμανικά και δημιουργεί τη λέξη “Πασχα-διακοπές” κατά το γερμανικό “Osterferien”. Η δασκάλα απλά αναφέρει τη σωστή λέξη στα ελληνικά και ολοκληρώνεται έτσι το επεισόδιο.

Η και πάλι κατά λέξη μετάφραση κάθε συνθετικού από τα γερμανικά στα ελληνικά δείχνει τη δημιουργική προσπάθεια αναζήτησης της ελληνικής λέξης δίνοντας ενδείξεις ότι έχει κατακτηθεί ο μηχανισμός σύνθεσης της ελληνικής. Επίσης, καταδεικνύεται ότι κατά την εκμάθηση της ελληνικής οι μαθητές στηρίζονται στις ήδη κατακτημένες δομές και της γερμανικής γλώσσας καθώς και σε γερμανικό λεξιλόγιο οικείο για αυτούς από την καθημερινότητά τους στη Γερμανία.

Παραφερές είναι και το παράδειγμα 4.

Παράδειγμα 4: ζεμπρα γραμμές & ζεβρα γραμμές/ Zebra streifen/ διάβαση πεζών

Επεισόδιο E16.4

(σκίτσα στο νέο Βιβλίο γλώσσας ΣΤ΄, τευχ.Β΄ σελ.71)

- | | | |
|----|----------|--|
| 1 | E9: | αλλά ο άντρας πήγε να περάσει το δρόμο και- |
| 2 | Δ: | το δρόμο πήγε να περάσει; |
| 3 | E9: | εε; |
| 4 | (3'') | |
| 5 | Δ: | πώς το λένε αυτό το κομμάτι εκεί; |
| 6 | E6 + E9: | Zebra streifen |
| 7 | Δ: | χμ, ναι |
| 8 | E6: | γραμμές ζέβρας |
| 9 | E4: | (παίζοντας με τη γλώσσα) <u>το ζέμπρα</u> . (.) ζέμπρα γραμμές |
| 10 | E5: | όχι. (.) Ζέβρα. |
| 11 | E4: | το Zebra πώς το λένε στα ελληνικά; |
| 12 | Δ: | ζέβρα, καλά το είπατε. |
| 13 | E4: | <u>ζεβρα γραμμές</u> |
| 14 | Δ: | όχι. (.) είναι η διάβαση πεζών (.) η διάβαση πεζών. |

Στο επεισόδιο E16.4 η δασκάλα αντιλήφθηκε ότι η E9 διατύπωσε την πρόταση στη σειρά 1 έτσι, ώστε να αποφύγει τη χρήση της γερμανικής λέξης για “διάβαση πεζών” και προκαλεί κατά κάποιον τρόπο έμμεσα την E9 να πει αυτό που σκέφτηκε. Η απάντηση έρχεται ταυτόχρονα από τις E6 και E9

στη σειρά 6 με ΕΚ. Η δασκάλα προσπαθεί να αφήσει το διάλογο να εξελιχθεί χωρίς να παρέμβει ιδιαίτερα. Στη σειρά 8 η Ε6 προσπαθεί να αποδώσει στα ελληνικά και μεταφράζει κάθε συνθετικό αντιστρέφοντας τα δύο συνθετικά στην τελική σύνθεση της λέξης λέγοντας «γραμμές ζέβρας». Στη σειρά 9 η Ε4, δείχνοντας ότι παίζει με τις γλώσσες, μεταφράζει τα συνθετικά με τη σειρά της γερμανικής λέξης, μεταφέροντας όμως στο πρώτο συνθετικό το φώνημα “μπ” από τη γερμανική λέξη “Zebra” και δημιουργεί έτσι το πολυλεκτικό σύνθετο “ζέμπρα γραμμές”. Το επεισόδιο συνεχίζεται χωρίς λογοπαίγνιο πια. Η Ε5 έρχεται να διορθώσει τη μεταφορά από τα γερμανικά, λέγοντας τη σωστή ελληνική λέξη στη σειρά 10. Η Ε4 κάνει ΕΚ για τη λέξη “Zebra” ρωτώντας για την αντίστοιχη ελληνική (σειρά 11). Η δασκάλα δίνει τη λέξη “ζέβρα” ως ελληνική και η Ε4 δημιουργεί στη συνέχεια το μονολεκτικό σύνθετο “ζεβραγραμμές”. Η δασκάλα δίνει στο τέλος την ελληνική αντιστοιχία δύο φορές και το επεισόδιο ολοκληρώνεται.

Στα παραδείγματα 3 & 4 καταδεικνύεται ότι οι μαθητές δημιουργούν σύνθετα τοποθετώντας τα δύο συνθετικά το ένα δίπλα στο άλλο χωρίς να υπάρχει δείκτης σύνθεσης, γεγονός που επιτρέπει η σύνθεση στα ελληνικά αλλά και στα γερμανικά.

Ένα πιο εκτενές επεισόδιο, το οποίο αναδεικνύει τη δυναμική ενασχόληση με την ΕΚ και τα διάφορα στάδια αναζήτησης της ελληνικής λέξης είναι το παράδειγμα 5.

Παράδειγμα 5: χιόνι νερό → χιόνι βροχή → χιονι νερό → χιονι νερό / Schneeregen/ χιονόνερο

Επεισόδιο Α2.1

[προηγήθηκε σχόλιο και κουβέντα για τον καιρό εκείνη τη στιγμή]

- | | | |
|----|-------|---|
| 1 | Δ: | λοιπόν έχει χιόνι σήμερα λέτε, εε; |
| 2 | Όλοι: | μμμ (δηλώνοντας συμφωνία) |
| 3 | Δ: | είναι χιόνι αυτό; |
| 4 | Α1: | ναι. |
| 5 | Δ: | Νίκο. |
| 6 | Α6: | στα γερμανικά το λένε Schneeregen . |
| 7 | Δ: | μμ, μάλιστα. στα ελληνικά τι είναι; |
| 8 | Α6: | μμ, ξέρω ξέρω |
| 9 | Δ: | τι; |
| 10 | Α6: | που είναι νερό και Sch και λίγο χιόνι. |
| 11 | Δ: | ωραία. μπορείς να φτιάξεις μία λέξη; πώς είναι στα γερμανικά είπες; |
| 12 | Α6: | Schneeregen . |
| 13 | Δ: | ωραία. για προσπάθησε να φτιάξεις μία τέτοια λέξη στα ελληνικά. να ξεκινήσεις με την ίδια λέξη. |
| 14 | Α6: | χιόνι νερό. |
| 15 | Α5: | χιόνι βροχή. |
| 16 | Δ: | χιόνι βροχή, δε μας βγαίνει, για ξαναπές το. μήπως το έχει ακούσει κάποιος; |
| 17 | Α6: | Schneeregen |
| 18 | Δ: | όχι, στα ελληνικά τώρα, πώς το είπες; χιόνι βροχή είπε ο Θ δε βγαίνει, δεν το λέμε έτσι. εσύ Νίκο πώς θα το έλεγες, το έχεις ξανακούσει; για ξαναπές αυτό που είπες (...) τι είπες; (...) Το ξέχασες; |
| 19 | Α6: | nnn |
| 20 | Δ: | πες το πάλι στα ελληνικά. (.) γιατί είναι σχεδόν σωστό, γι' αυτό. για έλα. πώς το είπες. (.) έλα πές' το....) ποια είναι η πρώτη λέξη στα γερμανικά; |
| 21 | Α6: | Schnee . |
| 22 | Δ: | ωραία. στα ελληνικά πώς θα το πούμε αυτό; |
| 23 | Α6: | χιονι νερό. |
| 24 | Δ: | χιονι νερό, δε λέμε όμως χιόνι νερό. |
| 25 | Α6: | χιονι νερό. |
| 26 | Δ: | χιονόνερο λέμε. ρίχνει χιονόνερο. |

Στο επεισόδιο Α2.1 ο διάλογος ξεκινά με αφορμή ένα σχόλιο για τον καιρό που προηγήθηκε. Η δασκάλα υπονοιάζεται ότι οι μαθητές γνωρίζουν ότι αυτό που ρίχνει έξω εκείνη τη στιγμή δεν είναι χιόνι, αλλά χιονόνερο, αλλά δεν το γνωρίζουν στα ελληνικά και απευθύνει το ερώτημα στην τάξη στη σειρά 3 “είναι χιόνι αυτό;”. Και έτσι ο Α6 στη σειρά 6 το ονομάζει στα γερμανικά με εισαγωγή “στα γερμανικά το λένε ...”. Ως συνέχεια του διαλόγου (σειρά 7) η δασκάλα με αφορμή την ΕΚ παροτρύνει τους μαθητές να σκεφτούν την ελληνική αντιστοιχία. Στη σειρά 10 ο Α6 παίρνει το λόγο και

προσπαθεί να εξηγήσει στα ελληνικά, παρεμβάλλοντας το γερμανικό σύμπλεγμα “sch” στη μέση της φράσης. Η δασκάλα δε δίνει τη λύση – απάντηση και συνεχίζει να παροτρύνει τους μαθητές να σκεφτούν την ελληνική λέξη ζητώντας αρχικά να ξαναπούν τη λέξη στα γερμανικά (σειρά 11) και στη συνέχεια να εστιάσουν στα σύνθετα της γερμανικής λέξης (σειρά 13). Στη σειρά 14 ο Α6 φτάνει κοντά στην ελληνική λέξη, ενώ ο Α5 (σειρά 15) μεταφράζει σωστά κάθε όρο. Στις σειρές 18 και 20 οι μαθητές παροτρύνονται και πάλι να σκεφτούν δυναμικά και οι προσπάθειες του Α6 τον φέρνουν πολύ κοντά στο σωστό αποτέλεσμα. Το επεισόδιο ολοκληρώνεται με τη δασκάλα να δίνει τη σωστή απάντηση.

Στο τελευταίο παράδειγμα καταδεικνύεται η αλλαγή γένους ελληνικού ουσιαστικού για την προσαρμογή του κατά τη σύνθεση.

Παράδειγμα 6: ο φωτιάς πλανήτης/ Feuerplanet (εννοεί τον ήλιο όπως το είχαν μάθει στο νηπιαγωγείο)

Επεισόδιο A28.4 (απόσπασμα)

[με αφορμή το κείμενο, ο Α6 αναφερόμενος στον ήλιο]

- ...
 11 Α6: εγώ το ξέρω μόνο στα γερμανικά τι (.) τι **Planet** είναι (.)
 12 Δ: ποιο;
 13 Α6: τι πλανήτης-
 14 Δ: τι πλανήτης;
 15 Α6: ναι
 16 Δ: ποιος είναι πλανήτης;
 17 Α6: ο ήλιος είναι (.) εμ (.) ο ο **Feuerplanet**.
 18 Δ: χμ (θετικό) (.) έτσι λέγεται;
 19 Α4: είναι ο: (.) φωτιάς πλανήτης

(συνεχίζεται)

Στο παράδειγμα 6 ο μαθητής στη σειρά 17 κάνει εναλλαγή για κάποια λέξη που γνωρίζει ως έννοια μόνο στα γερμανικά μιας και είχαν συζητήσει σύμφωνα με τα λεγόμενά του σχετικό θέμα στο νηπιαγωγείο. Επειδή όμως γνωρίζει στα ελληνικά κάθε συνθετικό του γερμανικού συνθέτου προσπαθεί να το αποδώσει στη σειρά 19 δημιουργώντας ένα νέο σύνθετο στα ελληνικά «ο φωτιάς-πλανήτης». Η παρουσία του αρσενικού άρθρου στην αρχή του συνθέτου φαίνεται ότι λειτουργεί ως εφελκυστήρας για το μαθητή για να βάλει την κατάληξη «-ς» για το αρσενικό γένος όχι μόνο στο δεύτερο, αλλά και στο πρώτο συνθετικό. Το γεγονός αυτό είναι ένδειξη ότι έχει κατακτηθεί η λεξική και σημασιολογική κατηγορία του «ουσιαστικού» με τις σχετικές καταλήξεις που αντιστοιχούν στη διάκριση αρσενικού – θηλυκού γένους και ότι ο μαθητής με τις μέχρι τώρα γνώσεις του στα ελληνικά προσπαθεί να καλύψει κάποια λεξιλογικά του κενά με μεταφορά από τα γερμανικά για να συνεχίσει το διάλογο στα ελληνικά.

Στον πίνακα που ακολουθεί συνοψίζονται παραδείγματα συνθέτων της διαγλώσσας των μαθητών όπως αυτά καταγράφηκαν στο λόγο τους κατά τη διάρκεια του μαθήματος.

Λόγος μαθητών	Γερμανικά	Νέα Ελληνικά
1) τηγανογλυκό τηγάνικuchen	Pfannkuchen (O-O) (m)	κρέπα
2) πορτοκαλοδέντρο (O-O)	Orangenbaum (O-O) (m)	πορτοκαλιά
3) Πάσχα-διακοπές	Osterferien (O-O) (pl)	διακοπές του Πάσχα
4) ζεμπραγραμμές	Zebraastreifen (O-O) (pl)	διάβαση πεζών
5) χιονι-νερό χιονι βροχή χιονινερό χιονονερό	Schneeregen (O-O) (m)	χιονόνερο
6) χεριμπάλα	Handball (O-O) (m)	χάντμπολ
7) ο φωτιάς-πλανήτης (O-O)	Feuerplanet (O-O) (m)	

Οι μαθητές φαίνεται πως μεταφέρουν λέξη προς λέξη τα συνθετικά του γερμανικού συνθέτου δημιουργώντας ένα στα ελληνικά ανύπαρκτο σύνθετο. Όλα τα σύνθετα στα γερμανικά και στην ελληνική διαγλώσσα των μαθητών ανήκουν στη γραμματική κατηγορία των ουσιαστικών. Από αυτά κάποια έχουν στα ελληνικά μονολεκτικό απλό (μη σύνθετο) ισοδύναμο, κάποια έχουν μονολεκτικό σύνθετο ισοδύναμο και τέλος κάποια άλλα έχουν πολυλεκτικό ισοδύναμο. Διαπιστώνουμε ότι οι

μαθητές δημιουργούν με τον τρόπο αυτό και νόθα μονολεκτικά σύνθετα όπως στις περιπτώσεις 3-6 στον πίνακα.

Η ικανότητα για δημιουργική χρήση της ελληνικής γλώσσας από τους μαθητές είναι ένδειξη ότι ο μηχανισμός της σύνθεσης έχει κατακτηθεί και αυτό φαίνεται να ισχύει και για τις δύο γλώσσες. Η μεταφορά από τα γερμανικά στα ελληνικά σε επίπεδο σύνθεσης γίνεται λόγω άγνοιας της ελληνικής αντιστοιχίας έχοντας ως βάση τη γερμανική λέξη και λειτουργεί ως στρατηγική κάλυψης του λεξιλογικού κενού από τη μια και ως στρατηγική επικοινωνίας από την άλλη για να συνεχιστεί η ροή του διαλόγου.

4. Συμπεράσματα και διδακτικές προτάσεις

Τα αποτελέσματα της έρευνας μας οδηγούν σε κάποια πρώτα συμπεράσματα. Υπάρχουν ενδείξεις ότι οι μαθητές χρησιμοποιούν τη δομική μεταφορά στην περίπτωση της σύνθεσης από τα γερμανικά στα ελληνικά με δημιουργικό τρόπο και ως στρατηγική κάλυψης και ως στρατηγική επικοινωνίας. Στην προσπάθειά τους να καλύψουν λεξιλογικά κενά και με σκοπό την ομαλή εξέλιξη και συνέχιση της επικοινωνιακής κατάστασης καταφεύγουν στη δημιουργική χρήση της γλώσσας μέσα από τη σύνθεση. Η ικανότητα για σύνθεση που καταγράφεται στους μαθητές δηλώνει τη δημιουργική χρήση της γλώσσας και είναι ένδειξη ότι ο μηχανισμός σύνθεσης της ελληνικής γλώσσας έχει κατακτηθεί και με την έννοια αυτή μπορεί και αξιοποιείται δημιουργικά στις ποικίλες περιστάσεις επικοινωνίας, παρόλο που τα νέα αυτά δημιουργήματα μπορεί να μην αντιστοιχούν σε λέξεις του ελληνικού λεξιλογίου. Η ικανότητα και μόνο δημιουργίας έστω ανύπαρκτων σύνθετων στην ελληνική γλώσσα δηλώνει την κατάκτηση του μηχανισμού σύνθεσης. Ως προς τη μεταφορά στοιχείων από την πρώτη στη δεύτερη γλώσσα τα αποτελέσματά μας συμφωνούν με αυτά της Tzakosta (2011).

Η εμπειρία μας με Έλληνες μαθητές Δημοτικού στην Ελλάδα έχει δείξει ότι οι μαθητές δημιουργούν συχνά επίσης ανύπαρκτα στα ελληνικά σύνθετα παίζοντας κατά κάποιον τρόπο με τις δυνατότητες που τους δίνει η ελληνική γλώσσα να δημιουργήσουν νέες λέξεις, έχοντας βεβαίως κατακτήσει και εσωτερικεύσει το μηχανισμό της σύνθεσης. Συμπεραίνουμε, λοιπόν ότι η δημιουργία ανύπαρκτων ελληνικών συνθέτων από Έλληνες μαθητές στη Γερμανία είναι ένδειξη δημιουργικότητας στα ελληνικά τους και αντικατοπτρίζει παράλληλα και τη διαγλώσσα τους τη συγκεκριμένη χρονική στιγμή/ περίοδο.

Συνεπώς, τα στοιχεία αυτά μας επιτρέπουν να υποστηρίξουμε ότι οι μαθητές είναι εν δυνάμει αμφίγλωσσοι και όχι ημίγλωσσοι όπως συχνά έχει υποστηριχθεί. Επίσης, καταδεικνύεται ότι χρησιμοποιούν την άλλη τους γλώσσα, τα γερμανικά, ως στήριγμα για να διαμορφώσουν τα διάφορα στάδια διαγλώσσας. Η εξέλιξη της διαγλώσσας των μαθητών με στόχο την προσέγγιση της αμφίγλωσσας ή της ισοδύναμης διγλωσσίας για τις επικοινωνιακές τους ανάγκες εξαρτάται και από τη διδακτική μας παρέμβαση που θα κάνουμε ως εκπαιδευτικοί στην τάξη. Καλούμαστε λοιπόν ως εκπαιδευτικοί της ελληνικής ως δεύτερης γλώσσας να εντοπίζουμε ξανά και ξανά, τα σημεία που δυσκολεύουν τους μαθητές μας και να τα διδάσκουμε με συστηματικό τρόπο με αφορμή κάποιες εσφαλμένες παραγωγές λόγου και πατώντας πάνω σε αυτές.

Η δομική μεταφορά κατά τη σύνθεση, όπως καταγράφεται στο λόγο των δίγλωσσων μαθητών της έρευνας, δίνει κατευθύνσεις για τη διδασκαλία της ελληνικής γλώσσας στη Γερμανία αναφορικά με τη σύνθεση. Κάθε εκπαιδευτικός οφείλει να λαμβάνει υπόψη του, τους υπάρχοντες γνωστικούς μηχανισμούς των μαθητών κατά τη σύνθεση, όπως αυτοί εκφράζονται στο λόγο τους και να διδάσκει, με αφορμή το γλωσσικό αποτέλεσμα στοιχεία που αντιλαμβάνεται ότι δεν έχουν κατακτηθεί ακόμη στην ελληνική γλώσσα.

Επιπλέον, καλείται κάθε εκπαιδευτικός να διδάσκει παράλληλα πιο συστηματικά λεξιλόγιο σε ελληνόπουλα στο εξωτερικό, ώστε να διευρυνθεί και να εμπλουτιστεί το λεξιλόγιό τους με απώτερο σκοπό τη βελτίωση της κατανόησης αλλά και της παραγωγής προφορικών και γραπτών κειμένων. Αυτό εκφράζεται στην πράξη από τη μια ως συστηματική διδασκαλία θεματικού λεξιλογίου και από την άλλη ως συστηματική παρουσίαση και διδασκαλία σημασιολογικών κατηγοριών με άξονα την παραγωγή λέξεων της νέας ελληνικής εστιάζοντας στην επιθηματοποίηση και τη προθηματοποίηση. Η πρόταση αυτή είναι κοντά σε αυτή της Ευθυμίου (2001) που προτείνει για την ελληνική ως μητρική να διδάσκεται πιο συστηματικά η παραγωγή και η σύνθεση στο γλωσσικό μάθημα.

Ενδεικτικά, για τη διδασκαλία της ελληνικής ως δεύτερης γλώσσας, όταν ο εκπαιδευτικός εντοπίσει αδυναμία των μαθητών στο να ονομάσουν τα διάφορα δέντρα στα ελληνικά, μία διδακτική ενότητα με σχετικό κείμενο και το επίθημα «-ιά» θα δώσει εύκολα και γρήγορα τις βάσεις για να θυμάται ο μαθητής ότι μία σημασία του επιθήματος «-ιά» είναι η σημασία ‘δέντρο’. Συγκεκριμένα, για τις παράγωγες λέξεις σε «-ιά» φαίνεται ιδιαίτερα χρήσιμη η διδακτική προσέγγιση της Ευθυμίου

(2000) μέσα από πέντε στάδια: την αναγνώριση, την ερμηνεία, την κατάκτηση, την επαναχρησιμοποίηση και τέλος την παραγωγή λέξεων.

Κλείνοντας συγκρατούμε δύο βασικά σημεία. Πρώτον, ότι η δομική μεταφορά στην περίπτωση της σύνθεσης από Έλληνες δίγλωσσους μαθητές στη Γερμανία, είναι ένδειξη κατάκτησης τους μηχανισμού σύνθεσης και έκφραση της ικανότητάς τους για δημιουργική χρήση της ελληνικής γλώσσας. Το δεύτερο σημείο είναι ότι οι μαθητές είναι εν δυνάμει αμφίγλωσσοι και όχι ημίγλωσσοι και χρειάζονται τη συνεχή και συστηματική υποστήριξη του δασκάλου της ελληνικής γλώσσας ο οποίος με συστηματική διδασκαλία θα τους οδηγήσει σε επόμενα στάδια διαγλώσσας και όσο το δυνατόν πιο κοντά στην αμφίγλωσσία για τις επικοινωνιακές τους ανάγκες.

ABSTRACT

The paper discusses a number of issues involved in identifying morphological oppositions in the area of Tense, Aspect and Modality in (Modern) Greek. Various difficulties faced by traditional and more recent approaches are noted and the importance of overt morphological expression is emphasized. Using morphology as a starting point, a number of specific proposals for the description of individual (sub-)categories can be supported.

Λέξεις κλειδιά: χρόνος, όψη, τροπικότητα, μορφολογική έκφραση, ασυμμετρίες μορφής-σημασίας

1. Εισαγωγή

Είναι κοινός τόπος στη διαγλωσσική μελέτη των ρηματικών κατηγοριών ότι σπάνια η ονομασία της καθεμιάς μπορεί να περιγράψει εξαντλητικά και με σαφήνεια τη σημασία της: έτσι, λ.χ., ένας «χρόνος» σπάνια δηλώνει μόνο χρονικές σχέσεις, ένας «μελλοντικός χρόνος» σπάνια αναφέρεται μόνο στο μέλλον, μια «προστακτική» σπάνια χρησιμεύει μόνο για να εκφράσει προσταγές ή έστω μόνο κατευθυντικές γλωσσικές πράξεις, κ.ο.κ. Επομένως, η απόφαση για τις σχετικές διακρίσεις και τις ονομασίες τους δεν είναι πάντα εύκολη – ενώ, αντίθετα, είναι πάντα εύκολο να βρεθούν παραδείγματα (έστω περιθωριακά) που να τις θέτουν σε αμφισβήτηση.

Στην περίπτωση της ελληνικής, η ισχυρή παράδοση της ανάλυσης των ρηματικών κατηγοριών της αρχαίας περιπλέκει ακόμα περισσότερο τα πράγματα, ενισχύοντας τον, ούτως ή άλλως υπαρκτό, συντηρητισμό που χαρακτηρίζει οποιαδήποτε γραμματική περιγραφή (βλ. τις σχετικές συζητήσεις στα Ρούσσου & Τσαγγαλίδης 2010, Τσαγγαλίδης 2001 και Θωμόπουλος 1945, μεταξύ άλλων). Ερωτήματα όπως τα ακόλουθα: *Ποιοι είναι οι χρόνοι του νεοελληνικού ρήματος; Ποιες είναι οι εγκλίσεις του νεοελληνικού ρήματος; Γενικότερα, ποια είναι τα «παρεπόμενα» του νεοελληνικού ρήματος;* συνηθέστερα θα προκαλέσουν το ερώτημα «μα είναι διαφορετικές από τις αντίστοιχες κατηγορίες της αρχαίας;» (υπονοώντας σαφώς το άλλο ερώτημα: «είναι δυνατό να είναι διαφορετικές από τις αντίστοιχες κατηγορίες της αρχαίας;») και εντελώς σπάνια θα θέσουν το πραγματικό ζητούμενο: *Πώς παίρνουμε τις σχετικές αποφάσεις;*

Σε σχέση με αυτό το ερώτημα, και εφόσον ερμηνεύω σωστά τον Jespersen (1924: 47, 321 – βλ. και Τσαγγαλίδης 2001), υπάρχουν δύο πιθανά σφάλματα κατά την προσπάθεια περιγραφής ενός γραμματικού συστήματος: το αλληθώρισμα προς τις κατηγορίες κάποιου άλλου συστήματος (με συλλογισμούς του τύπου «αφού η γλώσσα Α διαθέτει την κατηγορία X, θα πρέπει να τη διαθέτει και η γλώσσα Β») και η προσφυγή σε *αφελή* εννοιολογικά κριτήρια (π.χ. «ο τύπος Y είναι τύπος της προστακτικής, αφού μπορεί να χρησιμοποιηθεί για να εκφράσει προσταγή»). Με δυο λόγια, οι κατηγορίες του νεοελληνικού ρήματος μπορεί και πρέπει να περιγραφούν ανεξάρτητα από τις κατηγορίες οποιουδήποτε άλλου συστήματος (συμπεριλαμβανομένων και όλων των προγόνων του).

Αυτή η ανεξαρτησία της περιγραφής δεν υπαινίσσεται (και δεν δικαιολογεί) την άγνοια ούτε των ιστορικών δεδομένων ούτε των διαγλωσσικών τυπολογιών των αντίστοιχων κατηγοριών, ούτε βέβαια των σχετικών προβλέψεων που στηρίζονται σε προσεγγίσεις όπως η θεωρία της γραμματικοποίησης ή η παραμετροποίηση των λειτουργικών κατηγοριών (βλ. ενδεικτικά, και σε σχέση με τις ρηματικές κατηγορίες, τα αντίστοιχα ζητήματα που συζητούν οι Bybee, Perkins & Pagliuca 1994, Joseph 2004, Roberts & Roussou 2003, Μόζερ 2009). Είναι βέβαιο όμως ότι και τα ιστορικά δεδομένα δεν είναι ποτέ πλήρη (αν μη τι άλλο καθώς δεν περιλαμβάνουν δεδομένα προφορικού λόγου), οι διαγλωσσικές γενικεύσεις βασίζονται (ή θα έπρεπε να βασίζονται) σε εξαντλητικές περιγραφές μεμονωμένων γλωσσών και επομένως παραμένουν θεωρητικές γενικεύσεις «υπό αναθεώρηση», ακριβώς όπως και οι πιο προφανώς θεωρητικές προσεγγίσεις της γραμματικοποίησης ή της παραμετροποίησης. Με δυο

λόγια, όσο κι αν αμφισβητείται η πληρότητα μιας καθαρά συγχρονικής περιγραφής, στην πραγματικότητα είναι η πληρέστερη δυνατότητα που διαθέτουμε, δεδομένων όλων των άλλων περιορισμών.

Έτσι, η όποια περιγραφή μπορεί να προϋποθέσει συγκεκριμένα γλωσσικά καθολικά, τυπολογικές προβλέψεις, γνωσιακούς περιορισμούς, μπορεί να λάβει υπόψη κληρονομημένα ελληνικά χαρακτηριστικά, βαλκανισμούς και άλλες επιρροές, όμως η τελική απόφαση και η σχετικές κατηγοριοποιήσεις θα πρέπει να στηρίζονται στα πραγματικά συγχρονικά δεδομένα. Αυτά βέβαια επιδέχονται ένα πλήθος από γνωσιακές, σημασιολογικές και πραγματολογικές προσεγγίσεις της διαπλοκής των ρηματικών κατηγοριών (τόσο μεταξύ τους όσο και με τα λοιπά χαρακτηριστικά της πρότασης και της εκφώνησής της). Όμως, ως προς την αναλυτική τους περιγραφή, μόνο η μορφολογία μπορεί να θεωρηθεί ασφαλές έδαφος (“the safe ground of verbal forms actually found in a language” – Jespersen 1924: 321), στο οποίο μπορούν να βασιστούν οι σχετικές κατηγοριοποιήσεις.

2. Μορφολογικοί ορισμοί στο πεδίο του χρόνου

Όσο κι αν δεν είναι εύκολα αποδεκτό (στο πλαίσιο της παράδοσης της περιγραφής της ελληνικής), η μόνη ορατή διάκριση χρόνου είναι αυτή μεταξύ των χαρακτηριστικών [+παρελθόν] και [-παρελθόν]. Κάθε παρεμφατικός ρηματικός τύπος, υποχρεωτικά χρησιμοποιεί είτε τις καταλήξεις του ενός είτε του άλλου: αν περιοριστούμε στους μονολεκτικούς τύπους της ενεργητικής φωνής, οι διαθέσιμες καταλήξεις θα είναι είτε αυτές του *γράφω* (και άρα και του *γράφω*), δηλαδή το σύνολο <-ω, -εις, -ει, -ουμε, -ετε, -ουν> είτε αυτές του *έγραφα* (και άρα και του *έγραφα*), δηλαδή το σύνολο <-α, -ες, -ε, -αμε, -ατε, -αν> (βλ. όμως και Spyropoulos & Revithiadou 2009). Δεν θα επαναλάβω εδώ τις αδυναμίες της παραδοσιακής προσέγγισης να δεχθεί την ισότιμη αντιμετώπιση του τύπου *γράφω* ως τύπου που φέρει το ίδιο ακριβώς χρονικό χαρακτηριστικό όπως και ο τύπος *γράφω* (βλ. Τσαγγαλίδης 2002α και 2002β) – αλλά θα επιμείνω ότι πρέπει να υπάρξει ισχυρός λόγος για να ΜΗΝ θεωρηθεί ότι το σύνολο των καταλήξεων που χρησιμοποιεί εκφράζει ακριβώς τις ίδιες κατηγορίες (Χρόνου και Συμφωνίας) που εκφράζει και το (ολόιδιο) σύνολο καταλήξεων του *γράφω*. Προφανώς πάντως το καθαρά μορφολογικό ζήτημα του σχηματισμού είναι ξεκάθαρο και μπορεί να διατυπωθεί με ξεκάθαρο τρόπο, χωρίς να συνδέεται (και να συσκοτίζεται) από τους σημασιολογικούς και συντακτικούς περιορισμούς που σίγουρα υπάρχουν: με εντελώς ανάλογη συλλογιστική, το ότι το *γάλα* και η *ζάχαρη* δεν *σημαίνουν* κάτι εξίσου «ενικό» όπως το *κουτάλι* και η *κούπα* σίγουρα δεν αναιρεί την (ορθή και προφανή) κατηγοριοποίησή τους ως τύπων του Ενικού Αριθμού.

Σε ένα επόμενο επίπεδο, αντίστοιχα, η υπόσταση του *θα* δεν είναι εύκολο να διατυπωθεί με τρόπο που να καλύπτει όλες τις εμφανίσεις του, αν αυτό θα σήμαινε ότι θέλουμε να έχουμε ενιαία συμπεριφορά από την άποψη της σύνταξης, της σημασιολογίας και της πραγματολογίας. Στο επίπεδο του σχηματισμού, είναι προφανές και αδιαμφισβήτητο ότι όλοι οι παρεμφατικοί ρηματικοί τύποι μπορούν να συνοδεύονται από το *θα*, το οποίο σε κάθε περίπτωση *θα* μπορεί να δέχεται άρνηση με το *δεν* στην αμέσως προηγούμενη από το *θα* θέση και η ακολουθία <*θα* + ρήμα> μπορεί να διακόπτεται μόνο από κλιτικά της προσωπικής αντωνυμίας. Τα τυπικά αυτά στοιχεία ΔΕΝ διαφοροποιούν μεταξύ των αναγνωρισμένων χρονικών συνδυασμών του *θα* (στα *θα γράφω*, *θα γράψω*, *θα έχω γράψει*) και των άλλων (εν πολλοίς ανώνυμων και απερίγραπτων) συνδυασμών του *θα* (*θα έγραφα*, *θα έγραφα*, *θα είχα γράψει*). Είτε το *θα* θεωρηθεί δείκτης του μέλλοντα είτε κάποιας τροπικότητας δεν παύει να έχει ακριβώς τα ίδια τυπικά χαρακτηριστικά, ανεξάρτητα από όλους τους άλλους περιορισμούς στην εμφάνιση του κάθε συνδυασμού σε συγκεκριμένα συντακτικά και άλλα περιβάλλοντα.

Σε γενικές γραμμές πάντως, στο πεδίο του χρόνου, οι μορφολογικές διακρίσεις είναι απλές και οι αντιστοιχίες τους με κατηγορίες όπως παρόν, παρελθόν και μέλλον είναι γενικά αποδεκτές (με μικρές εξαιρέσεις, όπως το *γράφω*). Παρά τις προφανείς αυτές αντιστοιχίες, η επίδραση της παράδοσης (είτε των κλασικών γλωσσών είτε της καθιερωμένης τριανταφυλλιδικής ανάλυσης) είναι ισοπεδωτική: οι διαθέσιμοι όροι βρίσκουν αντίκρισμα (έστω και αν πολλαπλώς είναι προβληματική η αντιστοιχισή τους – βλ. π.χ. ‘ένεστώτας’ και ‘αόριστος’) ενώ οι υπαρκτοί τύποι που δεν διαθέτουν καθιερωμένη ονομασία παραμένουν άστεγοι και ανώνυμοι (όπως οι συνδυασμοί *θα έγραφα*, *θα έγραφα*, *θα είχα γράψει*). Αξίζει βέβαια να σημειωθεί ότι οι μεγάλες πρόσφατες γραμματικές έχουν κάνει σημαντικά βήματα προς την πληρότητα των σχετικών περιγραφών (βλ. Holton, Mackridge & Φιλίππакη-Warburton 1997/99, Κλαίρης & Μπαμπινιώτης 2005 καθώς και Τσαγγαλίδης 2001, 2002α και 2002β, Βελούδης 2006, Γιαννουλοπούλου & Τσαγγαλίδης 2006). Οι προσπάθειες αυτές όμως, όπως φαίνεται και από τα πρόσφατα σχολικά εγχειρίδια, δεν έχουν βρει το δρόμο προς την κοινή χρήση.

3. Μορφολογικοί ορισμοί στο πεδίο της όψης

Ανάλογη είναι η κατάσταση και στο πεδίο της όψης. Η διάκριση ενεστωτικού και αοριστικού θέματος είναι υπαρκτή και ορατή για το σύνολο σχεδόν των ρημάτων της νέας ελληνικής (και υπάρχουν και αρκετά καλές εξηγήσεις για την απουσία της διάκρισης σε συγκεκριμένες κατηγορίες ρημάτων – βλ. Comrie 1976, Μόξερ 1994, Tsangalidis 1999). Η δυσκολία και πάλι προκύπτει πέρα από την ξεκάθαρη μορφολογική διάκριση: ποια είναι η φύση της διάκρισης, πώς ονομάζονται οι σχετικές κατηγορίες και ποιος θα καθορίσει τις σχετικές αποφάσεις. Ενδεικτική είναι η σχετική ποικιλία της ορολογίας:

- Τρόπος (δράσης) – π.χ. στη Γραμματική Τριανταφυλλίδη
- Ποιόν ενεργείας – π.χ. στη Γραμματική Κλαίρη-Μπαμπινιώτη
- Άποψη – π.χ. Μόξερ 1994
- (Ρηματική) Όψη – π.χ. Βελούδης 2010

Η μορφολογία και πάλι όμως επιτελεί το καθήκον της πιστά: κάθε ρηματικός τύπος (αυτή τη φορά είτε πρόκειται για παρεμφατικό είτε για μη παρεμφατικό), οπωσδήποτε θα σχηματίζεται είτε με το ενεστωτικό είτε με το αοριστικό θέμα, χωρίς καμία αμφιβολία (εκτός βέβαια από τις περιπτώσεις ομόηχων θεμάτων σε -ν-, σε -λλ- και λίγων άλλων – βλ., λ.χ. Μαγουλά & Κατσούδα 2011). Δεν υπάρχει πάντως αμφιβολία ότι οι τύποι *γράφω*, *θα γράφω*, *έγραφα*, *θα έγραφα*, *γράφει*, *γράφοντας* περιέχουν το ενεστωτικό θέμα, ενώ οι τύποι *γράφω*, *θα γράψω*, *έγραψα*, *θα έγραψα*, *γράψε*, *γράψει* (στους συντελικούς τύπους) περιέχουν το αοριστικό.

Ο σημασιολογικός χαρακτηρισμός είναι που περιπλέκει τα πράγματα, και προφανώς εκεί οφείλεται και η αδυναμία ομοφωνίας στην ονομασία των μελών της προφανούς αυτής διάκρισης. Ξέρουμε ότι το ζεύγος *γράφει-γράψε* εκφράζει την ίδια διάκριση με το *έγραφε-έγραψε* και το *θα γράφεις-θα γράψεις*. Πώς όμως θα ονομαστεί το καθένα; Μεταξύ άλλων, έχουν προταθεί τα εξής:

- στιγμιαίο-διαρκείας (Γραμματική Τριανταφυλλίδη)
- τέλειο-ατελές (Γραμματική Κλαίρη-Μπαμπινιώτη)
- συντελεσμένο-ασυντέλεστο (Μοσχονάς 1990-91)
- συνοπτικό-μη συνοπτικό (Βελούδης 2005)

Εδώ το πρόβλημα είναι λίγο πιο σύνθετο από ό,τι στην περίπτωση του χρόνου, για αρκετούς λόγους: η παράδοση των κλασικών γλωσσών δεν περιέχει ξεκάθαρα αντίστοιχες κατηγορίες (αν και πολλά ιστορικά στάδια της εξέλιξης του ελληνικού ρήματος μπορούν πλέον να περιγραφούν με όρους όψης – βλ. π.χ. Bary 2009). Εξάλλου, η έννοια του ‘τρόπου’ όπως την εισήγαγε ο Τριανταφυλλίδης αποδείχτηκε αδιαφανής και τελικά όχι ιδιαίτερα χρήσιμη (όπως σημείωνε ο Καρατζάς στην Εισαγωγή του στη μετάφραση του Mirambel (1978: ι) «δε δίνει ... τη σωστή έννοια του όρου σε όλη του την έκταση»). Σε κάθε περίπτωση, η κατηγορία της όψης είναι γνωσιακά πιο σύνθετη από αυτή του χρόνου και έτσι είναι πολύ πιο εύκολες οι πιθανές διαφορετικές προσεγγίσεις των ίδιων δεδομένων αλλά και η αμφισβήτησή τους. Σε αυτό το πλαίσιο, οι όποιες σύγχρονες προσπάθειες είναι πολύ εύκολο να κατηγορηθούν (περισσότερο ή λιγότερα δίκαια) ότι «βιαστικά συμπεραίνουν όσοι αρκούνται να μεταφέρουν στα καθ’ ημάς θεωρίες για τ’ Αγγλικά ή τα Γαλλικά» (Μοσχονάς 1990-91: 167).

4. Μορφολογικοί ορισμοί στο πεδίο της έγκλισης/τροπικότητας

Στην περίπτωση της έγκλισης και της τροπικότητας η ένταση μεταξύ των ‘παραδοσιακών’ και των ‘εκσυγχρονιστών’ είναι ακόμα μεγαλύτερη, καθώς είναι οφθαλμοφανές ότι οι κατηγορίες της αρχαίας ελληνικής έχουν αλλάξει. Εξάλλου, είναι δύσκολο να αντιστοιχιστούν οι κατηγορίες της νέας ελληνικής με αυτές των άλλων γλωσσών, καθώς τόσο για την ελληνική όσο και για πολλές άλλες γλώσσες είναι προβληματική και η σχέση έγκλισης και τροπικότητας και η αριθμητική της καθεμίας (και βέβαια οι ονομασίες και το ακριβές περιεχόμενο των σχετικών (υπο)κατηγοριών).

Η έγκλιση είναι η γραμματική έκφραση της τροπικότητας – και πάλι ο ασφαλέστερος καθορισμός των γραμματικοποιημένων κατηγοριών σε μια γλώσσα βασίζεται στη μορφολογική τους έκφραση. Δεν θα επαναλάβω εδώ τις λεπτομέρειες σχετικά την απώλεια της μορφολογικής διάκρισης τόσο της ευκτικής όσο και της υποτακτικής της αρχαίας: εδώ και πολλούς αιώνες, η μορφολογία του ρήματος της ελληνικής διακρίνει μόνο μεταξύ προστακτικής και μη προστακτικής στο επίπεδο των μονολεκτικών τύπων (βλ. Ρούσσου & Τσαγγαλίδης 2010 και τις αναφορές εκεί). Αν υπερβούμε το όριο της λέξης, οι συνδυασμοί με το *να* και το *ας* είναι προφανώς διαθέσιμοι να συνοδεύουν όλους

τους παρεμφατικούς τύπους όλων των ρημάτων – και με παρόμοια τυπικά χαρακτηριστικά: επιλέγουν τον δείκτη άρνησης *μην* στην αμέσως επόμενη θέση, και κατά τα άλλα επιτρέπουν μόνο κλιτικά της προσωπικής αντωνυμίας ανάμεσά σε αυτά και το ρήμα.

Μικρή σημασία έχει αν θα ονομαστούν τύποι της υποτακτικής (κατά Βελούδη & Φιλίππακη-Warburton 1983) ή τροπικοί τύποι (όπως από τους Κλαίρη-Μπαμπινιώτη) ή κάτι άλλο: σε κάθε περίπτωση είναι υπαρκτοί συνδυασμοί και σχετίζονται με την έκφραση τροπικότητας (σε κύριες εκφορές) ενώ το να λειτουργεί και σαν δείκτης υπόταξης. Κάποιος άλλος δείκτης τροπικότητας δεν φαίνεται να έχει ιδιαίτερα σημαντικό ρόλο στην οργάνωση του ρηματικού συστήματος της νέας ελληνικής, αν και είναι προφανής η ύπαρξη, η συνδυαστικότητα και η πολυ-λειτουργικότητα των τροπικών ρημάτων (δυνατότητας και αναγκαιότητας, αντίστοιχα) *μπορώ/μπορεί* και *πρέπει* (Ιακώβου 1999, Τσαγγαλίδης 2003, Tsangalidis 2009).

Οι «συνταχτικές εγκλίσεις» που αναγνωρίζονται στη Γραμματική Τριανταφυλλίδη (1941: 315, παρ. 847) είναι προφανώς σημασιολογικά οριζόμενες υπο-περιπτώσεις των κατά τα άλλα διακριτών συνδυασμών των τροπικών μορίων *θα*, *να* και *ας*. Μορφολογικά δεν υπάρχει κάτι ιδιαίτερο ως προς τους συνδυασμούς αυτούς: αν δηλαδή όλοι οι συνδυασμοί του *θα* ανήκουν στην οριστική (κατά Βελούδη & Φιλίππακη-Warburton 1983), προφανώς εκεί ανήκουν και οι «δυννητικοί» και οι «πιθανολογικοί» συνδυασμοί του. Παρόμοια, αν οι συνδυασμοί του *να* και του *ας* θεωρηθούν τροπικοί τύποι ή τύποι της υποτακτικής, εκεί ανήκουν και οι «ευχετικοί» συνδυασμοί (βλ. και Τσαγγαλίδης 2001).

5. Άλλες μορφολογικές διακρίσεις ρηματικών κατηγοριών

Άλλες ρηματικές κατηγορίες που χρειάζεται να περιγραφούν με μορφολογικούς όρους περιλαμβάνουν τους συντελικούς τύπους (τους συνδυασμούς του βοηθητικού *έχω* με τον μη παρεμφατικό συνοπτικό τύπο) που έχουν προφανή συστατικά τις υπόλοιπες κατηγορίες που δηλώνονται από το *έχω*: χρόνος (+/-παρόν, +/-μέλλον) και τροπικότητα (+/-να, +/-ας) εκφράζονται όπως και με κάθε ρήμα. Το ερώτημα αν οι συντελικοί τύποι είναι διακριτοί χρόνοι ή εκφράσεις όψης ή κάτι διαφορετικό δεν έχει πλέον ιδιαίτερο ενδιαφέρον είτε σε θεωρητικό είτε σε πρακτικό επίπεδο, εφόσον ο σχηματισμός τους, σε κάθε περίπτωση, πρέπει να περιγραφεί ξεχωριστά.

Ο τύπος *γράφει* στον συνδυασμό *έχω γράψει* χαρακτηρίζεται «απαρέμφατο» στη Γραμματική Τριανταφυλλίδη και «μη παρεμφατικός» στη Γραμματική των Holton, Mackridge & Φιλίππακη-Warburton. Ανεξάρτητα από την ονομασία που θα προτιμηθεί, η υπόστασή του είναι ξεκάθαρη: αποτελείται από το αοριστικό/συνοπτικό θέμα και έχει κατάληξη ομόηχη με αυτή του γ' ενικού προσώπου, αν και είναι σαφές ότι δεν δηλώνει πρόσωπο.

Οι κλιτές μετοχές σε *-μενος* και σε *-μένος* έχουν επίσης προφανή διακριτά μορφολογικά χαρακτηριστικά: από τις ρηματικές κατηγορίες, ανήκουν στη μέση φωνή, και σχηματίζονται με το ενεστωτικό θέμα οι πρώτες και με ένα ιδιαίτερο (αλλά πάντως συνοπτικό) θέμα οι άλλες. Δηλώνουν επίσης γένος, αριθμό και πτώση (προφανώς ονοματικά χαρακτηριστικά) και επομένως δικαιολογούν απόλυτα την ονομασία τους, καθώς μετέχουν και στο ονοματικό και στο ρηματικό σύστημα. Είναι επίσης προφανές ότι η χρήση τους άλλοτε αντιστοιχεί με αυτή των επιθέτων και άλλοτε τις κάνει απλώς τμήματα ρηματικών σχηματισμών (π.χ. του παρακειμένου β').

Αντίθετα, οι άκλιτες μετοχές σε *-οντας/-ώντας* δεν διαθέτουν (πλέον) κανένα ονοματικό χαρακτηριστικό. Επομένως δεν μπορούν να δικαιολογηθούν πλέον την παραδοσιακή τους ονομασία, έστω κι αν ο όρος «γερούνδιο» που έχει προταθεί (από τους Holton, Mackridge & Φιλίππακη-Warburton – βλ. και Tsimpli 2000) δεν γίνεται εύκολα αποδεκτός (βλ. Μόζερ 2002, Νάκας 2003). Σίγουρα πάντως χρειάζεται να διαφοροποιηθούν από τις κλιτές μετοχές που είδαμε παραπάνω, καθώς ανήκουν στην ενεργητική φωνή, σχηματίζονται από το ενεστωτικό θέμα και με εντελώς δική τους κατάληξη (και συνακόλουθη συντακτική συμπεριφορά).

6. Συμπεράσματα

Αυτό που υποστηρίχτηκε παραπάνω σε σχέση με όλες τις κατηγορίες που συζητήθηκαν είναι πως οι μορφολογικές ενδείξεις σε κάθε περίπτωση αποτελούν στοιχεία που δεν μπορεί να αγνοηθούν. Ανεξάρτητα από την ιστορική εξέλιξη και από τις διαγλωσσικά έγκυρες προσδοκίες μας, τα ίδια τα δεδομένα πρέπει να περιγράφονται με ακρίβεια. Στην περίπτωση των κατηγοριών Χρόνου-Όψης-Τροπικότητας, υπάρχουν αρκετά σαφείς ενδείξεις για τη συστηματική πραγμάτωση συγκεκριμένων διακρίσεων. Η αναγνώριση των υπαρκτών διακρίσεων είναι το πρώτο απαραίτητο βήμα – ενώ η αντιστοίχισή τους με διαγλωσσικά πρότυπα ή με γνωσιακές ή καθολικές κατηγορίες θα πρέπει να

έπεται (για προφανείς λόγους λογικής και μεθοδολογικής συνέπειας). Από την άποψη αυτή, τα χαρακτηριστικά [+/-παρελθόν], [+/-συνοπτικό] και [+/-προστακτική] είναι απαραίτητο να αναγνωριστούν ως τα στοιχειώδη μορφολογικά συστατικά της σύνθετης περιοχής των ρηματικών κατηγοριών τα οποία θα αποτελέσουν τη βάση για τις αναλύσεις των πολύπλοκων σημασιακών δυνατοτήτων του συστήματος: στο επίπεδο της ερμηνείας, η διαπλοκή των στοιχείων είναι δεδομένη και προβλέψιμη.

ABSTRACT

The aim of the study is to discuss punning as a discursual strategy in the Greek parliament: Why do parliamentarians use puns in their speeches? How do they react to other parliamentarians' puns? Are puns accepted or rejected in this context? The data under scrutiny comes from the official parliamentary proceedings and involves a 'no confidence' debate which took place in 2007. The analysis reveals that puns are employed to undermine, criticize, and challenge the opponents, as well as to show solidarity among parliamentarians. Furthermore, they underline parliamentarians' rhetorical skills. Thus, they seem to be a popular strategy in this context.

Λέξεις κλειδιά: λογοπαίγνια, κοινοβουλευτικό λόγος, χιούμορ, ρητορική ικανότητα, πρόταση δυσπιστίας, ανάλυση λόγου, οριοθέτηση ομάδων

1. Εισαγωγή

Η σύγχρονη μελέτη του κοινοβουλευτικού λόγου στρέφεται ολοένα και περισσότερο σε γλωσσικές στρατηγικές οι οποίες θεωρούνται χαρακτηριστικές του είδους και εμφανίζονται συχνά σε αυτό. Όπως παρατηρεί η Ilie (2010: 880), ο κοινοβουλευτικός λόγος βαθμιαία τείνει να αποκτήσει έναν τυποποιημένο, τελετουργικό (ritualized) χαρακτήρα, καθώς αφενός υφίσταται θεσμικούς περιορισμούς από τους κανόνες (γλωσσικής ή άλλης) συμπεριφοράς του κοινοβουλίου και αφετέρου οι ίδιοι/ες οι βουλευτές, μέσα από τις πρακτικές τους, συμβάλλουν σε μια λιγότερο ή περισσότερο σταθερή ή και τυποποιημένη μορφή των ομιλιών και των παρεμβάσεών τους (πρβλ. Bayley, 2004: 14).

Στο πλαίσιο αυτό, στόχος της παρούσας μελέτης είναι η διερεύνηση της κοινωνιογλωσσικής λειτουργίας που επιτελούν τα λογοπαίγνια στον λόγο των πολιτικών στο ελληνικό κοινοβούλιο. Συγκεκριμένα, θα προσπαθήσω να απαντήσω στα ακόλουθα ερωτήματα:

- Για ποιους λόγους και στόχους παράγονται λογοπαίγνια από τους/τις πολιτικούς κατά την κοινοβουλευτική διαβούλευση;
- Σημειώνονται αντιδράσεις σε αυτά; Τι είδους είναι οι αντιδράσεις αυτές και από ποιους/ες προέρχονται;
- Αποτελούν, τελικά, τα λογοπαίγνια αποδεκτή γλωσσική στρατηγική στο ελληνικό κοινοβούλιο ή η χρήση τους αξιολογείται αρνητικά στο πλαίσιο αυτό;

2. Ανταγωνισμός και ρητορική στα σύγχρονα κοινοβούλια

Στις σύγχρονες δημοκρατίες η πολιτική διαβούλευση γίνεται κατεξοχήν σε υπερεθνικό επίπεδο (π.χ., στην Ευρωπαϊκή Ένωση), σε ενδοκυβερνητικό επίπεδο, στα ΜΜΕ και στα πολιτικά κόμματα, ενώ οι συζητήσεις στο κοινοβούλιο έχουν σχετικά περιορισμένη συμβολή στη λήψη νομοθετικών ή άλλων αποφάσεων. Γι' αυτό υποστηρίζεται (Bayley, 2004: 10-12· Ilie, 2010: 879) ότι τα σύγχρονα κοινοβούλια έχουν αποκτήσει περισσότερο *συμβολική* αξία, τουλάχιστον σε σχέση με παλιότερες

¹ Θερμές ευχαριστίες οφείλω στη Μαίρη Σηφιανού και τον Αργύρη Αρχάκη για τις εποικοδομητικές παρατηρήσεις τους στο παρόν κείμενο.

εποχές. Ουσιαστικά οι βουλευτές μάχονται για να επιβάλουν το δικό τους νόημα και τη δική τους ερμηνεία για την (πολιτική ή άλλη) πραγματικότητα, επισκιάζοντας τα αντίστοιχα των αντιπάλων.

Κινούμενοι/ες σε ένα τέτοιο ανταγωνιστικό και αντιπαραθετικό περιβάλλον, οι βουλευτές καλούνται να επιδεικνύουν τις ρητορικές (και ευρύτερα γλωσσικές) τους δεξιότητες και με αυτές να φέρνουν σε δύσκολη θέση τους/τις αντιπάλους τους. Η υπεροχή τους αυτή αναμένεται να αναγνωρίζεται τόσο από τους/τις συναδέλφους τους όσο και από το ευρύτερο κοινό (Pérez de Ayala, 2001: 164· Πιε, 2003: 30-31· Μπακάκου-Ορφανού, 2008). Κατά συνέπεια, πολύ συχνά στο κοινοβούλιο οι πολιτικοί ασκούνται (και αρκούνται) στην παραγωγή αξιοσημείων, εντυπωσιακού όσο και επιθετικού λόγου.

Όσον αφορά το ελληνικό κοινοβούλιο, το ίδιο το πολιτικό σύστημα φαίνεται να ευνοεί τις λογομαχίες. Δεδομένου ότι η εκάστοτε κυβερνώσα πλειοψηφία διαθέτει τη νομοθετική πρωτοβουλία και οι συνεργασίες μεταξύ κομμάτων δεν αποτελούν (ακόμη;) μέρος της ελληνικής πολιτικής κουλτούρας, η αντιπαράθεση μεταξύ κυβερνώντος κόμματος και αντιπολίτευσης είναι αναμενόμενη αλλά ταυτόχρονα και περιορισμένης επιρροής: σε αρκετές περιπτώσεις, η κριτική της αντιπολίτευσης δεν καταφέρνει να επηρεάσει σημαντικά τις νομοθετικές αποφάσεις, αφού η κυβέρνηση δεν χρειάζεται την ψήφο των άλλων κομμάτων για να προχωρήσει το έργο της. Σε αυτές τις περιπτώσεις, τα κόμματα λογομαχούν για να κοινοποιήσουν τις διαφορές τους δημοσίως το ένα στο άλλο και ταυτόχρονα στους/στις πολίτες, οι οποίοι/ες παρακολουθούν τα τεκταινόμενα από τα ΜΜΕ (Τσάκωνα, 2008· Tsakona, 2009α, β· 2012).

Στο πλαίσιο αυτό, όπως υποστηρίζει η Σηφianού (2008), οι κοινοβουλευτικές συζητήσεις βρίθουν αντεγκλήσεων, απειλών, επιθετικών και επικριτικών σχολίων. Η υπονόμηση των αντιπάλων αποτελεί κύριο μέλημα των βουλευτών και αναπόσπαστο κομμάτι του θεσμικού τους ρόλου. Με άλλα λόγια, ο συγκρουσιακός λόγος αποτελεί δομικό στοιχείο της κοινοβουλευτικής διαβούλευσης, με αποτέλεσμα η ικανότητα κάθε βουλευτή να συμμετέχει επιτυχώς στην αντιπαράθεση να αναδεικνύεται σε κριτήριο αξιολόγησής του/της τόσο από τους/τις συναδέλφους του όσο και από το ευρύ κοινό.

Τα υπό εξέταση δεδομένα προέρχονται από την τριήμερη συζήτηση της πρότασης δυσπιστίας που κατέθεσε το ΠΑΣΟΚ ως αξιωματική αντιπολίτευση κατά της κυβέρνησης της Νέας Δημοκρατίας τον Φεβρουάριο του 2007.² Μολονότι ήταν μάλλον σαφές από την αρχή ότι η κυβέρνηση δεν θα έπεφτε χάρη στην κομματική πειθαρχία των μελών του κυβερνώντος κόμματος, ο αντιπαραθετικός και επιθετικός χαρακτήρας της συζήτησης ήταν έντονος. Αυτό οφείλεται ενδεχομένως στο γεγονός ότι, όπως συνηθίζεται σε τέτοιου είδους διαδικασίες, η συζήτηση της πρότασης δυσπιστίας συγκέντρωσε το έντονο ενδιαφέρον των ΜΜΕ και των πολιτών, οπότε οι βουλευτές κλήθηκαν να επιδείξουν στο ευρύτερο κοινό τις ικανότητές τους στην εξάσκηση του θεσμικού τους ρόλου (πρβλ. Τσάκωνα, 2008· Tsakona, 2009α).

3. Τα λογοπαίγνια: Ορισμός και λειτουργία

Η παραδοσιακή, φορμαλιστική προσέγγιση θέλει τα λογοπαίγνια να αποτελούν «αποκλίνοσες» από τον γλωσσικό κανόνα χρήσεις, οι οποίες βασίζονται στην ομωνυμία, την παρωνυμία και την πολυσημία, δηλαδή σε λεξικά στοιχεία που εμφανίζουν μεγαλύτερη ή μικρότερη φωνητική ομοιότητα μεταξύ τους ή διαθέτουν περισσότερες της μιας σημασίες. Ως εκ τούτου, οι σχετικές μελέτες εξαντλούνται στη λεπτομερή ταξινόμηση αποπλαισιωμένων παραδειγμάτων, με στόχο την πλήρη περιγραφή, όχι όμως και την πραγματολογική και κοινωνιογλωσσολογική ερμηνεία της λειτουργίας τους.³

Στην παρούσα μελέτη, ακολουθείται μια διαφορετική προσέγγιση για τον ορισμό των λογοπαιγνίων, η οποία λαμβάνει υπόψη το περιβάλλον εκφώνησής τους: λογοπαίγνια παράγονται όταν ο/η ομιλητής/τρια ανακυκλώνει και αναπλαισιώνει στοιχεία που έχουν προηγηθεί στον λόγο του/της ή λιγότερο ή περισσότερο παγιωμένες γλωσσικές (εκ)φράσεις που βρίσκονται σε ευρεία κυκλοφορία, με στόχο να τους προσδώσει διαφορετικό νόημα στο περικείμενο στο οποίο τις χρησιμοποιεί και να τις συνδέσει με αυτό. Κατά τη διατύπωση του Carter (2004: 94), τα λογοπαίγνια είναι ένα είδος *γλωσσικής σχιζοφρένειας* (verbal schizophrenia), καθώς περιλαμβάνουν στοιχεία που «δείχνουν» προς δύο διαφορετικές σημασίες ταυτόχρονα. Βασικό κίνητρο των ομιλητών/τριών για αυτού του είδους τη γλωσσική συμπεριφορά φαίνεται να είναι η παραγωγή «καινούργιων» σημασιών με «παλαιά» υλικά.

² Τα υπό εξέταση δεδομένα μετρούν 213.249 λέξεις και είναι προσβάσιμα στην επίσημη ιστοσελίδα του ελληνικού κοινοβουλίου (www.hellenicparliament.gr).

³ Βλ. μεταξύ άλλων Freud (2009/1905), Attardo (1994: 108-173· 2008: 105-106), Dienhart (1999: 108 κεξ.), Τσάκωνα (2004: 152-159), Partington (2006: 109-111) και τις παραπομπές που δίνονται εκεί.

Δημιουργούνται έτσι άλλοτε συνοχικοί δεσμοί μεταξύ των στοιχείων ενός κειμένου και άλλοτε διακειμενικές συνδέσεις. Η επιτυχής παραγωγή και ερμηνεία των λογοπαιγνίων προϋποθέτει τη γνώση και την ανάκληση της «αρχικής» (εκ)φράσης ή του «αρχικού» (περι)κειμένου, ώστε να είναι σαφής η μεταξύ τους διαφοροποίηση και σύνδεση.⁴

Ας δούμε τα ακόλουθα παραδείγματα:⁵

(1) ΒΑΣΩ ΠΑΠΑΝΔΡΕΟΥ: «*Το κόμμα της μηδενικής ανοχής*» έχει γίνει πλέον *κόμμα συνολικής συνενοχής*. Καλύπτετε αδιακρίτως τα πάντα, σκάνδαλα, περιπτώσεις με πολύ σοβαρά ερωτηματικά, περιπτώσεις με άθλιο *ύφος* και *ήθος* εξουσίας. Και πριν από λίγο καιρό υπερηφανευόσασταν για τους «κουμπάρους» με τις χειροπέδες στη φυλακή. Πού είναι τώρα αυτοί οι «κουμπάρου»; Όχι μόνο έξω από τη φυλακή, αλλά είναι ξανά στην αγκαλιά σας.

Στο παράδειγμα (1), η Β. Παπανδρέου αρχικά παραλλάσσει την ευρύτερα γνωστή δήλωση του (νεότερου) Κ. Καραμανλή περί μηδενικής ανοχής απέναντι στη διαφθορά και κάνει λόγο για *συνολική συνενοχή*, αξιοποιώντας τους ήχους (καταλήξεις σε *-ικής, ανοχής/-ενοχής*), τις αντιθετικές σημασίες που προκύπτουν (*μηδενική/συνολική, ανοχή/συνενοχή*), καθώς και την επανάληψη (*κόμμα*). Στη συνέχεια, παίζει με τους ήχους συνδέοντας παρατακτικά τις λέξεις *ύφος* και *ήθος* που φωνητικά διαφοροποιούνται ελάχιστα. Μέσα από την αντωνυμική σχέση ορισμένων σημασιών και την επανάληψη άλλων ενισχύεται η συνοχή του λόγου της ομιλήτριας.

(2) ΑΘΑΝΑΣΙΟΣ ΛΕΒΕΝΤΗΣ: Η ψυχιατρική μεταρρύθμιση έχει διαλυθεί. Και ξέρετε κάτι; Και η αποασυλοποίηση. *Έχουμε γίνει ένα απέραντο φρενοκομείο!* Αυτό έχει ειπωθεί και παλαιότερα και ξέρετε από ποιον.

(Στο σημείο αυτό κτυπάει το κουδούνι λήξεως του χρόνου ομιλίας του κυρίου Βουλευτή)

Στο παράδειγμα (2), ο Α. Λεβέντης αναπλαισιώνει τη γνωστή ρήση του (παλαιού) Κ. Καραμανλή «Η Ελλάδα είναι ένα απέραντο φρενοκομείο», προκειμένου να την προσαρμόσει στην κριτική που επιχειρεί στην αποτυχημένη -κατά τα λεγόμενά του- προσπάθεια αποασυλοποίησης των ψυχικά ασθενών στη χώρα μας. Από τη μεταφορική στη βάση της ρήσης, το λογοπαίγνιο φέρνει στην επιφάνεια ένα νόημα που βρίσκεται πιο κοντά στην κυριολεξία: η ψυχιατρική μεταρρύθμιση δεν κατάφερε να μειώσει τον αριθμό των ιδρυμάτων και να (επ)εντάξει αποτελεσματικά τους/τις ασθενείς στο κοινωνικό σύνολο. Αναπτύσσεται έτσι ένας διακειμενικός δεσμός ανάμεσα στο απόφθεγμα του παλαιού πολιτικού και τον λόγο του βουλευτή.

Τα δύο αυτά παραδείγματα φέρνουν στην επιφάνεια δύο διαφορετικές όψεις που σχετίζονται με την ικανότητα για παραγωγή λογοπαιγνίων: η μία είναι (μετα)γλωσσική, ενώ η άλλη περισσότερο κοινωνιογλωσσική. Αφενός έχουμε την αξιοποίηση των φωνητικών και σημασιολογικών ομοιοτήτων και διαφορών, βάσει των οποίων επιλέγονται οι λέξεις που θα συνδυαστούν και θα συνεμφανιστούν στο κείμενο· και αφετέρου διακρίνεται μια τάση για αποδόμηση (εκ)φράσεων που βρίσκονται ήδη σε κοινωνική κυκλοφορία και ενίοτε των παραγωγών τους, και ταυτόχρονα για άσκηση κριτικής στον/στην αντίπαλο. Η έρευνα για τον ελληνικό κοινοβουλευτικό λόγο δείχνει ότι και οι δύο όψεις συνδέονται στενά με την ταυτότητα του «ικανού ρήτορα» (βλ. παραπάνω Σηφianού, 2008· Τσάκωνα, 2008· Tsakona, 2009α).

Η ποσοτική επεξεργασία των δεδομένων μου επιβεβαιώνει την ιδιαίτερη σημασία των λογοπαιγνίων στον κοινοβουλευτικό λόγο. Εντασσόμενα σε ένα πλαίσιο χιουμοριστικών μηχανισμών και ειδών, τα λογοπαίγνια είναι το πιο δημοφιλές είδος κοινοβουλευτικού χιούμορ (βλ. Πίνακας 1):

⁴ Βλ. Sacks (1973: 139), Sherzer (1978: 337-340· 1985: 214), Redfern (1984: 157), Dienhart (1999: 123), Gavrilidou (2003: 196), Norrick (2003: 1345), Γαβριηλίδου και Τσάκωνα (2004-2005: 150-158), Carter (2004: 94-100, 128), Τσάκωνα (2004: 152-219), Partington (2006: 119-131). Ειδικά για τα λογοπαίγνια που βασίζονται σε ιδιοματισμούς, βλ. Elspass (2002), Χατζηδάκη (2004).

⁵ Τα αποσπάσματα που αναλύονται εδώ προέρχονται από τα επίσημα πρακτικά του ελληνικού κοινοβουλίου και διατηρούν την ορθογραφία και τη στίξη του πρωτοτύπου. Τα αποσιωπητικά εντός αγκυλών δηλώνουν παράλειψη κειμένου, ενώ με πλάγια γραμματοσειρά σημειώνονται τα λογοπαίγνια.

Χιουμοριστικά είδη	Εμφανίσεις στο υλικό	Ποσοστό (%)
Λογοπαίγνια	72	52,55
Ειρωνεία	51	37,22
Αφηγήσεις	9	6,56
Κατασκευή φανταστικών σεναρίων	3	2,18
Ανέκδοτα	2	1,45
Σύνολο	137	100

Πίνακας 1 Η ποσοτική κατανομή των χιουμοριστικών ειδών στο υπό εξέταση σώμα δεδομένων

Λίγο παραπάνω από τα μισά χιουμοριστικά αποσπάσματα του υπό εξέταση υλικού αποτελούνται από λογοπαίγνια, ενώ ακολουθεί η ειρωνεία με περίπου το ένα τρίτο των αποσπασμάτων (Tsakona, 2011a). Περιορισμένες σε αριθμό είναι οι χιουμοριστικές αφηγήσεις (Archakis and Tsakona, 2011), ενώ ακόμη πιο σπάνια είναι η κατασκευή φανταστικών σεναρίων και τα ανέκδοτα.

Όσον αφορά τη λειτουργία των λογοπαιγνίων, στη σχετική βιβλιογραφία⁶ επισημαίνεται ότι, στην καθημερινή διεπίδραση, οι συνομιλητές/τριες διακόπτουν με αυτά τη συνομιλία για να αλλάξουν θέμα ή και να παίξουν με τη γλώσσα σε λιγότερο ή περισσότερο ανταγωνιστικό και επιθετικό τόνο. Από την άλλη πλευρά, ανακαλώντας και εισάγοντας στη διεπίδραση σημασίες και διακειμενικές αναφορές που δεν είναι άμεσα προφανείς από το περικείμενο, τα λογοπαίγνια λειτουργούν ως συνδετικός κρίκος μεταξύ των συνομιλητών/τριών: τους/τις αναγκάζουν να ανασύρουν σημασίες και κείμενα που είναι ευρύτερα γνωστά, επιβεβαιώνοντας έτσι τις κοινές τους αναφορές και αξίες και συχνά συμβάλλοντας στη διασκέδασή τους. Όποιος/α δεν το καταφέρνει, δεν είναι εύκολο να συμμετάσχει στη διεπίδραση. Αντίθετα, όποιος/α μπορεί να κάνει ή να κατανοήσει τέτοιου είδους παιγνιώδεις συνδέσεις μεταξύ γλωσσικών στοιχείων ή κειμένων, όχι μόνο νομιμοποιείται ως μέλος της ομάδας, αλλά και αξιολογείται συνήθως θετικά και προβάλλεται ως «εύστοφος/η», «πνευματώδης» και «ετοιμόλογος/η».

Ανάμεσα στις πιθανές αντιδράσεις στα λογοπαίγνια συγκαταλέγεται το γέλιο (Sherzer, 1985: 214), η παραγωγή περισσότερων λογοπαιγνίων ή άλλης μορφής χιούμορ ή ακόμη και η άμεση επιστροφή στη σοβαρή συζήτηση (Norrick, 2003: 1337).

Στην (περιορισμένη) βιβλιογραφία σχετικά με τη χρήση των λογοπαιγνίων στην πολιτική επικοινωνία, τονίζεται ότι τα λογοπαίγνια εμφανίζονται με αυξημένη συχνότητα σε δημόσιες λογομαχίες μεταξύ πολιτικών, όπου χρησιμοποιούνται ως ένδειξη της ρητορικής ικανότητάς τους (Elspace, 2002: 90-96). Τα λογοπαίγνια εμφανίζονται απόλυτα ενταγμένα στον λόγο και επιστρατεύονται για να αποσπάσουν την προσοχή του κοινού από την (πολιτική ή άλλη) σημασία όσων λέγονται και να τη στρέψουν στη γλωσσική επιδεξιότητα του/της ομιλητή/τριας. Χρησιμοποιούνται επίσης για να ξεφύγει ο/η ομιλητής/τρια από μια δύσκολη θέση στην οποία έχει βρεθεί λόγω της επιχειρηματολογίας ή της κριτικής του/της αντιπάλου ή για να καθυστερήσει την απάντησή του/της. Επιπλέον, τα λογοπαίγνια χρησιμοποιούνται υπονομευτικά εναντίον του/της αντιπάλου. Όσο μάλιστα πιο δύσκολα ανιχνεύονται οι διακειμενικές αναφορές στις οποίες βασίζονται, τόσο πιο επιτυχημένα θεωρούνται και αξιολογείται θετικά ο/η παραγωγός τους (Partington, 2006: 112-113, 117, 134-142· πρβλ. Tsakona, 2009a).

Στην επόμενη ενότητα, μέσα από την ανάλυση συγκεκριμένων παραδειγμάτων, θα προσπαθήσω να δείξω για ποιους λόγους και με ποιους στόχους οι βουλευτές καταφεύγουν στα λογοπαίγνια στο πλαίσιο της κοινοβουλευτικής διαβούλευσης.

4. Οι λειτουργίες των λογοπαιγνίων στον κοινοβουλευτικό λόγο

Όπως είδαμε προηγουμένως (ενότητα 3), η λειτουργία των λογοπαιγνίων εξαρτάται από το περικείμενο στο οποίο αυτά εμφανίζονται. Θα μπορούσαμε, επομένως, να υποθέσουμε ότι η λειτουργία τους στο κοινοβούλιο διαφοροποιείται σε σχέση με την καθημερινή διεπίδραση, στο πλαίσιο της οποίας τα λογοπαίγνια έχουν ως επί το πλείστον μελετηθεί.

Στην υπονόμηση, ή ακόμη και τη γελοιοποίηση, των αντιπάλων αποσκοπεί το ακόλουθο λογοπαίγνιο του Π. Παυλόπουλου, το οποίο βασίζεται στον εντοπισμό ηχητικών ομοιοτήτων μεταξύ λέξεων σημασιολογικά απομακρυσμένων:

⁶ Βλ. Sherzer (1978: 340-342· 1985), Norrick (1993: 60-69· 2003: 1337-1340, 1345, 1348), Carter (2004: 96-97).

(3) ΠΡΟΚΟΠΗΣ ΠΑΥΛΟΠΟΥΛΟΣ: Εγώ ένα κόμμα ξέρω, το οποίο τροφοδοτεί την πολιτική επικαιρότητα όχι με πολιτικές παρεμβάσεις, αλλά με την αμφισβήτηση του Αρχηγού του και το διαγκωνισμό *δελφίνων*. Και έχει μεταβληθεί από πολιτικό κόμμα σε πολιτικό *δελφινάριο*. Το ξέρουμε όλοι ποιο είναι, αυτό είναι που έχει το πρόβλημα.

Ο Π. Παυλόπουλος υποστηρίζει ότι το ΠΑΣΟΚ κατέφυγε στην πρόταση δυσπιστίας για να αποπροσανατολίσει την κοινή γνώμη και να στρέψει την προσοχή της μακριά από τα εσωκομματικά του προβλήματα, και ιδιαίτερα τα θέματα αμφισβήτησης του αρχηγού του Γ. Παπανδρέου. Χάρη στη συνεμφάνιση των λέξεων *δελφίνοι* και *δελφινάριο*, ο ομιλητής επιτυγχάνει τη χιουμοριστική και ταυτόχρονα έντονα υπονομευτική αναπαράσταση των μελών του ΠΑΣΟΚ με ηγετικές φιλοδοξίες ως μελών θιάσου επιθεώρησης. Αντίστοιχες είναι οι προσπάθειες των βουλευτών στα παραδείγματα (1) και (2) (βλ. ενότητα 3). Αυτό, βέβαια, είναι σαφές μόνο σε όσους/ες αναγνωρίζουν τις διακειμενικές αναφορές.

Οι βουλευτές επίσης χρησιμοποιούν λογοπαίγνια για να προκαλέσουν τους/τις αντιπάλους τους, στα δεδομένα μου συνήθως ζητώντας εκλογές, στο πλαίσιο της αμφισβήτησής τους για την πολιτική που ακολουθείται ή για τις απόψεις που κατατίθενται. Στο παράδειγμα (4), ο Δ. Ρέππας πετάει το γάντι στην κυβέρνηση να τολμήσει να αποδεχτεί την πρόταση του ΠΑΣΟΚ για πρόωρες εκλογές:

(4) ΔΗΜΗΤΡΙΟΣ ΡΕΠΠΑΣ: Τελειώνοντας, κύριε Πρόεδρε, θέλω να πω ότι η Νέα Δημοκρατία, εάν πράγματι πιστεύει ότι πρέπει να αντιμετωπίσουμε το πρόβλημα που απασχολεί σήμερα τη χώρα, που είναι πρόβλημα *κρίσης* των θεσμών, είναι *κρίση* για ολόκληρη τη χώρα και την ελληνική κοινωνία, τότε ας δεχθεί να καταφύγουμε στη μόνη επιθυμητή *κρίση*, που είναι η *κρίση* του ελληνικού λαού.

Εμείς εμπιστευόμαστε την *κρίση* του ελληνικού λαού. Εάν ισχύει το ίδιο και για εσάς, αποδείξτε το στην πράξη. Επειδή φοβάστε την *κρίση* του ελληνικού λαού γνωρίζουμε και ποια είναι η απάντησή σας. Είστε η πλειοψηφία στο Κοινοβούλιο, είστε μειοψηφία, στην ελληνική κοινωνία. Αλλά και στη Βουλή δεν θα είστε για πολύ ακόμη πλειοψηφία. Θα είστε και μειοψηφία στη Βουλή και πολύ μεγαλύτερη μειοψηφία στην ελληνική κοινωνία, μετά τις επόμενες εκλογές, όποτε και αν γίνουν αυτές.

Ευχαριστώ πολύ.

(Χειροκροτήματα από την πτέρυγα του ΠΑ.ΣΟ.Κ.)

Αφού χρησιμοποιήσει αρχικά τη λέξη *κρίση* με τη σημασία «διατάραξη της ομαλής πορείας», ο Δ. Ρέππας στη συνέχεια την επαναφέρει με τη σημασία της «απόφασης», προκειμένου να προκαλέσει τη Νέα Δημοκρατία να οδηγήσει τη χώρα σε εκλογές.

Πρόκληση κατά του αντιπάλου, και μάλιστα προσωπική, αποτελεί και το ακόλουθο λογοπαίγνιο του Χ. Καστανίδη:

(5) ΧΑΡΑΛΑΜΠΟΣ ΚΑΣΤΑΝΙΔΗΣ: Κύριε Αλογοσκούφη, δεν ξέρω αν είστε καλός Υπουργός των Οικονομικών. Είναι βέβαιο, όμως, ότι δεν είστε καλός προβοκάτωρ, διότι η Βουλή δεν συνεδριάζει μόνο με την παρουσία σας.

(Θόρυβος από την πτέρυγα της Νέας Δημοκρατίας)

(Χειροκροτήματα από την πτέρυγα του ΠΑ.ΣΟ.Κ.)

ΠΡΟΕΔΡΕΥΩΝ (Ιωάννης Τραγάκης): Παρακαλώ, κύριε Καστανίδη, τις εκφράσεις σας.

ΧΑΡΑΛΑΜΠΟΣ ΚΑΣΤΑΝΙΔΗΣ: Εδώ υπάρχουν παρόντες Βουλευτές του ΠΑ.ΣΟ.Κ. και δίνουν τη μάχη.

ΠΡΟΕΔΡΕΥΩΝ (Ιωάννης Τραγάκης): Κύριε Καστανίδη, σας παρακαλώ τις εκφράσεις σας!

ΧΑΡΑΛΑΜΠΟΣ ΚΑΣΤΑΝΙΔΗΣ: *Θα μπορούσα να πετάω τη σκούφια μου, παρ' ότι δεν είμαι Αλογοσκούφης.*

ΠΡΟΕΔΡΕΥΩΝ (Ιωάννης Τραγάκης): Κύριε Καστανίδη και τα ευφρολόγηματά σας παρακαλώ πάρα πολύ...

ΧΑΡΑΛΑΜΠΟΣ ΚΑΣΤΑΝΙΔΗΣ: Κύριε Πρόεδρε, σας παρακαλώ μη με κρίνετε.

Ο Χ. Καστανίδης συμμετέχει σε μια σύντομη και εκτός διαδικασίας συζήτηση που έχει ανοίξει κατόπιν διακοπών και παρεμβάσεων εκ μέρους του ΠΑΣΟΚ σχετικά με τον αριθμό και τη σειρά με την

οποία διατάσσονται όσοι/ες βουλευτές επιθυμούν να ανέβουν στο βήμα. Στη συζήτηση αυτή συμμετέχουν, πέρα από τον Χ. Καστανίδη, ο Γ. Αλογοσκούφης και ο προεδρεύων Ι. Τραγάκης. Ο βουλευτής του ΠΑΣΟΚ επιτίθεται στον τότε Υπουργό Οικονομικών υπαινισσόμενος ότι ο τελευταίος δεν είναι σε θέση να γνωρίζει και, ως εκ τούτου, να σχολιάζει τη διαδικασία, αφού προσήλθε στη συζήτηση μόνο για να εκφωνήσει τον λόγο του και μετά να αποχωρήσει. Οι κατηγορίες αυτές συναντούν την αντίδραση του προεδρεύοντα, οπότε ο Χ. Καστανίδης προσθέτει ένα λογοπαίγνιο βασισμένο στο επίθετο του Υπουργού, αναπλαισιώνοντας τον ιδιωτισμό *πετάω τη σκούφια μου* και προκαλώντας ακόμη περισσότερο τον αντίπαλό του. Αμέσως ο Ι. Τραγάκης του ζητά να σταματήσει τα «ευφυολογήματα» και το σοβαρό πλαίσιο αποκαθίσταται.

Αξίζει να σημειωθεί εδώ ότι αυτή είναι η μοναδική περίπτωση στα υπό εξέταση δεδομένα που το προεδρείο του κοινοβουλίου παρεμβαίνει ώστε να σχολιάσει αρνητικά κάποιο λογοπαίγνιο και να σταματήσει αυτού του είδους τη γλωσσική συμπεριφορά.

Τέλος, σπανιότερα, τα κοινοβουλευτικά λογοπαίγνια έχουν περισσότερο ήπιο, παιγνιώδη και ίσως φιλικό χαρακτήρα, ιδίως σε μεταβατικές φάσεις της διαβούλευσης, όπου δεν ασκείται κατ' ανάγκη κριτική σε θέματα πολιτικής - μεταξύ άλλων, όταν ένας/μία βουλευτής κάνει μια εισαγωγή στον λόγο του/της αναφερόμενος/η στους/στις συναδέλφους που που βρίσκονται στο ακροατήριο. Το επόμενο παράδειγμα προέρχεται από την έναρξη της ομιλίας του Δ. Ανδρουλάκη, ο οποίος παίρνει τον λόγο λίγο μετά τον τότε Υπουργό Εθνικής Άμυνας Ε. Μείμαράκη (έχει μεσολαβήσει ο Ξ. Βεργίνης):

(6) ΔΗΜΗΤΡΗΣ ΑΝΔΡΟΥΛΑΚΗΣ: Βαγγέλη Μείμαράκη, σε ευχαριστώ που έμεινες, αλλά ο κ. Βεργίνης μου έκοψε την όρεξη. Έσβησε η όρεξή μου.
Ήθελα, τέλος πάντων, να σου πω ότι *εσύ Βαγγέλη Μείμαράκη είσαι για τα συντάγματα –αυτή είναι η δουλειά σου- του Βαγγέλη Βενιζέλου είναι η δουλειά του για το Σύνταγμα και εγώ ανήκω στην πλατεία Συντάγματος*. Εκ μέρους της πλατείας Συντάγματος, λοιπόν, θα μιλήσω εγώ.
(Χειροκροτήματα)

Ο ανεξάρτητος βουλευτής χρησιμοποιεί με τρεις διαφορετικές σημασίες τη λέξη *σύνταγμα*. Απευθυνόμενος στον Υπουργό Εθνικής Άμυνας κάνει λόγο για τις μονάδες του στρατού ξηράς, αναφερόμενος στον καθηγητή συνταγματικού δικαίου και βουλευτή του ΠΑΣΟΚ Ε. Βενιζέλο κάνει λόγο για τον θεμελιώδη νόμο του κράτους και, τελικά, χαρακτηρίζοντας τον εαυτό του, προβάλλει την ιδιότητα του ως βουλευτή, ο οποίος εργάζεται στην πλατεία Συντάγματος, όπου βρίσκεται το ελληνικό κοινοβούλιο. Ο βουλευτής προβάλλει χωρίς κριτική διάθεση τη συμπάθεια και τις κοινές αναφορές με τους εν λόγω συναδέλφους του. Το λογοπαίγνιό του συγκεντρώνει τη θετική αξιολόγηση του συνόλου των παρισταμένων.

Ως εδώ, εντοπίσαμε μια ποικιλία λειτουργιών των κοινοβουλευτικών λογοπαιγνίων: υπονόμηση, επίθεση, πρόκληση, αλλά και φιλική προσέγγιση. Αξίζει επίσης να σημειωθεί ότι όλα σχεδόν τα λογοπαίγνια προέρχονται από βουλευτές που έχουν ήδη τον λόγο και όχι από βουλευτές που επιθυμούν να διακόψουν ή να αναστείλουν τη διαδικασία. Περισσότερα όμως για τη θέση των λογοπαιγνίων και τις αντιδράσεις σε αυτά θα δούμε στην επόμενη ενότητα.

5. Η θέση εμφάνισης των λογοπαιγνίων στις κοινοβουλευτικές ομιλίες και οι αντιδράσεις σε αυτά

Η πλειονότητα των λογοπαιγνίων που εντοπίστηκαν στα δεδομένα μου βρίσκονται ενσωματωμένα και λειτουργικά ενταγμένα στους λόγους των βουλευτών (πρβλ. Partington, 2006: 142). Μόνο δύο εξαιρέσεις εντοπίστηκαν. Η μία παρουσιάστηκε προηγουμένως (παράδειγμα 5), ενώ η άλλη παρουσιάζεται στη συνέχεια. Το παρακάτω λογοπαίγνιο του Α. Κακλαμάνη είναι το μοναδικό στα δεδομένα μου που δεν προέρχεται από αυτόν/ή που έχει ήδη τον λόγο, αλλά τον/τη διακόπτει:

(7) ΘΕΟΔΩΡΑ ΜΠΑΚΟΓΙΑΝΝΗ: Για την ουσία και το περιεχόμενο, για τους λόγους που υποβάλατε την πρόταση δυσπιστίας, θα συναντήσετε σήμερα, τη Δευτέρα, αλλά και στο μέλλον, την ίδια αδιαφορία που κυριαρχούσε και χθες το βράδυ απ' άκρου εις άκρον της Ελλάδος, καθώς συζητιόταν η πρόταση δυσπιστίας που υποβάλατε.

Κυρίες και κύριοι Βουλευτές του ΠΑ.ΣΟ.Κ., δεν είναι τυχαίο ότι η πρόταση δυσπιστίας συζητείται ουσιαστικά *με τα μέλη σας απόντα*.

ΑΠΟΣΤΟΛΟΣ ΚΑΚΛΑΜΑΝΗΣ: *Εμείς όλα μας τα μέλη τα έχουμε εδώ. Δεν μας λείπει τίποτα!*

ΘΕΟΔΩΡΑ ΜΠΑΚΟΓΙΑΝΝΗ (Υπουργός Εξωτερικών): Εννοώ τα κοινοβουλευτικά μέλη, με συγχωρείτε.

Η Θ. Μπακογιάννη κατηγορεί το ΠΑΣΟΚ ότι απουσιάζει από τη συζήτηση της πρότασης δυσπιστίας που το ίδιο κατέθεσε. Ο Α. Κακλαμάνης αναπλαισιώνει τη λέξη *μέλη* περνώντας από τα «κοινοβουλευτικά μέλη» στα «μέλη του σώματος», προκειμένου να απαντήσει στην κατηγορία διακόπτοντας την ομιλήτρια και ενδεχομένως προσπαθώντας να αποσπάσει την προσοχή της. Προσποιούμενος ότι δεν κατάλαβε τι εννοούσε η Θ. Μπακογιάννη, ο Α. Κακλαμάνης εμμέσως αξιολογεί αρνητικά τον τρόπο με τον οποίο αυτή εκφράζεται και υπονομεύει την επιτέλεση του λόγου της. Η αυτοδιορθωτική απάντηση της ομιλήτριας επαναφέρει το σοβαρό πλαίσιο στη συζήτηση (πρβλ. Schegloff, 1978: 212-215· Norrick, 1993: 22-25).

Όσον αφορά τις *αντιδράσεις* των βουλευτών στα λογοπαίγνια των συναδέλφων τους, διαπιστώνεται ποικιλία. Τις περισσότερες φορές δεν καταγράφεται καμία αντίδραση, οπότε ο/η βουλευτής μπορεί να συνεχίσει απερίσπαστος/η τον λόγο του/της (παράδειγμα 1-4). Αυτό μπορεί να οφείλεται σε δύο λόγους, εκ των οποίων ο ένας δεν αποκλείει τον άλλο: είτε τα λογοπαίγνια εκλαμβάνονται ως κοινή πρακτική, άρα γίνονται αποδεκτά στις κοινοβουλευτικές συζητήσεις, είτε οι αντιδράσεις είναι τέτοιες ώστε δεν καταγράφονται από τους/τις στενογράφους του κοινοβουλίου στα επίσημα πρακτικά (π.χ. χειρονομίες, γκριμάτσες, χαμόγελο, χαμηλόφωνο γέλιο, αποδοκιμαστικό ή επιδοκιμαστικό σχόλιο σε χαμηλή ένταση).

Ορισμένες φορές τα λογοπαίγνια προκαλούν χειροκρότημα εκ μέρους των βουλευτών κατά κανόνα από το ίδιο κόμμα με τον/την ομιλητή/τρια (παράδειγμα 6). Γίνεται έτσι σαφής η αναγνώριση και η επιβράβευση της γλωσσικής επιδεξιότητας και της κριτικής του/της ομιλητή/τριας. Άλλοτε τα λογοπαίγνια συνοδεύονται από μια σοβαρή απάντηση, η οποία φανερώνει ότι το μήνυμά τους εκλαμβάνεται ως σοβαρό και δεν απορρίπτεται ως αστείο ή παιγνιώδες (παράδειγμα 7). Η δε ρητή αρνητική αξιολόγηση και τάση για καταστολή των λογοπαιγνίων μαρτυρείται άπαξ στα υπό εξέταση δεδομένα (παράδειγμα 5).

Όλα αυτά δείχνουν ότι τα λογοπαίγνια αποτελούν λιγότερο ή περισσότερο συνήθη και όχι αρνητικά αξιολογούμενη γλωσσική στρατηγική στο κοινοβούλιο. Οι βουλευτές δεν υφίστανται κυρώσεις ή διακοπή κατά την παραγωγή λογοπαιγνίων, αντίθετα συχνά επιβραβεύονται για αυτά από τους/τις συναδέλφους τους. Το γεγονός μάλιστα ότι η πλειονότητα των λογοπαιγνίων δεν προκαλεί καμία αντίδραση από το ακροατήριο ή συνοδεύεται από σοβαρές απαντήσεις, μας οδηγεί στο συμπέρασμα ότι τα λογοπαίγνια είναι ένας μάλλον παγιωμένος τρόπος υπονόμησης, επίθεσης και πρόκλησης των αντιπάλων, καθώς και επίδειξης της ρητορικής ικανότητας των ομιλητών/τριών. Παρ' όλα αυτά, τα λογοπαίγνια κατά κανόνα δεν χρησιμοποιούνται για να διακόψουν αυτόν/ή που βρίσκεται στο βήμα (με εξαίρεση το παράδειγμα 7), αλλά κατά κανόνα προέρχονται από αυτόν/ή.

6. Συμπεράσματα

Ο Ahl (1988: 21) παρατηρεί ότι «οι ευρωπαίοι/ες [...] έχουν εκπαιδευθεί να θαυμάζουν την ειρωνεία, αλλά να αποδοκιμάζουν τα λογοπαίγνια».⁷ Μια εξαίρεση στη διατύπωση αυτή φαίνεται να αποτελεί το ελληνικό κοινοβούλιο, όπου τα λογοπαίγνια συνιστούν συνήθη χιουμοριστικό μηχανισμό και μέσο επίδειξης της ρητορικής ικανότητας των ομιλητών/τριών. Χάρη σε αυτά, οι βουλευτές προβάλλουν τις (μετα)γλωσσικές τους δεξιότητες, υπονομεύουν τον λόγο του/της αντιπάλου και συνδέουν τον δικό τους λόγο με άλλα λιγότερο ή περισσότερο γνωστά κείμενα. Η συχνότητα και η ευκολία στη χρήση λογοπαιγνίων μπορεί να ερμηνευθεί στο πλαίσιο της προσπάθειας των πολιτικών να αυτοπροβληθούν σε περιστάσεις δημόσιας αντιπαράθεσης και ανταγωνισμού. Η διαπίστωση αυτή είναι συμβατή με την αυξημένη βαρύτητα που έχει υποστηριχθεί ότι δίνεται στη ρητορική ικανότητα στον δημόσιο, προφορικό λόγο στα ελληνικά (βλ. μεταξύ άλλων Hirschon, 2001: 36· Tzionas, 2001· Tsakona, 2009α, β).

⁷ Αυτή η παρατήρηση του Ahl θα λέγαμε ότι συνοψίζει μια γενικότερη αρνητική στάση απέναντι στα λογοπαίγνια. Στον χώρο της παραδοσιακής γλωσσολογίας, τα λογοπαίγνια εκλαμβάνονται ως «αποκλίσεις» από τον γλωσσικό κανόνα και τη σημασιολογική διαφάνεια και ακρίβεια που θεωρείται ότι «πρέπει» να διέπουν τον λόγο, ενώ η σύλληψή τους ως παιχνιδιού δεν ενθαρρύνει τη σοβαρή και σε βάθος προσέγγισή τους. Αλλά και στον χώρο της έρευνας του χιούμορ, τα λογοπαίγνια συχνά περιβάλλονται από αρνητικές συνδηλώσεις καθώς ορισμένες φορές αναφέρονται ως «κατώτερη» μορφή χιούμορ (βλ. μεταξύ άλλων Sherzer, 1978: 345· 1985: 215· Freud, 1991: 80-83· Norrick, 1993: 60· 2003: 1345· Dienhart, 1999: 123· Partington, 2006: 112).

Η ανάλυση του παρόντος υλικού ενισχύει την (όχι τόσο συχνά αναφερόμενη στη βιβλιογραφία) υπονομευτική και κριτική λειτουργία των λογοπαιγνίων και φέρνει στο προσκήνιο τη χρήση τους ως μέσων πρόκλησης κατά των πολιτικών αντιπάλων. Μέσα από τα λογοπαίγνια, οι βουλευτές ασκούν κριτική σε πολιτικές αποφάσεις και καταστάσεις, και επιχειρούν να ανατρέψουν συμβολικά τον λόγο και τις πράξεις των αντιπάλων. Σπανιότερα σηματοδοτούν τη φιλική προσέγγιση μεταξύ των βουλευτών. Επιβεβαιώνεται έτσι η γενικότερη λειτουργία του χιούμορ ως στρατηγικής που οριοθετεί ομάδες συνομιλητών/τριών τις οποίες συνέχουν κοινές αξίες, αντιλήψεις και αναφορές και από τις οποίες αποκλείονται όσοι/ες δεν αποδέχονται τις αξίες αυτές (βλ. μεταξύ άλλων Αρχάκης και Τσάκωνα, 2004).

Η οριοθέτηση μπορεί να γίνεται και προς μια άλλη κατεύθυνση: εντός ομάδας τίθενται όσοι/ες είναι σε θέση να αντιληφθούν το παιχνίδι με τις διαφορετικές σημασίες των λέξεων και των ιδιωτισμών (παραδείγματα 1, 4, 5, 7) και τις διακειμενικές αναφορές σε παροιμίες, αποφθέγματα (παραδείγμα 2), κείμενα από τον καλλιτεχνικό (παραδείγμα 3), πολιτικό (παραδείγματα 1, 6) χώρο κλπ. Ουσιαστικά τα λογοπαίγνια θα μπορούσαμε να πούμε ότι ορίζουν ένα σύνολο συνομιλητών/τριών (εντός και εκτός κοινοβουλίου) που είναι σε θέση να αποκωδικοποιήσουν και να καταλάβουν το -εν προκειμένω πολιτικό- μήνυμά τους. Αυτό προϋποθέτει ένα αρκετά ενημερωμένο κοινό, ενώ ταυτόχρονα γεννά ερωτήματα σχετικά με τον συνειδητό ή υποσυνείδητο αποκλεισμό από τα κοινοβουλευτικά όσων δεν είναι σε θέση να επεξεργαστούν ή να παραγάγουν λογοπαίγνια (πρβλ. Tsakona, 2011β).

Επιπλέον, στο ελληνικό κοινοβούλιο, συνήθως δεν σχολιάζεται ή δεν απορρίπτεται η χρήση λογοπαιγνίων (μοναδική εξαίρεση στα δεδομένα μου το παράδειγμα 5). Αντίθετα, η έλλειψη αντίδρασης σε αυτά, τα χειροκροτήματα και η συχνότητα εμφάνισής τους δείχνουν ότι πρόκειται για γλωσσική στρατηγική αποδεκτή από τα μέλη του κοινοβουλίου. Οι δε σοβαρές αντιδράσεις δείχνουν ότι η κριτική και η υπονόμηση που γίνονται με τη μορφή λογοπαιγνίου συχνά εκλαμβάνονται ως σοβαρές από τους/τις βουλευτές και όχι ως λιγότερο σημαντικές από άλλες, μη παιγνιώδεις μορφές κριτικής. Μολονότι δηλαδή τα λογοπαίγνια μάλλον στερεοτυπικά συνδέονται με τη διασκέδαση των συνομιλητών/τριών, η παρούσα μελέτη δείχνει ότι κάτι τέτοιο δεν ισχύει αναγκαστικά σε όλα τα επικοινωνιακά περιβάλλοντα. Μια πιθανή ερμηνεία προέρχεται από το ίδιο το περικείμενο: σε αντίθεση με την καθημερινή διεπίδραση μεταξύ οικείων, όπου τα λογοπαίγνια τονίζουν και επιβεβαιώνουν τους δεσμούς οικειότητας, σε ένα σαφώς επίσημο και θεσμοθετημένο πλαίσιο, όπου ο συγκρουσιακός λόγος είναι κυρίαρχος, τα λογοπαίγνια υπηρετούν αντίστοιχους στόχους.

Τέλος, φαίνεται ότι τα λογοπαίγνια χαρακτηρίζονται από *πολυλειτουργικότητα*: οι στόχοι που εξυπηρετούνται μέσω αυτών ποικίλλουν στο πλαίσιο μιας και μόνης επικοινωνιακής περιστάσης ή από το ένα περικείμενο στο άλλο, και διαμορφώνονται από τα συγκεκριμένα χαρακτηριστικά τους.

ABSTRACT

*In the present paper we examine Greek CP-sentences within the Minimalist Program (Chomsky 2005, 2007) in order to test the ϕ -feature-inheritance mechanism in main clauses and *oti*-, *pou*- (non relative) and *na*-complement clauses. The analysis is based on three criteria, +/- controlled subject, +/- dependent tense and licensing of polarity items, and suggests that: If C^0 does not carry ϕ -features, it doesn't constitute a phase-head, the sentence is neither complete nor semantically closed. In this case, dependent Tense and subject control are obligatory and licensing of polarity items is not allowed.*

Λέξεις κλειδιά: φάση, κεφαλή φάσης, ϕ -χαρακτηριστικά, κληροδότηση ϕ -χαρακτηριστικών, υποχρεωτικός έλεγχος υποκειμένου

1. Εισαγωγή

Στην παρούσα εργασία βασιζόμαστε σε δύο θεωρητικές θέσεις (1) που έχουν διατυπωθεί από τον Chomsky (2005, 2007) στο πλαίσιο του Μινιμαλιστικού Προγράμματος με σκοπό να εξετάσουμε τις συνέπειές τους ως προς τις προτάσεις (ΦΣΔ) της Νέας Ελληνικής.

- (1) α. Η $\rho^*\Phi$ και η ΦΣΔ είναι φάσεις.
β. Τα ϕ -χαρακτηριστικά βρίσκονται στην κεφαλή του ΣΔ και κληροδοτούνται στην κεφαλή του Χρόνου (*feature inheritance*).

Με βάση τις αναλύσεις για την Ελληνική, γνωρίζουμε ότι στη φραστική δομή της πρότασης εμφανίζονται: α) περισσότεροι από ένας ΣΔ, β) η Άρνηση καθώς και γ) λειτουργικές κατηγορίες ανάμεσα στον ΣΔ και τον Χρόνο, όπως η Έγκλιση/Τροπικότητα, αλλά και λειτουργικές κατηγορίες ανάμεσα στη Φράση Χρόνου και τη $\rho\Phi$, όπως η Όψη και η Φωνή. Το γεγονός αυτό καθιστά αναγκαία για την Ελληνική κατ' αρχάς τον καθορισμό της κεφαλής που φέρει τα ϕ -χαρακτηριστικά (πρόσωπο/αριθμός), τον καθορισμό της κεφαλής της φάσης καθώς και την αποσαφήνιση της Φράσης που αποτελεί φάση, δηλαδή την οριοθέτησή της.

Στην εργασία αυτή εξετάζουμε μόνο πτυχές της ανώτερης φάσης, εκείνης που σχετίζεται με τον ΣΔ και την κληροδότηση των ϕ -χαρακτηριστικών¹ (σχήμα 1):

¹ Δηλαδή την απόδοση τιμής στα χαρακτηριστικά και τη νομιμοποίησή τους (*feature valuation*), την απαλοιφή μη ερμηνεύσιμων χαρακτηριστικών (*deletion of uninterpretable features*) και την επίτευξη της Συμφωνίας (*Agree*) (βλ. και Richards 2007).

Σχήμα 1

Ειδικότερα, εστιάζουμε κυρίως στα εξής ερωτήματα:

- α) Ποια κατηγορία της προτασικής δομής της Ελληνικής αντιστοιχεί στην κατηγορία του ΣΔ C' της Αγγλικής; Με άλλα λόγια ποια κατηγορία φέρει και κληροδοτεί τα φ-χαρακτηριστικά;
- β) Ποια κεφαλή οριοθετεί τη φάση; Πότε δηλαδή μια ΦΣΔ αποτελεί φάση; Περαιτέρω θα θίξουμε κι ένα επιπλέον ζήτημα, το οποίο όμως χρήζει διεξοδικότερης ανάλυσης, καθώς σχετίζεται με τη νομιμοποίηση του υποκειμένου:
- γ) Ποια κατηγορία κληρονομεί τα φ-χαρακτηριστικά, ούτως ώστε να νομιμοποιείται το υποκείμενο;

Για τον σκοπό αυτό εξετάζουμε:

α) κύριες προτάσεις:

(2) Ο Γιάννης (δεν) (θα) αγόρασε τα βιβλία.

β) *ότι-* και *που-*συμπληρωματικές προτάσεις:

- (3) α. Ο Γιάννης είπε ότι (δεν) (θα) αγόραζε τα βιβλία.
- β. Ο Γιάννης χάρηκε που (δεν) (θα) αγόραζε τα βιβλία.

γ) *να-*συμπληρωματικές προτάσεις:

- (4) α. Ο Γιάννης θέλει να (μην) αγοράσει τα βιβλία.
- β. Ο Γιάννης άρχισε να (μην) αγοράζει βιβλία.

2. Ο προβληματισμός, τα κριτήρια και οι προβλέψεις

Για να απαντηθούν τα ερωτήματα που τέθηκαν πρέπει να λάβουμε υπόψιν ότι η φραστική δομή της Ελληνικής περιλαμβάνει περισσότερες λειτουργικές κατηγορίες πάνω από τον Χρόνο, ορισμένες από τις οποίες βρίσκονται σε συμπληρωματική κατανομή. Στην φραστική δομή εμφανίζονται: α) οι ΣΔ *ότι/που*² με διαφορετικά χαρακτηριστικά, οι οποίοι εισάγουν συμπληρωματικές προτάσεις με διαφορετική συμπεριφορά, β) οι δείκτες (ή τα μόρια) Έγκλισης/Τροπικότητας (*θα, να/ας*), καθώς και γ) η Άρνηση (*δεν, μην*), η επιλογή της οποίας σχετίζεται με την Έγκλιση/Τροπικότητα και παρεμβάλλεται ανάμεσα στον ΣΔ και τον Χρόνο, όπως φαίνεται στο σχήμα 2:

² Δεν αναφερόμαστε στην μελέτη μας στο αναφορικό *που*, αλλά στον ΣΔ *που*, ο οποίος εισάγει συμπληρωματικές προτάσεις.

Σχήμα 2

Το ανωτέρω σχήμα δεν παραπέμπει σε κάποια συγκεκριμένη ανάλυση της φραστικής δομής. Διευκρινίζουμε εδώ ότι υιοθετούμε ένα παραγωγικό μοντέλο και δεν θα μας απασχολήσει ούτε ο χαρακτηρισμός των εν λόγω φράσεων σύμφωνα με τον ΣΔ (ως ΦΣΔ ή Φράση Έγκλισης)³, ούτε ο προβληματισμός αναφορικά με την ένταξή τους είτε στο σύστημα του ΣΔ (σύμφωνα με τη Ρούσσου 2000) είτε στο πεδίο του Χρόνου/Κλίσης (σύμφωνα με τη Philippaki-Warbuton 1998).⁴ Ωστόσο, στο σχήμα αποτυπώνεται το πρόβλημα σχετικά με τα ερωτήματα που αφορούν την κεφαλή που φέρει τα φ-χαρακτηριστικά, την κεφαλή που οριοθετεί τη φάση και την κεφαλή που τα κληρονομεί, εφόσον υπάρχουν περισσότερες υποψήφιες κεφαλές.

Για την ανάλυσή μας θέτουμε αρχικά ως στόχο τον προσδιορισμό κριτηρίων, σύμφωνα με τα οποία επιχειρούμε να ορίσουμε την έννοια μιας «πλήρους» πρότασης και τα οποία θα μας οδηγήσουν σε προβλέψεις αναφορικά με τον ΣΔ και τον καθορισμό της φάσης. Ως κριτήρια για τα ανωτέρω ορίζουμε τα εξής:

- α) τον υποχρεωτικό ή μη έλεγχο του υποκειμένου
- β) το είδος του χρόνου (+/- εξαρτημένος χρόνος)
- γ) τη νομιμοποίηση των Στοιχείων Αρνητικής Πολιτικότητας (ΣΑΠ).

Τα εν λόγω φαινόμενα επιλέγονται εδώ ως κριτήρια ελέγχου μιας «πλήρους» πρότασης, ακριβώς επειδή δείχνουν τον βαθμό ανεξαρτησίας της: α) ως προς το υποκείμενο, που σχετίζεται με τα φ-χαρακτηριστικά, β) ως προς τον χρόνο (εξαρτημένος ή ανεξάρτητος) και γ) ως προς τα ΣΑΠ, τα οποία νομιμοποιούνται στο πλαίσιο ενός συντάγματος που θεωρείται προτασικό, εφόσον βέβαια πληρούνται οι προϋποθέσεις επιδραστικού περιβάλλοντος⁵. Για τα φαινόμενα αυτά, τα οποία έχουν ήδη γίνει αντικείμενο συστηματικής μελέτης στην Ελληνική εξαιτίας των ιδιαίτερων χαρακτηριστικών τους (βλ. ενδεικτικά Iatridou 1993, Terzi 1991, Varlokosta 1994, Roussou 1999 για τον έλεγχο και τον αναφορικό χρόνο και Giannakidou 1994, Κλειδή 2008 για τα ΣΑΠ) θα επιχειρήσουμε μια νέα προσέγγιση στο πλαίσιο του Μινιμαλιστικού Προγράμματος με βάση τον καθορισμό της φάσης και την κληροδότηση των φ-χαρακτηριστικών.

Ο συνδυασμός των κριτηρίων που θέσαμε δίνει τη δυνατότητα να προβούμε στις ακόλουθες προβλέψεις για τις προτάσεις που εξετάζουμε αναφορικά με τον ΣΔ ως φορέα φ-χαρακτηριστικών και ως κεφαλή φάσης:

1. Μια πρόταση δεν νοείται πλήρης, αν ο ΣΔ της δεν φέρει τα φ-χαρακτηριστικά που νομιμοποιούν ενδοπροτασικά το υποκείμενό της.

³ Ο προβληματισμός σχετικά με τον χαρακτηρισμό των εν λόγω φράσεων αφορά κυρίως τις κεφαλές *να/θα*.

⁴ Στο σημείο αυτό αξίζει να σημειωθεί το εξής: Αν υποθεθεί για την Ελληνική η φραστική δομή που προτείνει ο Rizzi (1997) με δύο ΦΣΔ (ForceP και FinP), η οποία έχει υιοθετηθεί από την Roussou (2000), τότε το πρόβλημα που θέτουμε εδώ με τις ενδιάμεσες κεφαλές θα πρέπει να εξεταστεί σε άλλη βάση. Πιθανώς δεν υφίσταται, εφόσον υποθεθεί ότι τα φ-χαρακτηριστικά βρίσκονται ή μεταβιβάζονται από τον πρώτο ΣΔ (Force) στον τελευταίο ΣΔ (Fin), οποίος είναι συμβατός με την παρεμφατικότητα.

⁵ Τα ΣΑΠ νομιμοποιούνται από την ύπαρξη επιδραστικών προτασικών τελεστών (Progovac 1992, Klidi 1998).

2. Αν ο ΣΔ δεν φέρει φ-χαρακτηριστικά, τότε η ΦΣΔ δεν αποτελεί φάση και η φάση ολοκληρώνεται παραπάνω στην παραγωγή, ενώ το υποκείμενο ελέγχεται υποχρεωτικά από το υποκείμενο της κύριας πρότασης.
3. Στην περίπτωση υποχρεωτικού ελέγχου του υποκειμένου της συμπληρωματικής πρότασης, δεν νομιμοποιούνται ΣΑΠ.

Αναφορικά με τον χρόνο της συμπληρωματικής, όπως θα διαπιστωθεί από την ανάλυση των δεδομένων (κεφ. 3), στην περίπτωση υποχρεωτικού ελέγχου του υποκειμένου ο χρόνος είναι πάντα εξαρτημένος. Επισημαίνουμε, όμως, ότι δεν ισχύει το αντίστροφο: ο εξαρτημένος χρόνος της συμπληρωματικής δεν προϋποθέτει υποχρεωτικό έλεγχο υποκειμένου και απουσία ΣΑΠ.

3. Τα δεδομένα και η ανάλυση

3.1 Οι κύριες/ανεξάρτητες προτάσεις

Στην κατηγορία των ανεξάρτητων προτάσεων συγκαταλέγονται οι κύριες (5α), οι ανεξάρτητες να- και ας-προτάσεις (5β) και οι προτάσεις προστακτικής (5γ):

- (5) α. Ο Γιάννης αγοράζει/αγόρασε βιβλία.
- β. Να αγοράσεις/αγόραζες βιβλία. / Ας αγοράσει/αγόραζε βιβλία.
- γ. Αγόρασε βιβλία!

Εξετάζοντας την περίπτωσή τους παρατηρούμε ότι:

- A. Έχουν κενό ΣΔ (Ø).
- B. Ο ΣΔ φέρει φ-χαρακτηριστικά, εφόσον νομιμοποιείται το υποκείμενο ενδοπροτασικά.
- Γ. Υπάρχει ανεξάρτητος χρόνος.
- Δ. Επιτρέπεται η παρουσία ΣΑΠ (6):

- (6) Ο Γιάννης δεν αγόρασε κανένα βιβλίο. / Να αγοράσεις κανένα βιβλίο. / Αγόρασε κανένα βιβλίο!

Πιο συγκεκριμένα, οι κύριες προτάσεις σύμφωνα με ό,τι υποστηρίζεται για την Ελληνική – αλλά και γενικότερα στη θεωρία για τις κύριες ανεξάρτητες προτάσεις – έχουν κενό ΣΔ, ο οποίος με βάση τις νεώτερες θεωρητικές εξελίξεις φέρει τα φ-χαρακτηριστικά τα οποία κληροδοτεί στη Φράση Χρόνου. Αναφορικά με τις να- και ας-προτάσεις υποστηρίζουμε ότι έχουν κενό ΣΔ (ή ότι το να/ας αποτελούν ΣΔ, κατά την Roussou 2000) και σύμφωνα με την ισχύουσα βιβλιογραφία το να/ας αποτελεί δείκτη Τροπικότητας. Ως προς τις προτάσεις προστακτικής, αναλύσεις που υποστηρίζουν ότι η προστακτική δεν αποτελεί παρεμφατικό τύπο της Ελληνικής (Mavrogiorgos 2010) και αναλύσεις που προτείνουν ότι το υποκείμενο της προστακτικής είναι ένα PRO με πώση (Landau 2007) δεν αποτελούν αντενδείξεις σε ό,τι υποστηρίζουμε. Οι εν λόγω προτάσεις είναι «πλήρεις» με ΣΔ που φέρει φ-χαρακτηριστικά, ανεξάρτητα από άλλες προτάσεις. Επιπλέον, ας σημειωθεί ότι δεν τίθεται θέμα αναφορικού χρόνου ή ελέγχου υποκειμένου, αφού οι προτάσεις είναι ούτως ή άλλως ανεξάρτητες. Το ίδιο υποστηρίζουμε ότι ισχύει και για τις περιπτώσεις κύριων προτάσεων με μη αναφορικά (*non referential*) φ-χαρακτηριστικά του τύπου «Από δω βλέπεις τη θάλασσα».

3.2 Οι ότι-συμπληρωματικές προτάσεις

Για την περίπτωση των ότι-συμπληρωματικών προτάσεων παρατηρούμε τα εξής:

- A. Έχουν εκπεφρασμένο ΣΔ.
- B. Ο ΣΔ φέρει φ-χαρακτηριστικά, εφόσον νομιμοποιείται το υποκείμενο ενδοπροτασικά και δεν υπάρχει υποχρεωτικός έλεγχος υποκειμένου (7).
- Γ. Επιτρέπεται ανεξάρτητος χρόνος (8).
- Δ. Νομιμοποιούνται ΣΑΠ (9).

- (7) Ο Πέτρος νομίζει ότι η Μαρία αγοράζει βιβλία.

- (8) Ισχυρίζεται ότι αγόρασε βιβλία.

(9) Ο Πέτρος νομίζει ότι η Μαρία δεν έφερε κανέναν φίλο της στο πάρτυ (όπως πέρυσι).

Υποστηρίζουμε ότι ο ΣΔ και σε αυτή την περίπτωση φέρει φ-χαρακτηριστικά. Ως εκ τούτου, ο ΣΔ αποτελεί κεφαλή φάσης και η *ότι*-πρόταση είναι ανεξάρτητη ως προς το υποκείμενο και κατάλληλο περιβάλλον για εμφάνιση ΣΑΠ, αν επιδραστικοί τελεστές επιτρέψουν την εμφάνισή τους. Επιπλέον, στις συγκεκριμένες δομές επιτρέπεται ανεξάρτητος χρόνος.

3.3 Οι *που*-συμπληρωματικές προτάσεις

Οι *που*-συμπληρωματικές προτάσεις κατηγοριοποιούνται με βάση το ρήμα εξάρτησης (βλ. Ρούσσου 2006): α) νοητικής αντίληψης (*θυμάμαι, ξεχνώ*), β) ψυχικού πάθους (*χαίρομαι, λυπάμαι*) και γ) αισθήσεως (*βλέπω, ακούω*) και η συμπεριφορά τους διαφοροποιείται ανάλογα με αυτό.

Για τις πρώτες δύο κατηγορίες παρατηρούμε ότι συμπεριφέρονται σχεδόν όπως και οι *ότι*-συμπληρωματικές:

- A. Έχουν εκπεφρασμένο ΣΔ.
- B. Ο ΣΔ φέρει φ-χαρακτηριστικά, το υποκείμενο νομιμοποιείται ενδοπροτασιακά, ενώ δεν υπάρχει υποχρεωτικός έλεγχος υποκειμένου (10).
- Γ. Έχουν ανεξάρτητο χρόνο (11).
- Δ. Στις συγκεκριμένες προτάσεις νομιμοποιούνται ΣΑΠ (12).

(10) Ο Πέτρος θυμήθηκε/χάρηκε που η Μαρία αγόρασε βιβλία.

(11) Θυμάται/λυπάται που δεν αγόρασε περισσότερα βιβλία.

(12) Ο Πέτρος θυμάται/χαίρεται που η Μαρία δεν έφερε κανέναν φίλο της στο πάρτυ (όπως πέρυσι).

Η τρίτη κατηγορία με ρήματα αισθήσεως που παρουσιάζει έλεγχο του υποκειμένου από το αντικείμενο της κύριας δεν συμπεριλαμβάνεται στην ανάλυση της παρούσας εργασίας, καθώς εξετάζουμε τις δομές ελέγχου υποκειμένου από το υποκείμενο της κύριας. Αξίζει όμως να αναφέρουμε τα ακόλουθα χαρακτηριστικά τους. Έχει επισημανθεί στη βιβλιογραφία⁶ ότι οι *που*-προτάσεις παρουσιάζουν υποχρεωτικό έλεγχο του υποκειμένου τους (13):

(13) Άκουσα τον Γιάννη_i που ανέβαινε_i τη σκάλα.

Σημαντικό είναι να σημειωθεί εδώ ότι οι συγκεκριμένες δομές παρουσιάζουν εξαρτημένο χρόνο (14α) και δεν επιτρέπουν την παρουσία ΣΑΠ (14β):

- (14) α. * Βλέπω τον Γιάννη που ανέβηκε τη σκάλα.
- β. * Είδα τον Γιάννη που δεν χτύπησε κανένα κουδούνι.

Παρατηρούμε και σε αυτή την περίπτωση ότι τα τρία φαινόμενα συνεμφανίζονται, γεγονός που – όπως υποστηρίζουμε – οφείλεται σε ΣΔ χωρίς φ-χαρακτηριστικά, που δεν αποτελεί κεφαλή φάσης, και κατά συνέπεια η ολοκλήρωση της συμπληρωματικής πρότασης θα πρέπει να περιμένει μέχρι την κύρια.

Το ερώτημα που προκύπτει περαιτέρω για τις *που*-συμπληρωματικές σε σύγκριση με τις *ότι*-συμπληρωματικές αφορά στο γεγονός ότι πριν από τον ΣΔ *ότι* υπάρχει η δυνατότητα εμφάνισης υποκειμένου (15), ενώ η αντίστοιχη δομή με ΣΔ *που* είναι αντιγραμματική (16):

(15) Έμαθα ο Γιάννης ότι θα έρθει.

(16) * Χάρηκα ο Γιάννης που έφυγε.

Το συγκεκριμένο ερώτημα δεν θα το συζητήσουμε αναλυτικά στην παρούσα εργασία, διότι πρέπει να αντιμετωπιστεί σε σχέση με όλες τις συμπληρωματικές δομές της Ελληνικής. Υποστηρίζουμε, ωστόσο, ότι στις *που*-συμπληρωματικές προτάσεις είτε δεν προβάλλεται θέση χαρακτηριστή είτε είναι

⁶ Βλ. Ρούσσου (2006) για συστηματική μελέτη των ΣΔ.

κατειλημμένη⁷. Στην άποψη αυτή συνηγορεί το γεγονός ότι στις συγκεκριμένες δομές η εμφάνιση φράσεων εστίασης, θεματοποίησης ή ερωτηματικού είναι αντιγραμματική (17), ενώ οι αντίστοιχες δομές με ΣΔ ότι είναι γραμματικές (18):

- (17) α. * Τον θυμάμαι τα βιβλία που τα διάβαζε.
β. * Τον θυμάμαι ΤΑ ΒΙΒΛΙΑ που διάβαζε.
γ. * Τον θυμάμαι ΤΙ που διάβαζε;

- (18) α. Τον θυμάμαι τα βιβλία ότι τα διάβαζε.
β. Τον θυμάμαι ΤΑ ΒΙΒΛΙΑ ότι διάβαζε.
γ. Τον θυμάσαι ΤΙ ότι διάβαζε;

3.4 Οι να-συμπληρωματικές προτάσεις

Η περίπτωση των να-συμπληρωματικών προτάσεων έχει απασχολήσει πολλές φορές τους μελετητές της Ελληνικής, οι οποίοι έχουν επισημάνει διάφορα χαρακτηριστικά τους προτείνοντας ποικίλες αναλύσεις. Για την παρούσα ανάλυση οι παρακάτω επισημάνσεις αναφορικά με τα κριτήρια που θέσαμε είναι μείζονος σημασίας.

Ορισμένες να-προτάσεις παρουσιάζουν υποχρεωτικό έλεγχο υποκειμένου, ενώ άλλες όχι (19):

- (19) α. Η Μαρία_i σταμάτησε να αντιμιλάει.
β. Η Μαρία θέλει να αγοράσει ο Γιάννης αύριο μερικά βιβλία.

Ορισμένες να-προτάσεις παρουσιάζουν εξαρτημένο χρόνο, ενώ άλλες όχι (20):

- (20) α. Η Μαρία άρχισε να διαβάζει (*διάβασε).
β. Η Μαρία περιμένει να αγοράσε ο Γιάννης χθες τα βιβλία.

Ορισμένες να-προτάσεις νομιμοποιούν ΣΑΠ, ενώ άλλες όχι (21):

- (21) α. Η Μαρία τόλμησε να μην πάρει (*κανένα) τηλέφωνο.
β. Η Μαρία περιμένει να αγοράσε ο Γιάννης χθες κανένα βιβλίο.

Με βάση τα κριτήρια που θέσαμε υποστηρίζουμε ότι τα παραπάνω φαινόμενα συνδέονται με τον βαθμό ανεξαρτησίας της πρότασης, δηλαδή με την ύπαρξη ή όχι φ-χαρακτηριστικών στον ΣΔ. Πιο συγκεκριμένα, για ορισμένες να-προτάσεις είναι προφανής η εξάρτησή τους από την κύρια πρόταση, διότι παρουσιάζουν υποχρεωτικό έλεγχο υποκειμένου. Επιπλέον, ο υποχρεωτικός έλεγχος υποκειμένου συνεμφανίζεται με εξαρτημένο χρόνο και αδυναμία νομιμοποίησης ΣΑΠ. Η εξάρτηση αυτή μπορεί να περιγραφεί ως εξής: Οι εν λόγω να-προτάσεις δεν είναι πλήρεις, με την έννοια ότι ο ΣΔ δεν φέρει φ-χαρακτηριστικά, η δεύτερη/ανώτερη φάση δεν «κλείνει» στον ΣΔ, δεν ολοκληρώνεται δηλαδή η ερμηνεία τους πριν την κύρια πρόταση από την οποία εξαρτώνται. Αντίθετα, η φάση που ξεκινάει μετά την ρ-φράση θα ολοκληρωθεί στην κύρια, η οποία θα καθορίσει τα φ-χαρακτηριστικά του υποκειμένου και την ερμηνεία της κατηγορίας του χρόνου. Η μη ολοκληρωμένη μορφή τους, η μη πλήρης προτασική δομή τους ερμηνεύει αυτόματα και την αδυναμία νομιμοποίησης ΣΑΠ σε αυτές, αφού – όπως έχει ήδη επισημανθεί – τα ΣΑΠ νομιμοποιούνται υπό την επίδραση προτασικών τελεστών.

Οι συγκεκριμένες δομές έχουν ήδη απασχολήσει την επιστημονική έρευνα και οι αναλύσεις επικεντρώνονται στη φύση του υποκειμένου της δευτερεύουσας (pro, PRO ή A- ίχνος)⁸. Σε νεώτερες μελέτες επιχειρείται μια νέα ανάλυση του φαινομένου του ελέγχου μέσω μετακίνησης, σύμφωνα με τις οποίες ισχύουν τα εξής:

- α) Ο έλεγχος ερμηνεύεται ως μετακίνηση του υποκειμένου της δευτερεύουσας στην κύρια πρόταση (Hornstein 1999).
β) Η εμφάνιση του υποκειμένου στην κύρια ονομάζεται πρόσθιος / έμπροσθεν έλεγχος (*forward Control*) και η εμφάνισή του στη δευτερεύουσα όπισθεν έλεγχος (*backward control*) (Polinsky & Potsdam 2002).

⁷ Προφανώς, η θέση είναι κατειλημμένη από κάποιον τελεστή που δεν προκαλεί μετακίνηση (βλ. Ρούσσου 2000 για την παρατήρηση ότι οι που-γεγονοτικές προτάσεις δεν επιτρέπουν μετακίνηση ερωτηματικού).

⁸ Terzi (1992), Tsoulas (1993), Iatridou (1993), Varlokosta (1994), Philippaki-Warbuton & Catsimali (1999), Spyropoulos (2007) μεταξύ άλλων.

γ) Για την Ελληνική (και τη Ρουμανική) υποστηρίζεται ότι υπάρχει η δυνατότητα του όπισθεν ελέγχου (Alexiadou, Anagnostopoulou, Iordachioaia & Marchis 2010).

Οι πρόσφατες αναλύσεις, που υποστηρίζουν τη μετακίνηση του υποκειμένου από τη δευτερεύουσα στην κύρια πρόταση, την απαλοιφή των αντιγράφων⁹ στην κύρια και τη λεξικοποίηση ενός από τα αντίγραφα στη δευτερεύουσα, αποτυπώνονται σχηματικά στο (22):

(22) [TP ~~ο Γιάννης~~ [ρΦ ~~ο Γιάννης~~ άρχισε [TP ~~ο Γιάννης~~ να γράφει [ρΦ ο Γιάννης]]]]
[TP ~~ο Γιάννης~~ [ρΦ ~~ο Γιάννης~~ άρχισε [TP ο Γιάννης να γράφει [ρΦ ~~ο Γιάννης~~]]]]

Όπως επισημαίνουν και οι ίδιοι οι συγγραφείς, πρόβλημα στην ανάλυσή τους παραμένει – αυτό που έχει ήδη επισημανθεί από τον Landau (2007) – η παρουσία δύο πτώσεων (από την κύρια και από την δευτερεύουσα) σε μία αλυσίδα. Στην παρούσα μελέτη υιοθετούμε την ανάλυση των Hornstein (1999) και Alexiadou, Anagnostopoulou, Iordachioaia & Marchis (2010) και πιστεύουμε ότι αντιμετωπίζουμε το πρόβλημα της πτώσης, έχοντας υποστηρίξει για ανεξάρτητους λόγους ότι ο ΣΔ της δευτερεύουσας δεν φέρει φ-χαρακτηριστικά.¹⁰

Είναι, βέβαια, γεγονός ότι για το υποκείμενο της Ελληνικής είναι απαραίτητες περαιτέρω αναλύσεις. Η συγκεκριμένη ανάλυση παρ' όλα αυτά προβλέπει τα εξής:

- α) Ο έλεγχος σ' αυτές τις περιπτώσεις είναι υποχρεωτικός, όπως άλλωστε τα δεδομένα υποστηρίζουν.
- β) Η δυνατότητα όπισθεν ελέγχου συνδέεται με ΣΔ στη δευτερεύουσα που δεν αποτελεί φάση και ενδεχομένως στα χαρακτηριστικά του να έγκειται η παραμετροποίηση ανάμεσα στις γλώσσες που επιτρέπουν αυτό το είδος ελέγχου και σε αυτές που δεν το επιτρέπουν.

Υπάρχουν, ωστόσο, δύο ερωτήματα με τα οποία οφείλουμε ασχοληθούμε περαιτέρω σε αυτό το σημείο: Το πρώτο ερώτημα σχετίζεται με την ύπαρξη ΣΔ στις να-προτάσεις, όταν δεν φέρει και δεν κληροδοτεί φ-χαρακτηριστικά, εφόσον υιοθετήσει κανείς την υπόθεση ότι το να δεν αποτελεί ΣΔ αλλά κεφαλή Έγκλισης, ενταγμένη στο σύστημα της Κλίσης. Μολονότι η απάντηση του συγκεκριμένου ερωτήματος δεν εντάσσεται στους στόχους της παρούσας μελέτης και θα πρέπει να εξεταστεί σε συνδυασμό με όλες τις προτάσεις στις οποίες δεν εμφανίζεται λεξικοποιημένος ΣΔ αλλά έχουν ανεξάρτητα φ-χαρακτηριστικά (όπως οι κύριες), υποστηρίζουμε ότι υπάρχει ΣΔ για τους εξής λόγους:

A) Ορισμένες φορές εμφανίζεται λεξικοποιημένος ΣΔ (23):

- (23) α. Το άφησα στο τραπέζι, ώστε να το βρει εύκολα.
β. Το άφησα στο τραπέζι, για να το βρει εύκολα.
γ. Ψάχνω να του αγοράσω κάτι που να το έχει πραγματικά ανάγκη.

B) Στην περιφερειακή θέση των συγκεκριμένων δομών υπάρχει η δυνατότητα εμφάνισης φράσεων θεματοποίησης (24α), εστίασης (24β) ή ερωτηματικού (24γ):

- (24) α. Ο Γιάννης έμαθε τα αγγλικά να τα μιλάει τέλεια.
β. Ο Γιάννης έμαθε ΑΓΓΛΙΚΑ να μιλάει τέλεια.
γ. Ο Γιάννης έμαθε ΤΙ να μιλάει τέλεια;

Οι συγκεκριμένες φράσεις θεματοποίησης και εστίασης σύμφωνα με τις υπάρχουσες αναλύσεις (Αλεξιάδου 1997, 1999, Ρούσσου 2000) ανήκουν σαφώς στο σύστημα του ΣΔ, ενώ ως προς την περίπτωση του ερωτηματικού ως ενδεικτικού ορίου φάσης σημειώνουμε ότι πρόκειται για ερωτήσεις «ηχούς» (*echo questions*), οι οποίες διαφέρουν στην παραγωγή τους από τις ερωτηματικές προτάσεις (βλ. Sobin 2010).

Γ) Για καθαρά θεωρητικούς λόγους, αν ο ΣΔ δεν φέρει φ-χαρακτηριστικά και το υποκείμενο νομιμοποιείται από τα φ-χαρακτηριστικά του ΣΔ της κύριας, τα εν λόγω χαρακτηριστικά μάλλον θα κληροδοτηθούν στην εξαρτημένη μέσω ενός ΣΔ.

Το δεύτερο ερώτημα που πρέπει να απαντηθεί είναι το εξής: Σε ποια φάση της κύριας ολοκληρώνεται η να-εξαρτημένη πρόταση; Σε ποια φάση της πρότασης «κλείνει» η εξαρτημένη και στέλνεται στα διεπίπεδα για ερμηνεία; Το συγκεκριμένο ερώτημα πρέπει, ωστόσο, να ερευνηθεί σε

⁹ Οι αναλύσεις βασίζονται στη θεωρία των αντιγράφων (*Copy Theory*, Chomsky 1995, 2000).

¹⁰ Αυτό ισχύει βεβαίως αν βασιστούμε στη θεωρία (Chomsky 2001), σύμφωνα με την οποία η απόδοση της πτώσης είναι αποτέλεσμα / προϊόν Συμφωνίας (*by product*).

συνδυασμό με όλες τις περιπτώσεις εξάρτησης: ελέγχου από το αντικείμενο της κύριας, απόδοσης της πτώσης κατ' εξαίρεση (*ECM*), ανύψωσης κλπ., θέματα που δεν εμπίπτουν στον στόχο της παρούσας μελέτης. Πιστεύουμε, όμως, ότι για τις περιπτώσεις ελέγχου του υποκειμένου η ολοκλήρωση της εξαρτημένης πρότασης γίνεται με την εισαγωγή του ΣΔ της κύριας πρότασης.¹¹

4. Κληροδότηση των φ-χαρακτηριστικών από τον ΣΔ στον Χρόνο

Το τρίτο ερώτημα που τέθηκε αρχικά στην εργασία και αναφέρεται στη νομιμοποίηση του υποκειμένου σχετίζεται με την κατηγορία στην οποία κληροδοτούνται τα φ-χαρακτηριστικά. Σύμφωνα με τη θεωρία (Chomsky 2005, 2007) τα φ-χαρακτηριστικά κληροδοτούνται στην κεφαλή του Χρόνου (*T'*). Ωστόσο, αντικείμενο μελέτης αποτελεί η περίπτωση των γλωσσών, όπως η Ελληνική, στις οποίες η κατηγορία του Χρόνου δεν ακολουθεί αμέσως μετά τον ΣΔ, όπως σε προτάσεις του τύπου «...ότι δεν θα αγοράσει βιβλία».

Η πρώτη προφανής ένδειξη ότι τα φ-χαρακτηριστικά μετακινούνται από τον ΣΔ και καταλήγουν στον Χρόνο – πιθανώς περνώντας από όσες κεφαλές παρεμβάλλονται – είναι η μορφολογική τους πραγμάτωση στην κεφαλή του Χρόνου, εφόσον το ρήμα της Ελληνικής κλίνεται σε πρόσωπο και αριθμό. Ωστόσο, υποστηρίζουμε τη μεταβίβαση αυτή από τον ΣΔ έως τον Χρόνο επιπλέον για τους εξής λόγους:

- α) Τα φ-χαρακτηριστικά (προσώπου και αριθμού) δεν είναι δυνατόν να φιλοξενηθούν από κατηγορίες όπως η Άρνηση, η Τροπικότητα ή η φράση Έγκλισης, καθώς εκεί τα εν λόγω χαρακτηριστικά δεν θα ελεγχθούν, θα μείνουν ανεμνήνευτα και η πρόταση θα καταρρεύσει. Με άλλα λόγια οι ενδιάμεσες κεφαλές δεν είναι συμβατές με τη φύση των φ-χαρακτηριστικών.
- β) Το ρήμα στον Χρόνο δεν θα μπορέσει να ελέγξει τα δικά του χαρακτηριστικά, αν τα φ-χαρακτηριστικά παραμείνουν π.χ. στη φράση Άρνησης.
- γ) Η μεταβίβαση των φ-χαρακτηριστικών στον Χρόνο υποστηρίζεται μεταξύ άλλων θεωρητικά για τη νομιμοποίηση του υποκειμένου (Richards 2007), η οποία για την Ελληνική σχετίζεται επιπλέον με τη νομιμοποίηση μετα-ρηματικού υποκειμένου.

5. Προτάσεις

Συνοψίζοντας την ανάλυσή μας καταλήγουμε στην εξής γενίκευση σχετικά με τον ΣΔ της Ελληνικής: Ο ΣΔ διακρίνεται σε δύο είδη: σε ΣΔ με [+φ-χαρακτηριστικά] και σε ΣΔ με [- φ-χαρακτηριστικά].

Συνέπειες της γενίκευσης είναι οι ακόλουθες:

- α) Ο ΣΔ που δεν φέρει φ-χαρακτηριστικά δεν αποτελεί κεφαλή φάσης, η φάση δεν «κλείνει» στη ΦΣΔ, αλλά ολοκληρώνεται σε μετέπειτα στάδιο της παραγωγής, στην κύρια πρόταση.
- β) Η έλλειψη φ-χαρακτηριστικών στον ΣΔ της συμπληρωματικής πρότασης επιβάλλει τον έλεγχο του υποκειμένου της.

Η γενίκευση αυτή οδηγεί περαιτέρω στην κατηγοριοποίηση των προτάσεων:

- α) [+ φ-χαρακτηριστικά] φέρει ο κενός ΣΔ των κύριων προτάσεων, των ανεξάρτητων να- και ας-προτάσεων, ορισμένων να-συμπληρωματικών και των προτάσεων της προστακτικής, καθώς και ο εκπεφρασμένος ΣΔ των ό-τι-συμπληρωματικών και ορισμένων που-προτάσεων.
- β) [- φ-χαρακτηριστικά] φέρει ο ΣΔ σε ορισμένες να-συμπληρωματικές.

Τα [+/- φ-χαρακτηριστικά] στον ΣΔ σχετίζονται με την αυτονομία μιας πρότασης, δηλαδή με τον ορισμό της ως «πλήρους» πρότασης. Από την παρούσα ανάλυση προέκυψαν δύο σαφείς περιπτώσεις:

1. Απολύτως αυτόνομες προτάσεις (πλήρεις προτάσεις), φράσεις με ΣΔ [+ φ-χαρακτηριστικά] που αποτελεί κεφαλή φάσης, οι οποίες παρουσιάζουν ανεξάρτητο υποκείμενο, ανεξάρτητο χρόνο και νομιμοποίηση ΣΑΠ.
2. Απολύτως εξαρτημένες προτάσεις, φράσεις με ΣΔ [- φ-χαρακτηριστικά], που δεν αποτελεί κεφαλή φάσης, οι οποίες παρουσιάζουν υποχρεωτικό έλεγχο υποκειμένου, εξαρτημένο χρόνο και αδυναμία νομιμοποίησης ΣΑΠ.

Η παραγωγή των προτάσεων που εξετάσαμε μπορεί να απεικονιστεί σχηματικά ως εξής:

¹¹ Για την περίπτωση ελέγχου υποκειμένου από το αντικείμενο της κύριας ενδεχομένως η πρόταση να «κλείνει» στη ρΦ της κύριας.

Οι κύριες και ανεξάρτητες προτάσεις, οι *ότι*- και *που*-συμπληρωματικές καθώς και οι *να*-προτάσεις με ανεξάρτητο υποκείμενο, ανεξάρτητο χρόνο και δυνατότητα νομιμοποίησης ΣΑΠ απεικονίζονται στο σχήμα 3:

Σχήμα 3

Για τις *να*-προτάσεις με ελεγχόμενο υποκείμενο, αναφορικό χρόνο και αδυναμία νομιμοποίησης ΣΑΠ προτείνεται το ακόλουθο σχήμα (σχήμα 4):

Σχήμα 4

Τα δεδομένα, ωστόσο, των *να*-συμπληρωματικών υποδεικνύουν τουλάχιστον μία ενδιάμεση κατηγορία προτάσεων: εκείνες με ανεξάρτητο υποκείμενο αλλά εξαρτημένο χρόνο, όπως στα παραδείγματα (25):

- (25) α. Θέλω να φύγεις (*έφυγες).
β. Προσπάθησα να περάσεις/ *πέρασες καλά στο πάρτυ.

Επίσης, ιδιαίτερο ενδιαφέρον παρουσιάζουν οι *να*-προτάσεις σε θέση συμπληρώματος απρόσωπων ρημάτων, καθώς δεν παρουσιάζουν έλεγχο υποκειμένου (26), νομιμοποιούν ΣΑΠ (27), αλλά η χρονική τους αναφορά εξαρτάται ορισμένες μόνο φορές από την κύρια (28):

- (26) Τυχαίνει / πρέπει / μπορεί να ξέρω πολλά μυστικά του.

(27) Ενδέχεται / πρέπει / μπορεί να έχουν καμιά καλή πρόταση για το βράδυ.

(28) α. Πρέπει να έγραψε (* γράψει) τις ασκήσεις του.

β. Πρέπει να γράψει (*έγραψε) τις ασκήσεις του μέχρι αύριο!¹²

Φαίνεται, λοιπόν, ότι υφίσταται μία διαβάθμιση ως προς την αυτονομία των προτάσεων, η οποία δηλώνει ότι ο εξαρτημένος χρόνος δεν επιβάλλει έλεγχο του υποκειμένου (βλ. και Terzi 1992), ενώ ισχύει το αντίστροφο: ο έλεγχος του υποκειμένου συνεπάγεται απαραίτητα εξαρτημένο χρόνο. Με άλλα λόγια οι δύο κατηγορίες Χρόνος και Συμφωνία, οι οποίες στην Ελληνική πραγματώνονται μορφολογικά στην κεφαλή του Χρόνου, ενώ συνδέονται κατ' αυτόν τον τρόπο, λειτουργούν ταυτόχρονα ανεξάρτητα ως προς τον έλεγχο του υποκειμένου και την εξάρτηση του χρόνου. Συνεπώς, η θέση του Chomsky (2005, 2007), που υιοθετήθηκε εδώ, για την κληροδότηση/μεταβίβαση φ-χαρακτηριστικών από τον ΣΔ στον Χρόνο ενισχύει την άποψη ότι πρόκειται για ανεξάρτητες κατηγορίες. Το συγκεκριμένο ζήτημα (Χρόνος-Συμφωνία) έχει, βεβαίως, μακρά ιστορία στη Γενετική Γραμματική. Το ερώτημα, ωστόσο, που τίθεται είναι κατά πόσο ο ΣΔ [+φ-χαρακτηριστικά] προτάσεων με ανεξάρτητο υποκείμενο και εξαρτημένο χρόνο αποτελεί κεφαλή φάσης ή όχι, ερώτημα που παραμένει ανοιχτό στην παρούσα εργασία.

7. Σύνοψη-συμπεράσματα

Ολοκληρώνοντας τη διερεύνηση των θεωρητικών θέσεων σχετικά με τον ΣΔ ως φορέα φ-χαρακτηριστικών και την κληροδότησή τους στον Χρόνο αναφορικά με την Νέα Ελληνική, θεωρούμε ότι η πρότασή μας για τη διάκριση του ΣΔ της Ελληνικής με [+/- φ-χαρακτηριστικά] προσδίδει μια νέα ερμηνευτική διάσταση στον ΣΔ, καθώς αποτελεί μια προσπάθεια τυποποίησής του, η οποία έχει ως συνέπεια τον χαρακτηρισμό του ως κεφαλή φάσης και τον προσδιορισμό της έννοιας μιας «πλήρους» πρότασης. Σε αυτή τη βάση ερμηνεύονται στο πλαίσιο των νέων θεωρητικών εξελίξεων φαινόμενα (υποχρεωτικού ελέγχου του υποκειμένου, αναφορικού χρόνου και νομιμοποίησης των ΣΑΠ) τα οποία έχουν αναλυθεί εκτενώς στην ελληνική βιβλιογραφία και συνεχίζουν να αποτελούν αντικείμενο περαιτέρω διερεύνησης.

ABSTRACT

This paper is a contribution to the study of the influence of bidialectism and bilingualism to the teaching of Modern Greek in Greek-Cypriot Primary Education, in relation to the acquisition of Modern Greek as L2. We present the results of a case study in the 4th and 5th grade of a primary school in the suburban area of Limassol: we analyse the "errors" made by foreign pupils in their written texts and we relate them with the insufficient teaching of Modern Greek as L2, as well as some elements of the general sociolinguistic situation in the school context.

Λέξεις κλειδιά: bidialectism, teaching of Modern Greek as L2, Cypriot dialect

1. Εισαγωγή

Η εργασία αυτή αποτελεί μια συμβολή στη μελέτη τη διδασκαλίας της νέας ελληνικής σε μη γηγενείς μαθητές στην ελληνοκυπριακή (Ε/Κ) Δημοτική Εκπαίδευση, καθώς και στην ανάδειξη κάποιων αδυναμιών του συγκεκριμένου εκπαιδευτικού συστήματος όσον αφορά την υποδοχή και την ορθή αντιμετώπιση των μη γηγενών μαθητών. Τα δεδομένα μας προέρχονται από γραπτά μαθητών της Δ' και Ε' Δημοτικού ενός ημιαστικού σχολείου στην περιοχή της Λεμεσού. Θα παρουσιάσουμε την κοινωνιογλωσσολογικοδιδακτική κατάσταση που επικρατεί γενικά στο συγκεκριμένο σχολείο και ειδικότερα στις τάξεις όπου φοιτούν οι συγκεκριμένοι μαθητές, θα προβούμε σε μια ανάλυση των λαθών τους σε σχέση με διάφορα επίπεδα ανάλυσης και θα εστιάσουμε την προσοχή μας στο γεγονός ότι καταβάλλονται ανεπαρκείς προσπάθειες διδασκαλίας της κοινής νεοελληνικής (ΚΝΕ) ως Γ2 παράλληλα με τη διδασκαλία της ως Γ1, ενώ επιπρόσθετα δε λαμβάνεται επαρκής μέριμνα όσον αφορά την ένταξή τους στην τάξη στην οποία ανήκουν, έτσι ώστε η τελευταία να είναι σ'αλήθεια μια κοινότητα γραμματισμού (Κωστούλη 2006) που θα βοηθούσε λειτουργικά στην εκμάθηση της νέας ελληνικής και όπου, σύμφωνα με έναν από τους βασικούς σκοπούς της γλωσσικής καλλιέργειας έτσι όπως ορίζονται από το νέο *Αναλυτικό Πρόγραμμα Σπουδών της Νέας Ελληνικής Γλώσσας* της Κυπριακής Δημοκρατίας, "όλα τα παιδιά ανεξαρτήτως φύλου, πολιτισμικού και κοινωνικού υπόβαθρου και μορφών αναπηρίας έχουν ισότιμη πρόσβαση σε μαθησιακές δραστηριότητες και οι συνεισφορές τους γίνονται αποδεκτές" (σ. 7).

2. Περιγραφή μαθητών

Σύμφωνα με τον Παπαρανίου (1999), πριν τη δημιουργία του ανεξάρτητου κυπριακού κράτους (1960) ο μαθητικός πληθυσμός ήταν ομοιογενής και μονόγλωσσος, τουλάχιστον στα πλαίσια της σχολικής τάξης. Από την άλλη, κάθε κοινότητα ενθάρρυνε την εκμάθηση ξένων γλωσσών (κυρίως της αγγλικής) αλλά όχι και την εκμάθηση της επίσημης γλώσσας του "άλλου" (νέα ελληνική ή τουρκική). Βέβαια, η συνύπαρξη των δύο κοινοτήτων, ακόμα και μέχρι το 1974 "παρήγαγε" δίγλωσσους όχι λίγους επαρκείς ελληνοτουρκόφωνους ή τουρκοελληνόφωνους ομιλητές.

Η κατάσταση άλλαξε από το 1974 και μετά, όταν: 1) ως αποτέλεσμα της εισβολής η Ε/Κ και η Τ/Κ κοινότητα ζουν σχεδόν εντελώς χωριστά, 2) πολλοί Κύπριοι επέστρεψαν από τους τόπους μετανάστευσης ή γέννησής τους στο εξωτερικό (Μ. Βρετανία, Η.Π.Α., Αυστραλία), και 3) εκατοντάδες ή χιλιάδες μη ελληνόφωνοι (κυρίως Ρώσοι, Ρουμάνοι, Φιλιππινέζοι, Σριλανκέζοι και Άραβες) ήρθαν ως οικονομικοί ή πολιτικοί μετανάστες στην Κύπρο. Έτσι, σύμφωνα με την Κοιλιάρη

(2011), στην Κύπρο η ιστορική συγκυρία διαμόρφωσε συγκεκριμένες γεωπολιτικές συνθήκες και ιδεολογικές επιλογές που με τη σειρά τους δημιουργούν μία περιρρέουσα ατμόσφαιρα στην οποία η πολυπολιτισμικότητα και η πολυγλωσσία θα πρέπει να θεωρείται δεδομένη.

Στη συγκεκριμένη περίπτωση, πολλά από τα παιδιά των οικογενειών του (2) και (3) φοιτούν στα δημόσια σχολεία της Κυπριακής Δημοκρατίας, όπου η γλώσσα διδασκαλίας είναι η κυπριακή διάλεκτος (ΚΔ) ή η ΚΝΕ και η γλώσσα στόχος ήταν μέχρι το 2010 αποκλειστικά η ΚΝΕ. Σε ορισμένες περιπτώσεις παρέχονται ενισχυτικά μαθήματα ΚΝΕ στα παιδιά αυτά.

Γενικά, σε τέτοιες περιπτώσεις προκύπτουν ερωτήματα όπως:

α) Πώς και πόσο εντάσσονται στο σχολικό περιβάλλον και πόσο γίνονται αποδεκτά από τους "άλλους" συμμαθητές τους;

β) Πόσο επιτυχημένα είναι τα παιδιά αυτά ως προς την κατάκτηση της νέας ελληνικής;

(ένα υποερώτημα που τίθεται εδώ είναι:

τι εννοούμε με το *νέα ελληνική*: μόνο την ΚΝΕ, την ΚΝΕ και την ΚΔ, την τυχόν διαγλώσσα που μπορεί να έχει προκύψει από τη συνύπαρξή τους¹);

Επιπλέον, σύμφωνα με την Κοιλιάρη (2011), τίθενται και ερωτήματα όπως:

1. Ποια είναι η Γ1 και η Γ2 των μαθητών; Η ΚΝΕ ή η ΚΔ ή η γλώσσα της εθνικής ομάδας;

2. Η ΚΝΕ είναι για κάποιους μαθητές Γ3 ή ΞΓ;

Το υλικό που θα εξετάσουμε στη συγκεκριμένη περίπτωση προέρχεται από δεκατέσσερις μαθητές Δ' και Ε' Δημοτικού ενός σχολείου στην ημιαστική περιοχή της Λεμεσού, οι οποίοι είναι γεννημένοι στο εξωτερικό και είτε ο ένας από τους δύο γονείς τους είναι κυπριακής καταγωγής είτε και οι δύο αλλοδαποί. Ουσιαστικά, αυτή τη στιγμή βιώνουν μια κατάσταση τριγλωσσίας με την ΚΔ και τη μητρική γλώσσα της μητέρας τους να είναι τα δύο συστατικά αυτής της κατάστασης και τώρα έχουν εγκατασταθεί σε μια ημιαστική περιοχή που μέχρι πρόσφατα (πριν 10 χρόνια) θεωρούνταν χωριό, και όπου τα ελληνικά που χρησιμοποιούνται είναι κυρίως η ΚΔ αλλά στο σχολείο η γλώσσα-στόχος είναι η ΚΝΕ.

Η κατάσταση στο σχολείο έχει ως εξής: στην κανονική τάξη η δασκάλα τους φέρεται ισότιμα με τα άλλα παιδιά αλλά δεν υπάρχει καμιά εξατομίκευση (σε σχέση, π.χ. με το γεγονός ότι οι συγκεκριμένοι μαθητές είναι πιο αδύνατοι). Διδάσκονται επιπλέον μια ώρα ελληνικά κάθε Πέμπτη όλοι μαζί σε μια τάξη από μια άλλη δασκάλα με μεταπτυχιακό στη διδασκαλία της ελληνικής ως Γ2. Αυτή τους φέρνει δικές της ασκήσεις. Η προσέγγιση είναι δασκαλοκεντρική και η εστίαση στον γραπτό λόγο: η διδάσκουσα περνά πάνω από κάθε παιδί και ελέγχει πώς λύνει τις ασκήσεις.

Δε φαίνεται να δίνεται συστηματικά προσοχή σε βασικές αρχές της διαπολιτισμικής εκπαίδευσης, όπως αυτές της αποδοχής του πολιτισμικού κεφαλαίου των μαθητών και της παροχής ίσων ευκαιριών², και γενικά επικρατεί μια κατάσταση όπου (δικαιολογημένα ή αδικαιολόγητα) οι μαθητές δε δείχνουν εξοικειωμένοι με την έννοια της ετερότητας (γλωσσικής και εν γένει κοινωνικοπολιτισμικής). Είναι χαρακτηριστικό ότι γηγενείς και αλλογενείς κάθονται ξεχωριστά και στην τάξη και στα διαλείμματα, αν πρόκειται να παίξουν μπάλα ή κάτι άλλο, παίζουν αλλοδαποί εναντίον γηγενών κλπ., σε αρκετές περιπτώσεις παρατηρήθηκε οι γηγενείς να ειρωνεύονται τα ελληνικά των αλλογενών.

3. Σε τι μας βοηθά η ανάλυση των λαθών;

Ξέρουμε ότι το ερευνητικό πεδίο της κατάκτησης μιας γλώσσας ως δεύτερης/ξένης έχει στόχο, μεταξύ άλλων, να ερμηνεύσει τη μη ρητή γνώση των μαθητών (implicit knowledge) για την υπό εκμάθηση γλώσσα: τη μη συνειδητή, αυτοματοποιημένη γνώση που εκδηλώνεται στην αυθόρμητη παραγωγή λόγου³. Εφόσον, όμως, η μη ρητή γνώση της γλώσσας δεν είναι εύκολο να διερευνηθεί άμεσα, θα πρέπει να συναγάγουμε συμπεράσματα σχετικά με τη γλωσσική ικανότητα των μαθητών μέσω της παραγωγής του γραπτού και προφορικού τους λόγου, καταγράφοντας και αναλύοντας δείγματα της (δια)γλώσσας των μαθητών⁴. Σύμφωνα με τον Αρχάκη (2005: 139), η συνειδητοποίηση των προβλημάτων που αντιμετωπίζουν οι μη γηγενείς μαθητές είναι απολύτως απαραίτητη για τους εκπαιδευτικούς, επειδή έχει αποδειχτεί ότι οι προκαταλήψεις τους απέναντι στις πολιτιστικές και γλωσσικές καταβολές παίζουν έναν πολύ σημαντικό ρόλο και οδηγούν στη λεγόμενη "αυτο-εκπληρούμενη προφητεία" (self-fulfilling prophecy⁵). Στην περίπτωσή μας ισχύει το εξής: τα παιδιά

¹ Βλ., ενδεικτικά, Τσιπλάκου (2009).

² Δαμανάκης (2002: 103-104)

³ Ellis & Barkhuizen (2005)

⁴ Selinker (1972)

⁵ Hudson (1980: 209)

από τα οποία προέρχεται το υλικό μας έχουν διαμορφώσει μια διαγλώσσα που βασίζεται στην ΚΔ και στη μητρική τους, που είναι διαφορετική από την ΚΝΕ. Αυτό σημαίνει ότι οι μαθητές στους οποίους αναφερόμαστε, έρχονται στο σχολείο χρησιμοποιώντας ένα γλωσσικό σύστημα που από την κοινωνία και τους εκπαιδευτικούς θεωρείται κατώτερο της σχολικής νόρμας. Επιπλέον, σύμφωνα με τις δασκάλους τους, πρόκειται για παιδιά που οι μελλοντικές τους προσδοκίες (επαγγελματικές κλπ.) δε συνδέονται με την καλή εκμάθηση της ΚΝΕ, οπότε και τα ίδια και το περιβάλλον τους δε δίνουν ιδιαίτερη έμφαση στη συγκεκριμένη εκμάθηση. Όλα τα παραπάνω αποτελούν παράγοντες που είναι γνωστό ότι ωθούν τους εκπαιδευτικούς (όχι πάντα συνειδητά) σε αρνητικές εντυπώσεις και κρίσεις, επομένως χαμηλές προσδοκίες για τις γλωσσικές ικανότητες αυτών των παιδιών. Ταυτόχρονα, το σύστημα των ενισχυτικών μαθημάτων είναι διαμορφωμένο με τέτοιο τρόπο ώστε να μην ιδιαίτερα αποτελεσματικό. Η συνέπεια για τα ίδια τα παιδιά είναι η διαμόρφωση αρνητικής εικόνας όσον αφορά τη δυνατότητά τους να βελτιωθούν ως προς τη νόρμα, κάτι που με τη σειρά του οδηγεί σε μειωμένη ή μηδενική προσπάθεια και σε χαμηλές επιδόσεις.

4. Το γλωσσικό λάθος

Σύμφωνα με τους Θεοδωροπούλου & Παπαναστασίου (2001), ως γλωσσικό λάθος θα μπορούσε να οριστεί κάθε απόκλιση από τη γλωσσική νόρμα, την οποία μια κοινότητα θέτει ως πρότυπο και την περιβάλλει με το κύρος του κανόνα. Υπάρχουν διάφορες κατηγοριοποιήσεις των γλωσσικών λαθών. Μια από αυτές είναι αυτή των Θεοδωροπούλου & Παπαναστασίου (2001), που αξιοποιώντας και την αναλυτικότερη κατηγοριοποίηση του Σετάτος (1991), προτείνουν τη διάκριση σε 1) λάθη που αφορούν το γλωσσικό σύστημα, 2) λάθη που αφορούν τη χρήση της γλώσσας, και 3) λάθη που αφορούν τη γραπτή μορφή της γλώσσας και υποκατηγορίες όπως

Λάθη που αφορούν το γλωσσικό σύστημα: α) εκείνα που αφορούν το φωνητικό/φωνολογικό επίπεδο, π.χ. η προφορά της λέξης *διάρρηξη* ως [ˈðjariksi] αντί του κανονικού [ðiˈariksi] κατ'αναλογία προς πολλές άλλες λέξεις που αρχίζουν με [ðja] (π.χ. *διαβάζω* [ðjaˈvazo]). Στην ίδια κατηγορία ανήκουν και παραφθορές στην προφορά μη προσαρμοσμένων δανείων, όπως *σουπερμάρκερ* "σουπερμάρκετ", καθώς και λάθη τονισμού όπως *πανεπιστήμιου*⁶, β) εκείνα που αφορούν το μορφολογικό επίπεδο, π.χ. εκφορές όπως *πιο ανώτερος* ή *πιο καλύτερος*, όπου συνυπάρχουν πλεοναστικά δύο μορφήματα (*πιο* και *-τερος*) για τη δήλωση του συγκριτικού βαθμού, λάθη στην κλίση λόγιων στοιχείων της ΚΝΕ [π.χ. η διατήρηση της εσωτερικής αύξησης στον τύπο της προστακτικής *διέγραψε* (αντί του *διάγραψε*) κατ'αναλογία προς το γ' εν. του αορίστου *διέγραψε*⁷, της συγγραφέας (κατ'αναλογία προς τη γεν. εν. των θηλ. σε -ς), *του/της διεθνή* (αντί του *διεθνούς*) κατ'αναλογία τύπων γενικής όπως *του μαθητή*⁸], χρήση μορφολογικών στοιχείων άλλης γλώσσας [π.χ. *πέναλτις* "πέναλτι (πληθ.)"], λανθασμένη παραγωγή, π.χ. *εγκαινίζω* αντί του *εγκαινιάζω*, γ) εκείνα που αφορούν το συντακτικό επίπεδο, π.χ. *μετά Χριστού* (αντί του *μετά Χριστόν*) κατ'αναλογία προς την εκφορά *προ Χριστού*, *προ δύο μήνες* αντί του (*προ δύο μηνών*) κατ'αναλογία του συντακτικού σχήματος της ΚΝΕ που ορίζει ότι όλες οι προθέσεις συντάσσονται με αιτιατική, συμφωνία όρων, π.χ. *των εκκρεμομένων διαβουλεύσεων* "των διαβουλεύσεων που εκκρεμούν"⁹.

Λάθη που αφορούν τη χρήση της γλώσσας: Εδώ μπορούν να ενταχθούν λάθη που εμφανίζονται κυρίως στον προφορικό λόγο (και σπανιότερα στον γραπτό, π.χ. σε μια επιστολή), για την κατανόηση των οποίων είναι απαραίτητη η εμπλοκή κοινωνικών παραγόντων, με την έννοια της αλληλεπίδρασης πομπού και δέκτη. Λάθη στις περιπτώσεις αυτές θα μπορούσαν να θεωρηθούν η ανάμειξη διαφορετικών επιπέδων ύφους (π.χ. λαϊκός λόγος σε επιστημονικό κείμενο), η παραβίαση των κανόνων γλωσσικής συμπεριφοράς σε συγκεκριμένα κοινωνικά συμφραζόμενα (π.χ. η χρήση ενικού αντί του πληθυντικού ευγενείας, όταν απευθυνόμαστε σε ανώτερο στο περιβάλλον εργασίας μας), που μπορεί να οδηγήσει και σε αναποτελεσματικό λόγο ιδιαίτερα στην περίπτωση του γραπτού λόγου η χρήση λαϊκών τύπων (όπως *αερόπλανο* κλπ.) ή διαλεκτικότερων τύπων, π.χ. *που πήραν έναν ελέφαντα όπου* (ΚΝΕ *που*) με *κυνηγούσε*¹⁰.

⁶ Βλ. και Θεοφανοπούλου-Κοντού (2001: 54) και Ξυδόπουλος (2004: 252).

⁷ Βλ. και Ξυδόπουλος (2004: 523), που αποδίδει, μεταξύ άλλων, το συγκεκριμένο φαινόμενο στην υπερχρήση λόγιων θεμάτων που φέρουν πάγια τη χρονική αύξηση και τα οποία οι ομιλητές δεν έχουν την ικανότητα να διακρίνουν.

⁸ Βλ. και Ξυδόπουλος (2004: 524).

⁹ Θεοφανοπούλου-Κοντού (2001: 55).

¹⁰ Βλ. και Σετάτος (1991: 28).

Λάθη που αφορούν τη γραπτή μορφή της γλώσσας: Πρόκειται κατά κύριο λόγο για τα ορθογραφικά λάθη, στα οποία έχει επικεντρωθεί ένα μεγάλο μέρος της γλωσσικής διδασκαλίας και των οποίων ο χαρακτήρας υπερτονίζεται συχνά¹¹. Αυτό δεν αναιρεί, βέβαια, το γεγονός ότι η ορθογραφία αποτελεί ένα πεδίο στο οποίο ο χρήστης της γλώσσας πρέπει να ασκηθεί¹². Θα μπορούσαμε να διακρίνουμε τα ορθογραφικά λάθη σε δύο βασικές κατηγορίες¹³: α) λανθασμένη χρήση γράμματος: σχετίζονται με την ιστορική ορθογραφία και οφείλονται είτε σε ατελή εκμάθηση ή συνειδητοποίηση των κανόνων που τη διέπουν είτε στην έλλειψη της απαραίτητης προσοχής κατά τη σύνταξη ενός κειμένου, π.χ. *λύνετε* αντί *λόνεται*, *αμφισβητείστε* αντί *αμφισβητήστε*, *γίνο* αντί *γίνω*¹⁴, β) ελλιπής ή λανθασμένη χρήση των σημείων στίξης: οφείλονται συνήθως στο ότι αυτός που γράφει δεν "περνάει" από την αμεσότητα του προφορικού στην εμμεσότητα και αποστασιοποίηση του γραπτού λόγου. Με άλλα λόγια, δεν προβαίνει στην αναγκαία αφαίρεση εκείνων των χαρακτηριστικών του προφορικού λόγου η οποία θα του επιτρέψει να μεταβεί στον γραπτό¹⁵, π.χ. *Σας προσκαλο στα γενεθλια μου το Σαββατο 15 Νοεμβρηου θα τα κανο στο λούνα παρκ στην Λεμεσο Σας περιμένω!*, όπου είναι χαρακτηριστικό ότι ο τόνος χρησιμοποιείται προκειμένου να τονιστεί πού θα γίνει το συγκεκριμένο πάρτι γενεθλίων και, ενώ δεν υπάρχουν τελείες, η τελευταία πρόταση, ίσως αντιγραμμένη από κάποια άλλη πρόσκληση, είναι ολόσωστη (διαθέτει ακόμα και θυμαστικό στο τέλος). Σε περιπτώσεις όπως αυτές τίθεται το ζήτημα τι κάνουμε με εκείνα τα παιδιά που σαφώς διαθέτουν κειμενική ικανότητα (είναι χαρακτηριστικό ότι η συγκεκριμένη μαθήτρια φαίνεται να έχει συνδυάσει ορθά στοιχεία από δύο κείμενα - το δικό της και κάποιο άλλο) αλλά υστερούν σε άλλους τομείς (στη συγκεκριμένη περίπτωση στη μορφολογία).

Επιπλέον, στη βιβλιογραφία υπάρχουν διάφορες κατηγοριοποιήσεις λαθών όσον αφορά τη Γ2, όπως αυτή των Αναστασιάδη κ.ά. (2008). Περιλαμβάνει κατηγορίες όπως¹⁶

Φωνολογικά και γραφηματικά λάθη

1. Λάθη σε φωνήματα,
 - α. παράλειψη: *δοντα*
 - β. σε φωνήεντα: *βγαζι*,
 - γ. στον τρόπο άρθρωσης: *Ατρέα* "Αντρέα"
 - δ. στον τόπο άρθρωσης: *κτινιακτο* "κτηνίατρος"
 - ε. σε συμφωνικά συμπλέγματα: *κοριστι* "κορίτσι"
 - στ. σε δίψηφα φωνήεντα, π.χ. *φρυτα* "φρούτα"
2. Λάθη στην ορθογραφία/ γραφή
 - α. σε λεξικά μορφήματα: *χρόματα*, *πιγένει*, *πέζει*
 - β. σε γραμματικά/ κλιτικά μορφήματα: *βιβλοδiki* "βιβλιοθήκη", *των παιδιόν*
 - γ. σε επιθήματα: *ξαφνηκά*
 - δ. στα όρια λέξης: *γιάφτο* "γί'αυτό", *χέργιαμας* "χέρια μας"
 - ε. μικρά-κεφαλαία / τελικό-ς: *το σάβατο*, *Λεμεζος*
 - στ. φωνητική γραφή: *αφτοκινιτο*, *χέργιαμας* "χέρια μας"
 - ζ. ξένο αλφάβητο: *Λεμεζος*
 - η. σε σημεία στίξης: *Έχει TV, κρύβατι, ύπολογιστικι, εχει πολια πράγματα* "(Στο σπίτι μου) υπάρχει τηλεόραση, κρεβάτι, υπολογιστής. Υπάρχουν πολλά πράγματα"
 - θ. στον τονισμό: *εχει πολια πράγματα*

Μορφολογικά λάθη

- α. στο άρθρο: στο *θαλασσα*
- β. στο γραμματικό κλιτικό μόρφημα: *γίνο*
- γ. στη ρηματική όψη: *Όταν έφευγα από το σινεμά, πήρα το λεωφορείο και γύρισα στο σπίτι.*
- δ. στο γένος: *το ζοα* "τα ζώα"

Μορφοσυντακτικά λάθη

- α. στη συμφωνία γένους: *Το σπίτι μου είναι ψιλια, μύκρι, και ομορφί*
- β. στη συμφωνία αριθμού: *είμαι πιαδιά* "είμαι παιδί"
- γ. στη συμφωνία πτώσης: *14/2/2010 Ομίχλη στις Αποκριές και κακοκαιρίας*

¹¹ Για τον ιδιαίτερα σημαντικό ρόλο που πάντα έπαιζε το ζήτημα της ορθογραφίας στο πλαίσιο της νεοελληνικής γλωσσολογίας και διδασκαλίας της γλώσσας, βλ. την ιστορική επισκόπηση του Παπαναστασίου (2008: 117-182).

¹² Βλ. και Παπαναστασίου (2008: 87-88).

¹³ Βλ. και Θεοδωροπούλου & Παπαναστασίου (2001).

¹⁴ Βλ. και Σετάτο (1993: 136) και Παπαναστασίου (2008: 87).

¹⁵ Φυσικά, εδώ δε περιλαμβάνονται περιπτώσεις όπως το *Και τώρα... η συνέχεια της ταινίας* όπου τα αποσιωπητικά δηλώνουν έκπληξη, σαν να ήταν κάτι το απροσδόκητο η συνέχεια της ταινίας (Σετάτος (1991: 26) και όπου είναι σαφές ότι έχουμε να κάνουμε με ελλιπή γνώση κανόνων που αφορούν τη στίξη.

¹⁶ Τα παραδείγματα προέρχονται από το υλικό που συλλέχθηκε στα πλαίσια της παρούσας εργασίας.

δ. στην έγκλιση: *διά το φαίνομαι γειτόνικι πλέον καλά* "για να με βλέπουν με καλύτερο μάτι οι γείτονες", *Διάβασε τα μαθήματά σου, αφού πρώτα να φάεις το φαγητό*.

ε. στη συμφωνία προσώπου: *ο Μίμης θορίς τι ζαγκέτα* "Ο Μίμης φορά τη ζακέτα".

Επιπλέον, είναι λογικό να εμφανίζονται και λάθη που ίσως να οφείλονται στην επίδραση της Γ1, π.χ. η συχνή επανάληψη αντωνυμικών τύπων σε ονομαστική ως υποκείμενα σε παιδιά που στη μητρική τους γλώσσα (π.χ. αγγλική) η δήλωση του υποκειμένου του ρήματος είναι υποχρεωτική, π.χ.

(1)

Θελω ναγίνο κτινιατος επιδι εγω αγαπη ζωα Και εγω εχω 2 σκυλος και 8 γατες και 1 αλογο. Εγω αγαπη σκυλος επιδι εγω εχω ειχα σκυλος ολλη τη ζωη μου "Θέλω να γίνω κτηνίατρος, επειδή αγαπώ τα ζώα. Εξάλλου, εγώ έχω 2 σκύλους και 8 γάτες και 1 άλογο. Αγαπώ τους σκύλους επειδή είχα σκύλους όλη μου τη ζωή".

Τέλος, σε ένα περιβάλλον διδασκαλίας είναι αναμενόμενο να εμφανίζονται και λάθη – διαλεκτικές παρεμβολές, π.χ.

(2)

να φάεις¹⁷ το φαγητό

(3)

Ακούσαμε ένα δυνατό θόρυβο, σαν τρέχαμε "Ακούσαμε ένα δυνατό θόρυβο, την ώρα που τρέχαμε" (όπου χρησιμοποιείται το προφορικό ή λαϊκότροπο (μόνο στην ΚΝΕ¹⁸ αλλά όχι και στην ΚΔ) *σαν* αντί για το *ενώ* ή το *όταν*)

(4)

πεζο με πεδια απο συνοικία "παίζω με τα παιδιά της γειτονιάς" (όπου το *συνοικία* χρησιμοποιείται με τη σημασία «γειτονιά»)

(5)

ειχα συλος ολλη τη ζωη μου "είχα σκύλους όλη τη ζωή μου", (όπου εκτός από το ΚΔ *συλος* έχουμε και το υβριδικό *ολλη*, αποτέλεσμα του συνδυασμού το ΚΝΕ *όλη* και του ΚΔ *ούλλη*)

(6)

ενοσε πολα λλιπημενος "ένιωσε πολύ λυπημένος" (με το ποσοτικό επίρρημα *πολα* (ΚΔ *πολλά* / ΚΝΕ *πολύ*)

(7)

ύπολογιστικι "ηλεκτρονικός υπολογιστής" (όπου χρησιμοποιείται λανθασμένα το *υπολογιστική* που στην ΚΔ σημαίνει "αριθμομηχανή"),

(8)

Θελω να μπαλεβον "Μου αρέσει να παλεύω" (με [p>b] ίσως λόγω επανάλυσης σε περιβάλλοντα όπου πριν από το *παλεύω* υπήρχε [n], π.χ. *εν παλεύω* ['emba'levo] «δεν παλεύω»).

Από την άλλη, θα πρέπει να επισημάνουμε ότι σε κειμενικό επίπεδο τα προβλήματα ήταν πολύ λιγότερα, π.χ.

(1)

Θελω ναγίνο κτινιατος επιδι εγω αγαπη ζωα Και εγω εχω 2 σκυλος και 8 γατες και 1 αλογο. Εγω αγαπη σκυλος επιδι εγω εχω ειχα σκυλος ολλη τη ζωη μου "Θέλω να γίνω κτηνίατρος, επειδή αγαπώ τα ζώα. Εξάλλου, εγώ έχω 2 σκύλους και 8 γάτες και 1 άλογο. Αγαπώ τους σκύλους επειδή είχα σκύλους όλη μου τη ζωή".

Στο παραπάνω κείμενο που το έχει συνθέσει μια μαθήτρια της Δ' Δημοτικού με Γ1 την αγγλική (το ζητούμενο ήταν η σύνταξη ενός σύντομου κειμένου με τίτλο ή θέμα "Μια ευχή") το οποίο σαφώς και διαθέτει συνοχή: ξεκινά με την ευχή και ακολουθεί μια επαρκής αιτιολόγηση. Επιπλέον, είναι

¹⁷ Χατζηιωάννου (1999: 88)

¹⁸ Βλ. *Λεξικό της κοινής νεοελληνικής*, λήμ. *σαν* III2.

ενδιαφέρον ότι σε επίπεδο συνεκτικότητας διαρθρωτικές λέξεις υπάρχουν: το αιτιολογικό *επιδι* χρησιμοποιείται ορθά, όπως επίσης και το *Και*, με την επεξηγηματική και όχι συνδετική του σημασία¹⁹.

5. Τι συμβαίνει στην περίπτωση μας;

Το πρόβλημα είναι ότι έτσι όπως ήταν "οργανωμένη" η διδασκαλία της ΚΝΕ δεν υπήρχε η δυνατότητα για μια συστηματική κειμενοκεντρικού τύπου διδασκαλία της ΚΝΕ, που να λαμβάνει υπόψη τις ανάγκες των μη γηγενών. Στα πλαίσια του κανονικού ωρολόγιου προγράμματος η δασκάλα δεν είχε τον χρόνο για κάτι τέτοιο σε συνδυασμό και με το γεγονός ότι έπρεπε να διδάξει και στους γηγενείς. Επιπλέον, στα πλαίσια της ενισχυτικής διδασκαλίας διάρκειας μιας ώρας (για την οποία θα πρέπει να προσθέσουμε ότι με προσωπική επιλογή της διδάσκουσας επεκτεινόταν σε αρκετές περιπτώσεις ακόμα και κατά 100%) δεν ήταν δυνατή μια κειμενοκεντρική ή εξατομικευμένη διδασκαλία σε μια τάξη όπου είχαν «στοιβαχτεί» παιδιά διαφόρων ηλικιών και επιπέδων ελληνομάθειας. Εξάλλου, όσον αφορά τον γραπτό λόγο των παιδιών, δε γινόταν καμιά προσπάθεια να αποτελέσει προϊόν επεξεργασίας ή διόρθωσης από την υπόλοιπη τάξη. Ουσιαστικά, δηλ. έλειπε αυτό που ο Ματσαγγούρας (2001) ονομάζει *μετασυγγραφική φάση*²⁰, κατά την οποία οι μαθητές σε συνεργασία με τους δασκάλους και τους συμμαθητές τους επεξεργάζονται, βελτιώνουν και διορθώνουν τα κείμενά τους. Κάτι τέτοιο θεωρούνταν εξαιρετικά δύσκολο και δοκιμαζόταν σπάνια, επειδή συνήθως οι γηγενείς ειρωνεύονταν τα ελληνικά των μη γηγενών. Έτσι, χανόταν μια σημαντική ευκαιρία να συνειδητοποιήσουν οι γηγενείς μαθητές τη διαφορετικότητα της κυπριακής κοινωνίας μέσω της αιτιολογημένης διόρθωσης των γλωσσικών λαθών των αλλοδαπών, π.χ. μέσω της παρουσίας συγκεκριμένων λαθών ως αποτέλεσμα της επίδρασης του διαδialeκτισμού, π.χ. μέσω της εξήγησης ότι το *φάεις* γράφτηκε λάθος σε σχέση με τη νόρμα της ΚΝΕ, επειδή ο μη γηγενής μαθητής ζει σε ένα περιβάλλον όπου τα ελληνικά του διαμορφώνονται με πρωταγωνιστή την ΚΔ και όχι την ΚΝΕ. Με τέτοιου είδους προσεγγίσεις θα μπορούσαν όλοι οι μαθητές να έρθουν και πιο κοντά σε μια από τις βασικές έννοιες του *Προγράμματος Σπουδών Νέας Ελληνικής Γλώσσας* (2010) της Κυπριακής Δημοκρατίας, του *κριτικού γραμματισμού*, στα πλαίσια της παιδαγωγικής του οποίου "παίζει τεράστιο ρόλο η επίγνωση της λειτουργίας της γλωσσικής ποικιλότητας ως ενδείκτη και φορέα κοινωνικών/πολιτισμικών νοημάτων. Αν πρόκειται να διδαχθεί λειτουργικά ή κοινωνιογλωσσική/υφολογική διαφοροποίηση ανάλογα με το κειμενικό είδος και την περίπτωση μέσα στην οποία γεννάται, καθώς και οι τρόποι με τους οποίους η γλωσσική διαφοροποίηση κωδικοποιεί κοινωνικές σχέσεις και πολιτισμικές πρακτικές, αυτό δεν μπορεί να γίνει εν κενώ και ερήμην της γλωσσικής πραγματικότητας των μαθητών και των μαθητριών" (σελ. 10).

Εδώ, βέβαια, θα πρέπει να σημειωθεί ότι σε επίπεδο προφορικού λόγου θα μπορούσαμε να πούμε ότι η συγκεκριμένη τάξη λειτουργούσε ως κοινότητα γραμματισμού σε άλλα μαθήματα (π.χ. Μαθηματικά) αλλά όχι στη Γλώσσα, όπου και πάλι σπάνια υπήρχε η οποιαδήποτε προφορική συνεισφορά των μη γηγενών²¹. Παρατηρήθηκε δε ότι συχνά κατά τη διάρκεια των Ελληνικών οι μη γηγενείς δε συμμετείχαν ουσιαστικά στο μάθημα αλλά απασχολούνταν με το να λύνουν τις ασκήσεις της ενισχυτικής διδασκαλίας. Σύμφωνα με την Dyson (1999: 396), η παραγωγή γραπτού λόγου μέσα στην τάξη όχι μόνο απαιτεί από τα παιδιά να διαφοροποιούν τις φωνολογικές λεπτομέρειες του λόγου τους και τα κειμενικά χαρακτηριστικά αλλά και τους κοινωνικούς τους κόσμους, οι οποίοι βέβαια, τους παρέχουν τη βάση για την ανάπτυξη της δημιουργικότητάς τους. Δυστυχώς στην περίπτωση μας η επίλυση των ασκήσεων της ενισχυτικής διδασκαλίας και η μη ουσιαστική συμμετοχή στο καθαυτό μάθημα αναπαρήγαγε για τους μη γηγενείς τον εξωσχολικό κοινωνικό τους κόσμο, στα πλαίσια του οποίου η δημιουργική συμμετοχή στη σχολική πράξη του Ε/Κ εκπαιδευτικού συστήματος δε θεωρείται κάτι σημαντικό, και φυσικά ανάλογα διαμορφώνεται και η δημιουργικότητα αυτών των παιδιών.

Ανακεφαλαιώνοντας θα μπορούσαμε να πούμε ότι στην περίπτωση που εξετάζουμε, δεν υπήρχε καμιά δυνατότητα για ανάπτυξη μιας διαφοροποιημένης γλωσσοδιδακτικής στρατηγικής που να λαμβάνει υπόψη τις γλωσσικές και πολιτισμικές ιδιαιτερότητες των μαθητών, κάτι που, φυσικά, ήταν εξαιρετικά επιζήμιο όχι μόνο για τους ίδιους τους μαθητές αλλά και για ολόκληρη την κοινωνία, αφού μειώνονταν οι δυνατότητες επιτυχούς κοινωνικής ενσωμάτωσης, χωρίς να χάνεται η

¹⁹ Οι Spinillo & Pratt (2009: 70) επισημαίνουν ότι μελέτες σχετικά με τη γενική ανάπτυξη των παιδιών έχουν δείξει ότι τα παιδιά στις πρώιμες προσπάθειές τους για παραγωγή κειμένων φαίνεται να ελέγχουν καλύτερα το συνολικό ή μακροδομικό επίπεδο του κειμένου παρά τα μικροδομικά στοιχεία.

²⁰ Βλ. και Αρχάκης (2005: 140-141).

²¹ Οι μελέτες στον τόμο Moje & O' Brien (2001) δείχνουν ότι ότι τα σχολικά περιεχόμενα δεν είναι στατικά αλλά μεταβάλλονται από βαθμίδα σε βαθμίδα ή (όπως στην περίπτωση μας) από μάθημα σε μάθημα, καθώς κάθε μάθημα συνιστά μια πολιτισμική κοινότητα.

διαφορετικότητα αλλά και χωρίς αυτή η διαφορετικότητα να μετατρέπεται σε ανισότητα που οδηγεί σε περιθωριοποίηση.

ABSTRACT

Idiolect has not been extensively studied so far, since most studies focus on the language of social groups rather than individuals. This paper aims at exploring idiolectal variation in the speech of three Greek government press secretaries from two political parties. The data come from their briefings and were analyzed with corpus-linguistic methods. The lexicogrammatical choices of each speaker were identified through the analysis of keywords, clusters and concordances. It was found that the three speakers have specific linguistic preferences, which systematically relate to their idiolect, although further research is needed on the subject.

Λέξεις κλειδιά: γλωσσική ποικιλία, ιδιόλεκτος, κειμενικό είδος ενημέρωσης συντακτών, λέξεις-κλειδιά, λεξικά συμπλέγματα, σώματα κειμένων

1. Εισαγωγή

Η ιδιόλεκτος δεν έχει μελετηθεί εκτεταμένα στα ελληνικά, αλλά και στις άλλες γλώσσες, καθώς το ενδιαφέρον των ερευνητών έχει στραφεί κυρίως στην ανάλυση της γλώσσας που χρησιμοποιούν ομάδες ομιλητών (π.χ. εθνικές γλώσσες, διάλεκτοι, κοινωνιόλεκτοι) και όχι μεμονωμένα άτομα. Ως ιδιόλεκτος συνήθως θεωρείται ο ξεχωριστός τρόπος με τον οποίο μιλά και/ή γράφει κάθε άτομο. Έτσι, οι Leech και Short ορίζουν την ιδιόλεκτο ως «το γλωσσικό αποτύπωμα ενός συγκεκριμένου ατόμου, τα χαρακτηριστικά του λόγου του που το κάνουν να ξεχωρίζει από τους άλλους» (1981: 167), χρησιμοποιώντας τη μεταφορά του δακτυλικού αποτυπώματος, που είναι μοναδικό για κάθε άτομο. Οι Hatim και Mason πάλι θεωρούν ότι ιδιόλεκτος είναι «οι μη συνειδητές γλωσσικές συνήθειες κάθε ομιλητή» (1990: 10). Ο ορισμός αυτός θέτει το κριτήριο της μη συνειδητότητας, ενώ η παρουσίαση της ιδιολέκτου ως συνόλου γλωσσικών συνθηγιών οδηγεί και στη θεώρησή της ως στοιχείου που μπορεί να διαφοροποιείται με την πάροδο του χρόνου. Την αντίληψη ότι η ιδιόλεκτος ενός ατόμου δεν μένει αμετάβλητη εκφράζει και ο Dittmar στο παρακάτω απόσπασμα: «ιδιόλεκτος είναι η γλώσσα κάθε ατόμου, η οποία, εξαιτίας των συνθηγιών που έχει αποκτήσει και των υφολογικών στοιχείων της προσωπικότητάς του, διαφέρει από εκείνη άλλων ατόμων και σε διαφορετικές φάσεις της ζωής του παρουσιάζει, κατά κανόνα, εκφραστικά μέσα διαφορετικά ή με διαφορετική βαρύτητα χρήσης» (1996: 111). Ο Dittmar, όπως φαίνεται, αναγνωρίζει την επίδραση εξωτερικών παραγόντων στη διαμόρφωση και τη διαφοροποίηση της ιδιολέκτου. Μια προσπάθεια να καθοριστούν οι παράγοντες που επηρεάζουν τη διαμόρφωση της ιδιολέκτου γίνεται από την Hughes (1996: 67), η οποία υποστηρίζει ότι η ιδιόλεκτος υπόκειται σε διαλεκτικά (π.χ. τόπος καταγωγής, τόπος διαμονής), κοινωνικά (π.χ. οικογενειακή κατάσταση, μορφωτικό επίπεδο), βιολογικά (π.χ. ηλικία, φύλο, φυσική κατάσταση) και τυχαία στοιχεία (π.χ. συνομιλητές, θέμα συζήτησης, συναισθηματική κατάσταση). Η συσχέτιση της ιδιολέκτου με τα παραπάνω στοιχεία θέτει το ζήτημα των ορίων της ιδιολέκτου και της σχέσης της με άλλες μορφές γλωσσικής ποικιλίας όπως τη γεωγραφική, την κοινωνική και τη λειτουργική ποικιλία. Τέλος, άλλο ένα ζήτημα που προκύπτει στη βιβλιογραφία (βλ. Coulthard 2004: 431) είναι αν η ιδιόλεκτος αποτελεί χαρακτηριστικό μόνο των φυσικών ομιλητών μιας γλώσσας ή μπορεί να υπάρξει και σε μη φυσικούς ομιλητές μιας γλώσσας. Συμπερασματικά, στη έρευνα για την ιδιόλεκτο παραμένουν πολλά αναπάντητα θεωρητικά ερωτήματα. Παράλληλα, υπάρχει ανάγκη για τη μελέτη της ιδιολέκτου με εμπειρικό τρόπο, για να διερευνηθούν ζητήματα όπως ο βαθμός συνειδητότητας των

ομιλητών σε σχέση με τις συστηματικές γλωσσικές επιλογές τους, η πιθανή μεταβολή της ιδιολέκτου στη διάρκεια της ζωής ενός ατόμου κ.ά., υπό το φως συγκεκριμένων γλωσσικών δεδομένων.

Οι έρευνες για την ιδιολέκτο που βασίζονται σε εμπειρικά δεδομένα έχουν συχνά διαφορετικούς στόχους και μεθοδολογία και αναφέρονται σε διαφορετικές πλευρές της γλώσσας. Ένα πεδίο που έχει μελετηθεί πιο εκτεταμένα στο πλαίσιο της λογοτεχνικής υφολογίας, κυρίως με παραδοσιακούς όρους αλλά και με τη μεθοδολογία των σωμάτων κειμένων (βλ. Louwerse 2004), είναι εκείνο της ιδιολέκτου ενός συγγραφέα ή ενός ήρωα λογοτεχνικού κειμένου (βλ. Leech & Short 1981). Σημαντική για τη μελέτη της ιδιολέκτου είναι και η συμβολή ερευνητών από το χώρο της δικαστικής γλωσσολογίας, οι οποίοι καλούνται συχνά για πρακτικούς σκοπούς να βοηθήσουν στην ταυτοποίηση του συγγραφέα αμφισβητούμενων κειμένων (βλ. Coulthard 2004). Η εισήγηση του ερευνητή σε αυτές τις περιπτώσεις βασίζεται συνήθως στη σύγκλιση ή την απόκλιση των λεξικογραμματικών επιλογών του συγγραφέα σε σχέση με άλλα κείμενα, όπως διαπιστώνεται με τη μεθοδολογία των σωμάτων κειμένων. Τέλος, η ιδιολέκτος έχει μελετηθεί σε σχέση με την αναγνώριση του ομιλητή με βάση φωνητικές και προσωδιακές διαφορές (βλ. Weber et al. 2002, Gonet & Rózańska 2003). Ο στόχος στις έρευνες αυτές είναι καθαρά πρακτικός και συνδέεται με την ανάπτυξη υπολογιστικών εφαρμογών.

Οι πιο πρόσφατες έρευνες για την ιδιολέκτο χρησιμοποιούν τη μεθοδολογία των σωμάτων κειμένων για τον εντοπισμό συστηματικών λεξικογραμματικών επιλογών συγκεκριμένων ατόμων (βλ. Barlow 2009, Mollin 2009). Στόχος τους είναι η ανάδειξη των γλωσσικών ιδιαιτεροτήτων των ατόμων, όχι σε κειμενικά είδη που κατεξοχήν συνδέονται με την υφολογική απόκλιση, αλλά κυρίως σε προφορικά κείμενα όπως ανακοινώσεις, ομιλίες στη Βουλή κ.ά. Η παρούσα έρευνα αντιμετωπίζει την ιδιολέκτο με ανάλογο τρόπο στοχεύοντας στη μελέτη των λεξικογραμματικών επιλογών στα κείμενα τριών κυβερνητικών εκπροσώπων για τον εντοπισμό στοιχείων της ιδιολέκτου κάθε ομιλητή.

2. Δεδομένα και μεθοδολογία

Στόχος της έρευνας είναι η διερεύνηση των δυνατοτήτων που παρέχει η μεθοδολογία των σωμάτων κειμένων για τη μελέτη της ιδιολέκτου. Πιο συγκεκριμένα, επιχειρείται ο εντοπισμός λεξικογραμματικών επιλογών που είναι δυνατό να συνιστούν στοιχεία της ιδιολέκτου κάθε κυβερνητικού εκπροσώπου με τη χρήση ποσοτικών, στατιστικών και ποιοτικών δεδομένων. Τα δεδομένα της έρευνας περιλαμβάνουν απομαγνητοφωνημένα προφορικά κείμενα από την καθημερινή ενημέρωση των πολιτικών συντακτών και ανταποκριτών του ξένου Τύπου από τον κυβερνητικό εκπρόσωπο, τα οποία διακρίνονται σε ένα προσχεδιασμένο μέρος (το κείμενο των ανακοινώσεων που έχει προετοιμάσει ο κυβερνητικός εκπρόσωπος) και ένα απροσχεδιαστο (τις απαντήσεις του στα ερωτήματα των πολιτικών συντακτών). Θα πρέπει να επισημανθεί ότι τα δεδομένα προσφέρονται για τη σύγκριση του λόγου διαφορετικών ομιλητών και τον εντοπισμό των ιδιολεκτικών τους χαρακτηριστικών, καθώς παραμένουν σταθερές παράμετροι όπως η ιδιότητα του ομιλητή (κυβερνητικός εκπρόσωπος), το φύλο (άνδρες), το κειμενικό είδος (ενημέρωση συντακτών) και το επικοινωνιακό πλαίσιο (φυσικό και κοινωνικό σκηνικό, συμμετέχοντες, στόχοι κ.λπ.).

Οι κυβερνητικοί εκπρόσωποι των οποίων τα κείμενα μελετήθηκαν είναι οι Θεόδωρος Ρουσόπουλος, Ευάγγελος Αντώνιος και Γιώργος Πεταλωτής. Οι δύο πρώτοι υπήρξαν εκπρόσωποι της κυβέρνησης της Νέας Δημοκρατίας με πρωθυπουργό τον Κ. Καραμανλή και ο τελευταίος της κυβέρνησης του ΠΑΣΟΚ με πρωθυπουργό τον Γ. Παπανδρέου. Συλλέχθηκαν δεδομένα από τους μήνες Αύγουστο και Σεπτέμβριο των ετών 2008, 2009 και 2010 για κάθε κυβερνητικό εκπρόσωπο αντίστοιχα. Έτσι, δημιουργήθηκαν τρία σώματα κειμένων, από τα οποία στη συνέχεια αφαιρέθηκαν οι ερωτήσεις των πολιτικών συντακτών ώστε να μελετηθεί η προσωπική συμβολή των εκπροσώπων. Στον Πίνακα 1 παρουσιάζεται ο αριθμός των λέξεων σε κάθε σώμα κειμένων πριν και μετά την αφαίρεση των ερωτήσεων.

Αριθμός λέξεων	Ρουσόπουλος	Αντώνιος	Πεταλωτής
Πλήρη κείμενα	35.849	31.852	34.494
Κείμενα χωρίς τις ερωτήσεις	22.424	22.480	22.056

Πίνακας 1 Μέγεθος σωμάτων κειμένων

Η μεθοδολογία που ακολουθήθηκε περιλαμβάνει την κειμενική ανάλυση, με σκοπό την περιγραφή των χαρακτηριστικών του κειμενικού είδους της ενημέρωσης συντακτών και, κατ' επέκταση, τον προσδιορισμό του κοινού πλαισίου στο οποίο μπορεί να μελετηθεί η ιδιολέκτος των κυβερνητικών εκπροσώπων. Επιπλέον, χρησιμοποιήθηκαν μεθοδολογικά εργαλεία των σωμάτων κειμένων και, συγκεκριμένα, με τη χρήση του υπολογιστικού εργαλείου WordSmith Tools 5.0 (Scott 2008),

εντοπίστηκαν αρχικά οι λέξεις-κλειδιά (keywords) ανά δύο σώματα κειμένων και τα λεξικά συμπλέγματα (clusters) τριών έως πέντε λέξεων με πάνω από πέντε εμφανίσεις σε κάθε σώμα κειμένων. Ο εντοπισμός των λέξεων-κλειδιών γίνεται συγκρίνοντας τη συχνότητα εμφάνισης όλων των τύπων ενός σώματος κειμένων με τη συχνότητα εμφάνισής τους σε ένα άλλο σώμα κειμένων. Η σύγκριση αυτή λαμβάνει υπόψη το μέγεθος των δύο σωμάτων κειμένων και αξιοποιεί στατιστικά τεστ όπως το χ^2 . Στον Πίνακα που ακολουθεί παρουσιάζονται ορισμένες λέξεις-κλειδιά για το σώμα κειμένων του Αντώνη σε σύγκριση με εκείνο του Πεταλωτή, σύμφωνα με το WordSmith Tools. Οι λέξεις-κλειδιά εμφανίζονται στην πρώτη στήλη, ενώ η συχνότητά τους στο σώμα κειμένων του Αντώνη (αριθμητικά και σε ποσοστό) στη δεύτερη και τρίτη στήλη. Οι συχνότητες στην τέταρτη και πέμπτη στήλη αφορούν το συγκρινόμενο σώμα κειμένων, δηλαδή εκείνο του Πεταλωτή.

Λέξη-κλειδί	Συχνότητα (Αντώνης)	%	Συχνότητα (Πεταλωτής)	%	Σπουδαιότητα	P value
επίσης	25	0,11	1		27,09	0,0000001917
πυροσβεστικά	18	0,08	0		24,59	0,0000007062
άλλωστε	23	0,10	1		24,52	0,0000007342
πέρα	8	0,04	40	0,18	-23,98	0,0000009713
ώστε	20	0,09	63	0,29	-24,34	0,0000008045
έτσι	15	0,07	55	0,25	-25,17	0,0000005218

Πίνακας 2 Λέξεις-κλειδιά από τη σύγκριση δύο σωμάτων κειμένων (Αντώνης-Πεταλωτής)

Όπως φαίνεται στον Πίνακα 2, οι λέξεις-κλειδιά μπορεί να είναι λεξικοί (π.χ. *πυροσβεστικά*), αλλά και γραμματικοί τύποι (π.χ. *επίσης*, *άλλωστε*). Οι λέξεις-κλειδιά με μεγαλύτερο λεξικό περιεχόμενο, όπως θα φανεί στην ανάλυση των δεδομένων, συνήθως προσφέρουν στοιχεία για το θέμα των κειμένων που μελετώνται. Αντίθετα, λέξεις-κλειδιά με γραμματική λειτουργία αποτελούν συχνά ένδειξη ύφους και επομένως μπορούν να μελετηθούν ως πιθανά στοιχεία της ιδιολέκτου των ομιλητών. Αξίζει επίσης να σημειωθεί ότι οι λέξεις-κλειδιά που υπολογίζει το πρόγραμμα είναι δυνατόν να είναι θετικές ή αρνητικές. Στη συγκεκριμένη περίπτωση, οι τρεις πρώτες λέξεις-κλειδιά του Πίνακα 2 είναι θετικά σημαντικές, αφού εμφανίζουν ιδιαίτερα υψηλή (στατιστικά σημαντική) συχνότητα εμφάνισης στο σώμα κειμένων του Αντώνη σε σχέση με το σώμα κειμένων του Πεταλωτή, ενώ οι τρεις επόμενες (με το αρνητικό πρόσημο) είναι αρνητικά σημαντικές, καθώς εμφανίζουν ιδιαίτερα χαμηλή συχνότητα εμφάνισης στο πρώτο σώμα κειμένων σε σχέση με το δεύτερο. Όσο μεγαλύτερος είναι ο αριθμός στη στήλη *Σπουδαιότητα* τόσο πιο σημαντική είναι η λέξη-κλειδί. Στην τελευταία στήλη του Πίνακα 2 παρουσιάζεται το p value, ο βαθμός δηλαδή στον οποίο η σπουδαιότητα κάθε λέξης-κλειδιού μπορεί να μην υπολογίζεται σωστά. Η πιθανότητα αυτή είναι πάρα πολύ χαμηλή στα δεδομένα που μελετήθηκαν, αν ληφθεί υπόψη ότι έως και 0,05 (δηλαδή 5% πιθανότητα να γίνεται λανθασμένος υπολογισμός) θεωρείται αποδεκτό για τις κοινωνικές επιστήμες (Scott 2008). Συμπερασματικά, οι λέξεις-κλειδιά ανά δύο σώματα κειμένων, δηλαδή οι λέξεις που είναι στατιστικά σημαντικές λόγω της συγκριτικά υψηλής ή χαμηλής συχνότητάς τους, αξίζει να μελετηθούν, καθώς είναι δυνατόν να προσφέρουν σημαντικά στοιχεία για τις προτιμήσεις κάθε ομιλητή.

Επιπλέον, η ανεύρεση των λεξικών συμπλεγμάτων (βλ. Φέρλας 2011 για τα ελληνικά), τα οποία ορίστηκαν στην παρούσα έρευνα ως ακολουθίες τριών έως πέντε συνεχόμενων λέξεων με πέντε εμφανίσεις και πάνω σε κάθε σώμα κειμένων, μπορεί να συμβάλει στη μελέτη των προτιμήσεων των κυβερνητικών εκπροσώπων, όχι πια σε μεμονωμένους τύπους (όπως συμβαίνει με τις λέξεις-κλειδιά), αλλά σε μεγαλύτερα τμήματα λόγου. Στον Πίνακα 3 παρουσιάζονται τα συχνότερα λεξικά συμπλέγματα στο σώμα κειμένων του Ρουσόπουλου. Στην τρίτη και τέταρτη στήλη δίνεται η συχνότητα εμφάνισής τους, ενώ στις δύο τελευταίες στήλες αναφέρεται ο αριθμός των κειμένων στα οποία εμφανίζονται.

A/A	Λεξικό σύμπλεγμα	Συχνότητα	%	Κείμενα	%
1	ό τι αφορά ¹	36	0,16	11	84,62
2	της Νέας Δημοκρατίας	29	0,13	10	76,92
3	Σε ό τι	28	0,12	9	69,23
4	Σε ό τι αφορά	28	0,12	9	69,23
5	αυτό το οποίο	25	0,11	10	76,92
6	Οικονομίας και Οικονομικών	18	0,08	7	53,85
7	σε αυτή την	18	0,08	9	69,23

¹ Ο τύπος *ό,τι* λόγω του κόμματος υπολογίζεται από το λογισμικό ως δύο λέξεις, εξού και η παρουσία στον Πίνακα των σχετικών λεξικών συμπλεγμάτων.

8	πολύ καλά ότι	15	0,07	8	61,54
9	δεν μπορεί να	14	0,06	5	38,46
10	ό τι αφορά το	14	0,06	7	53,85
11	τι αφορά το	14	0,06	7	53,85
12	Δεν έχω να	13	0,06	7	53,85
13	Παρακαλώ τις ερωτήσεις σας	12	0,05	12	92,31
14	Παρακαλώ τις ερωτήσεις σας	12	0,05	12	92,31
15	Σε ό τι αφορά το	12	0,05	7	53,85

Πίνακας 3 Λεξικά συμπλέγματα στο σώμα κειμένων του Ρουσόπουλου

Είναι εμφανές ότι τα λεξικά συμπλέγματα μπορεί να αποτελούν ακολουθίες λέξεων με νόημα (π.χ. της *Νέας Δημοκρατίας*, *Παρακαλώ τις ερωτήσεις σας*) ή όχι (π.χ. *σε αυτή την, πολύ καλά ότι*). Επίσης, ορισμένα λεξικά συμπλέγματα μπορεί να συναπαρτίζουν ευρύτερα συμπλέγματα: π.χ. τα συμπλέγματα *ό τι αφορά*, *Σε ό τι*, *Σε ό τι αφορά*, *ό τι αφορά το*, *τι αφορά το* αποτελούν μέρη του συμπλέγματος *Σε ό τι αφορά το*, που εμφανίζεται 12 φορές στα μισά περίπου κείμενα του σώματος κειμένων. Τέλος, η μελέτη των λέξεων-κλειδιών και των λεξικών συμπλεγμάτων συμπληρώνεται με στοιχεία από την ευρύτερη χρήση τους, όπως διαπιστώνονται σε συμφραστικούς πίνακες (concordances).

3. Ανάλυση δεδομένων

Η πρώτη εικόνα που δημιουργείται από τη συγκριτική μελέτη των λέξεων-κλειδιών στο σώμα κειμένων των τριών κυβερνητικών εκπροσώπων είναι ότι περισσότερες λέξεις-κλειδιά εμφανίζονται κατά τη σύγκριση των σωμάτων κειμένων του Αντώνιου και του Ρουσόπουλου με εκείνο του Πεταλωτή (32 και 24 λέξεις-κλειδιά αντίστοιχα). Αντίθετα, η σύγκριση των κειμένων του Ρουσόπουλου με τον Αντώνιο δεν παράγει μεγάλο αριθμό λέξεων-κλειδιών (μόνο 14). Τα στοιχεία αυτά επισημαίνουν ότι ο λόγος των δύο εκπροσώπων της κυβέρνησης της Νέας Δημοκρατίας παρουσιάζει περισσότερες ομοιότητες, ενώ ο λόγος του Πεταλωτή, μάλλον αποκλίνει σε σχέση με τους άλλους δύο.

Εκτός από τις γλωσσικές επιλογές που είναι πιθανό να αποτελούν στοιχεία ιδιολέκτου, στις λέξεις-κλειδιά και στα λεξικά συμπλέγματα συγκαταλέγονται και τύποι που συνδέονται με το θέμα των κειμένων. Έτσι, στο σώμα κειμένων του Ρουσόπουλου λέξεις-κλειδιά όπως *ψηφοδέλτιο* και *βουλευτής* συνδέονται με ένα ζήτημα της επικαιρότητας που είχε προκύψει από μια ψηφοφορία στη Βουλή. Ανάλογα, στον Αντώνιο λέξεις-κλειδιά αποτελούν λέξεις όπως *πυρκαγιές*, *ζημιές*, *αεροσκάφη*, *πυροσβεστικά*, που συνδέονται με τις πυρκαγιές του καλοκαιριού του 2009. Τέλος, στο σώμα κειμένων του Πεταλωτή οι θεματικές λέξεις-κλειδιά *μεγάλες* και *αλλαγές* συνεμφανίζονται σε αρκετά λεξικά συμπλέγματα (π.χ. *τις μεγάλες αλλαγές*, *μεγάλες αλλαγές που*). Είναι μάλιστα ιδιαίτερα ενδιαφέρον ότι, όπως φαίνεται από τον σχετικό συμφραστικό πίνακα, της σύνταξης *μεγάλες αλλαγές* προηγούνται πολύ συχνά ρήματα σε πρώτο πληθυντικό όπως *υλοποιούμε*, *κάνουμε*, *πετύχουμε*, *ασχολούμαστε*, *προχωράμε* (πρβλ. ενότητα 3.3 για την προτίμηση του Πεταλωτή στην αντωνυμία πρώτου πληθυντικού προσώπου).

3.1 Μακροδομικά στοιχεία

Όπως προκύπτει από την κειμενική ανάλυση, οι ενημερώσεις συντακτών εμφανίζουν την εξής δομή:

- α) άνοιγμα (περιλαμβάνει χαιρετισμό, σε αρκετές περιπτώσεις σε συνδυασμό με ευχές)
- β) κείμενο ενημέρωσης από τον κυβερνητικό εκπρόσωπο (προσχεδιασμένος λόγος)
- γ) μεταβατική φράση
- δ) ερωτήσεις πολιτικών συντακτών και απαντήσεις κυβερνητικού εκπροσώπου (απροσχεδιαστος λόγος)
- ε) κλείσιμο (περιλαμβάνει ευχαριστίες ή/και ευχές ή χαιρετισμό).

Από τα παραπάνω δομικά μέρη της ενημέρωσης συντακτών το άνοιγμα, η μεταβατική φράση και το κλείσιμο αποτελούνται συνήθως από στερεότυπες εκφράσεις, που προσφέρονται για σύγκριση. Πράγματι, οι τρεις κυβερνητικοί εκπρόσωποι χρησιμοποιούν στη συντριπτική πλειονότητα των κειμένων το ίδιο λεξικό σύμπλεγμα *Παρακαλώ τις ερωτήσεις σας* ως μεταβατική φράση από το τμήμα της ενημέρωσης στο τμήμα των ερωταπαντήσεων. Το σύμπλεγμα αυτό, επομένως, φαίνεται να χαρακτηρίζει το κειμενικό είδος της ενημέρωσης συντακτών.

Αντίθετα, στο άνοιγμα και στο κλείσιμο της ενημέρωσης συντακτών εμφανίζεται αρκετή ποικιλία. Πιο συγκεκριμένα, ο Ρουσόπουλος συνηθίζει στο άνοιγμα να χρησιμοποιεί τον τύπο *Χαίρετε*, ο Αντώνναρος κυρίως χρησιμοποιεί τον χαιρετισμό *Καλημέρα*, αλλά και *Γεια σας*, *Καλησπέρα σας* και ο Πεταλωτής *Καλό μεσημέρι*. Οι χαιρετισμοί αυτοί ορισμένες φορές συνοδεύονται από ευχές (π.χ. *Χαίρετε και καλή εβδομάδα*, *Καλημέρα και καλό μήνα*). Στο κλείσιμο επίσης υπάρχει ποικιλία, καθώς οι Ρουσόπουλος και Αντώνναρος συνηθίζουν να κλείνουν με ευχαριστίες (*Σας ευχαριστώ*), οι οποίες ορισμένες φορές συνδυάζονται με ευχές, ενώ ο Πεταλωτής άλλοτε κλείνει με χαιρετισμό (*Καλό απόγευμα*) και άλλοτε με ευχαριστίες (*Σας ευχαριστώ*), ενώ μία φορά κλείνει μόνο με ευχή (*Καλό Σαββατοκύριακο*).

3.2 Οργανωτικά στοιχεία

Ως προς τα οργανωτικά στοιχεία του λόγου των κυβερνητικών εκπροσώπων ενδιαφέρον παρουσιάζουν οι δείκτες λόγου και οι αναφορικές εκφράσεις. Αρκετοί δείκτες λόγου ή μέρη τους εμφανίζονται ως λέξεις-κλειδιά ή ως λεξικά συμπλέγματα στα τρία σώματα κειμένων. Πιο συγκεκριμένα, τα *επίσης* και *άλλωστε* αποτελούν λέξεις-κλειδιά για το σώμα κειμένων του Αντώνναρου σε σχέση με εκείνο του Πεταλωτή (σπουδαιότητα 27,09 και 24,52 αντίστοιχα), ενώ στατιστικά σημαντική είναι η χρήση του δείκτη λόγου *λοιπόν* από τον Ρουσόπουλο σε σχέση με τον Πεταλωτή (σπουδαιότητα 45,78).² Επιπλέον, ο Ρουσόπουλος συνηθίζει να χρησιμοποιεί το λεξικό σύμπλεγμα *Σε κάθε περίπτωση* ως δείκτη παραχώρησης, κάτι που συμβαίνει σπανιότατα στα κείμενα του Αντώνναρου και ποτέ στα κείμενα του Πεταλωτή. Τέλος, ο Πεταλωτής χρησιμοποιεί συστηματικά τα λεξικά συμπλέγματα *Από εκεί και πέρα* (30 εμφανίσεις) για να δηλώσει την παραχώρηση και *Για/γι' αυτό ακριβώς* (14 εμφανίσεις) για να δηλώσει τη σχέση αιτίου-αποτελέσματος, τα οποία παρουσιάζουν είτε ελάχιστες είτε μηδενικές εμφανίσεις στα κείμενα των άλλων. Ένα ακόμη σύμπλεγμα το οποίο χρησιμοποιεί ο Πεταλωτής 22 φορές, αλλά δεν εμφανίζεται σε κανένα κείμενο των Ρουσόπουλου και Αντώνναρου, είναι το *Πρώτα απ'από όλα*. Συνολικά, ο Πεταλωτής εμφανίζεται να αποκλίνει περισσότερο συγκρινόμενος με τους άλλους δύο κυβερνητικούς εκπροσώπους, οι οποίοι δεν εμφανίζουν τόσο έντονες διαφορές.

Επιπλέον, οι κυβερνητικοί εκπρόσωποι χρησιμοποιούν δύο βασικές αναφορικές εκφράσεις (*Σε ό,τι αφορά* + άρθρο ή *στο/στη* και *Όσον αφορά* + άρθρο ή *στο/στη*), με διαφορετική όμως συχνότητα. Ο Ρουσόπουλος προτιμά τη δομή *Σε ό,τι αφορά* + άρθρο (35 εμφανίσεις), την οποία οι άλλοι δύο χρησιμοποιούν μόνο μία φορά ο καθένας. Από την άλλη, οι Αντώνναρος και Πεταλωτής χρησιμοποιούν συχνότερα τη δομή *Όσον αφορά* + άρθρο ή *στο/στη* (15 και 10 φορές αντίστοιχα). Οι αναφορικές φράσεις είναι ιδιαίτερα σημαντικές στο λόγο των κυβερνητικών εκπροσώπων, διότι αποτελούν βασικά στοιχεία δομής των απαντήσεων τους στους πολιτικούς συντάκτες. Ο κειμενικός αυτός ρόλος φαίνεται από λεξικά συμπλέγματα που συνδυάζόμενα δημιουργούν φράσεις όπως: *Όσον αφορά (σ)το πρώτο/δεύτερο σκέλος (της ερώτησής σας)*, οι οποίες εμφανίζονται κυρίως στην αρχή της απάντησης ή σε σημεία μετάβασης σε άλλο θέμα. Επομένως, ως προς τις αναφορικές φράσεις και οι τρεις εκπρόσωποι έχουν σχετικά ξεκάθαρο στίγμα, με τον Ρουσόπουλο να αποκλίνει από τους άλλους δύο.

3.3 Πρόσωπο

Η μελέτη κυρίως των λέξεων-κλειδιών, αλλά και των λεξικών συμπλεγμάτων έδειξε ότι η χρήση του προσώπου είναι σημαντική για τη διάκριση του λόγου των κυβερνητικών εκπροσώπων. Συγκεκριμένα, ο Πεταλωτής ξεχωρίζει από τους άλλους δύο λόγω της συστηματικής χρήσης του πρώτου πληθυντικού προσώπου. Όπως φαίνεται στους Πίνακες 4 και 5, ο τύπος *εμείς* αποτελεί λέξη-κλειδί στο σώμα κειμένων του Πεταλωτή σε σχέση με τα άλλα δύο σώματα κειμένων.

Λέξη-κλειδί	Συχνότητα (Ρουσόπουλος)	%	Συχνότητα (Πεταλωτής)	%	Σπουδαιότητα	P value
Εμείς	6	0,03	55	0,25	-46,40	0,0000000000

Πίνακας 4 Βαθμός σπουδαιότητας του τύπου *εμείς* στα σώματα κειμένων των Ρουσόπουλου και Πεταλωτή

² Έχει μάλιστα ενδιαφέρον ότι σε 7 από τις 47 εμφανίσεις του *λοιπόν* ο Ρουσόπουλος το χρησιμοποιεί στη δομή *Άρα, λοιπόν*.

Λέξη-κλειδί	Συχνότητα (Αντώνωρος)	%	Συχνότητα (Πεταλωτής)	%	Σπουδαιότητα	P value
εμείς	11	0,05	48	0,22	-25,83	0,0000003692
Εμείς	8	0,04	55	0,25	-40,41	0,0000000000

Πίνακας 5 Βαθμός σπουδαιότητας του τύπου *εμείς* στα σώματα κειμένων των Αντώνωρου και Πεταλωτή

Η χρήση αυτή του *εμείς* από τον Πεταλωτή αναφέρεται κυρίως στην κυβέρνηση, προσδίδοντας μια αίσθηση συλλογικότητας στη λειτουργία της. Και οι άλλοι δύο εκπρόσωποι χρησιμοποιούν την αντωνυμία *εμείς* με αυτή τη λειτουργία, αλλά πολύ σπανιότερα. Αξίζει μάλιστα να σημειωθεί η χρήση της σε αρχή πρότασης (με κεφαλαίο), όπου εμφανίζεται με υψηλό βαθμό σπουδαιότητας στο λόγο του Πεταλωτή. Σε αυτή τη χρήση συχνή είναι η δομή *Εμείς είμαστε αυτοί που* (5 εμφανίσεις), με την οποία παρουσιάζονται οι επιλογές και οι στόχοι της κυβέρνησης και δηλώνεται η ταυτότητά της, κάτι που θα ήταν αναμενόμενο για μια νέα κυβέρνηση και όχι για μια κυβέρνηση που έχει ήδη διανύσει ένα χρόνο θητείας.

Ενδιαφέρουσα είναι και η συχνότητα χρήσης του τύπου *μας*, ο οποίος εμφανίζεται με βαθμό σπουδαιότητας 58,82 στα κείμενα του Πεταλωτή σε σχέση με εκείνα του Ρουσόπουλου. Η συχνότητα του *μας* είναι στατιστικά σημαντική στα κείμενα των Αντώνωρου και Πεταλωτή, οι οποίοι όμως δεν τον χρησιμοποιούν με τον ίδιο ακριβώς τρόπο, όπως φαίνεται από τα λεξικά συμπλέγματα. Έτσι, και οι δύο χρησιμοποιούν τα λεξικά συμπλέγματα *της χώρας μας*, *η χώρα μας*, *τη χώρα μας*, στα οποία το *μας* αναφέρεται σε όλους τους Έλληνες, ενώ ο Πεταλωτής χρησιμοποιεί και συμπλέγματα όπως *τους στόχους μας*, όπου το *μας* αναφέρεται στην κυβέρνηση. Αντίθετα, στο σώμα κειμένων του Ρουσόπουλου λέξεις-κλειδιά αποτελούν τύποι όπως *μου* και *σας*, οι οποίοι εμφανίζονται σε λεξικά συμπλέγματα όπως *επιτρέψτε μου να*, *Σας θυμίζω ότι*, *που σας είπα*.

Η διάσταση του προσώπου εμφανίζεται και στο ρήμα *κάνω*, που στον τύπο *κάνουμε* αποτελεί λέξη-κλειδί στα κείμενα του Πεταλωτή, ενώ στον τύπο *κάνω* στα κείμενα των Ρουσόπουλου και Αντώνωρου. Ο τύπος *κάνουμε* αναφέρεται και πάλι στην κυβέρνηση και στις ενέργειες στις οποίες προβαίνει, ενώ το *κάνω* αποτελεί μέρος λεξικών συμπλεγμάτων που σχετίζονται με τη γλωσσική πράξη της άρνησης απάντησης προς τους συντάκτες (π.χ. στον Αντώνωρο *Δεν έχω να κάνω* και στον Ρουσόπουλο *κάνω κανένα σχόλιο*). Ανάλογη είναι και η χρήση του *έχω* σε λεξικά συμπλέγματα από τον Αντώνωρο και τον Ρουσόπουλο.

Ο Πεταλωτής χρησιμοποιεί το πρώτο πληθυντικό πρόσωπο για να αναφερθεί στην κυβέρνηση και με τα λεξικά συμπλέγματα *γνωρίζουμε πολύ καλά* (10 εμφανίσεις) και *γνωρίζουμε πάρα πολύ καλά* (9 εμφανίσεις). Αντίθετα, ο Ρουσόπουλος χρησιμοποιεί το σύμπλεγμα *γνωρίζετε πολύ καλά* (18 εμφανίσεις), με το οποίο μεταθέτει την ευθύνη στο πρόσωπο του συντάκτη που έχει υποβάλει την ερώτηση, καθώς προϋποθέτει ότι, αν και ο δημοσιογράφος γνωρίζει το θέμα, επιμένει να πιέζει τον κυβερνητικό εκπρόσωπο, προσδοκώντας την είδηση.

3.4 Τροπικότητα

Η τροπικότητα εκφράζεται με ποικιλία μέσων από τους κυβερνητικούς εκπροσώπους. Ιδιαίτερα σημαντική είναι η χρήση του τροπικού επιρρήματος *φυσικά* από τον Πεταλωτή, το οποίο μάλιστα εμφανίζεται ως λέξη-κλειδί με υψηλό βαθμό σπουδαιότητας (-66,02 σε σχέση με τον Ρουσόπουλο και -50,36 σε σχέση με τον Αντώνωρο). Ανάλογη λειτουργία έχει και το λεξικό σύμπλεγμα *είναι γνωστό ότι* (9 εμφανίσεις). Με τα στοιχεία αυτά ο Πεταλωτής εκφράζει τη βεβαιότητά του για τα γεγονότα, η οποία όμως δεν βασίζεται σε συγκεκριμένα δεδομένα, αλλά εμφανίζεται ως αυτονόητη και κοινώς αποδεκτή. Αντίθετα, ο Ρουσόπουλος και ο Αντώνωρος χρησιμοποιούν το λεξικό σύμπλεγμα *δεν πρόκειται να* (12 και 11 εμφανίσεις αντίστοιχα) με το οποίο εκφράζουν την προσωπική τους βεβαιότητα για αυτά στα οποία αναφέρονται. Συχνή είναι η χρήση του λεξικού αυτού συμπλέγματος στη γλωσσική πράξη της άρνησης απάντησης, όπως επισημαίνεται στην επόμενη ενότητα.

3.5 Γλωσσικές πράξεις

Το κειμενικό είδος της ενημέρωσης συντακτών οδηγεί τους κυβερνητικούς εκπροσώπους στην επιτέλεση συγκεκριμένων γλωσσικών πράξεων όπως αυτές της τοποθέτησης, της άρνησης απάντησης, της υπενθύμισης με στόχο την απόκρουση και της έκφρασης διαφωνίας. Με βάση τα δεδομένα, η γλωσσική πράξη της υπενθύμισης με στόχο την απόκρουση παρουσιάζεται στο λόγο και των τριών εκπροσώπων, η γλωσσική πράξη της άρνησης απάντησης εμφανίζεται μόνο στα κείμενα των

Ρουσόπουλου και Αντώνη και οι γλωσσικές πράξεις της τοποθέτησης και της διαφωνίας εμφανίζονται μόνο στα κείμενα του Αντώνη και του Πεταλωτή αντίστοιχα.

Η συχνότερη δομή που χρησιμοποιείται από τον Αντώνη για τη δήλωση τοποθέτησης είναι το λεξικό συμπλέγμα *θα ήθελα επίσης να*. Το συμπλέγμα αυτό συμμετέχει με παραλλαγές σε ευρύτερες δομές με την εναλλαγή στοιχείων με παρόμοια σημασία: *θα ήθελα (επίσης) να κάνω (μια σύντομη/μια αναλυτικότερη) αναφορά, θα ήθελα (επίσης) να αναφερθώ/αναφέρω, (Επίσης), θα ήθελα (όμως/επίσης) να (σας) πω (για μία ακόμη φορά) (κάτι/ότι)*.

Οι δύο εκπρόσωποι κυβέρνησης της Νέας Δημοκρατίας εμφανίζουν πολύ συχνά στο λόγο τους δομές που επιτελούν τη γλωσσική πράξη της άρνησης απάντησης. Στον Πίνακα 6 παρουσιάζονται τα λεξικά συμπλέγματα με περισσότερες από πέντε εμφανίσεις στο σώμα κειμένων των δύο εκπροσώπων, καθώς και οι ευρύτερες φράσεις στις οποίες συμμετέχουν.

Ρουσόπουλος	Αντώνης
(δεν θα/έχω να/πρόκειται να) κάνω κανένα σχόλιο	δεν έχω να κάνω (απολύτως) κανένα σχόλιο
δεν έχω να προσθέσω (κάτι περισσότερο)	δεν έχω να προσθέσω κάτι (άλλο/παραπάνω)
	δεν έχω να (σας) πω (κάτι/κάτι άλλο/τίποτε/κάτι παραπάνω)
	Ό,τι είχα να πω (για το θέμα/γι' αυτό το θέμα, το είπα/το έχω πει)

Πίνακας 6 Λεξικά συμπλέγματα και ευρύτερες δομές για τη γλωσσική πράξη της άρνησης απάντησης

Όπως φαίνεται, ο Αντώνης εμφανίζει μεγαλύτερη ποικιλία τρόπων με τις οποίες εκφράζει την άρνηση απάντησης σε σχέση με τον Ρουσόπουλο. Χρησιμοποιεί επίσης σταθερά τη δομή *δεν έχω να*, ενώ ο Ρουσόπουλος επιλέγει και άλλες δομές, όπως *δεν θα, δεν πρόκειται να*. Επιπλέον, η κοινή δομή *δεν έχω να προσθέσω* ακολουθείται στην περίπτωση του Αντώνη κυρίως από το *κάτι* (το οποίο σπανιότερα μπορεί να εμφανίζεται ως *κάτι άλλο ή κάτι παραπάνω*), ενώ στην περίπτωση του Ρουσόπουλου από τη φράση *κάτι περισσότερο*. Οι επιλογές αυτές εμφανίζουν υψηλό βαθμό συστηματικότητας, χωρίς μάλιστα να επηρεάζουν το νόημα του κειμένου, αφού είναι σχεδόν συνώνυμες. Στα δεδομένα του Αντώνη εμφανίζονται με υψηλή συχνότητα και οι δομές με τον τύπο *πω* (*δεν έχω να πω, ό,τι είχα να πω*). Αντίθετα, ο Ρουσόπουλος χρησιμοποιεί τον τύπο *πω* πολύ σπάνια και σε μεγαλύτερη ποικιλία δομών όπως *δεν θα/μπορώ να/πρόκειται να πω (κάτι/τίποτε/τίποτα περισσότερο)*.

Αντίθετα από τη γλωσσική πράξη της άρνησης απάντησης, η υπενθύμιση με στόχο την απόκρουση εμφανίζεται στα κείμενα και των τριών εκπροσώπων. Στον Πίνακα 7 περιλαμβάνονται τα λεξικά συμπλέγματα με περισσότερες από πέντε εμφανίσεις σε κάθε σώμα κειμένων, καθώς και οι ευρύτερες φράσεις στις οποίες χρησιμοποιούνται για τη συγκεκριμένη γλωσσική πράξη.

Ρουσόπουλος	Αντώνης	Πεταλωτής
Σας θυμίζω ότι		
	όπως σας είπα	Σας είπα ότι Σας ανέφερα ότι
γνωρίζετε πολύ καλά ότι		
Έχω ήδη απαντήσει		
(το έχω/έχουμε) πει πάρα πολλές φορές	επαναλαμβάνω για μια ακόμη φορά (σας) το έχω πει και άλλες φορές (και/σας το) λέω για μια ακόμη φορά	(το έχουμε/έχει/είχα) πει πολλές φορές

Πίνακας 7 Λεξικά συμπλέγματα και ευρύτερες δομές για τη γλωσσική πράξη της υπενθύμισης με στόχο την απόκρουση

Όπως φαίνεται, οι τρεις κυβερνητικοί εκπρόσωποι χρησιμοποιούν διαφορετικά μέσα για να εκφράσουν τη γλωσσική πράξη της υπενθύμισης με στόχο την απόκρουση. Ο Ρουσόπουλος χρησιμοποιεί, μεταξύ άλλων, τα λεξικά συμπλέγματα *Σας θυμίζω ότι, γνωρίζετε πολύ καλά ότι, Έχω ήδη απαντήσει*, ενώ οι Αντώνης και Πεταλωτής τα *όπως σας είπα και Σας είπα ότι, Σας ανέφερα ότι* αντίστοιχα. Και οι τρεις χρησιμοποιούν μια παρόμοια δομή με τον τύπο *πει*, η οποία όμως εμφανίζεται συστηματικά με διαφορετικό τρόπο: στα κείμενα του Ρουσόπουλου εμφανίζεται ως *(το έχω/έχουμε) πει πάρα πολλές φορές*, στα κείμενα του Αντώνη *(σας) το έχω πει και άλλες φορές* και στα κείμενα του Πεταλωτή *(το έχουμε/έχει/είχα) πει πολλές φορές*. Για άλλη μία φορά το περιεχόμενο των εκφράσεων είναι σχεδόν το ίδιο, αλλά οι δομές είναι διαφορετικές *(πάρα πολλές φορές, και άλλες φορές, πολλές φορές)*. Ο Αντώνης χρησιμοποιεί επιπλέον ανάλογες δομές με τα ρήματα *επαναλαμβάνω* και *λέω* στον ενεστώτα και τη φράση *για μια ακόμη φορά*.

Η έκφραση της συχνότητας σε αυτού του είδους τις φράσεις έχει ιδιαίτερο ενδιαφέρον για τον εντοπισμό των ιδιολεκτικών στοιχείων των κυβερνητικών εκπροσώπων. Το στοιχείο αυτό επιβεβαιώνεται από τη μελέτη και λιγότερο συχνών δομών για τη δήλωση της ίδιας γλωσσικής πράξης. Έτσι, ο Ρουσόπουλος επιμένει στη χρήση της δομής *πάρα πολλές φορές* και στις σπανιότερες στα δεδομένα φράσεις *Έχω απαντήσει/εκφράσει την άποψή μου πάρα πολλές φορές, έχουμε επαναλάβει πάρα πολλές φορές*, ενώ ο Αντώναρος φαίνεται να χρησιμοποιεί σχετικά συχνά το επίρρημα *επανειλημμένως* ή *επανειλημμένα* σε φράσεις όπως *το έχω πει επανειλημμένως, Έχω πει επανειλημμένα* ότι, *Έχω τοποθετηθεί (σε αυτό/γι' αυτό το θέμα) επανειλημμένα/επανειλημμένως*.

Τέλος, η γλωσσική πράξη της διαφωνίας βρέθηκε να δηλώνεται μόνο στα κείμενα του Πεταλωτή με το λεξικό συμπλεγμα *δεν έχει καμία σχέση* σε ευρύτερες φράσεις όπως η εξής: *Πρώτα απ' όλα δεν έχει καμία σχέση το ένα με το άλλο*.

4. Συμπεράσματα

Η μελέτη των σωμάτων κειμένων δείχνει ότι οι κυβερνητικοί εκπρόσωποι εμφανίζουν συστηματικές προτιμήσεις στο λόγο τους, οι οποίες στις περισσότερες περιπτώσεις διαφέρουν μεταξύ τους. Ομοιότητες εμφανίζονται σε στοιχεία που σχετίζονται με το κειμενικό είδος, όπως η χρήση της στερεότυπης μεταβατικής έκφρασης *Παρακαλώ τις ερωτήσεις σας*. Ενδιαφέρον είναι ότι, παρόλο που ακολουθούν με συνέπεια τις συμβάσεις του κειμενικού είδους, παρουσιάζουν συστηματικές διαφοροποιήσεις σε επιμέρους επιλογές (λ.χ. στις φράσεις για το άνοιγμα).

Ο λόγος των εκπροσώπων της κυβέρνησης της Νέας Δημοκρατίας παρουσιάζει συγκριτικά περισσότερες ομοιότητες, όπως φαίνεται και από τον ιδιαίτερα μικρό αριθμό λέξεων-κλειδιών. Επιπλέον, ο Ρουσόπουλος και ο Αντώναρος φαίνεται να ακολουθούν παρόμοια στρατηγική στη χρήση του προσώπου ή στις γλωσσικές πράξεις που συνήθως επιτελούν. Χαρακτηριστικό είναι ότι μόνο για αυτούς βρέθηκαν λεξικά συμπλέγματα και ευρύτερες δομές για τη γλωσσική πράξη της άρνησης απάντησης. Οι ομοιότητες αυτές είναι πιθανό να προέρχονται από την κοινή κυβερνητική γραμμή την οποία υπηρετούν, κάτι που χρειάζεται περαιτέρω έρευνα.

Το σημαντικότερο όμως εύρημα είναι ότι οι τρεις κυβερνητικοί εκπρόσωποι εμφανίζουν ιδιολεκτικές προτιμήσεις στη χρήση λεξιλογίου και ειδικότερα λεξικών συμπλεγμάτων (π.χ. *λοιπόν – επίσης, άλλωστε – πρώτα απ' από όλα, σε ό,τι αφορά – όσον αφορά*). Στην έρευνα αυτή η ανάλυση επικεντρώθηκε σε γραμματικούς τύπους και κατηγορίες, όπως δείκτες λόγου, αναφορικές εκφράσεις, τροπικότητα κ.ά., η χρήση των οποίων είναι πιθανόν να είναι λιγότερο συνειδητή σε σχέση με τη χρήση λ.χ. λεξικών τύπων. Είναι ιδιαίτερα σημαντικό, επομένως, ότι οι κυβερνητικοί εκπρόσωποι εμφανίζουν συστηματικές προτιμήσεις σε τέτοιου είδους στοιχεία. Παράλληλα, η χρήση διαφορετικών λεξικών συμπλεγμάτων από κάθε κυβερνητικό εκπρόσωπο για τη δήλωση ίδιων γλωσσικών πράξεων υποδεικνύει ότι ακόμα και όταν ο ομιλητής έχει ως στόχο την επιτέλεση της ίδιας λειτουργίας μπορεί να κάνει συστηματικές γλωσσικές επιλογές, που μάλιστα εδώ αποκλίνουν από τις επιλογές που έχουν κάνει άλλα δύο άτομα με την ίδια ιδιότητα σε μια ανάλογη επικοινωνιακή κατάσταση.

Αξίζει να σημειωθεί ότι ένας περιορισμός της έρευνας αποτελεί το ότι τα δεδομένα έχουν απομαγνητοφωνηθεί από τη Διεύθυνση Πληροφόρησης της Γενικής Γραμματείας Ενημέρωσης και Επικοινωνίας. Η μη διαθεσιμότητά τους ως προφορικών κειμένων δεν επιτρέπει να ελεγχθεί η ποιότητα της απομαγνητοφώνησης. Παρ' όλα αυτά, ο εντοπισμός τμημάτων λόγου που εμφανίζουν στοιχεία προφορικότητας αποτελεί σχετικά ασφαλή ένδειξη για την αυθεντικότητα των κειμένων. Επιπλέον, η μελέτη περισσότερων κειμένων των ομιλητών θα μπορούσε να προσφέρει τη βάση για περισσότερο ακριβή στατιστικά αποτελέσματα. Παράλληλα, η επισημείωση των σωμάτων κειμένων για μέρη του λόγου θα έδινε τη δυνατότητα ανεύρεσης των γραμματικών συνάψεων, κάτι που δεν επιτυγχάνεται εύκολα με την απλή παρατήρηση των δεδομένων. Η σύγκριση των ιδιολεκτικών στοιχείων των ομιλητών με άλλα δεδομένα από το ίδιο κειμενικό είδος, με κείμενα της ίδιας κομματικής προέλευσης, αλλά και με ένα γενικό σώμα κειμένων ή δεδομένα από τον παγκόσμιο ιστό θα ωφελοούσε επίσης τα αποτελέσματα αυτής της προκαταρκτικής έρευνας. Τέλος, σε ένα μεγαλύτερο σώμα κειμένων ενδιαφέρουσα θα ήταν και η συγκριτική μελέτη του προσχεδιασμένου λόγου των κυβερνητικών εκπροσώπων (κείμενο ανακοινώσεων) με τον απροσχεδιαστο λόγο στις απαντήσεις τους στους πολιτικούς συντάκτες για την ανεύρεση πιθανών διαφορών στην ιδιόλεκτο των ομιλητών.

Η μελέτη περισσότερων κειμένων των τριών ομιλητών, καθώς και η σύγκρισή τους με άλλα δεδομένα είναι απαραίτητη για να προσδιορίσουμε ασφαλέστερα ποια στοιχεία μπορεί να αποτελούν χαρακτηριστικά της ιδιόλεκτου των ομιλητών. Στο άρθρο αυτό παρουσιάζεται μια προκαταρκτική έρευνα, η οποία, με αφετηρία τη συχνότητα εμφάνισης και τις στατιστικά σημαντικές διαφορές στη συχνότητα εμφάνισης κυρίως γραμματικών τύπων και λεξικών συμπλεγμάτων, επιχειρεί να εντοπίσει γλωσσικά πεδία στα οποία εμφανίζεται ιδιολεκτική διαφοροποίηση (π.χ. οργανωτικά στοιχεία,

πρόσωπο, τροπικότητα, γλωσσικές πράξεις). Έρευνες για την ιδιόλεκτο στα αγγλικά έχουν εντοπίσει διαφορές ανάμεσα σε ομιλητές σε ορισμένα από αυτά τα πεδία. Για παράδειγμα, η Johnstone (2009: 38-39, 42-43), ακολουθώντας διαφορετική μεθοδολογία από αυτή που παρουσιάζεται εδώ, εντοπίζει στο πεδίο της τροπικότητας (βεβαιότητα, αυθεντία) ένα από τα βασικά χαρακτηριστικά της ιδιολέκτου της ομιλήτριας που μελετά. Ανάλογα, ο Barlow (2009), ο οποίος μελετά το λόγο πέντε κυβερνητικών εκπροσώπων του Λευκού Οίκου χρησιμοποιώντας τη μεθοδολογία των σωμάτων κειμένων, επισημαίνει ότι υπάρχουν διαφορές ανάμεσά τους ως προς τη συχνότητα χρήσης της αντωνυμίας του πρώτου πληθυντικού προσώπου. Παρ' όλες τις ομοιότητες αυτές, είναι απαραίτητη περαιτέρω έρευνα με εμπειρικά δεδομένα για να οδηγηθούμε σε ασφαλή συμπεράσματα.

Για να προσδιοριστεί η ιδιόλεκτος εμπειρικά, αλλά και να θεμελιωθεί θεωρητικά, είναι αναγκαίο να διευκρινιστεί η σχέση της με άλλες μορφές γλωσσικής ποικιλίας (λ.χ. τις κοινωνιολέκτους), να συσχετιστεί με δεδομένα από τη συνήθη γλωσσική χρήση και να συνδεθεί με ρητορικές στρατηγικές ομάδων στις οποίες ανήκει ο ομιλητής. Για παράδειγμα, δεν είναι δυνατόν να υποστηριχθεί ότι η στατιστικά σημαντική προτίμηση του Πεταλωτή στη χρήση της αντωνυμίας πρώτου πληθυντικού προσώπου αποτελεί αποκλειστικό στοιχείο της ιδιολέκτου του, εάν δεν μελετηθούν κείμενα του πρωθυπουργού, στελεχών της κυβέρνησης κ.λπ. της ίδιας περιόδου, για να αποκλειστεί η πιθανότητα να πρόκειται για ρητορική στρατηγική που έχει επιλέξει συνολικά η κυβέρνηση. Παρομοίως, η προτίμηση του Ρουσόπουλου στη δομή *Σε ό,τι αφορά* + άρθρο σε σχέση με τη δομή *Όσον αφορά* + άρθρο ή *στο/στη*, την οποία χρησιμοποιούν συχνότερα οι Αντώνιος και Πεταλωτής μπορεί να αναλυθεί περαιτέρω με την αναζήτηση των δύο αυτών δομών στο Σώμα Ελληνικών Κειμένων, ένα γενικό σώμα κειμένων περίπου 30 εκατομμυρίων λέξεων. Όπως προκύπτει από την αναζήτηση, η δομή *Σε ό,τι αφορά* εμφανίζεται υποδιπλάσιες φορές σε σχέση με το *Όσον αφορά*. Ο Ρουσόπουλος δηλαδή επιλέγει ένα στοιχείο που αποκλίνει από τη συνήθη χρήση και άρα από τις γλωσσικές αναμονές των ομιλητών, κάτι που μπορεί να οδηγήσει στην ευκολότερη αναγνώριση της ιδιολέκτου του ομιλητή αυτού. Βέβαια, ο προσδιορισμός της δομής αυτής ως στοιχείου της ιδιολέκτου του Ρουσόπουλου προϋποθέτει την ανάλυση της χρήσης της σε σχέση με άλλα κειμενικά είδη και περιστάσεις επικοινωνίας, αλλά και της χρήσης της από ποικίλες κοινωνικές ομάδες.

Συμπερασματικά, η μεθοδολογία των σωμάτων κειμένων, η οποία προσφέρει τη δυνατότητα ποσοτικής και ποιοτικής ανάλυσης πλήθους δεδομένων, επιτρέπει να μελετηθούν ιδιολεκτικά χαρακτηριστικά που αφορούν τη συστηματική χρήση λεξικογραμματικών δομών για τη δήλωση παρόμοιων λειτουργιών και σημασιών. Με τον τρόπο αυτό εντοπίζονται στοιχεία της ιδιολέκτου των ομιλητών που μπορεί να μην είναι εμφανή με μια ανάλυση που περιορίζεται σε μεμονωμένα λεξικά στοιχεία και δεν εξετάζει μεγαλύτερα τμήματα του λόγου (λ.χ. λεξικά συμπλέγματα και φράσεις). Επιπλέον, τα δεδομένα από την ενημέρωση των πολιτικών συντακτών στα οποία στηρίχθηκε η έρευνα είναι κατάλληλα για τη μελέτη της ιδιολέκτου, καθώς η διατήρηση της επικοινωνιακής περιστασης και της ιδιότητας των ομιλητών ως σταθερών στοιχείων έδωσε τη δυνατότητα να μελετηθούν οι ιδιαιτερότητες στο λόγο τους. Τέτοιου είδους γλωσσικά δεδομένα πολιτικού λόγου θέτουν ζητήματα που αφορούν τη σχέση της ιδιολέκτου με το συγκεκριμένο κειμενικό είδος, τις ρητορικές στρατηγικές που ακολουθούν οι ομιλητές ή η κυβέρνηση την οποία εκφράζουν, την κατασκευή της ταυτότητας της κυβέρνησης ή του πολιτικού κόμματος στο οποίο ανήκουν κ.λπ., τα οποία θα μπορούσαν να αποτελέσουν θέματα προς διερεύνηση σε επόμενες μελέτες. Το παρόν άρθρο επιχειρεί να προτείνει μια μεθοδολογία για την προσέγγιση της ιδιολέκτου, η οποία μπορεί να συμπληρωθεί και με άλλου είδους μεθοδολογικές προσεγγίσεις, όπως με συνεντεύξεις για την καταγραφή των απόψεων των ίδιων των ομιλητών και τη διερεύνηση των αντιλήψεων του κοινού για τις ιδιαιτερότητες στο λόγο τους (πρβλ. Johnstone 2009).

ABSTRACT

Multimodality as a concept began making highly visible presence in all Media in recent years. In this communication, first of all, all the main components of the concept of multimodality are presented. Here are two surveys conducted (in 2005 and 2011) and were designed to investigate the degree of existence of multimodality in the first page of wide circulation newspaper and the characteristics by which this occurs as well. Data and a first classification and analysis of the characteristics resulting from these investigations are presented and, finally, a demonstration of differences in the presentation of multimodal texts through comparison of data from the two surveys is shown.

Λέξεις κλειδιά: εφημερίδα, MME, μονοτροπικότητα, πολυτροπικότητα,

1. Σκοπός

Η σχέση του ανθρώπου των δυτικού τύπου κοινωνιών που ζει σε αστικό περιβάλλον με τον γραπτό λόγο και με την εικόνα -αλλά και με άλλα πολιτισμικά σημειωτικά προϊόντα δημόσιας επικοινωνίας- είναι σήμερα πάρα πολύ στενή. Αυτή η σχέση προφανώς διαμορφώνει μια διαφορετική από ό,τι στο παρελθόν σχέση του ατόμου με το περιβάλλον του και συγκροτεί υποκείμενα με ψυχοκοινωνική προσωπικότητα διαφορετική από αυτή που διαμόρφωνε ο άνθρωπος στο παρελθόν. Η ανάπτυξη των σημειολογικών σπουδών κατά τη δεκαετία του '70 προσέδωσε μια αίγλη στη μελέτη αυτής της σχέσης. Δεν προχώρησαν όμως στη μελέτη των πολιτισμικών προϊόντων που συνδυάζουν δύο ή και περισσότερους σημειωτικούς τρόπους, αυτά δηλαδή που ονομάζονται σήμερα πολυτροπικά. Τα πολυτροπικά επικοινωνιακά προϊόντα έμειναν έξω από αυτήν τη μελέτη για τον απλούστατο λόγο ότι αφενός άρχισαν να κάνουν έντονα την εμφάνισή τους μόλις πρόσφατα, πριν περίπου δέκα με δεκαπέντε χρόνια, κυρίως με την ανάπτυξη των σύγχρονων τεχνολογιών, και αφετέρου η έννοια της πολυτροπικότητας δεν είχε αναπτυχθεί σε θεωρητικό τουλάχιστον επίπεδο. Σκοπός, λοιπόν, της ανακοίνωσης που παρουσιάζεται εδώ είναι να συμβάλει στη μελέτη της πολυτροπικότητας και να διερευνήσει κατά πόσο η έννοια της πολυτροπικότητας ως πρακτική διευρύνθηκε ή όχι κατά την τελευταία πενταετία σε έντυπα ευρείας διάδοσης και αναγνωσιμότητας, όπως είναι οι εφημερίδες πανελλήνιας κυκλοφορίας. Γι' αυτό παρουσιάζονται δύο έρευνες που έγιναν στο ίδιο σχεδόν σώμα εφημερίδων με χρονική απόσταση πέντε ετών.

2. Η πολυτροπικότητα ως έννοια και ως πρακτική

Η έννοια της πολυτροπικότητας άρχισε να κάνει την εμφάνισή της με την ανάπτυξη των πολιτισμικών σπουδών την τελευταία δεκαετία. Οι σχετικοί με το αντικείμενο ερευνητές, στην προσπάθειά τους να ερμηνεύσουν και -προφανώς- να οριοθετήσουν τα διάφορα πολιτισμικά προϊόντα που περιέχουν, εκτός των άλλων μορφών πολιτισμικών προϊόντων (εικόνα, μουσική, ήχοι κτλ.), λόγο -γραπτό και προφορικό-, διαπίστωσαν ότι δεν ήταν δυνατό να χρησιμοποιηθούν πλέον τα θεωρητικά εργαλεία του παρελθόντος. Έτσι, μπορούμε να πούμε ότι το νέο πολιτισμικό τοπίο που προέκυψε την τελευταία δεκαετία στις δυτικού τύπου κοινωνίες είναι αυτό που ανάγκασε τους επιστήμονες να εισαγάγουν στο

λεξιλόγιό τους τον όρο και να μιλήσουν για πολυτροπικότητα. Με τον όρο αυτό νοείται η μορφή παρουσίασης ενός πολιτισμικού προϊόντος, στο οποίο περιέχονται και συνδυάζονται περισσότεροι από ένας σημειωτικοί τρόποι (modes). Και όταν αναφερόμαστε στους σημειωτικούς τρόπους που μπορούν να συνδυάζονται σε ένα κείμενο, εννοούμε τον γραπτό λόγο, τον προφορικό λόγο, την εικόνα, τη φωτογραφία, το σχέδιο, το σχεδιάγραμμα, το χρώμα, τη γραμματοσειρά, την κινούμενη εικόνα, τη μουσική, τον ήχο, τον ρυθμό και τις χειρονομίες.

Τα κείμενα έως και πριν από μερικά χρόνια ήταν -ίσως θεωρούνταν- μονοτροπικά και αντιμετωπιζόνταν ως τέτοια. Λέγοντας κείμενο εννοούμε μια ολοκληρωμένη διαδοχή γλωσσικών μηνυμάτων που πραγματοποιείται στα πλαίσια μιας επικοινωνίας (βλ. περισσότερα στα Brown and Yule 1983:6, De Beaugrande and Dressler 1981, Γεωργακοπούλου και Γούτσος 1999: 17-25). Εδώ όμως και μερικά χρόνια οι αλλαγές που επέφεραν η σύγχρονη τεχνολογία, η δημιουργία πολυπολιτισμικών κοινωνιών στις χώρες του βόρειου ημισφαιρίου, καθώς και οι γνωσιοκεντρικές (ή πληροφορικοκεντρικές) οικονομικές αλλαγές που συνέβησαν τα τελευταία χρόνια ανήγαγαν την εικόνα σε σημαντικότερο από τον λόγο επικοινωνιακό μέσο (Kress 2000: 165). Με τον όρο «εικόνα» νοείται μια γκάμα τρόπων, μερικοί από τους οποίους αναφέρθηκαν προηγουμένως (σχέδιο, φωτογραφία, σχεδιάγραμμα, κινούμενη εικόνα κτλ.). Οι τρόποι αυτοί αντικατέστησαν ένα μέρος του γραπτού και προφορικού λόγου στη δημόσια επικοινωνία με αποτέλεσμα να δίνουν τη δυνατότητα μετάδοσης και πρόσληψης μηνυμάτων χαμηλού πληροφοριακού φορτίου αλλά υψηλής επικοινωνιακής συχνότητας και εμβέλειας.

Ένα πολυτροπικό σημειωτικό προϊόν είναι σύνθεση επιμέρους σημειωτικών τρόπων, οι οποίοι επηρεάζονται και διαπλέκονται μεταξύ τους. Τα στοιχεία που πηγάζουν από αυτήν την επίδραση και τη διαπλοκή είναι αυτά που συνθέτουν την πολυτροπικότητα. Η δυνατότητα μείξης των διάφορων σημειωτικών τρόπων για την παραγωγή ενός πολιτισμικού προϊόντος δημιουργεί, όπως είναι προφανές, ένα νέο σε σχέση με τα μονοτροπικά πολιτισμικά προϊόντα σημειολογικό περιβάλλον που χρήζει ανάλογης προσέγγισης (Kress, G. & Leeuwen, T. van 2010: 41-62). Το σημειολογικό αυτό περιβάλλον είναι το αποτέλεσμα των κοινωνικών, ψυχολογικών και γενικότερα πολιτισμικών προϋποθέσεων που επικρατούν σε μια κοινωνία. Η διαλεκτικότητα, την οποία ούτως ή άλλως ενέχουν τα σημειωτικά συστήματα, επηρεάζει και τις κοινωνικές και τις ψυχολογικές δομές τόσο σε επίπεδο ομαδικό όσο και σε επίπεδο ατομικό, αφού αυτά τα ίδια «αποτελούν μέρος της ιδεολογικής υπερδομής μιας κοινωνίας» (Boklund-Λαγοπούλου & Λαγόπουλος 1980:24). Η πολυτροπικότητα αναπόφευκτα αποτελεί μέρος του σημειολογικού περιβάλλοντος, μέσα στο οποίο ζουν τα υποκείμενα και δρουν είτε ως κοινωνικά είτε ως ψυχολογικά όντα. Ως επιλογή ενταγμένη στο πλαίσιο μιας επικοινωνιακής λειτουργίας, η οποία και μόνο επιτρέπει τη νοηματοδότηση, είναι μια σημειωτική πράξη, η οποία παράγει και αναπαράγει νοήματα. Με την έννοια αυτή η πολυτροπικότητα θα πρέπει όχι μόνο να παράγεται κάτω από συγκεκριμένες συνθήκες, αλλά και να προϋποθέτει συγκεκριμένες δυνατότητες για την κατανόηση των νοημάτων που παράγονται από αυτήν και των διαδικασιών μέσω των οποίων παράγονται. Επομένως, αν γίνει αποδεκτή αυτή η διαπίστωση, είναι πολύ πιθανό να διαμορφώνει και συγκεκριμένες αντιλήψεις, ανάλογη ιδεολογία και γενικά ανάλογη υποκειμενικότητα. (βλ. περισσότερα στο Πουρκός, Μ. & Κατσαρού, Ε. [επιμ.] 2011).

Το ζητούμενο βέβαια στο πλαίσιο των Μ.Μ.Ε είναι κατά πόσο οι καταναλωτές και οι παραγωγό των προϊόντων που προσφέρονται από τα Μ.Μ.Ε. είναι εξοικειωμένοι με τη χρήση των πολυτροπικών κειμένων και το κατά πόσο γίνεται κατανοητή η νοηματοδότηση των πολυτροπικών κειμένων σε σχέση με τα μονοτροπικά. Θεωρούμε ότι αυτό συναρτάται από τον βαθμό χρήσης και το είδος των χαρακτηριστικών της πολυτροπικότητας που χρησιμοποιείται από τα Μ.Μ.Ε. Με την έρευνα που παρουσιάζεται εδώ επιχειρείται να διερευνηθούν ακριβώς αυτές οι παράμετροι, δηλαδή με ποια χαρακτηριστικά παρουσιάζεται η πολυτροπικότητα στις πανελλήνιες κυκλοφορίες εφημερίδες, αλλά και ποιος είναι ο βαθμός της πολυτροπικότητας που χρησιμοποιείται. Παράλληλα όμως εξετάζεται και αν αυτός ο βαθμός και τα χαρακτηριστικά διαφοροποιούνται με την πάροδο του χρόνου περιορισμένης διάρκειας. Η έρευνα για καθαρά πρακτικούς λόγους περιορίζεται στο κεντρικό πρωτοσέλιδο θέμα κάθε εφημερίδας.

3. Η έρευνα

3.1 Η διεξαγωγή των δύο ερευνών

Η διεξαγωγή της πρώτης έρευνας πραγματοποιήθηκε από τον Απρίλιο έως τον Οκτώβριο του 2005, ενώ της δεύτερης από τον Ιανουάριο έως τον Ιούνιο του 2011. Ερευνήθηκαν στην πρώτη έρευνα 58, ενώ στη δεύτερη 57 εφημερίδες πανελλήνιες κυκλοφορίας που εκδίδονται στην πλειονότητά τους στην Αθήνα και ορισμένες στη Θεσσαλονίκη. Έγινε προσπάθεια να ερευνηθούν οι ίδιες εφημερίδες, αλλά

αυτό δεν κατέστη απόλυτα εφικτό, γιατί από τις 58 εφημερίδες οι 12 (ποσοστό 20%) στο μεταξύ διάστημα είχαν αναστείλει την έκδοσή τους. Από το σύνολο των εφημερίδων στην πρώτη έρευνα οι 30 ήταν πολιτικές, οι 11 οικονομικές, οι 12 αθλητικές, οι 3 σατιρικές και οι 2 ήταν εφημερίδες ποικίλης ύλης, ενώ στη δεύτερη έρευνα οι 30 ήταν πολιτικές, οι 11 οικονομικές, οι 12 αθλητικές, οι 3 σατιρικές και οι 2 ποικίλης ύλης. (βλ. ΠΑΡΑΡΤΗΜΑ Ι). Επιλέχθηκε τυχαία ένα φύλο από κάθε εφημερίδα που να ενέπιπτε στις χρονικές περιόδους που αναφέρθηκαν και μελετήθηκε από την πρώτη σελίδα το κεντρικό θέμα. Στην εργασία αυτή αποδείχτηκε σημαντικός βοηθός ο δικτυακός τόπος του in.gr που επιγράφεται «περίπτερο» και περιέχει τα πρωτοσέλιδα των εφημερίδων πανελλήνιας κυκλοφορίας. Η καταγραφή αφορούσε ποσοτικά στοιχεία (ποσότητα χώρου που καταλαμβάνει το θέμα και κάθε τρόπος παρουσίασης (λόγος-εικόνα κτλ.), καθώς και ποιοτικά (σχέση του λεκτικού με τον εικονιστικό τρόπο, χαρακτηριστικά του κάθε τρόπου κτλ.) (βλ. τη σχετική φόρμα στο ΠΑΡΑΡΤΗΜΑ ΙΙ). Τέλος, αξιολογήθηκε ο βαθμός της πολυτροπικότητας του κάθε πρωτοσέλιδου θέματος σύμφωνα με την παρακάτω κλίμακα

Βαθμός	Προϋπόθεση
Πολύ υψηλός	Απόλυτη συμπληρωματικότητα. Κανείς τρόπος δεν μπορεί να γίνει κατανοητός χωρίς την ύπαρξη του άλλου
Μέτριος	Μέτρια συμπληρωματικότητα. Ο καθένας τρόπος μπορεί να γίνει κατανοητός χωρίς την ύπαρξη του άλλου
Μικρός	Μικρή συμπληρωματικότητα. Ο ένας τρόπος απλώς σχολιάζει τον άλλο.
Ελάχιστος	Ελάχιστη συμπληρωματικότητα. Καμία σχέση μεταξύ των δύο τρόπων
Μηδενικός	Μη ύπαρξη πολυτροπικότητας

3.2 Τα δεδομένα

Στην πρώτη έρευνα από τις 58 εφημερίδες που ερευνήθηκαν συνολικά οι 35 παρουσιάζουν το κεντρικό πρωτοσέλιδο θέμα χρησιμοποιώντας έναν συνδυασμό λόγου και εικόνας (φωτογραφία, πίνακας, φωτομοντάζ), που συγκροτεί την πρακτική της πολυτροπικότητας, ενώ οι υπόλοιπες 23 χρησιμοποιούν μόνο έναν τρόπο παρουσίασης που είναι κατά κανόνα ο λόγος (σε μια περίπτωση έχουμε μόνο σκίτσο). Στη δεύτερη έρευνα από τις 57 εφημερίδες που ερευνήθηκαν συνολικά οι 38 παρουσιάζουν το κεντρικό θέμα χρησιμοποιώντας συνδυασμό, ενώ οι 19 χρησιμοποιούν μόνο τον λόγο.

Τα στοιχεία που προέκυψαν από την έρευνα έγιναν αντικείμενο επεξεργασίας για να διαπιστωθούν αρχικά τα χαρακτηριστικά της χρησιμοποιούμενης πολυτροπικότητας και στη συνέχεια ο βαθμός χρήσης της πολυτροπικότητας σε σχέση με το είδος στο οποίο ανήκει η κάθε εφημερίδα και την πολιτικοϊδεολογική θέση που υποστηρίζει. Από την επεξεργασία αυτή προέκυψαν τα εξής αποτελέσματα, τα οποία παρουσιάζονται στους παρακάτω πίνακες.

Α/Α	Συνδυασμός τρόπων	Σύνολο εφημερίδων	
		Πρώτη έρευνα	Δεύτερη έρευνα
1	Λόγος και φωτογραφία/ες	31	32
2	Λόγος και πίνακας/ες	3	1
3	Λόγος, φωτογραφία/ες και πίνακας/ες (ή σκίτσο)	1	3
4	Λόγος και φωτομοντάζ	1	1
5	Λόγος και σκίτσο	--	1

Πίνακας 1 Χαρακτηριστικά πολυτροπικότητας

Α/Α	Είδος εφημερίδων	Βαθμός πολυτροπικότητας					Σύνολο
		Πολύ υψηλή	Μέτρια	Μικρή	Ελάχιστη	Μηδενική	
1	Πολιτικές	2	10	1	--	17	30
2	Οικονομικές	1	4	1	--	5	11
3	Αθλητικές	7	2	--	3	--	12
4	Σατιρικές	2	--	--	--	1	3
5	Ποικίλης ύλης	2	--	--	--	--	2

Πίνακας 2 Σχέση του βαθμού πολυτροπικότητας με το είδος της εφημερίδας ως προς το περιεχόμενο (πρώτη έρευνα)

Α/Α	Είδος εφημερίδων	Βαθμός πολυτροπικότητας					Σύνολο
		Πολύ υψηλή	Μέτρια	Μικρή	Ελάχιστη	Μηδενική	
1	Πολιτικές	2	3	8	5	12	30
2	Οικονομικές	--	2	1	1	7	11
3	Αθλητικές	4	3	2	2	--	11
4	Σατιρικές	--	2	1	--	--	3
5	Ποικίλης ύλης	--	1	1	--	--	2

Πίνακας 3 Σχέση του βαθμού πολυτροπικότητας με το είδος της εφημερίδας ως προς το περιεχόμενο (δεύτερη έρευνα)

Α/Α	Πολιτικοϊδεολογική θέση	Βαθμός πολυτροπικότητας					Σύνολο
		Πολύ υψηλή	Μέτρια	Μικρή	Ελάχιστη	Μηδενική	
1	Αριστερές	--	--	--	--	4	4
2	Δεξιές	--	--	1	--	1	2
3	Κεντρώες	1	10	2	--	12	25
4	Ουδέτερες	12	6	1	2	6	27

Πίνακας 4 Σχέση του βαθμού πολυτροπικότητας με την πολιτικοϊδεολογική θέση της εφημερίδας (πρώτη έρευνα)

Α/Α	Πολιτικοϊδεολογική θέση	Βαθμός πολυτροπικότητας					Σύνολο
		Πολύ υψηλή	Μέτρια	Μικρή	Ελάχιστη	Μηδενική	
1	Αριστερές	--	--	2	--	2	4
2	Δεξιές	--	--	3	1	1	5
3	Κεντρώες	1	5	4	4	9	23
4	Ουδέτερες	6	6	3	3	7	25

Πίνακας 5 Σχέση του βαθμού πολυτροπικότητας με την πολιτικοϊδεολογική θέση της εφημερίδας (δεύτερη έρευνα)

Από την ανάγνωση του πίνακα 1 προκύπτει πως τόσο στην πρώτη όσο και στη δεύτερη έρευνα ο συνδυασμός λόγου και φωτογραφίας αποτελεί τον κυρίαρχο και τον πλέον προσφιλή στους συντάκτες συνδυασμό για την παρουσίαση της πολυτροπικότητας, ενώ ο συνδυασμός λόγου και πινάκων, σκίτσων και διαγραμμάτων είναι πολύ περιορισμένος. Μια πιο λεπτομερής εξέταση του κυρίαρχου συνδυασμού έδειξε πως στη θέση της φωτογραφίας πολύ συχνά (12 από τα 31 στην πρώτη και 20 από 32 στη δεύτερη έρευνα) βρίσκεται η φωτογραφία του ή των προσώπων που παρήγαγαν το μήνυμα που αναγράφεται στον πρωτοσέλιδο κεντρικό τίτλο ή τουλάχιστον το πρόσωπο ή τα πρόσωπα που σχετίζονται με το κεντρικό πρωτοσέλιδο θέμα. Τα πρόσωπα αυτά είναι ως επί το πλείστον μέλη της κυβέρνησης -για τις πολιτικές και οικονομικές εφημερίδες- και αθλητικοί παράγοντες ή αθλητές για τις αθλητικές εφημερίδες. Οι υπόλοιπες 19 φωτογραφίες στην πρώτη και 12 στη δεύτερη έρευνα παρουσιάζουν κάποια εικόνα που άμεσα ή έμμεσα σχετίζεται με το κεντρικό πρωτοσέλιδο θέμα. Όσον αφορά τον συνδυασμό λόγου και πίνακα/ων αυτός βρίσκεται κυρίως στις οικονομικές εφημερίδες, στις

οποίες λόγω του περιεχομένου παρουσιάζονται ποσοστά και στατιστικές, συνήθως με έγχρωμα ιστογράμματα.

Από την ανάγνωση των πινάκων 2 και 3 προκύπτει ότι στις πολιτικές και οικονομικές εφημερίδες παρουσιάζεται μια σχετικά μεγάλη διασπορά στον βαθμό χρήσης της πολυτροπικότητας. Το αξιοσημείωτο είναι ότι στην πρώτη έρευνα το ποσοστό της μονοτροπικότητας ανέρχεται περίπου στο 40%, ενώ στη δεύτερη το ποσοστό αυτό φτάνει γύρω στο 33%. Από την άλλη, οι αθλητικές, οι σατιρικές και οι ποικίλης ύλης εφημερίδες δείχνουν μια αυξημένη προτίμηση στη χρήση της πολυτροπικότητας, αφού και στις δύο έρευνες ένα ποσοστό που φτάνει και ξεπερνάει το 60% παρουσιάζει μέτριο και πολύ υψηλό βαθμό πολυτροπικότητας.

Από την ανάγνωση των πινάκων 4 και 5 προκύπτει ότι οι εφημερίδες με ρητά ή άρρητα δηλωμένη την πολιτικοϊδεολογική τους ταυτότητα παρουσιάζουν πολύ μικρό βαθμό πολυτροπικότητας. Ανάμεσα σε αυτές από την πρώτη έρευνα προέκυψε ότι τον πλέον μικρό βαθμό παρουσιάζουν αυτές που ανήκουν στους ακραίους πολιτικοϊδεολογικούς χώρους, κάτι που στη δεύτερη έρευνα ανατρέπεται μερικώς, αφού τα έντυπα αυτά παρουσιάζουν κάποια σχετική διασπορά διολισθαίνοντας δειλά και προς τη χρήση της πολυτροπικότητας. Όσες ανήκουν στον κεντρώο χώρο παρουσιάζουν –και στις δύο έρευνες– μια διασπορά ως προς τον βαθμό χρήσης. Αλλά και σ’ αυτήν την κατηγορία παραμένει πολύ υψηλό το ποσοστό των εφημερίδων που επιλέγει μονοτροπική παρουσίαση του πρωτοσέλιδου κεντρικού θέματος, που φτάνει στην πρώτη έρευνα το 44% και στη δεύτερη το 35%. Αντίθετα με τις εφημερίδες αυτές, όσες δεν έχουν δηλωμένη την πολιτικοϊδεολογική τους ταυτότητα και κατατάσσονται στην κατηγορία «ουδέτερες» παρουσιάζουν στην πρώτη έρευνα πολύ υψηλό ποσοστό χρήσης της πολυτροπικότητας, που φτάνει το 66% στο σύνολο των πεδίων «πολύ υψηλή» και «μέτρια», ενώ στη δεύτερη έρευνα το ποσοστό αυτό μειώνεται στο 48% περίπου.

4. Συμπεράσματα

Βασικός σκοπός της έρευνάς μας ήταν να διερευνηθούν αφενός τα χαρακτηριστικά με τα οποία εμφανίζεται η πολυτροπικότητα στις πανελλήνιες κυκλοφορίας εφημερίδες, καθώς και ο βαθμός πολυτροπικότητας που χρησιμοποιείται σ’ αυτές, και αφετέρου οι τυχόν διαφορές που παρουσιάστηκαν την τελευταία πενταετία αναφορικά με τον βαθμό χρήσης της πολυτροπικότητας και των χαρακτηριστικών της από τα συγκεκριμένα έντυπα.

Η έρευνα έδειξε ότι την τελευταία πενταετία ένας πολύ μεγαλύτερος από ό,τι στο παρελθόν αριθμός εφημερίδων εκμεταλλεύεται την πολυτροπικότητα και τη χρησιμοποιεί ως ένα ακόμη μέσο, για να επιτελέσει ο δημοσιογραφικός και δη ο ειδησεογραφικός λόγος τις λειτουργίες του (Χατζησαββίδης 2000: 33-42). Εκείνο που διαπιστώνεται και από τις δύο έρευνες είναι πως το μέσο αυτό δεν παρουσιάζει τα ίδια χαρακτηριστικά σε όλες τις εφημερίδες και δε χρησιμοποιείται στον ίδιο βαθμό και στην ίδια έκταση από όλες τις εφημερίδες, αλλά σχετίζεται (εκτός από τη σπουδαιότητα του θέματος) με το είδος στο οποίο ανήκει η εφημερίδα και με τη φυσιогνωμία που θέλει να διαμορφώσει απέναντι στο αναγνωστικό της κοινό, φυσιогνωμία που έχει σχέση με την πολιτικοϊδεολογική θέση της κάθε εφημερίδας. Το τελευταίο χαρακτηριστικό φαίνεται και από τη σταθερότητα ως προς την έκταση, τον συνδυασμό τρόπων, τα χρώματα, τις γραμματοσειρές και τη γενικότερη αισθητική που χρησιμοποιούνται για την παρουσίαση των θεμάτων της πρώτης σελίδας. Έτσι τα χαρακτηριστικά της πολυτροπικότητας, ο βαθμός και η έκταση της, καθώς και η σχέση μεταξύ των δύο κυρίαρχων τρόπων που υφίστανται στα πολυτροπικά πρωτοσέλιδα κείμενα των εφημερίδων αντικατοπτρίζει και τη γενικότερη «γραμμή» της κάθε εφημερίδας.

Ειδικότερα, όσον αφορά τις ελληνικές εφημερίδες, με βάση τα δεδομένα των δύο ερευνών μπορούμε να οδηγηθούμε σε ορισμένες εκτιμήσεις εν είδει συμπερασμάτων, όπως τα παρακάτω:

Ι. Όσον αφορά τα χαρακτηριστικά με τα οποία εμφανίζεται η πολυτροπικότητα, καθώς και τον βαθμό πολυτροπικότητας διαπιστώθηκαν τα εξής:

- η πολυτροπικότητα ως νεωτεριστικό στοιχείο φαίνεται να αρμόζει σε έντυπα με περιεχόμενο που αφορά κυρίως ψυχαγωγικού περιεχομένου δραστηριότητες (αθλητισμός, σάτιρα, ποικίλα),
- η πολυτροπικότητα δεν αποτελεί στοιχείο φορτισμένο ιδεολογικά, γιατί προφανώς δεν έγινε κτήμα και δε χρησιμοποιήθηκε από καμιά ιδεολογία ως μέσο ιδιαίτερης έκφρασης και προπαγάνδας,
- η πολυτροπικότητα εισάγεται στην ελληνική δημοσιογραφία δειλά χρησιμοποιώντας ως «γέφυρες» έντυπα που κατά κανόνα δεν έχουν μια συγκεκριμένη πολιτικοϊδεολογική ταυτότητα και δεν έχουν διαμορφώσει την παράδοση που έχουν διαμορφώσει οι παλαιότερες εφημερίδες,

- η χρήση της πολυτροπικότητας δε φαίνεται ακόμη να είναι αποτέλεσμα συνειδητής επιλογής αλλά περισσότερο στοιχείο εντυπωσιασμού του αναγνωστικού κοινού.

II. Όσον αφορά τις τυχόν διαφορές που παρουσιάστηκαν την τελευταία πενταετία αναφορικά με τον βαθμό χρήσης της πολυτροπικότητας και των χαρακτηριστικών τους διαπιστώθηκαν τα εξής:

- οι διαφορές που παρουσιάζονται ανάμεσα στις δύο έρευνες γενικά είναι ελάχιστες και όχι αντιπροσωπευτικές για να δικαιολογήσουν τη δημιουργία μιας τάσης αλλαγής,
- φαίνεται να υπερισχύει σταδιακά η πολυτροπικότητα στην οποία χρησιμοποιείται ο συνδυασμός λόγου και φωτογραφίας,
- οι πολιτικές και οι οικονομικές εφημερίδες χρησιμοποιούν σε αρκετά μεγαλύτερα ποσοστά την πολυτροπικότητα από ό,τι πριν από πέντε χρόνια,
- οι εφημερίδες που ανήκουν σε ακραίους πολιτικοϊδεολογικούς χώρους χρησιμοποιούν περισσότερο από ό,τι πριν από πέντε χρόνια την πολυτροπικότητα,
- οι ουδέτερες πολιτικοϊδεολογικά εφημερίδες χρησιμοποιούν λιγότερο από ό,τι πριν πέντε χρόνια την πολυτροπικότητα.

Όλα αυτά τα τελευταία μας δίνουν το δικαίωμα να υποστηρίξουμε ότι η πολυτροπικότητα ως πρακτική γίνεται όλο και περισσότερο αποδεκτή από τις ελληνικές εφημερίδες δείχνοντας ότι αποχρωματίζεται από τις πολιτικοϊδεολογικής και αισθητικής φύσης συμφραζόμενα, με τα οποία ήταν προφανώς φορτισμένη, και από στοιχείο εντυπωσιασμού του αναγνωστικού κοινού που πιθανόν ήταν κάποτε μετατρέπεται σε ένα εκ των ων ουκ άνευ στοιχείο για την πρώτη σελίδα των ελληνικών εφημερίδων.

ABSTRACT

The present study reveals the regularity in negator choice in Greek providing qualitative and quantitative evidence from all the history of the language. The second negator NEG2, orthographically transcribed as μη, is found to be a polarity item, an element that appears exclusively in nonveridical environments in the sense of Giannakidou (1998 et seq.). Apart from its use as a prohibitive, the Greek NEG2 is identified in a number of compositionally non-negative, yet nonveridical functions; among these are its uses (i) as an optional question particle and (ii) as a complementizer in the scope of verbs of fear, which are both diachronically persistent.

Λέξεις κλειδιά: άρνηση, μη αληθειακόηηηα, πολικό σηνείο

1. Εισαγωγή

Η παρούσα εργασία εστιάζει στη διάκριση μεταξύ δύο προτασιακών αρνήσεων σε συμπληρωματική κατανομή, που διατηρεί η Ελληνική γλώσσα σε όλες τις φάσεις της από την Ομηρική Ελληνική (8^ο αιώνα π.Χ), (1), (2), μέχρι την Νέα Ελληνική, (3), (4), ως μέρος της παρακαταθήκης της από την Πρωτο-Ινδο-Ευρωπαϊκή (Fowler 1896, Moorehouse 1959, Joseph 2002, Fortson 2010, βλ. πίνακα 1). Παρατηρούμε πως η μία άρνηση, APN1, αλλάζει, ενώ η άλλη, APN2, παραμένει σταθερή και υφίσταται μόνο φωνολογικές αλλαγές, που είναι γενικές σε κάθε γλωσσική φάση (βλ. Horrocks 2010).²

Πίνακας 1 Οι APN1 και APN2 στη διαχρονία

Μετά από εξέταση ποιοτικών και ποσοτικών δεδομένων από αντιπροσωπευτικά κείμενα όλων των φάσεων της ομιλουμένης Ελληνικής καταλήγουμε ότι το ενοποιητικό στοιχείο των περιβαλλόντων του στοιχείου APN2 είναι η ιδιότητα της Μη Αληθειακότητας (Nonveridicality). Τα περιβάλλοντα εμφάνισης της APN2 δεν είναι πάντα τα ίδια διαχρονικά, είναι όμως πάντα μη αληθειακά (nonveridical), βάσει της αντίληψης για τη Μη Αληθειακότητα της Giannakidou (1994 κ.ε.). Η κατανομή συνεπώς των μορίων APN1 και APN2 της Ελληνικής είναι αποτέλεσμα σημασιολογικού παράγοντα: της πολιτικής συμπεριφοράς της APN2 (πβ. Chatzopoulou & Giannakidou 2011 όσον αφορά την Αττική διάλεκτο). Η σταθερότητα όμως της APN2 σε συγκεκριμένες χρήσεις στην ιστορία της Ελληνικής προτείνουμε ότι οφείλεται και στη σημασιολογία και στη σύνταξη. Οι διαχρονικά σταθερές χρήσεις της APN2 (α) στην απαγόρευση, (β) στην ενδοιαστική πρόταση και (γ) στη χρήση του ερωτηματικού μορίου, σχετίζονται με συντακτικές δομές όπου η APN2 *μη* τοποθετείται ή συσχετίζεται με θέση ιεραρχικά ανώτερη από την φράση άρνησης (ΑρνΦ): τη θέση του Συμπληρωματικού Δείκτη. Επιπλέον οι χρήσεις (β) και (γ) είναι μη αρνητικές και ως εκ τούτου δεν επηρεάζονται από τον Κύκλο του Γέσπερσεν (Jespersen 1917), που είναι γνωστός και ως Κύκλος της Άρνησης, εφόσον δεν συνδέονται με ιεραρχικά κατώτερη αρνητική φράση, η δομική ανύψωση της οποίας θέτει σε κίνηση τον Κύκλο του Γέσπερσεν κατά τον ορισμό της Chatzopoulou (2011a, 2011b, 2012a, 2012b). Η χρήση της APN2 στην απαγόρευση εμφανίζει στοιχεία Κύκλου του Γέσπερσεν, που όμως δεν ολοκληρώνεται για λόγους που χρειάζονται περαιτέρω εξέταση.

Η κατανομή των APN1 και APN2 επηρεάζεται από τις γλωσσικές εξελίξεις κάθε ιστορικής φάσης, όμως πέρα από την εξάρτηση της APN2 από την Μη Αληθειακότητα που μένει ανέπαφη, εξίσου σταθερή είναι σε γενικές γραμμές και η αναλογία του αριθμού των εμφανίσεων των δύο μορίων μεταξύ τους (βλ. πίνακα 2).

Πίνακας 2 Η διαχρονική αναλογία των APN1 και APN2 της Ελληνικής

2. Η Θεωρία της (Μη)Αληθειακότητας

Στις φυσικές γλώσσες έχουν παρατηρηθεί οικογένειες λέξεων που εκδηλώνουν περιορισμό στην κατανομή τους, καθώς δεν μπορούν να εμφανιστούν σε οποιοδήποτε γλωσσικό περιβάλλον με την ίδια ελευθερία που έχουν οι περισσότερες λέξεις όλων των γραμματικών κατηγοριών. Τέτοιες οικογένειες στη Νέα Ελληνική είναι αυτές του εμφατικού και του μη εμφατικού *κανένας* (Veloudis 1982, Giannakidou 1994, 1997, 1998).

- (5) *Ο Γιάννης χθες έφερε *KANENA/κανένα* γλυκό
(6) Ο Γιάννης χθες δεν έφερε *KANENA/κανένα* γλυκό.

Το φαινόμενο αυτό χαρακτηρίζεται παραδοσιακά ως πολικότητα (polarity) και οι λέξεις που το εμφανίζουν ως πολικά στοιχεία (polarity items), με αναφορά στους δύο 'πόλους' της κατάφασης και της άρνησης, καθώς η παρουσία αυτών των λέξεων είχε αρχικά συνδεθεί με την άρνηση, ότι δηλαδή η άρνηση επιτρέπει αυτά τα τεμάχια, πβ. (6), ενώ η κατάφαση δεν τα επιτρέπει, πβ. (5). Την προσοχή της γλωσσολογικής έρευνας σε φαινόμενα πολικότητας στρέφουν για πρώτη φορά τα άρθρα των Buysens (1959) και Klima (1964) με αφορμή το πολικό στοιχείο *any* της Αγγλικής, που όπως και το νεοελληνικό *κανένας*, εκδηλώνει περιορισμένη κατανομή και μάλιστα με αντίστοιχο τρόπο: φαίνεται να προτιμά την άρνηση (8) και να αποφεύγει την κατάφαση (7).

- (7) *John brought *any* fruit yesterday
(8) John didn't bring *any* fruit yesterday.

Έκτοτε ξεκινάει η περιπετειώδης ιστορία της Πολικής Θεωρίας με στόχο την εύρεση του κανόνα που ρυθμίζει την κατανομή των πολικών στοιχείων (Jackendoff 1969, Baker 1970, Ladusaw 1979, Linebarger 1980, 1987, Hoeksema 1986, Zwarts 1986, 1993, van der Wouden 1994, Kas 1993, Dowty 1994). Παραλείποντας τις λεπτομέρειες αυτής της πορείας (βλ. για περισσότερα Giannakidou 1997, 1998), η απάντηση με την μεγαλύτερη ερμηνευτική δύναμη, όσον αφορά το αριθμό των περιβαλλόντων εμφάνισης πολικών στοιχείων που καλύπτει, προέρχεται από την Πολική Θεωρία της Μη Αληθειακότητας (Giannakidou 1994 κ.ε., Zwarts 1995), που συμπεριλαμβάνει και επεκτείνει τις παρατηρήσεις προηγούμενων θεωριών, όπως ήταν αυτή της κατιούσας συνεπαγωγής (downward entailment) που είχε προτείνει νωρίτερα ο Ladusaw (1979, βλ. περισσότερα Giannakidou 1997: 10–13, 1998: 11–15). Η Θεωρία της Μη Αληθειακότητας, την οποία ακολουθούμε και στην παρούσα μελέτη, προβάλλει την ιδιότητα της Μη Αληθειακότητας ως ενοποιητικό παράγοντα των περιβαλλόντων εμφάνισης των πολικών στοιχείων. Η Μη Αληθειακότητα, ως ιδιότητα προτασικών τελεστών, ορίζεται με τον ακόλουθο τρόπο (ορισμός Giannakidou 2006: 589 σε δική μας μετάφραση).

(9) (Μη)Αληθειακότητα για προτασικούς τελεστές

- (i) Ένας προτασικός τελεστής F είναι αληθειακός, αν και μόνο αν το Fp συνεπάγεται ή προϋποθέτει ότι το p είναι αληθές στο επιστημικό μοντέλο $ME(x)$ κάποιου ατόμου x : διαφορετικά ο τελεστής F είναι μη αληθειακός.
(ii) Ένας μη αληθειακός τελεστής F είναι αντιαληθειακός, αν και μόνο αν το Fp συνεπάγεται το αντίθετο του p στο επιστημικό μοντέλο κάποιου ατόμου x : $Fp \rightarrow \neg p$ στο $ME(x)$.

(10) Ορισμός στοιχείου πολικότητας

Ένα λεκτικό τεμάχιο a αποτελεί στοιχείο πολικότητας, αν και μόνο αν:

- (i) η κατανομή του a εκδηλώνει περιορισμό λόγω εξάρτησης του a από μια σημασιολογική ιδιότητα β που είναι ιδιότητα του περιβάλλοντος εμφάνισης; και
(ii) η ιδιότητα β είναι η (Μη)Αληθειακότητα.

Μη Αληθειακοί τελεστές, πέρα από την άρνηση, υπάρχουν μεταξύ άλλων στην υποθετική πρόταση, στην ερώτηση και στις κατευθυντικές γλωσσικές τάσεις (directive attitudes), όπως είναι η προσταγή. Ο πίνακας 3 παρουσιάζει την κατανομή του εμφατικού και του μη εμφατικού *κανένας* στην Νέα

Ελληνική. Το εμφατικό *KANENAS* είναι αυστηρό στοιχείο αρνητικής πολικότητας (strict negative polarity item) κατά την ορολογία της Giannakidou (1998) με την έννοια πως εμφανίζεται αποκλειστικά σε αντι-αληθειικά σημασιολογικά περιβάλλοντα, σε αντίθεση με το μη εμφατικό *κανένας* που απαντά σε μεγαλύτερο εύρος μη αληθειικών περιβαλλόντων.

	Σημασιολογικά περιβάλλοντα	Παραδείγματα με το <i>κανένας</i>
Αντι Αληθειικά	Προτασική άρνηση	Η Ελένη δεν είδε KANENAN/κανέναν .
	<i>χωρίς</i>	Η Ελένη έφυγε χωρίς να δει KANENAN/κανέναν .
	<i>πριν</i>	Η Ελένη έφυγε πριν δει KANENAN/κανέναν .
Μη Αληθειικά	Υποθετική πρόταση	Αν φύγει κανένας , να με ενημερώσεις.
	Προστακτική	Πάρε κανένα γλυκό.
	Ερώτηση	Είδες κανέναν ;
	Δυνητική τροπικότητα	Μπορεί να φέρω κανένα γλυκό.
	Επιστημική τροπικότητα	Θα έφερε κανένα γλυκό.
	Κατιούσα συνεπαγωγή	Λίγοι επισκέπτες έφεραν κανένα μπακλαβαδάκι.

Πίνακας 3 Η κατανομή του εμφατικού και του μη εμφατικού *κανένας* στη Νέα Ελληνική

Η κατανομή του μη εμφατικού *κανένας* μπορεί να χρησιμεύσει και ως πρακτικό διαγνωστικό μέσο όσον αφορά την αληθειαικότητα ή μη ενός γλωσσικού περιβάλλοντος. Ωστόσο το πλήρες φάσμα των μη αληθειικών περιβαλλόντων δίνεται μόνο από τον ορισμό της Giannakidou που εκτέθηκε στο (9).

Η Θεωρία της (Μη)Αληθειαικότητας έχει χρησιμοποιηθεί στην ερμηνεία σημαντικού αριθμού φαινομένων πολικότητας διαγλωσσικά (Lin 1996, Matthewson 1998, Hoeksema 1999, Bernanrdi 2002, Farkas 2002, Falaus 2009, Fernald and Perkins 2007, Partee 2008, Borschev *et al.* 2008, Schwarz 2005, Yoshimura 2007, Van Craenenbroeck 2008, J. H. Lee 2008, Giannakidou and Yoon 2011, Yoon 2011). Η παρούσα μελέτη είναι άλλη μία εφαρμογή της θεωρίας της (Μη)Αληθειαικότητας, βάσει της οποίας εξηγείται διαχρονικά η κατανομή της APN2 στην Ελληνική.

3. Η κατανομή της APN2

3.1 Πρόδρομοι και προηγούμενες προσεγγίσεις

Ο κανόνας όσον αφορά την κατανομή των αρνήσεων της Ελληνικής αποτέλεσε αντικείμενο αναζήτησης από πολύ νωρίς με πρώτους τους κλασικούς φιλόλογους τους 18ου και 19ου αιώνα, οι οποίοι άλλοτε συντάσσοντας γραμματικές, ως επί τω πλείστω της Αρχαίας Ελληνικής (Kühner 1835, Crosby 1860, Goodwin 1889, Jannaris 1897), και άλλοτε με τη μορφή πιο εξειδικευμένων πονημάτων (Hoogeveen 1769, Hermann 1802, Anton 1824, Hartung 1833, Kühner 1852, 1870, Gildersleeve 1882, Postgate 1894), κάνουν διάφορες προθεωρητικές διαπιστώσεις χωρίς, ωστόσο, να καταλήγουν σε γενικότερη συναίνεση. Ενδεικτική είναι η διατύπωση του Hermann σε σχέση με τη διάκριση ανάμεσα στο *οὐ* και το *μή* της Κλασικής Ελληνικής: *οὐ* negat rem ipsam; *μή* cogitationem rei (Hermann [1802] 1822: 804) ‘το *οὐ* είναι άρνηση του ιδίου του όντος· το *μή* άρνηση του συλλογισμού περί το ον.’ Ο προβληματισμός και η λεπτομερής ταξινόμηση των περιβαλλόντων και των χρήσεων των APN1 και APN2 συνεχίζονται και από τους φιλόλογους του 20^ο αιώνα (Kühner & Gerth 1904, Smyth 1920, Τζάρτζανος 1946, Schwyzer & Debrunner 1950, Moorhouse 1959). Στην καρδιά των διαπιστώσεων των περισσότερων κλασικών μελετητών είναι πως ο παράγοντας που διαφοροποιεί τις δύο αρνήσεις της Ελληνικής είναι σημασιολογικός.

Στα νεότερα χρόνια σημειώνεται η απόπειρα συσχετισμού της APN2 στη Νέα Ελληνική με την μορφολογική έγκλιση και συγκεκριμένα με την μη οριστική, ενώ η APN1 συνδέεται με την οριστική (Joseph & Philippaki-Warbuton 1987, Giannakidou 1998). Ο σημασιολογικός χαρακτήρας της διάκρισης των δύο αρνήσεων φωτίζεται και πάλι στο άρθρο των Philippaki-Warbuton & Spyropoulos (2004) όπου προτείνεται ότι τις δύο αρνήσεις σε όλη την Ελληνική γλώσσα διαφοροποιούν δύο είδη τροπικότητας: η επιστημική τροπικότητα συνδέεται με την APN1 και δεοντική με την APN2. Τέλος, η Willmott (2007, 2008, υπό έκδοση) αντικρούει λεπτομερώς τις θέσεις των προηγούμενων χωρίς ωστόσο να αντιπροβάλει κάτι συγκεκριμένο, μολονότι συσχετίζει ορισμένες από τις χρήσεις της APN2 με την έννοια του *irrealis* (μη αληθινού). Οι συμβολές αυτές προσφέρουν μερική θέαση της

κανονικότητας πίσω από την επιλογή αρνητικού μορίου στην διαχρονία της Ελληνικής. Η σύνδεση της νεοελληνικής APN2 με την υποτακτική είναι μόνο φαινομενική και οφείλεται στο ότι τόσο η APN2, όσο και η υποτακτική είναι στοιχεία πολικότητας (βλ. για την υποτακτική Giannakidou 2009, 2011). Ο συσχετισμός της APN2 με την δεοντική τροπικότητα, μολονότι είναι ακριβής, δεν εξηγεί την εμφάνισή της π.χ. στην υποθετική πρόταση, σε είδη μετοχών και σε απαρέμφατα της Αρχαίας και της Ελληνιστικής, ούτε και την παρουσία της στις ερωτήσεις και στις ενδοιαστικές προτάσεις, ενώ από την οπτική της Willmott λείπει η συγκεκριμένη θεωρητική σκευή που θα βάλει όλα τα πράγματα στη θέση τους και που νοηματοδοτεί την εμφάνιση της APN2 σε όλα τα διαχρονικά της περιβάλλοντα. Η θεωρητική αυτή σκευή προτείνουμε πως είναι η θεωρία της (Μη)Αληθείαςκότητας.

3.2 Η APN2 ως στοιχείο πολικότητας: από την Αττική στην Νέα Ελληνική

Η εξέταση της συνολικής κατανομής της APN2 στην διαχρονία της Ελληνικής οδηγεί στο συμπέρασμα ότι η APN2 αποτελεί πολικό στοιχείο, εφόσον απαντά αποκλειστικά σε μη αληθείακά περιβάλλοντα στα οποία επιπλέον δεν συνεισφέρει πάντα αρνητική σημασία. Η θεωρία της Giannakidou (1998: 2–3, 93–95) επιτρέπει αυτή τη διάγνωση, εφόσον δεν θέτει περιορισμούς λεξικής κατηγορίας στα γλωσσικά τεμάχια που μπορούν να χαρακτηριστούν στοιχεία πολικότητας. Άρα και η προτασιακή άρνηση μπορεί να αποτελέσει στοιχείο πολικότητας σε γλώσσες που κάνουν διάκριση σε περισσότερες από μία αρνήσεις (66% των φυσικών γλωσσών, βάσει της καταμέτρησης των Van der Auwera & Lejeune 2005 σε δείγμα 495 γλωσσών ανά τον κόσμο).

Η πολική συμπεριφορά της APN2 *μή* στην Αττική διάλεκτο έχει επιβεβαιωθεί (Chatzopoulou & Giannakidou 2011), καθώς όλα τα περιβάλλοντα εμφάνισής της (π.χ. απαγόρευση, υποθετική πρόταση/μετοχή, τελική πρόταση/μετοχή, τελικό απαρέμφατο, ενδοιαστική πρόταση, ερώτηση) είναι μη αληθείακά (βλ. πίνακα 4 και ενδεικτικά παραδείγματα (11)–(18)).

 APN2 λοιπόν εγώ ανοητεύω.ΕΝΕΣΤ.ΟΡ/ΥΠΟΤ/1ΕΝ
 ‘Μήπως λέω ανοησίες;’ ΕΡΩΤΗΣΗ

Στην ενδοιαστική πρόταση και στην χρήση ερωτηματικού μορίου η APN2 δεν συνεισφέρει αρνητική σημασία (πβ. Joseph & Janda 1999), γεγονός που αποτελεί παρατηρημένη εξέλιξη γραμματικοποίησης της άρνησης διαγλωσσικά (Heine & Kuteva 2002, Van Gelderen 2008, 2011). Το αξιοσημείωτο είναι η αδράνεια που εμφανίζει η APN2 της Ελληνικής σ’αυτές τις χρήσεις, οι οποίες, μαζί με τις αρνητικές χρήσεις της, στην απαγόρευση και εντός της ονοματικής φράσης, είναι οι διαχρονικά σταθερές. Ο πίνακας 5 συνοψίζει τις χρήσεις της APN2 στη Νέα Ελληνική και ακολουθούν ενδεικτικά παραδείγματα.

Η εξάρτηση της APN2 από την Μη Αληθειαικότητα είναι εμφανής και στην Νέα Ελληνική, καθώς όλα τα περιβάλλοντα στα οποία απαντά εξακολουθούν να είναι μη αληθειαικά, βάσει του ορισμού για την (Μη)Αληθειαικότητα της Giannakidou. Η διαφοροποίηση στην κατανομή της νεοελληνικής APN2 σε σχέση με εκείνη της Αττικής οφείλεται σε γενικότερες εξελίξεις στο γλωσσικό σύστημα. Χάνεται για παράδειγμα η χρήση της APN2 με το τελικό απαρέμφατο, γιατί χάνεται το απαρέμφατο, καθώς εκτοπίζεται σταδιακά από την υποτακτική, να+ρηματικός τύπος (βλ. μεταξύ άλλων Blass & Debrunner 1961, Joseph 1978/1990, Horrocks 2010). Ωστόσο και η ίδια η υποτακτική και ο συνοπτικός μη παρελθοντικός τύπος του ρήματος (perfective non past) αποτελούν στοιχεία πολικότητας της Νέας Ελληνικής (βλ. Giannakidou 2009). Είναι άρα αναμενόμενος ο συσχετισμός τους με την APN2. Η μόνη γνήσια εξέλιξη στην κατανομή της APN2 από την Αττική στη Νέα Ελληνική είναι η απουσία της από την υποθετική πρόταση. Στη Νέα Ελληνική μόνο η APN1 είναι επιτρεπτή.

(29) Αν δεν έρθεις, θα θυμώσω.

Πρόκειται λοιπόν για μία ιστορική στιγμή στην πορεία της APN2 ως στοιχείο πολικότητας, καθώς τα περιβάλλοντα που αναγνωρίζει ως επιτρεπτά συρρικνώνονται κατά ένα, μία αλλαγή που όπως και άλλες είχε αρχίσει ήδη από την Κλασική εποχή (Horrocks 2010: 132), γενικεύεται όμως κατά την Ύστερη Μεσαιωνική περίοδο (Chatzopoulou 2012b) πριν ακόμη από την φωνολογική μετατροπή της APN1 από οὐδεν /udhén/ σε δεν /dhen/ με γενική αφαίρεση των άτονων φωνηέντων (Horrocks 2010).

(30) «ἄλλον» νὰ μὴ ἴδῃς τὴν Συρίαν, ἂν οὐδεν ὑποστρέψῃς.¹⁴
 ‘Να μην ξαναδείς την Συρία, αν δεν επιστρέψεις.’

Τα περιβάλλοντα στα οποία διατηρείται ωστόσο παραμένουν μη αληθειαικά στο σύνολό τους, γεγονός που αρκεί για να τον χαρακτηρισμό της ως στοιχείο πολικότητας και στην Νέα Ελληνική. Ακόμη και η παρουσία της στην ονοματική φράση μπορεί να ερμηνευτεί υπό το πρίσμα της (Μη)Αληθειαικότητας, εφόσον η ονοματική φράση, όπως συμβαίνει και με την προσταγή και την ερώτηση, είναι περιβάλλον μη αληθειαικά εκτιμήσιμο, περιβάλλον που δεν μπορεί να λάβει αληθειαική τιμή, ως αληθές ή ψευδές (πβ. Αριστοτέλη, *Περί ερμηνείας* I 16a13–18, επίσης Brandtler 2012 για τη σχέση αληθειαικής εκτιμησιμότητας [evaluability] και πολικότητας).

Η πολική συμπεριφορά της APN2 διατηρείται σε όλες τις ενδιάμεσες φάσεις της Ελληνικής (Chatzopoulou 2012b) και τεκμηριώνεται ήδη στην Ομηρική με βάση τις περιγραφές κατανομής των αρνητικών μορίων που δίνει η Willmott (2007) για την Ιλιάδα και την Οδύσσεια, ανεξάρτητα ωστόσο από τη θεωρία της (Μη)Αληθειαικότητας. Η γενίκευση στην οποία μπορούμε να καταλήξουμε είναι πως στην ιστορία της Ελληνικής η APN2 είναι σημαδεμένη όσον αφορά την ιδιότητα της Μη Αληθειαικότητας, ενώ η APN1 είναι ασημάδευτη, εμφανίζεται και σε αληθειαικά και σε μη αληθειαικά περιβάλλοντα. Έχει ωστόσο και η APN1 περιορισμούς, συνδέεται περισσότερο με την Αληθειαικότητα και μ’αυτή την έννοια μπορεί να ειπωθεί ως στοιχείο θετικής πολικότητας (positive polarity item). Κατά βάση όμως η APN1 είναι η πρωτοτυπική προτασιακή άρνηση της Ελληνικής. Η APN2 είναι πρώτα στοιχείο πολικότητας και δευτερευόντως άρνηση. Η πολική συμπεριφορά είναι το ενοποιητικό στοιχείο όλων των περιβαλλόντων της, ενώ ο χαρακτηρισμός του μορφολογικού αστερισμού (morphological constellation) που της αποδίδουν οι Janda & Joseph (1999) αρμόζει σε όλες τις ιστορικές της φάσεις.

¹⁴ Διγενής Ακρίτης, έκδ. Σ. Αλεξίου (1990), 454.

- (31) **Μορφολογικός αστερισμός:** μία ομάδα στοιχείων που μοιράζονται τουλάχιστον μία χαρακτηριστική ιδιότητα μορφής, αλλά διαφοροποιούνται από ιδιοσυγκρασίες τόσο μορφής όσο και λειτουργίας που εμποδίζουν την μεταξύ τους ταύτιση (Janda & Joseph 1999).

Διαφοροποίηση στην μορφή της APN2 σε κάθε συγχρονικό στάδιο δεν παρατηρείται (με εξαίρεση στη Νέα Ελληνική την απουσία του ευφωνικού ν από την χρήση της ονοματικής φράσης, π.χ. *ο μη ενδιαφερόμενος*). Στη λειτουργία όμως παρατηρείται. Ο πυρήνας γύρω από τον οποίο οργανώνεται ο μορφολογικός αστερισμός την ελληνικής APN2 είναι η Μη Αληθειακότητα.

4. Οι διαχρονικά σταθερές χρήσεις της APN2

Όπως προαναφέρθηκε, οι σταθερές χρήσεις της APN2 στη διαχρονία της Ελληνικής είναι τέσσερις: (i) στην απαγόρευση, (ii) στην ερώτηση, (iii) στην ενδοιαστική πρόταση και (iv) στην ονοματική φράση. Στις τρεις πρώτες η APN2 σχετίζεται με τη δομική θέση του Συμπληρωματικού Δείκτη, η τέταρτη όχι. Στην ενότιση αυτή παρουσιάζονται παραδείγματα των τριών πρώτων χρήσεων από αντιπροσωπευτικές φάσεις της ιστορίας της Ελληνικής και επιδιώκεται η ερμηνεία της σταθερότητάς τους. Για την τέταρτη χρήση, αυτήν της ονοματικής φράσης, δεν έχουμε ακόμη κάποια αξιόπιστη εξήγηση, πέρα από τη σκέψη ότι η χρήση της στη Νέα Ελληνική ενδεχομένως ενισχύθηκε και μέσω σημασιολογικού δανεισμού, εφόσον εκδηλώνει ομοιότητες με το γαλλικό *non* (βλ. Efthimiou 2008).

4.1 Στην απαγόρευση

Η πιο αντιπροσωπευτική διαχρονική χρήση της APN2 είναι η απαγόρευση. Εμφανίζεται ήδη στα ομηρικά έπη και παραμένει η στατιστικά συχνότερη χρήση της APN2 (Chatzopoulou 2012b). Εξελίξεις παρατηρούνται με την έννοια ότι στην Νέα Ελληνική η APN2 δεν συνεμφανίζεται με μορφολογική προστακτική, αλλά τον τύπο της προστακτικής υποκαθιστά ο συνοπτικός μη παρελθοντικός τύπος του ρήματος (perfective non past) με προαιρετική την παρουσία του *να*, π.χ. (*να*) *μην πάτε* (βλ. Giannakidou 1998). Η σημασία της APN2 ωστόσο εξακολουθεί να συνδέεται με την απαγόρευση.

4.2 Στη χρήση προαιρετικού ερωτηματικού μορίου: μη αρνητική χρήση

Λιγότερο προβεβλημένη είναι η χρήση της APN2 ως ερωτηματικό μόριο σε ερωτήσεις ολικής αγνοίας (Chatzopoulou & Giannakidou 2011). Την εξειδίκευση των δύο αρνήσεων όσον αφορά τις ρητορικές ερωτήσεις δίνουν οι παραδοσιακές γραμματικές της Κλασικής Ελληνικής: η APN1 οὐ(κ) εκφέρεται σε αναμονή καταφατικής απάντησης, ενώ η APN2 μή εκφέρεται σε αναμονή αρνητικής απάντησης. Αυτό σύμφωνα με την αντίληψη των Sadock (1971, 1974), Berg (1978), Frank (1990), Han (2002), κατά την οποία οι ρητορικές ερωτήσεις ολικής αγνοίας ισοδυναμούν με εμφατική δήλωση αντίθετης πολικότητας (η αποφαιτική ρητορική ερώτηση ισοδυναμεί με εμφατική κατάφαση, π.χ. *Δεν ξέρεις πως ο Σωκράτης θα πληγωθεί αν τον προδώσεις;* ⇔ *Ο Σωκράτης θα πληγωθεί αν τον προδώσεις*, και η καταφατική ρητορική ερώτηση με εμφατική άρνηση, π.χ. *Θα πλήγωνα ποτέ τον Σωκράτη;* ⇔ *Δεν θα πλήγωνα ποτέ τον Σωκράτη*), σημαίνει πως το μή της Αττικής διαλέκτου δεν συνεισφέρει αρνητική σημασία (πβ. Joseph & Janda 1999): είναι απλά ερωτηματικό μόριο. Η χρήση αυτή εμφανίζεται ήδη πριν την Αττική Ελληνική στα ομηρικά έπη. Σε κάποιες περιπτώσεις μπορεί να προσδίδει μια πραγματολογική απόχρωση πως αυτό που ακολουθεί είναι ανεπιθύμητο, αλλά αυτό δεν είναι καθολικό.

4.3 Στην ενδοιαστική πρόταση: μη αρνητική χρήση

Εφάμιλλη δομικά με τη χρήση του ερωτηματικού μορίου είναι και η χρήση της APN2 στην ενδοιαστική πρόταση, για την οποία περιοριζόμαστε σε παραδείγματα μόνο από την Αττική και την Νέα Ελληνική για λόγους χώρου. Στη χρήση αυτή παρατηρείται διαχρονικά και η ακολουθία APN2 APN1 που ισοδυναμεί με μία λογική άρνηση και επιβεβαιώνει το γεγονός πως η APN2 σ' αυτή τη χρήση, όπως και στην προηγούμενη, δεν συνεισφέρει αρνητική σημασία.

Νέα Ελληνική

Η ενδοιαστική πρόταση αποτελεί μη αληθειακό περιβάλλον, ωστόσο στην αρνητική της μορφή εμφανίζεται υποχρεωτικά η APN1. Αυτό μπορεί να αποδοθεί στο ότι η APN2 υπάρχει ήδη στην θέση του Συμπληρωματικού Δείκτη και συντελείται ενδεχομένως ένα είδος μορφολογικής ανομοιότητας μεταξύ των δύο αρνήσεων προς αποφυγή του αναδιπλασιασμού (*μη μη), οποίος σε σχέση με άλλες γλώσσες είναι περιορισμένος στην Ελληνική. Αυτό άλλωστε επιτρέπει και η θεώρηση πως η APN1 είναι ασημάδευτη όσον αφορά την ιδιότητα της Μη Αληθειαςκότητας, ενώ η APN2 είναι σηματοδεδειγμένη.

4.4 Η ερμηνεία της αδράνειας

Οι λόγοι της διαχρονικής σταθερότητας των τριών προηγούμενων χρήσεων της APN2 δεν μπορούν να συσχετιστούν με τη συχνότητα. Ενδεικτικά παραθέτουμε μια μερική κατανομή των χρήσεων της APN2 σε αντιπροσωπευτικά κείμενα της Ελληνιστικής Κοινής.

Απαγόρευση	32%
Συμπληρωματικός Δείκτης (ερωτηματικό μόριο και ενδοιαστικό μόριο)	5%
Υποθετική πρόταση	22%

Πίνακας 6 Μερική κατανομή της APN2 στην Ελληνιστική Κοινή

Η χρήση της υποθετικής πρότασης είναι συχνότερη από τις χρήσεις του ερωτηματικού και του ενδοιαστικού μορίου, κι όμως οι δεύτερες επιβίωσαν. Η χρήση πάλι της απαγόρευσης είναι συχνότερη από αυτήν της υποθετικής πρότασης, κι όμως η δεύτερη δεν επιβίωσε. Άρα κανένας συσχετισμός της αδράνειας με τη συχνότητα δεν μπορεί να γίνει, τουλάχιστον για τη περίπτωση της ελληνικής APN2. Επομένως οι λόγοι της διαχρονικής σταθερότητας των συγκεκριμένων χρήσεων –εάν δεν είναι συγκυριακοί– θα πρέπει να αναζητηθούν αλλού.

Η διαχρονική πορεία της άρνησης συνδέεται με τον Κύκλο του Γέσπερσεν. Κύκλος του Γέσπερσεν ονομάζεται παραδοσιακά η τάση της προτασιακής άρνησης προς ανανέωση (Gardiner 1903, Meillet 1912, Jespersen 1917, 1924). Ο Κύκλος του Γέσπερσεν, γνωστός και ως Κύκλος της Άρνησης, είναι ένας μόνο από περισσότερους γλωσσικούς κύκλους (Van Gelderen 2011), όποιου διαπιστώνεται διαγλωσσικά η ώθηση προς ανανέωση σε διάφορες σημασιολογικές κατηγορίες. Δεδομένου πως δύο από τις τέσσερις διαχρονικά σταθερές χρήσεις της APN2 δεν είναι αρνητικές (ως ερωτηματικό και ως ενδοιαστικό μόριο) είναι αναμενόμενο να μην επηρεάζονται από τον Κύκλο του Γέσπερσεν. Επιπλέον, βάσει του ορισμού που έχει προταθεί για τον Κύκλο του Γέσπερσεν (Chatzopoulou 2011a κ.ε.), ως ανανέωση της προτασιακής άρνησης μέσω της σημασιακής έκπτωσης (bleaching) και παράλληλης δομικής ανύψωσης της εμφατικής κατηγορηματικής άρνησης (emphatic predicate negation, πβ. οὐδέν ‘τίποτα’ 5^ο αι. π. Χ.) σε απλή προτασιακή (plain propositional, πβ. οὐδέν ‘δεν’ 12^ο αι. μ. Χ.) (πβ. επίσης Kiparsky&Condoravdi 2007 για τη σημασία της διάκρισης μεταξύ απλής και εμφατικής άρνησης), και η APN2 σημείωσε κύκλο του Γέσπερσεν.

(47) **μηδὲν** μέγ’ εἵπης.²⁹ 5^{ος} αι. π. Χ.
me:den meg’ e:pe:is
τίποτα μεγάλο λέω.ΑΟΡ.ΥΠΟΤ.2ΕΝ
 ‘Μην πεις τίποτε μεγάλο (αλαζονικό).’ (πβ. ‘μη πεις μεγάλο λόγο’)

(48) Αὐτόθε στέκου, Μαξιμού, ὧδε **μηδὲν** περάσεις.³⁰ 12^{ος} αι. μ. Χ.
 ‘Στάσου εκεί, Μαξιμού, μην περάσεις κατά δω.’

Το *μηδὲν* υπέστη και σημασιακή έκπτωση και δομική ανύψωση και μάλιστα γενικεύεται στη χρήση της απλής άρνησης μη αληθειακών περιβαλλόντων την ίδια χρονική περίοδο με το *οὐδέν*. Η εξέλιξη αυτή ωστόσο διακόπηκε και το *μη* παρέμεινε ως δεύτερη άρνηση της Ελληνικής για λόγους που προς το παρόν μας είναι άγνωστοι.

²⁹ Σοφοκλής, *Αίας* 386.

³⁰ *Διγενής Ακρίτης*, έκδ. Σ. Αλεξίου (1990), στ. 1530.

5. Επίλογος

Παρακολουθώντας τη διαχρονική πορεία του συστήματος προτασιακής άρνησης της Ελληνικής, συγκεκριμένα των μορίων APN1 και APN2, διαπιστώνει κανείς παράλληλα τη σταθερότητα και τη μεταβολή. Σταθερή παραμένει η APN2, καθώς και η εξάρτησή της από την Μη Αληθειαικότητα, την ιδιότητα εκείνων των περιβαλλόντων στα οποία το λογικό υποκείμενο δεν δεσμεύεται για το αληθινό των λεγομένων του (προσταγή, ερώτηση, υποθετικός λόγος, τροπικά περιβάλλοντα, ονοματική φράση κ.ά.). Η APN2 της Ελληνικής είναι σημαδεμένη ως προς αυτό. Η APN1 είναι ασημάδευτη. Η μεταβολή εντοπίζεται αφενός στις λεπτομέρειες των περιβαλλόντων των αρνήσεων, που παρακολουθούν τις γενικότερες γλωσσικές εξελίξεις κάθε χρονικής περιόδου (π.χ. την απώλεια των απαρεμφάτων και ως αποτέλεσμα της απαρεμφατικής άρνησης) και αφετέρου στην ίδια την APN1, η οποία υφίσταται ανανέωση, σύμφωνη σε γενικές γραμμές με τις προβλέψεις του Κύκλου της Άρνησης. Περισσότερη έρευνα είναι απαραίτητη όσον αφορά τη ιστορική εξέλιξη όχι μόνο της Ελληνικής, αλλά γενικά των φυσικών γλωσσών, γιατί πολλές από τις κανονικότητες που ψάχνουμε ενδέχεται να βρίσκονται στη διαχρονία.

ABSTRACT

This paper presents the results of the fieldwork conducted in two of the Greek-speaking villages of Donbass area in SE. Ukraine, in particular Maloyianisol and Yalta. The research aims are investigating the process of the language loss or maintenance of the Greek dialects spoken by these communities. The above-mentioned are the local varieties of the Crimean-Azov dialect (the so-called “Mariupolite” or “Tavrorumeic”), still spoken by the Greek-speaking population of Azov. In the first part of the research the language use and the attitudes towards the dialect are investigated, while the second part is devoted to the language loss that occurs in the language system of the dialect, specifically in the field of the archaic vocabulary.

1. Εισαγωγή

Στην παρούσα εισήγηση θα παρουσιαστούν εν συντομία τα αποτελέσματα κοινωνιογλωσσικής επιτόπιας έρευνας που διεξήγε η γράφουσα σε δύο ελληνόφωνες κοινότητες της περιφέρειας της Μαριούπολης, τη Γιάλτα και το Μάλι Γιανισόλ (στο εξής ΜΓ) στις οποίες μιλιούνται ιδιώματα της Κριμαιοαζοφικής ελληνικής διαλέκτου (στο εξής ΚΑ).

Κύριο θέμα της έρευνας που διεξήχθη είναι η διερεύνηση της γλωσσικής αλλαγής [language change] και συγκεκριμένα της γλωσσικής μετακίνησης [language shift], δηλαδή η αντικατάσταση της διαλέκτου στο ρόλο της μητρικής / πρώτης γλώσσας από τη ρωσική, περνώντας από το ενδιάμεσο στάδιο της διγλωσσίας. Σχετικά με τις συνθήκες που οδήγησαν στη γλωσσική συρρίκνωση της οποίας το τελικό στάδιο, εάν δεν αναστραφεί, είναι ο γλωσσικός θάνατος [language death], επισημαίνεται ότι η Κριμαιοαζοφική ακολουθεί τη μοίρα των προφορικών διαλέκτων, των μειονοτικών και γενικά των λεγόμενων ασθενών γλωσσών, φαινόμενο που αποτελεί συνέπεια πολιτικών, κοινωνικών και οικονομικών συνθηκών, που θα μπορούσαμε να τις αναζητήσουμε σε ανά τον κόσμο εφαρμοσμένες πολιτικές αλλά και στο περιεχόμενο του αρκετά γενικευμένου όρου ‘παγκοσμιοποίηση’, με ότι αυτός συνεπάγεται (Crystal 2000) και πρόκειται για ένα φαινόμενο καθολικό και παγκόσμιο. Επομένως, προκειμένου να προσεγγιστούν τα αίτια και οι συνθήκες που συντελούν στη διατήρηση ή στη συρρίκνωση μιας μειονοτικής γλώσσας, είναι απαραίτητο να γίνεται αναφορά στις εξωγλωσσικές αλλαγές σε μακροεπίπεδο, δηλαδή στο ευρύτερο ιστορικό, πολιτικό, κοινωνικό πλαίσιο στο οποίο εντάσσεται η γλωσσική κοινότητα (Edwards 1992: 37-54) αλλά να εξετάζεται και το μικροεπίπεδο, στην κάθε τοπική κοινότητα και τα μέλη της.

Η ελληνική εθνική κοινότητα της περιοχής της Αζοφικής περιλαμβάνει δύο γλωσσικές κοινότητες: τους ρουμέους, των οποίων η γλώσσα, διάλεκτος της νεοελληνικής, στο εξής Κριμαιοαζοφική διάλεκτος (ΚΑ), διαιρείται σε πέντε υποδιαλέκτους και η κάθε υποδιάλεκτος με τη σειρά της υποδιαιρείται σε τοπικά ιδιώματα και τους ουρούμ που μιλάνε τέσσερις υποδιαλέκτους της τουρκικής γλώσσας της Αλταϊκής ομάδας, την οποία οι Henrich και Ζουραβλιόβα (2003:126) ονομάζουν Κριμαιοσθωμανική ενώ ο Τζιτζιλής Κριμαιοταταρική. Και οι δύο γλωσσικές κοινότητες αυτοπροσδιορίζονται εθνικά ως Έλληνες, αλλά η μία ομάδα διαχωρίζει τον εαυτό της από την άλλη. Κοινά τους χαρακτηριστικά είναι η θρησκεία (χριστιανοί ορθόδοξοι) και η κοινή ελληνική εθνική συνείδηση κι αυτοπροσδιορισμός. Στην προκειμένη περίπτωση, η γλώσσα δεν αποτελεί ενδείκτη διαφορετικής εθνικής οντότητας. Δεν έχει απαντηθεί το ερώτημα γιατί μιλάνε διαφορετικές γλώσσες, αν αυτό οφείλεται στη συνύπαρξή τους με τους Τατάρους στην Κριμαία και την εκεί γλωσσική αφομοίωση μέρους του ελληνικού πληθυσμού ή αν προηγείται της εγκατάστασης στην Κριμαία και οφείλεται σε διαφορετικούς τόπους και χρόνους προέλευσης.

Ο Tzuxa (1993) δίνει με τις παλιές και τις καινούριες ονομασίες έναν κατάλογο με τα 20 πρώτα χωριά, ελληνόφωνα και ταταρόφωνα, που ιδρύθηκαν το 1778. Σήμερα, απόδειξη αυτού του γεγονότος

είναι η επιγραφή στην είσοδο αυτών των χωριών, όπου αναγράφεται η ημερομηνία ίδρυσης, η οποία αναγράφεται και στο κέντρο της πόλης της Μαριούπολης. Σύμφωνα με στοιχεία της Ομοσπονδίας Ελληνικών Συλλόγων Ουκρανίας, σήμερα οι Έλληνες της περιοχής ζουν σε 55 συνολικά χωριά, σε 7 περιφέρειες του νομού Ντονιέτσκ και σε ένα χωριό του νομού Ζαπαρόζκαγια. Από αυτά, στα 22 διαμένουν ταταρόφωνοι Έλληνες και στα 30 ελληνόφωνοι. 18 από αυτά τα χωριά αυτο- και ετεροπροσδιορίζονται ακόμα ως ‘ελληνικά’ από τους κατοίκους της περιοχής επειδή υπερτερεί αριθμητικά ο ελληνικός πληθυσμός.

Η γλωσσική ποικιλία των ελληνόφωνων Ελλήνων της Αζοφικής από τους ομιλητές της αποκαλείται *ρουμέικα* [*ru'meika/ru'm'eika*] ή *ru'meiku* 'γλoσα και οι ομιλητές της αυτοαποκαλούνται *ρουμέοι* [*ru'mei / ru'm'ei*] ενώ η γλωσσική ποικιλία των τουρκόφωνων Ελλήνων αποκαλείται από τους ομιλητές της *ουρούμσκι* [*u'rumski*] και οι ίδιοι αυτοαποκαλούνται *ουρούμοι* [*u'rumi*]. Το περιοδικό Πανδώρα (1863:533) αναφέρει πως ‘από την Κριμαία ακόμα οι Έλληνες είχαν την εθνική επωνυμία Γραικοί (*grjeki*)’. Οι άλλες εθνότητες στην περιοχή αποκαλούν τους Έλληνες, ελληνόφωνους και ταταρόφωνους ‘*grjek*, ‘*grjeki*’ όρος που χρησιμοποιείται ως υπερώνυμο των δύο γλωσσικών κοινοτήτων, αλλά υπάρχει και η διάκριση σε ‘*grjekota 'tari*’ και ‘*grjekoru 'mei*’ ή *grjeko 'elini*, όροι που συναντιούνται και στη σύγχρονη ρωσόφωνη βιβλιογραφία. Το κύριο εθνώνυμο με το οποίο αυτοπροσδιορίζονται σε αντιδιαστολή με τους ‘άλλους’ Έλληνες είναι το εθνώνυμο *Azov'grjek / A'zovskije Grjeki* = Έλληνες της Αζοφικής.

Η γλώσσα των ρουμέων, στη ρωσική και ουκρανική βιβλιογραφία συναντιέται ως η γλώσσα των *tati* (Beljetski, 1969), η γλώσσα των Ελλήνων της Μαριούπολης, ελληνικά ιδιώματα της Μαριούπολης (Sokolov), ελληνικές διάλεκτοι της Αζοφικής, ελληνική γλώσσα της Αζοφικής, γλώσσα των Ελλήνων της Μαιώτιδας (Beljetski), Μαριουπολίτικη διάλεκτος της νεοελληνικής γλώσσας (Tshernishova), ελληνικά ιδιώματα της Αζοφικής (Tshernishova 1958), Κριμαιορουμεική διάλεκτος (Klimenko 1999). Στην ελληνόγλωσση βιβλιογραφία η Ζουραβλιόβα την αποκαλεί Ταυρορουμεική και Ταυρορουμεικά ιδιώματα (1999: 56), οι Συμεωνίδης –Τομπαϊδής ελληνική διάλεκτο της Μαριούπολης, ο Χριστίδης Μαριουπολίτικα, η Χατζηδάκη ελληνικές διαλέκτους της περιοχής της Μαριούπολης (1999:65). Στην παρούσα εργασία υιοθετώ την ονομασία Κριμαιοαζοφική διάλεκτος (Τζιτζιλής & Ζουραβλιόβα υπό εκδ.), και ιδιώματα της ΚΑ διαλέκτου.

Η ΚΑ διάλεκτος διατηρεί πολλά αρχαϊκά χαρακτηριστικά σε σχέση με την Κοινή Νεοελληνική, όπως όλες οι περιφερειακές διάλεκτοι των οποίων η γλωσσική κοινότητα είναι απομονωμένη από τον υπόλοιπο ελληνόφωνο κόσμο. Επίσης, όπως όλες οι διάλεκτοι που είναι απομακρυσμένες γεωγραφικά από το κέντρο, η ΚΑ έχει επηρεαστεί αρκετά από ξένα γλωσσικά στοιχεία που ανήκουν σε γειτονικές γλώσσες, γεγονός που οφείλεται σε ιστορικούς λόγους (Ανδριώτης 1974:10) και συγκεκριμένα στους πολιτισμούς και συνακόλουθα τις γλώσσες με τις οποίες ήρθε σε επαφή [language contact]. Η ΚΑ διάλεκτος, αντικατοπτρίζοντας την ιστορία των ομιλητών της, έχει συνυπάρξει στη μακραίωνη ιστορία της με σειρά γλωσσών, συγκεκριμένα στην Κριμαϊκή της περίοδο κυρίως με ταταρικές και τουρκικές διαλέκτους, ενώ ισχυρή ήταν η επίδραση από την ποντιακή ελληνική διάλεκτο, η οποία όμως δεν άλλαξε τη βάση της. Στην Αζοφική της περίοδο ήρθε σε επαφή με τις σλαβικές γλώσσες (τη ρωσική και πρόσφατα την ουκρανική).

2. Έρευνα

Στην παρούσα έρευνα η μέθοδος που επιλέχθηκε ήταν στο μεγαλύτερο μέρος ποσοτική: σύνταξη ερωτηματολογίου και συνέντευξη με βάση το ερωτηματολόγιο. Η γράφουσα από το Σεπτέμβριο του 2002 έως τον Ιούνιο του 2007 διέμενε στην πόλη της Μαριούπολης εργαζόμενη ως αποσπασμένη φιλόλογος στο Κρατικό Πανεπιστήμιο Ανθρωπιστικών Σπουδών της Μαριούπολης (ΚΠΑΣΜ), οπότε είχε την ευκαιρία να διεξαγάγει παράλληλα και ποιοτική έρευνα με τη μορφή της συμμετοχικής παρατήρησης σε πολιτισμικά συμβάντα [events] των κοινοτήτων της Γιάλτας και του Μάλι Γιανισόλ αλλά και γενικά της ελληνικής κοινότητας της περιοχής. Είχε συνεπώς τη δυνατότητα να παρατηρεί σε τακτά χρονικά διαστήματα τη γλωσσική και ευρύτερη κοινωνική συμπεριφορά των δύο κοινοτήτων τις οποίες μελέτησε αλλά και δυνατότητα εμπλοκής στα δίκτυα επαφών.

Το ερωτηματολόγιο απαρτίζεται από δύο μέρη. Το πρώτο μέρος αποτελείται από τρεις ενότητες. Σκοπός της πρώτης ενότητας είναι η καταγραφή των ανεξάρτητων κοινωνικών μεταβλητών (ηλικία, φύλο, μόρφωση, επάγγελμα) και η σκιαγράφηση του γλωσσικού πορτραίτου των υποκειμένων - γλώσσες που γνωρίζουν και φυσικό ή τεχνητό περιβάλλον εκμάθησης. Η δεύτερη ενότητα στοχεύει στην περιγραφή των γλωσσικών χρήσεων ως προς τους συνομιλητές, αντιπροσωπευτικές σφαίρες λειτουργικότητας και συγκεκριμένες γλωσσικές δραστηριότητες. Στην τρίτη ενότητα οι ερωτήσεις είναι αξιολογικές και ζητείται η γνώμη των υποκειμένων για τη διάλεκτο, για τη διατήρηση και κωδικοποίησή της, για τη διεύρυνση των λειτουργιών της και τη μετάδοσή της στις επόμενες γενιές, με

στόχο τη διερεύνηση των στάσεων των υποκειμένων απέναντι στη διάλεκτο και απέναντι στην κυρίαρχη Κοινή Νεοελληνική, αλλά και τη μερική διερεύνηση των στάσεων των συνοικούντων εθνοτήτων απέναντι στην ΚΑ διάλεκτο και τους ομιλητές της, έτσι όπως οι τελευταίοι τις αντιλαμβάνονται.

Στο δεύτερο μέρος του ερωτηματολογίου διερευνάται η ύπαρξη ή όχι συρρίκνωσης στο γλωσσικό σύστημα, συγκεκριμένα στο λεξιλογικό επίπεδο και ακόμα πιο συγκεκριμένα, στο αρχαϊκό λεξιλόγιο της διαλέκτου. Έχουν επιλεγεί 117 αρχαϊκά λεξιλογικά τεμάχια ταξινομημένα κατά γραμματικό γένος, ενώ τα ουσιαστικά, που είναι και τα περισσότερα, ομαδοποιούνται κατά σημασιολογικά πεδία (νοικοκυριό-καθημερινή ζωή, φύση-φυτά, διατροφή, άνθρωπος, αφηρημένες έννοιες, ζώα, υγεία). Οι λεκτικοί αρχαϊσμοί επιλέχθηκαν από το λεξικό της Ζουραβλιόβα (Νεοελληνική Διαλεκτολογία, τόμος 4, 2003), από την ενότητα 'Κριμαιοαζοφική' των Τζίτζιλή-Ζουραβλιόβα στο υπό έκδοση 'Νεοελληνικές διαλέκτοι' και από το ρουμείο-ρωσο-νεοελληνικό λεξικό του Κυριάκοφ (1999).

Η επιλογή των αρχαϊσμών οφείλεται στο γεγονός ότι παρουσιάζουν ιδιαίτερο ερευνητικό ενδιαφέρον εφόσον αποτελούν ιδιαίτερο γνώρισμα των περιφερειακών διαλέκτων. Τα υποκείμενα της έρευνας ερωτώνται αν γνωρίζουν την κάθε μία λέξη. Σε περίπτωση που τη γνωρίζουν, οι λεκτικοί αρχαϊσμοί λειτουργούν ως εφόρμηση παραγωγής προφορικού λόγου η οποία με τη σειρά της λειτουργεί ως δείγμα της ικανότητας γλωσσικής και αφηγηματικής επιτέλεσης των υποκειμένων και της γλωσσικής τους επάρκειας.

Αναφορικά με τις μεταβλητές της έρευνας, όσον αφορά στις ανεξάρτητες (εξωγλωσσικές) μεταβλητές, η ηλικία είναι η αποκλειστική που αποτέλεσε κριτήριο επιλογής των υποκειμένων, δεδομένου ότι ήδη από την εποχή της ΣΕ τα δύο φύλα συμμετέχουν εξίσου στην παραγωγική διαδικασία, οι γυναίκες εργάζονται και λαμβάνουν την ίδια εκπαίδευση, οπότε δεν παρατηρείται αξιοσημείωτη διαφοροποίηση ανάμεσα στα δύο φύλα, ούτε ο γλωσσικός συντηρητισμός του γυναικείου φύλου ως προς τη χρήση της μητρικής γλώσσας που παρατηρείται συνήθως στις παραδοσιακές κοινωνίες στις οποίες η γυναίκα περιορίζεται στη σφαίρα της οικογενειακής ζωής. Η ηλικία είναι ένας πολύ σημαντικός παράγοντας ειδικά σε περιπτώσεις γλωσσικού θανάτου δεδομένου ότι η διαφορετική -και το κυριότερο- φθίνουσα γνώση και χρήση της διαλέκτου καθώς από τις μεγαλύτερες περνάμε στις μικρότερες ηλικίες, είναι ουσιαστικά μια 'διαχρονική ματιά' στη γλωσσική αλλαγή που έχει επιτελεστεί στη σημερινή κοινότητα στη χρονική διάρκεια τριών γενεών. Συγκεκριμένα, η μεταβλητή αυτή πήρε τρεις τιμές: τα υποκείμενα διακρίνονται σε τρεις ηλικιακές ομάδες: την ομάδα Α (γεννημένοι 1920-1934), την ομάδα Β (γεννημένοι 1950-1958) και την ομάδα Γ (γεννημένοι 1976-1986). Συνολικά συμμετέχουν στην έρευνα 24 υποκείμενα, 8 από κάθε ηλικιακή ομάδα, στην κάθε ομάδα 4 από το ΜΓ και 4 από τη Γιάλα, συνολικά 15 γυναίκες και 9 άντρες. Λαμβάνοντας υπόψη την ηλικία και τη γλωσσική κοινότητα της οποίας αποτελούν μέλη, οι ομάδες υποκειμένων που μελετάμε διαμορφώνονται ως εξής: ΜΓΑ, ΜΓΒ, ΜΓΓ, ΓΑ, ΓΒ, ΓΓ και με αυτές τις συντομογραφίες αναφέρονται στο εξής.

Ός προς τις στάσεις των υποκειμένων συμπεραίνουμε ότι αν και υπάρχει θετική αντιμετώπιση της γλώσσας ως εθνικού συμβόλου, η αξία της μειώνεται από το κόστος των προσωπικών αναγκών και κινήτρων που έχουν σχέση με την εκπαιδευτική και επαγγελματική επιτυχία, γενικά την κοινωνική κινητικότητα. Γι αυτό το λόγο, παρατηρείται διάσταση ανάμεσα στη συναισθηματική στάση και τις προσωπικές επιλογές. Εκδηλώνεται μεν ενδιαφέρον για την επιβίωση της μειονοτικής γλώσσας ως σύμβολο της εθνικής κουλτούρας και κληρονομιάς, δεν παρατηρείται όμως αντίστοιχο ενδιαφέρον για προσωπική ενασχόληση, στάση που έχει παρατηρηθεί σε αντίστοιχες περιπτώσεις και σε άλλες μειονοτικές γλωσσικές κοινότητες στην Αμερική (Crystal D.2000).

Παράλληλα, η Κοινή ΝΕ ασκεί ηγεμονικό ρόλο και προκαλεί μετακίνηση από τη διάλεκτο προς αυτήν ακόμα και ως προς το συμβολικό κύρος. Η διάλεκτος αντιμετωπίζεται ως στιγματισμένη ποικιλία με φτωχό γλωσσικό σύστημα που συνεπάγεται περιορισμένη λειτουργικότητα, σε αντίστιξη με την Κοινή ΝΕ που αντιμετωπίζεται ως η υψηλή ποικιλία που αντλεί το κύρος της από την παράδοση, τον πλούτο των εκφραστικών μέσων, το ευρύ φάσμα λειτουργιών, τη χρηστικότητα η οποία αποβαίνει συμφέρουσα για τους ομιλητές/τριες αλλά και από το γεγονός ότι αποτελεί επίσημη γλώσσα κράτους το οποίο αν και επί ΣΕ θεωρούνταν χαμηλότερου κύρους, στην παρούσα φάση, μετά την αυτονομία της Ουκρανίας θεωρείται υψηλού κύρους. Με λίγα λόγια, η διάλεκτος παρουσιάζεται ως συνεκτικός κρίκος με το παρελθόν και τις ρίζες και συνδέεται με τη συναισθηματική στάση των υποκειμένων, ενώ η ΚΝΕ γίνεται αντιληπτή ως γέφυρα με το μέλλον και τον ευρύτερο ελληνισμό.

Αναφορικά με τη στάση των άλλων σύνοικων εθνοτήτων απέναντι στην ελληνική διάλεκτο, στη διάρκεια της ΣΕ αντιμετωπίστηκε ως αρνητικό διακριτικό στοιχείο ταυτότητας που μάλιστα ταύτιζε τους ομιλητές/-τριες της με άλλες στιγματισμένες εθνοτικές και γλωσσικές μειονότητες. Αυτός ο στιγματισμός της διαλέκτου προκάλεσε την αρνητική στάση των ίδιων των μελών της κοινότητας, η διάλεκτος θεωρήθηκε κατώτερη σε σχέση με την οροφική (ρωσική) λόγω του χαμηλού κοινωνικού της κύρους και λόγω των στερεοτύπων για τις γλώσσες των μειονοτικών ομάδων χωρίς γραπτή παράδοση και εμπόδιο

για την επαγγελματική και κοινωνική εξέλιξη των παιδιών, με συνέπεια το σταδιακό αλλά συνειδητό εξοβελισμό της και από τη σφαίρα της οικογενειακής ζωής και την αντικατάστασή της από την κυρίαρχη οροφική.

Αναφορικά με τις γλωσσικές χρήσεις, όπως ήταν αναμενόμενο, βρίσκονται σε συνάρτηση με τις στάσεις απέναντι στη γλώσσα. Ο κυριότερος παράγοντας που επηρεάζει την επιλογή κώδικα είναι ο συνομιλητής και συγκεκριμένα το αν υπάρχει κοινή γνώση του κώδικα ώστε να εξασφαλίζεται η επικοινωνία, ενώ ο χώρος και η κατάσταση δε φαίνεται να διαδραματίζουν τόσο σημαντικό ρόλο. Τα υποκείμενα της ομάδας Α έχουν αναπτυγμένη γλωσσική ικανότητα, καθώς στο πρώτο διάστημα της ζωής τους η διάλεκτος, εκτός από μητρική γλώσσα ήταν και η γλώσσα της καθημερινής και οικογενειακής σφαίρας αλλά, λόγω της ραγδαίας μείωσης των συνομιλητών/-τριών περιορίζεται και η χρήση της διαλέκτου. Ωστόσο, επειδή η διάλεκτος είναι η πρώτη τους γλώσσα (μητρική) γι αυτό και διατηρούνται οι πιο εσωτερικές και υποσυνείδητες λειτουργίες και παρόλο που στη διάρκεια της ζωής τους υπέστησαν ή επέλεξαν λόγω εξωγλωσσικών συνθηκών τη γλωσσική μετακίνηση προς την κυρίαρχη ρωσική, επιστρέφουν στην πρώτη γλώσσα προς το τέλος της ζωής τους όταν χάνουν την επαφή με το εξωτερικό περιβάλλον, κλείνοντας έτσι τον κύκλο της γλωσσικής τους έκφρασης (χαρακτηριστικό παράδειγμα ο υπερήλικας από τη Γιάλτα που μιλάει τα τελευταία χρόνια μόνο στη ρουμείκη διάλεκτο κι όταν η Ρωσίδα νύφη του τού απευθύνεται στα ρωσικά, απαντά *‘zmons du = την ξέχασα*).

Τα υποκείμενα της ομάδας Β είναι οι κατεξοχήν δίγλωσσοι/-ες, με τη ρωσική να είναι πολύ κοντά χρονικά στην πρώτη γλώσσα ή και παράλληλη πρώτη γλώσσα μαζί με τη διάλεκτο (ταυτόχρονη και πρωτογενής διγλωσσία). Οι γονείς τους αλλά και οι ίδιοι ως γονείς, κάτω από αρνητικές εξωγλωσσικές συνθήκες για τις οποίες έγινε λόγος παραπάνω, θεώρησαν την ΚΑ διάλεκτο στο ρόλο της πρώτης γλώσσας εμπόδιο στην εξέλιξη των παιδιών τους και συνειδητά διέκοψαν ή περιόρισαν τη χρήση της και στον οικογενειακό τομέα.

Τα υποκείμενα της ομάδας Γ χρησιμοποιούν τη διάλεκτο σε δραστηριότητες που δεν απαιτούν καλή γνώση του κώδικα, όπως το βρίσιμο (αν και όχι συχνά γιατί δεν αποτελεί συχνή συμπεριφορά), δραστηριότητα που όπως ερμηνεύτηκε από τα ίδια τα υποκείμενα είναι πολύ κοντά στην κρυπτολαλική λειτουργία της εναλλαγής κωδικών. Η διαφορά τους είναι ότι το να μιλάει κάποιος στη διάλεκτο ώστε να μην τον καταλάβουν οι άλλοι προϋποθέτει τη δεξιότητα παραγωγής λόγου και αφήγησης, ενώ η βρισιά απαιτεί σύντομες στερεοτυπικές φράσεις γι αυτό και επιβιώνει ως ένα βαθμό και στις νεότερες γενιές. Στα όρια της στερεοτυπικότητας και της μη ελεύθερης και δημιουργικής παραγωγής λόγου εμπίπτουν και οι άλλες δύο δραστηριότητες στις οποίες φαίνεται να μετέχουν, δηλαδή το τραγούδι (αποσπασματικά) και ο χαιρετισμός στους ηλικιωμένους. Τα αποτελέσματα της μικρής –όσον αφορά στον αριθμό των υποκειμένων-αυτής έρευνας επιβεβαιώνουν τα συμπεράσματα της έρευνας που διεξήγαγε η Χατζηδάκη το 1999 που έκανε λόγο για επιβίωση των συναισθηματικών λειτουργιών της διαλέκτου. Μπορούμε να μιλήσουμε για διγλωσσική ικανότητα αλλά όχι διγλωσσική χρήση, η οποία είναι λανθάνουσα και ενεργοποιείται με το κατάλληλο κίνητρο ή πλαίσιο.

Ανακεφαλαιώνοντας, οι γονείς των σημερινών ηλικιωμένων ήταν παθητικοί δίγλωσσοι της ρωσικής ή παρήγαγαν λόγο μετά δυσκολίας, ενώ την ίδια σχέση έχουν συγχρονικά οι νεότεροι με τη διάλεκτο. Επομένως, στο χρονικό διάστημα ενός αιών, μέσα σε τρεις γενιές, συνέβη η γλωσσική μετακίνηση στο ρόλο της πρώτης (μητρικής) γλώσσας.

Περνώντας στα αποτελέσματα του δεύτερου μέρους της έρευνας αναφορικά με την αναγνώριση των αρχαϊκών λεκτικών τεμαχίων και τα χαρακτηριστικά του παραγόμενου λόγου, οδηγούμαστε στο συμπέρασμα ότι το ιδίωμα της Γιάλτας προηγείται χρονικά στη διαδικασία της συρρίκνωσης. Συγκεκριμένα, από όλα τα υποκείμενα και των τριών ηλικιακών ομάδων αναγνωρίζονται στη μεν Γιάλτα 10 αρχαϊσμοί (8,54%), ενώ στο ΜΓ 30 (26%). Επιπλέον, 30 τεμάχια από τα 117 (περίπου το 26,5 %) μαρτυρούνται σήμερα μόνο στο ιδίωμα του ΜΓ και όχι στις Γιάλτας, ενώ κάποιες λέξεις δε συναντώνται στην ομάδα Γ της Γιάλτας, ενώ συναντώνται στην ομάδα Γ του ΜΓ. Το ποσοστό αναγνώρισης των λέξεων από το μεγαλύτερο προς το μικρότερο, κατά ομάδα υποκειμένων, έχει ως εξής: ΜΓΑ (94,01%), ΜΓΒ (87,14%), ΓΑ (78%), ΜΓΓ (64,10%), ΓΒ (57,26%), ΓΓ (49,57%). Αντίστροφα, ξεκινώντας από την ομάδα όπου οι μη αναγνωρίσιμες λέξεις είναι οι λιγότερες, η σειρά έχει ως εξής: ΜΓΑ (8/117), ΜΓΒ (16/117), ΓΑ (41/117), ΜΓΓ (41/117), ΓΒ (48/117) / ΓΓ (56/117).

Σε σημασιολογικό επίπεδο, την πολυσημία μίας λέξης, την παραδειγματική σχέση συνωνύμων, τις νοηματικές αποχρώσεις μίας σημασίας που αποδίδονται με διαφορετικά σημαίνοντα, τις υποστηρίζει ένα λειτουργικό γλωσσικό σύστημα. Σε ένα σύστημα σε διαδικασία συρρίκνωσης ή χάνεται η πολυσημία μίας λέξης, ή υποχωρούν τα συνώνυμα και οι νοηματικές αποχρώσεις και επικρατεί ένα υπερώνυμο. Στο ιδίωμα του ΜΓ παρατηρούνται περισσότερο σημασιολογικές ομάδες λέξεων με λεπτές νοηματικές διαφοροποιήσεις. Τις διαφοροποιήσεις αυτές τις αναφέρουν τα υποκείμενα της Α και Β ομάδας, επομένως εκλείπουν ήδη από την ομάδα Γ (π.χ. *γυ'ργα = νωρίς γενικά, a'fiama = νωρίς το απόγευμα, a'riδ = αχλάδι, 'grabdu = μικρό αχλάδι, το οποίο κάνουν κομπόστα ή τουρσί*). Σε λέξεις με

πολυσημία στην ομάδα Γ παρουσιάζεται η τάση στένωσης της σημασίας. Επίσης, κάποιες από τις αρχαϊκές λέξεις βρίσκονται σε διαδικασία αντικατάστασής τους από άλλες των οποίων διευρύνεται η χρήση και σημασία. Μαζί με το σημαίνον χάνεται και μία λεπτή νοηματική διάκριση και παραμένει η λέξη με την πιο γενική σημασία. Στη Γιάλτα έχει συντελεστεί γρηγορότερα η διαδικασία αντικατάστασης.

Επιπλέον, ένα από τα συμπεράσματα της έρευνας είναι ότι σε λέξεις με κυριολεκτική και μεταφορική χρήση, ανθεκτικότερη ως προς την επιβίωση είναι η μεταφορική. Συχνά η ομάδα Α αναφέρει και την κυριολεκτική και τη μεταφορική σημασία, η ομάδα Β παρουσιάζει μια μικρή μετατόπιση προς τη μεταφορική, ενώ στην ομάδα Γ επιβιώνει περισσότερο η μεταφορική, κάποτε και αποκλειστικά (*tsepra* = ασθένεια του δέρματος / άνθρωπος που κολλάει πάνω σου, *a'rkdi'a* = αρκούδα / μεγαλόσωμος, δυνατός άνθρωπος, *'bazu* = τοποθετώ κάτι ψηλά / βάζω κάποιον κάπου με μέσο). Αυτή η τάση επιβεβαιώνεται από λέξεις που έχουν επιβιώσει αποκλειστικά με τη μεταφορική σημασία, όπως η λέξη *fii'xos* = φτωχός που επιβιώνει μόνο με τη μεταφορική σημασία 'αδύνατος', ενώ η κυριολεκτική σημασία έχει αντικατασταθεί από τη λέξη *γα'rips* (τουρκογενής με ελληνική κατάληξη).

Παρατηρείται η τάση να επιβιώνουν στην ομάδα Γ οι στερεότυπες φράσεις, κυρίως παγιωμένες προτάσεις σε προστακτική, οι οποίες στους παθητικά διγλωσσους αποτελούν ανάκληση μέσω της μνήμης, φράσεων που έλεγαν οι γονείς / παπούδες. (*'fae /'epar / 'dos / 'ynefa!* = φάε, πάρε, δώσε, ζύψα). Επίσης κάποιες λέξεις διατηρούνται μόνο ως 'επώνυμα της πιάτσας', κοινώς παρατσούκλια.

Αναφορικά με τα σημασιολογικά πεδία, τα πεδία ζώα, διατροφή και άνθρωπος έχουν την πιο υψηλή αναγνωρισιμότητα με τη σειρά που αναφέρθηκαν. Τα πεδία που παρουσιάζουν την πιο έντονη τάση για φθίνουσα πορεία είναι η υγεία κι ακολουθεί η φύση. Το πεδίο που παρουσιάζει τη μεγαλύτερη υποχώρηση είναι οι αφηρημένες έννοιες.

Η διατήρηση της στερεοτυπικότητας ενισχύεται και από παρατηρήσεις στο μορφολογικό επίπεδο, όπου παρατηρείται σημαντική υποχώρηση των αφηρημένων ουσιαστικών και των επιθέτων, και υψηλή διατηρησιμότητα της προστακτικής έγκλισης των ρημάτων. Σχετικά με τα άλλα γραμματικά γένη, παρατηρούμε ότι οι αντωνυμίες και τα επιρρήματα παρουσιάζουν την υψηλότερη βιωσιμότητα και τα επίθετα τη μικρότερη. Η παρουσία των ρημάτων είναι σταθερή και γενικά παρουσιάζουν σχετικά χαμηλό βαθμό συρρίκνωσης.

Σε πραγματολογικό επίπεδο, προέκυψε το ερώτημα αν οι αρχαϊσμοί και τα σημασιολογικά πεδία που υποχωρούν σχετίζονται με εκφάνσεις του πολιτισμού και της καθημερινής ζωής που υποχωρούν αντίστοιχα. Ανάμεσα στους όρους που έχουν πλήρως υποχωρήσει ή έχουν σαφή τάση υποχώρησης στην ομάδα Γ και των δύο κοινοτήτων κάποιοι σχετίζονται σαφώς με την υποχώρηση αντίστοιχων εργασιών αφού έχει αλλάξει ο τρόπος παραγωγής (*thiri'stir / shiri'st'er* = θεριστηρί, δρεπάνι *gli'fan* = δίκρανο, *klu'stir* = μεγάλο αδράχτο), με την αλλαγή μορφής της κατοικίας (*mu'rsi* = σκαμένη λακκούβα στη γη για τη φύλαξη και συντήρηση τροφίμων), με υλικά και είδη που δε χρησιμοποιούνται πια (*'tshenglu* = μάλλινο χαλάκι ή κέτες), με είδη διατροφής που δε συνηθίζονται πια από τους νέους (*ma'lai* = φαγητό από καλαμπόκι), με την αλλαγή κοινωνικών συνηθειών (*puku'shars* = προξενητής, *pu'rka* = δίσκος με γλυκά και φρούτα, *pesk'esi* στην περίσταση του γάμου), με τη σταδιακή εξάλειψη επαγγελματιών (*shi'r'das* = γουρουνάς), με την υποχώρηση κάποιων προκαταλήψεων (*klu'ksija*: *'ada* 'loyun *pu'surka* 'loy'a, 'erkit = λόξιγκας: έρχεται όταν λένε για σένα άσχημα λόγια).

Η υποχώρηση άλλων όρων δε σχετίζεται με υποχώρηση αντίστοιχων πραγματικών συνθηκών και πολιτισμικών χαρακτηριστικών, αλλά με το γεγονός ότι έχει υποχωρήσει η αναφορική λειτουργία της διαλέκτου η οποία δεν επιλέγεται ως κώδικας περιγραφής του κόσμου. Έτσι, η εξαφάνιση του όρου *'solka* = συνομιλικός στην ομάδα Γ είναι αναμενόμενη, η υποχώρηση του όρου *'orku* = πληγή (στη Γιάλτα *'oruk* με άπαξ μαρτυρία) σχετίζεται με τη γενικότερη υποχώρηση του σημασιολογικού πεδίου υγεία, η οποία είναι πιο έντονη στη Γιάλτα, όπως και των όρων *mu'losh* = μολόχα, *tra'shi* = τραχύ αντανάκλα τη συρρίκνωση του πεδίου των φυτών και των επιθέτων αντίστοιχα.

Από την άλλη, δεν είναι τυχαίο που οι λέξεις *shu'rid* = γουρούνι και *'xno* = αγελάδα αναγνωρίζονται από όλα τα υποκείμενα της έρευνας, εφόσον στα περισσότερα σπίτια και στις δύο κοινότητες εκτρέφονται ακόμα αυτά τα ζώα, μέχρι σήμερα. Άλλες λέξεις διατηρούν υψηλή βιωσιμότητα για διαφορετικούς λόγους, όπως η λέξη *'uksus* = ξίδι που δεν αναγνωρίζεται ως ελληνική αλλά ως ρωσική γιατί αποτελεί δάνειο ενσωματωμένο στη ρωσική από το 13^ο αι., λέξεις τις οποίες κατανοούν οι νέοι επειδή τις επαναλαμβάνουν συχνά οι ηλικιωμένοι συγγενείς τους (*'rasha* = ράχη, *zmu'nu/ zilmu'nu* = λημονώ, *'orima/ 'on'ur* = όνειρο), ή λέξεις που διατηρήθηκαν μέσα σε φραστικά σύνολα ή σε στίχους τραγουδιών.

3. Επίλογος

Ανακεφαλαιώνοντας, τα ιδιώματα της Κριμααιοζοφικής διαλέκτου χρησιμοποιούνται ακόμα στα ελληνικά χωριά, περισσότερο στα απομονωμένα και με μεγαλύτερο ποσοστό ελληνικού πληθυσμού, πρόκειται όμως για επαπειλούμενη [endangered] γλωσσική ποικιλία. Αυτό επιβεβαιώνεται από τις κοινότητες που εξετάσαμε, καθώς στη Γιάλτα που είναι περιοχή με συχνότερη συγκοινωνία, με τουριστική κίνηση τους καλοκαιρινούς μήνες και με χαμηλότερο ποσοστό ελληνικού πληθυσμού σε σχέση με το Μάλι Γιανισόλ, η γλωσσική συρρίκνωση βρίσκεται σε πιο προχωρημένο στάδιο. Τα ιδιώματα χρησιμοποιούνται από τους ηλικιωμένους και μεσήλικες αλλά δε μεταβιβάζονται στις νεότερες γενιές κυρίως επειδή δε βοηθούν στην κοινωνική κινητικότητα. Μετά τη σύσταση του ουκρανικού κράτους, τη συσπείρωση των ελληνικών κοινοτήτων της Ουκρανίας, την έξοδό τους από τη μέχρι τότε απομόνωση και την επαφή τους με την Ελλάδα και την ελληνική διασπορά, η Κοινή ΝΕ διαδραματίζει σταδιακά έναν ιδιότυπο ρόλο *lingua franca* για την ελληνική εθνοτική κοινότητα και εκτοπίζει τη διάλεκτο.

Σύμφωνα με τις παρατηρήσεις των κοινωνιογλωσσολόγων, κάτω από κατάλληλες αφομοιωτικές συνθήκες, συνήθως στην τρίτη γενιά μεταναστών παρατηρείται ήδη γλωσσική μετακίνηση. Στην περίπτωση των Ελλήνων της Αζοφικής διατηρήθηκε η δική τους γλώσσα, τα *ρουμέικα*, επί σειρά αιώνων ως μειονοτική γλώσσα, παρότι ήταν ανάμεσα σε κυρίαρχες γλώσσες αποκομμένη από τα κέντρα ελληνισμού, προφανώς επειδή οι αφομοιωτικές συνθήκες δεν ήταν ικανές κι επαρκείς. Τέτοιες συνθήκες - ιστορικές, κοινωνικές, πολιτικές- τόσο σε μακροεπίπεδο (παγκόσμιο και εθνικό) όσο και σε μικροεπίπεδο (τοπικό) δημιουργήθηκαν στα τέλη της δεκαετίας του '30 οπότε άρχισε να λαμβάνει χώρα η γλωσσική μετακίνηση προς την οροφική ρωσική, η οποία απ' ότι φαίνεται, σε ορισμένα περιβάλλοντα ολοκληρώθηκε επίσης μέσα σε τρεις γενιές.

Επιπλέον, φαίνεται να έχουν αποσυνδεθεί οι έννοιες *εθνοτική ταυτότητα* και *γλώσσα*. Η γλώσσα δεν αποτελεί αναπόσπαστο στοιχείο της εθνοτικής ταυτότητας αφού όσοι αυτοπροσδιορίζονται ως Έλληνες κι έχουν ελληνική εθνική συνείδηση δε μιλάνε όλοι τη διάλεκτο ή την Κοινή, ενώ αντίστροφα η Κοινή Νεοελληνική χρησιμοποιείται από άτομα διαφόρων εθνοτήτων, λόγω της διδασκαλίας της στο Κρατικό Πανεπιστήμιο Ανθρωπιστικών Σπουδών.

Τοποθετώντας το ζήτημα σε διεθνές επίπεδο, θεωρούμε καλό να αναφέρουμε τον προβληματισμό του Truchot (2002:17-19) σχετικά με τη θέση και τις λειτουργίες των γλωσσών σήμερα που το μόρφωμα εθνικό-κράτος τείνει να ξεπεραστεί και να θεωρηθεί αρχαϊκό μπροστά στα νέα σχήματα που επιβάλλει σταδιακά η παγκοσμιοποίηση της αγοράς. Αναρωτιέται αν σήμερα η χρήση μιας γλώσσας εξαρτάται από το βαθμό της θεσμικής της αναγνώρισης ή εξαρτάται περισσότερο απ' ότι στο παρελθόν από το ρόλο της στη λειτουργία της παγκόσμιας αγοράς. Οι εθνικές και επίσημες γλώσσες συχνά επιβλήθηκαν από τις εύπορες τάξεις στα λαϊκά στρώματα που μιλούσαν άλλες γλώσσες ή γλωσσικές ποικιλίες. Σήμερα, τα λαϊκά στρώματα είναι εκείνα που έχουν οικειοποιηθεί τις εθνικές κι επίσημες γλώσσες, ενώ τα ανώτερα στρώματα ενδεχομένως αναζητούν άλλες προοπτικές, παραδείγματος χάρη την απόκτηση μιας πολυγλωσσίας με υψηλή αξία προστιθέμενη στο οικονομικό πεδίο.

Αν θεωρηθεί το θέμα της θνησιμότητας της διαλέκτου της ελληνικής κοινότητας της Αζοφικής υπό το πρίσμα του σύγχρονου μακροεπιπέδου που εκτέθηκε παραπάνω, προκύπτει ο προβληματισμός κατά πόσο είναι εφικτό να επιβιώσει μία γεωγραφική ποικιλία που δεν πρόλαβε να εποικοδομηθεί και να κωδικοποιηθεί, από τη στιγμή που αλλάζει η ισορροπία σε σχέση και με τις εθνικές επίσημες γλώσσες. Μ' αυτή την προβληματική ακόμα κι ο ρόλος της Κοινής Νεοελληνικής στην περιοχή μπορεί κάλλιστα να κλονιστεί σε περίπτωση ευρωπαϊκού προσανατολισμού της Ουκρανίας ο οποίος θα καταστήσει απαραίτητη την εκμάθηση ισχυρότερων γλωσσών.

Θα μπορούσε να αναρωτηθεί κανείς γιατί να διατηρηθεί η διάλεκτος. Η απώλεια μιας γλώσσας δεν είναι η απώλεια μιας έννοιας αλλά είναι αυτό που συμβαίνει όταν οι άνθρωποι αλλάζουν συμπεριφορά και δεν μεταβιβάζουν τη γλώσσα τους στις επόμενες γενιές. Επιπλέον, μπορούμε να δούμε το φαινόμενο με τον οικολογικό του χαρακτήρα, εστιάζοντας στις σχέσεις των ανθρώπων μεταξύ τους και με το περιβάλλον, στις σκέψεις και τα αισθήματά τους. Σύμφωνα με τον Crystal (2000:27) χρειαζόμαστε τη διαφορετικότητα και την ποικιλότητα, γιατί οι γλώσσες εκφράζουν ταυτότητα, είναι αποθήκες της ιστορίας, συνεισφέρουν στο σύνολο της ανθρώπινης γνώσης, είναι ενδιαφέρουσες από μόνες τους. Εξάλλου η γλώσσα σχετίζεται με το συναίσθημα και η συνείδηση συνδέεται τόσο με διανοητικές, όσο και με συναισθηματικές διαδικασίες (Van Lier, 1996: 83).

Ο Ashla A. στον επίλογο της ηχογραφημένης ποιητικής ανθολογίας του (2003: 40-41) επισημαίνει ότι *«στις πολύτομες ιστορίες της νεοελληνικής λογοτεχνίας και στις ελληνικές εγκυκλοπαίδειες δεν αναφέρεται κανένας Ρωμαίος ποιητής από τη Μαριούπολη»*. Είναι γεγονός πως η ελληνική κοινότητα της Αζοφικής έχει μελετηθεί ελάχιστα από τους επιστημονικούς φορείς της μητροπολιτικής Ελλάδας εθνογραφικά και γλωσσικά και θα ήταν καλό αυτό να γίνει το συντομότερο, όσο επιβιώνουν ακόμα η διάλεκτος και τα ιδιώματά της και τα ιδιαίτερα πολιτισμικά της χαρακτηριστικά, προκειμένου ο

ελληνισμός της Αζοφικής να πάρει τη θέση που του αρμόζει, ως ένα από τα κομμάτια του ευρύτερου ελληνισμού με το δικό του ιδιαίτερο χαρακτήρα που άντεξε μέσα στο χρόνο και τις μεταπτώσεις της ιστορίας.

ABSTRACT

This paper addresses the issue of multi-word compounds (and other noun-structures) in Greek proposing a semantic approach to the notion of lexical unit. For this purpose it employs the prototypical approach of Natural Morphology trying to establish a three-part continuum among lexical units (multi/one word(s) compounds), open-ended constructs or retronymy pairs (multi/one word(s) compounds) and phrases (e.g. stereotypical expressions, collocations and other syntactic phrases). A main proposal of this paper is a unifying approach to one(N/A+N)- and multi(A+N)- word compounds.

Λέξεις-κλειδιά: πολυλεκτικά σύνθετα, σειραϊκοί σχηματισμοί, υστερώνυμα, Φυσική Θεωρία, σημασιολογική προτυπική προσέγγιση.

1. Εισαγωγή

Τα τελευταία χρόνια έχει αναπτυχθεί έντονος προβληματισμός ως προς το διαχωρισμό μορφολογικών και συντακτικών πολυλεκτικών δομών ή δεσμευμένων και μη φράσεων (Mel'čuk 1998, Jackendoff 2008, Bybee 2010 κ.ά.), σε διάφορες γλώσσες, με κυρίαρχη τάση την ανάδειξη ενός συνεχούς, κάποιες φορές με τριμερείς ή τετραμερείς διακρίσεις, που περιέχουν μεταξύ άλλων και παγιωμένες, στερεότυπες φράσεις ή λεξικές συνάψεις (idioms, stereotypical expressions, collocations) είτε αφήνοντας, κατά την εκτίμησή μου, σε δεύτερη μοίρα τη βασική διαφοροποίηση μεταξύ φράσης / λέξης, δηλ. χωρίς αυστηρό έλεγχο αυτής καθ' εαυτής της λεξικής ενότητας, είτε προκρίνοντας γι' αυτήν τη διαφοροποίηση κυρίως συντακτικά / μορφολογικά κριτήρια² (Ράλλη 2005, 2007, Booij 2009 για την Ελληνική, Booij 2005, 2010, Lieber 2005, Gaeta / Ricca 2009). Για την Ελληνική, παλαιότερες μελέτες των Αναστασιάδη-Συμεωνίδη (1986) και Ράλλη / Σταύρου (1998) αναδεικνύουν, κατά τη γνώμη μας, εντονότερα το σημασιολογικό παράγοντα.

Αν και αναγνωρίζουμε τη σημασία των πιο πάνω διακρίσεων στη βάση ενός συνεχούς, στην παρούσα εργασία θα προσπαθήσουμε να επικεντρωθούμε στα κριτήρια της διάκρισης των ονοματικών δομών ως λέξης και μη λέξης (ή ως πολυλεκτικού συνθέτου και μη) ελέγχοντας όλα τα γλωσσικά επίπεδα, όπως -επιπλέον της μορφολογίας και σύνταξης- τα επίπεδα σημασίας και χρήσης, χωρίς να αναφερθούμε σε περαιτέρω κατηγοριοποιήσεις των υπολοίπων δομών, που δεν θεωρούνται λέξεις, όπως οι συνάψεις ή στερεότυπες φράσεις. Ειδικότερα για την ελληνική μορφολογία, η οποία δεν έχει σχεδόν απεριόριστη δυνατότητα παραγωγής μονολεκτικών συνθέτων, όπως π.χ. η Γερμανική, θεωρούμε σημαντικό να μην εγκαταλείψουμε το πρωτογενές ζητούμενο της οριοθέτησης της λεξικής ενότητας, παρά την αναγνώριση ενός συνεχούς.

Στη μελέτη μας ασχολούμαστε αποκλειστικά με ονοματικές δομές και πιο συγκεκριμένα με τη δομή E+O (για τα σύνθετα E/O+O), γιατί θεωρούμε ότι η λεπτομερειακή και κατ' ομάδες έρευνα του φαινομένου των υπό εξέταση φραστικών δομών, επιβάλλεται σε ένα τόσο απαιτητικό στην ανάλυσή του φαινόμενο. Στην παραπάνω δομή, άλλωστε, εντάσσονται και οι περισσότερες περιπτώσεις υστερωνυμίας (retronymy), στην οποία θα αναφερθούμε αμέσως μετά ως χαρακτηριστικής ομάδας ονοματικών δομών προς διερεύνηση.

¹ Ο τίτλος της παρούσας μελέτης είναι εν μέρει διαφοροποιημένος από τον τίτλο της ανακοίνωσης που παρουσίασα στο 10^ο Συνέδριο Ελληνικής Γλωσσολογίας, Σεπτέμβριος 2011, Κομοτηνή.

² Όλοι οι πιο πάνω ερευνητές αναγνωρίζουν τη σπουδαιότητα και των σημασιολογικών κριτηρίων (κυρίως η Ράλλη και οι Gaeta / Ricca), αλλά δεν φαίνεται να τα προτάσσουν ως αποφασιστικής σημασίας και να τα αναλύουν αρκετά διεξοδικά.

Κατ' αρχήν από την ανάλυσή μας αποκλείονται όλες οι φραστικές δομές, κυρίως ρηματικές, όπως «τα βάφω μαύρα», «πέφτω από τα σύννεφα» κ.ά. (πρβλ. Μπακάκου 2005, Βασιλειάδου 2007), οι οποίες δεν παρουσιάζουν παραγωγικότητα, συμφωνώντας με τη Ράλλη (2007: 225-226), ότι οι δομές πρέπει να εξετάζονται υπό το πρίσμα της ένταξής τους σε πολυλεκτικά σύνθετα (στο εξής ΠΣ) ή όχι, μόνο εάν, και εφόσον, είναι μέλη σχημάτων με έντονη παραγωγικότητα, όπως ακριβώς οι δομές E+O, O+O κλπ. (πρβλ. όμως Jackendoff 2008)³.

2. Παρουσίαση προηγούμενων προσεγγίσεων

Επειδή η ανάλυση πολυλεκτικών δομών, που παρουσιάζουν λεξική ενότητα, έχει συζητηθεί εκτενώς θα επιχειρήσω μια στοχοποιημένη ανασκόπηση προσεγγίσεων, που αφορούν κυρίως την Ελληνική:

Πρώτη στην Ελλάδα η Αναστασιάδη-Συμεωνίδη (1986) βασίζει την ανάλυση των φραστικών δομών και λεξικών φράσεων, ακολουθώντας εν μέρει τη Levi (1978) και άλλους, στη διαφορά ποιοτικού επιθέτου και ψευδοεπιθέτου, αφού συζητήσει καταρχάς φωνολογικά (και γραφής), μορφολογικά, συντακτικά και σημασιολογικά κριτήρια των *λεξικών φράσεων*, όπως αποκαλεί αυτές τις δομές.

Οι Ράλλη / Σταύρου (1998) επιχειρήσαν, επίσης, έναν πολύ καλό διαχωρισμό των φραστικών ενοτήτων με δομή E+O σε μορφολογικές ή συντακτικές δομές θέτοντας σε νέα βάση το είδος του επιθέτου ως κριτήριο: τα ιδιοσυγκρασιακά επίθετα δημιουργούν ΠΣ, ενώ τα ταξινομικά και σχεσιακά όχι (βλ. και Ράλλη 2007). Όρισαν μάλιστα πέντε, συντακτικά κυρίως, κριτήρια βασιζόμενες εν μέρει στα κριτήρια της Αναστασιάδη-Συμεωνίδη (1986).

Η Ράλλη (2007) (βλ. και 2005) ακολουθεί εν πολλοίς τις Ράλλη / Σταύρου 1998, δίνει όμως περισσότερη έμφαση στα συντακτικά (και μορφολογικά) κριτήρια και ονομάζει τις δομές που ανταποκρίνονται στα κριτήρια «χαλαρά πολυλεκτικά σύνθετα» (σελ. 221 κ.εξ.) σε αντιδιαστολή προς τις «φράσεις που μοιάζουν με χαλαρά πολυλεκτικά σύνθετα» (σελ. 240 κ.εξ.) και δεν ανταποκρίνονται στα κριτήρια.

Η Μπακάκου (2005) ακολουθώντας την άποψη για ένα συνεχές μεταξύ φράσεων και λέξεων περιλαμβάνει τη μελέτη των ΠΣ στη γενικότερη μελέτη των «στερεότυπων εκφράσεων», τις οποίες αντιδιαστέλλει προς τις «συνάψεις» προκρίνοντας το κριτήριο της «ενιαίας αναφοράς» και της «σταθερότητας στη μορφή» (σελ. 70).

Ο Booij (2005, 2010) στο πλαίσιο της Construction Grammar συζητάει σημαντικά ενδιάμεσα φαινόμενα, όπως κλιτικούς περιφραστικούς ρηματικούς τύπους, αλλά και τα χωριζόμενα ρήματα της Ολλανδικής και Γερμανικής, τα οποία παρουσιάζουν μεγάλο ενδιαφέρον όντας μεταξύ κλίσης και παραγωγής. Αναφερόμενος, όμως, ειδικότερα στην Ελληνική (Booij 2009) θεωρεί, ότι η ύπαρξη σαφούς και ολοκληρωμένης κλίσης στο εσωτερικό των ελληνικών φραστικών ενοτήτων τις τοποθετεί στην κατηγορία των συντακτικών δομών. Θεωρούμε, όμως, ότι και αυτό το κριτήριο δεν είναι απόλυτο, όταν στα συνδετικά της γερμανικής μονολεκτικής σύνθεσης υπάρχουν στοιχεία υποτυπώδους εσωτερικής κλίσης (π.χ. *Kindergarten*, *Berufsgenehmigung*), όπως και η αρχαιοελληνική λέξη *νικηφόρος* κ.ά (βλ. και Ράλλη 2007: 239, Ραυτοπούλου 2001: 165, πρβλ. Lieber 2005: 376). Αν και πρέπει να παραδεχθούμε ότι τα παραπάνω γερμανικά και αρχαιοελληνικά σύνθετα δεν έχουν τη συστηματικότητα εσωτερικής κλίσης που έχουν τα ΠΣ, θα δείξουμε πιο κάτω ότι άλλα κριτήρια, μη μορφολογικά, μπορούν να είναι εξίσου ή πιο ισχυρά για τον ορισμό της λεξικής ενότητας.

Η Lieber (2005: 377), μεταξύ άλλων, επανερχόμενη κάνει μια αναδρομή στο θέμα των ΠΣ, αν και όχι για την Ελληνική, και αναφέρεται στα γλωσσολογικά κριτήρια, που έχουν προταθεί κατά καιρούς (Marchand 1969, Levi 1978 κλπ.) Προκρίνει, τελικά, ότι καθοριστικό κριτήριο φαίνεται για την Αγγλική να είναι το αδιαχώριστο (**truck fast driver*), μεταξύ των στοιχείων της δομής. Όλα τα υπόλοιπα κριτήρια τα αμφισβητεί ή τα σχετικοποιεί παραθέτοντας αντιπαραδείγματα.

3. Ανάλυση δεδομένων με συντακτικά (μορφολογικά) κριτήρια

Προκειμένου να αναπτύξουμε τη δική μας συμβολή στο θέμα του διαχωρισμού των ΠΣ από άλλες ονοματικές δομές επιλέξαμε να χρησιμοποιήσουμε το φαινόμενο της υστερωνυμίας, θεωρώντας ότι παράγει πολλές νεολογικές δομές E+O, οι οποίες είναι σημαντικό να κατανοήσουμε αν πρόκειται για ΠΣ ή όχι και μάλιστα σε αντιδιαστολή τόσο με τα παραδείγματα (χαλαρών) ΠΣ vs. φραστικών

³ Για παραγωγικότητα φράσεων βλ. Jackendoff (2008), ο οποίος εξετάζει το παραγωγικό σχήμα *N by N* στις φράσεις *inch by inch* κλπ.

ενοτιτών (ή στερεότυπων φράσεων) της ελληνικής βιβλιογραφίας (Ράλλη 2005, 2007, Κολιοπούλου 2006, Βασιλειάδου 2007) όσο και με συγκεκριμένο τύπο μονολεκτικών συνθέτων σειραϊκού σχηματισμού (βλ. Χριστοφίδου 2001), που θα συζητήσουμε πιο κάτω. Το εξελισσόμενο φαινόμενο της υστερωνυμίας θεωρούμε ότι έχει ιδιαίτερο ενδιαφέρον για τη γλωσσολογική ανάλυση της ελληνικής λέξης, γιατί βρίσκεται στην αιχμή της δημιουργικής πλευράς της γλώσσας, αφού αυτό παίρνει μεγάλη έκταση λόγω της ταχύτατης εξέλιξης της τεχνολογίας, της επιστήμης και της κοινωνίας, καθώς και της διάχυσης παρόμοιων όρων στη γλωσσική κοινότητα. Εμείς παίρνουμε το φαινόμενο ως αιτία και αφορμή, για να ασχοληθούμε με τη μορφολογική-λεξιλογική διάσταση της υστερωνυμίας ενταγμένης στο πρόβλημα της διάκρισης των φραστικών δομών από τα ΠΣ γενικότερα.

Ως υστερωνυμία ορίζουμε το φαινόμενο ή τη διαδικασία που αφορά στην ανα-ονοματοδότηση ενός αντικειμένου αναφοράς, συνήθως με την πρόσθεση ενός προσδιοριστή στην προϋπάρχουσα ονομασία, με σκοπό την αντιδιαστολή της από την (συνήθως σύνθετη) ονομασία ενός νεοεμφανιζόμενου αντικειμένου αναφοράς. Παράδειγμα:

Α΄ Φάση: προϋπάρχει η λέξη *ταχυδρομείο* / Β΄ Φάση: εμφανίζεται η ονομασία *ηλεκτρονικό ταχυδρομείο* / Γ΄ Φάση: εμφανίζεται η ονομασία *συμβατικό ταχυδρομείο* με σκοπό την αντιστοίχηση του από το νέο σχηματισμό *ηλεκτρονικό ταχυδρομείο*.

Άλλες περιπτώσεις υστερωνυμίας⁴:

Υστερώνουμο⁵ Υποκινητής(ές) υστερωνόμου⁶

σταθερό τηλέφωνο

κινητό/ασύρματο τηλέφωνο

συμβατικά όπλα

πυρηνικά/ έξυπνα/χημικά όπλα

συμβατικός πόλεμος

πυρηνικός/ηλεκτρονικός/νομισματικός/χημικός...

Αμέσως πιο κάτω παραθέτουμε την εφαρμογή των κριτηρίων (Πάλλη / Σταύρου 1998, Πάλλη 2007: 226 κ.εξ.) στα υστερωνυμικά ζεύγη, δηλαδή:

- (1) όχι προσδιοριστικό στοιχείο στο επίθετο
- (2) όχι παρεμβολή
- (3) όχι αντιμετάθεση των όρων
- (4) όχι διπλό άρθρο
- (5) όχι κατηγορήση

Προς σύγκριση θα ελέγξουμε κάποια προτεινόμενα από τη Ράλλη (2005, 2007) -και από το κόρπους της Κολιοπούλου (2006), η οποία ακολουθεί τη Ράλλη (2005)- ως («χαλαρά») πολυλεκτικά σύνθετα (και μη), βάσει των ανωτέρω κριτηρίων. Στην πιο κάτω ανάλυση θα διαπιστώσουμε, ότι παρά το γεγονός ότι κάποιες δομές δίνονται ως («χαλαρά») ΠΣ από την Ράλλη 2007 βάσει των ανωτέρω κριτηρίων, εμείς διαφοροποιούμαστε ως προς την εφαρμογή των κριτηρίων. Οπότε βασιζόμενοι στο ομαδοποιημένο παράδειγμα των υστερωνομικών κατασκευών, θα προσπαθήσουμε να δείξουμε ότι τα μέχρι τώρα προτεινόμενα κριτήρια για τη λεξική ενότητα, ή όχι, των ΠΣ είναι καλό να σχετικοποιηθούν.

(1) Όχι προσδιοριστικό επιθέτου στα πολυλεκτικά σύνθετα.

Παρατηρούμε ότι τα υστερόνυμα (α) δέχονται την παρεμβολή του προσδιοριστικού. Κατά τη γνώμη μας, όμως, ενώ το (β) ακολουθεί το κριτήριο (1), οπότε είναι ΠΣ, τα επιπλέον προτεινόμενα ως («χαλαρά») ΠΣ στο (γ) από την Κολιοπούλου (2006) φαίνεται να μην ακολουθούν το κριτήριο (1), αφού δεν θεωρείται αντιγραμματική η προσθήκη του προσδιοριστικού του επιθέτου *έντονα* και *ιδιαίτερα* αντίστοιχα.

Μπορούμε να πούμε⁷:

α. αποκλειστικά θαλασσινό (ορυκτό) αλάτι

⁴ Με τον όρο *υστερωνυμία* αποδίδουμε τον αγγλικό όρο *retronymy* θεωρώντας ότι ο όρος εντάσσεται καλύτερα στο ευρύτερο σημασιολογικό σχήμα της υπερωνυμίας, υπωνυμίας αλλά και μερωνυμίας κλπ. Ο Ξυδόπουλος (2008: 164) αποδίδει τον ίδιο όρο με τη λέξη *παλαιωνυμία*, ενώ η Αναστασιάδη-Συμεωνίδη (2001), η οποία πρώτη ασχολήθηκε με το θέμα στην Ελληνική, ονομάζει το φαινόμενο *αναβαπτισμός* ακολουθώντας *γαλλική* ορολογία.

⁵ Για έμφαση στη σημασιολογική ανάλυση του φαινομένου της υστερωνομίας βλ. Αναστασιάδη-Συμεωνίδη (2001) και Ξυδούπουλος (2008).

⁶ Θεωρούμε ότι οι υποκινητές μπορεί να είναι πλέον του ενός.

⁷ Αν και δεν οργανώσαμε αντιστήριδο ερωτηματολόγιο, ελέγξαμε με αρκετούς μορφωμένους φυσικούς ομιλητές του περίγυρου το γλωσσικό μας αίσθημα. Επιπλέον, κατά την ανακοίνωση των παραδειγμάτων στο συνέδριο, δεν τοποθετήθηκε αντίθετα κανείς φυσικός ομιλητής από το ακροατήριο.

---ενώ δεν μπορούμε να πούμε:

- β. * αποκλειστικά παιδική χαρά⁸
* κυρίως ουράνιο τόξο

---αλλά μπορούμε να πούμε:

- γ. (ένα) έντονα λαϊκό αίσθημα
(έκανε) ιδιαίτερα χρυσές δουλειές

(2) Όχι παρεμβολή στα πολυλεκτικά σύνθετα

Το ίδιο συμβαίνει και με το κριτήριο (2), όπου αρκετές από τις δομές που δίνονται στη βιβλιογραφία (Ράλλη 2007) ως ΠΣ δεν φαίνεται να αντέχουν, τουλάχιστον όχι χωρίς αντιρρήσεις, στα κριτήρια (βλ. γ, δ, ε):

Μπορούμε να πούμε:

- α. Η φυσική (τεχνητή), όπως λέγεται, γλώσσα
Αυτή η ακουστική (ηλεκτρική), όπως όλοι βλέπετε, καθάρα
Τα συμβατικά (πυρηνικά), και μόνο/κυρίως, όπλα

---ενώ δεν μπορούμε να πούμε:

- β. *η παιδική κυρίως χαρά
*το ουράνιο κυρίως τόξο

---αλλά κάποια προτεινόμενα από Ράλλη (2007) ως ΠΣ δεν ανταποκρίνονται, κατά τη γνώμη μας στα κριτήρια:

- γ. Θέλω στεγνό μόνο καθάρισμα
Ένα στεγνό και πολύ προσεκτικό καθάρισμα είναι ό,τι χρειάζεται
Πρέπει να γίνει ένα στεγνό, πολύ προσεκτικό, καθάρισμα
- δ. Οι δημόσιοι, και μόνο, υπάλληλοι⁹
Οι δημόσιοι, κυρίως, υπάλληλοι
Ο τρίτος, κυρίως, κόσμος υποφέρει

---αντίθετα μας φαίνεται μάλλον αντιγραμματική η πιο κάτω πρόταση, αν και η Ράλλη που την παραθέτει (2007: 242), τη θεωρεί γραμματική, εξηγώντας (και) έτσι την μη ένταξη της δομής θεατρική κριτική στα ΠΣ:

- ε. ?Ασκεί μια θεατρική, ιδιαίτερα αυστηρή, κριτική

(3) Όχι διπλό άρθρο στα πολυλεκτικά σύνθετα¹⁰

Μπορούμε να πούμε:

- α. Το σταθερό το τηλέφωνο δε με βολεύει

---ενώ δεν μπορούμε να πούμε

- β. *η παιδική η χαρά δε μου αρέσει

---αλλά μπορούμε να παρεμβάλουμε άρθρο σε δομές που θεωρούνται ΠΣ από Ράλλη (2007):

- γ. Ο ψυχρός ο πόλεμος είναι χειρότερος
Η μικρή η οθόνη αποτελεί το πρόβλημα για τα παιδιά

---αντίθετα μας φαίνεται οριακά αντιγραμματική η πιο κάτω πρόταση, αν και η Ράλλη που την παραθέτει (2007: 243), τη θεωρεί γραμματική, εξηγώντας (και) έτσι την μη ένταξη της δομής θεατρική κριτική στα ΠΣ:

- δ. ?Η θεατρική η κριτική είναι ηπιότερη από την κινηματογραφική

⁸ Οι δομές που θεωρούμε εμείς ως ΠΣ υπογραμμίζονται προς διευκόλυνση, αν και κατά τη γνώμη μας δεν πληρούν πάντα τα κριτήρια.

⁹ Δομές όπως δημόσιος υπάλληλος μπορούν να θεωρηθούν ΠΣ λόγω επίσημης ονομασίας με πολύ συγκεκριμένο αντικείμενο αναφοράς (institutionalization), βλ. Hohenhaus (2005), παρά τη μη πλήρωση όλων των κριτηρίων.

¹⁰ Στα παραδείγματα (3) υπεισέρχεται περιβάλλον αντίστιξης, οπότε το κριτήριο γίνεται ασθενέστερο εκτός από το καθαρό ΠΣ παιδική χαρά (παραδείγμα β).

(4) Όχι αντιμετάθεση στα πολυλεκτικά σύνθετα

Μπορούμε να πούμε:

- α. Θέλω μια *κιθάρα (ακουστική) ηλεκτρική*, παρακαλώ
Ετοιμάζουν *όπλα πυρηνικά* εναντίον της Ν Κορέας

---ενώ δεν μπορούμε να πούμε:

- β. *Χαρά παιδική

---αλλά μπορούμε να κάνουμε αντιμετάθεση σε δομές που θεωρούνται ΠΣ:

- γ. Πόλεμος ψυχρός δεν θα ξαναγίνει
?Υπάλληλος δημόσιος δεν θα γίνεις

---*αντίθετα* μας φαίνεται οριακά αντιγραμματική η πιο κάτω πρόταση, αν και η Ράλλη που την παραθέτει (2007: 242), τη θεωρεί γραμματική, εξηγώντας (και) έτσι την απόφασή μας για μη ένταξη της δομής *θεατρική κριτική* στα ΠΣ:

?Κριτική θεατρική είναι καλό να υπάρχει

(5) Όχι κατηγορήση στα πολυλεκτικά σύνθετα (Ράλλη / Σταύρου 1998)

Μπορούμε να πούμε:

- α. Το *αλάτι* είναι *θαλασσινό*

---ενώ δεν μπορούμε να πούμε:

- β. *η χαρά είναι παιδική
*το διάταγμα είναι υπουργικό

---αλλά μπορούμε να κάνουμε οριακά κατηγορήση τόσο σε δομές που θεωρούνται ΠΣ:

?Ο πόλεμος αυτός είναι ψυχρός (διαφοροποίηση βάσει ταξινόμησης)

όσο και σε δομές που δεν θεωρούνται ΠΣ (Ράλλη 2007: 240-243):

η κριτική αυτή είναι θεατρική, όχι κινηματογραφική (διαφοροποίηση βάσει ταξινόμησης)

Την πιο πάνω σχετικοποίηση των συντακτικών κριτηρίων ακολουθεί και η σχετικοποίηση του μορφολογικού κριτηρίου της κατασκευής παραγώγων από ΠΣ, όπως π.χ. *δημοσιοϋπαλληλικός* (βλ. Ράλλη 2007: 233), αφού βλέπουμε ότι ενώ η παραγωγικότητα συνηγορεί υπέρ της λεξικής ιδιότητας, άλλα κριτήρια λειτουργούν αντίστροφα, όπως στο παράδειγμα *οι δημόσιοι, κυρίως, υπάλληλοι* κλπ. Άλλωστε ούτε αυτό το κριτήριο το θεωρούμε αποφασιστικό, επειδή παραγωγικές διαδικασίες ενεργοποιούνται και από φράσεις, όπως *ωχαδελφισμός, ετσιθελισμός* κλπ.

Γενικότερα, αν και συμφωνούμε με τη Ράλλη (2007) στην επιλογή και διάκριση των περισσότερων ΠΣ, θέλουμε να αναδείξουμε τη σχετικότητα των συντακτικών κριτηρίων, όταν μάλιστα αυτά αυτονομούνται από το κειμενικό περιβάλλον τους, για τις ανάγκες της ανάλυσης.

4. Σημασιολογική προσέγγιση

Βλέπουμε, λοιπόν, ότι τα προτεινόμενα συντακτικά και μορφολογικά κριτήρια, αν και είναι πολύ σημαντικά, δεν διασφαλίζουν ικανή ακρίβεια για το διαχωρισμό των δομών σε ΠΣ ή όχι, αφού το γλωσσικό αίσθημα των γλωσσολόγων (αλλά και άλλων φυσικών ομιλητών) φαίνεται να μην ταυτίζεται. Θα προσπαθήσουμε, λοιπόν, να ενεργοποιήσουμε και σημασιολογικά κριτήρια για την απόδοση λεξικής ενότητας σε κάποια ΠΣ βασιζόμενοι σε μια σημασιολογική, κυρίως, διαβάθμιση των φραστικών ενοτήτων με επικουρικό το ρόλο της σύνταξης. Οι λόγοι για τους οποίους επιλέγουμε να δώσουμε προτεραιότητα στη σημασιολογική ανάλυση είναι οι εξής:

- α) Εφόσον μια δομή παρουσιάζει εν μέρει στοιχεία ελεύθερης και εν μέρει δεσμευμένης φράσης τόσο σε επίπεδο μορφολογίας όσο και σύνταξης (βλ. Booiǵ 2009), θεωρούμε ασφαλέστερο να την αναλύσουμε βάσει ενός τρίτου επιπέδου ανάλυσης, όπως αυτού της σημασίας. Τα ΠΣ αποδεδειγμένα δεν καλύπτουν όλα τα μορφολογικά κριτήρια μιας λέξης, οπότε η ειδοποιός διαφορά θα πρέπει να αναζητηθεί σε άλλο επίπεδο.

β) Αφού η λέξη αντιπροσωπεύει μόνιμη (μη ad hoc) εννοιολογική, σε σημασιολογικό επίπεδο ενότητα, αυτό θα πρέπει να είναι και το αποφασιστικό κριτήριο για τη διάκρισή μας - ειδικότερα στην Ελληνική, που η μονολεκτική σύνθεση δεν είναι τόσο ανοιχτή και απεριόριστη όσο στην Αγγλική ή τη Γερμανική, οπότε και η έννοια της λέξης παραμένει πιο κλειστή.

γ) Σε επίπεδο χρήσης τα αποπλαισιωμένα τεστ αποδεκτότητας ακόμη και αν γίνουν με ερωτηματολόγια δεν είναι πραγματικά ασφαλή, λόγω της αποφασιστικής σημασίας του κειμενικού πλαισίου. Θεωρούμε ότι είναι πολύ σημαντικά ως επικουρικά και όχι ως αποφασιστικής σημασίας¹¹. Σημαντική βοήθεια μπορούν να προσφέρουν πολύ καλά οργανωμένα και αντιπροσωπευτικά σώματα κειμένων (βλ. και Halliday 2004, Ricca 2010), αλλά και αυτά αποτελούν πολύτιμο εργαλείο, τα αποτελέσματα του οποίου πρέπει να αξιοποιηθούν εκ νέου σε θεωρητικό επίπεδο ανάλυσης.

Για το σκοπό της σημασιολογικής προσέγγισης θα επανέλθω στη σημασιολογική διάκριση των Ράλλη / Σταύρου (1998), την οποία θεωρώ σημαντική, προτείνοντας, όμως, μια διαφορετική ανάλυση των σημασιολογικών κριτηρίων των ΠΣ βασισμένη, κυρίως, στη προσέγγιση της Φυσικής Θεωρίας (Dressler 1987, 2005). Η Φυσική Θεωρία προτείνει τις παραμέτρους της διαφάνειας, της εικονικότητας, της δεικτικότητας, της αμφι-μονοσημαντότητας και της προβολής καθώς και μία προτυπική περιγραφή των φαινομένων. Θα παρουσιάσουμε, λοιπόν, ένα προτυπικά οργανωμένο συνεχές, τόσο μεταξύ ΠΣ και φραστικών ενοτήτων, όσο και μεταξύ ομάδων μονολεκτικών και πολυλεκτικών συνθέτων, τα οποία παρουσιάζουν τα ίδια προτυπικά ή μη προτυπικά χαρακτηριστικά. Επιπλέον θεωρούμε αναγκαίο να ελέγξουμε σημασιολογικά τα ΠΣ όχι μόνο ως προς τον προσδιοριστή, αλλά και ως προς την κεφαλή και ως προς το σύνολο του συνθέτου.

Στην ανάλυσή μας επιλέγουμε να χρησιμοποιήσουμε την φυσική παράμετρο της σημασιολογικής διαφάνειας (semantic transparency) (βλ. και Christofidou 1997), για να διαλευκάνουμε, όσο γίνεται, τις βαθμίδες λεξικής ενιαιοποίησης μεταξύ των φραστικών ενοτήτων. Δευτερευόντως θα χρειαστούμε την παράμετρο της εικονικότητας (iconicity). Κατά τον Dressler (2005) η σημασιολογική διαφάνεια μεγάλωνει ευθέως ανάλογα τις πιθανότητες μιας λεκτικής δομής να εμφανισθεί. Από τη στιγμή, όμως, που παράγεται και υιοθετείται από τη γλωσσική κοινότητα, αρχίζει η λεξική ενιαιοποίηση και λεξικοποίηση, ειδικά αν υπάρχει μεταφορικότητα, δηλαδή σημασιολογική αδιαφάνεια. Βάσει της σημασιολογικής διαφάνειας, όπως την ορίζει η Φυσική Θεωρία, θα ελέγξουμε - ακολουθώντας τον αντίστροφο δρόμο από αυτόν της παραγωγής λέξεων - το βαθμό λεξικοποίησης των φραστικών δομών E+O. Προτυπικά, λοιπόν, οι καθιερωμένες λέξεις μιας γλώσσας είναι λεξικοποιημένες (δηλ. παρουσιάζουν από πλήρως αδιαφανή έως διαφανή αλλά κατηγοριακή και εξειδικευμένη σημασία¹²).

Προτυπικές ιδιότητες του συνθέτου E/O+O:

1. φωνολογική ενότητα (ένας βασικός τονισμός)
2. μορφολογική ενότητα δηλ. όχι εσωτερική κλίση αλλά σταθερή στην κεφαλή
3. (μερική / πλήρης) σημασιολογική αδιαφάνεια (εξειδίκευση, μεταφορική χρήση)
4. κατηγοριακή σχέση με τον προσδιοριστή (Kastovsky 2005)

Προτυπικές ιδιότητες της φράσης E+O:

1. όχι φωνολογική ενότητα
2. εσωτερική μορφολογική κλίση με πλήρη μορφοτακτική διαφάνεια
3. μερική / πλήρης σημασιολογική διαφάνεια (όχι εξειδίκευση)
4. ποιοτικός προσδιοριστής με κατηγορηματική (predicative) λειτουργία (βλ. και Kastovsky 2005)

Κατά τη Φυσική Θεωρία (βλ. και Rosch / Mervis 1975) οι ιδιότητες κάποιου μη προτυπικού φαινομένου μπορεί να είναι εν μέρει διαφορετικές από αυτές του προτυπικού μέλους. Σε αυτήν την περίπτωση μια δομή μπορεί να αποτελεί λέξη ως περισσότερο ή λιγότερο προτυπικό μέλος της κατηγορίας λέξη. Έτσι, όποτε δεν έχουμε φωνολογική / μορφολογική ενότητα μιας δομής, **τότε η αδιαφάνεια (που συνεπάγεται δέσμευση των μερών) ως κριτήριο λεξικής ενότητας καθίσταται μοναδικής και αποφασιστικής σημασίας**. Μπορεί, λοιπόν, η δομή των ΠΣ να μην αποτελεί προτυπική λέξη, γιατί η αλληλοδέσμευση δεν καλύπτει την εικονική παράμετρο της Φυσικής Θεωρίας, δηλαδή μία φωνολογικά και μορφολογικά ενιαία εικόνα για μια ενιαία έννοια, μπορεί όμως να

¹¹ Βλ. Lieber (2005) για αναφορά σε παρόμοια εγχειρήματα και την κριτική που ασκεί.

¹² Παραδείγματος χάριν *κατσιοκλέφτης* δεν είναι κάποιος που έκλεψε μια φορά μια κατσίκα, αλλά ο κατ' επανάληψιν κλέφτης.

αποτελεί μια λεξική ενότητα, αν και λιγότερο προτυπική, και αυτό να σηματοδοτείται από τη σημασιολογική δέσμευση και αλληλοεξάρτηση των μερών της δομής. Παραδείγματος χάριν στο ΠΣ *χρυσή τομή* υπάρχει η σημασιολογική δέσμευση της λέξης *χρυσός* με τη σημασία 'ακριβής', κάτι σπάνιο για την ελεύθερη χρήση της λέξης *χρυσός* σε άλλα λεξικά ή φραστικά περιβάλλοντα.

Προς υποστήριξη της προτυπικής διάστασης του υπό εξέταση φαινομένου θέλω να αναδείξω τη διαφαινόμενη αντιστοιχία, που μπορεί να πάρει η δομή προσδιοριστής (E/O) + κεφαλή (O) τόσο στις πολυλεκτικές δομές όσο και στα μονολεκτικά σύνθετα σε ένα συνεχές της διαδικασίας της σύνθεσης, με περισσότερο και λιγότερο προτυπικά μέλη. Άλλωστε θεωρούμε (βλ. Χριστοφίδου 2001: 104-111, Bybee 2001: 29-31, 2010), ότι και στα μονολεκτικά σύνθετα υπάρχουν κατασκευές, όπως π.χ. *μουλαροτόμαρο*, *ροδακινόφυλλο* κλπ. (βλ. Χριστοφίδου 2001: 109) για τις οποίες δεν μπορούμε να είμαστε σίγουροι, αν είναι αποθηκευμένες στο νοητικό λεξικό ως λέξεις ή παράγονται ad hoc λόγω υψηλής διαφάνειας αλλά και μη συχνής χρήσης (βλ. και Hohenhaus 2005). Η Ράλλη (2007: 232) αναδεικνύει επίσης κοινά σημεία μεταξύ μονολεκτικών συνθέτων και ΠΣ, όπως οι πιο χαλαρές και λιγότερο χαλαρές δομές, και στα μονολεκτικά σύνθετα, όπως παραδείγματος χάριν στην περίπτωση των μονολεκτικών συνθέτων (σελ. 65-66) *πηγαινοέρχομαι* (περίπτωση παρατακτικών) αλλά και *παλιοάνθρωπος* (περίπτωση προσδιοριστικού συνθέτου). Εμείς θα προσπαθήσουμε να ομαδοποιήσουμε και να αναδείξουμε τις αντιστοιχίες βάσει σημασιολογικών κυρίως ομοιοτήτων.

5. Σημασιολογική ανάλυση

Όπως είπαμε προτυπικά τα σύνθετα σε σχέση με τις φράσεις είναι περισσότερο ονοματικά και κατηγοριακά (categorical), αλλά λιγότερο κατηγορηματικά (predicative) από τη φράση στη λειτουργία τους. Παραδείγματος χάριν:

τυφλοπόντικας ≠ τυφλό ποντίκι
καλόγερος ≠ καλός γέρος

Φυσικά, αυτό συνδέεται με το βαθμό διαφάνειας των μερών, τα οποία με τη σειρά τους καθορίζουν τη συνθετότητα της σημασίας (compositionality principle) κατά τη γνωστή αρχή του Frege¹³. Ως διαφανή¹⁴ ορίζουμε την παραδειγματικά συμβατικοποιημένη (αποπλαισιωμένη) σημασία του συνθετικού ενός συνθέτου ή ενός μέρους μιας φράσης. Τη σημασία, δηλαδή, που το συνθετικό έχει ακόμη και στην περίπτωση που αυτό εμφανίζεται είτε ως απλή μεμονωμένη λέξη είτε ως μέρος κάποιας φράσης.

Ως προς τις πολυλεκτικές δομές διακρίνουμε:

Α. Δομές που ενέχουν ποιοτικό επίθετο ως προσδιοριστή (αφορούν στερεότυπες) φράσεις αλλά όχι ΠΣ):

ωραίος άνθρωπος
πιο ωραίος άνθρωπος (ποιοτικός προσδιοριστής)
ακόμη και στη περίπτωση που είναι μεταφορικό και στερεότυπο, π.χ.
καθαρό μυαλό
πιο καθαρό μυαλό (ποιοτικός προσδιοριστής)

Ως γνωστόν μία μεταφορά μπορεί να είναι συμβατικοποιημένη εντός του λεξιλογίου μιας γλώσσας. Στην περίπτωση όμως που υπάρχει μεταφορική χρήση πρέπει αυτή να είναι διαφανής, οπότε και παραδειγματικά συμβατικοποιημένη στο ελληνικό λεξιλόγιο, όπως η αφηρημένη σημασία του επιθέτου *καθαρός*. Παραδείγματος χάριν εκτός από τη φράση *καθαρό μυαλό* υπάρχει παρόμοια χρήση του *καθαρός* και στις φράσεις *καθαρές κουβέντες*, *καθαρή εξήγηση* κλπ., οπότε η δομή *καθαρό μυαλό* μπορεί να θεωρηθεί στερεότυπη φράση αλλά όχι ΠΣ (πρβλ. την ανάλυση του ΠΣ *χρυσή τομή* ανωτέρω, ενότητα 4.).

¹³ Βλ. και Bybee (2010: 44) για «analyzability» vs. «compositionality» κατά Langacker (1987).

¹⁴ Η συγκεκριμένη χρήση της έννοιας της διαφάνειας εναπόκειται σε αυτή τη μελέτη στο γλωσσικό αισθητήριο, αν και γνωρίζουμε ότι είναι σημαντικό να μετρηθεί και βάσει σωμάτων κειμένων.

Β. Δομές που δεν έχουν ποιοτικό επίθετο ως προσδιοριστή και χωρίζονται σε 2 ομάδες (I, II):

I. Μη ποιοτικοί, μη υποκατηγοριακοί προσδιοριστές (→ αδιαφανή, προτυπικά σύνθετα και ΠΣ):

1. Μη συμβατική (συνήθως μεταφορική) σημασία της κεφαλής

α. μη συμβατική σημασία κεφαλής χωρίς κυριολεκτικό συνώνυμο

παιδική χαρά (δεν είναι χαρά)

* *πιο παιδική χαρά* (όχι ποιοτικός προσδιοριστής)

ουράνιο τόξο (δεν είναι τόξο)

* *πιο ουράνιο τόξο* (όχι ποιοτικός προσδιοριστής)

β. μη συμβατική σημασία κεφαλής με κυριολεκτικό συνώνυμο

μαύρος χρυσός (δεν είναι χρυσός) - συνώνυμο: *πετρέλαιο*

* *πιο μαύρος χρυσός* (όχι ποιοτικός προσδιοριστής)

πρβλ. μονολεκτικά σύνθετα:

αγιόκλημα (δεν είναι κλήμα)

καλόγερος (δεν είναι γέρος)

2. Μη συμβατική (συνήθως μεταφορική) σημασία του προσδιοριστή

μαύρη λίστα (είναι λίστα αλλά δεν είναι μαύρη)

* *πιο μαύρη λίστα* (όχι ποιοτικός προσδιοριστής)

λαϊκή αγορά (είναι αγορά αλλά δεν είναι λαϊκή)

* *πιο λαϊκή αγορά* (όχι ποιοτικός προσδιοριστής)

βαθύ κράτος (είναι κράτος αλλά δεν είναι βαθύ)

* /? *πιο βαθύ κράτος* (όχι? ποιοτικός προσδιοριστής)

---αλλά

Πιο μαύρη κωμωδία δεν έχω δει (εδώ η χρήση του *μαύρος* είναι συμβατική με την έννοια του 'μακάβριος', οπότε το επίθετο μπορεί να θεωρηθεί ποιοτικό¹⁵).

πρβλ. μονολεκτικά σύνθετα

λυκόσκυλο (είναι ένας σκύλος –όχι όμως λύκος)

νυχτολούλουδο (είναι ένα λουλούδι/φυτό – όχι όμως νυχτερινό)

Βλέπουμε ότι κοινό γνώρισμα των πιο πάνω περιπτώσεων της ομάδας **Β** που αποτελείται, σύμφωνα με τη θέση μας, από ΠΣ (σε αντιδιαστολή με την ομάδα **Α**) είναι ότι η σημασία των μερών καθορίζεται μόνο εντός της συγκεκριμένης σύνθεσης και δεν ταυτίζεται με την (έστω και μεταφορική) σημασία τους, όταν αυτά εμφανίζονται στο λόγο ως αυτόνομες λέξεις ή παραδειγματικά σε παρόμοιες δομές. Αυτή επομένως η σημασία δεν είναι ποιοτική αλλά κατηγοριακή: αλλάζει το σύνθετο στο σύνολό του, δεν προσδίδει μια (εφήμερη) ποιότητα/αξιολόγηση - όπως στις φράσεις *ωραίος σκύλος* ή *ωραίο λουλούδι* - ή μια υποκατηγοριοποίηση σε μια αναλλοίωτη σημασιολογικά κεφαλή (π.χ. *αιολική ενέργεια*), όπως θα δούμε αμέσως πιο κάτω.

II. Μη ποιοτικοί αλλά υποκατηγοριακοί¹⁶ προσδιοριστές (→ διαφανείς, συνήθως σειραϊκές, δομές και μη προτυπικά σύνθετα)

θεατρική / μουσική / κινηματογραφική ... κριτική

θεματικό / αιολικό / πολιτιστικό ... πάρκο

πράσινη / αιολική / ηλιακή / θερμική / πυρηνική / ατομική / κυματική ... ενέργεια

¹⁵ Το επίθετο *μαύρος* σημαίνει σε πολλά περιβάλλοντα 'μακάβριος', όπως *μαύρο χιούμορ* κλπ., οπότε η εδώ χρήση του είναι συμβατικοποιημένη. Αντίθετα το επίθετο *μαύρος* στο ΠΣ *μαύρη λίστα* σημαίνει 'με αρνητικές συνέπειες', σημασία όχι ιδιαίτερα συμβατική, όπως 'μαύρο=καταψήφιση', 'μαύρος=απαισιόδοξος' κλπ.

¹⁶ Προτιμούμε τον όρο «υποκατηγοριακοί» αντί «ταξινομικοί ή/και σχεσιακοί» (Ράλλη / Σταύρου 1998). Αλλιώςτε η ταξινόμηση ενέχει πιο κατηγοριακό χαρακτήρα από ό,τι η σχέση υποκατηγοριοποίησης, που, κατά τη γνώμη μας, δίνει πιο προαιρετικό χαρακτήρα στον προσδιοριστή.

πρβλ. υστερωνυμικά ζεύγη:

συμβατικός / νομισματικός / πυρηνικός / εξοπλιστικός **πόλεμος**
συμβατικά / χημικά / πυρηνικά **όπλα**

πρβλ. μονολεκτικά σύνθετα:

δαφνό-/γιασεμό-/κρινό-/ροδό-/τριανταφυλλό-/γαρυφαλό-/μεντό-/κανελό-/καρυδό-/
αμυγδαλό-/χαμομηλό-/λιναρό-/μπαμπακό-**λαδο** (αντίστοιχα καρυδ-/αμυγδαλ-**έλαιο**
κλπ.)
μυρό-/κισσό-/κιτρό-/πρασό-/μυρτό-/μολοχό-/πατατό-/λωτό-**φυλλο**
μουλαρο-/γίδο-/λαγο-/αλογο-/αγελαδο-/βοϊδο-/φιδο-/αρκουδο-/κατσικο-/λυκο-
/βουβαλο-/καμηλο-/σκυλο-/αρνο-/γουρουνό-/αλεπο-/γαϊδουρο-/λιονταρο-**τόμαρο**
πρασό-/σπανακό-/ζαμπονό-/τυρό-**πιτά**¹⁷

Στα πιο πάνω παραδείγματα η διαφάνεια των μερών, η οποία βασίζεται στην συμβατικότητα της σημασίας -και σε παραδειγματικό επίπεδο- είναι σαφώς μεγαλύτερη, άρα οι πιο πάνω δομές, **είτε πολυλεκτικές είτε μονολεκτικές**, αποτελούν μη προτυπικά σύνθετα, αφού ο υποκατηγοριακός προσδιοριστής δεν μεταβάλλει καθόλου τη συμβατική σημασία της κεφαλής, απλώς την εξειδικεύει και μάλιστα με ιδιαίτερα διαφανή και συστηματικό τρόπο (βλ. και Χριστοφίδου 2001: 109). Τα πιο πάνω μη προτυπικά μονολεκτικά σύνθετα είναι διαφανή, και καθόλου ιδιοσυγκρασιακά, γιατί ανήκουν σε ένα βασικό παραγωγικό σχήμα (schema) επαναλαμβανόμενων δεύτερων συνθετικών με εναλλαγή μόνο των πρώτων συνθετικών, βάσει του οποίου διατηρείται ακριβώς η σημασία τόσο του β' συνθετικού, όσο και της σημασίας παραγωγής (word formation meaning) διαφανής και αμετάβλητη. Άλλωστε η Bybee (2010: 36) θεωρεί ότι αυτή ακριβώς η βασική ιδιότητα χαρακτηρίζει τις πολυλεκτικές κατασκευές (constructions).

Όπως έχουμε υποστηρίξει και το 2001, τα προαναφερθέντα σειραϊκά σύνθετα δεν αποτελούν προτυπικά (μονολεκτικά) σύνθετα, δηλαδή προτυπικές λέξεις, γιατί η σημασία των μερών διατηρείται σταθερή μέσα σε ένα ανοιχτό παραγωγικό σχήμα, με σχεδόν μηδενικό βαθμό λεξικοποίησης. Δηλαδή, η σημασία παραγωγής (word formation meaning) είναι σταθερή και ιδιαίτερα διαφανής εντός του σχήματος με σταθερό β' συνθετικό και με α' συνθετικό, το οποίο ανήκει στην ίδια λεξική τάξη με όλα τα άλλα α' συνθετικά της σειράς / σχήματος (βλ. Χριστοφίδου 2001¹⁸, πρβλ. Jackendoff 2008 και Gaeta / Ricca 2009¹⁹) και δεν τροποποιεί τη σημασία του εντός του συνθέτου.

Μπορούμε, τώρα, να δούμε μια αντιστοιχία με πολλά κοινά σημεία μεταξύ των πολυλεκτικών δομών με υποκατηγοριακά επίθετα από τη μία -εκ των οποίων πολλά είναι και υστερωνυμικά ζεύγη- και των μονολεκτικών συνθέτων με υποκατηγοριακούς προσδιοριστές ανοιχτής σειραϊκής παραγωγής από την άλλη²⁰.

Πιστεύουμε ότι η αντιστοιχία είναι προφανής. Υπάρχουν έννοιες που δημιουργούν παραγωγικές σειρές, γιατί είναι κεντρικές και επιδέχονται πολλαπλές κατηγοριοποιήσεις, οπότε λειτουργούν ως βάση για πολλά σειραϊκά (άλλα συχνότερα-άλλα όχι) σύνθετα, αλλά και φραστικές ενότητες, οι οποίες πολύ δύσκολα μπορούν να θεωρηθούν ΠΣ. Σε κάποια σύνθετα αυτής της ομάδας υποκατηγοριακών δομών θα μπορούσαμε να αποδόσουμε στάτους λέξης κυρίως κατόπιν μετρήσεων χρήσης σε κόρπους ή βάσει πραγματολογικής χρήσης και αναγκαιότητας (βλ. *κληματόφυλλο* vs. *πρασόφυλλο*, *κισσόφυλλο* και *χαμομηλέλαιο* vs. *ηλιέλαιο*). Στο πλαίσιο του σχετικού λεξικού της Bybee (2001, 2010²¹) επισημαίνω ότι σε ένα χωριό το *δαφνόλαδο* μπορεί να έχει στάτους λέξης (ενώ για άλλους όχι), όπως σε ένα ενεργειακό κέντρο η *αιολική ενέργεια* έχει ίσως στάτους λέξης ενώ αλλού όχι.

¹⁷ Λέξεις από το *Αντίστροφο Λεξικό* της Αναστασιάδη-Συμεωνίδη.

¹⁸ Βλ. και τα αποτελέσματα του ειδικού ερωτηματολογίου που διεξήχθη (Χριστοφίδου 2001:112-114) και συνηγορεί υπέρ της μη προτυπικής λεξικής υπόστασης των σειραϊκών κατασκευών. Οι σειραϊκές κατασκευές με το αμφίβολο λεξικό στάτους αφορούν εξίσου παράγωγα (σελ. 94 κ.εξ.) και σύνθετα, απλώς στη συγκεκριμένη μελέτη αφορούν τα σύνθετα.

¹⁹ Η άποψή μας διαφοροποιείται αρκετά από την πρόταση τους για τις δομές (+μορφολογικό / -λεξικό), που αποτελεί την τρίτη από τις τέσσερις κατηγορίες δομών που προτείνουν, καθώς και από τη συνολική προσέγγιση και επιλογή της μορφολογίας ως καθοριστικό κριτήριο.

²⁰ Ίσως είναι ενδεικτικό ότι αυτές οι δομές (υστερωνυμικές-πολυλεκτικές και σειραϊκές-μονολεκτικές) περιγράφονται στα λεξικά κάτω από το λήμμα της κεφαλής και όχι του προσδιοριστή.

²¹ Η Bybee (2010) μάλιστα υποστηρίζει ότι όσο πιο συχνά το σύνθετο χρησιμοποιείται σε περιβάλλοντα που δεν μπορεί να χρησιμοποιηθεί η βάση, τόσο το σύνθετο αυτονομείται (σελ. 47-48). Σε αυτή την περίπτωση στην Ελληνική πολλά δεν παραμένουν ΠΣ αλλά ουσιαστικοποιούνται π.χ. *το σταθερό (τηλέφωνο)*, *το σχολικό* κλπ.

Στο φαινόμενο της υστερωνυμίας φαίνεται μάλιστα ιδιαίτερα καθαρά και η σχετικότητα της πολυλεκτικής ονομασίας μιας έννοιας, αφού αυτή είναι παροδική, μια και τις πιο πολλές φορές ουσιαστικοποιείται το επίθετο του υποκινήτη (π.χ. *το κινητό (τηλέφωνο)*) ή και του υστερωνύμου (*το σταθερό*) ή τελικά καθιερώνεται η δάνεια λέξη (π.χ. *e-mail* για το ηλεκτρονικό ταχυδρομείο και *ταχυδρομείο* για το συμβατικό).

6. Συμπεράσματα

Θεωρούμε ότι παράλληλα με την επίκαιρη προσπάθεια για διάκριση μεταξύ συνάψεων και στερεότυπων ή ιδιοματισμών και της τάσης για ανάδειξη μη στεγανών στη γλώσσα και στους μηχανισμούς της, δεν πρέπει να χαθεί η διάκριση μεταξύ μονολεκτικών και πολυλεκτικών συνθέτων από τη μια και φράσεων (στερεότυπων ή ελεύθερων) από την άλλη, αφού η λεξική ενότητα, μονολεκτική ή όχι, παραμένει ισχυρή στην Ελληνική.

Θεωρώντας ότι στην πράξη τα συντακτικά κριτήρια δεν είναι όσο χρειάζεται επαρκή για τη διάκριση των δομών E+O σε ΠΣ ή όχι, προτείνω να προηγείται αυτών μια ενδεδειγμένη σημασιολογική εξέταση και των δύο μερών της δομής, βάσει της οποίας θα γίνεται και η ένταξή τους σε ΠΣ ή όχι. Ως αποτέλεσμα της προηγηθείσας ανάλυσης προτείνουμε την πιο κάτω προτυπική ιεράρχηση των δομών E+O ή E/O+O ξεκινώντας από τα πιο προτυπικά μέλη (με ερωτηματικό τα μη προτυπικά μέλη):

Σύνθετα

Μονολεκτικά, μη σειραϊκά σύνθετα, π.χ.
καλόγερος (βάσει σημασίας και μορφολογίας)

Πολυλεκτικά σύνθετα με αδιαφανή (μη συμβατική) σημασία σε προσδιοριστή ή/και κεφαλή, π.χ.
παιδική χαρά (βάσει δεσμευμένης σημασίας)

Σειραϊκές (ανοιχτές) κατασκευές (καθοριστική η χρήση και το περιβάλλον – απαραίτητη βοήθεια σωμάτων κειμένων)

Μονολεκτικά, σειραϊκά σύνθετα, π.χ.
χαμομηλέλαιο (βάσει μορφολογίας και χρήσης, πρβλ. σύνθετο *ηλιέλαιο*)

Πολυλεκτικές δομές με υποκατηγοριακό προσδιοριστή, π.χ.
? θεατρική κριτική
? κινηματογραφική κριτική

Υποκατηγοριακές πολυλεκτικές δομές, όπως οι υστερωνυμικές ομάδες, π.χ.
?πυρηνικά / συμβατικά όπλα (οριακή, μη προτυπική ένταξη στην κατηγορία λόγω μεταβατικής φάσης, ουσιαστικοποιήσεων κλπ.)

Φράσεις (ελεύθερες ή στερεότυπες)

Δομές με ποιοτικό (μεταφορικό ή όχι) προσδιοριστή, π.χ.
ωραίος άνθρωπος
έξυπνο παιδί
αλλά και
καθαρό μυαλό (λόγω ποιοτικού επιθέτου)

Στηρίξαμε την ανάλυσή μας στην έννοια των προτυπικών διαβαθμίσεων της Φυσικής Θεωρίας, βάσει της οποίας προτείνω μια πιο ενιαία αντιμετώπιση των O+O μονολεκτικών συνθέτων και των E+O ΠΣ. Προτείνουμε τη μη κατ' αρχήν κατάταξη των υποκατηγοριακών δομών - τα οποία περιέχουν και τα υστερώνυμα με τους υποκινήτες - στα ΠΣ, αλλά και την αντιστοίχισή τους με τα σειραϊκά μονολεκτικά σύνθετα. Δηλαδή, θεωρούμε ότι και στα μονολεκτικά σύνθετα, που είναι υποκατηγοριακά, οπότε και σειραϊκά, υπάρχουν ad hoc χρήσεις με φραστικό χαρακτήρα παραγωγής λόγου και όχι λεξικής ανάκλησης. Σε μια ευρύτερη ανάλυση καθοριστική πρέπει να είναι η χρήση σωμάτων κειμένων.

Όλη η παρουσίαση, στην οποία, αναγνωρίζουμε, ετέθησαν πολλά θέματα και όχι όλα διεξοδικά, αποτελεί μια σύντομη προσέγγιση ενός αποφασιστικής σημασίας φαινομένου της Ελληνικής, αυτού των ΠΣ, το οποίο αξίζει ακόμη πολύ μελάνι - κυρίως ηλεκτρονικό.

DEIXIS IN INTERACTION: A MULTIMODAL APPROACH

Maria Koutsombogera

Institute for Language & Speech Processing / 'Athena' RC, Greece

mkouts@ilsp.athena-innovation.gr

ABSTRACT

This paper presents a corpus-based study of deictic non-verbal expressions produced by Greek television interview participants and their relation to the co-uttered speech. Deictic non-verbal expressions were extracted from a multimodally annotated multimedia corpus and they were studied in terms of typology, modalities employed, frequency, and distribution per participant. Furthermore, in order to identify the meaningful content they acquire, they were classified into categories according to their referent, expressed or not through speech, i.e. a concrete object, person or location or an abstract concept related to time and space.

1. Introduction

In face-to-face interaction speakers employ distinct modalities in order to communicate their message. Thus, the processing of information conveyed in all modalities (gestures, facial expressions and body posture) is important both to comprehension and production of language (Ekman & Friesen 1969, McNeill 1992, Kendon 2004). In order to study the interplay between speech and non-verbal expressions in its communicative dimension, a multimedia corpus consisting of Greek TV interviews was developed to include multimodal annotations; non-verbal modalities of hands, head, face and torso that contribute to the communication as well as the dialogue management during the interviews were identified and annotated with semiotic, semantic and pragmatic values.

Out of this rich collection of features we select to present the expressions annotated semiotically as deictic. Our goal is to (a) investigate the form and functions of deictic non-verbal expressions in an interactional context, as well as their relation with the co-uttered speech, (b) classify the non-verbal expressions according to their identified referents. For the purpose of this study we extracted all instances of gestures annotated as deictic, together with the words or phrases that are synchronized with them. Subsequently, we examine the typology of the deictic gestures, i.e. the specific forms that they may have. We then move on to the classification of the referents (e.g. self deixis, co-locutor deixis, location, time, presence or absence in the physical space, etc.) and their distribution in the data, to discover the reasons for which deixis is mostly employed. At the same time, we study the words that co-occur with the gestures to find out more about the lexical and grammatical properties that induce a deictic gesture. Finally, we examine whether the choice of the form or the trajectory of the gesture that the speakers make is determined by the respective referent category.

2. Non-verbal deixis

Deictic non-verbal expressions are mostly movements pointing to some direction with reference to concrete objects, persons or locations (present or virtual/ imaginary with regards to the physical space where an utterance takes place) or to abstract concepts related to time, space, or discourse structure. Their form does not convey semantic information itself, in contrast to other semiotic types such as the iconic ones. There are though several variations of deictic movements, i.e. in terms of the shape and the trajectory of a gesture, the direction of a gaze, etc. More importantly, they acquire meaningful content when linked to the actual referent which may or may not be expressed through speech. In this sense, they clarify the way through which the speakers refer to the surroundings.

Though deixis has been traditionally considered as the use of linguistic elements that contribute to locate entities in spatiotemporal, social and discoursal context (Lyons 1977, Marmaridou 2000,

Levinson 2006), non-verbal deixis provides access to the visible contextual information needed to understand an utterance.

Since deictic gestures, facial expressions and torso movements are a form of visible activity, their understanding and disambiguation require audio-visual information, i.e. they are dependent on both the linguistic and the extra linguistic information and context of the utterance. Non-verbal deixis has been studied within the broader context of multimodal communication and in parallel to other semiotic categories attributed to the various modalities (McNeill 1992, Kendon 2004). An efficient means to study the form and meaning of deictic non-verbal expressions is their observation through a corpus annotated with multimodal information. In this respect, non-verbal deixis has been co-investigated together with speech segments to discover their function and contribution content of the talk as well as to the turn taking system (Mondada 2007).

In principle, the classification in semiotic types follows Peirce's model of trichotomy of signs (1955) to icon, index and symbol, depending on the type of reference to the denoted object or entity. In this respect, an index is a sign that is linked to its object by an actual connection or real relation. When co-examined with language, an index is often related to a demonstrative word, though this is not always the case, as it will be explained in the following paragraphs.

3. Corpus description

The interview corpus examined is of approximately 170 minutes duration and it consists of 12 interviews. The structure is that of a typical two-person discussion program, i.e. an interviewer (host journalist) addresses questions to a guest (politicians, actors, TV personas) and the discussion follows an agenda which is predefined in either a strict or less controlled manner (Koutsombogera & Papageorgiou 2009). During the interview, the participants present their argumentation to the discussion topics and they elaborate on their opinions. In this context, they produce a multitude of non-verbal expressions co-uttered with speech.

In each interview, the audio signal has been transcribed¹ and the output has been further segmented and annotated in terms of dialogue acts² (Bunt et al. 2010). The video annotation³ deals with the labeling of the non-verbal expressions (facial, hand and torso movements) co-occurring with speech, at multiple levels: (a) identification and marking on the time axis, and assignment of (b) respective semiotic type, (c) turn management type (d) feedback type, (e) attitudes and emotions expressed (W3C 2008) and (f) semantic relations with speech (Poggi & Magno Caldognetto 1996). The levels and labels used in the annotation scheme are mainly inspired by the MUMIN coding scheme notation (Allwood et al. 2007), which was created for building annotated multimodal resources to study communicative phenomena in different situations and different cultural settings, and whose categories have been proven to be reliable. Both audio and visual signals as well as the tier-subtiers annotations are perfectly synchronized; the overall set of annotation levels is distinguished by speaker, and all the annotation metadata are integrated into xml files.

The goal of this corpus building process was to study the interplay between speech and non-verbal expressions in its communicative dimension. For the purposes of the present study we focus on non-verbal expressions semiotically annotated as deictic. All instances that were annotated semiotically as *deictic* have been extracted from the corpus, and were further analyzed according to the semantic properties they express and their coordination with co-occurrent words.

4. Non-verbal instantiations of deixis in the corpus

In the TV interview corpus of 170 minutes, 10K of non-verbal expressions were annotated. Non-verbal expressions are grouped under the main modality used, i.e. hands, head/face and torso. Table 1 (left) shows the distribution of the distinct modalities in the corpus. In general, the rate of the produced non-verbal expressions is the same in all cases, independently of the interview or the participant and, on average, a speaker produces 0.9 non verbal expressions per second.

Furthermore, 3.5% of the corpus instances, i.e. approximately 350 non-verbal expressions were semiotically labeled as *deictic*. Deixis is one of the five values employed to describe the semiotic

¹ Transcriber (<http://trans.sourceforge.net/>)

² General-purpose functions, as defined in the draft of ISO 24617-2

³ ELAN (<http://www.lat-mpi.eu/tools/elan/>)

properties of a non-verbal expression according to a Pierce-like model as included in the MUMIN coding scheme notation. The rest of the labels are related to rhythmic movements of the hands accompanying the speech (beats), to iconic and to symbolic (emblematic) expressions. A non-applicable (n/a) value was also employed for cases where there is no evident semiotic property carried by a non-verbal expression and it is attributed mostly to facial expressions and torso movements. The most frequent label attributed is the one of beats, followed by n/a, deixis, iconicity, and finally symbolic expressions, as presented in Table 1 (right).

Non-verbal expressions	%	Semiotic types	%
hands	54.5	beats	46.6
head-face	35.7	n/a	46.2
torso	9.8	deictic	3.5
		iconic	2.9
		symbolic	0.8

Table 1 Distribution of all non-verbal expressions attested in the interview corpus (left) and their attributed semiotic types (right)

Non-verbal expressions annotated semiotically as *deictic* have been extracted from the corpus together with the words or phrases that they synchronise with, and were further analyzed in terms of their typology and the deixis referent to discover pragmatic, lexical and grammatical properties inducing a deictic non-verbal expression.

The deictic function is performed by all modalities. Specifically, 85.4% of the deictic instantiations was attributed to gestures, i.e. movement of index fingers or extending arms with palms open pointing towards a referent. Subsequently, head movements and facial expressions appear in 10.3% of the cases; gaze direction as well as head tilting combined with eyebrow raising and ranging openness of the eyes are representative expressions of a referent indexing. Finally, torso movements may also have a deictic function (4.3%) and are usually performed by turning the torso towards the referent while always combined and synchronized with another modality. While examining the distribution of deictic non-verbal expressions per speaker group, we attested that the hosts perform relatively more expressions (60.5%) than the guests (39.5%); this difference however is not statistically significant.

Deictic non-verbal expressions	%
hands	85.4
head-face	10.3
torso	4.3
host	60.5
guest	39.5

Table 2 Distribution of deictic non-verbal expressions per modality and speaker group

5. Referents of deictic non-verbal expressions

Deictic non-verbal expressions acquire meaningful content when linked to the actual referent which may or may not be expressed through speech. Furthermore, the indexing of the referent may occur with or without the use of deictic words, i.e. deictic gestures that occur in both of the following examples: *από τα δημοσιεύματα **αυτά**⁴ # είναι απ'τα καλύτερα **κείμενα***. The typology of the deictic non-verbal expressions, that is, the forms they may have, were co-investigated together with the words or phrases synchronized with them. Next, we attempted to classify the referent types and their distribution in data to find out more about the reasons why deixis is employed by the speakers. We consider the deictic non-verbal expressions as egocentric, that is, the center of the deixis (origo) is the interview participant

⁴ Examples in Greek are extracted from the corpus transcription. Words that are synchronised with the deictic non-verbal expressions are in **bold**.

who holds the floor in any given moment. Thus, the center consists of the speaker at the time and place of the utterance and the respective non-verbal expressions. The identified types are summarised in Table 3 and presented in detail in the following paragraphs.

Deixis referents	%
Self-reference	29
Other-reference	25.8
Space	9.5
Hypertextuality	8.8
Time	7.5
Discourse	19.4

Table 3 Distribution of referents of deictic non-verbal expressions

5.1 Self-reference

In general, person deixis, expressed either verbally or non-verbally, is related to the grammatical persons included in the utterance, i.e. the speaker, the addressee, the audience of the interview and the entities mentioned in the content of the utterances.

Self-reference non-verbal expressions are performed by the participants who hold the floor at any time. It is represented by 29% of the overall deictic non-verbal expressions. Speakers use their index finger or an open palm pointing at themselves whenever they want to highlight speech content that is related to themselves or their professional and personal surroundings. A pattern attested is that of stressing the first person of the personal pronoun, while at the same time the hand moves towards the speaker's chest. According to Turk (2007), speakers employ this type of gestures not only for self reference purposes, but to distinguish themselves from a group and emphasize on their own experiences as well.

Movements of this type often synchronise with forms of the 1st person of the personal or possessive pronouns: *εγώ που σας μιλώ, ως υπουργός εγώ, και με γνώρισε, εξαιτίας της δικής μου θέσης, και να με έχει ανασχηματίσει εμένα, υπέρ του υπουργείου μου, τι λέμε όμως εμείς*, etc. As Greek is a pro-drop language, the pronoun may be omitted at times; still, the speakers clearly employ deictic movements to refer to themselves: *όταν μάλιστα θεωρούμαι, ξέρω ναι, το βλέπουμε, αυτά που ζούμε, σέβομαι την αντίθετη άποψη*, etc.

Moreover, use of the second or third person is quite often linked to self-reference deictic movements to serve the goals of generalisation or expression of collectivity: *τα οποία νιώθουν και οι πολίτες* (a group where the speaker belongs), *που νομίζεις εσύ σημαντικό, να βλαβείς εσύ* (you, i.e. anyone) etc.

Besides linking of deictic non-verbal expressions to morphological forms, there are other cases of self reference. Speakers indicate explicitly or implicitly that certain events they utter are somehow connected to themselves, either as direct experiences or as part of their personal and professional surroundings. For example, while a politician is talking about his wife addressing her by her name and not revealing his relationship to her, he makes a self-reference gesture while uttering “*η κυρία Χ μένει στο σπίτι της*”; he thus implies that there exists a connection between himself and that woman.

Deictic movements are also performed while the speaker talks about his/ her own actions: *όχι κατ' εντολήν κομματικής* (orders that the speaker gives as a representative of his party), *με την προσπάθεια που γίνεται* (from a speaker who is a minister), *προσωπικά, ως ένα είδος εκτόνωσης* (for the speaker himself), etc.

5.2 Other-reference

Assuming that the speaker is the deictic center, non-verbal deixis related to persons and performed to a direction other than the body of the speaker who holds the floor are considered as other-reference. This type of reference may take two forms, deixis towards the addressee as well as towards third parties, which – in a two-party discussion – are absent from the physical space of the interview.

5.2.1 Co-locutor deixis

Non-verbal modalities employed to express deixis of the addressee (13%) are usually synchronised with uttering the co-locutor's name and/or identity, or with forms of the second person of the personal pronoun: *θα σας δώσω μια συμβουλή, δικαίως εσείς, θα σας πω εσάς άπειρο, σας ερωτώ εσάς, η εναντίον σας διαμαρτυρία, σας δημιούργησε πρόβλημα αυτό;* etc. Co-locutor deixis is also synchronised with larger groups or organisations to which a speaker may belong or be related to, e.g. a pointing gesture towards the minister of public order performed while a speaker utters the phrase *από την αστυνομία της Θεσσαλονίκης*.

5.2.2 Third-party deixis

Non-verbal deixis to (well-known or not) persons who are not present in the physical space of the interview, but are involved in the argumentation or mentioned in the speech content occurs quite often (11.8%): *τα πιτσιρίκια στο σχολείο, άλλους καλλιτέχνες, από το ΠΑΣΟΚ και τη ΝΔ, ο Ρουσόπουλος ενεπλάκη στην υπόθεση, εναντίον ενός υπουργού, αντί να το πει η Ζαχαρέα, η Κριστιάν Αμανπούρ, ο διευθυντής το κανόνιζε, οι φίλοι μας, για τις γυναίκες συναδέλφους, με τον πρόεδρο του κοινοβουλίου, αν δεν πάρουν οι δάσκαλοι, οι αγρότες, όταν ακούω από την αξιωματική αντιπολίτευση, ο κυβερνητικός εκπρόσωπος, και του δημοσιογράφου,* etc. This type of movements is assumed to be used to serve purposes of stressing the agent who carries out an action or is responsible for a statement or an event.

5.3 Space deixis

Space deixis is related to the spatial locations relevant to an utterance. As it is also the case with person deixis, the locations may be either those of the speaker and addressee or those of persons or objects being referred to.

Speakers employ deictic non-verbal expressions to indicate the whereabouts of a specific location, which rarely coincides with the interview setting (e.g. *εδώ είναι ο χώρος, μ' αρέσει πολύ αυτό το πλατό, έχουν αυτό σα στούντιο, είμαστε εδώ, το Μίμη απέξω*). In fact, most of the locations mentioned are usually related to the topic of discussion; the speakers point vaguely sideways, while uttering names of cities, districts and places related to their opinions or experiences (e.g. *η Ιρλανδία δεν πάει καλά, της Κρήτης στο Ηράκλειο, στο Νέο Δελχί, εγώ ήμουν στις Βρυξέλλες, σχολείο στο Κερατσίνι, στην Καλαμαριά, μέχρι το Βαρδάρη, μεταξύ Βρυξελλών και Στρασβούργου, στην Κρήνη*), to locations of personal and professional activities uttered by the speaker: (e.g. *μας καταγγείλατε προχτές στη Βουλή, το δικαστήριο από την άλλη, αίθουσα της ολομέλειας*), or other locations (*στο ποτάμι*).

5.4 Hypertextuality

The annotated multimodal corpus includes non-verbal expressions making reference to texts the content of which is commented upon. The term hypertextuality is adopted to describe these cases where utterances within the discussion is linked to textual or audiovisual material within the physical space of the interview (e.g. books, pictures, reports in front of the speakers, studio displays). The deictic movements are used as a link to other texts beyond the interview text. This connection with other types of material is employed with the goal of either argumentation or information on a topic based on additional sources.

Speakers point towards these texts while uttering words such as: *αυτό που είναι συγκινητικό είναι, εδώ γράφει αγγλική φιλολογία, είναι ένα από τα καλύτερα κείμενα, υπάρχουν και αντιφάσεις μέσα στις καταθέσεις, αυτή η συνάντηση* (an event presented within the reports that the speaker has in front of him), *στον ίδιο ακριβώς χρόνο, βλέπω κάτι φωτογραφίες εδώ,* etc.

Moreover, speakers often point to displays located in the studio where the interview takes place, e.g. in cases of broadcast commentaries or event coverage related to the topic of the discussion: *έτσι λέτε, το 'πατε, θα επιμείνω στη δήλωση, όπως είπε και ο Χ, θέλω να τις δούμε, όπως είπε και ο συνδικαλιστής, από όλα αυτά τα οποία παίζαμε, έλεγε η τηλεόραση,* etc.

5.5 Temporal deixis

Non-verbal expressions related to temporal deixis are linked to aspects of time involved in the events included in the utterances. In this sense, deictic movements of temporal reference attested in the corpus are related mainly to the past. The trajectory and direction of the movements in question are usually backwards or sideways: *χτες κάναμε μια εκπομπή* (head, hands and torso move sideways), *όσο στην πρώτη τετραετία* (both hands move sideways), *το είπε ο κύριος πριν, μιας Κυριακής πριν από αρκετά χρόνια, γι' αυτό έβαλαν τη σύζυγό μου* (hand moves backwards), *το Δεκέμβρη τώρα* (hand moves backwards), etc. Reference to the present is more rare, e.g.: *και τώρα* (hand moves down).

5.6 Discourse deixis

Discourse deixis is used to indicate in an abstract manner the introduction of new topics in the interview. Specifically, new topics are considered as metaphoric images or locations to which the deictic movements point; they are employed by the speakers with the goal of presenting the co-locutors with a new material as a possible forthcoming topic of discussion, e.g. *πάμε τώρα να δούμε*.

Unlike its function with regards to the verbal content, non-verbal discourse deixis does not refer to parts of the discourse; if a speaker wishes to make reference to an utterance or a topic that has been previously mentioned, then the movements used are related to the time slot when the utterance or topic took place (i.e. the past) and not the topic itself, e.g. in the utterance *είπατε ότι [...]* the hand moves slightly backwards to make a temporal reference.

6. Patterns in deictic movements

Although there are variations in the intensity and form of deictic movements, it is possible to group together certain non-verbal expressions in the sense that their direction, when linked to specific speech content, could lead to the formulation of patterns. The most prominent example is that of the use of the index finger, the thumb or the whole palm pointing or moving backwards when referring to events or participants of events of the past.

Moreover, deictic movements to sideways indicate referents that are far from the speaker (e.g. either locations or persons not in the physical interview space). However, there was no evidence to support that the number of hands (single vs. both) used to perform this kind of gestures entails specific correlations to the speech equivalent. Finally, speakers often point down when accompanying a specific demonstrative word (e.g. *και αυτό με ρωτούσε, εκείνη η συνθήκη, αυτόν τον ξυλοδαρμό*) or adjectives and adverbs of spatiotemporal properties: *και τώρα, από το σημερινό πλαίσιο, είμαστε εδώ, τελευταίο επεισόδιο*.

7. Conclusions

The corpus-based study of deictic non-verbal expressions revealed that there are multiple ways through which deixis is performed, as well as multiple types of referents to which the deixis is addressed. A major contribution of the study of non-verbal deixis is its employment by speakers when there is no actual demonstrative word or what is considered as a traditional deictic expression, be it a temporal, spatial or discourse vocabulary. In fact, we believe that in order to come up with an as complete as possible framework for deixis interpretation, both verbal and non-verbal instantiations should be studied in their inter-relation and complementarity.

Furthermore, when it comes to communication, deixis can be a powerful means to interpret the dynamics of a given interaction. Specifically, both verbal and non-verbal signs deictic signs can account for social goals of the speakers; kinesic features of a deictic movement such as the proximity of a gesture to/ from a speaker or its direction, when expressed in parallel to the speech content, can be considered as devices that both unveil a speaker's intention and enable him/ her to achieve a social goal.

Our future goal is to provide elaborate evidence towards the development of an interpretation framework of deixis. Specifically, we plan to enrich our data with broader communicative instances of face-to face interaction in order to strengthen our findings regarding forms and variations of non-verbal deixis, as well as to further elaborate on the established categories of referents related to deictic movements.
